Temporary							

**ANALYSIS:** (Attach a separate page if necessary)

This legislation creates a new corporation to own and operate all or a portion of the Railbelt electric power generation and transmission (G&T) system. Under a phased transition, the new company will integrate the existing G&T assets presently owned by the Railbelt utilities and the Alaska Energy Authority (AEA). The company will also have the ability to construct new G&T infrastructure. AEA will develop a plan to allow the new corporation to assume ownership and/or control of its two existing AEA owned Railbelt G&T assets (the Bradley Lake Hydroelectric Project and the Alaska Intertie). The new corporation will ultimately have responsibility as an all-requirements supplier of wholesale power for the Railbelt.

Department of Commerce, Community and Economic Development

**FISCAL NOTE #1**

**STATE OF ALASKA  
2009 LEGISLATIVE SESSION**

**BILL NO. HB 182**

**ANALYSIS CONTINUATION**

AEA will provide basic support services to create the new corporation, assist its board members to begin the governance process, coordinate with Railbelt utilities to develop the corporation's bylaws, develop transition and financing plans, establish a detailed regulatory approach, and assist the new corporation in reporting these recommendations to the next legislative session.

AEA as program manager will provide services to form the new corporation, assist its board members to begin the governance process, coordinate with Railbelt utilities to develop the corporation's bylaws, develop transition and financing plans, establish a detailed regulatory approach, and assist the new corporation in reporting these recommendations to the next legislative session.

AEA's services will include procurement of professional and financial service as well as program management. AEA estimates its program services will be needed for a two year period. AEA will need one AIDEA employee for that period to manage this program.
