ANALYSIS: (Attach a separate page if necessary)

This bill requires DNR to convey title to 194,379 acres of specifically identified parcels of state land to the University of Alaska within two years of the effective date of the legislation. To satisfy the land conveyance proposed under this legislation, DNR will need to complete the conveyance process for these parcels, including a land title search, identify and reserve easements, identify and reserve navigable waters, and resolve any title conflicts. This will require some DMLW staff time to complete this research, finish the preparation of legal descriptions, prepare conveyance documents, and update the state's computerized records system. Because this effort was substantially completed by the department under the provisions of chapter 8, FSSLA 2005 prior to the State Supreme Court's invalidation of that statute, only a small amount of work remains to finalize the conveyances required under this bill.

FISCAL NOTE #2

STATE OF ALASKA
2010 LEGISLATIVE SESSION

BILL NO. HB 295

ANALYSIS CONTINUATION

(Analysis cont.)

Accordingly, DNR does not anticipate any additional funds or positions will be required, and the department can implement the intent of this proposed legislation using existing staff and resources.

This bill is intended to expedite the conveyance of state lands, including the mineral estate, to the University of Alaska by conveying to the Board of Regents by quitclaim deed to those state lands identified for conveyance to the University in a document entitled "University of Alaska Land Grant List 2005" dated January 12, 2005. This "Land Grant List" includes lands that make up part of the Nenana oil and gas basin.

***Based on the subsurface information currently available, the Nenana basin is thought to be gas-prone. DNR believes that the gas potential of this basin ranges from moderate to good. The basin is also in close proximity to markets in Fairbanks. Andex Resources currently has an oil and gas exploration license for part of the Nenana Basin. It is impossible without further exploration to predict the exact fiscal impacts. However, the conveyance of part of the Nenana oil and gas basin to the University of Alaska could result in a significant new source of revenue and /or energy for the University with a corresponding decrease in general and permanent fund revenues.

There is a similar but lesser impact from transferring the surface and subsurface from other lands that DNR would otherwise sell or lease. That is, the Department anticipates an unspecified decrease in future revenues from the loss of these lands.
