ANALYSIS: (Attach a separate page if necessary)

The Department of Environmental Conservation is tasked with consulting with the Department of Transportation & Public Facilities on the development of standards and operating procedures to allow the use of gravel or aggregate material that contains naturally occurring asbestos in transportation and public facilities construction projects. Estimated expenditures are based on existing staff participating in a total of six days of consultation meetings with Department of Transportation & Public Facilities (four meetings in year one, and two meetings in year two). It is assumed that two additional days of preparation will be required for each meeting day. Travel costs assume that the meetings are held in Juneau and that staff must travel to the meetings from Anchorage.
