FISCAL NOTE #1

**STATE OF ALASKA
2010 LEGISLATIVE SESSION**

BILL NO. CSHB 344(FSH)

ANALYSIS CONTINUATION

Bill Language:

This bill extends the existing Salmon Product Development tax credit for investment in processing equipment used to produce value-added salmon products by four years through 2015. The Salmon Product Development tax credit allows taxpayers to take a credit against their Fisheries Business Tax liability for 50% of qualified investment in new value-added salmon processing equipment. Credits may be applied up to 50% of the Fisheries Business Tax liability on salmon processed in Alaska in the year generated and the three subsequent years.

Revenues:

Although it is difficult to determine the number of taxpayers who would take advantage of this tax credit, the DOR would expect reduced Fisheries Business Tax collections in the years added. The department would expect the Fisheries Business Tax to decrease by \$2.4 million for each additional year the credit is extended.

Expenditures:

The provisions of this bill could be implemented with existing state resources. No additional personnel or resources would be needed, since the DOR is already performing these duties.
