Analysis

Bill Language:

This bill would allow a credit against corporate income tax of up to \$10,000,000 of 20% of qualified research and development expenditures that exceed the base amount incurred by a taxpayer for research and development conducted in Alaska. The base amount is the average qualified research and development expenditures attributable to Alaska for the three tax years immediately preceding the tax year for which the credit is claimed. For purposes of this bill, "qualified research and development" means qualified research as defined by the Internal Revenue Code. If the tax credit allowed exceeds the taxpayer's tax liability, the excess tax credit would be allowed to be carried forward for up to seven years.

This bill also provides that the department is required to complete an annual report disclosing the number of taxpayers receiving the credit, the total cumulative amount of credits granted to all taxpayers and the total cumulative number of employees conducting research and development in the state.

Revenues:

The department is unable to determine the amount of research and development credits which may be claimed by taxpayers as the department currently has no information about the amount of research and development conducted in the state. Therefore, the department has no basis with which to formulate an estimated effect on revenues.

Expenditures:

The department can implement the provisions of the bill with existing resources.
