FISCAL NOTE #4

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. CSHB 258(FIN)

Analysis

CSHB 258(FIN) directs Department of Transportation and Public Facilities to develop and implement standards for the use of gravel and other aggregate materials containing a defined level of naturally occurring asbestos as well as defining project areas where it may be economically unreasonable to use gravel and other materials that do not contain naturally occurring asbestos. The bill also provides immunity from suit to certain landowners and contractors who transport and use this material in the defined project areas, provided they have site specific plans concerning that use which are approved by Department of Transportation and Public Facilities in accordance with regulations promulgated by Department of Transportation and Public Facilities and after consultation with the Department of Health and Social Services, the Department of Natural Resources, the Department of Labor and Workforce Development and the Department of Law. The Department of Law will be tasked to assist in the drafting of a regulatory framework to carry out the provisions of CSHB 258(FIN).

The fiscal impact for the Department of Law will be zero.
