Analysis

Commercial Charter Fisheries Revolving Loan Fund - Administered by the Division of Economic Development, this loan fund and program would be substantially similar to the Commercial Fishing Loan Fund. Initial capitalization would be \$5 million. Operating expenses would be paid by the earnings of the fund, as is the case with other existing division loan funds. The cost projections that are provided include personal services for an Accounting Technician I position, located in Juneau, with initial first year set-up expenses (supplies and equipment, a projected "per employee" annual contractual services cost with all of these costs projected through 2017. In addition to these expenses, existing division staff would conduct several outreach trips to promote the program and prepare the necessary regulations.

Shellfish Mariculture Revolving Loan Fund - This loan program will assist shellfish mariculture businesses in purchasing equipment and seed necessary to develop and grow. Initial capitalization would be \$3 million. There are no anticipated additional operating costs for this loan fund.

Alaska Micro-loan Revolving Loan Fund - This loan program would provide short term, low interest loans to Alaska small businesses to be used for typical business purposes such as working capital, purchasing machinery, equipment and inventory and leasehold improvements. The initial capitalization would be \$3.5 million. All operating expenses would be paid from earnings of the fund. Projected operating expenses are: personal services for one flexed Loan Closer I/II, located in Juneau, with initial first year set-up expenses (supplies and equipment), a projected "per employee" annual contractual services cost, with all of these costs projected through 2017. In addition to these expenses, existing division staff would conduct several outreach trips to promote the program and prepare the necessary regulations.
