FISCAL NOTE #1

STATE OF ALASKA  
2012 LEGISLATIVE SESSION

BILL NO. CSSB 180(TRA)

**Analysis**

The proposed legislation intends to require the Alaska Department of Transportation and Public Facilities to establish standards and operating procedures in connection with public construction and maintenance projects to allow for the use of gravel or aggregate containing a limited amount of naturally occurring asbestos in a manner that avoids significant human health risks while mitigating significantly higher costs associated with using only gravel or aggregate that is 100 percent free of asbestos. The proposed legislation also intends to require users of gravel or aggregate containing a limited amount of naturally occurring asbestos to prepare project plans that demonstrate conformance with established standards and to shield providers of gravel or aggregate containing a limited amount of asbestos from liability under certain conditions.

There is no anticipated financial impact to the department as a result of this legislation. Existing resources would be used to provide consultative assistance to the Department of Transportation and Public Facilities in establishing and implementing standards for the use of aggregate or gravel that contains a limited amount of naturally occurring asbestos. Electronic means of communication will be utilized to avoid the need for travel.
