FISCAL NOTE ANALYSIS

STATE OF ALASKA
2015 LEGISLATIVE SESSION

Analysis

This bill proposes to modify how the Public School Trust fund is administered. Rather than distinguish between two funds, principal and income, whereby the income of the principal fund is moved to the income fund to support the state's public school program, the funds would be combined into one fund with a new POMV revenue calculation approach to determine funds available for the public school program. The POMV (percent of market value approach) proposed would identify 5% of the monthly average market value of the fund for the previous three fiscal years at June 30 as available for appropriation for use in supporting the state's public school program. No additional costs would be incurred by the Treasury as a result of the proposed bill.
