FISCAL NOTE ANALYSIS

STATE OF ALASKA
2017 LEGISLATIVE SESSION

Analysis

The proposed legislation establishes the ability to create environmental covenants for property with contamination remaining above cleanup levels. A covenant would restrict some activities from occurring on the property to avoid releasing the contamination but allow other uses to occur. It allows for transparency in real estate transactions and assurance to sellers that remaining contamination will be effectively managed. The Division currently maintains the contaminated sites database which contains deed notices. Environmental covenants will replace deed notices since they are sometimes lost as ownership turns over. The Division will modify this database to track environmental covenants with existing personnel resources. The database already has a public access webpage so there is no additional cost for adding a searchable element for environmental covenants. Staff already spend time creating and maintaining deed notices, and this effort will be replaced by similar effort to create and maintain environmental covenants. Increased personnel costs are not expected. Therefore, the department submits a zero fiscal note.
