FISCAL NOTE ANALYSIS

STATE OF ALASKA
2020 LEGISLATIVE SESSION**Analysis**

SB 194 would require a permit from the Department of Environmental Conservation for the installation of an advanced nuclear reactor in Alaska.

The Department does not have regulations in place or permitting staff assigned to oversee permits for advanced nuclear reactors, however the Department may be able to absorb the work within existing staff at the time the program is needed. The Department has been advised that the timeframe for these reactors coming to market is estimated at seven to ten years.
