FISCAL NOTE ANALYSIS

STATE OF ALASKA
2021 LEGISLATIVE SESSION**Analysis**

The Commercial Fisheries Division intends to utilize existing staff under the Aquaculture Section to administer the program proposed in this legislation. The Private Nonprofit Hatchery Permit Coordinator is the primary person responsible for evaluating these permit applications. Department of Fish and Game genetics, pathology, and management staff also contribute to the permit application review process. Permit application review generally takes six months to one year to complete. The department believes it can absorb the increase in work load with all existing resources.

The permit application fee for shellfish enhancement projects and new salmon private nonprofit hatcheries will be removed from statute. This will give the department the flexibility to set fees in regulation. This additional flexibility coupled with unknown industry interest in new projects is why the division is anticipating indeterminate revenue. However, the division can estimate two or three applications per year for the first two years and then a decline to an estimated one permit application per year.
