FISCAL NOTE ANALYSIS

STATE OF ALASKA
2022 LEGISLATIVE SESSION

Analysis

This bill mandates the creation of a new program focused on dementia awareness. It requires the development and implementation of specific strategies to ensure community engagement, the provision of educational materials, creation and maintenance of a list of providers who provide dementia services, coordination of community based activities, and implementation of a statewide comprehensive public awareness campaign in conjunction with stakeholders.

Effective public health campaigns require dedicated messaging and activities on focused objectives that can be measured to evaluate for effectiveness over time. They require the employment of a wide range of strategies, outreach, and communication approaches that connect with a vast array of audiences by translating complex medical information into digestible content that will resonate with the public. Campaigns should be geared to motivate and empower risk reduction behaviors and be considered and adopted.

Year 1 (FY2023) includes personal services costs for eight months (to account for the time to recruit and hire) for a full time Public Health Specialist II at a Step C. Travel will be needed for training and convening community partners and those with lived experience to develop a strategic plan to implement all aspects of the legislation. Services costs are for contracts for the implementation of public education campaigns; creation of educational materials for distribution; support for outreach activities; training of specific professionals to be able to identify those experiencing symptoms so they can more effectively work with them; and to maintain and publish annual data, information, resources, and other related information to a public-facing website that can be actively maintained. Commodities costs are for computer equipment for the new position.

Years 2 - 5 (FY2024-FY2028) include costs similar to those for year 1, except personal services and services costs will be for the full year and not prorated like they are for the first year. Also, the department will not need to purchase new computer equipment for each of these years.
