HOUSE BILL NO. 281

"An Act making appropriations for the operating and loan program expenses of state government and for certain programs; capitalizing funds; amending appropriations; making reappropriations; making supplemental appropriations; making appropriations under art. IX, sec. 17(c), Constitution of the State of Alaska, from the constitutional budget reserve fund; and providing for an effective date."

HOUSE BILL NO. 282

"An Act making appropriations for the operating and capital expenses of the state's integrated comprehensive mental health program; making capital appropriations and supplemental appropriations; and providing for an effective date."

[1:39:31 PM](#)

Co-Chair Merrick MOVED to ADOPT the proposed committee substitute for HB 281(FIN), Work Draft 32-GH2686\N (Marx, 03/03/22).

Co-Chair Foster OBJECTED for discussion. He invited his staff to present the changes reflected in the committee substitute.

[1:39:58 PM](#)

BRODIE ANDERSON, STAFF, REPRESENTATIVE NEAL FOSTER, reviewed the handouts in members packets. He looked at the document titled, "All Funds Agency Summaries" (copy on file). He read from a prepared statement:

Before the committee today is a Committee Substitute for House Bill 281 that reflects all of the actions of Subcommittees, and changes made to the Language section compared to the Committee Substitute introduced on January 27th, often referred to as CS 0.5, this committee substitute also includes ARPA Revenue Replacement, and some CSLFRF spending.

For FY23: the House Finance Committee Substitute Reflects a total of \$9,418,028.5 for Agency Operations, which is the more of the "day to day state government" a total budget of \$1,568,014.4 for

Statewide Items, which includes Debt Service, Retirement payments, Special Appropriations, and Fund Capitalizations.

These totals include the following funds

\$3,073,107.4 is federal -

\$871,369.2 in Designated General Funds or DGF

\$1,662,115.7 in other funds- these funds include the authorization of corporate receipts like AIDEA, AHFC, and Aerospace, Interagency receipts known as I/A and airport receipts and more.

And \$6,294,392.4 in Unrestricted General Funds

Compared to Adjusted Base, the unrestricted general funds spend reflects an increase of \$1,270,663.6 from the original FY23 adjusted base or an 25.3 percent increase from Adjusted Base. The largest increase from adjusted base is the addition of the permanent fund and the energy relief check.

[1:48:21 PM](#)

Representative Wool queried how much the Permanent Fund Dividend (PFD) total was the additional energy money attached to the PFD.

Mr. Anderson agreed to provide that information in revised reports, and noted that it was included in Document 1.

Mr. Anderson reviewed the changes from the CS. He continued to read from a prepared statement:

First off, this committee substitute includes all changes from subcommittee close-outs. However, since close-outs some things have changed in the numbers section so I'll address them here.

Department of Corrections (DOC)

Page 8 Lines 8-10

This carryforward language was moved from language to numbers as it is more appropriately placed in the Numbers section. This carryforward language is intended to fully utilize federal funds in the Anchorage Correctional Complex and even out costs across fiscal years. The Department has expressed no concern with this change.

1:50:23 PM

AT EASE

1:50:50 PM

RECONVENED

Mr. Anderson addressed the Department of Family and Community Services:

Page 14 Lines 23-28

In the Office of Children's Services, funding and intent language associated with the Tribal Child Welfare Compact was transferred from the Front Line Social Workers' allocation to its own allocation to ensure better tracking and reporting for the \$5 million appropriated for the Compact. This was a subcommittee recommendation.

Mr. Anderson referred to the Department of Labor and Workforce Development (DOL):

Page 23 Line 31

This change moves open-ended federal authority for unemployment insurance benefits and associated administrative costs from the language section to the numbers section as a \$10 million dollar one-time increment. The Department did not express concern with the \$10 million cap which should be sufficient.

Mr. Anderson referred the University of Alaska:

Page 38 Line 33

The subcommittee added \$3.75 million UGF to the Anchorage Campus allocation for the purpose of expanding the Healthcare worker training program.

The CS swapped the UGF funds to CLSFRF. This was an original request and intention by both the Board of Regents and the Governor.

These are the only differences to the subcommittee actions, excluding Revenue Replacement which I will address later.

Mr. Anderson discussed Supplemental Sections added to the CS:

Section 7 Page 59 Lines 1-5

Is the \$48.5 million for last year's remaining portion of school bond debt. This amount makes the State payment 100 percent of the obligation required for last year. This has a July 1st, 2021 retroactivity date reflected in Section 41 of the CS.

Section 8 Supplemental Commerce Community and Economic Development

Subsection (b) Page 59 lines 11-14

Is the \$7.1 million for last's year remaining payment to eligible recipients for the community assistance program. This has a July 1st, 2021 retroactivity date reflected in Section 41 of the CS.

Section 9 Supplemental Fund Capitalization

Page 59 lines 15 and 16

Is the \$31.8 million to repopulate the community assistance fund up to the full \$90 million, this is a supplemental item in FY22 so the full payments can be made in FY23.

Page 59 lines 17 and 20 Subsection(b)

\$17.1 million is appropriated to the regional educational attendance area or REAA fund, this is the amount to make the fund whole in FY22,

Page 59 lines 21 - 22 Subsection(c)

\$60.0 million is appropriated to pay for oil and gas tax credits, this is the amount to make the full payments for tax credits in FY22, last year the payments were short.

All of this Section has a July 1st, 2021 retroactivity date reflected in Section 41 of the CS.

Representative LeBon asked for the funding source.

Mr. Anderson responded that it was UGF.

Mr. Anderson continued to read from a prepared statement:

Supplemental Fund Transfers

Page 59 lines 23-31 and Page 60 lines 1-8
Subsection(a and b)

This authorization to refill all of the accounts that were swept when the CBR Reserve Sweep vote failed last year including the higher education fund.

Representative Josephson wondered whether Section 10, page 59 was referring to "swept items."

Mr. Anderson replied in the affirmative.

Representative Josephson asked if a CBR vote would be required in the current year.

Mr. Anderson responded in the negative.

Representative Wool asked whether the numbers were included with the expectation that the Spring Forecast would be reconciled with the numbers.

Mr. Anderson replied that the budget used FY 33 surplus, so the funds would be provided for the requests.

Co-Chair Foster redirected the line of questioning.

Representative Josephson pointed to the Worker's Compensation Benefit Fund and wondered whether it would be considered "swept funds."

Mr. Anderson agreed to provide that information.

Representative LeBon asked if the dollars were currently in the CBR.

Mr. Anderson responded that the funds would be repopulated in the CBR.

Representative LeBon asked if they were going to //.

[2:00:26 PM](#)

Mr. Anderson continued to read from a prepared statement:

Supplemental Statutory Budget Reserve Fund
Page 60 lines 9-11

This section takes all remaining surplus general funds not spent in FY22 and deposits them into the SBR. This amount is estimated to be approximately \$340 million. This section has a June 30th 2022 retroactivity date reflected in Section 41 of the CS.

Page 60 Lines 20-31 thru page 62 line 26

Section 14 Alaska Housing Capital Corporation

On the advice of Legislative Legal, the CS reflects the reappropriations made by the Governor in his bill for standing up the two new departments of Family and Community Services and Health with funds from the old Department of Health and Social Services are placed into the Alaska Housing Capital Corporation account as a holding account for the funds since all three department do not exist at the same time. The appropriation made from this account to the new departments is reflected later in the CS.

The other change to this section is the removal of the words "including encumbered amounts", once again on the advisement of Legislative Legal those references were removed because of a constitutional issue and that Legislature Legal feels is resolved through the language of Executive Order.

This section has a June 30th 2022 retroactivity date reflected in Section 41 of the CS.

Alaska Permanent Fund Section 17

Page 64 Lines 22-23 Subsection (c)

This is the deposit of the POMV \$3.3 billion from the Earnings Reserve to the general fund, which the standard practice of the Legislature.

Lines 24-27 subsection (d)

Is the POMV split of 25 percent for the PFD to Alaskans, taking \$840 million dollars for a \$1250 PFD payment per person

[2:03:27 PM](#)

Representative LeBon asked about the effective draw rate on the \$3 billion.

Mr. Anderson replied that did not know.

Mr. Anderson continued:

At this time I would like to also point out the special appropriation

This is related to the disbursement of the PFD, so please turn to:

Page 90 lines 18 thru 22
Section 38 Special Appropriations for Energy Relief
This section authorizes that \$840.1 million of general funds be used to provide a onetime energy relief payment of \$1300 per Alaskan. This onetime payment will utilize the PFD as the mechanism for distribution.

Please turn to Page 68 Lines 3-6
Under Section 20 Department of Education and Early Development
Subsection (d)
This a \$50 million one-time appropriation outside the formula for school districts, this is contingent upon the failure of the passage of a BSA increase legislation.
The contingent language is later on in the CS.

Page 68 lines 7-10
Subsection(e)
After Subcommittee close-outs, further discussions were had with the Department and the CS reflects the inclusion of the requested \$1.6 million for the expansion of WWAMI program by 10 participants but taking into consideration the fact that the funds might be spent in Fiscal Year 23, the reflects this as a multi-year appropriation so they will have two years to implement the expansion.

Page 68 line 11 through Page 73 line 5
Sections 21 and 22 Department of Family and Community Services and Department of Health
Since the CS deposits funds into the Alaska Housing Capital Corporation, these sections reflect the

appropriations going from the AHCC account into the departments.

Not reflected in this CS is the removal of the Department of Law section appropriating \$4 million for Statehood defense, the department had reported that they had only spent \$270 thousand of the \$4 million appropriated for the same purpose last year.

Additional in the Department of Transportation, Alaska Marine Highway appropriation, UGF backstop language to cover uncollected federal receipts was removed. This was included last year because there was uncertainty about the amount of federal funds that were available, this backstop language is unnecessary this year. It is not needed in this year's budget.

Page 75 lines 11-21

University of Alaska Section 28

The three projects listed from the Governor's budget for the drone program, rare earth minerals and Heavy Oil are funded by CSLFRF like the Governor's original request, they were initially changed to UGF in CS 0.5.

Page 80 Lines 24 through Page 81 line 9

Section 31 Federal and Other Program Receipts

Subsections (e) and (f)

This language provides limits on large RPL requests outside of the typical limited scope of the RPL process, in particular, this excludes flexible ARPA CSLFRF funds, and funds made available through the Infrastructure Investment and Jobs Act, IIJA.

This requires the Governor to come before the Legislature for authorization before those federal funds can be spent.

Page 86 Lines 19-21

Fund Transfer Subsection (m)

This subsection appropriates an estimated \$10.2 million from Large Vessel Gaming and Gambling Tax Account to the general fund because the State will be collecting the tax this year with a cruise season. This is standard practice when we have a cruise ship season returning.

Subsection (n) Page 86 Lines 22-24

This section is the Revenue Replacement of \$300 million dollars

Reference Document 5 ARPA Rev Replace

The committee will notice 1/3 of the revenue replacement is found in Corrections, this is because the Department has large amounts of general funds available for the fund swap without any necessary concern for how it might impact federal match or other requirements on those general funds.

Page 90 Lines 8-12

Section 36 Shared Taxes Subsection (g)

This clarifies the backstop language for prorating the distribution of revenue if there is any lost revenue for the seven port calls.

Page 90 Lines 23 thru 29

Statutory Budget Reserve Fund

Section 39

Subsection(a and b)

This authorizes the SBR to be used for deficit fill and deposits any surplus general funds in FY23 in the account.

Page 91 Lines 10-13

Section 42 Contingency

This section is the contingent language mention above regarding the \$50 million of one-time funding outside the formula if a BSA bill, House Bill 272 or similar bill is not passed.
