Approved By:	Theresa Cross, Administrative Services Director	Date:	01/16/24
Agency:	Department of Natural Resources		

## FISCAL NOTE ANALYSIS

STATE OF ALASKA  
2024 LEGISLATIVE SESSION**Analysis**

This bill amends the 10-year five percent royalty discount on certain Cook Inlet oil and gas fields program found in AS 38.05.180(f)(5) and modifies the program to include new production in Cook Inlet, regardless of discovery date, and removes limits on eligible volumes of oil or gas during the 10-year period of reduced royalty. Eligibility is subject to determination by the Department of Natural Resources (DNR) commissioner, rather than being automatic.

The current statute grants a five-percent royalty rate for oil or gas produced for sale for the first 10 years but is limited to six Cook Inlet fields discovered before 1988 and provides a deadline of January 1, 2004 for start of production (in AS 38.05.180(dd)). The statute limited the eligible volume to the first 25,000,000 barrels of oil and the first 35,000,000,000 cubic feet of gas produced for sale from that field.

**Operating Expenditures:**

The Division expects to implement this bill with existing resources and does not anticipate requiring additional funding.

**Change in Revenue:**

The changes to revenue are indeterminate. While the Division expects that companies are more likely to make investments in new Cook Inlet production under this bill than without the changes proposed in this legislation, the timing and scale of those investments, as well as the time to bring new production online are not certain and would affect changes in revenue to the State. Generally, while the bill reduces the State royalty on eligible new production, modeling by the Division indicates that the new production is less likely to occur without the proposed royalty rate modification.
