

1 IN THE SENATE

BY PALMER AND CROFT

2 SENATE CONCURRENT RESOLUTION NO. 20

3 IN THE LEGISLATURE OF THE STATE OF ALASKA

4 SEVENTH LEGISLATURE - FIRST SESSION

5 Relating to automated welding  
6 processes.

7 BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

8 WHEREAS a new automated welding process has been developed which makes  
9 welds of very high quality with the metallurgical structure unchanged; and

10 WHEREAS, if conventional welding methods were used on the oil and gas  
11 pipelines to be constructed in Alaska, it would be impossible to train  
12 Alaskans quickly enough to take advantage of the jobs created; and

13 WHEREAS, if an automated welding process can be utilized on the pipe-  
14 lines to be constructed in Alaska, untold numbers of Alaskans would be put  
15 to work, as untrained men can be quickly trained to use the new equipment;  
16 and

17 WHEREAS the utilization of an automated welding process would greatly  
18 shorten construction time in completing the pipelines, sharply reduce costs,  
19 and the quality of the welding could be expected to be far above that of  
20 conventional welding; and

21 WHEREAS the use of automatic equipment will, in future years, actually  
22 create many new jobs;

23 BE IT RESOLVED by the Alaska State Legislature that the Governor is  
24 respectfully requested to direct the Board of Welding Examiners to commence  
25 immediately a feasibility study of the use of automatic welding equipment  
26 on the pipelines to be constructed in Alaska and the training of Alaskans  
27 in the use of this automatic equipment; and be it

28 FURTHER RESOLVED that the Governor report to the Legislature at the  
29 earliest possible time regarding the feasibility of the proposal and if

1 feasible to take all necessary action to insure the use of automatic welding  
2 processes and the employment of Alaskan workers on the pipelines to be  
3 constructed in Alaska.
