Some, including a few of the legislators themselves, feel that the legislature may be somewhat small to handle committee work adequately or to be adequately representative—that it should be enlarged. Some think, and this includes the partisan governors, that there would be more "leadership" if the election were on a partisan basis, the implication being that a governor belonging to the dominant party in the legislature could crack the whip on behalf of an executive or partisan "program." Others seriously doubt this. At present the election of members is on a nonpartisan basis in both the primary and general election, and most members seem to be content with this. In fact, they have not infrequently elected to important legislative posts those in whom they had personal confidence, regardless of known party affiliation.

In the 1957 session, proposals to change the size and nonpartisan character of the legislature were rejected and the only constitutional amendment proposed by the legislature that would affect themselves, to be submitted to the people in 1958, is to double legislative salaries.

EDITORIAL COMMENT

(Continued from page 1)

which should be felt by representatives of the people. Nothing is more common than for one house to pass a bill and the members who voted for it to urge the other house to defeat it, or for a little group of members in one house to hold up legislation from the other house until they extort from it what they demand.

"c. The third point urged for two houses is in order to prevent hasty legislation by requiring more time and machinery for the enactment of a law, thus securing deliberation and reflection. Deliberation and reflection do not now mark the work of a two-house legislature, which passes most of its acts in the last ten days of the session. A smaller body with a more direct responsibility upon each member arising therefrom will tend to greater deliberation and reflection than the present system."

These serious indictments are at least as valid today as they were 40 years ago. Nebraska's experience, as well as the experience of the many cities that abandoned bicameralism long ago, have brought in the verdict.

Contrast the indifference and lethargy of other states with the attitude of industry. The assembly line was little more than an experiment before everyone saw its soundness—and acted. And no one has to go around preaching the virtues of automation or of the self-service supermarket.

Don't we care what happens to our legislatures?

NATIONAL MUNICIPAL LEAGUE
47 East 68th Street, New York 21

THE UNICAMERAL LEGISLATURE

Institutions of representative government should not be regarded as ends in themselves, but simply as means through which social and economic objectives can be achieved. An efficient legislative structure for state government is important so that lawmakers will have the fullest opportunity to know and be responsible to the public will.

Bicameralism is a characteristic feature of American government found in the organization of both Congress and the legislatures of every state except Nebraska. However, it has not been the only structure employed in American legislatures. Pennsylvania, Georgia, and Vermont had experience with unicameralism in their early history. Nebraska has had a unicameral state legislature since 1937. Great Britian's legislative body, from which our tradition stems, is bicameral in name only. The House of Commons has assumed all important legislative and political functions from the House of Lords, and is essentially a unicameral system. At one time some 40 per cent of the nation's cities had bicameral legislative bodies, but bicameralism has practically disappeared at the municipal level.

Although the traditional bicameral legislature remains in all but one state, the two houses generally have the same jurisdiction, the same authority, and the same requirements to perform identical functions. Further, state government is undergoing major change today. Reynolds v. Sims and other recent U.S. Supreme Court decisions have established the general rule that a state must make "an honest and good faith effort to construct districts for both houses of its legislature as nearly of equal population as is practicable." Differing bases of apportionment alone are a less valid rationale for a bicameral system.

It is therefore important to re-examine the efficiency and effectiveness of unicameralism as compared to bicameralism, and to weigh the relative merits and disadvantages of each.

Spotlight on Nebraska

The story of the pioneering efforts of Senator George W. Norris and others to convince Nebraskans to adopt a one house legislature began in 1913. A legislative committee was appointed to study ways and means by which the state government could be made to function more effectively. It recommended the unicameral system. A long and arduous campaign began, ending victoriously in November of 1934.

At that time, a citizens' petition had secured a statewide vote on the constitutional amendment to merge Nebraska's 33-member Senate and 101-member House into a single legislative body. The amendment carried by a large majority, and the unicameral legislature has been in operation in Nebraska ever since.

Legislative Structure

Nebraska has a one-house legislative body composed of not less than 30 nor more than 50 members (currently 50), elected from single-member districts on a nonpartisan ballot (which is not essential to the system). Legislators meet in unlimited biennial sessions, for which they are presently paid $4,800. Legislative terms have recently been extended from two to four years, with half the members elected every two years. The governor continues to present a budget, exercise the veto power, and make certain appointments subject to legislative confirmation. The presiding officer of the assembly is the lieutenant-governor, and the chief clerk is a full-time officer. A legislative council, to which all legislators belong, functions between and during sessions to maintain research and reference services, as well as to formulate legislative programs.

One of the objectives of the unicameral amendment was an effective committee system. There are at present 18 standing committees, 13 on subject matter and 5 on administration and rules. Membership and chairmen of the committees are chosen by a 13-member Committee on Committees.

Rules of Procedure

Introduction of bills by individual members is limited to the first 20 legislative days. After the 20-day limit, a standing committee may introduce bills upon a majority vote of its members and upon the vote of three fifths of the elected members of the legislature. Bills may also be introduced after the 20-day limit upon recommendation of the Governor.

There are public hearings on almost all major bills. Any citizen may appear to state his position for or against a measure. Notice of date and time of committee meetings is published in the legislative journal 5 days in advance of hearings.

En route to passage after receiving committee approval, a bill makes at least three appearances on the floor—first to undergo debate and amendments, a second time for technical refinements and unanimous consent amendments, and third, final reading aloud and final vote. All bills must be published after refinement and when received by the legislature must lie on the members' desk for one legislative day before the final vote.

Unicameralism a Success in Nebraska

There has been no serious attempt in Nebraska to return to bicameralism since 1934, although there are recurrent movements to change from non-partisanship to the party system. A survey of 68 present and former senators by the University of Nebraska's School of Journalism in 1961 turned up only four who wanted to return to the two-house system.

Nebraska's Gov. Frank B. Morrison has said in an interview with the *New York Times* that two houses are unnecessary. "There is no longer any reason for any state to retain the duplications of a bicameral system when a unicameral system serves the same purpose less expensively." The legislators in Nebraska generally agree that the unicameral system has benefited the state. Those interviewed by the *Times* indicated that lawmakers were much more responsive to the wishes of their constituents under the unicameral system than under the old two-house establishment. Vice-Chancellor of the University of Nebraska, Dr. A. C. Breckenridge, says that the unicameral system has "become a source of considerable pride for many Nebraskans. Although it is by no means a perfect institution, it is a workable and responsible device for representative government."

The unicameral legislature also is advocated by the National Municipal League in its Model Constitution and the system is supported in Nebraska by the Nebraska League of Women Voters.

Why Only in Nebraska?

With many western nations and almost all major cities in the U.S. governed by unicameral systems, why is Nebraska the only state with a unicameral legislature? One reason given is the innate conservatism in America where government is concerned; another is that legislators are naturally reluctant to vote themselves out of office. Three other factors were at work in Nebraska when the unicameral system was adopted: (1) long outstanding leadership for unicameralism in the state; (2) initiative provisions available in the constitution; and (3) disenchantment with the bicameral legislature and its handling of depression issues.

In Support of Bicameralism

The adherents of bicameralism give a number of reasons for its retention. A study of apportionment by a group of political scientists, "One Man, One Vote," said: *"Bicameralism may also serve to further the very objective of representing the people equitably in a legislature. In any districting, geographic features are bound to cause some inequities of population among districts. When there are two houses, an area that is somewhat underrepresented in one may be given a compensating advantage in the other and minor inequities in apportionment thus be balanced off."* The Supreme Court said that different constituences could be represented in two houses under a population standard; one house could have single-member districts while the other could have at least some multi-member districts. Differences in personnel, constituency, and outlook due to different terms and other factors all are justifications for bicameralism.

Efficiency and Consideration of Bills

Supporters of bicameralism insist one of its greatest advantages is that hasty or ill-considered legislation, passed by one house, can be killed on sober examination by the other. The following statistical analysis of the action of one house upon the bills from the other in Missouri challenges this argument.

Missouri General Assembly
Bills introduced and Their Disposition
72nd General Assembly, Reg. Session 1963

Introduced			1,154
Passed House of Origin	549	47.6%	
Failed in House of Origin	605	52.4%	
Action in Second House			549
Passed without Amendment	200	36.5%	
Passed with Amendments	87	15.7%	
Failed to Pass	262	47.8%	
Bills Sent to Conference			22

The house of origin in Missouri failed to pass approximately half the bills introduced, which means that a large fraction of the legislation proposed in either house is never even considered by the second chamber. When bills do get to the second house, a far greater percentage of those finally passed are not amended, seeming to disprove the theory that one house acts as a check upon the other.

Unicameral advocates assert that the real checks and balances are the governor's veto, a court review, and the fact that a bad bill can be repealed by referendum or at the next legislative session. Checks and balances should be exercised between the three branches of government.

A summary of the above provides an interesting parallel with those of Nebraska's unicameral legislature during the same year.

	1963	
Bills intro. Mo. Legislature	1,154	
Bills passed Mo. Legislature	287	25%
Bills intro. Neb. unicameral Leg.	815	
Bills passed Neb. unicameral Leg.	545	67%

For purposes of comparison, the last year of Nebraska's bicameral legislature is enlightening: of 1,956 bills introduced in 1935, 192 or 18% were passed. Certainly in a one-house legislature the total number of bills introduced is greatly reduced and the percentage of bills passed is greatly increased. In Nebraska, reports on bills can be requested 20 days after a bill has been sent to committee. The unicameral legislature has not experienced the bunching up of bills at the end of the session which so often characterizes the last 48 hours of many legislative sessions (caused in part by bills being approved by one house and held by the other until the last possible moment.)

Responsibility and Visibility

In a single house, supporters say, each legislator would feel greater personal responsibility for careful consideration of all bills to be voted upon, knowing that responsibility for presenting bad legislation could not lightly be delegated to a second body. Responsibility is more easily pinpointed in a unicameral system. With bicameralism, one house can stop, or seriously impede, good measures that are favored by a majority of the people. Some authorities feel that the biggest problem of state legislatures has been the failure to take any action at all rather than the laws actually passed.

It is claimed that two houses provide protection against corruption and undue influence by lobbies, yet Nebraska's simple organization and small membership provide high "visibility" for legislation. Certainly the elimination of the conference committee, which Senator Norris termed a third house, removes one point of undue influence. Nebraska State Senator R. D. Marvel says: "There's now no way for us to pass the buck. I can't say to a constitutent, 'Okay, I'll introduce this for you,' and then run to the other house and say, 'Boys, kill this.' The lobbyist, too, doesn't dare talk out of both sides of his mouth. We're working in a goldfish bowl." The definite legislative procedures required in Nebraska make it easier for the voter to understand the process and to know where and when his voice would be most effectively heard.

Economy

A unicameral legislature would undoubtedly be more economical. While improved rules of procedure could be followed under bicameralism, duplication of effort still would be involved in getting legislation passed by two houses. The total cost of Nebraska's first unicameral session in 1937, with 226 bills passed, was $140,000. The last bicameral session in 1935, with 192 bills passed, cost $203,000. Experts, however, are inclined to discount the importance of this argument. The single house should cost less, they say; but legislative costs are so small a part of total state budget that this is not a significant argument. Of more importance is the fact that the unicameral system would reduce the number of legislative members, making it possible to pay the legislators a more reasonable sum without increasing the amount spent on salaries.

Quality of Legislation

Certainly the rules of procedure have been an outstanding feature of Nebraska's unicameral system. Many of these same improvements could be made within a bicameral system, however. To adequately evaluate the quality of government in any state one must look at the kind of legislation which is passed, rather than the techniques used to pass it. Some authorities have noted that in a state as concerned with economy as Nebraska, the legislation passed has not kept pace with progress in other states. For example, Nebraska has no merit rating system for state employees, something the League of Women Voters has long supported in Missouri. Critics also have pointed to Nebraska's tax problems as an area in which bicameral legislatures seem to have done a better job. Yet, if the reason for lack of progress is failure of the legislature to act, having two houses instead of one would have made the situation even worse. Unicameralism, as a tool, does not guarantee good government, but it does eliminate some of the obstacles that plague bicameralism. Nebraska's problems and constituency are different from those of a more urban state, and comparisons of the quality of legislation are exceedingly difficult to make.

How Could Missouri Change to Unicameralism?

The legislature could offer a unicameral amendment to the voters, or citizens could circulate initiative petitions asking that such an amendment be put on the ballot at the next general election.

The change would take effect thirty days following approval by a majority of the voters.

UNICAMERAL LEGISLATURES

The Birth of Legislatures

Legislatures are a comparatively modern branch of government, while executive and judicial agencies can be found in the most ancient societies. The legislature as such originated in England in the late Middle Ages when the king under pressure of his vassals called representatives to gather and consult on the governing of the kingdom. From the beginning, the delegates were called as representatives of separate and distinct classes of society, known as estates. In the Model Parliament of 1295 there were five estates, but soon these were consolidated into two, the nobility and clergy in one body, and the common people in the other, and the tradition grew for them to sit apart so that each would have at least a veto power over the other. This explains the origin of the House of Commons representing the lower classes and the House of Lords representing the aristocracy.[1]

Colonial Legislatures

This pattern was followed to some extent in the Colonial American legislatures where the upper house in most cases served as a council to the royal governor, and represented the king, while the lower house was chosen by the electorate of the colony. In some cases the upper house was elected by the lower, but property requirements were higher in the upper house. Upon gaining independence most of the states retained this basic form while three states (Pennsylvania, Vermont, Georgia) at first tried unicameral legislatures.

"In the American colonies, the rise of the second house came about due to a conflict of interests within the colony or between the proprietor and the colonists.[2] The governor's council, which was to become the upper house of the legislature in the great majority of colonies, was a small body of from three to twelve men, appointed by the proprietors to act in advisory capacity to the governor; the lower house was a concession to the colonists, just as the house of commons grew up as a concession to the non-noble class of England. That the two groups early came to sit apart was due to questions of expediency, and the same motive which led the proprietors or the colonists to demand a separate house under one set of conditions led them to wish a joint meeting as a single house under other conditions.

"In Maryland, the first legislature summoned by Lord Baltimore, that of 1637, and its immediate successors, consisted of the lieutenant general or governor and the secretary of the province, the members of the council, gentlemen summoned by special writ of the proprietor, and the burgesses elected by each hundred. Those summoned by special writ were quite naturally looked upon as representing the interests of the proprietor rather than of the colonists. So long as the governor could summon an indefinite number of gentlemen to sit and vote with the elected burgesses, he could easily control the legislature. The burgesses, therefore, feeling that they were the only true representatives of the people, and impotent to cope with the forces of the governor,

early demanded the right to sit and vote apart and to have a veto on the acts of others. Although refused at the time, their request was granted eight years later, and from 1650 on the two groups continued to sit apart and act as coordinate bodies.

"The people of New Jersey were no less insistent in their struggle for a single house. The 'Consessions' of 1664, issued upon the separation of the new colony from New York, provided for the appointment of a council of six to twelve by the governor, who was the appointee of the proprietors, and the election of twelve deputies by the freemen. It would seem that the Concessions contemplated that these two groups should sit as one body and decide all questions by majority vote. But when the first session met in 1668 there were ten deputies and only seven councillors present. It being evident to the representatives of the proprietors that such a scheme would destroy all effective control over the conduct of affairs by them, they immediately withdrew and insisted upon their right to sit and vote apart. The deputies, wishing a single house, were so insistent in their demands that the governor ignored the Concessions, dismissed the deputies, and ruled without an elective assembly until 1675. The deputies elected in 1675 and succeeding years were no less insistent than had been their predecessors in their demands for a single house, and in 1681 the governor again dismissed them and ruled with the advice of the appointed council alone. In 1702, when the colony became a royal province, the bicameral system was restored, the upper house or council being appointed by the king, and the lower house elected by the freemen of East and West Jersey. This status continued until the revolution.

"In 1680, when New Hampshire was separated from Massachusetts by royal decree and made a separate province, the crown appointed a president and a council of nine who were to govern with the aid of an elective general assembly. To make the veto of the smaller council effective, it was provided that the two groups should sit and vote apart. That there was no intention of making the elective group the equal of the council was early shown when, in 1682, due to the stubborn attitude of the assembly in insisting upon its rights, it was dissolved, to meet only once during the next ten years. In the interim the president ruled with the council alone. In 1692 the assembly was restored as a coordinate body, and in this form the two houses continued down to the revolution.

"New York was ruled by a governor and council until 1683, when an elective assembly was granted, to sit as an independent house. With the ascension of the proprietor to the throne as James II, one of his first acts was to abolish this assembly, leaving the governor and council again supreme. William III revived the assembly in its old form in 1691, and it was continued down to the revolution. North Carolina was granted elected representatives as early as 1665, the 'Concessions' of that year providing for the election of twelve deputies to sit with a smaller number of councilors, as a single body. The disadvantage in which this placed the proprietors soon becoming evident, the plan was changed to require the consent of a majority of the councilors, as well as a majority of the entire body, for the passage of all laws. The two groups continued to sit together, the representatives of the proprietors having a veto, until 1691, when a new form of government provided for an upper house of the local nobility and a lower house of elected delegates. From this date the two houses continued to sit as separate bodies. In South Carolina the two houses seem to have sat apart from the first.

"The early legislative history of Pennsylvania and Delaware is quite different. William Penn was notably the most liberal of all the proprietors, and when he provided for a legislature for Pennsylvania in 1682, he did not retain a check in the form of an appointive upper house. He did, however, provide for two houses, both elective, the smaller of which was to propose laws, the larger only to consent to or reject the bills of the other. This ingenious scheme soon broke down, however, the lower house gaining the right to originate bills, which power was definitely recognized by the charter of 1696. The distinction between the houses being broken down, they simply becoming coordinate legislative Bodies, representing the same interests, a single house was substituted by the charter of 1701, and the life of the two houses as coordinate branches was thus limited to five years. Two years later Delaware was given its own legislature, also a single house, and in this form the two governments continued down to 1776.

"The first colonial assembly ever to meet in the new world was that of Virginia, elected in 1619 at the call of Governor Yeardley. Up to this time the colony had been under the direction of a governor and a council of six, all appointed by the London Company. The twenty-two burgesses met with the governor and council in one body and enacted laws for the colony. Although the session lasted but six days, it marks the beginning of representative government in America. Five years later, when the crown revoked the charter, the House of Burgesses was allowed to continue, the councillors, now the appointees of the crown, continuing to sit as members of this body. In 1680, however, the council was made an independent house, to increase the control of the crown over colonial affairs. The two houses continued down to the revolution.

"Massachusetts was the first colony to develop a two-house legislature. The charter of 1629 provided for a governor, deputy-governor, and eighteen assistants, all appointed by the members of the company. They were to meet four times a year with the freemen of the colony, who retained the legislative authority. With the growth of the colony such general meetings proved impracticable, and the lawmaking was left to the governor and the assistants. Although the assistants were now elected by the whole body of the freemen, the towns felt themselves to be without adequate representation, and in 1632 secured the right to send two deputies each to sit with the governor and assistants. Although the two groups sat together as one body, the closer connection of the assistants with the executive, together with the difference in their modes of election, tended to make them think of themselves as constituting two different groups, and not two years had passed before the assistants sucessfully asserted their right to a veto on acts of the General Court, even though they secured a majority vote of the two groups combined. However, they continued to sit together, either group having a negative upon the other until 1644, when a sharp controversy brought the two groups into conflict and forced the issue of separation.

"The two self-governing offshoots of Massachusetts, Connecticut and Rhode Island, may well be considered together, as their lines of development are very similar to each other and to that of Massachusetts. As in the latter state, a small number of 'magistrates' were elected at large, and a larger number of 'deputies' were chosen by the towns. The two groups met together as one house, but as the amount of business increased, the smaller group was made

a sort of standing committee to care for all matters that might arise while the deputies were not in session. This placed the deputies at a distinct disadvantage and led to their demanding and receiving permission in Rhode Island to withdraw for discussion among themselves and to agree upon a common attitude, so that they might meet the magistrates on a more even footing. The next step was a desire for complete separation, which came in 1696 in Rhode Island, and two years later in Connecticut. Only under such a plan could the more transient body of deputies retain their independence and equality of action in competition with the more experienced and more active magistrates.

"Thus the eighteenth century opened with all but two of the American colonies having legislatures composed of two coordinate branches, with an appointive council exercising a certain degree of supervision over the assembly. The only new colony of the next century, Georgia, in keeping with the policy of the proprietors and of the crown, was also provided with a bicameral legislature, so that the revolution found the American colonies with much the same scheme of legislative organization as had existed for the greater part of a century. Now that the time had come for the colonists to decide how to govern themselves, only those living in Pennsylvania and Delaware had had personal experience with the working of a single-house legislature.

"The revolution produced no break in the orderly growth of legislative institutions. No alteration had taken place in the minds of the people relative to those institutions under which they had lived for the better part of a century, and no radical changes were contemplated in them. The constitutions adopted in the period following the opening of hostilities simply followed the lines of development already established. In the organization of the legislatures of the new revolutionary states, the chief problem facing the constitution makers had to do with the upper house. The lower house, which always had been the most, and generally the only, republican branch of the colonial legislature, required no attention other than a definition of its function and powers. The upper house, however, demanded reconstruction, since the colonial council was aristocratic and monarchical in character. The colonists had grown accustomed, in the council, to a legislative body smaller in size and more permanent in nature than was the lower house, renewed as vacancies occurred rather than annually or semi-annually, and frankly composed of and representing the interests of the wealthier members of the electorate. Advanced though the colonists were for their day and age, they still retained much of the British antipathy to and fear of the uncontrolled rule of the masses. The council, being the agency with which they were acquainted, was the logical one to continue as a check upon the more democratic lower house.

"Of the eleven states to reorganize their colonial governments during the period of hostilities through the adoption of a written constitution, all but two, Pennsylvania and Georgia, provided for an elective second or upper house. Of the remaining nine, seven frankly made the upper house a weapon of special privilege represented by wealth. In Maryland, New Jersey, North Carolina, South Carolina and New Hampshire, membership was restricted to the wealthier members of society through higher property qualifications than were required for membership in the lower house. New York and North Carolina provided for the election of members of the upper chamber by the more wealthy electors. And Massachusetts and New Hampshire provided that members of the upper house should be apportioned in accordance with the 'proportion of public taxes' paid by the districts. Only Virginia and Delaware had the same property qualifications for both the members and the electors of the upper and lower houses.

Legislatures Since Colonial Days

Under the Articles of Confederation the United States functioned with a unicameral congress, but in the framing of the Constitution the authors provided for two houses primarily as a check upon the much greater power of the new federal union. The bicameral provision was part of the Great Compromise which provided for representation to be by states in one house and by population in the other to satisfy both the large and small states. The bicameral feature itself was not specifically debated at any length.

After Vermont abolished its unicameral legislature in 1836 (being the last of the three to do so) all the states had bicameral systems for nearly a century. The tendency was nearly universal to have the lower house more representative of the people while the upper house continued to represent land and wealth, often by having higher property requirements for its electors. In the early twentieth century there was a widespread movement to promote unicameral legislatures. This sprang from a general dissatisfaction with corrupt and minority-dominated bodies, and was closely related to the Progressive Movement and the drive for the initiative and referendum. Proposals were made in a number of states, often by the governor, but were always defeated. The following table gives examples of defeated unicameral proposals: [3]

Year	State	Where defeated or died
1915	Alabama	Legislature
1915	Arizona	Initiative
1918	Arkansas	Constitutional Convention
1913	California	Legislature
1917	California	Legislature
1918	California	Legislature
1923	California	Legislature
1925	California	Legislature
1914	Colorado	Initiative
1914	Minnesota	Legislature
1915	New York	Constitutional Convention
1912	Ohio	Constitutional Convention
1914	Oklahoma	Referendum
1912	Oregon	Referendum
1914	Oregon	Initiative
1917	South Dakota	Legislature
1927	South Dakota	Legislature
1915	Washington	Legislature
1917	Washington	Legislature

The movement lasted until 1935 when Nebraska adopted its unicameral amendment, largely under the leadership of George W. Norris, the famous Progressive Republican Senator from Nebraska. The Nebraska plan seems to have been popular and successful, at least to the extent that it has not been changed, but it has not led to any other state's adopting it.

[3] Ibid., pp. 197 - 200.

Representative legislatures had their greatest period of development during the 19th century and are now common throughout the civilized world.

> About three-fifths of the contemporary national legislatures are bicameral in form, including those of the major states. Legislatures are unicameral in Austria, Finland, New Zealand, Portugal and Spain, in the new states of Israel and Indonesia, and in most of the Soviet satellite states. National and state legislatures in the United States alone have preserved the balance between the two chambers. The U.S. Senate is unique among national upper chambers for its considerable ascendancy over the House of Representatives through longer term and possession of distinctive powers to confirm presidential appointments and to approve ratification of treaties, while possessing powers coordinate with the House of Representatives in other important respects. Elsewhere, notably in the British House of Lords since 1911 and to a lesser extent in the French Council of the Republic since 1946, upper chambers have quite generally been reduced to the role of delay, advice, and amendment of the actions of the popular second chamber.[4]

Canada is a particular case in regard to unicameral legislatures. The national Parliament is made up of the Queen's representative as Governor General, and two houses, the Senate and the House of Commons. The Provincial legislatures, with the exception of Quebec are unicameral, consisting of a Lieutenant Governor presiding and an elected Legislative Assembly. (Quebec retains a nominal second chamber, the Legislative Council.) Lieutenant Governors have the power to refuse assent to bills passed by the assembly. Canadian legislatures may delegate legislative power to other bodies, but such power is derivative rather than residual, and may be revoked at any time.[5] In Australia all states except Queensland nave bicameral legislatures, and the federal legislature is bicameral.

Essentially the tendency has been to copy the British pattern of bicameral legislatures in most of the English speaking world, and in larger nations, especially federal unions, while unicameral legislatures have arisen in smaller more homogeneous states and nations. Thus we find bicamerals in Switzerland, Australia, France, Spain, Mexico, Sweden, United States, Canada, and most American and Australian states and the bilingual province of Quebec in Canada; while we find unicamerals in Costa Rica, Finland, Haiti, Luxembourg, Norway, Panama, the majority of Canadian provinces, a single homogeneous American state, and one of the smaller Australian states. It should also be pointed out that American cities and towns are nearly universally governed by unicameral councils, though many of them earlier ex erimented with a bicameral form.

The Unicameral System

The rest of this study will attempt to explore the arguments that are advanced to support the adoption of a unicameral system, and the changing trend of justification for bicameral systems. The emphasis will be on the unicameral arguments, it being assumed that the reader is well acquainted with the functioning of the two-house system.

Arguments in favor of the unicameral system have tended to center around the issues of speed, economy, and popular will. One of the earliest advocates of the unicameral legislature was Jeremy Bentham, the 18th century political philosopher whose main theory was that of "utilitarianism", which proclaimed that government should seek the "greatest good for the greatest number". In achieving this he felt that any legislature would have to be based on universal suffrage and equal representation, essentially the "one man-one vote" concept. Therefore a second house was at best superfluous, usually obstructive, and potentially dangerous. He had no respect for bicameralism as a British tradition, pointing out that imitating governments rejected the monarchy but retained the House of Lords feeling they had no quarrel with it. Bentham saw only useless delay in consideration of legislation by a second house, suggesting that the indignation of voters is a better check on rash action. In a bicameral system a clear majority representing the will of the people in one house could be defeated by one or two votes in the other house. Any delay or clash of authority could only help to make lawmaking obscure and complex, an anathema to Bentham's idea of keeping the legislative process as close to the people as possible.[6] If one accepts Bentham's basic premise of pure majority rule, it is easy to concede his arguments in favor of unicameral legislatures. However, Bentham's premise is not in line with the tradition in United States governmental history of protection for minority and other interests.

An argument advanced long before the Supreme Court directed that both houses be apportioned on a strictly population basis was that the two houses had become so much alike in their representation that a separation was superfluous. This involves the whole issue of delay, obstruction and corruption. A bicameral legislature must consider everything twice (four times counting committees) thus doubling both time and expense. There is always the possibility that the two houses will pass the same bill for quite different reasons, not knowing the deliberations of the other. Or, vice-versa, they may pass essentially the same legislation, but in slightly different form, leading to delay in compromising the two versions. Or one house may assume that the other house has considered a bill adequately since it passed it, while in fact the bill gets proper consideration in neither house. On the other hand, two considerations can be strictly repetitious or may reflect purely the mutual jealousy between houses in seeking the attention of the people. Actually legislatures have virtually ceased to be deliberative bodies in the face of the great amounts of work they must now accomplish in one session. This is espcially noticeable in the closing days of a session when bills must be rushed

---

[6] Buehler, op. cit., pp. 127 - 140.

through in great numbers, with most of the rules suspended, and with no deliberation by the entire house at all. Advocates of the one-house system maintain that it would simplify the procedure and make it possible to have adequate discussion of all measures once.[7]

It is argued that a two-chamber legislature is more easily dominated by pressure groups because influence is needed with only a minority of one house in order to at least obstruct action. This was a key argument of Senator Norris who pushed the Nebraska unicameral. He saw danger especially in the conference committee system where two or three members from each house can have life or death power over a piece of legislation and can become a sort of superlegislature. Senator Norris's case against the two house system was built principally on his fear of evils and difficulties in the conference committee. He felt that the committee had far too much power in relation to its publicity.[8]

Advocates of the unicameral legislature make frequent reference to the tendency of a bicameral legislature to try to shift blame and responsibility from one house to the other. Since every bill must be considered in two places, it is relatively easy through parliamentary maneuver to create confusion as to who was really responsible for the passage or defeat of a particular bill. Or, if a bill is proposed which most members do not favor, but whose author is a member against whom they do not wish to vote, the bill may well be passed in the originating house with the silent hope that it will be killed in the other house. This method is the source of much unworkable law. The method is the fate of a great deal of personal legislation or measures which were promised to constituents with tongue in cheek. Proponents of the one house system contend that it will make the record of the legislator much clearer to the public and make it more difficult for a member to introduce legislation which he doesn't really want. Responsibility would be made clear to the voter and thus would rest more heavily upon the legislator individually.[9]

Unicameral legislatures, it is argued, are faster in passing needed legislation and more economical in their work since double consideration is eliminated. The absence of duplication of effort in committees and rivalry between the two houses would improve both speed and economy. In a bicameral system lack of unified leadership can create further problems of delay or obstruction, especially if the two houses are controlled by opposite parties or if one house allies itself with the governor, against the other. Often there can be delay simply because the two houses become jealous of each other's prerogatives and seek to obstruct for the sake of obstruction. Sometimes a conflict between the two houses over one major question will halt all action on necessary legislation until it must all be passed in great haste during the last days of the session. In a two party system the division of the legislature into two houses effectively creates four segments of legislators with conflicting loyalties, any one segment of which can usually delay the popular will from becoming law.

Thus the idea of a second chamber as a check on the governmental process has become instead merely a block to progress.

Another criticism of the bicameral legislature has been that its complexity and unwieldy organization make it difficult for the average citizen to appear before its committees of present their views in other ways. On the other hand the professional lobbyist or pressure group has a distinct advantage in working with this obscure system.[10]

The trend in the 20th century has definitely been in the direction of making legislatures more directly responsible to popular will. The Supreme Court decision requiring apportionment on the basis of population in both houses of a state legislature is probably the largest single step in this trend. The Encyclopedia Americana tracing and commenting on the trend points out the changing justification that has been used for the principle of bicameralism:

> Representation of various social classes or estates almost accidentally furnished the basis for bicameralism in England and in some other countries. Upper chambers are commonly constituted by birth, appointment, indirect election, or from a restricted electorate, while lower chambers almost universally rest upon a broader base of direct popular election. With the extension of suffrage and the development of popular political parties, power has followed the vote and progressive democratization of older societies has found expression in the ascendancy of their popularly elected second chambers. Much of the historic basis of bicameralism has been destroyed.
>
> In federated states a different reason of continuing validity sustains bicameralism. As in the U.S. Congress with its equal representation of states (geographic representation) in the Senate and representation according to state population in the House of Representatives, bicameralism permits expression of different principles of representation and the possibility of harmonizing the conflicts of interest expressed through such representation. The justly famous "Connecticut Compromise" which projected the federal Congress onto these lines during the Constitutional Convention of 1787, allowed the Convention to proceed with other essential matters to forge the greatest of federated states. The bicameral Canadian Parliament has accommodated geographic, nationality, and population principles of representation in a federal framework. Australia has solved representation problems similar to those in the United States by means of a bicameral parliament.
>
> * * * *
>
> Since both houses in American state legislatures have come to be elected by the same broad electorate organized into slightly different territorial groupings (commonly the county for the upper houses and population districts for lower houses), justification for bicameralism has shifted to emphasise on the

[10] Buehler, op. cit., pp. 45 - 64.

value of preserving a balance between rural and urban interests and on the desirability of dual consideration and debate. Critics on the other hand, point to dangers in the diffusion of responsibility between the two houses, duplication of time effort, and cost, and liability to obstruction by minority interests. It is suggested that the double hurdle of bicameralism may block desirable as well as undesirable legislation, and it is noted that with few exceptions municipal councils are unicameral in the United States.

Bicameralism in the United States has helped to create and to perpetuate a rural gerrymander (over-representation of rural population) in many state legislatures, and the House of Representatives, and of the less populous states in the Senate. Legislatures establish electoral districts both for state legislative bodies and for the state delegations to the national House of Representatives, and, with the election to the state senate frequently based on county district, they have been reluctant in many states to adjust representative districts to the progressive urbanization of American life. This has brought on acute problems of taxation and financing public services in several states with large metropolitan centers. This rural-urban political conflict is largely, but by no means entirely, independent of partisan political alignment. [11]

A further argument in favor of the unicameral legislature involves the recent trend toward more technical and specialized legislation. Legislatures in the past have often been accused of allowing carelessly drawn and faulty legislation to pass without careful scrutiny. As state legislation becomes more complex and more involved with areas where professional competence is needed in drawing up bills, it becomes more of a luxury to subject detailed bills to the whims and vagaries of two mutually jealous and suspicious bodies.

The U. S. Congress as has been pointed out above was made bicameral as part of the federal system in which the component states were to be sovereign and therefore were entitled to representation as states in one house of the legislature. This principle does not necessarily hold true for state legislatures since states are not federated systems and the counties or other districts are not sovereign entities, but merely administrative subdivisions of the state government. On the other hand bicameralism has been defended by pointing out the unique historical role of the United States Senate in checking the role of the executive branch, or at least keeping a watchful eye on it. One other historical fact that ought to be noted is that constitutional conventions, which have been the means of setting up governments in the American tradition, have always been unicameral bodies, no need apparently having been seen to establish differing kinds of representation for these sessions.

As has been pointed out, Nebraska is the only state in the union which presently has a unicameral legislature. The Constitutional amendment which created the unicameral body for that state is presented as an appendix

---

[11] Americana, loc. cit.

to this report. In addition to the amendment, some 125 changes in statute were required. Nebraska is not without its reapportionment troubles also. A constitutional amendment giving twenty per cent weight to area in apportioning the legislature was approved by the voters on November 6, 1962, and implemented by the legislature in May, 1963. A Federal District Court suit to bar submission of the amendment and to compile reapportionment on the basis of population alone had been denied, but a second suit challenging the weighted voting is pending.

Text of Nebraska's Unicameral Amendment[12]

Sec. 1. Commencing with the regular session of the Legislature to be held in January, nineteen hundred and thirty-seven, the legislative authority of the state shall be vested in a Legislature consisting of one chamber. The people reserve for themselves, however, the power to propose laws, and amendments to the constitution, and to enact or reject the same at the polls, independent of the Legislature, and also reserve power at their own option to approve or reject at the polls any act item, section or part of any act passed by the Legislature. All authority vested by the constitution or laws of the state in the Senate, House of Representatives, or joint session thereof, in so far as applicable, shall be and hereby is vested in said Legislature of one chamber. All provisions in the constitution and laws of the state relating to the Legislature, the Senate, the House of Representatives, joint sessions of the Senate and House of Representatives, Senator, or member of the House of Representatives, shall in so far as said provisions are applicable, apply to and mean said legislature of one chamber hereby created and the members thereof. All references to Speaker of the House of Representatives or temporary president of the Senate shall mean Speaker of the Legislature. Whenever any provision of the constitution requires submission of any matter to, or action by, the House of Representatives, the Senate, or joint session thereof, or the members of either body or both bodies, it shall after January first, nineteen hundred and thirty-seven, be construed to mean the Legislature herein provided for.

Sec. 5. At the regular session of the Legislature held in the year nineteen hundred and thirty-five the Legislature shall by law determine the number of members to be elected and divice the state into Legislative Districts. In the creation of such Districts, any county that contains population sufficient to entitle it to two or more members of the Legislature shall be divided into separate and distinct Legislative Districts, as nearly equal in population as may be and composed of contiguous and compact territory. After the creation of such districts, beginning in nineteen hundred and thirty-six and every two years thereafter, one member of the Legislature shall be elected from each such district. The basis of apportionment shall be population excluding aliens, as shown by the next preceding federal census. In like manner, when necessary to a correction of inequalities in the population of such districts, the state may be redistricted from time to time, but no oftener than once in ten years.

Sec. 6. The Legislature shall consist of not more than fifty members and not less than thirty members. The sessions of the Legislature shall be biennial except as otherwise provided by this constitution or as may be otherwise provided by law.

---

[12] Summers, op. cit., pp. 43 - 46.

Sec. 7. Members of the Legislature shall be elected for a term of two years beginning at noon on the first Tuesday in January in the year next ensuing the general the general election at which they were elected. Each member shall be nominated and elected in nonpartisan manner and without any indication on the ballot that he is affiliated with or endorsed by any political party or organization. The aggregate salaries of all the members shall be $37,500 per annum, divided equally among the members and payable in such manner and at such times as shall be provided by law. In addition to his salary, each member shall receive an amount equal to his actual expense in traveling by the most usual route once to and returning from each regular or special session of the Legislature. Members of the Legislature shall receive no pay nor perquisites other than said salary and expenses, and employees of the Legislature shall receive no compensation other than their salary or per diem.

Sec. 10. The Legislature shall meet in regular session at 12:00 o'clock (noon) on the first Tuesday in January in the year next ensuing the election of the members thereof. The Lieutenant Governor shall preside, but shall vote only when the Legislature is equally divided. A majority of the members elected to the Legislature shall constitute a quorum; the Legislature shall determine the rules of its proceedings and be the judge of the election, returns, and qualifications of its members, shall choose its own officers, including a Speaker to preside when the Lieutenant Governor shall be absent, incapacitated, or shall act as Governor. No member shall be expelled except by a vote of two-thirds of all the members elected to the Legislature, and no member shall be twice expelled for the same offense. The Legislature may punish by imprisonment any person not a member thereof who shall be guilty of disrespect to the Legislature by disorderly or contemptuous behavior in its presence, but no such imprisonment shall extend beyond twenty-four hours at one time, unless the person shall persist in such disorderly or contemptuous behavior.

Sec. 11. The Legislature shall keep a journal of its proceedings and publish them (except such parts as may require secrecy) and the yeas and nays of the members on any question, shall at the desire of any one of them be entered on the journal. All votes shall be viva voce. The doors of the Legislautre and of the Committees of the Whole, shall be open, unless when the business shall be such as ought to be kept secret.

Sec. 14. Every bill and resolution shall be read by title when introduced, and a printed copy thereof provided for the use of each member, and all amendments thereto shall be printed and read at large before the vote is taken upon its final passage. No such vote upon the final passage of any bill shall be taken, however, until five legislative days after its introduction nor until it has been on file for final reading and passage for at least one legislative day. No bill shall contain more than one subject, and the same shall be clearly expressed in the title. And no law shall be amended unless the new act contain the section or sections as amended and the section or sections so amended shall be repealed. The Lieutenant Governor, or the Speaker if acting as presiding officer, shall sign, in the presence of the Legislature while the same is in session and capable of transacting business, all bills and resolutions passed by the Legislature.

THE STRUCTURE OF THE MARYLAND LEGISLATURE

Unicameralism vs. Bicameralism

By John H. Michener

THE PURPOSE OF THE LEGISLATURE

The structuring of a legislature is not undertaken as an esthetic experience of value in itself, but as a means to secure a body that will function in the best possible manner. Alternative legislative structures must thus be evaluated in terms of their relative contributions to attainment of the purposes for which the legislature is created. A brief review of the basic purpose of the legislature helps clarify many of the problems involved in choosing between a bicameral and unicameral legislative structure.

The basic purpose of the legislature in modern times is to represent the electorate and to enact legislation carrying out majority wishes. Protection of minority interests is not a function of the legislature, as such. Protection of minority interests--or in broader terms, the distribution of power among the components of society--is a function of the constitution and the whole constitutional system. Internal restraints or impediments to legislative action are but one of a number of alternative means of protecting minority interests, and a means that has little justification if the other means in the constitutional system as a whole are adequate.

The failure of legislatures to fulfill their basic purpose adequately has been a fundamental cause of the most prevalent

INTERSTATE LEGISLATIVE RESEARCH

tendency in modern constitutional government, the decline of the legislative assembly.[1]

In choosing between a bicameral or a unicameral system, there needs to be a recognition of the underlying purpose of the legislature and an explicit decision on the worth of legislative impediments to implementation of majority wishes, in terms both of the value of that which is gained and the value of that which is lost.

ORIGIN OF BICAMERALISM

Bicameralism is not the outcome of deliberate choice, but is rather an accident of English history and the influence of the English example on other nations.[2] The system is rooted in the stratified social order of the later Middle Ages.[3] The various social classes then existing formed different estates. When necessary, each class met as a separate "estate" in a "states general." In England the various estates came to sit in two houses. In France there were three estates, which last met in 1789. Four estates met in Sweden until 1866.[4]

Though it was an accident of English history that there were two chambers in the legislature rather than three or four, it was not an accident that there were two chambers rather than one. Similarly, it was no accident that a bicameral system developed in Maryland. The first assemblies in Maryland had but a single house. This house, it was charged, was under the control of the governor through his power to summon the attendance of individual citizens in the assembly on a selective basis and to use proxies held by

himself and the secretary of the colony.[5] In order to prevent this subjection, the burgesses elected by the freemen requested in 1642 that they be allowed to meet in a separate house. Although this request was refused then, a bicameral legislature was adopted in 1650.[6] Thereafter, Maryland had a bicameral legislature, except for a brief reversion to unicameralism during the period of Puritan ascendancy from 1654 to 1657.[7] Bicameralism thus came to Maryland as a means of increasing the responsiveness of the legislature to the electorate and not as a check on popular wishes.

ARGUMENTS FOR RETENTION OF THE BICAMERAL SYSTEM

The forces leading to the creation of the bicameral system are not the same as the forces leading to its retention. Retention of the bicameral system has been urged on the following grounds:

1. The upper house provides a protection for the propertied classes.

   With the abolition of property requirements for voting, particularly for voting for the upper house, this justification lost its compelling force. Moreover, Federal and State constitutional protections for property have proved adequate in the view of most observers. The argument is no longer made today.

2. Two houses permit representation of different interests in the two chambers.

   With the lower house based on population, the upper house can be constituted on another basis, such as representation of area. This argument has not been viable since 1964 when the

Supreme Court held that both houses of State legislatures must be apportioned on the basis of population.[8]

3. The second chamber provides a check on "popular passions."

In the words of Justice Story, a second chamber "forms a great check upon undue, hasty, and oppressive legislation."[9]

4. A second chamber can give an independent and thorough review to the need for and character of proposed legislation and so detect and avoid unnecessary or faultily drafted legislation.

5. A bicameral system permits the defeat of undesirable but popular legislation where outright opposition to the legislation would be politically dangerous.

6. A bicameral legislature prevents unity in the legislature and so precludes the success of any legislative attempts to invade the powers of the executive or judicial branches or the powers of the people.

7. A bicameral system prevents corruption of the legislature.

Corruption of a single chamber might succeed, but it would be much more difficult to corrupt both houses at the same time.

8. The bicameral system is the traditional system in the United States and is familiar to the voters.

The foregoing arguments are assumed by the proponents of bicameralism to be self-apparent. Research studies documenting these claims are not available.

In addition to these direct arguments for a bicameral system, the proponents of bicameralism attack certain features of the unicameral system. Generally, these attacks take the form of an

assertion that the unicameral system lacks some desirable features found in the bicameral system, in particular, checks on popular passions and an independent review. The specific features of the unicameral system are not attacked as undesirable in themselves.

ARGUMENTS FOR THE UNICAMERAL SYSTEM

The case for unicameralism rests on three grounds: (1) an assertion that there is no justification for the present bicameral system, (2) a positive plea for the merits of unicameralism, and (3) a refutation of the asserted deficiencies of unicameralism.

The Attack on Bicameralism

As noted earlier, justification for a second chamber is no longer claimed on the grounds that the upper chamber protects the propertied classes or permits the representation of different interests in the society. It should be noted in passing, though, that historically these were the two fundamental justifications advanced for the bicameral system. With their fall, the justification of bicameralism has had to fall back to secondary arguments which the unicameralists claim to be untenable.

The claim that bicameralism provides a check on "popular passions" and on hastily drawn legislation is vigorously attacked by unicameralists. One aspect of the attack involves basic differences in the judgment of the proper role of the legislature. Thus the unicameralists assert that a check on legislative action, purely for the sake of blocking action disliked by the minority, is undemocratic and one of the prime causes for the widely recognized decline of legislative power vis-a-vis the executive.

Further, state the unicameralists, the claimed need for a review is a tacit recognition of the inherently faulty nature of the bicameral system with its confusion of responsibilities that permits legislators to escape public accountability for their actions. If the legislature were properly structured, there would be little need for a review of its work. On the practical side, the unicameralists assert that the so-called popular passions can dominate both chambers, as in some legislatures during the McCarthy era. In this view, the protection of the rights of unpopular groups lies basically in an educated citizenry and in the overall structure of the constitutional system. Furthermore, the branch of government that has raised its voice against popular views in defense of minorities has not been the legislature but the courts. Simply put, there is no data supporting the claim that the second chamber acts as a constructive check on the first.[10] Conversely, American experience has shown that in normal times the legislature is not inclined to ride roughshod over the rights of the well-to-do. Instead, the inclination is to avoid action on important issues and not to be influenced by popular passions.[11]

The unicameralists similarly dispute the view that the second chamber acts as an independent body of review to correct faultily drafted legislation. The objections to the claim fall into three major categories.

First, there is an assertion that, in fact, an independent review is often not given by the second chamber.[12] For example, bills are often received by the second chamber so late in the session that it is physically impossible to give them a thorough

consideration. Often times bills are hastily passed by the first house on the assumption that they will be carefully examined by the second chamber, an assumption that is sometimes poorly founded. With respect to noncontroversial bills, in particular, it is claimed that the second chamber seldom gives careful consideration, and that such consideration is often not given by the first chamber either.[13]

The second category of objections is that such checking or review that has been done has not been demonstrated to be of merit. The value of a check is not measured by its extent, but by its wisdom. In the case of Vermont, where a careful study was made of this point, not one of the "checked" bills could be classed as dangerous or seriously unwise.[14] Similarly, the National Municipal League states that there is no data to support the claim that a bicameral system results in better policies or more carefully drawn laws.[15]

The third category of objections claims that there is little need for a technical review. The argument for a second chamber review antedated the rise of the Legislative Council, of executive sponsored legislation, and of professional bill-drafting services. Important present day legislation has been carefully considered and drafted before introduction into the legislature, so that passage by one house in itself constitutes an independent review. A second chamber, with no special knowledge of the problems or technical competence in drafting legislation, has nothing further to contribute.

Proponents of unicameralism give short shrift to the claim that bicameralism permits the killing of undesirable but popular legislation. In the view of the unicameralists, this is but a tacit concession that bicameralism confuses responsibility and permits legislators to hide from the consequences of their actions, or, in blunt language, that bicameralism permits deception of the electorate. In the unicameralist view, if the legislation is popular but undesirable, the legislators have a duty to educate the electorate to an understanding of the reasons why the legislation is undesirable.

The claim that bicameralism prevents undue aggrandizement of legislative power is similarly rejected by unicameralists. Unicameralists point out the claim traces back to the days of the founding of the American constitutional system when democracy was suspect and it was anticipated that the legislature would be the dominant branch of government. History has proved the fear of legislative usurpation to be misplaced; today the need is to strengthen the legislature, not to weaken it. Further, the best check on the legislature is clearly focused public accountability.

The unicameralists also dispute the claim that bicameralism prevents corruption of the legislature. In the past, unicameralists point out, simultaneous corruption of both houses of state legislatures has actually occurred. Today, protection of vested interests requires primarily the blocking of legislation rather than the passage of new legislation. Bicameralism presents more points at which legislation can be stopped, and with less fear of

popular understanding of what has happened, than does unicameralism. In this view, corruption is a greater danger under bicameralism.

Finally, unicameralists reject the validity of the argument that bicameralism is desirable since it is traditional and understood by the voters. A traditional form of government does not mean it is good. When Lord Bryce wrote the American Commonwealth after visiting the United States in the 1880s, he commented that the government of the cities, then almost all bicameral, was the one conspicuous failure of the United States. The dramatic improvement of city governments since then can be traced directly to the abandonment of the traditional bicameral system in favor of unicameralism.[16]

Voters are in intimate contact with city governments and have a good understanding of unicameralism. Voters also have some knowledge of corporate structure with its strong parallels to unicameralism. Further, it is widely known that Nebraska has experimented successfully with unicameralism. Under these circumstances, it is no longer possible to pass unicameralism off as something strange and untried to be rejected in favor of the "traditional" bicameral government.

Not only do the unicameralists dispute the merits of every claim made for bicameralism, they claim that bicameralism has a number of positive disadvantages.

First among the disadvantages is the conference committee. This committee, it is claimed, often functions as a secret "third" chamber unaccountable to the electorate. Further, compromise measures as reported out by the conference committee must be

accepted or rejected by each house in toto without opportunity for amendment. Since the work of the conference committee is carried out in secret and sometimes hastily, unicameralists claim the conference committee is not only undesirable but a negation of the claim that bicameralism assures a check to prevent faultily drawn legislation. A student of the conference committee as it functioned in Nebraska before the adoption of unicameralism in 1934 reported that over 25% of all measures that were amended by the second chamber passed through conference. This same student of the Nebraska experience also found that almost 70% of all bills considered by the conference committee were referred to that committee during the last twenty days of the legislative session and that almost 50% of such bills were referred during the last ten days of the session.[17]

A second claimed disadvantage of bicameralism is the rivalry sometimes engendered between the two houses. Documented examples of this at the state level are not readily available, but a recent episode in the United States Congress illustrates the danger. In the case at point, appropriations to the executive departments suffered an extensive delay because the chairmen of the House and Senate appropriation committees could not agree, among other points, on where the conference committee, appointed to compromise the differences between the two chambers, was to sit.[18]

A third claimed objection to bicameralism is that it obscures responsibility and prevents accountability to the electorate. The claim here is that a measure can be passed in the two houses in slightly different form with agreement being deliberately not reached in conference so that the measure is defeated although

everyone is on record as being in favor, that a measure may pass one house as the best that could be obtained from the second house, rather than on its merits, or on the grounds that the choice was between a version worked out in conference or nothing. In all of these cases, it is impossible for the average voter to know who was responsible for the final action and should be held to account.

The Merits of Unicameralism

Although unicameralists dispute the merits of every claim made for bicameralism and advance some positive arguments against bicameralism, their advocacy of unicameralism rests primarily upon positive advantages they see in the latter system. These claims may be summarized as follows:

CLAIM 1. Unicameralism is more efficient than bicameralism.

The basic claim here is that each bill needs to be considered by only one house, eliminating a wasteful duplicative consideration. This results in more expeditious introduction and consideration of legislation and the elimination of the common end-of-session legislative log-jam. Thus in the 1949 Nebraska legislative session, only seventeen bills were introduced after the first twenty legislative days, and a number of these were recommended by the governor or were substitute or consolidated bills introduced by committees rather than by individual legislators.[19] In this session, one-half of the bills acted on by the legislature had been handled by the mid-point of the session. Three-fourths of those acted on had been handled by the two-thirds point of the session. In the last two weeks, only 44 bills were acted on. Of these 44, eight were

considered in the last week, and only one of these eight on the last day.[20] In the 1961 session, 25 bills remained to be disposed of in the last two weeks and only six on the last day.[21]

CLAIM 2. Unicameralism results in legislators of higher quality and greater prestige.

Usually this claim is made in general terms.[22] However, a study in 1944 showed that over 50% of Nebraska's unicameral legislators had had some college work or had attended an institution of higher learning.[23] Most had held public office or were influential members of civic or state social and economic organizations. In 1950 it was reported that two-thirds of the legislators had had previous legislative experience.[24]

On the other hand, a careful student of the subject believes it is unresolved whether unicameralism improved the moral and intellectual caliber of the Nebraska legislators.[25]

CLAIM 3. Unicameralism results in a more representative legislature.

Under the bicameral system in Nebraska, 52% of the legislators had only a single occupation while 48% had two or more occupations.[26] Under unicameralism, only 31% had a single occupation while 69% had two or more. Multiple occupations are claimed to bring a greater awareness of the problems and ramifications involved in legislation and so to make the legislator more responsive to constituent needs. Conversely, the change to unicameralism in Nebraska did not disturb the ratio of farmers, business, and professional men elected to the legislature. Thus the cross-section of the community remained

the same so that reduction in the number of representatives had no adverse effect.[27]

CLAIM 4. Unicameralism results in a positive improvement in the quality of enacted legislation.

Fewer statutes enacted under Nebraska's unicameral legislature were declared unconstitutional, as compared to its bicameral statutes, and fewer statutes were found to have "bugs" or "jokers."[28] Some of the credit must go to the simultaneous institution of a legislative council with the unicameral legislature, but proponents claim the unicameral legislature deserves part of the credit. Several reasons are advanced. As will be noted below, unicameralism results in the introduction of fewer bills. This means that each bill that is introduced can be given more time. Secondly, the increased efficiency of the unicameral legislature eliminates the hasty consideration often given to bills under a bicameral system. Thirdly, the unicameral legislature bears full accountability for the quality of the bills passed and this responsibility cannot be blurred by shared responsibility with a second chamber. Fourthly, bills often pass one house of a bicameral legislature in the expectation of defeat in the second chamber.[29] Such expectations are not always realized. Under unicameralism this type of miscalculation is eliminated.

CLAIM 5. Unicameralism results in higher standards for the introduction of bills.

Under unicameralism, a Nebraska legislator pointed out, he could no longer introduce a bill at the request of a constituent and then ask the other house to kill it.[30] The result of

unicameralism in Nebraska was a spectacular 43% reduction in the number of bills introduced.[31] Concomitantly, the percentage of introduced bills that were enacted rose from less than 20% under bicameralism to over 50% under unicameralism.[32]

CLAIM 6. Unicameralism brings lobbyists out into the open where their activities are subject to public scrutiny.

The claim here is that the direct and open procedures of the unicameral legislature, and the searching publicity that unicameralism permits, soon expose any member who is prone to succumb to lobby influence.[33] It is not uncommon for a Nebraska legislator to denounce a lobbyist by name on the floor of the house and to give a statement of what the lobbyist has been doing.[34]

The attainment of common policy between the two chambers of a bicameral system is greatly assisted--far more than is commonly realized--by pressures put on by lobbyists.[35] Unicameralism prevents this, and also prevents lobbyists opposing legislation from secretly maneuvering to get the two houses to adopt different versions of the bill so that it might be killed altogether or to give the lobbyists a chance to secretly influence conference action and the writing of the conference report.

Although unicameralism reduces the number of opportunities for lobby influence, and makes attempted influence more likely to receive public scrutiny, some observers do not believe the claim that unicameralism reduces the influence of the lobby to be positively proved.

CLAIM 7. Unicameralism pinpoints responsibility for legislative actions.

Under unicameralism responsibility is clearly focused.[36] There is no opportunity to pass bills for the other house to kill, to alter or kill legislation in the secrecy of the conference committee, or to claim that there is no use to consider certain legislation on the grounds it would meet sure death in the other chamber. Without the complexities of bicameral procedures, it is easier for the public to keep track of the progress of legislation. The interaction of these two factors results in pinpointed responsibility for legislative actions.

CLAIM 8. Unicameral legislatures are more economical.

The Vermont unicameral legislature was less expensive than the bicameral legislature both in total expenditures and in per capita expenditures.[37] In Nebraska's case, the switch to unicameralism reduced legislative expenses by almost 25%. A legislative council was introduced at the time of the switch to unicameralism. If the expenses of the council are excluded from the costs of operating the unicameral legislature, the savings amount to over 27%.[38] The reasons for this are obvious. A unicameral legislature, as compared to a bicameral legislature, can be expected to have fewer salaried members, a smaller legislative staff, reduced travel allowances, smaller printing expenditures, and so on.

OTHER CLAIMS. Unicameralism results in improved public understanding of legislative activities, the development of legislative leadership is facilitated, and a closer relationship between the legislature and the governor is permitted.

The first of these claims is implicit in many of the claims discussed above. The simplicity and openness of the unicameral system permits easy news coverage and searching publicity. Increased public understanding is an inevitable result. The development of legislative leadership is facilitated through its concentration in one chamber. This same concentration of leadership simplifies the working relationship between the governor and the legislature.

Rebuttal of Objections to Unicameralism

Unicameralists reject the criticism levied by the bicameralists. The one major objection to unicameralism is the fact that a review by the second chamber is eliminated. As noted before, unicameralists counter with an attack on the general worth of the review given by bicameral systems, point out the lessened need for a second legislative review with the growth of legislative councils, professional bill drafting services, and executive leadership, and claim the experience of Nebraska has proved in fact that there is no need for review. Should it still be felt, however, that a second legislative review is needed, the unicameralists point out that this can be secured under their system.

One method of securing a review is to require that certain categories of legislation be passed by two different sessions before becoming effective. The second passage may even be required to come after an intervening election. Because of the delays involved in this approach, it is feasible only with respect to fundamental issues where the need for a wide and lasting consensus

is of vital importance. Another approach, feasible for ordinary measures, is for the legislature to choose, when it first convenes, a portion of its membership to sit in a separate revising chamber. This is now done in the unicameralist Scandinavian countries.[39] All major questions and all conflicts between the two houses are handled by a majority vote of the two houses in a common session. In short, the second chamber can suggest revisions but has no power to enforce them over the wishes of the elected legislature. This, it will be recognized, is in effect the British system where the House of Lords can suggest revisions but no longer has power to prevent the passage of legislation. This method of securing a review of the work of the elected legislature bears a noticeable resemblance to the "Virginia Plan" advanced in the Constitutional Convention of 1787. That plan, favored by James Madison among others, provided for a lower house elected by the people, with an upper house chosen by the lower house.[40] Since the upper house would be chosen by the lower house, even though the choice was from nominations submitted by the various State legislatures, the upper house under the Virginia Plan could not be expected to prevail in a conflict between the two.

CONCLUDING REMARK

The foregoing summary of the arguments advanced for and against bicameralism and unicameralism tips heavily in favor of unicameralism. This is a reflection of the fact that people who write on the subject--political scientists and other persons with academic backgrounds in the main--heavily favor unicameralism. The most

that is said against unicameralism by persons within this group is that a clear superiority over bicameralism may not have been factually proved. Persons holding this reservation appear to be in the minority within the group. There is some comment that analyses to date are not conclusive on the grounds that a modernized, up-dated bicameralism has not been tried. The difficulties with this observation are that it may be easier to secure a wholesale revision of the legislature itself than to induce an existing legislature to reform its procedures, and that the suggested bicameral improvements--such as joint committee hearings and possibly joint committees--actually are partial moves towards unicameralism, for the real work of legislatures is done in committees and not on the floor of the houses.[41] In view of this, the unicameralists ask why reform should stop with half-way measures.

Practicing politicians favor bicameralism. Even here the unicameralists suggest that this may be due not to the merits of the case but to a fear of the personal political consequences of the transition to unicameralism, for among Nebraska legislators who have had experience with both systems--and who thus survived the transition--there is an overwhelming preference for unicameralism. A survey in 1961 of 68 present and former Nebraska legislators showed that only four wanted a return to bicameralism.[42] Earlier one legislator who had served four years in the Nebraska lower house and two years in the Nebraska Senate under bicameralism, and who had voted against unicameralism, stated that unicameralism

was a decided improvement over the previous bicameral system.[43] This legislator, C. Petrus Peterson, had also served as Speaker of the unicameral assembly, so he was intimately acquainted with the practical workings of both systems.

In this article, a member of the Nebraska Legislature takes an incisive look at his State's unicameral legislative body, the only one-house Legislature in the United States. Senator Richard D. Marvel, who has served in the Legislature since 1951, finds that the people of Nebraska, the geography of the area, its economics and other sociological factors have played an important role in the development of the Nebraska unicameral. A second and concluding article by Senator Marvel will appear in a subsequent issue of State Government.

A Member Looks At
The Nebraska Unicameral

by Richard D. Marvel

ONE OF THE BASIC functions of a legislative body is to make decisions for the society which it represents. "The task of government is not to express an imaginary popular world, but to effect adjustments among the various special worlds and purposes which at any given time are pressing for realization." [1]

One cannot adequately understand pressure politics in Nebraska and the decisions that result without an analysis of the people of the State as well as the legislative institution which they have developed. The history of Nebraska, the structural processes of the Legislature, and the personal, informal influences which affect each State Senator must be described in trying to point out possible influences on the final product—legislative decisions.

PHYSICAL FACTORS

Nebraska is *geographically* classified as being part of the Great Plains area, with three distinguishing characteristics: "a comparatively level surface of great extent; a treeless land and unforested area; and a region where the rainfall is insufficient for the ordinary intensive agriculture common to the lands of the humid climate." [2] Eastern Nebraska, however, does not fall into the Great Plains area and contains not only entirely different topographical characteristics than the land west, but also is in an entirely separate rainfall area. "The state is indeed in the transitional area and for that reason, perhaps, its problems are more complicated." [3] Thus, the geography of the State may be responsible for many of the differences in attitude between the eastern and the western Senators.

Major rivers also play a role in both unifying and dividing Nebraskans. Every mile of the Platte River "is bound to history and politics." [4] It provided a pathway for settlers, de-

fined the major route for the railroads, became a political dividing line, and during the 1940s and 1950s the river became the center of bitter water diversion battles in the Nebraska Legislature.

DEMOGRAPHIC FACTORS

Nebraska has a built-in urban-rural population schism, for Douglas (Omaha) and Lancaster (Lincoln) counties—both located in the eastern one-third of the State, only sixty miles apart—contain over 35 per cent of the State's 1.5 million population and have enjoyed the major population increase in recent years. Observers predict that within a few years Omaha and Lincoln will have over 50 per cent of the population and will, thus, be entitled to a majority of the representation in the State's unicameral Legislature.

Probably of more significance for the future is the ratio of school age residents to total population. In 1964, Nebraska ranked thirty-eighth in this category, with school age population as 25.6 per cent of the total. In the same year, Nebraska ranked fourth in the Nation in its population of those over sixty-five years of age —a percentage of 11.6.[5] Immigrants have played an important part in the development of the State. The typical immigrants were poor people—thrifty, conservative, religious, and pragmatic. The Germans led the influx with more than 200,000 of the 538,218 foreign population in 1910. Large numbers of Scandinavians and Czechs populated the State as well as lesser numbers of Central and Southern Europeans, Dutch, French, and English. While the Yankee settlers tended to be more progressive and interested in innovation than were many other groups, "immigrant pioneers influenced the state's politics, its fiscal viewpoint, and its morals." Negroes, predominately located in the metropolitan areas, today number only 2.1 per cent of the population, and the other main disadvantaged minority group, the Indians, account for less than 0.5 per cent of the population.

ECONOMIC FACTORS

Founded on an agricultural basis, Nebraska today remains primarily an agricultural State. The State's economy stood sixth in agricultural products in 1967. The farming industry is a $1.73 billion annual business in Nebraska. There are 6.4 million head of cattle worth $1 billion. Nebraska has over twice as many people employed in agriculture as in manufacturing.[6] Present Nebraska industry is largely centered in the metropolitan areas of Omaha and Lincoln. Dougias County (Omaha) has 38 per cent of the manufacturing industries and 45 per cent of those employed in manufacturing.[7] The agricultural emphasis is even more apparent in light of the fact that over 40 per cent of the manufacturing employees process food and other related products.[8]

The interdependence of agriculture and manufacturing is not a coincidence, and Nebraska farmers have historically had a business-oriented view. The latter view triumphed over the Populist view which refused to accept price control based on production limits.[9]

With recent legislative enactments, many of Nebraska's pillars of fiscal conservatism have fallen. No longer can the State "boast" of no broadened tax base, no state aid to schools, and the lowest per capita state tax in the Nation. Frugality is understandable considering the environment of the Great Plains. In Nebraska, the environment imposes variability and stresses the importance of a materialistic, conservative orientation to life. Uncertainty encourages the citizen to buy, plan, and operate cautiously with an emphasis on practical living. As one western Nebraska mayor commented: "The depression years are still looking over our shoulders."[10]

[10] Frederick C. Welso, Mayor of Rushville, Nebraska, personal interview, July 18, 1964.

Political squabbling dating from the first legislative sessio: between the North and South Platters set a pattern for political behavior which remains even today. Railroads made their presence felt in the early history of Nebraska and have played a significant role in the State's economic and political development. It has been said that the two most important factors in Nebraska's settlement were the construction of the railroads and a liberal land policy.[11] Towns vied for railroads and the competition encouraged feelings of localism and community spirit. A pioneer wrote in 1868: "One part of Nebraska belongs to the speculator, one part to the state, one part to the schools, and one part to the Union Pacific."[12] The political influence of the railroads is still felt in Nebraska, for the railroads continue to be important to the State's economy.

The home of *agricultural innovation,* the Great Plains region has also been "a land of *political innovation,* expressing itself in such vagaries as populism, agrarian crusades, and farm relief."[13] Nebraska has been an active, and at times the dominant participant in these various movements. Yet, the agrarian political behavior was unlike other segments of the population, "In short, the farmer reacts to economic pressure with political protest; yet the response has an explosive quality—great force without duration—which is unique."[14] Perhaps it is not too far-fetched to trace the individualism and the nonpartisanship of early agricultural political revolts to the signs of weakness in the Nebraska political parties by the mid-1930s, and ultimately to the establishment of a nonpartisan State Legislature.

It might be expected that a lack of commitment to a political philosophy would lead to significant variation in Nebraska's national political preference. However, this does not seem to have been the case. Dr. Jasper Shannon shows that "Nebraskans generally prefer a Republican liberal or progressive to a Democratic one,"[15] selecting Republicans in eighteen of twenty-four presidential elections.[16]

The environment and conditions of settlement contributed to strong feelings of *localism* and opposition to centralization. The necessity of the settler to look within himself in the midst of isolation and desolation caused localism to become the only understandable way of life. Localism is still strong today and finds expression in strong opposition to state involvement in educational matters.

THE LEGISLATOR—A BLEND

From this brief survey, one might be led to hypothesize that the Nebraska legislator is probably a highly individualistic, conservative, Republican, rurally oriented with a pro-business and anti-labor outlook, cautious with regard to spending, and a staunch advocate of local control. Yet, this picture would fail to account for the liberal innovations which have been a part of Nebraska history—the Populist-Progressive reforms, a complete public power complex, the somewhat radical design of the state capitol, and a one-house, nonpartisan Legislature. This blend of conservatism and liberalism may find its origin in the environment of the Great Plains which "challenges human intelligence in regard to every aspect of life—technological, economical, political, social, even philosophical."[17] This dichotomy has been evident throughout Nebraska history. Whatever the reason, it is evident that "there seems to be a contradiction in everything the Nebraskan thinks and does. He is secure, yet insecure; he is conservative, yet radical; he believes in both private ownership and public ownership. In his shifting moods and attitudes, the Nebraskan is like most of the great Midlands."[18] Thus, a more valid hypothesis would

seem to be that when an overall perspective of the legislative voting pattern is achieved, the Nebraska legislator will prove to be not of extremes, but of moderation, a blend of conservative and progressive strains.

DEVELOPMENT OF THE UNICAMERAL

The development of Nebraska's nonpartisan, unicameral Legislature was the result of the State's political, social, and economic history. Even though a unique set of circumstances led to the birth at that particular moment in 1934, the thinking of the people as it evolved made the enactment of the system possible.

A number of events and individuals kept the unicameral idea before the people awaiting the right moment. During the Progressive period of the early 1910s, J. N. Norton came to the Nebraska House and eventually became majority leader and speaker pro tem. Norton was interested in the unicameral idea and pushed for it during his legislative career. The issue lost in the Constitutional Convention of 1920 by only one vote. In the same year, a model state constitution recommended by the National Municipal League advocated the adoption of a unicameral State Legislature. In this same period, Senator George Norris was actively supporting the unicameral ideas in speeches and articles. Dr. John P. Senning, head of the Political Science Department at the University of Nebraska and member of the survey committee for the constitutional drafting committee of 1919 to 1921, saw the unicameral "as the next logical step for the improvement of the structure of the legislature." [19] The proponents believed the unicameral would be more representative of a legislative body, more open to public scrutiny, and more readily accountable to the electorate. Senator Norris saw partisanship and the conference committee as the two main roadblocks which tended to separate the public from its state representative.[20]

It was through Norris's efforts that the nonpartisan feature was part of the proposal put before the people in the election of 1934.

The year 1934 was economically poor for Nebraska. Agriculturally, the State had experienced hard times as early as the 1920s when the parity index began to take an unfavorable turn. Thus, the economic argument of the lesser cost of the unicameral no doubt had relevance for many people. Also, there were two other key constitutional amendments slated for consideration in 1934—a parimutuel proposition authorizing horse racing and repeal of prohibition. Advocates of these amendments, fearful that a "no" vote on one issue might jeopardize all, urged their supporters to vote "yes" on all three propositions. All three carried—repeal of prohibition by 328,074 to 218,107, parimutuel by 251,111 to 187,455, and the unicameral 286,086 to 193,152.[21]

Many credit one personality or organization for the success of the unicameral campaign. One author perhaps has summed it up best: "We may have to be content with the belief that the combination of forces and circumstances of the election produced the unpredicted. Certainly it was a decision that dismayed and perplexed many political experts." [22] Perhaps it is appropriate to say that originally Norton's promotion kept the unicameral ideal alive; that Norris' political astuteness judged the "Nebraska mind" ready to accept the proposition in 1934; and that Senning's educational background added the third element—political theory—to the triumvirate.

FORMAL STRUCTURE OF THE UNICAMERAL

The unicameral structure represents the innovative, yet conservative, spirit of the Nebraska pioneers. The basic goals of the unicameral, as propounded by its supporters and translated into the organization and rules of the Legislature, can be summed up as follows: (1) direct communication between the public

[19] John P. Senning, *The One House Legislature* (New York: McGraw-Hill Book Company, 1937), p. 3.

[20] George W. Norris, "The Model Legislature," address given in Lincoln, Nebraska, February 22, 1934, reprint from Congressional Record, February 27, 1934 (Washington, D.C.: U.S. Government Printing Office), pp. 3276-3280.

[21] Senning, *One House Legislature*, pp. 60-61.

[22] Adam Carlyle Breckenridge, *One House For Two: Nebraska's Unicameral Legislature* (Washington, D.C.: Public Affairs Press, 1957), p. 5.

and the legislative body, (2) visibility, i.e., playing the legislative game in the open, (3) adequate and full deliberation, (4) mobilization of power, (5) maximization of leadership potential, (6) representation of every major segment of the State's population, (7) protection of minority rights, (8) and the sum total of all of the previous goals—democratic representation.

Access and Visibility

The legislative operation and structure provides an excellent opportunity for the interested citizen to obtain access to the conflict and to observe the development of the battle plans. Visitors are separated physically from the Senators only by a rope strung across the rear of the chamber. Only forty-nine actors are involved and it is relatively simple to discern the key leaders in order to make direct contact with them. Perhaps the most important access point to both organized and unorganized groups is the committee hearing. Almost all bills are given a public airing to which any interested citizen is invited. Printed notice must be given five days before a hearing is held.

The Legislative procedure insures "openness" at all stages. A report on a bill or resolution must be made to the Legislature within eight calendar days after the committee has acted upon the particular measure[23] and the chairman must be accountable for the reasoning behind each decision. Any committee member who disagrees with the decision of his standing committee can rise on the floor to explain his opposition.[24]

Floor debate and voting procedure add another dimension to the visibility aspect. An electronic voting machine permits an observer to see at a glance how any Senator has voted. The vote on final reading is recorded in the daily Legislative Journal, but at any time while the bill is being processed a member can request a machine vote and can ask that this vote be made part of the record.[25]

Informed Deliberation

Public hearing is the first step a bill takes after introduction. After the open committee session, where all can testify, the committee goes into secret or executive session to take action on the bill. When a bill is released by a committee, it will be considered by the entire Legislature after being placed on general file, the first of five procedural steps, followed by enrollment and review for review, select file, enrollment and review for engrossment, and final reading. The first full-scale debate of any bill occurs during the time that bill is on general file.

The select file provides an additional deliberative step largely unknown in other legislative bodies. It provides an additional opportunity for debate and examination of the measure. "Procedure on Select File was really action in another committee of the whole."[26]

The two enrollment stages provide for technical correction of the bill and the addition of amendments. A full-time attorney is hired to assure legal correctness.

The last file is final reading. All Senators are required to be on the floor, and no visitors are permitted to contact the Senators.[27] As the entire bill is being read, the Senators, free from interruptions, have a final opportunity to study each bill.

The rules which govern movement of the bill across each of the five files provide that: (1) five legislative days must have passed since the bill was initially referred to enrollment and review, (2) it must have passed two legislative days on the board after its reference to the final reading file, and (3) a final printed form of the bill must have been upon the desks of the members for at least one legislative day.[28]

The unicameral's founders obviously felt that the deliberative process could not be left to chance. The original steps, largely intact, are still providing the necessary checks against hasty or ill-informed legislation.

Mobilization of Power

The unicameral structure provides a flexible framework for the use of political power. Flexibility in this instance refers to three major areas—method of selection of legislative leaders, development of leadership by specialization, and the presence of voting blocs which shift with specific issues. Neither seniority, partisanship, nor gubernatorial influence have been of major significance in the power struggle in Nebraska's unicameral structure.

The election of legislative leaders—the speaker, chairman of the committee on committees, and the chairman and vice chairman of the legislative council—is by secret ballot, not by party alignment.[29] The speaker presides during the absence of the Lieutenant Governor,[30] but his real power is based upon his membership in the reference committee[31] and the legislative council executive board. The speakership, often conferred on one of the senior members, has been more a position of honor than power in Nebraska.

The chairman of the committee on committees is a strategic position. This committee chooses the chairman and members of each standing committee. Though geographical distribution, nonpartisanship, and a blend of freshman and experienced Senators is sought, politics is a vital aspect of committee assignments. Both opponents and proponents of a broadened tax base in the past have attempted to put their friends on the revenue committee. Spending agencies of state government, in like manner, are always happy when their supporters find a position on the budget committee.

A person can rise to committee chairman in as few as two terms. Often geographic location or spending philosophies are the basis for selection. Peculiar to the unicameral is the fact that committee chairmen usually retain their positions for no more than two consecutive sessions. The chairman and vice chairman of the five-member legislative council executive board can be very influential. This board, which also includes the speaker and chairman of the committee on committees, heads the main research unit available to the Legislature and directs interim studies.

Bills are assigned to various standing committees by the reference committee—the speaker, chairman of committee on committees, and the Lieutenant Governor. Obviously, referral to an unfriendly committee can greatly lessen a bill's chances for survival.

While partisan machinery might make voting blocs more rigid, Nebraska's nonpartisanship finds that opponents on one issue may be proponents on another. In other words, issues tend to take the place of party alliances in Nebraska's legislative voting patterns.

Leadership

The legislative climate includes an opportunity for advancement which is not based on seniority. Nonpartisanship permits legislators to wield a considerable amount of individual authority and influence through identification with specific subjects. Ideally, the Nebraska unicameral structure provides the laboratory for the individual who desires to use his talents to full capacity to experiment with the problems of state government. The product of legislation in the American democracy must include the ingredients from the many elements of the society being served. To meet the diverse needs and demands requires the leadership traits of courage, patience, and understanding. The author believes these traits have been encouraged to a greater degree under a nonpartisan, one-house legislative structure.

Majority and Minority Rule

Minority groups in our framework must be allowed to speak, but not so loudly or forcefully as to thwart the majority. A Nebraska citizen can be heard on any issue through individual effort or by uniting with a group which shares his view.

A potent majority, properly organized, is provided adequate means of expression within the unicameral system. Neither party, seniority customs, nor a second house stands in the way

[29] Ibid., Rule 3, sec. 1.
[30] Ibid., Rule 2, sec. 1.
[31] Ibid., Rule 14, sec. 1.

of the majority. Lobbying by minority groups behind closed doors is reduced by a visible, accessible, legislative system operated by a small, easily identifiable membership.

Democratic Representation

The sum of all the elements discussed previously should lead to representative government producing moderate decisions. A legislative structure must afford the opportunity for the cooperative use of all its elements to meet the challenges facing modern representative democracy. The nonpartisan unicameral structure provides the mechanism to meet the demands of the first seven points. The seven goals, together, can attain maximum coordination through the nonpartisan, unicameral structure and thus produce the eighth goal—moderation through democratic, representative government.

INFORMAL INFLUENCES ON DECISION MAKING

Each individual elected to the unicameral brings with him predetermined philosophies and prejudices which collide with the informal rules of the group. His "role concept"—how he relates to each individual, to society, and to the world—influences his behavior in the role of a legislator. This "role concept" can be said to be composed of three elements: (1) the personal background and relationships a legislator brings with him to the Legislature, (2) the outside pressures of constituents, groups, parties, and agencies of state government, (3) the "rules of the game" governing the roles and actions of the members of the legislative group itself.[32]

The Legislator in Perspective

As was the pattern in the majority of the States, the Nebraska Legislature has had to wrestle with the reapportionment problem. Originally set up on an equitable distribution of population, urban growth in the 1950–60 decade resulted in an imbalance. The 1962 general election results not only indicated the population disparity between rural and urban legislative districts, but also revealed the appreciable difference within the metropolitan areas of both Omaha and Lincoln.

Urban-sponsored reapportionment acts were killed in the 1959 and 1961 sessions. A compromise establishing a population-area formula was passed by the Legislature as a constitutional amendment in 1961 and was approved by the voters. The 1963 Legislature implemented the measure, allowing a 20 per cent weight for area. A three-member federal court, however, voided the act, but approved a 1965 reapportionment act following a population discrepancy of almost 20 per cent.[33] Thus, one obstacle to possible majority rule in the Nebraska unicameral has been overcome.

As may be expected, farming-ranching has been the dominant occupation represented in the unicameral. Lawyers, traditionally well represented in legislative bodies, have steadily declined in the unicameral and business-oriented occupations seem to have taken their place. Few blue-collar workers have served in the Nebraska Legislature. The average age of Nebraska legislators has remained fairly constant over the years. The early sessions had the youngest personnel—47.0 years of age in 1941. The average age rose gradually to 54.2 in the 1947 session, and has remained around 54 years. Of all the legislators serving between 1936 and 1962, more than 67 per cent of those elected served more than one term, and more than 37 per cent served more than two terms. About one-third served but one term in the unicameral.

Of 125 uncontested races in the elections held between 1936 and 1962 (20.7 per cent of the total races), 114, or 91.2 per cent, involved incumbents. The "staying power" of Nebraska Senators seems to be very high. Once elected, if he so desires, an individual has greater than an 80 per cent chance of being reelected. Of 416 incumbents running in the years 1936–1962, 341, or 81.5 per cent, were successful. If one discards those defeated by former legis-

[32] John C. Wahlke, Heinz Eulau, William Buchanan, and LeRoy C. Ferguson, *The Legislative System* (New York: John Wiley & Sons, Inc., 1962), pp. 141–169.

[33] *League of Nebraska Municipalities* v. *Frank Marsh and others*, 232 F Supp. 411 (U.S. District Court, 1964), and *League of Nebraska Municipalities* v. *Frank Marsh and others*, 252 F. Supp. 27 (U.S. District Court, 1966).

lators, the result is 341 out of 395 successful, or 86.3 per cent.[34]

The turnover ratio in the unicameral has been generally below 40 per cent, and in the last few years seems to be near the national average which was 34 per cent in both houses in 1963.

More influential in the selection of candidates than state-wide pressure groups are the local organizations which feel that the incumbent legislator is not properly representing their interests. This situation will usually result in a meeting of the major groups and a subsequent attempt to draft a new legislative candidate.

Election to a legislative office in Nebraska does not offer a fertile ground for advancement to a higher state office, since very few individuals have moved from the Legislature to other state offices. Since 1951, the author's first legislative term, only one unicameral member has been elected to a higher office.

The pay for senators is $4,800 a year (the unicameral meets biennially, except for special sessions).[35] Fringe benefits given senators are minimal. They are not provided offices and must conduct their affairs from the desks on the floor of the unicameral. Senators can call upon the legislative council, composed of a staff of six people, two of whom are available to individual legislators for research during the session and the interim. In the 1967 session, law students from the University of Nebraska were utilized by the legislative council on a part-time basis to aid in research. Another service is provided in the form of a bill-drafter's office. Here, a legal staff drafts each bill introduced in the Legislature. In 1962, the office of a legislative fiscal analyst was added to the staff of the legislative council. Responsible to the committee on budget and appropriations, the fiscal staff has provided invaluable assistance to the implementation of program budgeting for the State.

The Legislator as Representative

Perhaps one of the greatest influences upon the representative as he functions in the legislative arena is potential constituency pressure. Elected on a nonpartisan basis, a Nebraska legislator is committed to support specific groups or issues, rather than to support a party platform.[36] The influence of constituency pressure will depend upon the position of the Senator within his own district. Some believe that the increase in senatorial terms from two to four years, adopted in 1964, will relieve some of the constituency pressure. This will permit a legislator to build a better record and to accept leadership in more sensitive areas with less fear of immediate repercussions.

THE NEBRASKA UNICAMERAL—CONCLUDING OBSERVATIONS

To be an active and accepted organ, a Legislature must reflect the basic thought of a majority of the State's opinion-makers. It must derive sustenance from the lifeblood of the environment of the State it serves. The Nebraska system fulfills those qualifications, for it is a creature, or a creation, of the history, the wishes, the thoughts of the citizens it serves.

The legislative structure derives its basic traits from the people, works with these same people in making state policy decisions and, in turn, has its own impact upon the people once the decisions are implemented. The input to the Legislature from the State and its people is received, remolded, and returned to the people in the form of legislative or decisional output.

The Legislature is considered to be an active and influential part of the social process of the State. Likewise, each of the elements exerting major impact upon the decisions of the unicameral is to be considered a segment

[34]Compiled from *Nebraska Blue Book*, 1936-1962, inclusive.

[35]Article III, sec. 7 of the Nebraska Constitution provides that a Senator shall receive "not more than two hundred dollars per month" for his term of office. At the time of the adoption of this amendment in 1960, there were some charges that the wording of the amendment masked the intent of raising legislative salaries which previously had been around $870 per year. Section 7 amended in 1968 read: "not to exceed four hundred dollars per month during the term of his office."

[36]In the 1959 session, the author, on constitutionality grounds, voted against an Associated Industries of Nebraska-sponsored bill on secondary boycotts. Subsequently, he was forced to attend a special meeting of his business constituents to explain his stand.

of the same social system. Thus, the environment exerts an influence on the legislative body directly, and also through the formal and informal structures of the legislative system. Likewise, the formal and informal act upon each other, as well as upon the environment and upon the Legislature itself. Finally, the unicameral system, receiving the total impact of these three important pressures, by its final decisions, or output, completes the circle by exerting its own influence back upon the environment and the people of the State it serves.

The decisions of the Legislature, reflecting the people's main characteristics and beliefs, produce moderate answers or conclusions to the major problems. Such flexibility is present within the unicameral legislative structure. The pressure groups, too, are products of the social system and must operate within the same basic framework of a formal structure and an informal process as the legislators being pressured. Both elements, the pressured and those exerting the pressure, are influenced by the same basic elements of th State's social system.

The unicameral structure provides the governmental tools that the people of Nebraska need to confront present challenges. The system is streamlined to eliminate obstacles which stand between the people and their goals of democratic representation. The worth of the unicameral has not always been fully understood, appreciated, or utilized. This is no reason to discount its value or underestimate its contribution in meeting the current need to upgrade and strengthen state government in the latter decades of the twentieth century.

UNICAMERALISM: WISCONSIN LEGISLATIVE HISTORY

INTRODUCTION

Nebraska is the only state in the United States that currently has a unicameral (that is, one-house) legislature. It has been in existence since 1937 with no apparent attempts to change the structure. Three other states (Pennsylvania, Georgia and Vermont), however, began with a unicameral legislature and later abandoned it.

Although the unicameral legislature is not very popular in the United States, many foreign countries have adopted it. For example, when Quebec abolished its two-house parliament in 1969, the last of Canada's 10 provinces became unicameral. The governing bodies of most municipalities and counties in the United States are also unicameral in nature.

The history of unicameral proposals in Wisconsin began with 2 proposed constitutional amendments introduced in 1915. After a lapse of 12 years, there was at least one such proposal introduced in every regular biennial session from 1927 to 1937. In 1935, 5 separate joint resolutions were introduced relating to adopting a unicameral legislature. Two of these proposals (1935 Assembly Joint Resolutions 10 and 95) were passed by the Assembly. These are the only 2 such measures which have ever received passage by at least one house. 1935 AJR 95 was not a proposed constitutional amendment, but rather, a proposed referendum relating to the establishing a unicameral legislature.

Not until very recently has there been any revived interest in unicameralism since the 1930's. Four proposals have been introduced in the last 3 sessions of the Wisconsin Legislature to provide for a unicameral legislature. Unicameralism has been given considerable attention since 1964 in many other states beside Wisconsin. The recent upsurge of interest is at least partially due to the United States Supreme Court's 1964 ruling in Reynolds v. Sims (377 U.S. 533; 84 S. Ct. 1362), which held that both houses of state legislatures must be apportioned according to population. In Wisconsin, of course, both houses have always been apportioned "according to the number of inhabitants". Since representation for both houses of state legislature now has to be based on population, some commentators have suggested that there might be no further need for 2 houses.

CONSTITUTIONAL PROVISIONS RELATING TO THE LEGISLATURE

The current provisions of the Wisconsin Constitution governing the number and size of the houses comprising the Wisconsin Legislature are found in Article IV. They read as follows:

> Section 1. The legislative power shall be vested in a senate and assembly.

Prepared by Gary Hatcike, Research Analyst

Legislature
SUBJECT
DATE 1970 XIII-1 COPY 2 of 3
LEGISLATIVE RESEARCH CHECK LIST

Section 2. The number of the members of the assembly shall never be less than 54 nor more than 100. The senate shall consist of a number not more than one-third nor less than one-fourth of the number of the members of the assembly.

If Wisconsin were to adopt a unicameral legislature, additional sections of constitution would have to be amended. Those sections which would also be affected are:

Article IV,	Section 3.	Apportionment.
	Section 4.	Assemblymen, how chosen.
	Section 5.	Senators, how chosen.
	Section 7.	Organization of legislature; quorum; compulsory attendance.
	Section 8.	Rules; contempt; expulsion.
	Section 9.	Officers.
	Section 10.	Journals; open doors; adjournments.
	Section 17.	Style of laws; bills.
	Section 19.	Origin of bills.
	Section 20.	Yeas and nays.
	Section 26.	Extra compensation; salary change.
Article V,	Section 8.	Lieutenant Governor president of senate....
	Section 10.	Governor to approve or veto bills; proceedings on veto.
Article VI,	Section 2.	Secretary of State duties relating to the legislature.
Article VII,	Section 1.	Impeachment proceedings.
	Section 13.	Removal of judges.
Article VIII,	Section 6.	Public debt for extraordinary expense; taxation.
	Section 8.	Vote on fiscal bills; quorum.
Article XI,	Section 4.	Legislature prohibited from incorporating banks.
Article XII,	Section 1.	Constitutional amendments.
	Section 2.	Constitutional conventions.
Article XIII,	Section 6.	Legislative officers.

WISCONSIN LEGISLATION PROPOSING A UNICAMERAL LEGISLATURE

No proposed constitional amendments relating to the establishment of a unicameral legislature have ever achieved passage through both houses of the Wisconsin Legislature, so as to be eligible for "2nd consideration" review 2 years later in preparation for their submission to the voters of Wisconsin. Therefore, all the proposals listed in the following table constitute "1st consideration" constitutional amendment proposals.

A. Proposed Constitutional Amendments Providing for a Unicameral Legislature*

Year	Joint Resolution	Author	Name of Body	Size of Body	Length of Term	Type of District	Misc. Provisions
1915	SJR 20	G. Weissleder	Legislature	3 mbrs. from each congress. district	Staggered 4-year terms	Correspond with congress. districts	
1915	AJR 33	H. L. Mortenson	Legislative Commission	1 mbr. from each congress. dist. & 2 from state at large	4 years	Congress. dist., plus 2 from the state at large	One of the 2 at large mbrs. receiving highest no. of votes — pres., other vice-pres.
1927	AJR 17	Wm. Coleman	Legislature	133 Members	Staggered 4-year terms	Single dists. of convenient contiguous territory	
1929	AJR 131	Robert Caldwell	Legislature	Number of mbrs. equal to the no. of U.S. Rep.s from Wisconsin	Staggered 4-year terms	Correspond with congress. districts	
1931	AJR 48	Philip Wenz	Legislature	133 Members	4-year terms	Single districts	
1933	AJR 26	G. Weissleder	Legislature	Not more than 3 mbrs. from each congress. district	Staggered 4-year terms	Single dists. of convenient contiguous territory	Sessional salary of $1200
1935	AJR 10	M. H. Hall	Legislature	Not less than 30 nor more than 50 members	2 years	Single member districts	
	A.Am. 1 (Adopted)	B. M. Vaughan		Not less than 90 nor more than 100 members			

*In measures proposing a staggered 4-year term, most proposals provided for half of the Legislature being elected for 2 years in the initial election under the new unicameral legislature, and subsequently for 4-year terms.

Proposed Constitutional Amendments Providing for a Unicameral Legislature — Con't

Year	Joint Resolution	Author	Name of Body	Size of Body	Length of Term	Type of District	Misc. Provisions
1935	AJR 11	G. Weissleder	Legislature	Not more than 3 mbrs. from each congress. district	Staggered 4-year terms	Single member districts	Legislature would meet once each mo. until all business completed. Annual salary of $4,000
	A.Sub.Am.1 as amended by A.Amdt. 1 and 2 (Adopted)			Not less than 90 nor more than 100			Legislature would meet once every 2 years
1935	AJR 70	Mary Kryzak	Legislature	Not less than one mbr. from each county nor more than 100 members	4-year terms	No dist. would embrace more than one county.	
1937	AJR 11	M. H. Hall	Legislature	Not less than 30 nor more than 50 members	2 years	Single member districts	
1965	AJR 107	Barbee, Iverson, Lipscomb & Schaus	Legislature	Not less than 43 nor more than 75 members	Staggered 4-year terms	Single member districts	Annual salary of $10,000. Annual sessions
1967	SJR 26	J. Lourigan	Legislature	Not more than 45 members	Staggered 4-year terms	Single dists. of compact contiguous territory	
1967	AJR 37	Barbee, Lipscomb, Anderson, Kessler & O'Malley, co-sponsored by Lourigan	Legislature	Between 33 and 75 members	Staggered 4-year terms	Single member districts	Annual salary of $12,000. Annual sessions.

Proposed Constitutional Amendments Providing for a Unicameral Legislature — Con't

Year	Joint Resolution	Author	Name of Body	Size of Body	Length of Term	Type of District	Misc. Provisions
1969	AJR 18	Barbee, Lipscomb & Sanasarian	Legislature	Not less than 33 nor more than 75 members	Staggered 4-year terms	Single member districts	Annual salary of $12,000. Annual sessions

B. Proposed Referenda Relating to Establishment of a Unicameral Legislature

Year	Joint Resolution	Author	Referendum Question
1935	AJR 95 A.Sub.1	G. Weissleder	This proposal would submit to the voters a referendum consisting of the following 5 questions and comprising 7 parts: (1) "Do you favor a one-house legislature?"; (2) (a) "Do you favor a legislative membership of not less than 30 nor more than 50 members?"; (or) (b) "Do you favor a legislative membership of not less than 30 nor more than 100 members?"; (3) "Do you favor the legislature sitting as a body to hear all arguments for and against all matters coming before it?"; (4) "Do you favor having the legislature meet once each month and remain in session until its business is completed?"; (5) (a) "Do you favor a 4-year term for the members of the legislature?"; (or) (b) "Do you favor a 2-year term for the members of the legislature?". The measure was adopted by the Assembly by a vote of 48 to 32. The Senate, however, nonconcurred in it by a 23 to 7 vote.
1935	AJR 171	E. W. Blomquist & A. F. Poltl	This proposal would have submitted one question to the voters: "Do you favor a one-house legislature? Yes____ No____"
1955	AJR 91	Louis C. Ramell	This proposal would have provided an advisory referendum consisting of 2 questions: (1) "Do you favor an amendment to the state constitution to provide for a unicameral legislature of 100 members, one-half to be elected every 2 years for terms of 4 years?" or (2) "Do you favor an amendment to the state constitution to provide that the legislative branch shall consist of 2 houses similar to the legislative branch of the federal government?"

The House Nebraska Built

by Donald Janson

Its simple plan for making state government cheaper and more efficient has worked out remarkably well and may soon be copied elsewhere.

Though Vermonters may dispute the title, Nebraska is probably the thriftiest state in the union. For example, the state's bonded debt is limited to $100,000 and Nebraska stays well under that. It has no sales tax or state income tax because so many Nebraskans feel the revenue would open the door to unnecessary spending.

If you are aware of this penny-pinching tradition it is a shock when you drive the arrow-straight road from Omaha to Lincoln to find a veritable architectural extravaganza looming up out of the surrounding plains.

This spectacular skyscraper is the State Capitol. It cost about ten million dollars and took ten years to build, being paid for by a special property tax which yielded a million dollars a year. "An innocent traveler from the East who thinks that Nebraska is a stick-in-the-mud state will get some surprises," John Gunther wrote in *Inside U.S.A.*, after his first glimpse of this startling building.

The surprises, however, are not merely architectural. Recent visitors are viewing with even more interest what goes on inside the Capitol. For this is the headquarters of the only one-chamber state legislature in the nation, an innovation which may, in the years ahead, be widely copied in other states. If this comes to pass, the full potential of a remarkable institution may be discovered—for Nebraskans, though generally pleased with their brainchild, have tended, in characteristic fashion, to maintain it on a starvation diet.

Senator George W. Norris—Nebraska's great innovator—was the chief architect of the "unicameral," as it is generally known. At the time it was created it seemed of no more than local significance to the rest of the country.

Now, thirty years later, it has become an object of national interest as a result of the Supreme Court's reapportionment decision on June 15. Despite the delaying tactics of the 88th Congress, district lines will inevitably be redrawn and state legislatures are headed for a shake-up. Economy-minded citizens are pondering the possibility of shaking one house out of existence in the process. If this should happen, millions of tax dollars will be saved. More importantly, legislatures might be largely cleansed of the corruption and inefficiency that blight state governments across the country.

If nothing else, experience in Lincoln has proved that one house is cheaper than two. Specifically, the taxpayers' bill for the first unicameral that met in 1937 was approximately half that of the preceding chamber session. And when one body must do the work of two, there is little time to waste on the glut of meaningless bills commonly tossed in the hopper at the start of state legislative sessions. The number introduced was cut in half in the unicameral. Conspicuously absent are the hundreds of nuisance and special-interest bills annually proposed in one house on the assumption that they will be killed in the other.

"There's now no way for us to pass the buck," says State Senator Richard D. Marvel, who has served in the unicameral for ten years. "I can't say to a constituent, 'Okay, I'll introduce this for you,' and then run to the other house and say, 'Boys, kill this.' The lobbyist, too, doesn't dare talk out of both sides of his mouth and offer bribes. We are working in a goldfish bowl."

With only one house, there are, of course, none

Reprinted from Harper's Magazine, November 1964.

of those conference committees whose secret sessions have long been a convenient locale for lobbyists' less savory maneuvers. In Nebraska's unicameral, all committees are required to hold public hearings, to announce them far enough in advance so that all interested citizens can attend, and to conduct their deliberations in plain view of the electorate.

Senator Norris was particularly eager to eliminate the powerful conference committee, which he saw as the graveyard for much beneficial legislation as well as the focal point of lobbying manipulations. Traditionalists claim to fear that getting rid of one house would do violence to the governmental system of checks and balances, but Norris' response to that was curt: "After the legislative session comes to an end and we balance the books, we generally find that the politicians get the checks and the special interests get the balance."

Buck-passing, logrolling, and undercover pressure in matters of taxation, schools, utilities, public power, and transportation had long plagued Nebraska. These were the chief targets of Senator Norris' campaign for a unicameral legislature. But his arguments on these points had little impact for a decade. In the end it was a sure-fire Nebraska issue—economy—that proved his trump card.

This came about in the blistering summer of 1934, when temperatures steadily soared over the hundred-degree mark and only fourteen inches of rain—the least the state had ever had—fell all year on parched cornfields. In the third consecutive year of drought, hot prairie winds turned the plains into a dust bowl and the corn crop withered to a pitiful three bushels an acre, compared with the accustomed twenty-four. This agricultural calamity multiplied the miseries of the great depression, which had already swept the state with foreclosures, frozen credit, bankruptcies, and unemployment.

With his familiar black string tie hanging limp from his wilting collar, Norris stumped the state from Omaha to the western sandhills that searing summer pleading the cause of a one-house state legislature. He wore out two sets of automobile tires, crisscrossing the state. He had the aid of a small band of reform-minded allies. One of the most persuasive of these was former Congressman John N. "Nate" Norton (whose daughter, Mrs. Evelyn Lincoln, later became President Kennedy's secretary). "Save time, talk, and money," he urged.

Arrayed against the Norris-Norton forces was a formidable coalition of the state's power structure—major farm and professional organizations, railroads, utilities, and the press. Newspapers "forgot" to report Norris' speaking engagements; handbills posted to announce them were torn down.

"If I offered the Lord's Prayer as an amendment they would fight it," Norris said of his foes on election eve.

But in the end, Norris' dynamism and the appeal to frugality won out. Advocates of the unicameral were helped, too, by the fact that two popular proposals—one advocating repeal of prohibition, the other authorizing pari-mutuel betting—were also on the ballot. All three propositions were approved, the unicameral by a vote of 286,086 to 193,152.

The returns shocked Nebraska's newspapers and politicians. Most stunned of all were 90 of the state's 133 legislators who had been voted out of their jobs. The surviving 43 decided to call themselves senators and went to work as a single-chamber legislature in 1937. Norris skipped an opening of Congress to be there. "I congratulate you on being members of the first unicameral legislature," he told the new senators their first day. "Every professional lobbyist, every professional politician, and every representative of greed and monopoly is hoping and praying that your work will be a failure."

Lobbyists in the Open

Today the unicameral system is firmly entrenched in the state. Nebraskans deny that the money saved is the only reason. They claim that legislators have been made more responsive to the will of the electorate. Probably this is true. But in a tightfisted state, the result is not necessarily progressive.

For example, last year the revenue committee held public hearings on a bill to establish a state income tax. The American Farm Bureau Federation, the Farmers Union, and the Grange sent representatives to oppose it. So did the state teachers' association. Appearing in support was

Among the events he has reported during nine years with the "Times," were the sinking of the "Andrea Doria" and the month in Dallas after the Assassination. He has a master's degree from Minnesota and was a Nieman Fellow at Harvard; he has also worked for the St. Louis "Post-Dispatch" and the Milwaukee "Journal."

an Omaha taxpayers' group called the Nebraska State Improvement Association. Most witnesses opposed the bill and in the floor debate that followed it was killed.

Last year, similarly, the budget committee held public hearings for two weeks on a special appropriation for the state's university. Its backers, calling themselves Friends of the University, included prominent farmers and industrialists eager to see increased funds devoted to agricultural research. The owner of a television station and a former mayor of Lincoln favored increased university funds for other purposes. The principal officers of the university and its department heads explained their budget requirements to the committee. Individual taxpayers, however, spoke against parts of the proposal, as did representatives of more than 130 Omaha doctors who opposed a full-time faculty in an augmented medical school. Their testimony prevailed and a proposed $35 million program to improve medical-school facilities was drastically altered.

This was, of course, a victory for a special-interest group. In other states the AMA and the practicing doctors who have also been part-time teachers in medical schools have fought against salaried full-time faculties, although medical educators generally believe the trend is the inevitable consequence of the increased specialization and scientific intricacy of modern medicine.

The doctors' victory in Nebraska, however, was openly arrived at after public debate. This is a very different process from the backstairs operations of the lobbyists for the Union Pacific Railroad, the Burlington Railroad, the utilities and liquor interests in the old two-house legislature whose deliberations seldom saw the light of day.

Senator Norris hoped that the limelight shed on the unicameral legislature would attract more capable men to it. He assumed that they would be better paid for their work, since they were fewer in number. Nebraskans, however, don't believe in pampering their public servants. So for years, legislators' annual salaries remained at $872. Recently they were increased to $2,400, which is still not nearly enough to live on. (In other states legislators' pay ranges from New Hampshire's $200 per biennium to New York's $10,000 a year.) Inevitably the legislators' energies must be divided. Senator Marvel, for example, sold his insurance-and-loan business to serve in the legislature. But he will soon be back at a second job, teaching political science at the Municipal University of Omaha.

There are a number of competent, dedicated men in the Nebraska legislature, but there is a notable dearth of lawyers, and the overall caliber is not too different from that of the men I have watched in other state legislatures.

Unquestionably, however, they work harder and more effectively than in many states. For example, the senators assigned to appropriations serve on no other committees. They delve deeply into the specifics of all money measures and when a budget is finally passed there is no question that the legislators know, in detail, just what they are doing.

Between sessions, the legislature—which meets every two years—functions as a "legislative council" which works continually on the state's perennial problems. This valuable service would be considerably more effective if Nebraskans were less parsimonious. The council—along with the legislature generally—is short on research and clerical staff. No senator has a secretary or administrative assistant of his own—he must rely on a meager secretarial pool. Though the council studies and prepares some eight hundred bills on three hundred subjects for each session, its research staff consists only of a director, one assistant, and two secretaries. The budget committee has only two fiscal assistants. Some of these gaps could be filled by university graduate students serving as legislative interns. However, in 1961 Nebraska turned down a foundation grant offered for such a program because it required the state to match the foundation funds in part.

To cite such shortcomings is not to belittle the advantages of the unicameral system. The pattern of an agriculturally oriented state, which is in many respects unusually frugal, would not be duplicated in more urban, ethnically mixed, and liberal states. And those who have worked with the unicameral in Nebraska—from the Governor down—attest to its practicality, efficiency, and responsiveness.

"Ours is the best government on earth and the envy of a lot of people in other states," says Senator Leroy Bahensky. This may be hyperbole. But one cannot dispute him when he adds, "It isn't easy to acquire."

Not Ordained in Heaven

Probably the major roadblock for other states wishing to imitate Nebraska is tradition—the feeling that two houses were ordained by the Founding Fathers. Actually, the idea was borrowed from England. In the early days of the

union, some states permitted only the wealthy to vote for members of the upper chamber.

In Maryland, for example, a net worth of at least a thousand pounds was required. Like the House of Lords, the upper chamber was intended to provide the propertied class with a check against impetuous action by the lower house representing the mass of freemen.

At one time some 40 per cent of the nation's cities also had bicameral legislative bodies. Only two now survive—in small New England towns. Britain, as a practical matter, long ago evolved a unicameral system, when the House of Lords was shorn of most of its power.

Apart from tradition, the odds against adoption of a unicameral are considerable. Though legislatures in all states but New Hampshire and Delaware may propose constitutional amendments, they are not inclined to propose eliminating half their membership. Nor is the idea likely to be popular with the politicians who dominate the constitutional conventions which could initiate such a change in all states.

The best prospects are in the dozen states, besides Nebraska, which permit the people themselves to initiate reform by petition leading to popular referendum. These states are Arizona, Arkansas, California, Colorado, Massachusetts, Michigan, Missouri, Nevada, North Dakota, Ohio, Oklahoma, and Oregon. There have been a few attempts, both before and since 1934, to eliminate one house. None has yet succeeded.

However, a major justification for two houses has been wiped out by the Supreme Court's decision that both houses must be apportioned on the basis of population alone, eliminating area as a consideration. "It doesn't make any sense," said W. Dale Hess, Democratic floor leader of the Maryland House of Delegates, after the ruling was handed down, "to have two houses, both based on equal population, since they'd only be duplicating each other."

While there are dissenters, the decided feeling from most quarters in Nebraska today is that Hess is absolutely right and so were Norton and Norris and the Nebraska voters of 1934.

Nebraska's Unicameral Legislature Saves Money for Taxpayers

By L. E. AYLSWORTH
University of Nebraska

Claims of its advocates that adoption of a one-house body would result in a marked reduction in legislative costs fully substantiated by figures now available.

SEVERAL incomplete, very inaccurate or biased statements regarding the cost of Nebraska's unicameral legislature have been published and are being circulated. A statement of the actual facts that is complete, accurate, and impartial appears to be needed and worth while, in order that interested citizens the country over may be rightly informed. The following presentation, based on a thorough examination of the record of legislative expenditures in the office of the state auditor, attempts to achieve this result.

The constitution of Nebraska contains the unusual provision that "the auditor shall within sixty days after the adjournment of each session of the legislature, prepare and publish a full statement of all moneys expended at such session, specifying the amount of each item and to whom and for what paid." This statement gives all legislative expenditures until three to six weeks after the regular session ends. It has always included the total salary of members for their entire term unless a special session was held later. But it has never included all the expenditures of a legislature during its term. These continue for over a year and a half until the next legislature meets. Such expenditures have included in the past the preparation and publication of the permanent senate and house journals and the session laws, also the custodial care of the chambers and other rooms devoted to legislative purposes. Under the unicameral system they now also include the salaries of the members, expenses of the office of the permanent clerk, and of the legislative council for the rest of the term. These post-session expenditures, therefore, have to be taken into account in order to arrive at a complete and accurate statement.

Legislative costs in Nebraska under the bicameral system, while usually greater than necessary, have been moderate compared with those of many other states, and never flagrantly excessive. Nevertheless, unicameral advocates urged that the adoption of a smaller one-house legislature would result in a marked reduction in legislative costs even though the salary of members was more than doubled. A careful examination and comparison of the records show that they fully substantiate this claim.

Nebraska's first unicameral legislature, despite statements to the contrary,[1] both appropriated and expended much less for legislative purposes than any of its bicameral predecessors for over a decade. The average appropriation of the last five bicameral legislatures was $220,793.63 for regular sessions only, and $240,893.63 if the three

[1] "The total cost of the unicameral session . . . was $237,581.96, an increase in round numbers of $32,000 over the cost of the . . . most expensive bicameral session in the history of the state." See G. E. Price, *Unicameralism in Practice, The Nebraska Legislative System*, p. 173. H. W. Wilson & Co., New York. 1937. This glaring misstatement is due mainly to three errors: the counting of the annual $37,500 salary three times instead of two; the inclusion of a vetoed appropriation of $10,700; and the figuring of appropriations as actual expenditures.

	Appropriations for Unicameral Legislature	*Unexpended Balances*	
		Sept 1, 1938	*Dec. 31, 1938*
Incidentals (by legislature 1935)	$2,000.00	None	None
Salary, members	75,000.00	$8,600.26	$0.26
Employees, supplies, etc.	77,143.60	6,052.53	4,500.00
Printing Journal, Session Laws	10,000.00	5,936.08	5,936.08
Salary of permanent clerk	7,200.00	3,000.00	1,800.00
Legislative council	15,000.00	10,562.67	8,000.00
TOTAL	$186,343.60	$34,151.64	$20,236.34

special sessions are included. The average expenditure was $194,479.94 for regular sessions, and $211,733.46 for both regular and special sessions.

The total appropriations by the unicameral body for legislative expenses with their unexpended balances are shown by the tabulation above.

The $4,500 and $8,000 balances on December 31, 1938, (the end of the term of the present legislature) are conservative estimates. At the present rate of expenditure they are likely to be somewhat larger. The other three balances are definite and sure.

The following detailed comparison of the expenditures of Nebraska's last bicameral and first unicameral legislatures brings out clearly the lessened cost of the latter not only for salaries but also for other expenses:

COMPARATIVE COSTS OF 1935 AND 1937 LEGISLATURES[1]

	Bicameral Legislature, 1935-36			*Unicameral Legislature, 1937-38*
	Regular Session to Dec. 31, 1936	*Special Session to Dec. 31, 1936*	*Total for Both Sessions*	*Regular Session to June 30, 1937*
Salaries:				
Members	$106,660.00	$13,300.00	$119,960.00	$37,499.87
Officers	11,142.00	2,135.50	13,277.50	4,510.50
Employees	34,338.89	5,125.40	39,464.29	26,867.06
Supplies	7,828.88	1,701.46	9,530.34	3,612.11
Printing	26,106.12	2,954.72	29,060.84	15,267.13
Telephone and Telegraph	692.24	268.23	960.47	388.19
Postage	7,287.40	1,221.65	8,509.05	6,300.00
Travel expenses:				
Mileage	3,698.40	3,679.50	7,377.90	565.11
Special	1,034.85	170.48	1,205.33	189.36
Expert assistance:				
Legislative reference bureau	4,000.00	———	4,000.00	4,000.00
Legislative counsel	1,180.00	340.00	1,520.00	4,697.05
Special legal, auditing, stenographic, and medical	1,317.65	176.90	1,494.55	———
Journals:				
Preparation	2,950.00	572.00	3,522.00	———
Printing	5,470.70	1,074.75	6,545.45	1,477.12
Session laws:				
Preparation	856.50	437.00	1,293.50	———
Printing	4,482.26	2,302.92	6,785.18	2,586.80
TOTAL	$219,045.89	$35,460.51	$254,506.40	$107,959.30

[1] In this comparison the salary of the lieutenant-governor is eliminated for all three sessions because the attorney-general holds that he is an executive officer whose salary is not a legislative expense.

TOTAL UNICAMERAL EXPENSES TO JUNE 30, 1937 (FORWARD)			$107,959.30
Unicameral Expenditures from July 1, 1937 to September 1, 1938			
Salaries of 43 members—three-quarters, 1938		$28,899.87	
Clerk's office			
Salary of clerk	$4,200.00		
Salary of secretary	1,830.00		
Custodial service	2,112.40		
Renovating legislative chambers	1,231.90		
Other expenses	1,521.26		
		10,895.56	
Legislative Council			
Expenses, members	$963.89		
Assistants payroll	2,798.22		
Other expenses	675.22	4,437.33	
			44,232.76
Expenditures from September 1, 1938, to December 31, 1938			
Salaries of 43 members		$8,600.00[a]	
Clerk's Office			
Salary of clerk	$1,200.00[a]		
Secretary, custodial service, and supplies	1,552.53[b]		
		2,752.53	
Legislative Council		2,562.67[b]	
			13,915.20
TOTAL UNICAMERAL EXPENDITURES FOR BIENNIUM			$166,107.26

[a]Definite [b]Estimate

Inspection of this comparison shows that the total cost of the unicameral legislature for the biennium, including the expense of both the permanent clerk's office and the legislative council, will be only $166,107.26 as against $219,045.89 for the regular bicameral session—a reduction of $52,93. .63 or 24.17 per cent. If the expense or the legislative council be excluded for two reasons: first, that it is a new institution not provided for by the bicameral legislature; and second, that its function is to gather and prepare material for the use of the next legislature, the saving jumps to $59,938.63 or 27.36 per cent.

These comparisons are all on the basis of one regular session for the biennium. But, what about the comparative cost of unicameral and bicameral in case a special session is found necessary? In 1930 the total cost of a special session of eleven days was $23,861.06, and the next year for another of equal length, $26,746.05. The special session of twenty-four days in 1935 cost a total of $35,460.51. A little thought will show that the additional cost of a special session under the unicameral set-up will be much less than this. There will be no extra expense for the salaries of the members and the permanent clerk. The extra mileage expense will be only one-sixth of what it was formerly. Other expenses will also be less. Hence a special two- to four-weeks session of the unicameral can be held at an extra cost of $10,000 or less. This would make a total of only $176,107.26 for a regular and a special unicameral session as compared with $254,506.40, the cost of the two sessions of the last bicameral legislature—a saving of $78,399.14 or 30.8 per cent.

The chief saving as predicted is in the salaries of members and officers. There is a saving in the expense for employees but not so much as expected. The amount of work and correspondence devolving upon the forty-three

members was probably as great as that upon the 133 members of any bicameral session. Hence more secretarial assistance was needed. Then, too, committees were supplied with secretaries as never before, to promote the keeping of better records of their proceedings. This expense for assistance was well worth while. In the future, doubtless more care will be exercised to assure the selection of somewhat fewer and, in some instances, more highly qualified employees. There is a striking drop in mileage and special transportation. The expenditure for the latter of only $188.36 is phenomenally low. There was certainly nothing even suggestive of legislative junketing in the record of the unicameral body. In fact for this small expense to the taxpayers all or a part of the committee on appropriations, without prior notice, visited and inspected all the state institutions, some twenty-five in number, without a single exception, a record hitherto unequalled.

Another very noteworthy decrease in cost is that for the preparation and printing of the permanent legislative journal and the session laws. The last bicameral legislature spent $4,815.50 for preparing, and $13,330.63 for printing, its permanent journals and session laws, a total of $18,146.13. The cost of printing the unicameral journal and session laws was only $4,063.92. The preparation for printing was done by the permanent clerk and staff. The difference, $12,082.21, is more than enough to pay all the extra expense of the permanent clerk's office for the entire biennium.

The unicameral expenditure for postage while less than formerly is probably too high. The body persisted in continuing the very questionable practice of a flat postage allowance per day for all members. This was elevated from thirty-five cents to one dollar, or $98.00 to each member for the session. No doubt some members actually spent this, or even more, for official purposes. But in too many instances this allowance was to a large extent an unjustifiable personal perquisite. This fixed daily allowance should be abolished and the postmaster authorized to record and stamp all official mail presented by any member.

For only one aspect of legislation did the unicameral legislature appropriate and spend more than any bicameral legislature, namely, expert assistance and counsel. Some $8,700 was spent during the session for such aid, or $3,500.00 more than by the last regular bicameral session. Impressed by the number of important acts passed by the last two legislatures that had been stricken down by the state supreme court as unconstitutional, the unicameral legislature broke new ground by spending $4,700 for a special group of three legislative counsellors to pass on the constitutionality of bills as to which there was any doubt. A similar increased recognition of the need of planning, research, and competent assistance in order to secure proper and effective legislation and records was shown by the establishment of the permanent clerkship and the legislative council with special appropriations of $22,200 for their expenses.

A final observation seems pertinent. The $50,000 to $75,000 reduction in legislative costs by the first unicameral legislature, compared with the last bicameral, will doubtless appear small to many in these days of huge governmental expenditures, and more so in some other states than in Nebraska. But it is the percentage of reduction, not the amount, that is of vital importance. A like reduction in legislative costs in Illinois would equal from $300,000 to $400,000 each biennium, and in Pennsylvania from $500,000 to $600,000.

Nebraska 'Unicam' Operates Smoothly

Handles 737 Bills With No Final Rush

NEBRASKA'S unicameral legislature this year, as in the past, had a performance quite in contrast to that of other state legislatures, particularly that of New York, described as "The Rites of Spring in Albany," by Mel Elfin in *The Reporter* of April 27 this year.[1]

The bill load of the Nebraska 1961 session, almost the same as that of 1959, was heavier in relation to the size of the legislature, i.e. to the number of members to share the burden, than in prior years—737 bills or an average of 17 per member (Iowa and Illinois figures this year were 8 and 11). The session was the longest by a week in the unicam's history, adjourning just before noon on Saturday, July 8, the 126th legislative day. This was the only Saturday sitting of the session. On Friday the legislature rejected proposals to suspend rules or cut procedural corners in order to finish in a hurry, held a morning and an afternoon sitting that day with a two-and-a-half hour recess at noon, but had no sitting at night.

Despite the heavy bill load per member, and contrary to the usual practice of bicameral legislatures, the bulk of the work did not pile up for last-minute action. Two weeks before adjournment Lincoln and Omaha newspapers reported that all but 25 of the bills had already been disposed of definitely, either by passage or rejection in some manner. The remaining days could be devoted to deliberations on the comprehensive budget bill for the ensuing biennium, on a few other highly controversial measures demanding full debate, and on the various proposals and instructions for investigations to be undertaken by the Legislative Council and its professional staff during the 18-month interim. Inasmuch as every member serves on that council, each may participate in committee hearings and deliberations at various times during the biennium under the general scheduling of its executive board. In this sense the legislature is never really inactive.

The unicameral continues to bear all the distinctive marks of a conservative midwest assembly. It still adheres to the property tax and has fended off attempts to impose general sales and income levies. During this session it outlawed the Communist party and lacked only one vote of ordering an investigation of school books as to their degree of "Americanism." It holds the purse strings tightly and had the University of Nebraska and other state institutions and agencies unusually on edge as it dealt with the budget. In the face of charges of gross gerrymandering, it reduced the state's congressional districts by one, but failed to touch its own legislative districts.

One thing was clear this session: the unicam's operations are sufficiently in the open, and its decisions or prospective decisions clear enough, so that a give-and-take occurs between legislature and public. For instance, what may have been a legislative policy mistake made during the session was corrected before the session was over as the result of repercussions through press publicity and pressure groups. It happened that a bill was passed about midsession requiring colored photos on drivers' licenses and centralising control of is-

[1] See also the Review, May 1961, page 254.

suance. Some alleged mishandling of contract-letting to implement the act only added fuel to the earlier controversy. The wisdom of the law was challenged with the upshot that an emergency bill was introduced and passed to repeal it.

The general appropriation bill was likewise before the legislators and public in time for public and administrative reaction. All could view and assess the proposals as a comprehensive program. The result was that some of the Appropriations Committee's cuts were modified before final action, although the totals were less than administrative recommendations by far and less than those for the previous biennium. The fact that the governor was not of the same political party as the majority of the "nonpartisan" legislators probably did not help.

The committee's bill, however, called for a new approach to budgeting and appropriations and had all agencies uneasy. One editorial emphasized that the attempt of the appropriations chairman to effect a functional basis for dealing with finances was likely to be of lasting benefit to the state. Considerable attention attached to the creation of a post of legislative fiscal analyst within the staff of the Legislative Council as an aid to both council studies and committee operations.

Praise came to the legislature for abolishing the Board of Control of state institutions and the substitution of departments and advisory boards, whose professional heads would be named by and responsible to the governor.

A slight reversion to the traditional American partisan pattern came about when the lieutenant governor, acting while the governor was absent at the Governors' Conference, appointed a recognized partisan, one whom the governor would not have appointed, to fill a vacancy in the nonpartisan legislature. This points up the fact that some Nebraskans continue to complain that the legislature flounders without leadership in the absence of partisan elections, even though leadership of a sort has certainly developed in the mechanism of the Appropriations Committee.

Different from other states, but usual in Nebraska, nearly all bills passed were in the governor's hands early enough for a vetoed bill to be returned for reconsideration while the legislature was still in session. Only six bills were left to be dealt with finally on the morning of that last day, between eight o'clock and noon, and the budget bill utilized most of this time because it was read, taking an hour and 27 minutes. Unusual for Nebraska, but causing more comment than alarm, was the enactment of the appropriation bill more than a week after its fiscal biennium had begun.

Unicameralism Passes Test

Nebraska's one-house legislature, after extended trial, has shown itself a sound instrument in the solution of the state's problems; fears of critics prove unfounded.

By JOHN P. SENNING
University of Nebraska

ALTHOUGH the United States is engaged in an unprecedented world war and the end is not yet in sight, the thoughts of the people are turning to postwar planning. Near the close of World War I interest in state government was focused on budgetary reform and administrative reorganization; today it is centered upon the state legislature.

Many reputable citizens are pointing to the ineptitude of legislatures in their handling of the depression issues as an omen of their inability to cope with the many serious questions of social and economic policy that will plague them in postwar days. They feel that the mechanism of legislative procedure must be reconstituted so that th lawmaking process will be adaptable to the nature and solution of those problems.

The nature and extent of that reform, whether it will follow the course of merely rejuvenating the bicameral setup or the example of Nebraska in adopting a unicameral structure, is unpredictable. Each plan has its staunch supporters and opponents. Unicameralism is a live issue in the Missouri constitutional convention now in session. The reasons advanced in opposition follow the traditional pattern of thought familiar to Nebraskans.

It is ten years ago this month that the campaign for a unicameral legislature was begun in Nebraska with the drafting of a constitutional amendment by a citizens committee.[1] Again and again the question is asked as to why this amendment was successful at the polls. The reasons have been published too often to require repetition here, except for one very important factor—Nebraska had kept the idea of a one-house assembly alive and before the people since 1913. No matter how fiercely the fire of a campaign for governmental reform burns, there must be a backlog of education and information if the fire is to arouse the people to affirmative action.

Since the questions raised in opposition to the unicameral principle in Missouri and elsewhere are identical with those which were the center of debate in Nebraska, it may be appropriate to turn to actual experience of the operation of a unicameral assembly, through four sessions and one special session, and to see to what extent the prophets of gloom and pessimism failed in their predictions. The skeptic answers each of these questions with an emphatic "No." Is it possible for a small single-chamber assembly to be representative of the people? To be an effective deliberative body? To be

[1] See "Nebraska Considers a One-House Legislature," by Lane W. Lancaster, NATIONAL MUNICIPAL REVIEW, July 1934, p. 373; also "Nebraska Adopts Single-Chambered Legislature," *op. cit.*, December 1934, p. 695.

a protection against hasty and ill-considered legislation? To be able to cope successfully with powerful pressure groups? Such an attitude reveals a misconception and a traditional view imposed upon the idea of a modernized legislature functioning in the present-day industrial and social environment.

In Nebraska the substitution of a nonpartisan, single-chamber assembly of 43 members for a partisan, bicameral body of 100 representatives and 33 senators reduced the total number of representatives without disturbing to any appreciable extent the ratio of farmers, business, or professional men and lawyers elected. Consequently the cross section of interest represented in the small assembly and in the bicameral body, subject to certain fluctuation, is the same. Multiplying men of the same occupational interest will not improve the representative character of the legislature.

Improved Personnel

Pursuing the subject of personnel we discover distinct gains in what may be termed a higher type of legislator. Considerably over 50 per cent of the unicameral legislators have either completed a college course or have attended an institution of higher learning one or more years. Furthermore a study of their place in the community shows that most of them have held public office or are influential members of civic and state social and economic organizations. They have therefore acquired a knowledge of the problems that are before the people and that are likely to need legislation for solution.

The most appealing argument used against representation in a small unicameral legislature was that, since Nebraska is predominantly agricultural in economic interest, the percentage of farmers elected would be too small for equable agricultural representation. One apparent fact was overlooked on the part of those who feared inequitable representation—that because of modern transportation, methods of production and distribution and industrialization of farming, urban and rural economic interests have become so intertwined that the differences of an earlier day have virtually disappeared.

A second fact emerged from an extended study of the occupations of the men elected to the one-house assembly and, for comparison, of the men who had served in the lower house of the bicameral legislature from 1921 to 1935. Of the bicameral representatives approximately 48 per cent were identified with two or more occupations while 52 per cent followed a single occupation. Of the unicameralists who served from 1937 to 1943 inclusive, approximately 69 per cent are identified with two or more occupational interests while 31 per cent have only a single occupational interest. Mr. Farmer, for example, also specializes in live-stock raising, serves on a board of directors of a farmers cooperative or of a rural telephone company or a local bank, and at the same time is identified with the associations representing those interests. Likewise Mr. Merchant, Mr. Lawyer, or Mr. Professional Man has a similar breadth of interests.

While the legislators do not lay

claim to being experts, but just plain ordinary men, nevertheless by reason of their catholicity of interests, their wealth of experience, coupled with their demonstration of good judgment and common sense in their labors session after session, it follows that this small body of legislators is actually more representative of the state's interest than a body twice its size or one of a hundred members.

Representatives of this quality are aware of their responsibility as the custodians of the great power vested in the single-chamber assembly. They gave evidence of that attitude during the first session in setting up the procedural framework within which the process of legislation has been carried on. The rules have been kept simple. A conscious effort was made to implement and supplement the safeguards set up in the constitution to prevent hasty and ill-considered legislation. Nor did the legislators rest on their oars after the rules of procedure were adopted. At each successive session alterations to facilitate work or to increase responsibility have been incorporated in the rules. This constant urge for improvement is in striking contrast to the old type of legislature in which rules were used for manipulation instead of for safeguarding the process of legislation.

The system of mandatory public hearings on all bills, inaugurated by the unicameral legislature, has steadily grown in importance. No legislator may serve on more than two of the eleven standing committees which deal with substantive legislation. Conflict of committee attendance is avoided by a carefully prepared schedule of time and place of meetings. This schedule, published in leaflet form and widely distributed, becomes a highly important source of information as each committee announces what bills will be heard at each session. The latter notice must be published five days prior to the session at which the hearing is had and a like notice is issued if a second hearing on the same bill should be necessary.

No Secret Sessions

The public announcements of committee hearings and the full press reports of the discussions at the hearings have created a renewed interest in the legislature by the people of the state. Increasing citizen participation in the hearings from session to session has brought the legislature close to the people. Hearings are also a great aid to the committee in determining the attitude of the public toward the legislative proposals under consideration. The press reports hearings almost, if not quite, as fully as it does the deliberations on the floor of the House. Contrary to the practice in at least some bicameral legislatures, there are no secret executive sessions of committees. The public is excluded from executive sessions but the press is present. In addition to its recommendation to the legislature as to disposition of a measure, the committee presents a statement giving reasons for its decision. This is mimeographed and placed on the desk of every member.

After a bill has been reported favorably by the committee to the parent body, it receives two thor-

ough considerations by the legislature itself. The first, General File, is the more exhaustive of the two. It is here that the bill is amended and each section approved or disapproved. It is also at this stage that the greatest casualty of legislative proposals occurs, except, of course, in the standing committee.

Legislative Procedure

Because a bill is so thoroughly discussed on General File, the debate unchecked, the clash of opinions often sharp and sometimes lobbying tactics exposed, there is captious criticism that the legislature is too slow. It is recommended, chiefly by lobbyists, that there be two or three leaders who would dictate to the rest of the House how to vote.

An interval of not less than three days must intervene between the first or General File consideration and the second or Select File consideration. Unless the measure is indefinitely postponed on General File it is sent to the Committee on Enrollment and Review for a thorough overhauling by the committee's legal expert for incorporation of amendments, attaining clarity of expression, and technical arrangement. All changes recommended by this committee are acted upon by the House. Following the second consideration on Select File, the Committee on Enrollment and Review prepares the bill for third reading and final passage. After the bill is printed in final form it must, by rule, lay on the members' desks for two legislative days before the final vote.

The full and open discussions, spacing of time between files, careful examination for errors after each consideration, machine and record votes, laying over of bills for additional information, all make for a satisfactory product. Moreover the orderly progress of work throughout the session prevents the piling up of a large number of bills to be disposed of during the closing days—another safeguard against hasty legislation. Not only does this make for a satisfactory product but also the governor is not confronted by a large number of bills for his approval or veto after the legislature adjourns. After adjournment in 1937 the governor had in hand 26 measures, 24 in 1939, eleven in 1941 and seven in 1943.

The relation of the governor to the unicameral legislature has been watched with interest especially since opponents of the unicameral plan predicted that the governor would exercise complete domination

over the small legislative body. As a matter of fact the nonpartisan legislature and the chief executive have worked together more as two coordinate departments than did the governor and legislature under the bicameral system. A closer relationship exists at present between the governor and the assembly since the governor acts as liaison officer between the federal government and the legislature in transmitting the interpretation of federal laws, rules, and regulations relating to federal-state legislation, to committees and to the House. He has been able to iron out differences much more effectively than if the legislature dealt directly with the federal agencies.

Both governors who have been in office since the inception of the unicameral body have objected strenuously to the constitutional prohibition that prevents the chief executive from vetoing items in the appropriations bill which have been raised above the figures set in the executive budget, after the bill has been passed by a three-fifths vote. This objection is not directed at the unicameral legislature but rather at a decision of the State Supreme Court in 1929, which said that veto of such items would constitute a second veto. In 1943 Governor Dwight Griswold asked the legislature to pass and submit to the people a constitutional amendment which would give the governor the constitutional power to veto items raised above the executive budget but the proposal did not get out of committee.

The veto power has never been exercised to any great extent in Nebraska and the same is true under the unicameral plan—see table above. Furthermore there are frequent conferences between members of the legislature and the governor and understandings are effected while a proposal in which the governor is interested is under consideration. The position of influence which the one-house legislature has attained makes it stand on the same footing and coordinate with the executive department. Thereby the governor and the legislature act as a check upon each other.

What of the Lobby?

Is the one-house assembly able to cope with the lobby? Opponents of the unicameral legislature warned that the lobby would throw the legislature into confusion and assume control. They pictured the lobby as a few powerful special interest groups working under cover and attempting to corrupt the membership. Modern pressure groups are made up of a vast number of citizens whose manifold interests cover all the major fields of legislation. But the old-fashioned lobbyist is still on the scene using the objectionable tactics with which his name is associated. The unicameral legislature gives the representatives of pressure groups opportunity to be heard at the public hearings where they perform a distinct function in expressing public opinion and in furnishing factual information.

A few persistent lobbyists pester the legislature in their insistence on attaining their objectives. The very nature of the one-house legislature, however, is a check upon their activities. The direct and open procedure soon exposes any member who

is prone to succumb to lobby influence. It is not uncommon for a legislator on the floor of the House to call a lobbyist by name and to state in what underhanded practices he is engaged.

Each session has seen one outstanding struggle where powerful lobbies were pitted against each other—in 1937 the allotment of one cent of the gasoline tax for relief, in 1939 and 1943 bills which brought private and public electric power forces into conflict, and in 1941 the regulation of small loan companies. The one-house legislature is much more successful in combatting lobbying influence than was the bicameral assembly, because its small membership is unhampered by party control, and because of the open procedure, the searching publicity, and the neutralizing influence of opposing pressure groups upon each other.

Why has the Nebraska unicameral legislature increased in popularity during the seven years of its operation and why are the requests for a return to the bicameral system few and far between?[2] The product of legislation has been satisfactory and shows the result of exhaustive consideration and matured judgment. The process of deliberation is orderly and effective, conducted by a group of men who are representative of all interests in the state. The resistance to the lobby has inspired the confidence of thinking citizens in their lawmaking body. The development of research facilities through the legislative council assures accurate information to the legislature. The quarterly meetings of the council, held in different parts of the state where public hearings are conducted, induce citizen participation and lead the people to think of the legislature not as a discontinuous body but as a constantly functioning department of the state.

What of the future? There is a disposition on the part of members of the legislature to be alert for improvements in deliberation. Planning for and research upon important issues will be increased in scope. Forward-looking legislators are talking about a staggered four-year term to replace the present biennial term, of quarterly sessions to take the place of the long biennial session, and of salaries equal to those of judiciary and executive state officers.

The modernized structure of the Nebraska legislature is not a solution of legislative problems but only an instrument in their solution. It is a human instrument and as such can claim no infallibility but it is a step toward coördination of the process of lawmaking with the social and economic life of the people of the state.

Nebraska's One-House Legislature — After Six Years

"Having observed the old way and the new, I unequivocally say that the new way is immeasurably the better."

By HARRY T. DOBBINS
Nebraska State Journal

THE Nebraska unicameral legislature recently finished its third regular session. The unicameral body was created by a constitutional amendment, adopted in 1935, which substituted a one-house legislature of from thirty to fifty members for a law-making body composed of a house of one hundred members and a senate of thirty-three members. Using the authority given by the amendment the last bicameral legislature fixed the membership at forty-three, a figure which came closest to securing equal district representation.

Members of the bicameral were paid $800 a biennium for their services. As the constitutional amendment limits to $75,000 the amount that can be paid in salaries to members for a biennium, the number of members—which may be changed by law at any session within the limits fixed—determines the individual salary. Under the present setup this salary is $1,744 for the two-year period, with no additional pay for extra sessions.

Representation is based upon population. This gives the counties of Douglas and Lancaster, in which are located respectively the cities of Omaha and Lincoln, a total of ten members. With one exception all the other districts are made up of from two to ten counties. The speaker now in office, R. M. Howard, represents the ten-county district.

Committee work is divided among ten groups composed of from five to eleven members each. In addition there is a committee on enrollment and review, whose duties are confined to seeing that pending legislation is properly arranged, that the phraseology is correct, and that it is properly correlated to existing statutes; a committee on committees, which selects the membership of the standing committees; and a committee on rules.

As with all pioneering efforts, various criticisms of the unicameral legislature have developed since its adoption in 1937.

Those heard most frequently are that members are elected on a nonpartisan ballot and that the membership is too small, that election on a party ticket enables the people to fix responsibility whereas nonpartisan election confers upon a small group the task of operating without any mandate solely on the basis of individual judgment.

It is quite true that a number of the members possess a yearning and a desire to have somebody else tell them what to do, and thus relieve

them of the burden of personal responsibility for their acts, or a desire to get organized backing. It is the old cry that the unicameral cannot furnish leadership of its own and that there should be party responsibility. But suppose the party declines responsibility. It has been doing that for years.

The proof lies in the examination of the platforms adopted last year preceding the election of members of the legislature. The Republican party, on state issues, declared for amendment of the primary law; so did the Democrats. The Republicans condemned the Democratic state administration for the extravagance with which it was charged; the Democrats commended the same administration for the rigid economy it had practiced; the Republicans declared for local administration of relief and public assistance and for a fair distribution of state highway funds, while the Democrats declared for limited civil service without stating a limit, for a minimum hour and wage law for women, and for adequate salaries for teachers without saying what is an adequate salary.

Issues Not Political

What sad befuddlement would have overwhelmed the members had they been elected as Republicans or Democrats when they faced the big controversial issues of the session: licensing of osteopathists to do operative surgery, a small loans law, gasoline tax refund for farmers, an unfair trades practices act, none of which was contained in the party platforms. Furthermore, could even the tyro in politics conjure up a party convention which would declare itself against teachers' retirement, against strict regulation of small loan companies, for or against tax refunds to farmers, or for an act designed to fix and freeze prices? The answer is that there are few state issues to divide along party lines.

In my view the unicameral system, which requires a candidate for the legislature to get out on his own power and contact the people whom he asks to represent, enables him to get a better knowledge of what his constituents think and want; and his constituents will be much more content with him if he faithfully and intelligently represents them, than with a man who, when questioned about his stand on a pending measure, proudly points to his party's platform and says: "There's where I stand; blame it, not me."

This party responsibility idea is a fetish, originally devised as a whip to hold party legislators in line and used and usable as a false front behind which timid-minded legislators may hide. Party platforms are written by party leaders and dictated by the head of the ticket. They contain what he and they regard as vote-catching pledges and promises and, as will be seen by the references just made to those adopted last year, they present no real issues. I have seen spokesmen whose duty it is to act as bellwether or sheepherder for a governor who has an eye on a senate seat. I have seen party leaders acting as lobbyists standing in the wings and directing action by messenger service or by calling members to their

it afforded a check against hasty and ill-formed legislation. In practice it greatly encouraged log-rolling and bill-trading. While trading is not absent from the unicameral, it possesses checks equally if not more effective than those of the bicameral body. As it is operated the members have three chances at a bill, in committee of the whole, on special file, and on third reading. If a measure passes the committee of the whole, it goes to a special committee which has in its employ a lawyer selected for his ability to detect constitutional imperfections. This special committee often rewrites a bill so as to more effectively declare its purpose, inserting amendments adopted on the floor in their proper places. The bill is then reported to special file, which is the equivalent of the committee of the whole, from which the bill proceeds to third reading. Only two bills of the many that passed the gauntlet were killed on third reading, a common place of fatality under the old system. All of these processes are leisurely gone through, and a law remodeled to suit the majority is the final result.

It is urged as a reason for a larger membership that too much work is imposed on the committees, which usually consist of eleven members. The cure for this is the introduction of fewer bills, or smaller committees.

In sharp contrast to bicameral practices, no bill can be considered in committee until five days' notice has been publicly given. Full hearings in public are given to all who wish to be heard upon any measure. In executive session reporters are admitted and no restrictions are placed upon what they may print.

The average number of bills introduced at the three unicameral sessions has been a little over five hundred. In bicameral days it was in excess of a thousand.

Order Out of Chaos

Twice as much time is devoted to consideration of legislation as was possible under bicameral operation. The observer is impressed, when he watches the unicameral in action, with the orderliness which has been substituted for the chaos and haste of the old days, with the seriousness which the members show in weighing the pros and cons of a proposed measure, and with the care taken to avert mistakes.

Between sessions a legislative council of fifteen members holds periodical meetings. It employs a corps of research workers, who gather all possible data on matters of taxation and other questions likely to be raised in succeeding sessions for the guidance of the membership of the future.

The unicameral legislature is the newspaper man's paradise. As a legislative reporter his mission is to keep the public informed as to the nature, purpose, and progress of legislation. The unicameral simplifies this task. Everything is open and above board. There are no secret meetings from which he is barred, and every facility is afforded for keeping track of the work of the lawmakers. Having observed the old way and the new, I unequivocally say that the new way is immeasurably the better.

side. This is alien leadership, not leadership within the body of lawmakers.

The notion that there can be no leadership in the unicameral legislature itself is without basis of fact. Each session of the unicameral has brought a gradual rise in the average ability and intelligence of members. The pay of $1,744 for the two-year term, for sessions averaging five months, makes it possible to secure the services of men of character and ability who can spare that time away from their private affairs, enables the members to be independent of the lobby which is always ready to dine and wine, and permits a member to devote necessary time to legislation.

Leadership Evident

It is self-evident that no legislature could turn out 202 laws without leadership. It is quite true that the independence which is the possession of unicameral legislators breeds a distrust of efforts of any member or members to assume leadership, and a general inclination to beat down the ears of one who seeks to assume that role. Yet leadership is slowly but surely emerging, leadership of a definite kind, based upon powers of logic and persuasion combined with a knowledge of facts and intelligence able to point out the results of proposed action.

Two years ago an effort was made to increase the number of members to eighty-six, double the present membership. It failed. No attempt has been made to renew the movement.

One argument in support of a larger membership is that with the present limitation all interests and areas are not represented.

Anyone with a critical knowledge of the operations of the bicameral system is aware that the best work was done by the small senate, while the house of one hundred members was unwieldy and added to the chaos of conflict that surrounded attempted legislation.

It is urged that the smaller number makes it possible for the lobby to operate with greater success, that with only forty-three members to concentrate upon, the pressure is increased. Lobbying takes two forms —that by representatives of vested interests whose status is menaced at each legislative session and who stay from beginning to end, and the pressure groups, such as teachers, firemen, members of the professions, bankers and merchants, who come and go as the tide of legislation flows. Much might be said upon the question. It is undeniable that the lobbyists prevent much bad legislation, and also some good legislation. The fact that almost to a man they oppose the unicameral system is significant. With only one house there are, of course, no conference committees, and it was the conference committee, meeting in secret, that was the lobbyist's most effective weapon. Through it disagreements between the two houses could be utilized to kill off legislation. It was in the closing days of the bicameral that most of the important measures hung in the balance, and the conference committee was often their burying ground.

The theory of the bicameral is that

Nebraska Idea 15 Years Old

One-house legislature no longer considered experimental; people well satisfied with result of their pioneer move.

By RICHARD C. SPENCER*

NEBRASKA'S experience with the unicameral legislature is now beyond the experimental stage. The one-house system is well established and it is possible to make a fairly accurate appraisal of its features. Seven regular biennial and three special sessions have been held. Some suggestions for minor changes will go on the ballot in the 1950 general election, but they do not call for any return to the two-house system.

Probably every session of any legislature pleases some people who are affected by its enactments or by its inaction while it displeases others by some of those same measures. Nebraska is not an exception in this respect but, regardless of expressions of disappointment at some of the bills that become law, one does not hear now, certainly not from important political sources, any demand for reversion to two houses.

The constitutional amendment of 1934 provided merely for the abolition of the two-house legislature and the substitution of a relatively small house of from 30 to 50 members. The size was fixed within these limits in 1935 by the last bicameral legislature in providing for 43 districts, a member to be elected from each, for the term beginning in 1937.

The biennial sessions were unchanged and so also were the relations of the governor to the legislature by way of budget proposals, veto power and the confirmation of gubernatorial appointments. The lieutenant governor's duties as presiding officer were transferred from the old Senate to the new body.

By statute the office of the clerk of the legislature was made permanent and a legislative council with research and reference staff was established to assist the legislature. These offices have been a distinct aid and the fact that they need serve only a single house prevents confusion and waste of effort on their part.

The early accounts of the first two or three sessions of the new legislature seemed to some skeptics to be somewhat generous in praise of the new system but, in general, longer experience has proved the skeptics wrong. Some former political opponents who at first viewed the device with alarm or scorn soon became adjusted to the new idea, or even began to view it with approval or at least with some degree of optimism. A lieutenant governor who presided over the new legislature is numbered among the converts.

The 43 districts were rather equitably arranged on the basis of the population census of 1930 and, ac-

*Dr. Spencer is professor of political science at Coe College, Cedar Rapids, Iowa. He has taught political science at Western Reserve University and has been visiting professor at the Universities of Cincinnati, Nebraska and elsewhere. From 1942 to 1947 he was a government organization specialist with the Governments Division of the U. S. Bureau of the Census.

cording to the 1940 census, no great change occurred to alter the picture seriously. But a further growth of the metropolitan communities could upset Nebraska's representation just as it has done in some other states. Any attempt to rearrange single-member districts, of course, could result in a gerrymander. The principal safeguard against such a contingency is that these legislators are elected on a nonpartisan basis. This nonpartisan, or "non-political," feature has been subject to some attack from partisans, at least during the earlier years, but no present proposals for change heed this criticism.

Election records show that voters are fully aware of their legislature and are interested in their representatives. Although legislative nominees do not have a prominent place on the ballot, about four-fifths of those voters appearing at general elections vote for legislative candidates. And between 80 and 90 per cent of those voting at primary elections vote for legislative candidates even though they are not on partisan sections of the ballot.

More than that, candidates elected are usually persons who have already won some local distinction, by long service on school boards or in city or county offices. A number have been presidents of their local chambers of commerce. Two-thirds or more of those elected each session have had previous experience in the legislature, some of them for a number of terms, so that Nebraska laws are not made by green legislators. Thus far there have always been a few members who had served in the former bicameral legislature.

Until now, at least, no member seems to have his district sewed up through local machine politics. Seldom are candidates without opponents, at least in the primary, and in some districts considerable rivalry develops.

Factors of Success

Internally, the factors that have contributed to the success of the unicameral legislature may be listed as: (1) knowledge of what goes on, that is, absence of the uncertainty so common under bicameral systems caused by not knowing what another chamber, its standing committees or committee chairmen or conference committees may do; (2) a bill procedure that is deliberate and democratic; (3) procedure that is clear, understandable, observable and easily reportable by the newspapers; (4) committee structure that promotes some degree of internal leadership and coordination; (5) a session that is not limited as to duration.

The preliminary examining or drafting of bills is real and not perfunctory. The rules requiring introduction of bills early in the session can be and are applied. Committees report bills only after each has a public hearing announced in the journals five days in advance and the report thereon adopted in a committee meeting held at a scheduled hour and a committee record made. A successful exposure of an attempted evasion of this rule late in the 1949 session indicates that rules on committee procedure are enforced. Newspaper reporters may attend executive sessions of committees.

The legislature itself has an adequate opportunity to debate each bill. Technical safeguards are provided so that there seems to be little opportunity to railroad a bill through, as so frequently happens in bicameral legislatures.

After the first general debate on a bill it is given a thorough review for technical accuracy, even rewritten if necessary. Then after a second consideration it is engrossed and reprinted by the same technical committee, and its draftsman, that had previously reviewed it.

Only then does it go on the calendar for final reading and passage. A bill may not be read finally for passage until at least five legislative days after having been submitted for review and two days after placement on final reading file and at least one legislative day after final printed copies have reached members' desks.

There are only eleven bill-considering committees, so that they do not get in each other's way. Their chairmen, as members of the committee on order and arrangement, prepare the daily calendar after the close of the period for free introduction of bills and thus can help coordinate committee action with the debate schedule of the house itself.

A further coordination of effort apparently is achieved through the influence of the budget committee whose chairmanship is recognized as one of the, if not the, most powerful positions in the legislature. The general appropriation bill, introduced early, comes to the floor for extended debate and amendment during the last two or three weeks of the session when the most difficult bills are in their final stages, and it is likely to be the last bill passed.

Fewer Bills, More Laws

All these things have had their effect on the total operation of the legislature. On an average the number of bills introduced in a session is about half that under the former bicameral system. The number of laws passed, however, is somewhat larger than in the bicameral legislature, but are felt by all concerned to be in better form technically and less subject to misinterpretation or to questioning as to constitutionality. As elsewhere, the number of laws needed is on the increase, also as elsewhere, most of them are corrective or amendatory of laws already on the books rather than of new substance. Regular sessions have increased in length somewhat, but this increase is less than 14 per cent, or by an average of about twelve legislative days.

The time-table of the session is rather striking. The deadline for the introduction of bills is enforced. Only seventeen bills in 1949 were introduced after the lapse of the first twenty legislative days, and a number of these were either recommended by the governor or were substitute or consolidated bills presented by committees rather than by members. The size of the job could thus be estimated early in the session.

In the 1947 session about three-fourths of the bills ultimately reported out of committee were so reported by the time the session was barely half over. Similarly, in 1949,

something better than half the bills either to be passed or defeated in the session had already been disposed of when the session was half over, and about three-fourths of them were disposed of when the session was two-thirds of the way along. In general, only the difficult bills were left until late.

In striking contrast to the usual closing days of bicameral sessions, the last two weeks of the session saw only eight bills killed and 36 passed. The figures for the last week were two killed and six passed, and the only bill passed on the last day was the general appropriation bill. The number of bills on the governor's desk at the close of the session, therefore, is amazingly small compared with that usual in other states. Ordinarily the number is well under twenty.

The people of Nebraska have been well satisfied with their single-house legislature, at least until toward the close of the recent session, and they have enjoyed the distinction their state has in being unique in this particular.

There are now proposals for minor constitutional change in the system but no suggestion of returning to bicameralism.

One of the measures to go to the voters in 1950 was passed in the 1949 session. It would amend the constitution to provide for four-year terms, half the members to be elected every two years, and for fixing the legislative salary by statute—instead of the rather low maximum now embedded in the constitution. It would also permit annual sessions and, if annual, the session in even-numbered years limited to budgetary appropriations and confirmation of appointments.

An initiative petition is in circulation calling for a vote on increasing the legislative membership to somewhere between 75 and 85, and raising the salary. The thought of Nebraskans is thus upon alteration of details without changing the essential features of unicameralism.

Smooth Operation

The 1949 legislature may or may not have made some grievous errors. But in spite of charges of lack of leadership on policy and that in vote trading it was a "fraternity of tolerance," its program did not bog down or end up in the wild confusion common to most bicameral systems. This smooth operation seems to have been characteristic of all sessions of the unicameral system. Sly tricks may be attempted, but the work is so open that they are almost sure to be caught.

Perhaps one of the greatest assets of the Nebraska system is that operations, including those of lobbyists and members alike, are out in the open where newspapers may report them and keep the people of the state currently informed.

UNICAMERALISM VS. BICAMERALISM

A Study-Discussion Guide

League of Women Voters of Nebraska

Pub. No. 127 1962

Nebraska is unique among the fifty states with its truly unicameral form of legislature. Although many foreign countries and most United States cities employ the one-house legislative body, Nebraska has the only state unicameral assembly since Vermont changed to a bicameral form in 1836.

In recent years other states have been watching the operation of our unicameral legislature as they have considered state constitutional revision. It would, therefore, seem very appropriate for us to take a careful look at the relative merits and shortcomings of unicameralism and bicameralism.

The History of Bicameralism and Unicameralism in America

Most of the American colonies started their legislative bodies in a unicameral form. Elected representatives sat with the governor and his appointed council in order to consider the enactment of laws, the levying of taxes and the transaction of state business. It was not long, however, before the executive division, the governor and his council, began to meet separately in order to be able to exercise an executive veto, and also because the elected representatives objected to the presence of members of the executive branch. By the end of the colonial period, all the colonies, except Pennsylvania and Delaware, were using the two-house arrangement.

When the colonies became states and wrote their first constitutions, all the states, with the exception of Georgia, Pennsylvania, and Vermont, provided for a bicameral legislature. The Governors' Councils became elected upper houses, and thereby lost their executive and judicial powers. They were designed primarily to protect the rights and privileges of the larger property holders. To this end, there were higher property qualifications for both voters and members. It was felt by many that the lower house, representing the population in general, would tend to be more radical, and might encroach on the rights of the propertied.

The upper house was also designed to give advice to the lower house when needed and to defeat ill-considered measures passed by the democratic lower house. Many felt that the concentration of power in a single house would lead that body to become exceedingly ambitious. These factors, and a tendency towards imitation, led all new states admitted into the Union to adopt bicameral legislatures.

However, three states, Georgia, Pennsylvania and Vermont, retained the unicameral form. Each of these maintained a council of censors that in many respects closely resembled a second house. This council had three functions: to act as the watchdog over governmental operations, to make recommendations for change, and to call for a constitutional convention when it seemed necessary. In 1789, Pennsylvania, and in 1790, Georgia, abandoned their original constitutions and in the new ones provided for two-house legislatures. Georgia was apparently influenced by the pattern of the federal Congress, and Pennsylvania seemed dissatisfied with both her council of censors and the executive council and thus abolished them. Vermont maintained her unicameral legislature from 1777 to 1836. Until the last year of the unicameral legislature, it seemed to be highly regarded by the people of the state. In 1835 at the election of a governor no candidate received a majority of the popular vote. In attempting to elect the governor, therefore, the legislature became involved in a deadlock

that resulted in a recommendation by the council of censors to abandon the only unicameral assembly in the country and adopt a bicameral legislature, which passed by a very close popular vote. For the next hundred years there was no unicameral state legislature in the United States.

Bicameral legislatures saw some change during this time, the most significant being the spread of universal manhood suffrage. This stripped the upper houses of their property qualifications and their duty in protecting the rights of property owners. In many states, however, this did not cause an equalization of representation in both houses. The lower house continued to be elected on the basis of population, while in most instances, the election districts for representatives to the upper house were based not only on population but also area. This tended to protect the then extremely important rural economy from the more progressive interests of the urban areas. As the urban areas have increased in size and relative importance, this has posed an increasing problem.

The Development of the Unicameral Legislature in Nebraska

As with all the other states that entered the Union after the Revolution, Nebraska's first constitution provided for a two-house legislature. This was maintained until 1934, in which year the people of Nebraska by a vote of 286,086 to 193,152, following a hotly contested campaign, established a unicameral legislature. It seemed strange to many observers that Nebraska, an extremely conservative farm state in the grips of a serious depression, would adopt such a dramatic change from the traditional form of state government and establish the only unicameral legislature in the United States. It has remained thus for over twenty-five years in spite of rather overwhelming agreement by political scientists that, no matter what its problems, Nebraska's unicameral legislature has proved itself to be a successful experiment.

In 1934, the idea of a unicameral assembly was not new to Nebraska. It had been preposed here, as in many other states, for many years. John N. Norton was its first strong advocate. He campaigned for this cause as early as 1913. In 1915, a joint legislative committee recommended that the people vote on a one-house form. This bill did not pass the legislature, and similar bills failed in 1917, 1919, 1920, 1923, 1925, and 1933. At the Constitutional Convention in 1919-1920 the proposal for discussion of a one-house legislature failed by only one vote, that vote being the presiding officer's vote to break a tie. Why after all these failures did it finally become a reality in 1934?

Although it remains somewhat of an enigma to those who know Nebraska, political observers have suggested several reasons for the establishment of the unicameral legislature. Possibly the most important reason was the vigorous personality and prestige of its strongest advocate, George W. Norris. It is upon his insistence that non-partisanship was established as a characteristic of the one-house body. He selected a propitious time for his campaign. A two-headed dragon was attacking Nebraska. The Midwest, along with the rest of the country, was in the depths of depression. As if this weren't enough to make times difficult for Nebraska's citizens, the early thirties also brought serious drought. Even the conserva-

tive, frugal people of Nebraska found living in these circumstances extremely difficult. Costs of state government had been a burden to some due to the building of the State Capitol, which had been constructed on a pay-as-you-go basis over a period of ten years. Therefore, the fact that a single, small legislature would cut governmental costs may have had its effect on the vote.

Another reason advocated as possible explanation was the fact that there were two other highly popular amendments offered at the same election-local option on prohibition, and legalized pari-mutual betting. The first won by a 110,000 majority, and the second by 64,000. The unicameral amendment was approved by a majority of 93,000. Possibly the popularity of these other issues helped to carry the unicameral amendment with them.

Nebraska's unicameral legislature has had twenty-five years to prove its effectiveness. There have been no major changes in the original provisions. The unicameral amendment provided for a one-house legislature, with all the privileges and responsibilities of the preceding two-house body. The 1935 legislature was to determine the legislative districts, using the 1930 census as their population guide. There were to be not more than 50, nor less than 30 members of the legislature. These members were to be elected on a non-partisan basis for a two-year term. The aggregate salaries of the legislators was not to exceed $37,500 per annum. In addition to his salary, each member would receive his actual traveling expenses for one direct round trip between his home and Lincoln for each legislative session, regular or special. The Lieutenant Governor would be the presiding officer, voting only to break a tie. A majority of the legislature would constitute a quorum. The legisture would determine its own rules, qualifications for membership, and be the judge of elections. It would choose its own officers, including a speaker to preside in the absence of the Lieutenant Governor. A two-thirds vote would be necessary for the expulsion of any member, and such member might be expelled only once for the same offense.

The legislature would also publish a journal in which, if requested, roll call votes would be recorded. Legislative sessions would be open to the public unless there was some special reason for secrecy. There were also provisions for the passage of bills stated in the amendment.

Most of the early opponents to the change have been converted or stilled in the face of the success of the unicameral legislature. Today, no one of any prominence suggests that Nebraska return to a two-house legislature, although there are many proposals for changes, with which the sponsor hopes to make the one-house body work more effectively.

Steps in the Passage of a Bill

Unicameral

1. The bill is introduced and read by title on the floor.
2. It is then referred to the standing committee for consideration and public hearing.
3. The standing committee reports the bill and refers it to General File.
4. General File provides reading, consideration, general debate and amendment by the Legislature, then the bill is referred to the Enrollment and Review (E & R) Committee.
5. The bill is reported back by the E & R committee and referred to Select File.
6. The Select File provides a second consideration and then the bill is referred to E & R for engrossment.
7. The bill is reported back by the E & R committee and referred to the Final Reading File.
8. On final reading, the bill has its third consideration and passed or killed.
9. The bill is sent to the Governor for his signature.
10. If the Govenor vetoes the bill, he sends it back to the Legislature to allow them to override the veto.

(This is the procedure for bill passage used by the Nebraska Legislature.)

Bicameral

1. The bill is introduced and read for the first time on the floor of the house of origin.
2. It is then referred to a standing committee.
3. After committee investigation, the bill is reported from committee.
4. The bill is then discussed in committee of the whole amended, killed or advanced without change.
5. The bill passed, third time, in the house of origin.
6. The bill is then sent to the second house.
7. It is then referred to the proper committee.
8. The second house committee refers the bill back to the main body after the usual consideration.
9. The bill then may be amended and passed.
10. If the amended bill is not accepted by the House, a Conference Committee is appointed to reach an agreement between the two versions of the bill.
11. When the Conference Committee reports a bill to the respective Houses, it is either accepted or rejected by the two groups without amendment of the conference committee report.
12. If the bill is rejected by either House, it is sent back to a new Conference Committee for further consideration.

13. If the bill is accepted by both Houses, it is sent to the Governor for his signature.

14. If the Governor does not approve of the bill, he may veto the measure and return it to the Legislature, usually giving his reasons for the veto.

Two lists of arguments often advanced in discussions of the form of state lawmaking bodies are presented below. One list argues in favor of a unicameral form and the other argues in favor of a bicameral legislature. Some of the arguments are used for both sides. Some are more valid arguments than others. Generalizations are often made. Consider each argument as it is presented in an attempt to determine the important issue or issues underlying each point. Following the summary of arguments for the two legislative forms, some discussion questions are presented.

Arguments in Favor of a Unicameral Form of State Legislature

1. There is no reason for people to vote for representatives in two separate houses.

   A. Originally, class differences dictated the need for two chambers. Now, these qualifications have disappeared and the same people vote for the members of both houses.

2. The Unicameral form simplifies bill passage.

   A. The unicameral form with only one chamber and a limited number of legislators, simplifies bill passage because fewer steps are required. Therefore, it is less likely for the bill to become confused or altered. Having fewer steps also means that a bill can be passed more quickly and efficiently without the necessity of limiting debate.

   B. The large bodies, of the lower houses particularily, in the bicameral form, make many complicated rules and procedures necessary. Passing a bill requires many involved steps and constant watchfulness, in order to follow the bill's progress. The complexity causes many delays and aids in the passage of poor legislation. Delayed bills often fail to receive consideration until the last minute clean-up rush.

3. Better legislation would result from a unicameral legislature.

   A. In the unicameral assembly, the process through which a bill must pass is more direct and a bill is more readily available for scrutiny by the legislators themselves and by the public. The well-regulated, easily defined process of bill passage would eliminate to a major extent the pile up of bills at the end of the session, because a bill is not so easily buried.

B. The bicameral form often causes hasty and ill-considered legislation. Two considerations do not necessarily mean double consideration. The first house may pass a bill quickly expecting that the second house will give it more careful study. Then the second house may assume that the first house gave the bill adequate consideration and automatically pass the bill. In practice, the majority of bills passed by one house are passed without change by the other. The number of poor bills that are passed indicates how poorly the check of the second house works in practice. Studies have indicated that the governor is a better check on the passage of bad bills. Many bills, passed by bicameral legislatures, might not be passed if legislators felt final responsibility for their actions.

C. The end of season rush in the bicameral legislature often results in poor legislation. In the beginning of a legislative session, much of the time is spent in organization. Several studies of bicameral legislatures have shown that between 50% to 90% of the bills are passed in the final two weeks. In most legislatures, a majority of bill passage occurs under suspension of the rules. Often bills are advanced, past the second reading and debate, to the final reading. This rush results in lack of consideration, poor wording and ill-advised amending.

4. A unicameral legislature places upon the members more responsibility for their actions.

A. Public attention can focus more easily upon the well-defined narrow procedure of the unicameral body, rather than being lost in the multitude of committees in the two-house legislature. George Norris has stated, "Responsibility always makes a person more deliberate, more logical and more careful. The same individual would be a much better legislator in a one-house legislature, where every official act must be performed before the eyes of the public, than in a two-house legislature, where all kinds of opportunities are offered to shift his responsibility, to share it with others, or to conceal his official acts from the public gaze."*

B. In a bicameral legislature, most legislators do not feel full and ultimate responsibility for their actions. Politicians can introduce popular, but objectionable, legislation by having similar bills introduced and passed in both houses, and having each one killed in the second house. Thus the legislator can placate public opinion and be on record in favor of a popular bill, while having no bill become law.

C. In the bicameral body, it is difficult for the average voter to follow a bill and assign responsibility for it. Intricate legislative machinery often conceals a politician's trail. A bill is easily lost to the public eye by rapid passage for minor amendment between committees of the two houses.

*Norris, George W., "One-House Legislature," Annals of the American Academy, September, 1955, p. 57.

This rapid passage also enables political buck passing.

5. The Conference Committee is an inherent evil necessary for the operation of the bicameral assembly.

   A. In the unicameral legislature, the conference committee can be eliminated, because it is only needed when two independent groups cannot agree and compromise is indicated.

   B. The conference committee in the bicameral is made up of members appointed by the presiding officers of both houses. Its purpose is to reconcile differences between the two houses. The report from this committee cannot be amended by either house, so it either must be accepted in its entirity by both houses or the bill fails. In seeking compromise, the conference committee often changes or amends the original purpose of the bills. Conference committee meetings are often held in secret, without rollcall, and no records are kept. Because a majority of the conferees from each house must agree to the compromise, it is possible for a minority to block passage of the committee provisions. This creates an increased opportunity for making political trades.

6. Lobbyists are less effective in the unicameral body.

   A. In a unicameral legislature there is less opportunity for objectionable lobbying. Because its procedure is apt to be more intelligible, there is less opportunity for manipulation by lobbyists, and a greater sense of responsibility by the legislators toward their constituents.

   B. In the two-house legislature, a lobbyist has many opportunities for intervention. Not only can he approach and attempt to control legislators in both houses and, thereby, sometimes succeed in one where he has failed in the other, but he also has an excellent opportunity to influence the conference committee. With these several sources, the lobbyist has more opportunity to cover his tracks and make his intervention less obvious. Because the legislator feels less direct responsibility, he is more apt to bow to the pressure of the lobbyist.

7. Special advantages of the unicameral legislature.

   A. It is easier to achieve cooperation between the Executive and Legislative branches of government. Their relationship is more direct, because there is only one organization of the legislature with which the Governor has to deal. It is easier for him to exert legislative leadership, resulting in a more unified and planned legislative program.

   B. The unicameral form may be more economical than the bicameral form with fewer salaries and related expenses to be paid. There is apt to be much less waste in the unicameral assembly with its simplified organization.

   C. The responsibility offered to the legislators as well as the opportunity to pay higher salaries is apt to attract

better qualified individuals.

D. The unicameral form has been advocated by the scholars of the National Municipal League since 1920, when they drafted their Model State Constitution.

Arguments in Favor of a Bicameral Form of State Legislature

1. The unicameral body is often in reality bicameral in nature.

   A. Most states of countries that operate under a unicameral legislature have what is in effect a second house by using appointive councils as a check on the action of the single house.

2. The bicameral form insures more equal representation to all interests within the state.

   A. All the people within a state should be represented, not merely a majority. Now, instead of the two houses of the bicameral representing property holders and non-property holders, they generally represent urban and rural interests. Representation in one house does not do this as effectively. Besides rural and urban interests receiving their due consideration, other special interests and classes can be represented, thereby counterbalancing the popular element and making for more sound legislation.

   B. The unicameral form does not represent the whole state as well as the bicameral. The small number of legislators will not represent the smaller communities and interests. It would tend to represent only the majorities. A single chamber will be apt to give unequal representation to cities. Apportionment becomes more of a problem in the unicameral because of the small number of representatives.

3. The Bicameral provides for more careful consideration of legislation.

   A. Double consideration of all issues is provided. The procedure for bill passage is more deliberate.

   B. The bicameral form affords a sound check upon unwise legislation. It eliminates the feeling on the part of the individuals and the body that they have only themselves to consult and satisfy. Usually, each house takes pleasure in detecting carelessness on the part of the other. If legislation is good, it is usually passed by both houses. If it is not good, it is fortunate that there is another body to oppose or correct it. The delay inherent in a more complicated system often works to benefit the legislature by preventing much bad legislation from getting through.

   C. "If the second house does its duty, no harm is done. If it fails to do its duty, there is nothing to show that it would not likewise have failed if it had been a single chamber."*

*Luce, Robert, Legislative Assemblies, Houghton Miflin Co., New York, 1924, p. 40.

B. The one-house system provides for no real check. Because only one action is necessary, bills can often be quickly passed under sway of emotion. The Governor's check is often inconsequential because it can easily be set aside by a not poor legislation. The single body is well aware of its potential power.

4. Many of the charges of shifting responsibility are exagerated and ill-founded.

   A. The joint-committee system in many states (Massachusetts, Vermont, Main, Connecticut, and Wisconsin) has had the effect of assigning responsibility.

   B. Any legislatow who seemed to be continually failing to accept responsibility would not be re-elected.

   C. There is no reason to suspect that where similar bills were offered in each house and defeated in the other, the legislators were merely trying to shift responsibility and were not looking seriously at a situation.

   D. Opportunities for shifting responsibility are available in the unicameral. DeLay and killing of bills can be shifted to the committees to which bills are referred. Responsibility can be shifted by trade-outs to members whose constituencise are disinterested in the bill. If all members are shifted to those not up for re-election. Responsibility can also be shifted to the Governor.

5. The Conference Committee is subjected to many checks and is not the evil often claimed.

   A. Both houses must vote on the bills referred back from the committee. Either house may demand action on any bill in committee. Each house has the right to send back any bill for further consideration. In many states, there are consitutional checks on the conference committee, prohibiting them from changing the intent of the bill.

   B. If the joint-committee system is used, there is often no disagreement and, therefore, no need for the conference committee. Secrecy can easily be removed by providing for open meetings and publication of the procedings. Antilobbying legislation can eliminate the influence of lobbyists on the conference committee.

6. Objectionable lobbying is not the major problem in the bicameral legislature that it is often assumed to be.

   A. A large unweildy legislature is also unweildy for a lobbyist. There are more opportunities for lobbying to fail, more gaps that have to be filled. Two houses are more difficult to manage than one.

B. Regulatory measures can easily be passed that would control any lobbying problem that may exist.

C. The one-house legislature can easily be controlled by lobbyists or special interests. Although it may be easier for a lobbyist to thwart legislation in a two-house legislature, he can much more easily promote desired legislation where he has to control only one house.

7. Although the bicameral state legislatures in existence today are not perfect, it would be easier and more satisfactory to correct the flaws in them, than to radically change the form of the legislature.

A. Procedures for bill passage can be more clearly defined and greatly simplified, elimating delays, unwieldiness and the end of season rush. One example of a simplification is the adoption of the joint-committee system.

B. Legislation controlling procedures of the conference committee and of lobbying could easily be provided.

C. The adoption of bill drofting services, legislative reference bureaus, and revision committees would facilitate the passage of more accurate, intelligible, clearly worded bills.

Questions for Discussion

1. What are the central issues dividing the proponents of bicameralism and unicameralism?

2. For each of the issues identified as central, an exploration of the following questions should contribute to a better understanding.

a. What is the nature of this issue and why is it important?

b. Which form of legislature seems best suited to a satisfactory resolution of this issue?

3. After carefully considering the characteristics of both forms, do you in general prefer a one-house or a two-house state legislature?

4. In your view are there any important differences between the desirability and effectiveness of the theoretical unicameral form, and the way in which it operates in prictice in Nebraska?

Unicameralism: 'It Would Work Anywhere'

Beetle

. . . One House Legislature Will Be 1967 Topic

Most ideas for state legislative reform are mild compared with a proposal that two houses be cut back to one. So far the only "buyer" has been Nebraska. Yet the question —that of unicameralism—came up at New York State Constitutional Conventions in 1915 and 1938. It most certainly will be discussed as the 1967 convention approaches. Here's the first of four articles discussing Nebraska's experiences and the relevancy of the idea to New York.

By DAVID H. BEETLE
Gannett News Service

There's a saying that if you build a better mousetrap, the world will beat a path to your door.

Well, Nebraskans thought they built a better mousetrap when they became the first state to establish a unicameral (one house) legislature back in 1937, but the world failed to respond.

They gave high schoolers a national debate topic and political scientists a few paragraphs in their texts, but that was about it.

Today, though, thanks to the one-man-one-vote mandate, things are perking up.

A lot of people around the country are saying: "If both houses have to be based on population, why have two?"

"If this doctrine stands, the inevitable outcome will be unicameral legislatures in all our states," Cecil H. Underwood, a former West Virginia governor, told this year's national legislative conference in Portland, Ore.

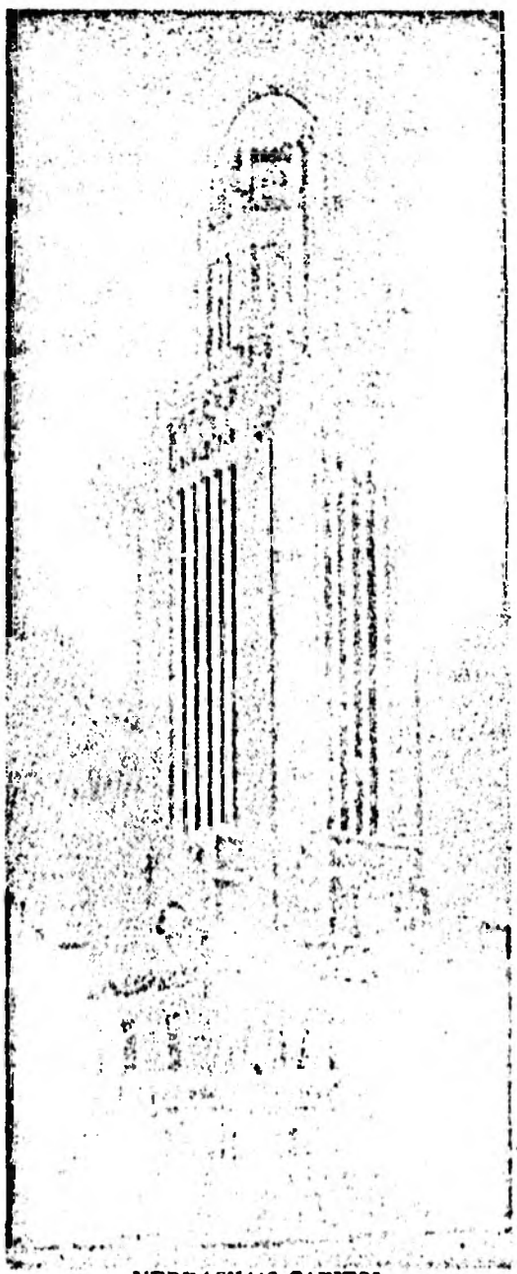
This prediction may be extreme, but the presence in Nebraska's tower-dominated Capitol of one left-over legislative chamber now used mostly for hearings, bid openings, and civil service tests is getting to be more than just a curiosity for passing tourists.

It's the abandoned one that's significant. The one that's in use looks perfectly normal.

INVITATION "sales trips" to tell "the Nebraska story" are mounting. Governor Frank B. Morrison has appeared before the Texas legislature and the New Jersey bar; Lt. Gov. Philip C. Sorensen has told Rhode Island constitutional convention delegates that there's nothing about a unicameral's value that's peculiar to Nebraska; legislative clerk Hugo F. Srb (he says his name reads like a radio station) has spoken similarly in Kentucky and California.

Mail inquiries are pyramiding. A Tennessee constitutional delegate writes in. So do curious legislators from other states: Connecticut, Pennsylvania, Ohio, Iowa, North Dakota, Alaska. And even citizens, eying reforms: a physician from Idaho, a chamber of commerce secretary from the state of Washington, an ex-Nebraska newspaperman now in Colorado.

Long eying Nebraska with satisfaction has been the National Municipal League. It has seen one city after another abandon bicameral councils until they now linger only in a couple of places in New England. As far back as 1918, the league wrote unicameralism into its model state constitution. When visitors from other lands pause in Lincoln, they often find Nebraska somewhat less than startling. Most of the Canadian provinces, as well as some countries in Europe, Latin America and Africa get by with one house.



NEBRASKA'S CAPITOL

Much of the current interest in unicameralism eddies around the office of clerk Srb. His earliest Nebraska memories go back to a day when he came home from the first grade sobbing to his Czech parents that "Everyone spoke English."

A TEACHER and attorney, he was a senator in the old two-house legislature and became the first and only clerk of the unicameral. Closer to the scene than anyone else living, he is enthusiastically and voluntarily pro-one house.

"With one house you fix responsibility. A legislator can't go home and say: 'We passed it, but something went wrong in the other house.' It's a lot easier for voters to keep track of one senator than one senator and three representatives."

Mr. Srb's enthusiasm is typical.

"The people of Nebraska are just about as likely to vote out unicameralism as the people of Colorado are to vote out Pike's Peak," one Nebraska editor wrote.

Among 30 Nebraskans sampled at random in Lincoln, only two—a barber and a draftsman —thought the state should have two houses. They felt vaguely it might lead to a better legislation. A 1961 survey of 68 present and former legislators turned up only four who favored the bicameral.

Governor Morrison, playing it safe, says that if unicameralism were put up to the voters, they'd go for it 75 per cent.

"Twenty-five per cent of the people are against anything you propose," he said, explaining the figure.

"I DON'T SEE why we need two legislatures any more than a bank needs two presidents, the United States needs two presidents or a city needs two school superintendents. There are a lot of vestigal things around—things like an appendix—and a bicameral legislature is one of them."

"The Nebraska Legislature has given a good account of itself," summarizes political scientist Adam C. Breckenridge, vice chancellor of the University of Nebraska. "I think other states could use one house—especially the more homogenous ones. I don't know but that it would work well anywhere."

"State government in order to survive has to be an equal co-partner with the federal government," believes Senator Richard D. Marvel, Hastings. "You can achieve this only by streamlining the structure and unicameralism is the one way to do it."

Even the newspapermen "on the scene"—and no group is more wary—are "sold."

"It's a reporter's dream," exclaimed one. "With a single house it's so much easier to track down legislation and find out its status."

Another newspaperman, now in California, said: "Come to think of it, I've worked in five different states and only in Nebraska did the legislature seem to command a lot of respect."

Unicameralism: Where Nobody Can Hide

Beetle

Non-Partisanship Is Included in the Package

Most ideas for state legislative reform are mild when compared with a proposal that two houses be cut back to one. So far the only "buyer" has been Nebraska. Yet the question—that of unicameralism—came up at New York State Constitutional Conventions in 1915 and 1938. It most certainly will be discussed as the 1967 convention approaches. Here's the second of four articles discussing Nebraska's experiences and the relevancy of the idea to New York.

By DAVID H. BEETLE
Gannett News Service

Almost any knowledgeable American probably knows that Nebraska has a unicameral (one-house) legislature.

But it's a "hep" one indeed who also knows that it's non-partisan.

Yet historically the two are inseparable.

They were sold in Nebraska in a package in the searing summer of 1934. The top "salesman" was Senator George W. Norris, a "New Deal Republican," famous for the TVA, the REA and a black string tie. By November, he'd worn out two sets of auto tires stumping the state.

"Unicameralism" got the headlines, but "non-partisanship" was equally dear to the senator's heart. He had himself refused to take "party orders." He looked on the political pros as "Dealers in jobs who sold them over the political pie counter as a merchant sells calico."

Thus the two concepts were linked in the constitutional amendment that did the trick—an amendment which Nebraskans first got on the ballot by petition and then adopted 286,086 to 193,152.

The electorate was in a "yes" mood the same day they ended prohibition and OKd parimutuels. As for unicameralism, it wasn't a bolt from the blue for Nebraskans. Spurred on by political scientists and others, they had been talking about it for 19 years. In 1934, plagued by depression, drought, and ten-cents-a-bushel corn, they were also looking for economy.

IN THE UNICAMERAL, they got it. The amendment provided for from 30 to 50 legislators in one house as against 133 in two. The enabling statute settled on 43—a number but recently upped to 49. It took 22 years before the unicameral's budget climbed back to what the bicameral was costing.

The unicameral has also legislated with an eye to the state's dollar—some think more than it should. State aid is skimpy. In 1963 Nebraska collected less per capita in state taxes than any other state. It is also debt-free—but perhaps only because the Constitution still insists on it.

As he pressed his campaign from urban Omaha to the western ranges, Senator Norris made it clear that the idea of a two-house legislature emerged in England and elsewhere when the aristocracy gave recognition to the common people. He saw no excuse for two houses in a democracy. He branded bi-cameralism as a device to throw sand in the eyes of the voters, so they couldn't follow legislation and find out what went on. He didn't really "buy" two houses even for Congress, but there he felt stymied by states rights and the U. S. Constitution.

He affirmed one house would end legislation by conference committee. Here he felt lobbyists got in their licks behind closed doors. And while he doesn't seem to have conceived as even possible a bicameral state like New York without conference committees, one feels sure he would have felt that this state's mysterious methods of ending disagreements were skullduggery compounded.

"Instead of one house being a check upon the other, the double-barreled system is a shield for corruption," he charged, "concealing the record of unworthy representatives and making it impossible for a critical public to know just what the record is."

HE ALSO FAVORED fewer and better paid legislators—an idea that just now seems to be ripening 30 years later.

A lot of Senator Norris's dreams for what he predicted would be a "business-like legislative operation" have been fulfilled.

Nebraska's Senate is an-easy-to-understand, simple-to-follow, goldfish-bowl operation.

The senate (technically the house was abandoned because the title "senator" sounds more impressive) elects a speaker, other officers, a committee on committees, and through this 14 working committees. It's the smallest number of legislative committees in any house in any state. The organization voting is carried on by secret ballot.

If a legislator introduces a bill, he has to prepare a statement telling what he expects to accomplish. The bill and the statement go to the appropriate committee. It calls a hearing. This is public. Anyone who wants to attend, appears. What they say—and what the legislators say—get summarized in a public record.

To act, a committee goes into executive session. To this, though, the press is invited. Technically the reporters can only report the result (bill out, 5-2; bill killed, 7-0, etc.); Actually if a reporter hears anything he wants to write, he can ask the legislator for it afterwards—on the record. Usually he gets it. In any case, the committee chairman is mandated to put on each senator's desk a public memo explaining the committee's action and its reasons.

ON THE FLOOR, a member can get a roll call on any bill or motion, simply by asking. And a lot ask. A voting machine quickly obliges with a tally. Everything said in the chamber gets on a public record—one that's indexed yet. No bill can get through to the governor in less than a week.

Doggedly and methodically, the legislature holds sessions mornings, 9 to 12, and committee meetings in the afternoon, 1:30 to 5. These go on from Monday through Friday until the job is done. The hours may be extended in the afternoon if a lot of people want to be heard. Otherwise they seldom change. If a dozen bills are voted on in any one day, it's a lot. The usual number is half-a-dozen.

This summer, a seven-and-a-half month biennial session droned to a calm ending at 3:10 p.m. on August 17. That last day legislators acted on seven bills, no log jams.

So Senator Norris got the kind of legislature he wanted: a business-like place where no one can hide.

He also got a house with no "majority leader" and no "minority leader"; a house whose members may belong to a party but don't run on any party ticket.

This system is as rare as unicameralism—perhaps rarer. Even Minnesota legislators who don't run on a party ticket choose up sides after they're elected.

And in Nebraska, unlike unicameralism, nonpartisanship is hotly controversial.

What the Columnists Say

Unicameralism: Protection Against Lobbyists

Beetle

Nebraska's Legislature Is No Clay Pigeon

Most ideas for state legislative reform are mild when compared with a proposal that two houses be cut back to one. So far the only "buyer" has been Nebraska. Yet the question—that of unicameralism—came up at New York State Constitutional Conventions in 1915 and 1938. It most certainly will be discussed as the 1967 convention approaches. Here's the third of four articles discussing Nebraska's experiences and the relevancy of the idea to New York.

By DAVID H. BEETLE
Gannett News Service

Any state that wants to adopt a unicameral legislature has to face the fact that the country's only state-level model—Nebraska's—has an added feature: Non-partisanship.

Thus, in evaluating the success there of the one-house system, it's necessary to figure out how much of it is due to unicameralism and how much to non-partisanship. On this, even Nebraskans don't agree.

A few—though they seem to be a small minority—think that unicameralism will only work well in a non-partisan situation. They argue that if you had one house linked with a governor of the same party, he'd have too much power.

Others—perhaps most—believe that while non-partisanship and unicameralism don't have to go together, it makes for a nice marriage.

Still others—again a large number—feel that while unicameralism works well, "partisanship" would make it work better.

"In a non-partisan legislature, matters will be discussed and decided regardless of the wishes or interests of the party bosses," predicted the late Senator George W. Norris, the free-wheeling Nebraskan who "sold" the two-part package.

Then, as now, a lot of the party "pros" oppose non-partisanship.

REPUBLICAN WOMEN, with considerable rank-and-file help from both parties in 1963 circulated a petition to amend the Constitution to require that legislators run on a party ticket.

Needed to put the question on the ballot were 46,459 signers. They were 150 signers short. "And, at the end they were paying 15 cents a signature," a newspaperman observes. It was freely predicted the voters would have rejected it anyway.

A similar move to get the legislature itself to put the amendment on the ballot failed miserably. Only eight legislators favored it.

"Nebraskans are about evenly divided on the non-partisan issue," says Governor Frank B. Morrison. "But I think over the long run at the state level, non-partisanship works better. You see a lot of backwash from national politics confusing state issues around the country."

He acknowledged that as governor he might be able to get his own program across better if he had a legislature of his own party. "But that might be good or bad," he added. "The long range effect of a non-partisan legislature acting on a governor's policy is likely to be beneficial."

Hugo Srb, the legislature's clerk who was a senator in the old bi-cameral legislature, thinks those who favor partisanship just haven't seen it in operation. "That's the sad part of it," he says. He still recalls an eye-opening day 30 years ago when he was pressured into voting for an incompetent "because the party wanted it."

"WHAT HAPPENS when a crisis erupts—be it in Washington or anywhere?" he asks. There's an instant appeal to drop politics and deal with it on a non-partisan basis."

Richard D. Marvel, Hastings senator and a political science professor, sees both sides but leans toward non-partisanship.

"I'm responsible directly to the people and not to any political leader," he says. "I can't blame anything on a majority or minority leader, either."

For a Nebraska politician's argument th "non-partisanship had led to a house full Mexican generals all going off on their own the senator had a forthright answer.

"Leadership evolves here on a subject m ter basis," he says. "We tend to specialize."

It's better to have a doze leaders than or In the areas of public power, budget, taxes, ed cation, health, you don't find one man calli all the shots—and that's good."

"One of the problems," he acknowledges, that we probably pass more bills than we shoul simply because under our system it's som times hard to rally opposition."

Also favoring non-partisanship is Mrs. Fe Hubbard Orme, a housewife and school teach turned senator. "I'm sure if I had a majori leader, I wouldn't do half as much as I now," she says.

"He would be calling the boys in and tellir them what to do. From what I've heard other legislatures, there's a lot of goofing off.

SENATOR NORRIS SAW in "non-partisa ship" and "unicameralism" a double protectio against lobbyists. And while Nebraska's legi lature seems to be no "clay pigeon" for pre sure groups it's not easy to decide which el ment in the two-part package affords the mo protection.

"I've made it a point to talk with quite few lobbyists through the years," says Earl E Hershberger, a pharmacy owner at Lincoln "Cornhusker Hotel." His job gives him a ring side seat. "The first three or four years th lobbyists thought it was going to be a snap, bu it hasn't worked out that way. The lobbyist tell me they have to work harder here than any where; that they just can't get a majority leade on their side; that they have to talk with al the legislators individually."

One thing is sure. Nebraska's motto is: "Th salvation of the state is watchfulness in th citizen"—and unicameralism makes it easie for him to watch.

(Next: But would it work in New York?)

What the Columnists Say

Unicameralism: Could It Work Here?

Beetle

One-House Proposals Were Killed in 1915, 1938

Most ideas for state legislative reform are mild when compared with a proposal that two houses be cut back to one. So far the only "buyer" has been Nebraska. Yet the question — that of unicameralism—came up at New York State Constitutional Conventions in 1915 and 1938. It most certainly will be discussed as the 1967 convention approaches. Here's the last of four articles discussing Nebraska's experiences and the relevancy of the idea to New York.

By DAVID H. BEETLE

Gannett News Service

"It would be unfortunate if a constitutional convention were held in New York and consideration were not given to a proposition which, in recent times, has commanded the attention and thought of nearly all profound students of political science."

The quote refers to a one-house state legislature. It sounds like a nice, fresh quote newly minted for the approaching New York State Constitutional Convention.

Actually, it goes back a couple of constitutional conventions ago to the appearance in 1915 of a Long Island senator before a legislative procedures committee.

The idea of unicameralism is as persistent as Harold Stassen. The reasons for it change little, but the objections shift.

In 1915 it was argued that unicameralism "was a radical step" and that New York should not be the first. At the 1938 Constitutional Convention, it was contended that while the Nebraska experiment seemed to be working out okay, it was really too new to tell. And now in 1965, it's affirmed that while unicameralism works fine in a place like Nebraska you wouldn't want it in a big complex place like New York.

NEBRASKANS, for the record, note that complexity is relative. With a corn belt in the east, range country in the west, and 350,000-people's worth of urban sprawl around Omaha, they have their problems too. A run-down of their 1966 legislative program looks suspiciously like New York's—arts council, abolition of capital punishment cigaret tax increase, park bonds, urban renewal, fair housing, auto junk yards, State U. tuition and so on.

The 1915 convention actually got three unicameral proposals calling respectively for

MR. SAMUELS

MR. KIRVIN

single houses of 60, 100, and 168. All died in committee, but not until after three members of the legislative procedures committee from Owasco, Whitehall and New York, staged a floor fight. They argued that one house was more efficient and economic. That two houses existed only because of "the plaster cast of tradition."

They dredged back in history to discover that Benjamin Franklin had said that setting up a two-house legislature was like hitching a horse to each end of a cart and letting them pull in opposite directions.

Unicameral proponents also showed up at a committee hearing.

"How long would a bank, a railroad or a factory escape bankruptcy if it were managed by two boards of directors with equal powers and a chairman with extensive veto powers?" asked William E. Verplanck, Fishkill.

"With two houses and two sets of new committees, bills are shunted back and forth so many times that when one finally becomes law it is often impossible to tell who is responsible for it, or if a good bill is defeated it is almost impossible to tell who is responsible for its defeat," complained the Long Island senator, William McKinney.

"AMONG CITIES the first tendency was to correct evils by imposing further checks and balances," reminded the merchants association of New York. "The cure was worse than the disease. It was not until pressure for improvement was turned toward simplification of municipal government that real progress was made". A key point, it observed, was elimination of dual city-level legislative bodies.

The 1938 Constitutional Convention received—and killed in committee—two unicameral proposals. One was fathered by Court of Appeals Judge Harlan W. Rippey at the request of Democratic-lawyer John A. Millliver, a fellow Rochesterian who once ran for the State Senate. The other bore the name of Charles Poletti, later governor. He introduced it for the Citizens Union.

Staffers for a Poletti-headed committee doing pre-conference research listed the pros and cons of unicameralism. These tended to balance off except a couple of "cons" no longer held. One was that the Nebraska experiment was too new; the other that two houses permit representation of both people and area.

As the 1967 convention approaches, most of the cast will be different but a lot of the lines will be the same.

Governor Poletti today isn't necessarily for one house but believes it is something the convention should study.

ARDENT UNICAMERAL backers are the National Municipal League's Alfred Willoughby and the Citizens Union's Georgo Hallett.

Even a few political activitists are speaking up.

On the heels of the one-man-one-vote mandate, former GOP speaker Joseph Carlino said unicameralism would be worth looking into.

John F. Kirvin, a Schenectady Democratic assemblyman who won reelection by a narrow margin in a GOP-carved district, favors one house of 100 or 150. Today he sees "no checks and balances" if the same party controls both houses and only "wastefulness, friction and political folly" if it doesn't. He acknowledges two houses mean more patronage but doesn't think that's good.

Outspoken for unicameralism is Howard J. Samuels, a Canandagua business man and Democrat, who eyes the governorship.

Interestingly, while talk about borrowing Nebraska's "unicameralism" persists there is little mention of borrowing the other part of the late Senator George Norris's package—"nonpartisanship."

Back in the 1915 convention an Albion delegate asked: "Are the people educated up to unicameralism?"

"Why not anticipate their demand?" shot back a New Yorker.

And that seems to be the way things stand 50 years later. It could simply be a good idea waiting for another George Norris to come along.

Nebraska Strong for Unicameral

Thirty Years' Experience Disproves Arguments Advanced Against It

Richard D. James
In *The Wall Street Journal*

LINCOLN, Nebr.

One attraction sure to catch the eye of anyone approaching Nebraska's second largest city is the state Capitol, a towering white Indiana limestone edifice dominating the Nebraska plains for miles. Completed in 1932, it was acclaimed one of the nation's architectural showpieces.

It is probably more noteworthy these days, however, as the home of the nation's only one-house state legislature, which has been thrust into the national spotlight recently by revival of an issue that once appeared virtually dead — unicameralism.

The Mirror of Public Opinion

The historic "one man, one vote" U.S. Supreme Court decision, under which states now are busily recarving legislative districts to conform solely to population, raises the question of whether or not two legislative houses are necessary, if both are apportioned on the same basis. To find out how unicameralism works, it is necessary to turn to Nebraska, the only state with a single chamber since Vermont adopted bicameralism in 1836.

Though the idea of substituting one house for two, largely dormant since Nebraska adopted it in 1934, is not given much chance of making substantial headway in other states any time soon, some are discussing the possibility again.

Nebraska officials were asked by Kentucky to testify before an assembly revising the Kentucky Constitution. A former Rhode Island Governor spent three days in Lincoln studying the system and a unicameral bill is pending before the Illinois legislature. In nearly every state the concept is getting consideration.

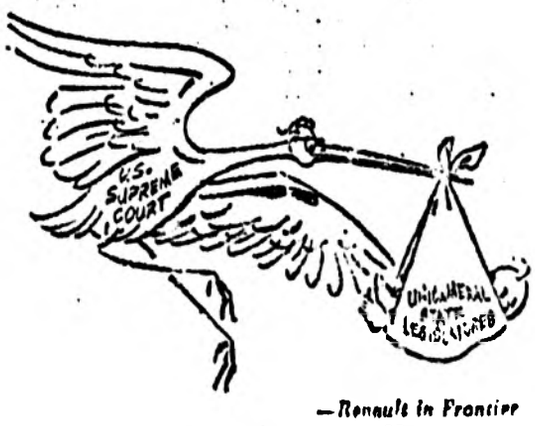
Nebraskans are quick to champion unicameralism. Using comparisons of the state's final bicameral legislature in 1935 with the first unicameral body in 1937, they claim the one-house system is more economical and more efficient.

The last bicameral session cost $202,593, or nearly double the $103,445 for the first unicameral session. The number of legislators was cut to 43 (currently 49) from 133, the number of standing committees to 18 from 61 and the number of bills introduced to 581 from 1056. Yet the first unicameral lawmakers passed 214 laws in 98 days; their bicameral counterparts, meeting 12 days longer, counted 22 fewer bills.

The one-house system, Nebraskans say, firmly fixes responsibility for good legislation or poor. "There's no way to pass the buck to the other house," says state Senator Richard D. Marvel. "The responsibility is right here."

But the most important advantage, some think, is eliminating the small but potent conference committee which resolves differences when bills passed in both houses vary, in content. The process, some contend, grants to a few men great power in determining the ultimate shape of legislation. Moreover, "the committee is a lobbyists' paradise" since only two or three Senators usually need to be swayed, says state Senator Stanley A. Matzke.

Interestingly, from its inception, Nebraska's unicameral body was apportioned on the basis of population. But voters in 1962 approved a constitutional amendment giving 20 per cent weight to area and the 1963 legislature reapportioned itself on that basis, adding six seats. Now, in light of the "one men, one vote" principle, it is reapportioning anew, using population once again as the sole standard.



—*Renault in Frontier*

One Man, One Vote, One House

The arguments thrown up to block unicameralism in those days are still those generally cited today. A second house is needed as a check on the first, opponents say. But Gov. Frank B. Morrison answers:

"On the basis of logic, I see no reason for two houses. The checks and balances come in other ways. The Governor has the veto; the law can be challenged in the courts; and finally, if the legislation isn't in the public interest, the people can repeal it through a referendum."

Mindful of this criticism, Nebraska carefully provided the opportunity for ample deliberation. Contrary to practice in some states, in Nebraska it's mandatory that all bills—some 900 in the current session—receive public hearings and that hearing dates be published at least five days in advance.

In addition, Nebraska's Constitution now prohibits passing any bill in less than a week. "In the old bicameral," recalls state Senator Peter H. Claussen, who served in the body, "it was possible by unanimous consent to introduce a bill in the morning and have it become law by evening. The public didn't have a chance to object."

Another important check was added, too. Before a bill becomes law it must pass three separate votes of the full Senate, the first following a complete reading and general debate on the Senate floor and the second not less than three days later. If it passes these hurdles, two more days must intervene before it is put to the final vote. A defeat at any stage kills the measure.

Other safeguards were created, too. The press is permitted to attend executive committee sessions, the theory being it keeps the legislative process more open. While reporters can relate the essence of a discussion, however, they must not report individual votes or statements. Executive sessions in bicameral days were closed to all outsiders as in most legislatures today.

As yet it's too early to tell whether unicameralism will gain more than the toehold it presently has. The Supreme Court decision, while raising some doubts regarding the need for two houses, didn't suggest there is no point in having two bodies even if both are based on population. Nonetheless, Nebraska's experiences with a unicameral system suggest some obvious advantages which in a time of rising governmental cost and complexity may deserve consideration.

DEC 29 1965

The Argument Goes On

A One-House Legislature?

By JOHN M. GREENE

ALBANY—Fifty years ago, former Sen. William McKinney of Northport tried to convince the delegates to the Constitutional Convention that New York State should shelve its bicameral legislature with its two branches and install a unicameral (one house) legislature in its place.

John Greene

"It would be unfortunate," said the senator, "if a constitutional convention were held in New York and consideration were not given to a proposition which, in recent times, has commanded the attention and thought of nearly all profound students of political science.

"With two houses and two sets of committees," McKinney told the delegates, "bills are shunted back and forth so many times that when one finally becomes law it is often impossible to tell who is responsible for it or, if a good bill is defeated, it is almost impossible to tell who is responsible for its defeat."

• • •

THE 1915 CONVENTION got three unicameral proposals calling for one house of 60, 100 and 168 members respectively. All three died after a hectic floor fight during which proponents quoted Benjamin Franklin as saying that setting up a two-house legislature was like hitching a horse to each end of a cart and letting them pull in opposite directions.

Two unicameral proposals were submitted to the 1938 convention, one of which bore the name of Charles Polleti, who later served briefly as governor of the state. He introduced the proposal for the Citizens Union.

George Hallock of the CU is still convinced a unicameral legislature should come into being. So is Alfred Willoughby of the National Municipal League. But Polleti now only goes so far to say it is something the 1967 convention should study.

So does former Assembly Speaker Joseph F. Carlino of Long Beach, who hopes to be a delegate to the convention. Howard J. Samuels of Canadaigua, who has gubernatorial ambitions, is also a unicameral booster.

Dr. Belle Zeller, a Brooklyn College professor and author of "American State Legislatures," said: "I don't go along with the idea that unicameralism is just a good idea for Nebraska because it's small." She said she'd like to see a few big states try it.

Dr. Zeller was asked if she feared lest an ambitious governor with a legislative majority from his own party might not put one house in his pocket. She replied, "That's not a serious objection. A governor usually has two pockets and he can put one in each."

A Democratic assemblyman from Schenectady, John F. Kirwin, favors one house of 100 or 150 members. He sees "no checks or balances" if the same party controls both houses and only "wastefulness, friction and political folly" if it doesn't.

• • •

IN 1915, IT WAS argued that unicameralism was a "radical step" and that New York should not be the first to take it. Twenty-three years later, the contention was that, while Nebraska seemed to be making it work, it really was too new to tell for sure.

Now, in 1965, the feeling seems to be that while unicameralism does work fine in a place like Nebraska it just wouldn't in a big complex state like New York.

Nebraskans have an answer to that. "Complexity," they say, "is relative." They have their problems with their corn belt to the east, their range country in the west and 350,000 peoples worth of urban sprawl around Omaha.

But take a look at its 1966 legislative program—arts council, abolition of capital punishment, cigaret tax increase, park bonds, urban renewal, fair housing, auto junkyards and state university tuition.

Sound familiar?

Wisconsin Briefs from the LEGISLATIVE REFERENCE BUREAU

Brief 70-5 December 1970

UNICAMERALISM: WISCONSIN LEGISLATIVE HISTORY

INTRODUCTION

Nebraska is the only state in the United States that currently has a unicameral (that is, one-house) legislature. It has been in existence since 1937 with no apparent attempts to change the structure. Three other states (Pennsylvania, Georgia and Vermont), however, began with a unicameral legislature and later abandoned it.

Although the unicameral legislature is not very popular in the United States, many foreign countries have adopted it. For example, when Quebec abolished its two-house parliament in 1969, the last of Canada's 10 provinces became unicameral. The governing bodies of most municipalities and counties in the United States are also unicameral in nature.

The history of unicameral proposals in Wisconsin began with 2 proposed constitutional amendments introduced in 1915. After a lapse of 12 years, there was at least one such proposal introduced in every regular biennial session from 1927 to 1937. In 1935, 5 separate joint resolutions were introduced relating to adopting a unicameral legislature. Two of these proposals (1935 Assembly Joint Resolutions 10 and 95) were passed by the Assembly. These are the only 2 such measures which have ever received passage by at least one house. 1935 AJR 95 was not a proposed constitutional amendment, but rather, a proposed referendum relating to the establishing a unicameral legislature.

Not until very recently has there been any revived interest in unicameralism since the 1930's. Four proposals have been introduced in the last 3 sessions of the Wisconsin Legislature to provide for a unicameral legislature. Unicameralism has been given considerable attention since 1964 in many other states beside Wisconsin. The recent upsurge of interest is at least partially due to the United States Supreme Court's 1964 ruling in Reynolds v. Sims (377 U.S. 533; 84 S. Ct. 1362), which held that both houses of state legislatures must be apportioned according to population. In Wisconsin, of course, both houses have always been apportioned "according to the number of inhabitants". Since representation for both houses of state legislature now has to be based on population, some commentators have suggested that there might be no further need for 2 houses.

CONSTITUTIONAL PROVISIONS RELATING TO THE LEGISLATURE

The current provisions of the Wisconsin Constitution governing the number and size of the houses comprising the Wisconsin Legislature are found in Article IV. They read as follows:

> Section 1. The legislative power shall be vested in a senate and assembly.

Prepared by Gary Watchke, Research Analyst

Section 2. The number of the members of the assembly shall never be less than 54 nor more than 100. The senate shall consist of a number not more than one-third nor less than one-fourth of the number of the members of the assembly.

If Wisconsin were to adopt a unicameral legislature, additional sections of constitution would have to be amended. Those sections which would also be affected are:

Article IV,	Section 3.	Apportionment.
	Section 4.	Assemblymen, how chosen.
	Section 5.	Senators, how chosen.
	Section 7.	Organization of legislature; quorum; compulsory attendance.
	Section 8.	Rules; contempt; expulsion.
	Section 9.	Officers.
	Section 10.	Journals; open doors; adjournments.
	Section 17.	Style of laws; bills.
	Section 19.	Origin of bills.
	Section 20.	Yeas and nays.
	Section 26.	Extra compensation; salary change.
Article V,	Section 8.	Lieutenant Governor president of senate....
	Section 10.	Governor to approve or veto bills; proceedings on veto.
Article VI,	Section 2.	Secretary of State duties relating to the legislature.
Article VII,	Section 1.	Impeachment proceedings.
	Section 13.	Removal of judges.
Article VIII,	Section 6.	Public debt for extraordinary expense; taxation.
	Section 8.	Vote on fiscal bills; quorum.
Article XI,	Section 4.	Legislature prohibited from incorporating banks.
Article XII,	Section 1.	Constitutional amendments.
	Section 2.	Constitutional conventions.
Article XIII,	Section 6.	Legislative officers.

WISCONSIN LEGISLATION PROPOSING A UNICAMERAL LEGISLATURE

No proposed constitional amendments relating to the establishment of a unicameral legislature have ever achieved passage through both houses of the Wisconsin Legislature, so as to be eligible for "2nd consideration" review 2 years later in preparation for their submission to the voters of Wisconsin. Therefore, all the proposals listed in the following table constitute "1st consideration" constitutional amendment proposals.

A. Proposed Constitutional Amendments Providing for a Unicameral Legislature*

Year	Joint Resolution	Author	Name of Body	Size of Body	Length of Term	Type of District	Misc. Provisions
1915	SJR 20	G. Weissleder	Legislature	3 mbrs. from each congress. district	Staggered 4-year terms	Correspond with congress. districts	
1915	AJR 33	H. L. Mortenson	Legislative Commission	1 mbr. from each congress. dist. & 2 from state at large	4 years	Congress. dist., plus 2 from the state at large	One of the 2 at large mbrs. receiving highest no. of votes – pres., other vice-pres.
1927	AJR 17	Wm. Coleman	Legislature	133 Members	Staggered 4-year terms	Single dists. of convenient contiguous territory	
1929	AJR 131	Robert Caldwell	Legislature	Number of mbrs. equal to the no. of U.S. Rep.s from Wisconsin	Staggered 4-year terms	Correspond with congress. districts	
1931	AJR 48	Philip Wenz	Legislature	133 Members	4-year terms	Single districts	
1933	AJR 26	G. Weissleder	Legislature	Not more than 3 mbrs. from each congress. district	Staggered 4-year terms	Single dists. of convenient contiguous territory	Sessional salary of $1200
1935	AJR 10	M. H. Hall	Legislature	Not less than 30 nor more than 50 members	2 years	Single member districts	
	A.An. 1 (Adopted)	B. M. Vaughan		Not less than 90 nor more than 100 members			

*In measures proposing a staggered 4-year term, most proposals provided for half of the Legislature being elected for 2 years in the initial election under the new unicameral legislature, and subsequently for 4-year terms.

Proposed Constitutional Amendments Providing for a Unicameral Legislature — Con't

Year	Joint Resolution	Author	Name of Body	Size of Body	Length of Term	Type of District	Misc. Provisions
1935	AJR 11	G. Weissleder	Legislature	Not more than 3 mbrs. from each congress. district	Staggered 4-year terms	Single member districts	Legislature would meet once each mo. until all business completed. Annual salary of $4,000
	A.Sub.Am.1 as amended by A.Amdt. 1 and 2 (Adopted)			Not less than 90 nor more than 100			Legislature would meet once every 2 years
1935	AJR 70	Mary Kryzak	Legislature	Not less than one mbr. from each county nor more than 100 members	4-year terms	No dist. would embrace more than one county	
1937	AJR 11	M. H. Hall	Legislature	Not less than 30 nor more than 50 members	2 years	Single member districts	
1965	AJR 107	Barbee, Iverson, Lipscomb & Schaus	Legislature	Not less than 43 nor more than 75 members	Staggered 4-year terms	Single member districts	Annual salary of $10,000. Annual sessions
1967	SJR 26	J. Lourigan	Legislature	Not more than 45 members	Staggered 4-year terms	Single dists. of compact contiguous territory	
1967	AJR 37	Barbee, Lipscomb, Anderson, Kessler & O'Malley, co-sponsored by Lourigan	Legislature	Between 33 and 75 members	Staggered 4-year terms	Single member districts	Annual salary of $12,000. Annual sessions.

Year	Joint Resolution	Author	Name of Body	Size of Body	Length of Term	Type of District	Misc. Provisions
1969	AJR 18	Barbee, Lipscomb & Sanasarian	Legislature	Not less than 33 nor more than 75 members	Staggered 4-year terms	Single member districts	Annual salary of $12,000. Annual sessions

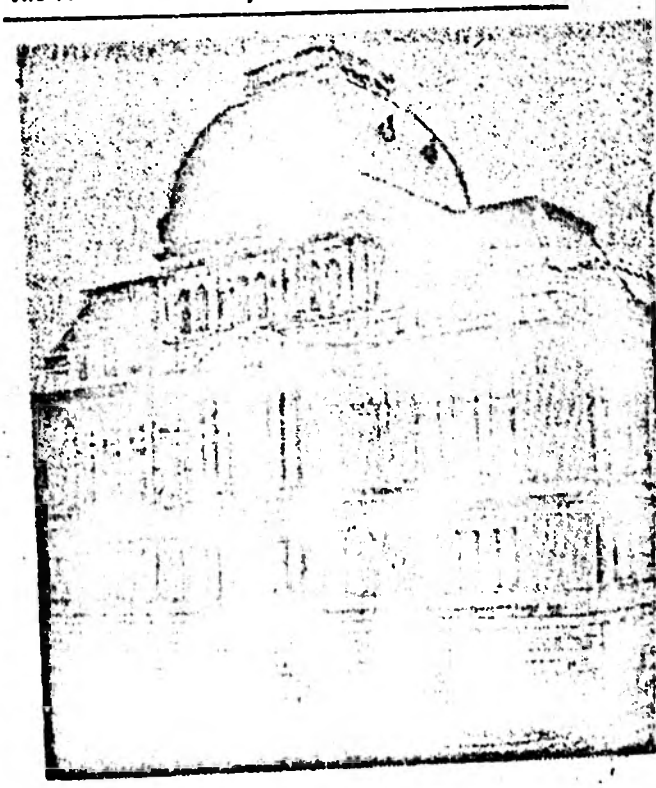
B. Proposed Referenda Relating to Establishment of a Unicameral Legislature

Year	Joint Resolution	Author	Referendum Question
1935	AJR 95 A.Sub.1	G. Weissleder	This proposal would submit to the voters a referendum consisting of the following 5 questions and comprising 7 parts: (1) "Do you favor a one-house legislature?"; (2) (a) "Do you favor a legislative membership of not less than 30 nor more than 50 members?"; (or) (b) "Do you favor a legislative membership of not less than 30 nor more than 100 members?"; (3) "Do you favor the legislature sitting as a body to hear all arguments for and against all matters coming before it?"; (4) "Do you favor having the legislature meet once each month and remain in session until its business is completed?"; (5) (a) "Do you favor a 4-year term for the members of the legislature?"; (or) (b) "Do you favor a 2-year term for the members of the legislature?". The measure was adopted by the Assembly by a vote of 48 to 32. The Senate, however, nonconcurred in it by a 23 to 7 vote.
1935	AJR 171	E. W. Blomquist & A. F. Poltl	This proposal would have submitted one question to the voters: "Do you favor a one-house legislature? Yes____ No____"
1955	AJR 91	Louis C. Romell	This proposal would have provided an advisory referendum consisting of 2 questions: (1) "Do you favor an amendment to the state constitution to provide for a unicameral legislature of 100 members, one-half to be elected every 2 years for terms of 4 years?" or (2) "Do you favor an amendment to the state constitution to provide that the legislative branch shall consist of 2 houses similar to the legislative branch of the federal government?"

The Providence Sunday Journal, February 13, 1966

One Branch or Two?

Two levels of government: At left the State House and at right, Providence City Hall.



The Cities Chose One

By JOSEPH A. KELLY

Joseph A. Kelly watches city government from his post as manager of the Journal-Bulletin bureau in Pawtucket.

ight U.S. cities with great- populations and bigger gets than the state of de Island are governed by ameral city councils.

ie number of councilmen hese one-body local legis- res ranges from nine in roit and Houston to 50 in ago.

os Angeles, with two and alf times the population of de Island, has 15 council- n. Philadelphia has 17.

century ago nearly all ge cities had bicameral ncils, usually a board of ermen and a common coun- They were on the wane 1850, almost extinct in 0.

Only Two Left

)f the 3,000 municipalities the U.S. today, there are ameral councils in only o—Everett, Mass. and Wa- ville, Maine.

Providence abandoned its ameral council in favor of unicameral council in 1940. wtucket, Woonsocket, New- rt and Central Falls did the me when they adopted me rule charters in 1952.

Much more significant than e demise of the bicameral uncil is the almost unanimous agreement that the unicameral council had produced tter local government in hode Island and throughout e country.

Former Governor Dennis J. oberts, a leader of the fight the Constitutional Convention for a unicameral state gislature, said the one-body uncil in Providence brought tremendous improvement in ty government.

Pawtucket, Woonsocket and entral Falls are said to have njoyed their best government years since they adopted ew charters with unicameral ouncils.

In these and other cities round the country the smaller unicameral councils have usually handled municipal usiness more expeditiously. There has been a better understanding by the public of controversial issues simply because they have been debated by fewer city councilmen.

There has been better scrutiny of the councils by the voters simply because there are fewer councilmen to [illegible]. Pawtucket, for example, decreased its councilmen from 21 to nine, Woonsocket from 20 to seven, Boston from 73 to nine.

Decline of Bosses

The unicameral council contributed much to the decline of political bossism in the cities. Conditions in the old bicameral councils with their many committees (the Boston council once had 42 committees) were so complex that it almost required a political boss to straighten them out.

The small one-body council focused more attention on the individual councilman and, generally, he acted accordingly. In almost every city it produced a higher caliber of candidate for the unicameral council. As a result, there was less dual office holding, fewer political shenanigans, more tending strictly to business.

Mr. Roberts believes the General Assembly and the city council are comparable, and that a unicameral legislature could bring the same improvements in state government that it has brought to the cities.

"The function of a city council is much like that of the General Assembly, even though it does not have the same inherent power," Mr. Roberts said.

The city council is a legislative body, he continued. It appropriates money and adopts ordinances regulating the public safety, health and other affairs of the city in much the same way as the General Assembly enacts laws.

Providence

Mr. Roberts, who served on the commission that framed the Providence charter in 1940 and then became the first mayor under the charter, asserted that the old bicameral council never functioned in its proper sphere. He recalled that committees of the board of aldermen and common council tied up business for months and on one occasion the appointment of a police commissioner was held up for more than two years.

"The unicameral council functioned as a legislative body should function from the outset. It was a tremendous improvement," Mr. Roberts said.

The former governor recalled that the only objections to the switch to a unicameral Providence council in 1940 came from the political structure, both Democrats and Republicans.

"They said the unicameral council would be the death knell of the Democratic party in Providence, that it would deprive the people of their rights, and the Democrats would never win another election.

In practice, it turned out that the Democratic party was stronger than ever under the unicameral council. The former governor pointed out that the Democrats received bigger pluralities than ever; they never lost the mayoralty again and there have never been more than four Republicans in the council.

In 1952, there was no controversy as the bicameral councils were abolished in Pawtucket, Woonsocket, Central Falls and Newport. Even councilmen who were losing their jobs failed to protest.

Forgotten Issue

The campaign for a new Pawtucket charter was fought bitterly by the professional politicians but no mention was ever made of the shift to the one-body council. It was just taken for granted that the bicameral council was long outmoded.

Hundreds of thousands of words were spoken at charter commission hearings on the manager plan vs. the mayor-council, partisan vs. nonpartisan elections and a merit system for city employes but nobody suggested that the old board of aldermen and common council should be retained.

Kevin K. Coleman, former mayor of Woonsocket, has no recollection of any demand that the bicameral council be retained in that city.

"What is important was the change for the better in Woonsocket after the switch to the seven-member unicameral council elected at large," Mr. Coleman said. "It proved quickly to be the more efficient way of legislating city business."

Authorities on government for nearly 75 years have held that the bicameral legislature at the city level created more problems than it solved and caused more evils than it prevented.

The first city governments established two houses of their municipal legislatures in imitation of Congress and in the belief they provided a necessary system of checks and balances.

Norfolk, Va., had a bicameral council in 1788, Philadelphia in 1796, Baltimore in 1797, Pittsburgh in 1816 and Boston in 1822. By 1840 the bicameral council had become general in the larger cities.

Fear of the Mob

Richard S. Childs, chairman of the executive committee of the National Municipal League and a leading authority on municipal government for 60 years, explains the early trend to bicameral city councils this way:

"In the making of charters of those days there was a great fear of headlong democratic action and mob rule. This led to innumerable devices to encumber the activities of government in an effort to insure elongated consideration of every measure.

"One of these devices was the establishment of two houses of the municipal legislature on the theory that if one house passes a bad bill, the other will block it.

"It was and is just as true to say that if one house passes a good bill, the other house will block it. The latter practice has been familiar for a century to all proposers of innovation and reform."

Boston had enough of its 78-member bicameral council by 1896, and Samuel B. Capen, president of the Boston Municipal League, told the National Municipal League at its annual meeting that year of the successful campaign for a unicameral council.

More Money

A city government does not need two boards of directors any more than a corporation or a railroad, Mr. Capen said. The second body in a unicameral legislature "often increases and rarely diminishes public spending," he said.

In order to bring the two bodies into harmony and obtain the required number of votes, Mr. Capen said, it often was necessary to appropriate large sums for projects in the districts of various members "for their selfish and personal interests, not because of public necessities."

He said the single branch legislature helps to define responsibility, making it easier for the voters to see who is responsible for legislation and where the blame rests when things go wrong.

W. B. Munro of Harvard University wrote in his "Government of American Cities" in 1912 that "quite as many opportunities for evil arise from a council's versatility in impeding business as from its power to rush things through with unseemly haste."

"If a single chamber can malign pressure he too ily stampeded into a vote hich is not in the interest the citizens, it is just as ue that a double chamber fords to every blackmailing olitical influence an undue tvantage in blocking the ith of measures which are the city's interest," Mr. unro said.

"The history of American ty councils furnishes quite many examples of malfeaance in one direction as the her," he added.

Delay and Friction

Mr. Munroe said the bicamral legislative system "enenders profitless delay and eedless friction; it precludes ie city from pursuing the rompt and businesslike ethods of private organizaons and it is out of harmony ith the arrangements which xist in the best governed ities of other countries."

Howard L. MacBain of Columbia Univeralty said in 916 in a paper on the evolution of the types of city government, "The introduction of ie two chambered council as a disastrous step in the irection of cumbersomeness f organization."

Numerous authorities on overnment also have noted hat no city which abolished he bicameral council has ever shown any desire to restore it.

Mr. Childs told a charter group in Pawtucket in 1951 that their city had the rather dubious distinction of being one of only a dozen cities in the country with a bicameral city council.

"We hope," he said, smiling, "that one of your Rhode Island cities will keep its bicameral council forever as a museum piece to show posterity what sort of complicated, ramshackle contraption once passed for city government."

The following year Pawtucket, Central Falls, Woonsocket and Newport passed up this opportunity for immortality, just as Providence had done in 1940.

Waterville

The field has since been reduced to two and two years ago the people of one, Waterville, Maine, had a chance to adopt a modern charter. They voted nearly two to one to keep the bicameral form.

The Waterville Sentinel favored the proposed charter with its unicameral council and it told its readers, "We can't be right unless everybody else in the country is wrong."

"What if we are the only ones? It makes us distinctive."

Supporters of the bicameral setup argued that doing away with the common council would eliminate a good school for people who go on to be aldermen, which is sometimes how it works.

Two recent governors of Maine came from Waterville, Edmund S. Muskie and the late Clinton A. Clauson. Ironically, neither of them served in the common council or board of aldermen.

Robert Drake, managing editor of the Sentinel, said the bicameral council was not the big issue in the charter campaign. He said the people voted down the new charter because it would have taken city jobs out of politics, and provided an executive secretary to the mayor. The present charter could be described as a "very weak mayor" type of charter, he said.

Everett

In Everett, Mass. the people lost an opportunity to vote out the only other bicameral council a few years ago when the then Governor Endicott Peabody vetoed a bill that would have put the question on the ballot. Everett has seven aldermen and 18 councilmen.

Philip J. Crowley, who retired last month after 16 years as mayor, said some people called the governor and "got him shook up." He said the Governor "mistook the voice of a few for the voice of many."

"Why the opposition to the change?" Mr. Crowley was asked.

"Only that some people would lose their jobs. An alderman gets $1,800 a year and a councilman gets $1,200," he said.

Mr. Crowley said he was elected mayor eight consecutive times and he managed to get his program through the two branches of the council. Yet, he is not in favor of a bicameral council.

"The bicameral council is outmoded. Things die in one branch, never get to the other. It's hard to pinpoint responsibility. Twenty five council names are too many for anybody to remember," he said.

"There's no argument for the bicameral council. It's just that there have been no scandals. The government is pretty good. So, there is no hue and cry for a change."

Is the successful experience of the cities with unicameral government relevant to the issue as it now faces the states? In short, could a unicameral state legislature become as successful as the one-house city council which today is the accepted way of operating the legislative branch of municipal government?

For Bicameral

The advocates of bicameralism are generally political leaders who have served in the legislatures, or are now serving, and they say no. They cite these points:

—A one-branch house destroys the traditional checks and balances exemplified by the division in Congress between the Senate and the House of Representatives.

—It is much easier in a one-branch body for one man or a small clique to exercise control.

Those who advocate unicameralism, on the other hand, are numerous authorities on government and political figures who have served in the executive branch. They cite these points:

—The big budgets and big problems of education, urban renewal and civil rights are just as serious and just as difficult on a city level as on the state level, and the unicameral councils of the cities have been able to cope with them in a fashion that, if not perfect, is at least no worse than the usual fashion in which the states have coped with them. New York City has more serious problems, certainly, than the state of New York, and Chicago has more than the state of Illinois. Both cities operate with unicameral councils. None of the several thousand cities which have adopted unicameral government have ever returned to the two-house system, nor has Nebraska, thus far the only unicameral state.

—The need in government today is for responsible, effective action—not the interminable delays that often impede business in bicameral legislatures. The two-house Massachusetts legislature, for example, has debated for more than a year and so far has failed to resolve the question of providing a greater state tax base. Several years ago Michigan had a financial crisis because the two branches failed to agree on a tax program. Such indecision would be impossible in a unicameral legislature: a decision one way or the other would have to be made.

—While it is possible that a clique can control a one-branch legislature, the responsibility is obvious to the voters. It cannot be hidden among large numbers of legislators. Having fewer choices to make at election time, the voters can exercise greater discretion and discrimination. As a matter of fact there have been many examples of cliques controlling two-branch legislatures.

—The additional check and balance afforded by a second house is more attractive in theory than in practice. Such balance, if it exists at all, is often purchased at an expensive price in confusion, delay, frustration and inefficiency, all of which are rapidly becoming intolerable in the face of the enormous problems facing government at all levels. In actual fact, there are sufficient checks and balances between the three main branches—judicial, executive, and legislative—precisely as the architects of the federal Constitution laid them down.

The architects of the federal Constitution devised the two-branch legislature to deal with the problem of the "sovereign" states. Within these states there are no sovereign subdivisions, just as there are none within cities.

As Alfred Willoughby, executive director of the National Municipal League, expressed it: It is no more logical to have two branches of the state legislature than it is to have two governors.

THE NEED FOR UNICAMERALISM

William J. D. Boyd

State legislatures are probably the most abused governmental institutions in this country. They are misunderstood and they are distrusted. The legislative 'image' is low indeed and only part of this is of their own doing. Most of it is due to the shackles placed upon legislatures by the many "thou shalt not's" of our state constitutions and by the organisational structure of the legislature itself.

Legislatures generally are underpaid, understaffed, ill housed, bound up in procedural antiquities and burdened with entirely too much local government legislation. In one way or another, New York's legislature is encumbered by all these factors, some to a much lesser degree than others. Some of the ills are not dependent upon constitutional reform. On the whole, New York's legislature has been one of the very best. Its public image is lower than it deserves. But the legislature could be dramatically upgraded and its image vastly improved with virtually no change at all in legislative personnel.

Distrust of the legislature is deeply mired in public ignorance of who their legislators are. Immediately after last year's elections, Elmo Roper and Associates polled the inhabitants of New York City, Buffalo, and Onondaga County to find out how much they could remember about the candidates they had just voted for. Only eight per cent of the people in New York City could properly identify one of the candidates (they weren't even asked to name the winner) in either the Senate or Assembly. Only fifteen per cent in Buffalo were right, and a rousing twenty per cent were correct in Onondaga. This is how much the citizens of the Empire State know about the men and women representing them in Albany. No wonder the public views the legislature with suspicion.

At the same time, a Gallup Poll showed that forty-six per cent of the people knew their Congressman, and seventy per cent could identify their mayor.

What New York needs is a dramatic restructuring of its state government. Very serious consideration should be given to the adoption of a single-house legislature. As long as citizens are confronted with an interminably long ballot and are unable to understand or follow the progress of legislation through the two houses, they will never know their legislator nor have much basic trust of the legislature. Present the people of this state with a streamlined ballot — the governor and a legislator — and within ten years a profound change will have taken place in the level of knowledge and interest that the public displays toward state government. Others will doubtless address you on the subject of shortening the statewide ballot; I should like to stick to the subject of the unicameral, or single-house, legislature.

Recently the New York Times stated that, because a large number of delegates to the convention are legislators, unicameralism has little chance of being adopted. It would indeed be unfortunate if the very people who would benefit most were to be the most adamant opponents of unicameralism.

The suggestion that the state shift to a single-house system is interpreted by some legislators as a personal criticism of the job they have been doing. It is no such thing. New York has had one of the best legislative records in the nation and most people acknowledge it. That still does not change the fact that it has been far from perfect and that the public still doesn't know what is going on or who is who. The organizational structure of the legislature is at fault and not the individual legislators. Rather than attacking them, a proposal for unicameralism is meant as an aid to the very people who feel abused by the suggestion.

The single-house concept is not radical, nor is it un-American.

Americans were the first people in modern times to utilize it. Vermont, Pennsylvania and Georgia all had single-house legislatures when every nation in Europe was ruled either by an autocratic monarch or utilized some form of a two-, three-, or four-house system. A majority of American cities had two-house legislatures but have since shifted to the one-house set-up so completely that today only two small towns in New England use bicameralism. Why did city governments change? Because they needed a full-time, action-oriented governing body.

Who ever heard of a bicameral county legislature?

Nebraska has been admirably served by its one-house state legislature, but unfortunately has combined it with other undesirable features that have hurt its value. Often when unicameralism is discussed, the conversation shifts to the comparative merits of legislation passed by the Nebraska and New York legislatures. This is a totally erroneous basis upon which to discuss the issue. The issue is: does the unicameral system perform well in Nebraska in comparison with the old bicameral system in Nebraska? The answer is an emphatic 'yes'. At no time has repeal of unicameralism been proposed in that state. This, and this alone, is what is important when the Nebraska unicameral set-up is discussed.

Great Britain and all the Scandinavian nations have, in actual practice, a one-house system, since the upper chambers are virtually powerless. Both Japan and New Zealand have single-house legislatures and every province in Canada except Quebec also uses unicameralism. It is one of those ironies that, although we started the first major experimentation with unicameralism and were to adopt it for all city and county government in this country, we have been far slower than other nations to see its practical value for our states.

Actually, 'irony' has little to do with it. There are very practical reasons why we have retained bicameralism at the state level and why we want to

it in the first place. American usage of bicameralism began in the newly independent states. Rather than the states' copying the federal government, as is often claimed, the reverse is true. Just as the British system of bicameralism had its roots in class distinction, so, too, the original purpose in this country was to place a check on the "masses." The newly created assemblies of the states were the most egalitarian parliamentary institutions in the world, even if the right to vote was often circumscribed by property-holding requirements, and was always restricted to free males.

The primitive conditions of communications led some states to bicameralism as a means of diffusing representation on a geographic basis. Most, however, had different qualifications for voting for members of the two houses, invariably based on greater wealth for the second house.

A vitally important reason for creating a differently constituted upper house to place a check on the more popularly elected chamber was that few of the states gave their governors the right to veto legislation. The unpleasant memories of colonial governors caused all thirteen original states to create weak chief executives. It was, therefore, to a second legislative chamber that the power to check the popular will was given. Those states which had single-house legislatures changed to bicameralism in order to place such a check on "the people."

It was several decades before the strict property qualifications disappeared. By then tradition and universal acceptance of bicameralism were strong factors in its retention. Equally persuasive, however, was the fact that it had become an important element in the emerging rural-versus-urban controversy. State after state (including New York) changed its apportionment formula so as to perpetuate rural dominance in at least one house. Those states which had single-house legislatures changed to bicameralism so as to introduce area factors in one house, and after 1890 most states entering the Union based one house on area,

the other on population. Recent court actions have now invalidated that purpose for bicameralism.

Some would still argue, however, that bicameralism provides a means of achieving fine shadings of difference in the type of representation in the two houses, even though both must be based essentially on population. [redacted] There are suggestions for lengthening the term of senators to four years, for deliberately creating Senate and Assembly districts unrelated to one another, and for placing citizens who live in an oversized Assembly district in an undersized Senate district. [redacted] Longer terms have some definite advantages but the claim of 'continuity' is a tenuous assertion in this state where the turnover in both chambers — even with reapportionment — is relatively small.

As for making the two sets of districts unrelated to one another, New York has long tried to keep a three-to-one ratio between the two houses, and the desire to place three Assembly districts in one Senate district is very strong. To try to balance out under- or over-representation in the two chambers is a practical impossibility, as anyone who has worked on the redistricting task in this state can testify.

New York has had dozens of legislators shift from the Assembly to the Senate with no discernible change in their voting patterns. In a highly competitive two-party state like New York, the position of the leadership of the Democratic or Republican party is much more important to a legislator than whether he is in the Assembly or the Senate.

The 'different shades of representation' argument has a very nice sound to it, but in the realm of practical politics it has little applicability to New York State.

Today the main argument for bicameralism at the state level is to create one house to act as a brake against impetuous action by the other. It is upon the validity of this that the fundamental value of bicameralism must be judged.

If an act is unconstitutional or damaging to the fundamental rights of any individual or group, there is the ultimate check of judicial review. An even more important factor is the governor's veto power. Any legislative measure that is hasty or ill-advised can be stopped by a governor and it requires a two-thirds majority to override his action.

The old argument that one house is needed to kill the precipitous action of the other is indeed faulty in a state like New York where the governor possesses strong veto powers and a wide range of other powers that aid him in seeing to it that his vetoes are upheld. This state's governors have regularly vetoed twenty-five per cent of the bills, and it has gone as high as thirty-five per cent. No governor's veto has been overridden in more than thirty years. This points up two fallacies in the one-house-checks-the-other thesis. First of all, the 'second' house seems to be letting a lot of legislation by it that our governors have considered questionable. And, secondly, the governors have done a pretty good job of stopping it. If the item veto is extended to non-appropriation items, this gubernatorial check in the 'checks and balances' system will be even greater.

Unicameralism would force legislators to assume fully the responsibilities of the office to which they were elected. Any legislator can tell you of the time — and money — wasted on legislation everyone knows is trivial, which is deliberately introduced with the full knowledge that it will never become law.

A single house would stop such negative aspects of the present system as the buck-passing between the houses that keeps the public confused as to where responsibility lies. It would also stop the highly questionable practice of passing a vast amount of legislation in the last forty-eight hours of a session, when each house hastily passes large numbers of bills previously enacted by the other chamber.

Closely allied with the one-house-checks-the-other theme is the idea that two houses provide time for due deliberation of all measures. Is this actually true? What about the end-of-the-session rush in all bicameral state houses? In Nebraska — again comparing it in purely institutional terms, not in terms of the type of legislation or economy that exist in that state — the unicameral legislature enacts almost exactly the same number of bills each session as did the old bicameral set-up. But less than half as many bills are introduced. Nebraska, incidentally, generally enacts only about one-fourth as much legislation as this state, which is supposed to have a system where deliberation and delay prevail. The unicameral system is a blessing to the legislator, who actually gets much more time to deal with each separate piece of legislation.

Under bicameralism, when the two houses pass different versions of the same bill, it is necessary to refer the measure to a conference committee which ironS out the differences, and whose recommendations are invariably accepted as the final law. Since there is no public testimony given before conference committees and their deliberations are rarely, if ever, open to the public, the end product is frequently enveloped in a cloud of suspicion. Political scientists and other students of the legislative process have long singled out the conference committee as a priority item for reform.

The relative obscurity of the state legislature is the most damning argument against bicameralism. Unicameralism, on the other hand, offers a means

of concentrating the voter's attention upon his state legislator. Greater public awareness heightens the importance of a legislative career.

A single house would further strengthen the legislature as an institution of state government by eliminating one set of checks and balances. Checks and balances are best exercised AMONG the three branches of government, not WITHIN just one of them. Would it be logical to elect two governors, the second to stop administrative action initiated by the first, or to veto bills the other had signed? Should there be two state courts of appeal, one to nullify the rulings of the other? Little-known state legislators are hardly in a position to challenge a popular and powerful governor. (And they would be challenging him on major issues, not the trivial nonsense a second house is now supposed to check.)

A single house would help correct the present imbalance. The role of leading individuals within the legislature would be enhanced; with only one majority leader, one chairman of the education committee, one head of the committee on labor and industry, these men and their positions would come under closer public scrutiny. A poor performance would be punished more easily and a good performance could be rewarded with greater influence or higher office. Men would become known as experts in their own fields and their voices would carry greater weight whenever a legislative-executive dispute arose over a policy issue.

Restoring the balance between the legislative and executive branches could do much to restore public faith and interest in state government. This, in turn, could help to halt the so-called trend to 'big government in Washington'. Single-house legislatures would be closer to and more respected by the public, while at the same time strengthening and streamlining the legislative function.

Better pay, better staffing, and better facilities could be provided for one house than can be done for two. A large bicameral legislature will

never be able to find it politically feasible to spend the money on itself that is necessary in this day and age. A reasonable sized single house, whose members are known to their constituents, will be able to equip, pay and staff itself as a twentieth-century legislative institution should.

It is interesting that Joseph Carlino, former speaker of the New York Assembly, and Jesse Unruh, current speaker of the California Assembly, have both advocated the adoption of a single-house legislature.

Both gentlemen frequently have been on record in opposition to a governor of their own party. They have come to realize that if the legislature is to continue to play a real role in our society it must be strengthened. State government itself needs strengthening. Strong governors, and streamlined reorganized court systems, are not viewed as radical or dangerous anymore. They are, in fact, 'quite the thing' these days. The poor legislature, however, has taken a back seat. If New York really wants to improve its government, it had better think about all <u>three</u> branches, and give unicameralism real consideration.

These then are the arguments for unicameralism: economy, efficiency, a heightened importance to a legislative career, and a strengthening of the legislative institution. All of these are important and desirable but they are insignificant in comparison to the one all-pervasive reason why we should have a one-house legislature — its impact on public awareness.

If one person in a hundred in New York has the vaguest idea of how the legislature actually works and what his particular legislative representatives are doing, it is a miracle. One can present all the beautiful arguments in the world about the need to preserve 'checks and balances', about the 'good record' of past New York legislatures and the need for a 'modest amount' of institutional delay. The fact remains that public attention is shifting more and more to the federal government while, at the same time, awareness of local government

activities remains relatively high. But state government, other than the office of governor, is becoming an ever greater enigma. People DO NOT KNOW their legislators and they DO NOT KNOW what the legislature is doing. It is worse today than it was sixty years ago.

No level of government can remain healthy or dynamic when the public simply does not know and does not care — and that is exactly the situation we have today. The ONLY way that the public has any chance to learn about their legislator and to follow the activities of the legislature is for us to strip away much of the junk in our current constitution and to replace it with a streamlined fundamental document, one of the main features of which would be a single-house legislature.

POLITICAL THICKETS AND UNICAMERALISM*

by

Harold S. Roberts

*From Reapportionment and the Revision and Amending Procedures of the Hawaii State Constitution, by Harold S. Roberts, 2nd edition, June 1968, University of Hawaii, pp. 68-75.

POLITICAL THICKETS AND UNICAMERALISM*

A simple statement on representative government by Chief Justice Warren in the famous reapportionment cases handed down on June 15, 1964 has been hailed as one of the most revolutionary actions of the United States Supreme Court. So revolutionary, in fact, that some state legislatures have suggested legislation to set aside the Supreme Court decision. Other individuals have suggested the impeachment of members of the Court and of the Chief Justice.

The revolutionary statement written by Chief Justice Warren said in part, "representative government is in essence self-government through the medium of elected representatives of the people, and each and every citizen has an inalienable right to full and effective participation in the political processes of his state's legislative bodies." Such a statement might have been deeply revolutionary in the period immediately following the American Revolution, but it doesn't sound that way in the mid nineteen sixties. During the 18th century we espoused representative government, yet it was not an accepted practice that "every citizen" had an inalienable right to full and effective participation in the political processes of his state's legislative bodies. This was available only to those individuals who had qualified as free citizens because of property rights and other qualifications which we in the 20th century hold to be discriminatory. Some of the reasons why Chief Justice Warren's mild statement is regarded as revolutionary in the 20th century are:

(1) The Supreme Court has entered into an area which before had been considered strictly political and one in which the legislators did not expect the courts to step in. (Their political prerogative would not be touched by the court.)

(2) The Supreme Court decision appeared to support the elimination of the ancient tradition of the bicameral legislature by holding that both houses of state legislatures would have to be apportioned substantially on the basis of population. Although the Court went out of its way to support bicameralism, its action requiring both houses of the legislature to be apportioned on population removed the major underpinning for the bicameral legislature.

Chief Justice Warren said in his opinion, "Most citizens can achieve this participation only as qualified voters through the election of legislators to represent them. Full and effective participation by all citizens in state government requires, therefore, that each citizen has an equally effective voice in the election of members of his state legislature. Modern and viable state government needs, and the Constitution demands, no less."

---

* Speech before the Unitarian Church of Honolulu, May 30, 1965.

The Court then went on to say, "Logically, in a society ostensibly grounded on representative government, it would seem reasonable that a majority of the people of a State could elect a majority of that State's legislators. To conclude differently, and to sanction minority control of state legislative bodies, would appear to deny majority rights in a way that far surpasses any possible denial of minority rights that might otherwise be thought to result....Since the achieving of fair and effective representation for all citizens is concededly the basic aim of legislative apportionment, we conclude that the Equal Protection Clause guarantees the opportunity for equal participation by all voters in the election of state legislators. Diluting the weight of votes because of place of residence impairs basic constitutional rights under the Fourteenth Amendment....We are admonished not to restrict the powers of the States to impose differing views as to political philosophy on their citizens. We are cautioned about the dangers of entering into political thickets and mathematical quagmires. Our answer is this: a denial of constitutionally protected rights demands judicial protection; our oath and our office require no less of us."

It might be well to note in passing that the Supreme Court did see some of the implications of its decision but hoped that it would be possible on the ground of the logic of its argument to work out acceptable procedures in each of the states so that the existing bicameral legislatures would be retained. The Court in a statement which is not very persuasive argues for the retention of bicameralism. Its argument is presented following its reasons for the use of population standards in both houses: "We hold (the Court said) that, as a basic constitutional standard, the Equal Protection Clause requires that the seats in both houses of a bicameral state legislature must be apportioned on a population basis. Simply stated, an individual's right to vote for state legislators is unconstitutionally impaired when its weight is in a substantial fashion diluted when compared with votes of citizens living in other parts of the State."

The reasoning set out by the Court seems to be clear enough. The Court said, "The right of a citizen to equal representation and to have his vote weighted equally with those of all other citizens in the election of members of one house of a bicameral state legislature would amount to little if States could effectively submerge the equal-population principle in the apportionment of seats in the other house. If such a scheme were permissible, an individual citizen's ability to exercise an effective voice in the only instrument of state government directly representative of the people might be almost as effectively thwarted as if neither house were apportioned on a population basis. Deadlock between the two bodies might result in compromise and concession on some issues. But in all too many cases the more probable result would be frustration of the majority will through minority veto in the house not apportioned on a population basis, stemming directly from the failure to accord adequate overall legislative representation to all of the State's citizens on a nondiscriminatory basis. In summary, we can perceive no constitutional difference, with respect to the geographical distribution of state legislative representation, between the two houses of a bicameral state legislature."

As I indicated the Court wanted to make it quite clear that its actions were not to be construed as demolishing the bicameral legislatures. It said immediately following its holding that both houses must be apportioned substantially on the basis of population -- "We do not believe that the concept of bicameralism is rendered anachronistic and meaningless when the predominant basis of representation in the two state legislative bodies is required to be the same -- population. A prime reason for bicameralism, modernly considered, is to insure mature and deliberate consideration of, and to prevent precipitate action on, proposed legislative measures. Simply because the controlling criterion for apportioning representation is required to be the same in both houses does not mean that there will be no difference in the composition and complexion of the two bodies. Different constituencies can be represented in the two houses. One body could be composed of single-member districts while the other could have at least some multi-member districts. The length of terms of the legislators in the separate bodies could differ. The numerical size of the two bodies could be made to differ, even significantly, and the geographical size of districts from which legislators are elected could also be made to differ. And apportionment in one house could be arranged so as to balance off minor inequities in the representation of certain areas in the other house. In summary, these and other factors could be, and are presently in many States, utilized to engender differing complexions and collective attitudes in the two bodies of a state legislature, although both are apportioned substantially on a population basis."

The New York Times in its editorial "The Court and the States" on June 21, 1964 had a very pungent observation on the court's apology for bicameralism. It said, "The strictness of the population yardstick will cause wonder whether there is purpose any longer in having a bicameral state legislature...Chief Justice Warren sought to offset such arguments in the Alabama Case. He maintained that two houses would insure mature and deliberate consideration of measures and prevent precipitate action. With different size constituencies and different length terms, differing collective attitudes would develop, he forecast, even though both bodies were apportioned substantially on a population basis. This (said the New York Times) sounds more like a prescription for political featherbedding than a justification for bicameralism."

Locally the Honolulu Star-Bulletin in its editorial on July 16 had the following to say on unicameralism: "The unicameral system saves time and money, it helps to keep the people's business out in the open, it discourages piling up of legislation for last minute wheeling-and-dealing, it pinpoints responsibility, and it does all this without the loss of essential checks and balances. But it could sideline some legislators, reduce patronage and make the role of the political manipulator more difficult."

The focus on unicameralism has been a long time in coming and I would venture to suggest that the Supreme Court decisions in the reapportionment case will do more for a reexamination of the basic structure of state legislatures in the United States than any single action of our courts.

My own interest in government structure goes back some 25 years to my study of political science. This was not very extensive and perhaps my practical experience in the federal and state government has provided a deeper and better understanding of the functioning of government. However, my introduction to political science, or in those days the study of American government, included a study of the then widely used textbook by Professor Frederic Ogg of the University of Wisconsin and Norman Ray of the University of California.

This voluminous tome as well as some of the general readings on the structure and function of American legislatures left me with two distinct impressions: (1) That there was very little good to be said for American state legislatures during the last 100 years -- their inefficiency, their personal benefits from positions of power and influence (if not outright corruption), the devious machinations of the legislative process, the buck-passing etc., was such that no political scientist would say a good word for them. (2) That the single chamber (unicameral) legislature if given the opportunity might go a long way to make the legislative process more responsive to the needs of people.

The original attitude of trust of the legislatures as against the executive which followed the colonial period shifted quite drastically, and the detailed provisions of many state constitutions adopted during the second half of the 19th and early 20th century placed very stringent limitations on legislatures. This according to Professors Ogg and Ray reflected the growing distrust of the legislatures. They said in part, "The main explanation of our lengthy constitutions is...the widespread distrust of state legislatures growing out of the abuses of legislative power, accompanied by much corruption which marked the middle portion of the past century."

There have been recent observations on state legislatures which are equally damaging and critical, and suggest the need for wholesale revision. This of course is not a reflection on our State Legislature. The Hawaii Legislature compares very favorably with those of other States.

1950 During the campaigning for the Constitutional Convention, I debated the issue of unicameralism with then Senator William Heen primarily to get some community discussion on the relative value of bicameralism and unicameralism. I had no great conviction then that a unicameral legislature was necessarily the answer to the major problems of American legislative bodies, nor was I even convinced at that time that the unicameral legislature would be given serious consideration at the 1950 Constitutional Convention. It wasn't.

One of the helpful side-effects of the recent Supreme Court decisions relates to the removal of one of the major underpinnings of bicameralism -- namely that the establishment of two houses of a state legislature will assure different community interests and thereby complement one another and provide a better spectrum or cross section of the community. This basic argument has been eliminated with the Supreme Court requirement that <u>both</u> houses of a state legislature must be apportioned essentially on the basis of population and that any other criteria would be of a relatively

minor significance. Since this is the case, there seems to be relatively little argument for the retention of a bicameral legislature.

I know of no serious authority on American government who has argued for a bicameral system. They will, of course, in their textbooks present the usual arguments for the bicameral system, such as the argument that it provides better checks and balances; that it represents more diverse community groups; that it may represent varying geographic areas, or that the members of one house may have longer terms of office or may require older individuals in the Senate than in the House. I know of no book on American government which supports bicameralism, and I don't know of a single book which does not speak highly of the unicameral system. It may well be that this is because we in the United States have not had any serious experience of abuse under the unicameral since the unicameral exists in only one state of the union. There were a number of states during the colonial period that had a unicameral legislative body.

All of the arguments of logic and common sense suggest that the unicameral is a highly preferable approach to the legislative process. First and most important it is designed to achieve greater responsibility within the legislature. The importance of this responsibility becomes apparent when one examines the operation of a legislature. It is extremely difficult even for those who follow the legislative processes quite closely to know where the prime responsibility for action or inaction rests.

It is possible through understandings, deals and other devices to have one house adopt legislation with the understanding that it would be killed in the other house. This buck-passing is typical in most American states. It is frequently impossible to know where and to whom responsible citizens may turn to determine why legislation did not pass or why certain legislation did pass.

In addition to the two houses of the legislature, Senator George Norris, the person most responsible for unicameralism in Nebraska, argued that most legislatures in addition have a third house whose operation is even more devious and harmful to the public. This is the operation of the conference committee where the leadership in the two houses turn over the responsibility for working out a final proposal to a select group of both houses. This is reported back and invariably adopted by both houses. There is usually insufficient time at the end of the session or insufficient understanding of the bills, and since agreement had been reached by the leadership and by the conference committee, approval is almost invariably the result. In most cases, however, relatively few individuals are aware of what goes into the final bill and very few members of the public have any idea of what goes on in the conference committees which are generally held in executive session.

In addition there is a tremendous duplication of time and effort in myriad committees in both houses with voluminous and unnecessary bills which are generally used for the purpose of giving the impression to the voter that some legislator favors legislation desired by his constituent, even though it is often well understood that the bill will never get out of committee and will be "filed" in an appropriate dusty corner.

Ogg and Ray sum up the bicameral structure as follows: "Each chamber is, in short, a mere duplication of the other; neither is more conservative or radical than the other, and each is subject to the same influences. Thus it has come about that the state employs two substantially identical organs to perform the same functions." On the question of unicameralism they have this to say: "The advantages of the unicameral system are unmistakable. In the first place, it enables public attention to focus promptly upon the narrow and well-defined area, and therefore permits a real scrutiny of legislative proceedings while laws are being made, a thing which is practically impossible in the case of our present large two-house legislatures with their multitude of committees. In the second place, when there is but one chamber, responsibility cannot be bandied back and forth between two houses, members of one house working with members of the other to defeat legislation, and putting it beyond the power of the public to fix the responsibility....Agreements of this kind...are facilitated by the existence of a dual committee system in the great majority of states, each house having its full set of committees. This duplication furnishes abundant opportunities for shifty deals between two sets of committees, and two sets of political leaders, which still further serve to cloud issues and dissipate responsibility. The disappearance of the dual committee system (including the peculiarly irresponsible and autocratic conference committees), which would, of course, follow the abandonment of the bicameral system, would greatly simplify the legislative process and eliminate much of the delay which nowadays blocks good as well as bad measures....Deadlocks and friction which almost constantly arise between the two houses would cease when two houses no longer existed; and the cost of supporting the legislature might be reduced."

The question of course may well be raised -- why haven't Americans done something about this situation. A partial answer appears to be that the comfort of well-worn shoes are preferred to new ones which might pinch in unexpected places. Ancient shibboleths and customs have to be retained. What is must be because it has existed for a long period of time even if it has outlived its usefulness or historic role.

It is of course possible to develop ways to make the bicameral structure work more efficiently through joint committees, joint hearings, the operation of the committee of the whole, or joint meetings of both houses. In the minds of many, the bicameral structure has outlived its usefulness. This is particularly true since the decision in Reynolds v. Sims. As a tool of government it is regarded by many as a clumsy and inefficient tool, especially in an automated, efficiency-minded, and forward looking society such as ours. No sensible businessman would ever run his business with a system of double committees and double effort and without the ability to pinpoint responsibility for action or for inaction.

(As I have noted, the Supreme Court after undermining the prime supports for the bicameral legislature argues rather lamely for the values of bicameralism. We tend to agree with the New York Times that the argument is nothing more than approval of "a prescription for political featherbedding.")

There is no question that there are a number of valuable features of bicameralism. None of these features need to be eliminated in any reorganization of the legislature. All of the qualities which are useful in bicameralism, such as the age of members of the senate, can also be included into a unicameral system. It is possible for the states to develop a single body which has members representing certain districts who might be elected on a two-year basis, whose minimum age might be 25 or 30, and another group elected from larger districts somewhat similar to the senate, to be elected with a minimum age of 30 or 35. It is also possible to have these individuals elected from differing size geographic units. It is also possible to build into the unicameral system whatever safeguards are necessary to avoid precipitate action. The so-called checks and balances strongly emphasized by those seeking the retention of the bicameral system become meaningless, where in spite of the bicameral system and the check and balances hasty legislation is passed during the closing hours of the session. In many situations the legislation has not even been read let alone understood by those voting for it.

It is possible to build into a unicameral as well as a bicameral system, a procedure for insuring that legislation before it is adopted for final action by the legislature be required to sit on the desk for at least three days. Also on the table should be a copy of the report of the committee setting out the reasons in support of and against the adoption. It is also desirable to require that each bill be read in its entirety to the assembled members of the legislature before a final vote is taken on the bill. It is also possible to see to it that public hearings are held before committees on all bills. The public should have the opportunity to examine the records and files of the committee as well as the votes of the members. Requirements can be written into the rules of the legislature or even through statute or the constitution if it becomes necessary, so that the public will be protected from precipitate action. On the matter of checks and balances, there is still the major check, the public vote during elections. There is also the balance or check of the executive office, which has the responsibility to review and to veto poor legislation. There is also the opportunity of the courts to review legislation which is of a questionable constitutional nature.

It is my belief that the unicameral system, particularly since the reapportionment decisions of the Supreme Court, is a fruitful area for study of our representative form of government. It holds within it the opportunity to revitalize the legislatures of our states. It should be noted that many of our city governments which have budgets and responsibilities in excess of those of the states, as for example in New York City, are unicameral in their operation. Some of the Canadian provinces have gone unicameral as have the Swiss cantons, Norway. It might be noted that State Constitutional Conventions including our own Constitutional Convention of 1950 was a unicameral body. There has been no claim of hasty or precipitate action, even though there was no executive to veto our action. There was, of course, and there always should be the veto power of the people in the adoption of our basic philosophy and structure in the State constitution.

I do not want to leave the impression that any structure, even a unicameral, would resolve the basic problems of government. Structures

are useful insofar as they help achieve the functions and goals of a community of people. It takes devoted and competent people to use the structure to achieve optimum results. A poor structure, however, is an added impediment toward efficient, effective and viable representative government.

It is the hope of many that in the months ahead, prior to our actual convening of a constitutional convention, the people of this community will discuss at length those features which will help bring about responsive and responsible state government. Careful and considerate study should be given to the unicameral legislature as one of the possible avenues for achieving that result.

We have not discussed the possible substantial savings of money which might come about as a result of having a single rather than a bicameral legislature. Substantial savings may be achieved, if the size of the legislature is not increased. The costs attributable to government, however, ought not to be the primary consideration. Providing effective representation should cost more. We ought to be willing to pay more for the kind of government which would be responsive to our needs; the kind that would attract the best people of our community to devote their full time, talents and energy to the administration of government. We believe this will require full-time paid salaries for legislators commensurate with those of other professions. The job should not be a part-time job taken out of a busy work schedule. The individuals should be paid on a full-time basis just as members of the U. S. Congress. Our representatives should be able to devote their full time to the needs of the State. The size of the body might well be reduced in a unicameral legislature.

Until we make a more careful review of the structure of our state governments, and insist on changes we want, we will not get the kind of government which all of us believe we should have and to which we are hopefully entitled. Let us work together to achieve more effective participation in our state government.

ARTICLE IN FAVOR OF A UNICAMERAL LEGISLATURE

BY: WALTER J. BILDER

The division of legislative bodies in this country into two parts had its historical origin in a form of social structure which was composed of two social classes, namely: an aristocracy and the common people, an upper class and a lower class. The prototype for two-house legislatures was the English Parliament. The respective names of the two houses of the English Parliament, namely: the House of Lords and the House of Commons, are historic monuments to the two-class society to which the bicameral form of legislature owes its origin.

In the course of many centuries the governmental power of the House of Lords diminished to the vanishing point so that today all legislative power in the government of Great Britain is possessed by the House of Commons, and the House of Lords has become virtually a governmental vestige. Thus today England, the historical parent of our own bicameral legislative system, has a unicameral legislature.

During the 17th century, the American colonial legislatures almost without exception were unicameral in form. In their unicameral form the colonial legislatures consisted of the colonial Governor and his Council and a group of deputies elected by the people. In New Jersey the frame of government

drawn up by the proprietors in 1665 vested the legislative power in an Assembly comprised of the Governor, six to twelve Councilors and twelve Deputies elected by the people. However, the people of the colonies came to recognize that the Governor and his Council really were the spokesmen of the royal or proprietory rulers and that only the Deputies were the agents of the people. This idea that the members of the single Assembly represented two distinct and different social orders led gradually to the division of the legislature into two houses, meeting and voting separately; and by 1763 all of the colonies except Pennsylvania and Delaware had bicameral legislatures.

The Declaration of Independence in 1776 necessitated the establishment of state governments and between 1776 and 1781 eleven of the thirteen colonies framed new constitutions. Nine of these state constitutions provided for bicameral legislatures and two of them, namely, Pennsylvania and Georgia, adopted constitutions providing for a single legislative chamber. It is notable that Pennsylvania had a unicameral legislature from 1701 to 1776 and retained this unicameral form of legislature after it became a state until the year 1789.

by New Jersey in 1776 required that a member of the upper branch of the legislature should be a freeholder of the county and be worth at least 1,000 pounds, while a member of the lower branch was only required to be worth 500 pounds.

With reference to this difference between the qualifications which the voters were required to have in respect of the upper house of the state legislatures and the lower house/ respectively a noted historian says: "the barriers to universal manhood suffrage in the early American states served as a defense for property rights, and in most of the states the Senate afforded special representation to wealth. The representation of mere man was left to the lower house . . . this was a conscious purpose in the formation of the second chamber."

When the federal Convention met in Philadelphia in 1787 and drew up a Constitution providing for a bicameral federal legislature, the delegates were naturally under the influence of the example of the bicameral system which existed in most of the states from which they came. But the real cause of the provision for a bicameral Congress was the deadlock between the small states and the large states, the former demanding that there should be a single chamber in which all of the states would have equal voting strength (known as the

The adoption of the bicameral form of legislature by most of the colonies after they became independent states was attributable to the fact that, although there was no aristocracy in the colonies, there were well recognized social distinctions based on wealth instead of on birth. Accordingly, the upper house of the bicameral legislature in the independent states was regarded as a convenient device for the special representation of the wealthy and propertied class. What secured this special representation was the fact that there were two general types of political restrictions on the right to vote or the right to hold office. These restrictions were based on the ownership of property or the amount of income, and the amount of property or income which a person was required to have in order to be qualified to vote for the election of members of the upper house of the legislature or to hold office in the upper house was much greater than the amount of property or income which was required with reference to the lower house. In this connection it is notable that Thomas Jefferson objected to Virginia's maintaining the same qualification for the electors of both houses of the legislature in that state on the ground that if both houses represented the same electorate, one of the houses would be superfluous and should be dispensed with. The Constitution adopted

New Jersey plan) and the large states demanding a two-house Congress with membership in both houses to be based on proportionate representation (known as the Virginia plan.) This deadlock was broken by the Connecticut Compromise under which the states were to have equal representation in the Senate and proportional representation in the House of Representatives. This arrangement was copied in the states like New Jersey, where representation in the state Senate was afforded to geographical units as such.

In another very important respect the example of the federal Constitution was followed by the states, namely: the assignment of special powers and functions to the upper house not shared by the lower house. In the case of the federal Constitution this governmental differentation between the Senate and the House of Representatives was dictated by the fact that the federal Constitution-makers actually feared the possession of too much governmental power by the people. To quote a noted historian, the delegates to the Constitutional Convention "were almost without exception members of the upper, propertied classes. They were alarmed by such signs of incipient democracy as Shay's Rebellion . . . in Massachusetts. To them democracy was synonymous with confusion and licentiousness."

In the same vein Alexander Hamilton said: "All communities divide themselves into the few and the many. The first are the rich and well born, the other the mass of the people. The voice of the people has been said to be the voice of God; and however generally this maxim has been quoted and believed, it is not true in fact. The people are turbulent and changing; they seldom judge or determine right. Give therefore to the first class a distinct, permanent share in the government. They will check the unsteadiness of the second, and as they cannot receive any advantage by a change, they therefore will ever maintain good government."

In line with this view, the federal Constitution originally was framed to provide for the election of the Senate by the state legislatures so that the Senate would not be subject to popular control and therefore would be a bulwark of the properties classes against the propertyless masses. This view was expressed by Edmund Randolph, one of the delegates, in the following words: "The object of the second branch is to control the democratic branch of the national legislature." It is thus plainly evident that in adopting the bicameral form of legislature, the states were endorsing an idea that an upper house of the legislature was needed in order to

afford special protection to the interests of the relatively small wealthy portion of the electorate against legislation adverse to their interests by the lower house which represented the mass of the electorate who were without wealth.

In considering the question of whether the proposed new Constitution of New Jersey shall provide for a bicameral legislature or a unicameral legislature, it is of transcendant and critical importance to realize that if a bicameral form of legislature is adopted, the people of New Jersey will not be following an example furnished either by New Jersey's present Constitution or the Constitution of 1844 which preceded it. For, under those Constitutions representation in the upper house of the legislature is based, not upon proportional representation, but on geographical divisions of the state treated as political units. Thus in the year 1938, eight of the state's counties containing four-fifths of the population of the state had eight Senators, while thirteen counties containing one-fifth of the population of the state, had thirteen Senators. The situation today is comparable to what it was in 1938.

However, if the proposed new Constitution of this state provides for a bicameral legislature, both houses of the

legislature must be based upon proportional representation. This means that a bicameral system under the proposed new Constitution would be something totally novel and untried in the history of this or any other state. Therefore it would lack totally the powerful support which any form of social action always derives from historical precedent or past experience. A bicameral system in which both houses are based upon proportional representation would be a political innovation. It follows from this important fact that all of the usual arguments advanced to justify a bicameral system would be wholly inapplicable. The incontrovertible fact is that a bicameral legislature in the proposed new Constitution of New Jersey would produce a sheer duplication in the legislative portion of the structure of our state government.

Chief among the traditional arguments advanced to justify a bicameral legislature is the claim that an upper house is needed to check the legislative power of the lower house. Obviously, such an argument is inapplicable to a bicameral legislative system in which both houses are based on proportional representation. For, if so applied, the argument would amount to saying that the people of the state need to elect two sets of legislative representatives so that each

set can act as a check on the other. Such an argument is self-evidently absurd. Indeed, if each of two sets of legislative representatives were really to perform the function of checking the action of the other, the resulting situation could only be aptly described by Benjamin Franklin's statement in which he likened a two-house legislature to a wagon with a horse hitched to each end pulling in the opposite direction.

I have said that if the people of New Jersey now adopt a Constitution which provides for a bicameral legislation they will not be following any historical political precedent but will be making an unheard-of political innovation. Yet, in another sense, the provision of a bicameral form of legislature in the proposed new Constitution will not be the breaking of new political ground but will be the continuing occupation of very old political ground,- ground which is utterly unsuitable for and incompatible with a democratic society. For,the bicameral form of legislature originated in a two-class society, one in which there was an upper social class and a lower social class; the bicameral system has always derived its claimed justification from the alleged need for protecting the interests of the upper class

from injury by the legislative action of the lower class; and the inclusion of the bicameral system in the proposed new Constitution of this state will serve to perpetuate a socially-invidious and ~~solely~~ virtually-obstructive political anachronism.

In conclusion, I would like to call attention to the all-important fact that this Constitutional Convention affords to the people of this state a golden opportunity to do away with one of the most harmful and anti-democratic features of the state's present governmental structure, namely: the power of each member of the Senate virtually to control appointments to office in his county which are within the appointive power of the state's Executive to make. Not the least of the salutary results of a unicameral legislature in this state will be the abolishment of this dictatorial anomaly in our democratic form of state government.

WICHE

A REPORT TO THE GOVERNORS, THE LEGISLATORS, AND THE PEOPLE OF THE 13 WESTERN STATES.

WESTERN INTERSTATE COMMISSION FOR HIGHER EDUCATION.

P.O. DRAWER P, BOULDER, COLORADO 80302,

JANUARY, 1972

Alaska • Arizona • California • Colorado • Hawaii • Idaho • Montana • Nevada • New Mexico • Oregon • Utah • Washington • Wyoming

WICHE is a public agency through which the people of the West work together across state lines to expand and improve education beyond the high school.

HISTORY:

- was created to administer the Western Regional Education Compact, which has been adopted by the legislatures of all the 13 western states;
- was formally established in 1951, after ratification of the compact by five state legislatures; program activities began in 1953.

ORGANIZATION:

- is composed of 39 commissioners, three from each state, appointed by their governors; they serve without pay;
- is served by a small professional staff, supplemented by consultants, councils, and committees.

PURPOSE:

- seeks to increase educational opportunities for western youth;
- assists colleges and universities to improve both their academic programs and their institutional management;
- aids in expanding the supply of specialized manpower in the West;
- helps colleges and universities appraise and respond to changing educational and social needs of the region;
- informs the public about the needs of higher education.

PROGRAM AND PHILOSOPHY:

- serves as a fact-finding agency and a clearinghouse of information about higher education and makes basic studies of educational needs and resources in the West;
- acts as a catalyst in helping the member states work out programs of mutual advantage by gathering information, analyzing problems, and suggesting solutions;
- serves the states and institutions as an administrative and fiscal agent for carrying out interstate arrangements for educational services;
- has no authority or control over the member states or individual educational institutions; it works by building consensus based on joint deliberation and the recognition of relevant facts and arguments.

FINANCES:

- is financed in part by appropriations from the member states of $15,000 annually; the states also contribute $7,500 each to participate in a regional program in mental health, mental retardation, special education, corrections, rehabilitation, and the helping services;
- receives grants and contracts for special projects from private foundations and public agencies; for each dollar provided by the states during Fiscal Year 1972, WICHE will expend more than $17 from non-state sources; in the past 16 years, grant and contract commitments have exceeded $25 million.

a message from the director

Twenty years ago, in 1951, the Governors of five Western states signed legislation establishing the Western Regional Education Compact. By 1953, three other states joined; the first executive director was appointed; and program activity began. By 1959, all 13 eligible states had joined.

To date, the 13 western states have invested $3,053,000 in WICHE's operation.

Question: What have the states received in return?

Answer: The "seed money" provided by the western states has made them beneficiaries of a host of significant regional programs. These programs have been mounted by WICHE and largely funded by private and public agencies, with grants totalling $25 million. Over the years, the ratio of state dollars to grant dollars has been nearly eight to one. And this current year, the ratio is $17 of grant support to $1 of state support. In other words, just measuring dollar-for-dollar value, WICHE has proved to be a good investment for the western states.

This year's annual report can only highlight a few of WICHE's significant contributions. But as in years past, WICHE has continued its efforts to increase and improve educational opportunity for the people of the West, and to assist the colleges and universities to improve both their academic programs and their institutional management.

For example, the Student Exchange Programs, WICHE's oldest programs, have been expanded once again. New fields of professional education have been included which are not offered by sending states. This year, the number of exchange students rose to an all time high of 790. These students come from 11 states and attend 42 different professional schools. Since 1953, WICHE has served as the educational broker on behalf of the sending states and the receiving schools. In total, this accounts for 7,747 student years.

Currently, WICHE's 45 separately budgeted programs are organized under three divisions: General Regional Programs, Mental Health and Related Areas, and the National Center for Higher Education Management Systems at WICHE. The activities of each of these divisions are briefly outlined in the body of this report.

Fee Increase

At WICHE's annual meeting last August, the Commissioners voted to request the state legislatures to raise the WICHE yearly appropriation from its present $15,000 per state to $28,000. It will be ten years (1963) since WICHE last made such a request. The increase was carefully considered by the Commission, whose members agreed that this modest increase (an average of 6.4% per year) is needed to offset inflation and to provide for the increased costs of on-going programs.

These additional dollars will strengthen WICHE:

- by providing seed money for developing new programs to meet emerging, crucial higher education needs;
- by providing dollars for important grants which do not provide 100% funding;
- by providing a better balance between "hard" state dollars and "soft" grant dollars, to insure WICHE's continued viability;
- and by insuring the continuation of the biennial Legislative Work Conference.

But most important, it will reaffirm the West's commitment to WICHE and to the regional approach for solving selected problems in higher education.

The Commissioners and staff feel confident that WICHE has proved that it can grow with the times, and respond to contemporary needs. Over the years, WICHE has effectively identified higher education problems in the West and contributed significantly to their solution. This has been demonstrated by the increasing support of granting agencies, which have spotted WICHE as a doer in higher education.

Thus after ten years of accomplishment, the Commissioners did not hesitate to request an adjustment of the WICHE appropriation from the states. They felt confident that WICHE had proved its ability to pay the highest of dividends for the states' investment.

We seek the support of all those who think likewise.

commissioners

As of January, 1972

The WICHE Commission is composed of 39 dedicated men and women, who serve without pay as the board of directors for the organization. They are the decision makers, the providers of ideas, and the takers of the western pulse in higher education.

Each western state is represented by three commissioners, appointed to four-year terms by the governor. One commissioner from each state must be actively involved in higher education. The other two are drawn from such wide-ranging fields as state government, medicine, law, business, and other areas.

ALASKA

*Mrs. Delio Pruhs, Fairbanks
John S. Hellenthal, Attorney, Anchorage
Dr. William R. Wood, President, University of Alaska

ARIZONA

*Dr. Richard A. Harvill, President Emeritus, University of Arizona
W.O. (Fred) Craft, Jr., Assistant U.S. Attorney, Phoenix
Dermont W. Melick, M.D., Coordinator, Arizona Regional Medical Program, College of Medicine, University of Arizona

CALIFORNIA

*Dr. Rita R. Campbell, Senior Fellow, Hoover Institution, Stanford University
Dr. Glenn S. Dumke, Chancellor, California State College and University System, Los Angeles
Dr. W. Ballentine Henley, President of the Board of Trustees, United Church of Religious Science, Los Angeles

COLORADO

*Dr. Kathryn M. Smith, Dean, School of Nursing, University of Colorado Medical Center
Dr. William E. Morgan, President Emeritus, Colorado State University
C. Gale Sellens, President, Lakeside National Bank, Wheatridge

HAWAII

*Dr. Frederick P. Haehnlen, Jr., Professor of Educational Psychology, University of Hawaii

John B. Connell, Life Underwriter, Insurance Company; Communications Coordinator, Model Cities Program, Kailua

George Goto, M.D., Honolulu

IDAHO

*Martha D. Jones, M.D., Boise

Dr. John B. Barnes, President, Boise State College

Dr. William E. Davis, President, Idaho State University

MONTANA

*Warren D. Bowman, M.D., Billings

Edward W. Nelson, Executive Secretary, The Montana University System, Helena

Herman C. Ross, D.V.M., Kalispell

NEVADA

*Dr. Juanita Greene White, State Assemblyman, Boulder City

Fred M. Anderson, M.D., Regent, University of Nevada

Dr. Thomas T. Tucker, Chairman, Department of School Administration and Supervision, College of Education, University of Nevada

NEW MEXICO

*Carter Kirk, Land Developer, Deming

Dr. Ferrel Heady, President, University of New Mexico

Clory B. Tafoya, Principal, Valencia Elementary School, Los Lunas

OREGON

*Mrs. Edna Scales, Portland

Dr. Roy E. Lieuallen, Chancellor, Oregon State System of Higher Education, Eugene

Lynn W. Newbry, State Senator, Ashland

UTAH

*Richard J. Maughan, Member, State Board of Higher Education; Attorney, Salt Lake City

Dr. G. Homer Durham, Commissioner, State Board of Higher Education, Salt Lake City

Mrs. Dorothy K. Watkiss, Member, University of Utah Institutional Council

WASHINGTON

*Gordon Sandison, State Senator; Insurance Broker, Port Angeles

James Furman, Executive Coordinator, Council on Higher Education, Olympia

Dr. Glenn Terrell, President, Washington State University

WYOMING

*Richard R. Jones, State Senator, Cody

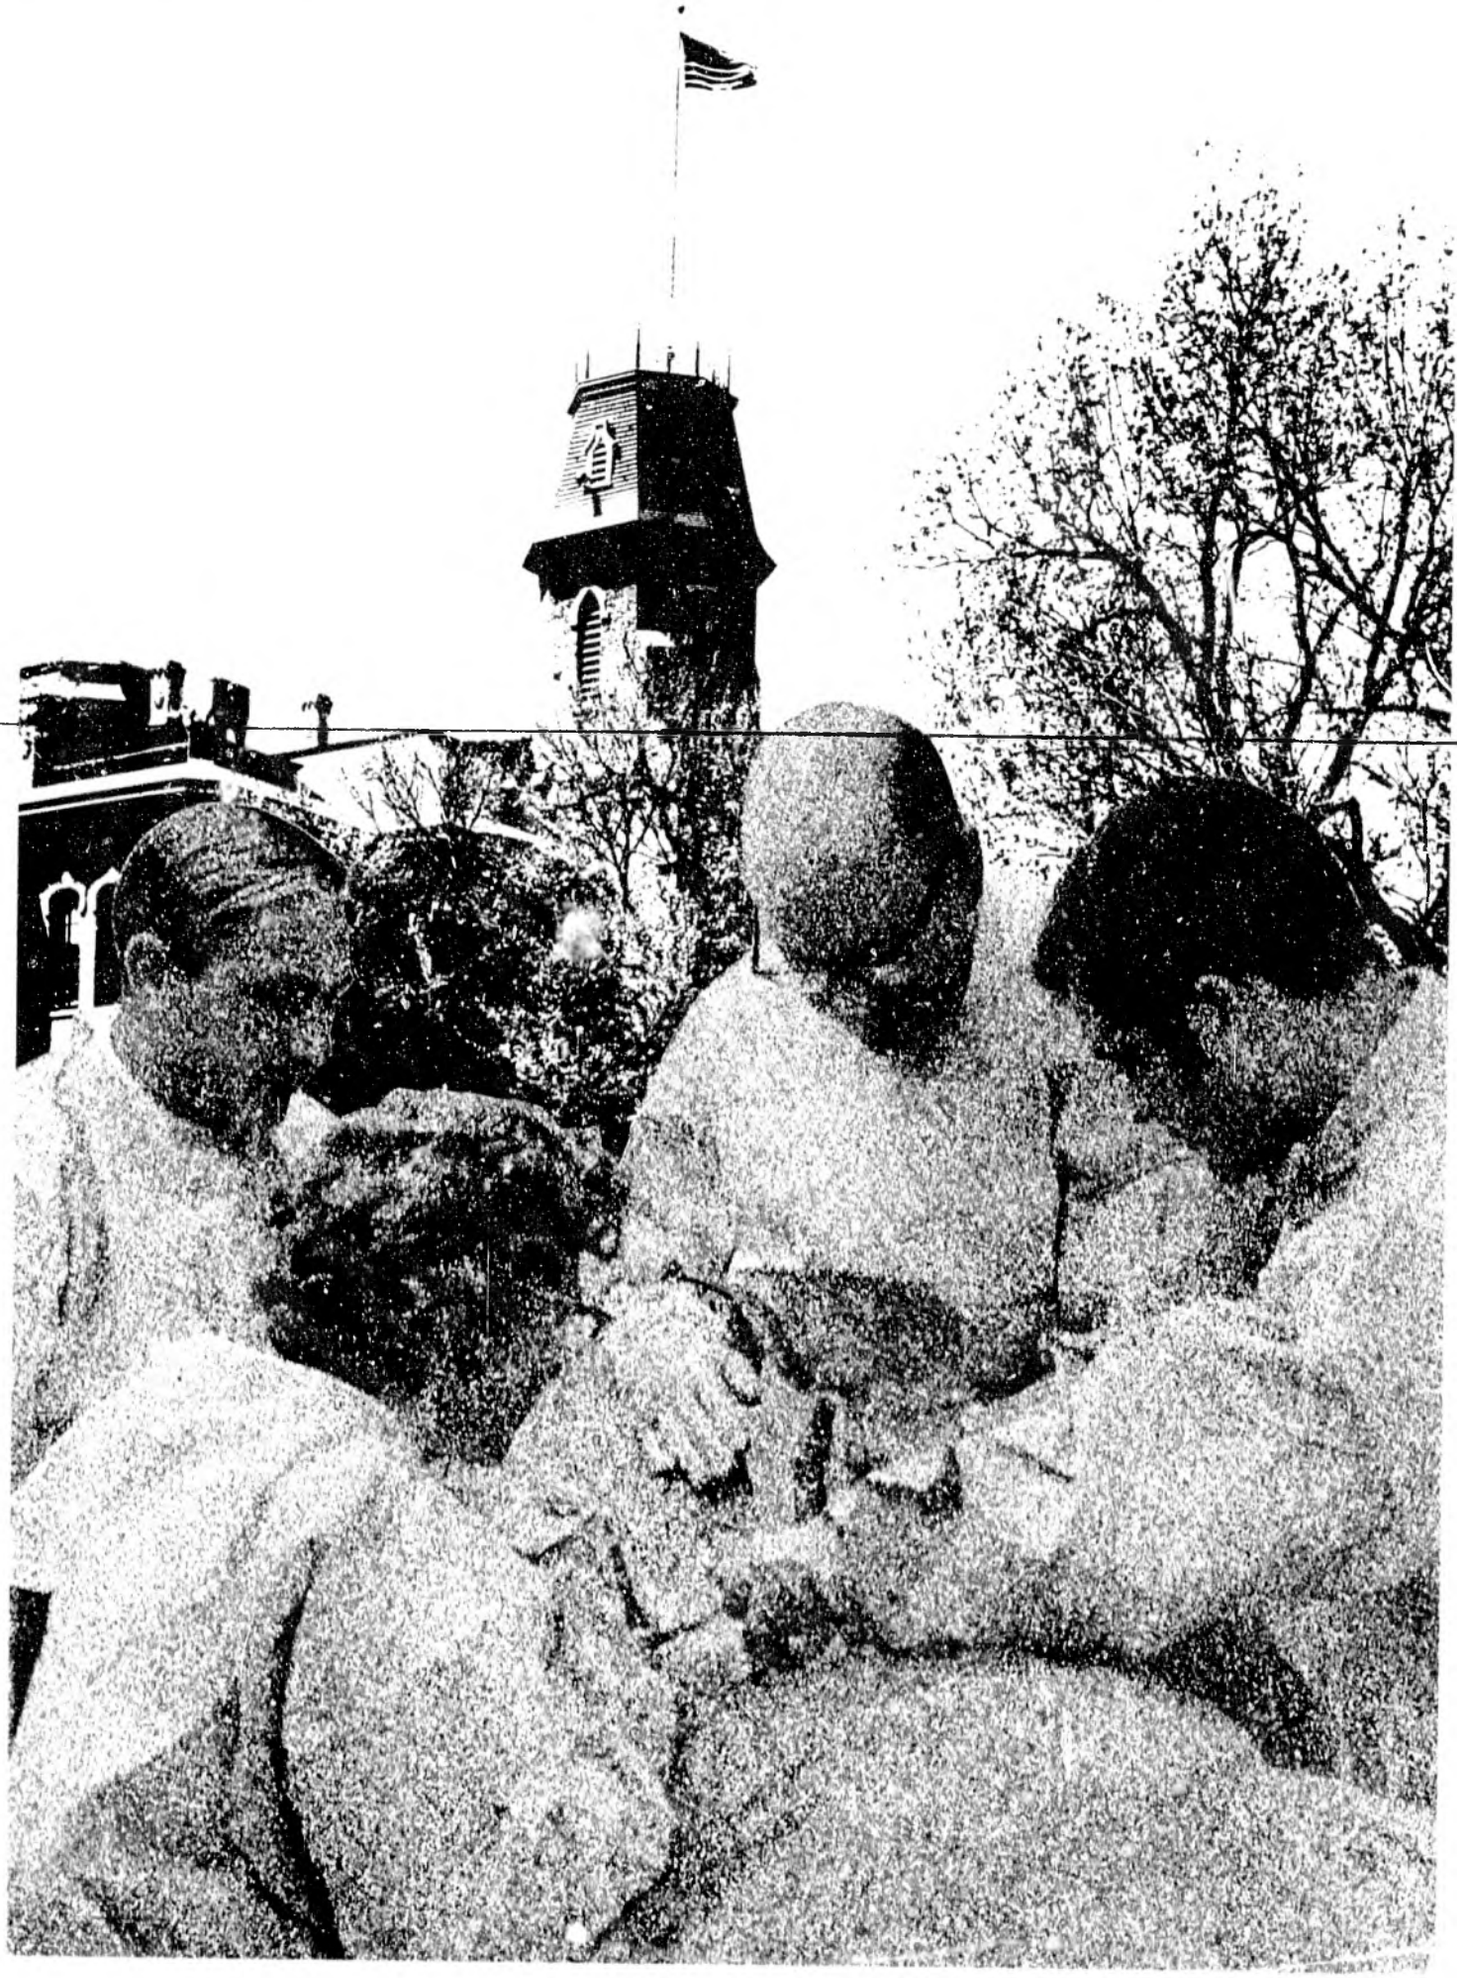
Francis A. Barrett, M.D., Cheyenne

Dr. William D. Carlson, President, University of Wyoming

*Members, Executive Committee

chairmen of WICHE

1951-53	**Dr. O. Meredith Wilson**	Dean, University College, University of Utah
1953-54	**Dr. Tom L. Popejoy**	President, University of New Mexico
1954-55	**Dr. G. D. Humphrey**	President, University of Wyoming
1955-56	**Frank L. McPhail, M.D.**	Physician, Great Falls, Montana
1956-57	**Ward Darley, M.D.**	President, University of Colorado
1957-58	**Frank J. Van Dyke**	Attorney, Medford, Oregon
1958-59	**Dr. Fred D. Fagg, Jr.**	President Emeritus, University of Southern California
1959-60	**Dr. Richard A. Harvill**	President, University of Arizona
1960-61	**Alfred M. Popma, M.D.**	Physician, Boise, Idaho
1961-62	**Dr. C. Clement French**	President, Washington State University
1962-63	**Dr. Charles J. Armstrong**	President, University of Nevada
1963-64	**Dermont W. Melick, M.D.**	Physician, Phoenix, Arizona
1964-65	**Dr. Willard Wilson**	Secretary, University of Hawaii
1965-66	**Mrs. Thomas Scales**	Collector of Customs, Portland, Oregon
1966-67	**Dr. William R. Wood**	President, University of Alaska
1967-68	**Gordon Sandison**	State Senator, Port Angeles, Washington
1968-69	**Dr. Merle E. Allen**	Director, Coordinating Council of Higher Education, Utah
1969-70	**John G. Mackie**	Assistant Professor, Colorado Mountain College; Attorney, Carbondale
1970-71	**Dr. Rita R. Campbell**	Senior Fellow, Hoover Institution, Stanford University, California
1971-72	**Francis A. Barrett, M.D.**	Physician, Cheyenne, Wyoming



division of general regional programs

From the surgical table to the campus, WICHE's Division of General Regional Programs carries forth projects and programs which strike to the core of many western needs in higher education.

In this division, higher education is viewed from the broadest possible perspective. Programs are developed to meet both on-campus and off-campus needs.

Dr. Kevin Bunnell

Mrs. Patricia Locke (at right), director, WICHE's Ethnic Programs in Higher Education, outlines program plans for increasing access to higher education for Blacks, Chicanos, Asians, and Indians.

In recent years, health has been a major concern in the West. Therefore, this division, responding to the need, has concentrated on health education. One example is the $1 million-a-year Mountain States Regional Medical Program covering the states of Idaho, Montana, Nevada, and Wyoming. Other examples include seven separate programs in nursing education. And there is the Student Exchange Program, which now offers interstate educational opportunities in eight health fields.

The Division of General Regional Programs has responded to other educational needs, as well. Programs have been mounted to improve and expand education's offerings for ethnic minorities, to train library personnel, to give college students a taste of real life with internship experiences, and to boost educational opportunities for community college students.

Division Director Kevin Bunnell describes the General Regional Programs as flexible. They are ready to meet new, and even unpredicted, needs in higher education. Of course as a regional agency, WICHE concentrates on interstate and interinstitutional programming.

According to Dr. Bunnell, program development is the heart of this division. The sole mission of the Special Higher Education Programs (SHEP) unit is to take the western pulse and create new and needed programs. Other division programs also concentrate on project development.

The products of this creativity have been many and varied. But perhaps most impressive have been the Mountain States Regional Medical Program and the SHEP-created National Center for Higher Education Management Systems, now a separate WICHE division with national importance.

division of general regional programs

Jack Arbolino, executive director, College-Level Examination Program, College Entrance Examination Board, speaks at a WICHE conference on Credit by Examination.

These Wyoming physicians carefully examine the subject during a surgical refresher course conducted by the Mountain States Regional Medical Program.

STUDENT EXCHANGE PROGRAMS

To share the educational resources of the West by providing opportunities for professional education when the specialty is not offered within the boundaries of the sending state through a system of student exchanges implemented at cooperating schools. Student exchange models may or may not involve interstate exchange of money.

Above. The topic was teaching innovations for nursing educators. Prof. Crystal Lange (top, right) of Delta (Mich.) College, coaches this nurse in simulation gameplaying. Chalk in hand, James Kent, Denver-based urban expert, explains community development.

Right. AA-degree nursing faculty pick up mental health concepts. Mrs. Joyce Reiswig (left), nursing instructor, Loma Linda U., jots notes during on-the-ward training. Miss Sandra Garfield (right), educational coordinator, Resthaven Psychiatric Hospital, explains the basics of psychodrama.

SPECIAL HIGHER EDUCATION PROGRAMS

To identify pertinent problems confronting general higher education in the West; to explore alternative solutions to these problems in cooperation with the West's colleges and universities; to begin preliminary program development designed to meet identified needs of the region; and to operate on a continuing basis a small number of higher education programs which provide necessary services to the people of the West.

MOUNTAIN STATES COMMUNITY COLLEGE CONSORTIUM

To enhance educational opportunities for students in community colleges in the four-state area of Idaho, Montana, Utah, and Wyoming. This will be achieved through interstate and interinstitutional cooperation and programming geared to the resolution of common problems that participating institutions share as small, geographically isolated, "developing institutions."

ETHNIC PROGRAMS IN HIGHER EDUCATION

To expand minority group access to higher education and to improve the relevance of educational experiences for these students and their communities.

WESTERN COUNCIL ON HIGHER EDUCATION FOR NURSING

To increase educational opportunities for students in nursing by developing programs in nursing education, based on sound educational principles; to identify and organize ways of coping with general nursing problems; and to improve care of patients by disseminating this knowledge throughout the western region.

CONTINUING EDUCATION PROGRAM FOR NURSES

To improve the leadership skills of nurses in teaching, supervision, and administrative positions through a series of short conferences aimed toward improving patient care provided for agencies and institutions employing the participant nurses.

NURSING RESEARCH CONFERENCES PROGRAM

Through an annual conference on nursing research, to share research findings, to receive and give stimulation for further research, and to facilitate the application of findings to patient care. Faculty are stimulated to use results of research in planning nursing school curricula.

REGIONAL PROGRAM FOR NURSING RESEARCH AND DEVELOPMENT

To provide a three-year program of consultation and work clinics directed toward increasing skills of nurses who are undertaking research, particularly in the area of patient care and care delivery, and then assisting these nurses to develop research projects. The goal of the program is to increase the number and quality of nursing research projects in the West.

IMPROVEMENT OF NURSING CURRICULA

To improve and revise curricula in western schools of nursing through integration of selected core concepts of nursing into associate degree, baccalaureate, and graduate programs; to provide information on and stimulate the use of additional innovations in the teaching-learning process.

CONTINUING EDUCATION PROGRAM FOR PSYCHIATRIC NURSES

To assist faculty in associate degree nursing programs to increase their content and skills in psychiatric mental health concepts throughout the nursing curriculum; and to increase the use of psychiatric mental health concepts by nurses in any health care setting.

Resources Development Intern Barbara Greebe trained Lakewood (Colo.) policemen in videotaping techniques last summer.

NURSE FACULTY DEVELOPMENT TO MEET MINORITY GROUP NEEDS

To increase the numbers of minority group students who are recruited and complete nursing programs and to modify existing programs of nursing to include content which will increase the potential of their graduates to provide services relevant to the health needs of minority group communities. The project proposes to achieve these aims through a three-year regional faculty development program.

CONTINUING EDUCATION PROGRAM FOR LIBRARY PERSONNEL

To demonstrate and evaluate the effectiveness of a variety of continuing education methods, materials, and programs in preparing library personnel in all types of libraries and to effect positive change in the delivery of library services.

The soft whirring of 16 mm. cameras backgrounded the 13th annual College and University Self-Study Institute on "The Public Challenge and the Campus Response." Speakers included Dr. Warren Martin, of the Center for Research and Development in Higher Education, Berkeley; and Dr. John Silber, president, Boston U.

MOUNTAIN STATES REGIONAL MEDICAL PROGRAMS

To develop programs in response to major needs in the four states of Idaho, Montana, Nevada, and Wyoming for continuing education for health personnel and for facilities which will strengthen the capacity of physicians and other health professionals to treat heart disease, cancer, stroke, and related diseases.

Operational Programs

1. Core Operation
2. Coronary Care Training—Montana
3. Cancer Education and Treatment Center (Mountain States Tumor Institute)
4. Continuation Education for Health Professionals in Montana
5. Rocky Mountain Tumor Registry
6. Continuing Nursing Education—Nevada
7. Continuing Education in Inhalation Therapy for Physicians, Therapists, and Nurses
8. Consulting Team Approach to Continuing Education for Health Service Personnel in Rural Communities in Nevada
9. Continuing Nursing Education—Idaho
10. Coronary Care Training—Southwest Idaho
11. Continuation Education for Nursing—Wyoming
12. Continuation Education for Nursing—Montana

RESOURCES DEVELOPMENT INTERNSHIP PROGRAM

To promote the productive interchange of ideas between the academic community, including students, and the participants in community organizations throughout the West, especially by means of the process of service-learning, by building bridges between educational institutions and community organizations, and by developing new and innovative supplementary projects.

division of mental health and related areas

It's a leap of lifetimes and of life styles—from the bloody past and grey frustration of the streets in Watts, here symbolized by Watts Towers, to the bright, sun-filled promises of this young artist for whom the behavioral sciences offer up their best.

Such is the range encompassed by WICHE's Division of Mental Health and Related Areas. Eight separate programs cover the span from "street training" in such poverty pockets as Watts, California; to special on-campus programs for students, faculty, and administrators; to continuing education efforts for the full range of mental health professionals.

Designed to meet a variety of western needs, WICHE's health programs are diverse and specialized.

Robert L. Stubblefield, M.D.

But when Division Director Robert Stubblefield, M.D., discusses programming, he talks in terms of *integration* and *interdependence*.

For Dr. Stubblefield, integration means more than mental health programs working together. It means closely relating division programs with programs in health and education. It means a broad perspective of mental health issues and needs—a perspective that is sociological and biological, as well as psychological. In other words, the idea is to create a united front for the common good.

The Division of Mental Health and Related Areas was created in 1956 at the request of the Western Regional Conference of the Council of State Governments. The creation of the division and its advisory board, the Western Council on Mental Health Training and Research, was based on a two-year survey of the needs of the western region.

As for future objectives, Dr. Stubblefield has charted divisional emphases in the areas of •drugs and drug abuse education, •teacher training in early childhood education, and •continuing professional education in the two fields of program evaluation and geriatrics. He also noted an interest in developing programming dealing with Indians and other ethnic groups. These programs would examine family and cultural strengths and develop a core of mental health manpower.

Raymond Feldman, M.D., former director, WICHE Mental Health Division, retired in September, 1971.

division of mental health and related areas

A founding father of mental health worker training, Dr. John True, of Johns Hopkins Hospital, was a principal speaker at a four-state WICHE conference on community college mental health worker programs.

Calling for a return to Indian religions and philosophies, Bud Mason (center), alcoholism worker, Rapid City, S. Dakota, spoke to 100-plus Indians from five southwestern states at a WICHE conference on Indian mental health issues—alcoholism and suicide. Be-feathered dancers from the Albuquerque Indian School were featured at one evening session.

Mrs. Menola Upshaw laughs heartily at a quip, while discussing new styles of training programs for regular teachers in the area of special education at a WICHE conference. Mrs. Upshaw is supervisor, Special Education Division, Denver Public Schools.

T. George Harris, editor, *Psychology Today*, sparked life into a breakfast discussion on education for master's-level psychologists at a conference in San Diego, co-sponsored by WICHE and the American Psychological Association.

CONTINUING PSYCHIATRIC EDUCATION FOR PHYSICIANS PROGRAM

To increase the supply of psychiatrist-teachers for nonpsychiatric physicians of the West, in areas remote from training institutions; to provide demonstration study opportunities for physicians practicing in these areas and to stimulate the development of ongoing training programs for them; and to provide liaison for the western region in this field.

WESTERN CONFERENCE ON THE USES OF MENTAL HEALTH DATA

To develop methods of training mental health statisticians, to develop new methods for effective collection and utilization of mental health data, and to develop a vehicle for communication and collaborative research among interested professionals in this field.

COMMUNITY COLLEGE MENTAL HEALTH WORKER PROGRAM

To develop community college educational programs in mental health in order to meet the manpower needs for service delivery in rural areas and to emphasize, particularly, the recruitment and training of Spanish-American and Indian students from rural areas.

First angry words, then a nervous rapprochement as Chicanos from six states met in a continuing education conference on "Implementing Organizational Change in the West." Participants included (l. to r.) Bernardo Lujan, of Denver; Eloy Apodaca, director, Chicano Institute, Seattle, Washington; Dr. Juan Ramos, special assistant to Director, National Institute of Mental Health; and Miss Julia Soto, of Tucson, Arizona.

SPECIAL EDUCATION FOR GENERAL EDUCATORS

To improve the understanding and capability of general educators—especially those already working in regular classrooms, in the inner city, and in geographically remote areas—in teaching exceptional children, by providing assistance to institutions and agencies in the 13 western states as they plan special training programs and special education programs for the delivery of services.

IMPROVING MENTAL HEALTH SERVICES ON WESTERN CAMPUSES

To assist four-year colleges and universities in the 13 western states to improve the organization and delivery of mental health related services throughout their campus communities.

Staffers from California Youth Authority institutions tested their grit and learned first-hand about ghetto life during four days of "street training" in Watts, California last spring. Ghetto-bred trainers were used for the sessions. They included 15-year-old Kenny Carter (left), brother of Black Panther "Bunchy" Carter, who was shot down by a rival group of black militants; and Volly Bastine (above, left), teacher, Drew Junior High School. Above, right: On the street, this white CYA trainee finds himself alone and very lonely.

MENTAL HEALTH CONTINUING EDUCATION

To help develop a collaborative field of continuing education for mental health personnel in the West, a field linked by mutual planning among leaders in university programs and treatment agencies and characterized, eventually, by a variety of flexibly designed, short, intensive courses for members of the core professions in both urban and rural settings.

DEANS AND FACULTY OF SCHOOLS OF SOCIAL WORK PROGRAM

To involve the deans of the graduate schools of social work in the western states in a program of continuing education which provides for their own professional development and enables them to share in the development of opportunities for continuation of their faculties; and to provide support for a regional workshop program for graduate school faculty.

CORRECTIONS PROGRAM

To provide in-service training for juvenile and adult correctional personnel in eleven of the thirteen western states under two separately funded projects—Regional Institute for Corrections, Administrative Study; and Nationwide Educational Programs for Institutionalized Children.

national center for higher education management systems at WICHE

The National Center for Higher Education Management Systems (NCHEMS) means people working together to solve some of the tough problems in higher education—principally management problems.

This WICHE Division has three broad goals: (1) the improvement of institutional management, (2) the improvement of statewide coordination of higher education, and (3) the improvement of decision-making processes on the highest national levels.

The process for achieving these goals is to design, develop, and facilitate the implementation of systems for planning and management which can be used at all levels of higher education.

Basically, the NCHEMS systems are tools—management tools. And when they are put to work, they help the decision maker in higher education to do a better job. The tools help the administrator gather the pertinent raw data and translate these isolated facts into useful information. All of this means the quick identification of more and clearer options for education's managers, who then should make better decisions.

Dr. Ben Lawrence

Dr. Robert Huff, director, NCHEMS Training and Implementation Unit is shown here with a slide from one of the unit's instructional presentations.

A central part of decision making and NCHEMS work is *accountability*, that catchword that asks: Do the benefits of higher education justify the costs?

NCHEMS Director Ben Lawrence notes that legislators, parents, and the public in general want to know what they are getting for the tax dollar. Educators, too, are concerned with accountability and other budget questions. They must balance tight money against rising costs, increased enrollments, and new program demands. NCHEMS is busy developing the tools to help answer those questions raised by this growing demand for accountability.

Even with all the talk of accountability, systems, and computer-age technology—the key in NCHEMS is people. These people are in all 50 states and at 725 institutions who use these management tools and are affected by them. For this reason, NCHEMS staff involves them at every level of program construction and implementation, seeking their advice and asking their consultation.

In other words, the principal designers and constructors of NCHEMS programs are the people affected by them. They include college and university faculty and administrators, students, members of governing boards and coordinating councils, legislators, and others.

As indicated by its title, this WICHE Division has been designated as a "national center" by the U.S. Office of Education, which is funding NCHEMS at $1 million yearly. Before the name change this year, NCHEMS was known as the Division of Planning and Management Systems.

NCHEMS is composed of 23 separate programs, which are generally divided into three units. The units are Development and Applications, Research, and Training and Implementation.

national center for higher education management systems at WICHE

MANPOWER ACCOUNTING MANUAL
To provide standard categories for classifying and reporting employee activities typically associated with jobs and positions in colleges and universities.

DATA ELEMENT DICTIONARY
To establish uniform sets of definitions for the data to be used in the Center's program. Uniform data elements are the foundation for the development of compatible data bases in the participating institutions.

PROGRAM CLASSIFICATION STRUCTURE
To design a taxonomy of higher education programs that will serve as the framework for comparable data exchange and reporting, assist in program budgeting, and serve as the framework for the development of generalized analytical models.

STUDENT FLOW MODELS
To develop analytical models that will predict student enrollment and simulate student progression through postsecondary education at both the institution and state system level.

FACULTY ACTIVITY ANALYSIS
To develop standard procedures for analyzing faculty activities and to design techniques that may be used to assist in compatible exchange of the data.

RESOURCE REQUIREMENTS PREDICTION MODEL
To develop simulation models to project resource requirements to aid institutional decision makers in the allocation of higher education resources.

INFORMATION EXCHANGE PROCEDURES
To define conventions regarding the manner in which institutional data may be aggregated and arrayed for interinstitutional comparison.

COST FINDING PRINCIPLES
To develop costing methodologies that will permit cost analysis of the various activities in higher education.

HIGHER EDUCATION FINANCE MANUALS
To describe procedures for translating institutional financial data into program structures designed to meet the particular needs of decision makers at the institutional, state, and national levels.

FACILITIES INVENTORY AND CLASSIFICATION MANUAL
To revise the federal *Higher Education Facilities Classification and Inventory Procedures Manual.*

NATIONAL SEMINAR ON HIGHER EDUCATION MANAGEMENT
To conduct a national seminar for the purpose of identifying issues fundamental to developing and implementing comprehensive state planning and management systems.

WICHE's 7th biennial Legislative Work Conference keyed on NCHEMS management systems during three days of sessions on "Legislative Decision Making in Higher Education: How To Get the Facts." Speakers included Rep. Genie Chance (right), of Alaska; keynote speaker John Keller (below, left), consultant, Hawaii Department of Budget and Finance; and Sen. Harold Giss (below, right), of Arizona.

Seventy educational leaders, government officials, and state legislators examined the issues and design of statewide planning for postsecondary education at the 3rd national invitational seminar co-sponsored by NCHEMS. Among the participants were *at left*, Dr. Lyman Glenny, associate director, Center for Research and Development in Higher Education, Berkeley; and *above*, Sen. Lynn Newbry (left), of Oregon with Dr. Roy Lieuallen, chancellor, Oregon State System of Higher Education.

GENERAL TRAINING
To promote the adoption and implementation of new higher education management tools and techniques.

TRAINING MATERIALS AND TECHNIQUES
To develop a variety of training materials and techniques for use in providing instructional experiences that will ensure that the new management tools being developed under the Center's aegis will be fully understood by the higher education community.

Dr. Robert Wallhaus (above), director, NCHEMS Research Unit, and Dr. Warren Gulko (left), director, NCHEMS Development and Applications Unit, answer questions and explain details of their programs at the Legislative Work Conference, in Phoenix.

TRAINING NETWORK
To meet the training needs of institutions and agencies throughout the country on the development and implementation of management technologies.

CENTER PRODUCT WORKSHOPS
To develop and conduct the Center product workshops to include details of specific Center products.

VISITING PROFESSIONALS TRAINING PROGRAM
To provide an opportunity for institutional or agency representatives to obtain a full understanding and working knowledge of NCHEMS developmental work and to contribute in a meaningful fashion to some specific aspect of the Center's developmental work.

A STUDY OF FEDERAL FINANCING PLANS FOR HIGHER EDUCATION
Phase I: To evaluate and make recommendations for implementation relative to a specific federal general assistance plan for higher education. Phase II: To investigate systematically the financial needs of higher education and to develop and analyze alternative federal financing plans with the objective of making recommendations for implementing a plan or set of plans that best addresses the identified financial needs of higher education

STATEWIDE PLANNING SYSTEMS
To conceptualize statewide planning systems that will result in design specifications for such additional programs as analysis of manpower trends, statewide planning and resource allocation models, and information systems for statewide planning.

STUDENT FLOW
To advance the state-of-the-art in student flow analysis by generalizing such concepts as student cohorts, transitions, state-of-the-system, and transition events to encompass a wide range of decision viewpoints of various decision makers. To investigate the stability and predictability of student flow in institutions in statewide systems.

RESOURCE UTILIZATION ANALYSIS
To develop techniques which will aid institutions in more efficient utilization of the resources available to them. This project is primarily directed to such operational or logistical functions of institutions as inventory management, work scheduling, space utilization, and course scheduling.

OUTPUTS OF HIGHER EDUCATION
To improve planning, evaluation, and decision making in higher education by developing quantitative measures and qualitative understandings of the outputs of education programs.

RESOURCE ALLOCATION AND PLANNING MODELS
To develop long-range improvements in the use and predictive capabilities of resource allocation and planning models. To develop techniques that facilitate the study of the resource implications of institutional output experiments and development of methodologies for studying feasible planning of alternatives.

Community College Mental Health Worker Program	43,640	
Refunds to Grantors	423	6,218,459
CASH BALANCE, JUNE 30, 1971		583,007[4]

(1) The difference between these two amounts reflects amounts carried over to the next year.

(2) This includes expenses of the executive director's office, associate directors' offices (that portion allocated for administration and program development), administrative services office, publications unit, public information unit, personnel office, and meetings of the Commission and the Mental Health Council.

(3) Direct cost expenditures only are shown for program funds. Indirect costs are charged internally to programs, but they are not included in program expenditures above because they are reflected in the WICHE administrative and basic operation expenditures.

(4) This balance represents primarily advance payments on grants in addition to a contingency balance of $247,854 and an operating reserve of $15,000, both of which have been authorized by the Commission.

In accordance with the provisions of the Western Regional Education Compact, the Commission provides for an annual independent audit of its books. On July 13, 1971, the firm of Haskins and Sells, certified public accountants, completed this audit for the year ended June 30, 1971. A copy of their report has been sent to the Governor of each state. Single copies are available on request.

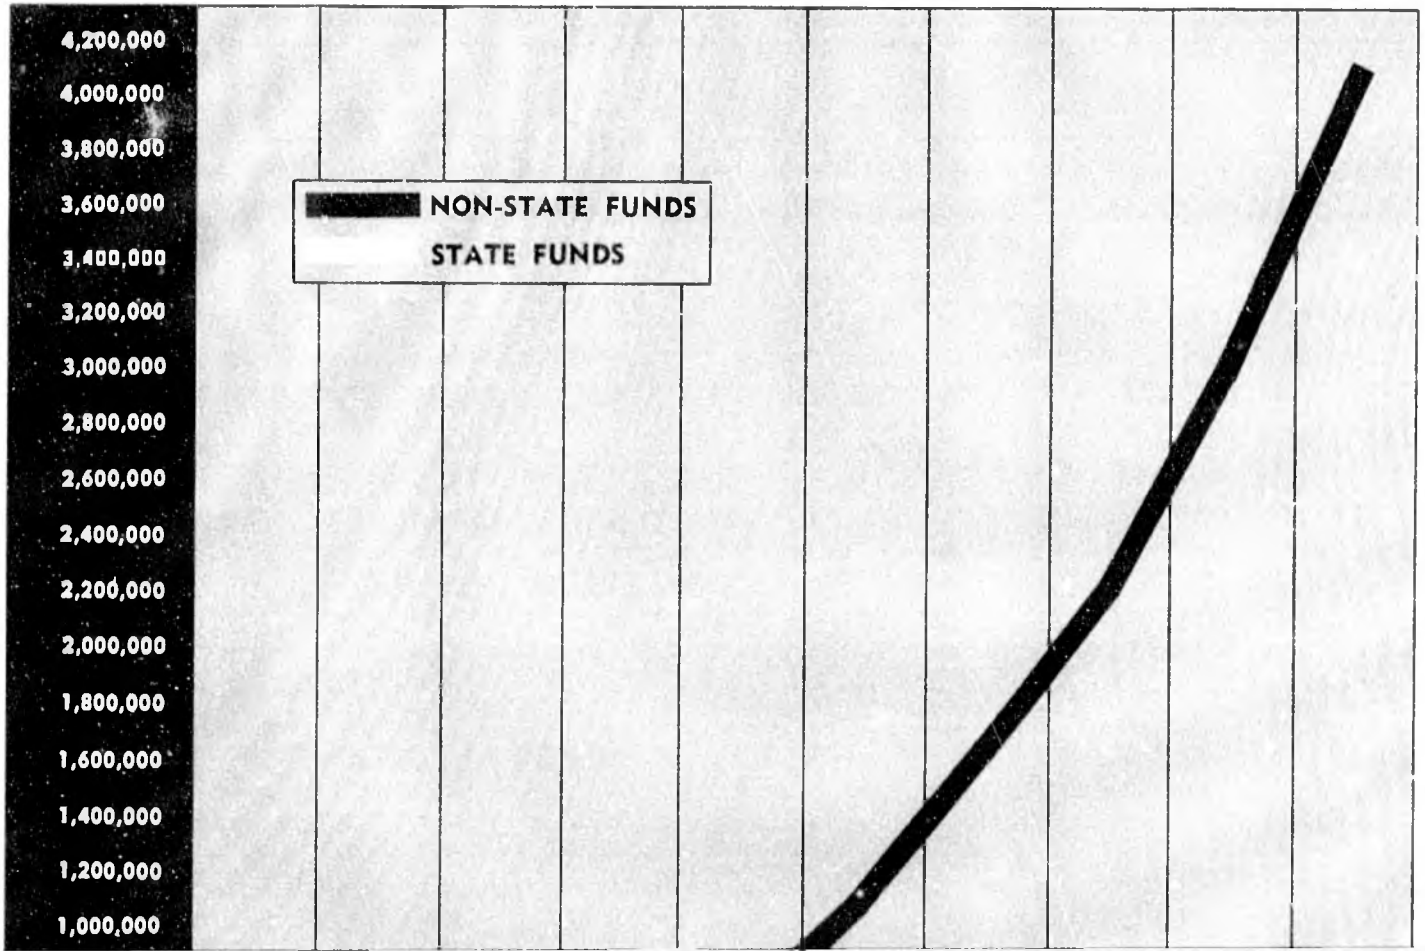
John C. Staley,
Administrative
Services Officer

10 Year Comparison of State and Non-State Funds, 1961-62, 1970-71

STATE FUNDS:
State appropriations, distributed in accordance with the year due. Does not include state funds paid to professional schools under the Student Exchange Program.

NON-STATE FUNDS:
Funds expended for special regional projects from grants from private foundations and public agencies outside the region.

YEAR	STATE FUNDS	NON-STATE FUNDS
61-62	130,000	364,111
62-63	130,000	492,095
63-64	195,000	582,278
64-65	195,000	598,546
65-66	202,500	683,668
66-67	217,500	1,156,366
67-68	255,000	1,618,063
68-69	270,000	2,230,661
69-70	285,000	3,134,973
70-71	285,000	4,134,390



publications

WICHE publications are available free, except where noted, while the supply lasts, from the Publications Unit, WICHE, P.O. Drawer P, Boulder, Co. 80302. Publications noted as out of print are obtainable through interlibrary loans from any of the depository libraries listed. A complete list of available publications is available from the WICHE Publications Unit.

I. GENERAL

WICHE ANNUAL REPORT 1970. A brief description of WICHE activities during 1970. (Out of Print.)

WICHE REPORTS ON HIGHER EDUCATION. A newsletter containing information about WICHE programs and articles of general interest on higher education. Copies of the last four issues are usually available.

THIS IS WICHE. A leaflet describing WICHE's activities and goals.

LEGISLATIVE DECISION MAKING IN HIGHER EDUCATION: HOW TO GET THE FACTS. The program for WICHE's Legislative Work Conference on Higher Education. (The proceedings of this conference will be available in March 1972.)

THE INSIDE . . . WICHE's bimonthly internal house organ.

II. REGIONAL PROGRAMS —GENERAL

COMMUNICATING NURSING RESEARCH: METHODOLOGICAL ISSUES IN RESEARCH. Marjorie V. Batey, editor.

ABOUT WCHEN. A revised edition of a pamphlet describing the history, organization, and programs of the Western Council on Higher Education for Nursing.

A DESCRIPTIVE APPROACH TO A COMMUNITY. A 60-minute videotape of a presentation by Dr. James Kent of the Foundation for Urban and Neighborhood Development during the summer sessions of the WICHE Nursing Curriculum Improvement Project. Available on either ½" Sony or 1" Ampex. Rental charge $5.00.

GUIDELINES FOR DEVELOPING CONTINUING EDUCATION PROGRAMS IN NURSING IN THE WEST. Prepared by the Western Council on Higher Education for Nursing.

COMMUNICATING NURSING RESEARCH: IS THE GAP BEING BRIDGED? Marjorie V. Batey, editor.

YOUR STATE CAN HELP YOU SECURE YOUR EDUCATION IN MEDICINE, DENTISTRY, DENTAL HYGIENE, OCCUPATIONAL THERAPY, OPTOMETRY, PHYSICAL THERAPY, VETERINARY MEDICINE. The informational brochure of WICHE's Student Exchange Program.

THE PUBLIC CHALLENGE AND THE CAMPUS RESPONSE. The announcement of the 13th Annual College and University Self-Study Institute. (The proceedings of this institute will be available in February 1972 at $3.50 per copy.)

THE MINORITY STUDENT ON THE CAMPUS: EXPECTATIONS AND POSSIBILITIES. Robert A. Altman and Patricia O. Snyder, editors. $3.50.

FRESHMAN AND TRANSFER VACANCIES IN WESTERN COLLEGES AND UNIVERSITIES — FALL, 1971. The report of a WICHE survey.

CREDIT BY EXAMINATION. Robert A. Altman, Carolyn M. Byerly, and J. Quentin Jones, editors.

MINERAL ENGINEERING STUDENT EXCHANGE PROGRAM. A folder describing this WICHE program and listing the participating states and cooperating institutions.

WICHE RESOURCES DEVELOPMENT INTERNSHIP PROGRAM. A folder describing this WICHE program.

RESOURCES DEVELOPMENT INTERNS' REPORTS. Each intern submits a report of the recommendations or results of his project. These reports, a partial list of which follows, are published in limited quantity and are distributed to selected agencies and interested individuals.

A METHODOLOGY FOR EVALUATING THE CALIFORNIA STATE LIBRARY SERVICE TO INDUSTRY, by Ellery Sorkin.

LAND USE CLASSIFICATION PROJECT, by Kent Mollohan.

SURVEY OF LAND USE TOOLS AND IMPLEMENTATION, by Craig Kirkwood.

MOBILE AND MODULAR HOME REGULATIONS, by Kathy Adams.

FUNDING FOR AIRPORT DEVELOPMENT, by Erick Sowell.

THE PUEBLO RESERVOIR AND PUEBLO WEST, by Gary Schillinger.

EMPLOYER TRAINING NEEDS AND THE DENVER CONCENTRATED EMPLOYMENT PROGRAM, by Martha Daly.

LAKEWOOD STREET RIGHT-OF-WAY REPORT, by N. Fraser Lambert.

INTERN PROGRAM PUBLIC RELATIONS, by Jennie Bourne.

INTERNSHIPS IN DRUG EDUCATION: A FEASIBILITY STUDY, by Lee Cheaney.

HOUSING REHABILITATION, by Daniel Cook.

LOCAL GOVERNMENT MODERNIZATION, by Robert Bellandi.

A SKILL CENTER FOR THE RENO/SPARKS AREA, by George Cotton.

STATE OF NEW MEXICO ECONOMIC DEVELOPMENT PROFILE, by Ralph Rounds.

BERNALILLO'S WATER AND SEWER SYSTEMS, by Keith Wegan.

CITY-COUNTY CONSOLIDATION, by Bruce Harder.

REVENUE ESTIMATING OF OREGON'S PERSONAL AND CORPORATE INCOME TAX, by Robert Lund.

TRANSPORTATION NEEDS IN CHEYENNE'S MODEL NEIGHBORHOODS, by Kathryn Krieger.

SOIL DATA FOR LAND-USE PLANNING, by Rex Burns.

MOUNTAIN GROWTH AND DEVELOPMENT—JEFFERSON COUNTY, by Elizabeth Losinski.

MONTANA COMMUNITY BETTERMENT CONTEST, by Randy Swartout.

A SURVEY OF RETAIL BUYING HABITS, by Howard Heinicke.

ALBUQUERQUE GOALS PROGRAM, by Robert M. Jones.

AQUACULTURAL POSSIBILITIES IN KEAUKAHA, by Frances Liu.

INFORMATIONAL NEEDS OF SMALL BUSINESSMEN IN THE CENTRAL BUSINESS DISTRICT OF HILO, HAWAII, by Lloyd Matsunami.

DENVER CONCENTRATED EMPLOYMENT PROGRAM SERVICE DELIVERY SYSTEM, by Daniel Kagan.

OREGON'S INTERNATIONAL TRADE, 1970, by William Beebe.

PUEBLO PLANS FOR THE FUTURE, by Dana Heuchemer.

NEW INDUSTRY AND CLARK COUNTY, by Jerald Powell.

COUNCILS OF GOVERNMENTS: WHICH WAY THE FUTURE?, by Bruce Harder.

PROPOSED TRAMWAY ANALYSIS FOR THE PORT OF CASCADE LOCKS, by Wilbur Conder, Larry McCallum, and Morton Michelsen.

HEALTH SCIENCES INFORMATION NETWORK. A folder prepared for the WICHE Mountain States Regional Medical Program, Wyoming.

WYOMING HEALTH PROFILE, UPDATED SUPPLEMENT. WICHE Mountain States Regional Medical Program, Wyoming.

CASSETTES FOR CARDIAC CARE. A folder prepared for the Coronary Care Training Program of the WICHE Mountain States Regional Medical Program, Montana.

ECG FUNDAMENTALS FOR THE DIAGNOSIS OF ARRHYTHMIAS. The announcement of two courses offered by the Coronary Care Training Program of the WICHE Mountain States Regional Medical Program, Montana.

CORONARY CARE TRAINING FOR PHYSICIANS—PHASE II. The announcement of two training courses offered by the Coronary Care Training Program of the WICHE Mountain States Regional Medical Program, Montana.

ECG MONITORING FOR THE ANESTHESIOLOGIST. The announcement of a three-day symposium offered by the Coronary Care Training Program of the Mountain States Regional Medical Program, Montana.

CORONARY CARE SKI WEEKEND. The announcement of a course offered by the Coronary Care Training Program of the WICHE Mountain States Regional Medical Program, Montana.

III. REGIONAL PROGRAMS—MENTAL HEALTH AND RELATED AREAS

IMPROVING MENTAL HEALTH SERVICES ON WESTERN CAMPUSES: SALARY DATA FOR CAMPUS MENTAL HEALTH PROFESSIONALS IN THE WEST, MONOGRAPH NO. 1. James H. Banning and Lu Anne Aulepp.

IMPROVING MENTAL HEALTH SERVICES ON WESTERN CAMPUSES: STAFFING PATTERNS OF CAMPUS MENTAL HEALTH FACILITIES IN THE WEST, MONOGRAPH NO. 2. James H. Banning and Lu Anne Aulepp.

IMPROVING MENTAL HEALTH SERVICES ON WESTERN CAMPUSES: PROGRAM ACTIVITIES AND STUDENT UTILIZATION OF CAMPUS MENTAL HEALTH FACILITIES IN THE WEST, MONOGRAPH NO. 3. James H. Banning and Lu Anne Aulepp.

CAMPUS COMMUNITY MENTAL HEALTH SERVICES. Lu Anne Aulepp, editor. A newsletter printed monthly during the academic year.

COMMUNITY COLLEGE MENTAL HEALTH WORKER PROGRAM. A folder describing this WICHE program.

SPECIAL EDUCATION FOR GENERAL EDUCATORS. A folder describing the objectives and methods of this WICHE program.

SUMMER WORK-STUDY PROGRAM IN MENTAL HEALTH AND RELATED AREAS. A folder describing the program and listing participating schools.

WESTERN GRADUATE PROGRAMS IN CLINICAL PSYCHOLOGY. The results of a survey performed by WICHE's Mental Health Manpower Office.

MENTAL HEALTH MANPOWER IN THE WEST. A general overview of mental health manpower characteristics presented by WICHE's Mental Health Manpower Office.

HAWAII MENTAL HEALTH MANPOWER STUDY 1970. John J. Blaylock. Published by WICHE's Mental Health Manpower Office.

COLORADO MENTAL HEALTH MANPOWER: AN EMPIRICAL STUDY. Robert B. Abelson. Published by WICHE's Mental Health Manpower Office.

COLORADO MENTAL RETARDATION MANPOWER: SURVEY OF THE DEPARTMENT OF INSTITUTIONS 1970. Robert J. Stephens, et al. Published by WICHE's Mental Health Manpower Office.

publications continued

WESTERN GRADUATE PROGRAMS IN SOCIAL WORK. The results of a survey performed by WICHE's Mental Health Manpower Office.

INTERDISCIPLINARY PROGRAMMING FOR INFANTS WITH KNOWN OR SUSPECTED CEREBRAL DYSFUNCTION, edited by Gene Hensley and Virginia W. Patterson. $1.00.

MENTAL RETARDATION MANPOWER IN THE WEST. A brief description of selected characteristics of 5,143 people working in state facilities for the mentally retarded in nine western states. Prepared by WICHE's Mental Health Manpower Office.

SELECTIVE MANPOWER DIMENSIONS IN THE CALIFORNIA DEPARTMENT OF MENTAL HYGIENE: A PRELIMINARY SURVEY. Marshall Fels. Published by WICHE's Mental Health Manpower Office.

A SURVEY AND STUDY 1969-1970. A survey and study of Idaho Mental Health workers performed jointly by the Idaho Division of Mental Health and WICHE's Mental Health Manpower Office.

MASTER'S DEGREE PSYCHOLOGISTS. The report of a conference co-sponsored by WICHE and the American Psychological Association.

ACCOUNTING GUIDELINES FOR MENTAL HEALTH CENTERS AND RELATED FACILITIES. Prepared by David L. Salsbery, CPA, and edited by Paul M. McCullough.

ELEVENTH ANNUAL TRAINING INSTITUTE FOR PSYCHIATRIST-TEACHERS OF PRACTICING PHYSICIANS 1971: INNOVATIVE STRATEGIES FOR CONTINUING EDUCATION AND THE PHYSICIAN'S EMOTIONAL WELL-BEING. Raymond Feldman, editor.

UNDERGRADUATE EDUCATION FOR REHABILITATION AND OTHER HELPING SERVICES. The final report of this WICHE program that operated from 1965 through June 1971. (Limited distribution.)

CORRECTIONS PROGRAM: A REGIONAL APPROACH TO TRAINING. A folder describing this WICHE program and its two projects.

REGIONAL INSTITUTE FOR CORRECTIONS, ADMINISTRATIVE STUDY. A folder describing the methods and objectives of a regional approach to management training in the justice system.

REGIONAL INSTITUTE FOR CORRECTIONS, ADMINISTRATIVE STUDY. A management training design and program guide. Bruce J. Martin, editor.

NATIONWIDE EDUCATION PROGRAMS IN CORRECTIONS. A folder describing the methods and objectives of this Corrections Program project.

PERSPECTIVES ON SOCIAL WORK EDUCATION IN THE 1970s. A report of a program in continuing education for deans and faculties of Graduate Schools of Social Work. Charles W. McCann, editor. (Limited distribution.)

IV. NATIONAL CENTER FOR HIGHER EDUCATION MANAGEMENT SYSTEMS

Most of the publications of this WICHE division are available on a fiscal year annual subscription. The publications marked with a single asterisk below are part of the 1970-71 subscription; those marked with a double asterisk are a part of the 1971-72 subscription. Single subscription, $15. Five subscriptions all mailed to the same address, $30. Ten subscriptions all mailed to the same address, $40. All publications listed below are available without subscription at the prices noted.

*INVENTORY OF EDUCATIONAL OUTCOMES AND ACTIVITIES, PRELIMINARY FIELD REVIEW EDITION, TECHNICAL REPORT 15. Robert A. Huff. $1.00.

THE RESOURCE REQUIREMENTS PREDICTION MODEL 1 (RRPM-1): AN OVERVIEW, TECHNICAL REPORT 16. Warren W. Gulko. (Out of Print.) (See Technical Reports 19-23 below.)

**NCHEMS Newsletter. A newsletter reporting technical and professional news about this WICHE division.

**HIGHER EDUCATION FACILITIES PLANNING AND MANAGEMENT MANUALS, TECHNICAL REPORTS 17-1 THROUGH 17-7. Harold L. Dahnke, et al. Manual 1, An Overview. Manual 2, Classroom and Class Laboratory Facilities. Manual 3, Office and Research Facilities. Manual 4, Academic Support Facilities. Manual 5, General Support Facilities. Manual 6, Program Planning and Analysis: The Basis for Institutional and Statewide Facilities Planning. Manual 7, Reference Guide. Sold as a set only. $7.50.

**HIGHER EDUCATION FACULTY AND STAFF ASSIGNMENT CLASSIFICATION MANUAL, PRELIMINARY DRAFT, TECHNICAL REPORT 18. W. John Minter. (Out of print.) The final edition of this publication under the title A MANUAL FOR MANPOWER ACCOUNTING IN HIGHER EDUCATION will be published and distributed by the National Center for

Educational Statistics, U.S. Office of Education, in 1972.

**HIGHER EDUCATION MANAGEMENT. A periodical designed to discuss issues related to higher education management.

DATA COMPARABILITY IN HIGHER EDUCATION. Ben Lawrence, et al. (Limited distribution.)

**A RESOURCE REQUIREMENTS PREDICTION MODEL (RRPM-1): AN INTRODUCTION TO THE MODEL, TECHNICAL REPORT 19. Warren W. Gulko and K. M. Hussain. $5.00 (See note under TECHNICAL REPORT 23.)

A RESOURCE REQUIREMENTS PREDICTION MODEL (RRPM-1): GUIDE FOR THE PROJECT MANAGER, TECHNICAL REPORT 20. K. M. Hussain. $5.00.

A RESOURCE REQUIREMENTS PREDICTION MODEL (RRPM-1): REPORT ON THE PILOT STUDIES, TECHNICAL REPORT 21. K. M. Hussain and James S. Martin, editors. $5.00.

A RESOURCE REQUIREMENTS PREDICTION MODEL (RRPM-1): INPUT SPECIFICATIONS, TECHNICAL REPORT 23. Michael J. Haight, et al. $5.00.

NOTE: RRPM-1 Packet 1 consists of two copies each of the four publications listed immediately above. The cost of Packet 1 is $30.00. When ordering please specify RRPM-1 Packet 1.

RRPM-1 Packet 2 consists of A RESOURCE REQUIREMENTS PREDICTION MODEL (RRPM-1) PROGRAMMER'S MANUAL, TECHNICAL REPORT 22, and a tape of RRPM-1 computer programs. The version of RRPM-1 released in December 1971 (RRPM-1.3) was the general model which was designed for large universities. Other specialized versions will become available as follows: Community College (RRPM-1.4), January 30, 1972. Four-year Public College (RRPM-1.5), March 1, 1972. Private College (RRPM-1.6), June 1, 1972. To order, please write or call for special RRPM-1 Packet 2 order blank covering complete tape specifications. $150.00.

**FACULTY ACTIVITY ANALYSIS: OVERVIEW AND MAJOR ISSUES, TECHNICAL REPORT 24. Leonard C. Romney. $1.00.

**STUDENT FLOW MODELS: A REVIEW AND CONCEPTUALIZATION, PRELIMINARY FIELD REVIEW EDITION, TECHNICAL REPORT 25. C. C. Lovell, $1.00.

STATEWIDE PLANNING FOR POSTSECONDARY EDUCATION: ISSUES AND DESIGN. Lyman A. Glenny and George B. Weathersby, editors. $3.50.

**COST FINDING PRINCIPLES AND PROCEDURES: PRELIMINARY FIELD REVIEW EDITION: TECHNICAL REPORT 26. Gordon Ziemer, et al. $2.00.

A RESOURCE ALLOCATION AND PLANNING MODEL FOR HIGHER EDUCATION. Robert A. Wallhaus. (Limited distribution.)

PROGRAM CLASSIFICATION STRUCTURE, PRELIMINARY DRAFT. Warren W. Gulko. (Limited distribution.)

GENERAL INSTITUTIONAL ASSISTANCE: A SCHEME THAT DEPENDS ON THE EDUCATIONAL EFFORTS OF THE STATES AND THE ATTENDANCE CHOICE OF STUDENTS. Wayne Kirschling and Rudy Postweiler. (Limited distribution.)

A SYNOPSIS OF A TECHNICAL PAPER ENTITLED GENERAL INSTITUTIONAL ASSISTANCE: A SCHEME THAT DEPENDS ON THE EDUCATIONAL EFFORTS OF THE STATES AND THE ATTENDANCE CHOICE OF STUDENTS. Wayne Kirschling and Rudy Postweiler. (Limited distribution.)

The WICHE staff is a unique cadre of highly trained individuals. These men and women are recognized experts in such fields as medicine, psychiatry, higher education management, nursing, and others. Furthermore, each has that special touch and technique, so necessary for the guidance of group action—an indispensable quality for interstate cooperation.

The 96 professional WICHE staffers are located in the central office in Boulder, Colorado, and in the five offices of the Regional Medical Program in Idaho, Montana, Nevada, and Wyoming.

These men and women are the implementors of WICHE programming.

In addition to the professional staff, special note should be taken of the dedicated and very able members of the WICHE supporting staff. They are the secretaries, clerks, typists, mailroom personnel, and others, who also lend their talents to improve interstate cooperation in the West.

WICHE: staff

As of January, 1972

ADMINISTRATION

Robert H. Kroepsch, Ed.D., Executive Director
Bob L. Brown, B.S., Personnel Director
Jean Davis, Administrative Assistant to the Executive Director

public and private granting agencies

In the past 16 years, WICHE has received grant and contract commitments totaling more than $24 million from public and private granting agencies for the support of a wide variety of regional programs which have contributed to the development of the 13 western states. Most of these agencies have made two or more grants to WICHE, thus underscoring a growing national interest in regional cooperation. In the last analysis, the people of the West are the ones who benefit from the investment of this risk capital, and on their behalf WICHE expresses appreciation to the organizations and agencies listed below.

Carnegie Corporation of New York
The Commonwealth Fund, New York
The Danforth Foundation, St. Louis, Mo.
Easter Seal Research Foundation, Chicago
ESSO Education Foundation, New York
Max C. Fleischmann Foundation, Reno, Nev.
The Ford Foundation, New York
The Grant Foundation, Inc., New York
National Science Foundation, Washington, D.C.
Jessie Smith Noyes Foundation, Inc., New York
United Cerebral Palsy Research and Educational Foundation, Inc., New York
W. K. Kellogg Foundation, Battle Creek, Mich.
U.S. Department of Commerce
Economic Development Administration
U.S. Department of Justice
Office of Law Enforcement Assistance
U.S. Department of Health, Education and Welfare
Office of Education
Office of Juvenile Delinquency and Youth Development
Public Health Service
Division of Chronic Diseases
Division of Community Health
Division of Nursing
Division of Regional Medical Programs
National Institute for Child Health and Human Development
National Institutes of Health
National Institute of Mental Health
Rehabilitation Services Administration

councils, committees, advisory groups

Each year, the annual report has listed the names of those westerners who have contributed to WICHE's cooperative efforts. Last year, 14 pages were devoted to this purpose.

In 1971, more westerners than ever were involved in WICHE's programming. But in the interest of economy —and with deep regret—this feature has been omitted from this publication.

We hope that the professional growth that has resulted from this involvement—together with the personal satisfaction of working with colleagues across state lines —will suffice in lieu of public recognition and acknowledgment.

Without the contributions of these hundreds of westerners who give of their time, energy and wisdom, there would be no WICHE. To them, the people of the West owe a huge debt of gratitude.

volgenau

ANYTIME RELEASE

Twenty-four Alaska students are now attending professional schools in other western states under a special low-tuition plan coordinated by the Western Interstate Commission for Higher Education (WICHE), according to Mrs. Donald Pruhs, of Fairbanks, one of the state's three WICHE commissioners.

The 24 students are pursuing professional studies in medicine, dentistry, occupational therapy, and optometry.

"Under the exchange program," said Mrs. Pruhs, "these western professional schools contract through WICHE to admit qualified students from states which have no professional schools in these fields.

"As a sending state, Alaska certifies that the student is an eligible resident. When he is accepted by a state university, he pays only the in-state tuition--the same rate paid by residents of that state. At private institutions, the student receives a substantial reduction in tuition fees. The state of Alaska then reimburses the school for the remainder of the educational expenses."

(Editors: See list of students by hometown, p. 2)

(more)

This year, 790 young westerners are pursuing their professional education as WICHE exchange students, which involves a transfer of more than $1.7 million among the 13 western states.

"The program benefits everyone involved--the students, the states, and the schools," stated Mrs. Pruhs.

"The student only pays in-state tuition," she said. "The states without certain professional schools are able to provide training for future doctors, dentists, veterinarians, and other professionals. And the schools get direct payments, which help cover the actual cost of educating an out-of-state student."

Mrs. Pruhs is Alaska's representative on the WICHE executive committee. Alaska's other commissioners are John S. Hellenthal, attorney, Anchorage; and Dr. William R. Wood, president, University of Alaska.

The Western Interstate Commission for Higher Education, which administers the Exchange Program, is a public agency supported by the 13 western states. Its primary responsibility is to help the states improve their higher education programs through regional cooperation.

Alaska Exchange Students

Optometry

Anchorage: Tom Roselius, Pacific University.

3. Fairbanks: Dennis A. Swarner, Pacific University.

Ketchikan: Michael P. Johansen, Pacific University.

(more)

Medicine

Aleknagik: Ernest L. Ford, Loma Linda University.

Anchorage: Robert W. Baird, Jr., University of Washington; Ronald C. Dobson, University of New Mexico; Alex Kutas, University of Oregon; John C. Mues, University of Washington; William H. Ragle, University of Colorado; Robert D. Wimmer, University of Arizona; and Wandal W. Winn, University of New Mexico.

Auke Bay: Joanne Wallington, University of California, San Francisco.

College: C. Dukeminier, University of Colorado.

Edgecumbe: Susan J. Salo, University of Washington.

Fairbanks: Robert W. Bundtzen, University of Washington; David R. Grube, University of Oregon; Kenneth C. Haycraft, University of Oregon; and Craig S. Schmidt, University of Oregon.

Juneau: Patrick Maloney, University of Washington.

Petersburg: Floyd Strand, University of North Carolina.

Dentistry

Anchorage: Brian L. Daniel, University of Washington; and William R. Sedwick, University of Washington.

Occupational Therapy

Anchorage: Betty Kenny, Colorado State University.

WHAT IS WICHE?

WICHE, the Western Interstate Commission for Higher Education, is a nonprofit agency created by the 13 western states. This Commission administers the Western Regional Education Compact, which is an agreement among the states to work cooperatively to improve educational programs and facilities. WICHE was formally established in 1951; program activity began in 1953.

GOVERNING BOARD Each state is represented on the governing board by three commissioners, appointed by the governor. These 39 men and women, who serve without pay, come from a broad variety of professions, including education, state government, medicine, law, business, and others.

FINANCES. Each member state appropriates $15,000 a year to finance WICHE's general activities. The western states also contribute an additional $7,500 to support WICHE's programming in mental health, mental retardation, education of the handicapped, and corrections. The majority of WICHE's 45 individual programs and projects are supported by foundation and public agency funds. For fiscal year 1971-72, these grant and contract funds provide approximately 17 dollars for each dollar given by the states.

WICHE's GOALS. •*Improve the quality of education beyond the high school* •Expand educational opportunities, including those in continuing education •*Coordinate and expand interstate and interinstitutional cooperative programs* •Help institutions of higher education improve both academic administration and institutional management •*Assist the education community in appraising and responding to the changing needs of the West* •Raise the public level of understanding of the role of higher education.

PROGRAM AND PHILOSOPHY. •WICHE serves as a fact-finding agency and a clearinghouse of information about higher education. It also makes basic studies of educational needs and resources. •*WICHE acts as a catalyst to help member states work out educational programs of mutual advantage.* •WICHE serves western states and institutions as an administrative and fiscal agent for carrying out interstate arrangements for educational services. •*WICHE works by building concensus; it has no control over the member states or individual institutions.*

Continued on inside back cover.

THIS IS WICHE

CURRENT PROGRAMS AND PURPOSES

GENERAL

1. **LEGISLATIVE WORK CONFERENCE**
   To strengthen understanding and communication among western legislators, public officials, and educators; to provide a forum for the discussion of critical problems in the 13 western states; and to gain insights which will assist the Commission and its staff in developing programs for interstate cooperation.

DIVISION OF GENERAL REGIONAL PROGRAMS

2. **STUDENT EXCHANGE PROGRAMS**
   To share the educational resources of the West by providing opportunities for professional education when the specialty is not offered within the boundaries of the sending state through a system of student exchanges implemented at cooperating schools. Student exchange models may or may not involve interstate exchange of money.

3. **SPECIAL HIGHER EDUCATION PROGRAMS**
   To identify pertinent problems confronting general higher education in the West; to explore alternative solutions to these problems in cooperation with the West's colleges and universities; to begin preliminary program development designed to meet identified needs of the region; and to operate on a continuing basis a small number of higher education programs which provide necessary services to the people of the West.

4. **MOUNTAIN STATES COMMUNITY COLLEGE CONSORTIUM**
   To enhance educational opportunities for students in community colleges in the four-state area of Idaho, Montana, Utah, and Wyoming. This will be achieved through interstate and interinstitutional cooperation and programming geared to the resolution of common problems that participating institutions share as small, geographically isolated, "developing institutions."

5. **ETHNIC PROGRAMS IN HIGHER EDUCATION**
   To expand minority group access to higher education and to improve the relevance of educational experiences for these students and their communities.

6. **WESTERN COUNCIL ON HIGHER EDUCATION FOR NURSING**
   To increase educational opportunities for students in nursing by developing programs in nursing education, based on sound educational principles; to identify and organize ways of coping with general nursing problems; and to improve care of patients by disseminating this knowledge throughout the western region.

7. **CONTINUING EDUCATION PROGRAM FOR NURSES**
   To improve the leadership skills of nurses in teaching, supervision, and administrative positions through a series of short conferences aimed toward improving patient care provided by agencies and institutions employing the participant nurses.

8. **NURSING RESEARCH CONFERENCES PROGRAM**
   Through an annual conference on nursing research, to share research findings, to receive and give stimulation for further research, and to facilitate the application of findings to patient care. Faculty are stimulated to use results of research in planning nursing school curricula.

9. **REGIONAL PROGRAM FOR NURSING RESEARCH AND DEVELOPMENT**
   To provide a three-year program of consultation and work clinics directed toward increasing skills of nurses who are undertaking research, particularly in the area of patient care and care delivery, and then assisting these nurses to develop research projects. The goal of the program is to increase the number and quality of nursing research projects in the West.

10. **IMPROVEMENT OF NURSING CURRICULA**
    To improve and revise curricula in western schools of nursing through integration of selected core concepts of nursing into associate degree, baccalaureate, and graduate programs; to provide information on and stimulate the use of additional innovations in the teaching-learning process.

11. **CONTINUING EDUCATION PROGRAM FOR PSYCHIATRIC NURSES**

To assist faculty in associate degree nursing programs to increase their content and skills in psychiatric mental health nursing; to increase the use of psychiatric mental health concepts throughout the nursing curriculum; and to increase the use of psychiatric mental health concepts by nurses in any health care setting.

12. **NURSE FACULTY DEVELOPMENT TO MEET MINORITY GROUP NEEDS**

To increase the numbers of minority group students who are recruited and complete nursing programs and to modify existing programs of nursing to include content which will increase the potential of their graduates to provide services relevant to the health needs of minority group communities. The project proposes to achieve these aims through a three-year regional faculty development program.

13. **CONTINUING EDUCATION PROGRAM FOR LIBRARY PERSONNEL**

To demonstrate and evaluate the effectiveness of a variety of continuing education methods, materials, and programs in preparing library personnel in all types of libraries and to effect positive change in the delivery of library services.

14. **MOUNTAIN STATES REGIONAL MEDICAL PROGRAMS**

To develop programs in response to major needs in the four states of Idaho, Montana, Nevada, and Wyoming for continuing education for health personnel and for facilities which will strengthen the capacity of physicians and other health professionals to treat heart disease, cancer, stroke, and related diseases.

Operational Programs

1. Core Operation
2. Coronary Care Training—Montana
3. Cancer Education and Treatment Center (Mountain States Tumor Institute)
4. Continuation Education for Health Professionals in Montana
5. Rocky Mountain Tumor Registry
6. Continuing Nursing Education—Nevada
7. Continuing Education in Inhalation Therapy for Physicians, Therapists, and Nurses
8. Consulting Team Approach to Continuing Education for Health Service Personnel in Rural Communities in Nevada
9. Continuing Nursing Education—Idaho
14. Coronary Care Training—Southwest Idaho
11. Continuation Education for Nursing—Wyoming
12. Continuation Education for Nursing—Montana

15. **RESOURCES DEVELOPMENT INTERNSHIP PROGRAM**

To promote the productive interchange of ideas between the academic community, including students,

and the participants in community organizations throughout the West, especially by means of the process of service-learning, by building bridges between educational institutions and community organizations, and by developing new and innovative supplementary projects.

DIVISION OF MENTAL HEALTH AND RELATED AREAS

16. **CONTINUING PSYCHIATRIC EDUCATION FOR PHYSICIANS PROGRAM**
To increase the supply of psychiatrist-teachers for nonpsychiatric physicians of the West, in areas remote from training institutions; to provide demonstration study opportunities for physicians practicing in these areas and to stimulate the development of ongoing training programs for them; and to provide liaison for the western region in this field.

17. **WESTERN CONFERENCE ON THE USES OF MENTAL HEALTH DATA**
To develop methods of training mental health statisticians, to develop new methods for effective collection and utilization of mental health data, and to develop a vehicle for communication and collaborative research among interested professionals in this field.

18. **COMMUNITY COLLEGE MENTAL HEALTH WORKER PROGRAM**
To develop community college educational programs in mental health in order to meet the manpower needs for service delivery in rural areas and to emphasize, particularly, the recruitment and training of Spanish-American and Indian students from rural areas.

19. **SPECIAL EDUCATION FOR GENERAL EDUCATORS**
To improve the understanding and capability of general educators—especially those already working in regular classrooms, in the inner city, and in geographically remote areas—in teaching exceptional children, by providing assistance to institutions and agencies in the 13 western states as they plan special training programs and special education programs for the delivery of services.

20. **IMPROVING MENTAL HEALTH SERVICES ON WESTERN CAMPUSES**
To assist four-year colleges and universities in the 13 western states to improve the organization and delivery of mental health related services throughout their campus communities.

21. **MENTAL HEALTH CONTINUING EDUCATION**
To help develop a collaborative field of continuing education for mental health personnel in the West, a field linked by mutual planning among leaders in university programs and treatment agencies and

characterized, eventually, by a variety of flexibly designed, short, intensive courses for members of the core professions in both urban and rural settings.

22. **DEANS AND FACULTY OF SCHOOLS OF SOCIAL WORK PROGRAM**
To involve the deans of the graduate schools of social work in the western states in a program of continuing education which provides for their own professional development and enables them to share in the development of opportunities for continuation of their faculties; and to provide support for a regional workshop program for graduate school faculty.

23. **CORRECTIONS PROGRAM**
To provide in-service training for juvenile and adult correctional personnel in eleven of the thirteen western states under two separately funded projects—Regional Institute for Corrections, Administrative Study; and Nationwide Educational Programs for Institutionalized Children.

NATIONAL CENTER FOR HIGHER EDUCATION MANAGEMENT SYSTEMS at WICHE

24. **PERSONNEL CLASSIFICATION MANUAL**
To provide standard categories for classifying and reporting employee activities typically associated with jobs and positions in colleges and universities.

25. **DATA ELEMENT DICTIONARY**
To establish uniform sets of definitions for the data to be used in the Center's program. Uniform data elements are the foundation for the development of compatible data bases in the participating institutions.

26. **PROGRAM CLASSIFICATION STRUCTURE**
To design a taxonomy of higher education programs that will serve as the framework for comparable data exchange and reporting, assist in program budgeting, and serve as the framework for the development of generalized analytical models.

27. **STUDENT FLOW MODEL**
To develop analytical models that will predict student enrollment and simulate student progression through postsecondary education at both the institution and state system level.

28. **FACULTY ACTIVITY ANALYSIS**
To develop standard procedures for analyzing faculty activities and to design techniques that may be used to assist in compatible exchange of the data.

29. **RESOURCE REQUIREMENT PREDICTION MODEL**
To develop simulation models to project resource requirements to aid institutional decision makers in the allocation of higher education resources.

30. **INFORMATION EXCHANGE PROCEDURES**
To define conventions regarding the manner in which institutional data may be aggregated and arrayed for interinstitutional comparison.

31. **COST FINDING PRINCIPLES**
To develop costing methodologies that will permit cost analysis of the various activities in higher education.

32. **HIGHER EDUCATION FINANCE MANUALS**
To describe procedures for translating institutional financial data into program structures designed to meet the particular needs of decision makers at the institutional, state, and national levels.

33. **FACILITIES INVENTORY AND CLASSIFICATION MANUAL**
To revise the federal *Higher Education Facilities Classification and Inventory Procedures Manual.*

34. **NATIONAL SEMINAR ON HIGHER EDUCATION MANAGEMENT**
To conduct a national seminar for the purpose of identifying issues fundamental to developing and implementing comprehensive state planning and management systems.

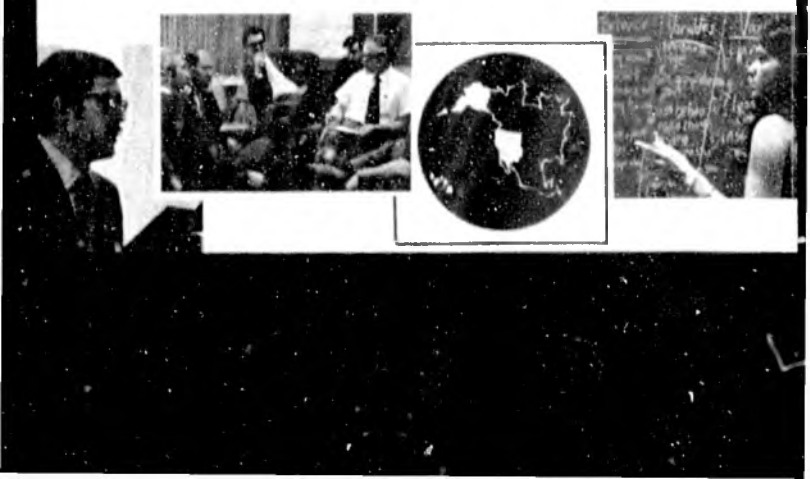
35. **GENERAL TRAINING**
To promote the adoption and implementation of new higher education management tools and techniques.

36. **TRAINING MATERIALS AND TECHNIQUES**
To develop a variety of training materials and techniques for use in providing instructional experiences that will ensure that the new management tools being developed under the Center's aegis will be fully understood by the higher education community.

37. **TRAINING NETWORK**
To meet the training needs of institutions and agencies throughout the country on the development and implementation of management technologies.

38. **CENTER PRODUCT WORKSHOPS**
To develop and conduct the Center product workshops to include details of specific Center products.

39. **VISITING PROFESSIONALS TRAINING PROGRAM**
To provide an opportunity for institutional or agency representatives to obtain a full understanding and working knowledge of NCHEMS develop-



mental work and to contribute in a meaningful fashion to some specific aspect of the Center's developmental work.

40. **A STUDY OF FEDERAL FINANCING PLANS FOR HIGHER EDUCATION**
Phase I: To evaluate and make recommendations for implementation relative to a specific federal general assistance plan for higher education. Phase II: To investigate systematically the financial needs of higher education and to develop and analyze alternative federal financing plans with the objective of making recommendations for implementing a plan or set of plans that best addresses the identified financial needs of higher education.

41. **STATEWIDE PLANNING SYSTEMS**
To conceptualize statewide planning systems that will result in design specifications for such additional programs as analysis of manpower trends, statewide planning and resource allocation models, and information systems for statewide planning.

42. **STUDENT FLOW**
To advance the state-of-the-art in student flow analysis by generalizing such concepts as student cohorts, transitions, state-of-the-system, and transition events to encompass a wide range of decision viewpoints of various decision makers. To investigate the stability and predictability of student flow in institutions in statewide systems.

43. **RESOURCE UTILIZATION ANALYSIS**
To develop techniques which will aid institutions in more efficient utilization of the resources available to them. This project is primarily directed to such operational or logistical functions of institutions as inventory management, work scheduling, space utilization, and course scheduling.

44. **OUTPUTS OF HIGHER EDUCATION**
To improve planning, evaluation, and decision making in higher education by developing quantitative measures and qualitative understandings of the outputs of education programs.

45. **RESOURCE ALLOCATION AND PLANNING MODELS**
To develop long-range improvements in the use and predictive capabilities of resource allocation and planning models. To develop techniques that facilitate the study of the resource implications of institutional output experiments and development of methodologies for studying feasible planning of alternatives.

SELECTED WICHE PUBLICATIONS

The following publications and a complete list of all available WICHE publications are available free, except where noted, from Publications Unit, WICHE, P.O Drawer P, Boulder, Colorado 80302

WICHE REPORTS ON HIGHER EDUCATION. A quarterly newsletter concerning WICHE program activities and allied subjects.

YOUR STATE CAN HELP YOU SECURE YOUR EDUCATION IN MEDICINE, DENTISTRY, DENTAL HYGIENE, OCCUPATIONAL THERAPY, OPTOMETRY, PHYSICAL THERAPY, VETERINARY MEDICINE. An informational brochure describing WICHE's Student Exchange Programs.

THE MINORITY STUDENT ON THE CAMPUS. R.A. Altman and P.O. Snyder, eds. $3.50.

THE PUBLIC CHALLENGE AND THE CAMPUS RESPONSE. R.A. Altman and C.M. Byerly, eds. $3.50. (Available Dec. 1, 1971)

CREDIT BY EXAMINATION. R.A. Altman and J.Q. Jones, eds. Proceedings from workshops cosponsored by WICHE and The College Entrance Examination Board.

COMMUNICATING NURSING RESEARCH: IS THE GAP BEING BRIDGED? M.V. Batey, ed.

ABOUT WCHEN. A brochure describing the goals, objectives, and methods of the Western Council on Higher Education for Nursing.

ELEVENTH ANNUAL TRAINING INSTITUTE FOR PSYCHIATRIST-TEACHERS OF PRACTICING PHYSICIANS 1971: INNOVATIVE STRATEGIES FOR CONTINUING EDUCATION: CONTINUING EDUCATION AND THE PHYSICIAN'S EMOTIONAL WELL-BEING. R.A. Feldman, ed.

ACCOUNTING GUIDELINES FOR MENTAL HEALTH CENTERS AND RELATED FACILITIES. Prepared by D.L. Salsbery in collaboration with the Cost Systems Task Force, Western Conference on the Uses of Mental Health Data. P.A. McCullough, ed.

HIGHER EDUCATION MANAGEMENT. A periodical designed to discuss issues related to the National Center for Higher Education Management Systems at WICHE.

STUDENT FLOW MODELS: A REVIEW AND CONCEPTUALIZATION. C.C. Lovell, $1.00

VALUE CHANGE AND POWER CONFLICT IN HIGHER EDUCATION. W.J. Minter and P.O. Snyder, eds.

INTERDISCIPLINARY PROGRAMMING FOR INFANTS WITH KNOWN OR SUSPECTED CEREBRAL DYSFUNCTION. G. Hensley and V.W. Patterson, eds. $1.00.

WHAT IS WICHE? Continued

DIVISIONS. WICHE is composed of three major divisions, which constitute the organizational framework for 45 separate programs and projects.

THE DIVISION OF GENERAL REGIONAL PROGRAMS. This division currently sponsors 14 programs, covering a wide range of activities in higher education. They include a student exchange program for western students in the health sciences, a four-state Regional Medical Program, a program development unit, continuing education and research projects in nursing, a program to increase access of ethnic-minorities to higher education and to improve educational relevance for these students, on-the-job internships for college students, and a continuing education program for library personnel.

THE DIVISION OF MENTAL HEALTH AND RELATED AREAS. This division, which now has eight programs, was formed in 1956 at the request of the Western Regional Conference of the Council of State Governments. Programs in this division include continuing education for mental health professionals and for physicians in the field of psychiatry; the development of mental health worker programs in community colleges; improving mental health services on western campuses; and continuing education for deans and faculties of social work schools, for correctional personnel, and for general educators in the area of special education for the handicapped.

NATIONAL CENTER FOR HIGHER EDUCATION MANAGEMENT SYSTEMS at WICHE. This division, established in 1969, has 23 separate programs and represents a national effort in higher education. NCHEMS aims to improve higher education management through the design, development, and implementation of planning and management systems at institutional, state, and national levels.

The WICHE states are:

Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming.

File: HCR #9

In recent years, the number of applicants to law school has risen much more rapidly than has the capacity of law schools to handle them.[1] It has become harder for all but the best qualified to get into particular law schools or, indeed, to get into law schools generally. In the fall of 1970, an American Bar Association survey showed that the country's law schools were essentially filled to capacity, with fewer than 1,000 first-year places unfilled because qualified students had not applied, and that there were no spaces at all at more than 90 percent of the law schools. Furthermore, the number of applications for fall 1971 admission rose at least 30 percent in law school capacity.

The increase, which is far in excess of projections based on student populations, is frustrating to both the applicants and the law schools. Up to a point, many schools welcome the chance to be more selective and get a more highly qualified student body, but by now an increasing number of schools are troubled by the number of fully qualfied applicants they must turn down. This is especially true in light of the opinion, widespread among legal educators and bar leaders, that the need of American society for people trained in the law is far from satisfied. Leaders of law schools and the bar are giving increased attention to the problem, but any long-range solution will come too late to help the 1972 or 1973 law school applicant.

[1]Twelve new law schools have been approved by the ABA since 1955, bringing the total to 140. First year students have increased from 8,700 to 17,000 during the same time period -- Digest of Educational Statistics, 1970.

Prelaw Handbook -- Association of American Law Schools and the Law School Admission Test Council.

January 27, 1972
2600 Northern Lights Boulevard
Anchorage, Alaska 99503

Gentlemen:

The purpose of this contact with you is to bring to your attention the plight of Alaskan students attempting to enter law school.

For varied reasons, law study has become extremely popular in the last two years. With an increasing number of applications, entrance requirements have stiffened significantly, especially for non-residents applying to state universities. Alaskan students fall into this category. The enclosed proposal includes what I consider to be the detrimental effects of this residency discrimination.

In the next few weeks I plan to outline three possible alternatives for remedial action. This factual presentation deals with unilateral action on your part. A second remedy will be sought through the logical vehicle, the Western Interstate Commission for Higher Education (WICHE; as Title 14, Chap. 40, Article 7) despite past opposition. A third alternative will examine the possibilities of legislative action including the feasibility of Alaska purchasing law school seats from Northwest schools.

Will you please consider this proposal and the forthcoming information with an eye towards development of a strong position on behalf of your profession.

Thank you for your attention.

Sincerely,

Martin D. Wells

A PROPOSAL

to the

ALASKA BAR ASSOCIATION

INASMUCH as it is the responsibility of the Citizenry of the State of Alaska to care for its offspring by offering the total amount of education as is possible, and

WHEREAS: Alaska does not have a law school at its state university, and

WHEREAS: 42 of 50 states offer preferential treatment to their state resident law candidates, and

WHEREAS: In the last two years, law school applications have increased 300% in many institutions, and

WHEREAS: Repercussions from this situation may include:

A. Alaskans being forced to study in schools far from the Northwest region, thus jeopardizing valuable contacts that are of prime importance during law school and upon returning to the state to practice law;

B. Alaskans being forced to borrow heavily to attend Outside private universities to the detriment and/or exclusion of other loan candidates;

C. Alaskans being forced to enter little-known, obscure schools, or four-year night schools to the possible detriment of their early careers;

D. The Alaska Bar's becoming inundated with attorneys from other states moving here to the possible detriment of the state due to their Outside orientation and perspective, and

WHEREAS: No reciprocal residency provisions now exist, as they have previously, that would alleviate the financial and proximity problems,

THEREFORE it is hereby proposed that the Alaska Bar Association take the following action:

A. IMMEDIATELY convey the interest of the Alaska Bar Association in its resident law school candidates by:

1. Sending letters to all law schools in the nation, with emphasis on the Northwest schools, urging them to accept qualified Alaskans in place of those non-resident applicants who have residency advantages in their home states,

2. Making this letter available to Alaskan students to include in their application material,

3. Properly publicizing this effort so its effectiveness will be maximized.

B. IMMEDIATELY seek the cooperation of the law schools in the Northwest in effecting an agreement allowing Alaskans to apply:

1. As in-state residents, or

2. On non-resident qualifications paying in-state tuition, or

3. On resident qualifications, paying out-of-state tuition,

in return for which the University of Alaska would allow students from those states to pursue graduate studies in Alaska under the same conditions.

C. ULTIMATELY urge the funding and establishment of a law school and legal center for the State of Alaska.

Submitted by

Martin D. Wells

I. INASMUCH as it is the responsibility of the Citizenry of the State of Alaska to care for its offspring by offering the total amount of education as is possible, and

II. WHEREAS: Alaska does not have a law school at its state university, and

III. WHEREAS: 42 of 50 states offer preferential treatment to their state resident law candidates, and

In Colorado:

> Based on the qualifications of all students granted regular admission to the Fall, 1971, entering class, it is not anticipated that applicants whose grade point averages or law School Admission Test scores are significantly below the following will be granted admission for the Fall, 1972. (Depending on the number of applications received and completed, higher qualifications may be required.)[2]

Resident		Non-Resident	
GPA	LSAT	GPA	LSAT
2.90	575	3.1	615

In Montana:

> Enrollment pressures are such that we can no longer accept applications for the University of Montana Law School from individuals who are not residents of Montana.[3]

In Idaho:

> The requirements for admission of resident students are somewhat lower than for non-residents wishing admission. We anticipate that residents will need around a 2.6 grade point average and a 560 LSAT score approximately, while non-resident applicants would need around a 3.00 grade point average and at least a 600 LSAT. It should be kept in mind, however, that these are only estimates at this time. Out of last year's entering freshman class there were 35 non-residents and 81 Idaho residents accepted.[4]

[4] Albert R. Menard, Jr., Dean, University of Idaho

III. Continued --

. In Oregon:

> In reply to your letter of December 30, 1971, we do not normally favor residents over non-residents for purposes of admission decisions. This policy is reflected in our tuition structure, where residents and non-residents pay the same amount. I should mention, however, that in cases where several applicants present the same prelegal credentials, our Committee on Admissions usually grants the admission to the resident of Oregon. But the majority of the decisions are not made on the basis of residency, but on prelegal record and other factors our Committee feels are important. [4]

In Maryland:

> In the admission decision preference is certainly given to those who are residents of Maryland. In fact, we expect that only about 15% of the 175 students who will be admitted into the class beginning in September, 1972, will be classified as non-residents. Preference is also shown to residents in regard to the award of certain categories of financial aid.[5]

LSAT Score	Percent Below	156,094 Tested 1966-69
750	99.6	
725	99	
700	97	Non-residents generally
675	95	required 600
650	91	
625	86	Residents generally
600	79	required 550
575	71	
550	62	Assuming a normal distri-
525	52	bution across the curve,
500	42	this means 21% qualify
475	33	as non-resident while the
450	25	top 38% can qualify as
425	18	residents.
400	13	
375	8	
350	5	
325	4	
300	2	
275	1	
250	0.8	

[4] Becky Anderson, Admissions Secretary, University of Oregon
[5] James Forsythe, Assistant to the Dean, University of Maryland

IV. WHEREAS: In the last two years, law school applications have increased 300% in many institutions, and

University of Oregon:

The number of applicants and the size of our entering class for the last three years has been: 1969: 655 applicants, 156 registered students; 1970: 656 applicants, 151 registered students; and 1971: 1905 applicants, 140 registered students. We have presently received more applications for the fall of 1972 than the level we were at at this time last year. Thus, it would appear admission competition will remain at least as high, and probably exceed, the competition level of last year. [6]

School	Applied/Accepted in 1971[7]
Boston Univ.	6,000/325
Catholic Univ.	2,000/189
Dickinson	1,300/140
Duke	2,000/140
Florida State	1,500/150
George Washington	4,000/400
Harvard	6,300/525
Stanford	3,800/155
U.C. Berkeley	5,500/275
U.C. Davis	1,367/157
Oregon	1,905/140
U. Pennsylvania	3,000/200

V. WHEREAS: Repercussions from this situation may include:

A. Alaskans being forced to study in schools far from the Northwest region, thus jeopardizing valuable contacts that are of prime importance during law school and upon returning to the state to practice law;

ALASKA COURT SYSTEM

PRESENT AND PROJECTED COURT FACILITIES PROGRAM

Status of Current Facilities Construction:

Major facilities financed and under planning and construction:

Anchorage
Ketchikan
Juneau

Fairbanks Court Space Requirements:

We have not included the city of Fairbanks within our court facilities program request due to the study and planning made by SUA, Inc. The SUA report indicates the urgency of the Court System for space both immediately and through 1985.

The report states that the existing building is not optimally designed for use as a court building, and every consideration should be given to providing a new court facility.

Recent legislation (Senate Bill No. 153) and opinions relating to the place of trial; and changing Rule 18, Rules of Criminal Procedure, now require that the superior court be brought to the bush areas as stated in AS 22.10.030, Sec. 3. It is the intent of this act to make the administration of justice more accessible to the people of rural areas of the state; it is the legislative intent that AS 22.10.140, providing for the temporary assignment of superior court judges anywhere in the state, be fully implemented. AS 22.10.030, Sec. 2 further states that in Sec. 1 of this act, AS 22.10.030(D) has the effect of changing Rule 18, Rules of Criminal Procedure, by requiring criminal prosecutions to be had not only in the judicial district in which the crime or offense was committed, but in the election district within that judicial district at a location convenient to the parties and witnesses.

The Alaska Court System in determining its capabilities of following legislative intent must submit a large three-year

capital improvements program in regard to both physical court facilities and upgrading of court libraries sufficient to take care of minimal superior court needs in the various election districts.

BUSH FACILITIES PROPOSAL

Major court facilities that each provide for Superior, District, and Magistrate Courts should be allocated a minimum of 12,00 square feet per building and are located as follows:

Location	Judicial District			Election District	
	Pro-posed	Pre-sent	Poss. Prop.	Will Be	Was
	FY 72/73				
Bethel	5	4	3	16	14
Barrow		2		21	17
Kotzebue		2		22	17
Sitka		1		4	3
	FY 73/74				
Kenai		3		12	10
Palmer		3		10	7
Seward		3		11	9
Wrangell		1		3	2

MAJOR COURT FACILITIES

12,000 sq. ft. space requirements for courts containing superior, district and magistrate operations. This building will require an architectural design.

Superior Court:

Courtroom - Jury Room	1,700 sq. ft.	
Offices - Judge, Secretary, In-court Deputy	650	
Clerical and Work Area	900	
Vault, Storage, Supply Areas	800	
Jury and Witness Assembly (Superior and District)	700	
Administrative and Family Court Requirements	600	
		5,350 sq. ft.

District and Magistrate Court:

Courtroom - Jury Room (Hearing Room)	1,500 sq. ft.	
Offices - Judge, Secretary, In-court Deputy	650	
Clerical and Recording Work Areas	1,200	
Vault, Storage, Supply Areas	800	
Witness Assembly	400	
Magistrate Office	250	
		4,800 sq. ft.

General Court Needs:

Public Law Library (Law Clerk)	1,200 sq. ft.	
Prisoner Holding	400	
Rest Rooms	800	
		2,400 sq. ft.
Direct Court Total		12,550 sq. ft.

MAJOR COURT FACILITIES

Space should be considered for ancillary court agencies as follows:

1.	District Attorney and Staff	600 sq. ft.
2.	Public Defender	600
3.	Parole - Probation	800
4.	Alaska Legal Services (OEO Funded)	300
		2,300

Court request does not include space requirements for mechanical, electrical, telephone, and janitorial needs as this will vary by facility and it is assumed that court space will most probably be joined to other State Building needs and be accomplished in overall planning.

BUSH FACILITIES PROPOSAL

To enable the Court System to hold Superior Court trials in every election district, it is essential that a plan for a building of 5,800 square feet be provided with a construction schedule as follows:

Location	Judicial District			Election District	
	Proposed	Present	Poss. Prop.	Will Be	Was
	FY 72/73				
Cold Bay		3		14	12
Dillingham		3		15	13

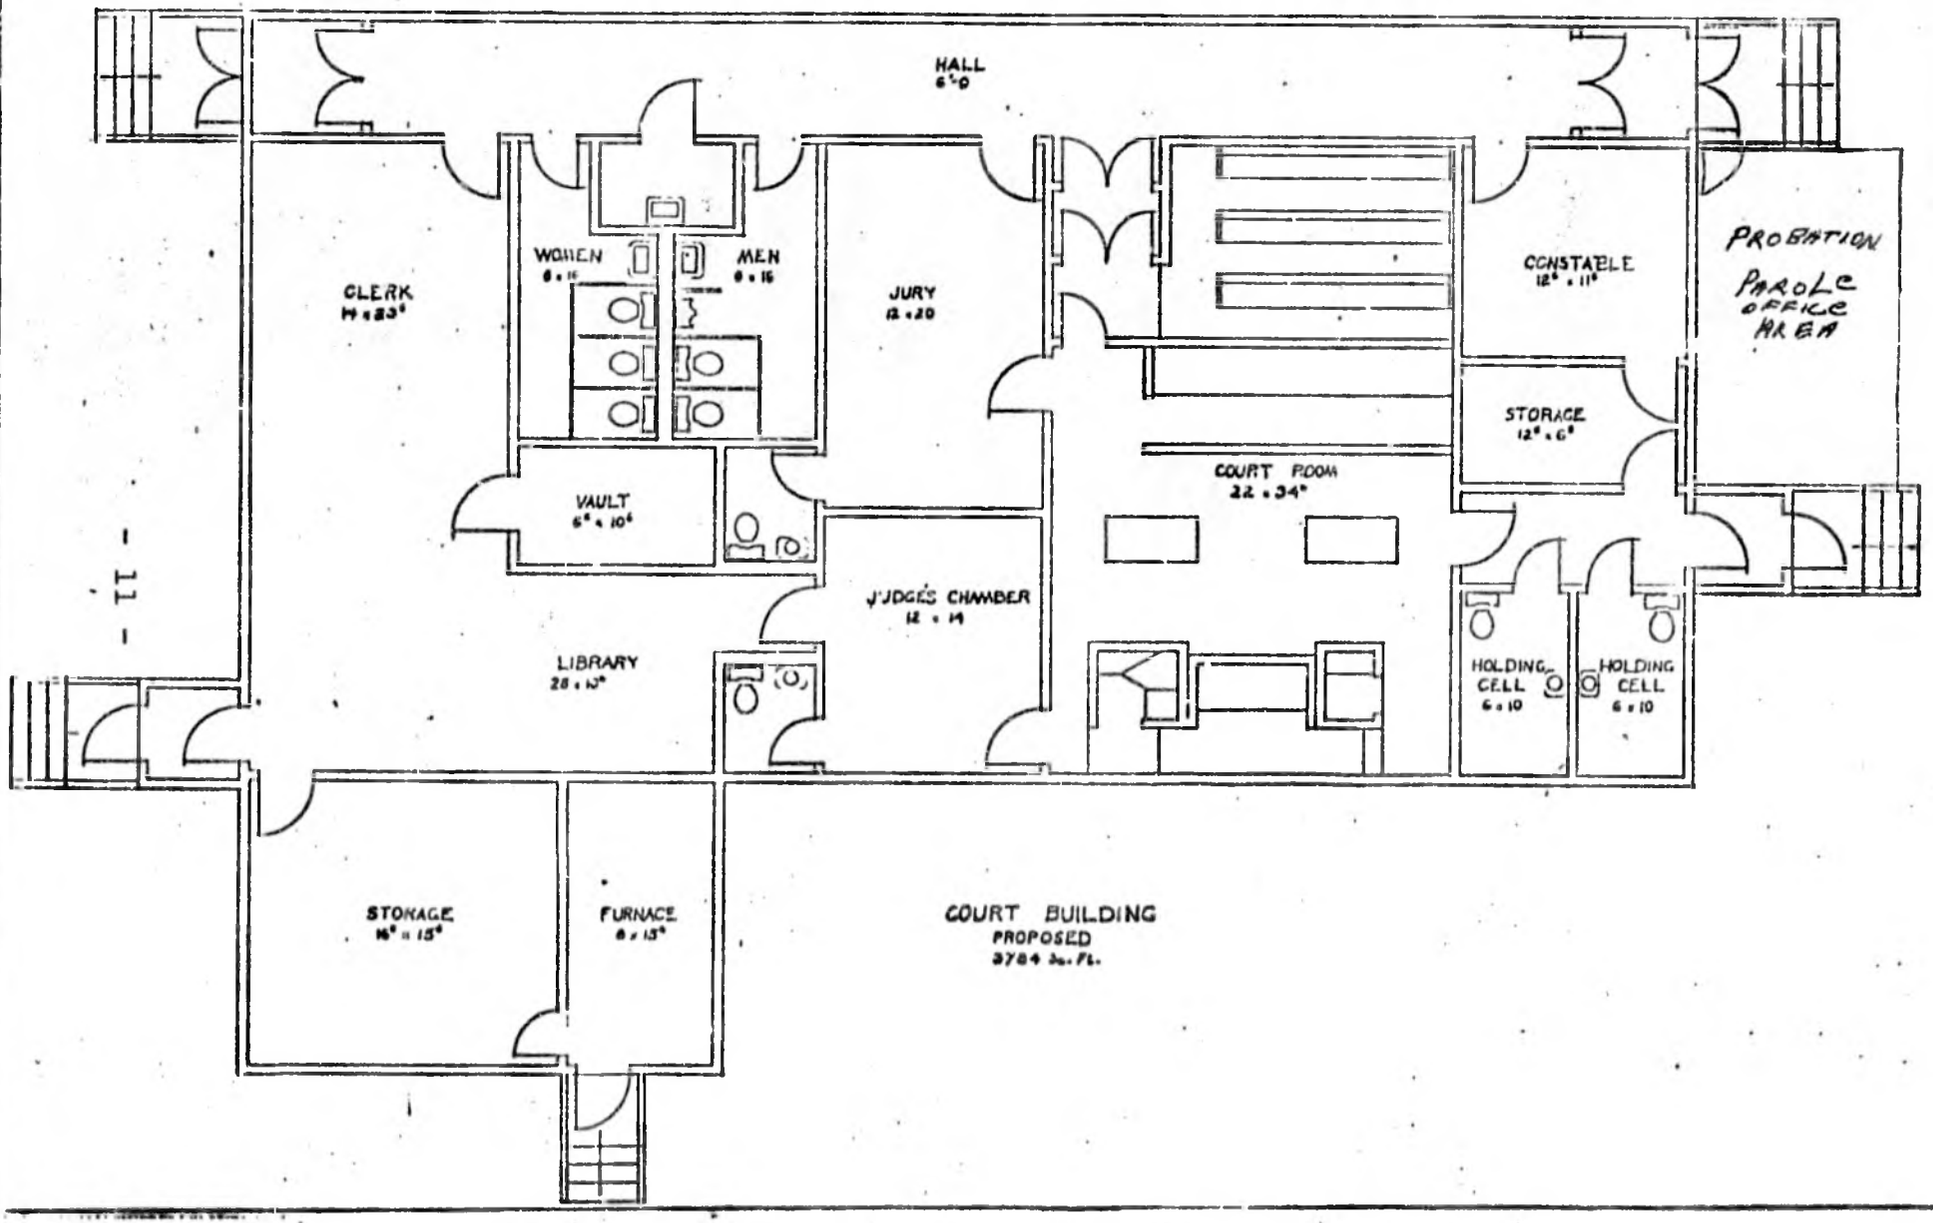
Suggested Floor Plan for 3,800 square foot Bush Justice Facilities



NOMENCLATURE

The population information was extracted from the 1970 U. S. Census Second Count reports, "Summary of Race and Housing for Places within Alaska," "Housing Totals for Places in Alaska" and "Preliminary 1970 Census Counts of American Indians and Alaska Natives." The form of government and borough in which the community is located is also indicated. There are 10 organized boroughs in Alaska, and the rest of the state is classified as "unorganized borough," with governmental responsibility vested in the state legislature. Local governments are classified as one of five types of cities under Alaska law and also "traditional villages," IRA rule, which are cities of the first class with charters adopted by local referendum, and the four classes specified by state enabling legislation. The first, second, third and fourth class cities are all incorporated under Alaska law, with rights and powers as prescribed, while the "traditional villages" are not incorporated. They are governed by tribal councils chosen by the villages with the authority granted by the villagers themselves. IRA villages are those incorporated under the federal Indian Reorganization Act, but not under state law. They have substantially the same status as traditional villages, but are somewhat more formalized. One last classification used in this report is "unincorporated," which denotes a community with no functioning government at all. In many cases the borough in which they are located provides government services as needed, or the population may be so small as to make local organization unnecessary.

The power section is admittedly not complete. Alaska Village Electric Cooperative (AVEC) has energized 33 villages and will serve 11 more this year. But information is sketchy on other electric utility service in the remote areas. There are privately operated generators, or village-owned facilities and service by tie-line from the urban utilities. And, of course, many places still have no power at all.

In the transportation facilities section an attempt is made to give a picture of each community's situation. Those on the highway system are identified, as these communities are different in many ways from the remote communities. The "roads" item shows local road mileage where known, or the fact that the village has a local road system. It can be assumed that most local roads are unpaved.

NOMENCLATURE

More communities are served by airport than by highway. The airports are very important to the life and economy of these places, and airstrip characteristics are given in some detail. The code meanings related to airstrips are as follows:

D - dirt or turf runway
G - gravel runway
H - hard-surface runway
S - seaplane landing area available

The runway designation is followed by a number indicating the length in hundreds of feet, and this is followed by the letter "L" if the strip is lighted. For example, H50L would mean a lighted hard-surfaced runway 5,000 feet long. If the airport has fuel available for aircraft, this is shown by "F". Scheduled airline service is shown by "AC" followed by a number indicating the number of days per week, and "J" indicating jet fuel is available. If "I" is shown, it means the field has navigation facilities and is equipped for instrument approach.

Major court facilities that each provide for Superior, District, and Magistrate courts should be allocated a minimum of 12,000 square feet per building and are located as follows:

	(1) Location	House Election District ** Will Was	(1) Population 1970	(2) % Native Population	(3) Form of Government	(4) Judge: Superior, District or Magistrate	(5) Village or City Police	(6) St. Trooper / St. Paid Village Police	(7) Transportation Road + Water	(8) Airport By Type	(9) Electric Power	(10) School By Type + Grades	(11) Military	(12) Public Library / Jail	(13) Communications

MAJOR COURT FACILITIES

PRESENT SPACE AND PRESENT DEFICIENCIES

FY 1972/73

Bethel:

Located in the Fourth Judicial District - court presided over by District Court Judge, Nora Guinn.

Current Space - ASHA - The court has 1,654 sq. ft. of space in the Bethel State Building shared with other state agencies.

Deficiencies of present space:

1. Courtroom too small - inadequate jury area;
2. No space for a judge's office or secretarial or in-court deputy work area;
3. No private room for conference purposes;
4. No vault or storage areas;
5. Inadequate clerical work area and the general public must wait in the open hall;
6. Unsatisfactory reference library both as to content and space provision;
7. No jury or witness assembly areas;
8. No provision for a reading section;
9. No space provided for ancillary court agencies.

Barrow:

Located in the Second Judicial District - court presided over by full-time Magistrate, Sadie Neakok.

Current Space - Up until January 25, 1972 Magistrate Neakok held court and operated from her home. As of January 25 we have rented 324 sq. ft. of office space in the post office building.

Projected Space Programs - The Court System joined in the planning for an ASHA combined state facility. Funds were appropriated for construction last year. All development was held in abeyance subject to possible inclusion of state agencies along with the City of Barrow in a federally funded airport facility, the Barror Terminal Corporation.

MAJOR COURT FACILITIES

PRESENT SPACE AND PRESENT DEFICIENCIES

FY 1972/73

Deficiencies of present space:

1. No courtroom or jury space;
2. Inadequate court facilities for clerical work area and no space for recording functions;
3. Unsatisfactory reference library both as to content and space provision;
4. No space for ancillary court agencies.

Kotzebue:

Located in the Second Judicial District - court presided over by Magistrate, Fletcher Gregg.

Current Space - Court is presently being held at the magistrate's home. By March 15, 1972 we will have two small offices comprising 360 sq. ft. total, located in the police building, for Magistrate Gregg.

Projected Space Program - The Court System joined in the planning for an ASHA combined state facility. Funds were appropriated by the legislature last year. However, this space is not adequate under present and future court needs.

Deficiencies of present space:

1. No courtroom or jury space;
2. Inadequate court facilities for clerical work area and no space for recording functions;
3. Unsatisfactory reference library both as to content and space provision;
4. No space for ancillary court agencies.

Sitka:

Located in the First Judicial District. Court System judicial officers:

MAJOR COURT FACILITIES

PRESENT SPACE AND PRESENT DEFICIENCIES

FY 1972/73

1. Superior Court Judge, Victor Carlson;
2. District Court Judge, Roger DuBrock;
3. Magistrate, Ernest W. Hillman.

Current Space - Court facilities are comprised of 4,686 sq. ft. leased from C & R Builders, other state agencies have space in this building.

Deficiencies of present space:

1. No superior courtroom or jury space;
2. Inadequate space for superior court support staff and all related court functions;
3. No vault or storage areas;
4. District court has insufficient space for the recording section;
5. Unsatisfactory reference library;
6. Need improved jury and witness assembly areas;
7. More space is required for ancillary court agencies;
8. Additional rest rooms and mechanical facilities are desperately needed;
9. Present parking space unsatisfactory.

MAJOR COURT FACILITIES

PRESENT SPACE AND PRESENT DEFICIENCIES

FY 1973/74

Kenai:

Located in the Third Judicial District. Court System judicial officers:

1. Superior Court Judge, James Hansen;
2. Magistrate, Jess Nicholas, Jr.

Current Space - Court facilities are comprised of 3,310 sq. ft. leased from Reliable Builders.

Deficiencies of present space:

1. Additional courtroom (hearing room) and jury space required;
2. Inadequate space for superior court support staff and related court functions;
3. No vault or storage areas;
4. Magistrate court has insufficient clerical working area as well as a need for recording space;
5. Need additional jury and witness assembly areas;
6. Require a prisoner holding facility;
7. Unsatisfactory reference library both as to content and space;
8. More space required for ancillary court agencies;
9. Additional parking space required.

Palmer:

Located in the Third Judicial District. Court presided over by Magistrate, Dorothy B. Saxton.

Current Space - Court facilities are comprised of 900 sq. ft. leased from the American Legion in Palmer.

Deficiencies of present space:

1. Additional courtroom and jury space is required;
2. Inadequate vault and storage areas;
3. Magistrate court has insufficient clerical working area as well as a need for recording space.

4. Need jury and witness assembly areas;
5. No prisoner holding facility;
6. Unsatisfactory reference library both as to content and space;
7. No space for ancillary court agencies;
8. Parking space required.

Seward:

Located in the Third Judicial District. Court presided over by Magistrate, Genevieve Schaefermeyer.

Current Space - Court facilities are comprised of 833 sq. ft. of space in the Seward State Court Building and City Hall. Other state agencies have 5,139 sq. ft. of space.

Deficiencies of present space:

1. Additional courtroom and jury space is required;
2. Inadequate vault and storage areas;
3. Magistrate court has insufficient clerical working area as well as a need for recording space;
4. Need jury and witness assembly areas;
5. No prisoner holding facility;
6. Unsatisfactory reference library both as to content and space;
7. No space for ancillary court agencies;
8. Parking space required.

Wrangell:

Located in the First Judicial District. Court System judicial officers:

1. District Court Judge, Harris Bullerwell;
2. Magistrate, Joel Wing.

MAJOR COURT FACILITIES

PRESENT SPACE AND PRESENT DEFICIENCIES

FY 1973/74

Current Space - Court facilities are comprised of 511 sq. ft. of space leased from GSA. This space is located in the Post Office Building in Wrangell.

Deficiencies of present space:

1. Inadequate space for superior courtroom use and has no jury facilities;
2. Inadequate vault and storage areas;
3. Magistrate court has insufficient clerical working area as well as a need for recording space;
4. Need jury and witness assembly areas;
5. No prisoner holding facility;
6. Unsatisfactory reference library both as to content and space;
7. No space for ancillary court agencies;
8. Parking space required.

BUSH FACILITIES PROPOSAL

12,000 sq. ft. buildings, each providing for Superior, District, and Magistrate Courts. Estimated cost per building by location and year.

FY 72/73

Bethel:

Anchorage cost 62.98 + 20% + 6% + 6% = $84.92 sq. ft.*

2 floors	12,000 x 84.92 =	$ 1,019,040
foundation	6,000 x 42.46 =	254,760
	Total	$ 1,273,800

Barrow:

Anchorage cost 62.98 + 50% + 6% + 6% = $106.15 sq. ft.*

2 floors	12,000 x 106.15 =	$ 1,273,800
foundation	6,000 x 53.08 =	318,480
	Total	$ 1,592,280

Kotzebue:

Anchorage cost 62.98 + 30% + 6% + 6% = $92.09 sq. ft.*

IT IS OUR UNDERSTANDING THAT THE STATE AND FEDERAL GOVERNMENTS HAVE SPECIFIC RESPONSIBILITIES UNDER SEVERE TIME SCHEDULES AS DESIGNATED IN THE WATER QUALITY ACT.

No. 6

Form SA 1

SB-1

MEMORANDUM State of Alaska

TO: The Honorable William J. Moran
State House of Representatives

DATE : April 26, 1971

FROM: Robert P. Isaac RPI
Assistant to the Commissioner
Department of Education

SUBJECT: Re CSSB 1

In regard to CSSB 1, it would appear that paragraph 3, Sec. 18.65.220 pertaining to curriculum development would be in conflict with 14.40.170 (b) (2) relating to the course of instruction for the university.

Perhaps a better approach would be: "The Board of Regents, in cooperation with the Police Standards Council, shall establish minimum curriculum standards . . ." This would avoid the conflict and yet permit the Council to have considerable input.

Michigan State University has one of the most widely acclaimed police education programs. Perhaps the Legislative Council could determine who establishes their curriculum, etc.

In our opinion there is no question that various agencies and organizations have a lot to offer in curriculum development; and, generally, those involved in curriculum development will seek their assistance. However, it is a well accepted principle that responsibility for curriculum development should be with the educational agency.

SB-28

STATE OF ALASKA

WILLIAM A. EGAN, GOVERNOR

DEPARTMENT OF LAW

OFFICE OF THE ATTORNEY GENERAL / POUCH K — STATE CAPITOL
JUNEAU 99801

February 8, 1972

Alaska State Legislature
House
Judiciary Committee
Pouch V
Juneau, Alaska

Re: Senate Bill No. 28 (Violent Crimes Compensation Board)

Dear Chairman Moran:

In response to your request of January 24, 1972, I will submit the information available from our records on this subject.

During the last nine months of 1971, the District Attorneys within the Department of Law processed the files of 444 defendants who were charged with crimes listed in Senate Bill No. 28.

Since our records only reflect those cases where an arrest was made it may not be a very meaningful statistic in the overall picture. I have spoken with the Commissioner of Public Safety and I believe that their report will be much more informative to the Committee because it will contain information on cases where no arrest was made.

If I may be of further service in this matter please advise.

Sincerely,

Norman C. Gorsuch
Deputy Attorney General

NCG:ss

SB-28

STATE OF ALASKA

WILLIAM A. EGAN, GOVERNOR

DEPARTMENT OF PUBLIC SAFETY

OFFICE OF THE COMMISSIONER

POUCH N — STATE CAPITOL
JUNEAU 99801

February 4, 1972

Representative William J. Moran
Chairman, Judiciary Committee
Alaska State Legislature
Pouch V - State Capitol
Juneau, Alaska 99801

Reference: Senate Bill 28

Dear Representative Moran:

We have compiled such information as is available concerning victims of violent crimes during 1971, 1970 and 1969. Because precise data that we need was not available we have made interpolations based upon the best information we could draw from.

Assignment of cost figures to these interpolations is even more difficult because there are absolutely no reported data of that nature. To arrive at possible costs we allowed the maximum $10,000 for a death and projected injuries at $2,200, which is a figure used for injury cost by the National Safety Council in accident loss computations.

We find by these imprecise means that the cost of compensation during calendar 1971 might have been $390,800.

Our 1970 figures were based upon the FBI Uniform Crime Report for 1970. These statistics indicated a possible cost of $317,600.

The 1969 Uniform Crime Report statistics would indicate a possible cost of $231,400.

I have enclosed the base data from which we arrived at these costs and hope that this may be of some use to you.

Very truly yours,

Emery W. Chapple, Jr.
Commissioner

Enclosures

FOLLOWING DATA PREPARED FOR USE IN CONSIDERATION OF SENATE BILL 28, COMPENSATION FOR VICTIMS OF VIOLENT CRIMES

ALASKA STATE TROOPER CASES ONLY - 1971

11	20 HOMICIDES: (50% of total)	9 fall within the four items listed under Section 44.58.110 (b).
2	20 MANSLAUGHTER: (10% of total)	18 fall within the four items listed under Section 44.58.110 (b).
	54 RAPES (Reported): (6% of total)	12 of which were unfounded. It is unknown how many of remaining 22 fall within the four items listed under Section 44.58.110 (b), however, it is felt very few if any. Depending upon interpretation of "personal injury" it is unlikely more than two would be compensational under SB 28.
	12 ATTEMPTED RAPES — 0 —	1 of which was unfounded. Remaining 11 as above.
	193 ASSAULTS WITH DEADLY WEAPON 10% of total	Which includes assault with intent to kill, maim, etc. Appears only ten to fifteen percent would be eligible for compensation. In most instances there either was no "personal injury"; relative involved; or person assaulted involved in criminal offense.
	142 SEX OFFENSES (Reported): - 0 -	This includes indecent acts with children; statutory rape; incest; lewd, indecent or obscene acts; crime against nature, etc. Again depending on interpretation of "personal injury", few (if any) would fall within category eligible for compensation.

CITY POLICE - 1971 (9 MAJOR POLICE DEPARTMENTS)

22	HOMICIDES	
4	MANSLAUGHTER	
71	RAPES	Breakdown as given above on AST cases not available from any of the city police departments.
10	ATTEMPTED RAPES	
385	ASSAULTS WITH DEADLY WEAPON	
255	SEX OFFENSES	

FOLLOWING DATA PREPARED FOR USE IN CONSIDERATION OF SENATE BILL 28,
COMPENSATION FOR VICTIMS OF VIOLENT CRIMES

ALASKA STATE TROOPER CASES ONLY - 1971

20	HOMICIDES:	9 fall within the four items listed under Section 44.58.110 (b).
20	MANSLAUGHTER:	18 fall within the four items listed under Section 44.58.110 (b).
34	RAPES (Reported):	12 of which were unfounded. It is unknown how many of remaining 22 fall within the four items listed under Section 44.58.110 (b), however, it is felt very few if any. Depending upon interpretation of "personal injury" it is unlikely more than two would be compensational under SB 28.
12	ATTEMPTED RAPES	1 of which was unfounded. Remaining 11 as above.
193	ASSAULTS WITH DEADLY WEAPON	Which includes assault with intent to kill, maim, etc. Appears only ten to fifteen percent would be eligible for compensation. In most instances there either was no "personal injury"; relative involved; or person assaulted involved in criminal offense.
142	SEX OFFENSES (Reported):	This includes indecent acts with children; statutory rape; incest; lewd, indecent or obscene acts; crime against nature, etc. Again depending on interpretation of "personal injury", few (if any) would fall within category eligible for compensation.

CITY POLICE - 1971 (9 MAJOR POLICE DEPARTMENTS)

22	HOMICIDES	
4	MANSLAUGHTER	
71	RAPES	Breakdown as given above on AST cases not
10	ATTEMPTED RAPES	available from any of the city police
385	ASSAULTS WITH DEADLY WEAPON	departments.
235	SEX OFFENSES	

ALASKA STATE TROOPERS CASES ONLY - 1969

14 HOMICIDES: 9 fall within the four items listed under Section 44.58.110 (b)

8 MANSLAUGHTER: All fall within the four items listed under Section 44.58.110 (b)

1 KIDNAPPING

50 RAPES Reported: 17 of which were unfounded. It is unknown how many of remaining 33 fall within the four items listed under Section 44.58.110 (b), however, it is felt very few if any.

10 ATTEMPTED RAPES: 3 of which were unfounded. Remaining 7 same as above.

116 ASSAULTS WITH A DEADLY WEAPON: Statistics not available to indicate how many would fall within items listed under Section 44.58.110 (b).

189 SEX OFFENSES reported: This includes indecent acts with children, statutory rape, incest, lewd, Indecent or obscene acts, crime against nature, etc. Appears only 26 victims may possibly be eligible for compensation under requirements set forth in SB

JUNEAU CITY POLICE DEPARTMENT

SB-28

Some States Aid Victims of Crime

EDITOR'S NOTE—There has long been a clamor for society to compensate victims of crime. Seven states now have laws providing compensation to victims of crime or persons injured in aiding victims of crime, and with federal government backing, there may be more on the books soon. A report on the situation:

By LOUISE COOK
Associated Press Writer

Donna M. Morrissey, a young registered nurse, was shot in the left shoulder by an unknown assailant as she got out of a car at a Boston skating rink Dec. 23, 1970.

While Donna was recovering, her father told her about a Massachusetts law which, under certain conditions, provides monetary compensation for victims of a criminal act.

On March 22, 1971, Donna filed a claim for compensation and after a June 14 hearing, the 25-year-old nurse was awarded $765.20. Three months later, Donna received her money.

Massachusetts is one of six states in the nation with laws compensating victims of crime. A seventh, Nevada, compensates persons injured in aiding the victims of crime.

A bipartisan group of legislators hopes to encourage other states to enact similar laws and, as a stimulus, is preparing a bill for Senate action under which the federal government would pay 75 per cent of the costs of compensation programs established by the states in accordance with federal standards.

Arguments in favor of such legislation include:

William Brown, attorney general of Ohio: "We do everything we can to rehabilitate the criminal, so it's only fair that we help the victim."

Robert Morris, University of Chicago Law School professor, who helped draft a crime compensation bill pending in Illinois:

"It's an extraordinary community which says help your neighbor, but the hell with it if you get hurt."

In addition to Massachusetts, the states already with such victims-of-crime compensation laws are New York, New Jersey, California, Hawaii and Maryland.

The Massachusetts law is fairly typical of the compensation statutes, although the different states have different maximum awards.

It allows the filing of claims for compensation by victims injured in a crime or by certain dependents of victims killed in a crime.

The law provides for compensation of up to $10,000 to victims who have lost more than $100 or two continuous weeks of earnings or support, provided the sum is not covered by public or private insurance. All expenses—including medical costs—are included in the $100 figure which is automatically deducted from any compensation payment. Donna Morrissey, therefore, actually received $665.20 of her $765.20 award.

Claims are filed in District Court and payments are determined by the court which must decide whether a crime was committed, whether the crime directly resulted in personal injury or death and whether police records show the crime was reported promptly.

The law took effect July 1, 1968 and the state attorney general, Robert F. Quinn, says most of the claims filed since then have resulted from assault and battery cases. The state paid $4,498.58 in fiscal 1968-69, $60,885.76 in 1970 and $27,162.33 for the first four months of 1971—the last period for which figures were available.

The number of claims has been lower than expected, according to a spokesman in the attorney general's office. "Most people don't know about this program," he said. "I've even met lawyers who don't know what it is."

The proposal before Congress, in addition to picking up part of the tab for state compensation programs, also would provide compensation up to $50,000 for victims of violent crimes committed in the District of Columbia, in national parks and forests, on Indian reservations and aboard airplanes and ships.

Even without the hope of federal money, many states and officials have been considering some sort of compensation law.

An Associated Press sampling showed proposals for such a law pending in a group of states that includes Pennsylvania, Georgia, Illinois, Milwaukee, Michigan, Florida, Missouri and Ohio. Washington, Delaware, Kansas and Arkansas legislators considered such measures in the past and defeated them and there are moves to introduce compensation bills in Colorado and Rhode Island.

Interest of spouse in estate by the entirety as subject to execution for individual debt, 166 ALR 969.

re SB 28

selected and reserved by the judgment debtor or his agent at the time of the levy, or as soon after levy and before sale as the [illegible] becomes known to him:

[illegible] judgment debtor received for his per[illegible] earned at any time within 30 [illegible] immediately [illegible], but not exceeding $350 if he [illegible] of a [illegible] $200 if he is a single [illegible] affidavit or otherwise [illegible] are necessary for his use or for the use of his family which is supported in whole or in part by his labor;

(2) books, pictures, and musical instruments belonging to the judgment debtor not to exceed $300 in value;

(3) necessary wearing apparel belonging to the judgment debtor for the use of himself or his family; watches or jewelry not to exceed $200 in value;

(4) the tools, implements, apparatus, motor vehicles, books, office furniture, business files, animals, laboratory, and any other article necessary to enable any person to carry on the trade, occupation, or profession by which that person habitually earns his living to the value of $1,800, including sufficient quantity of food to support the animals, if any, for six months;

(5) the following property belonging to the judgment debtor and in actual use or kept for use by and for his family: animals, household goods, furniture, and utensils to the value of $1,200, including food sufficient to support the animals, if any, for six months, and provisions actually provided for family use and necessary for the support of that person and family for six months;

(6) all property of a public or municipal corporation;

(7) no article of property mentioned in this section is exempt from execution issued on a judgment recovered for its price, and, in the event the article of property has been sold or exchanged for other property, the proceeds of the sale or the article for which it was exchanged is not exempt from execution. (§ 15.08 ch 101 SLA 1962)

Cross reference. See Civ. R. 69-(b)(1).

Sec. 09.35.090. Homestead exemption. The homestead of the family is, or the proceeds of the homestead are exempt from [illegible] judicial sale for the satisfaction of any liability contracted or judgment on debt except as provided in this section. The homestead consists of the actual abode of and owned by the family or some member of the family. It shall not exceed $8,000 in value, and not exceed 160 acres in extent if located outside a town or city

laid off into blocks or lots, or not exceed one-fourth of one acre if located in a town or city. This section does not apply to decrees for the foreclosure of a mortgage or deed of trust properly executed. If the owners of a homestead are married, it shall be executed by husband and wife. When an officer levies upon a homestead, the owner or the wife, husband, agent, or attorney of the owner may notify the officer that he claims the premises as his homestead, describing it by metes and bounds, lot or block, or legal subdivision. The officer shall notify the creditor of the claim, and, if the homestead exceeds the maximum in this section and he deems it of greater value than $8,000, then he may apply to the court for the appointment of three disinterested persons to appraise the homestead, commencing with the 20 acres of the lot upon which the dwelling is located, appraising each lot or 20 acres separately; and, if the homestead exceeds $8,000, then the officer shall proceed to sell all in excess of $8,000 by lots or smallest legal subdivisions, offering them in the order directed by the judgment debtor if he chooses to direct; otherwise, he shall sell them so as to leave the homestead as compact as possible. The homestead is exempt from sale or legal process after the death of the person entitled to the homestead for the collection of a debt for which it could not have been sold during his lifetime. (§ 15.09 ch 10[illegible] SLA 1962)

Cross reference.—See Civ. R. 69-(b)(3).

The [illegible] of homestead exemption is a [illegible] right and can be exercised [illegible] time after levy and before sale. Wendler v. Brenneman, 7 Alaska [illegible].

Order of confirmation may preserve right to raise question of homestead. Where the confirmation of sale is allowed without prejudice to defendant's right thereafter to make claim of her homestead exemption in proceeding within the jurisdiction of the court, defendant may raise question of her homestead right by an action of ejectment or to quit title, if the purchaser takes possession, or she may [illegible] obtain a perpetual injunction to prevent the issuance of a deed to the purchaser after the expiration of the time for redemption. Williams v. Thompson, 7 Alaska 601.

It was the legislative intent to make the assertion of a homestead exclusive, either on the parties or court. Williams v. Thompson, 7 Alaska 601.

Jurisdiction of court to determine claim of homestead.—See Williams v. Thompson, 7 Alaska 601.

Only one tract can be claimed as homestead.—One may have several tracts of land, houses, or homes; but only the one which he actually designates, points out, and selects as provided by law, can be claimed as the homestead. Seagreen v. Wendler, 5 Alaska 715.

It is not necessary for a person to live continuously on his homestead; but the fact of absence suggests, at least, the possibility that property claimed as a homestead was not a homestead. Williams v. Thompson, 7 Alaska 601.

Homestead character is not lost by use for business as well as residence purposes.—The homestead character of property is not destroyed by its use for business purposes while at the same time being occupied mainly as a residence. Wendler v. Brenneman, 7 Alaska 13.

Tenants in common are each entitled to a homestead exemption in the same property. Wendler v. Brenneman, 7 Alaska 13.

And right can only be waived intentionally.—Before it could be said that tenants in common, or either of them, waived their legal right of homestead exemption, there must be both knowledge of the right and the intention to relinquish it. Wendler v. Brenneman, 7 Alaska 13.

Statements to creditors do not estop claim.—One claiming a homestead exemption cannot be estopped by virtue of statements made to creditors. Wendler v. Brenneman, 7 Alaska 13.

Homestead may be purchased with nonexempt property.—A debtor may acquire a homestead and hold it exempt from execution for pre-existing debts not then reduced to judgment, although the homestead is purchased with, or obtained by exchange for, nonexempt property, and fraud cannot be imputed to such an act. In re Bocash, 10 Alaska 206.

Even by insolvent debtor.—An insolvent debtor, knowing himself to be insolvent, may acquire a homestead for himself and family, and hold the same exempt from his creditors, although purchased with nonexempt assets, and fraud cannot be imputed to such fact. In re Bocash, 10 Alaska 206.

The homestead exemption may be asserted even as to property purchased by an insolvent debtor with the proceeds of nonexempt property, in the absence of any specific equity existing in favor of a creditor, and the fact that the purchase is made for the very purpose of acquiring a homestead exempt from execution does not alter the rule. In re Bocash, 10 Alaska 206.

And service of notice of proceedings supplementary to execution does not prevent purchase.—The service on a judgment debtor of a notice requiring him to appear and answer regarding his assets, in a proceeding supplementary to and in aid of execution, without any order being made forbidding the transfer or other disposition of his property by him, does not give the judgment creditor any lien on his funds, nor prevent him from purchasing and paying for a homestead with them, which cannot be sold for the satisfaction of the judgment. In re Bocash, 10 Alaska 206.

As a general rule fraud cannot be predicated upon a disposition of the homestead; the same being exempt, the creditor could not subject the same to the satisfaction of his claim, and is therefore not injured or prejudiced by a conveyance or transfer thereof. Seagreen v. Wendler, 5 Alaska 715.

But transfer to put homestead beyond reach in event of moving may be fraudulent.—The transfer of the homestead from the husband to the wife is a fraud upon creditors, where it is not the bona fide intent to invest the wife with the real ownership, but to put it beyond the reach of the husband's creditors, in the event of their removal from said homestead. Seagreen v. Wendler, 5 Alaska 715.

Failure to introduce evidence waives allegation as to value.—Where no evidence was introduced upon either side as to the value of property in which a homestead exemption was claimed, defendant's allegation as to the value of the property was deemed abandoned. Wendler v. Brenneman, 7 Alaska 13.

Sec. 09.35.100. Execution against property. The person to whom the writ is directed shall execute the writ against property of the judgment debtor until the judgment is satisfied. (§ 15.10 ch 101 SLA 1962)

Cross reference.—See Civ. R. 69.

ALR and C.J.S. references.—Injunction against waste to protect judgment lien, 103 ALR 387.

33 C.J.S. Executions § 124.

Sec. 09.35.110. Execution procedure. All property shall be levied upon or released from levy in the manner that similar property is attached or released from attachment, and the proceed-

THE PRECEDING DOCUMENT(S) MAY NOT FILM LEGIBLY BECAUSE OF POOR QUALITY OF THE ORIGINAL.

arrangements for disposition of the matter as are just under the circumstances.

(5) If the judgment creditor cannot, after due diligence, locate the judgment debtor, he may file an affidavit of that fact with the court, and upon application, the court may authorize him to serve the notice required under this section by mailing the notice by certified mail to the last known address of the judgment debtor.

(6) Each court which issues writs of execution shall, by order, designate a trustee or other individual as the officer for administration of this section. This individual shall receive funds paid into the court, and is the appropriate person for service of claims for exemption by the judgment debtor and for performance of other duties that the court may direct. (§ 1 ch 175 SLA 1970)

Legislative committee report.—For report on ch. 175, SLA 1970 (HB 363 am S), see 1970 House Journal Supplement No. 3.

Sec. 09.35.070. Property liable.

Liquor license is not subject to attachment or execution.—A liquor license issued by the State of Alaska is not a property right but merely a personal privilege and, as such is, not subject to attachment or execution. 1967 Ops. Att'y Gen., No. 4.

Action against insurer. — A judgment creditor is entitled to an assignment of any claim its judgment debtor may have against the debtor's insurance carrier, without regard to whether or not such a claim in fact exists. Pennington v. Rimmer, 8 Alas. L.J. No. 5, p. 92 (May, 1970).

In Theodore v. Zurich Gen. Accident & Liab. Ins. Co., Sup. Ct. Op. No. (File No. 43), 364 P.2d 51 (1961), the Alaska supreme court held that a judgment creditor of the assured could maintain an action against the insurer (no assignment by the assured was stated in the decision to have been given). Pennington v. Rimmer, 8 Alas. L.J. No. 5, p. 92 (May, 1970).

Sec. 09.35.080. Exemptions. The following property is exempt from execution, except as otherwise specifically provided when selected and reserved by the judgment debtor or his agent at the time of the levy, or as soon after levy and before sale as the existence of the levy becomes known to him:

(1) the income of the judgment debtor, regardless of when it became payable, for work performed during the preceding 30 days, or otherwise earned or inured to his benefit within the 30-day period; the 30-day period shall be reckoned back from the date of the levy, but the exemption may not exceed $350 if he is the head of a family, and the amount of $200 if he is not the head of a family; the amount of the exemption shall be computed after deductions and payments, required by law or court order, so as to assure the judgment debtor the receipt of the first $350 per month if he is the head of a family or $200 if he is not the head of a family, when it appears by the debtor's affidavit or otherwise that the income is necessary for his use or for the use of his family which is supported in whole or in part by his income;

(2) books, pictures, and musical instruments belonging to the judgment debtor not to exceed $300 in value;

(3) necessary wearing apparel belonging to the judgment debtor for the use of himself or his family; watches or jewelry not to exceed $200 in value;

(4) the tools, implements, apparatus, motor vehicles, books, office furniture, business files, animals, laboratory, and any other article necessary to enable any person to carry on the trade, occupation, or profession by which that person habitually earns his living to the value of $1,800, include sufficient quantity of food to support the animals, if any, for six months;

(5) the following property belonging to the judgment debtor and in actual use or kept for use by and for his family: animals, household goods, furniture, and utensils to the value of $1,200, including food sufficient to support the animals, if any, for six months, and provisions actually provided for family use and necessary for the support of that person and family for six months;

(6) all property of a public or municipal corporation;

(7) no article of property mentioned in this section is exempt from execution issued on a judgment recovered for its price, and, in the event the article of property has been sold or exchanged for other property, the proceeds of the sale or the article for which it was exchanged is not exempt from execution. (§ 15.08 ch 101 SLA 1962; am § 1 ch 31 SLA 1966; am § 1 ch 96 SLA 1969)

Cross reference.

As to exemption of teachers' retirement salaries from taxation and process, see AS 14.25.200.

Effect of amendments.—The 1969 amendment rewrote paragraph (1) as amended in 1966.

Sec. 09.35.085. Exemption for child support payments. In addition to the exemptions set out in § 80 of this chapter, the amount which the judgment debtor has been ordered to pay to a court trustee as child support payments under Rule 67 of the Rules of Civil Procedure is exempt from execution. (§ 2 ch 31 SLA 1966)

Legislative committee report.—For legislative committee report on ch. 31, SLA 1966, see House Journal (1966), p. 591.

Sec. 09.35.087. Exemption for liquor licenses. In addition to the exemptions set out in §§ 80 and 85 of this chapter, the liquor license of a judgment debtor is exempt from execution. (§ 1 ch 18 SLA 1968)

Revisor's note (1968).—In ch 18 SLA 1967 the first portion of AS 09.35.087 provided that "since a liquor license is a privilege granted by the state . . . this privilege should be revocable only by the state."

Sec. 09.35.230. Redemption by lien creditor from purchaser. A lien creditor may redeem the property at any time within 60 days after the date of the order confirming the sale on paying the amount of the purchase money, with interest at the rate of eight

adequate comparison of credit costs as between different types of open end credit plans.

(Pub. L. 90–321, title I, § 143, May 29, 1968, 82 Stat. 158.)

EFFECTIVE DATE

Section effective July 1, 1969, see section 504(b) of Pub. L. 90–321, set out as a note under section 1631 of this title.

§ 1664. Advertising of credit other than open end plans.

(a) Exclusion of open end credit plans.

Except as provided in subsection (b) of this section, this section applies to any advertisement to aid, promote, or assist directly or indirectly any consumer credit sale, loan, or other extension of credit subject to the provisions of this subchapter, other than an open end credit plan.

(b) Advertisements of residential real estate.

The provisions of this section do not apply to advertisements of residential real estate except to the extent that the Board may by regulation require.

(c) Rate of finance charge expressed as annual percentage rate.

If any advertisement to which this section applies states the rate of a finance charge, the advertisement shall state the rate of that charge expressed as an annual percentage rate.

(d) Requisite disclosures in advertisement.

If any advertisement to which this section applies states the amount of the downpayment, if any, the amount of any installment payment, the dollar amount of any finance charge, or the number of installments or the period of repayment, then the advertisement shall state all of the following items:

(1) The cash price or the amount of the loan as applicable.

(2) The downpayment, if any.

(3) The number, amount, and due dates or period of payments scheduled to repay the indebtedness if the credit is extended.

(4) The rate of the finance charge expressed as an annual percentage rate.

§ 1665. Nonliability of advertising media.

There is no liability under this part on the part of any owner or personnel, as such, of any medium in which an advertisement appears or through which it is disseminated. (Pub. L. 90–321, title I, § 145, May 29, 1968, 82 Stat. 159.)

EFFECTIVE DATE

Section effective July 1, 1969, see section 504(b) of Pub. L. 90–321, set out as a note under section 1631 of this title.

SUBCHAPTER II.—RESTRICTIONS ON GARNISHMENT

§ 1671. Congressional findings and declaration of purpose.

(a) The Congress finds:

(1) The unrestricted garnishment of compensation due for personal services encourages the making of predatory extensions of credit. Such extensions of credit divert money into excessive credit payments and thereby hinder the production and flow of goods in interstate commerce.

(2) The application of garnishment as a creditors' remedy frequently results in loss of employment by the debtor, and the resulting disruption of employment, production, and consumption constitutes a substantial burden on interstate commerce.

(3) The great disparities among the laws of the several States relating to garnishment have, in effect, destroyed the uniformity of the bankruptcy laws and frustrated the purposes thereof in many areas of the country.

(b) On the basis of the findings stated in subsection (a) of this section, the Congress determines that the provisions of this subchapter are necessary and proper for the purpose of carrying into execution the powers of the Congress to regulate commerce and to establish uniform bankruptcy laws. (Pub. L. 90–321, title III, § 301, May 29, 1968, 82 Stat. 163.)

EFFECTIVE DATE

Section 504(c) of Pub. L. 90–321 provided that: "Title III [which enacted this section and sections 1672—1677 of this title] takes effect on July 1, 1970."

§ 1672. Definitions.

For the purposes of this subchapter:

(a) The term "earnings" means compensation paid or payable for personal services, whether denominated as wages, salary, commission, bonus, or otherwise, and includes periodic payments pursuant to a pension or retirement program.

(b) The term "disposable earnings" means that part of the earnings of any individual remaining after the deduction from those earnings of any amounts required by law to be withheld.

(c) The term "garnishment" means any legal or equitable procedure through which the earnings of any individual are required to be withheld for payment of any debt. (Pub. L. 90–321, title III, § 302, May 29, 1968, 82 Stat. 163.)

EFFECTIVE DATE

Section effective July 1, 1970, see section 504(c) of Pub. L. 90–321, set out as a note under section 1671 of this title.

§ 1673. Restriction on garnishment.

(a) Maximum allowable garnishment.

Except as provided in subsection (b) of this section and in section 1675 of this title, the maximum part of the aggregate disposable earnings of an individual for any workweek which is subjected to garnishment may not exceed

(1) 25 per centum of his disposable earnings for that week, or

(2) the amount by which his disposable earnings for that week exceed thirty times the Federal minimum hourly wage prescribed by section 206 (a)(1) of Title 29 in effect at the time the earnings are payable,

whichever is less. In the case of earnings for any pay period other than a week, the Secretary of Labor shall by regulation prescribe a multiple of the Federal minimum hourly wage equivalent in effect to that set forth in paragraph (2).

(b) Exceptions.

The restrictions of subsection (a) of this section do not apply in the case of

(1) any order of any court for the support of any person.

(2) any order of any court of bankruptcy under chapter XIII of the Bankruptcy Act.

(3) any debt due for any State or Federal tax.

(c) Execution or enforcement of garnishment order or process prohibited.

No court of the United States or any State may make, execute, or enforce any order or process in violation of this section. (Pub. L. 90–321, title III, § 303, May 29, 1968, 82 Stat. 163.)

Chapter XIII of the Bankruptcy Act, referred to in subsec. (b)(2), is classified to section 1001 et seq. of Title 11, Bankruptcy.

EFFECTIVE DATE

Section effective July 1, 1970, see section 504(c) of Pub. L. 90–321, set out as a note under section 1671 of this title.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in section 1675 of this title.

§ 1674. Restriction on discharge from employment by reason of garnishment.

(a) No employer may discharge any employee by reason of the fact that his earnings have been subjected to garnishment for any one indebtedness.

(b) Whoever wilfully violates subsection (a) of this section shall be fined not more than $1,000, or imprisoned not more than one year, or both. (Pub. L. 90–321, title III, § 304, May 29, 1968, 82 Stat. 163.)

EFFECTIVE DATE

Section effective July 1, 1970, see section 504(c) of Pub. L. 90–321, set out as a note under section 1671 of this title.

§ 1675. Exemption for State-regulated garnishments.

The Secretary of Labor may by regulation exempt from the provisions of section 1673(a) of this title garnishments issued under the laws of any State if he determines that the laws of that State provide restrictions on garnishment which are substantially similar to those provided in section 1673(a) of this title. (Pub. L. 90–321, title III, § 305, May 29, 1968, 82 Stat. 164.)

EFFECTIVE DATE

Section effective July 1, 1970, see section 504(c) of Pub. L. 90–321, set out as a note under section 1671 of this title.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in section 1673 of this title.

§ 1676. Enforcement by Secretary of Labor.

The Secretary of Labor, acting through the Wage and Hour Division of the Department of Labor, shall enforce the provisions of this subchapter. (Pub. L. 90–321, title III, § 306, May 29, 1968, 82 Stat. 164.)

EFFECTIVE DATE

Section effective July 1, 1970, see section 504(c) of Pub. L. 90–321, set out as a note under section 1671 of this title.

§ 1677. Effect on State laws.

This subchapter does not annul, alter, or affect, or exempt any person from complying with, the laws of any State

(1) prohibiting garnishments or providing for more limited garnishment than are allowed under this subchapter, or

(2) prohibiting the discharge of any employee by reason of the fact that his earnings have been subjected to garnishment for more than one indebtedness.

(Pub. L. 90–321, title III, § 307, May 29, 1968, 82 Stat. 164.)

EFFECTIVE DATE

Section effective July 1, 1970, see section 504(c) of Pub. L. 90–321, set out as a note under section 1671 of this title.

Youth

Mass. Closing Juvenile Jails

BY BILL KOVACH
The New York Times

AMHERST, Mass. — The State of Massachussetts is moving ahead rapidly with a program to abolish institutions for juvenile offenders and to replace them with community-based work and educational programs.

Tho program, in the formative stages for nearly two years, is designed to, within the next six months, make this the first state to abolish all juvenile prisons.

The experiment has received federal grants to aid its implementation.

In the past two months, three juvenile institutions — including the nation's oldest jails for boys and girls — have been closed and more than 200 of the state's 800 young offenders are in community-based facilities.

According to Dr. Jerome G. Miller, head of the Youth Services Department, directing the effort, the only way to reform the penal system is to dismantle its institutions.

"We made a basic decision after I took this job two years ago that it would do no good to pump more money and more programs into the existing system because the system can chew up reforms faster than you can dream up new ones," said Miller. "It is a sick system that destroys the best efforts of everyone in it and we decided to look for alternatives."

The per capita cost of jailing a juvenile for a year was about $10,000, or, as Miller pointed out, "enough to send a child to Harvard University with a $100 a week allowance, a summer vacation in Europe, and once a week psychotherapy."

Most of that money was required to maintain the institutions and, he said he decided it could be better spent for more personal work with the youthful offender in a program designed to integrate him back into the community rather than to segregate him.

One of the alternatives to buildings and bars is a program at the University of Massachussetts campus here called Juvenile Opportunities Extension, or, JOE.

Directed by Larry L. Dye, JOE is a recognized student activity (funded and run by the students) and is part of a major effort by the university's students to involve themselves in community affairs. Through JOE, 100 former inmates of the now-closed juvenile prisons are paired with student volunteers from their home community.

The juvenile and the student (called an advocate) live together in dormitories or apartments and jointly work together to find a way to bring the juvenile back into his local community. Designed as a month-long program, the two are expected to develop a living arrangement, at home if possible, and an educational or employment schedule.

Other alternatives serve 130 former juvenile inmates. Most of these are in group homes where the youngsters are directed and supervised by foster parents. Some of the larger group homes have staffs enlarged by the addition of state employes who formerly worked at the institutions that have been shut down.

"Whatever the arrangement," Miller said, "the thrust is the same — to get the kid out of an impersonal institution and into a more personal situation where he or she can be worked with more intensively."

By Lester Velie

The Child Trappers

The game is called "trap the child." It is played by judges, social workers and corrections officials in courtrooms, in bureaucratic mazes and in prison cells. It is known officially as the juvenile-court system, and yearly it mangles the lives of thousands of our children

For an outsider, the first glimpse of a fellow human being caged in solitary confinement in a six-by-ten-foot cell—prisoners call it "the hole"—is a harrowing one. But when the caged one is a child, the sight will trouble sleep that night, and for many nights thereafter.

Last August, at the Illinois Industrial School for Boys at Sheridan, I counted 26 boys, some as young as 15, who had been locked in the hole from five days to two months. One was Carman Tate, a slim, fine-featured boy of 17 whose dark-tan coloring reflected his black-Latin origins. Some deep, inner cry of protest so filled the boy's eyes with pain that one winced to look at him.

Carman had already spent three of his adolescent years locked away from mother, friends and school when I first saw him. What crime had he committed while outside? None known to the criminal code. The charge that set him on the path to this maximum-security prison was "running away from home for two days." His story reveals how the juvenile-court system traps and mangles children in the name of saving them.

The "saving" of Carman Tate began when he was 13. In the ghetto rioting that followed the assassination of Martin Luther King, Jr.,

some drapes were set afire in a school in Carman's neighborhood. Carman, who, with thousands of others, was milling around the streets that night, was picked up and charged with the arson. Since children get no bail, the boy spent 28 days behind bars in the local detention center awaiting disposition of his case. Then, as it turned out, the case was dismissed for lack of evidence. But Carman faced a still more difficult charge: his parents' word that he stayed out late, was "beyond their control."*

Actually, as a court investigator and a psychiatrist reported, it was Carman's parents who were beyond control. When Carman was nine, a stepfather had entered his life—a Chicago policeman, giant in size and quick with his fists. To make a man of young Carman, he would send him to a dark cellar, scare him out of his wits, then yell "sissy!" at the youngster's terror. The stepfather also had a store and made Carman work long, after-school hours, without pay or allowance. When the boy rebelled, the stepfather beat him. When Carman's mother interceded, he beat her, too.

At the time of the stepfather's arrival, Carman was an average student, attending school regularly. Soon, however, he became listless in class and, because of the long hours in the store, sometimes fell asleep. He had to repeat the fifth grade. Once, when Carman was 13, he stayed away from school for 25 days. The reason, his mother told a social worker, was that Carman had to baby-sit for his sisters while his mother worked. But to the school, he was a habitual truant.

All this was spread before the juvenile-court judge after the arson charge had been dismissed, plus the psychiatrist's advice that Carman's parents, as well as Carman, get counseling. But juvenile courts are not in business to save adults. Only Carman got the treatment—a year on probation. Having become a ward of the court, he was ordered to obey his parents, observe a curfew and attend school regularly—or else. Since Carman's probation did nothing about his difficulty with his stepfather, the "or else" descended within four months. Carman was adjudged a delinquent for violating probation and turned over to the Illinois Youth Commission.

Prior to assigning Carman to one of the state's 18 juvenile detention centers, the commission tested him at a "diagnostic center." Here a social worker strongly recommended "family counseling." Carman's place, obviously, was in his home.

But Carman didn't go home. Somewhere out there in the corrections bureaucracy, some paper-shuffler had pinned crimes on the boy that he had never committed: unlawful possession of narcotics, and setting fire to a school. Carman had

*In some states, including Illinois, any minor under 18, after a second complaint of his being "beyond the control of his parents" or a "habitual truant," can be locked up until he is paroled or until he reaches 21.

never been accused of a narcotics charge; the arson complaint had been dismissed. Yet the final diagnostic-staff decision concluded: "Because of his possible arsonist tendencies," the boy had to be put away in a secure setting. He was bundled off in a prison van to the state training school for boys at St. Charles, the second most secure juvenile-detention facility in Illinois.

It took eight leisurely months for the child-savers at St. Charles to discover that Carman merited parole. But less than two weeks after his release, Carman was back on a parole-violation charge. He was defiant, his parents had told the parole officer. True. Ordered out of the house by his stepfather, Carman had cried out to his mother: "If I can't be with you, I might as well be locked up!"

Sent again to the diagnostic center at Joliet, Carman learned that his stepfather had died. Since a happy home now awaited him, reason screamed: *Send this boy home!* Instead, he was taken to the training school for boys at Sheridan, the maximum-security institution where I met him. It was a routine department matter; no judge, lawyer or parent was advised.

During his first year at Sheridan, Carman spent a total of 82 days—1968 hours—in solitary. Once (eight days) was for threats (by the slightly built 15-year-old) to hit a guard; another time (14 days) for disrespect to a counselor and refusing an order. When he was not in solitary, he lived with some of the most desperate young felons in the state.

As the months passed, with no word about parole, Carman descended into bitterness. He came to feel that only a black revolution against an oppressive white establishment could free him. So, in the spring of 1971, Carman joined other inmates in a "black revolution" riot aimed at calling attention to their plight.

The spark was the authorities' use of a powerful tranquilizer, Thorazine, injected to immobilize misbehavers. A psychiatrist later testified at an inquiry into Sheridan that "Thorazine is a dangerous drug which should be used only as part of a program of psychiatric therapy." Yet Sheridan's part-time psychiatrist was not consulted about the drug's use. Nor did the prison's part-time doctor always examine the injected boy. The result was that one asthmatic inmate, 19-year-old Anthony Jones, subjected to a heavy daily dose for four consecutive days, died by strangulation.

Because Jones was a leader of the Black Power organization inside Sheridan, inmates looked on his death as calculated murder. During the riot that subsequently broke out, inmates knifed one guard to death. Later another guard was seriously beaten, and Carman was accused in this incident. Since this was a serious charge, Carman, now 16, was taken before an adult criminal court and indicted for aggravated battery—which carries a one-to-ten-year sentence in Illinois.

Last October, Carman's lawyers were planning to plead the boy guilty to the charge, in return for a specific sentence in an adult penitentiary which—with time off for good behavior—could free Carman within a year. In the mad world of juvenile correction, then, Carman could extricate himself from the juvenile-court trap by "committing" a crime, his first.

The Crime of Childhood. Carman's case is not an isolated one. Each year, more than 440,000 other non-criminal minors under 18 are trapped by our juvenile-court system.

Item: Over her parents' tearful pleas to let 15-year-old Sharon R. go home, a juvenile-court judge sent the girl to an Indiana reformatory. Police said the girl had stayed out beyond the nine o'clock minors' curfew and had sassed a policeman.

Item: Fifteen-year-old Pamela W., an intelligent child, has spent almost three years locked up. Her mother appealed to a Chicago juvenile court when Pamela, at ten, developed emotional problems. Pamela then spent months alternating between foster homes and detention centers—until 1969 when, without court order, she was dumped into a state insane asylum, although she was sane. Here, for "treatment," Pamela was spread-eagled on a bed, her ankles and hands bound with ropes, once for 28 days, another time for 30 days. When the girl struck one of her tormentors, she was charged with assault and committed by a juvenile court to a state training school where, at age 13, she endured 792 hours of solitary confinement. When I saw her last fall, she was still awaiting parole.

How did crimes against children like these begin? The juvenile court and the concept of juvenile delinquency are American inventions, mothered by welfare workers of the 1880s, to save children from lives of crime. The way to do it, they theorized, was to catch the youngster in "pre-delinquent" misbehavior, remove him from his family and put him into "protective custody," where he would get the care and discipline to prepare him for solid citizenhood.

However, this well-intentioned theory was codified in vague laws that gave the state awesome power to intervene in the lives of non-criminal children. Indeed, some statutes seem to make childhood itself a crime. California's law, for example, says: "Any person under 21 who persistently refuses to obey his parents, guardian, custodian or school authorities or who from any cause is in danger of leading an idle, dissolute or immoral life is within the jurisdiction of the juvenile court."*

Because those caught up in such broad legal nets were to become "wards of the court," and the state was to become their parent, a new kind of court was created to deal only with juveniles. (In many states,

*As this article was written, the constitutionality of part of this law was under consideration by the U.S. Supreme Court.

however, adult criminal courts continue to handle serious offenders over 15, and in some states over 12.) The new court would be run by a new kind of judge—a wise and benign counselor who would prescribe treatment for the child, instead of passing sentence. And presumably, this judge would have the tools for therapy: psychiatric care, counseling and foster homes.

But neither judges nor tools matched the lofty aims of the child-savers. Today the National Council on Crime and Delinquency (NCCD), which has studied juvenile courts and detention in almost every state, says: *"The quickest route to a criminal career is via the juvenile court."* One study has found that one fifth of all juvenile-court judges were not members of the bar; one half hadn't even graduated from college.

In El Paso, Texas, one judge bundled children off to detention without ever seeing them. He simply initialed a mimeographed form, filled out by a parent, declaring the child to be a delinquent. One such "delinquent" was a 16-year-old girl whose mother went off on a two-week spree with a lover and signed away the child as an "incorrigible"—so using the detention home as a baby-sitter.

The Trap Is Set. For a close-up view of a juvenile court at work, let's visit Illinois' Cook County (Chicago). Here, to enter a juvenile courtroom, you need the written permission of the chief judge. This, you are told, is to protect the anonymity of the juvenile. But the secrecy protects the system more than it does the child.

The court I entered is where the first step in the juvenile judicial process takes place—an arraignment that leads to the dismissal of a case or to more court appearances. A black 11-year-old stands mute, as adults take three minutes flat to agree on a decision that may damage him for the rest of his life.

An assistant state's attorney reads the accusation which charges the boy with "illegal trespass to a vehicle," *i.e.*, joyriding in a stolen car, driven by another. The young public defender, who had not seen the boy before, does not speak to his client or challenge the state's attorney. He pleads the boy guilty.

The judge questions the boy to determine whether he understands what has been said. Then, as the boy stands silent, he tells him that he will be placed under court supervision for six months. At the end of that time, if the boy has behaved, the charge will be dismissed and the case record destroyed.

The trap has been set. Truancy from school, disobeying his parents or a probation officer's complaint will bring the boy back to court. Then he may go to jail for disobeying the judge's orders—although, because of the guilty plea, the original charge was never tried and proved.

Strangely, as other children face the judge, the public defender pleads

, as other children face
e public defender pleads

virtually all his clients guilty. Why? In the Cook County juvenile court, parents and children are first questioned by law students and recent law graduates who—as "investigators" for the public defender—spend about ten minutes on each case. They note the child's name, his school record, past difficulties, if any, and then advise the parents.

"We kind of push for admissions (guilty pleas) on arraignment *if the kid has anything at all to do with the charge*," a law student told me. How the investigator determines this is not clear, for he does no investigating. The parent, not knowing what he or she is getting the child into, usually agrees to the guilty plea and supervision.

Even where court-appointed lawyers fight to send the child home, heavy case loads make the job difficult. In some cities public defenders each handle as many as 50 juvenile cases a day. And in small towns, many juvenile-court judges waive legal niceties altogether. When OEO lawyers sued every juvenile court in Texas last summer, charging failure to protect children's rights, the U.S. District Court for Eastern Texas sent a questionnaire to some 2400 jailed children all over the state. Half of them had not had a lawyer.

To all this, add the common practice of "dumping" non-criminal children, who languish in detention centers while judge and social workers seek a foster home, a shelter or psychiatric care. Such facilities are extremely hard to come by. The President's Crime Commission has pointed out that more than 80 percent of juvenile-court judges "had no psychologist or psychiatrist available on a regular basis." In short, the juvenile-court system simply can't keep the promise—made by its inventors—to use the behavioral and medical sciences to prevent or cure delinquent behavior.

Let's return to the Cook County Juvenile Court to watch judge, public defender and social worker make a promise that, unkept, dumps a 15-year-old who has done no one any harm. The courtroom we now enter is where the judge decides what to do with a child who has been held over after arraignment. It takes him an average of 12 minutes.

A sturdy boy, Gregory C., faces the judge. At an earlier hearing, Gregory had been adjudged a "minor in need of supervision," a term by which Illinois differentiates non-criminal children from delinquents. That was two months ago, when Gregory's mother had complained that he stayed away from home overnight. Since then, he has been behind bars in the Audy Home, a high-security detention center, while a social worker looked for a foster home. The social worker tells the judge that he still hasn't found one. Gregory's mother refuses to take him home.

A public defender has an idea. He takes the mother aside, and in an off-the-record huddle, urges her to agree to a finding of neglect against

her. This will turn Gregory into a "neglected child" and it will be easier to find a place for him. The mother demurs, then agrees, and the judge orders Gregory back to the lockup—pending further search for a foster home.

Tragic Odds. Is such dumping unusual? No. The Chicago Citizens Committee on the Juvenile Court found that 331 children *under six* had been dumped into the Audy Home in a recent year. Another 447 were six to 12 years old. Sometimes the bureaucracy, having dumped a child, loses or forgets him. Billy N., left temporarily at Audy when he was six, remained there on and off until he was 16!

If Gregory had been adjudged a delinquent he would probably have been sent to a training school. Many of these places are massive maximum-security facilities—overcrowded, located far from the homes of the children, and, according to NCCD, control their inmates with physical repression.

For example, at the Gatesville State School for Boys in Texas, as U.S. Senate investigators heard: "Security is maintained by a 24-hour horse patrol, 24-hour jeep patrol, and an eager kennel of dogs who are trained to chase younger children. [In April 1969, 200 of the "school's" inmates were under 12.] . . . A day without a beating is the exception, and torment is the order of the day."

Says Massachusetts Youth Services Commissioner Jerome G. Miller: "Almost anything we could do is better than what we have been doing." He wants to shut down his state's ten juvenile-correction institutions by 1974.

What are the odds that a juvenile graduate from a training school or reformatory can go straight? Less than 50-50, says NCCD. When the FBI studied several thousand repeaters of all ages it found three of every four offenders under 20 were repeaters within the next four years. At the school at Sheridan, Ill., an official who used to inspect state prisons said: "Over the years, I saw hundreds of inmates at Pontiac (an adult prison) whom I had first met as Sheridan boys."

In Philadelphia, Family Court Administrative Judge Frank J. Montemuro, Jr., summed up the horror of our juvenile courts: "We're running a feeding system for the adult-criminal court."

The delinquency doctors are telling us that the treatment is part of the disease. Isn't it time we tried another treatment?

In Part II of this series, The Reader's Digest will examine some possible solutions to the problems of juvenile justice.

Half-truths are like half a brick—they can be thrown farther.
—Vice Admiral Hyman G. Rickover

SB-68

NIGHT LETTER Sent 5-5-71 5:00 p.m.

To: Rep. Genie Chance, Juneau, Alaska

From: Harold J. Butcher, Anchorage

Strongly urge House conferees accept Senate Bill 68 as introduced by Thomas, et.al., as originally proposed by the undersigned and attached to memorandum of justification.

My proposal, as reflected in Senate Bill 68 simply adds one paragraph to the statute and requires no alteration or changes in preceding statutes. The languege contained in the last line of Senate Bill 68 "on order of the court" simply reiterates the same language as presently contained in the last line of 47.10.080(b)(1), as adopted in 1970. That language "on order of the court" has never created any problems between the court and the Division of Corrections. That language "on order of the court" also reiterates the same language in the statute as it existed before the amendment of 1970 in the original statute as it has stood since its adoption in 1962. The House verdon, in my opinion, detracts from the clear purpose of the statute as it has stood since 1962.

Please do your best to get a bill passed as the amendment is badly needed now.

Lowell:
This telegram sent to Genie Chance, May 5.

(7) is an orphan who has no relatives willing and able to assume custody and care;

(8) has been released by his parent or parents, or guardian, to the department for adoptive purposes; or

(9) is in need of special care or training not otherwise provided.

(b) When a minor is accused of violating a traffic statute or regulation, or a traffic ordinance or regulation of an incorporated municipality, excepting a statute the violation of which is a felony, the procedure prescribed in §§ 20—90 of this chapter may not be followed, except that a parent, guardian or legal custodian shall be present at all proceedings. The minor accused of a traffic offense shall be charged, prosecuted, and sentenced in the district court in the same manner as an adult.

(c) In a controversy concerning custody of a minor, the court may appoint a guardian of the person and property of a minor and may order support from either or both parents. Custody of a minor may be given to the Department of Health and Social Services, and payment of support money to the department may be ordered. (§ 4 art I ch 145 SLA 1957; am § 1 ch 76 SLA 1961; am §§ 1, 2 ch 110 SLA 1967; am § 1 ch 64 SLA 1969; am § 6 ch 104 SLA 1971)

Cross references. — See Rules of Children's Procedure, Alaska Rules of Court Procedure and Administration. As to prosecution of minor driving vehicle without owner's consent, see AS 28.35.010 (d).

Effect of amendments — The 1967 amendment rewrote the introductory language of subsection (a) and rewrote subsection (c).

The 1969 amendment, in the first sentence of subsection (b), deleted "AS 28.35.030, 28.35.040, or AS 28.35.050 —28.35.110, or" following "excepting," and substituted "may" for "need." In the second sentence of that subsection the amendment substituted "shall" for "may" and inserted "in the district court."

The 1971 amendment substituted "Department of Health and Social Services" for "Department of Health and Welfare" in the last sentence in subsection (c).

Editor's note. — Section 7, ch. 110, SLA 1967, as amended by § 80, ch. 69, SLA 1970, provides: "In exercising its jurisdiction under AS 47.10, the superior court may designate district judges and magistrates as masters under Civil Rule 53."

Legislative committee reports. — For report on amending bill, see 1961 House Journal, p. 140. For report on ch. 64, SLA 1969 (CSHB 10), see 1969 House Journal, p. 362.

Jurisdiction to regulate custody of infants does not depend upon domicile of parents. Clegg v. Abood 13 Alaska 187 (1951).

It has its origin in the protection that is due to the incompetent or helpless. Clegg v. Abood, 13 Alaska 187 (1951).

The court acts as parens patriae, protecting the child whose custody is in dispute and making its award solely according to the interests and welfare of the child. This is true, regardless of the settled or transient character of the parents' residence, or even of a child abandoned by its parents. Clegg v. Abood, 13 Alaska 187 (1951).

Hence, the residence of the child suffices, though the domicile of the parents be elsewhere. Clegg v. Abood, 13 Alaska 187 (1951).

Effect of decree of another court in custody cases. — That a parent brings the child into the jurisdiction of a court in violation of the decree of another court, will not deprive the court of the state where the child presently resides from determining matters of custody in cases of changed circumstances. Clegg v. Abood, 13 Alaska 187 (1951).

When person over or under certain age. — With respect to penal statutes, whether a person is over or under a certain age depends upon whether he has reached that particular anniversary of his birthday or not. State v. Linn, Sup. Ct. Op. No. 47 (File No. 122), 363 P.2d 361 (1961).

Requisites to determination of delinquency. — Before a juvenile can be determined delinquent in a proceeding which could result in commitment to an institution, thus curtailing his freedom, certain requisites must be met. First, written notice of the charges must be given to the juvenile and his parents sufficiently in advance of the proceedings to allow preparation to meet the charges. Second, the child and his parents must be apprised of the right to counsel, including appointed counsel in case of indigency. Third, the child may exercise his privilege against self-incrimination. Lastly, absent a valid confession, the determination of delinquency cannot be sustained in the absence of sworn testimony, which is subject to cross-examination. E.J. v. State, Sup. Ct. Op. No. 628 (File No. 1144), 471 P.2d 367 (1970).

The required standard of proof has been increased from "a preponderance of the evidence" to "beyond a reasonable doubt" in the adjudicatory stages of at least those delinquency proceedings in which a child is charged with an act that would be a crime if committed by an adult. E.J. v. State, Sup. Ct. Op. No. 628 (File No. 1144), 471 P.2d 367 (1970).

Violations of AS 04.15.060. — In cases involving violations of AS 04.15.060, offenders between the ages of 18 and 21 years may be punished as for a misdemeanor by fine or imprisonment; but offenders between the ages of 17 and 18 years must instead be proceeded against under the provisions of the juvenile laws. Purdy v. United States, 16 Alaska 173, 146 F. Supp. 762 (D. Alas. 1956)

Appeal after serving sentence. — If there remain collateral legal disabilities apart from the sentence, an appeal is not mooted even though the sentence has been served. E.J. v. State, Sup. Ct. Op. No. 628 (File No. 1144), 471 P.2d 367 (1970).

Am. Jur., ALR and C.J.S. references. — 27 Am. Jur., Infants, §§ 101 to 112; 31 Am. Jur., Juvenile Courts and Delinquents, Dependent and Neglected Children, §§ 13 to 50.

Another court's jurisdiction over a child as affected by assumption of jurisdiction by juvenile court, 11 ALR 147; 78 ALR 317; 146 ALR 1711.

Vagrancy of minors, 14 ALR 1507.

Homicide by juvenile as within jurisdiction of juvenile court, 48 ALR2d 662.

43 C.J.S. Infants §§ 6, 93 et seq.

Sec. 47.10.020. Investigation and petition. (a) Whenever a person informs the court of the facts which bring a minor within this chapter, the court shall appoint a competent person or agency to make a preliminary inquiry and report for the information of the court to determine whether the interests of the public or of the minor require that further action be taken. Upon the receipt of the report, the court may informally adjust or dispose of the matter without a hearing, or it may authorize the person having knowledge of the facts of the case to file with the court a petition setting out the facts. Where the court informally adjusts or disposes of the matter, the minor may not be detained or taken into the custody of the court, and the matter shall be closed by the court upon adjustment or disposition.

(b) The petition and all subsequent pleadings shall be styled as follows: "In the matter of ....., a minor under 18 years of age." The petition may be executed upon the petitioner's information and belief, and shall be verified. It shall include the following information:

never a person in this chapter, ncy to make a of the court to e minor require eport, the court a hearing, or it ts of the case to Where the court nor may not be matter shall be

ll be styled as ....., a minor cuted upon the ; It shall include

(1) the name, address and occupation of the petitioner, together with his relationship to the minor, and his interest in the matter;

(2) the name, age and address of the minor;

(3) a brief statement of the facts which bring the minor within this chapter;

(4) the names and addresses of the minor's parents;

(5) the name and address of the minor's guardian, or of the person having control or custody of the minor.

(c) If any of the facts required in this section are not known by the petitioner, he shall state in his petition that those facts are unknown to him. (§ 5 art I ch 145 SLA 1957)

Sec. 47.10.030. Summons and custody of minor. (a) After a petition is filed and after further investigation which the court directs, if the person having custody or control of the minor has not appeared voluntarily, the court shall issue a summons which (1) recites briefly the substance of the petition; (2) clearly states that at the hearing it is possible that parental rights and responsibilities may be terminated forever and that the minor may at the hearing be committed to the Department of Health and Social Services for possible adoption; and (3) directs the person having custody or control of the minor to appear personally in court with the minor at the place and at the time set forth in the summons.

(b) If the person summoned is not the parent or guardian of the minor, the court shall also give the parent or guardian notice of the place and time of the hearing. The court may also subpoena the parent of the minor, or any other person whose testimony may be necessary at the hearing. A summons, subpoena or other process may be served by a person authorized by law to make the service. Where personal service cannot be made, the court may direct that service of process be made by registered mail.

(c) If the minor is in such condition or surroundings that his welfare requires the immediate assumption of his custody by the court, the court may order, by endorsement upon the summons, that the officer serving the summons shall at once take the minor into custody and make the temporary placement of the minor which the court directs. (§ 6 art I ch 145 SLA 1957; am § 1 ch 110 SLA 1960; am § 6 ch 104 SLA 1971)

Effect of amendment. — The 1971 amendment substituted "Department of Health and Social Services" for "Department of Health and Welfare" in item (2) of subsection (a).

ALR references. — Notice to parent, and hearing, before commitment of delinquent, dependent, or neglected children, 76 ALR 247.

Right to and appointment of counsel in juvenile court proceedings, 60 ALR2d 691.

Sec. 47.10.040. Release of minor. A minor who is taken into custody may, in the discretion of the court and upon the written promise of the parent, guardian or custodian to bring the minor before the court at a

time specified by the court, be released to the care and custody of the parent, guardian or custodian. The minor, if not released, shall be detained as provided by § 140 of this chapter. The court may determine whether the father or mother or another person shall have the custody and control of the minor for the duration of the proceedings. If the minor is over 14 years of age, his desires in the matter shall be given consideration by the court. (§ 7 art I ch 145 SLA 1957)

Sec. 47.10.050. Appointment of guardian ad litem. Whenever in the course of proceedings instituted under this chapter it appears to the court that the welfare of a minor will be promoted by the appointment of a guardian ad litem, the court may make the appointment. (§ 8 art I ch 145 SLA 1957)

Sec. 47.10.060. Waiver of jurisdiction. (a) If the court finds at a hearing on a petition that there is probable cause for believing that a minor is delinquent and finds that the minor is not amenable to treatment under this chapter, it shall order the case closed. After a case is closed under this subsection, the minor may be prosecuted as if he were an adult.

(b) Repealed by § 8 ch 110 SLA 1967, effective January 1, 1968.

(c) Repealed by § 8 ch 110 SLA 1967, effective January 1, 1968.

(d) A minor is unamenable to treatment under this chapter if he probably cannot be rehabilitated by treatment under this chapter before he reaches 21 years of age. In determining whether a minor is unamenable to treatment, the court may consider the seriousness of the offense the minor is alleged to have committed, the minor's history of delinquency, the probable cause of the minor's delinquent behavior, and the facilities available to the division of youth and adult authority for treating the minor.

(e) If a person who has been tried as an adult under this section has completed his sentence and five years have elapsed, he may petition (or the Department of Health and Social Services may petition for him) the superior court to seal the records of all criminal proceedings against him and all punishments assessed against him, except for traffic offenses, while he was a minor. If the superior court finds that the punishment assessed against the person has had its intended rehabilitative effect, the superior court shall order the record of proceedings and the record of punishments sealed. Sealing the records restores civil rights removed because of a conviction. No person may ever use records so sealed for any purpose. (§ 9 art I ch 145 SLA 1957; am § 1 ch 118 SLA 1962; am §§ 3, 8 ch 110 SLA 1967; am § 6 ch 104 SLA 1971)

Effect of amendments. — The 1967 amendment rewrote subsection (a) and repealed subsections (b) and (c).

The 1971 amendment substituted "Department of Health and Social Services" for "Department of Health and Welfare" in the first sentence of subsection (e).

Sec. 47.10.070. Hearings. The court may conduct the hearing in an informal manner in the courtroom or in chambers. All hearings under this chapter are without a jury and the usual rules of evidence do not apply. However, a hearing may be held before a young adult advisory panel in accordance with § 75 of this chapter. The court shall give notice of the hearing to the department and it may send a representative to the hearing. The court shall also transmit a copy of the petition to the department. The representative of the department may also be heard at the hearing. The public shall be excluded from the hearing, but the court, in its discretion, may permit individuals to attend a hearing, if their attendance is compatible with the best interests of the minor. (§ 10(1) art I ch 145 SLA 1957; am § 1 ch 49 SLA 1966)

Effect of amendment. — The 1966 amendment added the second sentence.

Legislative committee report. — For report on ch. 49, SLA 1966, see 1966 House Journal, p. 52.

Constitutionality. — See In re Gault, 387 U.S. 1, 87 Sup. Ct. 1428, 18 L. Ed. 2d 527 (1967), discussing due process requirements in juvenile delinquency proceedings.

Applicability of rules of evidence in juvenile delinquency proceedings, 43 ALR2d 1128.

Degree of proof in juvenile delinquency proceedings, 43 ALR2d 1138.

Sec. 47.10.075. Young adult advisory panels. (a) Unless the minor objects, the court may select a young adult advisory panel to hear the case and advise the court of a recommended judgment and order. The court may consider any of the panel recommendations in making its judgment and order in the case.

(b) The principal of each high school shall submit annually to the court a list of the students enrolled in grades 10, 11 and 12. The court shall determine the method of selecting the members of each panel.

(c) A student shall be excused from attending school during the time he is serving as a panel member. No student may serve more than once each year on a panel.

(d) A student shall be excused from service as a panel member if he submits a written request to the court indicating the reason he does not wish to serve. (§ 2 ch 49 SLA 1966)

Legislative committee report. — For report on ch. 49, SLA 1966, see 1966 House Journal, p. 52.

Sec. 47.10.080. Judgments and orders. (a) The court, at the conclusion of the hearing, or thereafter as the circumstances of the case may require, shall find and enter a judgment that the minor is or is not a delinquent, or a child in need of supervision, or dependent minor.

(b) If the court finds that the minor is delinquent, it shall

(1) order the minor committed to the Department of Health and Social Services for an indeterminate period of time not to extend past a specified date or in any event past the day the minor becomes 19, except

that the department may petition the court for continued supervision for an additional one-year period for minors who have not responded to treatment, and may direct the minor's placement in a juvenile correctional school, detention home, or detention facility designated by the department; the minor may be released from placement or detention and placed on probation on order of the court; or

(2) order the minor placed on probation, to be supervised by the department, and release him to his parents, guardian, or a suitable person; if the court orders the minor placed on probation, it may specify the terms and conditions of probation; the probation may be for an indeterminate period of time, not to extend past a specified date and in no event past the day the minor becomes 19, except that the department may petition the court for continued supervision for an additional one-year period for minors who have not responded to treatment.

(c) If the court finds that the minor is dependent, it shall

(1) order the minor committed to the department for an indeterminate period of time not to exceed the date the minor becomes 19 years of age, except that the department may petition the court for continued supervision for an additional one-year period for minors who have not responded to treatment;

(2) order the minor released to his parents, guardian, or some other suitable person; if the court releases the minor, it shall direct the department to supervise the care and treatment given to the minor; the department's supervision may not extend past the date the minor becomes 19 years of age, except that the department may petition the court for continued supervision for an additional one-year period for minors who have not responded to treatment; or

(3) by order, terminate parental rights and responsibilities of one or both parents and commit the child to the department or to a legally appointed guardian of the person of the child, if one of the following conditions exists:

(A) Each parent, or the surviving parent, or one parent if the other has been deprived of custody and visitation rights wishes to relinquish the child to the department or to a legally appointed guardian of the person of the child for adoptive purposes, and the relinquishment is in writing, signed and acknowledged before the court or duly authorized representative of the department and filed with the court;

(B) the child has been abandoned for a period of not less than six months by

(i) both parents, or

(ii) the surviving parent, or

(iii) one parent if the other has been deprived of custody and visitation rights;

(C) each parent, the surviving parent, or one parent if the other has been deprived of custody and visitation rights has been judicially determined to be of unsound mind and the disability has not been

removed and the parent has been hospitalized for reasons of mental illness diagnosed as permanent or of long duration; or

(D) each parent, or the surviving parent, or one parent if the other has been judicially deprived of custody and visitation rights, has demonstrated by his conduct, proven by clear and convincing proof amounting to more than a preponderance of the evidence that he is unfit to continue to exercise his parental rights and responsibilities.

(d) An order issued under (c) (3) of this section authorizes the commissioner of health and social services or his designee or the guardi of the person of the child to consent to the adoption of the child.

(e) If the court finds that the minor is not delinquent, a child in need of supervision, or dependent, it shall immediately order his release from its custody and his return to his parents, guardian, or custodian, and close the case.

(f) A minor found to be delinquent, a child in need of supervision, or dependent is a ward of the court as long as he is committed to the department or the department has the power to supervise his actions. The court shall review an order made under (b) or (c) (1) or (2) or (j) of this section annually, and may review the order more frequently to determine if continued placement, probation, or supervision is in the best interest of the minor and the public, and to determine if the minor is being treated fairly. The department or the minor's parents or guardian is entitled to a review on application. The minor need not be present at the review.

(g) No adjudication under this chapter upon the status of a child may operate to impose any of the civil disabilities ordinarily imposed by conviction upon a criminal charge, nor may a minor afterward be considered a criminal by the adjudication, nor may the adjudication be afterward deemed a conviction, nor may a minor be charged with or convicted of a crime in a court, except as provided in this chapter. The commitment and placement of a child and evidence given in the court are not admissible as evidence against the minor in a subsequent case or proceedings in any other court, nor does the commitment and placement or evidence operate to disqualify a minor in a future civil service examination or appointment in the state.

(h) The department shall pay all court costs incurred in all proceedings in connection with the adjudication of delinquency under this chapter, including hearings which result in the release of the minor.

(i) A minor, his parents or guardian acting on his behalf, or the department may appeal a judgment or order, or the stay, modification, setting aside, revocation, or enlargement of a judgment or order issued by the court under this chapter.

(j) If the court finds the minor is a child in need of supervision it shall make any of the following orders of disposition for his supervision, care and rehabilitation.

(1) any order which is authorized under (c) of this section; or

(2) order the minor placed on probation under those conditions and limitations that the court may prescribe. (§ 10(2) art I ch 145 SLA 1957; am § 2 ch 110 SLA 1960; am § 2 ch 118 SLA 1962; am § 1 ch 40 SLA 1967; am §§ 1—4 ch 27 SLA 1970; am §§ 12—15 ch 245 SLA 1970; am § 6 ch 104 SLA 1971)

Effect of amendments. — The 1967 amendment rewrote subsection (c) (3) (B).

The first 1970 amendment added "or thereafter as the circumstances of the case may require" and "or a child in need of supervision" in subsection (a), inserted "a child in need of supervision" in subsection (e), inserted "a child in need of supervision" in the first sentence of subsection (f), and near the beginning of the second sentence of that subsection inserted "or (j)." The amendment also added subsection (j).

The second 1970 amendment substituted "19, except that the department may petition the court for continued supervision for an additional one-year period for minors who have not responded to treatment" for "21" in subsections (b) (1) and (b) (2), substituted "19" for "21" and added the exception in subsections (c) (1) and (c) (2).

The 1971 amendment substituted "Department of Health and Social Services" for "Department of Health and Welfare" in subsection (b) (1) and "commissioner of health and social services" for "commissioner of health and welfare" in subsection (d).

Legislative committee reports. — For report on amending bill, see 1960 House Journal, p. 494.

For report on ch. 40, SLA 1967 (HB 131), see 1967 House Journal, p. 339. Chapter 245, SLA 1970 (HCSSB 399 am H), was identical to CSHB 406 (Jud.). For report on CSHB 406 (Jud.), see 1970 House Journal Supplement No. 6.

A judge cannot consider a juvenile offense as a criminal conviction for the purpose of prescribing a mandatory sentence. Berfield v. State, Sup. Ct. Op. No. 581 (File No. 960), 458 P.2d 1008 (1969).

The judge's consideration of factors relating to accused's life, characteristics, background and behavior prior to reaching the age of 18 years did not mean that he considered accused a criminal or that he was using the juvenile offenses as criminal convictions in determining the sentence to impose. Berfield v. State, Sup. Ct. Op. No. 581 (File No. 960), 458 P.2d 1008 (1969).

Sec. 47.10.090. Records. (a) The court shall make and keep records of all cases brought before it. The court's official records may be inspected only with the court's permission and only by persons having a legitimate interest in them. All information and social records pertaining to a minor and prepared in the discharge of his official duty by an employee of the court or by a federal, state or city agency are privileged and shall not be disclosed directly or indirectly to anyone without the court's permission. However, a state or city law enforcement agency shall disclose information regarding the case which is needed by the person or agency charged with making a preliminary investigation for the information of the court.

(b) The name or picture of a minor under the jurisdiction of the court may not be made public by a newspaper radio, or television station in connection with the minor's status as a delinquent or dependent child, except as authorized by order of the court. A person who violates this provision is guilty of a misdemeanor, and upon conviction is punishable by a fine of not more than $500 or by imprisonment for not more than one year, or by both. (§ 10(3) (4) art I ch 145 SLA 1957)

(d) If the court finds that probable cause exists, it shall determine whether the minor should be detained pending the hearing on the petition or released. It may either order the minor held in detention or order him to be released to the custody of a suitable person pending the hearing on the petition. If the court finds no probable cause, it shall order the minor released and close the case.

(e) Except for temporary detention pending a detention hearing, no minor may be detained except by court order. (§ 15 art I ch 145 SLA 1957; am § 3 ch 118 SLA 1962; am § 2 ch 100 SLA 1971; am § 6 ch 104 SLA 1971)

Effect of amendments. — The first 1971 amendment deleted "or evading the person having legal custody of him" following "justice" in the first sentence of subsection (a).

The second 1971 amendment substituted "Department of Health and Social Services" for "Department of Health and Welfare" in the first sentence of subsection (b).

Sec. 47.10.142. Emergency custody and temporary placement hearing. (a) The Department of Health and Social Services may take emergency custody of a minor upon discovering any of the following circumstances:

(1) the minor has been abandoned;

(2) the minor has been grossly neglected by his parents or guardian, as "neglect" is defined in AS 47.17.070(5), so that immediate removal from his surroundings is, in the determination of the department, necessary to protect his life;

(3) the minor has been abused, as "abuse" is defined in AS 47.17.070(1), so that immediate medical attention is necessary, in the determination of the department.

(b) A minor who has left home and is evading the person having legal custody of him may obtain the services of the department. The department shall assess the situation and furnish the minor with the social services it considers appropriate to protect the well-being of the minor and to preserve his family life if preserving it is considered desirable under the circumstances. If, after assessing the situation, considering the wishes of the minor, and furnishing appropriate social services, the department considers it necessary, the department may take emergency custody of the minor.

(c) When a child is taken into custody under (a) or (b) of this section, the department shall immediately, and in no event more than 12 hours later unless prevented by lack of communication facilities, notify the parents or the person or persons having custody of the child and the court of the action and file with the court a petition alleging dependency.

(d) The court shall immediately, and in no event more than 48 hours after being notified unless prevented by lack of transportation, hold a hearing at which the minor, if his health permits, and his parents or guardian, if they can be found, shall be permitted to be present. The

court shall determine whether probable cause exists for believing the minor to be a dependent minor, as defined in § 290(3) of this chapter. The court shall inform the minor, and his parents or guardian if they can be found, of the reasons given as constituting probable cause and the reasons given as authorizing his temporary placement.

(e) If the court finds that probable cause exists it shall order the minor committed to the department for temporary placement, or order him returned to the custody of his parents or guardian subject to the department's supervision of his care and treatment. If the court finds no probable cause it shall order the minor returned to the custody of his parents or guardian. (§ 3 ch 100 SLA 1971; am § 6 ch 104 SLA 1971)

Effect of amendment. — The 1971 amendment substituted "Department of Health and Social Services" for "Department of Health and Welfare" at the beginning of subsection (a).

Article 2. Juvenile Institutions.

Section		Section	
150.	General powers of department over juvenile institutions	190.	Conditions governing detention
160.	Duties of department	200.	Releasing juveniles after commitment
170.	Power of cities to maintain and operate home or facility	210.	Youth counsellors
180.	Operation of homes and facilities	220.	Grants-in-aid

Sec. 47.10.150. General powers of department over juvenile institutions. The Department of Health and Social Services may

(1) purchase, lease or construct buildings or other facilities for the care, detention, rehabilitation and education of dependent or delinquent minors;

(2) adopt plans for construction of juvenile homes, juvenile detention facilities, and other juvenile institutions;

(3) adopt standards and regulations under this chapter for the design, construction, repair, maintenance and operation of all juvenile detention homes, facilities, and institutions;

(4) inspect periodically each juvenile detention home, facility, or other institution to insure that the standards and regulations adopted are being maintained;

(5) reimburse cities maintaining and operating juvenile detention homes and facilities;

(6) enter into contracts and arrangements with cities and state and federal agencies to carry out the purposes of this chapter;

(7) do all acts necessary to carry out the purposes of this chapter;

(8) adopt the regulations necessary to carry out this chapter;

(9) accept donations, gifts or bequests of money or other property for use in construction of juvenile homes, institutions or detention facilities;

(10) operate juvenile homes when municipalities are unable to do so;

(11) receive, care for, and place in a juvenile detention home, the minor's own home, a foster home, or correctional school or treatment institution all minors committed to its custody under this chapter. (§ 3 art II ch 145 SLA 1957; am § 1 ch 152 SLA 1959; am § 6 ch 104 SLA 1971)

Effect of amendment. — The 1971 amendment substituted "Department of Health and Social Services" for "Department of Health and Welfare" near the beginning of this section.

Am. Jur. reference. — 26 Am. Jur., Houses of Correction, Reformation and Refuge, § 1 et seq.

Sec. 47.10.160. Duties of department. The Department of Health and Social Services shall

(1) accept all minors committed to the custody of the department and all minors who are involved in a written agreement under § 230(c) of this chapter, and provide for the welfare, control, care, custody, and placement of these children in accordance with the provisions of this chapter;

(2) require and collect statistics on juvenile offenses and offenders in Alaska;

(3) conduct studies and prepare findings and recommendations on the need, number, type, construction, maintenance, and operating costs of juvenile homes, facilities and the other institutions, and adopt and submit a plan for construction of the homes, facilities, and institutions when needed, together with a plan for financing the construction programs;

(4) examine, where possible, all facilities, institutions, and places of juvenile detention in Alaska and inquire into their methods and the management of juveniles in them. (§ 5 art II ch 145 SLA 1957; am § 4 ch 110 SLA 1967; am § 4 ch 100 SLA 1971; am § 6 ch 104 SLA 1971)

Effect of amendments. — The 1967 amendment deleted "handled by all district magistrate courts" following "offenders" in paragraph (2).

The first 1971 amendment inserted "all minors who are involved in a written agreement under § 230(c) of this chapter, and" in paragraph (1).

The second 1971 amendment substituted "Department of Health and Social Services" for "Department of Health and Welfare" near the beginning of this section.

Sec. 47.10.170. Power of cities to maintain and operate home or facility. (a) A city having a population of 1700 or more, according to the latest decennial census, or found by the department to have a present population of 1700 or more may maintain and operate a juvenile detention home or facility.

(b) The city may receive grants-in-aid from the state for costs of operation of the homes or facilities. (§ 5 art II ch 145 SLA 1957)

Sec. 47.10.180. Operation of homes and facilities. (a) The Department of Health and Social Services shall adopt standards and

regulations for the operation of juvenile detention homes and juvenile detention facilities in the state.

(b) The department may enter into contracts with cities and other governmental agencies for the detention of juveniles before and after commitment by juvenile authorities. No contract may be made for longer than one year. (§ 8 art II ch 145 SLA 1957; am § 3 ch 97 SLA 1960; am § 6 ch 104 SLA 1971)

Effect of amendment. — The 1971 amendment substituted "Department of Health and Social Services" for "Department of Health and Welfare" in subsection (a).

Sec. 47.10.190. Conditions governing detention. When the court commits a minor to the custody of the department, the department shall arrange to place the juvenile in a detention home, facility or another suitable place which the department designates for that purpose. A juvenile detained in a jail or similar institution at the request of the department shall be held in custody in a room or other place apart and separate from adults. (§ 9 art II ch 145 SLA 1957)

Sec. 47.10.200. Releasing juveniles after commitment. A juvenile delinquent who by his conduct gives sufficient evidence that he has reformed may be released at any time under the conditions and regulations which the department considers proper, if it appears to the satisfaction of the department that there is a reasonable probability that the juvenile will remain at liberty without violating the law. (§ 10 art II ch 145 SLA 1957)

Sec. 47.10.210. Youth counsellors. The department may employ youth counsellors. Youth counsellors shall exercise the duties of probation officers and shall prepare preliminary investigations for the information of the court. They shall also carry out other duties in the care and treatment of minors which are consistent with the intent of this chapter. Youth counsellors have the powers of a peace officer with respect to the service of process, the making of arrests of minors who violate state or municipal law, and the execution of orders of the court relating to juveniles. The youth counsellors shall assist and advise the courts in the furtherance of the welfare and control of minors under the court's jurisdiction. (§ 11 art II ch 145 SLA 1957)

Sec. 47.10.220. Grants-in-aid. The Department of Health and Social Services may accept grants-in-aid from the federal government or private foundations and may accept other gifts consistent with the purposes of this chapter. (§ 13 art II ch 145 SLA 1957; am § 6 ch 104 SLA 1971)

Effect of amendment. — The 1971 amendment substituted "Department of Health and Social Services" for "Department of Health and Welfare."

Article 3. Care of Children.

Section
230. Powers and duties of department over care of child
240. Adequacy of home or institution
250. Standards of care
260. Payment of costs

Sec. 47.10.230. Powers and duties of department over care of child. (a) The Department of Health and Social Services shall arrange for the care of every child committed to its custody by placing him in a foster home or in the care of an agency or institution providing care for children inside or outside the state. The department may place a child in a suitable family home, with or without compensation, and may place a child released to it, in writing verified by the parent, or guardian or other person having legal custody, for adoptive purposes, in a home for adoption in accordance with existing law.

(b) The department may pay the costs of maintenance which are necessary to assure adequate care of the child, and may accept funds from the federal government which are granted to assist in carrying out the purposes of this chapter, or which are paid under contract entered into with a federal department or agency. No child under the care of the department may be placed in a family home or institution that does not maintain adequate standards of care.

(c) The department may receive, care for, and make appropriate placement of minors accepted for care for a period of up to six months on the basis of an individual voluntary written agreement between the minor's parent, legal guardian, or other person having legal custody and the department. The agreement may include provisions for payment, in whole or in part, to the department for the minor's care and treatment. The agreement entered into shall not operate to prohibit a minor's parent, legal guardian, or other person who had legal custody from regaining care of the minor at any time. (§ 1 art III ch 145 SLA 1957; am § 5 ch 100 SLA 1971; am § 6 ch 104 SLA 1971)

Effect of amendments. — The first 1971 amendment added subsection (c).

The second 1971 amendment substituted "Department of Health and Social Services" for "Department of Health and Welfare" in the first sentence of subsection (a).

Sec. 47.10.240. Adequacy of home or institution. (a) A representative of the department shall visit, as often as is considered necessary, every foster home or institution in which a child is placed, and if not satisfied as to the care given, may remove the child from the foster home or institution and place him elsewhere.

(b) The person or institution receiving a child shall submit the reports the department requires as to the education, health and welfare of the child and the conditions under which he is living. (§ 2 art III ch 145 SLA 1957)

Sec. 47.10.250. Standards of care. The Department of Health and Social Services shall establish standards of care and regulations desirable for the welfare of every child under its care. (§ 3 art III ch 145 SLA 1957; am § 6 ch 104 SLA 1971)

Effect of amendment. — The 1971 amendment substituted "Department of Health and Social Services" for "Department of Health and Welfare."

Sec. 47.10.260. Payment of costs. The department shall pay the proper and necessary costs of the court and witnesses and other expenses necessarily incurred in the enforcement of §§ 230—260 of this chapter. (§ 4 art III ch 145 SLA 1957)

Article 4. General Provisions.

Section
270. Appropriation
280. Purpose of chapter
290. Definitions

Sec. 47.10.270. Appropriation. Funds to carry out this chapter shall be provided for in the general appropriation act of the legislature. (§ 1 art IV ch 145 SLA 1957)

Sec. 47.10.280. Purpose of chapter. The purpose of this chapter is to secure for each minor the care and guidance which is as nearly as possible equivalent to that which should be given him by his parents. The principle is recognized that minors under the jurisdiction of the court are wards of the state, subject to its discipline and entitled to its protection, and that the state may act to safeguard them from neglect or injury and to enforce the legal obligation due to them and from them. (§ 2 art I ch 145 SLA 1957)

Sec. 47.10.290. Definitions. In this chapter, unless the context otherwise requires,

(1) "court" means the superior court of the state;

(2) "delinquent minor" is a minor whom the court determines is within the provisions of § 10 (a) (1) of this chapter;

(3) "dependent minor" is a minor whom the court determines is within the provisions of § 10 (a) (4), (5), (6), (7), (8), or (9) of this chapter;

(4) "juvenile detention facility" means separate quarters within a city jail used for the detention of delinquent minors;

(5) "juvenile detention home" or "detention home" is a separate establishment, exclusively devoted to the detention of minors on a short-term basis and not a part of an adult jail;

(6) "minor" is a person under 18 years of age;

(7) "child in need of supervision" is a minor whom the court determines is within the provisions of § 10 (a) (2), (3) or (6). (§ 1 art I ch 145 SLA 1957; am § 5 ch 110 SLA 1967; am §§ 5, 6 ch 27 SLA 1970)

Sec. 47.15.060. Enforcement. The courts, departments, agencies and officers of this state and its subdivisions shall enforce this compact and shall do all things appropriate to the effectuation of its purposes and intent which are within their respective jurisdiction. (§ 6 ch 88 SLA 1960)

Sec. 47.15.070. Additional procedures not precluded. In addition to the procedures provided in articles IV and VI of the compact for the return of a runaway juvenile, the particular states, the juvenile or his parents, the courts, or other legal custodian involved may agree upon and adopt any plan or procedure legally authorized under the laws of this state and the other respective party states for the return of the runaway juvenile. (§ 7 ch 88 SLA 1960)

Sec. 47.15.080. Short title. This chapter may be cited as the Uniform Interstate Compact on Juveniles. (§ 8 ch 88 SLA 1960)

Chapter 17. Child Protection.

Section
10. Purpose
20. Persons required to report
30. Action on reports; termination of parental rights
40. Central registry; confidentiality
50. Immunity
60. Evidence not privileged
70. Definitions

Sec. 47.17.010. Purpose. In order to protect children whose health and well-being may be adversely affected through the infliction, by other than accidental means, of harm through physical abuse or neglect requiring the attention of a practitioner of the healing arts, the legislature requires the reporting of these cases by practitioners and others to the appropriate public authorities. It is the intent of the legislature that, as a result of these reports, protective services will be made available in an effort to prevent further harm to the child, to safeguard and enhance the general well-being of the children in this state, and to preserve family life whenever possible. (§ 1 ch 100 SLA 1971)

Sec. 47.17.020. Persons required to report. (a) The following persons who, in the performance of their professional duties, have cause to believe that a child has suffered harm as a result of abuse or neglect shall immediately report the harm to the nearest office of the department:

(1) practitioners of the healing arts;
(2) school teachers;
(3) social workers;
(4) peace officers, and officers of the division of corrections;
(5) administrative officers of institutions.

(b) This section does not prohibit the named persons from reporting

cases which have come to their attention in their nonprofessional capacities nor does it prohibit any other person from reporting a child's harm which he has cause to believe is a result of abuse or neglect. These reports shall be made to the nearest office of the department.

(c) If the person making a report of harm under this section cannot reasonably contact the nearest office of the department, and immediate action is necessary for the well-being of the child, the person shall make the report to a peace officer. The peace officer shall take immediate action to protect the child and shall, at the earliest opportunity, notify the nearest office of the department. (§ 1 ch 100 SLA 1971)

Sec. 47.17.030. Action on reports; termination of parental rights. (a) If a child, concerning whom a report of harm is made, is believed to reside within the boundaries of a local government exercising health functions for the area in which the child is believed to reside, the department may, upon receipt of the report, refer the matter to the appropriate health or social services agency of that local government. For cases not referred to an agency of a local government, the department shall, for each report received, investigate and take action, in accordance with law, which may be necessary to prevent further harm to the child or to insure the proper care and protection of the child.

(b) A local government health or social services agency receiving a report of harm shall, for each report received, investigate and take action, in accordance with law, which may be necessary to prevent further harm to the child or to insure the proper care and protection of the child. In addition, the agency receiving a report of harm shall forward a copy of its report of the investigation, including information the department requires by regulation, to the department.

(c) Action shall be taken regardless of whether the identity of the person making the report of harm is known.

(d) Before the department or a local government health or social services agency may seek the termination of parental rights, under AS 47.10.080(c) (3), it shall offer protective social services and pursue all other reasonable means of protecting the child. (§ 1 ch 100 SLA 1971)

Sec. 47.17.040. Central registry; confidentiality. (a) The department shall maintain a central registry of all investigation reports but not of the reports of harm.

(b) Investigation reports and reports of harm filed under this chapter are considered confidential and are not subject to public inspection and copying under AS 09.25.110 and 09.25.120. However, in accordance with department regulations, investigation reports may be used by appropriate governmental agencies with child-protection functions, inside and outside Alaska, in connection with investigations or judicial proceedings involving child abuse, neglect, or custody. Sec. 47.17.050. Immunity. A person who, in good faith, makes a report under this chapter, or who participates in judicial proceedings related to the submission of reports under this chapter, is immune from any civil or criminal liability which might otherwise be incurred or imposed. (§ 1 ch 100 SLA 1971)

Sec. 47.17.060. Evidence not privileged. Neither the physician-patient nor the husband-wife privilege is a ground for excluding evidence regarding a child's harm, or its cause, in a judicial proceeding related to a report made under this chapter. (§ 1 ch 100 SLA 1971)

Sec. 47.17.070. Definitions. In this chapter

(1) "abuse" means the infliction, by other than accidental means, of physical harm upon the body of a child;

(2) "child" means a person under 16 years of age;

(3) "department" means the Department of Health and Social Services;

(4) "institution" means a private or public hospital or other facility providing medical diagnosis, treatment, or care;

(5) "neglect" means the failure to provide necessary food, care, clothing, shelter, or medical attention for a child;

(6) "practitioner of the healing arts" includes chiropractors, dentists, health aides, nurses, optometrists, osteopaths, physical therapists, physicians, psychiatrists, psychologists, religious healing practitioners, and surgeons. (§ 1 ch 100 SLA 1971; am § 6 ch 104 SLA 1971)

Effect of amendment. — The 1971 amendment substituted "Department of Health and Social Services" for "Department of Health and Welfare" in paragraph (3).

Chapter 20. Exceptional Children.

Section	Section
10. Assistance authorized	40. Purpose
20. Standards for assistance	50. Definitions
30. Appropriations	

Sec. 47.20.010. Assistance authorized. The Department of Health and Social Services may provide professional guidance and financial assistance to organized groups of parents according to standards and regulations devised by the department for providing special services, evaluation and special training required by exceptional children who are educable or trainable but physically or mentally retarded. (§ 2 ch 118 SLA 1961; am § 6 ch 104 SLA 1971)

Effect of amendment. — The 1971 amendment substituted "Department of Health and Social Services" for "Department of Health and Welfare."

Sec. 47.20.020. Standards for assistance. The department shall

SB-68

Sec. 47.10.070. Hearings. The court may conduct the hearing in an informal manner in the courtroom or in chambers. All hearings under this chapter are without a jury and the usual rules of evidence do not apply. However, a hearing may be held before a young adult advisory panel in accordance with § 75 of this chapter. The court shall give notice of the hearing to the department and it may send a representative to the hearing. The court shall also transmit a copy of the petition to the department. The representative of the department may also be heard at the hearing. The public shall be excluded from the hearing, but the court, in its discretion, may permit individuals to attend a hearing, if their attendance is compatible with the best interests of the minor. (§ 10(1) art I ch 145 SLA 1957; am § 1 ch 49 SLA 1966)

Effect of amendment.—The 1966 amendment added the second sentence.

Legislative committee report.—For legislative committee report on ch. 49, SLA 1966, see House Journal (1966), p. 52.

Constitutionality.—See In re Gault, 387 U.S. 1, 87 Sup. Ct. 1428, 18 L. Ed. 2d 527 (1967), discussing due process requirements in juvenile delinquency proceedings.

Sec. 47.10.075. Young adult advisory panels. (a) Unless the minor objects, the court may select a young adult advisory panel to hear the case and advise the court of a recommended judgment and order. The court may consider any of the panel recommendations in making its judgment and order in the case.

(b) The principal of each high school shall submit annually to the court a list of the students enrolled in grades 10, 11 and 12. The court shall determine the method of selecting the members of each panel.

(c) A student shall be excused from attending school during the time he is serving as a panel member. No student may serve more than once each year on a panel.

(d) A student shall be excused from service as a panel member if he submits a written request to the court indicating the reason he does not wish to serve. (§ 2 ch 49 SLA 1966)

Legislative committee report.—For legislative committee report on ch. 49, SLA 1966, see House Journal (1966), p. 52.

Sec. 47.10.080. Judgments and orders. (a) The court, at the conclusion of the hearing, or thereafter as the circumstances of the case may require, shall find and enter a judgment that the minor is or is not a delinquent, or a child in need of supervision, or dependent minor.

(b) If the court finds that the minor is delinquent, it shall

(1) order the minor committed to the Department of Health and Welfare for an indeterminate period of time not to extend past a specified date or in any event past the day the minor becomes

19, except that the department may petition the court for continued supervision for an additional one-year period for minors who have not responded to treatment; and may direct the minor's placement in a juvenile correctional school, detention home, or detention facility designated by the department; the minor may be released from placement or detention and placed on probation on order of the court; or

(2) order the minor placed on probation, to be supervised by the department, and release him to his parents, guardian, or a suitable person; if the court orders the minor placed on probation, it may specify the terms and conditions of probation; the probation is to be for an indeterminate period of time, not to extend past a specified date and in no event past the day the minor becomes 19, except that the department may petition the court for continued supervision for an additional one-year period for minors who have not responded to treatment.

(c) If the court finds that the minor is dependent, it shall

(1) order the minor committed to the department for an indeterminate period of time not to exceed the date the minor becomes 19 years of age, except that the department may petition the court for continued supervision for an additional one-year period for minors who have not responded to treatment;

(2) order the minor released to his parents, guardian, or some other suitable person; if the court releases the minor, it shall direct the department to supervise the care and treatment given to the minor; the department's supervision may not extend past the date the minor becomes 19 years of age, except that the department may petition the court for continued supervision for an additional one-year period for minors who have not responded to treatment; or

(3) by order, terminate parental rights and responsibilities of one or both parents and commit the child to the department or to a legally appointed guardian of the person of the child, if one of the following conditions exists:

(A) Each parent, or the surviving parent, or one parent if the other has been deprived of custody and visitation rights wishes to relinquish the child to the department or to a legally appointed guardian of the person of the child for adoptive purposes, and the relinquishment is in writing, signed and acknowledged before the court or duly authorized representative of the department and filed with the court;

(B) the child has been abandoned for a period of not less than six months by

(i) both parents, or

(ii) the surviving parent, or

(iii) one parent if the other has been deprived of custody and visitation rights;

(C) each parent, the surviving parent, or one parent if the other has been deprived of custody and visitation rights has been judicially determined to be of unsound mind and the disability has not been removed and the parent has been hospitalized for reasons of mental illness diagnosed as permanent or of long duration; or

(D) each parent, or the surviving parent, or one parent if the other has been judicially deprived of custody and visitation rights, has demonstrated by his conduct, proven by clear and convincing proof amounting to more than a preponderance of the evidence that he is unfit to continue to exercise his parental rights and responsibilities.

(e) If the court finds that the minor is not delinquent, a child in need of supervision, or dependent, it shall immediately order his release from its custody and his return to his parents, guardian, or custodian, and close the case.

(f) A minor found to be delinquent, a child in need of supervision, or dependent is a ward of the court as long as he is committed to the department or the department has the power to supervise his actions. The court shall review an order made under (b) or (c)(1) or (2) or (j) of this section annually, and may review the order more frequently to determine if continued placement, probation, or supervision is in the best interest of the minor and the public, and to determine if the minor is being treated fairly. The department or the minor's parents or guardian is entitled to a review on application. The minor need not be present at the review.

(j) If the court finds the minor is a child in need of supervision it shall make any of the following orders of disposition for his supervision, care and rehabilitation:

(1) any order which is authorized under (c) of this section; or

(2) order the minor placed on probation under those conditions and limitations that the court may prescribe.

(am § 1 ch 40 SLA 1967; am §§ 1—4 ch 27 SLA 1970; am §§ 12—15 ch 245 SLA 1970)

Effect of amendments. — The 1967 amendment rewrote subsection (c)(3)(B).

The first 1970 amendment added "or thereafter as the circumstances of the case may require" and "or a child in need of supervision" to subsection (a), inserted "a child in need of supervision" in subsection (e), inserted "a child in need of supervision" in the first sentence of subsection (f), and near the beginning of the second sentence of that subsection inserted "or [illegible]." The amendment also added subsection (j).

The second 1970 amendment substituted "19, except that the department may petition the court for continued supervision for an additional one-year period for minors who have not re-

sponded to treatment" for "21" in subsections (b)(1) and (b)(2), substituted "19" for "21" and added the exception in subsections (c)(1) and (c)(2).

As the rest of the section was not affected by the amendments, it is not set out.

Legislative committee reports.—For legislative committee report on ch. 40 SLA 1967 (HB 151), see House Journal (1967), p. 339. Chapter 215, SLA 1970 (HCSSB 339 am H), was identical to CSHB 406. For report on CSHB 406, see 1970 House Journal Supplement No. 6.

A judge cannot consider a juvenile offense as a criminal conviction for the purpose of prescribing a mandatory sentence. Berfield v. State, Sup. Ct. Op. No. 581 (File No. 960), 458 P.2d 1008 (1969).

The judge's consideration of factors relating to accused's life, characteristics, background and behavior prior to reaching the age of 18 years did not mean that he considered accused a criminal or that he was using the juvenile offenses as criminal convictions in determining the sentence to impose. Berfield v. State, Sup. Ct. Op. No. 581 (File No. 960), 458 P.2d 1008 (1969).

Sec. 47.10.100. Retention of jurisdiction over minor. (a) The court retains jurisdiction over the case and may at any time stay execution, modify, set aside, revoke, or enlarge a judgment or order, or grant a new hearing, in the exercise of its power of protection over the minor and for his best interest, until he becomes 19 years of age, unless sooner discharged by the court, except that the department may petition the court for continued supervision for an additional one-year period for minors who have not responded to treatment. An application for any of these purposes may be made by the parent, guardian, or custodian acting in behalf of the minor, or the court may, on its own motion, and after reasonable notice to interested parties and the appropriate department, take action which it considers appropriate.

(b) If the court determines at a rehearing that it is for the best interests of the minor that he be released to the care or custody of his parent, guardian, or custodian, it may enter an order to that effect and the minor is discharged from the control of the department.

(c) If a minor is adjudicated a delinquent, a child in need of supervision, or a dependent before his eighteenth birthday, the court may retain jurisdiction over him after his eighteenth birthday for the purpose of supervising his rehabilitation, but the court's jurisdiction over him under this chapter never extends beyond his nineteenth birthday, except that the department may petition the court for continued supervision for an additional one-year period for minors who have not responded to treatment. The department may retain jurisdiction over a child between his eighteenth and nineteenth birthdays for the purpose of supervising his rehabilitation, if he is committed to the custody of the department before his eighteenth birthday, except that the department may petition the court for continued supervision for an additional one-year period

Sec. 47.10.070. Hearings. The court may conduct the hearing in an informal manner in the courtroom or in chambers. All hearings under this chapter are without a jury and the usual rules of evidence do not apply. However, a hearing may be held before a young adult advisory panel in accordance with § 75 of this chapter. The court shall give notice of the hearing to the department and it may send a representative to the hearing. The court shall also transmit a copy of the petition to the department. The representative of the department may also be heard at the hearing. The public shall be excluded from the hearing, but the court, in its discretion, may permit individuals to attend a hearing, if their attendance is compatible with the best interests of the minor. (§ 10(1) art I ch 145 SLA 1957; am § 1 ch 49 SLA 1966)

Effect of amendment.—The 1966 amendment added the second sentence.

Legislative committee report.—For legislative committee report on ch. 49, SLA 1966, see House Journal (1966), p. 52.

Constitutionality.—See In re Gault, 387 U.S. 1, 87 Sup. Ct. 1428, 18 L. Ed. 2d 527 (1967), discussing due process requirements in juvenile delinquency proceedings.

Sec. 47.10.075. Young adult advisory panels. (a) Unless the minor objects, the court may select a young adult advisory panel to hear the case and advise the court of a recommended judgment and order. The court may consider any of the panel recommendations in making its judgment and order in the case.

(b) The principal of each high school shall submit annually to the court a list of the students enrolled in grades 10, 11 and 12. The court shall determine the method of selecting the members of each panel.

(c) A student shall be excused from attending school during the time he is serving as a panel member. No student may serve more than once each year on a panel.

(d) A student shall be excused from service as a panel member if he submits a written request to the court indicating the reason he does not wish to serve. (§ 2 ch 49 SLA 1966)

Legislative committee report.—For legislative committee report on ch. 49, SLA 1966, see House Journal (1966), p. 52.

Sec. 47.10.080. Judgments and orders. (a) The court, at the conclusion of the hearing, or thereafter as the circumstances of the case may require, shall find and enter a judgment that the minor is or is not a delinquent, or a child in need of supervision, or dependent minor.

(b) If the court finds that the minor is delinquent, it shall

(1) order the minor committed to the Department of Health and Welfare for an indeterminate period of time not to extend past a specified date or in any event past the day the minor becomes

19, except that the department may petition the court for continued supervision for an additional one-year period for minors who have not responded to treatment and may direct the minor's placement in a juvenile correctional school, detention home, or detention facility designated by the department; the minor may be released from placement or detention and placed on probation on order of the court; or

(2) order the minor placed on probation, to be supervised by the department, and release him to his parents, guardian, or a suitable person; if the court orders the minor placed on probation, it may specify the terms and conditions of probation; the probation may be for an indeterminate period of time, not to extend past a specified date and in no event past the day the minor becomes 19, except that the department may petition the court for continued supervision for an additional one-year period for minors who have not responded to treatment.

(c) If the court finds that the minor is dependent, it shall

(1) order the minor committed to the department for an indeterminate period of time not to exceed the date the minor becomes 19 years of age, except that the department may petition the court for continued supervision for an additional one-year period for minors who have not responded to treatment;

(2) order the minor released to his parents, guardian, or some other suitable person; if the court releases the minor, it shall direct the department to supervise the care and treatment given to the minor; the department's supervision may not extend past the date the minor becomes 19 years of age, except that the department may petition the court for continued supervision for an additional one-year period for minors who have not responded to treatment; or

(3) by order, terminate parental rights and responsibilities of one or both parents and commit the child to the department or to a legally appointed guardian of the person of the child, if one of the following conditions exists:

(A) Each parent, or the surviving parent, or one parent if the other has been deprived of custody and visitation rights wishes to relinquish the child to the department or to a legally appointed guardian of the person of the child for adoptive purposes, and the relinquishment is in writing, signed and acknowledged before the court or duly authorized representative of the department and filed with the court;

(B) the child has been abandoned for a period of not less than six months by

(i) both parents, or

(ii) the surviving parent, or

(iii) one parent if the other has been deprived of custody and visitation rights;

(C) each parent, the surviving parent, or one parent if the other has been deprived of custody and visitation rights has been judicially determined to be of unsound mind and the disability has not been removed and the parent has been hospitalized for reasons of mental illness diagnosed as permanent or of long duration; or

(D) each parent, or the surviving parent, or one parent if the other has been judicially deprived of custody and visitation rights, has demonstrated by his conduct, proven by clear and convincing proof amounting to more than a preponderance of the evidence that he is unfit to continue to exercise his parental rights and responsibilities.

(e) If the court finds that the minor is not delinquent, a child in need of supervision, or dependent, it shall immediately order his release from its custody and his return to his parents, guardian, or custodian, and close the case.

(f) A minor found to be delinquent, a child in need of supervision, or dependent is a ward of the court as long as he is committed to the department or the department has the power to supervise his actions. The court shall review an order made under (b) or (c) (1) or (2) or (j) of this section annually, and may review the order more frequently to determine if continued placement, probation, or supervision is in the best interest of the minor and the public, and to determine if the minor is being treated fairly. The department or the minor's parents or guardian is entitled to a review on application. The minor need not be present at the review.

(j) If the court finds the minor is a child in need of supervision it shall make any of the following orders of disposition for his supervision, care and rehabilitation:

(1) any order which is authorized under (c) of this section; or

(2) order the minor placed on probation under those conditions and limitations that the court may prescribe.

(am § 1 ch 40 SLA 1967; am §§ 1—4 ch 27 SLA 1970; am §§ 12—15 ch 245 SLA 1970)

Effect of amendments. — The 1967 amendment rewrote subsection (c)(3)(B).

The first 1970 amendment added "or thereafter as the circumstances of the case may require" and "or a child in need of supervision" [illegible] subsection (a), inserted "a child in need of supervision" in subsection (e), inserted "a child in need of supervision" in the first sentence of subsection (f), and near the beginning of the second sentence of that subsection inserted "or (j)." The amendment also added subsection (j).

The second 1970 amendment substituted "19, except that the department may petition the court for continued supervision for an additional one-year period for minors who have not re-

sponded to treatment" for "21" in subsections (b)(1) and (b)(2), substituted "19" for "21" and added the exception in subsections (c)(1) and (c)(2).

As the rest of the section was not affected by the amendments, it is not set out.

Legislative committee reports.—For legislative committee report on ch. 10, SLA 1967 (HB 131), see House Journal (1967), p. 330. Chapter 215, SLA 1970 (HCSSB 360 am H), was identical to CSHB 406. For report on CSHB 406, see 1970 House Journal Supplement No. 6.

A judge cannot consider a juvenile offense as a criminal conviction for the purpose of prescribing a mandatory sentence. Berfield v. State, Sup. Ct. Op. No. 561 (File No. 960), 458 P.2d 1005 (1969).

The judge's consideration of factors relating to accused's life, characteristics, background and behavior prior to reaching the age of 18 years did not mean that he considered accused a criminal or that he was using the juvenile offenses as criminal convictions in determining the sentence to impose. Berfield v. State, Sup. Ct. Op. No. 561 (File No. 960), 458 P.2d 1005 (1969).

Sec. 47.10.100. Retention of jurisdiction over minor. (a) The court retains jurisdiction over the case and may at any time stay execution, modify, set aside, revoke, or enlarge a judgment or order, or grant a new hearing, in the exercise of its power of protection over the minor and for his best interest, until he becomes 19 years of age, unless sooner discharged by the court, except that the department may petition the court for continued supervision for an additional one-year period for minors who have not responded to treatment. An application for any of these purposes may be made by the parent, guardian, or custodian acting in behalf of the minor, or the court may, on its own motion, and after reasonable notice to interested parties and the appropriate department, take action which it considers appropriate.

(b) If the court determines at a rehearing that it is for the best interests of the minor that he be released to the care or custody of his parent, guardian, or custodian, it may enter an order to that effect and the minor is discharged from the control of the department.

(c) If a minor is adjudicated a delinquent, a child in need of supervision, or a dependent before his eighteenth birthday, the court may retain jurisdiction over him after his eighteenth birthday for the purpose of supervising his rehabilitation, but the court's jurisdiction over him under this chapter never extends beyond his nineteenth birthday, except that the department may petition the court for continued supervision for an additional one-year period for minors who have not responded to treatment. The department may retain jurisdiction over a child between his eighteenth and nineteenth birthdays for the purpose of supervising his rehabilitation, if he is committed to the custody of the department before his eighteenth birthday, except that the department may petition the court for continued supervision for an additional one-year period

. . . while five spiffy new paint schemes achieve high promotional impact . . . and win some new riders, too

Cr[illegible] savings averaging 4c a mile — equivalent to de-pr[illegible]n — have been posted the first year by 15 new GM[illegible] diesel-powered 3301's purchased by Spokane Transit system.

[illegible] cents a mile is the difference in operating costs between this fleet and the average of all other coaches owned by the system.

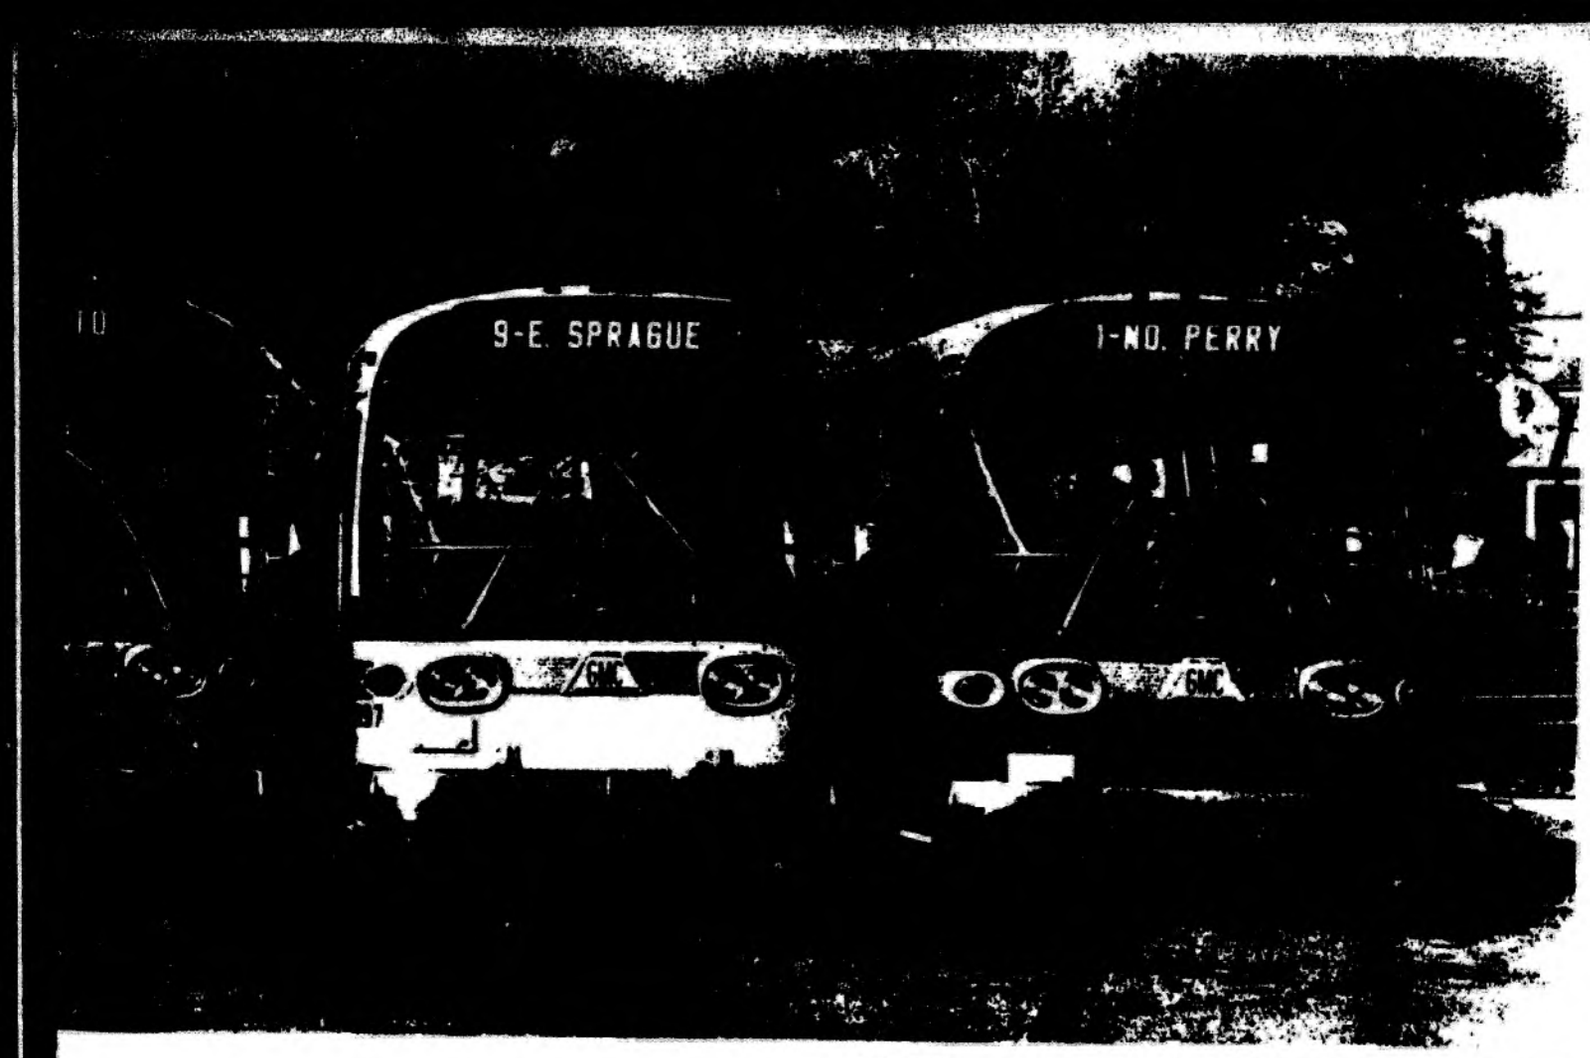
[illegible] of the saving is in fuel, since the new buses have been averaging 6.5 miles per gallon, nearly 2 miles per gallon better than the remaining fleet. All are GM[illegible] models ranging from a few 4507's up through Nov[illegible] 4517's. There are 66 coaches in the system.

In 740,958 miles, only 9 road calls

Operating 740,958 miles during their first 12 months, or 49,397 miles per vehicle, management reports only 9 road calls, 7 of which involved broken drive belts, for an average of 82,328 miles per call.

Engines have been trouble-free requiring only routine service. Likewise transmissions. Nor have there been any problems with air suspension.

"Considering our present requirements, the 33-passenger coach fits very well into our system," reports Robert V. Harder, General Manager. "We are planning a fleet of two-thirds small coaches and the other third, 45-passenger models. This means we will gradually phase out our older 45's and replace them with



additional 3301's as soon as funds become available.'

During the last year, while representing 22% of the fleet, the 3301's operated 37% of the mileage.

Reliability of the system's all-GMC fleet has resulted in excellent manpower-to-bus ratios. For example maintaining 66 coaches are 7 first class mechanics 2 second class mechanics, 5 utility men and 4 cleaners

Excitement in new colors

To focus city-wide attention on the new fleet, it was decided to use five different paint schemes, all of them bright and colorful — with interiors to match

"This multiple paint scheme created much favorable comment both locally and around the nation.' says Mr. Harder. "The maintenance cost is not any higher. However, it does affect our inventory of paint and repair materials." Subsequently, all older vehicles were repainted in one of the system's five new colors

More recently the system has been sustaining public interest with a Name-the-Bus contest.

Spokane Transit System serves a population of about 185,000 people with 117 one-way road miles. In 1969 the system operated 2,077,646 miles while carrying 4,123,685 people.

Estimates of passenger volume for 1970 have been projected in excess of 4,500,000.

Overseeing transit operations on behalf of the city are Mayor of Spokane David Rodgers, right; William Parker, Transit Commission Chairman, left; and Robert Wilkinson, Assistant Chairman, center.

While the system remains privately owned, it operates under a unique lease-management arrangement with the city, providing everything necessary for the operation on a cost-of-service basis. Recent legislation provides a subsidy of about $500,000 annually through a household transit tax of 73¢ per month per residence dwelling. As a result, 15 new buses have been purchased, headways increased and fares reduced. Responding to better service, passenger volume has been running higher throughout 1970.

SB-88

SENATE BILL 88 (Bar Association)

1. The present Board of Governors, as of 1955, includes 3 members from Southeastern, and 3 from the Second and Fourth Judicial Districts combined.

2. Half of the lawyers, or more, in the state are in the Anchorage area, and under the one-man--one-vote concept, Anchorage has felt that they should have greater representation on the 9-man board.

3. Obviously, the Ketchikan, Juneau and Tanana Valley Bar Associations don't approve, but the situation had almost reached the stage of throat-cutting.

4. Some of the members were even threatening to bolt the organization.

   At the May, 1970 Alaska Bar Association convention, a compromise resolution was approved. That compromise is reflected in this bill, which merely reconstitutes the board as follows:

   a. The Anchorage representation increases from 3 to 4.

   b. One of the 3 members is taken away from the Southeastern representation and one is taken from the 2nd and 4th District, making the apportionment 4--2--2.

   c. The 9th member will be elected on a state-wide basis.

5. All local bar associations and the State Bar, the Board of Governors, have approved the bill.

6. The second half of the bill merely provides that those members currently serving on the board will serve out their allocated terms. Only as each goes off the board will the new plan go into effect.

Offered: 2/2/71
Referred: Judiciary

IN THE SENATE BY THE JUDICIARY COMMITTEE

SENATE BILL NO. 88

IN THE LEGISLATURE OF THE STATE OF ALASKA

SEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the Alaska Bar Association; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.08.050(a) is amended to read:

(a) Two [THREE] members of the board shall be elected by and from among the members of the association resident in the first judicial district; four [, THREE] members of the board shall be elected by and from among the members of the association resident in the third judicial district; two [, AND THREE] members by and from among the members of the association resident in the combined area of the second and fourth judicial districts; and one member at large from the entire state. [NO MORE THAN TWO MEMBERS MAY BE RESIDENT PRACTICING ATTORNEYS IN THE FOURTH JUDICIAL DISTRICT WHEN THERE ARE FOUR OR MORE RESIDENT PRACTICING ATTORNEYS IN THE SECOND DISTRICT.]

* Sec. 2. AS 08.08.050(c) is amended to read:

(c) Three board members shall be elected annually (on the following triennial rotation:) with the following

(1) in the first year, one member at large and two members from the third judicial district;

(2) in the second year, one member from the combined area of the second and fourth judicial districts, one member from the third judicial district, and one member from the first judicial district; and

(3) in the third year, one member from the first judicial district, one member from the combined area of the second and fourth

Box 4 - W
Spenard, Alaska 99503

10 February 1971

State Representative
William Moran
Pouch V
Juneau, Alaska 99801

Dear Mr. Moran:

The bill introduced by Senators Groh, Rader, Ziegler and Ray to rescind certification of the Constitutional Referendum is a direct threat to all elective processes, past, present and future. It also amounts to an outright and outspoken accusation that we who voted for the Convention are dolts who did not know what we were voting for. I resent the implication involved and state categorically that I consider myself an interested and intelligent voter and that I knowingly and willfully voted in favor of the Constitutional Convention. Further, I have made many inquiries among friends and acquaintances and found that each who did vote in favor of the Referendum did so in the same willful and intelligent manner.

It is alarming to realize that a possibility exists within the Legislature to overturn the mass will of the voters at the ballot box. I feel that the Senators who introduced this measure have performed an obvious disservice to the people of the State of Alaska, and on that basis should seriously consider resigning from their present elective seats.

There is a group of us here in the Anchorage area, as well as another group in the Fairbanks area, who are organized to fight the legal action now pending in the courts in Juneau in the same issue. If the courts rule favorably for the plaintiffs and void the Referendum, we are poised to immediately bring the matter back into the courts and will challenge the outcome of all other elections held at the same time (3 November 1970).

There are many valid and serious reasons as to why the Convention must be held and a majority of us are convinced that the changes cannot be accomplished by the Legislature due to the very nature of them.

I thank you for your very kind attention and urge you to defeat the dangerous measure introduced by Senators Groh, Rader, Ziegler and Ray.

Very truly yours,

Jack A. Pearson

SB 113

March 5, 1971

MEMORANDUM

TO: The Honorable John Rader, Chairman
Senate Local Affairs Committee

The Honorable Mike Miller, Chairman
House Local Affairs Committee

FROM: Robert P. Isaac
Assistant to the Commissioner
Department of Education

SUBJECT: Review of Senate Bill 113, Municipal Code

I am herewith transmitting a review of the education provisions in Senate Bill 113. In our opinion the proposed code, if modified as suggested, would meet most of the objections which have been raised.

A small committee of school administrators and school board members would like an opportunity to meet with the respective legislative local affairs committees when hearings are again scheduled to discuss Senate Bill 113 as redrafted.

March 5, 1971

MEMORANDUM

TO: The Honorable John Rader, Chairman
Senate Local Affairs Committee

The Honorable Mike Miller, Chairman
House Local Affairs Committee

FROM: Cliff R. Hartman
Commissioner of Education

By: Robert P. Isaac, Assistant to the Commissioner

SUBJECT: Senate Bill 133, Revised Municipal Code in Respect to its Educational Provisions

We have reviewed the revised municipal code in respect to its education provisions, and we are especially concerned over the apparent omission of a specific education provision for school districts co-terminus with home rule municipalities.

A number of district superintendents, school board members, and other persons involved in education have also expressed a similar concern.

Section 29.33.050 pertaining to education is almost identical to a similar provision in the present borough law Title 7, (7.15.030). This section in the proposed revision applies only to the operation of schools in general law cities and boroughs.

Section 29.13.100 specifies the limitations on home rule powers and indicates the sections of the general code which may not be modified by a charter. Significantly, Section 29.13.100 does not include Section 29.33.050, Education, thereby giving a home rule municipality considerable latitude in legislating educational matters. It is our contention that education is a State function and delegated to the municipalities for administration and operation. We do not believe this delegation of the administrative-operational responsibility of schools also implies a delegation of the Legislature's legislative prerogatives.

As you may know, there is a local court case which revolves around this very matter; and while a decision has not yet been reached by the court, case law strongly supports State law as being superior to charter provisions if there is a conflict between the two.

Proponents of the concept that a charter may supercede State law argue that home rule municipalities may legislate on matters of local concern, including education, even though it might mean that charter provisions take an opposite view in respect to the law. They further argue that the Legislature, by placing the municipal education provision in the municipal code, have made education a matter of local concern.

We do not agree with this supposition. We believe that the specific provision in the existing borough code, Section 7.15.030 and its proposed successor, Section 29.13.100 in the revised code, are adopted by reference in Title 14 by Section 14.14.065, thereby defining this section as a general education law.

We do not argue that a municipality does not have a local concern or interest in education; however, we do believe that all municipal districts should be governed by the same basic laws and that a home rule municipality charter should not be in conflict with law.

The Department of Education is charged with the general management and supervision of the public school system and must do so in accordance with State law.

If a municipality also has legislative authority in respect to education, it would mean requiring the Department to adjudicate district education matters not only under State law, but under the provisions of home rule charters. As has happened already, we would foresee school boards requesting clarification and interpretation of law when conflicts arise. In this connection, it is likely a request of this nature would be referred to the Department of Law for an opinion. Whatever direction the opinion might give, the Department of Education is required to follow that direction (unless subsequently changed by court or legislative action). In order to write an opinion, the Department of Law would also have to read the charter and law together to arrive at a conclusion. In our opinion, such a procedure would be chaotic and unworkable and would only lead, ultimately, to greater devisiveness between local municipal governing bodies and school boards.

The Legislature, in accordance with the Constitution, has delineated quite clearly its intent in providing for public education. The following sequence of constitutional and State law provisions indicates how this was accomplished and the application of these provisions to the foregoing discussion:

Constitution: Article VII, Health, Education, and Welfare

> Section 1. Public Education. The Legislature shall by general law establish and maintain a system of public schools open to all children of the State, and may provide for other public educational institutions. Schools and institutions so established shall be free from sectarian control. No money shall be paid from public funds for the direct benefit of any religious or other private educational institution.

Title 14:

> Section 14.03.010. Establishment of a School System. There is established in the State a system of public schools to be administered and maintained as provided in this title. (Sec. 1, Ch. 98, SLA 1966)
>
> Section 14.14.065. Relationship Between City School District and City. The relationships between the school board of a city school district and the city council and executive are governed in the same manner as provided in AS 07.15.330 for the school board of a borough school district and the borough assembly and executive. (Sec. 1, Ch. 98, SLA 1966)

By reference, Section 14.14.065 adopts 07.15.330 (29.33.050) and establishes it as general law to be observed by city and borough school districts, whether home rule or not.

Although there might be a number of alternatives, it would appear the most feasible recommendation we could make is to include Section 29.33.050 in the home rule limitations, Section 29.13.100. Such a revision would at least maintain the status quo.

If it is believed Section 29.33.050 is not adequate for both general law and home rule municipalities, we would then recommend the Legislature make such revisions as might be necessary. Our only case in point is that the education provisions should be in law and not in the charter, unless the law is repeated in the charter for convenience.

We would be glad to meet with the committees on this matter at their convenience.

SB 123

State Shoplifting Laws — A Chains Best Friend

Shoplifting laws have been enacted in forty-nine states. The District of Columbia has no laws which deal with the specific crime of shoplifting. California, while it has no shoplifting law, as such, the law of arrest allows a police officer to make an arrest when he has reasonable cause to believe a felony has been committed by the person arrested without incurring liability for false arrest. Decisions of the State Supreme Court and other appellate courts have held that a merchant or his employee may detain a suspected shoplifter for a reasonable time if he has probable cause to believe goods have been stolen (Collyer v. Kress; 5 California 2d, 175).

The first decision by the high court of any of the 49 states which have shoplifting laws was handed down by the Supreme Court of North Carolina on December 13, 1961. The Decision ruled the law was valid and sustained the conviction of shoplifter. (State v. Hales). The following chart indicates by a dot each state's inclusion in shoplifting laws of the United States.

Chart based on information supplied by the Association of General Merchandise Chains and the Institute of Distribution

*As last amended 1969. *8 Amendment of 1969. *1959, Wisconsin enacted additional law permitting a person to threaten or use force against another for the purpose of preventing or terminating what he believes to be an unlawful interference with his property. Third persons may use similar means to defend another's property provided property belongs to a merchant and third party is his employee or agent of property.

Provisions of Shoplifting Laws

1) Definition of shoplifting or theft of merchandise. This includes any or all of the following: removing unpurchased goods from within the store with intent to steal; concealment of unpurchased goods with intent not to pay for same; alteration of price tag or other markings; transfer of goods to another person or another container with intent to steal. One who assists or abets is also guilty.

2) Right of detention. This includes giving the right to a merchant, his employee or a peace officer to detain a suspected shoplifter for a number of reasons. These vary in different states and can include questioning with regard to ownership of the goods and questioning witnesses to the alleged act. This right is limited to a reasonable time—sometimes defined in the law—with the manner of detention also a reasonable one. Probable cause must exist for believing a crime was committed and the suspect committed the act. Few laws define probable cause and reasonable grounds with the judicial criteria usually being what the careful and prudent man would do under the circumstances.

3) Immunity from suit. This includes immunity from various civil and criminal actions if the merchant, his employee or peace officer takes the suspect into custody to detain him in a reasonable manner and for a reasonable length of time. Such custody and detention does not make merchant, his employee or officer liable for slander, false arrest, false imprisonment or unlawful detention.

4) Presumption of guilt. This includes wilful concealment of goods as *prima facie evidence* that intent to shoplift the items existed with the suspect having the burden to prove that this intent did not exist. This presumption often includes the presumption that finding unpurchased goods indicated that the items were wilfully concealed with intent to steal.

5) Penalties. This includes graduated fines and imprisonment penalties as a deterrent with some states (indicated by [A] adding felony punishment by imprisonment for not less than one year nor more than 20 years.

SB 103

STATE OF WASHINGTON
JOHN J. O'CONNELL
ATTORNEY GENERAL
TEMPLE OF JUSTICE
OLYMPIA, WASHINGTON 98501

May 19, 1967

Honorable Harold E. Wolf
State Representative
Twenty-second District
Clark Road
Yelm, Washington

Dear Representative Wolf:

By letter previously acknowledged you have requested an official opinion of this office on several questions concerning the provisions of chapter 76, Laws of 1967.

For purposes of discussion, we shall set forth in full the language of § 3 of this act, which reads as follows:

> "In any civil action brought by reason of any person having been detained on or in the immediate vicinity of the premises of a mercantile establishment for the purpose of investigation or questioning as to the ownership of any merchandise, it shall be a defense of such action that the person was detained in a reasonable manner and for not more than a reasonable time to permit such investigation or questioning by a peace officer or by the owner of the mercantile establishment, his authorized employee or agent, and that such peace officer, owner, employee or agent had reasonable grounds to believe that the person so detained was committing or attempting to commit larceny or shoplifting on such premises of such merchandise. As used in this section, 'reasonable grounds' shall include, but not be limited to, knowledge that a person has concealed possession of unpurchased merchandise of a mercantile establishment, and a 'reasonable time' shall mean the time necessary to permit the person detained to make a statement or to refuse to make a statement, and the time necessary to examine employees

> and records of the mercantile establishment relative to the ownership of the merchandise."

Notably, § 2 of the act contains an identical provision with respect to ". . . any criminal action . . ."

Before turning to your questions, we should note and explain that the provisions of §§ 2 and 3 of chapter 76, Laws of 1967, supra, are merely phrased in terms of providing a merchant or a shopkeeper with a defense against civil or criminal liability with regard to matters involved in detaining a suspected shoplifter, where the merchant or shopkeeper has complied with the provisions of the new law. In other words, the new provisions do not purport to authorize any particular activity by a merchant or shopkeeper; rather, they simply provide a defense for him in the event he is sued or prosecuted, assuming that he can show that he acted within the terms of the sections.

The statute itself is patterned after a New York statute (New York Laws of 1960, chapter 1005, codified as General Business Law, § 218). There has been no reported experience under the New York act as of the date of this writing, and the source of the statute is mentioned here only because, knowing the source, it is evident that the new sections of chapter 76 were intended to have at least as broad, and perhaps broader application than the New York statute. The New York statute specified the types of action in which the defense would be available to a shopkeeper. Our statute makes the defense available in any criminal action, in the case of § 2, and in any civil action, in the case of § 3, ". . . brought by reason of any person having been detained on or in the immediate vicinity of the premises of a mercantile establishment for the purpose of investigation or questioning as to the ownership of any merchandise. . . ."

Preliminary to answering your questions some general observations concerning the common law right of a shopkeeper to detain a person who is reasonably suspected of having shoplifted an article of merchandise might be helpful to an understanding of our analysis of the questions presented. First, it should be noted that without statutory authority a shopkeeper could detain a customer or patron of his store who apparently had not paid for what he had received, for a reasonable length of time to investigate the circumstances. Rogers v. Sears, Roebuck & Company, 48 Wn. 2d 879, 297 P. 2d 250 (1956);

Restatement of Torts 2d, § 120 A; 22 Am. Jur. 368; 35 C.J.S. 640. Grounded as it was on the right to protect or recapture one's property, the right to detain a shoplifter necessarily ceased upon the return of the goods taken or the expiration of a reasonable time to investigate the taking. See, Teel v. May Department Stores Co., 348 Mo. 696, 155 S.W. 2d 74, 137 A.L.R. 495 (1941); Restatement of Torts, § 120 A, Comment "f". While it is a general rule that whether the detention was lawful must be determined as of the time of the detention (35 C.J.S. 640), some courts have made a distinction between the right to detain for purposes of recaption of property and a detention for the purpose of vindicating public justice, holding in the latter case that a subsequent acquittal or dismissal of criminal charges has a bearing on the lawfulness of the detention. See, Annos. 35 A.L.R. 645; 92 A.L.R. 2d 15; 35 C.J.S. 660.

In a case where the employee of a drug store was also a deputy police officer, and the act which gave rise to the detention was prosecuted, resulting ultimately in acquittal of the suspect, our court did not see fit to discuss the dual nature of the employee's right to detain the suspect. Instead it based its opinion upon the fact that the employee, a police officer, was entitled to assert a defense of reasonable cause. Sennett v. Zimmerman, 50 Wn. 2d 649, 314 P. 2d 414 (1957). Analysis of that case leaves one with the inference that had the employee not been a police officer the mere fact that he had reasonable grounds to believe that the person detained had taken property from the store in which he was employed would not have been a defense to him or the store in the subsequent suit by the suspect.

In any event, subsequent to that case the legislature passed chapter 229, Laws of 1959 making shoplifting a distinct crime, authorizing a peace officer to make an arrest without a warrant for that misdemeanor, even though it was not committed in his presence, and made "reasonable cause" a defense to certain civil actions brought against the peace officer by a person suspected of shoplifting. The loose language of the last-mentioned section was criticized by Professor Arvil A. Morris, 34 Washington Law Review 308. Repeal of that section and substitution therefor of chapter 70, Laws of 1967 brings us to your questions.

You ask for a legal interpretation of "reasonable grounds" as that term is used in the statute. The statute itself defines the term as follows:

> ". . . As used in this section, 'reasonable grounds' shall include, but not be limited to, knowledge that a person has concealed possession of unpurchased merchandise of a mercantile

establishment . . . "

Because the determination of what "reasonable grounds" might include is susceptible to so many variables, dependent upon the particular circumstances in the context of which the term is sought to be defined, it is impossible to define the term with any precision. Certainly, the fact-finder in a suit in which the new statute is involved will, in most circumstances, decide whether the merchant had reasonable grounds to detain the suspect. Some general observations may be made, however. Whether the detention contemplated by this section is an arrest, it does seem clear that it is something akin to arrest and that the general criteria for determining an officer's right to arrest for a felony provides guidelines. In State v. Massey, 68 Wn. 2d 88, 411 P. 2d 422 (1966) the Washington Supreme Court outlined these rules as follows:

> ". . . (1) An officer has cause for an arrest if he has reasonable grounds for suspicion, together with evidence of circumstances to warrant a cautious man in believing the accused to be guilty. State v. Hughlett, 124 Wash. 366, 214 Pac. 841 (1923). (2) An officer has probable cause to arrest without a warrant if he has knowledge which would convince a cautious but disinterested person that the accused is guilty of a felonious offense. State v. Darst, 65 Wn. 2d 808, 399 P. 2d 618 (1965); State v. Smith, 56 Wn. 2d 368, 353 P. 2d 155 (1960); Beck v. Ohio, 379 U.S. 89, 13 L. Ed. 2d 142, 85 Sup. Ct. 223 (1964); Wong Sun v. United States, 371 U.S. 471, 9 L. Ed. 2d 441, 83 Sup. Ct. 407 (1963). (3) An officer is not required to have knowledge of evidence sufficient to establish the guilt of the accused beyond a reasonable doubt. Draper v. United States, 358 U.S. 307, 3 L. Ed. 2d 327, 79 Sup. Ct. 329 (1959)."

By paraphrasing the above rules, substituting shopkeeper where officer appears, detention where arrest appears, and shoplifting where felonious offense appears, it is suggested that a fairly good set of guidelines are set out for a merchant wishing to stay within the terms of the statute being discussed, at least until more precise rules are defined by the courts in construing the term as used in this section.

Your next question—what is a reasonable time? — like the previous question, is not susceptible to precise definition. The definition within the statute is:

> ". . . 'reasonable time' shall mean the time necessary to permit the person detained to make a statement or to refuse to make a statement, and the time necessary to examine employees and records of the mercantile establishment relative to the ownership of the merchandise."

It is obvious that here the legislature has expanded the term "reasonable time" beyond the confines inherent in the term as it was understood at common law. Perhaps the most precise statement of what a reasonable time for detention is, absent statutory authority, is found in Comment "f" of the Restatement of Torts 2d, § 120 A, which reads:

(2)

> "The privilege is one of detention on the premises for only the time necessary for a reasonable investigation. Investigation does not mean discovery of all of the facts, but only such inquiry as may reasonably be made under the circumstances, promptly and without undue detention. What is a reasonable time will depend upon all of the circumstances, including the nature of the misconduct suspected, the amount involved, the explanation or denial offered by the other, his willingness to cooperate, and the time required to consult readily available sources of information. Normally, such a reasonable time will be short. Fifteen minutes may be too long where all that is necessary is to ask a clerk whether the other has paid. If the detention is continued beyond the time reasonably necessary for investigation, the actor is liable for the excessive detention."

(3)

The statute authorizes detention beyond that set forth in the underscored portion of the quote to the extent that it permits detention for "the time necessary to make a statement or refuse to make a statement." Detention for this purpose was clearly not authorized at common law. See, Teel v. May Department Store Co., supra.

Does "reasonable time" include the time necessary for an officer to arrive on the scene? Of course, if an officer arrives while the storekeeper is taking a statement or examining employees

and records relative to the ownership of the merchandise allegedly taken, clearly the merchant is within the terms of the statute, and the defense afforded by it is available to him. A more knotty problem arises when an officer has not arrived on the scene at the time the statutory purposes have been accomplished. Since the statutory definition is in derogation of the common law, and since a statute in derogation of common law is to be strictly construed, (Sutherland, Statutory Construction, 3d Ed. § 6201,) the cautious answer would be that a detention, after accomplishment of the questioning relative to the statement and investigation of the employees and records of the mercantile establishment, is unlawful; and, consequently, the defense afforded by the statute may be lost to a merchant seeking to avail himself of it. (A strong argument can be made, however, reaching the opposite result. The legislature is presumed to be aware of existing statutes relating to the same subject. Hatzenbuhler v. Harrison, 49 Wn. 2d 691, 306 P. 2d 745 (1957). It is thus presumed to be aware of the existence of chapter 229, Laws of 1959. That statute, by singling out shoplifting as a separate offense and authorizing a peace officer to arrest without a warrant when he had reasonable cause to believe a suspect had committed that crime was certainly a legislative attempt to ease the dilemna created by the common law rules regarding unlawful detention and to facilitate prosecution of shoplifters. Morris, 34 Washington Law Review 308. The repeal of section 3 of that act, permitting the defense of reasonable cause to be asserted by a peace officer sued as a result of such a detention, and a substitution therefor of the present section granting a defense not only to peace officers but to the owner of the store and his authorized employees in no way would indicate a recession by the legislature from that position.)

Because both terms, "reasonable grounds" and "reasonable time", are incapable of accurate abstract definition, it is strongly urged that shopkeepers who intend to vigorously avail themselves of their right to detain shoplifting suspects consult with their attorney regarding a standard practice to be followed by the store and its authorized employees relating to shoplifting. Certainly, what that practice might be will vary depending upon the type of business conducted and other circumstances.

Your final question has to do with the responsibility of a shopkeeper to advise a detained suspect of his constitutional rights. There is at present no obligation on the part of a private citizen, or for that matter, on police officers, to advise a detained person of such constitutional rights as the

right to remain silent, the right to an attorney, etc. Certainly, whether or not the suspect had been so advised would in no way be material to the question of whether the shopkeeper acted within his rights and within the terms of the statute under discussion. Whether a statement obtained from such a suspect without having first advised him of his constitutional rights would be admissible in a criminal prosecution is an issue we do not reach in this opinion.

We hope this has been of some assistance to you.

Very truly yours,

JOHN J. O'CONNELL
Attorney General

SB-123

ALASKA RETAIL ASSOCIATION

POSITION PAPER ON SB 123
RELATING TO THE DETENTION OF SUSPECTED SHOPLIFTERS

Nearly everyone will agree that the crime of shoplifting is epidemic throughout the United States. The latest national figures indicate that shoplifting causes losses to the consuming public amount to 3 billion dollars annually. This, indeed, contributes heavily to our present high cost of living. It has been stated, moreover, that shoplifting, coupled with internal theft, is responsible for about 30% of all business failures in the United States.

Specific figures on shoplifting losses for Alaska are not available. However, the Anchorage Chief of Police estimates that retailers of all sizes throughout the State lose an average of $7,000 apiece each year. As there are approximately 2,000 retailers of all types in Alaska, this means that Alaskans are subject to a loss of $14,000,000 annually.

Existing statutes and municipal codes, if enforced, are adequate to help combat the shoplifting problem. The main problem encountered in Alaska, and all other areas, in enforcement is the understandable reluctance of merchants, and even professional store detectives, to apprehend suspected shoplifters for fear of being subjected to false arrest litigation.

SB 123, relating to the detention of suspected shoplifters, would, we feel, provide just the right degree of protection to merchants and their agents against frivolous false arrest suits. This protection would encourage merchants to make apprehensions when a crime is apparently in process, thus helping to combat this very serious crime wave.

SB 123 is designed to allow reasonable protection to the merchant or his agent without promoting undue harassment of customers and without violating the rights of those who may be accused. It requires that the merchant, or his agent, have reasonable grounds to suspect that a crime has been committed before being allowed to detain a suspect. The circumstances of the detention must be such that the merchant or his agent had specific cause to believe a theft was in process before he would have an effective defense under this law and that the detention was accomplished in a reasonable manner and only for a reasonable time.

In summary, the general lack of prosecution is probably the one single factor which has contributed to making the crime of shoplifting so widespread in our country. Professional shoplifters and, indeed, amateur thieves are encouraged in their activities as they feel secure in the knowledge that the merchant is reluctant to prosecute. As this reluctance is caused, in a large part, by the merchant's fear of false arrest suits, or criminal action for false arrest, we feel that the provisions of SB 123 would aid greatly in encouraging retailers to prosecute those who are stealing from all of us.

We respectfully urge your favorable consideration of SB 123 as we are convinced that its provisions will aid significantly in combating a serious and costly crime -- shoplifting.

SB 136

March 16, 1971

Honorable William J. Moran, Chairman
Judiciary Committee
House of Representatives
Juneau, Alaska

Dear Chairman Bill Moran:

While we were writing our comments on SB 136 yesterday, it passed the Senate. Apparently there was little notice of any public hearing, if any. We believe this Bill deserves closer review, for reasons given in the enclosures. Perhaps none of these reasons came to the attention of the Senators during its brief stay in Committee. By telephone today we have requested the opportunity to be heard on this matter (probably before the House Commerce Committee).

In the past, the fuel oil dealers (and subdividers) have entered regulatory proceedings against us, before the Commission. Although they admitted in their testimony that the public should have a free choice among all forms of fuel service, by their practice, and by the proposed amendment (SB 136), they would perpetuate their monopolistic practices.

We believe that the purpose of "regulation" would be thwarted by trailer court operators and subdividers (and where applicable, by apartment house owners) being left free to extract the "kick-back" described by Mr. Hall (Executive Director of the Commission), while refusing to allow natural gas service to be offered to their tenants. Surely the Legislature would not permit these practices to continue unchecked by the authority of the Public Utility Act and Commission.

We would appreciate advance notice and opportunity to appear when hearings are scheduled on this proposed amendment.

Very truly yours,

ANCHORAGE NATURAL GAS COMPANY

March 15, 1971

Honorable Joe Josephson
and Honorable Ron Rettig
Alaska Senate
Juneau, Alaska 99801

Gentlemen:

We have just received copies of SB136, which would revise the definition of a public utility for the purpose of avoiding "....unnecessary regulatory procedures over petroleum fuel dealers delivering to trailer courts and apartment buildings..." except "when the consumer has no alternative in his choice of supplier of a comparable product at an equal or lesser price."

We have obtained a copy of the comments made by Mr. Don Hall, Executive Director of the Alaska Public Utilities Commission, regarding regulation of fuel dealers in general and this Bill in particular; Mr. Hall's comments were made in response to an inquiry by Mr. Robert Butler, Deputy Commissioner of Commerce. Copy of Mr. Hall's memorandum is enclosed; we believe his enclosures, which are obtainable from Mr. Butler, may be quite helpful to you in following his comments.

We have submitted our own comments on the fuel dealers' formal requests for exemption from regulation (APUC Cause U-7-71 through Cause U-11-71) by letter to the Alaska Public Utilities Commission, and copy of these comments is also enclosed for your review.

We hope you will understand our position--that when the tenants of trailer parks and apartment houses are precluded from the opportunity to receive or have natural gas utility service, an effective monopoly may exist even though it may be shared by two or more fuel oil dealers, which would be allowable without regulation under the language of your Bill (SB136).

The "kickback" referred to in Mr. Hall's memorandum to Mr. Butler is of course a central issue in this matter. We believe that such "kickback," which is referred to in our letter as an "incentive payment," explains the unwillingness of owners and operators of trailer courts and apartment house projects to allow natural gas service to be installed on their properties. In some cases, notably in the trailer court called "Dimond Park Estates," the owners are themselves also owners of the fuel distribution system. This project involves 400 trailer spaces, and may at

present dominate the house trailer market of the Anchorage area. No "kickback" may be in effect on this project, but the restraint of competition through refusal to allow natural gas service to be installed still would produce an effective monopoly which is normally cause for regulation.

Anchorage Natural Gas has always welcomed competition and has never sought to impose burdensome regulations upon underground oil and propane utilities. We do seek to see elimination or control of practices which appear to be unfair to consumers as well as to us. We believe that the Certificate of Public Convenience and Necessity which was issued to us by the Alaska Public Utilities Commission is being seriously infringed by continuation of such practices and that the best interest of a large portion of the public in our service area is harmed as a result.

All we ask is the opportunity to compete. We do not favor "...unnecessary regulatory procedures," nor are we seeking any competitive privilege other than relief from "affiliated interest" agreement by our competitors which effectively excludes us from an opportunity to compete. We do not believe SB136 can be administered to achieve the intended purpose and still protect the public interest. We are opposed to this Bill because:

1. It would foster -- and legitimize -- the continuation of "kick-backs" by dealers of oil and propane to owners of trailer courts and apartment houses.

2. It would perpetuate the condition in which Anchorage Natural Gas is being excluded from competition to serve trailer courts and apartment houses.

3. It would allow -- and practically invite -- price fixing by dealers of oil and propane, and would thus be in restraint of competition.

4. It would foster the continuation of shoddy and unsafe installation of underground systems for oil and propane, with obvious hazard to residents of areas so served.

For the foregoing reasons, we would request that if hearings are scheduled on SB136, we and our attorneys (Law Firm of Robison, McCaskey, Strachan, and Hoge) be notified by collect telegram or telephone so that we may have the opportunity to appear and support our position as necessary.

Very truly yours,

Dale Teel
President

Cause Nos. U-71-7/U-71-11
Inclusive

Gentlemen:

This letter is in response to the various Notices received from the Commission regarding Certification (or Exemption) of the fuel oil and propane dealers (Applicants) listed in the attached summary.

Alaska Public Service Corporation has been certificated by the Commission to provide natural gas utility service in the greater Anchorage area and on the Kenai peninsula, and is thus in competition with these Applicants to serve the energy requirements of these areas. Our position is that such competition is in the public interest and that regulation should not serve to inhibit such competition. However the practices of various of these Applicants appear to us to warrant an in-depth investigation by the Commission before a decision is made to exempt any of the Applicants from regulation by the Commission.

Specifically, we believe that competition is now being inhibited in many instances, if not generally, through the mechanism of an "incentive" paid to developers or owners of land on which these Applicants' fuel delivery systems are installed. The developers or owners of land served by Applicants underground systems become "affiliated interests" and subject to jurisdiction of the Commission, by their agreements or contracts with the Applicants. We understand the "incentive" is as much as 2¢ per gallon of fuel oil sold to the end users served by these systems, and a lesser amount per gallon of propane. We further believe that as a result of such "incentive payments" the developers or owners are resisting or refusing to allow natural gas distribution systems to be installed in the Applicants' areas of operations, or are discouraging their tenants or customers from giving fair consideration of natural gas utility service where it has been made available, thereby creating an effective monopoly by the fuel dealer serving the area. We further believe that in several cases some of the Applicants or their affiliated interests are owners or otherwise in control of the land served by them and that in such cases natural gas has been placed in an unfair position.

KA PUBLIC SERVICE CORPORATION
O. BOX 6288
CHORAGE. ALASKA

We believe that the Commission can and should move to prohibit the payment of such "incentives" by Applicants to the developers or owners of land and to restrain both applicants and developers and owners of land from discouraging the acceptance of natural gas by the end users of fuel in their areas of operation on such land. We believe moreover that where Applicants are the developers or owners of such land (or affiliated interests thereof), such Applicants should be ordered not to preclude or resist the reasonable and lawful efforts of Alaska Public Service Corporation (or other fuel sources) to compete for, attract, and serve the end users of fuel in such areas, and should be ordered to cooperate with Alaska Public Service Corporation (and others) as to access to the land for the purpose of construction, operation, maintenance of natural gas distribution facilities and appliances on such land.

If the foregoing position were to be adopted by the Commission, then Alaska Public Service Corporation would not oppose Applicants' requests for exemption (more accurately, "partial exemption, under AS 42.05.711(d)") from the full effect of regulation, specifically in whatever of Applicants' areas of operation natural gas service has been made available to end users in such areas.

We recognize the benefits of having the Commission and its staff and resources available to the public for receiving complaints and resolving matters of dispute, and we believe the Commission should not suspend its jurisdiction in this respect, or in the respect of safety (e.g., enforcement of the Pipeline Safety Act of 1969), or in the respect of preventing collusion or conspiracies or practices which would inhibit competition both among the Applicants and by Alaska Public Service Corporation, as a certificated natural gas utility serving most of the subject areas. We believe the Commission is empowered to achieve these benefits without the need for the full extent of filings, hearings, fiscal and other reporting, and formal proceedings which would be costly and burdensome to both the Commission and the Applicants.

Appropriate legal briefs and additional comments will be supplied during the course of these proceedings.

Very truly yours,

Dale Teel
President

MEMORANDUM

State of Alaska
DEPARTMENT OF COMMERCE

John info to me return to me Paul.

TO: Mr. Robert E. Butler
Deputy Commissioner
Department of Commerce

DATE : March 3, 1971

FROM: Don Hall
Executive Director
Alaska Public Utilities Commission

SUBJECT: S. B. 136
Revision of
AS 42.05.701 (2) (E)

SUMMARY

Complying with your request for comments on S. B. 136 is far easier said than done as you can see by the length of this memorandum and the amount of back-up material that accompanies it. Therefore, I thought it might be helpful and time-saving to summarize, at the outset, some of the main points I have developed and documented. Here they are:

1. In my view, the question of whether fuel oil dealers, or any other person or firm, should or should not be regulated, or exempt from regulation, in whole or in part, is properly a matter of legislative policy concerning which administrators, such as I, should not comment. Therefore, I respectfully decline to make any recommendation other than suggest the facts be examined to see if they fully support a finding that regulation of the operations in question is "unnecessary" as indicated in the stated purpose of the Bill.

2. The question should not be resolved solely on the basis of alternative choices by the customer as to comparable products and service related to the price paid. Our research, and some of the enclosures, indicate that the following factors should also be considered:

   A. Public safety as evidenced by faulty construction, faulty maintenance or unsafe practices. At least two trailer homes were destroyed by fire in Anchorage last November, and another badly damaged, resulting in an estimated loss of $40,000. (See Exhibits A and B)

   B. Trailer court owners and housing developers sometimes incur no investment toward the installation of storage and/or pipeline distribution facilities; yet receive a kick-back of 1¢ per gallon on every gallon sold for "dedicating" their trailer court (or housing development) to oil.

C. Complaints have been filed by consumers who looked to the Commission for the redress of grievances stemming from allegations that fuel dealers have failed to restore service quickly during cold weather--even after repeated pleas for help. (See Exhibit B-1)

3. Fuel dealers, such as Petrolane, distribute propane to trailer courts and apartment houses in much the same fashion that fuel oil dealers distribute their product, but they are not exempt. This does not appear to be equal or fair treatment. Nor does it appear reasonable that trailer court and apartment house owners who operate their own oil pipeline distribution systems should be regulated while dealers who operate in other trailer courts and apartments are exempt under certain conditions.

4. The Bill would be even more difficult to administer than sec. 42.05.711 (e) of the present law because of numerous practical difficulties. To put it more bluntly, it would create an administrative nightmare.

5. The Bill is poorly drafted, first, because it amends the wrong section. In my view, it should amend AS 42.05.711 which deals with exemptions, rather than the section containing definitions. Second, it does not clearly state the legislative intent, despite the effort to do so--which, incidentally is one of the questions that seems to bother oil dealers about the present law. They expect us to tell them what the Legislature intended, and we simply don't know. For example, the stated purpose makes reference to trailer courts and apartments but does not mention dealers who distribute fuel oil, by pipeline, to office buildings and housing developments. In my opinion, it would be better to simply exempt fuel dealers from the law completely (and without any qualification), if that is what is desired, rather than attempt to regulate them only under the stated conditions which would invite disputes between dealers and their customers; yet leave the Commission virtually powerless to resolve complaints filed with the Commission.

6. There are approximately 73 fuel dealers in Alaska now subject to regulation that would be affected by S. B. 136. Several of them have filed applications with the Commission for total exemption from AS 42.05 pursuant to AS 42.05.711 (d) thereof, or in the alternative, for a certificate of public convenience and necessity. If S. B. 136 is enacted, these pending

applications would, of course, be dismissed as moot and all other dealers would be relieved from the necessity of even filing applications. Further, any that might be subject to regulation in the future could very easily avoid it by changing their price if the customer was in an area in which he had one of the alternative choices mentioned in the Bill.

7. By order of the Commission all fuel dealers are temporarily exempt from all provisions of AS 42.05 until April 1, 1971 to give them ample opportunity to file applications with the Commission. (See Exhibit D) It was for this reason we stated, on page 16 of our first annual report, that it "...would be no surprise to the Commission if they should seek legislation to specifically exclude their operations from regulation under the APUC Act."

DETAILS

Your request for comments on Senate Bill No. 136 brings up a rather delicate question of policy; namely, whether I, as an administrator of the APUC Act, should take a position as to whether or not petroleum fuel dealers should be exempt from the Act under certain conditons. In the past I have consistently refused to take a position either for or against the regulation (or exemption) of any operation. I see no reason why I should now. However, I owe it to you, and to the Legislature, to report some pertinent background facts that may be of some assistance in arriving at an appropriate decision. (See Exhibit G)

In the first place, the problem does not relate soley to the price the customer pays which seems to be the main thrust of the proposed amendment. There is also the matter of safety to be considered. This was first brought to our attention here in Anchorage on November 23, 1970 when a fire destroyed two mobile homes and bably damaged a third one--all reportedly due to a malfunction in the Shato Trailer Park's community fuel system. The damage was estimated at $40,000 (See Exhibit A, attached).

I am also enclosing photos indicating that sub-standard construction practices are employed in a number of mobile home courts in Anchorage that are served directly or indirectly by local fuel dealers. (See Exhibit B) I cannot honestly affirm that all of the pictures portray systems installed by fuel oil distribution firms as distinguished from those installed by propane distributors (which, I note, are not involved in S. B. 136). Some may be owned and operated by the owners of the trailer parks rather than by dealers. But I

understand they all are served via pipelines from central storage tanks and that tenants generally do not have a free choice of furnishing their own individual fuel tanks and of purchasing oil directly from any local fuel dealer they may select.

While on the subject of safety, I must report that the Federal Department of Transportation has entered into an agreement with the APUC whereby the Commission will endeavor to enforce the Federal safety standards which are applicable to all gas pipelines in the State (See Exhibit C). This agreement was made pursuant to Section 5 (b) of the Natural Gas Pipeline Safety Act of 1968, and the rules and regulations issued thereunder (See Exhibit E). If we had not entered into this agreement, the Federal Department of Transportation would have already preempted the entire field of gas utility safety regulation in Alaska. Thus, unless the State desires to lose jurisdiction over gas pipeline safety, by default, it really has no choice but to help the Department of Transportation enforce its regulations. I wrote you a memorandum on this subject dated February 6, 1971, a copy of which is attached hereto as Exhibit F.

The main point of what I have just said about safety is this: How can the State reasonably exempt distributors of oil by pipeline, as to safety, (or as to anything else for that matter) and at the same time subject distributors of propane to all the provisions of AS 42.05 including safety? It would seem that the public need for regulation, or the justification for exemption from regulation, should not rightfully depend upon whether the pipeline distributor sells oil or gas. After all, they both sell an essential fuel that heats trailers and they distribute it by pipeline as well as delivering their product to individual customers. I say this only to point out a basic inconsistency--not because I have taken a position for or against the regulation of either kind of a fuel distributor.

Another inconsistency of S. B. 136 is that it singles out, for special treatment, fuel dealers that distribute petroleum products to the public for compensation while ignoring the fact that many mobile home court owners, who also distribute petroleum products to their own tenants for compensation via pipelines, would still be subject to regulation. This does not appear to be fair or reasonable.

Your attention is invited to the fact that this entire matter is now before the Commission in Docket No. U-70-85 and two orders have been written. A copy of the entire file in this proceeding is attached as Exhibit D of this memorandum. We are now in the process of issuing public notices so that all persons and firms in the entire State that may be utilities under AS 42.05.701 (2) (D) or (E) will have an opportunity to comply with the Commission's order that they must apply for a

certificate covering their operation as a condition precedent to considering their applications for exemption. The 6 fuel dealers that have already filed the required applications seek complete exemption from AS 42.05 pursuant to AS 42.05.711 (d). Alternatively, they desire a certificate. They now have until April 1, 1971 to make application pursuant to our order dated February 2, 1971 in U-70-85. But if they can get the law amended to exempt them from regulation, obviously those that have not applied will be spared the trouble of making application and the Commission will simply dismiss the applications then pending.

I understand the fuel dealers are not at all happy with the Commission, mainly because it has not felt free to go along with their contention that the Legislature never intended to regulate them in the first place. This may be so. Maybe it was a legislative oversight that they appear to be utilities, but who are we to say it was? If that is all that is involved, then certainly this Legislature is in a position to correct the oversight.

I am not yet in a position to give you completely reliable figures on the full extent of the problem of regulating oil distributors (as defined by AS 42.05.701 (2) (E)) or of regulating natural or manufactured gas distributors (as defined by AS 42.05.701 (2) (D)), but I do have a pretty good idea from our own research (with the aid of Carl Sullivan representing the Oil Heat Institute) and from other sources including the State Revenue Department. With the above qualifications, this is approximately what it looks like now for the entire State:

Kind of Fuel Distributed by Pipeline to 10 or More Customers

	Oil	Gas
Number of Cities	7	6
Number of Locations	47	33
Number of Operators	73	2
Number of Customers	2,413	863

From the standpoint of administering AS 42.05 as applied to all utilities presently defined as such by AS 42.05.701 (2) (E), I shudder to think of it as though cold steel were being plunged into my warm quivering human flesh, particularly so if the APUC is going to have its budget cut for next year. Just think of it. We now have 125 regulated utilities. This would increase the total to 198, a 63% increase. How in the world could we reasonable be expected to do an adequate job of regulating that many more utilities, with no more personnel than we now have is incomprehensible. On the other hand, if the Legislature feels that these operations should be regulated we shall just have to do the best we can with the resources placed at our disposal--but, you can depend upon it, we shall be severely criticized. If we had any idea of how many utility

operations of this kind there may be, we would have requested a lot more personnel than we did ask for in our great ignorance.

I think the underlined part of S. B. 136 will create administrative problems that just won't quit--ever. For example:

1. Who will decide disputes between consumers and the dealers that serves them as to whether or not the consumer has "no alternative in his choice of supplier of a comparable product and service at an equal or lesser price,"--the dealer, the consumer, or the Commission? If there is a question as to whether the Commission has jurisdiction to entertain the customer complaint, how would it be decided?

2. What is a "comparable product"? Would it include natural or manufactured gas? Would the decision be based upon the BTU content of the fuel?

3. Would the words "and service", following the word "product" include electric service since it might be argued that electricity furnished for space heating is a "comparable" service because both would supply trailer homes and apartments with heat, for cooking and space-heating?

4. In determining whether a comparable product or service could be purchased at "an equal or lesser price", what would be the common denominator for the determination as between heavy (like PS 300) and light oil (like diesel 182), propane, natural gas, and electricity? Who would decide disputes in this regard?

Getting back to the stated purpose of S. B. 136, I note that the expression "unnecessary regulatory procedures" is used. This is precisely the main issue now before the Commission in U-70-85. (See Exhibit D) The law under which gas and propane distributors are now seeking exemption is AS 42.05. 711 (d) which provides that the Commission, "... on a finding that no legitimate public interest will be served, may exempt a utility from all or any portion of the chapter." It may develop that the Commission will find, after a public hearing, that they should be exempt from some, all, or no provisions of AS 42.05. S. B. 136, if enacted, would simply mean the Commission would dismiss all the applications then pending, and close the proceeding as the issue would be moot. This is precisely what was done in respect to a case involving the regulatory status of the Kenai Pipeline Company when the law was amended (in 1968) to specifically exclude it.

Another thing I notice about the stated purpose of S. B. 136 is the fact that it includes dealers delivering to trailer courts and apartment buildings, but excludes those that may possibly be delivering to other multi-tenant structures such as office buildings. Still another situation that I actually know of here in Anchorage is not covered by the stated purpose. In this regard, I refer to a dealer here who furnishes oil to an entire housing development via pipelines connected with a central storage tank. It does not seem reasonable that such an installation would be exempt if others of a similar nature, that are mentioned, are included.

In short, Mr. Butler, I think S. B. 136 is poorly drafted and would cause more administrative headaches than it could possible eliminate if it is passed. Further, I do not think it would be fair to exempt petroleum fuel dealers without, also, exempting dealers who distribute propane or manufactured gas.

I hope I have covered the subject adequately.

NOTICE OF APPLICATION FOR

CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

The ALASKA PUBLIC UTILITIES COMMISSION hereby gives notice that the STANDARD OIL COMPANY, an Alaska Corporation, has filed an application (Cause No. U-71-7) for an exemption from Sections 221 - 281 of the Alaska Public Utilities Commission Act (AS 42.05) or, in the alternative (under protest) for a certificate of public convenience and necessity to furnish fuel oil delivery products public utility service in the following areas: Trailer City, 4420 Emard St., South Mountain View, Alaska; Maggies Trailer Court, 4503 Spenard Road, Anchorage, Alaska. The applicant states that the rate charged to its cutomers is 24.4 cents per gallon of fuel oil. More detailed information may be obtained from the applicant through its Attorney in Fact, Mr. Victor S. Schutzky, whose address is 1649 C Street, Anchorage, Alaska. The complete filing is available for inspection at the offices of the Alaska Public Utilities Commission, 700 MacKay Building, 338 Denali Street. Anchorage, Alaska 99501.

Any interested party may file with the Commission by 4:30 P.M. on March 12, 1971, a statement of his views and specific reasons in favor of, or in opposition to, the granting either of the exemption as requested or else of authority to the applicant to operate as a fuel oil delivery products public utility, together with written confirmation that the same statement has also been served on the applicant.

DATED at Anchorage, Alaska this 22nd day of February, 1971.

NOTICE OF APPLICATION FOR

CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

The ALASKA PUBLIC UTILITIES COMMISSION hereby gives notice that the PETERS CREEK FUEL & SERVICE, INC. has filed an application (Cause No. U-71-8) for an exemption from Sections 221-281 of the Alaska Public Utilities Commission Act (AS 42.05) or, in the alternative, (under protest) for a certificate of public convenience and necessity to furnish fuel oil delivery utility service in the following areas in the vicinity of Eagle River, Alaska: Lazy Mountain Trailer Court, Sunny Slopes Subdivision, Eagle River Trailer Court, Eagle River Heights North Subdivision. The applicant states that the rates charged at present to its central distribution system customers are 24.4¢/gal. for No. 1 heating oil and 23.2¢/gal. for No. 2 heating oil. More detailed information may be obtained from the applicant whose address is P. O. Box 128, Eagle River, Alaska 99577. The complete filing is available for inspection at the offices of the Alaska Public Utilities Commission, 700 MacKay Building, 338 Denali Street, Anchorage, Alaska 99501.

Any interested party may file with the Commission by 4:30 PM on March 15, 1971, a statement of his views and specific reasons in favor of, or in opposition to, the granting either of the exemption as requested or else of authority to the applicant to operate as a fuel oil delivery public utility, together with written confirmation that the same statement has also been served on the applicant.

DATED at Anchorage, Alaska this 23rd day of February, 1971.

NOTICE OF APPLICATION FOR

CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

The ALASKA PUBLIC UTILITIES COMMISSION hereby gives notice that DAY AND NIGHT FUEL COMPANY, INC. has filed an application (Cause No. U-71-9) for an exemption from Sections 221-281 of the Alaska Public Utilities Commission Act (AS 42.05) or, in the alternative (under protest), for a certificate of public convenience and necessity to furnish fuel oil delivery public utility service (through central tank and pipeline distribution systems) within the following service areas: Top Hand Trailer Court, 2409 McRae Road, Spenard, Alaska; Grizzly Trailer Court, 4222 Spenard Road, Spenard, Alaska. The applicant's stated rate is 23.7¢ per gallon of fuel oil. Its tariff also provides for a $25.00 deposit and monthly customer billing. More detailed information may be obtained from the applicant whose address is 608 East Fireweed, Anchorage, Alaska 99503. The complete filing is available for inspection at the offices of the Alaska Public Utilities Commission, 700 MacKay Building, 338 Denali Street, Anchorage, Alaska 99501.

Any interested party may file with the Commission by 4:30 P.M. on March 15, 1971, a statement of his views and specific reasons in favor of, or in opposition to, the granting either of the exemption as requested or else of authority to the applicant to operate as a fuel oil delivery public utility, together with written confirmation that the same statement has also been served on the applicant.

NOTICE OF APPLICATION FOR

CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

The ALASKA PUBLIC UTILITIES COMMISSION hereby gives notice that DENALI FUEL COMPANY/DENALI DISTRIBUTORS, INC. has filed an application (Cause No. U-71-10) for an exemption from Sections 221-281 of the Alaska Public Utilities Commission Act (AS 42.05) or, in the alternative (under protest) for a certificate of public convenience and necessity to furnish fuel oil delivery public utility service (through central tank and pipeline distribution systems) in the following locations in the Greater Anchorage and Eagle River areas: Alaskan Village Mobile Home Court, Chateau Trailer Court, Clearwater Trailer Court, Cowdery Brothers Construction, Dimond Estates, East Anchorage Trailer Court, Forest Park, Four Seasons, Frank's Trailer Court, Glacier Terrace Courts, Green Acres, Johnson Trailer Court, Kathy C Estates, Kluane Terrace, La Honda Trailer Park, Mountain View Trailer Court, Muldoon Estates, Penguin Trailer Court, Piper Trailer Court, Plaza 36, Rangeview Trailer Park, Rebischke's Court, Riviera Terrace, Scenic View, South Park Estates, Spruce Park Trailer Court, Totem Trailer Court, Trails End Trailer Court, Vagabond Trailer Court, Waterbury Trailer Court, White Birch Trailer Court, Hamilton Park, Ocean View Subdivision and Palos Verdes Subdivision. The applicant has filed a tariff which includes its rates and regulations relating to security deposits, installation charges, connection fees, automatic refueling, service labor charges, billing period, and terms of payment. The stated rates are 23.7¢ per gallon for No. 1 fuel oil and 22.5¢ per gallon for No. 2 fuel oil. The security deposit is $25.00 and the connection fee is $15.00 per customer. More detailed information may be obtained from the applicant

whose address is 1525 East 5th Avenue, Anchorage, Alaska 99501. The complete filing is available for inspection at the offices of the Alaska Public Utilities Commission, 700 Ma-Kay Building, 338 Denali Street, Anchorage, Alaska 99501.

Any interested party may file with the Commission by 4:30 PM on March 15, 1971, a statement of his views and specific reasons in favor of, or in opposition to, the granting either of the exemption as requested or else of authority to the applicant to operate as a fuel oil delivery public utility, together with written confirmation that the same statement has also been served on the applicant.

DENALI DISTRIBUTORS, INC.

EXHIBIT C

Applicant does not desire to render a service to the public in general, does not wish to hold itself out or offer its service to the public at large and does not wish to dedicate its operations to public use.

The business in which applicant desires to engage itself consists of the delivery of fuel oil to mobile home occupants in trailer courts and the delivery of fuel oil to occupants of dwellings in subdivisions.

The facilities which applicant proposes to utilize consist of bulk storage tanks in excess of 300 gallon capacity located within the trailer courts, pipes extending from the storage tanks in the trailer courts to the trailer spaces in the trailer courts, and separate meters to measure the consumption of each customer in each trailer court. The same facilities are utilized in connection with a housing development, or subdivision.

The type of customers consist of mobile home and permanent home owners and occupants in specified trailer courts and subdivisions. The number and location of the trailer courts and subdivisions is presented in Exhibits I and E attached hereto. The approximate number of maximum potential individual customers in trailer courts ranges from twenty-four at Green Acres Trailer Court and Piper Trailer Court to four hundred at Dimond Estates. At the present time, applicant proposes to deliver fuel oil from pipes connected to a storage tank in each of six subdivisions; namely, Hamilton Park Subdivision, formerly State Manor Subdivision, Ocean View Subdivision, Kluane Terrance Trailer Estates Subdivision, Palos Verdes Subdivision, Muldoon Estates

Subdivision and Sunny Slopes Subdivision. The remainder of applicant's proposed operations will be in trailer courts.

As part of its overall business of fuel oil delivery. Denali Fuel Company presently engages in the delivery of fuel oil to mobile home occupants in trailer courts and to occupants of dwellings in Subdivisions utilizing the facilities outlined above, except Denali Fuel Company presently has no operating facilities at Muldoon Estates Subdivision, Sunny Slopes Subdivision or Palos Verdes Subdivision. Denali Fuel Company does not presently deliver fuel oil to all of the potential customers specified as potential users in Exhibit I, since many of the potential users presently obtain fuel oil, or a different product for heating, from a competitor (See Exhibit III) of Denali Fuel Company. Denali Fuel Company, therefore, requests that the Commission find no legitimate public interest in regulating any of its operations. See Exhibit D.

DENALI DISTRIBUTORS, INC.

EXHIBIT D

No legitimate public interest is served by regulating any of the business of Denali Fuel Company, or applicant herein, because its business is not the type intended to be regulated, does not have the characteristics of a business intended to be regulated, and is already regulated by competition and other governmental requirements. Furthermore, the Commission has no jurisdiction to regulate any of the business of Denali Fuel Company, as no portion of its business is a defined public utility under the Alaska Public Utilities Act, either literally or within the intent of the Legislature.

One of the marks of a public utility is the monopolistic characteristics of its operations. This factor of monopoly gives rise to a reason for public protection through control and regulation. Contrariwise, the fuel oil delivery business, in general, and with respect to centralized delivery systems in trailer courts and housing developments, is a highly competitive business.

The sale of fuel oil by means of tank wagon delivery to a common storage tank in a trailer court or housing subdivision for further delivery through pipes from the common tank to customers in the trailer court or subdivision is a merchandising operation: the sale of a commodity and not of a utility service. A metered sale to individual customers in the trailer court or subdivision does not change the essential nature of the transaction.

Another one of the distinguishing marks of a utility operation is that it is affected with a public interest. The distribution of fuel oil by the use of a centralized storage tank and pipes directing the fuel to customers in a trailer court or subdivision is not affected with a public interest. There is no holding out or offer to service the public at large. The mere

fact that it may be considered to be of the nature of one of the necessities of life should not affect an industry with a public interest. A consumer in a trailer court or housing subdivision is no more dependent upon obtaining fuel oil for heating from one supplier at a constant price than he is upon obtaining other fuels such as coal, wood, kerosene, liquefied petroleum gas, or, for that matter, the same type of fuel oil from a different dealer on an individual or pipeline basis. There are many necessities of life, including such prime necessities as food and clothing, whose distribution and sale are made from a centralized location, but are not considered a public utility subject to regulation.

The supply of fuel oil through a pipeline system in a trailer court or housing subdivision makes no demands on the public for privileges peculiar and characteristic of a public utility; such as, the right to use public property and the exercise of eminent domain over private property.

Because of the non-competitive nature of its operation, an ordinary gas company is usually characterized by certain features which are lacking in the case of a fuel oil supplier. The fuel oil supplier employs the technique of marketing his product through a pipeline system in a trailer court or housing development on private property by permission of the owner. The installation of gas utility mains, by which the gas is delivered to users, requires, generally, the use of easements along or across public highways or the exercise of eminent domain over private property.

Furthermore, the operation of a public utility requires a monopolistic form of business. In order to prevent the lack of competition from affecting the service rendered to the public, governmental regulation of such a business becomes a paramount

policy consideration. The delivery of fuel oil is a highly competitive business and therefore does not meet the requirements for public utility regulation.

For this Commission to determine under the provisions of the Alaska Public Utilities Commission Act that it is within the public interest to exercise jurisdiction over and regulate the sale of fuel oil, merely because the product is marketed from a central tank through a pipeline system to ten or more people, would also mean that the Commission could assume jurisdiction over and regulate the sale of gasoline through all gasoline service stations in the State of Alaska. Certainly the Legislature of the State of Alaska, in enacting the Public Utilities Commission Act, did not contemplate, and could not have contemplated, any such broad interpretation of the Act. The Legislature specifically included AS 42.05.711(d) in the Alaska Public Utilities Act, authorizing the Commission to exempt an operation from any or all portions of the Act when no legitimate public interest will be served by regulating the operation. There is a distinct difference between the operation of a public utility engaged in the sale and distribution of electricity, gas or water, or the rendition of telephone service and that of one engaged in the delivery and sale of fuel oil. The distributor of electricity, gas or water and the supplier of telephone service are generally the sole suppliers of their particular product or service in and affecting an entire community. The delivery of fuel oil is not so limited. In the Anchorage area alone, there are at least thirteen suppliers of fuel oil, each of whom compete with the others.

Attached hereto as Exhibit IV is a survey of prices posted by all fuel oil suppliers in the Anchorage area. It is obvious from an inspection of this exhibit that there is a variation in pricing and that competition exists. The prices listed

in the columns for No. 1 and No. 2 fuel with a storage tank capacity of greater than 300 gallons are, to the best information and belief of Applicant, the rates applied with respect to central delivery systems and are also the rates applied to customers who have a 300 gallon, or greater, tank and who are not connected to a central delivery system.

It is also an attribute of a public utility that it be affected with a public interest. A mere legislative declaration with regard to this is insufficient. This point the United States Supreme Court has made clear in Wolff (Charles) Packing Co. v. Court of Industrial Relations, 262 U.S. 522, 539. The United States Supreme Court has also said the following in Williams v. Standard Oil Company, 278 U.S. 235, 240:

> "A business or property, in order to be affected with a public interest, must be such or be so employed as to justify the conclusion that it has been devoted to a public use and its use thereby in effect granted to the public. . . . Negatively, it does not mean that a business is affected with a public interest merely because it is large or because the public are warranted in having a feeling of concern in respect of its maintenance."

In view of this statement, it would seem that the question of whether the business of delivering fuel oil from a central tank through pipes to consumers in a trailer court or subdivision has become clothed with a public interest would turn in some degree upon the question as to whether the public has become peculiarly dependent upon the business and whether the distributor-marketer has evidenced an intent to grant the use of the business to the public. The situation in the case of the centralized supply of fuel oil is very much like that expressed by the United States Supreme Court in the case of Michigan Public Utilities Commission v. Duke, 266 U.S. 570:

> "Plaintiff is a private carrier. His sole business is interstate commerce, and it is limited to the transportation covered by his three contracts. He has no power of eminent domain or franchise under the state, and no greater right to use the highways than any other member of the body public. He does not undertake to carry for the public, and does not devote his property to any public use. He has done nothing to give rise to a duty to carry for others. The public is not dependent on him or the use of his property for service, and has no right to call on him for transportation."

Each consumer in a trailer court or subdivision wherein a centralized supply system is located is perfectly free to obtain his needs from someone other than the system owner. The consumer can have an individual tank, barrel or container positioned at his door for his own individual use.

A private business, operated under private contracts and not devoted to a public use, should not by legislative fiat or order of a public service commission be declared a public utility, since there would be in a sense the taking of private property for public use without just compensation, inconsistent with the due process clause of the Fourteenth Amendment to the United States Constitution.

There is not a dedication to public use of the centralized supply systems for fuel oil in a privately owned trailer court or housing development. Fuel oil, marketed through a pipeline system in a trailer court or housing development, is not sold to the general public like the utility gases. There is no open offer of sale. The supplier is free to refuse to deliver to any individual consumer in the trailer court or housing development. Furthermore, the means of tank wagon transportation, necessary to bring the product to trailer courts and subdivisions, and other incidental matters in connection with the transportation, handling and storage of fuel oil, indicate that the product

is not adaptable to the sale, distribution and furnishing to the public at large in unlimited quantities from a single dealer. Necessarily, the service rendered by a public utility must be so dedicated to the public that it becomes affected with the public interest. There must be an offer to sell to and serve the public generally, the right of use of public property, and in most cases condemnation of private property. Such is not the case in the sale of fuel oil to consumers in a trailer court, housing development, or elsewhere. Each sale is an independent sale and transaction between the seller and an individual customer. The fuel oil supplier does not hold himself out, nor should he be expected, to sell to the public generally.

The nature of the business of fuel oil delivery and the methods employed for marketing its products, together with the fact that there exists competition among the various dealers, contradicts common dedication to the public use. It is the factor of monopoly, absent in the case of centralized supply systems herein under consideration, which gives rise to a reason for public protection through control and regulation. Since the supply of fuel oil in trailer courts and housing developments is a highly competitive industry, to regulate the owners of the centralized systems, designed to more effectively market their product in such locations, would effectively eliminate this competition. The effect of an elimination of competition in an already competitive industry was noted as follows by the Ohio Supreme Court in Paramount Gas Utilities Co. v. Public Utilities Commission (1932), 125 Ohio St. 211, 180 N.E. 897:

> "If any mercantile establishment, selling its goods to the public in general, could have its business adjudged as falling within the jurisdiction of the Commission, and thereby eliminate, or at least greatly diminish competitors from unfairly coming into a determined

field, evidently all distinction between mercantile operations, carried on by persons, partnerships, corporations, or associations, and public utilities, as now generally recognized by law, would promptly disappear, and the Commission would, quite, as promptly, be completely swamped in any effort the Commission might make to take care of the situation thus arising, and the general provisions of the public utilities law would become broadened far beyond anything that the legislature ever had in mind in the enactment of the public utilities statutes."

Denali Fuel Company, and Applicant under protest herein, further contend that none of its operations are subject to the Commission's jurisdiction because none of its operations fall within the definition of public utility stated in AS 42.05.701(2). The Commission contends that a central supply system for fuel oil in a trailer court and housing development falls within the definition of AS 42.05.701(2)(E). This Subsection requires the owning, operating, managing or controlling of a pipeline or system for distribution of petroleum products to the public for compensation. Denali Fuel Company does not charge its customers for the delivery of fuel oil through the centralized system located in trailer courts and housing developments; i.e., there is no charge to the customer for the use or maintenance of the centralized system. Therefore, Denali Fuel Company is not being compensated for the customer's use of a pipeline or system.

The Commission is also referred to Applicant's Exhibit B herein, for an illustration of other governmental means by which standards are set with respect to various aspects connected with central fuel oil delivery systems, thus illustrating that there are already regulations imposed in the interests of the consumer's health and safety.

DENALI DISTRIBUTORS, INC.

EXHIBIT F

Applicant proposes to charge, for fuel oil delivered through individual metered units connected to applicant's system in a trailer court or subdivision, a price not to exceed the retail price of the least expensive oil of a class suitable to such customer's needs based on the delivered price appertaining to 300 gallon capacity tanks posted in the Greater Anchorage area.

RATES

Stove oil : $0.237 per gallon - No. 1 Fuel

Furnace oil : $0.225 per gallon - No. 2 Fuel

SECURITY DEPOSIT

Per Customer: $25.00

INSTALLATIONS

No charge to customer for installation of storage tank, pipeline from tank to location or meter setting.

CONNECTION FEE

Per Customer: $15.00
This charge is made only if necessary to install copper tubing from the meter to customer's furnace and for firing furnace.

REFUELING

Automatic checking and refilling of the storage tank provided without additional charge to customers.

SERVICE LABOR CHARGE

No charge to customers for repair to meters, storage tank or pipes between them.

Furnace Service (If requested): $13.00 per hour
$19.50 per hour overtime

CYCLE BILLING PERIOD

Monthly

TERMS

1% service charge if bills not paid within sixty (60) days.

Denali Fuel Company, as it presently operates, posts the above rates for customers in trailer courts and subdivisions connected to a common storage tank located at the court or subdivision. These rates are the same posted rates for all customers having a storage tank with a capacity greater than 300 gallons. These rates do not exceed the posted rates for customers having a storage tank with a capacity less than 300 gallons, who are not connected to a trailer court or subdivision system.

No charge is made to any customer for the use or maintenance of the centralized distribution system.

NOTICE OF APPLICATION FOR

CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

The ALASKA PUBLIC UTILITIES COMMISSION hereby gives notice that PETROLANE-ALASKA GAS SERVICE, INC., PETROLANE-ANCHORAGE GAS SERVICE, INC., and PETROLANE-QUEEN GAS, INC. have filed a joint application (Cause No. U-71-11) for an exemption from Sections 221-281 of the Alaska Public Utilities Commission Act (AS 42.05) or, in the alternative, an application (under protest) of PETROLANE-ALASKA GAS UTILITIES, INC. for a certificate of public convenience and necessity to operate as an LP-Gas fuel delivery public utility in the following areas: Dimond Estates, Plaza 36, Kathy O' Estates, Frank's Trailer Court, Alaska Village, Trailer City, Top Hand, Maggie's and East Anchorage Mobile Home at Anchorage; Best View at Chugiak; Badger Mobile Homes, Wayne's Trailer Park, Lakeview Terrace, Birdview and Wildwood Trailer Court at Fairbanks; Ocean Crest, Mt. View Trailer Court, and M.B. Development at Ketchikan; Mobil Haven and Thunder Mt. at Juneau; Perron's Trailer Court at Valdez. The application contains tariffs which include rates and regulations relating to deposits, connection fees, installation, automatic refueling, service labor charges, credit policies, taxes, billings, terms of payment, and other provisions for service. Seperate rate schedules are included for Anchorage, Fairbanks, Juneau, Chugiak, Valdez and Ketchikan. More detailed information may be obtained from the applicant whose address is 1200 Whitney Road, Anchorage, Alaska 99501. The complete filing is available for inspection at the offices of the Alaska Public Utilities Commission, 700 MacKay Building, 338 Denali Street, Anchorage, Alaska 99501.

Any interested party may file with the Commission by 4:30 P.M. on March 15, 1971, a statement of his views and specific reasons in favor of,

or in opposition to, the granting either of the exemption as requested or else of authority to the applicant to operate as an LP-Gas fuel delivery public utility, together with written confirmation that the same statement has also been served on the applicant.

DATED at Anchorage, Alaska this 25th day of February, 1971.

SB-248

STATE OF ALASKA
THE LEGISLATURE

LEGISLATIVE AFFAIRS AGENCY

POUCH Y - STATE CAPITOL
JUNEAU, ALASKA 99801

M E M O R A N D U M

January 25, 1972

TO: Members of the House Judiciary Committee

FROM: Russell E. Mulder

SUBJECT: Uniform Probate Code

At various times since the adjournment of the 1971 session, the Legislative Council has solicited the courts, the Alaska Bar Association, local bar associations and individual bar members to study the proposed Uniform Probate Code and submit their comments and suggestions. Attached are the replies received which you will probably wish to consider concerning SB 248.

It is encouraging to note that while both the Alaska Bar Association and Probate Master Gray have offered various suggested changes, they both are in agreement that the Uniform Probate Code is an acceptable approach for probate revision.

I am also attaching a series of correspondence between Professor Richard V. Wellman (chief drafter of the UPC), Frederick O. Eastaugh (one of Alaska's members of the National Conference of Commissioners on Uniform State Laws) and Charles Horowitz (also a member of the National Conference) relating to the need for the retention of certain provisions in the UPC which have been objected to by some. The sections in question are AS 13.16.040 and AS 13.16.455. I believe Professor Wellman's explanations should be helpful.

Att.

Superior Court
State of Alaska
THIRD JUDICIAL DISTRICT
941 FOURTH AVENUE, ROOM 224
ANCHORAGE, ALASKA
99501

KEIFER L. GRAY

STANDING MASTER
PROBATE MASTER

June 15, 1971

Honorable Edward V. Davis
Acting Presiding Judge
Superior Court
Anchorage, Alaska

Dear Judge Davis:

In response to your request that I furnish you suggestions in connection with the revision of the Probate Code to be presented at the City Council chambers in this City on June 25 and 26 since I will not personally be here at that time, you are informed that the following suggestions are made.

It is suggested that wherever the word "county" is used that we substitute instead "judicial district."

ESTATES

Section 1-401, regarding notices under paragraphs (1) and (2), it is suggested "10 days" rather than "14 days" as set forth in the proposed code.

Section 2-109, paragraph (1), add "provided the Native rights through blood of any person so adopted may be retained if provided for in the decree of adoption."

Section 2-401, the homestead allowance should be a minimum of "$8,000" instead of "$5,000" as listed in the proposed bill.

Section 2-502, add a paragraph (a) which states "Wills other than self-proving wills under Section 2-504 may be proven by

the affidavits of the two witnesses to the will or, where one witness is deceased or cannot be located, by the testimony of one subscribing witness and other proof satisfactory to the Court."

Add Section 2-903. [Procedure for Non-Intervention Wills.]
If the last will and testament of a decedent provides that the estate shall be settled without the intervention of any Court, title of the decedent passes to the devisee or heirs on death. It is necessary only that the executor, or person or corporation nominated in his place if he fails to serve, submit the will to the Court, prove it, secure letters testamentary, file an inventory, and submit proof of solvency. Thereafter, the estate shall be managed and settled without the intervention of any Court. However, notice to creditors requiring them to submit their claims within three months shall be published once each week for four weeks in a newspaper of general circulation in the judicial district where the will is probated. The party probating the will may file a final account with the Court if he desires and he shall make a report of any inheritance tax due the State or the United States and pay the same from estate funds. Nothing contained in this section shall be construed to prevent the Court from ordering the filing of a final account if a petition demanding a final account is filed by an heir, devisee, legatee, creditor, the State or Federal Government or a person showing he is adversely affected by the failure to file the account. Provided further that a full and complete report must be submitted to the Court within one year from the date of filing such will for probate and that proof of final distribution should be filed simultaneously. Extensions beyond this period of time may be granted only on a specific order by the Court for good cause shown and then not to exceed six months.

Section 3-203(f), paragraph (1), substitute the figures "19" for the figures "21."

Section 3-706, the last paragraph after the comma, instead of "he may file the original of the inventory with the court" it should read "he shall file the original of the inventory with the court," substituting the word "shall" for the word "may."

Section 3-1201(1), change the value from "$5,000" to "$6,000."

Section 3-1204, add paragraph (d), "The Superior Court may authorize the disposal in a manner it prescribes of personal property which has not been disposed of under this section by the end of six months if no heirs or claimants have been located."

Add Section 3-1205. [Settlement Directed by Court.]
When a judge receives information that a person has died in his judicial district leaving an estate of $6,000 or less and no qualified person has appeared to take charge of the assets, the judge may immediately appoint some person, corporation, or attorney to settle the estate in the manner provided for in Section 3-1201 through 3-1204 of this chapter or the appointee may administer the estate in the manner provided for in the administration of small estates.

GUARDIANSHIPS

Section 5-103, item (1), the age should be "19 years."

Section 5-104, the time should be "not exceeding one year unless sooner revoked."

Section 5-204, add "or has failed to properly exercise his duties as such."

Section 5-207(e), add this paragraph to read, "A bond in the amount to be fixed by the Court may be required of the guardian as the circumstances require."

Section 5-209(d), add "at least once every year unless ordered sooner."

Section 5-424, change the age from "18" to "19."

From my examination of the Uniform Probate Code the above suggestions for changes have been made. It is felt that the code itself embodies an excellent change and one which sets forth clearly the law in every case which would be a distinct

advantage to our present code since a great deal of our present code has been built up solely through practice and does not set forth the facts as it should. It is my belief that the adoption of this code will greatly strengthen and simplify the handling of probate matters in the State and it is recommended that it be adopted.

Very truly yours,

Keifer L. Gray
Probate Master

Attention: Russell E. Mulder, Deputy Director

Subject: Proposed Probate Code

Gentlemen:

In response to your memorandum on this subject dated October 4, 1971 addressed to members of the Alaska Bar Association, and at the direction of the Board of Governors of the Alaska Bar Association I report herewith the comments of the Real Property, Probate and Trust Committee of the association as reported to the Board of Governors at Anchorage, 6 November 1971. These comments and suggestions set forth the views of the Board of Governors. They are not intended to be totally exhaustive, but do reflect the views of the Association as expressed by the said committee, as follows:

1. The committee, based upon comments of reviewers in other states, considered recommending elimination or revision of Part 3 of the UPC (Informal Probate and Appointment Proceedings), (Article 3 of the work draft copy of the Legislative Affairs Agency). Objections were voiced in the belief that insufficient controls to protect creditors and heirs was afforded. However, it is concluded that sufficient safeguards are provided in the uniform code and no objections are taken to Article 3 as set forth in the redraft.

2. On the whole the UPC is acceptable, to the committee with few exceptions which are listed below.

a. UPC Section 2-401, Article II, Exempt Property and Allowances (Article 4, Sec. 13.11.125 et seq. of work draft copy). The use of a description such as "Homestead Allowance" for the widow of decedent and for minor and

dependent children might well be confused with the "Homestead Exemption" provided under A.S. 09.35.090, and the exemptions provided in Sec. 13.11.130 of the work draft copy may be confused with the exemptions provided by A.S. Sec. 09.35.080. We read the probate allowances and exemptions to be in addition to the homestead exemption and other exemptions as now provided under A.S. 09.35.080 and 09.35.090. We recommend that the probate code eliminate the description "Homestead Allowance" and substitute "Widow's and Childrens' Allowance". Likewise, we recommend the description "Exempt Property" be changed to "Personal Property Allowance".

b. Section 13.16.450 of the work draft copy in conformance with the uniform code allows four months for presentation of claims by creditors. We recommend this be changed to ninety (90) days to conform to our present probate code. Ninety days is considered sufficient, and will shorten the length of the probate proceedings.

c. We disagree with the power given a foreign personal representative under Section 4-201 of the UPC, which requires only that the non-resident fiduciary may secure removal of assets of a non-resident decedent from Alaska upon furnishing a copy of his appointment and an affidavit as to death, Alaska administration, and entitlement to payment. Nothing is said or provided concerning Alaska debts of the non-resident decedent, except that should a creditor in Alaska know of the death and the whereabouts of assets in Alaska, that creditor may object. This is considered inadequate and likely to result in no recovery in most cases. Suit against the foreign representative in the foreign jurisdiction is not a good remedy. We recommend that Sec. 4-201 be expanded to require some notice to Alaska creditors prior to removal of the assets from Alaska. We would add the following additional requirement to Sec. 4-201.

> "In addition to the foregoing requirements the domiciliary foreign representative shall furnish to any person having possession or control of personal property, or other asset sought to be removed from Alaska, proof that notice has been published in a newspaper of general circulation in the Borough or City where such assets are

located, at least once a week for three (3) weeks, that such property or other asset will be removed unless objections are made. Such notice shall specify the personal property or asset and its location in Alaska."

d. Section 2-901 UPC (Sec. 13.11.315 of draft copy) provides for deposit of wills with any court. This should be restricted to the Superior Courts inasmuch as the inferior courts, particularly in sparsely settled areas will not have the personnel or facilities to administer this provision. Basically we feel that Sections 2-901 and 2-902 might well be eliminated since they will burden the courts with additional duties, although it is assumed that the rules of court would require a charge to be made? The commentary to the UPC suggests that a central filing system be established soon and a statute be enacted requiring the registrar of the will to notify the central bureau so that any inquiries could be directed to the central bureau. All this seems unnecessary, and will require no end of additional court rules, record keeping, etc.

Should any further comments be desired it is suggested that you direct any inquiries directly to Kenneth McCaskey, Chairman, Real Property, Probate and Trust Committee, Alaska Bar Association, 921 W. Sixth Avenue, Anchorage, Alaska 99501.

Respectfully Yours,

Peter LaBate

F. O. Eastaugh, Esq.
Commissioner on Uniform State Laws
P. O. Box 1211
Juneau, Alaska 99801

Dear Commissioner:

Thank you very much for your letter of November 18, 1971 and the most welcome news contained therein that the Uniform Probate Code now stands a good chance of passage at the forthcoming session of the Alaska legislature.

I have examined with interest the proposed changes summarized in Mr. Mulder's memorandum addressed to the members of the Alaska Bar Association and your own comments.

Because of the pressures of my work, I will be unable to do much more than call attention to a matter which I hope will be reconsidered. It is your Item (4), which expresses a doubt concerning the wisdom of establishing an absolute three-year limit on commencing probate. I have talked to our chief reporter, Richard V. Wellman, and have asked him to write to you directly so that you may have the benefit of his views on the importance that the three-year limitation plays in the Code. Would it be possible at the same time for you to send him a copy of the material which you sent me so that if anything occurs to him that should be called to your attention he may be in a position to write you concerning the matter. Will you please send me a copy of your letter so that both he and I will be aware of what each is doing.

Again, my thanks to you and my personal regards to both yourself and Mrs. Eastaugh.

Sincerely,

CHARLES HOROWITZ

CH:vm

P.S. While talking to Professor Wellman I was informed that he had just received a letter from Professor Richard Effland of Arizona State University that Arizona will probably be introducing the Code at the next legislative session.

Comm. Disc.
RECEIVED
DEC - 3 1971
ROBERTSON, MONAGLE
EASTAUGH & BRADLEY

Frederick O. Eastaugh, Esq.
Box 1211
Juneau, Alaska 99801

Dear Fred:

Charles Horowitz telephoned recently to tell me that an important Alaskan committee had decided to make affirmative recommendations to your Legislature regarding the Uniform Probate Code. This is very good news. It puts Alaska with Arizona which, as I learned only a day or so ago, now has a totally favorable recommendation from a Law Revision Commission committee that spent a year in study of U.P.C.

Charles also indicated that he understood from your account to him that the Alaskan committee's recommendation would delete §3-108 which puts a three year from death time limit on proceedings to probate wills or administer estates. He asked me what I thought of this deletion and I responded that it would make hash out of much that Article III is designed to accomplish. He urged me to get my views on to you. This letter is designed to do just that.

The Committees and Reporters who created U.P.C. were not certain that three years from death was the correct deadline for probate and administration proceedings, but they were unanimously of the view that some cut-off on the possibility of probate and administration was necessary.

In Model Probate Code, §83 proposes a 5 year from death time limit on probate and administration proceedings. The statutory notes to M.P.C. report variations in state statutes prescribing probate limitations ranging from one year to twenty.

We know that at common law, there was no fixed time limit barring probate of a will. But, it was also true at common law that a will of land was like a deed in that no probate was essential as a preliminary to use of a will in evidence as a muniment of title.

But quite apart from historic sources concerning limitations on probate, §3-108 serves so many purposes in the functioning of Article III of U.P.C. that its deletion will cause serious difficulties unless it is offset by some careful re-drafting.

Consider these points:

(1) 3-108's three year limitation on probate serves as the time limit for contest of an informally probated will.

(2) 3-108's limitation serves to end questions concerning late-discovered wills that turn up after an estate has been distributed as intestate.

(3) 3-108's limitation period settles an estate as intestate and as lien-free if no will is probated and no administration is commenced. The public has been demanding a way by which inheritances can be perfected without an official act. Section 3-108 teams up with 3-101 to provide such a way. Few heirs will be content with the fact that inheritances will be non-marketable for the period prescribed by 3-108, so it's unlikely that many will avail themselves of the possibility. Nevertheless, it's quite important for good will purposes, and to restore public confidence in probate, that the possibility be available. Even those who use it may find title examiners insisting on a court determination of heirship (not barred by 3-108), but then again, not all heirship patterns are disputable or difficult to prove.

(4) The bar of 3-108 on administration bars the elective share proceedings under Article II, Part 2.

(5) The limitations in §3-1006 will not make any sense if 3-108 is deleted.

(6) Deletion of 3-108 seriously undercuts the effort reflected in Article II, Part 1 to make intestacy a recommended estate plan for many persons of ordinary means. This objective, in turn, is integral to the effort to re-establish confidence in sole ownership until death, and in state laws governing inheritance.

(7) Leaving 3-108 in the Code will not reduce the incentive for many inheritors and fiduciaries to use protective adjudications. The time for the end of questions relating to inheritances can be accelerated very appreciably by use of the formal proceedings provided in Article III, Part 4 and in §3-1001 and 3-1002.

I hope you can get your committee to reconsider the proposal to abandon this important time limit. Please let me know if I can be of any assistance in clarifying the matter.

Sincerely,

Richard V. Wellman

Re: Uniform Probate Code

Dear Dick:

Thank you for your letter of November 29 which contains exactly the information I was about to write you for.

I can accept all of the reasons you so aptly demonstrated for the questioned provision in the Code regarding the three year period of limitations for proceedings to probate wills or commence the administration of estates.

However, we have a problem in Alaska that might not be shared in the Lower 48. Most of us have at one time or another been faced with the necessity of probating estates some ten or more years after death in order to clear title to realty. We usually find it necessary to probate one or two estates in order to clear title and are sometimes able to do so for a nominal cost less than the cost of a quiet title action.

As you suggest 3-108 may be the perfect solution to such problems, and if the limitation period of this section will not satisfy the title companies it could well be that the suggested court determination of heirship could be handled at nominal cost to solve most problems.

Your comments or further suggestions would be helpful.

Our Legislative Council met this past Monday and it is my understanding this point was discussed but left for legislative committee action when the bill is introduced. I am accordingly taking the liberty of sending copies of this letter and of your letter, to Senator Robert Ziegler, who is Chairman of our Legislative Council and who will be most influential in determining the action to be taken in the forthcoming session, and also to John Elliott who as you know is Director of Legislative Affairs.

As Charles Horowitz suggested, I am enclosing a copy of the Code modified to conform to the Alaska Bill Drawing Manual with the accompanying memorandum from Russell E. Mulder, Deputy Director of Legislative Affairs.

I was in Anchorage last week to attend Bob Eastaugh's wedding. Jim Bradley came up for it. Avrum Gross is reviewing the Code for the Juneau Bar Association. Both Jim and Av wanted to be remembered to you.

Sincerely,

AGENC

UNIFORM PROBATE CODE—ILLEGITIMACY—Inheritance and the Illegitimate: A Model for Probate Reform

I. INTRODUCTION

On May 20, 1968, the United States Supreme Court handed down landmark decisions in *Levy v. Louisiana*[1] and *Glona v. American Guarantee & Liability Insurance Company*.[2] In *Levy*, five illegitimate children sued under article 2315 of the Louisiana Civil Code[3] for damages for the wrongful death of their mother. The suit was dismissed by the Louisiana district court, which held that illegitimate children had no cause of action under the Louisiana statute. In *Glona*, a Texas domiciliary brought a diversity action in federal district court in Texas for the wrongful death of her illegitimate son, caused by an automobile accident in Louisiana. The Texas district court dismissed the suit, holding that under Louisiana law the mother had no cause of action for the death of her illegitimate child. The Supreme Court granted the petition for certiorari in *Glona*[4] and noted probable jurisdiction in *Levy*.[5] With Justice Douglas writing for a majority of six in each case,[6] the Court reversed both decisions, holding that the Louisiana wrongful-death statute denied equal protection of the law both to illegitimate children and to their parents.

Levy and *Glona*, read narrowly, stand only for the proposition that a state wrongful-death statute cannot discriminate between beneficiaries solely on the basis of legitimacy. Read in their broadest sense, however, the opinions in the two cases condemn generally any classification based on legitimacy. A major problem with the opinions is that Justice Douglas did not specify the grounds on which he based his decision. Thus, the potential scope of the holdings is open to question. Several recent cases[7] have interpreted *Levy* to condemn all classifications based on legitimacy. Similarly,

1. 391 U.S. 68 (1968).

2. 391 U.S. 73 (1968).

3. LA. CIV. CODE ANN. art. 2315 (West Supp. 1969).

4. 389 U.S. 969 (1967).

5. 389 U.S. 925 (1967).

6. Justices Black and Stewart joined Justice Harlan, dissenting, in both cases. 391 U.S. at 76.

7. *See* King v. Smith, 392 U.S. 309 (1968), especially Justice Douglas, concurring, at 392 U.S. at 336 (AFDC payments); Munn v. Munn, 450 P.2d 68 (Colo. 1969) (support); R—— v. R——, 431 S.W.2d 152 (Mo. 1968) (support); *In re* Estate of Jensen, 162 N.W.2d 861 (N.D. 1968) (inheritance). *But see* Strahan v. Strahan, 304 F. Supp. 40 (W.D. La. 1969) (inheritance).

several commentators have argued persuasively that the *Levy* reasoning should be extended by a test of "close scrutiny" under the equal protection clause of the fourteenth amendment,[8] to areas of the law other than wrongful death and should be extended with equal force to the child-father relationship as well as the child-mother relationship.[9]

One area of the law in which there traditionally has been discrimination against the illegitimate is that of inheritance. While most states allow an illegitimate to inherit from his mother by intestate succession on an equal footing with legitimate offspring,[10] only three states[11] allow an illegitimate to inherit from the father equally with legitimate offspring. Rather, most states require the father formally to recognize or acknowledge his illegitimate offspring in order for the child to be able to inherit from the father by intestacy.[12] In a few other states a judgment in a paternity action gives the illegitimate child the right to inherit from his father.[13] Not all states allow illegitimates to inherit from the mother's family, and only a few allow them to inherit from the

---

8. The courts tend to apply a close-scrutiny test over classifications when the interests at stake are deemed fundamental (*see* Harper v. Virginia Bd. of Elections, 383 U.S. 663 (1966) (voting) and Douglas v. California, 372 U.S. 353 (1963) (right of the criminally accused to a proper defense)), or when the classification involved is inherently suspect (*see* Brown v. Board of Educ., 347 U.S. 483 (1954) (race)).

9. The general consensus among the commentators seems to be that either a close-scrutiny test should be applied or, in any event, the traditional state interests in supporting discrimination against illegitimates—to encourage marriage, to discourage promiscuity, and so forth—should no longer be considered "rational." *See generally* Krause, *Equal Protection for the Illegitimate*, 65 MICH. L. REV. 477 (1967); Krause, *Legitimate and Illegitimate Offspring of Levy v. Louisiana—First Decisions on Equal Protection and Paternity*, 36 U. CHI. L. REV. 338 (1969); Gray & Rudovsky, *The Court Acknowledges the Illegitimate: Levy v. Louisiana and Glona v. American Guarantee & Liability Insurance Co.*, 118 U. PA. L. REV. 1 (1969); Comment, *The Expanding Rights of the Illegitimate*, 3 CREIGHTON L. REV. 135 (1970); Note, *Equal Protection and the Applicability of Levy v. Louisiana to Succession Law*, 44 TUL. L. REV. 640 (1970); Note, *Inheritance Rights of Illegitimate Children Under the Equal Protection Clause*, 54 MINN. L. REV. 1336 (1970); Recent Development, 21 CASE W. RES. L. REV. 292 (1970).

10. *See* Note, *Illegitimacy*, 26 BROOKLYN L. REV. 45, 76-79 (1959).

11. Arizona, North Dakota, and Oregon have abolished illegitimacy as a legal status. *See* ARIZ. REV. STAT. ANN. § 14-206 (1956) ("A. Every child is the legitimate child of its natural parents. . . . B. Every child shall inherit from its natural parents and from their kindred heir, lineal and collateral, in the same manner as children born in lawful wedlock. . . ."); N.D. CENT. CODE § 56-01-05 (Supp. 1969) ("Every child is hereby declared to be the legitimate child of his natural parents. . . . He shall inherit from his natural parents, and from their kindred heir, lineal and collateral. . . ."); ORE. REV. STAT. § 109.060 (1968) ("The legal status and legal relationships and the rights and obligations between a person and his descendants, and between a person and his parents, their descendants and kindred, are the same for all persons, whether or not the parents have been married.").

12. *See* Note, *Illegitimacy*, 26 BROOKLYN L. REV. 45, 76-79 (1959).

13. *Id.*

father's family.[14] Furthermore, when a testator makes a bequest to his "children" in a will, many states have construed that term to include only legitimate children.[15] Thus, most states discriminate against illegitimates in their inheritance laws, although there are local variations concerning the manner and extent of the discrimination.

In light of *Levy* and *Glona*, and their progeny, the state inheritance statutes that discriminate on the basis of legitimacy are of dubious constitutionality.[16] Moreover, there has been over the past decade a perceptible trend in state and federal laws to bring the illegitimate child into a position of parity with his legitimate counterpart with regard to various legal rights.[17] Furthermore, commentators such as Norman Dacey[18] have soundly criticized probate laws on various grounds, and have exerted discernible pressure for a reform of probate law into a system more responsive to present-day needs. In light of these developments, therefore, it is likely that many states will be revising their inheritance statutes to provide illegitimates with certain legal rights that compare favorably with those accorded legitimate offspring.

The Uniform Probate Code (Code),[19] which was approved by the American Bar Association in August 1969, deals with the prob-

14. *Id.*

15. *See* Annot., 34 A.L.R.2d 4 (1954) (Right of Illegitimate Child To Take Under Testamentary Gift to "Children").

16. The commentators have painstakingly explored the constitutional issues involved. *See* sources cited at note 9 *supra*. In general, the consensus seems to be that while the right to inherit by intestacy—being a matter of statutory grace—is probably not a basic civil right, any classification based on legitimacy is probably inherently suspect—just as is a classification based on race. Thus the strict test of close scrutiny under the equal protection clause should apply. *See* note 8 *supra*. Furthermore, myths of a "rational purpose" (for a statement of the rational-purpose or reasonable-basis test of equal protection under the fourteenth amendment, see Lindsley v. Natural Carbonic Gas Co., 220 U.S. 61 (1911)) to support discrimination against illegitimates—discouraging promiscuity, preserving the family unit, promoting morality—have been largely exploded by the same commentators. On the other hand, a federal district court in Strahan v. Strahan, 301 F. Supp. 40 (W.D. La. 1969), recently held Louisiana's intestacy statute, which denies to unacknowledged illegitimates the rights of inheritance enjoyed by legitimate issue of an intestate decedent, to be reasonable under the rationality test of the equal protection clause—the test that the court felt was applicable. The court identified two rationales sufficient to justify the statutory discrimination: (1) encouraging marriage and discouraging promiscuity, and (2) Louisiana's interest in maintaining stability of land titles. 304 F. Supp. at 42. The *Strahan* decision is criticized in Comment, *The Expanding Rights of the Illegitimate*, 3 CREIGHTON L. REV. 135, 155 (1970); Note, *Equal Protection and the Applicability of Levy v. Louisiana to Succession Law*, 44 TUL. L. REV. 640, 642 (1970); Recent Development, 21 CASE W. RES. L. REV. 292, 293-94 (1970).

17. *E.g.*, WIS. STAT. ANN. § 852.05 (Supp. 1970), and official comment. *See* Note, *The Rights of Illegitimates Under Federal Statutes*, 76 HARV. L. REV. 337 (1962).

lem of inheritance by illegitimates both with regard to intestate succession—section 2-109—and also with regard to the construction of a bequest to "children" by will—section 2-611. This Note will examine the issue whether the Code, which presents a comprehensive model for probate reform, deals with the problem of inheritance by illegitimates in an appropriate, desirable, and constitutional manner. The Code provisions concerning illegitimacy relate to many other provisions of the Code in which childhood status is relevant;[20] therefore, it will be useful to analyze these other provisions in order to assess the over-all effect of section 2-109 and section 2-611 in an integrated probate system. On the other hand, the formulae set out in sections 2-109 and 2-611, if constitutional, could constitute a desirable model for probate reform—even apart from the entire reform package of the Code—for those states that wish to, or, indeed, who are forced to, reform their laws in this important area.

II. The Illegitimate and Intestate Succession Under the Uniform Probate Code

A. *Section 2-109*

1. *Meaning*

Article 2 of the Code deals with intestate succession and wills. Under that article, section 2-109 defines "child" for the purpose of intestate succession. Furthermore, since section 1-201, the general definitional section of the Code, adopts the section 2-109 definition of "child," that definition is established for all purposes throughout the Code.[21] Section 2-109 provides:

> If, for purposes of intestate succession, a relationship of parent and child must be established to determine succession by, through, or from a person,
>
> (1) an adopted person is the child of an adopting parent and not of the natural parents except that adoption of a child by the spouse of a natural parent has no effect on the relationship between the child and that natural parent.
>
> (2) In cases not covered by (1), a person born out of wedlock is a child of the mother. That person is also a child of the father, if:
>
> (i) the natural parents participated in a marriage ceremony before or after the birth of the child, even though the attempted marriage is void; or
>
> (ii) the paternity is established by an adjudication before the death of the father, or is established thereafter by clear and con-

20. *See* pt. II. B. *infra*.

21. UPC § 1-201(5) provides: "'Child' includes any individual entitled to take as a child under this Code by intestate succession from the parent whose relationship is involved and excludes any person who is only a stepchild, a foster child, a grandchild or any more remote descendant."

> vincing proof, except that the paternity established under this subparagraph (ii) is ineffective to qualify the father or his kindred to inherit from or through the child unless the father has openly treated the child as his, and has not refused to support the child.

The language of the statute seems to be clear for the most part, but there may be an ambiguity that could best be dealt with in a comment to the statutory language. Subsection (2) is intended to define the right of an illegitimate who is not subsequently adopted under subsection (1) to inherit by intestacy. Such a person is always the "child" of the mother, and is also the "child" of the father if he is legitimated by the marriage of his natural parents or if he or his mother can establish the identity of the natural father to the satisfaction of subparagraph (2)(ii) of the section. Although the language of subsection (2) seems to be clear on its face, it appears to contain a latent ambiguity in that subparagraph (2)(i) runs headlong into "one of the strongest presumptions" in this area of the law—the presumption of legitimacy.[22] This doctrine, which derives from English law[23] and which is very common in American jurisdictions,[24] raises a strong presumption, usually rebuttable only by proof of impotency or nonaccess, that any child born in wedlock is legitimate.[25] The presumption is an outgrowth of the time when bastardy was not only a source of reproach and ridicule, but also a source of grave material and legal disadvantage. Although the stigmas attached to bastardy, both personal and legal, have gradually dissipated somewhat over the years, the presumption has remained.[26] The source of the crucial ambiguity lies in the fact that the term "wedlock" is used in a more narrow sense in the Code than it is in the presumption of legitimacy.

It seems clear from a reading of section 2-109 that the policy of that section is to enable illegitimates to inherit from their natural parents—hence "wedlock" is intended to mean marriage between the natural parents of a child. The policy of the presumption of legitimacy, however, is to avoid bastardization of as many children as possible—hence "wedlock" simply means any marriage at all. Accordingly, the presumption has been held to override an acknowledgment by the true father from an adulterous relationship when there was no clear proof of nonaccess or impotence of the legal husband.[27] Therefore, since the policy of section 2-109

dictates that "wedlock" means marriage only between the natural parents, that interpretation should be made explicit either in the statute or in a comment to that section, and the presumption of legitimacy should be similarly limited in those jurisdictions that may adopt the Code formulation of section 2-109.

2. *Constitutionality*

Assuming that section 2-109 can be read literally, subject to the above qualifications, it must, of course, pass the test of the equal protection clause of the fourteenth amendment in order to be valid. While Justice Douglas did not clearly specify the equal protection test which he applied in *Levy and Glona*,[28] it appears that section 2-109 would be valid vis-à-vis inheritance by illegitimate children under either the rationality test[29]—the basic test of equal protection—or under the close-scrutiny test[30]—the test applied when a basic civil right or an inherently suspect classification is involved.[31] The provision would be valid for the simple reason that it makes no classification on the basis of illegitimacy. Section 2-109(1) makes no distinction whatever between legitimates and illegitimates, and section 2-109(2) merely establishes a burden of proof[32] of paternity in the child-father relationship which the illegitimate must meet before he can inherit from his natural father. Substantively, section 2-109(2) takes the position that all children have the right to inherit equally from their natural parents. The draftsmen of the provision recognized, however, that while there are few, if any, problems of proof in ascertaining the child-mother relationship, such problems may be substantial indeed in ascertaining the child-father relationship. Thus, section 2-109(2)(ii) sets out a standard of proof for the illegitimate or his next friend to meet in establishing paternity if it has not been established by adoption under subparagraph (1). By imposing a burden of proof, then, section 2-109(2) does not entail a classification that must pass muster before the appropriate equal protection test, but rather, it entails a standard that must be measured by due process considerations.

30. *See* McLaughlin v. Florida, 379 U.S. 184 (1964); Oyama v. California, 332 U.S. 633 (1948); Korematsu v. United States, 323 U.S. 214 (1944). *See also* note 8 *supra*.

31. Gray & Rudovsky, *supra* note 9, at 15, suggest that perhaps the Court in *Levy* and *Glona* has taken a middle ground between the rationality and strict-scrutiny tests.

32. In *Glona*, Justice Douglas suggested that the danger of fraudulent claims is properly handled by an appropriate burden of proof rather than by making a classification which amounts to a denial of equal protection. 391 U.S. at 75-76.

One of the prime purposes of imposing a burden-of-proof requirement is to prevent fraudulent claims.[33] So stated, such a requirement certainly serves a valid state purpose. However, if the burden imposed is too heavy—that is, if it is tantamount to a bar to recovery in a substantial number of cases—it may operate as a deprivation of property without due process of law on those unable to meet the unreasonable burden.[34] It does not appear, however, that the standard adopted in section 2-109(2)(ii) is so onerous as to be violative of due process. If the only means of establishing paternity were by an adjudication before the death of the father, the standard would be of doubtful validity since the illegitimate's legal rights would be determined by the volitional acts of other people—the father by acknowledgment, or the mother by prosecuting a paternity suit. By allowing clear and convincing proof of paternity after the father's death, however, the statute, unlike many of the present provisions requiring acknowledgment by the father while he is alive,[35] allows the child or his next friend to gather appropriate proof of paternity in cases in which the father has died without acknowledging the child. The "clear and convincing" standard of section 2-109 is consistent with other burdens of proof relating to legal relationships involving deceased persons.[36] Thus, it appears that the provisions of section 2-109 governing inheritance of the illegitimate child by, through, or from his natural father are constitutional.

On the other hand, there may be raised grave doubts concerning the constitutionality of that portion of section 2-109 relating to the right of a father or his kindred to inherit from or through his illegitimate child. The Code provides that even if paternity is established under section 2-109(2)(ii), the father and his kindred cannot inherit from or through the child "unless the father has openly treated the child as his, and has not refused to support the child."[37] The rationale behind that provision seems to be to encourage fathers at least informally to acknowledge and support their illegitimate children. While this purpose may be a rational one under traditional equal protection analysis, it cannot stand if the close-scrutiny test of equal protection is applied. The Supreme Court has held in *Skinner v. Oklahoma*[38] that a statute touching

36. *Compare, e.g.*, N.M. STAT. ANN. § 20-5-2 (Supp. 1969) (interested party cannot obtain judgment against a deceased person on his own evidence unless such evidence is corroborated by other material evidence) *with* W. VA. CODE ANN. § 57-3-1 (1966) (interested party shall not be examined as a witness in regard to any personal transaction or communication between himself and a deceased except on his own behalf).

37. UPC § 2-109(2)(ii).

38. 316 U.S. 535 (1942).

on fundamental rights must not be underinclusive. Yet section 2-109(2)(ii) arguably is underinclusive since it does not cut off the rights of all fathers who desert or fail to support their children, but rather cuts off the rights of only those who happen to have illegitimate children. Thus the constitutionality of the last clause of section 2-109(2)(ii) may turn on how the right to inherit is characterized or on how the use of ancestry (in the sense of legitimacy) as a means of classification is viewed.[39] If the right to inherit is deemed a basic civil right, or if classification based on legitimacy is deemed suspect—as is classification based on race—then the strict test of equal protection will apply,[40] and the last clause of section 2-109(2)(ii) may not pass that test.

3. *Desirability*

If section 2-109 meets the tests of the equal protection and due process clauses of the fourteenth amendment, as it probably does, it still must accomplish a desirable distribution in order to be appropriate for adoption by the various states either with or without the rest of the Code package. The law of intestate succession has two principal aims: to achieve a distribution of property at death which society deems fair, and to distribute property according to the presumed intent of the deceased.[41] If a socially equitable distribution were the sole aim of intestacy statutes, the distribution plan based on the definition of "child" in section 2-109(2) could not be faulted. It seems only fair that the natural offspring of decedents should be the object of their bounty in the state's estate plan. Illegitimate offspring are no less deserving of their natural parents' bounty because of a mere accident of birth than are their legitimate brethren. In fact, given the extent of the stigma that still attaches to bastardy,[42] it could be argued that illegitimates may be more entitled to compensation in the form of inheritance than legitimate children, at least from the standpoint of social justice. At any rate, it seems clear that from the standpoint of equitable distribution the most desirable plan is to treat legitimates and illegitimates as nearly equally as possible, especially in light of the proof considerations that must be taken into account—and section 2-109(2) accomplishes this end.

However, achieving a socially equitable distribution is only one of the goals of intestacy statutes; reflecting the presumed intent of the ordinary testator in lieu of a valid will is the other primary goal. With regard to this latter goal it could readily be argued that most decedents, especially fathers, would not wish to have

39. *See* note 10 *supra*.

42. *See* V. SAARIO, *supra* note 26, at 143-47.

their illegitimate offspring included among their heirs. But if the statute is designed to reflect presumed intent, it must still do so within constitutional limits. If the normal testator's presumed intent is in fact frustrated by the provisions of section 2-109(2), it is clear that the fourteenth amendment requires that result. In *Shelley v. Kraemer*,[43] the Supreme Court held that the equal protection clause prohibits court enforcement of restrictive covenants based on race. The reasoning of *Shelley* can be applied by analogy to the instant situation—a state is not allowed by statute or other state action to attribute a discriminatory intent to those who may not in fact have had such an intent.[44] Given the additional fact that a testator who is so inclined can exclude illegitimate children from his estate by disinheriting them by will, there appears to be no reason whatever to inject a presumption of discriminatory intent into the intestacy laws. Rather, the burden of discrimination properly lies with the testator.[45] Thus, it appears that the legal-estate plan of the Code based on the definition of "child" in section 2-109(2) reaches a desirable result in light of both social values and presumed intent.

Section 2-109(1), which relates to inheritance by adopted persons, also seems to achieve a desirable disposition. That subsection is apparently designed to apply to three types of situations, only two of which deal directly with illegitimacy. The first situation involves the case in which the parents of a legitimate child are divorced, one of the parents subsequently remarries, and the new step-parent adopts the child. This situation, by its very nature, would not arise with regard to an illegitimate child. The second situation is the case in which one of the natural parents of a child, whether legitimate or illegitimate, dies, the surviving spouse remarries, and the new step-parent adopts the child. In such a case the child would only be the child of the surviving spouse and the step-parent, and not of the deceased natural parent. Thus, adoption would cause the child, whether legitimate or illegitimate, to lose his right to inherit through his deceased natural parent, to the extent that he has not already done so before the act of adoption takes place. The third situation involves the case in which an illegitimate child is born, one of the natural parents marries a spouse other than the other natural parent, and such new spouse adopts the child. In this case, the child would inherit by, from, and through only his married natural parent and step-parent, not from the other natural parent. Similarly, the other natural parent

43. 334 U.S. 1 (1948).

44. *Cf.*, Reitman v. Mulkey, 387 U.S. 369 (1967).

45. An individual is free to discriminate against anyone he pleases so long as no state action is involved. *See generally* Shelley v. Kraemer, 334 U.S. 1 (1948); Civil Rights Cases, 109 U.S. 3 (1883).

could not inherit by, from, and through the child, at least by intestacy.

Section 2-109(1), insofar as it relates to illegitimates in the second and third situations just mentioned, appears to be desirable both from the standpoint of social justice and that of the presumed intent of the deceased. Furthermore, section 2-109(1) is not inconsistent with the statutory provisions presently in force in many states with regard to adopted children.[46] At first glance, it might appear that section 2-109(1) fails to take adequate account of natural filial relationships in that adoption causes a child to lose his right to inherit by, through, or from his other natural parent.[47] On the other hand, there are persuasive reasons why an adopted child should not inherit by, through, or from his other natural parent. In the first place, any social-justice argument that could be made to the contrary is neutralized by the fact that the illegitimate will be taking by intestacy by, through, or from someone—namely the adopting parent as well as his or her natural-parent spouse. In addition, insofar as section 2-109(1) is designed to reflect the presumed intent of both the adopting parent and the other natural parent it seems to do so—surely the adopting parent would wish to make his adopted child the object of his bounty, and it is almost as likely that the other natural parent would not wish for his estate to be distributed to a child who has been adopted, and in many cases reared, by another person.[48] Finally, in many adoption cases, the other natural parent may not be known to the child —especially an illegitimate child—and it would seem to be a valid

---

46. *See, e.g.*, MICH. COMP. LAW ANN. § 702.86 (1968); N.J. STAT. ANN. § 9:3-30 (1968).

47. In fact, the traditional rule in many states has been that an adopted child still retains his right to inherit by, from, and through his natural parents, and in some states this is still the rule. *See, e.g.*, ALA. CODE tit. 27, § 5 (Supp. 1969). The trend in recent years, however, has been to subordinate the interest of fostering natural filial relationships to that of fostering unity in the adopting family. The New York experience in this regard is instructive. Until 1963, New York law, in accordance with the traditional rule, provided that an adopted child inherited from his natural as well as his adopting parents. Ch. 147, § 1, [1961] N.Y. Laws 781-82. In 1963 the law was changed to provide that an adopted child retained the right to inherit from his natural parents only when a natural parent remarried and consented to the adoption of the child by his or her spouse. N.Y. DOM. REL. LAW § 117 (McKinney 1964). Finally, in 1966 the law was changed further to provide that "[w]hen a natural . . . parent . . . marries or remarries, and consents that the stepfather or stepmother may adopt such child, such consent shall not . . . affect the rights of such consenting spouse and such foster child to inherit from and through each other and the natural and adopted kindred of such consenting spouse." N.Y. DOM. REL. LAW § 117 (McKinney Supp. 1969). In addition to fostering family unity, the effect of the present New York provision, as well as that of UPC § 2-109, is to give the adopted child the same relative rights that a natural child of the same parents would have.

48. Adoption statutes and procedures generally produce a clean break between the natural parents and the child. Especially in the case of agency adoptions, the natural parents often do not know who the adopting parents are. *See, e.g.*, Katz, *Judicial and Statutory Trends in the Law of Adoption*, 51 GEO. L.J. 64, 66-69 (1962).

state interest to attempt to protect the new family unit by not creating an economic incentive for the child to investigate his natural parentage.[49] Thus, it is submitted that the Code's solution of treating an adopted child as the child of the adopting parent in place of the other natural parent is the best way of dealing with situations involving illegitimacy and adoption.

B. *The Impact of Section 2-109 on Other Provisions of the Uniform Probate Code Relating to Intestate Succession*

Section 2-109, which treats the illegitimate offspring as the child of the natural mother in all cases, and the child of the natural father if certain conditions of proof are met, cannot be viewed in a vacuum. Although that section could be severed from the rest of the Code, it forms an integral part of article 2 relating to intestate succession and wills. As mentioned above, the general definitional section of the Code in article 1 adopts the section 2-109 definition of "child" throughout the entire Code.[50] In article 2 itself, the new and broader definition of "child" affects no less than fifteen other sections.[51] It may be useful to survey some of those sections briefly to discern the over-all impact of section 2-109 on inheritance law and to point out certain areas where draftsmen may wish to adjust their planning to take the impact of section 2-109 into account.

The intestate share of the surviving spouse is determined by section 2-102.[52] Since the share of the surviving spouse varies depending on the existence of issue of the decedent, treating illegitimates as heirs of a deceased father would change the spouse's

49. Full integration of the adopted child into the adopting family is a major social objective of adoption. Lingering ties with one or both natural parents would seem to undermine that objective. *See* Katz, *supra* note 48.

50. *See* note 21 *supra* and accompanying text.

51. Naturally, since UPC § 2-109 defines "child" and since children are an essential beneficiary in any intestacy scheme, the substantive and procedural rules governing intestate succession which the UPC sets forth will be applicable to illegitimates as well as legitimate children. *See, e.g.*, UPC § 2-104 (children must survive the testator for 120 hours in order to take an intestate share); UPC § 2-107 (halfbloods take as if they were of the whole blood); UPC § 2-111 (debts owed to the decedent will only be charged against the debtor's share); UPC § 2-801 (renunciation). Treating illegitimates as children under these provisions, however, does not create any special problems for draftsmen.

52. UPC § 2-102 provides:

The intestate share of the surviving spouse is:

(1) if there is no surviving issue or parent of the decedent, the entire intestate estate;

(2) if there is no surviving issue but the decedent is survived by a parent or parents, the first [$50,000], plus one-half of the balance of the intestate estate;

(3) if there are surviving issue all of whom are issue of the surviving spouse also, the first [$50,000], plus one-half of the balance of the intestate estate;

(4) if there are surviving issue one or more of whom are not issue of the surviving spouse, one-half of the intestate estate.

The same analysis would apply to UPC § 2-102A for community property states.

share considerably, at least when the father has no legitimate issue. Rather than taking the whole intestate estate under section 2-102(1) or the first 50,000 dollars plus one half of the remaining estate under sections 2-102(2) or (3) if illegitimates were not treated as heirs of the father, the widow would now take one half of the intestate estate under section 2-102(4). Thus, because of the effect that section 2-109 has on section 2-102, the married father of illegitimate offspring who wants his wife to inherit his entire estate would be forced to draft a will to achieve that particular disposition.

Section 2-103[53] allocates that portion of the intestate estate which remains after the surviving spouse takes her share, or the entire estate if there is no surviving spouse. Under section 2-103(1), treating illegitimate children as heirs of the father will affect the size of the shares that pass to legitimate children. It is not difficult to imagine a case in which heirs who would otherwise take per capita would be relegated to taking by representation by virtue of the existence of an illegitimate child of a degree closer to the parent, since shares are determined pursuant to section 2-106, relating to representation, and the illegitimate simply would be added to the class of heirs at the appropriate level. Similarly, illegitimates can take by representation through their dead parents, thus creating another class of heirs in some cases, and reducing the per capita shares of the first degree accordingly. Perhaps even more important than its effect on section 2-103(1) is the possible effect of section 2-109 on sections 2-103(2), (3), and (4). Under those provisions, the share of the decedent's parents, his brothers and sisters, and his grandparents respectively are all contingent on the absence of surviving issue. Thus, if a man died leaving an illegitimate son and two aged parents, his entire estate would go to the

53. UPC § 2-103 provides:

The part of the intestate estate not passing to the surviving spouse under Section 2-102, or the entire intestate estate if there is no surviving spouse, passes as follows:

(1) to the issue of the decedent; if they are all of the same degree of kinship to the decedent they take equally, but if of unequal degree, then those of more remote degree take by representation;

(2) if there is no surviving issue, to his parent or parents equally;

(3) if there is no surviving issue or parent, to the brothers and sisters and the issue of each deceased brother or sister by representation; if there is no surviving brother or sister, the issue of brothers and sisters take equally if they are all of the same degree of kinship to the decedent, but if of unequal degree then those of more remote degree take by representation;

(4) if there is no surviving issue, parent or issue of a parent, but the decedent is survived by one or more grandparents or issue of grandparents, half of the estate passes to the paternal grandparents if both survive, or to the surviving paternal grandparent, or to the issue of the paternal grandparents if both are deceased, the issue taking equally if they are all of the same degree of kindship to the decedent, but if of unequal degree those of more remote degree take by representation; and the other half passes to the maternal relatives in the same manner; but if there be no surviving grandparent or issue of grandparent on either the paternal or the maternal side, the entire estate passes to the relatives on the other side in the same manner as the half.

illegitimate son. In much the same manner, treating an illegitimate as an heir may prevent escheat under section 2-105.[54] Draftsmen must be especially wary of section 2-103 since the existence of illegitimate heirs may cause distribution of the intestate estate contrary to the wishes or expectations of many decedents with illegitimate offspring. It is now necessary to advise such persons to write a will rather than rely on the intestacy laws.

Treating illegitimates as heirs of the father also has an important effect on section 2-108[55] relating to afterborn heirs. Under that provision, illegitimates who are conceived before a decedent's death but born thereafter will be heirs as if they were born during the lifetime of the decedent. Thus, the juxtaposition of sections 2-108 and 2-109 could give rise to a spate of fraudulent claims by pregnant "gold diggers." In such cases the "clear and convincing" proof requirement for establishing paternity under section 2-109 should prove its usefulness.

Section 2-109 also has an important impact on section 2-110[56] relating to advancements. Under section 2-110 an illegitimate, as an heir, is subject to having receipts treated as advancements in certain cases. The provision is sufficiently clear that support payments, for instance, would not be treated as advancements unless a writing to that effect can be produced. It should be noted, however, that an astute draftsman could make good use of section 2-110, since a father who is supporting illegitimate children in another household may wish to designate such support payments as advancements in order to make what he feels to be an equitable distribution of his estate. Section 2-110 would seem to allow him to make such a designation.

The effect of section 2-109 on section 2-112[57] dealing with alienage could also prove to be important and lead to some difficulties, since alien illegitimates would be entitled to take as heirs under that provision. In light of the number of American servicemen and travelers going abroad each year, it is not unlikely that

54. UPC § 2-105 provides: "If there is no taker under the provisions of this Article, the intestate estate passes to the [state]."

55. UPC § 2-108 provides: "Relatives of the decedent conceived before his death but born thereafter inherit as if they had been born in the lifetime of the decedent."

56. UPC § 2-110 provides:

> If a person dies intestate as to all his estate, property which he gave in his lifetime to an heir is treated as an advancement against the latter's share of the estate only if declared in a contemporaneous writing by the decedent or acknowledged in writing by the heir to be an advancement. For this purpose the property advanced is valued as of the time the heir came into possession or enjoyment of the property or as of the time of death of the decedent, whichever first occurs. If the recipient of the property fails to survive the decedent, the property is not taken into account in computing the intestate share to be received by the recipient's issue, unless the declaration or acknowledgment provides otherwise.

57. UPC § 2-112 provides: "No person is disqualified to take as an heir because he or a person through whom he claims is or has been an alien."

such servicemen and travelers father a number of alien illegitimate children.[58] However, it seems doubtful that many alien illegitimates will be able to sustain the "clear and convincing" proof burden of section 2-109(2)(ii). Moreover, international conflict-of-laws problems could arise in this area regarding choice of law, and could be especially troublesome if the child is born in a country that does not recognize paternity actions.

It should be noted that section 2-109 will also affect provisions of the Code other than those dealing strictly with intestate succession, since on the basis of that section, illegitimates may be able to take against a valid will in certain instances. For example, an illegitimate child could be a pretermitted heir under section 2-302[59] just as a legitimate child could be. Section 2-302 could present the draftsman with substantial problems since that section not only presumes the existence of a will but further presumes that the omission of an afterborn illegitimate child in that will was unintentional, except in enumerated circumstances. If an afterborn illegitimate child is deemed to be a pretermitted heir, he is entitled to take against the will the value which he would have received if the testator had died intestate. Furthermore, under section 2-302(b) an illegitimate child is entitled to a like share if the testator omitted him from his will in the belief that the child was dead. It may be that, in light of the relationship between sections 2-109 and 2-302, draftsmen will insert in many wills a provision to the effect that afterborn illegitimate children are purposely excluded from the testator's will, in order to make certain the circle of heirs in a given estate plan. This procedure would also provide a solution to the pregnant "gold digger" problem, alluded to earlier,[60] which might arise in this context as well.

Illegitimates may also be able to take the homestead allowance, exempt-property allowance, and family allowance against a will

58. *See, e.g.*, V. SAARIO, *supra* note 26, at 15.

59. UPC § 2-302 provides:

(a) If a testator fails to provide in his will for any of his children born or adopted after the execution of his will, the omitted child receives a share in the estate equal in value to that which he would have received if the testator had died intestate unless:

(1) it appears from the will that the omission was intentional;

(2) when the will was executed the testator had one or more children and devised substantially all his estate to the other parent of the omitted child; or

(3) the testator provided for the child by transfer outside the will and the intent that the transfer be in lieu of a testamentary provision is shown by statements of the testator or from the amount of the transfer or other evidence.

(b) If at the time of execution of the will the testator fails to provide in his will for a living child solely because he believes the child to be dead, the child receives a share in the estate equal in value to that which he would have received if the testator had died intestate.

(c) In satisfying a share provided by this section, the devises made by the will abate as provided in Section 3-902.

60. *See text* following note 55 *supra*.

pursuant to sections 2-401 [61] 2-402,[62] and 2-403[63] respectively. Under section 2-401, if there is no surviving spouse, the minor or dependent illegitimate children have a right to share the homestead allowance of 5,000 dollars with other legitimate minor or dependent children. Thus, illegitimate children may be entitled to a homestead allowance when there otherwise would be none, as in the case in which a single man who was the father of a minor illegitimate child disposed of his entire estate by will. Similarly, under section 2-402 an illegitimate child is entitled to share in the exempt-property allowance for an estate up to a total of 3,500 dollars if there is no surviving spouse. In contrast to the homestead allowance, in order to be entitled to the exempt-property allowance illegitimates need not be minors or dependent on the decedent. Fur-

61. UPC § 2-401 provides:

A surviving spouse of a decedent who was domiciled in this state is entitled to a homestead allowance of [$5,000]. If there is no surviving spouse, each minor child and each dependent child of the decedent is entitled to a homestead allowance amounting to [$5,000] divided by the number of minor and dependent children of the decedent. The homestead allowance is exempt from and has priority over all claims against the estate. Homestead allowance is in addition to any share passing to the surviving spouse or minor or dependent child by the will of the decedent unless otherwise provided, by intestate succession or by way of elective share.

62. UPC § 2-402 provides:

In addition to the homestead allowance, the surviving spouse of a decedent who was domiciled in this state is entitled from the estate to value not exceeding $3,500 in excess of any security interests therein in household furniture, automobiles, furnishings, appliances and personal effects. If there is no surviving spouse, children of the decedent are entitled jointly to the same value. If encumbered chattels are selected and if the value in excess of security interests, plus that of other exempt property, is less than $3,500, or if there is not $3,500 worth of exempt property in the estate, the spouse or children are entitled to other assets of the estate, if any, to the extent necessary to make up the $3,500 value. Rights to exempt property and assets needed to make up a deficiency of exempt property have priority over all claims against the estate, except that the right to any assets to make up a deficiency of exempt property shall abate as necessary to permit prior payment of homestead allowance and family allowance. These rights are in addition to any benefit or share passing to the surviving spouse or children by the will of the decedent unless otherwise provided, by intestate succession, or by way of elective share.

63. UPC § 2-403 provides:

In addition to the right to homestead allowance and exempt property, if the decedent was domiciled in this state, the surviving spouse and minor children whom the decedent was obligated to support and children who were in fact being supported by him are entitled to a reasonable allowance in money out of the estate for their maintenance during the period of administration, which allowance may not continue for longer than one year if the estate is inadequate to discharge allowed claims. The allowance may be paid as a lump sum or in periodic installments. It is payable to the surviving spouse, if living, for the use of the surviving spouse and minor and dependent children; otherwise to the children, or persons having their care and custody; but in case any minor child or dependent child is not living with the surviving spouse, the allowance may be made partially to the child or his guardian or other person having his care and custody, and partially to the spouse, as their needs may appear. The family allowance is exempt from and has priority over all claims but not over the homestead allowance.

The family allowance is not chargeable against any benefit or share passing to the surviving spouse or children by the will of the decedent unless otherwise provided, by intestate succession, or by way of elective share. The death of any person entitled to family allowance terminates his right to allowances not yet paid.

thermore, illegitimates would be able to take advantage of the family-allowance provision of section 2-403 up to a total of 6,000 dollars during the period of administration of the estate. If the spouse survives, the family allowance is paid to her (or him) for the care of herself and the children living with her. But if the minor or dependent illegitimate child is not living with the surviving spouse, the allowance is apportioned between such spouse and such child. This situation would be fairly common in cases in which the parents of the illegitimate child do not live together. If no spouse survives the family allowance is paid directly to children who qualify. It should be noted that the homestead, exempt-property, and family allowances all are created by statute and, as such, entitle qualified persons to take against the will regardless of a testator's contrary intent.

From this brief survey of other relevant Code sections to which section 2-109 relates, it is clear that the repercussions of treating illegitimates as heirs of the natural parents whenever possible can have a profound effect on the distribution of estates. Thus, estate planners must be alert to the implications of section 2-109 in order to develop secure estate plans. Section 2-109 assures that if a testator wishes to discriminate against his illegitimate offspring, the law will not accomplish that task for him.

III. The Illegitimate and the Class Gift to Children Under the Uniform Probate Code

Part 6 of article 2 of the Code deals with rules of construction for wills and contains the other crucial Code provision dealing with illegitimates—section 2-611. As the general comment to part 6 suggests, "all of the 'rules' set forth yield to a contrary intent expressed in the will and are therefore merely presumptions."[64] Nonetheless, rules of construction are an important aspect of inheritance law, for all too often testators fail to make clear their intentions in a will, and courts need some guidance in the form of legal presumptions in construing wills. Section 2-611 is that rule of construction which defines "child" in a class-gift terminology. That section provides that:

> Halfbloods, adopted persons, and persons born out of wedlock are included in class gift terminology and terms of relationship in accordance with rules for determining relationships for purposes of intestate succession, but a person born out of wedlock is not treated as the child of the father unless the person is openly and notoriously so treated by the father.[65]

64. UPC art. 2, pt. 6, general comment.

65. UPC § 2-611.

Thus, section 2-611[66] adopts the basic formula of section 2-109 and adds another condition that the illegitimate must fulfill before he can be presumed to take under a bequest to children. The import of the provision is clear: the illegitimate child will always be included in a bequest to "children" by the mother; on the other hand, the same illegitimate child will only be included in a bequest to "children" by the father if the illegitimate can first establish paternity under section 2-109 *and* if the father openly and notoriously treats the child as his own. Section 2-611 by its terms only requires that an illegitimate be treated openly and notoriously as the child of the father in order to be included under a class gift to children. But the definition of "child" as used in section 2-611 comes from section 1-201(3) which extends the section 2-109 definition of "child" throughout the Code.[67] Thus, it seems that an illegitimate must satisfy requirements of both sections 2-109 and 2-611 in order to be included in a class gift to children.

Since a statutory presumption such as that found in section 2-611 constitutes state action no less than judicial enforcement of a restrictive covenant,[68] such a presumption must stand up to constitutional scrutiny under the fourteenth amendment. Section 2-611 poses no due process problems since it creates only a rebuttable presumption.[69] It may, however, be constitutionally suspect under the equal protection clause. The rationale behind the presumption in section 2-611 seems to be the "family-unit" theory,[70] which assumes that a testator normally wishes his bounty to pass to those within his family unit. As a general rule, the family-unit theory may be factually supportable, and may form a good basis for attempting to discern the actual intent of most testators. But unfortunately the "open and notorious" requirement of section 2-611 represents an imprecise application of the family-unit doctrine in that it requires too heavy a burden of proof from too small a group of people. One problem with section 2-611 is that only illegitimates need show open and notorious treatment by the father. If the provision is meant to foster the family-unit theory, why should not such a showing be required from *all* of a testator's children, legitimate and illegitimate alike? If a testator deserts both legitimate and illegitimate children, it would not be reasonable to allow only the legitimate children to take under a bequest to "children" when neither group actually has been treated as children by the father. On the other hand, a showing that the testator deserted

66. *See also* UPC § 3-101 which provides that the UPC will apply to wills drafted before the UPC becomes effective.

67. *See* note 21 *supra* and accompanying text.

68. *See* text accompanying note 48 *supra*.

69. *See* note 34 *supra*.

70. *See* Gray & Rudovsky, *supra* note 9.

all his children may be sufficient to rebut the presumption in section 2-611 against the illegitimate children. Thus, in large measure, the constitutionality and desirability of section 2-611 turns on the type and quantum of evidence that is required by a court to rebut the presumption contained therein.

Assuming that section 2-611 is neither undesirable nor unconstitutional even though it discriminates on the basis of legitimacy, one further problem remains with the formulation of that section. The requirement that the father treat the illegitimate as his child "openly and notoriously" in order for the child to be deemed an heir under a bequest to children may be challenged from the standpoint of desirability, not on the basis of any discrimination, but rather on its face as too strict a standard. It is arguable that such a requirement may be unrealistic since the imposition of that requirement may assume that the social stigma attached to bastardy has disappeared to a greater extent than it actually has.[71] In today's world it does not seem unlikely that a father might love and willingly support an illegitimate child and still not treat him as his own "openly and notoriously." Social convention is still too potent a force for many people openly to admit paternity of a bastard. Thus, a lesser showing of family unity than "open and notorious" treatment as a child would probably be more desirable under section 2-611. Clearly some recognition by the father of the parent-child relationship should be required. However, since the facts of each case are likely to be quite varied, it would be preferable to treat this issue on a case-by-case basis in order to determine the actual intent of the father, rather than to impose a strict per se standard such as the "open and notorious" requirement. Moreover, it must be remembered that since section 2-611 raises only a rebuttable presumption, testators are free explicitly to define "children" in their wills to include or exclude illegitimates as they see fit.

Thus it appears that although section 2-611 does create a classification based on illegitimacy, the discrimination it fosters is probably not so unreasonable as to violate the equal protection clause. Insofar as the presumption of section 2-611 has a factual basis, allows a court to discern the testator's actual intent in each case, and is rebuttable, it should be upheld in the courts. On the other hand, the standard of the presumption could be improved by modifying the "open and notorious" requirement to one which recognizes that many fathers may be unwilling, for a variety of social reasons, openly to acknowledge illegitimate children. Alternatively, the "open and notorious" requirement or a modification thereof could be applied to legitimate children as well in order to extend the family-unit theory to its logical limit.

71. *See* V. SAARIO, *supra* note 26, at 145-47.

IV. Conclusion

Illegitimacy has always been a fact of life in civilized society. So, too, has bastardy carried with it a special social stigma. But modern society has been gradually eliminating its outworn taboos. At the same time, the number of illegitimate births continues to rise[72] as illegitimacy proves to be more socially acceptable. In light of the large number of illegitimate children born in the United States every year,[73] American law, including inheritance law, can no longer afford to treat the bastard as *filius nullius* solely on account of an accident of birth. The bastard must be welcomed into society on a level of parity with his legitimate brothers. The provisions of the Uniform Probate Code dealing with illegitimates make a solid attempt to achieve that level of parity in the field of inheritance law. With only minor modifications necessary to avoid possible constitutional problems, the provisions of the Code appear to establish an appropriate model for reform in this important area, whether they be adopted in conjunction with the rest of the Uniform Probate Code or grafted onto an existing state probate system.

UNIFORM COMMERCIAL CODE—SALES—Sections 2-508 and 2-608—Limitations on the Perfect-Tender Rule

Just as parties to marriage contracts do not always live happily ever after, it is a fact of commercial life that a buyer and seller do not always live happily ever after the consummation of a sales contract. Even when the seller is satisfied with the arrangement, the buyer may try to cancel the contract either because he believes the seller has not and will not live up to his promise, or because changed circumstances have caused the buyer to feel that his purchase was not a good deal.

Buyer attempts to avoid sales contracts can occur in two contexts —merchants dealing with each other at arm's length, and merchants dealing with consumers. Contracts casebooks are full of cases involving merchant-buyers who cornered the glue or bolt market only to watch the price subsequently plummet. It was early observed that such a buyer will "often try to escape from a performance within the

CHAPTER 70-19

Some Effects of the Uniform Probate Code on Estate Planning

RICHARD V. WELLMAN *

¶70.1900 Introduction

The Uniform Probate Code is the product of a joint project of the Real Property, Probate and Trust Law Section of the American Bar Association and the National Conference of Commissioners on Uniform State Laws. The work started in 1962 and culminated in August 1969 when the Code, then in its sixth preliminary draft, was approved and promulgated by the sponsoring organizations. Early in 1970, an official paperback edition of the Code and official comments were published by the West Publishing Company.

It is fair to predict that the Uniform Probate Code will be of considerable interest to bar committees and legislatures across the country. In many states, probate laws are obviously obsolete. Also, Dacey and other popular writers have "Naderized" probate to the point where there is very great interest in corrective legisla-

tion. The Code represents the careful effort of several dozen lawyer-experts whose principal objective was to produce a balanced package with broad acceptability. Preliminary drafts were reviewed by hundreds of lawyers, trustmen, life underwriters and other representatives of special points of view. Study committees organized by local bar committees combed the preliminary drafts and contributed enormously to the refining process which continued for three full years after the first tentative draft was made available in 1966. This preparation process insures that the Code will provide a useful and persuasive format for probate law improvement throughout the United States. Surely it is time for estate planners to begin to assess the probable impact of the Code on their work.

¶70.1901 The Code and Estate Planning—An Overview

The Uniform Probate Code will affect estate planning in the enacting states in many ways. From a technical point of view, it modernizes many basic estate planning tools so that existing preferences regarding devices for achieving various objectives should be reconsidered by advisors who wish to achieve optimum benefits for their clients. Additionally, some new planning tools will have to be assessed. Further, if the Code is widely adopted by the states, it could have a marked impact on the planning of multi-state estates. Finally, the Code will enable planners to review and re-evaluate existing wills, trusts and contracts because the publicity generated by its enactment will stimulate many estate owners to move to their counselors for a checkup.

¶70.1902 The Code and Wills in General

The Uniform Probate Code advances the proposition that the will should be as much like the revocable trust as possible in terms of procedural advantages and disadvantages relating to transfers at death. The Code will not change the fact that wills are ambulatory and contestable after death; nor does it alter the concept that inter vivos trusts create present authority over trust assets which may be unaffected by the settlor's death. However, the Code offers the executor a quick and simple route to a position like that of a trustee of a well-drafted trust over all of the assets of a dece-

dent's estate. The Code also contains several features which should shrink the threat of will contests so that the mere possibility of contest should no longer deter the use of wills.

¶70.1902.1 Obtaining Letters Testamentary

Informal probate and appointment is the procedure by which the person who is named the executor of an apparently well-executed will can secure full authority over the estate assets very quickly after the testator's death.[1] The proponent must sign a sworn application containing detailed information about the decedent's survivors and circumstances relevant to the validity of the will.[2] The application is made to the registrar of the probate court who need not be a lawyer.[3] Unless and until inheritance tax laws change to meet the situation, or unless some interested person has filed a demand for notice, the registrar may respond to the application without delay or notice to anyone and without the necessity of receiving testimony of attesting witnesses.[4] Hence, in uncontested cases involving no apparent irregularity which might move the registrar to reject the application,[5] letters testamentary can be obtained by a single trip to the courthouse after the expiration of a mandatory waiting period of five days from the testator's death.

¶70.1902.2 Fiduciary Powers

Once he receives letters, an executor appointed under the Code may exercise statutory powers which are designed to relieve third persons with whom he deals of any concern regarding his authority.[6] Land, securities, interests in going businesses and other assets may be sold, liened or otherwise used in any way that would be possible with reference to trust assets being handled by a trustee under a well-drafted trust instrument.[7] The Code also protects executors from certain risks of personal liability arising from transactions occurring during administration, and for distributions made in good faith and before being impugned by a later contest.[8] Finally, administration may be "independent." This means that there is no statutory requirement that the personal representative

---

Copyright 1970, Newkirk Associates, Inc.

return to the appointing court for approval of his accounts, discharge or any other occasion.[9]

¶70.1902.3 Widow's Election

The Code's provisions protecting a surviving spouse are designed to give meaningful rights in infrequently encountered instances where a deceased spouse has dealt unfairly with the survivor, without impeding administration in ordinary cases.[10] A spouse who has not altered his or her position by a simple written agreement or release as permitted by the Code[11] is entitled to one-third of the probate estate augmented by certain nonprobate values which are added for computation purposes.[12] But, to get more than the decedent has given, the survivor must take credit for all benefits received from the decedent by any means, including benefits passing by life insurance and pension plan.[13] Also, neither the court nor the decedent's executor has any responsibility to see that the surviving spouse's best interests are protected. Rather, the aggrieved survivor has six months after letters are issued within which to file a lawsuit against the estate and other successors.[14] In summary, the elective share provisions should be of less concern to estates being settled under wills than the threat of litigation is today in many states insofar as it relates to the widow's rights against revocable trusts.[15]

¶70.1902.4 Will Contests Under the Code

Opportunities for will contests under existing laws which enable unhappy heirs to tie up estates and coerce settlements are greatly reduced by the Code. The named executor who secures probate and appointment promptly and informally receives full authority to administer.[16] Once appointed, he may precipitate litigation (formal probate) to test the validity of known claims against the will and to eliminate unknown claims.[16] This process minimizes the likelihood that a contest will restrict administration. If a contest occurs before appointment, the named executor has priority to serve as special administrator pending resolution of the contest.[17] A section is included which throws the initial burden of proof and the burden of persuasion on contestants with respect to the usual grounds of undue influence and lack of capacity.[18]

Finally, the Code offers the enacting state an option in regard to whether a right to trial by jury will apply to will contests.[19] Overall, these several provisions should reduce the possibility of will contests in ordinary situations from that which exists today in many states.

¶70.1902.5 Advantages of Wills Under the Code

In addition to the tax advantages presently associated with the use of probate rather than trust estates, a Code estate settlement under a will may be preferable to a settlement under a revocable trust for any of several reasons. The ability of a personal representative to protect purchasers, transfer agents and others with whom he deals from doubts concerning the validity or meaning of the will, or his authority to act for the estate, is made clear by explicit statutory language which applies to all kinds of assets.[20] The Code includes renunciation provisions which are applicable to transfers through probate, but not to inter vivos transfers.[21] An enacting state may see fit to extend these provisions to all donative transfers. Unless it does, however, devisees under wills will have significantly greater opportunity than beneficiaries of living trusts to reduce their income, gift and estate taxes by careful use of the statutory system for renunciation. Also, although the validity of a trust may be determined in litigation by or against known disputants, resolution of disputes concerning the validity of trusts is frequently clouded by jurisdictional questions.[22] By contrast, the Code permits the validity of a will to be established in post-mortem probate proceedings as against all known and unknown persons with contrary interests, and with reference to known and later discovered assets.[23] The probate court of the decedent's domicile has exclusive jurisdiction for this purpose, and interested persons can be tied into the judgment by mailed notice and publication.[24] Such proceedings are not required, however, and if they occur, are not entwined with full court control of the estate or the personal representative.[25]

¶70.1902.6 Limitations on Wills Under the Code

The probate court of the decedent's last domicile will continue to allow heirs to contest wills. Hence, it will continue to be true

Copyright 1970, Newkirk Associates, Inc.

that wills may be challenged somewhat more easily than revocable trusts.[26] The Code contains a three-year statute of limitations for contest of wills probated without notice, and a much shorter period for contest of formally probated wills.[27] Still, if a fight is anticipated, the estate planner will likely continue to recommend use of a revocable trust rather than a will.

Furthermore, until the Code is widely adopted, revocable trusts will continue to offer the most efficient mechanism for handling testamentary transfers of land or assets located in several different states.

¶70.1903 Testamentary Trusts

In addition to the new efficiencies relating to probate administration, the Code eliminates other technical and procedural limitations which may have discouraged the use of purely testamentary (as distinguished from pour-over) trusts. Provisions in Article VII make it clear that a testamentary trust may be administered by any trustee selected by the testator and at a place which is convenient or indicated by the will.[28] Local residency requirements and restrictions relating to qualification to engage in business at the place of probate are avoided. Article III provisions protect the executor who delivers assets to a trustee designated by will.[29] The testamentary trustee is not required to be appointed or approved by the probate court; nor are accountings to the court of the testator's domicile or elsewhere required.[30] Trustees of all family trusts are covered by a common set of provisions which enable them to resort to the probate court for resolution of problems or to secure protection.

Finally, the Code permits life insurance contracts to be drawn so that death benefits may be paid to a trustee of a trust established by will without being deemed part of the decedent's probate estate.[31] This provision should enable planners to make even greater use of life insurance.

¶70.1904 Inter Vivos Trusts

Notwithstanding the foregoing provisions which encourage the use of wills, the Code is not antagonistic to inter vivos trusts. Indeed, by paving the way to the creation of trusts via the very

simple method of signing a will, the Code should serve more to popularize all forms of trusts than to detract in any serious way from the existing, nontechnical, reasons for recommending living trusts. Similarly, Article VII of the Code should encourage the use of trusts by allowing a probate court to acquire jurisdiction over all persons interested in a particular trust question. Mailed notice of trust litigation will be effective for inter vivos as well as testamentary trust beneficiaries, and minors and unascertained beneficiaries can be tied into the decree by forward-looking provisions dealing with representation of interests.[32] Guardians ad litem are not eliminated, but their use under the Code should be far less common than at present.

It should be emphasized that the probate court's relationship to trusts is passive and nonsupervisory. The court cannot make an order regarding a trust except in response to a petition by an interested person and after notice. The power to issue orders does not continue once the proceedings under a given petition have been resolved.[33] As noted earlier, there are no statutory requirements for orders regarding accounts, distribution or other details of administration. However, unlike the situation involving the personal representatives of decedents and conservators of estates of disabled persons, the Code does not contain statutory powers for trustees.[34] Careful drafting of trust powers, then, will still be important, unless the state concerned has adopted the Uniform Trustees' Powers Act or its equivalent.

¶70.1905 Intestate Succession

Intestacy under present law is invariably undesirable. Therefore, estate planners are more accustomed to avoiding intestate succession than to using it as part of a plan. Nevertheless, the Code's version of intestate succession improves substantive and procedural aspects of the so-called "law's estate plan" to the point where advice to allow property to pass intestate may be given without hesitation in many more situations than at present.[35]

On the substantive side of intestacy,[36] the spouse takes all when (a) the decedent leaves no issue or parent; or (b) the decedent leaves no issue by a prior marriage, or no issue but a parent, and the distributable estate is worth less than $50,000. The spouse takes one-half when there are issue by a prior marriage, and the

Copyright 1970, Newkirk Associates, Inc.

first $50,000 plus one-half of the excess over this amount when issue or parents survive. Issue take one-half of the intestate estate if any issue are by a prior marriage and split the excess over $50,000 with the spouse in other cases where both issue and spouse survive. If there is no spouse, issue take all. If there are no issue, parents split the excess over $50,000 with the spouse. If no issue or spouse survives, parents or descendants of parents take, and if there is none, grandparents and descendants of grandparents take. More remote relatives are not heirs. No person is an heir unless he survives the decedent by five days.[37] Adopted children are fully transplanted into the adopting family, and persons born out of wedlock who prove parentage before death of the father, or by clear and convincing proof thereafter, are treated like legitimate children for purposes of receiving inheritances.[38]

On the procedural side, all of the advantages applicable to probate proceedings are available also in intestacy.[39] Included is an opportunity to secure a binding adjudication that the decedent died intestate and determining his heirs.[40]

It is unlikely that this "new look for intestacy" will have any significant impact on estate planning for persons whose estates fall within Federal estate tax brackets. Indeed, liberal new rules regarding illegitimate and adopted children may provide additional incentives for the wealthy to alter the law's plan. Perhaps the most likely consequence of the new look will be that lawyer-planners will be able to assist clients with modest estates far more efficiently than at present. For example, under the Code, the best advice in many more cases than can possibly be imagined under present law anywhere simply will be to execute a will designating an executor and his alternate.

¶70.1906 Other New Planning Tools

As suggested previously, the Code's new system for intestacy will be an important estate planning tool. Similarly, the new treatment in Article V of the ancient problems of guardians and conservators will bring new flexibility to the planner for use in various specialized situations. For example, careful study of the powers and duties of a court-appointed conservator for a minor may lead many planners to eliminate elaborate sub-trusts which are frequently inserted in complex plans simply to avoid guardianship.

¶70.1906.1 Durable Powers of Attorney

Article 5 of the Code authorizes a written power of attorney to include language indicating that the authority conferred remains in effect notwithstanding later incompetency of the principal.[41] A properly worded power remains effective in periods of known incompetency and periods of uncertainty as to whether the principal is dead or alive. Durable powers should prove to be useful supplements to—if not substitutes for—revocable trusts to protect an owner from risks of senility or incompetence.

¶70.1906.2 Facility of Payment Provisions

A section in Article V of the Code protects any person owing money to a minor in amounts up to $5,000 per year who makes payment to any person having the care or custody of the minor, or deposits the sum owed in a savings account in the minor's name.[42] This provision will add to the utility of insurance and annuity contracts which provide benefits in relatively small amounts for minors.

¶70.1906.3 Renunciation Provisions

The Code specifically allows the partial or total renunciation of interests passing by will or intestacy.[43] A renounced interest passes as if the person renouncing his interest predeceased the decedent. In many situations, renunciation will have the effect of passing the renounced interest to the issue of the person renouncing, either by operation of the section dealing with lapse or by operation of the rules of intestacy. Thus, inheritance can be redirected to the next generation when tax or other considerations dictate.

¶70.1906.4 Multiple-Party Bank Accounts

Several provisions in the Code strengthen accounts in financial institutions in the name of two or more persons.[44] The provisions dealing with joint accounts, trust accounts and pay-on-death accounts authorize a variety of will substitutes for the individual who wishes to retain full control of deposit rights until death, while

Copyright 1970, Newkirk Associates, Inc.

providing another with the power to withdraw balances remaining at death free of probate procedures.

¶70.1906.5 Minors and Incompetents

A general provision in Article V of the Code authorizes a probate court to respond to petitions regarding the estate problems of minors or incompetents which do not require appointment of a guardian or conservator.[45] Using it, minors' contracts may be ratified; settlements of injury claims may be approved; and various arrangements made for elderly persons, as for example, the conversion of his assets into an annuity contract for his benefit.

¶70.1907 Multi-State Estate Planning

If the Code is widely adopted, a series of provisions should have the effect of eliminating the need for administrations in several states where planning is accomplished by will or intestacy. Courts of enacting states are directed to abide by adjudications as to the domicile of a decedent when made in formal probate proceedings in another state which were commenced prior to the local proceedings.[46] Courts of enacting states are also directed to accept determinations as to the validity and construction of a will made in a proceeding after notice at the decedent's domicile.[47] If local administration becomes necessary, a series of provisions serve to give the personal representative appointed in the state of domicile priority to administer assets in an enacting state.[48] Other provisions protect local debtors of a decedent making payment to the personal representative appointed in the state of domicile, provided payment is not made prior to 60 days from the date of death and that no protest blocking payment has been made by a resident creditor of the decedent.[49] Also, a personal representative appointed in the state of domicile may file copies of his appointment with a local office and thereby acquire all powers of a personal representative appointed locally.[50]

The Code strengthens the ability of a testator to choose the law applicable to his estate. Enacting states are directed to recognize a will as valid if the will would be valid under the rules of almost any state having some connection to the will.[51] Another provision

permits a testator to select the law of any state to control the meaning and effect of his will unless the result offends the public policy of the enacting state.[52]

Finally, multi-state planning using trusts is facilitated. Assets may be transferred by will or by deed to trustees located in other jurisdictions.[53] Trustees of other states may act as trustees of land located in an enacting state without being charged with "doing business" in that state. Each trust has a "home base," located at the "principal place of administration" of the trust, which place can be fixed by the trust instrument.[54]

¶70.1908 Existing Estate Plans Under the Code

As drafted, the "effective date" provision of the Code directs applicability to wills written before enactment, but becoming effective by testator's death thereafter.[55] One important provision in the Code establishes a rule of construction that various class gift terms—such as "heirs" and "issue"—include certain persons who would be deemed related to the designated ancestor for intestate succession purposes.[56] Thus, the Code's new provision regarding rights of adopted persons and children born out of wedlock may become applicable to existing wills.

Other sections of the Code which will affect existing wills include provisions that: (a) beneficiaries are required to survive the testator five days, unless the will contains some language on the point;[57] (b) anti-lapse directions apply to gifts to any descendant of a testator's grandparents who predeceases the testator leaving issue;[58] (c) specific gifts of encumbered assets, whether land or personal property, pass the described asset subject to encumbrances and without exoneration unless the will directs otherwise;[59] (d) the surviving spouse (or children if there is no spouse) has a right to $3,500 of chattels as exempt property,[60] a right which may nullify chattel bequests in estates where the value of the chattel property is low; and (e) the surviving spouse and dependent minors are entitled to $5,000 value exemption called "homestead exemption" plus amounts needed for support during administration.[61] These rights, which are terminable interests under the Code, have priority over creditors' claims and will directions.

¶70.1909 Conclusion

Enactment of the Code probably will be accompanied by a good deal of publicity about new and expanded estate planning devices. Estate planners can anticipate an upturn in requests for analyses and advice as various popular publications begin to inform the public about new opportunities under the Code.

Overall, the impact of the Code on estate planning will depend largely on the planners. For those who prefer to stick close to familiar patterns, the principal impact of the Code will be the need to carefully review existing will and trust forms. Others will experiment in various ways with some of the new opportunities offered by the Code. In time, estate planning should be considerably affected by the Code, but changes will be gradual and responsive to the interests of planners in meeting the needs of clients.

THE UNIFORM PROBATE CODE APPROVED: A BOLD AND PROGRESSIVE REFORM

By J. Pennington Straus, *Philadelphia*
Member of the Pennsylvania Bar

Historical Background

History in law reform was created at Dallas on August 7, 1969, when the National Conference of Commissioners on Uniform State Laws promulgated the Uniform Probate Code. In the judgment of the writer, this was one of the boldest and one of the most progressive achievements of the National Conference, unsurpassed even by the Uniform Commercial Code. Whereas the Uniform Commercial Code had as a base the old Negotiable Instruments and Sales Acts supported by the commercial motivation of interstate uniformity, the Probate Code cuts into a field of new statutory policy in suggesting that law relating to the transfer of property by death which has heretofore been considered largely a matter of local concern, should be elevated to a platform of national importance with resulting uniformity and predictable simplicity.

In the week following the adoption of the Code by the National Conference of Commissioners, the Section of Real Property, Probate and Trust Law in its sessions held in conjunction with the American Bar Association meeting, approved the Code, and subsequently the House of Delegates of the American Bar Association likewise approved the Code and directed the Real Property, Probate and Trust Law Section to institute studies of the Code among the various local bar associations of the United States with the end in view that the Code would receive wide attention and adoption.

The first printed version of the Code is now available from Prentice-Hall, and this will be followed at a later date by a publication of the Code with final minor stylistic corrections by the West Publishing Company.

To the Pennsylvania lawyer there is very little in the Uniform Probate Code that will seem new or radical. Taken as a whole, the Code is perhaps the greatest compliment that could be produced for the draftsmen of the Pennsylvania statutory system of probate and estate administration as originally created in the Five Sisters Acts of 1917, and as more recently amended and restated in the series of legislative acts which comprise what is our present Pennsylvania code.

In these two articles we will give a brief summary of the history and contents of the Uniform Probate

Code, with comment on those Sections of the Code which might be adopted in Pennsylvania.

Origin of the Model Probate Code

The origins of the Uniform Probate Code go back to 1946 when the Section of Real Property, Probate and Trust Law of the American Bar Association brought out the Model Probate Code. That work had a definitive effect on the laws of a number of states which at that time and thereafter were reviewing and amending their probate and estate administrative procedures. The Advisory Committee of Pennsylvania Legislature had the Model Probate Code before it when the Pennsylvania statutes went through their extensive revisions beginning in 1945. Missouri adopted the Model Probate Code in great part and a number of other states used it as a guide in the revision of their laws.

In 1962 the Council of the ABA Section of Real Property, Probate and Trust Law concluded that the time had come to review and revise the 1946 Model Probate Code in the light of decisional law and development since its promulgation. A committee was formed and the support and interest of New York University Law School was obtained.

At the same time, a New York State Legislature Commission was in the process of extensive revision the New York probate and ate administrative law, and financial help was given to the Code project which produced certain basic studies that were useful to the New York Commission.

From the beginning, the Council of the Real Property, Probate and Trust Law Section interested the National Conference of Commissioners on Uniform State Laws in the project. It was then envisioned by some that if the National Conference adopted the proposal, the project would have far greater chances of success because of the prestige of the Conference and its greater financial backing.

By 1964 a distinguished committee of draftsmen was put together under the Chairmanship of Richard V. Wellman of the University of Michigan Law School. Money was collected from individual lawyers, a few banks and from a few foundations. The National Conference of Commissioners fully adopted the plan: the sights were set not merely upon a review of the Model Probate Code, but upon a complete revision of the law, extensive in scope. It was further concluded that this work should be channeled toward a uniform statute.

The objective of uniformity developed strength as increasing criticism was directed at lawyers and courts by many writers and by the public generally. Never before had there been so much popular attention directed to the probate laws as that which followed the attack made by Dacey and others on probate procedures.

This criticism had the result of spurring the action of the two committees, one of the National Conference of Commissioners on Uniform State Laws, and the other, the Special Committee of the Section of Real Property, Probate and Trust Law of the American Bar Association. Additional funds were obtained and the Uniform Probate Code became the major project of the National Conference of Commissioners, leading to its adoption at the Dallas meeting.

The Uniform Code Follows Pennsylvania Law

At the beginning of this article it was noted that a Pennsylvania lawyer thumbing through the Uniform Probate Code as finally promulgated would not be surprised or startled by anything he saw. Once he got over the unfamiliar stylistic approach of the new Code in which it differs from the draftsmanship of Pennsylvania statutes, he would find that what is set forth in the Uniform Probate Code is substantially Pennsylvania law.

We must realize that the laws relating to the transfer of property by death have had an ancient and diverse evolutionary growth, from practice in the Ecclesiastical courts, the English chancery courts, and the common law courts. The New England states adopted the system of probate known as probate in solemn form, where notice must be given to all parties in interest and hearing held before an appropriate administrative or judicial authority in order to effect probate. These states also followed a system of supervised administration in which virtually every step of the personal representative in paying creditors and making distribution in accordance with the will or the intestate laws had to be effected through a court hearing with notice, testimony, findings, and decree. This system was predominantly followed throughout the Middle Western States and finally penetrated to the West Coast in modified form. It has been said that in the nineteenth century there was a great suspicion of personal representatives, and allegedly a great deal of embezzlement of decedents' property. As a consequence, the majority of our states set up highly restrictive probate systems for administering decedent's estates, requiring the personal representative to submit his every act to court supervision.

Pennsylvania, New Jersey and Delaware and to some degree Maryland were unique in adopting the form of probate known as probate in common form without notice, and the procedure of distributing an estate on receipt and release without court supervision.

The Drafting Committee, with all of the evidence before it, decided initially that the approach of the Uniform Code should give a choice to the parties to elect probate in common form, or probate in solemn form with notice, and also should include the choice of unsupervised administration as well as avenues for supervised administration, that

is, a method whereby the personal representative could be brought before the court at any step of the administration to justify his acts, or whereby the entire administration from start to finish would be under direct supervision of the Court.

This approach of maximum flexibility is the cornerstone of the entire Code, and it is perhaps the Code's most notable achievement. It could therefore become the law of Pennsylvania without affecting in any substantial way what is now our practice.

The Uniform Probate Code is far more than an all inclusive statutory plan. It is all of that, but much more. It is a treatise, a compendium of the law, relating to the transfer of property by death, and the administration of decedent's estates, the estates of incompetents, and of trusts. It is the most comprehensive effort in this field ever produced in the common law, and it rewards review by any lawyer interested in this particular field of jurisprudence.

Contents of the Code

Article I is concerned with definitions and also a description of the jurisdiction of the Probate Court. The entire Code is based on the assumption that each jurisdiction will have or will create a probate court having the full power of a court of general jurisdiction similar to the Orphans' Court Division of the Common Pleas Court under the Pennsylvania Constitution with direct appeal to the state's highest appellate tribunal. This is a radical departure for many jurisdictions where probate and estate administrative matters are handled by laymen acting as "probate" or "surrogate" judges.

Article II logically refers to intestate succession and the execution of wills. A singular part of this Article is expansion of the share of the surviving spouse.

Part 2 of Article II sets forth the elective share of the surviving spouse, again a novel concept and different from what we have in Pennsylvania although the basic approach is somewhat similar. The Code creates what is called the "augmented estate," which Mr. Hauptfuhrer discusses in the following article.

Article II, Part 3 relates to the rights of the spouse and children unprovided for by the will, giving the spouse the same share he would have received if the decedent had left no will unless it appears that the omission was intentional, and the same basic principle applies to pretermitted children.

Article II, Part 4 sets forth certain property which is exempt from creditor's rights, and to which the surviving spouse and children have a claim, such as homestead allowances, not interesting to Pennsylvanians, and a $3,500 exemption, including household furniture, automobiles and similar tangible personal property.

The family allowance is not set forth as a specific figure as in Pennsylvania law, but the surviving spouse and minor children of the decedent are entitled to a "reasonable allowance" from the estate for their maintenance during the period of administration.

Article II, Part 5 sets forth the principles for the execution of wills.

Article II, Part 6 sets forth rules of will construction, and Article II, Part 7 states that a contract to make a will is enforceable.

Article II, Part 8 contains general provisions, the most interesting being that relating to renunciation. This section states that any heir or person succeeding to an interest by intestacy or under a testamentary provision can renounce his interest by filing his renunciation at a certain time and place.

Article III is the most arresting, and in some respects the most controversial, because it is the article that sets forth probate and estate administrative procedure. While it is not the purpose of this article to analyze the coverage in this article or its applicability to existing Pennsylvania law, it must be emphasized that probate in common form, is the preferred approach. Any interested party may nonetheless force the probate to be accomplished in solemn form, and the personal representative may elect to follow that course. The administration may proceed out of court as in Pennsylvania, and can be terminated after payment of creditors and taxes and distribution of the estate, by appropriate filing of a release with the court, which terminates after a given period of time the liability of the executors, a concept not in our present law. In the alternative, at any stage of the proceedings the personal representative on his own motion may petition the court in any matter, and he may be forced to do so by any interested party. At the termination of a supervised accounting he must file an account with the court with due notice and thereafter can be discharged. Thus there is in essence what we now have in Pennsylvania practice.

Article IV relates to ancillary administration and here again is something of a landmark effort. In this section, emphasis is placed on the domiciliary or principal administration, and if uniformly adopted, this act would permit the domiciliary or principal administrator to collect the debts of the decedent, no matter in what state they might have arisen, and to distribute the real and personal property of the decedent among creditors and beneficiaries no matter in what state or states the real or personal property might be located.

Article V relates to the protection of persons under disability and their property, providing separate systems of guardianship to protect the persons of minors and of mental incompetents. It also provides a system of protective proceedings, including conservatorship, for the management of the property of

persons who are under disability. It is unique in giving to the guardian the power of a trustee, and expanding that power to provide that the guardian can make inter vivos gifts on behalf of his ward, make willls for him, and even arrange for his divorce. It also contains a useful provision that a power of attorney will survive incompetency, and there is a method of quickly getting a guardian or conservator appointed ex parte to protect the property of an incompetent person where there is danger that it may be taken from him by fraud or accident before complete proceedings can be established. This again is a landmark article and it contains many innovations.

Article VI relates to non-probate transfers such as joint interests, tentative trusts, "P.O.D. accounts" and similar types of property interests which do not go through probate, but where death does affect the transfer of property.

Article VII relates exclusively to the administration of inter vivos and testamentary trusts. There is nothing in this section that would prove new to a Pennsylvania lawyer, except the requirement of trust registration. The Code puts upon the trustee the obligation to register the trust in the county of the principal place of administration, the purpose being to provide not only a jurisdictional forum for all court action, but also to provide a method of control or supervision of the trust, if needed.

The Need for Uniformity and the Future of the Code

Why should the law of probate and estate and trust administration, and the administration of incompetent's estate be made uniform? For centuries these fields of law have been considered of parochial concern, a concept which arose from the fact that in earlier times, when our patterns of law were established, the principal source of wealth was real estate. It is inherent in the common law that the law relating to real estate is to be determined by the jurisdiction in which the land lies.

However, one of the phenomena of the economy of the last hundred years has been the alteration in our forms of wealth. Today wealth in greater part is represented by choses in action, notes, bonds, checking accounts, savings accounts, and by stock certificates representing fractional percentages in corporate enterprises. At the same time, our population has grown to over 200 million, and while there is still too large a percentage of that population at the poverty level, there is also an enormously increased percentage of the population having substantial property in the form of intangibles. This is evident by the increase in the number of wills that are being probated and the number of intestate administrations being granted in every jurisdiction.

There is the further factor that the population as a whole has be-

come far more mobile. State boundaries no longer are of any concern to the citizen of the United States. In the course of his lifetime he may have a residence in two, three, four, half a dozen, or a dozen states, and he may have from time to time acquired property interests in all of them. He not infrequently maintains a residence in two states, and we include not only the affluent. He will have banking connections in two or more states, and indeed he may have established inter vivos trusts in states in which he does not reside because of favoring a particular corporate fiduciary of prominence in the field of trust administration. The complexity, prolixity, and diversity is increasing not decreasing. With the inevitable population growth we shall certainly face greater problems in estate and trust administrations.

The time has already arrived when it seems ridiculous that the accident of where a will is probated on the basis of domicile, should determine procedural and substantive rights of creditors who may be scattered in many states. It is palpably absurd that the accident of a man dying intestate on the eastern bank of the Delaware River should face a different pattern of distribution of his estate from what would result if he had died on the western bank of the River.

These are the long range considerations that led the National Conference of Commissioners, after extensive study and debate, to determine upon a *uniform* probate code. It was fully recognized that there are articles and sections of the Code that commend themselves more than others to the consideration of uniform adoption throughout the states. Such sections, for instance, are those relating to creditors rights, to the methods of probate of the will of the decedent, and to the basic concept of intestate succession, and the share of the surviving spouse.

It is recognized that not all of the states are going to adopt this Code in the exact form in which it was promulgated. Studies will be made by various state and local bar associations over the next few years and various state legislatures will adopt perhaps part but not all of the Code. The Drafting Committee of the National Conference of Commissioners will be kept in office for another two years, and the Special Committee of the Real Property Probate Trust Law Section of the ABA will continue its work of study and promulgation of the Code. It is hoped that local bar associations in Pennsylvania will follow the lead of the Philadelphia Bar Association, which created a special sub-committee of its Orphans' Court Committee to study the Uniform Probate Code and make recommendations for adoption in this jurisdiction. Similar studies should originate in the Allegheny County Bar, and in many other county bars throughout the state, and these should be consolidated, hopefully, in studies that will be directed by the Real Property Pro-

bate and Trust Law Section of the Pennsylvania Bar Association. Ultimately the results of these studies should be concrete recommendations to the Advisory Committee of the State Legislature, to the end that the Pennsylvania statutes in these fields can be implemented, and in some respects modified and amended, so as to bring Pennsylvania in substantial conformity with the Uniform Code.

One of the advantages of having the National Conference of Commissioners adopt a code as a Uniform Code is the practical one that the Commissioners, by virtue of such adoption, are obliged to bring to the legislatures of their respective states, the Uniform Probate Code as adopted in Dallas. This will be the first step that will set the ball rolling in each jurisdiction, and it will then be up to the lawyers in each state to address themselves to the Code and to test its adaptability to their particular jurisdictions.

Maryland has already revamped its entire system of probate and estate administrative procedure and has passed its new statute in substantially the form of the Probate Code, which becomes effective January 1, 1970. Connecticut and Wisconsin are both in the throes of reexamination of their statutes, and the Uniform Probate Code will be recommended to the legislative committees of these states for adoption. Other states may be provoked or inspired by the Uniform Probate Code to create legislative commissions for the revision of their respective laws.

It is a long road. It cannot be covered quickly, but the ultimate objective of securing, through the United States, essentially similar laws with respect to the distribution and devolution of property on death would be a boon to all our citizens. Much effort has been spent over the past years in creating uniformity in the laws of the several states relating to the inter vivos transfer of property interests. The Uniform Commercial Code is a landmark in this field. Yet every citizen of this country must face the fact of death, and the inevitable transfer of property interests at that time. Certainly an interstate legal system providing for simplicity and uniformity in the transfer of property at this final moment is a desirable objective of law reform.

THE UNIFORM PROBATE CODE—A MODERN APPROACH FOR PENNSYLVANIA

By George J. Hauptfuhrer, Jr., *Philadelphia*
Member of the Pennsylvania Bar

Last winter, as the National Conference of Commissioners on Uniform State Laws was revising the Fourth Working Draft of the Uniform Probate Code, the Orphans' Court Committee of the Philadelphia Bar Association appointed a special subcommittee to review the latest drafts of that code and to advise the Orphans' Court Committee whether the substance and procedure proposed by the Uniform Probate Code would be desirable in Pennsylvania. During the period of the subcommittee's study, the Fifth Working Draft of the Code was published and the study was directed to that draft. It is substantially the Fifth Draft which was approved this August by the National Conference of Commissioners on Uniform State Laws in Dallas and which was subsequently approved by the House of Delegates of the American Bar Association.

The subcommittee was comprised of Philip Bregy (author of *Intestate, Wills and Estates Acts of 1947*), John Walsh (Register of Wills of Philadelphia County), J. Pennington Straus (former Chairman of the American Bar Association Section on Real Property, Probate and Trust Law), Joseph Coghlan (former Law Clerk to Orphans' Court Judge Robert Bolger), Henry Beerits (partner of Morgan, Lewis & Bockius) and the author as chairman. This is a personal and subjective reaction to the Code—growing out of the subcommittee's work.

The task of the subcommittee was great in view of the size of the project (the Fifth Draft contains 341 pages) and the time limits imposed upon it. Under the circumstances, it was necessary for the subcommittee to concentrate on the broad policy aspects of the Code. In like manner, this report can be only a brief and broad overview of the Code. Neither the subcommittee nor the author have compared, in any detail, the provisions of the Code with their statutory and case law counterparts under existing Pennsylvania law. The focus of the subcommittee's study was on the desirability and feasibility of the Code. While the subcommittee members all specialize in probate, estate and trust law, it should be recognized that some of the "off the cuff" comments with regard to Pennsylvania law might very well be in error. The subcommittee had in mind always that it should be more concerned with what the law of Pennsylvania should be than

what it may or may not be at the present time.

Title

The first observation should be that the title of the Uniform Probate Code is a misnomer. The Code covers a great deal more than probate matters. It concerns itself also with minors and other persons under disability and the administration of their property, with non-probate transfers such as jointly-owned property and tentative trusts, and with trust administration. In general it would be a broad codification of many laws which we find today in our Intestate Act, Wills Act, Estates Act, Incompetents' Estates Act, Orphans' Court Act, Register of Wills Act, Fiduciaries Act and in a great body of our case law.

The second observation is that the Uniform Probate Code—while having uniformity among the states as its principal objective—has as a secondary objective the simplification of probate procedures throughout the United States. Many states have probate rules which require a lawyer to go to court with a petition—after notice and followed by a hearing—in order to effect the simplest procedure in the administration of an estate. Many of these costly and time consuming procedures have been the focus of recent public criticism. The Uniform Probate Code's provisions would provide an answer for much of such criticism without sacrificing many of the procedural safeguards which have grown up through the years for good reason. To a large degree the Code places on interested parties (particularly creditors) the obligation to come forward to protect their own interest. If the Code is adopted in Pennsylvania such parties would probably pay closer attention to what is going on in the administration of an estate than they do today.

Article I—General Provisions

As stated in Mr. Straus's paper, Article I contains the general provisions, definitions and outline of the jurisdiction of the probate court as a court of general jurisdiction with appeals going directly to an appellate court for reconsideration on the record. The probate court may include a registrar (Register of Wills), who need not be a judge or lawyer, to whom the judge can delegate certain ministerial functions. This is not unlike much of the judicial operations currently in effect in Pennsylvania with the exception that the office of Register of Wills is somewhat downgraded.

While most of the definitions in this section are self-explanatory it should be noted that a "conservator" is one appointed by a court to manage the estate of a disabled person or a minor, whereas a "guardian" is one who is qualified as the guardian of the person pursuant to either testamentary or court appointment.

Article II—Intestate Succession and Wills

Article II is perhaps the most important article in the Code. It deals with both intestate succession

and wills and contains provisions which would change the substantive law of many states.

Intestacy

The Code deals with real and personal property without distinction. That should create no problem of significance for Pennsylvania practitioners but it would bring about noticeable changes in other jurisdictions. The commentators to the Code consider the principal features under the intestate succession part of Article II to be as follows:

"(1) A larger share is given to the surviving spouse, if there are issue, and the whole estate if there are no issue or parent.

(2) Inheritance by collateral relatives is limited to grandparents and those descended from grandparents. This simplifies proof of heirship and eliminates will contests by remote relatives.

(3) An heir must survive decedent for five days in order to take under the statute. This is an extension of the reasoning behind the Uniform Simultaneous Death Act and is similar to provisions found in many wills.

(4) Adopted children are treated as children of the adopting parents for all inheritance purposes and cease to be children of natural parents; this reflects modern policy of recent statutes and court decisions.

(5) In an era when inter vivos gifts are frequently made within the family, it is unrealistic to preserve concepts of advancement developed when such gifts were rare; the statute therefore provides that gifts during lifetime are not advancements unless declared or acknowledged in writing."

While some may consider the changes of questionable value, it must be remembered that the testator may always elect different rules for distribution of his estate by executing a will.

By way of illustration, the Code would give to the surviving spouse, where there is no surviving issue but where the decedent is survived by a parent, the first $50,000 and then ½ of the balance of the net intestate estate. If there are surviving issue, all of whom are issue of the surviving spouse also, the surviving spouse would again receive the first $50,000 plus ½ of the balance of the net intestate estate; but where there are surviving issue one or more of whom are not issue of the surviving spouse, then the $50,000 preference is removed and the surviving spouse receives only ½ of the net intestate estate.

The Code contains a requirement that an heir must survive the intestate decedent by five days in order to be entitled to his share. The five-day survival provision requires survivorship by 120 hours and is designed to avoid multiple administration and in some instances to prevent property from passing to persons not desired by the decedent. It is believed that the five-day period would be generally beneficial and it is doubted that it would create any hardships by holding up the administration of an estate unduly. Also, it would not put a cloud upon the marital deduction under section 2056(b)(3) of the Internal Revenue Code if the spouse survives for the five days (even though it would deprive the estate of the marital deduction if the surviving spouse died

within the five-day period). As the marital deduction is normally a problem for larger estates, the five-day period could be easily "drafted around" by any competent scrivener.

Under the intestate section not only are adopted children fully engrafted upon the inheritance tree of their adopting parents, but also under certain circumstances an illegitimate child is considered the child of the father. The circumstances under which such relationship would be deemed to exist could be a subject for considerable discussion but it is probably fair to say that the policy trend is in favor of the direction taken by the Code.

The Code would alter the common law relating to advancements in that only written evidence of the intent that an inter vivos gift be considered as an advancement on one's inheritance would be admissible. The Commissioners obviously concluded that if a donor wanted an inter vivos transfer to be treated as part of a beneficiary's inheritance he could easily make a will and adjust the respective interests of his beneficiaries accordingly.

Elective Share

Part II of Article II would provide substantive law changes for almost all jurisdictions. It deals with the elective share of a surviving spouse and injects an entirely new concept of the property to be considered in determining the amount to be allocated to an electing spouse. In essence the concept is an extension of Section 11 of the Pennsylvania Estates Act. The Code provides that a surviving spouse may take an elective share of an "augmented net estate." In brief, the augmented net estate includes transfers by the decedent during marriage (a) to persons other than the surviving spouse where the decedent has retained for himself a lifetime benefit or control, (b) to jointly-held property with right of survivorship, (c) within two years of death to the extent that the aggregate transferred to any one donee in either of the years exceeds $3,000, (d) to the surviving spouse and (e) by way of life insurance or similar benefits payable to the surviving spouse.

The commentators' notes to the section indicate that the purpose of augmenting the probate estate in computing the elective share is two-fold:

"1. To prevent the owner of wealth from making arrangements which transmit his property to others by means other than probate deliberately to defeat the right of the surviving spouse to a share, and

2. To prevent the surviving spouse from electing a share of the probate estate when the spouse has received a fair share of the total wealth of the decedent either during the lifetime of the decedent or at death by life insurance, joint tenancy assets and other non-probate arrangements."

The category of transfers by the decedent during his lifetime, includes only transfers during the marriage, and it would therefore be possible for a person to provide for

children by a prior marriage, as by a revocable living trust, without concern that such provisions could be upset by later marriage and an election by the surviving spouse.

The surviving spouse under the Code would have an elective share equal to ⅓ of the augmented net estate. If a married person is domiciled in another state and owns property which is located in Pennsylvania there would be no election under Pennsylvania law to the Pennsylvania property. The Uniform Probate Code would, of course, include in the domiciliary state all of the property located in Pennsylvania.

Obviously, the substantive law changes and the policy behind them can be widely debated; however, it appears that the Code has a great deal to be said in its favor.

Exempt Property

Another noteworthy provision concerns "exempt property." In short, the Code would give a surviving spouse (or minor children in the absence of a surviving spouse) a "homestead allowance" of $5,000. In addition the surviving spouse would be entitled to an "exempt property allowance" on household furniture, automobiles, furnishings, appliances and personal effects to an aggregate value not exceeding $3,500. Finally, in addition to the two previous exemptions, the surviving spouse (and dependent children) would be entitled to a reasonable allowance from the estate for their maintenance during the period of administration. The determination of the latter obviously could lead to court proceedings in many cases until working ground rules are developed and refined.

Execution of Wills

Part V of Article II deals with the formalities of execution and revocation of wills. For many states the provisions contained in this part will greatly liberalize their procedures, as the Code contains only minimum formalities. Insofar as Pennsylvania is concerned the Code would permit any person 18 years of age or older who is of sound mind to make a will. Such reduction of the mimimum age seems to be in keeping with the times. With the exception of holographic wills, every will must be in writing signed by the testator and witnessed by two witnesses, although there is no requirement that the witnesses observe the testator sign and they can sign the document at any time after execution and need not sign in each other's presence. The signing of the will by the witness would, of course, increase the execution formalities over those currently required under Pennsylvania law.

The Code contains an interesting provision for "self-proved" wills. Under the Code a will may—at the time of its execution or at any subsequent date—be made self-proved by the acknowledgment thereof by the testator and the affidavits of the attesting witnesses

made before an officer authorized to administer oaths and evidenced by the officer's certificate under official seal attached or annexed to the will. The advantage of a self-proved will is that it can be admitted to probate without the testimony of any subscribing witnesses. In all other respects, it is treated no differently than a will which is not self-proved.

Construction of Wills

The rules for construction of wills are not significantly dissimilar from existing Pennsylvania rules except that there is the carryover from the intestate provisions of the five-day survivorship provision. The Code provides that a beneficiary who fails to survive the testator by 120 hours is deemed to have predeceased the testator unless the will provides otherwise.

The Code provides that adjustments should be made in bequests because of stock dividends and stock splits and similar types of corporate reorganization. Such provision might be an improvement over our current case law, but the particular section of the Code is introduced by the phrase "if the testator intends that specific gift of certain securities . . ." and our courts could well end up exactly where they are today with the question being: what did the testator intend?

The section contains more liberal provisions with regard to engrafting adopted persons on the family tree of the adopting parents and denying them inheritance from their natural parents. Ademption by satisfaction is eliminated as was the principle of advancement under the intestate section. In such cases the testator must provide either in a contemporaneously written document or by will that an inter vivos gift is to be deducted from the gift in the will.

The Code contains provisions with regard to the effect of marriage or divorce after the execution of the will and also provisions that are comparable to our Slayers' Act.

Deposit of Wills

An interesting new concept for Pennsylvania is a provision for the lifetime deposit of a will by a testator. Under the Code the testator may lodge the will with the court for safekeeping. Some states already have statutes which permit the deposit of wills, and wills so deposited are supposed to be kept completely confidential. The Commissioners obviously believed that the experience in such states has been beneficial.

Article III—Probate of Wills and Administration

Article III of the Code deals with the actual probate of wills and the administration of estates and Pennsylvania practitioners may require some "adjusting time" to become familiar with the Code's rules.

Alternative Procedures

Under the Code there are alternative procedures that may be fol-

lowed in connection with the administration of the estate. One is deemed the formal procedure and involves court review of almost all of the steps required in the administration of an estate. The other is referred to as the informal procedure and corresponds in many respects to the current practice in Pennsylvania. An executor or personal representative can start down either procedure and the Code contains provisions whereby the administration of the estate can be switched from either the informal to the formal or from the formal to informal procedure during the course of administration. The existence of the formal procedures would probably not impose any great hardship on Pennsylvania practitioners, most of whom it is believed would follow the informal procedure route in the settlement of estates. Personal representatives acting under the informal procedure have full powers to deal with the various assets of the decedent's estate and purchasers from such personal representatives or from distributees of such personal representatives are fully protected. Non-adjudicated settlement of estates is feasible under the Code. In essence, the Code visualizes the court's role in the settlement of estates as a passive one. Unless asked to do so under the formal procedure route the court becomes involved only when some interested party asks it to become involved to secure resolution of a problem.

Will Contests

Practitioners in some counties will find comfort in the provisions of the Code which allow only one will contest rather than the two (Register of Wills first and then the Orphans' Court) which is the practice under some existing rules.

Appraisals

For those states where there have been political abuses in connection with the appointment of appraisers of estates' assets the Code greatly simplifies matters and brings them into line with the general practice in Pennsylvania. Under the Code it is the personal representative's obligation to prepare an inventory of the property owned by the decedent and to indicate the fair market value of each item as of the date of death. The personal representative may employ a qualified or disinterested appraiser to assist him in ascertaining such market value. If he chooses to use an appraiser, he is required to indicate the name of such appraiser on the inventory.

Powers

The Code gives a personal representative exceedingly broad powers to deal with the property and claims of the decedent. The Code does however require joint action by co-personal representatives unless the will provides otherwise. There are only certain limited exceptions to this general joint action rule and it may cause testators to

reflect more carefully when selecting personal representatives.

Compensation

A personal representative is entitled to reasonable compensation for his services under the Code even though the will may contain an express provision for such compensation. In that event he may renounce the provision in the will and elect the reasonable compensation provided by law.

Small Estates

The provisions of Part 12 of Article III deal with special situations in the settlement of estates and seem generally worthy of adoption. One such provision creates procedures for the settlement of a small estate on affidavit. That procedure should be an easier procedure than is currently provided by Section 202 of the Fiduciaries Act, and it is believed that there would be any number of small estates where such simplified procedure would be helpful. It is recognized, however, that the liberalization of rules in this area could provide opportunities for wrong-doers. The affidavit procedure would apply to estates up to $5,000 and would be available only thirty days after the death of the decedent. The Code also provides provisions similar to Section 202 of the Fiduciaries Act for closing small estates where the amount involved does not cover the various "allowances" and the costs of administration, funeral, etc.

ARTICLE IV—FOREIGN PERSONAL REPRESENTATIVES: ANCILLARY ADMINISTRATION

In brief, Article IV is designed to simplify the administration of multiple-state estates through unifying the administration and emphasizing the domiciliary administration insofar as possible. It is interesting to note that this article includes not only personal representatives appointed under the various states of the United States, but also includes certain common law foreign countries with laws quite similar to ours—such as England, Ireland and Canada (but not the Province of Quebec).

Collection by Affidavit

Article IV simplifies the procedures whereby the domiciliary representative may collect the property that belonged to the decedent which may be located in another state. Under the Code he would simply deliver to the person possessing the decedent's property, 60 days after the death of the decedent, an affidavit stating only the date of death of the decedent, that there is no local administration, and that the person delivering the affidavit is the domiciliary personal representative entitled to the property. It does not require any statement, such as contained in Section 1101 of our Fiduciaries Act, to the effect that all local creditors have been paid. Under the Code the burden is on creditors to protect themselves by either taking some action locally within 60 days after death or by

proceeding in the jurisdiction in which the decedent was domiciled at the time of his death. The Code, on the other hand, protects third parties who are indebted to the decedent or to whom the decedent had entrusted the safekeeping of certain property by completely exonerating them from any further liability if they surrender property to the domiciliary representative on the strength of the affidavit provided by the Code. The affidavit procedure does not require the domiciliary representative to file copies of his appointment in the state where the property or claim is located or to produce a short certificate.

Formal Procedures

The domiciliary representative, if he wishes, could follow Code procedures similar to those currently provided in Pennsylvania law. He could file a copy of his appointment in the foreign state and enjoy the full authority that would be available to a local representative under the informal probate procedure. The Code makes it perfectly clear that a domiciliary representative has first preference to ancillary letters in the foreign state if formal proceedings in that state are indicated. Other persons who might be resident in the jurisdiction where the decedent's property is located are not foreclosed from applying for letters to which they might otherwise be entitled but they cannot obtain such letters until notice has been given to the domiciliary personal representative to come into the jurisdiction and to obtain letters.

Article V—Protection of Persons Under Disability and Their Property

Insofar as Pennsylvanians are concerned perhaps some of the most useful provisions of the Code are contained in Article V which has to do with the protection of persons under disability and their property.

Facility of Payment

To begin with, there is a facility-of-payment provision which enables persons owing funds to minors to distribute those funds in a pragmatic fashion where there has been no conservator appointed for the minor's estate. In particular, up to $5,000 a year can be paid (a) to the minor directly if he or she is 18 or married, or (b) indirectly by payment to the parent or the grandparent with whom the minor resides, or (c) indirectly by payment to the minor's guardian, or (d) indirectly by deposit in a savings account in the minor's name.

Guardian and Conservator

The Code could be at variance with some existing Pennsylvania practice in that the guardian of a minor's person may also be the conservator of the minor's estate.

Estate Planning

One provision which will be most welcomed by estate planners in this day of increasing numbers of senile

senior citizens is the Code's provision which would permit a conservator of a disabled person's estate to engage in estate planning for that person subject to court approval. While there have been a few lower court cases in Pennsylvania which have approved this practice on a substitution-of-judgment theory in a few special situations for affluent persons, it would undoubtedly be helpful to have statutory provisions which clearly accept the principle.

Separate Counsel

A requirement which might cause Pennsylvanians to raise their eyebrows is a provision that an alleged disabled person must have his own separate counsel in a hearing to determine his disability. The current Pennsylvania practice seems to provide more than adequate safeguards for disabled persons in such proceedings, but the provision should not be an exceedingly difficult provision to live with, although it may increase the costs of such proceedings.

Title

Those lawyers who are particularly intrigued with the concepts of title and vesting of title will be pleased to see that the Code contains a provision that title to real estate vests in a disabled person's conservator upon the appointment of such conservator.

Powers

A conservator is given broad powers to act without court approval in such areas as continuing the disabled person's business or incorporating it, or in mortgaging his property or even in determining and distributing principal and income. Of course, the conservator does exercise his judgment at his own risk; and accordingly, if he wishes, he can obtain the approval of the court in any situation where he feels that he needs the protection of a court decree.

Surcharge

A conservator can be held liable or be surcharged for loss only when there is a causal relationship between his breach of trust and the loss. For example, if an investment banker who is a conservator obtains bonds from a firm in which he is a partner at time when the purchase was generally thought wise, and such bonds later "turn sour," the conservator would not be a guarantor as a result of his technical self-dealing breach of trust. He would be liable only if it could be shown that his breach of trust caused the loss. That would be a change from current Pennsylvania law.

Bar to Claims

Another interesting concept involves the barring of claims against the disabled person by advertising by his conservator. If a creditor does not come forward within four months after such advertising his claim could be completely barred. The Code's philosophy of putting the burden on creditors may be

thought to be harsh to Pennsylvania lawyers who regularly represent clients who are creditors. The Commissioners apparently felt, on the other hand, that the conservator ought to be in a position to ascertain the debts of his ward. If the conservator takes reasonable steps to notify creditors and the persons to whom the disabled person owed money do not come forward, their failure to do so would be at their own peril and not at the risk of the conservator who should be trying to administer the estate in an orderly fashion.

Power of Attorney

Finally, this article contains provisions which all practicing attorneys should find useful: the "block-buster" power of attorney provisions. Under the Code, a power of attorney could be drawn which would survive disability. If by its terms the power of attorney is to be effective even in the event the person granting the power of attorney is declared incompetent, such provisions are valid and effective. Certainly each of us at one time or another is called upon to determine the effect of a power of attorney of a person who is in that wide, questionable area between competency and incompetency. The "block-buster" power of attorney seems to be a pragmatic solution for that problem.

Article VI—Non-Probate Transfers

Article VI of the Code purports to deal with non-probate transfers. (Incidentally this entire article of the Code is currently embodied in House Bill 1045 which is pending before the Pennsylvania legislature.) The article really deals with just two particular problems: (a) multiple party bank accounts and (b) tentative trusts.

Joint Accounts

With regard to joint bank accounts there is a new concept injected into the law. That concept is that each depositor owns his own "net contribution" to the account during his lifetime. The net contribution of a party is the sum of all deposits made by or for him less all withdrawals made by or for him which have not been paid to or applied to the use of any other party, plus a pro rata share of any interest or dividends included in the balance. The net contribution also includes any deposit life insurance proceeds added to the account by reason of the death of the party whose net contribution is in question. Of course, evidence of what a person's net contribution is may be difficult to produce. In addition, each account is presumed to be a survivorship account in the absence of provisions to the contrary. Rebutting the presumption of survivorship may also be quite a challenge.

Tentative Trusts

The provisions with regard to tentative trust are even broader than those under the recently adopted Pennsylvania Banking Code. Under the Uniform Probate Code there may be any number of trustees to a tentative trust and any number of settlors and beneficiaries. The original case law with regard to such accounts was exceedingly restrictive and the Pennsylvania Banking Code liberalized those restrictions only modestly. The Probate Code would go even further.

Banks

In both the multiple party account and the tentative trust account the banks are protected in accordance with their deposit contracts just as they are under existing Pennsylvania law. The Code covers only the relationship among depositors and others named in the deposit contract. It does not purport to impose any liabilities on the banking institution which otherwise lives up to its contractual obligations. In view of the great variety of deposit contracts which exist in our state today, one cannot help but wonder whether the Uniform Probate Code would provide any easy answers to the problems in this area in the short run. Perhaps the question should be: Have we any better solutions?

ARTICLE VII—TRUST ADMINISTRATION

The final article of the Code is Article VII and it deals with trust administration. There would be a few changes brought about by the Code.

Trust Registration

Undoubtedly, the biggest change in the law insofar as Pennsylvanians are concerned centers upon the trustee's duty to register an inter vivos trust at the principal situs of administration. The penalty for not registering the trust is that failure to do so is automatic grounds for removal of the trustee and automatic grounds for denial of his compensation. It is difficult to visualize any professional trustee failing to register the trust when the Code contains such penalties and the additional provision that any clause in the trust instrument which purports to eliminate the requirement for registration shall be ineffective. The provision for registration of trusts applies equally to inter vivos and testamentary trusts and is available to foreign created trusts as well as those locally created. The place of registration is not necessarily related to the place where the trust was created, but is related to the place where the trust is primarily to be administered. The situs of administration in turn is supposed to be at a location appropriate to the purposes of the trusts and the interests of its beneficiaries.

Standard of Care

Another innovation written into Article VII has to do with the trustee's standard of care and per-

formance. Here present Pennsylvania law would be revised and corporate trustees or individual trustees with special skills (such as lawyers) would be held to higher standards of care when serving as trustees than would ordinary laymen when serving as trustees. Undoubtedly the trust companies will study such provisions carefully.

Powers

The article also contains the broad powers already recommended by the Uniform Trustees Powers Act. These powers are exceptionally broad and even include the power to delegate discretionary duties. Some questions will probably arise as to the effect of some of the broad powers on certain tax planning devices.

Conclusions

Overall the Uniform Probate Code would appear beneficial for Pennsylvania, even though it contains a number of provisions of debatable value for Pennsylvanians. Uniformity in itself is a desirable goal, but in addition the Code would provide some improvements in Pennsylvania law and procedure.

Pennsylvania at the present time is among the forerunners of states which have liberal, pragmatic and inexpensive probate procedures. Thus there is probably no imperative reason that Pennsylvania rush to adopt the Uniform Probate Code. Possibly it would be wise for the Pennsylvania legislature first to enact into law, by way of amendment to existing laws, those sections of the Code which are most desirable in order that our law, in both substance and procedure, be brought gradually into line with the provisions of the Code. Perhaps Pennsylvania should first wait to see what the experience of some other states is with regard to this particular uniform act. This is not to say that the Code is not a desirable, forward-reaching document. It is only to say that Pennsylvania today has very workable laws. They should not be replaced until we are reasonably certain that the replacements will be improvements.

OREGON LAW REVIEW
VOLUME 49
NUMBER 4

THOMAS W. MAPP*

The 1969 Oregon Probate Code and Due Process

THE 1969 Oregon Probate Code[1] (hereinafter Code) takes effect on July 1, 1970.[2] The author believes that the dominant objective of the Code is to facilitate the prompt and economical transmission of wealth at death through the administration of decedents' estates. Moreover, it seems an almost self-evident truth that speed and economy are dependent on an efficient legal system.[3] The 1969 Code should facilitate efficient administration of decedents' estates for two basic reasons: codification and independent administration.

Codification. Throughout the Code, substantive and procedural law has been clarified. Old statutes and decades of case law have been integrated and restated in modern text.[4] This codification process necessi-

* Associate Professor of Law, University of Oregon; Visiting Professor of Law, University of North Carolina. Professor Mapp was a member of the Advisory Committee on Probate Law Revision which drafted the 1969 Oregon Probate Code for the Oregon Law Improvement Committee.

[1] Or. Laws 1969, ch. 591, as amended by §§277-280, Or. Laws 1969, ch. 597.

[2] Or. Laws 1969, ch. 591, 306. Hereafter, as all references to Code sections will be to OREGON REVISED STATUTES (1969), the form "ORS §000.000" will be used in text and footnotes.

[3] Unfortunately, no caveat is required at this point. Even a more efficient legal system may not decrease costs during an inflationary period. But at least it should dampen the rising cost spiral.

[4] The following provisions are merely important examples of this process: ORS §111.085. Matters subject to probate court jurisdiction; ORS §§112.015-.115. Intestate succession; ORS §112.385. Nonademption of specific devises in certain cases; ORS §112.045. Pretermitted children; ORS §112.455-.555. Rights of slayer in property of a decedent; ORS §112.675. Renunciation of intestate succession or devise; ORS §114.105.-165. Elective share of surviving spouse; ORS §116.133. Abatement; ORS §116.303-.383. Apportionment of estate taxes; and ORS §117.005-.096. Estates of absentees.

tated statutory resolution of many policy issues. Those responsible for the Code, as draftsmen and legislators, believe experience will verify the wisdom of at least the majority of these policy decisions. At the minimum, the attorney will find a new certainty and completeness in the Code which will permit him to advise his clients of their rights with less costly and time-consuming resort to the courts. However, no matter how important these clarifying provisions will be, they do not reflect the Code's new theory of estate administration. The most significant increase in efficiency for most estates will come from independent administration.

Independent Administration. The Code adopts the theory of independent estate administration. This theory is not new. It has been in operation in England since 1925,[5] and, in modified form, has been utilized for many years in Texas[6] and Washington.[7] It constitutes the central administrative theme of the UNIFORM PROBATE CODE,[8] promulgated by the National Conference of Commissioners on Uniform State Laws in August 1969. Although the Oregon Probate Code does not adopt the UNIFORM PROBATE CODE, many of its sections are based on the UNIFORM PROBATE CODE.

Why has independent administration been selected as the method for achieving more efficient estate administration? For many years, probate reformers have focused attention on "Small Estates Acts" designed to extricate small estates from the probate morass. The 1969 Code reflects a policy determination that the vital issue is the potential controversy which may be involved in the administration of an estate, not the size of the estate. Hence, the goal of the Code is to free all noncontentious estates from mandatory court supervision, but to keep judicial protection available whenever reasonably demanded by interested persons.

SUMMARY OF ESTATE ADMINISTRATION UNDER THE CODE

Since the Code makes a radical departure from the traditional philosophy of estate administration in the United States, a knowledge of its general drift is essential to appreciate any analysis. A selection of the basic administrative provisions of the Code will be quoted, or briefly summarized, to furnish an overview of the new Oregon system. For purposes of due process analysis, special attention should be focused

on those provisions designed to give interested persons a reasonable opportunity to protect their rights.

> ORS §111.085. *Probate jurisdiction described.* The jurisdiction of the probate court includes, but is not limited to . . . (5) Administration, settlement, and distribution of estates of decedents . . . (8) Supervision and disciplining of personal representatives . . .

ORS §113.035. "*Petition for appointment of personal representative and probate of will.*"[9] Any interested person, or a named executor, may file the petition and seek estate administration. In addition to the facts prerequisite to the court's jurisdiction, the petition must include, so far as known, the names and addresses of heirs (whether or not a will is being offered) and devisees (if a will is being offered). A statement of the extent and nature of estate assets is required to enable the court to determine the amount of bond which may be required. No notice of the hearing on the petition is required; it is contemplated that ex parte appointment and probate will continue to be used in Oregon in most cases.

ORS §113.105. "*Necessity and amount of bond; bond notwithstanding will.*"[10] A bond is required of the personal representative unless he is the sole heir or devisee, or the will provides that no bond is required. Even in the latter situation, the court may require bond.

ORS §113.145. *Information to devisees and heirs.*[11]

(1) Upon his appointment a personal representative shall deliver or mail to the devisees and heirs named in the petition for appointment of a personal representative, at the addresses therein shown, information that shall include:

(a) The title of the court in which the estate proceeding is pending and the clerk's file number;

(b) The name of the decedent and the place and date of his death;

(c) Whether or not a will of the decedent has been admitted to probate;

(d) The name and address of the personal representative and his attorney; and

(e) The date of the appointment of the personal representative.

(2) The failure of the personal representative to give information under this section is a breach of his duty to the persons concerned, but does not affect the validity of his appointment, duties or powers or the exercise of his duties or powers.

. . .

ORS §113.155. *Publication of notice to interested persons.*[12]

(1) Upon his appointment a personal representative shall cause a notice to interested persons to be published once in each of three consecutive weeks in:

(a) A newspaper published in the county in which the estate proceeding is pending; or

---

[9] *See* UPC §§3-301, 3-306, *and* 3-310.

[10] Compare UPC §§3-603, 3-604, 3-605, *and* 3-606. Under these provisions, a personal representative appointed in informal proceedings (ex parte) is not required to give bond unless expressly required by the will, or demanded by an interested person.

[11] Based on UPC §3-705.

[12] The UNIFORM PROBATE CODE does not require a published notice comparable to ORS §113.155. UPC §3-801 does require the conventional notice to creditors.

(b) If no newspaper is published in the county in which the estate proceeding is pending, a newspaper designated by the court.
(2) The notice shall include:
(a) The title of the court in which the estate proceeding is pending;
(b) The name of the decedent;
(c) The name of the personal representative and the address at which claims are to be presented;
(d) A statement requiring all persons having claims against the estate to present them, within four months after the date of the first publication of the notice, to the personal representative at the address designated in the notice for the presentation of claims; and
(e) The date of the first publication of the notice.
(3) The failure of the personal representative to cause a notice to be published under this section is a breach of his duty to the persons concerned, but does not affect the validity of his appointment, duties or powers or the exercise of his duties or powers.
. . .

It should be noted that subsection (2)(d) takes the place of a separate notice to creditors. ORS §111.005(19) defines interested persons as follows:

(19) "Interested person" includes heirs, devisees, children, spouses, creditors and any others having a property right or claim against the estate of a decedent that may be affected by the proceeding. It also includes fiduciaries representing interested persons.

. . .

ORS §113.195. *Removal of personal representative.*
(1) When a personal representative ceases to be qualified as provided in ORS §113.095, or becomes incapable of discharging his duties, the court shall remove him. (2) When a personal representative has been unfaithful to or neglectful of his trust, the court may remove him.
(3) When grounds for removal of a personal representative appear to exist, the court on its own motion or on the petition of any interested person, shall order the personal representative to appear and show cause why he should not be removed . . .

ORS §114.215. *Devolution of and title to property.*[13]
(1) Upon the death of a decedent, title to his property vests:
(a) In the absence of testamentary disposition, in his heirs, subject to . . . administration and sale by the personal representative; or
(b) In the persons to whom it is devised by his will, subject to . . . administration and sale by the personal representative.
(2) The power of a person to leave property by will, and the rights of creditors, devisees and heirs to his property, are subject to the restrictions and limitations expressed or implicit in . . . [this Act] to facilitate the prompt settlement of estates.

ORS §114.265. *General duties of personal representative.*[14] A personal representative is a fiduciary who is under a general duty to and shall collect the income from property of the estate in his possession and preserve, settle and distribute the estate in accordance with the terms of the will and . . . [of this Act], as expeditiously and with as little sacrifice of value as is reasonable under the circumstances.

---

[13] Based on UPC §3-101.
[14] Based on UPC §3-703(a).

ORS §114.275. *Personal representative to proceed without court order; application for authority, approval or instructions.*[15] A personal representative shall proceed with the administration, settlement and distribution of the estate without adjudication, order or direction of the court, except as otherwise provided in [this Act]. However, a personal representative or any interested person may apply to the court for authority, approval or instructions on any matter concerning the administration, settlement or distribution of the estate, and the court, without hearing or upon such hearing as it may prescribe, shall instruct the personal repsentative or rule on the matter as may be appropriate.

Relative to its importance, this section may be unduly terse. Its basic thrust is that the personal representative *shall* proceed with administration without court order. He, or any interested person, *may* apply to the court for instructions. The fundamental alteration in the role of the court will be apparen. to any experienced probate attorney. Whereas in the past, the court had supervisory responsibility for business decisions involving the administration of estate assets, with the personal representative playing a more ministerial part, under the Code, judicial authority is passive until invoked by the personal represenative or an interested person. It is believed that the Code contemplates that the personal representative will make and execute business decisions within the scope of his authority over estate assets without seeking court instructions, unless he believes that there is genuine disagreement among persons interested in the estate as to the wisdom of those decisions.

The role of the court in response to petitions by interested persons concerned about the administration of the estate is more nebulous. They would hardly be seeking "authority" or "approval." Rather, they would probably want the personal representative instructed to act in a specified way, or to refrain from acting in a manner contemplated. Section 3-607 of the UNIFORM PROBATE CODE expressly authorizes the court to issue an order restraining the personal representative from performing specified acts, or exercising any of his powers. Also, the UNIFORM PROBATE CODE has express provisions, in sections 3-501 through 3-505, for a completely supervised administration, which may be requested by an interested person. However, the author believes that the jurisdiction and powers of the probate court as expressed in ORS §§111.085 and 111.095 are sufficiently broad to permit the court to issue orders restraining a personal representative from exercising any or all of his powers without further court order, thus requiring a partially or completely supervised administration. Although the word "instructions" in ORS §114.275 is perhaps ill-chosen, the basic theory of the Code would require that it be given an interpretation broad enough to permit

[15] ORS §114.275 is based on UPC §3-704. However, UPC §3-704 only applies to a personal representative. Petitions for orders from an interested person are authorized by UPC §3-105.

an interested person to invoke the full supervisory jurisdiction of the probate court in an appropriate case.

ORS §114.305. *Transactions authorized for personal representative.*[16] Except as restricted or otherwise provided by the will or by court order, a personal representative, acting reasonably for the benefit of interested persons, is authorized to:...

This section, then, includes 25 subsections granting the personal representative broad authority to administer estate assets without court approval or order. It should be emphasized that this section details transactions which are *authorized* for a personal representative, unless restricted by the will or by court order.

ORS §114.325. *Power to sell, mortgage, lease and deal with property.*[17]
(1) A personal representative has power to sell, mortgage, lease or otherwise deal with property of the estate without notice, hearing or court order.
(2) Exercise of the power of sale by the personal representative is improper, except after notice, hearing and order of the court, if:
(a) The sale is in contravention of the provisions of the will; or
(b) The property is specifically devised and the will does not authorize its sale; or
(c) A bond of the personal representative has been required and filed, the sale price of the property to be sold exceeds $5,000 and the bond of the personal representative has not been increased by the amount of cash to be realized on the sale, unless the court has directed otherwise.

Subsection (1) gives the personal representative a *power* over the title to estate property, which may be exercised without notice, hearing or court order. Because of this *power* over title, the personal representative may transfer a good title to a bona fide purchaser under ORS §114.385 even though exercise of the power may have been improper, *i.e.*, unauthorized, under subsection (2) above:

ORS §114.385. *Persons dealing with personal representative, protection.*[18] A person dealing with or assisting a personal representative without actual knowledge that the personal representative is improperly exercising his power is protected as if the personal representative properly exercised the power. The person is not bound to inquire whether the personal representative is properly exercising his power, and is not bound to inquire concerning the provisions of any will or any order of court that may affect the propriety of the acts of the personal representative. No provision in any will or order of court purporting to limit the power of a personal representative is effective except as to persons with actual knowledge thereof.

ORS §114.395. *Improper exercise of power; breach of fiduciary duty.*[19] If the exercise of power by a personal representative in the administration of an estate is improper, he is liable for breach of his fiduciary duty to interested persons for

[16] *Compare* UPC §3-715 *and* UNIFORM TRUSTEES' POWERS ACT §3.
[17] The concept of power over title is taken from UPC §3-711. Authority to sell, mortgage, or lease property of an estate is included in UPC §3-715(23), along with transactions generally authorized for a personal representative.
[18] Based on UPC §3-714.
[19] Based on UPC §3-712.

resulting damage or loss to the same extent as a trustee of an express trust. Exercise of power in violation of a court order is a breach of duty. Exercise of power contrary to the provisions of the will may be a breach of duty.

Under ORS §114.325(1), the personal representative has an unqualified power over the title to property of the estate. However, the circumstances under which he is authorized to use this power are covered by ORS §§114.305 and 114.325(2). An unauthorized exercise of this power is improper, and may be a breach of duty under this section.

ORS §116.083. "*Accounting by personal representative.*" The personal representative must file a verified account of his administration annually, at such other times as the court may order, and when the estate is ready for final settlement and distribution. Although the statute does not expressly so state, it is believed that an interested person could invoke a court-ordered accounting in an appropriate case by petitioning for "instructions" to the personal representative under ORS §114.275. The final account must also include a petition for distribution.

ORS §116.093. "*Notice for filing objections to final account and petition for distribution.*" The personal representative must mail a notice of the time for filing objections to his final account and petition for distribution to each heir at his last-known address if the decedent died intestate, to each devisee at his last-known address if the decedent died testate, and to any other person known to claim an interest in the estate. No published notice is required.

ORS §116.103. "*Objections to final account and petition.*" Any person entitled to notice may file objections, and if any are filed, the court must provide a hearing.

ORS §116.113. "*Decree of final distribution.*"[20] The decree must designate the persons in whom title to the estate property is vested. Subsection (4) provides:

The decree of final distribution is a conclusive determination of the persons who are the successors in interest to the estate and of the extent and character of their interest therein, subject only to the right of appeal and the power of the court to vacate the decree.

ORS §116.123. *Effect of approval of final account.*[21] To the extent that the final account is approved, the personal representative and his surety, subject to the right of appeal to the power of the court to vacate its final orders and to the provisions of ORS §116.213, are relieved from liability for the administration of his trust. The court may disapprove the account in whole or in part, surcharge the personal representative for any loss caused by any breach of duty and deny in whole or in part his right to receive compensation.

ORS §116.213. *Discharge of personal representative.*[22] Upon the filing of

[20] Based on MODEL PROBATE CODE §183.

[21] Based on MODEL PROBATE CODE §179.

[22] Based on MODEL PROBATE CODE §193; see FED. R. CIV. P. §60(b)(1), which provides: "[T]he court may relieve a party ... from a final judgment ... for ... (1) mistake, inadvertance, surprise, or excusable neglect."

receipts or other evidence satisfactory to the court that distribution has been made as ordered in the final decree, the court shall enter an order of discharge. The discharge so entered operates as a release of the personal representative from further duties and as a bar to any action against the personal representative and his surety. The court may, in its discretion and upon such terms as may be just, within one year after entry of the order of discharge, permit an action to be brought against the personal representative and his surety if the order of discharge was taken through fraud or misrepresentation of the personal representative or his surety or through the mistake, inadvertence, surprise or excusable neglect of the claimant.

THE PROBLEM OF DUE PROCESS

Section 1 of the fourteenth amendment to the Federal Constitution provides: "Section 1 . . . nor shall any State deprive any person of . . . property, without due process of law . . ."[23] The author believes that two aspects of the Code could raise problems under the due process clause. They will be characterized as the authority problem and the power problem. Two simple examples may be of assistance.

The Authority Example. The testator's will left all of his property to his son (S) and his daughter (D) in equal shares. S was named executor in the will, which expressly stated that no bond should be required. S was duly appointed personal representative, and no bond was required by the court.

D (age 22) left for Europe after an argument with her father (the testator) about one year before he died. Occasional postcards had arrived, from various countries. S diligently attempted to locate an address for D, through other relatives, and friends of D, without success. S was unable to mail D the information required by ORS §113.145, and as S and D were also the sole heirs of the testator, no other mailing was made. S published notice to interested persons as required by ORS §113.155.

The testator owned and lived in a modest home some 300 miles from S's residence. The house had not been well maintained during the testator's declining years, and S believed that it would not be prudent to invest estate funds in necessary repairs to prevent further deterioration, or to hire a management firm to secure tenants and handle routine upkeep problems. Although not required to raise funds to pay debts or administrative expenses, S felt that a sale from the estate was desirable. The will contained no provision concerning the sale of estate property.

Pursuant to his power of sale in ORS §114.325(1), his authority to sell in ORS §114.325(2), and the general mandate of ORS §114.275 to proceed with estate administration without court order, S sold the property. He accounted under ORS §116.083. He mailed no notice of

[23] U.S. CONST. amend. XIV, §1.

his accounting and petition for final distribution to D under ORS §116.093 as her "last known address" was the testator's home. After paying D's share of the estate to the Division of State Lands pursuant to court order secured under ORS §116.213, S obtained an order of discharge under ORS §116.213.

D subsequently returned and recovered her share of the estate from the Division of State Lands. More than one year after S had obtained his discharge, she filed suit against him. She contends:

(1) That S was negligent in making the sale in that he sold for a grossly inadequate price.

(2) That the court lacked jurisdiction to enter a discharge of S which would bar her suit because:

(a) She was given no actual notice of the administrative proceeding.

(b) Constructive notice by publication is inadequate under the due process clause where a statute authorizes a fiduciary to sell estate assets without judicial supervision.

The Power Example. Assume the same facts as in the authority example, except for the following variations. S knew D's address, but did not mail her information under ORS §113.145. S did not publish notice to interested persons as required by ORS §113.155. The will expressly directed that the homeplace not be sold. The purchaser (BFP) from S paid value, and had no actual knowledge that S was using his power of sale improperly under ORS §114.325(2).

D filed suit against BFP to recover her one-half interest in the property. She contends:

(1) That ORS §114.215(1)(b) vested a one-half interest in the property in her as a devisee at the death of the testator.

(2) That insofar as ORS §§114.215(1)(b), 114.325(1), and 114.385 purported to give S a power of sale over her property, in contravention of the express terms of the will, when she had neither actual (ORS §113.145[2]) nor constructive (ORS §113.155[3]) notice of the proceeding, they deprived her of her property without due process.

What Is Property? In both examples, the basic contention of the devisee is that the Code procedures deprive her of *property* without due process. In the authority example, it is a cause of action for damages against the personal representative. In the power example, it is land. But what "property" did the devisee "have" to lose?

ORS §114.215(2) is crucial to this question, for subsection (2) expresses a legislative determination that the rights of heirs and devisees to the decedent's property are subject to the restrictions and limitations of the Code to facilitate the prompt settlement of his estate. The property rights of the decedent may differ from those of his devisee. This article can hardly plumb the depths of the jurisprudential meaning

of property. But a noted economist provides the following frame of reference:

> Since therefore neither occupation, natural law nor labor gives an indefeasible title to private property, some philosophers were led to frame the so-called legal theory of private ownership which is in essence that whatever is recognized as such by the law is rightfully private property. Obviously, however, this is not an economic doctrine. Good law may be bad economics. The law generally follows at a respectful distance behind the economic conditions, and adjusts itself gradually to them. The legal theory tells us what property is, not why it is, nor what it should be. Thus we are finally driven to the social utility theory...In ancient as in modern communities, the individual is helpless as against society, however much under modern democracy society may see fit to extend the bounds of individual freedom. If we allow the individual to seize upon unoccupied wealth, if we recognize the existence of certain rights in what are deemed to be the products of labor, if we throw the mantle of the law around the elements of private property—in every case society is speaking in no uncertain voice and permits these things because it is dimly conscious of the fact that they redound to the social welfare. Private property is an unmistakable index of social progress. It originated because of social reasons, it has grown under continual subjection to the social sanction. It is a natural right only in the broad sense that all social growth is natural.[24]

A leading United States Supreme Court case, *Irving Trust Co. v. Day*,[25] demonstrates the application of these theories to the rights of succession to property of a decedent. In 1922, two days before his marriage, a man (hereafter referred to as decedent) obtained a written waiver of all rights in his estate at death from his prospective bride (hereafter referred to as widow). On August 21, 1930 decedent executed a will leaving only $2,000 to his widow. On September 1, 1930 (eleven days later) section 18 of the NEW YORK DECEDENT ESTATE LAW[26] became effective as to all wills executed after that date. It gave a surviving spouse a right to take an elective share against the will of the spouse who died first, and permitted waiver of this right by an instrument duly acknowledged. Although the waiver signed by the widow was not acknowledged, the rights of successors under the August 21 will were still immune from claims of the widow because created under a prior law. But the decedent wished to change his will, and whether he knew it or not, his effective testamentary rights after September 1, 1930 were sorely restrained, for any change would forfeit his testamentary control over the share of his estate subject to the widow's election. He made a codicil on July 6, 1934, thus republished his will, and subjected his estate to the widow's election. The widow claimed her elective share. The executor of the decedent's will contended that section 18 impaired the decedent's contract rights, and deprived his testamentary successors of property without due process.

[24] E. SELIGMAN, PRINCIPLES OF ECONOMICS 133-134 (1905).
[25] Irving Trust Co. v. Day, 314 U.S. 556 (1942).
[26] N.Y. Laws of 1929, ch. 229, §4.

The Court's initial pronouncement on the constitutional issue appears to reflect the legal theory of private ownership of property:

> Rights of succession to the property of a deceased, whether by will or by intestacy, are of statutory creation, and the dead hand rules succession only by sufferance. Nothing in the Federal Constitution forbids the legislature of a state to limit, condition or even abolish the power of testamentary disposition over property within its jurisdiction.[27]

Under this sweeping language, New York could have eliminated the decedent's right of testamentary disposition, and thus deprived his testamentary successors of all rights. Reduced to its bold form, the proposition is that a state could not possibly deprive a person of property by its laws governing succession to a decedent's property, for the only property one has by succession is created by and subject to those laws.

Interestingly, the Court did not terminate its analysis at this point. It referred to the effect of section 18 as continuing, as obligations of a decedent's estate, social responsibilities he had assumed during life, and said that to effectuate this policy of providing for a surviving widow, New York could have refused to recognize any waiver by a spouse, acknowledged or not.[28] To whatever extent it was constitutionally relevant, the Court was obviously sympathetic with the benign social utility of New York's creation of property rights in the decedent's spouse at the expense of his testamentary successors.

Returning to ORS §114.215, the Legislature appears to have relied on the proposition that if the State of Oregon could constitutionally eliminate all rights of succession to a decedent's property, it could certainly create rights in successors "subject to restrictions and limitations to facilitate the prompt settlement of estates."

The author suspects, however, that for two reasons the logic of this analysis proves too much. First, as long as the due process clause purports to protect property rights, the federal courts can hardly leave the determination of whether or not property ever existed solely to the states. In the *Irving Trust Co.* case, the Supreme Court said that "the existence of the contract and the nature and extent of its obligations become federal questions for the purposes of determining whether they are within the scope and meaning of the Federal Constitution . . . [29] And, with reference to section 18 and the elective share which it created, the Court said: "The condition clearly was such as New York might, without restraint from the Federal Constitution, annex to the privilege of making a will under its law."[30] Why was the

[27] Irving Trust Co. v. Day, 314 U.S. 556, 562 (1942).
[28] 314 U.S. at 563-564.
[29] 314 U.S. at 561.
[30] 314 U.S. at 563.

condition (the elective share) clearly within New York's power? Whether viewed as "creating" property rights in the widow, or "shifting" property rights from persons who would otherwise be successors to the widow, section 18 was justified by the Court in terms of reasonable state social policy.

Second, even if Oregon could constitutionally deny any property rights in erstwhile successors of a decedent, the primary thrust of ORS §114.215 is quite the opposite, for subsection (1) provides that upon the death of a decedent, title to his property *vests* in his heirs and/or devisees. Until heirship is determined, or a will is established and immune from contest, we do not know who these persons are. But the statute vests property rights in them which until his death resided in the decedent. Although these rights are conferred subject to restrictions and limitations, they are expressed as vested.

Because succession to a decedent's wealth is so deeply rooted in our society, the *interests* of successors probably will continue to be characterized as property rights, and the statutory provisions governing establishment of rights of succession and administration of the wealth of the estate in which those rights exist, will have to withstand an attack under the due process clause.

The Authority Problem. The authority example involves a collateral attack on the finality of the judicial order discharging the personal representative. The contention is that the court lacked jurisdiction to issue an order barring suit by a devisee given notice of the proceeding only by publication when the personal representative was authorized, by statute, to sell estate assets without judicial supervision. The theory is that due process requires that interested persons be given a higher quality of notice in independent administration than in supervised administration. However, before this theory can be evaluated, the general notice requirements of due process in estate administration should be explored.

Professor Simes states:

> In jurisdictions where statutes provide for some sort of notice to initiate the administration, it is clear that publication is sufficient and that personal service on interested parties is not required.[81]

Moreover, it is well known that probate in common form, without any notice to interested persons, is the accepted practice in many states.[82] In these states, notice to interested persons is usually given after the appointment of a personal representative, by a published notice to creditors or a notice of appointment.[83]

---

[81] Simes, *The Administration of a Decedent's Estate as a Proceeding in Rem*, 43 MICH. L. REV. 675, 695 and n. 73 (1945).

[82] *Id.* at 693-694 and n. 70.

[83] *Id.* at 694.

However valid these notice procedures were under due process in 1945, when Professor Simes wrote, they are currently subject to serious doubts. The foundation case for these doubts is *Mullane v. Central Hanover Bank and Trust Co.*[84] The *Mullane* case was not concerned with estate administration, but dealt with trust administration, and a New York statute[85] which permitted trust companies to pool small trust estates into common trust funds for investment management. The statute also provided that a trust company could obtain a judicial settlement of its accounts in a common fund as against all beneficiaries of participating trusts after notice of hearing published in a local newspaper, setting forth merely the name and address of the trust company, the name and date of establishment of the common trust fund, and a list of all participating estates, trusts or funds. A trust company sought a final judicial settlement of accounts after giving the minimum notice by publication required by the statute. The Supreme Court held that this notice was inadequate under the due process clause as a basis for an adjudication depriving known beneficiaries whose addresses were available of substantial property rights. The notice provisions were upheld, however, as to persons whose interests or addresses were not known to the trust company.

That the beneficiaries of the participating trusts and estates had property interests in the common trust fund was conceded by all. The trust company argued that because the New York courts had jurisdiction over the trustee and the fund, the proceeding was at least in the nature of a proceeding in rem, and constructive service by publication was consistent with due process as to all beneficiaries. The opposing contention was that the decree did not affect the relative interests of the beneficiaries in the fund which was subject to New York's jurisdiction, but terminated the personal rights of all beneficiaries to surcharge the trustee for breach of trust, and hence was a proceeding in personam which required personal service of process on nonresidents, and at least mailed notice to residents.

Perhaps the most significant aspect of the Court's holding was its extreme pragmatism. The Court emphatically rejected the in rem—in personam antithesis in the due process context. It recognized the duty of the state to provide procedures for the administration of trusts supervised by its courts which would efficiently serve the needs of fiduciaries and all beneficiaries. But the Court was equally cognizant of the individual interests to be protected, for it said that before individual beneficiaries could be deprived of property the adjudication must

[84] 339 U.S. 306 (1950)

[85] N.Y. Laws of 1937, ch. 687, §10-C, as amended by ch. 602 (1943) and ch. 158 (1944).

"be preceded by notice and opportunity for hearing appropriate to the nature of the case."[36] These are broad words, as the Court admits:

> The Court has not committed itself to any formula achieving a balance between these interests in a particular proceeding or determining when constructive notice may be utilized or what test it must meet.[37]

The Court did provide what it characterized as a few general principles. The temptation to quote these will be resisted. It is believed that they in turn, boil down to two fundamental principles, which will be stated; their application to the "particular proceeding" in the *Mullane* case will be summarized.

(1) If a reasonable means, which would be used by a person who actually desired to communicate information to another, is available, an interested person is entitled to notice by that or equivalent means.

Mullane holding. Notice by ordinary mail was required for all beneficiaries, resident and nonresident, whose addresses were known to the trust company in the normal course of business.

Mullane analysis.

(a) "[T]he mails today are recognized as an efficient and inexpensive means of communication."[38] Such a notice is reasonably certain to reach most of those interested in objecting to the accounting.

(b) In a common trust fund, the interests of individual beneficiaries are identical with those of the entire class. As long as most beneficiaries receive notice, necessary objections probably will be made, and will inure to the benefit of all. "Now and then an extraordinary case may turn up, but constitutional law like other mortal contrivances has to take some chances, and in the great majority of instances no doubt justice will be done."[39]

(c) Personal service of citation on beneficiaries with known addresses would, "... by reasons of delay if not expense, seriously interfere with the proper administration of the fund."[40]

(2) If no reasonable means are likely to be available to a person who actually desired to communicate information to another, an interested person is entitled to notice which is not less likely to succeed than other feasible and customary substitutes.

Mullane holding. Notice by publication was approved for all beneficiaries, resident and nonresident, whose interests or addresses were not known to the trust company in the normal course of business.

Mullane analysis.

(a) Although it is unlikely that such a notice will ever reach inter-

---

[39] *Id.*
[40] 339 U.S. at 318-319.

ested persons, it is not much more likely to fail than alternative choices open to the state.

(b) Diligence in investigation beyond the normal course of business would lead to the ascertainment of some previously uncertain future interests, and the discovery of some previously unknown addresses. But because of the large number of beneficiaries, the practical difficulties and costs of such a requirement would impose a severe burden on the common trust fund plan, and would likely dissipate its advantages.

A subsequent case, *Schroeder v. City of New York*,[41] is also considered quite important. The case arose from a condemnation proceeding under the New York City Water Supply Act[42] to divert a portion of the Neversink River twenty-five miles upstream from the owner's land. In compliance with the Act, the City published notices in newspapers in the City of New York and in the County in which the lands with water rights were located, and posted twenty-two notices (two more than required) along a seven-to-eight mile stretch of the river in the general vicinity of the land affected by the case. Neither the published nor posted notices named any affected land owners, explained the necessary procedures to recover damages for loss of water rights, or gave information that damage claims were barred three years after the City's action. No notice was posted on the land affected in the case, and no notice was mailed to the owner, although her name and address were, to quote the Court's value judgment, "readily ascertainable from both deed records and tax rolls . . . "[43] The owner did not file a claim for damages within the three-year period required by the Act, and the issue was whether the published and posted notices measured up to the quality of notice required by the due process clause. The Court held that they did not. But what would have been adequate? The Court said:

> The general rule that emerges from the *Mullane* case is that notice by publication is not enough with respect to a person whose name and address are known or very easy ascertainable and whose legally protected interests are directly affected by the proceedings in question.[44]

The Court said a single letter would have discharged the City's obligation.

Although the Court referred to *Mullane*, it does appear that a significant factual distinction produced a more stringent notice requirement. In *Schroeder*, the owner's property interests were directly affected, and the damage claims of other property owners would not protect her. In *Mullane*, mailing was required for beneficiaries whose addresses were known "in the normal course of business;" in *Schroeder*, the re-

[41] Schroeder v. City of New York, 371 U.S. 208 (1962).
[42] Administrative Code of City of New York, tit. K41.
[43] 371 U.S. at 210.
[44] 371 U.S. at 212-213.

quirement is addresses "known or very easily ascertainable." Applied to the facts, this means that the City had a duty to ascertain the owners of all lands with possible water rights on the Neversink River downstream of the diversion point, and to give them mailed notice. The message is clear. Where the circumstances are such that only the interested person can effectively protect his rights, a duty of due diligence exists to locate his address. And due diligence probably means a more extensive search than the searcher might be disposed to call "easy."

In the years since the *Mullane* decision the Supreme Court has not considered a case involving notice requirements in estate administration. The general guide remains " . . . notice and opportunity for hearing appropriate to the nature of the case."[45]

What is the nature of the case? "The proceeding to administer the estate of a decedent is properly described as strictly in rem."[46] The res is the property of the decedent located in the state in which the proceeding takes place; the purpose of the proceeding is to determine the rights of all persons in the world, whether they be the decedent's successors or creditors, in that property.[47]

In many states the administration of an estate is viewed as one continuous in rem proceeding, from the petition for appointment of a personal representative to the order discharging him.[48] If constitutional notice is given to interested persons at the beginning of such a proceeding, no further notice is required for subsequent judicial orders in that proceeding.[49] Professor Simes states that the trend is to adopt the one continuous proceeding theory.[50] This trend probably reflects the greater efficiency of such a procedure, for in a reasonably complex estate, a requirement of new notices to support court approval of even the relatively significant transactions would impose a considerable burden in delay and expense.

It seems reasonably clear that the 1969 Code is based on the one-continuous-in-rem proceeding concept. ORS §114-275 is most in point, for it provides that ". . . a personal representative or any interested person may apply to the court for authority, approval or instructions on any matter concerning the administration, settlement or distribution of the estate, and the court, without hearing or upon such hearing as it may prescribe, shall instruct the personal representative or rule on the matter as may be appropriate." The court could, of course, require a notice of hearing under ORS §111.215. But the foregoing provision also refers to orders without hearing. Of course, the personal

representative would want an order with some judicial effect, and an ex parte order could satisfy that need only if rendered within a continuous in rem proceeding preceded by constitutional notice to interested persons.

Certainly the state must provide for the orderly administration of decedents' estates. If an order of final distribution is to identify the successors to a decedent's property, and bind all other persons, constructive notice must obviously be adequate for some persons. During the period of administration a fiduciary must manage the estate assets, and, frequently, management will require sale. The fiduciary may seek protection by a court approval before he makes the sale, or by a judicial order of discharge after his final account has been approved. But unless he can be assured of effective protection at some point for necessary business decisions, he could hardly accept the fiduciary office. Although the *Mullane* case rejected the significance of state characterizations of proceedings as "in rem" or "in personam" for due process purposes, the judicial necessity of jurisdiction over a res, and an indefinite number of potentially interested persons, remains. Discarding the "in rem" label does not alter the nature of the case. If estates are to be administered, less notice must be required than in proceedings historically characterized as "in personam."

The author believes that, subject to one qualification which will be discussed subsequently, ORS §§113.145 and 113.155 satisfy the due process requirement of notice and opportunity for hearing appropriate to the nature of a continuous in rem proceeding for the administration of an estate.

ORS §113.145, it will be recalled, requires a personal representative, upon his appointment, to deliver or mail to the devisees and heirs, named in the petition for appointment of a personal representative, certain basic information. Notice by ordinary mail was approved in *Mullane* as an inexpensive and efficient means of communication with a relatively large group of interested persons. The number of heirs and devisees in an estate is frequently large. The substantive information required by section 113.145 seems fully adequate to permit the recipient to utilize the further provisions of the Code available to secure protection of his rights.

Moreover, information to devisees under a probated will and heirs (which would include a surviving spouse and issue under ORS §§112.025 and 112.045) would include, in the vast majority of cases, all potential successors. Two categories of potential devisees are not included; those under unknown instruments, and those under instruments known to the personal representative which have not been probated. Many decedents leave a series of revoked wills. Imposing a duty on the personal representative to search for such instruments, and to

give information to devisees named in any of them found or already known, would be burdensome, and would probably be either fruitless or unnecessarily disruptive. The Code adopts the view that it is better public policy to leave such interested persons with the notice afforded all persons by the death of an individual, and publication.[51]

However, ORS §113.145 only provides for information to devisees and heirs named in the petition for appointment under ORS §113.035, and names and addresses of heirs and devisees need be included in that petition only "so far as known." Granted, in *Mullane* the trust company was only required to mail notice to beneficiaries whose addresses were known in the regular course of business. But in the common trust fund the interests of all beneficiaries were identical; notice to most would probably secure protection for the rest. The sole heir disinherited by a will may well have to protect his own interests. In *Schroeder*, mailed notice was required for a landowner whose address was easily ascertainable, and who, under the circumstances, had to press her own damage claim.

How diligent a search for unknown persons, or known persons with unknown address, should be required of a personal representative? After all, the death of a person is likely to come to the attention of relatives who were at all close to him.

> They do not pretend that the facts of the fraud were shrouded in concealment, but their plea is that they lived in a remote and secluded region, far from means of information, and never heard of Broderick's death, or of the sale of his property, or of any events connected with the settlement of his estate, until many years after these events had transpired. Parties cannot thus, by their seclusion from the means of information, claim exemption from the laws that control human affairs, and set up a right to open up all the transactions of the past. The world must move on, and those who claim an interest in persons or things must be charged with knowledge of their status and condition, and of the vicissitudes to which they are subject. This is the foundation of all judicial proceedings in rem.[52]

Nevertheless, the author would advise his client who wished to rely on subsequent ex parte court orders to bar suit by an interested person who did not receive mailed information to be prepared to prove he searched with reasonable diligence.

ORS §113.155, the other notice statute, requires publication of a notice to "interested persons" including the title of the court in which the proceeding is pending, the name of the decedent, the name and address of the personal representative, and the usual information contained in a notice to creditors.[53]

---

[51] *See* UPC §3-403, Comment.

[52] Case of Broderick's Will, 21 Wall (88 U.S.) 503 at 519 (1874).

[53] At this point one might reasonably wonder why ORS §113.145 requires "information" to persons, while ORS §113.155 requires published "notice." The author has already expressed his opinion that both sections will be required to

Assuming, then, that the notice requirements of sections 113.145 (with a diligent search for the addresses of heirs and devisees) and 113.155 would be adequate for a judicially supervised estate administration, are they adequate for independent administration? Are the rights of interested persons subject to more hazards under independent administration?

Of course, if the interested person receives notice of the proceeding, by mail, publication, or otherwise, protective provisions are available under either system.

(1) *Removal of personal representative.* Any interested person may petition the court to have a personal representative who "has been unfaithful to or neglectful of his trust" removed under ORS §113.195. If the interested person can establish that the personal representative has already been disloyal (unfaithful) or imprudent (neglectful), removal would seem to be in order in most cases. However, what if the evidence merely establishes that there is strong animosity between the personal representative and the interested person (which might lead to disloyalty), or that the personal representative lacks even ordinary managerial competence (which probably would lead to imprudent acts)? The court could have found such a person unsuitable and never appointed him under ORS §113.085. But the original appointment is ex

---

meet minimum due process notice requirements for the continuous in rem estate proceeding contemplated by the Code. If so, both are notice provisions, and the word "notice" should have been used in ORS §113.145, rather than "information." The misnomer should have no legal significance in the Code, as long as the cause of the error is known.

The error was caused by copying a provision of the UNIFORM PROBATE CODE which was designed to accommodate a theory of estate administration not adopted in the Oregon Code. The UNIFORM PROBATE CODE provides for two categories of proceedings, formal and informal.

Informal proceedings for probate of a will, appointment of a personal representative, or closing an estate, may generally be conducted without notice to any interested persons. UPC §§1-201(s), 3-301, 3-705, and 3-1003; but see UPC §§3-306 and 3-310. These proceedings do not involve court adjudications, and interested persons become bound by them only by various statutes of limitations, and related provisions. UPC §§3-108, 3-703, 3-909, 3-1005 and 3-1006. Thus UPC §3-705 requires the personal representative to give information to heirs and devisees. With information of the administration, they can institute formal proceeding to secure such protection as they desire. But "information" is not "notice," and under the UNIFORM PROBATE CODE is not intended to confer jurisdiction on the court to issue an order binding an informed person. Much of the language of ORS §113.145, and unfortunately the word "information," was taken from UPC §3-705.

Formal proceedings are those conducted with notice to interested persons before a judge, without limitation as to subject matter (UPC §1-201). Adjudicative proceedings to determine testacy or secure appointment of a personal representative (UPC §§3-402 and 3-403), resolve administrative matters (UPC §3-105) and close an estate (UPC §3-1001), must be preceded by notice given under UPC §1-401.

Substantively, ORS §§113.145 and 113.155 give virtually the same notice as UPC §§-403 and 1-401, and for the same purpose, to support the court's jurisdiction to grant subsequent orders binding interested persons.

parte, and hence it is unlikely that the court would have had evidence of unsuitability available at that time. It would seem that the court should consider evidence of general unsuitability in acting on a removal petition in an appropriate case.

(2) *Order limiting authority of personal representative.* Any interested person may petition the court for an order instructing the personal representative to act, or refrain from acting, in a specified manner, under ORS §114.275. Engaging in a transaction made unauthorized by court order would be a breach of fiduciary duty, with resultant liability for loss to any interested person under ORS §114.395. It could also subject the personal representative to punishment for contempt of court under ORS §§111.085 and 111.095.

However, what if the interested person has received no actual notice of the proceeding from the personal representative upon his appointment? An examination of the alternatives open to the personal representative in a typical managerial transaction, and their practical impact on the rights of the interested person, should be useful. In the authority example, the personal representative made a business decision that certain real property ought to be sold. He had authority to make the sale without court order under ORS §114.325. Moreover, ORS §114.275 urged him to use that authority and to proceed with estate administration without court direction. He made the sale. By so doing he assumed the risk of liability, under ORS §116.063, for any loss to the estate which might arise if his conduct were subsequently found to be negligent. His final account under ORS §116.083 included the facts of the transaction. Had the interested person made herself known to the personal representative, she would have received mailed notice of his final account under ORS §116.093. She could have then filed objections under ORS §116.103, and ORS §116.123, possibly subjecting the personal representative to surcharge for breach of trust, as well as loss of his compensation as a fiduciary. In short, where the personal representative uses his authority under independent administration, he remains fully accountable for negligence until his final discharge, and for one year thereafter under ORS §116.213 if the interested person can satisfy the court that she permitted his order of discharge through her "mistake, inadvertence, surprise, or excusable neglect."

Moreover, his potential liability is made more meaningful under the Code because of stricter bond requirements under ORS §113.105. Even if the will waives bond, the court may, in its discretion, require one. It seems clear that an interested person could petition the court to exercise this discretion under ORS §114.275.

On the other hand, although the personal representative had authority to make the sale, he could have petitioned the court under ORS

§114.275 for approval before he did so. As long as the personal representative made a full and honest disclosure of the facts relevant to his proposed sale, the court's ex parte order of approval would give him protection under the one-continuous-in-rem-proceeding concept. The interested person would not then have a cause of action for the personal representative's negligence, even if she acquired knowledge of the estate proceeding before his final discharge, but she would have gained judicial supervision of the sale.

How much judicial scrutiny would the transaction probably have received? How much substantive protection is it likely that the court would have given? The Code's conclusion reflects the following analysis. The American court system is designed to adjudicate controversies between litigants; within this system, court supervision of noncontentious fiduciary decisions exists as an anomaly. Fiduciary decisions relative to the need for, and terms of, sale of estate assets will probably be based on economic considerations. Whether or not a given sale is prudent will depend on the best judgment of business experts, real estate men or securities investment counselors. A judge can hardly be assumed to possess such skills or have the time to conduct an independent investigation of the wisdom of a proposed transaction. Perforce, he must usually approve the decision already made by the fiduciary and his advisers. The unrepresented interested person will seldom acquire additional protection, for he is not present to offer an alternative solution to the court. But the personal representative will have bought protection, and the cost of this protection, in terms of attorney fees, is an administrative expense of the estate. The ultimate conclusion is that the practice of routine ex parte approval of proposed fiduciary transactions involves delay and expense, and produces very little protection for the estate. Thus the Code authorizes and charges the personal representative to make and act on his management decisions; to be prepared to defend their prudence at the time of his final accounting; in a word, to earn his fiduciary compensation.[64]

Does independent administration subject the interested person without actual notice of an estate proceeding to greater risks than supervised administration? The argument that his rights against the personal representative are strengthened is, at the very least, reasonable. Imposition of a higher standard of notice for independently administered estates could seriously impair the objective of the Code, speedy and economical administration of estates in the interests of all potential successors. What notice beyond a diligent search for the identity and

[64] The Code authorizes courts to grant ex parte approvals for contemplated fiduciary transactions; it may be that courts should move in the direction of refusing to grant approvals for business decisions which should properly be the responsibility of the fiduciary.

addresses of heirs and devisees, and a mailed notice, could be required? Personal service might be suggested. But if an address cannot be located, this is no better than a letter insofar as actual notice is concerned. If it were required in the name of due process, the fiduciary would be forced to return to the old practice of seeking court approval for all transactions. The author sees no sensible reason for such a result.

The Power Problem. The power example mounts a direct attack on the Code provisions granting the personal representative power to transfer good title to a bona fide purchaser even when exercise of the power is unauthorized. Certainly the Code is not designed to encourage or condone this conduct. ORS §114.325(2) states that a sale in contravention of the provisions of a will *is* improper except after notice, hearing and order of the court, and ORS §114.395 provides that a personal representative *is* liable for loss or damage to an interested person resulting from a breach of duty in the improper exercise of power. The last sentence of ORS §114.395 provides that "Exercise of power contrary to the provisions of the will *may* be a breach of duty." An emergency might make it necessary for a personal representative to sell assets in contravention of the terms of the will without taking time to secure prior court approval. Such a sale would be improper, yet in exceptional cases might not be a breach of duty. But in the absence of a compelling emergency, the breach of duty would be clear, and the personal representative would be liable for any resulting loss, no matter how prudent the sale might have been when made.

However, damages may be quite inadequate to an interested person who has been deprived of property with unique or sentimental value. Fairness forces us to reconsider the notice problem, for if an interested person had notice of the proceeding, a method for blocking the personal representative's unauthorized exercise of power would surely have been available.

The UNIFORM PROBATE CODE provides for a completely supervised administration in certain situations.[55] Under this procedure, the court may order the personal representative not to exercise all or certain powers without court approval, and these restrictions must be endorsed on the personal representative's letters of appointment. As a person dealing with a personal representative must determine his fiduciary status by examining his letters of appointment, the person could not be a bona fide purchaser if restrictions on powers were noted on the letters.

No express provisions for endorsing letters with restrictions on powers are included in the Oregon Code. The author believes, however, that ORS §§111.085 and 111.095 grant the court ample power

[55] UPC §§3-501 through 3-505.

to make endorsements, and that an interested person could petition under ORS §114.275 to invoke the court's power. Where the will directed that certain property not be sold, or contained a specific devise of certain property without authorizing its sale, the statutory restrictions on the sale of that specific property without court approval under ORS §114.325 could be endorsed on the letters of appointment. Moreover, the court could restrain a personal representative from making any sales without prior court approval, and have the letters so endorsed. In the power example, no information was mailed to a devisee with a known address, and no notice was published. Hence this remedy was not available to the devisee.

Both ORS §113.145(2) and ORS §113.155(3) expressly state that failure of the personal representative to give information, or publish notice, as required, does not affect the validity of his appointment, or the exercise of his duties or powers. These provisions supply indispensable support for ORS §114.385, which permits a person, such as a purchaser, to deal with a personal representative on the strength of his letters of appointment. But balanced against the loss to an interested person of irreplaceable property, why is it not proper to impose a greater duty of inquiry on the purchaser? The purchaser (in reality his attorney) could:

(1) Check the court file to ascertain that notices required by ORS §§113.145 and 113.155 have been given.

(2) Examine the will to see if sale is authorized under ORS §114.325(2) without court order, and if not, if a court order has been properly obtained.

(3) In an intestate proceeding, check the court file to ascertain if bond has been required, and if so, if it has been increased as required by ORS §114.325(2)(c).

A practical answer to point (1) above is that if the power of a personal representative to engage in binding transactions, such as sales, were contingent on whether or not he used reasonable diligence in mailing notice to heirs and devisees, or published notice with technical accuracy, a person dealing with a personal representative could seldom rely on his power.

However, the three points above raise a far more fundamental issue. The Code was written to facilitate the prompt and economical administration of thousands of estates. In the power example, one personal representative failed to give required notices, and made an improper sale. But unless the purchaser in this obvious hardship case is protected; unless the personal representative's power of sale can exist independent of his authority, then every purchaser from every personal representative in every estate must make certain of the authority of the fiduciary to sell.

The philosophy of the Code reflects a policy judgment now uniformly accepted in the United States in connection with the transfer of securities by a fiduciary. Suppose that the power example concerned the sale of securities registered in the testator's name at his death, rather than real property. For this transaction the personal representative would need both a buyer and a transfer agent willing to rely on his statutory power of sale. The buyer must be certain that his title will be upheld, and the transfer agent must be certain that it will not be subjected to liability, even if the fiduciary exceeded his authority in making the sale. Neither can rely unless a protective statute is in force in the state of incorporation of the issuing corporation, and the state where the transfer and issuance of a new certificate will take place.

As of 1967, either the UNIFORM COMMERCIAL CODE, the UNIFORM ACT FOR SIMPLIFICATION OF FIDUCIARY SECURITY TRANSFERS, or the MODEL FIDUCIARIES' SECURITIES TRANSFER ACT was in force in all American legal jurisdictions, and for practical purposes no distinction need be made between these jurisdictions.[56] As the UNIFORM COMMERCIAL CODE[57] has now been adopted in all states except Louisiana, the following analysis will be based on that CODE.

A person such as a decedent's successor, against whom the transfer of a security is wrongful for any reason, except an unauthorized endorsement, cannot recover possession of the security or any new security evidencing all or part of the same rights, from a bona fide purchaser.[58] An executor or administrator of a decedent who is a registered owner of a security is authorized to endorse the security for transfer.[59] And, failure of a fiduciary to comply with a controlling instrument or with the law of the state having jurisdiction of the fiduciary relationship, including any law requiring the fiduciary to obtain court approval of the transfer, does not render his endorsement unathorized.[60] A bona fide purchaser is defined as a purchaser for value in good faith and without notice of any adverse claim.[61] Further, the fact that the purchaser has notice that the security is endorsed by a fiduciary does not create a duty of inquiry into the rightfulness of the transfer or constitute notice of adverse claims.[62]

But, protection for a would-be buyer would be fruitless if no trans-

[56] C. ISRAELS & E. GUTTMAN, MODERN SECURITIES TRANSFERS §12.01 (1967).

[57] The UNIFORM COMMERCIAL CODE will be cited hereafter in the form "UCC §0-000."

[58] UCC §8-315.

[59] UCC §8-308(3)(d).

[60] UCC §8-308(7).

[61] UCC §8-302.

[62] UCC §8-304. Section 7(a) of the UNIFORM ACT FOR SIMPLIFICATION OF FIDUCIARY SECURITY TRANSFERS (hereinafter cited as SIMPLIFICATION ACT) contains similar provisions, and is substantially comparable to ORS §114.385.

fer agent could risk making a transfer to him. Hence, neither an issuer[63] nor a transfer agent[64] is liable to a person suffering loss as a result of the transfer of a security if it has the necessary endorsements and had no duty to inquire into adverse claims. Where the endorsement is by a fiduciary appointed by a court, appropriate evidence of the appointment is specified to be an official court certificate, such as letters of appointment.[65] Although the issuer or transfer agent has a general duty to inquire into adverse claims upon proper notice, where the endorsement is by a fiduciary there is no duty to inquire whether the transfer is made in compliance with a controlling instrument or with the law of the state having jurisdiction of the fiduciary relationship, including any law requiring the fiduciary to obtain court approval of the transfer. Neither the issuer nor the transfer agent is charged with notice of the contents of any court record or file or other recorded or unrecorded document.[66]

The dominant purpose of article eight of the UNIFORM COMMERCIAL CODE is expressed by section 8-105: to make securities governed by that article negotiable instruments. But within the context of fiduciary transfers, the underlying reason for negotiability is stated in the Prefatory Note to the UNIFORM ACT FOR THE SIMPLIFICATION OF FIDUCIARY SECURITY TRANSFERS. "The main purpose of this Act is to render unnecessary the burdensome documentation which has been required by the transfer agent . . ." [67] If the corporation and transfer agent are liable for making a transfer which results from a fiduciary breach of duty, they must police the transfer. Documentation proving that the personal representative has been properly appointed, that he is complying with the will, and any law requiring court approval, must be required. This procedure would prevent some wrongful transfers. But the administrative expense in providing documentation it imposes on the overwhelming majority of proper transfers is enormous. In isolated transactions a market based on the premise of negotiability may deprive true owners of a margin of protection; but overall, the efficiency and reduced costs of negotiability redound to the benefit of sellers and purchasers.[68]

Should speed and economy only be provided in transfers of investment securities? At common law, the personal representative was considered the owner of all estate personal property, and consequently could sell personalty and transfer good title to a purchaser without the

[68] Folk, *Article Eight: A Premise and Three Problems*, 65 MICH. L. REV. 1379, 1386-1387 (1967).

necessity of a court order.[69] Where a different rule exists in the United States, it results from statutes which condition the personal representative's power of sale of personalty upon prior court authorization.[70] The historical origins of the rules governing sales of real property are well known. Real property descended directly to the heir. Were it available to the personal representative for the payment of debts, the performance of feudal military services might have been jeopardized.[71] Of course, land is now subject to sale for the payment of administrative expenses and the decedent's debts, but because the realty passed directly to heirs or devisees, statutes were required to authorize such sales.[72] And in the absence of a testamentary power of sale, these statutes require court approval as a prerequisite to a valid sale.[73]

The plight of the prospective purchaser from a fiduciary in the United States, whether he be a personal representative or a trustee, is much the same. One cannot be a bona fide purchaser from a trustee if he has knowledge that the trustee would be exceeding his authority in making the sale. If the purchaser knows that he is dealing with a trustee, he is charged with notice of the terms of the trust, and their correct legal interpretation, and hence of any lack of authority.[74] The draftsman can provide the trustee with the broadest of powers, or a modern statute such as the UNIFORM TRUSTEES' POWERS ACT may provide such powers.[75] The purchaser still has a duty of inquiry; he must examine the trust instrument to make certain that included powers are adequate, or that statutory powers have not been negated by the settlor. Professor Fratcher has aptly summarized the situation:

> The Uniform Fiduciaries Act and the Uniform Commercial Code have abolished the duty of inquiry in virtually all transactions concerning negotiable instruments and investment securities, but little has been done as to other types of transactions. One who purchases half a million dollars worth of corporate bonds from a trustee need not inquire into his powers to sell and to give a receipt for the price, but one who buys a pig or a rocking chair at a trustee's auction is bound to study the terms of the trust and determine at his peril their correct legal meaning. The duty of inquiry is especially onerous in land transactions because, if notice of a trust appears in the chain of title, not only the original purchaser from the trustee but every subsequent purchaser must diligently inquire into his powers. Might it not be better to eliminate the duty of inquiry in all transactions with trustees and make third parties who engage or assist in such transactions liable to the cestui que trust only when they have actual knowledge that the trustee is committing a breach of trust? The duty of inquiry is rarely of real value to the cestui,

yet it *impedes the effective administration of every trust by delaying necessary transactions and discouraging dealings with and assistance to trustees.* A trustee who is financially unable to respond in damages for his breaches of trust could be required to furnish a bond.[76]

The UNIFORM TRUSTEES' POWERS ACT adopts the thesis of Professor Fratcher, for it provides that:

[A] third person, without actual knowledge that the trustee is exceeding his powers or improperly exercising them, is fully protected in dealing with the trustee as if the trustee possessed and properly exercised the powers he purports to exercise.[77]

The primary purpose of this provision is to eliminate the delay and expense produced by the duty of inquiry in the vast majority of cases when the trustee is not committing a breach of trust. And this purpose cannot be achieved unless all purchasers, except those with actual knowledge of breach of trust, are protected.[78] No distinction is made between personal and real property transactions. Indeed, as Professor Fratcher points out, because title assurance in the United States is primarily based on recording systems and chain of title, merchantability of land is enhanced by statutory protection of bona fide purchasers from trustees.

Finally, the potential merits of this approach have led to its extension to transactions with personal representatives in the UNIFORM PROBATE CODE[79] and the Oregon Probate Code.[80]

As ORS §114.215 vests title to a decedent's property in his heirs or devisees, subject to sale by the personal representative, the ultimate result of the exercised power of sale is to *shift* the rights of interested persons from specific property to proceeds of sale, perhaps to be supplemented by the personal liability of the personal representative and his surety if a breach of fiduciary duty has resulted in loss. Neither the Oregon Probate Code, the UNIFORM PROBATE CODE, nor the UNIFORM COMMERCIAL CODE condition this shifting of rights on constitutional notice to interested persons. Could the UNIFORM COMMERCIAL CODE, adopted in all states except Louisiana, be constitutional, but not the Oregon Probate Code, or the UNIFORM PROBATE CODE when adopted? Returning to Professor Fratcher, if an interested person could be deprived of half a million dollars worth of stock in a corporation (per-

[80] ORS §114.385.

haps including control of the corporation), it seems unlikely that loss of a pig (even as unique as Al Capp's Salome), should produce a contrary result. Will the relevant portions of the UNIFORM COMMERCIAL CODE be held unconstitutional? No case raising such a challenge has been discovered.

CONCLUSION

This article is developed around two hardship examples. In so doing, it demonstrates a syndrome commonly attributed to lawyers, an analytical approach oriented to the unusual case. Whether this is a virtue or a vice depends on the extent to which it leads to a focus on the trees to the exclusion of the forest.

The Code is designed to facilitate the transmission of wealth at death without unnecessary administrative delay and expense. The system developed must provide for the efficient succession to millions of dollars in thousands of estates. The primary focus of the Code is on the vast majority of estates. In order to achieve this goal the Code has adopted the theory of independent administration. The personal representative is given authority required for prudent management of estate assets without mandatory judicial supervision. He is given a power over the title to estate assets so that third parties can safely transact business with him. Perhaps the delay and expense inherent in the old system could be tolerated during the nineteenth century. But the twentieth century has already witnessed a remarkable increase in the relatively affluent percentage of the population. In a free enterprise economic system, it is highly desirable that the wealth of decedents be efficiently managed and kept freely alienable. This writer believes the Code meets the current needs of our society and is optimistic that it will meet economic requirements that will probably be characterized as imperative by the twenty-first century, only thirty years away.

THE UNIFORM PROBATE CODE: A POSSIBLE ANSWER TO PROBATE AVOIDANCE††

RICHARD V. WELLMAN†

Succession, or probate as it is more likely to be called, is currently quite controversial. This fact, though possibly useful to would-be speech makers, is unfortunate. There should not be any controversy about the rules protecting individual freedom in regard to personal savings. The fundamental principles, *e.g.*, the premise of private property that a decedent's unused savings should go as he indicates in his will or to his heirs if he leaves no will, are not disputed or disputable. Nor can the troubles of the area be attributed to contentiousness of survivors and other claimants. Wills are rarely challenged, and the occasional challenges are usually unsuccessful.[1] Creditors of decedents, protected in many situations by security or insurance, if not by survivors concerned about family credit ratings, are not a notable source of controversy.[2] Indeed, the controversy arises from the charge that we have more rules than we need.

Perhaps the presence of elaborate rules and procedures causes survivors to forego natural contentiousness. Perhaps we should accept the ponderousness of our system as the price for desirable tranquility. Still, there are other explanations for lack of disputes, which seem particularly applicable to small estates. Inheritance is a family matter. Any economic advantage one set of survivors might gain over another by stirring up trouble would be countered in most cases by displeasure and resentment by relatives or close acquaintances, rather than strangers. And, disappointment in regard to an expectancy is seldom as keen as other economic losses. We are quite accustomed to the idea that an estate owner is free to dispose of his savings as he pleases. Hence, losses of anticipated inheritances can be borne with equanimity and when there is something to inherit, it comes as a happy surprise! In sum, therefore, many of the

†† This article is an adaptation of an address delivered at the Institute on Estate Planning and Administration in Indiana, Indiana State Bar Association, October 25, 1968.

1. Of 453 testate estates in a random sample studied in a recent survey of probate records in Cuyahoga County, Cleveland, Ohio, will contests occurred in only six, or 1.3 per cent of the cases. None were wholly successful. The survey was conducted by a sociology-law team at Case-Western Reserve University, Cleveland, Ohio. The results soon will be published. The manuscript from which the information was obtained is entitled *The Family and Inheritance*. Its authors are Marvin B. Sussman, Judith Cates and David Smith.

2. According to the manuscript of the Cleveland survey, ". . . we do not find that debts constitute a significant problem in the settlement of an estate."

usual components in succession tend to lead survivors to resolve any differences privately and amicably.

At some point, however, the size of the inheritance becomes large enough to induce would-be successors to disregard various environmental restraints in an effort to get something, or to get more. Whether this phenomenon exists in fact, or only in the minds of would-be decedents and their fiduciaries, is problematical. In either event, persons counselling owners of substantial estates are not likely to agree that survivors will not be contentious or that they will be able to resolve their differences without outside assistance. To them, a complex system for succession may tend to prevent problems before they become serious.[3]

Nonetheless, in estates of the size most frequently encountered,[4] the picture should be one of peace and harmony. Paradoxically, however, the factors in modest estates which should indicate legal tranquility appear to have contributed indirectly to the current hue and cry about probate. In any event, it is clear that we have a controversy about probate law. It is identified by the words *AVOID PROBATE*.[5] Mr. Dacey struck a raw nerve, as he learned to his delight, when his paperback of about fifty pages of text and 291 pages of duplicated forms ran first on the nonfiction best seller list in the late months of 1966. Total sales of this expensive packet of legal forms has passed 670,000.[6] Dacey's charges were quite specific and quite serious. He asserted that probate law and procedure are archaic, needlessly complex, and exist principally for the benefit of lawyers and probate judges. As a result, succession through probate is terribly time-consuming and costly. He also stated that lawyers cannot be trusted to give sound estate planning advice because of a conflict of interest; *i.e.*, the conflict between what is good for the client, and the lawyer's interest in probate fees.

His advice was explicit and alarming: Do not trust the law of succession. Opt out, and avoid probate by the use of self-declared trusts

4. The Cleveland survey described in note 1 *supra* covered 659 estates which were identified in a five per cent simple random sample of all estates closed in Cuyahoga County between November 9, 1964 and August 8, 1965. Of the 659, forty-eight or 7.3 per cent involved assets of 60,000 dollars or over and eighty-five or 12.9 per cent involved assets of less than 2,000 dollars and so were released from administration. Four hundred fifty-three (68.7 per cent) were testate and 206 (31.3 per cent) were intestate. The mean testate estate grossed 41,218 dollars; the mean intestate estate grossed 8,599 dollars. The median testate estate size was 15,000 dollars gross; the median intestate estate was 6,000 dollars gross. The figures refer to the size of the probate estate. From these figures it can be said that half of the estates in probate involve well under 15,000 dollars gross.

5. N. Dacey, How to Avoid Probate (1965).

6. Dacey's full page ad in The New York Times, May 3, 1967, reported that more than 673,000 had been sold.

of various assets and by use of joint tenancy designations.

Unfortunately, from the view of those who dislike Dacey's charges, there is much in them that cannot be denied,[7] particularly if we focus on the estate of modest size and the relationships most commonly encountered in succession. Probate laws in almost all of our states, including some with recently adopted codes, are undeniably obsolescent. For example, intestacy laws nearly everywhere continue to divide estates between the spouse and children of a decedent, even through this pattern has not made sense since the family farm ceased to be the dominant feature of American family organization a couple of generations ago. Also, modern probate procedures are best explained by reference to colonial times when our rule assigning personal property of decedents to publicly appointed local officials at least served to protect local interests against unwanted claims from afar. This ancient starting point explains a heritage which haunts probate procedures in many states today. The assumption that administration of an estate requires a judicial proceeding is as doubtful as it is costly. The burden it imposes on succession has become more apparent as the Supreme Court has made lawyers realize that easy judicial notices via publication or posting cannot be considered due process if better notice is possible.[8] The absurdity of the assumption is nowhere more apparent than in our crowded cities where low paid probate clerks go through the motions of checking receipts against items of expenditure listed in accounts of personal representatives. One coming on such a scene from abroad might assume that outlays of public moneys rather than private family distributions were involved. However, he would soon learn that routine big-city probate audits are superficial affairs which serve best to remind us how futile it is to use public offices to check private family transactions.[9]

This is not to say that the probate situation is the product of a conspiracy by lawyers against the public, as Dacey suggests, or that probate laws do not work very well in many situations. Rather than a

---

7. But we should be less than fair if we sought to excuse the abuses in the probating of wills that are inducements to avoiding probate. It is our belief that regardless of the merits of the revocable trust, it is the duty of a vigilant organized bar to take to heart the criticisms that have been aimed at lawyers and at the improper practices of the probate courts.
Editorial, *Avoiding Probate*, 52 A.B.A.J. 938, 939 (1966).

8. See Mullane v. Central Hanover Bank, 339 U.S. 306 (1950). There has been quite a bit of controversy concerning whether the *Mullane* case applies to probate proceedings. See Levy, *Probate in Common Form in the United States: The Problem of Notice in Probate Proceedings*, 1952 Wis. L. Rev. 420; Estate of Pierce, 245 Iowa 22, 60 N.W.2d 894 (1953).

9. As far as the writer knows, unless a question is raised by an interested person, the process is limited to determining whether receipts with which the accounting fiduciary charges himself have been properly expended and distributed.

conspiracy, what we have is the natural product of understandable conservatism in regard to changes of basic law. Coupled with this, we have a situation in which the basic law works well for persons of wealth who know that their affairs involve values which may invite trouble unless there is careful planning. These persons, whose affairs tend to be unusual, are rarely bothered by rules designed for the average person because they see to it that custom-made charters govern their estates.

But there is a vacuum of consumer interest in the laws which affect most directly the person whose estate is very modest and whose affairs are average. This vacuum has been principally responsible for the neglect of our estates codes. Legislatures respond to pressure. Decedents obviously pose no political problems, nor do the more thoughtful prospective decedents who can protect themselves by planning. Survivors tend to be happy with their windfall. Hence, probate laws have remained largely unchanged for generations, because the groups principally concerned with them, the lawyers and probate court officials, have found that they work very well for what they see to be the important cases; *e.g.*, the big estate where planning occurs, and the bitterly contested case. These professionals are paid to make rules work, rather than to question or to change them, and until recently at least, there has been almost no pressure for change. In a sense, the legal profession has demonstrated its technical proficiency by making the old laws work as long and as well as they have.

If, as I have suggested, probate laws which work unjustly for the average person are the product of history and historic indifference, one might expect that better legislation would appear rather quickly in this day of rising emphasis on estate planning. The combination of steadily rising levels of affluence, complex federal and state tax laws with burdensome rates and more and more public awareness of the advantages of planning which our burgeoning estate planning industry has generated, has made hundreds of thousands of persons newly conscious of their estates.

With the aid of paid and free advice, they are learning that succession via probate runs directly against such usually desired objectives as privacy in regard to family property matters, avoidance of delay in transmission at death and avoidance of periods of artificial non-liquidity following death. Joint estates, life insurance, living trusts and various extra-legal devices which avoid the shortcomings of probate are being utilized with steadily increasing frequency. Still, probate substitutes involve some personal and legal inconveniences when compared to the will. And, many people are sufficiently resentful about being pushed toward probate-avoiding devices by bad law that they would gladly

support legislative correction of the probate problems even though they also may move to protect themselves.

But, new statutes to correct probate problems are not going to be promoted or written by laymen. Lawyers must do the job and most other lawyers must support the results. The question is, how do lawyers view the probate problem?

My premise in regard to probate reform is that Dacey is simply wrong in suggesting that lawyers will not support probate law changes. There are too many reasons why lawyers should jump at the chance to get probate laws on a modern track. Let me elaborate.

Traditionally, the principal service of lawyers in relation to the succession process has involved the counselling of personal representatives and survivors. There are no better clients. But the importance of this role is shrinking in direct correlation to the extent to which individuals are using devices to avoid probate. Of course, an important new role for lawyers, garbed in the catchy words, "estate planning," has developed. These words used to mean will drafting. But, much modern estate planning is likely to center around non-probate devices. Indeed, if the sales of Dacey's book are an indicator, we should accept the fact that many laymen may shy away from use of a will. Surely, the layman is interested in substitutes. Seeing that the lawyer has no insurance, mutual investments, or joint accounts to sell, the layman is likely to believe that the lawyer can meet his estate planning needs only where the estate is large enough to warrant use of a trust.

Of course, if laymen also realized that lawyers might assist them with small trusts using family trustees, as well as with many other devices—that, indeed, a lawyer is an expert in probate avoidance—my concern about a shrinking role in estate matters for lawyers would not be so great. I am told that a good deal of new interest in estate planning by lawyers has been stimulated by the Dacey furor. But, lawyers also concede that much of this business probably would have come to them anyway. Any wide-spread discussion of estates, whether it is focused on the inadequacy of present rules, or on the advantages of a new code, would probably have some short-run effect in moving people to law offices.

I conclude, therefore, that the new "avoid probate" emphasis in estate planning works in several ways to discourage persons from using lawyers as estate planners. First, it is related to charges that the law is defective and that lawyers are in some degree responsible. Second, it has deprived lawyers of their best known stock-in-trade for estate planning, the will. Third, it has made lawyers appear to be useful only in regard to estates of unusual size and complexity.

Most estates are not of unusual size and complexity, at least so far

as estate owners are concerned. The practicing bar surely should be concerned with any trend suggesting that most estate owners understand they need some planning, but believe that lawyers have little to offer them. One disconcerting aspect is that a lawyer probably will not be the professional to whom the young family man turns first in his search for assistance in financial planning. By the time the typical person gets to the lawyer, his affairs have become complicated and much untangling becomes necessary. Worse, he may not get to the law office at all.

As a service industry, we cannot afford a posture that makes us appear useless to the average man. The other side of the coin is equally disconcerting. It is that present trends are shrinking the area of utility of estates lawyers to the point where their livelihoods may depend on continuance of a few relatively narrow provisions of our federal tax laws. When lawyers do participate in modern estate planning, the shift in the timing and character of their service means that they are working more for estate accumulators than for estate inheritors. There are significant differences between these groups in regard to their tolerance for legal fees. If put to a choice, would not lawyers prefer to be employed by inheritors? If so, there is additional reason for skepticism about the proposition that the lawyer's role in modern estate planning makes him uninterested in probate law reforms.

Probate law dilemmas are therefore lawyers' dilemmas. The probate controversy should not embarrass us—it should delight us. It has given us a great opportunity to solve some old problems. What remains to be seen, however, is whether lawyers will make the proper response to the probate controversy. In some instances to date, lawyer organizations have moved in precisely the wrong direction. Consider the action of the New York County Bar Association. That group sued to enjoin distribution of the Dacey book in New York on the ground that the author was engaged in the illegal practice of law. This action, which was in effect to say that the public should not read matters lawyers do not want them to read, simply tended to prove Dacey's charges that the bar would do whatever it could to keep the public from learning something about probate. Even if the suit in New York had resulted in a lawyer victory, which it did not,[10] the practicing bar in general stood to be seriously damaged by this emotional outburst.[11] As you can imagine, the litigation was publicized to the hilt by Mr. Dacey.[12]

---

10. The decision of the New York Court of Appeals terminating the litigation is reported in The New York Times, Dec. 30, 1967, and TIME, Jan. 12, 1968.

11. In Florida, the content of a bar journal article criticizing Dacey seems now to be the subject of a libel action by Dacey against the lawyer group. See TIME, Jan. 12, 1968.

12. See the ad in The New York Times, May 3, 1967.

A somewhat more typical reaction by various lawyers has been to write and speak of the danger of following the Dacey form book approach to probate avoidance.[13] In the main, these pieces have done a good job of discrediting Mr. Dacey's advice concerning how probate is to be avoided.[14] But, the reasoned answer sometimes seems to interest a smaller circle than the emotional attack.

Moreover, many lawyer responses to Dacey's charges fail to offer the layman a practical solution to his estate problem. The usual message has been either that probate is not so bad after all, or that only lawyer-drawn trusts are safe. But, it is still obvious to most people that probate routines are expensive and senseless as applied to the ordinary estate, and the advice that everyone should see a lawyer, is increasingly impractical. Owners of ordinary estates are the ones who have been most frightened by the turmoil about probate, and many of these persons, being newly arrived in the status of having enough to worry about, do not know a lawyer. The suggestion that they find one is troublesome. It sounds expensive. Also, lawyers are busy and the general practitioner who serves the walk-in trade is becoming hard to find. Even if the layman with a modest estate can locate an estates lawyer, more likely than not he will encounter a product of recent law school emphasis on estate planning oriented around federal tax problems. If so, he may end up with a monstrous estate plan which will be worth its price only if all of his relatives suddenly die without plans and he is later wiped out in an airline accident causing gobs of double indemnity and travel insurance to fall into the pot.

These observations suggest the parameters of the probate problem. Obsolete laws and outmoded administrative institutions threaten to trap estates lawyers and to strip them of their traditional and principal function. Interest in estate planning for persons with complex affairs has diverted professional attention so that the loss of customary function does not appear to be as alarming as reflection suggests it may be. To correct the problem, major and meaningful steps must be taken to restore the confidence of the owner of small estates in the probate system. But, lawyers must offer the solutions. And, the general area of probate has been of such pervasive importance to lawyers for so long, that the process of persuading lawyers to concede that the present system is defective, and to apply their energies vigorously to its correction, stirs up professional doubts and emotions that threaten to render the bar

14. See especially the review in CONSUMERS' REPORT, July, 1967, at 390-392.

impotent in the matter.[15]

Hopefully, the rapidly maturing Uniform Probate Code may provide some answers if it is approved by the Uniform Law Commissioners when they give it final consideration next July.[16] The project which is producing the Code is one for which every lawyer may claim credit. Originated by a sub-committee of the American Bar Association, financed almost entirely by lawyers' bar dues and gifts channeled through the American Bar Foundation, the project has been active since late 1962.[17] Because the project was well underway long before Mr. Dacey touched the public's sensitivity, it offers an explicit rejection of the charge that lawyers will never act on their own to sweep away probate dead wood. Moreover, the major features of the evolving Code will provide an affirmative, professional response to the major complaints about existing law.

Let me become more specific. The heart of the Code is its system of probate administration.[18] The basic scheme is not very original, but it may be both useful and acceptable. The idea is to offer the various major features of the different probate systems presently followed in our fifty states, as options, in a single system. Thus, under the draft Code, it will be possible for persons representing an estate to secure probate of a will very promptly after the testator's death by application to a non-judicial official of the probate court. Only a mandatory five day delay to permit family coordination and to discourage races is involved.[19] Probate with-

---

15. For further example, the American Bar Association has been criticized for sponsoring and producing the film "The Revocable Trust—An Essential Tool For the Practicing Lawyer." The film suggests that legal fees can be avoided by use of the revocable trust. See *Avoiding Probate*, note 7 *supra*.

16. Preliminary consideration was given to portions of early drafts at annual meetings of the National Conference in 1965 and 1966. A first tentative draft was introduced in 1966 and an expanded and improved second draft was introduced at the 1967 meeting. Three days of full Conference attention was given to a fourth working draft at the Philadelphia meeting of the Conference in 1968. Three meetings of the Special Committee of Commissioners have been scheduled for the winter 1968-69, during which it is contemplated that one or possibly two additional drafts will be prepared. Present plans are to present a final draft to the National Conference at its meeting in Dallas in 1969.

17. The project originated in 1962 when a subcommittee of the Real Property, Probate and Trust Law Section of the American Bar Association was formed to revise the Model Probate Code. Soon thereafter, the project was taken over by the National Conference of Commissioners on Uniform State Laws, which has assumed sole responsibility for the research and drafting effort. The ABA committee continues to serve in advisory capacity, however.

18. Article III of the 4th Working Draft of the Uniform Probate Code covers probate procedures. (The 4th Working Draft is hereinafter cited as Code).

19. Neither probate nor appointment can occur until at least five days after the decedent's death. Code §§ 3-210; 3-216. However, provision is included for emergency appointment of a special administrator, if needed before five days have elapsed. Code § 3-313. But, by use of the "relation-back" idea, and by giving the personal representative

out notice, which permits a will to be put into effect without being finally adjudicated, is an old and respected feature in many states which have long permitted what is usually called "common form probate."[20] However, if the parties desire a binding adjudication of the will's validity, the draft Code offers an appropriate, optional procedure.[21] Either no-notice or formal probate can occur without administration. But, if persons want to collect and transfer assets, administration will be a practical necessity because only an appointed representative can protect transfer agents and others.

An executor or an administrator in intestacy may be appointed with no more fuss than is required to probate a will, just as is true in many states today. After securing letters, a personal representative under the Code becomes in effect a statutory trustee with the necessary powers and protections to permit him to accomplish the entire job of collecting assets, paying debts, and selling land or intangibles as needed to raise necessary cash and distributing the estate to the successor.[22] If desired, all of these steps can be handled without further court orders. Again, however, isolated adjudications to answer particular questions or general orders settling accounts are available as desired.

The Code accepts the proposition that the probate court's proper role in regard to settlement of estates is to answer questions which parties want answered rather than to impose its authority when it is not requested to see that otherwise peaceful settlements are correct. This idea, though it would change the law in Indiana, is not novel in American probate law. Pennsylvania procedures and practice have long sanctioned settlement of estates without any activity by public offices or officials other than common form probate and routine issuance of letters. New Jersey procedures are similar. New York's surrogate courts have little to do with personal representatives after appointment. In Georgia, Texas and Washington, wills can effectively provide that the probate court shall not supervise the work of executors, and all well-drawn wills in these areas routinely so provide.

But, the draft Code offers the option of supervised administration which features, like your present Indiana Code, the necessity of a court ordered distribution of assets to close the judicial proceedings, which are deemed to have been initiated by probate, and issuance of letters.[23]

---

power to ratify acts of others done before appointment, it is hoped that use of special administrators may be avoided. Code § 3-401.

20. Simes, *The Function of Will Contests*, 44 MICH. L. REV. 503 (1946), also published in L. SIMES & P. BASYE, MODEL PROBATE CODE 682 (1946).

21. Code § 3-222 et seq.

22. Article III, Part 4, Code. See also Code § 3-104.

23. Code § 3-105 et seq.

All that is required is that some interested person request supervision by the court and that a need for it exist.

What is new about the procedural package? In a sense, nothing is new because each procedure has its tested counterpart somewhere among the states now. But the extension of familiar, easy procedures to intestate estates and the presence in the Code of clear options to handle various steps in testate or intestate administration, with or without court orders, will offer new advantages in procedure for every state.

In two other respects, however, the draft code offers somewhat newer ideas for improvement of succession in the United States. The most important is a new basic pattern of succession to intestate estates left by married persons.[24] The old system, found almost everywhere in this country, divides estates equally between the spouse and children of intestate decedents. The Code alters this so that the first 50,000 dollars will pass to the spouse, and any excess over 50,000 dollars will be divided between the spouse and children. There is a variation from this pattern if all children are not the children of both the decedent and the surviving spouse. The new pattern is deemed to reflect what an overwhelming majority of married persons want.[25] An impressive amount of data shows quite clearly that married persons of ordinary means do not want their estates divided between their spouse and children. If the children are young, expensive guardianships result from a parent's death without a plan. If the children are grown, their heirship may well reduce the spouse's share below what should be provided for predictable needs. Moreover, reducing the surviving spouse's share in favor of children deprives the survivor of a degree of control over children's inheritances which may be useful to bolster natural ties when problems of old age might strain the relationship.

Thus, the draft code rejects the feature of existing law which tends to compel every married person to make a will or employ a will substitute.

This new pattern of heirship, coupled with efficient procedures for intestate estates, should tend to reduce pressures on persons of modest means to make wills *or* avoid probate. In a sense, the Code offers a statutory estate plan which should be wholly satisfactory for most persons. Thus, the drafts offer the legal profession an answer to the question of

---

24. Code §§ 2-102, 2-103.

25. See Dunham, *The Method, Process and Frequency of Wealth Transmission*, 30 U. Chi. L. Rev. 241 (1963). The Cleveland study mentioned in note 1 *supra* reports that 89.2 per cent of testate decedents who were survived by spouse and issue willed everything to the spouse. The survey also includes responses to interviewer questions by survivors. In the survivor sample, 87.2 per cent of those with spouse and issue planned to leave their entire estates to their surviving spouse. Where the decedent was survived by a spouse and collateral heirs, 85.8 per cent willed everything to the spouse.

how to accommodate the large bulk of estate owners without diverting professional attention from the increasing demands of persons with complex affairs. It will be much easier to give advice about intestacy than to mass produce wills.

In addition, the new Code, if widely adopted, will go far to reduce the problems of planning via wills for persons who own property in several states. Estate planning by will and testamentary trust presently is handicapped in regard to persons who may change residences from one place to another, or who would invest in land in more than one state. Lawyers, who are so important to persons who prefer to manage their own affairs, should vigorously support uniformity of estate law because it will increase the range and value of the planning devices which lawyers are uniquely well equipped to handle. Also, lack of uniformity of estate law may be pushing persons who anticipate moving about the United States toward nationally managed investment pools, and the pre-packaged estate plans which go with them. I have no quarrel with these arrangements if they are preferred over owner-controlled investments *on the merits*. We should see, however, that individualized ownership is not unduly handicapped by legal anachronisms.

The Uniform Probate Code thus offers some positive answers to current probate dilemmas. Properly explained and properly used by lawyers assisting survivors, it will offer a much easier answer to worried owners than Mr. Dacey's. The message might be: "Relax; keep your property for yourself; inheritance is safe and, like any alternative, as cheap or expensive as your survivors and creditors make it." Shortened, the message might simply be, "Save your money. Probate works well."

The new Code would let lawyers carry out this kind of promise to the public. When survivors of a decedent who did not avoid probate seek legal counsel, the attorney will find it easier to give efficient service, for many of the old procedural drawbacks are gone. The Code makes it possible to avoid public disclosure of the assets of a decedent. Court-appointed appraisers are eliminated. Probate bonds, which every testator avoids when he can, will not be needed unless demanded by survivors, and awkward judicial sales of real estate should become a thing of the past.

The legal system will offer protection, but will not force it. As a corollary of less required paperwork and fewer adjudications, legal fees in individual cases may go down, but if general confidence in the probate system is restored the overall effect should be a marked increase in the number and size of estates in which lawyers may be involved.

Still, there are substantial risks that the Code will not become the answer to probate avoidance. The principal worry lies in the difficulty

of marshalling lawyer opinion behind the project. There are some who believe that the probate controversy is a tempest in a teapot and that it would be a mistake to undo settled law in response to the new found public interest in estates. I am convinced, however, that these views are wrong. In my five years of work on the Code, I have heard from dozens of laymen, and I have discussed these matters with lawyers from every part of the country. Most lawyers concede that the law needs to be improved. The public wants a change of law. If there is doubt on any point, it relates simply to whether lawyers will react affirmatively to the obvious demand for change. Until now much of the pressure for change has been tempered by publicity to the effect that the Uniform Code project would result in significant improvement. If the organized bar disappoints the public and follows the advice of the "stand-patters" on this occasion, it will be inviting a new and serious wave of anti-lawyer opinion which I, for one, do not believe it can afford. Moreover, it will be missing a golden opportunity to get public support for law changes that are badly needed in order to get the will, the lawyer's stock-in-trade, back into the circle of approved methods for handling many estate planning demands.

Some lawyers, particularly older practitioners who enjoy good probate practices, express apprehension about the Code's impact on probate fees. However, old assumptions concerning probate fees are likely to be unreliable guides for the future whether or not the Uniform Code gains much support. The increasingly popular revocable trust and publicity about probate fees already have brought new fee fixing criteria into the picture. Further, the Uniform Code does nothing about probate fees other than to make the lawyer's work load in particular estates somewhat less predictable, and to get the probate court out of the business of determining or approving fees in routine cases. Perhaps the biggest difference will be that lawyers will be able to handle small estates efficiently enough to begin to realize a decent return for time invested. Certainly they would prefer to be well paid for two or three hours of work, rather than nurse a file along for months to pick up a few hundred dollars from a small estate.

As far as large estates are concerned, I see little reason to predict great change in the actual work which lawyers will perform. Of course, if all that is involved is the transfer of securities and the routine determination of taxes, work and fees may be modest. But corporate fiduciaries will want the protection of adjudicated settlements; fees will continue to be borne in large part by the government in the form of deductible expenses; survivors receiving big inheritances should not be any more hard-nosed about fees than they are today. Indeed, with increased pros-

pects that fees will be carefully explained and irritating rituals in court minimized, there may well be less resistance to good fees in big estates than is present today.

Some lawyers and trustmen may worry about loss of inter vivos trust business under the Code but if any diminution occurs, it will be because probate business grows. Moreover, if there is no reason for a trust except to avoid probate, it is not certain that professional trustees will find participation profitable. There is an essential and expensive contradiction between the idea that the trust company owns and controls and the notion that the settlor is still the owner. Yet a settlor who has kept a power of revocation is likely to see it just this way, especially if the whole purpose was merely to avoid probate. But, there should be no loss of the desirable revocable trust business. The Probate Code does nothing to reduce the advantages of revocable trusts for persons who want the investment, tax counselling, bookkeeping, and "senility-insurance" features offered by present trusts for management.

Indeed, by its inclusion of an up-to-date set of optional legal proceedings for trustees and beneficiaries of all kinds of trusts, without distinction between those created by will and those created inter vivos, the Code should encourage greater use of trusts.

Many lawyers who tend to favor the Code fear the reaction of the probate judiciary to the new package. They fail to take into account that probate judges and their employees everywhere have been hit with the main force of the probate controversy. These people are caught between an interest in serving the public which led them to accept public office, on the one hand, and unpopular and useless law which they must enforce, on the other. The Uniform Code, though it may be adapted to a wide variety of court organizations, advocates that probate courts be thought of as fully equivalent in terms of power to courts of general jurisdiction. The Code also expands the subject matter jurisdiction of the probate court, giving it clear authority to resolve controversies relating to all kinds of will substitutes, and to handle questions and accounts by inter vivos and testamentary trustees. Overall, the Code is designed to relieve probate judges of the unpopular and difficult job of riding herd on all estates, and to open the way to the development of a powerful and specialized court which should offer real opportunity for valuable and dignified service by incumbent and future probate judges. Surely many will favor such a package.

There are many other less obvious perils ahead for the Code, but all of them will evaporate if lawyers support the project. Some elements of the newspaper industry are unhappy with what they deem to be inadequate provisions for publications of legal notices, and peddlers of probate

bonds dislike the Code's provisions on bonds. Another, perhaps more worrisome, obstacle to the Code is the tendency of local committees of lawyers examining the Code to prefer familiar local rules of heirship and wills to any national model. This tendency easily could wreck the objective of uniformity. Committee by committee, the realization must spread that lawyers, and the people legal rules should serve, have everything to gain and nothing to lose by relinquishing their hold on traditional provincial rules regarding inheritance. Only very minor adjustments in basic rules will be necessary for most states to align present rules to the Code. The goal of expanding every estate lawyer's useful counselling range so that interstate succession problems can be handled is important.

But, do not let talk of doubts blur your perspective about the Code. Keep in mind that the Code will represent a very thoroughly considered professional response to problems which were identified by lawyers long before Mr. Dacey got excited. Literally hundreds of lawyers representing all kinds of practice in all parts of the country have been continuously involved in its preparation over the last five years.[26] Their diversity and their awareness of the great public interest in the project have enabled them to evolve drafts which offer fair balance between public and professional interests. If these drafts become law, millions of owners of modest estates may find reason to stop worrying about estate planning and probate because the law's estate plan will be as good as they can find. Thus, the law may at least stop pushing these people toward non-lawyer estate specialists. At the same time, lawyers will gain important new legal equipment to enable them to meet the interest of persons who know they have enough property to make planning and protection worthwhile. This is a charter which should attract wide support.

In passing, I should note that the conditions in Indiana which bear on the Code's chances of success here strike me as especially favorable. Your present Code, like the Uniform Code, has borrowed much from the old Model Probate Code of 1946. Your court organization, which presently recognizes the probate court as a court of significant power and stature, is essentially compatible with the Uniform Code. The

26. The advisory committee of the Real Property, Probate and Trust Law Section, was mentioned in note 17. Primary responsibility for the drafts has rested in the Special Committee on the Uniform Probate Code of the National Conference (see note 16 *supra*) with whom the Reporters have met frequently since 1962. This committee, numbering over twenty, is composed of lawyers from different states. Other subcommittees of the Real Property, Probate and Trust Law Section of the American Bar Association have studied and reported on the Code. More than 150 lawyers are involved in these committees. The American College of Probate Counsel, The Trust Division of the American Bankers Association and many state and local bar groups have had committees studying the drafts for some time.

interest of the bar of Indiana in estate planning, as reflected by the focus of this important meeting, is a very good omen. Your people, situated near the crossroads of the nation, are more interstate than provincial. Surely, you need to keep your laws in tune with, if not ahead of, those in neighboring states. Finally, I am delighted to learn that your Commission on Interstate Cooperation has recommended to the Indiana legislature that the Probate Code Study Commission be reconstituted with a charge to study the Uniform Probate Code. This is a very good start.

It remains to be seen, however, whether we lawyers can agree on anything so pervasive and so important to the general practice of law as a uniform probate code. If we can, and *if* we use the resulting new law intelligently, we will have our answer and that of the public to the probate avoidance controversy. If we cannot, we will not block changes in probate law and practice. Present trends, if unchecked, dictate that *probate avoidance* will become the main road with wills and intestacy becoming infrequently encountered by-ways. Present trends also suggest that estates law and lawyers will become increasingly irrelevant to the ordinary person's estate problems. Our failure to agree on a useful new Code will not change these trends. It will prove only that lawyers as a group are so incapable of constructive reform that they cannot even agree on changes which seem necessary to the perpetuation of the profession as we have known it. I, for one, am not yet ready to believe that this will be the case.

CONSERVATORSHIP UNDER UNIFORM PROBATE CODE

BY ELMER L. FINGAR*
White Plains, New York

I. INTRODUCTION

Article 5 of the Uniform Probate Code (hereinafter referred to as UPC) relates to minors and other persons under disability. I had contended most vehemently that the problems of minors and those of adult persons under disability were so dissimilar that it was not feasible to draft a statute which would adequately provide for both. I now state publicly that Professor Wellman and his able assistants who drafted the UPC have demonstrated that gasoline and water can indeed mix, provided the mixers have patience and adequate skill.

We have made great progress in protecting the rights of all citizens regardless of race, color or creed. Yet there is little in the press or elsewhere in regard to the rights of *adult* persons under disability. It is stated that about half of all the hospital beds in the United States are occupied by mentally ill persons.[1] Such persons are unable to organize to protect and preserve their property and to exercise freely their civil rights. Therefore, it is the duty of the bar associations, and particularly the American Bar Association, to act on behalf of this unfortunate segment of our society and to sponsor needed legislation. The person under a disability is not a second rate citizen.

As a boy I heard my seniors refer to patients in a state hospital for the mentally ill as lunatics, crazy and the like. The commitment to the hospital was a stigma, something that the family of the patient did not discuss. While there has been some change in the attitude of the public, a residue of such thinking remains with us. We know now, of course, that many of such patients are curable and that during their treatment they are capable of exercising many of their civil rights, such as voting.

In addition to the patient in a hospital for the mentally ill we have the elderly senile person, who makes his home with a son or daughter, and the unfortunate retarded person. In 1968 I probated the will of a retarded man who had the mentality of a boy of 14 and who died in his sixties. There were objections to the will but they were withdrawn.

There is no need here to discuss in detail guardianship of minors or guardians of the *person* of incapacitated adult persons. The provisions of Parts 2 and 3 of Article V of the UPC are clear in these two areas and do not present any particular problems. They are quite similar to existing statutes of most states. My experience is that guardians of the person, whether a minor or adult under disability, fill a rather limited role in any event. If, however, such appointment is needed, I direct your attention to

---

*Chairman of the Section's Committee on Problems Relating to Persons under Disability.

[1] ALLEN, FORSTER & WEIHOFEN, MENTAL IMPAIRMENT AND LEGAL INCOMPETENCY (1968).

section 5-303. The draftsmen have fully protected the alleged incapacitated person to prevent an adjudication where one is not required. For example, he must be represented by counsel, a physician appointed by the court must examine him and he must be interviewed by a "visitor" designated by the court. Finally, he is entitled to be present at the hearing and to a trial by jury in open court. A hearing in chambers without a jury may be had if the ward or his counsel so requests and the physician and visitor approve the request.

II. Protective Proceedings

Part 4 of Article V of the UPC relates to the protection of the *property* of minors and adults under disability. The proceedings thereunder are called "protective proceedings," the person under disability a "protected person" and the fiduciary appointed by the court a "conservator."

A minor is stated to be a person under age 21. An adult person under disability is a person unable to manage his property and affairs effectively because of physical or mental disability, including mental retardation, senility, disease, habitual drunkenness, addiction to drugs, imprisonment, compulsory hospitalization, confinement, detention by a foreign power, disappearance or other reason or combination of reasons.

Section 5-401 provides that the court may appoint a conservator of a minor who has money or property that requires management or protection which he is unable adequately to provide or that funds are needed for his support and education and that protection is necessary or desirable to obtain or provide funds. Likewise, the court may appoint a conservator of an adult under disability if it determines that the person has property which will be wasted or dissipated unless proper management is provided, or that funds are needed for the support, care and welfare of the person or those entitled to be supported by him and that protection is necessary or desirable to obtain or provide funds.

If the court finds that sufficient grounds exist for the appointment of a conservator of an adult under disability, the statute provides that the court shall have the powers over his estate and affairs which he could exercise if present and not disabled, including the power 1) to make gifts; 2) to convey or release contingent and expectant interests in property, including inchoate dower, curtesy initiate and the right of survivorship incident to joint tenancy and tenancy by the entirety; 3) to exercise or release his powers as trustee or other fiduciary or donee of a power of appointment; 4) to enter into contracts; 5) to create revocable or irrevocable trusts of property of the estate which may last longer than his disability or life; 6) to sue for divorce or annulment of his marriage; 7) to exercise options to purchase securities or other property; 8) to elect options and change beneficiaries under insurance and annuity contracts and to surrender policies for their cash surrender value; 9) to exercise his right to an elective share in the estate of his deceased spouse and to renounce any interest by testate or intestate succession or by inter vivos transfer.

Provision is made for a hearing in respect to the exercise of certain of

the enumerated powers such as the exercise or release of powers and the making of gifts exceeding 20 per cent of any year's income of the disabled person. It will be noted that tax saving is the motivation for several of the powers. As for the power to sue for a divorce or annulment of marriage the comment states that the court should have the power to authorize the conservator to cut off the rights of the spouse of a disabled person who has abandoned or maltreated a minor or disabled person and thereby prevent a wrongdoer spouse from exercising his or her marital rights, such as support. I have recommended that the power of the court be extended to sue for a legal separation.

A questionnaire circulated to selected lawyers active in the American Bar Association shows that some of the enumerated powers are controversial, particularly the power to dissolve the marriage of a protected person. Such power cannot be exercised, however, without notice to the person, his spouse, his parents and children, his guardian, if any, and his conservator.

III. Appointment and Function

Assuming that the facts justify the appointment of a conservator, the court may appoint either a natural person or a corporation with general powers to serve as trustee. While the appointment of a conservator vests in him title to all property of the protected person, the statute states that the appointment is not a transfer or alienation within the meaning to the provisions of any federal or state statute or regulation, insurance policy, pension plan, contract or a will or trust agreement imposing restrictions upon or penalties for transfers or alienation by the protected person of his rights or interest.

Where the court finds that a basis exists for the appointment of a conservator of a disabled person it may authorize or direct any transaction necessary or desirable to achieve any security, service or care arrangement meeting the foreseeable needs of the protected person without the appointment of a conservator. For example, authority may be granted by court order to transfer real property and securities without an appointment. This provision effects savings in time and expenses otherwise incurred in a full conservatorship.

The alleged disabled person or minor or any person interested in his welfare may petition for the appointment of a conservator and nominate the conservator. The statute provides for priority of appointment of classes of persons, for the fixation of the bond (individuals), for filing of an inventory and accounting and like matters. As for the other statutory powers of a conservator I shall mention only that the prudent man rule governs investments.

In addition to providing for the necessary support of the disabled person the conservator under proper circumstances may with the approval of the court provide for the maintenance and support of other persons who had been maintained and supported in whole or in part by the protected person prior to the appointment of a conservator.

On the death of the protected person the conservator must deliver to

the court any will of such person in his possession and deliver the estate to the duly appointed personal representative of the decedent. Functionally, it would seem that if the protected person dies intestate, the conservator with court approval should be authorized to administer the estate and make ultimate distribution to the distributees.

While the statute imposes restrictions upon the right of the protected person to incur debts and to execute contracts, unless authorized by the court, the existence of a conservatorship has no bearing on the capacity of the protected person to marry, to vote or to exercise other civil rights.

Possibly one of the most important provisions of the UPC is that third persons dealing with or assisting a conservator are amply protected in that (1) the existence of all statutory powers conferred upon conservators and their proper exercise may be assumed without inquiry; and (2) a third party is not bound to assure the proper application of money or assets paid or delivered to a conservator. These provisions have particular significance when applied to land record and security transfers.

IV. Powers of Attorney

In most states the authority of an attorney-in-fact terminates with an adjudication of incompetency or the death of his principal. Part 5 of Article V of the UPC permits a principal who is *sui juris* to abrogate that rule by adding to the instrument, "This power of attorney shall not be affected by disability of the principal" or similar words. This authorizes the attorney-in-fact to act regardless of the later disability or incapacity of his principal or later uncertainty whether the principal is dead or alive. If a conservator is thereafter appointed for the principal, the attorney-in-fact must account to the conservator rather than to the principal. The conservator has the same power which the principal would have had but for his disability or incompetence to revoke, suspend or terminate all or any part of the power of attorney.

An attorney-in-fact acting in good faith may continue to exercise his authority as agent until he has actual knowledge of the death, disability or incompetence of his principal. An affidavit executed by the agent as to lack of actual knowledge of the revocation or termination of the power of attorney by death, disability or incompetence constitutes, in the absence of fraud, conclusive proof of the nonrevocation or nontermination of the power at such time.

V. Conclusion

I recommend the UPC for study to the end of sponsoring it in your state in whole or in part. While you may not agree with all of its provisions I am confident you will find that many provisions deserve your attention and that of your local bar association. I am pleased to note that Maryland has paved the way by enacting in 1969 a new Probate Code which with certain changes follows the patterns of the UPC.[2] That other states will follow is inevitable.

[2] *See* 4 REAL PROP., PROB. & TR. J. 253 (1969).

MULTIPLE-STATE ESTATES UNDER THE UNIFORM PROBATE CODE

ALLAN D. VESTAL*

1. THE UNIFORM PROBATE CODE

On August 7, 1969, the National Conference of Commissioners on Uniform State Laws adopted by a vote of the states the Uniform Probate Code. The following week the House of Delegates of the American Bar Association approved the Code.[1] In these actions a giant step forward was taken toward uniformity in probate law in the United States. Although no state has had the opportunity to consider and adopt the Uniform Code, there is reason to believe that a number of states will give serious consideration to the Code in the near future.

For some time in the post World War II period various segments of the legal profession and the lay public had been dissatisfied with the methods of passing property from one generation to another.[2] This had resulted in a number of probate revisions which have taken place or which have been urged.[3] In the decade of the sixties impetus for re-

---

*John F. Murray Professor of Law, University of Iowa. A.B. 1943, DePauw University; LL.B. 1949, Yale University. The author is one of the draftsmen of the UNIFORM PROBATE CODE and a member of the Special Committee on the UNIFORM PROBATE CODE of the National Conference of Commissioners on Uniform State Laws. The author cannot speak for the draftsmen, the committee or the National Conference. Any opinions are his own and should not be attributed to anyone else.

[1]The House of Delegates approved the UNIFORM PROBATE CODE with an amendment which provides:

> Resolved, that the Section of Real Property, Probate and Trust Law be authorized to present the views of the American Bar Association regarding the Uniform Probate Code with appropriate recommendations for implementation to state and local Bar Associations to make in-depth studies, including studies of the long-term advantages of uniformity on particular points of probate and related law, customs and practices; and that the National Conference of the Commissioners on Uniform State Laws be urged to continue its Special Drafting Committee.

After the adoption of the UNIFORM PROBATE CODE (hereinafter cited as UPC) by the National Conference and its approval by the House of Delegates of the American Bar Association, a version of the UPC was published by Prentice-Hall under the date of August 27, 1969. In a letter from the Executive Secretary to the Commissioners it was stated:

> This edition of the Code was printed by Prentice-Hall, Inc., and contains the changes made at Dallas.
>
> However, it does not contain style changes which will appear in the official draft of the Uniform Probate Code.

[2]*See* M. BLOOM, THE TROUBLE WITH LAWYERS, ch. 11 (1968); *Let's Rewrite the Probate Laws*, CHANGING TIMES, Jan. 1969, at 39.

[3]For example, the IOWA PROBATE CODE was revised by a committee of the Iowa Bar Association and submitted to the Iowa General Assembly in 1963. IOWA CODE ch. 633 (1966). This was adopted almost without change by the legislature and became effective on January 1, 1964. On the new IOWA PROBATE CODE, see *Symposium on the New Iowa Probate Code*, 49 IOWA L. REV. 633 (1964) with forward

form has come from Wisconsin, Michigan, Oregon, Alabama, Maryland and other states. In the early 1960's the National Conference of Commissioners on Uniform State Laws (hereinafter the National Conference) and the Real Property, Probate and Trust Section of the American Bar Association both became actively interested in the matter of probate reform.[4]

In August. 1963, a joint meeting was held of the Model Probate Code Special Committee of the National Conference and members of the Section on Real Property, Probate and Trust Law of the ABA.[5] At this meeting the preliminary efforts of these two groups were merged into a common project, a "joint venture," "the development of a Model Probate Code."[6] Following this meeting in 1963, a group of reporters started work on drafting a code dealing with probate and related matters. At the Hollywood, Florida, meeting of the National Conference in August of 1965, a draft of part of the Code was presented for the first time. Following this beginning the personnel working on the project has changed,[7] the title of the project has changed,[8]

---

by Willard L. Boyd (early draftsman of the UPC), and articles by Shirley A. Webster, Jack W. Peters, Matthew J. Heartney, Jr. and N. William Hines.

For a discussion of 1965 changes in New York probate law see Note, *Recent Reforms in the Law of Estates, Wills and Trusts*, 40 ST. JOHN'S L. REV. 230 (1966).

[4]The Conference has been interested in estate administration for a number of years as indicated by the uniform acts passed in the area. The UNIFORM FOREIGN PROBATED WILLS ACT was approved in 1915 (withdrawn); the MODEL EXECUTION OF WILLS ACT was drafted in 1940; the UNIFORM POWERS OF FOREIGN REPRESENTATIVES ACT was approved in 1944; the UNIFORM ANCILLARY ADMINISTRATION OF ESTATES ACT was approved in 1949; the UNIFORM PROBATE OF FOREIGN WILLS ACT was approved in 1950; and the MODEL SMALL ESTATES ACT was approved in 1951.

[5]This meeting was held in the Hotel Knickerbocker, Chicago, Illinois, during the 72d Annual Conference of the National Commissioners. Representing the ABA were J. Pennington Straus, Edward B. Winn, Harrison Durand, Paul Basye and William Fratcher (the latter two later became reporters on the UPC). Representing the National Conference were Allison Dunham, Earl Sachse, Clarke Gravel, Harvey S. Reynolds, Clarence Swainson, William Pierce, Herbert H. McAdams and Sverre Roang.

[6]This language is taken from the notes of the meeting and is attributed to Clarke Gravel, Chairman of the 1962-63 Model Probate Committee of the National Conference.

[7]The original chairman of the National Conference Committee was Judge Sverre Roang, of Janesville, Wisconsin, who was not renamed a Commissioner in 1967. In the Hawaii meeting Tom Martin Davis of Houston, Texas, and Charles Horowitz, of Seattle, Washington, were named co-chairmen of the Committee. During the crucial year, 1968-69, the members of this Special Committee on the UNIFORM PROBATE CODE were Fred T. Hanson (Nebraska), James T. Harrison (Montana), Thomas L. Jones (Alabama), Robert A. Lucas (Indiana), Miller Manier (Tennessee), Bert McElroy (Oklahoma), Godfrey L. Munter (D.C.), J. William O'Brien (Vermont), Russell W. Smith (Indiana), Clarence A. Swainson (Wyoming), C. P. Von Herzen (California), Joe W. Worley (Tennessee), Robert R. Wright (Arkansas), and the author of this article.

[8]The initial discussion was in terms of a "Model" Code. Later the goal became

and the scope of the project has been modified,[9] but the principal thrust has remained the same—the creation of simplified methods of transferring property on death and protecting the interests of certain legally incompetent persons. A great impetus to the development of the Code was given by a meeting of the draftsmen in 1967 at Boulder, Colorado.[10] During a five week session the draftsmen put together the so-called "Boulder Draft" which was the first extensive, cohesive draft covering all of the articles then proposed. A session of three draftsmen was held in Berkeley the following year and Article VII on trusts was produced in this meeting.[11] This is the background of the adoption of the Uniform Probate Code (UPC) in Dallas in 1969.

The UPC is composed of seven articles dealing with various phases of the very broad topic of estates of both decedents and persons under disability in addition to coverage of some non-probate transfers and trusts. Article I, General Provisions, covers the application of the act, definitions, the probate court itself, a general notice provision, right to trial by jury, and a broad fraud provision. Article II provides for intestate succession and wills. This includes elective share of the surviving spouse, pretermitted heirs, exempt property and allowances, rules of construction for wills, and contractual arrangements concerning death. This article in a bracketed section also deals with the effects of homicide on succession to property.

Article III covers the probate of wills and the administration of estates, either through supervised or independent administration. Parts of Article III deal with appointment proceedings, the personal rep-

---

a Uniform Act. To the National Conference the difference is very significant. For a discussion of the distinction between a "Model" Act and a "Uniform" Act see HANDBOOK OF THE NATIONAL CONFERENCE OF COMMISSIONERS ON UNIFORM STATE LAWS 328 (1968). Basically the "Uniform" Act has widespread support among the commissioners and is expected to have a good chance of enactment in a substantial number of jurisdictions.

[9]The addition of the Article on Trusts in 1968 was the most notable change.

[10]Attending the seminar in Boulder, Colorado, were draftsmen Paul E. Basye, Hastings College of the Law of the University of California, Richard Efland, now of the College of Law of Arizona State University, William F. Fratcher, School of Law, University of Missouri, James McDonald, Law School of University of Wisconsin, Eugene Scoles, now Dean of the School of Law, University of Oregon, Richard V. Wellman, Law School of the University of Michigan, Harold G. Wren, Law School of Boston College, and the author. Observers at the meeting were Thomas L. Jones of the Law School, University of Alabama (later named a Commissioner and a member of the Special Committee on the UNIFORM PROBATE CODE) and Thomas W. Mapp, School of Law, University of Oregon.

[11]The three men attending this meeting were Edward Halbach, Dean of the School of Law, University of California at Berkeley, Gene Scoles, now Dean of the School of Law, University of Oregon, and Richard Wellman, Law School of the University of Michigan.

resentative and his duties and powers, claims of creditors, distribution, and closing. The article also includes a provision for handling small estates.

Article IV covers the matters under consideration in this article, foreign personal representatives and ancillary administration.

Article V deals with the protection of persons under disability and their property. Article VI, on non-probate transfers, covers multiple-party accounts and provisions in contracts dealing with the effect of death. The final article, VII, deals with the administration of trusts. Although there is some interrelationship between articles, they generally can stand alone.[12]

The Uniform Probate Code was designed to remedy some of the deficiencies so readily apparent in the present scheme of property passage by probate administration. It may be true that the Code goes to extremes in attempting to solve some of the problems, but nonetheless radical steps seemed to be necessary. The National Conference has prepared a comprehensive document which deserves serious consideration by all members of the legal profession.

2. Foreign Personal Representatives; Ancillary Administration

Article IV deals with estates which involve more than a single state.[13] Generally, this involves the domiciliary jurisdiction[14] and a second state in which the decedent had property or in which a claim is asserted against the estate. Obviously more than two states can be involved. The multi-state contacts can arise in numerous ways. The retired Iowa farmer, who keeps his farm but moves to Florida and decides to reside there, may have property in both Iowa and Florida on death. The Illinois businessman, who decides to invest in a savings

---

[12]In the latter stages of drafting there has been some pressure to separate some articles out for special treatment as model rather than uniform provisions. To the members of the N.C.C.U.S.L. this difference is very significant. The uniform laws have much more status or prestige. *See* note 8 *supra*.

[13]For a general discussion of the current state of the law on suits by and against foreign personal representatives see Currie, *The Multiple Personality of the Dead: Executors, Administrators, and the Conflict of Laws*, 33 U. Chi. L. Rev. 429 (1966).

[14]The UPC in section 3-402 provides for the situation where there is a conflict concerning the state of domicile. The final sentence states, "The determination of domicile in the proceeding first commenced must be accepted as determinative in the proceeding in this state." Since this is keyed to the action first commenced and not to the first judgment handed down, there may be some constitutional problem concerning full faith and credit. *See also* Riley v. New York Trust Co., 315 U.S. 343 (1942) (determination of domicile not entitled to full faith and credit as to those not parties to prior determination).

and loan association in California, on death will have a multi-state estate. If a Kansas motorist, killed in an automobile accident in Missouri, is at fault, his personal representative handling his estate in Kansas may find that he is involved in litigation in Missouri.[15] The Montana resident who invests in land in Arizona has a multi-state estate on death. All of these hypotheticals are commonplace; the American population is no longer tied to its place of birth. People are mobile; wealth is mobile.

Whenever more than one state is involved, administration at the present time is complex and difficult. Assembling assets from several states is not easy. While jurisdictions increase arithmetically, difficulties seem to increase geometrically. Just as troublesome is the possibility that the personal representative or the assets of the estate may be the subject of litigation in several states.

Article IV is designed to simplify and unify the estate administration. It may have some other collateral effects, but the main thrust is toward these goals.

3. Marshalling Assets of Estate; Collecting Debts or Property Owed to Decedent

One of the recurring problems in estate administration is collecting debts and property of a decedent outside the domiciliary jurisdiction. An example of this difficulty is found when the decedent has deposited money in a savings and loan association in a foreign state. The personal representative is forced to go to the foreign state to get this asset. Should the savings and loan association be willing to pay without court proceedings, this does not necessarily solve the difficulty completely. There remains the possibility that payment may not terminate liability.

The courts of a number of states have held that the personal representative appointed by the foreign, domiciliary court[16] may ac-

---

[15]Brooks v. National Bank of Topeka, 251 F.2d 37 (8th Cir. 1958) (Kansas executor sued in federal court in Missouri by Florida residents). Note, *Should Iowa Again "Reach Out" for Estate Representatives of Non-resident Motorists?*, 44 Iowa L. Rev. 402 (1959); Note, *Amenability of Foreign Administrators to Suit Under Non-Resident Motorist Statutes*, 57 Yale L.J. 647 (1948).

[16]Although there may be some confusion about the terminology, it seems reasonable to separate probate courts in a given estate into a domiciliary court (in the state where the decedent was domiciled) and ancillary courts (all other states). *In re* Maxton's Estate, 335 Ill. App. 240, 81 N.E.2d 658 (1948); First Nat'l Bank v. Blessing, 231 Mo. App. 888, 98 S.W.2d 149 (1936); *In re* Smith's Estate, 126 Mont. 558, 255 P.2d 687 (1953); *In re* Smith's Estate, 55 Wyo. 181, 97 P.2d 677 (1940). A court may be ancillary although there has been no domiciliary administration. Payne v. Payne, 259 Ky. 99, 82 S.W.2d 805 (1931).

cept voluntary payment and give acquittance so long as no local creditors are prejudiced. For example, the Supreme Court of New Hampshire has stated,

> By comity, in the absence of the appointment of an ancillary administrator in this state, a foreign administrator may collect the assets of the estate located here when there is no prejudice to local interests . . . . If there is need, any creditors may petition for ancillary administration in this state.[17]

Minnesota,[18] California,[19] Connecticut,[20] New York[21] and Delaware[22] have reached similar conclusions. The Maryland court has stated, "[T]he general current of the decisions has held that such voluntary payment is valid, and a good discharge of the debt."[23]

Colorado and Florida have statutes covering this matter. Conditioned on "no prior written demand from a creditor" and a delay of six months, the Colorado statute protects a debtor of the estate by providing: "Upon such payment or delivery, such person is released to the same extent as if payment or delivery had been made to a personal representative appointed by a court of this state."[24] The Florida statute, along this same line, provides,

> All persons indebted to the estate of a decedent or having possession of personal property, either tangible or intangible, belonging to the estate of a decedent, who have received no written demand from a personal representative or curator appointed in this state, for payment of such indebtedness or the delivery of such property, are authorized to make payment of such indebtedness or to deliver such personal property to the foreign personal representative after the expiration of three months from the date of his appointment.[25]

[25]FLA. STAT. ANN. § 734.30 (1963).

Florida also has a parallel statute dealing with bank accounts of nonresident decedents.[26]

Section 4-201 of the UPC is similar to the Colorado and Florida statutes in allowing voluntary payment. It provides that the personal representative from the domiciliary jurisdiction can, after the death of the decedent, contact

> any person indebted to the estate of a . . . decedent or having possession or control of personal property, or of an instrument evidencing a debt, obligation, stock or chose in action belonging to the estate of the . . . decedent . . . .

and ask for payment or delivery.[27] The personal representative is to present an affidavit stating:

(1) the date of the death of the nonresident decedent,
(2) that no local administration, or application or petition therefor, is pending in this state,
(3) that the domiciliary foreign personal representative is entitled to payment or delivery.[28]

Upon the presentation of this affidavit, the debtor or person in possession, if he acts in good faith, can pay or deliver to the domiciliary personal representative and will be discharged of his obligation.[29] This simplifies the handling of debts or assets in a non-domiciliary jurisdiction. At the present time in many states these can be handled with protection to the delivering party only through the opening of an ancillary administration.[30]

Under this section of the UPC the debtor of the estate is not required to make payment. If he wishes, he can refuse to pay and force the foreign personal representative to use other techniques available to him to collect the debt. This section does not cover the matter of transfer of securities since, it is felt, this "is adequately covered by section 3 of the Uniform Act for Simplification of Fiduciary Security Transfers."[31]

There is one apparent danger in the UPC provision. A resident creditor of the nonresident decedent may wish to look for satisfaction

[31] UNIFORM PROBATE CODE § 4-201, Comment.

to the assets of the decedent located in the local state. He may not want the assets carried back to the domiciliary jurisdiction. Article IV provides that such a resident creditor may notify "the debtor . . . or the person having possession of the [decedent's] personal property" that the assets should not be delivered to a foreign personal representative. When such notice has been given, payment or delivery may not be made under section 4-201.[32] This provision is similar to the Colorado provision[33] and reflects the desire found in other states to protect local creditors of the decedent.[34]

4. Foreign Personal Representative Acting as Local Personal Representative With All Powers

Under the existing law of a number of states, the foreign personal representative has the power to maintain actions to recover debts owed to the decedent.[35] For example, the Kansas statute provides:

> A fiduciary duly appointed in any other state or country may sue or be sued in any court in this state, in his capacity of fiduciary, in like manner and under like restrictions as a nonresident may sue or be sued.[36]

Other states have similar provisions.[37] This power to sue may be given to the foreign personal representative only after he has met certain local requirements. In Indiana he is authorized to file a duly authenticated copy of his letters and give a bond "under the laws regulating the maintaining of suits by non-resident citizens."[38] In Arkansas he is required to file a bond.[39]

Adams' Executors, 27 Ind. 432 (1867). A foreign personal representative cannot sue on a note when ancillary administration has been granted. Hensley v. Rich, 191 Ind. 294, 132 N.E. 632 (1921).

[39] Ark. Stat. Ann. § 27-805 (Supp. 1965). For cases interpreting this and its progenitor see McGraw v. Simpson, 208 Ark. 471, 187 S.W.2d 536 (1945); St. Louis, I.M. & S. Ry. v. Cleere, 76 Ark. 377, 88 S.W. 995 (1905); Gibson v. Ponder, 40 Ark. 195 (1882).

The Conference chose to incorporate a provision in the UPC granting broad power to a domiciliary personal representative who files certain documents in the local state. Under section 4-204, if no local administration is pending, the foreign personal representative can file with the local court in a county in which the deceased had property (1) authenticated copies of his appointment, and (2) copies of his official bond if he has given one.[40] Upon filing these documents, the foreign personal representative may exercise "all powers of a local personal representative, and may maintain actions and proceedings in [the local state] subject to any conditions imposed upon nonresident suitors generally."[41]

The grant of "all powers of a local personal representative" to the foreign personal representative means that the foreign personal representative "has the same power over the title to property of the estate as an absolute owner would have . . . ." This power of the personal representative "may be exercised without notice, hearing, or order of court." The property, of course, is held in trust for the benefit of the creditors and other individuals having an interest in the estate.[42] Equating the foreign personal representative with the local personal representative also means that the former may have the power to "receive assets from fiduciaries, or other sources,"[43] and "prosecute or defend claims, or proceedings . . . for the protection of the estate . . . ."[44]

The Uniform Probate Code provides that the powers under sections 4-201 and 4-205 "shall be exercised only when there is no administration or application therefor pending in this state."[45] An application for ancillary administration terminates powers under the two sections to collect assets of the decedent and to exercise the powers of a local personal representative. However, "the local Court may allow the foreign personal representative to exercise limited powers to preserve the estate."[46] When a local personal representative is named, he then is "subject to all duties and obligations which have accrued by virtue of the exercise of the powers by the foreign personal representative and

may be substituted for him in any action or proceedings in this state."[47] This continuity in administration reflects the underlying policy of unifying estate administration which is found in the UPC.

Since there may be some confusion about the powers in this period of transition, the UPC protects a relying party by providing that:

> No person who before receiving actual notice of a pending local administration has changed his position by relying on the powers of a foreign personal representative shall be prejudiced by reason of the application or petition for, or grant of, local administration.[48]

5. Ancillary Administration

A. *Procedure*

Another method of dealing with the assets of a nonresident decedent, provided in the Uniform Probate Code, is ancillary administration.

Under the UPC the appointment of a personal representative can be sought first by persons given priority. These include:

(1) the person with priority as determined by a probated will including a person nominated by a power conferred in a will;
(2) the surviving spouse who is a devisee of the decedent;
(3) other devisees of the decedent;
(4) the surviving spouse of the decedent;
(5) other heirs of the decedent;
(6) 45 days after the death of the decedent, any creditor.[49]

It is clear that persons without priority may seek the appointment of a personal representative although only in a formal proceeding.[50] Should appointment be sought, then the local court must, if there are local assets of the decedent, appoint a personal representative and so open an ancillary administration of the estate. This ancillary administration will be instituted even though there is a domiciliary personal representative who has filed authenticated copies of his appointment and of his bond, if any.[51] This ancillary administration will probably be sought by someone other than the domiciliary personal representative since he can obtain all of the powers of a local personal representative

[50] *Id.* § 3-203(e). Formal proceedings are judicial and are covered by Article III, Part 4; Informal involve only the Registrar, § 1-401(11), and are covered by Article III, Part 3.
[51] *Id.* § 4-206.

without going through the procedures of informal or formal appointment.[52]

A non-domiciliary administration may be had where there is no administration in the place of domicile of the decedent. It is possible that a decedent might die with all of his assets outside his state of domicile or under circumstances so that there would be no administration at his place of domicile. This might happen, for example, in the case of an Iowa farmer who decided to retire to Florida. He might have a farm and equipment in Iowa—the bulk of his wealth—while his residence is in Florida. On death there might not be an administration in Florida, his place of residence, while there might be an administration in Iowa. This latter would be an ancillary, not domiciliary, administration.[53]

Ancillary administration under the UPC follows the general pattern of administration under Article III. There are, however, some points of difference. In an original administration there is a three year period of time within which the appointment of the personal representative must take place. This statute of limitation does not apply if there has been a prior appointment. If a personal representative has been appointed in one state, then additional appointments are possible under the UPC even though the three year period has run.[54]

The proper venue for the appointment of a personal representative is the place of domicile of the decedent. In the case of a non-resident there is no place of domicile in the state and the Code provides that the proper venue for an ancillary appointment is "any [county] where property of the decedent was located at the time of his death."[55] To solve some of the problems concerning the location of property, subsection (d) establishes some rules. It provides:

> A debt, other than one evidenced by investment or commercial paper or other instrument in favor of a non-domiciliary is located where the debtor resides or, if the debtor is a person other than an individual, at the place where it has its principal office. Commercial paper, investment paper and other instruments are located where the instrument is. An interest in property held in trust is located where the trustee may be sued.[56]

---

[52] *Id.* § 4-205. A decedent in his will may provide for different personal representatives in the domiciliary jurisdiction and an ancillary jurisdiction. The UPC will not interfere with such a decision. *See* §§ 3-203(g), 3-611(b). This multiple appointment will destroy to some extent the unity sought under the UPC. A provision for different personal representatives can be implemented in the ancillary jurisdiction only by a formal appointment. *See* discussion Sections 5 B and C text *infra*.

[53] *See* cases cited note 16 *supra*.

[54] UNIFORM PROBATE CODE § 3-108.

[55] *Id.* § 3-201(a)(2).

[56] *Id.* § 3-201(d).

In the proceedings brought for the appointment of a personal representative in a non-domiciliary jurisdiction the procedures set out in Article III, Part 3 (informal appointment) or Part 4 (formal appointment) would be used. Those seeking the appointment of a personal representative could choose either of the tracks, formal or informal.[57]

B. *Informal Appointment*

The informal procedure, involving only the Registrar, is not available if a personal representative has been named in the domiciliary jurisdiction. Section 3-308 provides that an application for informal appointment must be denied if it is indicated that

> the decedent was not domiciled in this state and that a personal representative whose appointment has not been terminated has been appointed by a Court in the state of domicile . . . .

This indicates that an ancillary appointment, where there is a domiciliary personal representative, can be obtained only in a formal proceeding under Part 4 of the UPC.

The basic provision concerning the application for informal appointment is section 3-301 which includes a requirement of disclosure of, among other things, the place of domicile of the decedent and "a statement identifying and indicating the address of any personal representative of the decedent appointed in this state or elsewhere whose appointment has not been terminated."

Section 3-307, dealing with informal appointment, includes a proviso that

> if the decedent was a non-resident, the Registrar shall delay the order of appointment until 30 days have elapsed since death unless the personal representative appointed at the decedent's domicile is the applicant, or unless the decedent's will directs that his estate be subject to the laws of this state.

This provision, that a domiciliary personal representative can be appointed an ancillary personal representative through the informal procedure, seems inconsistent with section 3-308 which states that informal appointment is not available for a non-domiciliary decedent where a personal representative has been named in the state of domicile A state adopting the Uniform Probate Code would probably wish to resolve this apparent inconsistency by either (1) clearly allowing an informal appointment under section 3-308 if the domiciliary personal representative is the applicant, or (2) deleting the exception for the domiciliary personal representative in section 3-307. It would seem

[57] *Id.* § 4-207.

that the first alternative is preferable. If a domiciliary personal representative is the applicant, there would seem to be little reason for requiring a formal proceeding.

The notice provided in the informal appointment of a personal representative includes notice to all persons having a prior or equal right to appoint. The priority concerning appointment is established by section 3-203 and this includes in (g) the following:

> A personal representative appointed by a court of the decedent's domicile has priority over all other persons except where the decedent's will nominates different persons to be personal representatives in this state and in the state of domicile. The domiciliary personal representative may nominate another, who shall have the same priority as the domiciliary personal representative.

Therefore, anyone seeking an ancillary appointment where there is a domiciliary personal representative would be required, by this section, to notify the latter of the applicant's intention to seek an informal appointment. As indicated above, this informal appointment would be proper only if there is no known domiciliary personal representative.

C. *Formal Appointment*

In the typical estate where there is a domiciliary personal representative recourse would (absent the change suggested above) be to the appointment of an ancillary personal representative through the formal proceeding involving a judge. Notice under section 3-403 must be given to

> executors named in any will that is being, or has been, probated, or offered for informal or formal probate in the [county], or that is known by the petitioner to have been probated, or offered for informal or formal probate elsewhere, and any personal representative of the decedent whose appointment has not been terminated.

So here, as in the case of informal appointment, notice must be given to the domiciliary personal representative if there is one.

The appointment in the formal proceeding is provided for in section 3-414. Reference in that section is made to the priority established by section 3-203 which gives preference to the domiciliary personal representative. Here, as in the informal ancillary appointment, preference is given to the domiciliary personal representative in an attempt to maintain the unity of the estate administration.

D. *Estate Administration*

Once the ancillary personal representative has been named, the provisions of Article III control and the administration follows the general pattern established by that article.[58] There are, however, some special provisions for ancillary administrations dealing with exceptional problems which may arise.

The UPC attempts to minimize conflicting adjudications where assets are located in more than one state. To this end, section 3-408 provides that an adjudication in the court of the state of domicile

> determining testacy, the validity or construction of a will, made in a proceeding involving notice to and an opportunity for contest by all interested persons must be accepted as determinative by the courts of this state . . . .

By so applying the concept of res judicata/preclusion the UPC again emphasizes the unity of the estate administration. Recognizing that some jurisdictions may not provide for the probating of a will, section 3-409 provides in part:

> A will from a place which does not provide for probate of a will after death, may be proved for probate in this state by a duly authenticated certificate of its legal custodian that the copy introduced is a true copy and that the will has become operative under the law of the other state.

This procedure, of course, does not rise to the level of the binding effect of section 3-408 where a will has been established. It does, however, provide a simple method of proving the document.

Where an ancillary personal representative has been named, other than the domiciliary personal representative, there may be a desire to unify the administration by having the domiciliary personal representative named in the ancillary jurisdiction. Section 3-611 (b) states in its last sentence:

> Unless the decedent's will directs otherwise a personal representative appointed at the decedent's domicile, incident to securing appointment of himself or his nominee as ancillary personal representative, may obtain removal of another who was appointed personal representative in this state to administer local assets.

Under this a domiciliary personal representative can oust any person serving as ancillary personal representative regardless of the sequence of appointment.

---

[58] *Id.* § 4-205.

During the course of the administration of the estate in the ancillary jurisdiction, the personal representative is under an obligation to notify creditors of his appointment.[59] Under the UPC the non-claim period, that time during which creditors must present their claims or else be barred, is four months, which runs from the date of the notice.[60] In the case of ancillary administration a serious problem arises where notice to creditors is given at different times in different jurisdictions. The problem of different statutes of limitations and different non-claims periods gave the draftsmen of the UPC a gr at deal of trouble. The final draft provides that any claims against the decedent's estate arising prior to the decedent's death are barred unless presented within the four-months' period, with the proviso that "claims barred by the non-claim statute at the decedent's domicile before the first publication for claims in this state are also barred in this state . . . ."[61] So if the non-claims provision has run in the domiciliary jurisdiction before the first advertisement in the ancillary administration, claims will be barred in both jurisdictions. This may seem to be unfair to the local creditor who has relied on the assets of the decedent available in the local state. However, he does have the right to initiate administration[62] and should do so to protect himself if it is not started promptly by those with superior priority.

If the first advertisement in the ancillary state should occur before the running of the non-claim period in the domiciliary jurisdiction, then claims are not barred. Some interesting possibilities may occur under this section. Assuming that a domiciliary personal representative has been appointed, knowledgeable creditors will file in the domiciliary administration. Should there be, however, uncertainty about a group of creditors, an attempt might be made to extend the period for filing by starting an ancillary administration and thus taking advantage of secti on 3-803(1).

A creditor, with sixth priority forty-five days after the death of the decedent,[63] can seek an appointment as a personal representative. This would have to be in a formal proceeding.[64] The creditor could attempt to time his appointment to come close to the end of the four-months' non-claim period in the domiciliary jurisdiction. A vindictive creditor

[64] Since a domiciliary personal representative has been named. See discussion at Section 5 C text *supra*.

could thus effectively extend the non-claim period for somewhat less than four months giving creditors who were unascertained or uncertain an additional period of time in which to file. This, of course, assumes the existence of assets of the decedent in the ancillary jurisdiction.

In the administration of the estate in the ancillary jurisdiction, the personal representative must recognize that "[a]ll assets of estates being administered in [the ancillary state] are subject to all claims, allowances and charges existing or established against the personal representative wherever appointed."[65] Should the assets in the domiciliary jurisdiction prove to be insufficient to pay homestead allowance, or family allowance, or exempt property allowance, then the assets in the ancillary jurisdiction would be used to make up the difference.

E. *Insolvent Estate*

The troublesome problem of the estate which is insolvent in a single state while solvent in other states has not been satisfactorily settled in the general provisions of the UPC. In the First Tentative Draft of the Model/Uniform Probate Code, dated July, 1966, in Part III, section 317, there was a provision dealing with an "insolvent estate transferred to federal bankruptcy court." This provision was included in section 3-112 of the Honolulu Draft, 1967, in the following language:

> Incident to a petition for supervised administration, if it appears that the estate is insolvent, the court may, upon petition of the principal creditor or creditors, order the proceedings transferred to the jurisdiction of the federal district court in bankruptcy, provided federal laws permit such court to administer an insolvent decedent's estate, and provided, further, that the rights of the surviving spouse and children of the decedent to homestead, family, and support allowances and to exempt property, are or can be protected in the process.

In the UPC there is no such provision concerning an insolvent estate. Section 3-815, however, does cover the payment of claims in case of insolvency. Under this section the family exemptions and allowances and prior charges are to be satisfied, and then all claimants whose claims have been allowed "either in this state or elsewhere in administrations of which the personal representative is aware" are to be paid equal proportions of his claim. The local jurisdiction in its distribution is authorized to balance out inequitable treatment given in another

[65] UNIFORM PROBATE CODE § 3-815(a).

state.[66] Section 3-815(c) sets forth a procedure to be used in a non-domiciliary jurisdiction when local assets available for the payment of claims are either greater than or smaller than necessary to pay the correct proportional share. If assets beyond the proper proportional share are available locally, these are to be transferred to the domiciliary personal representative.[67] Again, the unity theory which runs through this entire Code in its treatment of multi-state estates can be seen. The ancillary administraion does not stand apart from the domiciliary administration; rather the two are considered together.

F. *Final Distribution*

The provision concerning the final distribution of the estate in the ancillary jurisdiction also reflects the unity concept. This section, 3-816, provides:

> The estate of a non-resident decedent being administered by a personal representative appointed in this state shall, if there is a personal representative of the decedent's domicile willing to receive it, be distributed to the domiciliary personal representative for the benefit of the successors of the decedent . . . .

There are, however, exceptions to this general provision. First, if the decedent's will provides that his successors are to be identified "pursuant to the local law" of the forum state then the transfer of funds need not be made. Second, if according to the applicable choice of laws rules, the successors are to be determined "pursuant to the local law of [the forum state] without reference to the local law of the decedent's domicile."[67] One obvious application of this exception would be in the case of real property located in the forum state. Under the usual conflicts rule this property will pass according to the law of the state of situs—the forum state—and therefore the property would not be distributed to the domiciliary personal representative. The apparent reasoning is that if the law of the forum state is to be applied, the forum state should apply it.

A third exception to the transfer of funds to the domiciliary jurisdiction occurs when the local personal representative is unable to discover a domiciliary personal representative. If he cannot find a domiciliary personal representative through "reasonable inquiry," he has no duty to transfer funds. Finally, a court in a proceeding for

---

[66] *Id.* § 3-815(b).

[67] *Id.* § 3-815(c). This section was derived from the UNIFORM ANCILLARY ADMINISTRATION OF ESTATES ACT as amended in 1955. 9 UNIFORM LAWS ANNOTATED 69-70 (1957).

closing under section 3-1001, or in a supervised administration, can order local distribution or make any other order regarding distribution which it feels appropriate.[68]

6. Jurisdiction Over Ancillary Personal Representative

Section 3-602 provides:

> By accepting appointment, a personal representative submits personally to the jurisdiction of the Court in any proceeding relating to the estate that may be instituted by any interested person.

This section also sets out the procedure to be used in serving notice on the personal representative. By using the procedure set forth, service can be made on any personal representative, domiciliary or ancillary, named by a court of the state. Since there is a substantial contact between the individual and the state there would seem to be no constitutional question about the validity of the provision for service.[69]

7. Jurisdiction Over Foreign Personal Representative

Section 4-301 is designed to deal with the foreign personal representative who has not been appointed a local representative by the local court. The foreign personal representative who (1) collects funds as authorized by section 4-201, (2) files his authenticated copies of his appointment thereby getting all the powers of a local personal representative, or (3) does any act as a personal representative which would give the state jurisdiction over him as an individual, submits to the jurisdiction of the courts of the local state.[70] In the case of collection of funds, jurisdiction is "limited to the money or value of personal property collected."[71]

In all of these situations there seems to be a sufficient minimum contact so that it is reasonable for the state to exercise jurisdiction over the foreign personal representative.[72]

---

[68] Uniform Probate Code § 3-1001(a).

[69] McGee v. International Life Ins. Co., 355 U.S. 220 (1957); International Shoe Co. v. Washington, 326 U.S. 310 (1945).

[70] Uniform Probate Code § 4-301. Only a domiciliary personal representative can file authenticated copies of his appointment under section 4-204. Collecting funds under section 4-201 can be done only by a domiciliary personal representative; either a domiciliary or an ancillary personal representative could do acts in the state which might give the state jurisdiction over "him as an individual" thus giving the state jurisdiction over the personal representative.

[71] *Id.* § 4-301.

[72] *See* cases cited note 69 *supra*.

The UPC also provides in section 4-302, that "a foreign personal representative is subject to the jurisdiction of the courts of this state to the same extent that his decedent was subject to jurisdiction immediately prior to death." This provision covers the situation, for example, where the decedent, involved in an automobile accident outside the state of his residence, tortiously injured another person and died. Had the tortfeasor lived, the injured person would have been able to bring an action under the usual non-resident motorist provision.[73] Because of the death of the tortfeasor, a rather complex legal problem arises. Some states have held that they could not exercise jurisdiction over the person of the foreign personal representative even though he had been served in the forum state or had appeared in the proceeding. The theory seems to be that the person *qua* personal representative can be found only in the state of appointment and that only the courts of that state have any power over him.[74] The federal court sitting in Iowa, speaking to this point, stated:

> [A]n executor or administrator appointed in one state, cannot by voluntary appearance in an action in another state confer upon the court of such other state jurisdiction to render judgment against him in his representative capacity where there is no property belonging to the estate in the state where the action is brought.[75]

The court concluded that the Iowa provision for service on the foreign personal representative was invalid and that the court acquired no jurisdiction over the foreign administration.[76] Although there is some question about this judgment,[77] the Iowa General Assembly decided to use a different technique to reach assets of the non-resident motorist who is deceased.[78]

The more numerous group of states has decided that a state can exercise jurisdiction over the non-resident tortfeasor's personal representative named by another state. This is the path chosen by the UPC.[79]

The UPC, if adopted in the state of domicile of the deceased tortfeasor, would give the personal representative the right to defend when so served. Section 3-715 provides that a personal representative (here of the deceased tortfeasor) may "(22) prosecute or defend claims, or proceedings in any jurisdiction for the protection of the estate and of the personal representative in the performance of his duties." Section 3-703(c) also provides:

> A personal representative of a decedent domiciled in this state at his death has the same standing to sue and be sued in the courts of this state and *the courts of any other jurisdiction as his decedent had immediately prior to death.* (Emphasis supplied.)

This provision, being tied to the status of the decedent prior to death, is the complementing provision to that dealing with service on the personal representative under conditions when the decedent could have been reached immediately prior to death.

> The mechanics of service are covered by section 4-303 which states:
> (a) Service may be made upon the foreign personal representative by registered or certified mail, addressed to his last known address, requesting a return receipt signed by addressee only. Notice by ordinary first class mail is sufficient if registered or certified mail service to the addressee is unavailable.
>
> Service may be made upon a foreign personal representative in the manner in which service could have been made under other laws of this state on either the foreign personal representative or his decedent immediately prior to death.

The foreign personal representative so served is to be given at least thirty days in which to move or appear.[80]

8. Effect of Adjudication; Unity of Administration

The final section of Article IV provides:

> A prior adjudication rendered in any jurisdiction for or against any personal representative of the estate is as conclusive as to the local personal representative as if he were a party to the adjudication.[81]

---

[79] Uniform Probate Code § 4-308.
[80] *Id.* § 4-303(b).
[81] *Id.* § 4-401.

This general statement of res judicata/preclusion in connection with the administration of the estate is still another part of the general attempt to unify the estate administration. This not only provides that adjudications in the domiciliary jurisdiction will be preclusive: it also provides that an adjudication in any other ancillary administration will be binding. This binding effect includes both issue preclusion and claim preclusion.[82] Although there is no fraud exception specifically set out, it is obvious that an adjudication resulting from fraud or collusion would not be binding.[83]

9. Thrust of Provisions

An examination of the provisions of Article IV indicates that the draftsmen have hoped to achieve some very specific ends. First is simplicity in the handling of the assets of the estate outside the domiciliary jurisdiction. Second is the unifying of the administration to avoid conflicting fiduciaries or, more positively, to simplify and expedite administration. Third is the goal of centralizing all of the problems in the domiciliary administration by allowing suits against the domiciliary personal representative in a number of jurisdictions. The unifying of administration is promoted, finally, by the res judicata/preclusion effect to be given adjudications "in any jurisdiction for or against any personal representative of the estate."

All of these attempts of the draftsmen—to simplify, to unify the administration, to centralize the problems of the estate—if successful will make estate administration a much more attractive way of handling the passage of property from one generation to another.[84] In the multistate estate provisions of the UPC, the draftsmen have presented a document which deserves the careful consideration of the legal profession.

UNIFORM PROBATE CODE

Some Current Comments

BY H. IRVIN LAWRANCE

Vice President and Trust Counsel, Security Pacific National Bank, Los Angeles, Calif.

In August of this year, after several working drafts and seven years of study in cooperation with the Real Property, Probate and Trust Law Section of the American Bar Association, the National Conference of Commissioners on Uniform State Laws promulgated the Uniform Probate Code, and the House of Delegates of the American Bar Association approved it.

Some General Comments

The work of the Conference was conducted in cooperation with an American Bankers Association Trust Division Liaison Committee. The Conference work has also been followed with interest by several groups including the American College of Probate Counsel, which is interested for obvious reasons; the Veterans Administration, which is concerned over veteran guardianships; newspaper groups, which are concerned over the code's minimum requirements for published notice; and insurance groups, which are concerned over the code's minimum requirements for posting bond. These activities are evidence that the code has broad significance, and will be presented to various state legislatures in the very near future.

Professor Richard V. Wellman of the University of Michigan Law School addressed the Midwinter Trust Conference and the Mid-Continent Trust Conference on this subject in 1968. The text of these talks has been printed in *Trusts & Estates* [T&E, Mar. '68, p. 238 and Jan. '69, p. 29] and in *The Trust Bulletin*, thus offering trust men an excellent written overview of the code.

As Chief Reporter for the Uniform Probate Code Project, Professor Wellman speaks to our industry as an advocate—indeed a brilliant advocate—of the code. Today I intend to cover briefly the contents of the code, raise some questions and indicate some of the code provisions which may have an impact upon the corporate fiduciary. I should also like to speculate briefly upon the probability that the code will be accepted by the several states.

It is clear that legislation of this magnitude will generate controversy. For example, although it has many forward-looking features, it may not meet the required standards of all communities and although it is immensely well integrated, there is something in it to offend everyone.

The code consists of eight articles. Let me outline them briefly.

General Provisions And Definitions

Article I contains general provisions and definitions. It covers court jurisdiction and notice. Here the purposes and policies of the code are stated. The code expressly encourages simplicity, speed and efficiency in the administration of estates.

The probate court is given subject matter jurisdiction over all trusts, whether created by will or otherwise, as well as jurisdiction over estates of decedents and protected persons.

Article I provides a definite statute of limitations applicable wherever fraud is perpetrated in connection with matters covered in the code. These provisions are intended to replace various existing equitable remedies and limitations, such as the uncertain limitation embodied in the principle of laches. Action must be commenced against the perpetrator of a fraud within two years from discovery of the fraudulent act, and against non-perpetrators within five years from the time the fraud was committed.

For example, if a will known to be a forgery is probated informally—an option provided in the code, under which no notice is required—and the contest period runs, heirs may proceed against the perpetrator within two years from discovery of the fraud, but may proceed against innocent distributees only if action is commenced within five years from the time of the fraudulent act. The same limitations would apply where a will has been fraudulently concealed.

Treatment of Fraud

Let me pause here for a general comment. The code concept of fraud is new and reflects a basic approach, repeated in the code, to the effect that persons interested in a decedent's estate should be free to prove a will or not; commence legal proceedings or not; have a personal representative appointed or not—all in terms of whether or not they are willing to assume the risks involved.

The traditional legislative approach to probate administration, in contrast to this, has been one of more formality. And while this very formality has been criticized and even ridiculed, such formality was probably developed in an effort to insure that heirs and creditors, including taxing authorities, would always receive some kind of notice, and to make it clear that all interested persons were protected by the presence of a personal representative, responsible to the court as well as personally responsible in the administration and distribution of an estate.

In very general terms the code would now say: "Injured party, you have your remedy against those who take innocently and against those who perpetrate a fraud, but your rights as against an innocent personal representative will be strictly limited. We want personal representatives to act without delay and without fear."

In the same general terms I suggest that innocent distributees whose inheritance is later recovered by a superior claimant, and injured parties who attempt to collect personally either against perpetrators of fraud or in-

From address at 43rd Western Trust Conference, San Diego, Calif., Nov. 1, 1969.

nocent distributees, may well be expected to let go with a far more pertinent outcry against our legal system and how it operates than Norman Dacey ever considered. If property is improperly distributed, legal costs of recovery will certainly be high and the problem aggravated by the very real possibility that defendants may have disposed of their windfall by the time they are reached.

Moreover, I fear that the innocent personal representative may not be safe from attack as might be assumed. Faced with a difficult case, a court may well broaden its concepts of fraud in order to place responsibility for injury where the court, in retrospect, feels the responsibility should be placed.

As between an innocent personal representative and an innocent injured heir it is not beyond my imagination, for example, that a court might conclude that a personal representative should have known that formal rather than informal administration was called for because the latter is better designed to give notice; that some greater investigation was called for or that some other such thing tainted his acts sufficiently to constitute "fraud" so that he rather than the innocent heir should suffer.

Probate And Administration

Article II covers intestate succession, wills, rules of construction, the spouse's elective share and custody by and deposit of wills with the court. The code provides for deposit of an executed will with any court for safekeeping.

Article III covers probate of wills and administration. The code provides an option of informal or formal probate of a will. Administration is not mandatory, but a personal representative may be appointed, again either informally or formally. Regardless of how an administration is commenced problems may be referred to the court for hearing after notice.

Article III includes the Uniform Estate Tax Apportionment Act without change. Incidentally, there are other uniform acts embodied in the code. For example, Article II includes the Uniform Testamentary Additions to Trust Act. In this regard while California, for example, has adopted the Uniform Testamentary Additions To Trust Act, the tax apportionment act has met with strong resistance, primarily on the grounds that our existing apportionment statutes in California are workable and the ultimate test of any such legislation is its workability. Introducing a change in this respect has been and will probably continue to be troublesome.

Article IV covers foreign personal representatives and ancillary administration.

Disability—Power of Attorney

Article V deals with the protection of persons under disability and their property. This article introduces some new terminology. "Guardian" as here used is the term to define what we know as guardian of the person, except that there are certain specified instances in which the guardian may in fact handle the property of the disabled or incompetent person.

The word "conservator" is here used to define what we now know as conservator or guardian of the estate. That is, it is the conservator who is primarily responsible for managing the property of the disabled persons.

Article V covers powers of attorney. In this article the flexibility of a power of attorney is substantially increased in order to permit persons to do that which a number of them are already doing anyway. That is, the code would permit using a power of attorney beyond the time when the principal becomes disabled. Under the new provisions, if a power of attorney contains language to the effect that the power shall not be affected by disability of the principal, or that it shall become effective upon the disability of the principal, or similar words showing intent that the authority conferred shall be exercisable notwithstanding disability, then the authority of the attorney in fact or agent is exercisable by him as provided in the power.

Article V also contains express provisions protecting persons who deal with the holder of a power of attorney, which power might previously have been revoked or terminated, so long as they had no actual knowledge of revocation, death, disability or incompetency of the principal.

Non-Probate Transfers

Article VI covers non-probate transfers. Like Article V, it is designed so as to include within the probate code specific coverage of various will-substitutes which are being used. Article VI deals with bank accounts which are joint, payable on death to named persons, or bank trust accounts, such as *Totten Trusts*. Provisions are included in Article VI defining more clearly than any existing law the rights of the various persons named in such bank accounts. This article includes protective provisions for banks in dealing with survivors as well as creditors of the depositor.

Administration of Trusts

Article VII is entitled "Trust Administration." It is contemplated that the probate court, as defined in the

ATTORNEYS FIND US COOPERATIVE IN
PLANNING CLIENTS' ESTATES

MARINE MIDLAND GRACE
TRUST COMPANY OF NEW YORK

TRUST DEPARTMENT
250 PARK AVENUE, NEW YORK, N. Y. 10017

MEMBER FEDERAL DEPOSIT INSURANCE CORPORATION

code, would have subject matter jurisdiction over all trusts administered in the state. Article VII requires registration of a trust.

A trust is registered by the trustee in a court of the state in the county of the principal place of trust administration. This registration is not a registration of the trust instrument. That is to say, there is no need for filing a copy of the trust instrument with the court. What is required is a disclosure of the name of the settlor or testator, the date of the trust and, of course, the identity of the trustee. There are provisions in Article VII designed to coerce the registration of trusts and to smoke out a number of "Dacey Trusts" now in existence.

Under Article VII, resort to the court is possible for any number of reasons in order to resolve actual controversy and to end up with a binding order which will serve as some protection to all persons concerned. A trustee under this section may resort to the court for review and settlement of interim or final accounts.

It is clearly stated that neither registration of a trust nor proceedings under Article VII will result in continuing court supervision. It is also provided here that the management and distribution of a trust are intended to proceed expeditiously, consistent with the terms of the trust, free of judicial intervention and without order, approval or other action of any court.

Possible Shortcomings

I am not entirely satisfied with these portions of the code since a trustee who may submit accountings might well conclude for any number of reasons that he must submit accountings to the court for approval, if only to cut off contingent liabilities Moreover, I should think some attention would have been given to the possibility that an attorney might provide in a trust which he drafts that the trustee must submit periodic accountings to the court.

For the corporate fiduciary, I believe we generally agree that court accounting procedures are somewhat more costly than non-court accounting procedures. If we accept that fact, and then recognize that a number of inter vivos trusts contain express fee provisions, I can envision some profit squeeze here because of the code provisions.

Article VIII is the effective date and repealer section. As I said earlier the code itself is immensely well integrated. I might add here that it also overlaps a number of other statutes in California. I am sure the same is true in other states. It is also clear that one cannot automatically repeal an entire existing probate statute and expect the Uniform Probate Code to cover all subjects which were dealt with in the repealed law. For example, the existing California Probate Code contains clear provisions eliminating bond requirements for the corporate fiduciary. The Uniform Probate Code is silent on this subject.

Advantage of Flexibility

As mentioned, the code does embrace some forward-looking features. The flexible system of administration of decedent's estates, involving formal and informal probate, formal and informal administration, supervised administration and so on is the heart of the Uniform Probate Code, and is based on the premise that the court's role in connection with probate and administration, and the court's relationship to personal representatives, who derive their power from public appointment, is wholly passive until some interested person invokes the court's power in order to resolve a controversy. In other words, as stated in the code comments, the state, through the court, should provide remedies which are suitable and effective to protect any and all rights regarding succession, but should be restrained from intruding into family affairs unless requested to do so.

Role of the Corporate Fiduciary

I am not yet certain how the corporate fiduciary will fit into this flexible probate system. I anticipate, for example, that a certain amount of pressure may be brought to bear on the corporate fiduciary to proceed informally wherever possible on the assumption that this will reduce costs. The corporate fiduciary is of course also interested in protecting itself and never has a personal interest in the estate of its customers. The code, it seems to me, has been drafted on the assumption that the personal representative in many if not most instances *will* have a personal interest in the estate and for that reason be willing to choose his alternative courses with regard to what is best for him.

I am a little timorous here. Banks may be pressured into pursuing a course which would disregard the fact that some risk and exposure is involved, particularly in the no-notice, informal alternatives which are available and optional with the personal representative. I suspect, in other words, that banks would generally proceed with supervised administration, but I hesitate to offer this as a recommendation since it is contrary to the spirit in which the code has been drafted and offered to the public.

Code's Forward-Looking Features

Whatever may be said about the flexible system of administration of decedent's estates which is embodied in the code it is at least possible to say that this, since it is the heart of the code, is the basic forward-looking feature of it. What has been written in our industry journals already is sufficient to explain some of the other major features of the code. Following are some forward-looking features, selected at random for review, based on personal experience:

1. The code provides that no person is disqualified to take as an heir because he or a person through whom he claims is or has been an alien. Existing reciprocity statutes in the several states, including Oregon and California, have caused expensive legal controversy in an attempt to prove up the current law on this subject in some foreign country. We have evidence that this type of litigation is being conducted notwithstanding severe doubts as to the constitutionality of such legislation. The constitutional limitation is based on the assumption that such statutes force an excursion by a state into foreign affairs, which matters are basically entrusted to the President and Congress.

2. The code clearly covers matters of accession and ademption. The code provides that if properties specifically devised are sold by a conservator prior to a testator's death the devisee has the right to receive a general pecuniary devise equal to the net sale price.

Incidentally, the code defines the term "devisee" to mean any person designated in a will to receive a gift, whether the gift is of real or personal property, and thereby would wipe out a problem I have had, particularly with older trust men and lawyers, in selecting the proper words when referring to a bequest, a devise or a legacy. So far as accessions are concerned, the code is pretty good with respect to stock splits and other corporate distributions, including mutual fund reinvestments under a plan originated by the testator.

3. The code attempts to set forth a definition of what is meant by "surviving spouse" where there have been a number of marriages and divorces, some of which were invalid. These provisions are set out in the intestate succession and wills portion of Article II of the code and include, as an illustration, a statement to the effect that the term "surviving spouse" does not include a person who, following a decree or judgment of divorce which may not have become final, then participates in a marriage ceremony with a third person.

While I regard this as a forward-looking feature of the code, I am somewhat concerned over the fact that no effort was made to deal with this rather complicated subject in Article V, concerning the protection of persons under disability. In this connection we as conservator are faced with the problems of support which arise where a husband becomes incapacitated having left a trail of marriages and divorces in an unresolved state of bigamy and confusion.

4. The code expressly permits the conservator to examine the will of his conservatee when the same is in custody of a third person.

5. The nomination provisions are very broad. Even the conservator of the estate of a protected person may exercise rights of nomination. While I regard these provisions with optimism and hope I am sure that the various public administrators are already sharpening their ax on this subject.

Representative's Investment Powers

6. The investment powers conferred upon a personal representative of a decedent's estate are very broad. Again it is contemplated that these powers will be exercised in a fiduciary capacity and without submitting investment questions to the court.

Several months ago, one of my colleagues in the trust business who works in a state which permits unsupervised administration, severely chastised California trust men for not attempting to change the California law on this point. He stated his opinion very bluntly to the effect that complicated investment transactions should be resolved by qualified corporate fiduciaries and not be tendered to some judge.

7. The code contains separate provisions regarding personal representatives, conservators and trustees, to the effect that such fiduciaries are individually liable for obligations arising from ownership or control of property of the estate or for torts committed in the course of administration *only* if they are personally at fault. There has been a great deal of dispute on this subject which these code provisions would tend to resolve.

Conservator's Powers

8. I am particularly interested in the provisions of Article V regarding the powers of a conservator as well as powers of the court with respect to the affairs of protected persons. After hearing, and upon determining that grounds for an appointment or other

protective order exist with respect to a person, the court has for the benefit of that person all the powers over his estate and affairs which that person could exercise if present and not under disability, except the power to make a will.

These powers are stated to include the power to make gifts, to exercise or release a protected person's powers as trustee or personal representative, to enter into contracts, to create revocable or irrevocable trusts, and so on. Here for the first time we have in this proposed legislation recognition of the fact that trusts and other will substitutes do exist. I feel that the one major defect with most existing conservatorship and guardianship statutes is that they simply fail to contemplate that property will descend upon death of the protected person in any way other than by will or by intestate succession. It is curious to me, however, that while the court may create revocable trusts for the protected person it may not make a will for him or her.

Provisions Affecting Banks

With regard to banks, several provisions of the code should be studied carefully, including the following:

1. The code provides that an executor or administrator is entitled to reasonable compensation. It is entirely silent on the subject of attorney's fees. Enactment of the code would probably be followed by the informal adoption of a number of fee schedules or fee guidelines both for attorneys and for executors or administrators. I hope that the banks will be able to deal tactfully with attorneys and cooperate with them on this rather delicate point.

2. Bond is required under the code only if the court determines that a bond is necessary. This is true even where a will expressly requires bond. So long as the corporate fiduciary can obtain a blanket statutory exemption from bonding requirements, this type of provision may work to our benefit. That is to say, since the testator has no control over bonding he would, if the code were adopted, look to the corporate fiduciary as the best source of protection for his heirs. I personally prefer the bonding requirement even though testators in most cases waive bond. The reason for this is that all of us in this business suffer whenever any estate is raided and heirs suffer for lack of bonded protection.

3. I have already mentioned concern over the pressure which would be applied to banks to elect the informal, no-notice options available under the code. This pressure would probably be applied with the objective of keeping the costs down. As I stated before, this is where the representative has a personal interest as heir or as a relative of an heir who enjoys benefits under an estate. Banks never enjoy benefits under decedent's estates which they administer. Accordingly, the pressure to select the informal no-notice options would, under the code, present us with what is essentially a fee controversy right from the beginning.

Foreign Fiduciaries—Family Allowance

4. The provisions of the code regarding the conduct of trust business by foreign fiduciaries are of concern to me to the extent they permit foreign executors and administrators to act locally. The trust provisions of the code, however, expressly provide that a foreign corporate fiduciary may not administer trusts in a state unless it satisfies the laws of the state of administration relating to the qualification of a corporate fiduciary to conduct business there.

5. The family allowance provisions of the code authorize the personal representative of a decedent's estate to pay, as a lump sum or in periodic installments, a reasonable allowance for support of the surviving spouse of a decedent and his dependent children. This is a grant of discretionary powers, but the code does not specify what factors are to be taken into consideration in exercising such discretion.

The comment to this particular Code Section (2-403) does suggest the various factors to consider. I am nonetheless concerned since in the related provisions of Article V covering protected persons, and in particular Section 5-425, specific standards *are* set forth to guide the conservator in expending funds reasonably necessary for the support, education, care or benefit of the protected person. That is, he must pay due regard to the size of the estate, the duration of the conservatorship, a likelihood that the protected person may at some future time become able to manage his affairs, the accustomed standard of living of the protected person and members of his household as well as other funds or sources available for the support of that person. It is not clear to me why similar guidelines are not offered for the personal representative of a decedent's estate.

6. The code provides that any person may renounce an inheritance by a written instrument at any time within six months after the death of the decedent. This offers the heir an excellent opportunity to wipe out what may

be a creditor's only real hope of payment.

In addition, unless our tax laws were also revised, I question whether the various tax collectors would read this renunciation privilege literally. I suspect the heir would be taxed as if he received the inheritance, at least in those cases where this will produce a larger tax.

7. The code provides that a will may be deposited by the testator or his agent with any court for safekeeping, under such rules as the court may promulgate. This section should have been drafted after consultation with those who do accept wills for safekeeping. The expense to the public of this kind of safekeeping service may well turn out to be prohibitive. The draftsmen might have considered the court custodian in a large metropolitan area dealing with hundreds of thousands of wills, for any one of which an individual may be repeatedly asking the custodian to bring out her wills and all of her holographic codicils so that she can look them over for another change. I use the feminine reference arbitrarily.

Appraisal

8. The code provides that the personal representative will act as appraiser for his own estate. While payment of a percentage of the total value of an estate to an appraiser may be obnoxious to some persons, it is also true in some states that the appraiser not only determines values but also computes the tax, which computation in some instances is a highly complex and technical job for which percentage fees may or may not be adequate. Whatever the case may be, adoption of the Uniform Probate Code with this provision in it would probably necessitate revision of the tax laws of any state.

9. The code provides that where there are two or more co-representatives, any co-representative may receive and receipt for property due the estate. Problems can and often do arise where banks act with family members as co-representatives. These problems are sufficiently common so that I am completely unable to understand why receipt of both co-representatives is not required. In my opinion, this provision makes sense only if representatives are generally bonded, and since the bonding requirements have for all practical purposes been eliminated I fail to understand the logic behind this particular section of the code.

Reform—Two Sides of the Coin

Some of the facts of life which are suggested as a basis for reconsidering existing laws on the management and distribution of the property of deceased and incapacitated persons have frequently been discussed. These include increasing affluence in our society, the complexity of modern investment techniques, the frequency of second and third marriages, the diffusion of family members, which is a part of the population mobility which our society seems to encourage, and increased taxes.

Professor Wellman has admitted that a number of sections of the code do not necessarily have to be accepted in every state. This makes the Uniform Probate Code different from other uniform laws which have been offered. The historical distinction between the uniform laws and the model codes is that the uniform laws are offered with the idea that no local changes would be made, whereas model codes were simply offered as a sort of food for thought which could be borrowed in whole or in part as any legislature might see fit. Professor Wellman has described the Uniform Probate Code, however, as a form of uniform model act, or model uniform act, but in any case he concedes at the outset that some localization is to be expected.

So far as the opposing groups are concerned, I feel that the various newspapers might oppose the code because of its broad no-notice provisions, and the general elimination of required published notice in legal newspapers. I suppose the insurance industry will object to the reduction of bonding requirements. Corporate fiduciaries as well as lawyers, will probably fe[illegible] the code to some extent because it requires them to study and learn an entire new approach to what has been a bread-and-butter portion of their work. All of this would indicate that we may now be entering a period of public debate and controversy over the subject of estate administration and distribution, which has in the past been a very dull subject.

I feel that the code will attract some attention on the grounds that it aims to reduce the number of required contacts with the court, thus reducing public expense or at least freeing a judge so that he can handle other m ters. Today it seems that our appel courts are being forced to devote inordinate amount of time trying define and balance the rights of individual citizen as against those the citizenry as a whole. This ma it important that controversy rega ing property matters, including esta and trusts, be resolved at the low possible level.

While the code may be a step that direction, we should recogn that a skillful and responsible job administration also tends to red controversy. This is where our indus deserves recognition. We have don fine job, often notwithstanding the v ious probate laws, and I would ho that this new code will not be accep if it operates to minimize the sign cance of our work.

One burden that the commission have not borne in the code or in th comments, or even in the prior wo ing drafts of the code, is the burden proof to show why uniformity is n essary in all the areas covered by code. I can understand, for examp why a uniform law on the subject intestate succession is advisable. I c also understand the advisability of ha ing more or less uniform approach in the several states to the treatm of persons who are incapacitated. T is understandable from the fact th people do move and it seems absurd impose technical legal barriers up free interstate mobility.

I am unable to endorse the bli proposal that uniformity is a desiral end in itself. In connection with th uniform laws it is my strong feeli that one must first ask if the propos new law is really better than the exi ing law. In California a great deal h been done recently to up-date our pr bate laws. We now have some limit authority to invest estate funds if will so provides. The claim period h been shortened. We have a new pr vision covering powers of a testame tary trustee. These are just a few many changes which have been ma here. I consider the existing Californ probate system to be quite good a certainly not subject to the criticis which has been generally directed t ward probate law and practice.

If there are provisions in the co which would improve existing law th I suggest we consider those provisio only and accept Professor Wellma suggestion that this package be treat like a model code.

Uniform Probate Code:

Probate costs are high because of antiquated procedures lawyers must follow.

By Harrison K. Chauncey, Jr.

A certain Jarndyce, in an evil hour, made great fortune, and made a great Will. In the question how the trusts under that Will are to be administered, the fortune left by the Will is squandered away; the legatees under the Will are reduced to such a miserable condition that they would be sufficiently punished, if they had committed an enormous crime in having money left them; and the Will itself is made a dead letter.
CHARLES DICKENS — BLEAK HOUSE 1853

THE SAVAGE CRITICISM of probate practice that Dickens vented in *Bleak House* had little effect in Victorian England, but in our day the public is not so placid. Criticism of our probate courts is increasingly harsh.[1] Indeed, in some Florida counties our judges have warned us that we are killing the goose that lays the golden egg of probate practice.

There is no question that estate administration is costly. But it is arguable that one reason those costs are high is due to the antiquated, time-consuming probate procedures that lawyers must follow. If those procedures could be streamlined the estate would not be overburdened in costs and the attorney would not be forced to spend valuable time in unproductive paper-shuffling.

In 1963 (two years before Norman Dacey came upon the national scene) a group of lawyers in the American Bar Association who were deeply concerned with our probate practice urged and eventually obtained approval for a study of probate practice by the National Conference of Commissioners on Uniform State Laws and the ABA Section of Real Property, Probate and Trust Law. The object of the study was to suggest reforms to, and update the Model Probate Code which had been completed in 1947.[2] The result was the Uniform Probate Code, promulgated in 1969.[3]

The reporters of the National Conference first endeavored to pinpoint the manner in which our probate laws impeded the efficient administration of estates. They found that the problem was, in some respects, historical.[4] Our probate courts occupy a position uniquely American; that is they are administrative rather than judicial courts. In civil jurisdictions no public agency becomes involved in the administration of a decedent's estate unless disputes arise. The draftsmen also concluded that our 50 jurisdictions have developed a variation of procedures that have unduly complicated the administration of estates, especially in multistate administration.[5]

Also, it is clear that the laborious and expensive procedures adopted by the various states in the name of protecting the beneficiaries and creditors have overburdened the probate courts and unnecessarily postponed distribution to beneficiaries for a period of from two to four years.

The probate practitioner might retort that the procedures developed by the probate courts in America are important. There is need for the protection of creditors, heirs and beneficiaries and the laws that have been developed do these things. Laymen, however, do not agree. They simply say, "I want my wife to get my estate"—and they find a way to do it. For

Harrison K. Chauncey, Jr., practices law with a firm in Palm Beach. He is chairman of the Committee on Problems Relating to Persons Under Disability of the Real Property, Probate and Trust Law Section of the ABA. He is a graduate of Rollins College and of Duke University Law School.

Attempted Reform

example, 55 percent of all the land in Iowa was, in 1964, held as joint tenancies. Thirty percent of all savings accounts in New York in 1964 was held as joint tenancies. In 1965, shares traded on the New York Stock Exchange and valued at 48 billion dollars were jointly held.[6] The life insurance field has found it possible to merchandise various wealth-passing devices that avoid probate. And now the *inter vivos* trust is a favorite way to pass on property without a will and without subjecting a decedent's estate to probate procedures.

Although it may be that many of these probate-avoidance vehicles would have been successful no matter how little a lawyer charged or how simple probate might be, most fairminded members of the Bar will agree that there is an urgent need for reform in probate procedure. The draftsmen of the Code in promulgating it have suggested that a probate law flexible enough to serve a changing society is at least useful as a guide to probate reform in the various jurisdictions.[7]

Because the Uniform Probate Code contains more than 400 pages of typewritten text and combines in one code areas of the law now covered in many separate statutes, it would be impossible to discuss the entire work here in detail. About all that can be attempted is to give a general outline of the Code and highlight some of its more unfamiliar aspects.

Article I of the Code contains general provisions including definitions and the scope of probate jurisdiction of courts. It also codifies the present rules respecting fraud in estate matters.[8] Article II concerns intestate succession and wills. Article III gives the rules for probate of wills and administration of estates. Article IV is involved with foreign personal representatives and ancillary administration. Article V provides rules for protection of persons under disability and their property. Article VI governs nonprobate transfers. Article VII respects trust administration and Article VIII contains the repealer and effective date.

Four Changes in Florida

At least four substantial changes in Florida practice and substantive law would occur if the Code were adopted—and they would be controversial changes. The first is the concept called Code estate planning; the second is reform of widow's rights and the theory of the augmented net estate; the third is the new procedure for administering estates by revolutionizing (for Florida, at least) the probate practice rules; and fourth is the Code approach to ancillary administration. These four areas engendered much of the controversy during the drafting stages and certainly will continue to do so. Lawyers have been particularly vociferous in attacking the portions of the Code relating to descent and distribution and the Code estate plan.

Although present statutes on descent and distribution vary widely from state to state, the widow's share is usually less than half of the estate.[9] This type of intestacy statute seems to be totally unacceptable to the average American today. For example, in a recent study by sociologists and lawyers at Case-Western Reserve University, a survey of lawyers, laymen and trust men asked the question, "How would you wish your property to be left in the event you died without a will?" By far the majority of people surveyed indicated that they wanted all their property left to their surviving spouses.[10] Contrary to most state laws on intestacy that do not reflect the desires of the average person, the Code takes a new tack.

Spouse Gets Entire Estate

The Code would give the surviving spouse the entire estate if there is no surviving issue or parent of the decedent. The widow would receive the first $50,000 if there is surviving issue or a parent plus one-half of the balance of the estate. If there is surviving issue of the decedent but not of the surviving spouse, then the surviving spouse takes only half of the estate and the surviving issue takes the balance.[11]

The result of the provision is that many estates may be "Code probated." That is, no will would be necessary if a man wishes his spouse to receive one-half of an estate of $100,000. The full marital deduction would thus be saved and the interests of issue would be protected. It is obvious that a large number of estates in Florida would fall within this provision and it would make unnecessary many wills drawn today. It is therefore easy to see why Rich-

ard Wellman, chief reporter for the Code, found lawyers objecting to this provision of the proposed Code.[12] As might be imagined the draftsmen are accused of attempting to legislate lawyers out of business by providing a basic estate plan within the Code. This view not only makes the spokesmen appear to be grasping will-hoarders, it is also shortsighted for several reasons.

First, the average layman is keenly interested in probate matters and wants the substance and procedure of the practice reformed. Two surveys have been cited to support this. One survey was held in the 18th Senatorial District of Michigan where a state senator sent questionnaires to his constituents asking them to rank, in order of priority, 13 topics of possible legislative activity. Of the 500 returns picked at random from 3,500 responses the percentage of respondents indicating an interest in probate reform was topped only by concern about unsolicited credit card charges and cancellation of automobile insurance.[13] Another survey of a 35,000 member consumer organization in Detroit placed estate law reform second only to assistance in garnishment procedures.[14]

Second, the Code estate plan might actually enable the lawyer to use his time more effectively. Consider the relatively large amount of time the lawyer takes to draw a will for the small estate; and for which he can charge only a small fee. If the practitioner were able to avoid drafting the simple will and spend more time on complex estate plans for which he could charge a reasonable fee, both he and his clients might be better served.

Widow's Elective Share

Those who find the intestate succession provisions surprising will be staggered by the provisions dealing with the widow's elective share; it involves a concept known as the augmented net estate. To really understand the idea it is first necessary to understand what the draftsmen were trying to cure.

Suppose *T* has $1,000,000; and suppose that before his death he gives $600,000 jointly to *S1*, *S2* and himself. Then he gives away $200,000 to the community chest. He dies and his will leaves his entire probate estate to his wife. It also directs the executors to pay estate taxes from residue. In this case *T* could ignore the needs of his wife in giving the bulk of his estate to his sons and to charity, because in Florida dower extends only to personalty owned by *T* at the time of his death.[15]

Now suppose a different case. *T* gives $600,000 outright to his wife. He pays a gift tax and dies four years later leaving the rest of his estate, say, approximately $300,000 equally to his three sons. *W* elects to take against the will in Florida and she receives $100,000 of the $300,000. Of course, the sons' shares are burdened with the payment of estate taxes, administration expenses and debts. In this case the wife has used her dower privilege to obtain an unfair advantage and in the process, to destroy her husband's estate plan.

What would the Code do? Very simply, it gives the widow one-third of the "augmented estate." That is computed by adding to the value of the estate (reduced by the amount of claims, expenses and allowances) the sum of the following: (1) all *inter vivos* transfers by the testator to someone other than his wife including those in which he retained any life interest, control, power of revocation, or consumption or right of survivorship; transfers of over $3,000 to any one person within two years of death; and (2) generally all property derived from the decedent by the surviving spouse during marriage and owned by the spouse at the decedent's death, plus all such property transferred by the spouse during marriage to one other than the decedent.[16] The Code then directs that the wife's share be funded by deducting from one-third of the augmented estate all property comprising the augmented estate which has been transferred to her during the marriage, by the will or by intestate succession.[17] The balance, if any, is charged to the probate estate and other transferees of the decedent.

Although the fairness of the provisions respecting the augmented net estate must be admitted, there will be many instances in which the complexity of the device will generate extensive litigation. Collection problems also could be very difficult. Although the Code provides for collection in cases where estate assets are insufficient to fund the share,[18] the Code leaves some blanks that will need to be filled. For example, is income on transferred assets collectable? If so, for what period of time? Any legislature contemplating the enactment of the Code should weigh the prospect of extensive litigation against the basic fairness of the Code's approach to the widow's share

Independent Administration

Somewhat less complex than the augmented net estate, the concept of simplified or of independent administration forms the heart of the Code. It has been said that the purpose of independent administration is to provide a flexible system with as much or as little probate procedure as circumstances may require.[19]

The basic idea of independent administration is simple. The draftsmen assumed first that estate matters are administrative matters and not judicial. They also assumed that if there are no disputes and the rights of all persons are protected then court supervision of the administration of an estate is unnecessary.[21] But they also make provision for supervision of an estate when necessary or desirable.

For example, assume *T* dies and leaves a wife and three sons. His probate estate is $250,000 and his wife is named executrix. The wife

would proceed as follows: after five days from the decedent's death she may apply for informal probate before the registrar (the administrative official), which simply means that she files a short application with the registrar.[22] The will can accompany the application or be preproved or prefiled with the court. Upon the registrar's finding that the application is complete and verified and that the will appears validly executed, he will issue a statement of informal probate and appoint the widow executrix.[23] The executrix then administers the estate without the necessity of an appraiser by simply giving notice of her appointment and a copy of the inventory to the beneficiaries.[24] She publishes a notice to creditors and pays bills on the creditors' statements. No formal claims are necessary—although creditors may file such claims.[25] In general, the claims period expires four months from the issuance of letters.[26] At the end of the fifth month, the widow is free to distribute and file a sworn "closing statement" describing her administration.[27] After filing of the informal closing statement however, the widow is not discharged, but remains liable to creditors and interested parties for a period up to three years from the time of distribution.

This kind of simplified procedure would certainly eliminate much of the unnecessary and duplicative work incident to the administration of most moderate-sized estates, and that should be a welcome prospect. The problem, however, is whether the beneficiaries, contesting parties, creditors and even the fiduciary are adequately protected under the informal procedure.

Adequate Protection?

To illustrate, assume that *T* dies leaving his present wife, a former wife and a son by the former marriage who himself is a defendant in a divorce proceeding. (The example really is not that farfetched.) There is a probate estate of $500,000 and *T*'s widow and a bank are executors. The widow (and the bank) are worried that the son or the former wife or even the daughter-in-law might obstruct an informal proceeding, and perhaps contest the will.

Under the Code the executors may file a formal petition for probate asking that validity of the will be judicially determined and that the court (not the registrar) appoint the executors.[28] Upon the filing of this petition there must be notice to all heirs.[29] If the will is found to be valid, then (subject to a couple of exceptions) all right to contest it is terminated.[30] The executors, subject to the decision of the court, might then proceed in a variety of ways. On the one hand, the court might have found that the administration

should be supervised by the court; or, it may have found that non-supervised informal administration would be preferable. The executors could perform some administrative steps informally and operate under supervised procedure for others; or they could administer the estate as did the widow in the former example and then formally petition for an order of settlement and discharge.[31]

If the court is persuaded to continue the estate in supervised administration, all important administrative matters may, upon motion, be approved by the court.[32] There could then be an order entered for the payment of claims, orders of distribution, orders for any compromises and the executors would file formal accountings. After an accounting proceeding and distribution and discharge, any rights any creditor or party might have had would be foreclosed except in the event of fraud.[33]

Finding Administrators

One seemingly troublesome question that might arise under the Code concerns the availability of supervised administration; that is, the supervisory proceeding is possible only when the court finds it to be necessary or when the will so directs.[34] Some contend this tends to put the burden on inexperienced and, perhaps, minor beneficiaries to come in and ask for supervised administration. The draftsmen answer that is exactly where the burden belongs because the beneficiaries are the best ones to protect their own rights.[35]

Perhaps some middle ground is preferable in Florida. An ombudsman or guardian or the registrar himself might be a proper person (in addition to the beneficiaries) to initiate a petition for supervised administration at any point. It may be unrealistic to hope that a beneficiary or a court, on its own motion, will find supervised administration necessary and some other policing official may be necessary.

The above examples give only the barest, oversimplified outlines of the procedure available under the Code. The important administrative concept is, of course, that any degree of either independent or supervised administration is possible. There can be no doubt of the flexibility of the proposed procedure.

Similarly, it is wasteful to go through the motions of obtaining court orders if none is really necessary. On the other hand, our Bar might argue that Florida now has a form of independent administration; orders are obtained only when the executor wants or needs them and partial distributions are often made without order for tax reasons. Even final distributions are sometimes made on simple receipt and release.

Statute Needs Reform

Although it is common knowledge that our courts and lawyers often wink at the statutory probate provisions and do not follow them, it is submitted that this is a sign that the statute needs reform.

Even assuming the Code does not survive its legislative trip in Florida, it and the critics of our current procedure will have accomplished much by focusing critical public attention on outmoded procedure.

The portion of the Code which could cause a mild panic in some parts of Florida is that respecting ancillary administration.[36] The Code sets the sweeping tone of Article IV by defining a foreign personal representative as any "personal representative of another jurisdiction."[37]

The first right that the foreign representative has in Florida (without any qualification here) is the right to demand a Florida debtor pay a debt to the foreign personal representative.[38] Although this flies in the teeth of the usual jurisdictional or territorial limitations on personal representatives, many states expressly permit this as an exception to that territorial limitation.[39]

Foreign Fiduciaries

The bombshell for Florida, however, is the provision allowing a foreign personal representative to file authenticated copies of his letters in the ancillary state and then act in all respects in that state as a domiciliary representative in a local, informal probate administration.[40] This provision would permit foreign corporate fiduciaries to act in Florida. It would be understandable if New York, Illinois, California and a few other states with powerful, national trust companies should approve this provision but it is difficult to see how it could pass through the Florida Legislature unscathed—no matter how socially beneficial it might be.

These highlights of the Code are by no means all the important provisions. The articles dealing with trusts, wills and guardianship are equally new to Florida and in most respects are convincing efforts to solve in a practical manner many difficult problems besetting the lawyer who advises fiduciaries.

Last summer at the American Bar Association meeting in Dallas, Texas, the Code was recommended for adoption to the states. If the history of the Uniform Commercial Code is pertinent—it was promulgated in 1952—it will be many years before Florida finally adopts the Code. □

The New Uniform Probate Code

by Richard V. Wellman

The product of a long study and gestation, the new Uniform Probate Code now has been approved by the American Bar Association and is available to the states for study and enactment. The new code modernizes one of the oldest and most creaky institutions of the law—an institution whose shortcomings have been a source of embarrassment for the legal profession.

LAST AUGUST the House of Delegates of the American Bar Association approved the Uniform Probate Code. This action came a few days after the code had been approved by the National Conference of Commissioners on Uniform State Laws, which sponsored the code in a co-operative project with the Real Property, Probate and Trust Law Section of the Association. The completion of the code and its approval mark an extraordinary achievement by the American Bar Association and the National Conference. The accomplishment indicates that lawyers serving these national organizations faced and resolved doubts about the desirability and feasibility of a significant reform of state probate laws. Similar doubts will be entertained by other lawyers as the code is considered for adoption in the several states.

To some lawyers, our tradition of nonuniform, local laws for the administration of decedents' estates, guardianships and trusts is a complete reason for opposing uniformity in probate laws. Others are traditionalists in the sense that the *status quo* will be favored until persuasive reasons for changes required to achieve uniformity become apparent. The negative or skeptical attitudes of many lawyers regarding the project pose a handicap.

The size of the code and the pervasive and complex nature of its concepts present additional difficulties. The printed code with official comments runs to 275 pages.[1] The subject of property rights at death is terribly complex. In many states it is intertwined with community property concepts that will continue to cause interstate diversities affecting succession, though all states adopt a common code of probate. Many of the old rules, although possibly not justified by the current attitudes of laymen, appear suitable to lawyers as points of departure for planning and drafting. Subjects like restrictions on testamentary power, the rights of dependents and creditors of a decedent and the role of formalities in preparing wills pose the trap of interminable debate for anyone advocating abandonment of provincial rules in favor of some national norm. The investment that counselors and estate planners have in an education that enables them to live with the existing complexities seems threatened by change.

Lawyers interested in probate law improvement soon realize that their work will not be much noticed by the public. The development of the new code received little financial or moral support from any but the sponsoring organizations and their members. The work, which forced participants to take a close look at the details as well as the over-all functioning of the nation's elaborate probate institution, attracted little outside attention. Representatives of the Trust Division, American Bankers Association, watched the formative process carefully but, except for a general memorandum of approval issued last summer in regard to the fifth working draft, avoided any assertion of control or influence. The American College of Probate Counsel was interested but provided little leadership or encouragement. Ultimately, hundreds of lawyers and other interested persons acquainted themselves with the major premises of the code, which remained fairly constant through six preliminary drafts. Their familiarity, of vital importance to final approval of the code,

1. See the official text of the code and appended comments prepared by West Publishing Company, which was published in March, 1970.

came about largely because of the hard work of the Section of Real Property, Probate and Trust Law, accomplished through committees that worked closely with the draftsmen from the inception of the project.

Why, in spite of these obstacles, did the project manage to produce an officially approved code? Several reasons can be identified. Many are relevant to the prospects for widespread adoption of the Uniform Probate Code.

The most important is the concern all members of the legal profession share for the recent and widespread public criticism of the American probate institution.[2] Much of the biting commentary has been directed most squarely at practicing lawyers. Some of it has suggested that a conspiracy exists among courts, legislatures and lawyers which works to rob survivors of their inheritances. The discussion weakened public confidence in an important American legal institution. Focusing on an area lawyers themselves have long recognized as needing reform, the criticism called for action rather than words. The profession answered in the form of the Uniform Probate Code.

History of the Project Goes Back to the 1940s

But the code is much more than a mere response to embarrassing criticism. Its roots go back to the early 1940s and the careful work which culminated in 1946 with the publication by the University of Michigan Law School of the Model Probate Code,[3] a project of a special committee of the Probate Law Division of the Real Property, Probate and Trust Law Section. Although not conceived as a uniform code or officially approved by more than a small advisory committee, the model code was a major effort to bring some rational order out of our chaotic probate laws. It had a significant influence on probate code changes adopted in several states after 1946.

The Uniform Probate Code project originated with a move in 1962 in the Real Property, Probate and Trust Law Section to revise the earlier work and to encourage wider recognition of its recommendations. The move reflected growing professional concern about a continued provincialism in probate and represented an effort to take advantage of more than a decade of experience with the earlier code. Viewed together, the two projects represent a long-standing, forceful effort by national committees of lawyers to improve probate law.

The long history of the project and the renewal of activity in 1962 allowed participants to release their accomplishments in time to take some advantage of the probate publicity. The first tentative draft of the code, rushed to completion by two reporters in the summer of 1966, reflected the benefit of nearly twenty years of experience with the earlier model code and four years of committee discussions about how that code might be improved and extended. The fact that the project was able to produce a comprehensive draft as quickly as it did following the wave of adverse probate publicity was a source of important support and momentum for the effort. Also the demonstration of progress served in some states to delay proposals for quick legislative reaction to adverse probate publicity. It is hoped that the code now will be received for local study by committees that will give some weight to the time-consuming care with which it was prepared.

Major Premises of the Code Are Based on Experience

The research and experience gained from the Model Probate Code project and the discussions from 1962 to 1966 enabled the evolution of some major premises that have proved popular. These good ideas, which served to offset much of the initial skepticism about the project, form the major characteristics of the new code. Framing a package that will enable the profession to meet the legitimate demands of the public, they provide some additional basis for believing that the code may be well received by state legislatures.

The area of probate procedure posed the toughest challenge for the code's architects. Intertwined with widely varying ideas across the country concerning the appropriate status, power and function of local probate offices, procedures relating to decedents' estates are characterized by local eccentricities that contribute significantly to the inefficiency of the succession process. Except for Louisiana, our states subscribe to the idea that wills must be probated after the testator's death and that a publicly appointed personal representative is the appropriate authority to marshal assets for the benefit of creditors and successors of decedents. Having said this, one has described the only common threads in the practice existing in the fifty states.

Sometimes postmortem proof of wills occurs in an adjudication after

Richard V. Wellman has been a member of the faculty of the University of Michigan Law School since 1954. One of several reporters for the Uniform Probate Code, he served as chief reporter for the project after 1966. After receiving B.A. (1947) and J.D. (1949) degrees from the University of Michigan, he practiced law in Ohio before becoming a teacher.

2. The principal probate critics are Norman F. Dacey, author of *How To Avoid Probate*, and Murray Teigh Bloom, author of two *Readers' Digest* articles on probate and of the book, *The Trouble With Lawyers*.

3. The book, PROBLEMS IN PROBATE LAW, INCLUDING A MODEL PROBATE CODE, 1946, is better known as MODEL PROBATE CODE. The volume includes a model code and comments (197 pages), an appendix of statutory notes comparing the code with statutes and cases in all states (110 pages), and four important law review articles by Lewis M. Simes and Paul E. Basye. Copies of a reprint in paperback form are available from Legal Publications, University of Michigan Law School.

notice. Usually, but not invariably, it is linked with the appointment of an executor. Sometimes the appointment of a personal representative in intestacy involves an adjudication after notice. Administrators in some states and executors under well-drawn wills in a few others assume the role of unsupervised fiduciaries who have no purely statutory obligation to account to their appointing authority or other tribunal. At the other extreme, probate administration is frequently a tightly controlled affair requiring several hearings to enable superintending courts to satisfy themselves of full compliance with all rules.

The code offers a flexible system for the administration of decedents' estates. The purpose is to offer alternatives that permit the details of procedure to be determined by the needs of each estate, rather than to be dictated by state statute. Another objective is to create substantial opportunities for some sets of survivors to avoid any contact with a public office if no will or need for administration appears within a set number of years after death.

Under the code, wills are ineffective unless probated after death.[4] Whether or not a will is probated, the appointment of a personal representative is optional,[5] but successors will find that appointment will be a practical necessity if they wish to protect transfer agents and purchasers during the first three years after a decedent's death.[6] After three years, unsecured claims against the decedent and any proceeding for probate or appointment in regard to his estate are barred.[7] This period of limitation co-ordinates with a provision passing title to all estate assets at death, subject to probate and administration, and aids survivors who want to avoid all probate or appointment steps.[8]

Timely proceedings for probate, appointment or both may be informal, nonadjudicative and handled by a probate registrar, or they may be formal, with a judge of a court having the power of a court of equity to enter a final order after notice and hearing on relevant questions.[9] After appointment, a personal representative may proceed without further court or registrar activity, using statutory duties and powers and periods of limitation to accomplish all objectives of administration.[10] Or a procedure called supervised administration is available on petition, so that persons who see some advantage to keeping an estate "in court" until distribution may obtain their goals under the code.[11] Unless supervised administration is ordered, the appointing court or registrar has no responsibility to check or answer for the acts of the appointee.[12]

A galaxy of remedies is provided for individuals having interests in estates, however, so that there is little prospect that any personal representative will get away with illegal conduct offensive to others.[13] The unsupervised personal representative has full optional access to an appropriate court for resolution of any problem or for judicial review of his administration and discharge.[14] The code includes a jurisdictional system for making interested persons parties to any proceeding by mailed notice, so that the option of obtaining judicial review of any question involving an estate may be pursued without undue procedural difficulty.[15]

Flexibility of the System Is Attractive to Lawyers

Several aspects of this flexible system of administration make it attractive to lawyers. First, each of its features is based on a tested characteristic of some state's existing probate law. Only the combination is different, and even it is similar to procedures now available in Pennsylvania.[16] Second, the system will enable lawyers in a particular state or part of a state to handle estates as they are accustomed to handling them or to innovate with new combinations designed to lower costs or improve client relations. No one will be pushed into strange new practices. If changes in practice occur, it will be because estate counselors and their clients desire change. Third, the system will enable an efficient handling of estates that, in view of the successors' circumstances, are small enough to be free of serious risks for the personal representative. Once a mandatory waiting period of five days from death has passed, a probate and appointment can be obtained through informal proceedings that can be completed in a single trip to the courthouse and without the necessity of notices or citations to witnesses or heirs.[17] Only an affidavit procedure is involved, and full control of estate assets can be gained by one willing to assume a trustee's responsibility, and administration can be completed without any return trip to the courthouse once the registrar makes the appointment. The idea of having efficient procedures available for use in any estate that appears risk free to the personal representative and other interested persons has more appeal for lawyers than dramatic proposals to exempt all estates under $60,000 or some other arbitrary figure from all probate requirements.[18] A full array of effective procedures may be more important to some persons who have interests in a $25,000 estate than to others who share an estate worth hundreds of thousands of dollars.

Finally, the code offers viable alternatives to the tight control over estate procedures assumed by probate magistrates over the generations. It is frequently difficult at the state level to find officials accustomed to control who are willing to relinquish any authority. These officials have tended to dominate local probate law revision efforts to the point that many probate code reforms entail the addition, rather than relaxation, of expensive and mandatory requirements. The national

package, with a rational answer for every apprehension and the blessing of the American Bar Association, should help legislatures see that much of the probate bog is the result of the long-standing propensities of publicly elected probate officials to overemphasize the risks in estates administration to magnify their own role as public protectors. It remains to be seen, of course, whether legislatures will perceive the public interest in changes that reorder accumulated political power.

Should the Law of Intestate Succession Be Uniform?

Another sticky portion of the job of probate reform relates to the substantive law of intestate succession. What objectives justify a uniformity we have been able to do without? Why change the rules without good reason? The answers evolved by the project participants have favorable public relations implications for the Bar and wide practical appeal for lawyers whose clients, like most people of substance today, have business and personal connections with more than one state.

The code offers a respectable statutory estate plan for married persons of modest means. The principal feature of the code's scheme of exemptions is that approximately the first $15,000 of gross probate estate of a married decedent will pass to the surviving spouse ahead of creditors and the provisions of any will.[19] Intestate estate in excess of exemptions will pass entirely to the spouse unless it exceeds $50,000, or unless the decedent left issue by a prior marriage.[20] Common accident problems are avoided by a five-day survival requirement for heirs.[21] Modern considerations control the definitions of spouse and other takers by descent.[22] These features combine with the administrative system of the code, which treats administrators in intestacy exactly like executors and gives both offices the statutory power and protection necessary to permit efficiency in collection, management and distribution of estates.

The code reduces the pressure on married persons with modest estates to make wills in order to insure that the survivor will have full control of family resources. The many lawyers on committees controlling the project and others who reacted to the drafts were quickly in favor of this approach. Possibly they felt that the purpose of restoring confidence in a basic system for transmitting savings at death outweighed any possible advantage of a system that tends to force persons of average circumstances into law offices for wills. They felt that persons with estates falling within federal estate tax brackets would be moved by tax considerations to continue to support a high volume of personalized estate planning service.

The idea that the code offers persons of modest means a statutory plan having a potential for efficiency well beyond that of all highly touted will substitutes struck many as guaranteeing that the code would be popular from a political point of view. Without this broad appeal, the odds against getting the code's administrative system enacted over the protests of local politicians, who have vested interests in present systems, were heavy.

Standing alone, the idea of uniformity in the law of wills seems to many to be a good idea, but hardly worth fighting for. On the other hand, lawyers from metropolitan areas embracing two or more states tend to put the code's objectives of substantive uniformity and of unification of probate administration at domicile high on the list of reasons why the code should be vigorously supported.

Substantive uniformity in succession matters will depend on the general adoption of the code. In contrast, many of the code's ideas to enable unified administration of probate estates located in two or more states may be picked up by states that do not accept the entire code. One key procedure enables personal representatives appointed at the domicile of their decedents to secure authority to collect, sell and distribute local assets by local filing of their domiciliary letters.[23] Another involves submission to the jurisdiction of local courts by any nonresident who obtains local appointment as a personal representative.[24] The latter provision permits abandonment of residency requirements for executors and administrators, which have tended to complicate administration of multistate estates. Another section would require courts of enacting states to accept prior adjudications regarding validity and meaning of wills entered at decedents' domiciles.[25] Ancillary administrations remain possible under the code, but these and other provisions serve to reduce significantly the practical likelihood of multiple administrations.

A moment's reflection suggests that lawyers everywhere should applaud steps tending to make the will more suitable as an estate planning tool for the 1970s and beyond. If the will can be freed of procedural and stateline limitations, the advantages of its characteristics as a unilateral and ambulatory device tend, over time, to assure that it may again become the principal instrument for sophisticated estate planning. Lawyers are still much more closely associated in the public mind with the will than they are with other estate planning devices. Steps that tend to popularize the will tend to assure estate specialists of plenty of interesting work for the decades ahead.

Code Goes Beyond Subject of Decedents' Estates

The code ranges well beyond the subject of decedents' estates. It encourages, but does not demand, realignment of administrative and judicial responsibilities among public offices so that the judge who handles true adjudications relating to estates and other proceedings under the code will be indistinguishable from and ideally a part of the trial court of general jurisdiction.[26] Routine contacts required for every estate would be with local probate offices having the authority of the registrar described by the code. Other ways of allocating the public authority

contemplated are illustrated by the code and comments, however.[27] In short, it should be easy to fit the code's important features into almost every combination of probate office arrangement as now recognized.

In its coverage of guardianships and conservatorships, the code is best described as a collection of new, good ideas. There is virtually no dissent from the proposition that this badly neglected area of our state codes critically needs improvement, and the goal of uniformity supplies a needed catalyst to consideration of new ideas.

The code uses the term "guardian" to refer to what has been commonly known as a guardian of the person and "conservator" to refer to one who is concerned primarily with estate management.[28] Subject to veto power in the prospective ward, a guardian of a minor or an incompetent adult may attain official status by filing a written acceptance of appointment as expressed by the will of a parent or spouse.[29] When no one has the parental rights of a parent or guardian, or after removal of a testamentary guardian, the court may appoint a guardian for a minor or incapacitated person after notice and hearing. A conservator, who occupies a position much like that of trustee of all assets of a disabled person as it might be described in a well-drawn trust instrument, may be created only by court order in what are called "protective proceedings".

In protective proceedings, the court may solve an estate management problem without appointment of a conservator as, for example, by ratifying a minor's contract or ordering renewal of a lease or mortgage for a disabled adult, or it may determine that continuing management is necessary and appoint a conservator.[30] The proceedings are designed to handle cases in which a person disappears leaving dependents who should be assisted by use of his estate.[31] If a conservator is appointed, he may use statutory powers to manage and distribute the estate, and so avoid further contact with the court that neither he nor any person interested in the affairs of the disabled person desires or seeks.[32]

The code article dealing with the affairs of minors and disabled persons also includes various devices designed to eliminate many recurring reasons for guardians or conservators. One is a facility of payment provision which gives statutory protection to debtors of minors who make payment to parents and others as prescribed by the code.[33] Other provisions permit powers of attorney to be used as reliable sources of authority to manage the affairs of persons who may become incompetent after execution of powers.[34]

In general, the code avoids the temptation to straighten out the world of nontestamentary transfers at death and to co-ordinate it with that of transfers through probate. However, joint accounts, Totten trust accounts and related arrangements are the subject of a rather ambitious effort to strengthen these much-used arrangements and eliminate stateline booby traps. The general subject of joint tenancy is not touched by the code except indirectly through the position that a joint and survivor account should not be considered a joint tenancy at all, but merely a contract enforceable according to its terms, as far as the bank is concerned, and a valid mutual will which is good without probate between persons named as depositors.

The final article of the code deals with court procedures for testamentary and *inter vivos* trusts. Proceeding from the assumptions that many existing state laws require unnecessary and expensive qualification and accounting requirements for testamentary trustees and that frequently there is an absence of effective procedures for handling problems relating to *inter vivos* trusts, the article offers a common procedural system for both forms of trust. Under it, no trustee is under statutory compulsion to qualify or account in court for the affairs of the trust. However, there are provisions designed to establish a relationship between each trust and a court that is convenient to the trust's place of administration.[35] Either trustee or beneficiary may use that court as a forum for resolving issues which may require resolution. Orders are binding on the trust interests of all who are notified by mail of pending procedures.[36] The easy availability of optional court procedures will not embarrass the ability of trustees and beneficiaries who face no controversy to handle their business without making any court record indicating the assets, beneficiaries or terms of their arrangement.

Code Deserves Support

Lawyers will react with varying degrees of enthusiasm or dismay to the Uniform Probate Code. But the solid reasons that impelled hundreds of well-informed lawyers to urge and obtain overwhelming support from the House of Delegates for this most ambitious package of proposals should apply with more rather than less force to the question of local enactment.

The code offers an affirmative, balanced and long-range solution to the dilemma posed by our old and over-protective probate law. Its enactment should be accompanied and followed by a period of public education that should go far toward restoring public confidence in the basic institution of succession and in the lawyers who are so closely related to it. Many more lawyers than are involved in estate planning and probate work have been embarrassed by the controversy about our defective probate institution. The code gives them an answer to some serious problems that have proved to be practically beyond the power of individual state law reform efforts.

It remains to be seen whether most members of the legal profession have the ability to receive as well as give good counsel. If they have, the Uniform Probate Code may have a very significant impact on our state laws and the probate institution. If they have not, a tragedy of some dimension will occur if events prove that Norman F. Dacey was right when he said that lawyers would see that legislatures do nothing to correct probate law deficiencies.

THE UNIFORM PROBATE CODE: BLUEPRINT FOR REFORM IN THE 70's

*Richard V. Wellman**

INTRODUCTION

PROBATE law changes slowly. On August 13, 1969, the House of Delegates of the American Bar Association promulgated the Uniform Probate Code, completing a project which began in 1962.[1] The UPC project has been described as a continuation of an earlier effort by elements of the ABA to modernize and unify American probate laws which resulted in preparation of the Model Probate Code.[2] Viewing the two projects as one, the 30 plus years of effort to improve probate law may appear as an exercise in killing an unwanted idea by perpetual debate.[3] The Connecticut story, as told by other contributors to this symposium, is representative of the experience in other states where efforts to improve probate law have been frustrated by foot-dragging tendencies of local elements who derive power or profit from the old rules. An observer might well conclude that national efforts at probate reform would be more of the same.

But there is more to the new Code. Though it may not have been conceived for purpose of reform, the recent project matured in a period of unparalleled public criticism of the existing probate institution.[4] Also, the project was supported by both ABA committees

and the National Conference of Commissioners on Uniform State Laws. Bolstered by broad support, and challenged by the goal of framing rules meeting the diverse and idealistic demands of the Commissioners, the draftsmen sought to produce a truly useful guide to significant probate reform in the seventies.

And there are many reasons for believing that a forward-looking Code will be welcome on the state level. Widespread public discussion of probate law problems has resulted in the formation in many states of study committees charged with responsibility to recommend changes meeting on public concerns. UPC will provide conscientious committee members with a strongly recommended alternative to proposals from local probate officials whose control of probate rules has caused many of the current problems.[5] Practicing lawyers also are ready for a turnabout in probate law. The tendency for local probate officials to extend their responsibility through generation of more red tape for estates has been dominant too long. Consequently, existing legal requirements in many areas not only irritate the public but complicate settlement of quite modest estates to the point where someone, usually a lawyer, must work for very little or nothing if titles are to be cleared.[6] Also, the new Code probably would not have been promulgated were it not for a growing realization by the legal profession that its traditional monopoly in regard to estate services has been broken by the ever increasing array of popular devices for avoiding probate.[7] Streamlined probate procedure has become an important objective of law-oriented estate planners who must innovate constantly to keep abreast of client demands. Perhaps, there-

5. UPC's procedural package, though designed to reduce the traditional control by probate officials of decedents' estates, can be described as conventional for it merely offers, as options for use in every state, various procedures which exist today in the various states. *See* "Introduction to Article III", *Uniform Probate Code*, 34, (Prentice-Hall, 1969). [Hereinafter cited as UPC.]

6. Informal surveys conducted by members of the Committee on Professional Economics, Michigan State Bar Association, resulted in unpublished estimates that between 35 and 45 hours of professional time is required to handle the usual responsibilities of counsel for a personal representative in Michigan. It might be noted, however, that Michigan's probate code requires a minimum of three court appearances for the simplest estate.

7. *See* Wellman, *The Lawyer's Stake in Probate Reform*, 47 MICH. ST. B .J. 10 (1968), reprinted in 9 LAW OFFICE ECONOMICS & MANAGEMENT 415 (1969); Wellman, *The Uniform Probate Code: A Possible Answer to Probate Avoidance*, 44 IND. L.J. 191 (1969).

fore, three decades of talk about probate law improvement will produce results the public will find beneficial.

I. From Court to Complexity: The American Probate Problem

One confronted with the task of describing today's American probate institution is best advised to seek another approach or other employment. Happily, there is a way out. The legal situation has been so lightly touched by change in the twenty-three years since Simes and Basye prepared their careful analyses of probate laws, that their articles continue to provide an accurate picture.[8] It is one of disarray. There is general agreement that wills must be validated by probate after death to be effective to prove a bequest or devise,[9] and that creditors of decedents should seek their remedies against publicly appointed personal representatives.[10] But local procedures for probate of wills range from procedures involving little more than public deposit of a will, with appropriate, accompanying affidavits,[11] through various intermediates,[12] to formal litigation against every-

8. Simes and Basye, *The Organization of the Probate Court in America*, 42 Mich. L. Rev. 965 and 43 Mich. L. Rev. 113 (1944); *The Function of Will Contests*, 44 Mich. L. Rev. 503 (1946). The same articles appear in Problems of Probate Law — Model Probate Code (1946) at 385, 683. The latter volume is better known as Model Probate Code and this shorter reference will be used hereinafter.

9. *See* comment to § 85, Model Probate Code; T. Atkinson, Wills 503 (2d ed. 1953).

10. Louisiana adheres to the civil law view that acceptance of a succession by an adult heir makes the acceptor personally liable for the decedent's debts. LSA Civ. Code (Rev. 1950) Art. 1013. *See* Rheinstein, *European Methods for Liquidation of the Debts of Deceased Persons*, 20 Iowa L. Rev. 431 (1935).

11. In Texas, common form probate may occur on the strength of a petition accompanied by a deposit of a "pre-proved" will. A will may be pre-proved in the Texas Probate Code which became effective January 1, 1956, by attachment of an acknowledgement of the testator and affidavits of attesting witnesses in the form prescribed by § 59, Chapter 4, Vernon's Ann. Civ. St.. However, it appears that a probate magistrate in Texas may, in the exercise of discretion, decline to probate a will which has been presented to him.

12. Connecticut procedures involve probate after notice before one called a judge. However, any elector of a probate district, whether or not trained in law or licensed to practice, can be elected probate judge. Also, the notice may be "public" or "private". "Public notice" consists merely of publication. Gill v. Bromley, 107 Conn. 281, 140 A. 721 (1928). Indiana statutes patterned after the Model Probate Code direct that a petition for probate of a will shall be "heard forthwith" by the court or by the clerk if filed when the court is in vacation. Notice to interested persons occurs after probate and appointment of a personal representative. The new Iowa code gives the district attorney authority (which

one in the world.[13] Administration may be a dispensable procedure which affects testate and intestate estates only when unpaid creditors or title clearance considerations compel it;[14] or it may be inseparable from probate of a will in testate cases,[15] and it may be required in intestate estates to prevent opportunities for public administrators to take over.[16] Once commenced by appointment of an executor or administrator, administration may resemble a form of non-court trust in that the appointee is expected to proceed on his own to settle the estate in accordance with legal duties, with no more being required by or of the appointing or other authority unless some interested person petitions for relief.[17] More commonly the appointee is obliged to return for authority to take various steps required for estate settle-

---

may be exercised by the clerk) to order probate immediately upon receipt of a will and petition for probate. Testimony of one of the attesting witnesses is sufficient, and may be supplied by affidavit executed after the testator's death. Notice follows probate.

13. Illinois Probate Act, 1955 ILL. REV. STAT., Chapter 3, Par. 63, *et seq.*; LAWS ANN., § 702.21 *et seq.*

14. Careful analysis of the perils of attempting to settle estates by family agreement appear in Basye, *Dispensing with Administration*, 44 MICH. L. REV. 329 (1945). *See also* HASKINS, SMITH & GROSSMAN, PENNSYLVANIA FIDUCIARY GUIDE ch. 1 (1962).

15. ABA members from twenty-three states responded to a questionnaire prepared by the Committee on Administration and Distribution of Decedents' Estates which included a question about probate without administration. The respondents from twelve states (Col., Fla., Iowa, Md., Mo., N.Y., N.C., N.D., Ohio, Penn., Tex., Vt.) indicated that a will could be probated without appointment of an executor, while answers from eleven states (Ill., Kan., Me., Mich., Minn., N.H., Okla., Ore., R.I., Wash., Wisc.) indicated the contrary.

16. For example, Michigan statutes authorize the public administrator to petition for administration whenever it appears that the surviving spouse or kin have neglected to petition within 30 days after death. In practice, the power conferred appears not to be exercised frequently except where the decedent resided in a large metropolitan area and left no resident kin.

17. The text describes administration under a non-intervention will in Texas. *See* Marschall, *Independent Administration of Decedents' Estates*, 33 TEXAS L. REV. 95 (1954); Woodward, *Independent Administration Under the New Texas Probate Code*, 34 TEXAS L. REV. 687 (1956). "While he takes charge of and administers the estate of his testator without action of the county court in relation to the settlement of the estate, and may do, without an order, every act which an executor administering an estate under the control of the court may do with such order, he is uncontrolled, uninformed, unchecked and untrammeled by orders of the court, directing, informing or commanding what he shall do in the management and administration of the estate. He is an executor at large, exercising his own judgment and discretion, acting and doing what he pleases, unless brought to account for his actions by someone interested in the estate . . ." Altgelt v. Mernitz, 37 Civ. 397, 83 S.W. 891, 894 (Tex.Civ.App. 1904).

ment and the appointing authority is expected to review and approve accounts and make other orders deemed necessary to assure proper performance of the appointee's duties.[18]

Also, the public office controlling inheritances varies markedly from state to state in name and stature. For example, both New York and New Jersey confer original jurisdiction for probate of wills and issuance of letters on officials called surrogates.[19] However, the surrogate's office in New York has grown to become a powerful court with complete, original jurisdiction over matters involving probate and appointment,[20] while the New Jersey surrogate who is also clerk of the probate division of the county court, may handle only uncontested probates and appointments.[21] The New Jersey officer resembles Pennsylvania's "register of wills" in that both appear to perform approximately the same function once performed by the English "ordinary", who had little effective power other than to probate wills and issue letters.[22] Thus, neither New Jersey's surrogate nor Pennsylvania's register may entertain proceedings for approval of accounts. But, one must not conclude that the title of "ordinary" always signifies similar limitations on authority. Thus, Georgia uses this term for its probate official to whom it gives jurisdiction to handle common form and solemn form probates, proceedings for orders of sale and proceedings for review of accounts.[23] However, orders of the Georgia "ordinary" in contested matters are reviewable by trial de novo in the superior court.[24] Nor does the term "probate court" con-

18. In fifteen of twenty-three states covered by returned questionnaires, ABA members reported that personal assets cannot be sold by a personal representative without court order or express will-power. The same survey reports that a personal representative's final account must be approved before he can make final distribution. *Estate Administration: Current Practices and Proposed Uniform Probate Code*, 3 Real Property, Probate & Trust L. J. 143 (1968).

19. McKINNEY'S CONSOL. L. CONST. ART. VI, § 12(d), 3-A . . . STAT. ANNO., § 3-17. The term "surrogate" reflects the circumstance that the governor of the New York province held the probate authority exercised in England by the ordinary, which was exercised through delegates. A Dr. Bridges, appointed probate deputy by Lord Cornbury in 1702, seems to have been the first to use the title "surrogate". REPPY and TOMKINS, HISTORICAL AND STATUTORY BACKGROUND OF THE LAW OF WILLS 165. (1928).

20. *See* McKINNEY'S CONSOL. L., CONST., ART. VI, §§ 11, 12, 25.

21. N. J. STAT. ANN., §§ 2A—3-2, 3A—2-3.

22. PURDON'S PENNA. STAT. ANN., Title 20, §§ 1840.201, 1840.205, 1840.207; T. ATKINSON, WILLS 15-19 (2d ed. 1953).

23. GA. CODE ANN. (Rev. 1959) § 24.1901.

24. GA. CODE ANN. (Rev. 1959) § 6-201.

vey any meaning which can be safely exported from one state to another. For example, differences outweigh similarities when one tries to compare the Massachusetts' version with the organization carrying the same name in Connecticut. The former is a lawyer-manned court of considerable stature,[25] while the latter connotes a job for which any qualified elector in a probate district is qualified.[26] It goes without saying that activities of the two kinds of organization have quite different legal significance.

How can this jungle of procedures and organizations be explained? Obviously, the shape of probate rules in each state is rooted more in local history than in the English traditions regarding the subject which all states save Louisiana[27] have accepted. The old assumptions that wills should be publicly established after death, and that personal representatives should be publicly appointed or identified, have survived, to be sure. But the differences in these requirements as they exist today in the several states are so great as to suggest that the old ideas have served principally as a cover for more important considerations. The variety demonstrates that the dominant factor in growth of our probate institution has been the preoccupation of our legislative and legal community with the power represented by assets of decedents. The story of probate is a story of expansion and dispersal of this power among local politicians and the legal profession.

The variety of the country's probate offices and procedures also provides legislators who become serious about probate reform with a wide assortment of working models for comparison with local assumptions. Hopefully, comparative study will lead to reconsideration of a series of incremental judgments which the political and legal communities in some key states seem to have made with inadequate attention for any but their own concerns.

The complexity of the probate institution is, of course, a major reason for its perpetuation. Relatively few lawyers, including many who regularly handle simple estates, seem to be well founded in regard to the rationale and weaknesses of their own state's probate rules. Even fewer have had the necessity or opportunity to learn

about the laws of several states. There will be few improvements in the law in this area if the process of change requires many to grasp most of the procedural niceties of several states. The discussion must focus on some fairly simple propositions.

With full recognition of the risks of generalization, it is suggested that legislative discussion about probate reform should center around three major questions: (a) Is a "court" the appropriate agency to handle routine applications for probate and appointment? (b) Are routine probate and appointment orders properly viewed as adjudications which must conform to all requirements of procedural due process of law which might apply to a condemnation proceeding, for example? (c) Should responsibility for accurate and complete administration of decedents' estates be assumed by any state agency?

In areas where probate procedures and bureaucracies have ballooned to maximum proportion, each of these questions has been answered affirmatively.[28] Understandably, local experts in these areas are convinced about the propriety,[29] if not the necessity, of their complex systems. Nevertheless, examples from other states are available to show that different answers produce wholly satisfactory and vastly simpler results.

A. Courts as the Proper Agencies to Administer State Authority Over Estates.

It is unclear whether English ordinaries exercised much effective control over decedents' estates. Summaries of English probate history suggest a declining role which, at the time of formation of American colonies, probably was reduced to the point where it served to assure that authority over personal assets of a decedent passed to one who solemnly undertook to collect and distribute with full regard for rights of the decedent's creditors and family.[30] In recognizing and appointing personal representatives, ordinaries doubtless performed

---

28. States such as California and Illinois which confer probate jurisdiction on the court having general civil jurisdiction and whose probate procedures involve required, fully supervised administration for all but small estates, provide the best examples.

29. *See* Marshall, *Probate Code — The New Look*, 47 TAXES 139 (1969). *See also* 47 TAXES 244 (1969) for a reply to Judge Marshall's article.

30. *See* Bordwell, *An Introduction to Wills and Administration*, 14 MINN. L. REV. 1 (1929); Simes and Bayse, *The Organization of the Probate Court in America*, 42 MICH. L. REV. 965, 967-970. (1940).

a magistrate's role, but it seems inaccurate to bracket them with courts in the present sense of the term. In any event, judicial authority over estates and personal representatives seems to have been sufficiently diffused between the ordinaries, the law courts and chancery to provide fair assurance in most cases that no judge with significant authority could exert much unwanted control over an estate after the business of identifying the personal representative had occurred.[31]

In England, the awkward rule which attributed the title of a decedent's goods to his personal representative after appointment, probably worked well because of the role of the ecclesiastical authorities. The same rule created a troublesome gap in control of family assets when applied in colonies which sought to avoid a state church. Representatives of the civic authority appeared on the scene to remedy the problem.

In some American colonies whose probate history has been carefully reconstructed, early patterns indicate that although local delegates or magistrates had little to do with testate estates other than to receive proof of wills and inventories, they exercised virtually unlimited power over goods of intestates.[32] Understandably, law and organizations to enforce it grew to control this power which, in a

---

31. Simes, *op. cit.*, note 30, pp. 391-395.

32. Atkinson, *The Development of the Massachusetts Probate System*, 42 MICH. L. REV. 425 (1943). At page 436, the author reports as follows regarding the contents of an unpublished judicial notebook of a magistrate who served in what later became Springfield: "Pynchon's notebook confirms what may be found in the regularly organized courts. Proof of wills, grants of administration and exhibition of inventories were apparently necessary in all cases. Generally, further matters were settled by agreement without coming again into court, but if there were doubt, dispute or special circumstances the court would determine the matter. In an early case the court appointed commissioners to settle the executor's account; after confirmation of the report, the executor was discharged. Particularly in the division of small intestate estates there was the utmost judicial discretion and paternalism both as to the shares which each member of the family should receive and the time, form and manner of payment. The magistrates' notions of the welfare of the particular family seem to have been the sole criterion in many cases." *See also*, the account of the development of the law of probate and administration in New York by Surrogate Charles P. Daly (later Chief Justice), in Matter of Brick's Estate, 15 Abb. Prac. Rep. 12, 17-31. Concerning the power of local delegates of the governor to supervise the estate of intestates, Surrogate Daly notes, at p. 24,: "This power of supervising the estate of intestates was in consequence of a clause in the act of 1692, which provided, that where any any person died intestate, two freeholders of the town, to be annually elected, should inquire into the real and personal estate of the deceased, and make an inventory of it, and return it, under oath, to the person in the county delegated

community where wills probably were unusual,[33] must have been very obvious. Also, the circumstances were lacking which served in England to prevent the ordinary's jurisdiction over testamentary causes from becoming a self-expanding legal complex.[34] The local probate officials exercised the same state-delegated power as that of local magistrates exercising general civil and criminal jurisdiction. Only the reason for and the technique of exercise distinguished the probate official. The importance of their power increased as they asserted authority over wills and real estate like that formerly exercised by various tribunals in England. Imperceptibly, the assumption

---

by the governor to supervise the estate of intestates; that the persons delegated should cause the goods and chattels to be sold, retaining the proceeds for those who should appear and have a right to claim them . . ."

33. Some guess work about will-making habits in the seventeenth century can be based on data from this century. Various studies suggest that the tendency for persons to make and leave wills has increased markedly during the 20th century. Powell and Looker, examining the period from 1915 to 1929 found a steady increase. Among the jurisdictions studied, the range was from 25 percent testate in Cook County, Illinois, to 64 percent testate in Chelain County, Washington. Powell and Looker, *Decedents' Estates*, 30 COLUM. L. REV. 930 (1930). Studies relating to Dane County, Wisconsin, found testate cases accounting for 61.9% of estates in 1929, 45.9% in 1934, and 39.1% in 1944. A study of Cook County, Illinois records in the years 1953 and 1957 indicates that 58% of estates involve wills. Dunham, *The Method, Process and Frequency of Wealth Transmission at Death*, 30 U. CHI. L. REV. 250 (1962). A careful study, as yet unpublished, of Cuyahoga County, Ohio, probate records shows 69% of the estates to involve wills. Sussmah, Cates and Smith, "The Family and Inheritance" (1963 manuscript). It suggests also that testacy is positively associated with age (75% and up of all persons over 70 leave wills), marital status (single persons are least likely to have wills; married and widowed persons are most likely), and size of estate (median testate estate is $15,000 gross, compared with $6,000 for intestate; average testate estate is $41,218, compared with $8,599 for intestate.) Overall, this data suggests that except for the wealthy, will-making habits turn importantly on the amount of information persons have about probate laws.

34. The principal circumstance, of course, was that testamentary causes were under the jurisdiction of ecclesiastical courts which, from a relatively early date, declined in importance as the temporal courts grew in power. As explained in Bordwell, *Introduction to Wills*, 14 MINN. L. REV. 1 (1929), this eventually resulted in a situation where the tribunal which touched every estate served effectively only to accept proof of due execution of wills and to issue letters of authority to personal representatives. The Law Court's writ of prohibition prevented the ecclesiastical court from exercising authority over executors and administrators. Eventually, the court of Chancery developed effective procedures to handle problems involving administration and distribution of estate, but it asserted jurisdiction only in those cases brought before them by proper pleading of an interested person. *See also* SIMES AND FRATCHER, CASES AND MATERIALS ON FIDUCIARY ADMINISTRATION (2d ed. 1956) at 12-18 and authorities cited.

grew that agencies handling routine probate matters should be thought of as specialty courts, having within the range of the subject matters assigned to them approximately the power of any court of general jurisdiction.[35]

The notion that routine probates and grants of administration are properly the business of an office which is, or aspires to be, a court in the usual sense of the word is at the root of most of today's probate complications. Of course, lawyers have not questioned the connection, for the presence of a court creates a service monopoly protecting lawyers, not only from other specialists, but from survivors themselves.[36] Even though required estate procedures in a given state have remained or become minimal, the routing of every estate to an office resembling a court leaves the legal profession pretty much in control of the situation. The arrangement would be acceptable were it not for the historic tendency of judges and lawyers to serve each other's need for function and status, a tendency which has been particularly obvious in probate matters. Here, public ignorance and dispersal, distaste for death planning and lack of concern by survivors about pre-receipt erosion of inherited assets have left an open field for those who would emphasize, rather than minimize, the need for expensive safeguards. The assumption that a court is the proper agency to handle essential services to decedents' estates undoubtedly contributes to pyramiding legal requirements.

What is the alternative? In England, the modern system enables persons interested in estates to apply in person for letters to any of 26 District Probate Registries, or in cases of estates of small value, to any of 374 customs and excise offices.[37] If a solicitor is involved, a mailed application suffices.[38] Two-thirds of approximately 300,000 grants of probate per year are made in District Probate Registries which, as of the time of Professor Fratcher's careful report, were manned by a total of seventeen District Registrars receiving annual salaries in the £3,550 to £4,100 range.[39] The systems in Pennsylvania and New Jersey bear some resemblance to the English system in that

the fundamental steps of probate and appointment are handled by a statutory official who, though connected to a court having jurisdiction over estates, acts on his own in routine cases.[40] In both states, the power of the magistrate is sharply limited so that he has a relatively minor role in contested cases, and no responsibility to review acts and accounts of his appointees. The probate offices in these states constitute a standing contradiction to any assumption that a modern state must interpose a powerful court between survivors and the estates they would claim.

B. Probate and Appointment As Adjudications Requiring Notice

The initial step in administration of a testate estate is to secure probate of the will. If there is no will, the appointment of an administrator starts things. The English procedures first followed in the early colonies included common form probate,[41] which is generally understood to permit wills to be proved and appointments to be made without notice to interested persons, delay or elaborate proofs.

Traditionally, orders so obtained have not been accorded the respect or finality accorded orders entered in ordinary judicial proceedings, but they have served an obvious purpose in situations in which there was no contention.

Early intestate administrations differed somewhat in that the probate magistrate through his appointees seems simply to have taken charge of intestate estates coming to his attention. The notion that appointment of an administrator in intestacy involves a finding that there is no will was a much later development which is still incomplete.[42]

ANN. §§ 1840.201, 1840.207. *See also,* HASKINS, SMITH & GROSSMAN, PENNSYLVANIA FIDUCIARY GUIDE (1962) §§ 3.4, 3.14, 3.15; Straus, *The Uniform Probate Code Approved: A Bold and Progressive Reform,* 41 PENN. B. ASS'N. Q. 71 (1969); Hauptfuhrer, *The Uniform Probate Code — A Modern Approach for Pennsylvania,* 41 PENN. B. ASS'N. Q. 79 (1969).

41. Simes, *The Function of Will Contests,* 44 MICH. L. REV. 503 (1946).

42. In Michigan, for example, a later discovered will cannot be probated after an estate has been settled and closed under a prior will and normal periods for vacation and delayed appeal have passed. But, if the estate was distributed as intestate after a finding that there was no will, there appears to be no time limit on proceedings to probate a later discovered will. This curious situation is attributable, in part, to a statute which provides for revocation of letters of administration incident to probate of a later discovered will. *See* In re Broffee's Estate, 206 Mich. 107, 172 N.W. 541 (1919); Young v. Young, 200 Mich. 236, 167 N.W. 23 (1918). *Cf.* In re Butts' Estate, 173 Mich 504, 139 N.W. 244 (1913).

In both New York and Massachusetts, common form probate simply disappeared as the estates court grew in power and stature.[43] Presumably, the office holders aided their evolution toward the status of powerful judges by adopting procedures like those followed in regular courts.

Common form probate still exists in some states as an optional method of establishing a will or initiating an administration.[44] In many, the choice between notice and no-notice procedures gives successors some control over the time when the probate order becomes conclusive.[45]

Following the lead of the Model Probate Code, several states have accepted the idea that probate of a will initiates a continuous court proceeding which is not concluded until entry of an order approving final distribution and discharging the personal representative.[46] The logic of this approach permits notice of probate to be given after administration has been commenced, for until the closing order, the position of those who would take in the absence of a will is not finally determined.[47] The system offers significant advantages over that of

---

43. *See* Surrogate Fowler's account of New York history involving common form probate in In re Hock, 74 Misc. 15, 129 N.Y.S. 196 (Sur.Ct. 1911). Atkinson notes that early probate laws in Massachusetts provided very little guidance concerning the necessity and manner of notice of proceedings before probate magistrates and lists the present notice requirements under the heading "Modern Developments". Atkinson, *supra* note 25, at 442 and 449. In *The Function of Will Contests, supra* note 41, Simes suggests that the abandonment of the English system of ex parte probate by many jurisdictions may have been due to extension of probate court jurisdiction to land as well as to a tacit assumption that due process requires that interested persons be given advance notice of orders affecting them.

44. Simes, *supra,* note 41. The Codes of New Hampshire, Indiana, Missouri and Arkansas have been changed in regard to notice since publication of the Simes article.

45. The Florida procedures described by Simes provide an example. Simes, *supra* note 41. *See also* GA. CODE ANN. (Rev. 1959, Supp. 1969) §§ 113-601, 113-605; 12 DEL. CODE § 1310.

46. The Codes of Arkansas, Indiana, Iowa and Missouri provide examples.

47. MODEL PROBATE CODE §§ 64-81. The Code enables will proponents to use a prior notice probate proceeding to shorten the time available for contestants to raise all objections except revocation by subsequently discovered will. Under § 81, the order of probate or grant of administration remains vulnerable to proof of another will "not theretofore presented to the court" which is offered "prior to the decree of final distribution." If the estate was opened on an assumption of intestacy, the order may be vacated for good cause under section 19 at any time prior to the expiration of the time for appeal from the closing order. The effect of these provisions is to require full administration and closing of an estate as a

states which require notice to all interested persons to proceed entry of an order of probate or determining intestacy. The tactical position of trouble-making heirs is enhanced very considerably when, as is true in many prior notice states, only special administrators with quite limited powers can be appointed to manage the estate pending entry of the order of probate.[48]

Nevertheless, the cost of probate or appointment without prior notice to interested persons is too high when the package includes a

---

condition to complete finality of an order of probate which was entered after full notice and hearing. The authors offer the following observations which tend to justify the Model Probate system:

> As to noncontentious matters, the situation may be different. Here it is conceivable that the estate could be distributed without any judicial intervention at all. Indeed, the Roman law system, with its conception of universal succession, accomplished just that. And the modern tendency of legislation in the United States to dispense entirely with administration in the case of small estates is to the same effect. Nevertheless, there are many cases where some judicial action is desirable even though there are no controversies among the interested parties. This becomes particularly important in view of the current trend, elsewhere noted, to provide that the probate court distribute land by its decree. In spite of the lack of disagreement among persons interested in the estate, they may well need the aid of the court to determine what is a just basis of distribution; they may wish to distribute in such a way as to avoid disputes in the future; and, to further that end, they may desire to have an official record of the distribution which has been made. Thus, the noncontentious business of the court is an important function of the judicial organization. No statistics are required to justify the observation that the vast majority of smaller estates is handled by American probate courts without any controversies whatsoever. Administration in court is then desired solely for the purpose of having the property of the decedent disposed of in an orderly way.

48. Prior notice of probate is required in Massachusetts and New York, as well as in many other states. The following appears in Report No. 3.3A, N.Y. Commission on Estates 2d Report (March 31, 1968) at 60:

> In a large number of cases on the probate trial calendar, the person who files objections to the probate of the will has no reasonable basis to expect any measure of success in the contest except that which may inure to him because of his ability to delay the administration of the estate. Estate representatives and beneficiaries are frequently willing to pay the nuisance value of a contest in order to avoid delay and even greater expense. We believe that a grant to an estate fiduciary of an authority somewhat greater than that possessed by an executor will speed the administration and reduce the number of feigned objections. One of the advantages of probate in the common form is said to be its discouragement of groundless probate contests. That is an objective which would save much time and money for the people of the State.

The new provisions governing the appointment of temporary administrators in New York appear at § 901 *et seq.*, SCPA (McKinney, 1967).

requirement of court supervision and closing of every estate. A more flexible concept works quite satisfactorily today in Pennsylvania and New Jersey where probate and appointment by limited power magistrates may initiate administrations which need not be closed by court order.[49]

It may be contended that an order determining the validity, invalidity or absence of a will denies procedural due process if it is entered without prior notice to interested persons.[50] The concern is valid if it is also conceded that a probate settlement necessarily involves an adjudicative process resolving recognized private rights. The steady self-induced growth of local probate magistrates toward the position of powerful judges has gone hand in hand with development of probate as a court proceeding.

The Model Probate Code, reflecting the drive of three decades ago to organize and rationalize the existing situation rather than the current concern about probate simplification, added impetus to this view.[51] Serious efforts to simplify probate must involve review of these developments, for the cost of the courts and lawyers necessarily involved under an adjudicative approach is simply more than the public should or will tolerate. The English system[52] as well as those presently working in Pennsylvania and New Jersey point to a better

---

49. *See* HASKINS, SMITH & GROSSMAN, PENNSYLVANIA FIDUCIARY GUIDE (1962), for a discussion of Pennsylvania procedures. *See especially* §§ 4.8 and 15.2. For New Jersey, *see* the authority referred to in note 40.

50. *See, Informal Proceedings Under the Uniform Probate Code: Notice and Due Process*, 3 PROSPECTUS 39 (1969); Comment, 53 IOWA L. REV. 508 (1967).

51. The Model Probate Code originated in the Probate Division, the Real Property, Probate and Trust Law Section, American Bar Association. Professor Simes used research resources of the University of Michigan Law School to secure assistance for the project and the same resources made publication of the volume possible. In conversations with the principal participants, the author has formed the impression that the earlier project had to be cut along very conservative lines in order to achieve any degree of success. These observations are not offered as criticisms. Surely, the Uniform Probate Code project could not have succeeded without the earlier effort. UPC originated with a proposal to update the MODEL PROBATE CODE and the careful statutory research and analysis of the '40's relieved the participants in UPC from the awesome obligation of combing the current codes of fifty states to achieve legitimacy. In this connection, it should be noted that Professor Simes has served on the ABA committee which has guided the current project. Also, during the summer of 1966, as a special consultant to the project, he reviewed the first tentative draft. Professor Basye, a major participant in the earlier project, had much to do with origination of the UPC project, and served as a Reporter.

52. *See* Fratcher, *supra* note 37.

way. The failure of the New York Commission on Estates to recommend common form probate as a part of its sweeping revision of New York laws and procedures was disappointing, evidently even to some of those involved.[53] In the absence of better explanation, it must be attributed to the fact that surrogates and former surrogates controlled the effort.[54]

---

53. The following paragraph opens a report entitled, "Simplification of New York Probate", prepared by staff assistants of the New York Commission on Estates which is published in the Second Report of the Commission (1963) at 60: "Many of the advisory committees suggested to the Commission that it recommend to the Legislature the adoption in New York of one of the variants of probate in the common form. The Commission studied the proposal, heard extensive argument, and voted not to approve probate in the common form. Undoubtedly those advisory committees and individual lawyers who recommended the adoption in this State of the so-called simple probate, were motivated by a desire to simplify our probate procedure and to reduce delay and expense. Many other lawyers and legal groups that were unwilling to go so far as probate in the common form, have also suggested that present procedures be simplified, made less expensive and more expeditious. They have also suggested that provision be made to reduce the large number of probate contests that have no real merit and are prosecuted solely for their nuisance value. At the request of Chairman Bennett, your Committee on Simplification of New York Probate was organized. We accept the decision of the Commission which disapproved probate in the common form (although some members of your Committee favor it), and we take that decision as our starting point."

54. Eight of fourteen of the original Commission were surrogates or former surrogates. (First Report (1962), at 9). The more than 3,700 pages of printed reports of the Special Commission contain rather extended reports about various matters of narrow importance, such as the 35 page report about nuncupative and holographic wills. The subject of common form probate was not overlooked. Indeed, it was identified by a paragraph in the first Report which concluded: "The study of simple probate, or probate in common form, is therefore of high priority". (First Report, (1962) at 25). Other notations in the voluminous reports indicate only that the matter was "tabled" at a Commission meeting on June 22, 1962, after a single meeting on May 31, 1962, between a former surrogate who represented the Commission and members of the New Jersey and Connecticut bars who were invited to explain their state's version of simplified probate (Second Report (1963) at 3). Surely, in view of the extensive staff reports on other rather esoteric matters, the Commission did *not* accord the topic "high priority" in any sense other than the speed with which it was dropped as a study topic.

The disappointing performance of the Special Commission in the area of probate simplification surely reflects the fact that surrogates dominated the Commission. Indeed, it may be more than coincidental that the legislation authorizing the special commission was enacted by the same 1961 session which produced two bills permitting proof of wills by affidavit. The bills passed both houses but were vetoed by Governor Rockerfeller who appears to have accepted arguments by the Surrogates Association which urged that proposals for probate procedure changes be deferred for study by the Special Commission then being recommended. *See* N.Y. Legislative Annual, 1961, at 589; Report 3.3A, Second Report (1963); Com-

C. Public Office Responsibility for Acts of Personal Representatives

Perhaps the most awkward heritage of the American tradition of permitting probate courts to grow just as probate judges and compliant lawyers have thought best is the concept of supervised administration. The notion is accepted in most states that the personal representative handles the business of administration as if he were a receiver in a closely watched proceeding to wind up the affairs of an insolvent debtor. Necessary administrative steps are the occasion for required orders, such as orders regarding appraisals, support payments to dependents, payment of claims and distributions. The responsibility of the personal representative is not ended until he submits his final account to the appointing authority and receives its order of discharge.[55]

In some states which have made maximum use of the logic that an estates court should have power to handle all estate matters formerly handled by the law court or chancery in England, the land of the decedent is included among assets for which the personal representative is responsible in routine cases.[56] In these states, full administration and settlement of estates involving land becomes a necessity from the standpoint of the land title examination specialists as well as from that of probate bondsmen, and probate court officials.

Most of the aspects of probate which the public has learned to identify and dislike in recent years are facets of supervised administration. Statutory time schedules, designed to give appraisers, personal representatives and creditors decent opportunity to attend to necessary steps or file claims, become impediments to quick settlement in uncontested cases. Since these schedules serve principally to

---

mission on Estates, at 60, 62. Surely the power of the Surrogates Association was responsible for the fact that the 1961 enabling legislation specified that at least five of the Commission had to be surrogates designated by the governor.

The recommendations of the Special Commission in regard to small estates, proof of wills by affidavit, and holographic wills also appear to fall short of standards one might identify as critical to probate simplification. These recommendations deserve more attention than can be given here.

55. Though the degree of supervision varies among states which require personal representatives to obtain a closing order, the description of the modern Massachusetts system in Atkinson's article is useful. Atkinson, *supra* note 32. A recent survey of lawyers in 23 states provides useful insights concerning the variety of procedural detail which frame probate procedures in several states. *See*, *Estate Administration: Current Practices and Proposed Uniform Probate Code*, *supra* note 18.

56. *See* Simes and Basye, *supra* note 8, 43 MICH. L. REV. 113, 121, (1944).

separate orders by which the court adds its blessing to what dutiful fiduciaries and attorneys report to it, they have a greater potential for embarrassing the legal community with "unclosed" estates than for safeguarding private interests. Time consuming notice requirements for interim orders have proliferated under pressure of the *Mullane* decision.[57] At the same time, older requirements for wasteful publication of probate notices remain on the books as a reminder of a simpler day and the power of the legal news press.[58]

Overall, the time schedules and notice requirements are usually pointless, institutionalize delay, and add enormously to the work burden which is assumed by every personal representative and estate attorney. The routine which the statutory notice requirements create also tends to defeat the purpose of notice by making every warning paper ordinary.

Other troublesome details relate in a more indirect way to the notion that the appointing authority has some responsibility for personal representatives. Judges select appraisers, approve bonds, appoint special guardians to represent minors, absent or unborn persons and enjoy wide discretion in regard to these and other procedural points. Much of the popular literature about probate has emphasized abuses which have grown around these perquisites of local judges.[59]

Perhaps the most insidious aspect of supervised administration in many areas is that its promise of protection for survivors is almost totally deceptive. Real responsibility for enforcing fiduciary responsibility falls neatly between the court, the attorney for the estate and the survivors. Bar association pressure in most states, plus institutional doubt as to whether the probate official is a real judge or is more like a policeman, have made probate judges in many areas reluctant to serve the public except in response to a written complaint prepared by a lawyer. Sometimes, survivors who are forced to employ legal assistance to get the court to exercise its control over the estate by issuing letters, discover they must hire additional counsel to get

---

57. Mullane v. Central Hanover Bank & Trust Co., 339 U.S. 306, (1949). Changes in Michigan procedures since the Mullane case illlustrate the point.

58. Current Michigan procedures involve mailed or delivered notice to all interested persons when an estate is commenced, and at the time of closing. In addition, two and usually three series of legal publications must be run in order to comply with accumulated statutory and practice requirements. *See* MICH. LAWS ANN., §§ 701.32, 702.29, 702.56, 708.2, Probate Rule 18.

59. *See supra* note 4.

relief from sub-standard performance by the original representative.[60] It is only in cases in which there is no controversy that the supervising court gets credit for protecting survivors via the costly machinery it superintends. Sadly, when the inherent deficiencies of this protective system are identified, the typical correction is to add more requirements and cost.[61]

Other problems of probate are traceable to supervised administration. The dependence of personal representatives on court orders has inhibited the development of useful inherent or implied powers for personal representatives.[62] The non-recognition of personal representatives in courts of states other than that of appointment is tied to their status as functionaries of the appointing office.[63]

The assumption that courts should be responsible to see that public authority over estates is not misused also has led to some grotesque situations in sparsely settled political subdivisions of some of our states and to widespread variance in practice in different areas of the same state. Law-makers have used the argument that probate offices should be located conveniently to all people to justify allocation of probate power to counties. But, many areas cannot or will not support lawyer-manned courts. Thus, lay judges are given the job of interpreting and following state-wide requirements concerning no-

---

60. Michigan's recently revised Probate Rule 5a, *see supra* note 61, purports to require probate courts to appoint special fiduciaries when a prior appointee has failed to file an inventory within 30 days after appointment, render an account in accordance with the statutory schedule or otherwise failed to conform to statutory requirements designed to assure prompt settlement of estates. The rule says nothing about who is to pay attorneys' fees for the deposed representative or the special administrator. Further, Michigan statutes so limit the power of a special administrator that in many cases, a third appointment would be required in order to get someone with the necessary authority. See MCLA § 702.61. Rule 5a and its probable meaning in practice provide a vivid illustration of the inadequacies of so-called supervised administration.

61. In the wake of recent adverse publicty regarding unclosed estates, the Michigan Supreme Court recently adopted an amendment to the Probate Court Rules which requires the probate judge acting on his own motion to review files, and appoint special administrators "in the event the fiduciary or his attorney shall fail to perform the duties required of them within the time so limited." Rule 5a. One of the new requirements is that inventories be filed within 30 days of appointment. Since the work involved in identifying and appraising an estate frequently requires more than 30 days, the new rule is producing a flood of "temporary" inventories of little value to anyone.

62. *See* the survey cited in note 55, *supra*, for a summary of the powers now granted to personal representatives by law.

63. H. GOODRICH & E. SCOLES CONFLICTS (4th ed. 1964) § 190 and authorities cited.

tice, appearance, pleadings and conflict of interest. Even in states where most probate judges are lawyers, the relationship between court and attorney is such that the judge's view of state rules controls. Consequently, in some states there are almost as many ways of probating estates as there are counties. Neither of these conditions is conducive to public understanding of the institution.

The procedures in several states offer alternatives to supervised administration. The appointee of Pennsylvania's register of wills is under no obligation to return to the register or the Orphans' Court after appointment, though he assumes liabilities like those borne by a trustee.[64] New Jersey procedures offer generous opportunity for independent administration in testate and intestate estates. New York's recent probate legislation eliminated older provisions concerning appraisers and inventories which had been generally disregarded in practice.[65] Georgia recently added an important provision giving testators authority to insert will provisions which prevent probate court involvement in their estates after appointment of the personal representative.[66] Similar authority, sometimes little used, exists in other states.[67] Texas and Washington institutions involving "independent executors" and "non-intervention wills" have been widely recognized and discussed.[68] Finally, it seems likely that independent administration is achieved as a practical matter in many estates which are administered under supposed supervision of relatively weak or non-aggressive courts which do not attempt to compel court approval of final accounts.[69] Surely, it is difficult to force survivors or counsel

69. At a recent meeting of the West Virginia State Bar Association, the author heard lawyers from various parts of the state describe a practice, apparently well established in the more populous areas, of ignoring statutory requirements for audit of accounts by so-called "commissioners of accounts" designated by the county courts.

back to court for approval of accounts and closing order when all monies have been distributed and everyone involved is satisfied.

D. Other Problems of the Probate Bureaucracy

Many by-products of the historic probate bureaucracy can be identified. Provincialism in probate, born of local public office control of each estate and nurtured by different state and local history as it has impacted on the stature and power of the office, has discouraged law school study of probate administration.[70] Among practicing lawyers, the relatively low prestige of trusts and estates work is indicated by the fact that though women have been systematically discouraged from engaging in many areas of law, women lawyers are relatively more heavily involved in trusts and estates work than men.[71] Not surprisingly, probate officials, trustmen and lawyers from relatively small communities[72] have dominated occasional efforts to revise probate law.[73] Consequently, though probate codes seem to be frequently amended, changes cutting anywhere close to the heart of the probate problem almost never occur.[74]

The stagnation attributable to the probate bureaucracy is manifest in almost every aspect of probate law. Intestate succession patterns in

---

70. Only 36 teachers are listed under the subject "Fiduciary Administration" in the recent AALS Directory of Law Teachers (1968-70). By contrast, about 340 are listed under "Trusts and Estates" and about 200 under "Estate Planning". Many so-called Trusts and Estates courses involve very little on the subject of probate administration.

71. *See* White, *Women in the Law*, 65 MICH. L. REV. 1051 (1967).

72. The reference to small town lawyers is not derogatory. In the author's experience, lawyers from smaller communities are likely to be more concerned about probate law deficiencies than big-city lawyers of comparable prominence. For one reason, they are more familiar with the costs and problems relating to handling small estates than their counterparts in big firms.

73. The structure of N.Y.'s Commission on Estates is described in note 53, *supra*. The recently approved Wisconsin probate code was prepared by two committees appointed by the State Bar of Wisconsin. Each committee was chaired by a county judge. In all, five state probate officials, four trust officers, one "insurance counsel" and six practicing lawyers only one of whom was from Milwaukee, constituted the group which controlled two law professors who served as research reporters for the project. *See Proposed Wisconsin Probate Code* (West pamphlet). The thirteen member Governor's Commission in Maryland which made recommendations leading to adoption of the Maryland probate laws of 1968, included six persons listed as "Hon." The abbreviation "Esq." follows the names of the other seven. *See Second Report of Governor's Commission To Review and Revise the Testamentary Law of Maryland.* (State pamphlet, Dec. 5, 1968).

every state defy the intention of the average married person[75] by dividing even very small estates between surviving spouse and issue, and ancient distinctions between real and personal property still cause variations in inheritance patterns. Rights of inheritance from blood relatives frequently stand as glaring contradictions to the generally accepted idea that adopted children fare best if spared all knowledge of the identity of their family of origin.[76] Execution requirements for wills perpetuate ancient and demeaning ceremonies in a society which is generally accustomed to transacting business by mere signature. Inheritance rights for children are vigorously asserted, only to be more zealously guarded by cumbersome guardianship procedures which make no sense at all from the standpoint of the family.[77] The old game of protecting imaginary local creditors, combines with that of protecting local land titles from the tamperings of "foreign" courts of adjacent and other sister states, to force multiple probates on the survivors of persons with assets in two or more states.

---

74. The proposed Wisconsin probate code makes estate administration a truly ponderous proceeding before a court of record. Prior notice to interested persons is required in regard to orders of probate and appointment, and strict time schedules plus appropriate enforcement mechanisms surround requirements which culminate in a court order closing each estate. *See Proposed Wisconsin Probate Code, supra,* note 73. The author has been informed that most of the draft code has been enacted with a postponed effective date. The recently approved Oregon Probate Code continues the state's tradition of *ex parte* probate, followed by supervised administration. Chap. 591 Oregon Laws, 1969 (effective July 1, 1970). Suggestions emanating from the second draft of the Uniform Probate Code regarding independent administration of estates were not accepted by the revision commission. The recently enacted code in Maryland was also drafted after the second tentative draft of UPC became available in the summer of 1967. In the introduction to the Second Report of the Governor's Commission, it is stated: "When there were major differences between Maryland practice and the Boulder draft, (the second draft, UPC) the Commission, in most instances, followed the existing Maryland practice." However, an important provision in the Commission's draft would have enabled estates to be administered independently of probate court supervision when a will so provided, or all heirs consented. *See* § 7-402 of the draft code, Second Report of the Governor's Commission (Maryland pamphlet, Dec. 5, 1968). This section was dropped by the legislature. The author has learned from reliable sources that protests by elected probate officials caused the deletion.

77. A question and answer period followed presentation of papers on the Uniform Probate Code at the annual meeting of the Real Property, Probate and Trust Law Section, ABA, in Philadelphia in August, 1968. As has occurred many

Worse, these and many other examples of probate nonsense are jammed down the throats of the unhappy public as wave after wave of idealistic new probate officials assume their jobs with fresh dedication to see that the estates coming before them are handled with meticulous respect for law. It's a small wonder that community respect for this area of our legal system has all but disappeared in some areas of the country.

E. Collateral Responsibilities of Probate Courts

One other important aspect of the matter should be noted. Though the relationship of public offices to estates is at the heart of our probate problem, one cannot ignore other responsibilities of local probate officials. Probate offices, particularly those called courts but having less power within their area of subject-matter jurisdiction than regular courts, have received responsibility for an interesting array of odd jobs from state legislatures.[78] Varying degrees of jurisdiction over the person and affairs of orphans and other minors is frequently given to the office having control of estates. In recent times, this authority has broadened in many areas into jurisdiction over neglected and delinquent juveniles and their parents.[79] Authority over sanity proceedings involving adults who are alleged to be incompetent, or who need treatment involving curtailment of personal rights may be included. Guardians whose authority is limited to property matters sometimes may be appointed by order of the probate office. Sterilization proceedings relating to mentally defective persons, change of name proceedings, jurisdiction over trustees named by will, and authority to determine and possibly collect inheritance taxes sometimes are handled by probate courts.

II. The Uniform Probate Code

A. An Overview

The briefest description of existing probate problems suggests com-

---

times, a probate judge raised questions concerning the protection under the code, then in its third draft, for minor children who share an inheritance with one parent upon the death of the other. The judge observed that he had found surviving parents to constitute the biggest class of probate cheats. *See Questions and Answers on Uniform Probate Code*, 3 Real Property, Probate & Trust L. J. 388 (1968).

78. *See* Simes and Bayse, *supra* note 8, part VI.

79. Michigan laws are an example. *See* Mich. Laws Ann. § 701.19.

plexity beyond the reach of simple remedies. The Uniform Probate Code is neither simple nor easy to describe.

In the preamble, it is stated that the Code relates to "affairs of decedents, missing persons, protected persons, minors, incapacitated persons and certain others". The open-ended reference to "certain others" does not mean that the Code deals with all subject areas presently associated with probate courts in some states. The important area of juvenile law is not covered and nothing is included regarding miscellaneous matters like inheritance taxes, sterilization proceedings, condemnation proceedings and various responsibilities regarding county government. On the other hand, the focus on "affairs of decedents" carries the Code into certain aspects of death benefit contracts,[80] and its coverage of procedures relating to testamentary trusts leads to treatment of procedures regarding inter-vivos trusts.[81] Functions for public offices in the areas covered include jurisdiction of optional proceedings involving decedents' estates, trusts, guardianships and protective arrangements for disabled persons for a full-power court,[82] and limited, non-judicial functions for a local public official, who should not be thought of as a judge.[83] Existing probate offices which do not meet either description may be upgraded or restricted as necessary, or left as now constituted to handle matters not dealt with by the Code.

The Code reflects the view that both substantive and procedural rules relating to affairs of decedents have been overly influenced by our historical preoccupation with safety of estates. As a corrective, substantive rules have been liberalized by more generous use of assumptions regarding the wishes of most owners, and by identifying as desirable rules for uniform adoption, those versions of existing

---

80. UPC, Article VI.

81. UPC, Article VII.

82. Under Articles III and VII, the court has jurisdiction to handle all matters involving trusts and decedents' estates which are brought before it by petition. However, the CODE does not compel persons interested in trusts or estates to use court proceedings and offers alternative routes to accomplish normal objectives without judicial proceedings. However, orders of the court are required in regard to certain protective proceedings for disabled persons. *See* UPC, Article V.

83. *See* §§ 1-307, 5-105. UPC references are to the official version which will be published soon by West Publishing Company. The system for numbering subsections used by West varies from that appearing in Prentice-Hall's edition of UPC.

rules which expand opportunities for considering evidence of intention in particular cases. In regard to procedures, the object of the Code is to open opportunities now denied to survivors and their counsel in many states to select from among several available settlement procedures with an eye to finding the desirable balance of safety and efficiency. Procedural provisions have been designed around very limited and specific requirements for every estate which can be handled by non-judicial local probate officials under restrictions designed to curtail power and discourage development of new requirements and powers. Also, the Code offers decedents and survivors simple alternatives to use in case probate procedures remain or become undesirably cumbersome. Thus, prospective decedents will find that UPC significantly strengthens various non-probate methods for effecting transfers at death. For survivors who claim probate assets, the Code offers many alternative methods of perfecting title, some of which include a choice of the public official who will be involved. Finally, problems deriving from variety in state laws concerning succession should be eased by generous use of sections directing local courts to recognize and respect the relationship of the decedent to his domicile.

Because probate law is to be measured more in the way it is implemented in practice than in its formal statement, it is distinctly possible that adoption of the Code may not be followed by probate improvements which the public will perceive and appreciate. On the other hand, the Code certainly permits and encourages very significant improvement in practice in an area of law which has very obvious political overtones as well as a dollar and cents meaning for most families. If it can gain enactment, its potential as an instrument of law reform seems very great.

The package is too big to handle in useful detail in a single article. The approach here is to identify the major topics covered by the Code and the principal purpose of the draftsmen relating to each. Then, some of the more complex and important areas will be analyzed in depth.

B. "Court" Organization and Jurisdiction

The Code describes an office calling simply "Court" to which it assigns functions and proceedings relating to decedents' estates, guardianships, conservatorships and trusts.[84] As indicated by official

84. §§ 1-201(5), 3-105.

notes and comments, UPC's "Court" is more a product of the effort to write coherently of functions to be performed by public officials in any enacting state than an effort to describe an ideal organization.[85] Properly understood, the functions can be sorted in various ways between existing courts and offices in states receiving the Code. However, the Code makes it clear that the tribunal which handles binding adjudications relating to decedents' estates, trusts, guardians or conservators should be empowered to handle any civil litigation to which a fiduciary may be a party, with appeals going to courts handling appeals from courts of general jurisdiction.[86] Ideally, a division of the general trial court will receive this kind of subject matter jurisdiction. The Code is written as if a specialty court having power in limited subject areas equivalent to the general trial court were involved. However, this style merely reflects the need of the draftsmen to find an organizational form which offered the smallest invitation for endless discussions about the desirability of mixing estate dockets and general trial dockets.

The Code also includes a notice system for binding many and widely separated persons interested in judicial proceedings involving estates and fiduciaries.[87] This portion of the Code may be kept as part of a statute describing special procedures of a new, or continued special court, used in a statute describing estate proceedings before a court of general jurisdiction, or sorted into statute and court rule for either species of court.

The assumption of the Code is that a mailed notice affording interested persons warning of each *adjudicative* proceeding, and an opportunity to be heard, is required and desirable.[88]

UPC's "court" includes a "registrar" who is identified as the person designated by the judge to handle non-adjudicative proceedings contemplated by the Code.[89] Legislatures in states where non-lawyers are now permitted to serve as principal, local probate officials could, and parhaps should, assign the registrar functions under the Code to

85. *See* particularly the Comment following § 3-105.
86. §§ 1-302, 1-308, 3-105, 5-204, 5-304, 5-402, 7-204.
87. *See* Art. I, Part 4.
88. *See* §§ 3-403, 7-206. The informal proceedings described in Art. III, Part 3, are deemed non-adjudicative. See §§ 3-302 (effect of informal probate), 3-307(b) (effect of informal appointment), and 3-108 (time limit on testacy and appointment proceedings).
89. §§ 1-307, 3-105, and Art. III, Part 3.

these officials. Under the Code, the registrar handles "informal" proceedings to establish wills or appoint personal representatives.[90] Also, the registrar may be responsible to preserve various documents, notices and demands which may be filed in his office under provisions of the Code.[91]

C. Substantive Rules of Heirship and Family Protection

The Code contains a series of provisions which identify the successors to intestate estates. These are high on the list of provisions which warrant uniform enactment. Designed to work with the administrative provisions offering identical opportunities for simplified administration to testate and intestate estates and augmented by new provisions relating to the handling of property of minors and other disabled persons, the sections on descent are the core of a modern statutory estate plan which is designed to relieve most persons of ordinary means of the need to take affirmative estate planning steps.[92]

The Code also includes three sets of sections designed to protect the spouse and children of decedents from loss of essential family assets to the decedent's creditors, and to protect the spouse from loss of expectancy where the decedent, by design or neglect, disinherits the spouse by will or will substitute. One,[93] which includes a $5,000 "homestead allowance," an exemption for chattels worth up to $3,500, and a family allowance for support of spouse and dependent children during administration, will serve to prefer the close family of a married decedent to all unsecured creditors and takers by will in the first $14,500[94] of probate assets. Another protects after-born children, children believed to be dead, and spouses acquired after execution of a will from disinheritance through oversight or mistake.[95] The third, creating an "elective share", is designed to protect spouses

90. §§ 3-105, 3-301.

91. §§ 1-305, 1-307. Sections contemplating filings, which do not involve response by judge or registrar include §§ 3-204, 3-706, 3-804, 3-1003, 5-202, 5-302, 7-102. § 3-604, relating to the filing of bonds, is somewhat different.

92. Art. II, Part 1. *See* 3 REAL PROPERTY, PROBATE & TRUST L. J. 199 (1968) for a discussion of the law's estate plan.

93. §§ 2-401, 2-402 and 2-403.

94. The figure assumes that the personal representative grants the spouse the full amount or support allowance which can be given without approval of the court. *See* § 2-404.

95. Article II, Part 3 (§§ 2-301 - 2-302).

from transfers by will or will substitute which would reduce the spouse's share of the estate controlled by such transfers below 1/3.[96]

The latter system is as much a part of the subject of intestate succession as it is of the subject of wills. Gifts made by the decedent to the spouse, however effected, are included in the computation so that an electing spouse must take credit for all values received from the decedent before obtaining rights against other transferees by will or certain will substitutes.[97] Apart from procedural provisions of the Code which will be upsetting to vested interests, this new approach to the old forced share problem probably will prove more troublesome for persons studying the Code than any other area. Surely controversy about these provisions characterized the Reporters' discussions of preliminary drafts.

D. Wills

The final substantive system for decedents' estates relates exclusively to the subject of wills. A principal objective of these sections is to provide a uniform base for interpretation of the nation's wills. Another is to aid inartfully drawn wills by reducing recurring problems of meaning through use of rebuttable presumptions regarding a testator's intention.

Also, in order to accommodate testators who may not have sought any legal advice, the Code expands the kind of writings which may be effective as wills. Thus, holographic wills are validated,[98] certain informal dispositive lists referred to in wills are approved[99] and a flexible rule keyed to testator's intent as proved by any evidence is stated to govern the revival problem.[100]

Finally, the draftsmen moved rather boldly to increase the power of testators to choose the law applicable to their estates.[101] Whether or not the Code is ever generally adopted as a uniform law, this provision should dent the concept that the rules of the place of land must control its devolution.[102]

102. § 3-408 is also relevant in this connection.

E. Coverage Outside Decedents' Estates

The Code reaches beyond traditional limits of the rules for decedents' estates to deal with some problem areas traditionally associated with probate court jurisdiction. Also, it covers some problems bearing a close functional relationship to the general subject of affairs of decedents which are generally regarded as parts of probate law. The Code's coverage of guardianship and the relationship of various kinds of trusts to the probate court are examples of the first category; the second is reflected by the treatment in Article VI of non-probate transfers at death.

1. *Guardianship and Conservatorship*

Article V of the Code is entitled "Protection of Persons Under Disability and Their Property". Covering the subjects of guardians and of conservators, the article describes four separate systems for meeting or reducing problems relating to persons who because of minority, affliction or other circumstances are unable to discharge personal responsibility for their well-being or the care of their estates. Separate systems of personal guardianship are described for minors and for those whose incapacity is unrelated to minority.[103] The separation, due in part to a desire to facilitate removal of either or both subjects from a probate code, also reflects somewhat different procedural safe-guards relating to appointment[104] and different problems of discharge for guardians in the two categories.[105] Each kind of guardian is given limited powers over the ward's estate, consisting principally of the power to expend sums received by him as guardian for support and maintenance of the ward, and to preserve unused balances.[106] The limitations were designed to encourage use of separate, so-called "protective proceedings", leading possibly to appointment of a conservator for the estates of persons with complex financial affairs.

The Code contemplates that guardianship proceedings will be handled by the same full power court which will handle other judi-

106. *See* §§ 5-209 and 5-312.

cial business arising under the Code.[107] However, guardians of the person of minors may be appointed by will of the surviving parent.[108] No court proceeding for confirmation is necessary if a testamentary guardian files an acceptance.[109] Indeed, unless a testamentary guardianship is blocked by objection,[110] or ended by removal, the parental rights over the ward conferred on the testamentary guardian by the Code[111] will prevent court appointment after a will designation has been accepted.[112] Essentially the same idea is extended to designations of personal guardians for adult incompetents made by will of an incompetent's spouse or parents.[113] These two methods of identifying guardians further the overall purpose of the Code to provide nonjudicial remedies for recurring needs which may not involve controversy.

Separation of procedures for use in cases where the principal objective is to secure estate management or application for the benefit of the owner or his dependents, from personal guardianship proceedings, serves several objectives.[114] Financial problems for missing, ill, incompetent or minor persons may be remedied on grounds bearing no necessary relationship to the subject's sanity, and without implication that his personal liberty or his ability to contract should be restrained or questioned.[115] Where an owner needs both personal and property protection, more sensitive selection of persons with real interest in his well-being may be expected as the distinction between the guardian's job and that of managing the ward's estate is furthered by the Code. Also, the separate proceeding which is designed simply

---

107. Since Article V does not make use of "informal proceedings" as does Article III (decedents' estates), all references in Article V are to "Court" rather than "Registrar". Consequently, the "Court" may not delegate its authority regarding guardianship matters to the Registrar as provided for some matters by § 1-307.

108. § 5-202.

109. §§ 5-201, 5-202.

110. § 5-203.

111. § 5-209.

112. § 5-204.

113. § 5-301. It should be noted that the possibility of securing appointment by the court of a guardian for an incompetent adult is not related to whether another has obtained parental rights of custody via acceptance of a testamentary appointment. *See* §§ 5-303 and 5-304.

114. Article V, Part 4 covers regimes designed to protect property interests.

115. The grounds for a protective order appear in § 5-401. The definition of "incapacitated person" in § 5-101 keys to the procedures of Part 3 of Article V, and has no relevance to Part 4.

to meet property management problems caused by an owner's disability easily includes a proceeding for court approval of a single transaction, like ratification of a minor's contract, or renewal of a lease or mortgage, without appointment of a conservator.[116]

For a conservator who may be appointed to provide continuing management for a disabled person, the Code offers a statutory charter of powers and duties designed to enable him to accomplish the usual purposes of a protective trust for the sole benefit of a person and his dependents.[117] No requests to the appointing court for authority to do what a managing trustee should be able to do, or regular reports or accountings to the court, are required. At the same time, the package offers an array of safeguards and remedies which enable the protected person or anyone interested in his welfare to compel performance of all statutory duties.[118]

Article V includes two features which are designed to minimize the need for guardians of minors and conservators for incompetent adults. For minors, a statutory facility of payment clause protects persons owing up to $5,000 per year to a minor who discharge their obligation by voluntary payment to any adult having the care and custody of the minor.[119] The recipient, who may not be a guardian in a formal sense, is under a duty to apply the funds received to the support and education of the minor, and preserve any unneeded balance for payment when the minority terminates.

The other scheme, changing the usual law of agency,[120] protects persons acting in good faith and without actual knowledge of the principal's death or loss of capacity under a power of attorney given by one who has since died or become incompetent.[121] Also, statutory effectiveness is extended to a provision in a power of attorney that the authority conferred shall not be terminated by known disability of the principal.[122]

It should be noted that Article V changed more drastically during the drafting process than any other portion of the Code. The preli-

122. § 5-501.

minary drafts show vacillation about whether any coverage of guardians of adult incompetents should be included,[123] uncertainty regarding the effect of a protective proceeding on the subject's capacity to contract[124] and an abandoned proposal to subject creditors of a disabled person to non-claim statutes like those working against creditors of decedents.[125] There were many other, somewhat less drastic changes in content and several fairly major reorganizations of the material. This history accurately suggests that Reporters and Special Committee had a great deal of difficulty with this Article. Much of the subject matter seemed more relevent to the larger problems of mental health and juvenile legislation than to the business of framing modern substantive and procedural rules for decedents' estates and trusts. It would not be surprising if legislatures in enacting states see fit to alter many portions of Article V in varying ways. On the other hand, there is less concern about this subject by various vested interests who will question some of the decedents' estates provisions. Hence, overburdened legislators may be inclined to accept Article V with few changes.

2. *Non-Probate Transfers*

Article VI offers two quite different statutory approaches to two problem areas selected from the world of non-probate transfers. Multiple-party accounts in financial institutions, including joint accounts, Totten trust accounts and accounts providing explicitly for payment on death to persons having no withdrawal right until the decedent's death, are covered in detail in Part One. Part Two consists of a single section dealing with provisions in effective written instruments purporting to shift or cancel rights by reason of the death of an owner.

For joint accounts, the Code abandons the joint tenancy analysis

---

123. Part 3 of Article V entitled "Guardians of Incompetents" which appeared in the "Summer 1967 Draft" was dropped from the Third Working Draft which was published in November, 1967.

124. § 5-424 of both the Third Working Draft and Working Draft #5 (distributed in January, 1969) provided that a protected person was incapable of making gifts and most contracts. In the Code as finally approved, § 5-408(5) expressly negates the idea that an order determining disability involves a finding of incapacity.

125. *Compare* §§ 5-425 and 5-427 of the Third Working Draft, with § 5-425 of Working Draft No. 5.

in favor of the broader concept that a surviving party to a multiple-party account contract is entitled to balances attributable to a decedent without regard to whether he had any present, beneficial interest prior to his death.[126] Testamentary benefit for survivors exists unless the account form or other clear and convincing evidence of intention as of the time the account was created indicate otherwise.[127] The Code also declares that a bank account in the name of one as "trustee" for another or others may be a vehicle for a valid testamentary disposition by the trustee to the other or others.[128] Accounts by trustees under trusts evidenced otherwise than by the form of the account are excluded.[129] Finally, accounts for one payable on his death to another, called "P.O.D. accounts" by the Code, are also validated as informal wills.[130] A transfer at death effected by any of the three forms of account has the status of a special specific bequest which passes outside probate administration without abatement in regard to other gifts made by will.[131] However, survivors' benefits in such accounts are subject to certain claims by the decedent's creditors, spouse and children if traditional probate assets are insufficient.[132]

Six of the thirteen sections in the part dealing with multiple-party accounts relate entirely to the relationship between persons who are named on the accounts, on the one hand, and financial institutions, on the other.[133] Reflecting a determination to keep questions involving beneficial ownership between parties completely separated from questions of banker liability, these sections nonetheless support the ownership provisions by stating when it is safe for bankers to pay various categories of persons named in the several forms of account.

Section 6-201 deals with written instruments which can be classified as contracts, conveyances, gifts or trusts and declares provisions therein calling for transfers of values at death to be non-testamentary. The section might prove to be a very important provision of the Code. On the other hand, it could be viewed as adding nothing to existing case law. The draftsmen followed the lead of a few existing statutes which

exempt death benefit provisions in rather narrowly described arrangements, such as "a pension, retirement, death benefit, stock bonus or profit sharing contract plan, system or trust,"[134] but abandoned efforts to limit the statutory declaration to special categories or arrangements. In effect, the Code applies to any written provision which, but for its death benefit aspects, would be capable of creating or altering rights between individuals. If courts will respect various intra-family agreements which the section may invite, the provision could have very significant impact.[135] By offering courts a broad alternative to the probate route for effectuating expressions calling for transfers at death, the draftsmen may have created a form of competition for wills which might serve to assure that probate procedures will be and remain as simple as possible.

3. *Jurisdiction Relating to Trusts*

Many existing probate codes subject testamentary trusts to continuing jurisdiction by the same court which probated the will creating the trust.[136] The irrelevance of attendant requirements of qualification, bond and periodic court accountings and the awkwardness of the continuing jurisdiction idea when applied to cases where trustee and assets are located in different states, are generally recognized by lawyers and trustmen. Widespread enactment of the Uniform Testamentary Additions to Trusts Act or its equivalent,[137] though attributable in part to the desirability of unifying management of inter vivos and testamentary increments to trusts, probably occurred because the legislation offers well counselled testators a way of keeping trusts arising at death away from continuing and expensive probate court control.

But, state procedural codes sometimes leave trustees and others interested in inter vivos trusts with no effecient means of obtaining adjudications which will bind all interested persons.[138] The principal

135. *Cf.* Halldin v. Usher, 49 Cal. 2d 749, 321 P.2d 746, (1958).

136. *See* Simes and Basye, *supra*, note 8, 43 Mich L. Rev. 113, 133.

137. 9c, U.L.A. (1967 Supp.). According to the *Handbook of the National Conference of Commissioners on Uniform State Laws* for 1968, 41 jurisdictions had enacted the Uniform Testamentary Additions to Trusts Act, or substantially similar legislation, as of December 1, 1968.

138. Michigan procedures, now codified in its modern and comprehensive Revised Judicature Act, provide an example. Under RJA, jurisdiction over non-

difficulty, related to the traditional view that the relationship between a trustee and beneficiaries is *en personam,* lies in subjecting non-residents to the authority of the court. Legislation authorizing mailed notice to trust beneficiaries is clearly valid,[139] but not all legislatures have accepted the fact that there are many inter vivos trusts other than those creating common trust funds or involving local land which need legislative assistance.

One of the objectives of Article VII is to offer procedures for obtaining adjudications concerning trusts which apply equally to testamentary and inter vivos trusts.[140] Probate critic Norman Dacey has interpreted reports about the Code to mean that inter vivos trusts are subjected to the same kind of relationship to the probate court as is required now by typical probate code provisions dealing with testamentary trusts.[141] The Code is plainly to the contrary. It identifies what may be called a home base court for each trust by requiring trustees to register trusts with the court at the trust's principal "place of administration".[142] The court of registration is empowered to enter orders in proceedings initiated by interested parties which bind persons to whom prior notice has been given in accordance with the Code's basic system for notice of estate proceedings.[143] But, there is no duty on trustees or beneficiaries to initiate proceedings in the court of registration, and "neither registraton of a trust nor proceedings . . . result in continuing supervisory proceedings."[144] In effect, therefore, the Code offers both inter vivos trusts and testamentary trusts flexibility in regard to court proceedings like that currently available to inter vivos trusts and convenience in regard to extending proceedings to non-residents like that now available to what Professor

---

resident beneficiaries of a trust cannot be obtained except through service of process in the state, or waiver, unless the litigation can be maintained under MICH. STAT. ANN. § 27A.705 which authorizes mailed notice in cases involving "ownership, use or possession of any real or tangible personal property within the state."

139. Mullane v. Central Hanover Bank and Trust Co., 339 U.S. 306 (1949).

140. *See* Introduction to Article VII.

141. *See* newspaper article bearing Mr. Dacey's by-line and "Copyright, 1969, by North American Newspaper Alliance, Inc.," which appeared in several of the nation's newspapers in early 1969, including the Connecticut Sunday Herald edition of April 20, 1969.

142. § 7-101.

143. § 7-103.

144. § 7-201.

Casner has called "court trusts".[145] At the same time, it completely avoids requirements of court qualification, bond and mandatory accountings.

Article VII has another important objective. It is to strengthen the ability of an owner to devise property of any location to a trustee of his choice. Under the Code, a testamentary trustee derives his title and power from the will rather than from court appointment. The Code provides "unless otherwise doing business in this state, local qualification by a foreign trustee, corporate or individual, is not required in order for the trustee to receive distribution from a local estate or to hold, invest in, manage or acquire property located in this state, or maintain litigation."[146] It also provides, "A foreign corporate trustee is required to qualify as a foreign corporation doing business in this state if it maintains the principal place of administration of any trust within the state."[147] These provisions should go far to free corporate trustees of restrictions which have probably served more to discourage realization of the full potential of existing leads to new trust business, than to protect them from unwanted competition by out-of-state organizations.

The foregoing general description of the Uniform Probate Code only scratches the surface. Detailed analysis of many areas and sections will be needed before an accurate assessment of the Code can be made. For example, careful study of the Code's treatment of inheritance rights of illegitimate and adopted children should be related to existing habits of draftsmen dealing with class gifts.[148] Form book clauses for wills should be reviewed with careful attention to the Code's rules of construction.[149] Conflict of Laws scholars and proce-

145. ABA film, "The Revocable Trust".
146. § 7-105.
147. § 7-105.
148. The important sections are §§ 1-201(3), 1-201(17), 1-201(21), 1-201(29), 2-109 and 2-611. In regard to the last section, users of the Prentice-Hall edition of the Code published in August, 1969 should know that the publishers failed to notice a re-draft of the section which was accomplished during the proceedings of the Commissioners on Uniform State Laws at Dallas. The correct version of the section which is one of several dealing with construction of wills, is as follows: "Halfbloods, adopted persons and persons born out of wedlock are included in class gift terminology and terms of relationship in accordance with rules for determining relationships for purposes of intestate succession, except that a person born out of wedlock is not treated as the child of the father unless the person is openly and notoriously so treated by the father."
149. Article II, Part 6, is of particular relevance.

durists should give the provisions having closest relation to their area of interest close scrutiny. Old prejudices against guardians and conservators should be reconsidered in light of Article V. Bankers and others offering demand or time account contracts need to explore the wide new world of multiple-party accounts which is opened by Article VI. Estate planning specialists will find new uses for testamentary trusts and many other ideas made safe or efficient by the Code. The list could be extended.

F. Probate Procedures

1. *Introduction*

The heart of the UPC is its package of procedures, restrictions and limitations relating to decedents' estates. Consisting of 16 parts and 140 sections of Articles III and IV, and occupying about 46% of the pages of the entire work, the procedural and administrative core of the Code seeks to establish new rationality in probate through reduction of the necessity and importance of contacts between survivors and the Court or any public office. If enacted and used, these provisions implement purposes of the draftsmen to (i) take the critical question of how much procedure must attend each administration away from the probate office and to move this important power to persons interested in particular estates; (ii) provide methods of administering estates which will enable efficiency in succession equivalent to that associated with transfers at death via revocable trusts; (iii) eliminate the need for or advantage of separate administration for portions of a decedent's estate which happen to be located in various states.

If organization of the offices and courts dealing with estates is adjusted to make optimum use of the new procedures for decedents' affairs, the Code may reverse the historic tendency of minor probate officials to work themselves toward the postition of powerful members of the regular judiciary. In states where probate officials already have stature like that of trial court judges, the courts should be combined. In addition to the savings of public and estate funds which should follow if estates may be settled with fewer contacts with less important officials than at present, the new look promises new vitality for the nation's fiduciary industry and all associated with it.

The working relationship between the several parts and sections of Article III must be understood if the bright promise of the package is to be realized. Also, comprehension of the details of the system will be needed to answer criticisms which can be anticipated from some probate officials and two well organized and well financed commercial groups. The American Insurance Association, representing companies selling probate bonds and the National Newspaper Association representing county newspapers and metropolitan publications specializing in legal news and advertising, made it clear during the drafting stage that they are unhappy with the Code's provisions regarding probate bonds and published notices. Whatever else may be said of their respective positions, it is certain that their complaints will put pressure on advocates of the Code to demonstrate that its safeguards are adequate and that its system in regard to notices is fair and constitutional. The anticipated opposition from these groups and the importance of Article III to the cause of probate simplification warrant a more detailed analysis of this portion of the Code than can now be made of other important areas.

2. *Probate Procedure: Detail*

The first few sections of Article III describe the relationship between a public office and the complex of interests in a decedent's assets represented by his creditors and successors. Under Section 3-101, all the estate of a decedent, without distinction between real and personal assets, "devolves to the persons to whom it is devised by his last will . . . or in the absence of testamentary disposition, to his heirs . . . subject to [certain allowances] rights of creditors, . . . and to administration." Subject to exceptions which will be mentioned later, Section 3-102 requires that wills "be declared to be valid by an order of informal probate by the Registrar, or an adjudication of probate by the Court" if they are to be effective to prove a devise.[150] Section 3-103 then provides that one must be appointed by the court or rgeistrar to become an executor or administrator. Section 3-104 provides that claims of a decedent's creditors may not be enforced against his successors except through a personal representative or after property has been distributed by a personal representative.

150. The term "devise" is defined by § 1-201(17) to include any disposition by will of any kind of property.

Finally, Section 3-105 confers exclusive jurisdiction on the Code's court and registrar to grant orders on matters like probate of wills and grant of administration. Section 3-108, with appropriate exceptions for wills previously proved in the decedent's domicile and appointments necessary to complete unfinished administrations, bars either probate or appointment proceedings commenced more than three years from death. Section 3-803 bars unsecured claims against a decedent which are not presented to a personal representative within three years of death. The section applies whether or not a personal representative is appointed.

From these provisions, it can be seen that the Code continues the traditions of post-mortem probate of wills and creditor protection via a publicly appointed personal representative. But the limitations and other features of the sections offer new opportunities for survivors to avoid all contact with the probate court.[151]

When contact with the probate office is necessary or desirable, "informal proceedings" before the registrar, consisting largely of examination to determine whether sworn applications are complete and consistent with the Code's guidelines and involving no notice or delay (other than a mandatory period of five days after death) are available to handle the critical steps of probate and appointment.[152] By contrast "formal testacy proceedings" before the judge of the Code's court are offered to provide adjudications concerning testacy which may be original, corroborative of previous informal proceedings or motivated by someone's desire to contradict an informal order.[153] Also, formal appointment proceedings are available to aid

---

151. The Code does not compel probate or appointment. If three years from death elapses before a decedent's survivors take any action involving the probate office, any wills of the decedent are barred from probate and unsecured claims against his estate are eliminated. The heirs to whom the estate devolves upon the decedent's death hold the estate free of claim or encumbrance except any resulting from tax legislation or existing against the decedent before his death. Of course, it may be necessary to determine who the heirs are, and § 3-102 leaves small possibilities that a later discovered will may be used to prove another succession. Also, certain rights to homestead and exempt property may be asserted without the necessity of administration. Still in many situations, the most significant compulsion for securing administration of a decedent's estate will be to gain the protection for purchasers and persons transferring a decedent's assets which are keyed to an appointment. See §§ 3-703, 3-714, 3-910.

152. Article III, Part 3.

153. Article III, Part 4.

resolution of disputes relating to priority or qualifications of an applicant for appointment.[154]

Another point should be noted. The Code permits a will to be probated, either informally by the registrar or in formal proceedings before the judge, with no attendant requirement that the executor named therein be appointed or otherwise empowered to settle the estate.[155] If the decedent is believed to have died intestate, a formal proceeding for an order finding this fact and determining heirs is available without appointment of an administrator. Thus, the Code avoids a problem of the *Model Probate Code* which swept the question of will or no will into a single proceeding involving administration.[156]

If no will is offered for probate and no steps are taken to administer an estate as intestate within three years of a decedent's death, the heirs are secure in their claim to the estate. Exceptions to 3-102 permit a later offered will to be admitted in evidence without having been probated, but only if there have been no estate proceedings of any kind *and* to confirm a possession enjoyed during the three year period by the devisee, or to prove succession to an asset which was unknown to successors of the decedent during the three year period for administration. Heirs will not be able to offer assurance to purchasers or transfer agents until the three years has elapsed, but unless and until someone proves a will or secures appointment of an administrator, their possession of an estate following the decedent's death is lawful and may be enforced against third persons who cannot show interest in the estate. Hence, a decent opportunity to avoid probate court contact is afforded heirs who possess a decedent's assets and satisfy his creditors. Predictably, prospective purchasers and transfer agents dealing with heirs who follow this route will require assurance concerning the identity of the heirs, the date of the owner's death and some proof relating to possession of the assets during the three year period.[157]

---

154. § 3-414. The question of priority to serve as personal representative may be resolved by decision that the decedent died testate, or that he left no will. If so, the testacy proceeding described by § 3-401 would be appropriate.

155. §§ 3-301, 3-401.

156. The MODEL PROBATE CODE has been criticized for its failure to permit probate without administration. *See* Rheinstein *The Model Probate Code: A Critique*, 48 COLUM. L. REV. 534 (1948).

157. *See supra* note 151.

One who claims under a will and is also interested in minimum contact with the probate court, may obtain probate of the will in informal or formal proceedings and then await passage of time. If his probate proceeding was informal and therefore non-adjudicative, the running of three years from death will perfect his title as well as bar all claims of possible unpaid creditors. If the probate was formal, the title probably will have been perfected before three years bars any possible creditor who has not been paid.[158] The devisee who avoids administration will need releases from any spouse or children who have statutory rights to take ahead of the will.[159] Also, he will have the full burden of any interpretive problems concerning the will. Still, many cases can be imagined in which neither kind of difficulty will arise.

Having noted that administration of both intestate and testate estates can be avoided, it is appropriate to take a closer look at what administration under the Code entails. It's fair to say at the outset that administration should offer more advantages than problems for most categories of survivors.

Section 3-103 states that administration is commenced by appointment of a personal representative by the Court or by the Registrar. As noted above, either probate of a will, appointment of a personal representative, or both may be obtained in a non-adjudicative "informal proceeding". However, petitioners have the option of getting binding determinations by the Court regarding will or no will, or settling questions of priority and qualification regarding persons who seek to administer estates.

After securing letters, a personal representative whether acting as executor under a probated will, or as an administrator in intestacy, becomes in effect a statutory trustee. The Code gives him the duty and the necessary powers and protections to permit him to accomplish

158. § 3-412 permits vacation of an order in a formal testacy proceeding for certain reasons if the petition for vacation is filed prior to the earlier to occur of closing of an administration, one year from entry of the order, or three years from the date of death.

159. Certain family rights described by Parts 3 and 4 of Article II may be implemented without administration. The right to an elective share which a surviving spouse may assert under Part 2 of Article III is barred if not properly asserted within six months after the appointment of a personal representative. Although the Code is not explicit on the point, it would seem that the elective share is barred by the failure to commence an administration within three years after death. *See* §§ 2-205, 3-108.

the entire job of collecting assets, paying debts, and selling land or intangibles as needed to raise necessary cash and distributing the estate to the successor.[160] If desired, all of these steps can be handled without further court orders.[161] Again, however, isolated adjudications to answer particular questions or general orders settling accounts are available as needed.[162]

Creditor's claims are presented by simple statement to the representative, and barred by statutes of limitation if not presented.[163] Purchasers and transter agents are protected if they deal with a representative, even though he may be violating the will or otherwise breaching a duty.[164] Distributions will be on risk of liability by distributees for repayment unless suitable adjudications to eliminate risk occur.[165] Because the representative is not an officer of the court, and because the draftsmen sought to make intestacy resemble the will which an average person would want, no bond is required unless requested. Also, no reports or accounts need be filed with the Registrar or court unless a proceeding is commenced.[166]

The status of a personal representative, including all statutory powers and abilities to protect third persons, is the same whether his appointment is obtained in formal or informal proceedings.[167] Also, unless a special proceeding called "supervised administration" is ordered at the petition of an interested party,[168] the authority of either court or registrar over a personal representative ends with the appointment.[169] Later proceedings may bring the personal representative before the court for any appropriate order, but a petition by the

---

160. Article III, Part 7, describes the duty and power of a personal representative. Article III, Part 8, describes methods by which a personal representative may secure protection against creditors of the decedent and the estate, and Parts 9 and 10 are relevant to the personal representative's liability regarding distributions. § 3-703(b) which protects a personal representative who proceeds without protection of a formal order regarding testacy is especially important.

161. §§ 3-107, 3-704.

162. § 3-105.

163. §§ 3-801 through 3-804.

164. § 3-714.

165. §3-909. But, purchasers from distributees are protected by § 3-910 and § 3-703 protects the personal representative unless the distribution was unauthorized by the terms of a probated will or involved a mistake as to the identity of devisees or heirs.

166. § 3-107; *See supra* note 82.

167. §§ 3-107, 3-307(b), 3-601, 3-602, 3-703.

168. Article III, Part 5, describes supervised administration.

169. § 3-107. *Cf.* § 3-602.

representative or other interested person is necessary to institute a later proceeding.[170] In this fashion, the Code offers the option of independent administration for both intestate and testate estates.

The meaning of all this is that unless someone demands notice as is possible under Section 3-204, the heirs of a decedent who is believed to have died intestate may obtain an appointment of a personal representative five days after the decedent's death.[171] After obtaining letters, the person or persons appointed assume a role very much like that of trustees of a well drawn revocable inter vivos trust who are directed to distribute trust estate remaining after the settlor's death after first satisfying all of his creditors. However, differing from such a trustee, the basis for the authority of the personal representative will be a matter of record in the registrar's office. Also, by accepting letters, a personal representative consents to personal jurisdiction of the Court in any proceedings which may relate to the estate.[172]

If a will is involved, its probate must be obtained prior to appointment of the named executor.[173] However, probate in informal proceedings will suffice. Even if the security of a binding order on the question of will or no will is desired, the Code encourages use of an informal probate to establish the will so that the executor may be appointed, after which a corroborative formal probate proceeding may be initiated without impugning the authority of the earlier appointee in any way.[174]

3. *Protective Features*

Before assessing the overall desirability or fairness of the administrative system, the Code's protective devices must be considered. Many relate to the fact that persons who seek to acquire useful control of a decedent's assets via a personal representative must make application to a public office for proof or authority. It is true that heirs acquire title to a decedent's assets upon his death and without prior contact with any public office, but their authority will not enable them to give a marketable title, at least for some considerable period.[175] Devisees are entitled to immediate possession pending ap-

170. § 3-105.

pointment of a personal representative, but only if they can prove their right and they may not use a will for the purpose unless it has been probated.

Several features of the public office contact required of survivors who seek to control a decedent's assets involve meaningful safeguards. The Code prescribes the content of applications for informal orders and forces applicants to divulge a good deal of information about the decedent, his survivors and his status in regard to known wills.[176] Misstatement may involve perjury.[177] Also, Section 1-106 specifies that one guilty of fraud in connection with any proceeding or statement filed with the Court remains personally liable to persons injured thereby until two years after discovery of the fraud. No order in an informal proceeding may be entered until five days from death has passed.[178] Any person with an interest in an estate may block the possibility that a future informal order may be made without notice to him by filing a demand for notice at any time after the decedent's death.[179] Also, a formal proceeding to probate a will or to declare that the decedent died intestate, or to secure appointment of a personal representative, or both, may be initiated at any time within three years after death by any interested person.[180] If initiated before an informal order has been made, this proceeding prevents issuance of an order without notice.[181] Notices required by the Code must be by personal service or mail.[182] Mere publication is not enough, except as it serves to start a limitation period which will bar creditors who fail to present claims.[183]

Further, anyone seeking appointment as a personal representative must satisfy the Registrar that he has priority ofr appointment under Section 3-203.[184] Unless there is a will, Section 3-203 assures priority for the spouse of the decedent, and if there is no spouse, gives a joint priority to all heirs. If there are several, each must concur before one or a nominee of the group may be appointed. If concurrence is not

184. § 3-308(7). *Cf.* § 3-309.

demonstrated to the Registrar, the proceedings must be recast as formal proceedings.[185] Here, the judge may select a personal representative, but only after notice to all interested persons and an opportunity for hearing.

Finally, one having priority must qualify by posting any bond required by will, or required because another interested person has filed a demand for bond with the registrar before the appointment letters may issue.[186]

If an interested person fails to take steps to protect himself in advance against appointment of one he deems undesirable, and the inherent protection of being a beneficiary of a statutory trust is not sufficiently reassuring, there are several other remedies. The worried successor or creditor may impose a requirement of bond by demand,[187] institute proceedings to enjoin or limit the power of the appointee,[188] institute a formal testacy or appointment proceeding to test the basis of the appointment and thereby limit the broad power otherwise available to the appointee,[189] or obtain removal of the appointee if any misstatement appears in his application for appointment.[190] Also, he may initiate a special proceeding seeking supervised administration.[191] If his request for supervised administration is granted, the letters of the personal representative may be endorsed to indicate any special restrictions on power.[192] Also, a supervised personal representative may not distribute without order of the court.[193] As may seem from Appendix A, these precautions combine with other considerations to support omission from the Code of any blanket statutory requirement of bond.

4. *Notices*

Is the Code defensible in regard to notices? The approved version imposes a duty on every personal representative to mail notice to every interested person, including heirs apparently disinherited by

185. § 3-203(e).

193. § 3-504.

the will which provided the basis for his appointment.[194] Further, each personal representative is under a statutory duty to publish notice for creditors once each week for three weeks following his appointment.[195] Failure to advertise makes the personal representative personally liable to creditors who may prefer to reach him than to pursue distributed estates. No other notices are required unless some interested person seeks an adjudication in formal proceedings. Then, only those given notice in accordance with the Code's scheme for notice are bound.[196] If an adjudication of a decedent's testacy is sought, the Code requires mailed or delivered notices to all known persons having interests and a published notice for the benefit of possible unknown successors.[197] As previously noted,[198] if property is distributed to devisees under an informally probated will which is later contested successfully in proceedings started before the three year limitation period runs, the personal representative is exonerated, but the persons who received the estate remain personally liable to restore what they have received or its value. Purchasers from the personal representative, or from distributees following an unadjudicated distribution, are protected from liability to the heirs in the case supposed.[199] The same pattern of relationships apply to an estate which is distributed prior to discovery and probate of a will in a case where there was no prior adjudication of intestacy.

Lawyers in states which presently require some form of notice to interested persons before issuance of letters tend to recoil from the idea that the wide power over estate assets given by the Code to a personal representative may be obtained without some form of advance notice to interested persons. There are, however, several justifications for the Code's position on this point. The most important is that the proposed system, featuring issuance of letters without notice and non-supervised administration, has been proved satisfactory by generations of use in Pennsylvania.[200] Many other states also permit

194. § 3-705. In Working Draft Number 5, this section only required notice to heirs of a testate decedent when it appeared that the will related to less than all of the estate.

letters of administration to be obtained without advance notice,[201] and it is widely recognized that one with letters has full practical control of the decedent's liquid assets notwithstanding the degree of "supervision" exerted by the court following appointment. Thus, accumulated experience affirms that survivors do not avail themselves of the possible opportunity afforded by ability to get letters quickly and without notice to take advantage of fellow heirs.

Also, one urging that notice should be required before a personal representative can gain control of assets must assume the burden of explaining why the probate route to control of assets must be more awkward than non-probate alternatives which are freely available. Thus, joint accounts and revocable trusts, and the acknowledged ability of persons who are close to an owner before and immediately after death to cause his liquid assets to appear to belong to survivors, will continue to provide working alternatives to the probate route which will permit some survivors to gain control of assets without advance notice to other heirs. Family pressures and basic honesty must provide satisfactory controls for this power. Otherwise, our law of probate alternatives surely would not be as it is. Also, it is sensible to match probate rules functionally similar to those applicable to probate alternatives. Owners should be encouraged to allow their estates to flow through probate where some record of assumption of responsibility for control of assets is created.

Another reason for permitting letters to issue before notice is that many of the Code's safeguards tend to reduce any associated risk. Letters may not issue without notice to anyone having a better or equal right to letters. Letters may not issue without notice to anyone who has demanded notice.

Finally, a requirement of notice before probate has implications which tend over time to run against the objective of keeping succession procedures simple. An order after notice appears to be a judicial act which adjudicates rights. Traditional considerations relating to

---

201. In a recent ABA survey, respondents from eleven of twenty-three states contacted indicated that no notice, other than possibly by publication, is required in regard to an application for appointment of an administrator. The states so indicated as supporting the proposition that letters are available without notice are: Colorado, Florida, Illinois, Iowa, Maryland, Minnesota, North Carolina, Ohio, Pennsylvania, Texas and Vermont. *See Estate Administration: Current Practices and Proposed Uniform Probate Code*, 3 REAL PROPERTY, PROBATE AND TRUST L. J. 2 (1968).

procedural due process suddenly become important though most would concede that a state does not have to dispense control of decedents' estates through judicial proceedings. A magistrate who has authority to make an order only after notice to interested persons may shrink his effective responsibility to that of checking notices. Such a dispersal of responsibility causes inefficiency. Worse, the magistrate may decide that he should require extrinsic proof of heirship to assist in determining whether a requirement customarily associated with jurisdiction has been met. Also, a requirement of advance notice creates a necessity for guardians for minor heirs who may receive or waive notice. After thinking the matter through, one who starts with the idea that a notice requirement would provide a simple way of providing safety for survivors, may well get to the conclusion that a requirement of advance notice almost guarantees that a supposedly simple system will become complicated.

The gist of the argument in support of the Code's provisions regarding notice, or the lack thereof, may be seen in an excerpt from a memorandum adopted by the co-chairmen of the Special Committee which controlled the drafting effort.[202] This responded to contentions by representatives of the legal advertising industry that due process considerations supported their request that published notice be required for every estate before issuance of letters, at the beginning of administration, and at closing.[203]

The position of the newspapers' representatives reflects a misapprehension about the system of administration described by the Code, and a dubious judgment about the effectiveness of legal publication as notice. Thus, the opening statement of their memorandum asserts: "When the state assumes a role in the marshalling and distribution of assets of an estate, it also assumes an obligation to afford due process to all interested parties."

But, the informal proceedings described by the Code are not proceedings leading to binding adjudications affecting rights. Rather, informal probate or informal appointment are events which individuals may cause because the statute sanctions them. No judicial

order is involved. Also, the status and power of a personal representative are conferred by statute under described statutory conditions. Rights of possible successors of a decedent are not finally determined by the statutory proceedings unless and until the basic statute of limitations of three years elapses. Claims of possible successors cannot be cut off earlier except through the process of litigation. If this occurs, the Code makes it quite clear that the best possible notice must be given to persons whose interests may be affected by the questions involved.

Statutes create the power in owners to control their estates by will and define who takes in intestacy. We assume the newspapers recognize that statutes creating successors' rights may define those rights. This makes published notice unnecessary. If the newspapers are correct that notice is necessary, the no notice probate systems followed presently in several states are invalid. It would also follow that a state is powerless to provide an efficient system of succession to property owned at death. This lack of authority would be most unfortunate in view of the clear evidence that a simple system based on confidence in the basic honesty of people is desired by thousands. The committee believes that this authority exists.

5. *Bonds*

The surety bond industry sent a copy of a letter attacking the Code's provisions regarding probate bonds to every member of the National Conference of Commissioners on Uniform State Laws in advance of the 1969 meeting.[204] The gist of the industry's position was that there is no precedent for the Code's basic position that no bond is required of any personal representative except as specified by will, demanded by interested persons or required by the Court in formal proceedings.[205] The concluding paragraph of the letter con-

204. Communication of David Q. Cohen, Counsel, American Insurance Association, 85 John Street, New York, New York 10038, dated July 1, 1969, addressed to "The Commissioners on Uniform State Laws, The Special Committee and the Reporters on the Uniform Probate Code, the American Bar Association Committee to Review the Model Probate Code, The American Bar Association Advisory Committee to the Special Committee on UPC, and The American Bankers Association Liaison Committee."

205. A recent article about the Code erroneously reports that bond is required of personal representatives only when it is determined to be necessary by the court. *See* Lawrance, *Uniform Probate Code — Some Current Comments,* 108

tains the following sentence: "We believe the Code goes overboard in its treatment of the bonding of administrators and its fantastic reliance on naked legal rights as an effective substitute for security." In addition to the letter, several representatives of the industry met with members of the National Conference at a hearing in Dallas held on Sunday, August 3, 1969, to press the objection to the Code's bond provisions.

In response, the Special Committee prepared two documents which were on the desk of each commissioner at the beginning of the Dallas meetings. One of these, reflecting statistical data collected in an important research project concerning probate conducted in Cleveland, Ohio, illustrated that most probate estates are quite small and only a few involve controversy. The second was a detailed brief in support of the Code's position on bonds.

These documents are an important part of the legislative history of the Code. For this reason and in the interests of assisting state legislators who are certain to be bombarded with contentions that the Code does not provide adequate protection for inheritors of intestate estates, these documents are reproduced in the Appendix.

Conclusion

The American probate institution reflects more than two centuries of experience with an unfortunate legal premise. The accumulation of courts and procedures which now surround the simple matter of succession to property of a decedent is a sad monument to the predilections of the legal and political communities to serve their specialized interests when public ignorance or indifference permit. Though public interest in probate has come alive, it remains to be seen whether lawmakers will make the correct response. If they do not, the old institution will simply wither away as the public and responsive counsellors perfect private corrections for bad probate law. The Uniform Probate Code offers a way by which states can find a more constructive approach.

Trusts & Estates 1133 (1969). The Code requires that an executor must post bond before receiving letters if bond is required by the terms of the will (§§ 3-601, 3-603). In other cases, bond is required if demanded by any interested person (§ 3-605). Bond requirements so generated may be negated by the court upon finding that no bond is required, but the requirement remains until countermanded in formal proceedings.

In all probability, the Uniform Probate Code probably will not be adopted by any state in exactly the form approved at Dallas. Its substantive provisions invite changes in rules which are so old as to be confused with the natural order of family expectations. The tougher sledding will be against the vested interests which will seek to protect themselves by a few small and well camouflaged changes in the sections dealing with bonds, published notice and court control of estates. The complexity of the procedural provisions makes the Code vulnerable to this kind of attack and compromise.

But, the Code also places dozens of important and heretofore obscure details of probate procedure in a rational setting which may make it easier for proponents to show how each contributes to an important effort at law reform. Hence, it should be a valuable format for local studies. In the final analysis, however, the future of the Code is closely linked to the larger question of whether modern lawmakers are able to chart a course toward some reduction of a local political institution which has prescribed its own needs for function and growth for a very long period.

APPENDIX

The two documents which are reproduced here were distributed to members of the National Conference of Commissioners on Uniform State Laws at the beginning of the 1969 meeting in Dallas. The "Probate Fact Sheet" summarizes some data abstracted from the manuscript, *The Family and Inheritance, op. cit.*, note 33. The memorandum concerning bonds is described in the text at note 197.

PROBATE FACT SHEET

(From a survey of decedents' estates, Cuyahoga County, Ohio, closed or released from administration between Nov. 9, 1964 and Aug. 8, 1965, as revealed by a sample of one out of every 20 estates docketed.)

Frequency of Probates	*County population*	2 million
	# of estates per month	1,464
Testacy	% of testate estates	69%
	% of intestate estates	31%
Size of Gross Probate Estate	*Mean* gross value, all estates	$ 31,097
	Mean gross value, testate estates	41,218
	Mean gross value, intestate estates	8,599
	Median gross value, testate estates	15,000
	Median gross value, intestate estates	6,000
Frequency of large ($60,000) and small ($2000) estates	48 estates, or 7.3% of those sampled, grossed over $60,000. Only 2 of these were intestate. 85 estates, or 13% of those sampled, grossed under $2,000, and the remaining 526 grossed between $2,000 and $60,000.	

		#	%
Time in Probate	*up to 9 months*	210	or 31.9%
	9 to 15 months	290	or 44%
	over 15 months	159	or 24.1%
Survivor Patterns	Spouse only	60	9.1%
	Spouse and lineal heirs	321	48.7%
	Lineal heirs and no spouse	191	29.0%
	Collateral kin	75	11.4%
	No known kin	12	1.8%
			100.0%

Frequency of Disputes	Will contests were instituted in 6 or 1.3% of the testate cases. All 6 cases were settled. Claims for or against estates for debts alleged to be due, or assets alleged to belong in probate, occurred in 6 estates.
Creditors' Claims	Aside from funeral expenses, no debts of any sort appeared in probate records in *41% of all estates grossing between $6,500 and $15,500*. For smaller estates, the "no debt" category accounted for from 46% to 90% of all estates. The report concludes "In general, we do not find that debts constitute a significant problem in the settlement of an estate. First, the

debts usually constitute a small proportion of the gross estate. Second, the survivors of the decedent usually make provision for payment without the necessity of court proceedings."

MEMO

July 8, 1969

TO: The Special Committee, Uniform Probate Code

FROM: R. V. Wellman, Chief Reporter, Uniform Probate Code

RE: Probate Bonds and the Uniform Probate Code

The attached statement of the Chief Reporter responds to the memorandum concerning probate bonds by Mr. Cohen of the American Insurance Association. We concur with Professor Wellman in this response, and urge every Commissioner to give this document their careful attention.

You have received Mr. Cohen's memorandum of July 1, 1969 on behalf of the American Insurance Association, which presents the case against the draft Code's proposals relating to probate bonds. The purpose of this memorandum is to enable members of the National Conference to see both sides of the matter.

Provisions of Draft Code on Bonds

The draft code which the National Conference will consider at Dallas is not silent on the subject of bonds for fiduciaries who are subject to probate court jurisdiction. Sections 3-603 through 3-606 cover the subject as it relates to personal representatives of decedents; e.g. executors and administrators. Sections 5-411 and 5-412 cover bonds for conservators and Section 7-304 deals with bonds for trustees. It may be inferred that the American Insurance Association is content with the provisions concerning bonds for conservators and trustees, for Mr. Cohen's memorandum deals only with bonds for personal representatives. In any event, this memorandum is limited to a discussion of bonds for personal representatives of decedents.

The code uses the term "personal representative" to include executors under wills and administrators in intestacy. It proceeds from the assumption that there is no fundamental difference between these offices.

Section 3-603 provides that bond for a personal representative is required if:

(a) it is so ordered by the court in formal proceedings;

(b) any person having or claiming an interest in the estate worth in excess of $1,000, demands bond by writing filed with the probate court registrar with a copy mailed to the personal representative; or

(c) bond is required by the terms of the decedent's will.

The Section also states that bond is not required in other cases.

Elsewhere in Article III, the code specifies that a personal representative's appointment may result from adjudication after notice to interested persons by the judge of the probate court (formal appointment), or it may occur without notice or delay following application to the registrar (informal appointment). In either event, an appointment creates a statutory fiduciary who, unless appointed

in formal proceedings as a "supervised" personal representative, is beholden only to the creditors and successors of the decedent to carry out the purposes of administration as expressed by the code. The public office making the appointment has no further responsibility in the matter, unless and until its jurisdiction as a court is invoked in extraordinary estate proceedings by or against the personal representative. (3-107).

Some other details of the Code are relevant to bond. Except for a special representative, no informal appointment may be made after a petition seeking a court order concerning an appointment been filed (3-401; 3-414) and bond may be required for a special representative, however appointed. (3-603) This means that any interested person can be assured that the judge will have an opportunity to pass on the need for bond before any appointment is made. All he needs to do is to file a petition in a formal probate or appointment proceeding before an informal appointment has been made. In this connection, it is important to note that no informal appointment may be made until five days from death have elapsed. (3-307(a)) As to appointments in informal proceedings, an obligation to post bond arising from the provisions of a probated will must be met before the personal representative may receive any evidence of his authority. (3-601) An obligation to post bond arising from demand of an interested person made after a representative has been appointed is enforced by (a) the personal representative's statutory powers are suspended until the bond requirement has been met (3-605); (b) on petition, the personal representative may be restrained in any manner (3-607) and (c) if a demand for bond is not complied with within 30 days, on petition the personal representative can be removed. (3-605)

From the foregoing, it may be seen that the risk that someone can gain powers as a personal representative before a judge has had an opportunity to pass on the desirability of bond is narrower than the possibility that a personal representative may be appointed informally. The difference is measured by cases where a will's terms require bond. To the extent the probate office has authority to deny an informal application for appointment, thus forcing applicants to seek a judicial order after notice if they desire appointment of a personal representative, the risk is further reduced. It should be noted in this connection that Section 3-309 recognizes that the registrar may deny an application in informal proceedings for unspecified reasons. In a sense, therefore, the code provides public officials with an opportunity for discretion in regard to bond in advance of every appointment which may be requested.

Focus of the Insurance Industry's Criticism

It is important to see the exact thrust of Mr. Cohen's criticism of the code. He does not complain of the discretion re bond which the code grants to a judge who may be making an appointment in a formal proceeding. He says nothing about the provision, modelled after existing law in about 40 states, which gives testators some control over whether bond requirements should be visited on their executors. He seems to accept the blanket excuse from any bond requirement for fiduciaries who have complied with state statutes contemplating deposit of cash or collateral by professional fiduciaries. His sole complaint seems to lie in the possibility that an unbonded personal representative may be appointed informally in a case where the testator has said nothing about bond.

In passing, it is to be noted that either the decedent or his survivors can prevent the case which Mr. Cohen is concerned about from occurring. The decedent may require a bond by his will. If the will is probated, its provisions concerning the personal representative have priority over other mechanisms for identifying who should be the fiduciary (3-203), and if the decedent requires the person he

selects to post a bond, bond must be filed before the appointment can become effective. (3-601) In any event, any interested person can prevent an informal appointment by filing a demand for notice and initiating a formal proceeding for probate or appointment. (3-204; 3-401) Interested persons are further protected against surprise by the requirement that five days delay after death precede any appointment. Thus, in a significant sense, the decedent, his creditors and survivors have important control of whether a bond requirement should be imposed at the time of appointment. To cover cases where it may appear from the detailed recitals required of every petition that interested persons may not know what is occurring, the registrar may deny an informal appointment, thus guaranteeing notice and judicial discretion concerning a possible bond requirement before any appointment

We seem to be left with a large controversy over a relatively small category of cases involving intestate decedents whose survivors either know or care too little to avail themselves of the opportunities given them by the Code for preventing appointment of an unbonded individual.

Here, we must face the questions of who these appointees are likely to be and whether the position of the Code that no bond is required unless desired by someone from the court office or with an interest in the estate is sound. Once the risk area is identified, we must ask whether a bond requirement for every individual personal representative is the appropriate remedy, as compared with the Code's flexible system of remedies, including personal liability of any defaulting fiduciary, liability of persons who receive erroneous distributions, and an on-going opportunity for any person to demand bond, or initiate supervised administration.

Perhaps, however, we should assume that Mr. Cohen also objects to the approach of the Code in testate cases which is that a testator may alter the basic rule of no bond by a provision in his will. In many states, the matter is the reverse of this with testators having power by will to alter the law's basic requirement of bond. In this posture, the response to Mr. Cohen's criticism should lead us to an inquiry about the usual habits of professional will draftsmen in regard to bonds and to an analysis of the proper role of legislation relating to a subject commonly covered by wills.

Summary of Position in Support of Code

The argument in support of the Code's position regarding bonds in intestate estates is relatively simple. It rests on the fact that the heavy majority of cases falling within the category in question will involve very small estates being administered by a close family member for himself and other members of the family, or by an attorney or other outsider who is agreed to by the survivors after the decedent's death. The Code accepts the proposition that succession to small, unplanned estates should not be made relatively more expensive or complicated than succession to larger estates. Thus, bond requirements which are routinely avoided by persons planning large estates, should not be imposed on successors to modest estates. It also reflects the belief that the value of probate bonds is sufficiently unclear to make it unwise for state law to require bonds for any category of cases.

Finally, the Code proceeds from the assumption that existing probate statutes relating to administration of intestate estates must be improved rather than perpetuated if the nation's probate problems are to be corrected. Too much existing law regarding estates reflects the interests and attitudes of estate planners and others whose professional interests have made them acutely aware of problems which have nothing to do with the vast majority of estates in probate. Too little thought has been given to the concern about probate of most citizens.

Sources of Data: The Cleveland Project and the ABA Survey

A book will be published soon called *The Family and Inheritance*. Its authors are Marvin Sussman, Judith Cates and David Smith. Drs. Sussman and Cates are sociologists; Prof. Smith teaches law. The book is the report of a research project financed by a grant by Russell Sage Foundation and conducted by the authors under Dr. Sussman's direction at Case-Western Reserve University in Cleveland, Ohio, during the period from 1965 to 1969. The project involved a detailed analysis of a random sample of one out of every twenty estates closed in Cuyahoga County, Ohio, during a one year period extending from a date in 1964 to a date in 1965. The sample, reflecting 13,180 estates, consisted of 659 estates. Data from probate records was collected and survivors of the decedents involved were systematically interviewed by trained persons.

The survey and the report were planned and accomplished by professional social scientists who sought only to produce solid data for use by lawmakers. The results should be of enormous utility to everyone who is concerned with the problems of probate law. For convenience, data appearing in the manuscript of the report book is referred to as resulting from the "Cleveland project".

During the year 1967-68, the Committee on Administration and Distribution of Decedents' Estates of the Real Property, ABA Probate and Trust Law Section, distributed a questionnaire about probate procedures to its 28 members. Returns were received from lawyers in 23 different states. A report of their answers appears in Vol. 3, No. 2, Real Property, Probate and Trust Journal (Summer 1968) at p. 142. References in this memorandum to the ABA survey are to the answers as tabulated from the returned questionnaires rather than as summarized in the published report.

Relevant Data

a) Size of Estates

Most estates in probate are relatively small estates. According to the Cleveland project, 68.7% of estates are testate and 31.3% are intestate. The *median* testate estate grossed $15,000; the median intestate estate grossed only $6,000. The average or mean worth of all intestate estates was only $8,599. None of the thirty-two decedents in the sample whose estates were taxed under the federal estate tax law were intestate. It is safe to conclude, therefore, that more than half of all estates in probate gross less than $15,000, and that most intestate estates having some contact with probate court are significantly smaller than $15,000 in gross value.

These same figures demonstrate that there is a positive correlation between the size of estates and the likelihood that the decedent left a will.

b) Typical Survivor Patterns

Of the 659 estates involved in the Cleveland project sample, the surviving heirs consisted of spouse and descendants, spouse only, or descendants only, in all but 87 or 13% of the cases. In 12 of the 87, or about 2% of the total, the decedent appeared to have left no relatives, and in 75 cases, or about 11% of the total, collateral kin were the survivors.

c) Likelihood of Inheritance by Minors

Though the Cleveland project did not focus on the age of inheritors, some of its data is relevant to the probability of inheritance by minors. First, as suggested by a) above, inheritance by collateral heirs, including minors, is relatively rare. Second, the age of the decedents identified in the sample averaged 67.9 years. It is unlikely that many persons of this age have minor children. Third, the com-

monest instance of wills altering the intestate pattern occurs where the decedent had a wife and children. The draft of the Cleveland report states: "Testators who are survived by spouse and lineal kin most often deviate from the statutes to bequeath the entire estate to the spouse. Decedents survived by spouse and lineal kin had a high rate of testacy (72.8%) despite the fact that they are six to ten years younger than the other groups." (Chapter IV)

d) Protection of Creditors

Confirming beliefs which many have held for a long time, the Cleveland project demonstrates that probate procedures have little real meaning for creditors of decedents. 38.5% of all estates list no debts other than funeral expenses. The report states "This does not necessarily mean that the decedent had no debts at the time of his decease. It is likely that his spouse or another survivor paid the lawful debts and did not bother to render an accounting. It will be remembered that the vast majority of our estates were small and no tax advantage would accrue to the heirs from careful bookkeeping and reporting. [The following table] indicates the smaller the estate size, the higher the percent of estates with no debts." The report then indicates no debts were listed in 90% of estates under $2,500, 45% of estates between $2,500 and $6,500, and 41% of estates between $6,500 and $10,500. The section on debts is concluded with the following observation: "In general, we do not find that debts constitute a significant problem in the settlement of an estate. First, the debts usually constitute a small proportion of the gross estate. Second, the survivors of the decedent usually make provision for payment without the necessity for court proceedings."

e) Cost of Probate Bonds

The cost of probate bonds varies markedly from state to state. Respondents to the ABA questionnaire answered as follows to the question "What is the usual cost of a fiduciary bond for each $10,000 of estate assets?":

Vermont	$10.00
Florida	$20.00
Ohio	$25.00
N. Hampshire	$30.00
Iowa	$40.00
Colorado	$40.00
N. Dakota	$40.00
Wisconsin	$40.00
Illinois	$50.00
Minnesota	$50.00
Mississippi	$50.00
N. Carolina	$50.00
Rhode Island	$55.00
Texas	$55.00
Maryland	$60.00
Washington	$60.00
Michigan	$60.00
Oregon	$60.00
Kansas	$72.50
Oklahoma	$100.00

Another fact about the price of probate bonds which has been conceded by industry representatives is that current price scales for probate bonds have been in effect since 1929 in many areas of the country.

One can only surmise that these curious features of probate bond prices are related to the fact that bonds have been required by statute for generations. Local history in each state rather than the law of supply and demand, has controlled prices.

f) Frequency of Claims on Probate Bonds

It is difficult to estimate how many estates must have been within the experience of the lawyers who responded to the ABA questionnaire. It is commonly assumed that practitioners identifying themselves as probate lawyers tend to have more years of experience than other categories of practitioners. Nonetheless, only 5 of 22 respondents answered affirmatively to the following question: "Have you or has any member of your firm ever been involved in a suit to recover on a fiduciary bond?" One respondent from Illinois wrote as follows: "Prior to engaging in probate work with my employer, I practiced privately a number of years and never observed a suit to recover on a fiduciary bond. I inquired recently of the largest law firm in Chicago and they reported they could not recall such a suit, and, indeed, was so rare they could only cite an instance which hit the newspapers a few years ago."

Argument and Conclusions

Testate Cases

Testate cases arising under the code normally will involve fiduciaries selected by the decedent. The code invites testators who believe that the person chosen should be bonded to require bond. No prospect of exercise of fiduciary power before the bond requirement is met exists where the decedent imposes the bond requirement.

No blanket bond requirement should relate to testate cases where the will is silent on the question of bond. The fiduciary usually will be selected by the testator. Provisions excusing executors from bond requirements are boiler plate in the forty-two states where testators now can control bond. The practice of draftsmen suggests what the law should infer to be the wish of the occasional testator who says nothing about bond.

Further, the option of formal or informal probate offered by the code should serve to bring the most tension-ridden situations before the judge in a formal proceeding. To the extent this occurs, it is also quite probable that appointment of the personal representative will be by the judge who will thus have an opportunity to impose a requirement of bond if it seems desirable under the circumstances.

Intestate Cases

If we pay any attention at all to the facts developed by the Cleveland project, we must conclude that the typical intestate estate is quite small and so, under the Code's scheme of intestate distribution likely to pass entirely to the surviving spouse if any, or to children where there is no spouse. The insurance industry's representative concedes that bond is inappropriate where the personal representatives takes the whole estate. Either he agrees that the possibility of claims against the decedent does not warrant a bond, or his concession is meaningless for the *possibility* of debts will exist in every estate. The Code's system of priorities for selection of administrators in intestacy is set forth in Section 3-203. The spouse has priority over other heirs. As among heirs having equal priority, each is entitled to notice of even an informal application of any other and each must concur in identifying some one or more of their group or some outsider who may be selected. (3-310) If an application is falsified to prevent the registrar from identi-

fying persons with prior or equal right to appointment, the applicant may be charged with fraud, removed if appointed, or subjected to other appropriate remedies.

The argument recurs that bond must be imposed in every intestate estate in order to protect possible minor heirs, and persons who though presently unknown may turn up later and establish some right to the estate. These points need to be separately considered.

As to minors, we must remember that the average age of decedents is such as to make it unlikely that minors will be included in the usual circle of survivors. Secondly, unless there were children by a prior marriage, only relatively large (over $50,000) estates will devolve on children of the decedent if there is a surviving spouse. Third, the effect of Part 4 of Article II of the Code is to give a surviving spouse the first $14,000 or so of a gross estate ahead of the claims of creditors and any children by a prior marriage. Finally, under 5-103, the code approves of the idea that a parent or other adult with whom a minor resides may receive up to $5,000 per year from any person owing money to the minor. This section reflects the view that elaborate protective relationships can and should be avoided where relatively small property interests of minors are involved. It is a purpose of the Code to extend to small property interests the same flexibility and freedom from expensive and overly-elaborate protective arrangements which typical trust provisions and gifts to minors legislation indicate to be desired by wealthy persons.

Finally, we must not overlook the pressures built into the code which will tend to produce formal proceedings whenever significant values appear to be owned by minor or incompetent persons. As noted earlier, once formal proceedings occur, the court has discretionary power to require any appointee to post bond. Also, the court may appoint a guardian ad litem for any such person who appears to be interested in any formal proceeding and to be inadequately represented by parent, conservator or guardian. Remember, too, that the registrar has residual authority to decline informal applications and thus force formal proceedings. In this connection, it should be noted that applications are required to state the age of any minor heirs or devisees. There is a significant probability that any individual who undertakes to serve as personal representative where minors or incompetents are involved will want the protection of formal orders particularly if values of any consequence are involved. The Code encourages these persons to use formal proceedings by providing clear and flexible procedures and a competent, and possibly specialized, court.

A blanket requirement of bond cannot be justified as necessary to the protection of unknown heirs and devisees. Under the Code, a personal representative owes no duty to persons who might show up within the limitation period for probate or contest of wills and demonstrate that they are the true successors, unless they initiate proceedings before distribution is made. (3-703) Such persons have protected rights against those who received the estate but not against a fiduciary who acted in good faith. Thus, a bond insuring fidelity of the personal representative would not help them. The Code's position in this regard is defensible because it is keyed to the usual, rather than to the extraordinary case and is necessary to permit fiduciaries to distribute without court order.

Unknown persons who may appear as additional heirs or devisees entitled to share an estate as it is being administered have rights against the personal representative which are not cut off unless and until they are adjudicated to be nonexistent in formal proceedings. This will tend to move fiduciaries to the court for orders in formal proceedings in cases where there are important values or reasonable doubts. A bond requirement would add nothing to the absent person's ability to prevent a court order which cuts him off.

Doubts as to the Value of Probate Bonds

The National Conference should not accede to the demands of the insurance industry that their time-honored, legislatively guaranteed market be perpetuated without asking some obvious questions about the effectiveness of bonds in preventing disappointments in regard to inheritances and the relative cost of whatever salutory effect bonds may have.

Evidently, estate planning experts across the country think little of fidelity bonds as protection. Provisions in trusts requiring bonds of fiduciaries are quite uncommon. Will draftsmen routinely excuse bond requirements for testators whenever they can.

Receiverships and other extraordinary proceedings involving court-appointed business managers or liquidators bear little resemblance to succession of decedents' estates which is as natural as death itself and well accommodated by family traditions and community mores. The analogy the insurance industry attempts to draw between administration of decedents' estates and liquidation proceedings involving living debtors, though warranted in a superficial sense by our history of probate court supervision of decedents' estates, is inaccurate from a functional point of view.

The value of bonds as measured by their deterrent effect and cost is quite questionable. Some insurance industry spokesmen have indicated that there are no figures to indicate the relationship of bond premium income to losses covered by bonds. They also urge that figures as to dollars paid in claims are unimportant because they would not demonstrate the value of bonds in coercing proper discharge of fiduciary duties. Of course, it can be argued with equal force that since probate bonds have been routinely required by statute in intestate estates, we have no basis whatever for connecting the bond requirement to the behavior of individual fiduciaries. It could just as well be argued that the typical close relationship between individuals who serve as administrators, and the beneficiaries of intestate estates, totally explains the tendency for intestate estate settlements to be very routine and peaceful affairs so far as can be determined from the outside.

Surely, it is difficult to explain the variation in cost of bonds in the several states, other than as a phenomenon of forcing a market by statute.

Conclusion

Putting reasons for doubts about the value of probate bonds to one side, a blanket requirement of bond for every intestate estate being administered by any individual would be a clear instance of statutory overkill. It is submitted that statutory rules can and should be so cast that the routine requirements which apply to every estate will be relevant to facts usually to be anticipated in ordinary cases. Unusual situations should be the occasion for extraordinary procedures, rather than new routines for every estate. Present drafts of the proposed Code seek to achieve this ideal by making bond requirements fully responsive to the needs of a particular case as identified by interested persons and probate court personnel.

Finally, a statutory requirement of probate bonds in testate or intestate estates is inconsistent with the basic philosophy of the Uniform Probate Code that estates belong to survivors who are expected to look out for their own interests. The ancient idea that a probate court is a public agency through which all estates must pass in order that accuracy and honesty in regard to inheritances will be achieved has become intolerable to a vast majority of our people. It has outlived its usefulness and now deserves an honorable burial. Indeed, if it is not soon eliminated by forward looking legislation, the day when the overwhelming ma-

jority of dollars passing at death will be controlled by will and probate substitutes will be on us much sooner than might be imagined. As this day approaches, the estates left in probate to bear the expense of bond and other costs which better planned estates avoid, will come more and more to consist almost entirely of the little accumulations of the relatively poor and ignorant elements of our population. The Code must have the support of the average man and his organizations if it is to withstand the ordeal of battle in our legislatures. It should not be weakened by what is really an unnecessary concession.

SUGGESTIONS AND COMMENTS
ON THE
UNIFORM PROBATE CODE (SB 248)

(1) Suggestion

In sec. 13.11.125 et seq. the use of a description such as "Homestead Allowance" for the widow of decedent and for minor and dependent children might well be confused with the "Homestead Exemption" provided under AS 09.35.090, and the exemption provided in sec. 13.11.130 may be confused with the exemption provided by AS 09.35.080. We read the probate allowances and exemptions to be in addition to the homestead exemption and other exemptions as now provided under AS 09.35.080 and AS 09.35.090. We recommend that the probate code eliminate the description "Homestead Allowance". Likewise, we recommend the description "Exempt Property" be changed to "Personal Property Allowance".
(Alaska Bar Association)

Comment

I believe that the use of similar terms in two totally different and unrelated titles would not cause any confusion. Sections 13.11.125 et seq. relate to certain rights and values to which a surviving spouse and certain children of a deceased are entitled in preference over unsecured creditors of the estate and persons to whom the estate may be devised by will. AS 09.35.080 - 09.35.-090, on the other hand, specify what personal and real property cannot be taken from a judgment debtor by means of execution.

(2) Suggestion

Sec. 13.16.450 in conformance with the uniform code allows four months for presentation of claims by creditors. We recommend this be changed to 90 days to conform to our present probate code. Ninety days is considered sufficient, and will shorten the length of the probate proceedings.
(Alaska Bar Association)

Comment

While at first glance it may appear that this suggestion to retain the existing 90-day period for creditors to present claims would seem to go ahead of the UPC to shorten the length of the probate proceedings this is not the case. Presently the law (AS 13.30.250) states that "The notice shall require all persons having claims against the estate to present them, with proper vouchers, within three months...." (Emphasis added.) However, AS 13.30.260 provides that "A claim not presented within three months after the first publication of notice is not barred, but it cannot be paid until the claims presented within that period have been satisfied...." (Emphasis added.) The result of these two existing sections is that creditors' claims can be presented as long as assets remain in the estate. This procedure would not shorten the probate proceeding.

On the other hand, two sections in SB 248 go far to reduce the time it would take to probate an estate. These two provisions read:

"Sec. 13.16.450. NOTICE TO CREDITORS. Unless notice has already been given under this section, a personal representative upon his appointment shall publish a notice once a week for three successive weeks in a newspaper of general circulation in the judicial district announcing his appointment and address and notifying creditors of the estate to present their claims within four months after the date of the first publication of the notice or be forever barred."

and

"Sec. 13.16.460. LIMITATIONS ON PRESENTATION OF CLAIMS. (a) All claims against a decedent's estate which arose before the death of the decedent, including claims of the state and any subdivision thereof, whether due or to become due, absolute or contingent, liquidated or unliquidated, founded on contract, tort or other legal basis, if not barred earlier by other statute of limitations, are barred against the estate, the personal representative, and the heirs and devisees of the decedent, unless presented as follows:

(1) within four months after the date of the first publication of notice to creditors if notice is given in compliance with sec. 450 of this chapter; provided, claims barred by the non-claim statute at the decedent's domicile before the first publication for claims in this state are also barred in this state;

(2) within three years after the decedent's death, if notice to creditors has not been published.

(b) All claims against a decedent's estate which arise at or after the death of the decedent, including claims of the state and any subdivision thereof, whether due or to become due, absolute or contingent, liquidated or unliquidated, founded on contract, tort, or other legal basis, are barred against the estate, the personal representative, and the heirs and devisees of the decedent, unless presented as follows:

(1) a claim based on a contract with the personal representative, within four months after performance by the personal representative is due;

(2) any other claim, within four months after it arises.

(c) Nothing in this section affects or prevents:

(1) any proceeding to enforce any mortgage, pledge, or lien upon property of the estate; or

(2) to the limits of the insurance protection only, any proceeding to establish liability of the decedent or the personal representative for which he is protected by liability insurance."

(Emphasis added.)

These sections make it mandatory that a creditor must submit his claim within four months after he has received notice or be forever

barred. Thus the possibilities of closing an estate more quickly under SB 248 are much greater than under present probate procedures.

When this same issue was raised by the Legislative Council while it was preparing the bill for introduction, Professor Richard V. Wellman of the University of Michigan Law School and the prime drafter of the UPC made some very meaningful remarks on why these provisions should be retained. (See Appendix A.)

(3) Suggestion

P. 130

We disagree with the power given a foreign personal representative under sec. 13.21.015, which requires only that the nonresident fiduciary may secure removal of assets of a nonresident decedent from Alaska upon furnishing a copy of his appointment and an affidavit as to death, Alaska administration, and entitlement to payment. Nothing is said or provided concerning Alaska debts of the nonresident decedent, except that should a creditor in Alaska know of the death and the whereabouts of assets in Alaska, that creditor may object. This is considered inadequate and likely to result in no recovery in most cases. Suit against the foreign representative in the foreign jurisdiction is not a good remedy. We recommend that sec. 13.21.015 be expanded to require some notice to Alaska creditors before removal of the assets from Alaska. We would add the following additional requirement to sec. 13.21.015.

> In addition to the foregoing requirements the domiciliary foreign representative shall furnish to any person having possession or control of personal property, or other asset sought to be removed from Alaska, proof that notice has been published in a newspaper of general circulation in the borough or city where such assets are located, at least once a week for three weeks, that such property or other asset will be removed unless objections are made. The notice shall specify the personal property or asset and its location in Alaska.

(Alaska Bar Association)

Comment

While this suggestion in regard to sec. 13.21.015 would be of considerable merit if we were dealing with traditional concepts of administering multi-state estates, I would not think it is particularly necessary under the approach taken by the UPC.

Traditionally there has always been a reluctancy on the part of one state which has assets and creditors of a person who dies domiciled in another state to turn over those assets to the decedent's domiciliary estate without first paying off local creditors.

> "Whenever more than one state is involved, administration at the present time is complex and difficult. Assembling assets from several states is not easy. While jurisdictions increase arithmetically, difficulties seem to increase geometrically. Just as troublesome is the possibility that the personal representative or the assets of the estate may be the subject of litigation in several states." (Multiple-State Estates Under The Uniform Probate Code, 27 Wash. & Lee L. Rev. 74 (Spring 1970))

To avoid these problems and complexities which have plagued the several states since their existence, the UPC in ch. 21 has provided a system whereby a personal representative in the state of the decedent's domicile has the same power over the title to property of the estate as an absolute owner would have and thus an entire estate, wherever located, can be administered in one proceeding. At first it may seem that creditors in a foreign state are left to the mercy of another state for their payment. This, however, is not the true case because the property is held in trust for the benefit of the creditors and other individuals having an interest in the estate (sec. 13.16.390). The code treats all creditors alike whether they are in the domiciliary state or another state. Besides having the same protection offered all creditors by the code, local creditors who are apprehensive that the domiciliary personal representative will withdraw assets from the local state may notify persons owing the decedent or having possession of state property not to pay or turn over property on affidavit (sec. 13.21.025). The creditor could also petition for local administration ("interested person" for all code purposes includes creditors) in order to prevent the domiciliary foreign personal representative from proceeding without local appointment (sec. 13.-21.040). Finally, sec. 13.16.520 provides equal treatment of all creditors in an insolvent estate.

(4) Suggestion

P. 42

Sec. 13.11.315 provides for deposit of a will with any court. This should be restricted to the superior courts inasmuch as the inferior courts, particularly in sparsely settled areas will not have the personnel or facilities to administer this provision. Basically we feel that secs. 13.11.315 and 13.11.320 might well be eliminated since they will burden the courts with additional duties, although it is assumed that the rules of court would require a charge to be made. The commentary to the UPC suggests that a central filing system be established soon and a statute be enacted requiring the registrar of the will to notify the central bureau so that any inquiries could be directed to the central bureau. All this seems unnecessary, and will require no end of additional court rules, record keeping, etc.
(Alaska Bar Association)

Comment

At the present time, of course, there is no way of knowing how many people would avail themselves of this provision and the resulting cost to the state, but if the idea seems feasible, the recommendation that only superior courts be used would seem a very good one.

(5) Suggestion

P. 11

Sec. 13.06.110, regarding notices under paragraphs (1) and (2), it is suggested "10 days" rather than "14 days".
(Keifer L. Gray, Standing Master in Probate)

Comment

I cannot see any particular need for the change.

(6) Suggestion

Sec. 13.11.045(1), add "provided the Native rights through blood of any person so adopted may be retained if provided for in the decree of adoption".
(Keifer L. Gray, Standing Master in Probate)

p. 17

Comment

In regard to this suggestion, the question has been raised as to how adoption affects the rights of inheritance from the natural parents.

After researching this question I have come to the conclusion that neither under existing law (AS 20.10.120, see Appendix B) nor under sec. 13.11.045(1) of SB 248 would an adopted child be precluded from inheriting from both his natural as well as his adopting parents.

The general law on this matter is quite clear:

> "Consanguinity is fundamental in statutes of descent and distribution, and the right of a child to inherit from his natural parents or to share in the intestate personalty of their estates is affected by the legal adoption of the child by another only to the extent that such rights are taken away or limited by the terms of the applicable statutes of adoption and descent and distribution, or by necessary implication therefrom. To state the rule another way, an adopted child is, in a legal sense, the child both of its natural and of its adopting parents, and is not, because of the adoption, deprived of its right of inheritance from its natural parents, unless the statute expressly so provides. In any event, the adoption of a child after the death of its parents does not affect its status as the heir of such parents.
>
> "The adoption of a child does not destroy his status as one of the 'issue' of his natural ancestors. The fact that by the terms of the adoption statutes the natural parents lose all rights over a child when it is adopted by another does not necessarily imply that the child may not inherit from such parents, nor is that implication to be drawn from the fact that the child becomes the legal child of its adopting parent and sustains all the rights and is subject to all of the duties of that relationship. A statute which includes as its dominant and principal feature the establishing of the adopted child as the heir of the adopting parent, without reference to inheritance from natural parents, is not likely to be construed as depriving the child of that inheritance." (Emphasis added.) (2 Am Jur 2d, Adoption, sec. 103)

To deal with this question a specific provision must be adopted and this has been done in a number of states.

> "Some statutes expressly save the rights of an adopted child to inherit from its natural parents; others by their express terms bar adopted children of the right to inherit from their natural parents and natural kin. Rights of dual inheritance from the natural parent as well as from the adoptive parent are denied by a statutory declaration that all rights and duties between the adopted child and his natural parent shall cease and determine and that the child

shall thereafter be deemed and held to be for every purpose the child of his adoptive parents. Such statutes are not open to attack on the ground of discrimination between minors whose natural parents died before the effective date of the statute and those whose natural parents died thereafter, but such a statute does not prohibit a natural parent from bequeathing property by will to a child whom he has permitted to be adopted by another." (Id)

As can be seen from a reading of AS 20.10.120 (see Appendix B) and sec. 13.11.045(1) of SB 248 neither the existing nor proposed provision specifically provide that an adopted child cannot inherit from his natural parents. In view of the state of the law as cited above, I believe that whichever approach the legislature takes should be specially stated in the bill. The House Judiciary Committee has already expressed its support for allowing an adopted child, at least to some degree, to inherit from his natural parents by the introduction of HB 722 (see Appendix C).

For a more extensive consideration of the entire question of how adoption affects the rights of inheritance through or from natural parents or other natural kin, please see annotations and cases in Appendix D.

(7) Suggestion

P. 25

Sec. 13.11.125, the homestead allowance should be a minimum of "$6,000" instead of "$5,000".
(Keifer L. Gray, Standing Master in Probate)

Comment

The Legislative Council changed this to $8,000 to correspond with present day needs in Alaska as reflected in existing law.

(8) Suggestion

Sec. 13.11.155, add a paragraph (a) which states:

P. 28 Relocated to 1/30

(a) Wills other than self-proving wills under sec. 165 of this chapter may be proven by the affidavits of the two witnesses to the will or, if one witness is deceased or cannot be located, by the testimony of one subscribing witness and other proof satisfactory to the court.

(Keifer L. Gray, Standing Master in Probate)

Comment

This seems like a very practical suggestion.

(9) Suggestion

P. 42

Add a new sec. 13.11.325 to read:

Sec. 13.11.325. PROCEDURE FOR NONINTERVENTION WILLS. If the last will and testament of a decedent provides that the estate shall be settled without the intervention of any

court, title of the decedent passes to the devisee or heirs on death. It is necessary only that the executor, or person or corporation nominated in his place if he fails to serve, submit the will to the court, prove it, secure letters testamentary, file an inventory, and submit proof of solvency. Thereafter, the estate shall be managed and settled without the intervention of any court. However, notice to creditors requiring them to submit their claims within three months shall be published once each week for four weeks in a newspaper of general circulation in the judicial district where the will is probated. The party probating the will may file a final account with the court if he desires and he shall make a report of any inheritance tax due the state or the United States and pay the same from estate funds. Nothing contained in this section shall be construed to prevent the court from ordering the filing of a final account if a petition demanding a final account is filed by an heir, devisee, legatee, creditor, the state or federal government or a person showing he is adversely affected by the failure to file the account. However, a full and complete report must be submitted to the court within one year from the date of filing such will for probate and proof of final distribution should be filed simultaneously. Extensions beyond this period of time may be granted only on the specific order by the court for good cause shown and then not to exceed six months.

(Keifer L. Gray, Standing Master in Probate)

Comment

In view of the fact that the UPC is based on the premise that a court should not intervene unless requested by an interested person, this suggested provision would seem unnecessary. Also, sec. 13.11.230 provides that "... the intention of the testator as expressed in his will controls...." The proposed amendment is drafted along the lines of existing law (AS 13.30.111) which reflects the traditional probate concepts.

(10) Suggestion

p. 49

Sec. 13.16.065, paragraph (1), substitute the figure "19" for the figure "21".
(Keifer L. Gray, Standing Master in Probate)

Comment

SB 248 has substitued "19" for "21".

(11) Suggestion

p. 82

Sec. 13.16.365, the last paragraph after the comma, instead of "he may file the original of the inventory with the court" it should read "he shall file the original of the inventory with the court", substituting the word "shall" for the word "may".
(Keifer L. Gray, Standing Master in Probate)

Comment

In regard to making the filing of an inventory permissive instead of mandatory, the drafters of the UPC seem to indicate that the

worth of an estate should be the concern of only interested persons and not of the general public (Uniform Probate Code, sec. 3-706).

(12) Suggestion

Sec. 13.16.680(1), change the value from "$5,000" to "$6,000". (Keifer L. Gray, Standing Master in Probate)

p. 118

Comment

This suggestion would correspond with present day needs in Alaska as reflected in existing law.

(13) Suggestion

p. 119

Sec. 13.16.695, add paragraph (d) to read:

> (d) The superior court may authorize the disposal in a manner it prescribes of personal property which has not been disposed of under this section by the end of six months if no heirs or claimants have been located.

(Keifer L. Gray, Standing Master in Probate and Superior Court Judge James M. Fitzgerald)

Comment

Because SB 248 is silent on this point and the necessity seems obvious, this suggestion should be added.

(14) Suggestion

Add a new sec. 13.16.700 to read:

p. 119

> Sec. 13.16.700. SETTLEMENT DIRECTED BY COURT. When a judge receives information that a person has died in his judicial district leaving an estate of $6,000 or less and no qualified person has appeared to take charge of the assets, the judge may immediately appoint some person, corporation, or attorney to settle the estate in the manner provided for in secs. 680 - 695 of this chapter or the appointee may administer the estate in the manner provided for in the administration of small estates.

(Keifer L. Gray, Standing Master in Probate)

Comment

This suggestion seems appropriate on the same basis as (13) above. However, because secs. 680 - 695 are the provisions for administering small estates, I would recommend deleting "or the appointee may administer the estate in the manner provided for in the administration of small estates".

(15) Suggestion

p. 125

Sec. 13.26.015(1), the age should be "19" and not "18". (Keifer L. Gray, Standing Master in Probate)

Comment

It should be changed to "19".

(16) Suggestion

Sec. 13.26.020, the time should be "not exceeding one year unless sooner revoked".
(Keifer L. Gray, Standing Master in Probate)

p. 126

Comment

Considering the purpose underlying sec. 13.26.020, this suggestion would seem appropriate because of the cost and distance involved in Alaska travel. The drafters of the UPC have stated on this point:

> "This section permits a temporary delegation of parental powers. For example, parents (or guardian) of a minor plan to be out of the country for several months. They wish to empower a close relative (an uncle, e.g.) to take any necessary action regarding the child while they are away. Using this section, they could execute an appropriate power of attorney giving the uncle custody and power to consent. Then if an emergency operation were required, the uncle could consent on behalf of the child; as a practical matter he would of course attempt to communicate with the parents before acting. The section is designed to reduce problems relating to consents for emergency treatment." (Uniform Probate Code, sec. 5-104, Comment)

(17) Suggestion

Sec. 13.26.045, add "or has failed to properly exercise his duties as such".
(Keifer L. Gray, Standing Master in Probate)

p. 127

Comment

This provision does not seem necessary in view of sec. 13.26.085 which provides specifically for the removal of guardians.

(18) Suggestion

Sec. 13.26.060, add an (e) to read:

> (e) A bond in the amount to be fixed by the court may be required of the guardian as the circumstances require.

p. 127

(Keifer L. Gray, Standing Master in Probate)

Comment

Under the provisions of the UPC guardians are appointed to protect only the person of the minor and not his property or other assets. If problems of property management arise, then a conservator would be appointed and a bond may be required under sec. 13.26.215.

(19) Suggestion

Sec. 13.26.070(4), add "at least once every year unless ordered sooner".
(Keifer L. Gray, Standing Master in Probate)

p. 129

Comment

I cannot see any harm in this suggestion but the benefit is also a little doubtful.

(20) Suggestion

p. 151

Sec. 13.26.280(a), change the age from "18" to "19".
(Keifer L. Gray, Standing Master in Probate)

Comment

This should be changed to "19".

(21) Suggestion

p. 2-3

Sec. 13.06.035, add a paragraph (3) to read:

> (3) a person who is absent for a continous period of five years, during which he has not been heard from, and whose absence is not satisfactorily explained after diligent search or inquiry is presumed to be dead; his death is presumed to have occurred at the end of the period unless there is sufficient evidence for determining that death occurred earlier.

(F.E. Kester, State Registrar of Vital Statistics)

Comment

This suggestion is very important and should definitely be incorporated into SB 248.

(22) Suggestion

Adopted

Either Title 9 or 13 should contain provisions for wrongful death and survival of actions.
(Herbert A. Ross, Attorney at Law)

Comment

This is a very good suggestion and should definitely be made a part of the bill. Because the provisions relate to causes of action and not probate, I suggest they be made a part of Title 9 (Civil Procedure).

(23) Suggestion

Various age requirements in the bill should be made uniform.
(R. G. Laube, Vice President and Trust Officer, National Bank of Alaska and Chairman, Legislative Committee, Anchorage Estate Planning Council)

Comment

The age of 19 either has been or will be substituted for 18 where appropriate.

Appendix A

Excerpt from letter dated December 13, 1971, addressed to Frederick O. Eastaugh from Professor Richard V. Wellman of the University of Michigan Law School:

Let me move to another point on the list of deviations from U.P.C. that are indicated in Russell E. Mulder's letter of October 4, 1971, to Members of the Alaskan Bar Association. I am somewhat concerned about point 5 dealing with bar on unsecured creditors claims.

First, let me focus on the proposal to extend the non-claim period on unsecured claims following first advertisement for claims from four months to one year. Statutory notes to the Model Probate Code (1946) indicate that in the early 1940's when research on the project was accomplished, twenty-six states had fixed time limits in non-claim provisions. In twelve states, the basic time period was six months; in four the basic period was three or four months; in four the period was eight, nine or eleven months; in six the period was one year. Section 142 of the Model Probate Code set the non-claim period at 4 months. The recently enacted Surrogates Court Procedure Act in New York established a three month period and Wisconsin's new probate code permits the court to fix a non-claim period as short as three months. The non-claim period in the new codes in Maryland and Oregon is set at four months. Idaho's version of U.P.C. preserved the four month limitation period, as does the Law Revision Commission's recommendation in Arizona.

The pattern across the states, influenced I am sure, by the criticism that probate is too long, is distinctly toward a period that is much shorter than the year that is mentioned in Mr. Mulder's letter.

It may be pertinent, also, to note that during the several years of drafting of U.P.C., the project did not receive a contact, much less a protest, from any group representing creditors. This significant silence corroborates the careful study of attitudes about probate reported in Sussman, Cates and Smith's book, The Family and Inheritance (Russell Sage, 1970) which reported that problems with creditors were a very unimportant aspect of the typical probate proceeding.

During the drafting process, the Reporters were informed by researchers who had probed Chicago merchants about protection through probate for unsecured creditors claims. The second-hand reports back indicated that merchants gave very little attention to problems of collection from deceased debtors. On some kinds of accounts, like fuel oil contracts, credit life insurance is used. In other situations, joint obligations bind husband and wife so that the death of either is of little concern to creditors. Statistically death is not a serious risk for age levels where borrowing or credit purchasing is most common. Finally, creditors appear to believe that survivors will pay valid small debts of family members, if for no other reason than to maintain their own reputation for honesty and good credit.

In point of fact, therefore, there is much to support the proposition that the usual concern about creditors in probate proceedings comes only from the minds of lawyers who for generations, have been taught that the principal purpose of probate is to protect creditors.

Finally, lawyers have a good deal to gain from moves that may serve to shorten the time for routine probates. The length of non-claim periods will have a direct bearing on the standard time during which estates probably will remain undistributed. With the optional valuation date and the filing deadline for federal estate tax purposes now moved closer to date of death, it would be paradoxical if long non-claim provisions continued to impede prompt closing of estates. Surely, Alaskans will not want to be out of line with national trends on this point.

Second, I am concerned about the proposal to change the code so that a creditor who had good cause for not presenting a claim in time might escape the bar of non-claim. I think that such a provision may do more harm than good. First, it should be noted that the four months claim period does not apply to unsecured tort claimants who seek to reach the decedents insurance. See 3-803(c) (2). When one thinks of contract debts, who are the creditors who will not know of the decedents death within four months? All a creditor needs to do to prevent non-claim from running is to mail his bill to the personal representative or to the court.

Appendix B

Sec. 20.10.120. ADOPTION TERMINATES RELATIONSHIP OF PARENT AND CHILD. (a) By a decree of adoption, the natural parents, other than a spouse of an adopter, are divested of all legal rights and obligations in respect to the child, and the child shall be free from all legal obligations of obedience and maintenance in respect to them, and is, as to all legal incidents, the child, legal heir, and lawful issue of his adopter, entitled to all rights and privileges, including the right of inheritance and the right to take testamentary disposition, and subject to all the obligations of a child of the adopter.

(b) An adopter and the spouse of an adopted child, and their respective kin, have the rights of inheritance from the child as prescribed by the statutes of descent and distribution for natural parents, spouse and their respective kin to the exclusion of the adopted child's natural parents and kin, and any prior adopter and his kin. Where a natural parent is the spouse of an adopter, the natural and adopted parent and kin inherit the same as natural parents and their kin.

Introduced: 3/7/72
Referred: Judiciary

IN THE HOUSE BY THE JUDICIARY COMMITTEE

HOUSE BILL NO. 722

IN THE LEGISLATURE OF THE STATE OF ALASKA

SEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act clarifying inheritance rights of adopted children; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 20.10.120 is amended by adding a new subsection to read:

(c) An adopted child and his issue have the rights of inheritance from the natural parents and their respective kin as prescribed by the statutes of descent and distribution unless the decree of adoption specifically provides for termination of those rights of inheritance.

* Sec. 2. This Act takes effect on the day after its passage and approval or on the day it becomes law without approval.

In Villier v. Watson's Adm'x, 168 Ky 631, 182 SW 869, LRA1918A, 820, the statute of adoption under which the case was decided is much unlike ours and we deem the case not in point. The same may be said of the cases of Dreyer v. Schrick, 105 Kan 495, 185 P 30, and Coonradt v. Sailors, 186 Tenn 294, 209 SW2d 859, 2 ALR2d 880. In the case of In re Roderick's Estate, 158 Wash 377, 291 P 325, 80 ALR 1398, the court considered a statute of adoption and held an adopted child could inherit from both adoptive and natural parents. However, note that the statute of Washington and also the statutes of Minnesota, California, and South Dakota, cited on page 1401 of 80 ALR, do not contain the emphatic language as does our adoption statute, particularly Section 453.090, supra.

We find no fault with the result reached in the cases of St. Louis Union Trust Co. v. Kaltenbach and Mississippi Valley Trust Co. v. Palms, supra. We limit our disapproval to the expressions and language which we deem obiter dictum contained in the opinions which lend support to the theory that persons legally adopted under the provisions of Chapter 453, supra, may inherit from their natural parents. After a full consideration of the case, we are convinced that the case of Shepherd v. Murphy, supra, was correctly decided and we find no sound reason that the same rule should not apply in this case.

The judgment of the trial court is reversed and the cause remanded with directions to enter a decree in conformity with this opinion. It is so ordered.

Dohling and Barrett, CC., concur.

Per Curiam.

The foregoing opinion by Westhues, C., is adopted as the opinion of the court.

All concur.

The Divisional opinion has been adopted as the opinion of the court en banc.

All the Judges concur, except Hyde, J., who dissents.

ANNOTATION

Adoption as affecting right of inheritance through or from natural parent or other natural kin

[See ALR Digests, Descent and Distribution § 28.]

§ 1. In general, 334.
§ 2. Inheritance from immediate parents, 336.
§ 3. Inheritance from grandparents or other natural kin, 345.
§ 4. Inheritance in two capacities from one estate, 349.

INDEX

Blood relatives, inheritance from, §§ 1, 3.
Civil law, reference to, § 1.
Construction of adoption statute, §§ 1, 2.
Death in foreign state—
  of grandparent, § 3.
  of natural parent, § 2.
Disinheritance by statute, § 2.
Dual—heirship, §§ 1, 4.
  rejection of, § 3.
Foreign state saving rights of inheritance, effect of adoption in, § 3.
Grandparents, inheritance from, §§ 2, 3, 4.
[illegible] sister of decedent, right to share with [illegible]ter of the whole blood, § 3.
[illegible]itimate adopted child—
  [illegible]heritance from natural father, § 2.
  [illegible]ght to inherit from grandparent, § 3.
Immediate parents, inheritance from, § 2.
Inheritance in two capacities from one estate, § 4.
Lawful issue, adopted child born after testator's death, § 3.

[§ 1]

Lineal descendant of grandfather, adopted child as, § 3.
Natural kin, inheritance from, §§ 1, 3.
Natural parents, inheritance from, § 2.
Pretermitted heirs, adopted children as, §§ 2, 3.
Relationships, statutes as concerned only with, § 2.
Representative of deceased natural parent, §§ 2, 3, 4.
Second adoption, right to inherit from first adoptive parent, § 2.
Statutes—
barring rights of child, § 3.
child as heir of adopting parent, effect, § 2.
saving rights of child, §§ 2, 3.
Testamentary trust for life of natural parent, right of adopted child to share in corpus of, § 2.
Will of natural parent, failure to mention adopted child, §§ 2, 3.
Workmen's compensation, right of adopted child to compensation for death of natural father, § 2.
Wrongful death of natural father, right to recover for, § 2.

---

§ 1. In general.

This annotation supersedes 80 ALR 1403, and the supplement thereto in 123 ALR 1038, being division III of the latter annotation, at pp 1042 et seq.

The following annotations related to the present one may be noted:

Conflict of laws as to adoption as affecting descent and distribution of decedent's estate, 73 ALR 964, supplemented in 154 ALR 1179.

Status of child under contract to adopt not fully performed, 27 ALR 1325, supplemented in 142 ALR 84 and 171 ALR 1315.

Descent and distribution of property of adopted child, 170 ALR 742.

✦

The question whether an adopted child inherits from his natural parents is "one of statutory construction." Roberts v. Roberts (1924) 160 Minn 140, 199 NW 581.

"Since adoption is wholly statutory, all its incidents must be." Young v. Bridges (1933) 86 NH 135, 165 A 272.

So, except as the statutes otherwise provide, the adoption of a child does not deprive him of the right subsequently to inherit from his natural parents or to share in intestate personalty of their estates.

Arkansas.—Shaver v. Nash (1930) 181 Ark 1112, 29 SW2d 298, 73 ALR 961 (involving Texas law); Hawkins v. Hawkins (1951) 218 Ark 423, 236 SW2d 733.

New York.—Re Landers (1917) 100 Misc 635, 166 NYS 1036; Re Monroe (1928) 132 Misc 279, 229 NYS 476; Re Gourlay's Estate (1940) 173 Misc 930, 19 NYS2d 122.

North Carolina.—Grimes v. Grimes (1935) 207 NC 778, 178 SE 573.

The child's right to inherit from blood relatives having been once given by statute "can be taken away only by statute," except, of course, as the act of the individual or individuals involved may end it. Re Landers (1917) 100 Misc 635, 166 NYS 1036. This seems to be the generally prevailing view.

In Re Darling (1916) 173 Cal 221, 159 P 606, the court stated that it appeared to be well settled in all jurisdictions in which the common law constitutes the rule of decision, that the right of inheritance of a child is affected by its adoption "only to the extent that the statutes bearing on the matter in terms or by implication provide." (But that adoption was unknown to the common law, see infra.)

In Sorenson v. Churchill (1927) 51 SD 113, 212 NW 488, the court quoted with approval the language of Hockaday v. Lynn (1906) 200 Mo 456, 98 SW 585, 8 LRA NS 117, 118 Am St Rep 672, 9 Ann Cas 775, to the effect that consanguinity is so fundamental in statutes of descent and distribution "that it may only be ignored by construction when courts are forced so to do, either by the terms of express statute or by inexorable implication."

As late as the year 1917, a New York judge declared that his attention had been called to no authority in that or any other state, nor had he been able to find any, "which even hints at the possibility of an adopted child losing his rights of inheritance from natural kindred by reason of adoption." Re Lander's Estate (1917) 100 Misc 635, 166 NYS 1036. But see certain of the cases infra, §§ 2 and 3.

According to Young v. Bridges (1933) 86 NH 135, 165 A 272, the statutes regulating inheritance and the adoption statutes touching the same matter are in pari materia and should be construed together as if they were one law. In that case, which did not on its facts involve any question of the right of an adopted child to take two portions from a single estate (one as an adopted person and one as blood kin), the court nevertheless made use of the possibility of such a dilemma as arguing that the whole idea of dual heirship should be rejected and the child confined to the adopted inheritance. The court was of the opinion that any supposition of a legislative purpose to reserve the right to inherit from blood relatives was "negatived

[§§ 1, 2]

by the predominant policy of the inheritance statute against dual heirship." The court noted that the adoption statute provided that an adoption should make the child "the child of the petitioner to all legal intents and purposes," and concluded therefrom that, giving language its ordinary meaning and giving weight to the policy the statute disclosed, the result which followed was that an adoption establishes "a change of status by which in general the relatives become strangers in legal aspect and others take their place." Further as to the statute there in question, see the same case, infra, § 3.

✦

Since the right of adoption was unknown to the common law and exists in this country, in those states having that law as the basis of their jurisprudence only by virtue of statute (1 Am Jur, Adoption of Children § 3), but since it did exist under the civil law, the cases sometimes make reference to the civil law on the subject.[1]

In Humphries v. Davis (1885) 100 Ind 274, 50 Am Rep 788, where the question decided was not within the present subject, the court noted that the rule there followed did not cut off the child from inheriting from its natural relatives, and said that "it may inherit from them and from its adoptive parents. This was the rule of the civil law," citing Sandars' Justinian, 105. The opinion explained that the common law made no provision for the adoption of children and consequently no light could be obtained from that source, but that the Roman law did make provisions for adoption and that, as revised and changed by Justinian, formed a complete system whereby the adopted child was declared "assimilated, in many points, to a son born in lawful matrimony," and that at the same time "that law preserved to the child all the family rights resulting from his birth."

However, it has been said that the civil law's reservation of inheritance from the adopted child's natural relatives "does not shed much light to show the reservation in a statutory adoption," and that if the civil-law system of adoption may be of aid in determining the incidents of a statutory adoption, because of the absence of any common law on the subject, it can be so only on the theory that the statute was enacted with the design of incorporating in some measure the system. Young v. Bridges (1933) 86 NH 135, 165 A 272.

✦

This annotation is of course concerned only with the rights which an adopted person may possess as an heir or distributee by reason of the death of an intestate occurring subsequently to the adoption.

In Re Pillsbury (1917) 175 Cal 454, 166 P 11, 3 ALR 1396, the court declared that "unquestionably" since the adoption of the three minors followed the death of their father it did not affect their status as his heirs and that whatever rights had thus descended to them they retained.

§ 2. Inheritance from immediate parents.

The child will be entitled to take as heir or distributee of his natural parent dying intestate subsequently to the adoption save only as the statutes have in some form otherwise provided —see general citations touching this point, supra, § 1.

In the following cases the right to inherit from the natural parent was upheld.

United States. — For federal cases involving state law, see state headings infra.

Arkansas. — Hawkins v. Hawkins (1951) 218 Ark 423, 236 SW2d 733 (express statutory provision).

Delaware. — Glanding v. Industrial

1. The English Adoption of Children Act, of 1926 (16 & 17 Geo V, ch 29) was the first English statute to provide for the adoption of children. 17 Halsbury's L of Eng p 679, ¶1407. The effect of an adoption order thereunder is not to deprive the child of any right to or interest in property to which he would have been entitled without the adoption. Id. pp 687, 688, ¶1422.

Trust Co. (1946) 29 Del Ch 517, 46 A2d 881.

Washington. — Re Roderick (1930) 158 Wash 377, 291 P 325, 80 ALR 1398.

Wisconsin. — Re Sauer (1934) 216 Wis 289, 257 NW 23.

As indicated, the problem is ordinarily merely one of the construction of the adoption statute.

In Roberts v. Roberts (1924) 160 Minn 140, 199 NW 581, it was held that the right to inherit from the natural father was retained notwithstanding the adoption statute provided that an adopted child should become the legal child of the persons adopting him and they should become his legal parents, with all the rights and duties between them of natural parents and legitimate child, and that the child should inherit from the adopting parents or their relatives as though he were the legitimate child of such parents, and should not owe his natural parents or their relatives any legal duty, and that in case of his death intestate the adopting parents and their relatives should inherit his estate, as if they had been his parents and relatives in fact. From the opinion in that case it appears that at the time of the adoption, in the year 1898, the adoption statute contained a provision that no person by being adopted should lose his right to inherit from his natural parents or kindred, but that that saving provision had not been carried over into the revision of the statutes in 1905 and did not appear in the later statute; from which matters, viewed in connection with the explicit provisions of the adoption statute in force at the death of the decedent, which went so far as to disinherit the natural parents and relatives of the child, it would seem that a strong argument might have been constructed to the effect that by the later statutes the legislature intended to displace the natural parent-and-child relationship with the adopted one and not to save rights of inheritance from natural parents or kindred. In that case the adopted person claimed nothing under the express res-

[§ 2]

ervation of rights of inheritance contained in the statute as it existed at the time of the adoption proceeding.

In Re Sauer (1934) 216 Wis 289, 257 NW 28, where the pertinent section of the adoption statute provided, *in the first sentence*, that the adopted child should be deemed, "for the purposes of inheritance and succession and for all other legal consequences and incidents of the natural relation of parents and children," the same to all intents and purposes as if he had been born in lawful wedlock of the adoptive parents, but should not be capable of taking property expressly limited to the heirs of the body of an adoptive parent, and provided, *in the second sentence*, that the adoptive parents and their heirs and next of kin should be deemed for purposes of inheritance and succession by such parents, their heirs and next of kin, the same to all intents and purposes as if the child had been born in lawful wedlock of such adoptive parents, and should take in accordance with the general statutory provisions regulating inheritance and succession as between a parent and a child dying without issue, with the proviso that if no heirs or next of kin are found in the line of the adoptive parents the property of the deceased should go to the natural parents, and in case they shall have died, then "in their line of descent," and provided, *in the third sentence*, that the natural parents by the order of adoption should be deprived of such legal rights, if any, of whatsoever nature they may have had respecting the child and its property, and provided, *in the fourth sentence*, that the child should be free from all legal obligations of maintenance and obedience to the natural parents, subject to a further proviso clearly not of significance in the present inquiry—the court was of the opinion that the legislature did not by those provisions intend to deny to an adopted child the right to inherit from his natural parents. The court conceded that there would have been considerable force in the opposing contention if the section had contained no more than the first sentence, since had the legislature by that sentence intended the meaning argued for by the appellant it would have been unnecessary to have enacted much of the remainder of the section. It should be noted, however, that that ruling was made in view of a prior decision (Re Estate of Bradley (1924) 185 Wis 393, 201 NW 973, 38 ALR 1) which was stated to be to the effect that a statute which interferes with the descent of property to blood kindred or interrupts the natural course of descent should be strictly construed, especially since the established doctrine in Wisconsin is "that the right to inherit property is a natural right which the legislature cannot destroy." The court, in the Sauer Case, pointed out that in the adoption statute there was certainly no explicit and unmistakable language compelling a conclusion contrary to the one reached, and the court considered that under the Wisconsin decisions a child could not be deprived of the natural right of inheritance without the use of explicit and unmistakable language. But see Re Ries's Estate (1951) 259 Wis 453, 49 NW2d 483, 50 NW2d 397, infra, § 3.

In Re Tilliski's Estate (1945) 390 Ill 273, 61 NE2d 24, the court was of the opinion that in regard to the right of an adopted child to inherit from its natural mother the changes which had been made in the adoption and descent statutes effected no change in result, and in particular that the descent provision declaring that when a decedent leaves a surviving spouse and also a descendant, two-thirds of the property shall go "to the decedent's descendants per stirpes" was to be construed as including a child of decedent who had been adopted by a stranger, notwithstanding, as to adoptions, the statutes declared that a child lawfully adopted "is deemed a descendant of the adopting parent for purposes of inheritance." The court applied the principle that an adopted child is not deprived of the right to inherit from blood parents "unless clearly required by statute," and stressed that neither the prior statute of adoption, nor the

probate act involving the adoption language in question, nor the descent provisions, contained any language to the effect that a child should be incapable of inheriting from its natural parents.

In Re Kay's Estate (1953) — Mont —, 260 P2d 391, it was held that inasmuch as the statutes of descent provided that if a decedent left no surviving husband or wife but left issue, the whole estate should go to such issue "unless otherwise expressly provided by the laws of Montana," and there was in fact nothing to be found in the constitution or statutes expressly providing that because of their adoption by another the bodily issue of a natural parent should lose the right to inherit, the adopted child in question was entitled to take equally with his brother the entire estate of the natural father where the same passed as in case of intestacy.

✦

Some of the statutory language in question has seemingly been concerned with the personal and family relationships rather than with any matter implying a cessation of the child's rights of inheritance.

In Glanding v. Industrial Trust Co. (1946) 29 Del Ch 517, 46 A2d 881, the court said that the language of the Delaware adoption statute (providing that by the final order of adoption the natural parents should be divested of all legal rights and obligations in respect to the child and the child should be free from all legal obligations of obedience and maintenance respecting them) dealt with nothing more than the usual rights and obligations of parent and child while the latter remains a member of the family, and that thereby the natural status was not changed, the child continuing to be a child and heir at law and next of kin of his natural parents and the latter continuing to be the parents of the child with the same rights of inheritance as theretofore, save only for the proviso of the statute covering the case of an adopted child surviving the adoptive parent and dying without issue, when the property which came from the adopting parent and remains undisposed of shall pass to his or her next of kin and not to the next of kin of the adopted child. The court expressed the opinion that an adoption statute taken in connection with an inheritance statute should not be construed to change the devolution of intestate property "unless it shows a clear intent on the part of the legislature to do so."

In Sledge v. Floyd (1925) 139 Miss 398, 104 So 163, where the report does not set out the language of the adoption statute but the court stated that the act did not provide "in terms" that the adopted child should cease to be regarded as the child of his natural parents but divested the natural parents of the custody and control without in terms relieving them from the legal obligations imposed on them by law and without in terms providing that the child should cease to be regarded as their child, the court said that the adoption proceeding conferred on the child "such rights" as were therein "mentioned," and it was held that since neither the statute nor the proceeding purported to deprive the child of her right to inherit from her blood relatives such right was retained, and in particular that she was entitled to inherit from her natural father notwithstanding the adoption. The court remarked that it did not think that the adoption statute intended to deprive children of their rights to inherit from their blood parents and blood relatives, since to do so "would raise grave questions where a child having expectations should be adopted against its consent or without its power to consent during the tender years of minority."

In Sorenson v. Churchill (1927) 51 SD 113, 212 NW 488, the court said that the pertinent sections of the South Dakota adoption statutes were similar to those in question in Re Darling (1916) 173 Cal 221, 159 P 606, infra, yet the South Dakota court declined to follow the Darling Case. The court observed that the adoption statute fixed the status of the adopting person and of the adopted child and defined the rights and obligations of each to the other, without making any mention of the interests either might

[8a]

have in the estate of the other, and concluded, therefore, that notwithstanding the adoption the child was entitled to take the entire estate of his natural mother to the exclusion of the latter's brothers and sisters.

In Re Benner (1946) 109 Utah 172, 166 P2d 257, wherein the court said that the adoption statute in question was similar to the statute of South Dakota dealt with in Sorenson v. Churchill (1927) 51 SD 113, 212 NW 483, supra, the court quoted with approval language of the latter opinion to the effect that the adoption statute did not so limit that part of the succession statute in question as to cause an adopted child to lose the right to inherit from his natural parents, and that that conclusion was fortified by the consideration that under the law of adoption the consent of both natural and adopting parent is essential, and by his consent each is bound, whereas, "no one consents for the innocent and helpless subject of the transfer that he shall lose the right to inherit from his natural parent."

In Re Roderick (1930) 158 Wash 377, 291 P 325, 80 ALR 1398, where the court stated that Washington adoption statutes were substantially the same as those of California, Minnesota, and South Dakota, and the Washington provisions were that by the adoption the natural parents should be divested of "all legal rights and obligations" in respect of the child and the child should be free from all legal obligations of maintenance and obedience respecting them, and should be to all intents and purposes the child and legal heir of his or her adopter or adopters, and be entitled to all the rights and privileges and subject to all the obligations of a child of such person or persons begotten in lawful wedlock, with the proviso that in case of the decease of persons who have adopted a child and the subsequent decease of the child without issue, property coming from the adopting parents should descend to their next of kin and not to the next of kin of the child, it was held that a child of the decedent who had been adopted by a stranger remained entitled to inherit from the decedent and that the consequence was that since he had made no provision for her in his will and did not mention her therein, he in law died intestate as to her and she became entitled to share in the estate in the same manner as though he had died intestate. The latter consequence followed from the statute providing that if a person shall make his last will and die leaving a child, not named or provided for therein, who was born after the making of the will or the death of the testator, the testator as to such child shall be deemed to have died intestate, etc.

In Hale v. Department of Labor & Industries (1944) 20 Wash2d 14, 145 P2d 285 (where it was held that a child who had been receiving compensation from the department of labor and industries on account of the death of her father did not lose the right to further monthly amounts because of having been adopted by another) the court stated it was committed to the rule that an adoption does not effect a dissolution of the natural relationship between kindred, and that an adopted child is not deprived of the benefits arising therefrom, citing the Roderick Case (Wash) supra.

But compare the California cases, infra.

✦

A statute which includes as a principal or dominant feature the establishing of the child as an heir of the adopting parent, without making reference to the inheritance from natural parents, is not likely to be construed as depriving the child of that inheritance.

In Shaver v. Nash (1930) 181 Ark 1112, 29 SW2d 298, 73 ALR 961, the court declared, arguendo, that under the Texas statute (providing that any person wishing to adopt another "as his legal heir" should file in a designated office a written statement of a character described and that when made and recorded the statement should entitle the adopted child to all the rights and privileges of "a legal heir" of the adoptive parent) an adopted child retains all his rights to the

protection "and to the estate of, his natural parent."

In Burnes v. Burnes (1904, CC Mo) 132 F 485, affd (CA8th) 137 F 781, cert den 199 US 605, 50 L ed 330, 26 S Ct 746, the court stated that under the Missouri statutes then applying, no judicial proceeding was needed for the adoption of children and that all the statutes seemed to require was a signing by the adopting parent of a specified instrument, its due acknowledgment, and its recording, and that the effect of it was that the child could inherit from its foster parent, even though adopted without his knowledge or consent; in fact could inherit "both from his natural father and the adopting father. Such is and has been the law of Missouri." But see Wailes v. Curators of Central College (1953) 363 Mo 932, 254 SW2d 645, 37 ALR2d 326, infra, § 3, involving a very different statute.

In Slattery v. Hartford-Connecticut Trust Co. (1932) 115 Conn 163, 161 A 79, involving an adoption in Michigan under a statute declaring that the person adopting a child shall stand in the place of a parent to the child and be liable to all the duties and entitled to all the rights of a parent, and that the child shall thereupon become an heir at law of the person adopting him the same as if he were in fact the child of the adopting person, the court said that, under that statute as construed in Michigan, the person adopted would inherit from both natural and adopting parents even though the statute did not specify that the child should retain the inheritance from his natural parents. The ruling made was that the child was entitled to inherit as a child of his natural parent in Connecticut notwithstanding, the court stated, it had seemed wise to the Connecticut legislature to debar a child adopted under the Connecticut statutes from inheriting from his natural parents.

✦

Various cases disclose statements or intimations to the effect that the child retains the right of inheritance from his natural parents notwithstanding the adoption.

In Villier v. Watson (1916) 168 Ky 631, 182 SW 869, LRA1918A 820, the court stated that "all the authorities agree, that the fact of adoption does not lose the adopted child's right of inheritance from his parents," and the court reasoned therefrom that it was "difficult to see why a child could not inherit from two or more persons who might by adoption bestow that right upon him."

In Clarkson v. Hatton (1898) 143 Mo 47, 44 SW 761, 39 LRA 748, 65 Am St Rep 635, the court went so far as to say that by the adoption the child becomes, in a legal sense, the child of the adopting parents, and at the same time remains the child of his natural parents, and is not deprived of his rights of inheritance from them "unless expressly so provided by statute." That language, however, was doubtless used obiter. Compare the ruling in Wailes v. Curators of Central College (1953) 363 Mo 932, 254 SW2d 645, 37 ALR2d 326, infra, § 3.

In Rumans v. Lighthizer (1952) 363 Mo 125, 249 SW2d 397, a contest between the blood kin of the adopted child on the one side and the blood kin of the adoptive parent on the other, both child and parent having died intestate (and therefore not involving the right of an adopted child to inherit from its natural parents or kin), the court cited the Clarkson Case (1898) 143 Mo 47, 44 SW 761, 39 LRA 748, 65 Am St Rep 635, supra, as authority for the proposition that the adopted child inherits "from its adoptive parents and from its natural parents." Yet at the same time the court observed that the Missouri adoption statute of 1917 differed materially from the prior law, and the court quoted language of the 1917 Act, including the provision that when a child is adopted under and in accordance with the act "all legal relationship, and all rights and duties, between such child and its natural parents shall cease and determine," and moreover, the court quoted the language of St. Louis Union Trust Co. v. Hill (1934) 336 Mo 17, 25, 76 SW2d 685, 689, to the effect that under the later law an adopted child's relations with its natural parents cease and by

[§ 2]

law it becomes the child of its adopting parents "for every purpose as fully as though born to the adopting parents in lawful wedlock," and that the adopted child "is taken out of the blood stream of its natural parents" and placed, by operation of law, in the blood stream of its adopting parents.

In Re Klapp's Estate (1917) 197 Mich 615, 164 NW 381, LRA1918A 818, the court conceded, with reference to an adoption statute declaring that upon the adoption taking effect the child should become an heir at law of the adoptive parent or parents, the same as if he or she were in fact the child of such person or persons, that it was "pretty well settled by the adjudicated cases that an adopted child may inherit from both his natural and adoptive parents." However, the matter there to be decided was whether the adopted child lost the right to inherit from the adoptive parent when he was thereafter adopted by another.

In Re Carpenter's Estate (1950) 327 Mich 195, 41 NW2d 349, where the matter to be decided was whether the child remained an heir at law of the first adoptive parents notwithstanding a second adoption (the ruling being in the negative), the court incidentally stated that "there is no question but that the child will always remain an heir at law of her natural parents."

In Patterson v. Browning (1896) 146 Ind 160, 44 NE 993, the court, in holding that the right of an adopted child to inherit from the adoptive parent was not destroyed by a second adoption occurring after the death of the first adoptive parent, relied, arguendo, upon the fact that an adopted child may inherit from both the natural and the adoptive parents.

In Dreyer v. Schrick (1919) 105 Kan 495, 185 P 30, the court, in holding that the fact that a child is the subject of a second adoption does not cut off the capacity to inherit under the former one, asserted that an adopted child may inherit from both the natural and the adoptive parents.

Re Anderson's Estate (1935) 23 Pa D & C 332, involved the construction of a will rather than of statutes of descent or adoption. It was there held that the child was entitled to share in the corpus of a testamentary trust established for the benefit of the natural parent for life, to be paid at his decease "to his child or children living," notwithstanding during the lifetime of his natural parent the child was adopted by a stranger. It is true that at one point the auditing judge said that the question involved the determination of the status of an adopted person "as respects inheritance" from or through a natural parent, but in his ruling he in effect departed from that language. The opinion in confirmation placed no reliance on the mere inheritance laws.

✦

The adoption statutes of certain states have expressly saved the child's right to inherit from his natural parents.

Arkansas. — Hawkins v. Hawkins (1951) 218 Ark 423, 236 SW2d 733.

Florida.—Re Hewett's Estate (1943) 153 Fla 137, 13 So2d 904.

Massachusetts. — Delano v. Bruerton (1889) 148 Mass 619, 20 NE 308, 2 LRA 698.

New York. — Re Landers (1917) 100 Misc 635, 166 NYS 1036; Re Monroe (1928) 132 Misc 279, 229 NYS 476; Re Gourlay's Estate (1940) 173 Misc 930, 19 NYS2d 122; Re Ferris' Estate (1948, Sur) 79 NYS2d 12; Re Fodor (1952) 202 Misc 1100, 117 NYS2d 331.

Ohio. — National Bank of Lima v. Hancock (1948) 85 Ohio App 1, 88 NE 2d 67 ("nothing in this act shall be construed as debarring a legally adopted child from inheriting property of its natural parents or other kin"); Re Crossley (1939) 135 Pa Super 524, 7 A2d 539 (involving Ohio statute).

Pennsylvania. — Re Crossley (1939) 135 Pa Super 524, 7 A2d 539 (involving express provision of Ohio statute).

Wisconsin.—Re Ries's Estate (1951) 259 Wis 453, 49 NW2d 483, 50 NW2d 397.

In Re Hewitt's Estate (1943) 153 Fla 137, 13 So2d 904, a case involving the right of an adopted child to inherit from kindred of the adoptive parent or parents, and therefore not on its

facts within this annotation, the Florida statute of 1933 in question provided that an adopted child "shall inherit the estate of its blood parents, but such blood parents shall not inherit from such adopted child."

In Hawkins v. Hawkins (1951) 218 Ark 423, 236 SW2d 733, the court said it was the settled law of Arkansas that an adopted child "can inherit from its natural parents," and moreover, that by the adoption statute of 1947 it had been expressly provided that "the adopted child should inherit from its natural parents."

In Macon, D. & S. R. Co. v. Porter (1942) 195 Ga 40, 22 SE2d 818, followed in Macon, D. & S. R. Co. v. Porter (1942) 68 Ga App 462, 23 SE2d 280, not involving rights of inheritance but a question whether the adopted child remained the child of his natural father so as to be able to recover for the latter's wrongful death, the adoption statute provided that the adoption decree should declare the child to be the adopted child of the adoptive parent and capable of inheriting his estate, and that as between them the relation of parent and child should exist "except that the adoptive father shall never inherit from the child. To all other persons the adopted child shall stand as if no such act of adoption had been taken."

✦

Notwithstanding the general judicial tendency to uphold the child's right to inherit from his natural parents where the adoption statute may be construed as establishing a personal and family status without intent to affect existing rights of inheritance (see generally the cases supra, especially Sorenson v. Churchill (1927) 51 SD 113, 212 NW 488), the California courts have proceeded to an opposite conclusion.

In Re Darling (1916) 173 Cal 221, 159 P 606, the court declared that the adoption statute specifying that the parents of an adopted child are from the time of the adoption "relieved of all parental duties" toward and "all responsibility" for the child and have "no right over it" had the effect of providing that the adopted child could no longer inherit from his parents because so far as they were concerned "he is no longer their child." The question presented, however, was whether the adopted child could inherit from his grandfather, representatively in the place of his father deceased, and it was held that he could.

In Re Tilliski's Estate (1945) 390 Ill 273, 51 NE2d 24, the court commented that in the Darling Case (Cal) supra, "The somewhat illogical result was reached that an adopted child could not inherit from its natural parents, but could inherit from its natural grandparents." And notice in this connection Sorenson v. Churchill (1927) 51 SD 113, 212 NW 488, supra.

In Re Hunsicker (1923) 65 Cal App 114, 223 P 411, where the adoption occurred in Pennsylvania under statutes merely providing that it should be lawful for any person desirous of adopting any child "as his or her heir" to present a petition declaring such desire and that he or she would perform the duties of a parent to the child, etc., and that the court, if satisfied that the welfare of the child would be promoted by the adoption, might with the consent of the parents of the child decree that the child assume the name of the adopting parent and have all the rights of a child and heir of such adopting parent and be subject to the duties of such a child, and further, that if the adopting parent shall have other children the adopted one shall share the inheritance only as one of them, and that he, she, or they shall respectively inherit from and through each other "as if all had been the lawful children of the same parent," it was held that a natural daughter of the decedent, the will not mentioning her or her children, nor containing any language to indicate that the omission was intentional, could not claim the estate as a pretermitted child (by virtue of the California statute declaring that when any testator omits to provide in his will for any of his children or for the issue of any deceased child, unless it appears that such omission was intentional, such child, or the issue of such child, shall take the same share in the

[§ 2]

estate of the testator as if he had died intestate), for the court was of the opinion that the daughter of the decedent was not one of his children under that statute, the relation of parent and child existing between her and her father having, in the view of the court, been supplanted by a new relation created by the adoption. It seems that the principal contention of the daughter was that upon the death of the adoptive parent the natural relation of parent and child between herself and father had been restored. One might have supposed that the import of the Pennsylvania adoption statute was simply to establish the relation of parent and child between the child and the adopting parent and entitle the child to share by inheritance with the natural children of the adoptive parent in case of intestacy, and that it disclosed no intent to destroy any right to inherit from other persons.

In Re Martin's Estate (1948) 86 Cal App2d 474, 195 P2d 839, where the theory of appellant was that respondent was not entitled to inherit as a daughter of the decedent because she had been adopted out of the family in the year 1910 by a Minnesota adoption decree, the court seemed to assume that had the adoption been valid the result contended for would have followed, but held that the adoption decree was without effect for want of proper notice.

✦

A few statutes very plainly deprive the child of the right to inherit from the natural parents.

In Slattery v. Hartford-Connecticut Trust Co. (1932) 115 Conn 163, 161 A 79, where the court quoted with evident approval the language of Re Darling (1916) 173 Cal 221, 159 P 606, to the effect that it is well settled in all jurisdictions in which the common law constitutes the rule of decision that "the right of inheritance of a child is affected by its adoption only to the extent that the statutes bearing on the matter in terms or by implication provide," the court, without quoting or paraphrasing the Connecticut adoption statute, remarked that it had "seemed wise to our legislature to debar a child adopted under our statute from the right of inheritance from his natural parents, and it has to this extent established our public policy."

In Re Tilliski's Estate (1945) 390 Ill 273, 61 NE2d 24, the court noted that Connecticut had "an express statute precluding inheritance from the natural parent."

And notice the District of Columbia statute in question in Re Penfield's Estate (1949, DC Dist Col) 81 F Supp 622, infra, § 3.

Apparently by a recent Minnesota statute (Laws 1951, ch 508, MSA §§ 259.21 et seq) it is expressly provided that an adopted child (perhaps simply that an adopted illegitimate child) shall not inherit from his natural father, since in O'Dell v. Hingeveld (1951) 235 Minn 223, 50 NW2d 476, the opinion states that prior to that statute, an illegitimate child, adopted by a stranger inherited from its natural father just as did a legitimate child—the court citing Roberts v. Roberts (1924) 160 Minn 140, 199 NW 581, supra.

The Missouri statute, which contains strong language touching the point, has been construed as cutting off the natural inheritance—see Wailes v. Curators of Central College (1953) 363 Mo 932, 254 SW2d 645, 37 ALR2d 326, infra, § 3.

In Re Hampton's Estate (1942) 55 Cal App2d 543, 131 P2d 565, it was conceded that the daughter of the testatrix would have no standing to contest the will if her adoption by another in Kansas was valid, the court stating in reference to that point that the California Probate Code provided that "an adopted child does not succeed to the estate of a natural parent when the relationship between them has been severed by the adoption," citing Re Darling's Estate (1916) 173 Cal 221, 159 P 606, supra. But in the Darling Case the court distinctly stated: "There is no provision in any of our statutes of succession or those relating to adoption that in terms refers to the matter of inheritance."

§ 3. Inheritance from grandparents or other natural kin.

The right of the child to inherit from his grandparents or other natural kin, or to share in the distribution of personalty of intestate persons so related, is not affected by the adoption except as the statutes otherwise provide—see the general citation of cases touching this point, supra, § 1.

In the following cases, such right was upheld:

California.—Re Darling (1916) 173 Cal 221, 159 P 606.

Colorado.—Re Wilson (1934) 95 Colo 159, 33 P2d 969.

District of Columbia.—Re Penfield's Estate (1949, DC Dist Col) 81 F Supp 622.

Georgia.—Macon, D. & S. R. Co. v. Porter (1942) 195 Ga 40, 22 SE2d 818, followed in Macon, D. & S. R. Co. v. Porter (1942) 68 Ga App 462, 23 SE2d 280.

Indiana. — Humphries v. Davis (1885) 100 Ind 274, 50 Am Rep 788; Billings v. Head (1916) 184 Ind 361, 111 NE 177; Head v. Leak (1916) 61 Ind App 253, 111 NE 952.

Iowa.—Wagner v. Varner (1879) 50 Iowa 532.

Kansas. — Bartram v. Holcomb (1921) 109 Kan 87, 198 P 192.

Missouri.—St. Louis Union Trust Co. v. Kaltenbach (1945) 353 Mo 1114, 186 SW2d 578. But see Wailes v. Curators of Central College (1953) 363 Mo 932, 254 SW2d 645, 37 ALR2d 326, infra, this section.

New York.—Re Landers (1917) 100 Misc 635, 166 NYS 1036; Re Gourlay's Estate (1940) 173 Misc 930, 19 NYS2d 122.

Utah. — Re Benner (1946) 109 Utah 172, 166 P2d 257.

In Re Landers (1917) 100 Misc 635, 166 NYS 1036, the right of the child, a half sister of the decedent, to share equally in the distribution of personalty with a sister of the whole blood was held unaffected by the adoption statutes (which, as first enacted, declared that the adopted child and the adoptive parent should sustain toward each other the legal relation of parent and child and have all the rights and be subject to all the duties of that relation, "excepting the right of inheritance," but which as amended, left out the words "excepting the right of inheritance," and substituted the words "including the right of inheritance," and further declared that the heirs and next of kin of the adopted child should be the same as they would be were he the legitimate child of the adopting parent, and also that "his rights of inheritance and succession from his natural parents remain unaffected by such adoption"), for although the statutes made no reference to other kin of the adopted child the court concluded that this simply indicated that "there is no altered relation created by statute."

The grandchildren of an intestate have frequently been allowed to share as heirs or distributees notwithstanding adoption by a stranger.

In Re Darling (1916) 173 Cal 221, 159 P 606, the view taken was that the California adoption statute (providing simply for an order of adoption declaring that the child "shall thenceforth be regarded and treated in all respects as the child of the person adopting," and that the child and the person adopting shall sustain toward each other the legal relation of parent and child and have all the rights and be subject to all the duties of that relation, and further, that the parents of an adopted child shall from the time of adoption be "relieved of all parental duties" toward and all responsibility for the child and have "no right over it") did not have the effect of providing in any manner, either expressly or by implication, that an adopted child should not inherit from blood relatives, and accordingly it was held that the child was entitled to share in the estate of his grandfather, representatively through his deceased father, under that provision of the code declaring that if a decedent leaves no surviving husband or wife but leaves issue, the whole estate shall go to such issue and that if such issue consists of more than one child living, "or one child living and the lawful issue of one or more deceased children," then the estate should go in equal shares to the children living, "or to the child living

[§ 3]

and the issue of the deceased child or children by right of representation." In short, the adopted child in that case remained the "issue" of his grandfather under the law of succession notwithstanding the adoption.

In St. Louis Union Trust Co. v. Kaltenbach (1945) 353 Mo 1114, 186 SW2d 578, the court, in holding that the child remained capable of inheriting from his grandfather, that is, the court said, "through his own father," notwithstanding the California adoption proceeding, noted that the Missouri statute did not expressly provide that an adopted child should not inherit from his natural parents, and in that connection the court referred to the language of Clarkson v. Hatton (1898) 143 Mo 47, 44 SW 761, 39 LRA 748, 65 Am St Rep 635, to the effect that an adopted child remains the child of its natural parents "and is not deprived of its rights of inheritance from them unless expressly so provided by statute." However, in the Kaltenbach Case the specific ruling was simply that the minor child did not lose his rights of inheritance through his own father by a proceeding of which the father had been given no notice and in which no guardian ad litem had been appointed to represent and protect the child's interests.

In Re Gourlay's Estate (1940) 173 Misc 930, 19 NYS2d 122, it was held, upon the authority of Re Landers (1917) 100 Misc 635, 166 NYS 1036, supra, and seemingly under the same or similar statutory provisions, that a child adopted in New Jersey was entitled to share in New York in the distribution of New York assets of which the child's natural grandfather had died possessed.

And, in general, see the cases infra, § 4.

It may be noted that in Re Esposito's Estate (1943) 57 Cal App2d 859, 135 P2d 167, it was held that a granddaughter of the testator, notwithstanding her adoption by a stranger, could claim under the will, substitutionally, an interest in the estate left to her father, the father having predeceased the testator, for notwithstanding her adoption the granddaughter was a "lineal descendant" of her grandfather within the meaning of the statute providing that if a devisee or legatee dies during the lifetime of the testator the testamentary disposition to him fails unless an intention appears to substitute another, except that when any estate is devised or bequeathed "to any kindred" of the testator and the devisee or legatee dies before the testator "leaving lineal descendants," such descendants shall take the estate in the same manner as the devisee or legatee would have done had he survived the testator. The argument to the contrary was largely based on a further statute which dealt with the rights of illegitimate children, but which the court held did not apply and did not control the plain language of the statute first above referred to. The court noted that the granddaughter's claim was not founded upon the succession laws but arose under the laws relating to wills.

It may be noted that in Taylor's Estate (1946) 57 Pa D & C 311, it was held that the child, an illegitimate son of a daughter of one William McDaniels, could take under the provision of a will directing distribution "to the issue of William McDaniels"; this notwithstanding the child had been adopted by a stranger and the adoption statute provided that adopted persons should not be entitled "to inherit or take from or through their natural parents, grandparents, or collateral relatives."

✦

But in Re Ries's Estate (1951) 259 Wis 453, 49 NW2d 483, 50 NW2d 397, where it appeared that in the year 1947 the Wisconsin legislature had rephrased and condensed the language of the adoption statute which was in question in Re Sauer (1931) 216 Wis 289, 257 NW 289, supra, § 2, although generally it seems without intent to change the meaning, but there was added the distinct provision: "The adopted person does not lose the right to inherit from his natural parent," it was held that the addition of that provision, which had been included to

codify the ruling made in the Sauer Case, had the effect of preventing any extension of the doctrine of inheritance from natural relatives additional to parents, and that consequently the child in question by reason of her adoption was prevented from inheriting from her father's aunt. The court conceded that but for the added provision of the statute the Sauer Case might have become a precedent for decisions allowing adopted children to inherit from their natural relatives generally, but, the court said, "now the amendment has intervened," so as to set as a limit the point of decision in the Sauer Case. The language of the first sentence of that section of the adoption statute in question, as altered by the legislative condensation and rephrasing, contained the words that the effect of the order of adoption should be to "completely change the legal status" of the adopted person, language which seems to readily lend itself to the construction that the adopted relationship was to be substituted for the former one.

In Wailes v. Curators of Central College (1953) 363 Mo 932, 254 SW2d 645, 37 ALR2d 326, the first Missouri case to require a decision of the question whether an adopted child may inherit from or through its natural parents, the question was answered in the negative, this on the strength of the language of the Missouri adoption statute of 1917 providing that when a child is adopted in accordance with the provisions thereof all legal relationships "and all rights and duties between such child and his natural parents . . . shall cease and determine" and such child shall thereafter be deemed and held to be "for every purpose" the child of his parent or parents by adoption as fully as though born to him or them in lawful wedlock. The court stressed that it required "some ingenuity to reason that 'all rights' means all except one." There the precise question was whether the adopted children were the heirs of their grandparents, and therefore could be pretermitted heirs entitled to take notwithstanding the joint will of the grandparents, made no mention of them and they were the only children of the only child of such persons and such child had predeceased the decedents. The conclusion reached was that the children, having been validly adopted by strangers, were not heirs of their grandparents, and, therefore, could not be pretermitted heirs of such persons. The court cited Clarkson v. Hatton (1898) 143 Mo 47, 44 SW 761, 39 LRA 748, 65 Am St Rep 635, as indicating that prior to the 1917 change in the adoption law of Missouri an adopted child might inherit from both adoptive and natural parents.

In Young v. Bridges (1933) 86 NH 135, 165 A 272, the child, who was born in wedlock, had unquestionably inherited her mother's interest in the real estate in question, since that interest had come to the mother upon the death of the grandmother and had passed to the child upon the mother's death and was clearly unaffected by the subsequent adoption proceeding. The adoption then occurred, after which the maternal grandfather, who owned an interest in the same real estate, died. The ruling made under those circumstances was that the child could not share in the real estate as an heir of the grandfather, notwithstanding the statutes as amended made illegitimates "heirs of the mother and her kindred," for the court was of the opinion that the adoption statute in making the adopted child "the child of the petitioner to all legal intents and purposes," fairly disclosed an intention that the adoption should establish a "change of status by which in general the relatives become strangers in legal aspect and others take their place." The court took the view that the general purpose of the statute was to free the child from his status arising from his relationships by blood and to give him a new status and that he was to be regarded as "taken in legal contemplation from his natural family and made a member of a new family." As supporting that conclusion the court examined the dilemmas which can arise when the dual inheritance is preserved, by which striking

[§ 2]

inequalities can result, and the court said that when no dual inheritance has been explicitly enacted "the argument against its implication is reinforced by the unnatural and abnormal possibilities to which it leads." It is to be noted that the adoption statute there in question contained no terms peculiarly decisive of the problem, for it merely provided in not unusual terms that the child should bear the same relationship to the adopting parents and their kindred in respect to the inheritance of property, and all other incidents pertaining to the relation of parent and child, that he would bear were he the natural child of such parents, except that he should not take property expressly limited to the heirs of the body or bodies of the adopting parents, and should he die under age or intestate, leaving property received by gift "or inheritance from his natural kindred," such property should be distributed as if there had been no decree of adoption. As to the language last quoted from the statute, the court was of the opinion that any supposed implication thereof contrary to the conclusion reached could be explained by the possibility that at the time of adoption a child might have become the owner of property received by inheritance from natural kindred.

In Re Hunsicker (1923) 65 Cal App 114, 223 P 411, where the Pennsylvania adoption statute (declaring it to be lawful for any person desirous of adopting any child as his or her heir to present a petition, etc., and stipulating that the decree of adoption should provide that the child should assume the name of the adopting parent and have all the rights of a child and heir of such parent and be subject to the duties of a child and that in case the adoptive parent has other children, he, she, or they should respectively inherit from and through each other "as if all had been the lawful children of the same parent") was held not to entitle the daughter of the decedent to take as a pretermitted child by virtue of the California statute providing that when any testator omits to provide in his will for any of his children, or for "the issue of any deceased child," unless it appears that such omission was intentional, such child, or the issue of such child, shall have the same share in the estate of the testator as if he had died intestate, since the daughter had been adopted by a stranger, the further conclusion reached was that the children of the daughter were not entitled to share since they could not be described as "the issue of any deceased child" within the language of the California pretermission statute.

✦

Some of the statutes expressly save the right of the child to inherit from his natural kin.

Georgia.—See Macon, D. & S. R. Co. v. Porter (1942) 195 Ga 40, 22 SE2d 818, followed in Macon, D. & S. R. Co. v. Porter (1942) 68 Ga App 462, 23 SE 2d 280, supra, § 2.

Massachusetts.—Delano v. Bruerton (1889) 148 Mass 619, 20 NE 308, 2 LRA 698.

Ohio.—National Bank of Lima v. Hancock (1949) 85 Ohio App 1, 88 NE 2d 67 ("nothing in this act shall be construed as debarring a legally adopted child from inheriting property of its natural parents or other kin"); Re Crossley (1939) 135 Pa Super 524, 7 A2d 539 (involving Ohio statute).

Pennsylvania.—Re Crossley (1939) 135 Pa Super 524, 7 A2d 539 (involving Ohio statute).

✦

Pennsylvania and District of Columbia statutes have expressly cut off the child's right of inheritance from natural kin. Re Penfield's Estate (1949, DC Dist Col) 81 F Supp 622; Re Zoell's Estate (1942) 345 Pa 413, 29 A2d 31, cert den 318 US 778, 87 L ed 1146, 63 S Ct 855; Re Crossley (1939) 135 Pa Super 524, 7 A2d 539; Re Fisher (1942, Pa) 58 Montg Co LR 134; Re Wessman (1944, Pa) 29 North Co R 242; Re Kallenberger's Estate (1946, Pa) 36 Del Co 389.

The Pennsylvania statute of 1917, in question in Re Zoell's Estate (1942) 345 Pa 413, 29 A2d 31, cert den 318

US 773, 87 L ed 1146, 63 S Ct 855, contained the express provision that adopted persons "shall not be entitled to inherit or take from or through their natural parents, grandparents, or collateral relatives." Thereunder it was held that appellant, a niece of the intestate, who had been adopted by another in New Jersey, was not entitled to share in the estate even though the New Jersey decree purported to save to the child rights of natural inheritance.

In Re Penfield's Estate (1949, DC Dist Col) 81 F Supp 622, it was held that a Nevada adoption decree of March, 1922, did not exclude the adoptee from receiving as next of kin of a decedent personal property in the District of Columbia, notwithstanding the code of the District, becoming effective August 25, 1937, declared that all rights and duties "including those of inheritance and succession between the adoptee, his or her natural parents, their issue, collateral relatives, etc., shall be cut off," for the statute also provided that it should have no retroactive effect and should not be construed as affecting in any way the rights and relations obtained "by any decree of adoption entered prior to August 25, 1937."

The ruling in Stamford Trust Co. v. Lockwood (1922) 98 Conn 337, 119 A 218, did not involve the question whether an adopted child may take by inheritance from his natural parent or kin, but whether the testamentary words "the lawful issue," as applied to children of a son of the testator, included one who was born after testator's death and was adopted by a stranger. It was held that, by force of the adoption statute, the grandchild ceased to be the child of her father and became the child of her parents by adoption and could not take as "lawful issue." The report does not set out or paraphrase the statutory language construed to have had that effect, but seemingly it was language explicitly cutting off the right of inheritance—see Slattery v. Hartford-Connecticut Trust Co. (1932) 115 Conn 163, 161 A 79, supra, § 2.

§ 4. Inheritance in two capacities from one estate.

Decisions from Colorado, Iowa, Kansas, and Utah have allowed a child adopted by his grandparent to take as a "child" of the grandparent and also to take as a grandchild representing the stock of the immediate parent deceased, the latter recovery (except in Utah) having been allowed under statutes of descent and distribution manifestly designed to avoid the inequality which would result from an entire exclusion of the stock of the immediate parent, where a brother or sister of the latter survives, and seemingly not with any intent to produce a double inheritance.

In Wagner v. Varner (1879) 50 Iowa 532, where the intestate had adopted the two children of a deceased daughter, and was survived by them and also by certain children, it was held that the adoptees were entitled to share in the estate as children and also as grandchildren, taking in the latter capacity the share their mother would have taken had she outlived the decedent—this because the adoption statute declared that the rights, duties, and relations between parent and child by adoption should in all respects, including the right of inheritance, "be the same that exist by law between parent and child by lawful birth," and the descent statute provided that in case a child of the decedent be dead the heirs of such child shall inherit the share such child would have taken had he outlived his parent. The court said that there was no escape from the conclusion announced unless it could be said that a child by the adoption becomes disinherited by its natural parent, and the court noted that in certain contingencies adoption could be had without the consent of the natural parents, so that, in the view of the court, under the contention made an adopted child might be "disinherited by the natural parent without the consent of the latter." The further argument of the opinion was that by the adoption the child acquires certain additional rights and there was nothing in the act of adoption which in and of

[8 4]

itself took away existing rights or any which might subsequently accrue, except as by statute provided, that the grandchildren in question remained the children of their natural parents, and the act of adoption did not deprive them of the statutory right of inheriting from their natural parents; in fact the court said: "We think the contrary is expressly provided." It may be noted, however, that in such a situation as that presented, no right to inherit from the natural parent is involved, the latter having predeceased the intestate; the question arising is simply whether the adopted child may share twice in the one estate.

In Bartram v. Holcomb (1921) 109 Kan 87, 198 P 192, where the intestate had had two children, one of whom died in his lifetime leaving an only child, and such child was then adopted by the intestate and survived him and eventually claimed one share in the estate as the representative of his mother and another as adopted son, the court in allowing the double sharing regarded it as the logical result of the rule that an adopted child may inherit from both the natural and the adopted parents, the court in that connection stating that the only question presented was whether the grandson could inherit from his grandfather as an adopted child "and at the same time as the sole surviving heir of his mother." The court did not set out or paraphrase the language of the descent statute, but evidently it was one in the familiar form dividing the estate of an intestate into as many shares as there are children surviving and children deceased who have left issue surviving.

In Re Wilson (1934) 95 Colo 159, 33 P2d 969, where, following the decease of both natural parents, the child was adopted by his grandfather, it was held that upon the latter's death the child was entitled to inherit from his grandfather both as an adopted child and as a grandchild, since the statutes of descent and distribution provided that intestate property should go to the decedent's children surviving and to the descendants of his children who were dead, while the adoption statute simply provided that to all intents and purposes legally adopted children should be children and legal heirs of the persons adopting them and was to be construed as depriving an adopted child of nothing but as conferring on him certain additional rights of inheritance.

In Re Benner (1946) 109 Utah 172, 166 P2d 257, the only surviving heirs of the intestate were three grandchildren, the issue of a deceased daughter, and the intestate had adopted one of those grandchildren. It was held that the child did not thereby lose the right to inherit from and through his mother, for in its bearing on that question the adoption statute merely provided that the adopted person and the adoptive parent should sustain the legal relation of parent and child and have all the rights and be subject to all the duties of that relation and that the natural parents should be relieved of all parental duties toward and all responsibility for the child and should have "no further rights over it," and the court was of the opinion that the reasonable construction of that language was that it did not touch the matter of inheritance but had reference rather to custody and control. Moreover, the conclusion which was held to follow (one judge dissenting) was that since the statute of descent and distribution provided that if a decedent leaves no husband or wife but leaves issue, the whole estate should go to such issue, the child was entitled to take a one-third share as "issue," besides the greater share he was entitled to as adopted child.

But in Billings v. Head (1916) 184 Ind 361, 111 NE 177, where the decedent left as his heirs a widow, four children, and a grandchild (the latter being the daughter of a deceased son who had been adopted by the grandfather), it was held with reference to the statutes of descent providing that an intestate's land should descend one-third to his widow and the remainder to his children equally, and that if a child be dead leaving a child surviving the latter should take the share which

the parent would have inherited if living, and also with reference to the adoption statute providing that an adopted child should be entitled to all the rights in the estate of the adopting father or mother, by descent or otherwise, that the child would be entitled to if a natural heir of the adopting father or mother, that the grandchild in question was entitled to take either two-fifteenths of the estate as the representative of her father or two-fifteenths as the adopted daughter of the intestate but was not entitled to take a double share. The court conceded that the statutes contained no language dealing with the situation presented, placing the decision upon the broad ground that it was "not the legislative purpose" that an adopted grandchild should ever inherit more of the adopting parent's estate than would one of his natural children. It was not decided in that case whether the grandchild took as adopted child or on the contrary through her father, although the court pointed out that in the future it might be important to know under which statute, the adoption statute or the descent statute the interest was taken, for by an express provision of the adoption statute if an adopted child should die the owner of property acquired through the adoption, rather than as a blood descendant, the same should descend to the heirs of the adopting father or mother and not otherwise. Later in Head v. Leak (1916) 61 Ind App 253, 111 NE 952, involving a distribution of the surplus of personal estate of the deceased adoptive parent, the grandfather of the adopted child, it was held that the principle to be followed in determining in which capacity the child took from her grandfather was that she should be held to take in that capacity which would give her the greatest interest and that since there was no proviso attaching to the further descent of property taken as a natural heir and it would descend according to the general laws of descent, and the child's rights in the property would consequently be greater as a natural heir than as an adopted child, the conclusion indicated was that she took as a natural heir through her deceased father.

In Morgan v. Reel (1905) 213 Pa 81, 62 A 253, it was held that the adoption statute, providing that the adopted child should have the rights of a child and heir of the adopting parent, although if the latter should have other children the adopted child could share only as one of them, and that in case of intestacy, he, she, or they, should respectively inherit from and through each other as if all were the lawful children of the same parent, certainly did not expressly provide for the case of a grandparent adopting his grandchild, yet that nevertheless the intent was plain that the status of the adopted child should be equal but not superior to that of the others and that such intent was enough to indicate that the child could share in the grandfather's estate only as his child by adoption and could not also share as a representative of her deceased mother. The result was that the estate was held to descend in four stocks: one to each of the two actual daughters, another to the adopted daughter, and the remaining one to the son of the deceased daughter. Said the court: "Thus, and thus only, can the equality intended by the statute be maintained." In Reel's Estate (1902) 12 Pa Dist 608, involving the same estate and adopted child and right of inheritance as were in question in Morgan v. Reel (Pa) supra, it had been held (contrary to the later ruling in the Morgan Case) that the grandchild of decedent having been adopted by him was entitled to take a fourth share of the estate as his child and also an eighth as a natural grandchild, the latter by virtue of the statute of inheritance entitling issue of a deceased child to take the share of the parent, representatively.

In Delano v. Bruerton (1889) 148 Mass 619, 20 NE 308, 2 LRA 698, where the intestate, who left as his heirs at law and distributees five daughters and also a grandson, the latter the only child of a deceased son, and he

[8 4]

had adopted the grandson, and the adoptee claimed a share in the personal estate as an adopted son and also a further like amount as a grandson representing his deceased father, relying upon a provision of the adoption statute that "no person shall, by being adopted, lose his right to inherit from his natural parents or kindred," the court was of the opinion that in making the latter provision the legislature was not to be understood as intending that the word "kindred" should include the adopting parent, the intent having been rather to save the right of inheritance "from other parties," after having provided for the right of inheritance from the adopting parent. The court stressed that it was not dealing with the question whether the grandson could inherit as a son by adoption and at the same time inherit as a son of his own father, but the sole question was as to the right to inherit from the grandfather in two capacities. The court did not cite the statutes of descent, which evidently provided for the division of personalty of an intestate into as many shares as he leaves children surviving and children deceased who have left issue surviving.

In Burnes v. Burnes (1904, CC Mo) 132 F 485, aff'd (CA8th) 137 F 781, cert den 199 US 605, 50 L ed 330, 26 S Ct 746, the court, although conceding that under the then Missouri statute (which seemed to require no judicial proceeding but simply the signing by the adopting parent of acertain instrument, and its due acknowledgment and recording) the effect of an adoption was that the child could inherit both from the natural father and the adoptive one, said that the child could not inherit "from one person's estate in the dual capacity of a blood relation and as an adopted child."

In Grimes v. Grimes (1935) 207 NC 778, 178 SE 573, involving the rights of an adopted child in the estate of his grandfather who had died intestate, it was apparently not disputed that the child was entitled to share in the interest which his mother, a daughter of the intestate, would have taken had she not predeceased him, but the child's additional claim that since he had been adopted by his uncle, a son of the intestate, and the uncle, too, had predeceased the intestate, claimant was entitled to take a further share, representatively, through the uncle, was disallowed, this upon the ground that the effect of the adoption was simply to create in the child a right to inherit from the adoptive parent and not to inherit through him from the latter's kin. The fact that a blood relationship existed between the child and the adoptive parent and the latter's father was held not to alter the result.

It may be noted that in Einstein v. Michaelson (1919) 107 Misc 661, 177 NYS 474, the ruling made was simply that the only child of the testator's deceased son, which child had been adopted by the testator, could not take under the will both as a child and as a grandchild.

And in Mississippi Valley Trust Co. v. Palms (1950) 360 Mo 610, 229 SW2d 675, involving the right of grandchildren of the testator to take under his will as "heirs at law," so designated by the instrument, and consequently not in strictness within the scope of this annotation, the conclusion reached was that since the will manifested throughout its provisions the testator's intention to provide equally for his children, and also for his grandchildren per stirpes, the two grandchildren in question could not take as such, and also as adopted children of their mother's sister, although the court seemed to concede that despite their adoption the children remained heirs of their natural mother and, had their grandfather died intestate, might have been entitled to share in his estate through her.

SB-296

Motor Vehicles

DRIVERS' LICENSES—

Nebraska motor vehicle statute that provides for summary suspension, after accumulation by traffic convictions of 12 or more point violations, of driver's license does not violate Due Process Clause.

A revocation for traffic violations under the point system of our statute involves a substantially different situation than revocation under Financial Responsibility Acts. Those acts are founded upon the premise that the motorist involved in an accident may be at fault. In Bell v. Burson, 402 U.S. 535, 39 LW 4607 (1971), the U.S. Supreme Court held that before the driver's license and registration of the motorist could be revoked there must be a determination made at a hearing "appropriate to the nature of the case" that there is a reasonable possibility he is in fact at fault. In those situations the danger that the Court wishes to guard against is an unreasonable possibility of wrongfully depriving the motorist of a valuable entitlement. Under the point system of revocation as established by our statutes, the possibility of error is unlikely and the procedural safeguards that are inherent in the system afford an opportunity to correct before irreparable damage occurs such as might happen.

The challenged statute prescribes the number of points to be assessed against the licensee for each conviction under the various categories of violations. It provides for revocation of the license if there is an accumulation of 12 or more points within a two-year period. The statute specifies the duty of tribunals in which the traffic conviction takes place with reference to entry of judgment in such case and requires the forwarding of an abstract of the convictions to the director of the Department of Motor Vehicles. The abstracts set forth the date of the violation; the date of hearing; the name and address of the motorist; the date of his birth; his operator's license number; the vehicle number; and docket and page number of the proceedings in the court; the judgment of conviction including fine and costs; the plea; a description of the offense; the name of the enforcing agency and the officer's name; the date of any appeal from the judgment or the date the appeal was dismissed if that is the case; and a formal certificate for a judge, clerk, or magistrate to sign.

Every motorist is charged with notice of the contents of the statute specifying the points assessed for the various violations. For every offense he has or is afforded an opportunity for hearing. He therefore is charged by law with knowledge that his license is in jeopardy and at all times is charged by law with notice of the state of his record as it pertains to points charged against him.

The information required to be set forth in the abstracts of conviction is entirely adequate to readily determine if mechanical or identification errors have occurred.

If errors do occur, or if there should be fraud, or an absolutely void judgment, the statute affords a remedy. The statute provides for an appeal from an order of revocation to the district court and authorizes the judge to stay the order of revocation pending the appeal. There is a full evidentiary hearing and no fact finding of the director is binding on the courts.

In a very real sense, the essential facts have been determined in judicial proceedings in connection with each conviction. In a very real sense the director acts only ministerially. The result — the revocation — flows from the operation of the statute upon the already judicially determined facts, that is, the series of convictions of traffic offenses. These circumstances do, in our opinion, make the procedures applicable to revocation of the driver's license for an accumulation of points for traffic offense convictions clearly distinguishable from revocation under a financial responsibility law as in Bell v. Burson. The financial responsibility statutes create without a hearing a presumption of fault. This is their constitutional deficiency. Such a situation does not exist in the case here involved. Under the statutory scheme of Nebraska, no notice and hearing were required before the issuance of the order of revocation. — Clinton, J.

SB-296 ETB

Nebraska Motor Vehicle Point System Is Upheld

Although the U.S. Supreme Court has recently cast doubts on the constitutionality of motor vehicle financial responsibility acts that deprive a driver of his license without a presuspension hearing, Bell v. Burson, 402 U.S. 535, 39 LW 4607 (1971), the Nebraska Supreme Court finds a way to sustain Nebraska's ex parte point system. Due process does not invalidate a system that automatically deprives a driver of his license after he accumulates a predetermined number of traffic violation points. (Stauffer v. Weedlun, 3/10/72)

Revocation under the state point system "involves a substantially different situation" than revocation under financial responsibility acts. Those acts are founded upon a premise that the motorist involved in an accident may be at fault. In those situations, the danger the court wishes to guard against is the possibility of wrongfully depriving the motorist of a valuable entitlement.

Every motorist is charged with notice of the contents of the statute specifying the points assessed for the various violations and, since for every offense the motorist has or is afforded an opportunity for a hearing, he is charged by law with knowledge that his license is in jeopardy.

In a very real sense, the essential facts leading up to the revocation have been determined in judicial proceedings in connection with each conviction. The Director of Motor Vehicles acts only ministerially and the result — revocation — flows from the operation of the statute upon the already judicially determined facts. (Page 2633)

SB-296

plaint and, on appeal, the union members assert that since individual liability for concerted action in violation of their contract is precluded under Section 301, a state cannot impose that liability.

It must be concluded that the federal preemption doctrine has withdrawn the diversity remedy stated in count 3. See San Diego Building Trades Council v. Garmon, 359 U.S. 236 (1959); Street, Electric Ry. and Motor Coach Employees v. Lockridge, 403 U.S. 274, 39 LW 4741 (1971). Although Section 301 does not grant federal courts exclusive jurisdiction over controversies within the Act's purview, a state court—or a federal diversity court—is not free to apply individualized local rules when called upon to resolve union-employer disputes. Section 301(a) is peculiarly one that calls for uniform law. Teamsters v. Lucas Flour Co., 369 U.S. 95 (1962). In light of federal labor policy, legislative history, and congressional intentions, it must be concluded that Section 301 was enacted in part to prevent the assessment of damages against individual union members for the alleged misconduct stated in count 2. Any conflicting state rule must give way to the federal principle.—Kuley, J.

—CA 7; Sinclair Oil Corp. v. Oil—Chemical Workers, 10/0/71.

STRIKES—

Union adherents' mere participation in sit-down strike, absent established grievance procedures and unaccompanied by violence, threats of violence, or damage to employers' property, does not deprive them of Taft Act Section 7 protection.

The employees here were discharged after they engaged in a sit-down strike to protest six other employees' discharge. The six employees had been dissatisfied with the progress of bargaining and engaged in a work slowdown.

The company relies on NLRB v. Fansteel Metallurgical Corp., 306 U.S. 240 (1939), and argues that the sit-down strike did not constitute concerted activity protected under Section 7 of the Taft Act. The discharges would therefore be for cause and would not violate Sections 8(a)(3) and (1). In Fansteel, 95 employees, in response to their employer's unfair labor practices, took over and held two of the employer's key buildings thereby causing the remainder of the plant to cease operation. After the employees' shift had ended, the plant's superintendent demanded that the employees leave. After they refused, they were discharged. They continued to hold the buildings for nine days, during which time a pitched battle occurred between workers and police officials upon efforts of the police to evict the strikers. The Supreme Court held that when the employees resorted to "that sort of compulsion" they took a position outside the protection of the statute.

The company contends that all sit-down strikes are thus unprotected by Section 7 and are not a legitimate weapon to be used in the field of labor relations. Since Fansteel however, the cases are clearly contrary to this contention.

For example, NLRB v. American Mfg. Co., 106 F.2d 61 (CA2 1939), involved a temporary work stoppage induced by an employer's unfair labor practice. The court refused to consider such activities an illegal sit-down strike, noting that the employees did not claim to hold the premises in defiance of the owner's right of possession. A similar result was reached in Olin Ind., Inc. v. NLRB, 191 F.2d 613 (CA5 1951).

Analogous activity was, however, found to be unprotected by the Fourth Circuit. In Cone Mills Corp. v. NLRB, 413 F.2d 445 (CA4 1969), employees engaged in a work stoppage to protest the discharge of a fellow employee. The union steward, despite established grievance procedures to the contrary, demanded that immediate reinstatement of the discharged employee before beginning discussions. Several of the employees stated that they would refuse to work until the discharged employee was rehired. The court relied heavily on the regular grievance procedures in effect, found that the employees had already made their point about their feelings concerning the previously discharged employees, and found no violation of Section 8(a)(1). However, NLRB v. Serv-Air, Inc., 401 F.2d 363 (CA 10 1968), held that, absent established grievance procedures, a spontaneous work stoppage to present a grievance was a protected activity.

There are no facts in this case showing that the employees were claiming to hold the premises in defiance of the owner's right of possession. The sit-down did not threaten to carry over into the next shift, and the employees left immediately when requested to do so by the police.

[*Text*] The mere act of sitting down on the job in order to further discussions with an employer, as was done in the instant case, can alone furnish no basis for a finding that the acts constituted a forcible seizure of the employer's property. Fansteel does not so hold, and we know of no case that does. * * * Without more than the mere act of sitting down during a labor dispute, there is no more incitement or probability of violence than is necessarily incidental to any other act. * * *

An employer cannot convert a protected in-plant work stoppage into an unprotected trespass by the simple expedient of ordering his employees from the plant where, as here, such an order served no immediate employer interest and unduly restricts the employees right to present grievances to their employer. The employer interest in maintaining an established grievance procedure and the absence of restriction on employees in the face of such procedures, such as that found in Cone Mills, is not present in the instant case. At the time of the sit-down strike, negotiations between the company and the union had just begun pursuant to the union's certification only two months prior. There is no evidence of any established, regular procedure by which employees were to present their grievances. Under such circumstances, we cannot find that the employees had no interest in presenting their grievance in the manner chosen in the instance case. [*End Text*]—Thornberry, J.

—CA 5; NLRB v. Pepsi-Cola Bottling Co. of Miami, Inc, 10/13/71.

Motor Vehicles

DRIVERS' LICENSES—

Due process bars suspension of driver's license under Pennsylvania "point system" without prior notice to driver and opportunity for hearing.

The Pennsylvania point system provides a means of assessing "points" by the Secretary of the Department of Transportation upon receipt of notification of conviction of certain specified violations of the Motor Vehicle Code. Notice is given to the driver of the imposition of the points on each occasion and when a total of 11 points is accumulated, the Secretary is directed to suspend the operator's license for a specified period. No administrative hearing is provided either upon each assessment of the points or before suspension, but after the penalty has been imposed an appeal may be taken to the commonwealth court.

The operator challenging the statute is a truck driver whose livelihood depends on his ability to operate a motor vehicle. His driving record over a two-year period resulted in his accumulation of a total of 11 points, the result of which was that his license was suspended by the secretary for a period of 60 days. He took an appeal to the court of common pleas, contending that he was not guilty of the violations for which points had been assessed and that there was a fatal variance between the information and the conviction for which five

points had been assigned. His appeal was dismissed, the court relying upon the case of Commonwealth v. Virnelson, 243 A.2d 464 (Pa. 1968), which held that there could be no review of the facts behind the conviction giving rise to the assessment of points and that the only matter which might be shown was improper calculation of the points. Under Pennsylvania law a payment of fines and costs, as this driver did, is equivalent to a plea of guilty and in the context of this case would be an admission of a conviction.

[*Text*] There can be no quarrel with the commonwealth's position that in order to regulate the use of its highways, the state does have power to enact the Point System Plan into law and that it may use infractions of the Vehicle Code as a basis for license suspension. We may say further that the legislation is an intelligent and commendable effort to diminish the carnage on our highways by focusing attention on the most common cause of accidents, the careless and code-violating driver. However, it is not enough that the substantive provisions of a statute pass constitutional muster because it is also necessary that the methods of administration meet appropriate standards of due process.

Bell v. Burson, 402 U.S. 535, 39 LW 4607 (1971), makes it clear that even if denominated a privilege, as the Pennsylvania court did in Commonwealth v. Funk, 186 A. 65 (Pa. 1936), nevertheless an operator's license is not to be taken away by state action which fails to comply with procedures required by the Fourteenth Amendment.

The commonwealth in its brief concedes, and our independent examination confirms, that the Point System Act makes no provision for departmental administrative hearing at any time before suspension. Section 618(h) of the Vehicle Code provides that after notice of suspension, any person may request a departmental hearing but it is not the practice to notify the licensee of the availability of this opportunity. See In re Hamsher Motor Vehicle Operator License Case, 175 A.2d 303 (Pa. 1961). Similarly, judicial review under section 620 of the Code is provided only after suspension.

We find that this falls short of what the Constitution requires. As was said in the Bell case: "* * * it is fundamental that except in emergency situations (and this is not one) due process requires that when a state seeks to terminate an interest such as that here involved, it must afford 'notice and opportunity for hearing appropriate to the nature of the case' before the termination becomes effective." 402 U.S., at 542.

Here the state furnished neither notice nor opportunity for Reese to be heard either at an administrative hearing or de novo before a court before the termination. * * *

[E]ven if the convictions cannot be contested, there still remain the possibilities, among others, that the convictions were those of another person with the same name; that the fines and costs were paid on an information at variance with that for which the minor judiciary entered a conviction as plaintiff contends occurred in this case; that the points were improperly calculated; that credits were wrongfully withheld; or that there were errors on the report of conviction form. In none of these instances is there a provision for a hearing before suspension even though notice of the assessment of points is given. Notice without opportunity to rectify error obviously is not sufficient. [*End Text*]—Weis, J.

Concurrence. [*Text*] Those licensed by a state to operate motor vehicles on its highways are charged with the knowledge that a violation of the Code will result in liability for the payment of a fine and the assignment of a specified number of points to that individual's record, and that on the accumulation of 11 points automatic license suspension will result. Accordingly, it seems to me that the licensed public is charged with knowledge of the provision of the Pennsylvania Motor Code; that all motor vehicle operator licensees must abide by the rules of the road, and that upon failure to do so to stand liable and submit to the penalty of a fine and points, and such suspension and revocation as are set forth in the Act.

I find it difficult to separate the penalty into two separate parts so as to indicate that the payment of a fine is one thing, and the imposition of points is another. In reality the paying of the fine and the imposition of the points are one and the same, since by legislative mandate the latter accompany the former. * * *

In the present situation, the repeated nature of the offenses, and the non-discretionary duty of the secretary compel the conclusion that in all probability the petitioner is the type of individual which the commonwealth sought to exclude from its highways in the interests of public safety. In almost every case of this sort, a hearing prior to the suspension would serve no valid purpose other than putting the commonwealth to the added burden of providing a hearing which would disclose that the assignment of 11 points to the individual's driving record was properly made. However, as the majority indicates, there does exist the extremely remote possibility that compounded errors could result in the suspension of the license of an innocent individual. Under these circumstances, which I feel are highly improbable, a miscarriage of justice would result in an individual being deprived of his operator's license without due process of law. * * *

Thus, while I firmly believe that Sec. 619.1 of the Pennsylvania Motor Vehicle Code is a valid exercise of police power, I am bound to support the ultimate conclusion reached by the majority only on the remote possibility that a summary suspension might inadvertently deprive an innocent person of his operator's license without due process of law. For the limited purpose of inquiring into the propriety of the secretary's record, and not for the purpose of authorizing a review of each of the constituent cases of their respective penalties whether fines or points, or both, I join in the result reached by the majority. [*End Text*]—Rosenberg, J.

—USDC WPa (three-judge court); Reese v. Kassab, 10/26/71.

Municipal Corporations

BUSINESS REGULATIONS—

District of Columbia City Council lacks authority under its general police power to enact "geographic discrimination" insurance regulations which, like Congress' D.C. Insurance Placement Act, seek to regulate availability of high risk coverage.

The insurance challenged here bars insurers from declining to insure or renew contracts of insurance "because of the geographic area within the District of Columbia wherein is located the subject of the risk or the applicant's or insured's address." Further, the regulations specifically list the permissible reasons for cancellation. These regulations were issued pursuant to the general police power granted to the Commissioners of the District of Columbia by Congress.

Although the ultimate legislative power over the District of Columbia resides in Congress, Congress has established a relationship with the District comparable to that existing between municipalities and their parent states.

Since the authority to make reasonable and usual police regulations was delegated to the District in 1892, that power has never been used to regulate the insurance field. With the exception of Chicago v. Phoenix Ins. Co., 126 Ill. 276, 18 N.E. 668 (1888), no cases considering the application of municipal police power to the regulation of insurance have been found. That case struck down a municipal insurance tax on the ground that the state

YULE FISHER, National Chairman
EDWARD F. KEARNEY, Executive Director

March 6, 1972

Mr. Stuart C. Hall
Legislative Affairs Agency
Pouch Y
State Capitol
Juneau, Alaska 99801

Dear Mr. Hall:

Regarding your letter of March 1, 1972, you seem to already have satisfactory answers to your questions 4 and 5; here are some observations on the first three:

1. Six states and the Uniform Vehicle Code follow the approach of the Governor's bill. Another 16 jurisdictions have point systems which are administratively established. Thirteen states, on the other hand, follow the approach of the Ray bill, setting out the point values in the law itself.

2. Under Bell v. Burson and other recent Supreme Court cases it is clear that a driver's license cannot be taken away without affording the licensee due process, most essentially, a hearing. Whether that hearing must preceed delicensing action or can be offered subsequent to that action (as now authorized under the UVC) is a debatable question. Proposals have been submitted to amend the UVC in this respect. Probably your safest course of action would be to recommend that the Alaska law should require a hearing prior to any discretionary licensing action. Although I have not yet read the case myself, I am advised that a recent Federal District Court decision, Reese v. Kassab, 334 F. Supp. 744 (1971) requires a hearing prior to a sus ension based on a point system.

3. Better yet there should be a general provision to this effect applicable to your whole driver licensing law. See UVC § 6-204(c), for example. We believe it is constitutional. Alaska already has a comparable provision but it does not clearly apply to the whole driver licensing law. See AS § 28.15.190(c).

In terms of a general observation, we note that discretionary suspension and revocation in Alaska is in the hands of the courts rather than the department of motor vehicles. See AS § 28.15.220. This is very uncommon but we assume you have some good reason for doing it this way. Both the Governor's bill and the Ray bill, however, place the discretion to suspend in the department of motor vehicles. Passage of either of these bills would mean that both the courts and the department have authority to suspend, often upon the same grounds. This would be unnecessarily confusing and might make it much more difficult to keep accurate records of suspensions.

The Randolph-Warwick bill is very different. It provides for mandatory license action on the basis of the accumulated point level. The UVC, the Ray bill and the Governor's bill, on the other hand, all provide for discretionary action against a driver who is identified by the point system. See my observations on this distinction in my February 25th letter. It is where the Randolph-Warwick type effect is given to a point system that an administrative determination of point values might very well be an unreasonable delegation of authority. Thus proponents of this bill will quite justifiably urge that the point values should be set out in the law. Where, as under the UVC, however, the point system is merely used to identify "habitually reckless or negligent" drivers, and the law clearly authorizes the department to suspend such habitually reckless or negligent drivers, there should be no problem in allowing the department to determine point values.

Unfortunately, while both the Governor's bill and the Ray bill specify the purpose of the point system as "identifying habitually reckless or negligent drivers . . .," neither clearly gives the department authority to suspend such drivers. That authority now rests with the courts under AS § 28.15.220(b)(4). Both bills would be made stronger by inclusion of a provision such as UVC § 6-206(a)(3), or by completely revising AS § 28.15.220 to conform with UVC § 6-206 in its entirety.

Sincerely,

John W. English
Staff Attorney

Section III

Statutory Point Systems

SB-296

(Table 7)

In addition to the authority granted by law to suspend or revoke a driver's license on a mandatory or discretionary basis (Tables 1-6), at least 19 states have established statutory point systems governing license suspension and revocation.* In six of these states (Idaho, Iowa, Nevada, South Dakota, Utah, Wisconsin) the department is authorized to develop a point system by rule in accordance with the general mandate laid down by the legislature. The UVC, by a 1968 revision, now incorporates similar authority.

Under this authority, points are assessed for specified offenses and the accumulation of a given number of points within a prescribed period of time results in license withdrawal.

Digests of the several statutory point systems are covered on the following pages. Included also are the New Jersey and District of Columbia Point Systems established by regulation. One thing that may be considered common to all such point systems is their dissimilarity in many basic features.

For example, Michigan, Nebraska and Ohio provide that the accumulation of 12 or more points within two years subjects a person to license withdrawal. In addition to variations in the procedures to be followed, Michigan provides for maximum suspension of one year. In Ohio, suspension shall be for six months if the offender had not been previously suspended under the point system; but suspension shall be for one year if such person had no more than one such previous suspension, three years if not more than two such suspensions, and five years if three or more previous such suspensions. Nebraska requires mandatory revocation of license for one year, unless the court specifies a longer period.

In another state (N. C.) where 12 or more points within a three-year period also results in license suspension, the maximum periods are as follows: on first suspension, 60 days, on the second, six months, and on a third, one year; a licensee is also subject to suspension upon accumulating eight points within a three-year period following reinstatement after license has been withdrawn because of conviction for one or more traffic offenses.

In other jurisdictions suspension action is taken according to a graduated point accumulation over a period of years. Thus, in Colorado a maximum of one year's suspension may be imposed when a driver has accumulated 12 points within 12 consecutive months or 24 points within 24 months. (It might be noted that the Colorado law which included grounds for discretionary suspension of license similar to those covered in Tables 4-6, repealed this authority in 1959 and substituted a statutory point system.)

The assessment of eight points within two years in Maryland results in the initial suspension of license from two days to 30 days; on the second suspension, the period of license withdrawal would be from 15 to 90 days; a license is revoked for three months upon the accumulation of 12 points within a two-year period.

Florida is somewhat similar but fixes the period of maximum suspension for point demerits within the periods prescribed: 12 points within 12 months calls for suspension for a maximum of 30 days; for 18 points within 18 months, the maximum suspension is three months; and the accumulation of 24 points within 36 months results in suspension for a maximum of one year. Points used as the basis for suspension are used in determining point accumulation leading to subsequent suspension, since points maintain full value for 36 months.

Florida has also modified its point values for all the offenses listed by changing from a fixed point total to a point range. Thus, reckless driving, previously resulting in an assessment of four points, now has a point spread of from two to six points; passing a stopped school bus, formerly a four point violation, now has a range of from two to four points. Courts are required to assess points against violators from the minimum to the maximum point values specified; if court fails to do so, department shall assign the median points.

Hawaii, which adopted a court administered statutory point system in recent years, also provides for a point spread in the violations listed. In fact, in some violations listed, point assessment may be from zero to two or three points. For example, for unlawful passing, the point range is from zero to three; improper turning, from zero to two points.

Missouri, which enacted a point system law within the past few years, also has a special feature with regard to point values covering all offenses enumerated. For example, driving while under the influence of intoxicating liquor or narcotic drugs results in the assessment of 12 points if the violation is under state law, but only six points if a violation of a county or municipal ordinance. Moreover, practically all author-

**The following states are reported to have administrative point systems: Alabama, Arizona, Connecticut, District of Columbia, Illinois, Indiana, Kentucky, Louisiana, Maine, Montana, New Jersey, New York, Oklahoma, Oregon, Rhode Island and Washington.*

ity for license suspension or revocation, is now covered in the Missouri point system.

There is also considerable variation among the states with regard to the type of violations included under the point systems and the value of points assigned for comparable offenses. The offense of passing a stopped school bus might be cited as an example of this situation.

In North Carolina conviction for such violation requires the assignment of five points against the offender's record; in South Carolina six points are assessed. In Colorado, four points are assigned upon conviction for failing to stop for a stopped school bus, whereas in Florida, as noted above, two to four points are assessed. No specific reference is made to such violation in the schedule of offenses in the point system laws of Michigan, Nebraska or Ohio, for example, but all moving violations other than those listed are assigned two points; thus such an offense would presumably have a two point value. These differences in points assessed for the same offense would have to be correlated with the total point accumulation and the time periods at which action against a person's license may be initiated in the several states in order to draw an accurate comparison.

Moreover, some states include offenses which would require mandatory revocation of license under other law, such as convictions for driving while under the influence of intoxicating liquor or drugs. In some of these, the number of points assessed are equal to the action level required under the point system and this raises a question concerning which law is applicable. One state (Colo.), makes this clear by providing that other statutory authority governing mandatory license revocation takes precedence over the point system law.

In Michigan, whose point system also includes "mandatory" revocation offenses covered under other law, a license would be revoked under such other law, but a licensee would also be given six points, which is half the point total required (12 points within two years) for action under the point system. Thus a person would be subject to revocation under the basic law but would also be assigned points under the point system for the same offense.

Many differences also exist with regard to other matters concerning the application of the law.

For example, in some states points retain full value for the period within which they are effective; in others, they diminish in value as time progresses and until they are expunged. As noted, points are cumulative in some states for the period of time specified and can be used again for subsequent suspension or revocation of license. In others, (e.g. Nebraska, North Carolina, Ohio, South Carolina) the law specifically provides that points once used in suspending a driver's license cannot be considered again as the basis for further action. (See Appendix 2, McAnerney v. State, Dept. of Public Safety, Drivers License Division, 341.P (2d) 212, 9 Utah (2d) 191, 1959).

States also differ with regard to the holding of hearings. In some, the department is authorized to suspend and then notify the licensee of the action taken and of his right to a hearing. In some jurisdictions, the suspension takes effect only after the period for hearing has expired and if a hearing is requested, suspension is delayed until the hearing is held. In others, a hearing must precede an order of suspension. In one state at least, the department may suspend with or without a hearing.

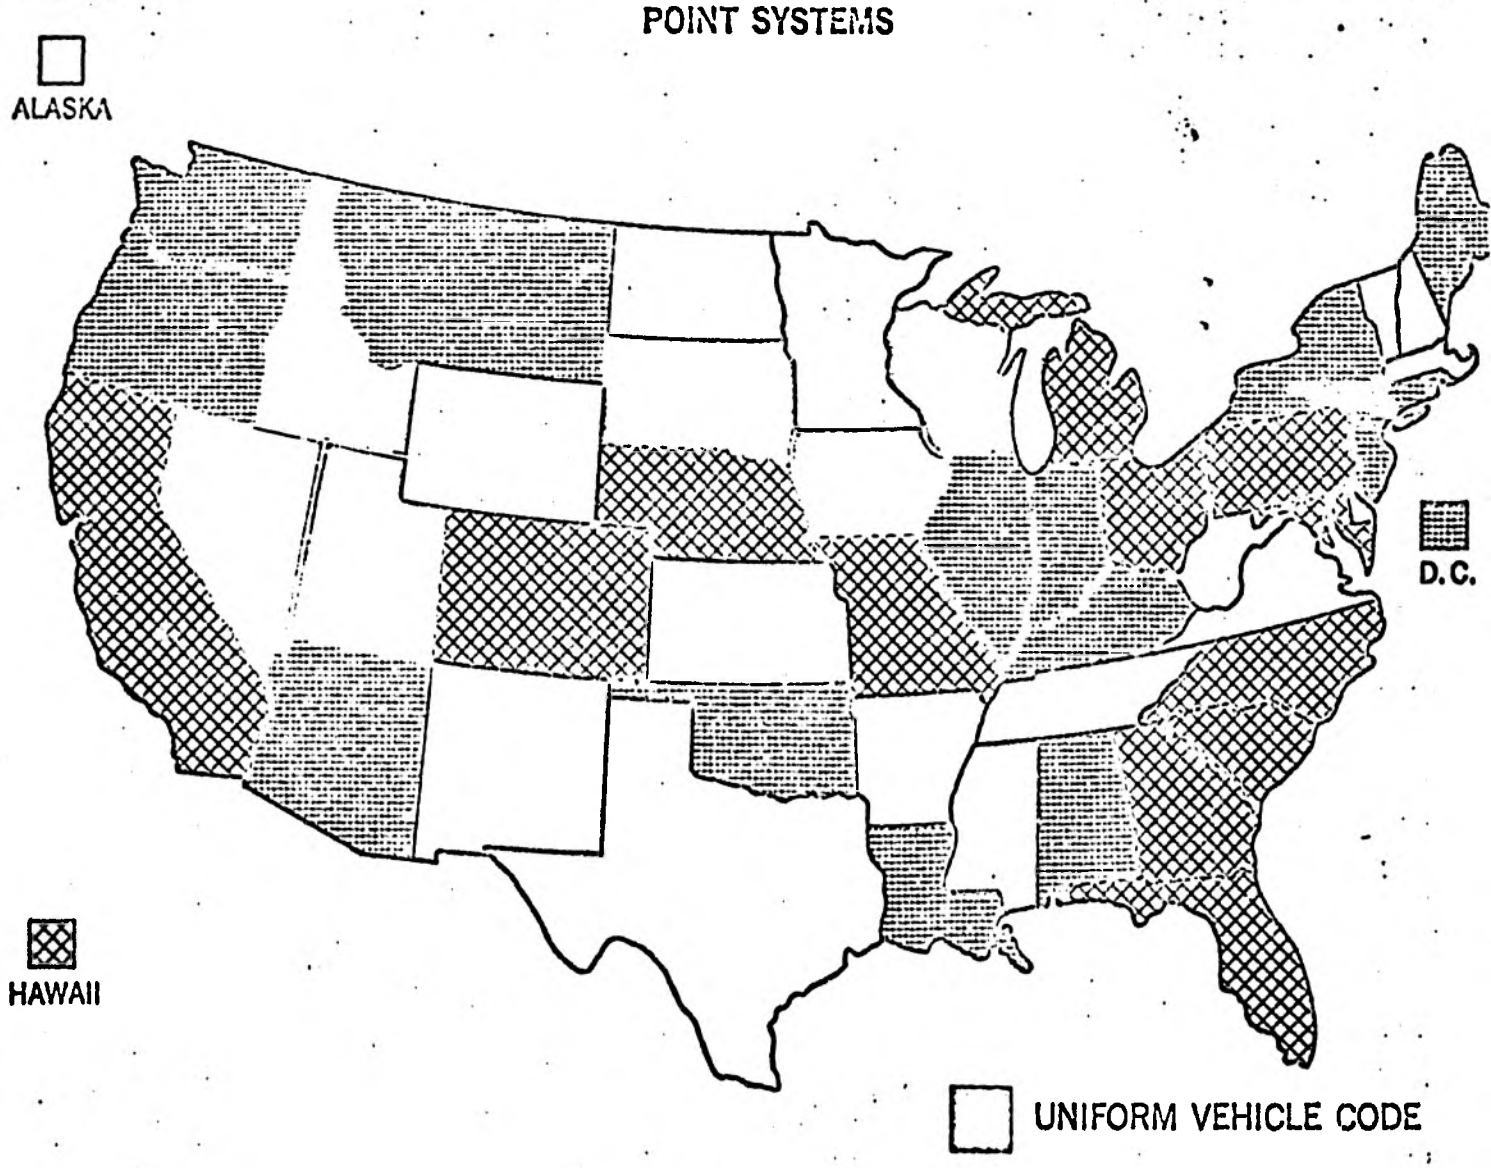
In most states, after the accumulation of a certain number of points below the action level, the department as a matter of law or under administrative procedures, sends out a warning letter or requests the licensee to submit to an interview, or both, but the point levels at which such steps are taken vary.

Out-of-state conviction of resident drivers for comparable in-state offenses are treated differently under the point systems of the several states. In New Jersey, for example, points are assessed against a resident driver who is convicted in another state of an offense covered by the point system. In Florida, except for those offenses requiring mandatory revocation of license, "point system" values for out-of-state convictions may be assessed at half the value that normally would be assigned if the convictions had been had in Florida. In Maryland and North Carolina, points are assigned against residents only upon conviction within the state and do not apply to such offenses committed in a foreign jurisdiction. In Hawaii and South Carolina, out-of-state convictions of residents apply if reciprocal agreements have been entered into with such jurisdictions.

A few states also give special consideration to licensees subject to action under the point system. For example, in North Carolina, when a person accumulates seven points he may be afforded an opportunity to attend a driver improvement clinic, and if he successfully completes such course, three points are deducted from his record. In Maryland, if a person needs a license for purpose of employment, additional points beyond the normal action level are permitted before a license is suspended or revoked. In Colorado, Iowa and Missouri for example, a special restricted license may be issued for occupational purposes to a licensee otherwise subject to suspension. (See also Occupational Licenses under Table 13.) In Utah, the number of points assessed for a violation may be increased or decreased by 10%, depending upon the severity of the offense as determined by the court.

Iowa, Hawaii and Utah also have features not covered in any other point system laws. In Iowa, a person is permitted to accumulate credit points, one for each year of violation-free driving, until he receives a total of five points. These credits may then be used

POINT SYSTEMS



- Statutory point system *(13 states)*
- Law sets standards and authorizes licensing agency to establish point system *(6 states)*
- Administrative point system established by licensing agency under general authority *(15 states and D.C.)**
- No formal, publicized point system *(16 states)*

* *See digest of state laws on following pages.*

** *1953 law under which registrar established and administered a point system was repealed in 1960.*

\# *In Sturgill v. Beard, see Appendix, Section III, Table 7, Point System—court held that department has authority under the law (covered in Tables 4-6) to establish an administrative point system.*

to offset the assessment of points for future offenses committed. Hawaii, similarly, provides that if no violation is charged against a person during a 24-month period, a total of six favorable points will be credited to his account which may be used to offset points charged for violations. In Utah, the department is authorized to delete points for violation-free driving for such period of time as it may prescribe.

And in Pennsylvania, a point is credited, or demerit points are assessed, depending upon whether or not a person assigned to a driver improvement school successfully completes the course and meets other related requirements.

DIGESTS OF STATUTORY POINT SYSTEMS

UNIFORM VEHICLE CODE

Basic authority for establishing a point system was incorporated in the 1968 revision of the UVC. The provision leaves to administrative determination point values to be assigned to offenses and the number of points and time period within which they are accumulated before suspension may be authorized. Footnotes, however, suggest certain criteria for the consideration of the responsible administrative agency. Following is a brief digest of the substantive elements of the provision and footnotes:

1. *Authority to Establish:*
   To identify habitually reckless or negligent drivers and habitual or frequent violators of the traffic regulations, requires department to adopt regulations for a uniform system of demerit points to be assigned for convictions of violation of the rules of the road (Chapter 11) and local ordinances regulating the operation of motor vehicles.

2. *Non-Assignment of Points:*
   No points shall be assessed for violations governing standing, parking, equipment or size or weight. (Footnote suggests also that no points be assigned for violations by pedestrians, passengers or bicycle riders, or for violations of provisions relating to the preservation of the condition of traffic control devices on the highway.)

3. *Out-of-State Convictions:*
   Department is authorized to assess points for conviction in other States of offenses which, if committed in home state, would be grounds for such assessment.

4. *Interim Action:*
   Notice of assessment of points may be given to driver, but notice shall be given when point ac-

cumulation reaches a certain percent of the number of points at which suspension is authorized (footnote suggests 50 percent as appropriate).

5. *Two or More Offenses Arising Out of Single Incident:*

In the event of conviction for two or more traffic violations committed on a single occasion, points to be assessed for one offense, and if point values differ, points to be assessed for offense having greater point values.

6. *Suspension — Hearings:*

Department authorized to suspend license of driver, with or without a hearing (but see Table 4 re suspension without a preliminary hearing) when his driving record identifies him as an habitually reckless or negligent driver or as an habitual or frequent violator under the point system.

7. *Action Level — Point Values:*

As a guide to the administrator and in the interest of interstate uniformity, a footnote suggests the following action level and point values for offenses:

An accumulation of 12 or more points during any consecutive 12-month period, or 18 or more points during any 24-month period as the basis for suspension.

Six points for conviction of reckless driving (willful and wanton disregard for safety of persons or property) speeding at least 20 mph over the lawful limit; four points for conviction of relatively serious offenses; and three points for less serious offenses.

CALIFORNIA

1. *Number of points which authorizes action:*

When the department determines that a person is a negligent operator, it may refuse to issue or renew a driver's license. (However, under administrative policy, when a person's driving record shows the following violation point count the department may suspend, revoke or place such person on probation based upon the circumstances involved.)

In applying the authority granted, the department is required to give due consideration to the amount of use or mileage traveled in the operation of a motor vehicle.

A person is presumed to be a negligent operator if he has accumulated a violation point count of:

4 or more points in 12 months
6 or more points in 24 months
8 or more points in 36 months

2. *Violations and schedule of point values based upon convictions:*

	Points
(1) Failing to comply with requirements, in accident resulting in property damage, including vehicle; parking vehicle which becomes runaway and causes such damage.....	2
(2) Driving under the influence of intoxicating liquor or combined influence of liquor and any drug.....	2
(3) Reckless driving	2
(4) Reckless driving — bodily injury.....	2
(5) Any other traffic conviction involving safe operation of a motor vehicle....	1
(6) When licensee involved in accident is deemed responsible by department..	1

3. *Interim Action:*

Not specified in law but under administrative procedure warning letters are sent in the discretion of the department when person accumulates three points in one year; five points in two years and seven points in three years.

4. *Two or more offenses arising out of a single incident:*

When more than one violation arises out of a single incident only one violation is counted under the point system.

COLORADO

1. *Number of Points which authorizes suspension:*

12 points within any 12 consecutive months or 18 points within any 24 consecutive months.

Time periods shall be based on date of violation but points shall not be assessed until after conviction; accumulation of points shall not be affected by the issuance or renewal of license. (See Table 8 for maximum period of suspension).

Other statutory provisions covering cancellation and mandatory revocation take precedence over the point system law. (See Tables 1-3).

2. *Application to certain licensees:*

In case of provisional licensees (18-21 years of age) license subject to suspension for accumulation of eight points within 12 consecutive months or 12 points within 24 consecutive months, or 14 points within period for which license was issued; in case of minor operator (16-18 years of age) license subject to suspension for four points within 12 consecutive months or more than six points within time period for which license issued. Whenever a minor operator receives a summons for a traffic violation, his parent or legal guardian shall be notified by the court.

If any applicant for license has illegally operated motor vehicle prior to issuance of valid license or permit within 36 months prior to application, department may deny issuance for not more than 12 months.

Points accumulated by minor operator under a temporary instruction permit shall apply to license subsequently issued.

Authority to suspend under point system not to prevent issuance of restricted license under other law (13-4-14: among other restrictions, license may be issued limiting operation to driving to and from place of employment or performance of duties in course of employment; on satisfactory evidence of violation of such restrictions, department may cancel or suspend restricted license but offender entitled to hearing as otherwise provided.)

3. *Violations and schedule of point values based upon convictions:*

	Points
(1) Leaving scene of accident	12
(2) Driving while intoxicated (.10% or more) or under the influence of drugs	12
(3) Driving while impaired by consumption of alcohol (more than .05% and less than .10%)	8
(4) Speed contests	12
(5) Eluding or attempting to elude a police officer	12
(6) Reckless driving	8
(7) Careless driving ...4	4
(8) Speeding — one to nine miles per hour over the posted speed limit	3
(9) Speeding — 10 to 19 miles per hour over the posted speed limit	4
(10) Speeding — 20 miles or more per hour over the posted speed limit	6
(11) Failure to stop for school signals	6
(12) Driving on wrong side of road	4
(13) Improper passing	4
(14) Failure to stop for school bus	4
(15) Following too closely	4
(16) Failure to observe traffic sign or signal	4
(17) Failure to yield to emergency vehicle	4
(18) Failure to yield right-of-way	3
(19) Improper turn	3
(20) Driving in wrong lane or direction of one-way street	3
(21) Driving through safety zone	3
(22) Conviction of violations not herein stated while driving a moving vehicle, which are violations of a state law or municipal ordinance	3
(23) Failure to signal or improper signal	2
(24) Improper backing	2
(25) Failure to dim or turn on lights	2
(26) Operating an unsafe vehicle	2
(27) Improper, dangerous parking	1

4. *Hearings:*

Suspension imposed only after a hearing; hearing held 10 days after notice to licensee; hearing delays are granted only upon good cause and then no later than 30 days following date of original hearing; if person fails to appear for hearing, when delay or continuance not requested, department shall immediately suspend license without further notice. However, such suspension or revocation not to be effective until 20 days after notification of such action has been mailed to licensee; such notice to inform licensee that he may apply for hearing within 20 days after mailing of notice, and if hearing is requested, effective date of action will be extended until hearing; hearing to be held within 30 days of request.

If after hearing, record of licensee does not sustain suspension, department shall not suspend and shall adjust point total accordingly. (See also under item 5 —Interim Action.)

5. *Interim Action:*

Upon accumulation of half as many points as are required for suspension, department may send licensee a warning letter or order a preliminary hearing; failure to send such warning letter or hold such hearing not to be grounds for invalidating subsequent suspension action resulting from accumulation of additional points. Failure to report for preliminary hearing when ordered, unless good cause shown, may result in license suspension.

6. *Duration of Points:*

Points to accumulate throughout period for which license issued (birthday renewal of licenses every three years).

7. *Probationary Licenses:*

If license is suspended, department may issue probationary license for period not exceeding period of suspension; (conditions for issuance of such license not stated); license may contain such restrictions as department may deem reasonable and necessary and

is subject to cancellation for violation of restrictions; department may also order any person whose license is suspended to take a complete driving reexamination.

8. *Appeal to Court:*

After hearing, licensee may appeal department's decision to district court. See Note in Table 11.

FLORIDA

1. *Number of points which authorizes suspension:*

12 points within 12 months — maximum 30 days.

18 points, including points upon which suspension action is taken above, within 18 months — maximum 5 months.

24 points, including points upon which suspension action is taken above, within 36 months — maximum 1 year.

2. *Violations and schedule of point values based upon convictions:*

	Points
(1) Reckless driving willful and wanton.	2-6
(2) Leaving scene of accident resulting in property damage of more than $50,.	3-7
(3) Passing stopped school bus.....	2-4
(4) Unlawful speed	2-4
(5) Improper equipment (brakes, lights, steering)	1-3
(6) All other moving violations (including parking on highways outside municipal limits)	1-3
(7) Any moving violation covered above resulting in accident	2-4

3. *Point Assessment:*

Courts shall assess points against violators from the minimum to the maximum shown above; if court fails to specify number of points on conviction report at the time of conviction, department shall assign the median points provided for the violation committed.

4. *Hearings:*

Suspension before hearing, but licensee entitled to hearing.

5. *Interim Action:*

Warning letter sent when driver's record reaches "danger zone."

6. *Duration of Points:*

Points have full value for period of 36 months; after 36 months points are erased.

7. *Out-of-State Convictions:*

Resident drivers may be assessed half the point values for comparable out-of-state convictions; exception is made for offenses requiring mandatory revocation. (Tables 1-3).

GEORGIA

1. *Authority:*

Department (Director of Department of Public Safety) to establish point system for assessment of points for moving traffic violations committed by resident licensees within or without state.

Note: With regard to plea of nolo contendere, points to be assessed upon a second or subsequent such plea.

2. *Number of points which require suspension:*

Department shall suspend license for a period of not more than one year upon accumulation of 15 or more points in any consecutive 18-month period.

3. *Violations and schedule of point values based on convictions:* (See Note, Item 1, above)

	Points
(1) Exceeding speed limit by 25 mph or more	6
(2) Exceeding speed limit by more than 10 mph but less than 25 mph.....	3
• (3) Exceeding speed limit by not more than 10 mph: except school zone .....no points in school zone	2
(4) Unlawful passing of school bus.....	6
(5) Any moving violation resulting in accident	4
(6) Improper passing on hill or curve...	4
(7) Disobedience of any traffic control device	3
(8) Disobedience of any traffic officer....	3
(9) All other moving traffic violations...	2

4. *Reinstatement — Hearings:*

Department may after 30 days of suspension (60 days on second or subsequent conviction) reinstate licensee if he qualifies as a self-insurer or produces evidence of a policy of liability insurance (in accordance with 92A-608).

Any person suspended under point system is entitled to a hearing (as provided in 92A-602).

•*Note: Under other law (63-2113), no speeding violation of less than 10 mph above speed limit in a county or municipality in which person is given a speed ticket shall be used by the department for purposes of revoking a driver's license. No speed violation reported by counties or municipalities which fails to specify the speed shall be used by the department to revoke license of violator.*

5. *Point count following reinstatement:*

Upon reinstatement of licensee, point count reduced to six. If no additional violation points accumulated within 12 months subsequent to reinstatement, point count reduced to zero.

6. *Interim Action:*

Department to notify licensee when point count equals or exceeds one-half the number of points requiring suspension of license. Notice to be in form determined by department, but shall give ample warning that continued violations might result in license suspension. Sending or receipt of such notice not a condition precedent to license suspension.

7. *Records:*

Courts, except juvenile courts, to maintain records of violations and action taken and forward abstract of conviction to department within 30 days of last day of month in which conviction occurred. (department to pay 25 cents for each such report)

8. *Provisions of law cumulative, supplemental:*

Authority to suspend under point system law is cumulative and supplemental to other powers, duties and responsibilities of the director in relation thereto.

9. *Removal of points — special circumstances:*

In cases where Governor issues an executive order (pursuant to 68-1628) suspending the power of a county or municipality from enforcing speed limits within their jurisdiction, any points assessed during period of such suspension shall be removed from licensee's record; not applicable, however, when points assessed as a result of arrest by any member of the Department of Public Safety or person enforcing the law under the department's supervision.

HAWAII

1. *Authority:*

Points imposed by district magistrates for conviction of state traffic laws or county traffic ordinances with such frequency as to indicate a disrespect for such laws and ordinances and a disregard for the safety of other persons on the highway.

A total of 12 points indicates such disrespect and disregard. Magistrates not precluded from imposing greater sentence as may be provided by law.

2. *Number of points which authorize action:*

District magistrates shall suspend license for a period of one to six months upon accumulation of 12 points. Upon a showing of good cause, magistrate may suspend the license suspension.

In computing points, those accrued during the 12-month period including and immediately preceding the last violation shall be counted at full value; those accrued from 12 to 24 months preceding the last violation shall be counted at one-half their value; points resulting from violations more than 24 months prior to last violation shall not be counted.

If no violation has been charged against a person during a 24-month period, a total of six favorable points will be credited to his account which may be used to offset points charged for violations.

In the event a district magistrate subsequent to bail forfeiture does hear the case, he may set aside the points resulting from the bail forfeiture and designate the points he deems necessary, provided that no licensee shall twice be assigned points for the same traffic violation.

3. *Violations and schedule of point values based upon convictions:*

	Points
(1) Heedless and careless driving	3 to 6
(2) Driving while license suspended or revoked (includes court conviction as well as safety responsibility violations)	3 to 6
(3) Fraudulent use of license	3 to 6
(4) Excessive speeding (15 miles or more over established limit)	3 to 6
(5) Leaving scene of accident	3 to 6
(6) Speeding (10 miles or more over established speed limit)	1 to 4
(7) Failure to report accident immediately	1 to 4
(8) Driving on left side of roadway	0 to 4
(9) Inattention to driving; negligent driving	1 to 4
(10) Permitting unlicensed driver to drive	1 to 4
(11) Following too closely	1 to 3
(12) Disregarding stop signs	1 to 3
(13) Right of way violations	0 to 3
(14) Disregarding traffic control signals	1 to 3
(15) Unlawful passing	0 to 3
(16) Unsafe changing of lanes	0 to 3
(17) Crossing solid or double lines	0 to 3
(18) Impeding traffic	0 to 2
(19) Improper turning	0 to 2
(20) Unsafe emergence from parked position	0 to 2
(21) Disregarding pavement markings	0 to 2
(22) Unsafe movements	0 to 2

	Points
(23) Stopping at medial openings	1 to 2
(24) Improper emergence from private driveway	1 to 2
(25) Unattended motor vehicle (if motor running)	1 to 2
(26) Violations of pedestrian's right of way	1 to 2
(27) Unsafe equipment on vehicle	0 to 2
(28) Faulty brakes	0 to 2
(29) Driving with improper lights	0 to 2
(30) Operating or carrying a passenger on a motor scooter or motorcycle without a safety helmet or, in absence of a windscreen, without eye and face protective devices or other protective devices required by state highway safety coordinator	0 to 2
(31) Driving after failure to renew license	0 to 2

Whenever an employee is cited for driving a vehicle with unsafe, faulty or improper equipment, brakes or lights and the responsibility for such condition is that of the employer, no points shall be assessed against the driver.

With regard to items (8) and (13), and (15) through (22), no points shall be assessed by court where the violations are due to the size or nature of the vehicle, or the necessity of the driver's following a specific route or schedule in the course of his employment and not to inattention or fault on the part of the driver.

Where bail forfeiture is allowed, the court shall assess the driver the minimum points set forth above, but in no case less than one point.

4. *Duration of Points:*

See under 2, above.

5. *Notice of Suspension — return of license:*

Upon accumulation of sufficient points to warrant suspension by the district magistrate, licensee required to surrender license to court, if present in court; if licensee not present when license suspended, clerk of court to notify licensee in writing by certified mail of license suspension and the return of license within 15 days of receipt of notice; willful failure to return license shall, on conviction, result in fine of not more than $100 or imprisonment for not more than 30 days or both.

6. *Nonresidents:*

Nonresident's driving privilege subject to suspension by district magistrates in like manner and for like cause.

7. *Outside convictions:*

District magistrates of each county shall enter into reciprocal agreements with other counties, and the Governor of the state may enter into such agreements with any state or territory, for the purpose of reporting convictions or bail forfeitures in such jurisdictions by persons holding a license from such jurisdictions.

Such convictions or bail forfeitures for violations which if committed in Hawaii would be a violation of the state traffic laws or the ordinances of the several counties shall be recorded against the licensee as if committed in Hawaii.

8. *Appeals:*

In event of appeal from decision of district magistrate to circuit or supreme courts, or a trial in circuit court, such courts shall be governed by provisions of the point system and shall direct the district magistrate and the clerk of the magistrate to carry out their orders.

9. *Conviction reports —courts martial:*

Convictions by courts martial of any branch of armed services of the U. S., or by a U. S. Commissioner of a violation either on or off government property, which would be a violation of the state traffic laws or ordinances of the several counties, may be recorded against the licensee as if the convictions had been had in the courts of the state.

10. *Prima facie evidence of conviction:*

Photostatic or other copies of reports filed with district magistrates shall be deemed prima facie evidence of conviction or bail forfeiture when such copies are duly certified by issuing agencies as true copies of originals on file.

IDAHO

1. *Authority to Establish:*

Commissioner of lawenforcement directed to establish a violation point count system covering licensed resident drivers to apply to various moving traffic violations occurring within or outside the state.

2. *Point Values:*

Range of point values shall be one point on conviction for less serious violations to four points for more serious violations; conviction for only one violation arising from one arrest or citation shall be counted in determining violation point count.

3. *Action Level:*

Driver's license suspended when person has 12 or more points in any consecutive 12-month period or is a habitual violator of the traffic laws of the state. Habitual violator means a person who has a driving record showing a violation point count of 18 or more points in any consecutive 24-month period, or 24 or more points in any consecutive 36-month period.

4. *Hearings:*

Person suspended under point system (or for grounds covered in Tables 4-6) entitled to hearing.

IOWA

1. *Establishment of Point System:*

Commissioner is authorized to establish a point system for weighting traffic convictions or offenses by their seriousness and may change such weight scale from time to time as experience and accident frequency dictate.

Purpose of point system is to determine when the commissioner may suspend a license based on department records and other sufficient evidence, under his discretionary authority. (See Tables 4-6.)

2. *Credit points:*

After point system goes into effect under this authority, licensee shall receive a credit of one point for each year in which he had a valid license and during which no points were assessed against his license; such credit points shall not exceed five at any one time.

Credit points shall be subtracted from total points assessed against a licensee in determining when to suspend a license.

3. *Notice of Suspension — Appeals:*

Prior to suspension taking effect on the following grounds, licensee shall have 20 days advance notice of effective date of suspension and an appeal to the court shall stay suspension pending determination by the district court that licensee:

(1) Is a habitually reckless and negligent driver

(2) Is a habitual violator of the traffic laws

(3) Is incompetent to drive

(4) Has permitted an unlawful or fraudulent use of his license

(5) Has committed a serious violation of the state motor vehicle laws

4. *Notice of Point Assessment:*

Department must notify licensee when points are assessed and reasons therefor.

5. *Hearings:*

No license shall be suspended under the point system without notice of proposed suspension and without a preliminary hearing before members of the department "who shall have authority in meritorious cases to revoke the suspension." (Note: suspension before hearing under other law—see Table 4.)

6. *Equipment — Points not to be assessed:*

Warnings, summons, conviction or forfeiture of bail not vacated for a violation of the state law or municipal ordinance pertaining to vehicle equipment standards, except Sections 321.430 and 321.431 and local ordinances relating to brake requirements, shall not be considered in determining suspension or length of suspension. Nor does suspension action apply for violation of brake requirements if equipment is repaired within 72 hours of warning, summons, etc., and evidence of such repair has been sent to department.

7. *Occupational License:*

On application the commissioner may issue a temporary restrictive license to any person convicted, whose regular employment requires operation of a motor vehicle or who cannot perform his regular occupation without the use of a motor vehicle; such restrictive license does not entitle person to drive a vehicle for pleasure. Issuance of such license not applicable to person whose license is revoked for conviction requiring mandatory revocation of license. (See Tables 1-3.)

MARYLAND

1. *Number of points which authorizes suspension:*

Eight points within two years—initial suspension not less than two days and not more than 30 days; subsequent suspension not less than 15 days nor more than 90 days.

12 points within two years—license revoked (three months—under other law).*

If above action adversely effects employment or opportunity of employment of licensee, hearing officer authorized not to order suspension or revocation, or to cancel or modify suspension or revocation. In addition, if licensee is required to drive a motor vehicle in the course of his regular employment, suspension level shall be 15 points and revocation 18 points.

2. *Violations and schedule of point values based upon convictions:*

	Points
(1) Any moving violation not listed below and not contributing to an accident	1
(2) Violations contributing to an accident	3
(3) Exceeding posted speed limit by 10 mph or more	3
(4) Reckless driving	3
(5) Failure to report an accident	5
(6) Permitting unlicensed operator to operate a motor vehicle	4

**Period of revocation not specified but under other law (Section 106, Article 66 1/2) first revocation is three months; second or subsequent revocation is one year. (Sec. N1, Table 8) Point System law specifies that it shall not affect or apply to section 104 relating to mandatory suspension or revocation*

of license (see Tables 1-3) or to provisions of the motor vehicle financial responsibility law.

	Points
(7) Leaving after colliding:	
(a) No personal injury.....	8
(b) With personal injury.....	12
(8) Operating after suspension or revocation	12
(9) Obtaining or attempting to obtain permit by misrepresentation.....	12
(10) Loaning or altering a permit.....	12
(11) Conviction for any homicide or assault committed by motor vehicle..	12
(12) Driving under the influence of intoxicating liquor or narcotic drugs.	12
(13) Any felony involving use of motor vehicle	12

Note: Point system law specifies that it is in addition to, and not in substitution of, other law.

With regard to items (7b), (8), (11), (12) and (13) above, revocation upon conviction for such offenses is specified under other law, which also covers out-of-state convictions; provisions of the point system do not affect or apply to such out-of-state convictions.

3. *Interim Action:*

Warning letter to be sent upon accumulation of three points; licensee called in for conference upon accumulation of five points.

4. *Hearings:*

Licensee may request hearing within 10 days of notice of suspension (after eight points) or notice of revocation (after 12 points); suspension or revocation to be invoked at end of 10-day period unless licensee requests hearing. (Note: under other provisions of law, suspension is imposed only after a hearing is held—See Table 4.)

5. *Duration of Points:*

Points retained for two years and not counted thereafter.

6. *Out-of-state convictions:*

Applies only to convictions within the state.

7. *Two or more offenses arising out of single incident:*

Where multiple charges arise out of same incident, only the charge which has the highest point value is assessed upon conviction.

8. *Military Personnel:*

Points are assessed against service personnel for moving traffic violations, if after traffic case is turned over to military authority, commissioner is notified that such authority has taken disciplinary action.

9. *Appeals:*

Licensee has right of appeal as provided for under other provisions of law.

10. *Reinstatement following suspension, revocation:*

A licensee suspended or revoked under the point system shall not be reinstated unless he passes a reexamination which covers the tests given to all driver applicants (eyesight, ability to read and understand highway signs, knowledge of traffic laws and safe driving practices, driving test and such further physical or mental examinations as department finds necessary to determine fitness to operate a motor vehicle safely.)

11. *General Authority:*

Commissioner given authority to issue warning letters, conduct conferences, issue or modify orders of suspension and revocation, and hold hearings; a Driver Improvement section is established in the department to administer the point system.

MICHIGAN

1. *Number of points which authorizes suspension:*

12 points within two years—maximum suspension one year. (See Note, Table 4.)

2. *Violations and schedule of point values based upon convictions or probate court findings:*

	Points
(1) Manslaughter, negligent homicide or other felony resulting from operation of motor vehicle.....	6
(2) Operating under influence of intoxicating liquor or narcotic drug.....	6*
(3) Failure to stop and disclose identity at scene of accident.....	6
(4) Reckless operation in violation of Sec. 626 or similar state or municipal law within or without the state	6
(5) Exceeding speed limit by more than 15 mph or careless driving (state law or ordinance)	4
(6) Exceeding speed limit by more than	

*Under other law, four points are assessed upon conviction f operating a motor vehicle when due to consumption of i toxicating liquor or drugs, a person's driving ability is visib impaired. (Person charged with driving while under the i fluence of intoxicating liquor or drugs (Table 1) may found guilty under this provision).

(Note: Person convicted of driving while under influence intoxicating liquor or drugs (Table 1) has license suspend in addition to which six points are assessed under point s tem; 0.15% or more by weight of alcohol in blood constitu presumption that person was under influence of intoxicati liquor, whereas 0.10% or more by weight of alcohol in blo constitutes presumption that person's driving ability visibly impaired.)

	Points
10 but not more than 15 mph (state law or ordinance)	3
(7) Exceeding speed limit by 10 mph or less (state law or ordinance)	2
(8) Disobeying traffic signal, stop sign or improper passing	3
(9) All other moving violations	2
(10) Failure to answer a citation or notice to appear in court for any violation of Act or comparable ordinance	1*

No points shall be assessed for defective equipment when such defect consists of overweighted loads.

3. *Hearings:*

Department may conduct investigation and may require examination before action is taken; for failure to appear for reexamination, after proper notice, license revoked.

4. *Interim Action:*

Licensee may be called in for interview upon accumulation of nine points; for failure to appear after notice, three additional points are assessed.

5. *Appeals:*

Person aggrieved by action of department suspending or revoking license under point system may petition circuit court for order staying such action; court authorized to enter ex parte order staying suspension or revocation, subject to such terms and conditions as it may prescribe and for such time as it deems proper or until determination of any appeal to license appeal board or circuit court. (Also see Note under Table 11.)

6. *Duration of Points:*

Points retained for a two-year period. Every subsequent conviction date establishes new two-year period. Points accumulated are not erased until lapse of two years from latest conviction date. (However, driver's record maintained for seven years, and indefinitely for point convictions covering violations (1), (2), (3), and (4) in Item 2, above.)

7. *Out-of-State Convictions:*

No point values are assessed for bond forfeitures outside of state.

8. *Assessment of points when licensee subject to suspension under other law:*

Points are assessed against the driver's record for offenses under the point system even though offender is suspended or revoked for the same offense under other provisions of law.

9. *Multiple Convictions:*

If more than one conviction results from same incident, points assessed for more serious offense only.

Other law states that such failure shall constitute a misdemeanor but "shall not be considered a violation for any purpose under Sec. 320a" (point system) and provides that 30 days following failure to respond, court shall send notice to offender and upon his failure to appear within 14 days, department shall suspend offender's license and so notify him; suspension to remain in effect until matter adjudicated; on return of license, a reinstatement fee of $2.00 is imposed; such offender not subject to reexamination, as is required before reinstatement of licensees suspended or revoked.

MISSOURI

1. *Establishment of Point System:*

Director of revenue required to put into effect a point system for suspension and revocation of licenses (chauffeurs and operators). Points to be assessed only after a conviction or forfeiture of collateral.

2. *Number of Points Requiring Suspension — Revocation:*

Director shall:

Suspend operating privilege when driver has accumulated eight points within 18 months. Time of suspension shall be not less than 30 days nor more than 90 days. (Note: See Table 8)

Revoke operating privilege one year when driver has accumulated:

12 points in 12 months
18 points in 24 months
24 points in 36 months

3. *Violations and Schedule of Point Values:*

	Points
(1) Any moving violation of a state law or county or municipal traffic ordinance not listed herein, other than a violation of equipment provisions...	2
(Except any violation of a municipal stop sign ordinance where no accident is involved — 1 point)	
Note: Under definition of moving violation, excluded are driving a motor vehicle without a valid motor vehicle registration license and violations relating to sizes and weights of vehicles.	
(2) Speeding:	
In violation of state law	3
In violation of county or municipal ordinance	2
(3) Leaving scene of accident	
In violation of Sec. 564.450 RSMo..	12
In violation of county or municipal ordinance	6

	Points
(4) Careless and imprudent driving	
In violation of Sec. 304.016, sub-section 4, RSMo. (driving on left side of roadway under certain conditions)	4
In violation of county or municipal ordinance	2
(5) Operating without a license after suspension or revocation and prior to restoration of operating privileges	12
(6) Obtaining a license by misrepresentation	12
(7) Driving under the influence of intoxicating liquor or narcotic drugs	
In violation of state law	12
In violation of county or municipal ordinance	6
(8) Any felony involving use of a motor vehicle	12
(9) Knowingly permitting unlicensed person to operate a motor vehicle	4

An additional two points assessed when personal injury or property damage results from above violations and if found to be warranted and certified by the reporting court.

When any of the acts listed in subdivisions (2), (3), (4) or (7) above constitute both a violation of a state law and a violation of a county or municipal ordinance "points may be assessed for either violation but not for both."

4. *Interim Action:*

Director shall notify licensee of points charged against his record when record shows four or more points accumulated in 12-month period.

5. *Reduction of point values — Period of Safe Driving:*

For operation without conviction for a moving violation, point values reduced as follows:

For first full year	— reduced by one-third
For second consecutive full year	— reduced by one-half
For third consecutive full year	— points withdrawn

6. *Reinstatement — Suspension — Revocation:*

Suspended license returned to licensee upon termination of suspension and compliance with Safety Responsibility Law.

Upon termination of revocation, person shall apply for license in manner provided by law. (No new license granted until expiration of one year after revocation, See Note, Table S.)

Upon issuing a reinstated license accumulated point values are reduced to six points.

7. *Out-of-State Convictions:*

On notice of conviction in another state, which if committed in this state, would result in assessment of 12 points, director is authorized to assess points and revoke operating privilege.

8. *Hardship Cases — Livelihood:*

All circuit and magistrate courts located in counties which are part of multi-county judicial circuit have jurisdiction to hear applications for hardship driving privileges.

When court finds that operator or chauffeur suspended or revoked is required to operate a motor vehicle in connection with his business, occupation or employment, it may grant such limited driving privileges as circumstances warrant and if court finds undue hardship on such person to earn a livelihood; person so operating within the restrictions and limitation of such order shall not be guilty of operating a motor vehicle without a valid license.

Operators and chauffeurs may make application to court for hardship driving privilege, which shall be accompanied by copy of applicant's driving record for next preceding five years, as certified by department, and by proof of financial responsibility as required under the financial responsibility law; however, with respect to a chauffeur who fails to file such proof, court may grant hardship driving privilege solely for operating a commercial vehicle whose owner has complied with financial responsibility law; court's order to state such restriction and chauffeur must carry proof of owner's compliance.

Court order granting privilege shall indicate termination date, which shall not be later than end of suspension or revocation; copy of order sent to department, with copy to driver to carry on person when driving; a conviction resulting in assessment of points, other than a violation of a municipal stop sign ordinance where no accident involved, terminate order granting privilege; court in which such conviction occurs to immediately notify driver, the department and court which granted order.

Hardship driving privilege not to be extended to person whose license has been suspended or revoked for following reasons: convicted of any felony in commission of which motor vehicle was used or convicted for second time of driving while under the influence of intoxicating liquor (564.440); person ineligible for license issuance (under Sec. 302.060—grounds for license denial); operating a motor vehicle under influence of narcotic drugs, drugs (as defined in Sec. 195.220) or having left the scene of an accident (564.450); has been granted hardship driving pri

lege within a period of five years preceding application for such privilege, or who has refused to submit to a chemical test for intoxication (561.444) within a five-year period.

NEBRASKA

1. *Number of points requiring mandatory revocation:*

Twelve or more points within two years—mandatory revocation of license or driving privilege of nonresident for one year by department, unless longer period specified by court; period to commence from date of order of revocation or release from jail or penitentiary, whichever is later.

2. *Violations and schedule of point values based on files of department:*

	Points
(1) Felony resulting from operation of motor vehicle	12
(2) Third offense of drunk driving in violation of state, city or village law, whether or not court found same to be third offense	12
(3) Third offense of reckless driving or willful reckless driving or any combination of the two, in violation of state, city or village law whether or not court found same to be third offense	12
(4) "Hit and run" in accident resulting in death or injury of another	12
in death or injury of another	12
in property damage— if accident report within 12 hours	4
if not so reported (telephone call or other notification to appropriate peace officer deemed to be a report)	8
(5) "Hit and Run" in accident resulting alcoholic liquor or any drug in violation of state, city or village law	6
(6) Driving while under the influence of of state, city or village law	6
(7) Willful reckless driving in violation	
(8) Careless driving in violation of city or village law	4
(9) Negligent driving in violation of city or village law	3
(10) Reckless driving in violation of state, city or village law	5
(11) Speeding in violation of state, city or village law:	Points
a. Not more than five miles over speed limit	1
b. More than five miles but not more than 10 miles over speed limit	2
c. More than 10 miles over speed limit	3
(12) All other traffic violations for which reports to the department are required (not including parking violations, muffler violations or overloading of trucks)	2

In all cases the forfeiture of bail not vacated shall be regarded as equivalent to the conviction of the offense with which the licensee was charged. Points assessed as of date of violation for which conviction was had.

3. *Hearings:*

No department hearing; aggrieved person may appeal to court; appeal does not stay revocation unless permitted by court, pending review.

4. *Interim Action:*

Not specified in law. (based on available information, warning letter sent upon accumulation of eight points, under administrative procedure).

5. *Notice of Revocation:*

Within 24 hours after revocation, department to notify person in writing; notice to contain list and date of convictions, courts in which convictions rendered, points charged, length of revocation and demand for return of license. Upon failure to return license, peace officer shall secure possession; refusal to surrender license on demand subjects offender, on conviction, to fine, imprisonment or both.

6. *Duration of Points:*

Points have full value for two-year period and are erased thereafter. Points which are used to suspend the driver are not considered as the basis for further action against the driver.

7. *Non-residents:*

Point system similarily applies to non-residents.

8. *Reinstatement:*

Person revoked under point system must give and maintain proof of financial responsibility for three years, as required under financial responsibility law.

9. *Driving while under Suspension — Revocation:*

Persons driving while under revocation or suspension and before reinstatement shall be subject to following penalties upon conviction under state law or local ordinance:

first offense—imprisonment in county jail for 30 days; court orders person not to drive for one year from date of discharge from jail

each subsequent offense—imprisonment for six months; court orders person not to drive for two years from date of discharge

In addition, person operating motor vehicle who tries to flee in order to avoid arrest for operating while under suspension or revocation and before reinstatement is subject to the following penalties upon conviction—

fine not exceeding $500, or imprisonment in county jail for not more than six months, or in Nebraska Penal and Correctional Complex for not less than one year nor more than three years, or by both such fine and imprisonment. Court also orders person not to drive motor vehicle for one year from date of release, or in case of fine only, from date of satisfaction of fine. (See also Tables 16 and 17).

NEVADA

1. *Authority to Establish:*

Provides that department shall establish a uniform system of demerit points for various traffic violations occurring in state to be assessed against holders of licenses issued by the department.

System to be a running system of demerits covering a period of 12 months next preceding any date on which licensee may be called by department to show cause why license should not be suspended.

Traffic violation defined as conviction on charge involving a moving traffic violation in any municipal, justice's or district court in state.

2. *Point Values:*

Department charged with responsibility of establishing points depending on gravity of offense, with one demerit point to be assessed for a minor traffic violation to eight points for an extremely serious one.

3. *Action Level:*

Details of violation to be submitted to department by court. Department may provide for a graduated system of demerits within each category of violations.

When licensee has accumulated 12 demerit points, the department shall suspend his license until the total demerits have dropped below 12 demerit points in the next preceding 12 months.

NEW JERSEY

Note: The point system has been established under general authority as a regulation by the Director of the Division of Motor Vehicles, Department of Law and Public Safety. It is summarized herein because of its inclusion in the state's pamphlet laws covering motor vehicles and traffic regulations, but more important, because it contains certain grounds for suspension or revocation not otherwise specifically covered in the law but which are the basis for such action in the UVC and laws of other states.

1. *Number of points which authorize action:*

Twelve points within a three-year period may subject driver to hearing before department to show cause why his driver's license should not be suspended, or driver may elect to attend department's Driver Improvement School.

Director may permit driver, subject to suspension under point system, to attend such school in lieu of all or part of period of suspension. The maximum period of suspension that may be credited is two months. If suspension period is longer than two months, driver to surrender license for such excess period; license returned at expiration of period in excess of two months if driver, in signed statement, agrees to attend school on following conditions:

(a) will attend designated school and each session to which he's assigned

(b) comply with rules governing attendance, conduct, instruction and examination

(c) will be subject to suspension of driver license privilege if he fails to attend sessions, fails to comply with rules or fails to successfully complete course.

2. *Violations and schedule of point values:*

	Points
(1) Leaving scene of an accident	8
(2) Reckless driving	6
(3) Racing on highways	6
(4) Speeding—20 mph or more over legal limit, providing speed is less than 60 mph	6
(5) Speeding — other	4
(6) Passing on curve or hill or otherwise unsafely	5
(7) Passing stopped school bus	5
(8) Following too closely	5
(9) Other moving violations	3

3. *Driver Improvement School — Suspended Drivers:*

Driver who accumulates 12 or more points and whose driver license privilege is suspended may be requested to attend and successfully complete course as a condition to restoration of license.

4. *Conditions following restoration of license:*

Restoration after suspension or official warning, or warning after successfully completing Driver Improvement School course following accumulation of 12 points, shall be made on express condition and under-

standing that conviction of any violator of motor vehicle laws of New Jersey or other states within one year thereof, may result in summary suspension of driving privilege, without a hearing for the following period:

when violation occurred within date of action as follows:

within six months — three months
after six months but
within nine months — two months
after nine months but
within one year — one month

5. *Out-of-state violations:*

Violations in other states or Canadian Provinces charged against a person's driving record and points assessed, as if the violation had occurred within State.

6. *Proof of Financial Responsibility:*

On suspension under point system, proof of financial responsibility for the future will be required if one or more violations for which points are assessed resulted in an accident.

7. *Affect on other Suspensions:*

Provision of point system regulations shall not be affected by any revocation or suspension imposed by the judge of a municipal court, except that no lesser period of revocation or suspension will be imposed than that directed by the court.

NORTH CAROLINA *

1. *Number of points which authorizes suspension:*

12 or more points within three-year period, or eight or more points within three-year period immediately following reinstatement of license suspended or revoked because of conviction for one or more traffic offenses.

1st suspension—maximum 60 days

2nd suspension—maximum 6 months

Subsequent suspension—maximum one year

2. *Violation and schedule of point values based upon convictions:*

	Points
(1) Passing stopped school bus.....	5
(2) Reckless driving	4
(3) Hit and run, property damage only.	4
(4) Following too closely.....	4
(5) Illegal passing	4
(6) Driving on wrong side of road.....	4
(7) Running through stop signs.....	3
(8) Speeding in excess of 55 mph.....	3
(9) Failing to yield right of way.....	3
(10) Running through red light.....	3
(11) No operator's license or license expired for more than one year.....	3
(12) Failure to stop for siren.....	3
(13) Driving through safety zone.....	3
(14) No liability insurance.....	3
(15) Failure to report accident where such report is required.....	3
(16) All other moving violations.....	2

No points shall be assessed for convictions of following offenses:

Over loads	Carrying concealed weapon
Over length	Improper plates
Over width	Improper registration
Over height	Improper muffler
Illegal parking	Public drunk within a vehicle

Possession of liquor

Improper display of license plates or dealer tags

Unlawful display of emblems and insignia

Failure to display current inspection certificate

3. *Hearings:*

With or without a hearing.

4. *Interim Action:*

Warning letter sent upon accumulation of four points; department may request licensee to attend conference upon accumulation of seven points, and may afford him an opportunity to attend the Driver Improvement Clinic; upon successful completion of course, three points are deducted from licensee's record; only one such deduction permitted for any one licensee.

5. *Appeals — Stay of Suspension:*

License not to be suspended pending appeal from conviction.

6. *Duration of Points:*

Points retain their full value for three-year period and are erased thereafter. Upon restoration of license suspended or revoked for conviction of a traffic offense, any accumulated points in a driver's record are erased.

7. *Out-of-State Convictions:*

Point system applies to violations and convictions within state only.

8. *Assessment of Points when licensee subject to suspension under other law:*

Points are not assessed for convictions resulting from suspension or revocation under other provisions of

*See Note, Table 12 on habitual offender.

law. Any points heretofore charged for violation of the motor vehicle inspection laws shall not be considered as the basis for suspension or revocation of license. When person subject to suspension under point system and to suspension or revocation at the same time under other provisions of law, period of suspension or revocation to run concurrently.

9. *Two or more offenses arising out of single incident:*

Where multiple offenses occur on a single occasion, points assessed for one offense only; if offenses have different values, the highest point value is assessed.

10. *Probation:*

Department may substitute a period of probation for all or any unexpired period of suspension under the point system for period not exceeding one year; violation of probation results in suspension for original period ordered, or remainder of unexpired term; accumulation of three or more points during probation constitutes violation of probation.

OHIO

1. *Number of points which authorizes suspension:*

Twelve or more points within a two-year period.

2. *Procedure:*

Department notifies offender who has accumulated 12 points within two years from date of first conviction that his license will be suspended within 20 days of notice unless he files petition in court (juvenile court, if under 18 years of age) agreeing to pay cost of proceedings and alleging he can show cause why his driving privilege should not be suspended as follows: (Upon written request of petitioner department shall furnish him with copy of record of convictions; existence of such record showing 12 or more points shall be prima facie evidence that person is an habitual traffic law violator.)

a. Six months, if person not previously suspended under the point system

b. One year, if person had no more than one such previous suspension

c. Three years, if person had no more than two such previous suspensions

d. Five years, if person had three or more such previous suspensions.

At hearing court determines if person's license shall be suspended, based on record and other competent evidence. If court finds that person has failed to show cause why his license should not be suspended, court shall suspend as noted above, withhold such suspension or part thereof, or provide such conditions or probation as it deems proper; in such case, cost of proceedings to be paid of person; if person does show cause, cost to be paid out of county treasury.

3. *Violations and schedule of point values based on convictions.* (See item 7 below):

Courts of record or mayors' courts shall assess and transcribe to abstract of conviction report, furnished by and forwarded to the department, the points charged, according to following schedule:

	Points
(1) Violation of provisions (secs. 4507.38, 4507.39, or ordinance) prohibiting operation of motor vehicle while under suspension or revocation. (4507.38 prohibiting while license is suspended or revoked under driver license law; 4507.39 prohibits any "nonresident or other person" whose license or right of privilege to operate in the state has been suspended or revoked from operating with a license issued by another jurisdiction during period of suspension or within one year of date of such revocation)	6
(Also provides, with reference to above enumerated sections, for fine of not more than $500 and imprisonment for not less than two days nor more than six months; however, under point system (sec. 4507.40) penalty for driving while license suspended or revoked shall be a fine of not more than $500 and imprisonment for not less than three days nor more than six months; no court shall suspend the first three days of any sentence provided under the section.)	
(2) Violation of 4549.04 or ordinance prohibiting operation of a motor vehicle without consent of owner...	6
(3) Homicide by vehicle.....	6
(4) Violation of 4511.19 or ordinance prohibiting operation of a motor vehicle while under the influence of alcohol or drugs.....	6
(5) Failure to stop and disclose identity at scene of accident.....	6
(6) Violation of 4511.02 or any ordinance prohibiting the willful fleeing or eluding of a police officer.....	6
(7) Any crime punishable as a felony under the motor vehicle laws or any other felony in which motor vehicle is used	6
(8) Driving in violation of license restrictions	2
(9) Violation of 4511.251 or ordinance prohibiting reckless operation.....	4

	Points
(10) Violation of 4511.20 or ordinance prohibiting reckless operation.....	4
(11) Violation of speed regulations.....	2
(12) All other moving traffic violations, except 5577.01 through 5577.99 (size and weight of vehicles)	2

4. *Interim Action:*

Warning letter by regular mail sent when points assessed exceed five; letter to list reported violations, points charged for each, and to include outline of suspension provision. On accumulation of more than seven points person required to submit to license or physical examination, or both; such examination to determine if person is to be suspended or revoked, retain license or is issued restricted license. Failure or neglect to submit to exam is grounds for suspension or revocation.

5. *Duration of Points:*

Points retain their full value for two years; points used to suspend driver shall not be considered as the basis for any subsequent suspension under point system.

On notification from court, department shall delete points entered for bond forfeiture if person is acquitted of offense.

6. *Out-of-State Convictions:*

Not included under point system.

7. *Assessment of points when licensee subject to suspension under other law:*

When person's driving privilege is suspended by the court for specified offenses covered in Tables 1-3 and points are charged under the point system for such offenses, "that period of suspension shall be credited against the time of any subsequent suspension under this section for which such points were considered in making such subsequent suspension."

8. *Two or more offenses arising out of single incident:*

Where multiple offenses occur on a single occasion, points are assessed for one offense only; if offenses have different point values, the highest point value is assigned.

9. *Nonresidents:*

Nonresidents' driving privilege subject to suspension by department (registrar). (Note: See Item 2 above, covering court's authority.)

10. *Reinstatement:*

Person whose license is suspended, put "on probation, or granted limited or occupational driving" under the point system, is not reinstated until he has qualified by taking the required driver's examination and gives and maintains proof of financial responsibility in accordance with the provisions of the financial responsibility law.

PENNSYLVANIA

1. *Number of points which require suspension:*

Eleven points or more (Also see Interim Action, Item 3, below).

First suspension	— 60 days
Second suspension	— 90 days
Subsequent suspension	— 120 days to one year, at discretion of department

2. *Violations and schedule of point values based upon convictions:*

Section of Code		Points
1001 (1)	Reckless driving	5
1002 (a)	Driving too fast for conditions	5
1002 (b) (1)	Exceeding speed limit of 10 mph in passing any interurban or street car taking on or discharging passengers; at intersection where safety zone established; where traffic controlled by officer or traffic signal	4
1002 (b) (1.1)	Exceeding 15 or 20 mph limit in residence district	4
1002 (b) (2)	Exceeding speed limit of 15 mph in school zone	5
1002 (b) (3)	Exceeding speed limit 20 mph within 200 feet of RR grade crossing..	3
1002 (b) (4-7, 9)	Speed over legal limit:	
1002 (c)	6 to 10.....	3
	11 to 15.....	6
	16 to 20 (and 15 days suspension) ...	6
	21 to 29 (and 30 days suspension) ...	6

Section of Code		Points
	30 and over (and 60 days suspension) ...	6
1004	Driving to left of center of highway.....	3
1005	Passing at intersection of railroad crossing...	3
1006	Failure to drive on right half of highway..	3
1007	Improper overtaking .	3
1008 (a) (c) (d) (e)	Improper passing	3
1008 (b)	Improper passing on curve or crest of hill..	6
1009 (a)	Failure to yield to overtaking vehicle ...	3
1010 (a)	Following too closely..	5
1010 (b)	Following too closely (comm. vehicle)	5
1011 (a) (b) (d)	Improper turning	3
1012	Failure to give proper signals	3
1013 (a) (b) (d)	Right of way (two vehicles at intersection at same time)	3
1014 (a) (b) (c)	Exceptions to right of way	3
1016 (a) (b)	Driving through stop sign	5
1016.1	Failure to yield right of way	5
1018 (a-e)	Passing school bus loading or unloading..	6
1020 (a)	Stopping on highway.	3
1026	Coasting (passenger or commercial vehicle) ..	3
1028 (a)	Driving through traffic light	5
1036	Moving violations on Pennsylvania turnpike, other than speed.....	3
1113.1	Restricted zones for certain commercial vehicles	4

3. *Interim Action:*

When person's record shows as many as three points (note: no offense has lower point value) department shall notify offender by letter of nature and effect of point system; failure to receive notice shall not prevent suspension of license or learner's permit; where operator is a minor, a similar letter may also be sent to his parent or guardian.

When person's record for first time shows as many as six points, department shall require that he undergo a special examination (as provided in Sec. 608 (g)) attend an approved driver improvement school, or clinic, or any combination of foregoing. On successful completion of school, driver's record shall be credited with one point. On failure to attend and satisfactorily complete requirements of examination, school or clinic, an additional five points shall be assigned and license or learner's permit shall be suspended.

When person's record has been reduced below six points and for the second time shows as many as six points, action taken as above, except for reference to crediting driver's record with one point.

When person's record has been reduced below six points and for a third or subsequent time shows as many as six points, department shall require him to attend an interview, at which time the record is reviewed and department shall take such action as is deemed proper.

4. *Duration of Points:*

Points removed from record from date of last conviction at the rate of two points for each year person is not convicted of any violation of vehicle or tractor laws of Commonwealth. However, on restoration of driving privilege following suspension under point system, person's record shall show five points, which shall be removed as noted above.

5. *Credit Points:*

See Interim Action, Item 3 above.

6. *Two or More Offenses Arising out of Single Incident:*

On conviction of two or more offenses under point system committed on single occasion, points assessed only for offense with highest point value.

7. *Out-of-state convictions:*

Points may be assessed when such offense, if committed in Commonwealth, would result in poin assignment.

8. *Notice of Suspension:*

Upon suspension, department shall notify perso in writing to surrender license or learner's permit.

9. *Hearings:*

After a hearing which indicates person was at faul or partly at fault, in causing an accident, departme may require person to undergo special examinatic or attend driver improvement school or clinic. (S. under Interim Action, Item 3 above).

SOUTH CAROLINA

1. *Number of points which authorizes suspension:*

Twelve points within 12 months (which presumes to indicate a disrespect for law and disregard for safety of others)—maximum suspension six months.

2. *Violations and schedule of point values based upon convictions:*

	Points
(1) Reckless driving	6
(2) Passing stopped school bus	6
(3) Hit and run (property damage only)	6
(4) Driving too fast for conditions, or speeding	4
(5) Disobedience of official traffic control signals	4
(6) Disobedience of officer directing traffic	4
(7) Failing to yield right of way	4
(8) Driving on wrong side of road	4
(9) Passing unlawfully	4
(10) Turning unlawfully	4
(11) Driving through or within safety zone	4
(12) Failing to give signal (or giving improper signal) for stopping, turning or suddenly decreasing speed	4
(13) Shifting lanes without safety precaution	2
(14) Improper dangerous parking	2
(15) Following too closely	4
(16) Failing to dim lights	2
(17) Operating with improper lights	2
(18) Operating with improper brakes	4
(19) Operating vehicle in unsafe condition	2
(20) Driving in improper lane	2

3. *Hearings:*

Suspension before hearing; but licensee entitled to hearing.

4. *Interim Action:*

Not specified in law. (Note: under administrative procedures warning letter is sent upon accumulation of six points).

5. *Warning Tickets:*

Warning tickets not to be assigned a point value.

6. *Courts:*

Courts to report convictions to department as required under other law; action of department subject to judicial review.

7. *Other law not affected:*

Point system authority shall not affect action taken by department in suspending or revoking license when such action is mandatory under other law.

8. *Duration of Points:*

Points retain full value for 12 months; half value between 12-24 months; points not counted thereafter. Points which are used to suspend driver are not considered as basis for further action, under the point system or other law covering reckless driving (which provides for mandatory license suspension for three months on second or subsequent conviction for such offense within 5 years).

9. *Out-of-State Convictions:*

Applies to out-of-state convictions of resident drivers for offenses covered under the point system provided that reciprocal agreements are entered into with other states.

10. *Nonresidents:*

Nonresident subject to suspension in same manner as resident driver.

11. *Military Personnel:*

Conviction by court martial of any branch of armed services of U. S. or by a U. S. Commissioner of a violation either on or off government property which if committed in South Carolina would be a violation of the laws of the state may, in discretion of department, be recorded against a driver the same as if conviction had been had in courts of South Carolina.

SOUTH DAKOTA

Department authorized to adopt a point system. See Note in Table 5.

UTAH

1. *Authority to Establish:*

Department authorized to assign point values to moving traffic violations, based on relationship between such violations and motor vehicle accidents. (See also Note in Table 5).

2. *Point Assessment:*

Persons convicted of such violations shall have assessed against their driving records the number of points assigned; but the number of such points assessed shall be decreased by 10% if on abstract of court record of conviction court has graded severity of violation as "minimum" and increased by 10% if court grades violation as "maximum." (See Note in Table 10.)

3. *Duration of Points:*

Points shall be valid for period of time determined by department, which time limit shall not exceed three years.

4. *Point Deletion — Violation-free Driving:*

Department authorized to delete points to reward violation-free driving for such period of time as it may determine.

5. *Public Notice:*

Notice of points assigned for violations, time limit for deletion of points, and point level at which department takes suspension action shall be published in two newspapers with general circulation throughout state; notice of changes made in point system shall be given in similar manner.

6. *Hearings:*

Upon suspending license under point system, department shall notify licensee and upon his request afford him an opportunity for a hearing, within 20 days after receipt of such request. After hearing, department shall either rescind suspension, or on good cause, may extend suspension or revoke license.

WISCONSIN

Department authorized to adopt a point system. (See Note 2 in Table 5.)

DISTRICT OF COLUMBIA

1. *Authority to establish point system:*

By order, Director of Motor Vehicles is required to put into effect a point system for suspension and revocation of operator's permits.

Points assessed only after conviction. With respect to persons under 18 years of age, points assessed only after adjudication by juvenile court or other court having jurisdiction or where such person has not denied charge to Juvenile Bureau of Metropolitan Police Department.

In his discretion, director may, after notice and opportunity for a hearing, suspend permit or driving privilege of any person without assessment of points for traffic charges pending in court, subject to final determination; on finding of guilt, points assessed. In cases where director proposes to revoke or continue an existing suspension following court proceeding, he shall afford operator opportunity for a hearing.

2. *Number of points authorizing suspension, revocation:*

Eight points for license suspension and 12 points for revocation, accumulated within a three-year period. Initial suspension period from two to 30 days with subsequent suspension from 15 to 90 days based on seriousness of case. Revocation period not specified, but under basic law is six months. When revocation action can be modified (in opinion of Hearing Officer or Director) to a suspension, suspension not limited to periods above; when limited permit is allowed as modification of suspension or revocation, effectiveness of permit also not limited to time periods noted above.

Suspension effective five days after notice, unless hearing requested; mandatory revocation effective immediately.

3. *Violations and schedule of point values:*

	Points
Any moving violation not listed below and not contributing to an accdent	2
Violations contributing to an accident	3
Speeding	4
Motor running unattended	4
Failure to lock ignition	4
Failure to report an accident	5
Failure to give the right of way to pedestrian	5
Leaving after colliding:	
No personal injury	8
With personal injury	12
Reckless driving	12
Operating without a District of Columbia permit prior to restoration of operating privileges which have been suspended	12
Operating in violation of restriction	12
Using permit of another	12
Operating after suspension or revocation.	12
Obtaining or attempting to obtain a permit by misrepresentation	12
Loaning or altering a permit	12
Conviction for any homicide or assault committed by means of an automobile	12
Driving under the influence of intoxicating liquor or narcotic drugs	12
Any felony involving use of an automobile	12

4. *Suspension under other conditions:*

Director, in his discretion, and after notice and op portunity for a hearing, may suspend or revoke perm or operating privilege of person who, in his opinio is not physically, mentally or morally qualified operate safely or has driven in manner which shows flagrant disregard for safety of persons or property.

In addition, when person is arrested for any of t following traffic violations, he shall be interviewed an official of the Metropolitan Police Department a served notice of possible suspension unless he appe for a hearing with department (motor vehicle) witl five days (10 days for nonresident) to show cause w permit should not be suspended or revoked. (cent driver file notified by phone to place "stop" in driv record). On failure to appear, permit or privilege

pended or revoked until restored by director. (special procedures set forth for persons, who because of physical or mental condition, cannot be served notice):

(1) Operation of a motor vehicle involved in an accident resulting in the death of another.

(2) Operation of a motor vehicle at a speed in excess of 30 miles per hour above the authorized speed limit.

(3) Operation of a motor vehicle involved in an accident as the result of a traffic violation for which, by order of the Municipal Court, collateral of $50 or more, or a bond in any amount, is required.

(4) Operation of a motor vehicle in disregard of any restriction which may have been imposed on the use of the permit of the operator of such vehicle, whether such permit be issued by the District of Columbia or by another jurisdiction.

(5) Operation of a motor vehicle while apparently under the influence of intoxicating liquor or a drug, or while apparently physically or mentally unqualified to operate a motor vehicle by reason of diabetic coma, or epileptic or other seizure.

(6) Leaving the scene of an accident, in which the motor vehicle driven by him was involved and in which there is bodily injury, without giving assistance or making known his identity and address and the identity and address of the owner of the vehicle.

(7) Reckless driving involving bodily injury.

(8) Engaging in the commission of a felony in which a motor vehicle is involved.

Director also has authority, when justified, to require person to show cause why his license should not be revoked, when action has already been taken towards the suspension of the permit or privilege of such person.

5. *Interim Action:*

On first moving violation, warning letter sent unless points assessed are five or more; at five points, person to attend conference.

6. *Duration of Points:*

Points shall be erased only by a lapse of three years; upon issuance of a permit, following revocation, there may be additional periods of suspension or revocation for additional points obtained. In his discretion, director may cancel points assessed against traffic violator who elects to stand trial and where court finds such person not guilty or dismisses case.

7. *Out-of-state convictions — military personnel:*

For convictions, forfeitures and pleas of guilty certified to the District by other jurisdictions, points comparable to the District schedule will be assigned in the discretion of the Director.

In traffic cases turned over to military authorities, points will be assessed immediately upon notification to the Director that such military authorities have taken disciplinary action as the result of arrests of service personnel for moving traffic violations.

8. *Failure to respond to traffic citation:*

After notice and opportunity for a hearing, director may suspend resident arrested for traffic violation in another jurisdiction, which under agreement with D. C., permits violators to receive a traffic citation instead of posting bail or collateral to secure appearance for trial, and who fails to comply; suspension to remain in effect until person shows evidence of compliance with terms of citation. Also applicable with respect to moving traffic violations committed in D. C. by D. C. residents.

SB-296

PAUL J. BELL, JR., Petitioner,

v

R. H. BURSON, Director, Georgia Department of Public Safety

402 US 535, 29 L Ed 2d 90, 91 S Ct 1586

[No. 5586]

Argued March 23, 1971. Decided May 24, 1971.

SUMMARY

Under Georgia's motor vehicle safety responsibility statute, an uninsured motorist's motor vehicle registration and driver's license are subject to suspension if he is involved in an accident and he fails to post security to cover the amount of damages claimed by aggrieved parties. The petitioner, an uninsured motorist, was involved in an accident when a girl rode her bicycle into the side of his automobile. He did not post security for the damages claimed to have been suffered by the girl. At an administrative hearing, his offer to prove that he was not liable for the accident was rejected, and he was given 30 days to post security or to have his license and registration suspended. The administrative decision was upheld by the Georgia Court of Appeals (121 Ga App 418, 174 SE2d 235), and the Georgia Supreme Court denied review.

On certiorari, the United States Supreme Court reversed and remanded the case. In an opinion by BRENNAN, J., expressing the view of six members of the court, it was held that before the state could suspend the petitioner's license and registration, procedural due process required a determination whether there was a reasonable possibility of a judgment being rendered against him as a result of the accident, since liability, in the sense of an ultimate judicial determination of responsibility, played a crucial role under the state's statutory scheme for motor vehicle safety responsibility.

BURGER, Ch. J., and BLACK and BLACKMUN, JJ., concurred in the result.

HEADNOTES

Classified to U. S. Supreme Court Digest, Annotated

Constitutional Law § 695 — motor vehicle licenses

1. The Fourteenth Amendment is not violated by a statute which bars the issuance of licenses to all motorists who do not carry liability insurance or who do not post security.

Constitutional Law § 695 — due process — motor vehicle license

2. A license issued to a motorist is not to be taken away by state action without that procedural due process required by the Fourteenth Amendment.

States § 18 — constitutional restraints

3. Relevant constitutional restraints limit state action to terminate an entitlement, whether the entitlement is denominated a "right" or a "privilege."

Constitutional Law § 695 — due process — motor vehicle license — suspension

4. In connection with the suspension of a license of an uninsured motorist who was involved in an accident, the inquiry into fault or liability requisite to afford the licensee due process need not take the form of a full adjudication of the question of liability.

Constitutional Law § 695 — due process — motor vehicle license — suspension

5. Before a state may suspend the license and registration of an uninsured motorist who was involved in an accident and who did not post security to cover the amount of damages claimed by another party involved in the accident, procedural due process requires a determination whether there is a reasonable possibility of a judgment being rendered against the motorist as a result of the accident, where liability, in the sense of an ultimate judicial determination of responsibility, plays a crucial role under the state's statutory scheme for motor vehicle safety responsibility.

Constitutional Law § 695 — due process — motor vehicle license — suspension

6. A state's interest in protecting a

Validity of Motor Vehicle Financial Responsibility Act. 85 ALR2d 1011.

claimant from the possibility of an unrecoverable judgment is not, within the context of the state's fault-oriented scheme of motor vehicle safety responsibility, a justification for denying procedural due process by suspending the license and registration of an uninsured motorist who has failed to post security, where there is no reasonable possibility of a judgment being rendered against him in connection with an accident in which he has been involved.

Constitutional Law § 787 — due process — sufficiency of hearing

7. The fact that additional expense will be occasioned by an expanded hearing does not justify denying a hearing which meets the standards of procedural due process.

Constitutional Law § 695 — motor vehicle license — suspension

8. In reviewing state action in the area of suspension of motorists' licenses, the United States Supreme Court will look to substance, not to bare form, to determine whether constitutional minimums have been honored.

Constitutional Law § 803.5 — due process — hearing — suspension of license

9. Under a statutory scheme which makes liability an important factor in the state's determination to deprive an individual of his motor vehicle license, the state may not, consistently with due process, eliminate consideration of that factor in its hearing prior to the suspension of an uninsured motorist's license because he has been involved in an accident and has not posted security.

Constitutional Law § 787 — due process — sufficiency of hearing

10. The hearing required by the due process clause of the Fourteenth Amendment must be meaningful and appropriate to the nature of the case.

Constitutional Law § 803.5 — due process — notice — hearing

11. Due process requires that when a state seeks to suspend a motorist's license, it must afford, before the suspension becomes effective, notice and opportunity for hearing appropriate to the nature of the case.

APPEARANCES OF COUNSEL

Elizabeth R. Rindskopf argued the cause for the petitioner, pro hac vice, by special leave of Court.

Dorothy T. Beasley argued the cause for the respondent.

OPINION OF THE COURT

Mr. Justice Brennan delivered the opinion of the Court.

Georgia's Motor Vehicle Safety Responsibility Act provides that the motor vehicle registration and driver's license of an uninsured motorist involved in an accident shall be suspended unless he posts security to cover the amount of damages claimed by aggrieved parties in reports of the accident.[1] The administrative hearing conducted prior to the suspension excludes consideration of the motorist's fault or liability for the accident. The Georgia Court of Appeals rejected petitioner's contention that the State's statutory scheme, in failing before suspending the licenses to afford him a hearing on the question of his fault or liability, denied him due process in violation of the Fourteenth Amendment: the court held that " 'Fault' or 'innocence' are completely irrelevant factors." 121 Ga App 418, 420, 174 SE2d 235, 236 (1970). The Georgia Supreme Court denied review. App, at 27. We granted certiorari. 400 US 963, 27 L Ed 2d 383, 91 S Ct 376 (1970). We reverse.

Petitioner is a clergyman whose ministry requires him to travel by car to cover three rural Georgian communities. On Sunday afternoon, November 24, 1968, petitioner was involved in an accident when five-year-old Sherry Capes rode her bicycle into the side of his automobile. The child's parents filed an accident report with the Director of the Georgia Department of Public Safety indicating that their daughter had suffered substantial injuries for which they claimed damages of $5,000. Petitioner was thereafter informed by the Director that unless he was covered by a liability insurance policy in effect at the time of the accident he must file a bond or cash security deposit of $5,000 or present a notorized release from liability, plus proof of future financial responsibility,[2] or suffer the suspension of his driver's license and vehicle registration. App, at 9. Petitioner requested an administrative hearing before the Director asserting that he was not liable as the accident was unavoidable, and stating also that he would be severely handicapped in the performance of his ministerial duties by a suspension of his licenses. A hearing was scheduled but the Director informed petitioner that "[t]he only evidence that the Department can accept and consider is: (a) was the petitioner or his vehicle involved in the accident; (b) has petitioner complied with the provisions of the Law as provided; or (c) does petitioner come within any of the exceptions of the Law." App, at 11.[3] At the

1. Motor Vehicle Safety Responsibility Act, Ga. Code Ann. §§ 92A-601 et seq. (1958). In pertinent part the Act provides that anyone involved in an accident must submit a report to the Director of Public Safety. Ga Code Ann § 92A-604 (Supp 1970). Within 30 days of the receipt of the report the Director "shall suspend the license and all registration certificates and all registration plates of the operator and owner of any motor vehicle in any manner involved in the accident unless or until the operator or owner has previously furnished or immediately furnishes security, sufficient . . . to satisfy any judgments for damages or injuries resulting . . . and unless such operator or owner shall give proof of financial responsibility for the future as is required in section 92A-615.1. . . ." Ga Code Ann § 92A-605(a) (Supp 1970). Section 92A-615.1 (Supp 1970) requires that "such proof must be maintained for a one year period." Section 92A-605 (a) works no suspension, however, (1) if the owner or operator had in effect at the time of the accident a liability insurance policy or other bond, Ga Code Ann § 92A-605(c) (Supp 1970); (2) if the owner or operator qualifies as a self-insurer, ibid; (3) if only the owner or operator was injured, Ga Code Ann § 92A-606 (1958); (4) if the automobile was legally parked at the time of the accident, ibid.; (5) if as to an owner, the automobile was being operated without permission, ibid.; or (6) "[i]f, prior to the date that the Director would otherwise suspend license and registration . . . there shall be filed with the Director evidence satisfactory to him that the person who would otherwise have to file security has been released from liability or been finally adjudicated not to be liable or has executed a duly acknowledged written agreement providing for the payment of an agreed amount in installments . . . ." Ibid.

2. Questions concerning the requirement of proof of future financial responsibility are not before us. The State's brief, at 4, states: "The one year period for proof of financial responsibility has now expired so [petitioner] would not be required to file such proof, even if the Court of Appeals decision were affirmed."

3. Ga Code Ann § 92A-602 (1968) provides:

"The Director shall administer and enforce the provisions of this Chapter and may make rules and regulations necessary for its administration and shall provide for hearings upon request of persons aggrieved by orders or acts of the Director under the provisions of this Chapter. Such

ministrative hearing the Director jected petitioner's proffer of evi- nce on liability, ascertained that titioner was not within any of the tutory exceptions, and gave pe- ioner 30 days to comply with the curity requirements or suffer sus- nsion. Petitioner then exercised statutory right to an appeal de ve in the Superior Court. Ga Code n § 92A-602 (1958). At that aring, the court permitted peti- ner to present his evidence on li- ility, and, although the claimants re neither parties nor witnesses, nd petitioner free from fault. As esult, the Superior Court ordered at the petitioner's driver's license be suspended . . . [until] it is filed against petitioner for e purpose of recovering damages the injuries sustained by the ld . . . ." App, at 15. This der was reversed by the Georgia urt of Appeals in overruling pe- ioner's constitutional contention.

1-3] If the statute barred the is- nce of licenses to all motorists o did not carry liability insurance who did not post security, the tute would not, under our cases, late the Fourteenth Amendment. parte Poresky, 290 US 30, 78 L 152, 54 S Ct 3 (1933); Conti- tal Baking Co. v Woodring, 286 352, 76 L Ed 1155, 52 S Ct 595, ALR 1402 (1932); Hess v Paw- ki, 274 US 352, 71 L Ed 1091, 47 Ct 632 (1927). It does not follow, wever, that the Amendment also mits the Georgia statutory eme merely because not all mo- ists, but rather only motorists olved in accidents, are required to post security under penalty of loss of the licenses. See Shapiro v Thompson, 394 US 618, 22 L Ed 2d 600, 89 S Ct 1322 (1969); Frost & Frost Trucking Co. v Railroad Commission, 271 US 583, 70 L Ed 1101, 46 S Ct 605, 47 ALR 457 (1926). Once licenses are issued, as in petitioner's case, their continued possession may become essential in the pursuit of a livelihood. Suspension of issued licenses thus involves state action that adjudicates important interests of the licensees. In such cases the licenses are not to be taken away without that procedural due process required by the Fourteenth Amendment. Sniadach v Family Finance Corp. 395 US 337, 23 L Ed 2d 349, 89 S Ct 1820 (1969); Goldberg v Kelly, 397 US 254, 25 L Ed 2d 287, 90 S Ct 1011 (1970). This is but an application of the general proposition that relevant constitutional restraints limit state power to terminate an entitlement whether the entitlement is denominated a "right" or a "privilege." Sherbert v Verner, 374 US 398, 10 L Ed 2d 965, 83 S Ct 1790 (1963) (disqualification for unemployment compensation); Slochower v Board of Higher Education, 350 US 551, 100 L Ed 692, 76 S Ct 637 (1956) (discharge from public employment); Speiser v Randall, 357 US 513, 2 L Ed 2d 1460, 78 S Ct 1332 (1958) (denial of a tax exemption); Goldberg v Kelly, supra (withdrawal of welfare benefits). See also Londoner v Denver, 210 US 373, 385-386, 52 L Ed 1103, 1112, 28 S Ct 708 (1908); Goldsmith v Board of Tax Appeals, 270 US 117, 70 L Ed 494, 46 S Ct 215 (1926); Opp Cotton Mills v Administrator, 312 US 126, 85 L Ed 624, 61 S Ct 524 (1941).

4, 5] We turn then to the nature of the procedural due process which must be afforded the licensee on the question of his fault or liability for the accident.[4] A procedural rule that may satisfy due process in one context may not necessarily satisfy procedural due process in every case. Thus, procedures adequate to determine a welfare claim may not suffice to try a felony charge. Compare Goldberg v Kelly, 397 US, at 270-271, 25 L Ed 2d at 300, with Gideon v Wainwright, 372 US 335, 9 L Ed 2d 799, 83 S Ct 792, 93 ALR2d 733 (1963). Clearly, however, the inquiry into fault or liability requisite to afford the licensee due process need not take the form of a full adjudication of the question of liability. That adjudication can only be made in litigation between the parties involved in the accident. Since the only purpose of the provisions before us is to obtain security from which to pay any judgments against the licensee resulting from the accident, we hold that procedural due process will be satisfied by an inquiry limited to the determination whether there is a reasonable possibility of judgments in the amounts claimed being rendered against the licensee.

6, 7] The State argues that the licensee's interest in avoiding the suspension of his licenses is outweighed by countervailing governmental interests and therefore that this procedural due process need not be afforded him. We disagree. In cases where there is no reasonable possibility of a judgment being rendered against a licensee, Georgia's interest in protecting a claimant from the possibility of an unrecoverable judgment is not, within the context of the State's fault-oriented scheme, a justification for denying the process due its citizens. Nor is additional expense occasioned by the expanded hearing sufficient to withstand the constitutional requirement. " 'While the problem of additional expense must be kept in mind, it does not justify denying a hearing meeting the ordinary standards of due process.' " Goldberg v Kelly, 397 US, at 261, 25 L Ed 2d at 295, quoting Kelly v Wyman, 294 F Supp 893, 901 (SDNY 1968).

8, 9] The main thrust of Georgia's argument is that it need not provide a hearing on liability because fault and liability are irrelevant to the statutory scheme. We may assume that were this so, the prior administrative hearing presently provided by the State would be "appropriate to the nature of the case." Mullane v Central Hanover Bank & Trust Co. 339 US 306, 313, 94 L Ed 865, 872, 70 S Ct 652 (1950). But "[i]n reviewing state action in this area . . . we look to substance, not to bare form, to determine whether constitutional minimums have been honored." Willner v Committee on Character, 373 US 96, 106-107, 10 L Ed 2d 224, 231, 83 S Ct 1175, 2 ALR3d 1254 (1963)

ring need not be a matter of record the decision as rendered by the ctor shall be final unless the aggrieved son shall desire an appeal, in which he shall have the right to enter an ap- l to the superior court of the county of his residence, by notice to the Director, in the same manner as appeals are entered from the court of ordinary, except that the appellant shall not be required to post any bond nor pay the costs in advance. If the aggrieved person desires, the appeal may be heard by the judge at term or in chambers or before a jury at the first term. The hearing on the appeal shall be de novo, however, such appeal shall not act as a supersedeas of any orders or acts of the Director, nor shall the appellant be allowed to operate or permit a motor vehicle to be operated in violation of any suspension or revocation by the Director, while such appeal is pending. A notice sent by registered mail shall be sufficient service on the Director that such appeal has been entered."

4. Petitioners stated at oral argument that while "it would be possible to raise [an equal protection argument] . . . we don't raise this point here." Tr. of Oral Arg., at 14.

(concurring opinion). And looking to the operation of the State's statutory scheme, it is clear that liability, in the sense of an ultimate judicial determination of responsibility, plays a crucial role in the Safety Responsibility Act. If prior to suspension there is a release from liability executed by the injured party, no suspension is worked by the Act. Ga Code Ann § 92A-606 (1958). The same is true if prior to suspension there is an adjudication of nonliability. Ibid. Even after suspension has been declared, a release from liability or an adjudication of nonliability will lift the suspension. Ga Code Ann § 92A-607 (Supp 1970). Moreover, other of the Act's exceptions are developed around liability related concepts. Thus, we are not dealing here with a no-fault scheme. Since the statutory scheme makes liability an important factor in the State's determination to deprive an individual of his licenses, the State may not, consistently with due process, eliminate consideration of that factor in a prior hearing.

[10] The hearing required by the Due Process Clause must be "meaningful," Armstrong v Manzo, 380 US 545, 552, 14 L Ed 2d 62, 66, 85 S Ct 1187 (1965), and "appropriate to the nature of the case." Mullane v Central Hanover Bank & Trust Co., supra. It is a proposition which hardly seems to need explication that a hearing which excludes consideration of an element essential to the decision whether licenses of the nature here involved shall be suspended does not meet this standard.

[11] Finally, we reject Georgia's argument that it must afford the licensee an inquiry into the question of liability, that determination, unlike the determination of the matters presently considered at the administrative hearing, need not be made prior to the suspension of the licenses. While "many controversies have raged about . . . the Due Process Clause," Mullane v Central Hanover Bank & Trust Co. 339 US, at 313, 94 L Ed at 872, it is fundamental that except in emergency situations (and this is not one)[5] due process requires that when a State seeks to terminate an interest such as that here involved, it must afford "notice and opportunity for hearing appropriate to the nature of the case" *before* the termination becomes effective. Ibid. Opp Cotton Mills, Inc. v Administrator, 312 US, at 152-156, 85 L Ed at 639-641 (1941); Sniadach v Family Finance Corp., supra; Goldberg v Kelly, supra; Wisconsin v Constantineau, 400 US 433, 27 L Ed 2d 515, 91 S Ct 507 (1971).

[12] We hold, then, that under Georgia's present statutory scheme, before the State may deprive petitioner of his driver's license and vehicle registration it must provide a forum for the determination of the question whether there is a reasonable possibility of a judgment being rendered against him as a result of the accident. We deem it inappropriate in this case to do more than lay down this requirement. The alternative methods of compliance are several. Georgia may decide merely to include consideration of the question at the administrative hearing now provided, or it may elect to postpone such a consideration to the de novo judicial proceedings in the Superior Court. Georgia may decide to withhold suspension until adjudication of an action for damages brought by the injured party. Indeed, Georgia may elect to abandon its present scheme completely and pursue one of the various alternatives in force in other States.[6] Finally, Georgia may reject all of the above and devise an entirely new regulatory scheme. The area of choice is wide: we hold only that the failure of the present Georgia scheme to afford the petitioner a prior hearing on liability of the nature we have defined denied him procedural due process in violation of the Fourteenth Amendment.

The judgment is reversed and the case is remanded for further proceedings not inconsistent with this opinion.

It is so ordered.

The Chief Justice, Mr. Justice Black, and Mr. Justice Blackmun concur in the result.

5. See, e. g., Fahey v Mallonee, 332 US [illegible]; Ewing v Mytinger & Casselberry, Inc., 339 US [illegible]

6. The various alternatives include compulsory insurance plans, public or joint public-private unsatisfied judgment funds, and assigned claims plans. See R. Keeton & J. O'Connell, After Cars Crash (1967).

SB-291

be given, but notice is required when the point accumulation reaches ..... percent of the number at which suspension is authorized.[16] No points shall be assessed for violating a provision of this act or municipal ordinance regulating standing, parking, equipment, size or weight.[17] In case of the conviction of a licensee of two or more traffic violations committed on a single occasion, such licensee shall be assessed points for one offense only and if the offenses involved have different point values, such licensee shall be assessed for the offense having the greater point value. The department is authorized to suspend the license of a driver, with or without preliminary hearing, when his driving record identifies him as an habitually reckless or negligent driver or as an habitual or frequent violator under this subsection. (NEW, 1968.)

(c) Upon suspending the license of any person as hereinbefore in this section authorized, the department shall immediately notify the licensee in writing and upon his request shall afford him an opportunity for a hearing as early as practicable within not to exceed 20 days after receipt of such request in the county wherein the licensee resides unless the department and the licensee agree that such hearing may be held in some other county. Upon such hearing the commissioner or his duly authorized agent may administer oaths and may issue subpoenas for the attendance of witnesses and the production of relevant books and papers and may require a re-examination of the licensee. Upon such hearing the department shall either rescind its order of suspension or, good cause appearing therefor, may continue, modify or extend the suspension of such license or revoke such license. (REVISED, 1968.)

§ 6-207—Department may require re-examination

The department, having good cause to believe that a licensed driver is incompetent or otherwise not qualified to be licensed, may upon written notice of at least five days to the licensee re-

---

[16] It is suggested that a percentage low enough to give the driver opportunity to protest any erroneous entry and to improve his driving habits prior to any suspension be specified. *Fifty* percent might be appropriate.

[17] In addition, it is suggested that no points be assessed for violations by pedestrians, passengers or bicycle riders, or for violations of provisions relating to the preservation of the condition of traffic-control devices or the highway.

cense of a driver without preliminary hearing upon a showing by its records or other sufficient evidence that the licensee:

1. Has committed an offense for which mandatory revocation of license is required upon conviction;

2. Has been convicted with such frequency of serious offenses against traffic regulations governing the movement of vehicles as to indicate a disrespect for traffic laws and a disregard for the safety of other persons on the highways;

3. Is an habitually reckless or negligent driver of a motor vehicle, such fact being established by the point system in subsection (b), by a record of accidents, or by other evidence;

4. Is incompetent to drive a motor vehicle;

5. Has permitted an unlawful or fraudulent use of such license;

6. Has committed an offense in another state which if committed in this State would be grounds for suspension or revocation;

7. Has been convicted of fleeing or attempting to elude a police officer; or

8. Has been convicted of racing on the highways. (REVISED, 1968.)

(b) For the purpose of identifying habitually reckless or negligent drivers and habitual or frequent violators of traffic regulations governing the movement of vehicles, the department shall adopt regulations establishing a uniform system assigning demerit points for convictions of violations of chapter 11 of this act or of ordinances adopted by local authorities regulating the operation of motor vehicles. The regulations shall include a designated level of point accumulation which so identifies drivers.[15] The department may assess points for convictions in other states of offenses which, if committed in this State, would be grounds for such assessment. Notice of each assessment of points may

---

[15] In formulating the administrative point system authorized by this section, each department is urged to consider, in the interest of interstate uniformity, authorizing suspension for an accumulation of 12 or more points as a result of offenses committed during any consecutive 12-month period or 13 or more points as a result of offenses committed during any 24-month period; assigning six points for convictions of reckless driving (willful and wanton disregard for the safety of persons or property, as in § 11-901) and for convictions of speeding when the licensee drove at least 20 miles per hour over the lawful limit; four points for convictions of relatively serious offenses; and three points for less serious offenses.

March, 1964

SB-296

Law Review Cites Rulings on Point Systems

This month Dr. Joseph P. Hennessee, AAMVA Counsel and Director, Uniform Laws Program, comments on the various court decisions and opinions affecting administrators' handling of cases involving "habitual violators" and their administration of the point system.

AAMVA members are invited to send Dr. Hennessee significant court decisions affecting all aspects of DMV administration for discussion in future issues of the BULLETIN.

Driver License Suspensions—Habitual Violators—Point Systems

Section 6-206 (a) (3) of the Uniform Vehicle Code provides that a department may suspend the license of any operator or chauffeur without preliminary hearing upon a showing by its records or other satisfactory evidence that the licensee: "has been convicted with such frequency of serious offenses against traffic regulations governing the movement of vehicles as to indicate a disrespect for traffic laws and a disregard for the safety of other persons on the highways."

On page 236 of *Driver Improvement—The Point System*, The American Association of Motor Vehicle Administrators, Chapel Hill, 1958, this writer suggested that this language would be sufficient to support the establishment of an administrative point system, and, *ergo*, by extension of this reasoning, suspensions under this authority.

A recent memorandum decision from the First Judicial District of North Dakota, *State of North Dakota v. Rheault*, December 31, 1963, casts a shadow of doubt on this conclusion. This court held that Section 39-06-32 (2) NDCC was void as uncertain. This statute, which is in the language of the Uniform Code provision, cited above, the court said, makes no itemization of what constitutes "serious offense" nor does it furnish any standards in determining the definition of "with such frequency." Further, the court said, it is left in the dark as to whether there has been such serious offenses or such frequency of violations as would "indicate" a disrespect for traffic laws. To follow this law each judge would be left to his own standards of what constitutes "serious offenses," what may be termed "such frequency," and what is indicative of "indicate."

To support its position the court cited 14 Am. Jur., Criminal Law, sec. 19, page 771, and *Connally v. General Construction Co.*, 269 U.S. 385, 46 S.Ct. 126, 70 L.Ed. 222 (1926), to the effect that a statute must be sufficiently explicit to inform those who are subject to it what conduct on their part will render them liable to its penalties.

On March 5, 1961, the Supreme Court of Arizona handed down a decision, *Arizona v. Birmingham and Bradley* (not yet reported), upholding A.R.S. 28-446 (A) (3), which provides: "(A) The department is authorized to suspend the license of an operator or chauffeur without preliminary hearing upon a showing by its records or other sufficient evidence that the licensee: (3) has been convicted with such frequency of serious offenses against traffic regulations governing the movement of vehicles as to indicate a disrespect for traffic laws and a disregard for the safety of other persons on the highways," and the administrative point system established to implement this law.

This court agreed that standards for administrative action must be spelled out in the legislative enactment and that if they are negligible or nonexistent, there is an unconstitutional delegation of legislative powers. But when examined in this light, the court said, this statute "evidences five criteria or guides by which the responsible administrative officers are to determine when a driver's license shall be suspended. It requires (1) that the suspension be upon *conviction* of offenses against traffic regulations; (2) that there be *frequent* convictions; (3) that the offenses of which the operator has been convicted be *serious* offenses against traffic regulations; (4) that the offenses be against traffic regulations governing the *movement* of vehicles; and (5) that the convictions must be such as to show a disrespect for traffic laws and a disregard for the safety of other persons on the highway." "We think," the court said, "the criteria established by the legislature for the suspension of an operator's license is reasonably definite and certain involving a minimum of discretion, particularly where it is obviously impractical, as here, to lay down an exact comprehensive rule."

In upholding A.R.S. 28-446 (A) (3) and the point system established under it the court refused to follow *South Carolina State Highway Department v. Harbin*, 226 S.C. 585, 86 S.E. 2d 436 (1955), and *Harrell v. Scheidt*, 249 N.C. 690, 107 S.E. 2d 549 (1959), which held point systems unconstitutional because authority was granted without sufficient standards, and cited with approval *Stargill v. Beard*, 303 S.W. 2d 908 (Ky. 1957), which upheld Kentucky's point system and its supporting statute. None of these three statutes was four-square with the Arizona statute, however, and the difference in results may be distinguished on a difference in statutory language. A divergence in viewpoints expressed in these two lines of cases warrants a brief review of similar case holdings.

Statutes are coming in for increasing attack on the grounds that they are too vague and indefinite to constitute a sufficient definition of prohibited conduct or that they attempt to make an unconstitutional delegation of legislative authority to an administrative body. In *Brown v. Kelly*, 169 NYS 2d 203 (1957), the court ruled that a provision prohibiting operation of a motor vehicle "at such speed as to endanger life, limb or property of any person or at a rate of speed greater than will permit bringing vehicles to a stop without injury to another or his property" was too vague and indefinite and did not contain sufficient standards by which a driver's conduct could be tested, and therefore the statute was ineffective as a basis for revocation of a driver's license. By way of contrast, the Oklahoma court had no difficulty in upholding a statute which prohibited operation of a motor vehicle at a speed "in excess of maximum safe and prudent speed as determined and posted by the state highway department." *Ludwig v. Yancey*, 318 P. 2d 450 (Okla. 1957).

What constitutes an habitual violator has come in for some review by the courts. In *Lamb v. Rubin*, 198 Va. 628, 96 S.E. 2d 80 (1957), the court upheld a determination that a driver was habitually reckless and negligent where the record showed nine convictions in approximately six years. *Lambe v. Clark*, 199 Va. 371, 99 S.E. 2d 597, decided in the same year, held that five convictions from July 19, 1952, to May 6, 1955, plus three convictions from February 27, 1956, to June 1, 1956, to be sufficient

to support a finding by the commissioner that the licensee was habitually reckless and negligent. A New York court in *Ross v. McDuff*, 7 N.Y. 56, 127 N.E. 2d 836 (1955), upheld a statute permitting the commissioner to suspend a license for "habitual" or "persistent" violation of traffic laws against a charge that it was an unconstitutional grant of legislative authority to an administrative agency without providing criteria or standards defining the words "habitual" or "persistent." The North Carolina court on the other hand, voided its habitual violator statute because it did not contain any fixed standards or guides to which the department must conform in order to determine whether or not a driver is an habitual violator of the traffic laws, and because left to the sole discretion of the department to determine when a driver is an habitual violator of such laws. This, the court held, to be an unconstitutional grant of legislative powers. *Harvell v. Scheidt, supra*. This being true, the North Carolina court, like the South Carolina court, did not have to look at the system of points being used or at the record of the driver.

By way of a summary we can now report that administrative point systems have been upheld in two jurisdictions against attacks that their foundation statutes were void as an unconstitutional delegation of legislative authority, and in two jurisdictions they have been voided. Only one of these foundation statutes, however, in Arizona, was substantially similar to the language of Section 6-205 (a) (3) of the Uniform Vehicle Code. What other courts may do when presented with a similar question is open to conjecture. If the statute is in the language of the Uniform Code, Section 6-206 (a) (3), the Arizona decision stands alone in providing an interpretation. Divergent language may find support in the Beard decision. Opponents will cite the Harbin and Harvell decisions.

Perhaps the leading case on the delegation of legislative authority as it affects suspensions of the drivers' licenses is *Thompson v. Smith*, 155 Va. 367, 154 S.E. 579, 581 A.L.R. 601 (1930). This court voided a city ordinance which permitted the chief of police to revoke the permit of any driver, who, in his opinion, became unfit to drive an automobile on the streets of the city. The court said that "the rights of men are to be determined by the law itself, and not by the lot or leave of administrative officers or bureaus. This principle ought not to be surrendered for convenience or in effect nullified for the sake of expediency. It is the prerogative and function of the legislative branch of the government, whether state or municipal, to determine and declare what the law shall be, and the legislative branch of the government may not divest itself of this function, or delegate it to executive officers."

Where does this leave an administrator who is charged with the duty and responsibility of administering habitual violator type and other general suspension authority statutes? The question, to a degree, suggests its own answer. A statute is presumed to be valid and enforceable unless and until it has been voided by a competent court. Until a statute has been voided, one charged with its administration and enforcement is entitled to rely upon it and to administer and enforce it.

By way of a caveat, however, it should be mentioned that the existence of a statute for a long period of years gives rise to no presumption as to its validity. *People v. Mendacqua*, 170 N.Y.S. 2d 423 (1958). Also, repassage of a statute may not act to approve or validate rules and regulations promulgated under it prior to its repassage. *Los Angeles County v. State Board of Health*, 322 P. 2d 968 (Calif. 1958).

What should be done if a foundation statute or a point system based upon it should be invalidated by the courts? The answer supplied by both South Carolina and North Carolina was the enactment of a statutory point system to replace the voided statutes. Other states have obviated this question by enactment of either a specific statutory authority to establish a system of points or a statutory point system.

Finally, how can an administrator predict how a court will hold when a habitual violator type statute or a point system established under its authority has been challenged? No definitive answer can be given. It may be helpful to know how the court has held as to similar questions. It is always helpful to know how courts of other jurisdictions have held. The results may hinge upon the skill and diligence with which a test case is prosecuted and defended. If the statute in question is in the language of Section 6-205 (a) (3) of the Uniform Code, the Arizona case stands alone as authority for its validity. No ruling case, interpreting the same language, exists to the contrary.

Georgia Financial Responsibility Law In Effect

A new law passed in 1963 dealing with financial responsibility of motorists went into effect this month, but only after the 1964 general assembly made various changes in the act.

The measure calls for stringent penalties against motorists convicted of any of seven major traffic violations. Changes in the law made by the present assembly modified some of the penalties. The bill's sponsors followed several recommendations of Colonel H. Lowell Conner, director of the Georgia Department of Public Safety.

Revisions in the original law before it became effective were made to avoid imposition of tremendous record-keeping burdens on the department, which would have required increased personnel.

Nova Scotia Eliminates Double Fee For Extra-Provincial Carriers

The Board of Commissioners of Public Utilities in the Canadian province of Nova Scotia has authorized motor carriers licensed in the province to plate any or all vehicles for extra-provincial use as well, for a fee of $2 per vehicle annually.

Previously a separate extra-provincial license had to be purchased at full price of from $10 to $28 per vehicle. The action followed collective discussion among Hon. Stephen Pyke, Minister of Highways, the Board of Commissioners of Public Utilities and representatives of the Maritime Motor Transport Association.

Traffic fatalities in Mississippi for the first two months of 1964 were 14 percent below the same period for 1963, according to Al Richburg, assistant director of the accident records division.

Motor Vehicle Law Review

In this issue of the BULLETIN, Dr. Joseph P. Hennessee, AAMVA Counsel and Director, Uniform Laws Program, reviews another "habitual violator" case, as well as the reasonable and prudent speed rule, safety glass and rulings of the attorney general of South Dakota.

AAMVA members are invited to send Dr. Hennessee significant court decisions affecting all aspects of DMV administration for discussion in future issues.

Habitual Violators

Since the March issue of the BULLETIN went to press another "habitual violator" case has come to our attention. In this case, *Anderson* v. *Commissioner of Highways* (not yet reported), handed down February 14, 1964, the Minnesota Court upheld the provisions of Minn. St. 171.18(4) which gives the commissioner authority to suspend the license of any person, without a preliminary hearing, upon a showing that such driver is an "habitual violator," against a contention that it was unconstitutional as vague in failing to provide a clear and precise standard for action by the commissioner.

This court recognized the general rule that a statute which vests discretion in a public official must prescribe precise rules of action but noted that this rule is subject to exceptions and qualifications. The modern tendency is to be more liberal in permitting grants of discretion to administrative officers in order to facilitate the administration of laws (Annotation, 92 A.L.R. 410). The rule which requires an expressed standard to guide the exercise of discretion is subject to the exception that where it is impracticable to lay down a definite comprehensive rule—such as, where the administration turns upon questions of qualifications of personal fitness, or where the act relates to the administration of a police regulation which is necessary to protect the general health, welfare and safety of the public—it is not essential that a specific standard be expressly stated on the legislation. (Annotations, 12 A.L.R. 1417; 54 A.L.R. 1119; 92 A.L.R. 410.) This, the court said, is in accord with its previous decisions.

In reaching its decision, however, the court noted that there is a division among the courts of the several states as to the validity of traffic and license laws using the term "habitual violator," as evidence by *Harrell* v. *Scheidt*, 249 N.C. 699, 706, 107, S.E. 2d 549, 554 (1959) interpreting an identical provision, and *State Highway Department* v. *Harbin*, 226 S.C. 585, 86 S.E. 2d 446 (1955). The court also noted that legislatures in other states have, by statute, enacted a more specific rule. Texas, Missouri and Florida have, for example, by statute defined an habitual violator in terms of the number of his offenses. North and South Carolina (as noted also in the March issue of the BULLETIN), following adverse court rulings, have established legislative point systems for guidance in determining the status of a licensee as an habitual violator.

This court also upheld the use of driver license provision convictions in determining when a driver is in fact an habitual violator. This holding was based in part on the wording of Minn. St. 171.16 which requires courts to forward reports of convictions of "any law of this state regulating the operation of motor vehicles on streets or highways,"—except parking violations. This is in line with a recent decision of the Supreme Court of Washington, *State ex rel. Ralston* v. *Department of Licenses*, 60 Wash. 2d 535, 374 P. 2d 575, which permitted the director there to consider reports of convictions of municipal ordinances and use them as a basis for ordering suspension.

Information for the above case was provided by G. A. Hatfield, Drivers License Director, Minnesota Department of Highways.

Safety Glass

A declaratory judgment action decision, April 30, 1963, in the Law and Equity Court of the City of Richmond, Virginia, although not a ruling case, may be of interest to administrators. This case, instituted by Windshield Glass Distributors, Inc., against the Virginia Superintendent of State Police, presented two questions: (1) does tempered glass qualify as a safety glass under Virginia Code Section 46.1-293 prior to its amendment in 1960; and (2) is the 1960 amendment an unconstitutional delegation of legislative authority to nongovernmental organizations, in this case, the American Standards Association.

After discussing at length the statutory authority involved and the qualities of both tempered glass and laminated glass the court concluded that tempered glass meets the statutory requirement of Sec. 46.1-293, both before and after the 1960 amendment thereto, and that the 1960 amendment to such section is not unconstitutional. In reaching this decision as to the constitutional question, in the absence of Virginia law on the subject, the court relied upon *Union Bridge Co.* v. *U. S.*, 204 U. S. 364, 51 L.Ed. 523, a landmark case. See also, *St. Louis, etc., Ry.* v. *Taylor*, 210 U. S. 251, 52 L.Ed. 1061.

In reference to the American Standards Safety Code, the court said the following:

> In December, 1935, a tentative draft of a safety code purporting to set forth the specifications and methods of testing for safety glass as used for all purposes, including windshields and windows of all types of motor vehicles, motorboats and aircraft was prepared by a subcommittee of the American Standards Association. This work was sponsored by the National Bureau of Standards and the National Bureau of Casualty and Surety Underwriters and was approved by the American Standards Association. The latter group was at that time and is at present composed of representatives from all of the interested organizations concerned with safety development over the country at large, including various testing laboratories as well as governmental agencies. This safety code was formally approved in 1938 and as revised in 1950 has substantially the same specifications and testing standards as when originally adopted. This code contains the "standards and specifications" of American Standards Association, which are referred to in the 1960 Amendment to 46.1-293. This code differentiates between windshields and other windows in motor vehicles and approves only laminated glass for the former, but tempered glass for all others. With this single exception it accepts tempered glass as safety glass for all other motor vehicle glazing purposes. This separation of functions

MOTOR VEHICLE LAW REVIEW

In this issue of the Bulletin, Joseph P. Hennessee, Association Counsel, comments adversely on a "point system" decision from Kentucky and contrasts early land-mark decisions which upheld Kentucky's administrative Point System and voided a comparable point system in South Carolina.

Point System Suspension Voided

Kentucky's Administrative Point System for Driver Improvement, based upon KRS 186.570, was upheld by the Kentucky Court of Appeals in a landmark case in 1957. *Sturgill, Acting Commissioner of Public Safety* v. *Beard*, 303 S.W. 2d 908.

Doubts as to the validity of driver license suspensions—under Kentucky's point system, have been raised by the Kentucky Court of Appeals in another case, *Kentucky Department of Public Safety* v. *Glasscock*, decided on October 28, 1966, which affirmed a decision of the Jefferson Quarterly Court that voided a suspension under this self-same point system.

Under facts of the case, as reported by the Court, on May 20, 1965, the Department of Public Safety suspended Glasscock's license on the basis of his having accumulated twelve "points" within three years (KRS 186.570 (d) and PSfty regulations DI-5-1, DI-9, and DI-10). On June 14, 1965, Appellee Glasscock advised the Department pursuant to KRS 186.580 (2), Kentucky's Appeal statute, that he was "aggravated" by the suspension but did not advise as to the grounds for his grievance. On June 16 he petitioned for relief in the Jefferson Quarterly Court from the suspension and this relief was granted and the Department's order of suspension was set aside on grounds unspecified in this opinion.

The Department appealed, first, ostensibly to the Jefferson Circuit Court, which apparently affirmed the Quarterly Court order setting the suspension order aside. Upon appeal to the Court of Appeals the Department argued (1) that the judgment setting aside the suspension was void because the court lacked jurisdiction, (2) the proceedings were a void collateral attack upon another court's judgment, and (3) the scope of judicial review was exceeded.

The Department's first contention was that the Jefferson Quarterly Court acquired no jurisdiction because the Appellee was untimely in prosecuting his appeal there. This contention was based on the language of KRS 186.580 (2), which directs that the appeal to the Quarterly Court be filed "(i)n not less than fifteen nor more than thirty days . . ." The difficulty is that the statute is vague as in fixing the event from which the computation of time is to be made. The Department's position is that the computation is to be made not less than fifteen nor more than thirty days after the licensee reports his grievance to the Department; Glasscock's, that it means not less than fifteen nor more than thirty days after the Department's order of suspension. This Court agreed that the appeal was timely in that the "not less than fifteen, nor more than thirty days" dated from the date of the suspension, and held that failure of appellee to state his grounds for grievance was not fatal since this requirement is merely directive and not mandatory.

As to the second position advanced by the Department, a point relied upon by appellee (and apparently accepted by the Quarterly Court), was that the third violation for which points were assessed was not based upon a conviction by any court (although a fine was paid) although he availed himself of provisions of a city ordinance which permitted remittance of a prescribed fine and appointment of an attorney-in-fact to enter appellee's appearance and plea of guilty.

Appellee's position was based on language in *Sturgill* v. *Beard*, 303 S.W. 2d 908 (Ky. 1957) supra to the effect that a license may not be suspended (under the point system) except for "points" assessed pursuant to *convictions* of certain named moving traffic violations.

On this point the Court said it could concede, without deciding, that for purposes of this opinion, there was no "conviction" of appellee incident to his payment of a fine at the Louisville traffic bureau, but this concession would not be dispositive as, in the opinion of the Court, a "conviction" is not required as a condition precedent to the assessment of points. This is based on the Department's regulation PSfty-DI-4, which specifically provides that use of the "convenience" fine-paying procedure, as used here, was to be regarded as a "conviction" insofar as it relates to whether the operator may be considered to be a "reckless" one; and because the relevant statute (KRS 186.570) does not make the operator's "conviction" a condition precedent to Departmental action, but does specifically provided that the license may be suspended" . . . with or without a hearing, *and with or without receiving a record of conviction of that person of a crime*, whenever the Department had reason to believe: . . . (d) That person is an habitually reckless or negligent driver of a motor vehicle or has committed a serious violation of the motor vehicle laws (emphasis supplied)". In the view of this Court, the use in *Beard* of the term "conviction" was an inadvertence and a dictum, and a "conviction" is not required. This apparently upheld the Department's contention that the proceedings below constituted an indirect attack on the police court judgment under which appellee waived appearance and paid a fine.

Up to this point the Court, while liberally construing the appeals provisions (KRS 186.580 (2), had done no violence to the Department's position. Through the second point, the Court seemed headed toward a reversal of the lower court and a confirmation of the Department's suspension order. Then without other explanation the Court said that the judgments of the Quarterly Court and of the Circuit Court recite that evidence was heard. "The evidence is not in the record before us. We must assume, therefore, that the evidence heard was sufficient to sustain the judgments of the Courts."

In affirming the judgments setting aside the suspension order the Court said "What we have said disposes of appellant's contention that the proceedings constituted an indirect attack on the police court judgment . . . , as well as the claim that the scope of judicial review was misconceived. The basic scope of the judicial review is concerned with the question of arbitrariness . . ."

If the basic scope of judicial review of departmental suspension orders comes down to a question of arbitrariness, as it may do, and as it does in the instant

decision, it is difficult to see how this Court could decide that the Department's suspension order was arbirary from a record of two judgments which contained no evidence and no apparent allegation of evidence or arbitrariness. The apparent effect of this decision is to require that a departmental hearing be afforded before suspension under the point system in order to avoid reversal on the grounds of arbitrary action by the Department.

Kentucky's point system was created on December 20, 1956, by a series of three administrative regulations, PSfty DI-1, DI-2, and DI-3, which (1) established a point system for driver improvement, (2) set out a schedule of points, and (3) provided a mandatory suspension upon an accumulation of 12 points within a three year period.

Suspension under this point system was first upheld in *Sturgill, Acting Commissioner of Public Safety* v. *Beard*, 303 S.W. 2d 908 (Ky. 1957). A review of that decision follows.

Beard's license was suspended under the point system. In seeking a return of his license Beard contended that (1) KRS 186.570 upon which the point system regulations were based, was an unconstitutional delegation of legislative power without any criteria or standards for an administrative agency to follow; (2) the point system, as applied to him in the suspension of his license violated the due process provisions of the Fourteenth Amendment to the Constitution of the United States; and (3) action in suspending his license based upon violations occurring prior to the effective date of the regulations establishing the point system was void as an *ex post facto* application of the law.

In upholding this suspension and the point system on which it was based the Kentucky Court of Appeals rejected the contention that KRS. 186.570 was unconsitutional as a delegation of legislative powers without providing any criteria or standards. In holding that there was no violation of due process in the suspension of Beard's license under the point system the court said it was too late to contend, as was done here, that one had a natural right to operate a motor vehicle because it is a privilege granted by a license of the state, subject to reasonable regulation by the state in the exercise of its police powers, and when the conditions imposed by the license are violated (as here), the suspension of the license is not a denial of "due process".

Beard's claim that the regulation had been used retroactively against him was given short shrift. This claim evaporates, the Court said, when the provisions of KRS 186.570, enacted in 1936, are applied to the facts. It is obvious that there was no ex post facto application of the law and the mere fact that the Department used the point system in making its determination to suspend did not make the application of the regulation retroactive. The Court did imply, however, that application of the regulations so as to assign points to violations occurring prior to the 1936 enactment of KRS 186.570 might constitute a retroactive or *ex post facto* application of this statute.

By way of contrast, the opinion of the South Carolina Court in *South Carolina State Highway Department* v. *Harbin*, 226 S.C. 585, 86 S.E. 2d 466 (1955), should be noted.

This case, like the *Beard* case in Kentucky, turned initially on whether the Department had any legal authority to promulgate a point system.

On November 24, 1953, the South Carolina State Highway Department, relying upon the authority contained in Section 46-172 of the 1952 Code, established a point system by administrative rule. This section provided that "For cause satisfactory to the Department it may suspend, cancel or revoke the driver's license of any person for a period of not more than one year."

Following issuance of this order Harbin accumulated a total of 12 points. After a personal interview (hearing), as provided in the point system order, Harbin's license was suspended for five months. Upon his petition for a court review of this suspension the trial court held that the Department was without authority to put a point system into effect and revoked its action in suspending Harbin's license.

Upon appeal to the South Carolina Supreme Court the Department conceded that it was not "expressly" empowered to adopt a point system but contended that the power to do so was contained in the broad powers to refuse, suspend or revoke a license contained in Section 46-172. This, the Department said, gave it authority to set up a point system which embodied reasonable criteria to be used in the exercise of its discretionary power, and that a point system is in accord with the legislative policy expressed in that section.

Harbin, on the other hand, contended among other things that 46-172 fixed no standards and laid down no intelligible guides to which the Department must conform but left the right to revoke or suspend in the unrestricted and uncontrolled discretion of the Department, and that this rendered the section void as an unconstitutional delegation of legislative authority.

In reaching a decision the Court noted that it was unnecessary to go beyond the basic issue of whether the power granted in 46-172 was unconstitutional on the grounds that suspensions are left to the absolute, unregulated and undefined discretion of the Department.

It is accepted, the Court said, that although a legislature cannot delegate its legislative power it can authorize an administrative agency to fill in details by prescribing rules and regulations. "It is necessary, however, that the law declare a legislative policy, establish primary standards for carrying it out, or lay down an intelligible principle to which the administrative body must conform, with a proper regard for the public interest."

When the authority of the State Highway Department to suspend or revoke a license for cause which it deems satisfactory is considered in the light of the principles enunciated above, the Court said, such provisions must be held invalid as an unconstitutional delegation of legislative powers. Thus, having held that the statute relied on to support the point system was unconsitutional it followed, and the Court so held, that the Department was "without authority" to establish a point system and such a system was without force or effect.

Left unsettled were the questions as to "reasonableness" of the South Carolina system, and whether suspensions under such system would be violative of due process.

1967 Program

Continued from Page 7

In addition to the specific programs outlined, much staff time and effort will be devoted to intensified work in keeping informed of international, federal and jurisdiction developments, and increased service to members through visits by regional representatives and staff specialists, development of legislative guidelines, participation in in-service training, and correspondence.

CHAPTER EIGHT

A LEGAL STUDY OF POINT SYSTEMS

By JOSEPH P. HENNESSEE
Assistant Director, Institute of Government

INTRODUCTION

As was to be expected of any new system, especially a system which affects upwards of half the driving populations of the United States and Canada, public reaction to point systems has been widespread and varied. In general it may be said that the reaction of the public has been favorable; the reaction of those whose licenses have been affected by a point system, something less than favorable.[1] There is nothing to indicate, however, that this reaction is essentially different from the reaction to license sanctions applied under any other system.

Significant of the public and legal acceptance of the theory and application of point systems is the paucity of cases reaching the appellate courts in which point systems have been challenged on legal grounds. This is not to say that there is no case law applicable to point systems other than that found in cases in which point systems have been challenged. That would be an implication that point systems are to be gauged and judged by a body of law peculiar to point systems. That is not the case. In fact, point systems are subject to the same legal rules and principles that govern other systems of license suspensions and revocations. This fact is borne out in a study of the two available point system cases.[2] We can go further and say that there exists no separate body of legal precepts and principles applicable peculiarly to drivers license suspensions. Rather, all systems of license suspensions are governed by general principles of constitutional law and statutory construction. It is the purpose of this study to examine these general principles of law, compare their application in

applicable cases, and measure existing point systems against them.

BASIS FOR REGULATION

It no longer permits of doubt that the legislature in the exercise of its police powers may regulate and control drivers through licensing procedures. This premise has been upheld in the courts so many times that it no longer requires citation of legal authority.

POLICE POWERS

What do we mean by "police powers"? It is generally recognized that it is impossible to give an exact definition of the term. Many attempts at definition, however, have been made. Blackstone defined it as "the due regulation and domestic order of the kingdom, whereby the individual of the states, like members of a well governed family, are bound to conform their general behavior to the rules of propriety, good neighborhood, good manners, and to be decent, industrious and inoffensive in their respective stations."[3]

It has been said that the police power is merely another name for the authority which every sovereignty possesses to pass all laws for the internal regulation and government of the state, and that it embraces and comprises all that portion of the sovereignty of the states not surrendered by the terms of the Federal Constitution to the Federal Government.[5] Others have said that it is the inherent and plenary power in a state over persons and property which enables the people to prohibit all things thought to be harmful to the comfort, safety, health and welfare of society.[6] It has been broadly defined by the United States Supreme Court as "that power, inherent in the state, whereby it may enact and enforce all laws for the protection, maintenance or advancement of the health, safety, morals, comfort, quiet, convenience, welfare, and prosperity of the people."[7]

4. *Mutual Loan Company v. Martell*, 222 U.S. 225, 32 S. Ct. 74, 56 L. Ed. 175, Ann. Cas. 1913B, 520 (1915).

5. *Slaughter House Cases*, 16 Wall. (U. S.) 36, 21 L. Ed. 394 (1873).

6. *Drysdale v. Prudden*, 195 N. C. 722, 143 S. E. 530 (1928).

7. *C. B. & Q. R. R. v. State of Illinois*, 200 U. S. 561, 26 S. Ct. 341, 50 L. Ed. 596 (1906).

It is not to be supposed from the foregoing that the police power is unlimited. Speaking of this power, the United States Supreme Court has said that it can be used to interfere with the conduct of individuals and the use of their property only, in-so-far as may be required to effect the peace, good order, morals and health of the community.[8] Expressed another way, the Supreme Court has said that before the power may be invoked it must be made to appear that the interest of the public in general as distinguished from a particular class or group requires such interference, and that the means chosen must be reasonably necessary to accomplish the desired purpose, and not be unduly oppressive upon individuals.[9] These are affirmations of the guarantees contained in the Fourteenth Amendment that no state may make or enforce any laws which will "deny to any person within its jurisdiction the equal protection of the laws" nor shall any state "deprive any person of life, liberty or property without due process of law." For example, the Court has pointed out that the Fourteenth Amendment requires that governmental regulations be accomplished by methods consistent with due process and that the due process clause is a limitation upon an improper exercise of the police power by the states in that it prevents an arbitrary or unreasonable exercise of the power either through laws or regulations.[10] In considering the relationship between the equal protection clause of the Fourteenth Amendment and the police power of the states, it is well settled that the police power is subordinate to the constitutional guarantee of equal privilege and that any attempted exercise of the police power which results in a denial of the equal protection of the law is invalid.[11]

Another limitation upon the exercise of the police power is the prohibition, contained in Section 10 (1), Article I, of the Constitution of the United States, against the passage of any *ex post facto* laws.

Summarizing, we can say that the legislature, in the exercise of its police powers, may properly regulate the conduct of individuals and the use of their property but that the methods chosen must have some reasonable relationship to the object sought to

be obtained, be consistent with due process, apply in a like manner to all persons similarly situated, and be prospective rather than retroactive in their application and effect.

DUE PROCESS

Writers on the subject state almost without exception that a license to operate a motor vehicle is a "privilege" and not a "property right" and that being a "privilege" it is subject to regulation under the police powers of the states. This has been accepted as the weight of authority in the American court jurisdictions. This distinction was meaningful because it assumed that the due process clause of the federal constitution did not apply unless a license to drive was a "property right." This distinction has lost much of its meaningfulness in view of a holding in the federal courts that whether you call it a "privilege" or a "property right," the freedom to make use of one's property, in this instance a motor vehicle, as a means of getting about from place to place, whether in pursuit of business or pleasure, is a "liberty," which, under the Fourteenth Amendment cannot be curtailed or denied by a state without due process of law.[12]

This line of thought is being adopted by state courts as well. The question of whether a license to operate a motor vehicle was a property right within the meaning of the Fourteenth Amendment was thought to have been put to rest, in Rhode Island, at least, in the classic case of *La Plante v. State Board of Public Roads*, decided in 1926.[13] At that time the court held that a "license" to operate an automobile, being a permit to do that which would otherwise be unlawful, was merely a "privilege" and not a "property right" within the meaning of the "due process" clauses of the United States and Rhode Island Constitutions, and that provisions for revocation of such license by the State Board of Public Roads without a hearing did not operate so as to deprive the driver of his property without due process

of law. In *Berberian v. Lussier*,[14] decided this year, the Rhode Island Court has retreated from this position with these words:[15]

> We have, however, come to the conclusion that we can no longer completely subscribe to the proposition for which the *La Plante* case stands. The use of the automobile as a necessary adjunct to the earning of a livinghood in modern life requires us in the interest of realism to conclude that the right to use an automobile on the public highways partakes of the nature of a *liberty* (emphasis supplied) within the meaning of the constitutional guarantees of which the citizen may not be deprived without due process of law. In *State v. Dalton*, 22 R. I. 77, at page 86, 46 A. 234, at page 237, 47 L. R. A. 775, this court pointed out that the liberty which is guaranteed to every person by both our state and federal constitution includes the right to be free from unreasonable interference in the pursuit of a livelihood. In the *Dalton* case at page 86, of 22 R. I., at page 237 of 46 A., quoting from *People v. Gillison*, 109 N.Y. 389, at 399, 17 N.E. 343, at page 345, we stated: "Liberty, in its broad sense, as understood in this country, means the right, not only of freedom from servitude, imprisonment, or restraint, but the right to use his faculties in all lawful ways, to live and work where he will, to earn his livelihood in any lawful calling, and to pursue any lawful trade or avocation." The Court of Appeals of Louisiana in the case of *Hughes v. Department of Public Safety*, 79 So. 2d 129, recognized that although an operator's license was not a property right it was a right which was protected by the due process clause. In that case the court stated at page 130: "A license to operate a vehicle upon the highways of the state is a privilege and not a property right, although a state may not deny this privilege to any of its citizens arbitrarily or capriciously." The proposition that a license to operate motor vehicles and to use them on the public highways is something more than a mere privilege was also recognized in *Thompson v. Smith*, 155 Va. 367, 154 S. E. 539, 71 A. L. R. 604, and in *Escobedo v. State Department of Motor Vehicles*, 35 Cal. 2d 870, 222 P. 2d 1.

But, whatever may be its nature, the court concluded, the right to use the public highways for travel by motor vehicles is one which properly can be regulated by the legislature in the valid exercise of the police powers of the state.

North Carolina, in 1948, joined the list of states in which it is

recognized that a license is something more than a mere privilege, with a holding by the Supreme Court that "a license to operate a motor vehicle is a privilege in the nature of a right of which the license may not be deprived save in the manner and upon the conditions prescribed by statute."[16] This view was expanded in 1954 when the court said "the right to operate a motor vehicle on the highways by a licensed operator is granted by the state, and one should not be deprived of this right except as authorized by statute, in accordance with prescribed procedure, and in accord with the established rules of law."[17]

Implicit in these holdings is a warning that while operation of a motor vehicle upon the public highways and the licensing of drivers may properly be regulated by the legislatures under the police powers, the manner in which the use of the highways may be restrained or licenses refused or withdrawn must be consistent with the principles of due process.

What is meant by "due process"? As a practical matter due process is a protection against arbitrary and capricious actions affecting an individual's life, liberty and property. In a legal sense the essential ingredients of due process of law are notice and an opportunity to be heard and to defend in an orderly proceeding adapted to the nature of the case.[18] Daniel Webster said that by due process of law is meant "a law that hears before it condemns; which proceeds upon inquiry, and renders judgment only after trial."[19] It generally implies and includes regular allegations and opportunity for one to answer to the charges, to be confronted by the witnesses against him, to be able to offer testimony in his own behalf, and a trial according to some settled course of judicial proceedings.[20]

What may constitute due process in one situation may not constitute due process in another. For example, in the field of privileges, such as driver licenses, the legislature may provide a mandatory revocation upon conviction for specified offenses without making any provision for a hearing. In such a case, however,

convictions must be consistent with due process. When, however, an administrative agency has been authorized to suspend a license for specified reasons, due process requires that a licensee be given an opportunity for an administrative hearing upon the matter together with the right to have a judicial review of any administrative determination. The concept of due process does not, however, require that a hearing be granted prior to the taking of official action in exercise of the police power.[21]

Thus far we have considered in a general manner only, what constitutes due process. Moving from the general to the specific, the Pennsylvania Court in construing applicable provisions of the Pennsylvania statutes for the enforcement of regulations governing the operation of motor vehicles through revocation and suspension said:

> (but) If the constitutional provisions of due process were here applicable, they would be fully satisfied by the procedural steps specified in §§ 615 and 616 of the Vehicle Code. As we have seen, they require a hearing before the Secretary of Revenue or his representative. Suspension of the licensee's operating privilege is authorized only when the secretary finds upon sufficient evidence that the offenses enumerated have been committed. Section 616 allows an appeal to the Court of Common Pleas wherein the licensee resides. The licensee is given an opportunity to be heard and to produce witnesses in his behalf. Here the Secretary of Revenue fulfilled the statutory mandate by holding the hearing and by finding that the appellee had violated the motor vehicle laws of this Commonwealth. The appellee then availed himself of his right to be heard anew by the Common Pleas Court. This system sets up every requirement of due process of law, and an operator whose license has been revoked or suspended cannot complain that he has been arbitrarily deprived of the enjoyment of the privilege.[22]

The Idaho Supreme Court, on the other hand, has held that a statute which attempted to authorize the Commissioner to suspend the license of an operator without preliminary hearing, if the operator had been involved in an accident resulting in death, personal injury or serious property damage, irrespective of negli-

gence or responsibility, and without provision for review of the Commissioner's action in a court of competent jurisdiction, was unconstitutional as a taking of property without due process.[23]

Summarizing, it is still the numerical weight of authority in American jurisdictions that a license to drive is a privilege and not a property right, and therefore without the constitutional guarantees of due process. However, there is a discernible tendency among state courts to hold to the federal view that a license to drive is something more than a privilege, and that the due process provisions of the federal constitution do apply.

EX POST FACTO LAWS PROHIBITED

Section 10 (1), Article I, of the Constitution contains a prohibition against passage or enforcement of any *ex post facto* law by any state. Authorities differ as to whether the prohibition against *ex post facto* laws applies to license suspensions based on convictions antedating the statutory authority to suspend for specified violations. Illinois, for example, held that an act authorizing the Secretary of State to revoke the driver's license of anyone convicted of driving while intoxicated did not apply to offenses committed before the act became effective.[24] California, on the other hand, has held that Section 309 of the Vehicle Code, which provided that the probationer's prior convictions should be considered as convictions for the purposes of revocation and suspension, was not invalid as an *ex post facto* law as applied to a motorist who, before that section was enacted, was twice convicted of drunken driving.[25]

A slightly different question was presented in a recent Kentucky decision. There the question was whether a suspension under the Kentucky point system based in part on violations occurring prior to the effective date of the point system regulations was an *ex post facto* or retroactive application of the regulations. In reaching a decision the court said that the claim that there was an *ex post facto* application evaporated when the provisions of KRS 186.570 were applied to the case. This statute, enacted in 1936, upon which the point system regulations were grounded, authorized the Department to suspend summarily the

license of any person whenever the Department had reason to believe that a person is an habitually reckless or negligent driver or has committed a serious violation of the motor vehicle laws. The mere fact that the Department used a point system in making its determination that he was an habitually reckless driver did not make the application of the regulation retroactive.[26] The careful manner in which the Kentucky Court limited its answer suggests that had such violations occurred prior to the effective date of the foundation statute a different answer would have been forthcoming.

SEPARATION OF POWERS

Both the federal and the various state governments operate under a separation of powers doctrine. Under this system specific powers are delegated to the legislative, executive and judicial branches of the government. For example, the sole authority to declare what the law shall be, subject to constitutional limitations, is vested in the legislative branch of the government;[27] the power to administer and enforce the law, in the executive branch;[28] and the judicial powers in the courts.[29]

American courts universally agree that no part of the legislative power may be delegated to a non-legislative body. There is no universality of agreement, however, as to what constitutes a delegation of legislative authority. Generally speaking, a law which confers discretion on executive officers without establishing any standards for guidance is a delegation of legislative powers and therefore unconstitutional. Where the discretion, however, relates to a police regulation for the protection of public morals, welfare, and safety, and it is impossible or impracticable to provide such standards, and to do so would defeat the legislative object, legislation conferring such jurisdiction may be upheld without such restrictions or limitations.[30] The United States Supreme Court has laid down this rule. The legislature must declare the policy of the law and fix the legal principles which are to control in given cases; but an administrative body may be invested with the power to ascertain the facts and conditions to

30. *Benjamin v. City of Columbus*, 148 N.E. 2d 695 (Ohio, 1958).

which the policy and conditions apply."[31] In the final analysis, what constitutes an unconstitutional delegation of legislative powers must depend upon the individual facts in each situation.

Thompson v. Smith,[32] decided in Virginia in 1930, is perhaps the leading state case relative to an unconstitutional delegation of legislative authority in the drivers license field. A Virginia ordinance provided that the chief of police was authorized and directed to revoke the permit of any driver, who, in his opinion, became unfit to drive an automobile on the streets of the city. After Thompson was convicted of two speeding charges within one year, Smith, the police chief, purported to suspend Thompson's license under the authority above. In an action for the return of his license, Thompson alleged that the chief was without authority to revoke his permit because "(2) The provisions authorizing the chief of police to revoke the permit of any driver, *who, in his opinion*, becomes unfit to drive an automobile on the streets of the city is void because it is a delegation of legislative powers to an administrative agency in that it authorizes the chief of police to revoke a permit whenever *in his opinion* the holder thereof has done or omitted to do something the doing or the omission of which the chief thinks renders the holder unfit to drive an automobile on the streets, without prescribing any uniform rule, applicable to all persons alike, as to what constitutes unfitness to drive an automobile on the streets of the city, or laying down any rule for the guidance and control of the chief of police in determining what constitutes unfitness to drive an automobile on the streets of the city."

In holding that the lower court was in error in dismissing Thompson's action for the return of his license, the Supreme Court of Virginia said that it was a fundamental principle of our system of government that "the rights of men are to be determined by the law itself, and not by the lot or leave of administrative officers or bureaus. This principle," the court stated, "ought not to be surrendered for convenience or in effect nullified for the sake of expediency. It is the prerogative and function of the legislative branch of the government, whether state or municipal, to determine and declare what the law shall be, and the legis-

31. *Mutual Film Corp. v. Ohio Industrial Comm.*, 236 U.S. 230, 35 S. Ct. 387, 59 L. Ed. 552, Ann. Cas. 1916C, 296 (1915).

32. 155 Va. 367, 154 S.E. 579 (1930).

lative branch of the government may not divest itself of this function, or delegate it to executive officers."

This does not mean, the court explained, that no discretion can be left to administrative officers in administering the law.

> Government could not be efficiently carried on if something could not be left to the judgment and discretion of administrative officers to accomplish in detail what is required by law in general terms. Without this power legislation would become either oppressive or inefficient. There would be confusion in the laws, and, in an effort to detail and particularize the law would miss sufficiency both in provisions and detail. This is particularly true where the discretion to be exercised by administrative officers relates to police regulations designed to protect the public morals, health, safety, and general welfare. A city may, in the execution of its police powers invest its administrative and executive officers with a reasonable discretion in the performance of duties devolved upon them to the end, whenever it is necessary for the safety and welfare of the public. *But, it should be added, the reasonable discretion which may be vested in its administrative officers is limited to a discretion in its essence ministerial and not legislative though it may be such as may be exercised by the legislature.*
>
> In principle, legislation and administration are quite distinct powers; but in practical application the line which separates their exercise is not clearly marked or easily defined. However, in their definition in practical application, lies the difference between government by legislation and government by bureaucracy. . . .
>
> The decisions of the various courts and sometimes of the same court, are in conflict as to what constitutes a delegation of legislative powers. The majority of cases lay down the rule that statutes or ordinances vesting discretion in administrative officers and bureaus must lay down rules and tests to guide and control them in the exercise of the discretion granted in order to be valid; but several courts apply the rule with varying degrees of strictness. Other cases go so far in sustaining, especially in cases involving police regulations, grants of discretionary powers to administrative officers and bureaus without prescribing any definite rule or specified condition to which the officers must conform, as, in effect, to substitute for government by legislation government by administrative officers and bureaus. For a collection of cases on this subject, see note in 12 *A.L.R.*, page 1435 and *seq.*
>
> Where a statute or ordinance assumes to regulate the exercise of a common right, such as here involved, by requiring a permit for the exercise thereof, which is to be

granted or refused, and may be revoked, by an administrative officer in his discretion, the correct principles for determining whether it is void because it delegates legislative powers to the administrative officers are stated by the court in *Mutual Film Corporation v. Ohio Industrial Comm.*, 236 U.S. 239, 35 S.Ct. 387, 392, 59 L.Ed. 552, Ann. Cas. 1916C, 296,[33] in the following language: 'The legislature must declare the policy of the law and fix the legal principles which are to control in given cases; but an administrative body may be invested with the power to ascertain the facts and conditions to which the policy and principles apply.'

The Court then looked to the terms of the ordinance, and measured them against the foregoing principles and stated:

> . . . but when we come to examine the provisions with reference to revocation of permits by the chief of police, the policy of the law and the legal principles which are to control the action of the chief of police are not determined or determinable from the terms of the ordinance. . . It fails to state to what standard of conduct the holder of a permit must conform to be immune from the official ax.

In 1956[34], the Wyoming Courts had occasion to pass upon a statute which provided: "Upon the termination of such investigation, the person or persons holding such investigation shall prepare findings based upon the evidence received and considered. The Department upon review of such findings may dismiss the proceedings or it may suspend or revoke the license of such person . . . ." Plaintiff contended that this provided for revocation or suspension of license upon grounds other than the wrongdoing, fault, negligence, crime, misdemeanor, incompetence, mental or physical infirmities or disabilities of the driver, or stated another way, that the statute provided no standards for the licensee, the violation of which would be cause for revocation.

The court stated that since this statute was unique among the 48 states that there was no value in reviewing decisions or statutes from other states. Then after citation of cases, it quoted with approval the language of *State v. Grimshaw*, 49 Wyo. 192, 53 P.2d 13, 16, that "if the legislature leaves to administrative officers the determination of what the law shall be; or to determine what acts are necessary to effectuate the law, such delegation of authority is void." The court held this to be the law in the instant case and held that the statute was an unconstitutional delegation of legislative power.

---

33. See note 31, supra.

34. *Eastwood v. Highway Department*,—Wyo.—, 301 P. 2d 318 (1956).

Statutes are often attacked on the grounds that they are too vague and indefinite to constitute a sufficient definition of criminal conduct. In a case decided this year[35] the New York courts held that a provision relating to operating motor vehicles "at such speed as to endanger life, limb or property of any person or at a rate of speed greater than will permit bringing vehicle to a stop without injury to another or his property" was too vague and indefinite and did not contain sufficient standards by which a driver's conduct could be tested and therefore the statute was ineffective as basis for revocation of a driver's license. By way of contrast, the Oklahoma court had no difficulty in upholding a statute which prohibited operation of a motor vehicle at a speed "in excess of maximum safe and prudent speed as determined and posted by the State Highway Department."[36]

What constitutes an habitual violator has come in for some review by the courts. In *Lamb v. Rubin*,[37] decided in 1957, the Virginia court upheld a determination that a driver was an habitually reckless and negligent driver where the record showed nine convictions in approximately six years. In another Virginia case,[38] a record of five convictions from July 19, 1950, to May 6, 1955, plus three convictions from February 27, 1956 to June 1, 1956, was held to be sufficient to support a finding by the Commissioner that licensee was habitually reckless and negligent. New York courts have upheld a statute permitting the Commissioner to suspend a license for "habitual" or "persistent" violation of traffic laws and ordinances against a contention that the statute was unconstitutional on the grounds that legislative functions had been delegated to an administrative body without providing any criteria or standards defining the words "habitual" or "persistent."[39]

A Virginia statute[40] provided "Upon any reasonable ground appearing in the records of the division, the Commissioner may, when he deems it necessary for the safety of the public on the highways of this state, and after notice and hearing as herein-

before provided, suspend or revoke for a period not to exceed five years, . . . the . . . license of any person who is a violator of the provisions of the Motor Vehicle Code." In upholding this section against an attack on the grounds that the section constituted an unconstitutional delegation of legislative power without providing any standards or controls to guide the actions of the Commissioner, the Virginia court pointed out that the section contained the following controls and limitations of the Commissioner's actions:[41]

(1) The Commissioner must deem the suspension or revocation "necessary for the safety of the public on the highways of this state."

(2) The ground upon which the conclusion of the Commissioner is based—that the safety of the public will be jeopardized unless the license is suspended—must appear "In the records of the Division" of Motor Vehicles.

(3) The grounds for the suspension must be "reasonable" both as to necessity therefor and duration thereof.

(4) The Commissioner must grant a hearing and give notice of the time and place. The right of review by a circuit court is provided for any person deeming himself aggrieved thereby.

(5) An appeal to the Supreme Court from the final judgment of the reviewing court is granted as a matter of right.

Here, the court said, "Under the general terms employed in the statute, it is clear that the cardinal principle or standard by which the exercise of the power conferred on the Commissioner must be guided and controlled is that the revocation of the operator's license . . . must be necessary for the safety of the public on the highways of this state."

Summarizing, we can say that under the doctrine of separation of powers the legislature may not divest itself of its duty to say what the law shall be, although it may, within prescribed limits, permit a non-legislative body to promulgate rules and regulations for the enforcement of the law. This rule, stated in the *Mutual Film* case[42] is clear enough, but the degree of strictness with which the rule will be applied by the various courts,

and within a particular court, is subject to conjecture.

STATUTORY CONSTRUCTION

It is a general rule of statutory construction that a statute is presumed to be valid and will not be overthrown as unconstitutional if it can be sustained on any reasonable basis, and the burden is on the party attacking the constitutionality of a statute to establish the invalidating facts and its invalidity must be clearly shown.[43] This rule is limited, however, by another general rule that those sections of the constitution which provide for separation of the powers of the government, which constitute the keystone of our form of government, must be strictly construed. In this line, the Indiana Court has declared that "reasonable standards" must be imposed whenever the legislature delegates discretionary powers to an administrative officer or body.[44]

The Ohio Court states the rule to be that statutes must be read and interpreted in the light of those fundamental principles which protect a citizen in his private rights and guard him against arbitrary action of government.[45]

Generally speaking, the constitutional validity of a law is to be tested, not by what has been done under it, but by what may, by its authority be done.[46] But, like all legislation, statutes authorizing suspension and revocation of drivers must be interpreted in the light of their general purpose.[47]

Until a statute has been declared by a competent court to be unconstitutional, however, an administrative agency charged with the administration of the law is entitled to rely and act upon the statute as written and interpreted by the courts. In fact, in individual instances the statute may require that certain

action be taken under given circumstances. Thus, where the statutes provide for a mandatory revocation it is the duty of the administrative agency to perform the purely ministerial function of imposing the revocation. Likewise, when the statutes give the administrative agency discretionary authority to take specified action upon receipt of notice of conviction, for example, for specified offenses, it is authorized to give full faith and credit both to the statute and to the conviction report.[48]

It is a well recognized principle of statutory construction that a court will not pass on the constitutionality of a law unless the constitutional issues are clearly presented and not even then if the decision can be made to turn upon some other factor. Thus, in *Winch v. Register of Motor Vehicles*, 135 N.E. 2d 17 (Mass. 1956), the court refused to pass on the constitutionality of a statute which imposed penalties for points upon failure of appellant to show imminent danger of harm from the statute or that he had a substantial controversy with the administrator and without his first having exhausted his administrative remedies.

The existence of a statute over a long period of years gives no certain assurance of its validity[49] and repassage of a statute may not act to approve or validate rules and regulations promulgated under it prior to its re-passage.[50]

In conclusion, we can say that statutes will be construed in the light of their stated purposes and that they are presumed to be valid. This conclusion is limited by the general rule that the constitutional provisions calling for separation of powers will be strictly construed.

COURT DECISIONS

A careful study of reported cases discloses only two instances in which point systems have been considered by ruling appellate courts in the American jurisdictions.[51] A study of the Dominion

48. See *In re Wright*, 228 N. C. 301, 45 S.E. 2d 370 (1947) and *In re Wright* 228 N. C. 584, 46 S.E. 2d 696 (1948).

51. *South Carolina State Highway Department v. Harbin*, 226 S.C. 585, 86 S.E. 2d 466, (1955). *Sturgill, Acting Commissioner of Public Safety v. Beard*, 303 S.W. 2d 903 (1957).

Reports discloses no Canadian point system cases.

Of the two American cases, both concerned point systems created by administrative regulation without express legislative authority. No ruling cases have been found wherein the legality of statutory or permissive point systems have been considered. In the first of these, from South Carolina, the statute relied upon as authority for setting up the system was voided as an unconstitutional delegation of legislative powers. In the second, from Kentucky, the Kentucky Court of Appeals upheld the constitutionality of the statutory authority relied upon and the reasonableness of the system. Although reaching opposite conclusions, the cases are distinguishable on the basis of differences in the language of the statutory authority relied upon. Considering this difference in statutory phraseology, it is submitted that the decisions are not in conflict.

On November 24, 1953, the South Carolina State Highway Department, relying upon the authority contained in Section 46-172 of the 1952 Code,[52] established a point system by administrative rule.[53] This rule, among other things, recited that the

52 §46-172.—For cause satisfactory to the Department it may suspend, cancel or revoke the driver's license of any person for a period of not more than one year.

53. In order to do everything within reason to reduce traffic accidents the Department will commence immediately to charge each violation committed and reported to the Department against the record of each offending driver. Each violation will be graded as to seriousness in accordance with the following table which is based on violations involved in accidents during 1952.

Moving Violation	*Violation Points*

point system was created for the purpose of reducing traffic accidents, set forth a detailed schedule of points for violations and warnings, and provided that upon an accumulation of 10 points a driver was to be brought in for a personal interview by the highway patrol to determine if his license should be taken. A further violation, where a driver was permitted to keep his license, was deemed sufficient grounds for immediate suspension.

Following the issuance of this order Harbin accumulated a total of 12 points, 10 for speeding violations and 2 for a warning. Following notice to appear for an interview, as provided in the order, an interview, and a recommendation that a suspension issue, Harbin's license was suspended for a period of five months. Upon Harbin's petition for a court review of the Department's action in suspending his license the lower court held that the

---

Improper parking 2
Responsibility for accident involving personal injury and/or property damage in excess of $100 5
If while driving under the influence 10
Responsibility for accident involving no personal injury and property damage of $100 or less (or point violation value, whichever is higher) 2
All warnings and minor violations 2

When the total of violation points charged against a driver reaches a minimum of 10 the driver will be personally interviewed by a member of the Highway Patrol for the purposes of determining whether the offender's license to drive should be suspended or whether it appears from the circumstances that he should be allowed another chance. In cases where the driver is permitted to retain his license after the interview any additional violation committed by him will be deemed sufficient grounds for an immediate suspension of his license. The Department, of course, has no discretion where cases involve driving under the influence of intoxicants or narcotic drugs, reckless homicide, and two convictions for reckless driving. The suspension of drivers' licenses under these circumstances is required by law.

Highway Patrol personnel conducting the personal interview will approach the work in a spirit of helpfulness and with utmost courtesy. The primary purpose of the program is to make better and safer drivers, and not to suspend licenses except where other efforts in this direction have failed.

In order to give this program maximum effectiveness members of the highway patrol should exert every effort to encourage local enforcement officers to send to the Department copies of all violation warnings and summonses issued by them, and copies of reports of all accidents they investigate.

Department was without authority to put a point system into effect and revoked its action in suspending Harbin's license.

Upon appeal to the South Carolina Supreme Court the Department conceded that it was not "expressly" empowered to adopt a point system but contended that the power to do this was contained in the broad powers to refuse, suspend or revoke a license contained in Act number 603, April 4, 1930, 36 St. at Large, 1057, then codified in Chapter 2 of Title 46 of the 1952 Code as Section 46-172. This section read as follows:

> §46-172.—For cause satisfactory to the Department it may suspend, cancel or revoke the driver's license of any person for a period of not more than one year . . . .

This, the Department contended, gave it the authority to set up a point system which it said embodied reasonable criteria to be used in the exercise of its discretionary power, and that all of the violations mentioned therein have a direct bearing on highway safety, and that a point system is in accordance with the legislative policy expressed in the above section.

Harbin contended that Section 46-172 fixed no standards and laid down no intelligible guide to which the Department must conform but left the right to revoke or suspend in the unrestricted and uncontrolled discretion of the Department, and that this rendered the section void as an unconstitutional delegation of the legislative power. In addition he questioned the reasonableness of some of the points, asserting that some were contrary to legislative enactments, and pointed out that the system permitted a suspension solely upon warnings issued.

In reaching a decision the court said that it was unnecessary to go beyond the constitutional issue of whether the power granted in Section 46-172 was unconstitutional on the grounds that suspensions and revocations are left to the absolute, unregulated, and undefined discretion of the Department.

"It is accepted," the Court stated, "that while the legislature cannot delegate its legislative authority it can authorize an administrative body to fill in the details by prescribing rules and regulations for the complete operation and enforcement of a law within its expressed general purpose. It is necessary, however, that the law declare a legislative policy, establish primary standards for carrying it out, or lay down an intelligible principle to which the administrative body must conform, with a proper regard for the public interest."

Thus, the court held, when the authority of the State Highway Department to suspend or revoke a license for cause which it deems satisfactory is considered in the light of the above principle, such provisions must be held invalid as an unconstitutional delegation of legislative powers. It sets up no standards to guide the Department and contains no limitations. It is that which an act permits that determines the issue, not what action an administrative official may or may not take, and delegation of unrestricted discretion cannot be saved by any presumption that an officer will exercise sound judgment and good faith.[54]

Having concluded that Section 46-172 of the 1952 Code, the foundation stone for the establishment of the point system, was void as an unconstitutional delegation of legislative powers, it followed that the Department was "without authority" to establish a point system, and that such a system, therefore, was without force and effect. Left unsettled were the questions as to the "reasonableness" of the South Carolina system, and the question of whether suspensions based on "warnings" wholly or in part would be violative of the "due process" requirements of the federal constitution.

A point system was created in Kentucky on December 20, 1956, by a series of three administrative regulations.[55] In order,

54. The court, by way of dicta, acknowledged that a license to drive is a privilege and not a property right but stated that such privilege could not be taken away arbitrarily or capriciously.

PUBLIC SAFETY
DRIVER IMPROVEMENT

PSfty-DI-1
Establishment of Point System for Driver Improvement
Relates to KRS 186.570 (d)
Pursuant to the Authority of KRS 186.400.

To assist the Department of Public Safety in making a determination that a person is an habitually reckless or negligent driver of a motor vehicle for the purpose of denying, suspending, or revoking that person's license in accordance with KRS 186.570, a schedule of penalty points established by administrative regulations shall govern. Such schedule shall assign point value points for the different classifications of traffic violations and shall be assessed according to such schedule for all drivers. Information concerning convictions of traffic violations may be secured from any official source or records available to public or departmental inspection. Complete records of point system assessments shall be maintained in the Department of Public Safety.

these regulations (1) established a point system for driver improvement, (2) set out a schedule of points, and (3) provided that upon an accumulation of from 6 to 9 points within any three year period, a motorist was to be given a warning; for an accumulation of 12 points within a three year period, a mandatory six months suspension. Under this system one Beard's license was suspended for a period of six months. In reaching a decision as to the suspension of Beard's license the Department considered only one violation occurring following the adoption

Effective, (Emergency) 20 Dec. 1956.

PSfty-DI-3
Enforcement of the Point System For Convictions of Traffic Violations
Relates to KRS 186.570 (d)
Pursuant to Authority of KRS 186.400

(1) On the accumulation of six to nine points against any one driver within a three year period, the driver shall be apvised and cautioned regarding his point status and such other matters as the Commissioner of Public Safety deems necessary.

(2) On the accumulation of twelve scheduled points against any one driver within a three year period, it is mandatory that the Commissioner of Public Safety suspend the operator's license for a period of six months.

(3) Periods of suspension resulting from additional accumulation of points shall be governed by provisions of KRS 186.560.

Filed, 20 Dec. 1956

administration of
prescribe regula

f the point system. The other violations, for which points were ssigned, occurred prior to the adoption of a point system, but all within a three year period.

In seeking a return of his license Beard contended (1) that KRS 186.570[56] upon which the point system regulations were based, was an unconstitutional delegation of legislative power without any criteria or standards for an administrative agency to follow; (2) that the point system, as applied to him in the suspension of his license violated the due process provisions of the Fourteenth Amendment of the Constitution of the United States; and (3) that the action in suspending his license based on violations occurring prior to the effective date of the administrative regulations establishing the point system contravened Article I, Section 10, of the Constitution of the United States, Section 19 of the Constitution of the State of Kentucky, and KRS 446.080, which prohibit *ex post facto* laws and retroactive application of statutes.

In upholding the Kentucky point system, the Kentucky Court of Appeals rejected the contention that KRS 186.570 was unconstitutional as a delegation of legislative powers without providing any criteria or standards and held that the point system was constitutionally sound because it believed that the administration of traffic rules could be lawfully delegated to administrative officials.

In holding that there was no violation of due process in the suspension of Beard's license under the point system the court said that it was too late to contend that one had a natural right to operate a motor vehicle because it is now a privilege granted by a license of the state, subject to reasonable regulation by the

---

56. KRS 186.570.—Discretionary suspension or denial of license; surrender of certificates. (1) The Department or its agents designated in writing for that purpose may deny any person a license or may suspend the license of any person, or, in the case of a non-resident, withdraw the privilege of operating a motor vehicle in this state, with or without a hearing, and with or without receiving a record of conviction of that person, whenever the department has reason to believe that:

(d) that person is an habitually reckless or negligent driver of a motor vehicle or has committed a serious violation of the motor vehicle laws.

KRS 186.400.—Duties of Departments of Revenues and Public Saf administration of laws. (1) . . . The Department of Public Safety may prescribe regulations for the enforcement of KRS 186.400 to 186.640, . . .

state in the exercise of its police powers, and when the conditions imposed by the license are violated, the suspension of the privilege to operate a motor vehicle is not a denial of "due process."

Likewise the court gave short shrift to Beard's claim that the regulation had been applied retroactively by the Department in suspending his license. This claim, the court said, evaporates when the provisions of KRS 186.570 are applied to the case. the statute enacted in 1936, authorized the Department to suspend summarily the license of any person whenever the Department has "reason to believe" the person in question "is an habitually reckless or negligent driver of a motor vehicle or has committed a serious violation of the motor vehicle laws." Beard's license was suspended under this statute upon a determination by the Department that he was "an habitually reckless driver." The mere fact that the Department used the point system in making this determination did not make the application of the regulation retroactive as to Beard.

It is important to note that in both the South Carolina and the Kentucky cases the initial question confronting the court was "did the Department or Agency have any legal authority to promulgate a point system?" In the South Carolina case this was answered in the negative and the court did not progress to a consideration of any further questions. In the Kentucky case the Court held that there was sufficient statutory authority to support the establishment of a point system and proceeded to uphold the reasonableness of the point system and to rule that under the fact situation presented, there was no *ex post facto* application of the law.

CONCLUSIONS

In the field of legal precedents there is a danger in attempting to draw specific conclusions from generalities in the law and no attempt is here made to do so. Rather, some broad generalizations will be attempted from the application of specific principles of law. Such generalizations may or may not be applicable in a given jurisdiction. In fact, their application may hinge upon subtle fact variations and upon the skill or lack of skill with which a test case is prosecuted and defended. Almost certainly their application will depend upon the judicial climate. Whether or not such generalities may be valid may depend in some meas-

ure on the community of thought within a jurisdiction. In the final analysis, legal questions arising out of the establishment and application of a point system, like other legal questions, can only be answered by a competent court, and then the answer may not be final, for, powerful as the doctrine of *Stare Decisis*[57] may be, a change in personnel on the court, militant public thought, or changed conditions may result in a reversal of a prior decision by the same court. Thus the best that can be done is to draw from available decisions and conjecture as to what the courts of a given state, using accepted measuring standards and principles, will conclude when presented with a given factual situation. It is quite impossible to gauge adequately the imponderable intangibles such as factual differences, skill and persistence of an advocate, judicial climate, and force of community thought. Such generalities should, however, prove efficacious in acquainting Motor Vehicle Administrators with possible pitfalls in establishing a point system and in providing a measuring rod whereby existing systems may be gauged.

Specific principles of law against which our generalizations are drawn include:

(1) Operation of a motor vehicle upon the highways, including the licensing of drivers, is a proper subject for regulation and control by the legislature in the exercise of its police powers.

(2) Regulations under the police power must have some "reasonable" relationship to the object sought to be accomplished.

(3) The legislature, in the exercise of its police powers is limited by both the "equal protection of the laws" and the "due process" clauses of the federal constitution and by similar provisions of state constitutions.

(4) The federal constitution prohibits a state from passing any *ex post facto* laws.

(5) The legislative power is vested in the legislature and any attempt to delegate legislative power without standards for

---

57. Policy of courts to stand by precedent and not to disturb a settled point. *Neff v. George*, 364 Ill. 306, 4 N.E. 2d 388 (1936); Doctrine that when a court has once laid down a principle of law as applicable to a certain state of facts it will adhere to it and apply it to all future cases where facts are substantially identical, *Moore v. City of Albany*, 98 N. Y. 396 (1885).

guidance to a non-legislative body is void as an unconstitutional delegation of legislative power.

(6) There is a presumption that statutes are valid.

Measuring now, the factual situations presented in both the South Carolina and the Kentucky cases against the specific principles of law outlined above, the following generalities may be expressed:

(1) A legislature, in the exercise of its police powers, may regulate the operation of motor vehicles through licensing procedures and prescribe through statute the manner in which a license to drive may be granted, refused, or taken away. This being true, no serious legal obstacles stand in the way of the creation of a point system by statute. Such a system would be subject to the same legal rules and regulations as other statutory license regulations.

(2) Subject to the rule that the legislature must declare what the law shall be, although it may delegate to a non-legislative body the authority to promulgate rules and regulations for the administration of the law, a legislature may properly authorize an administrative agency to promulgate a point system for license suspensions together with a schedule of points.

(3) Discretionary point systems will stand or fail depending upon the foundation statutes upon which they are grounded. Thus a point system which is in itself reasonable and provides full protection under the "due process" and "equal protection" provisions of the Fourteenth Amendment may be voided because of the invalidity of its foundation statutes.

(4) Where the foundation statutes provide no standards or guides they will probably be voided as an unconstitutional delegation of legislative powers to a non-legislative body. Where, however, there are any standards or guides, however rudimentary, the probabilities are that they will be sustained.

(5) Once the validity of a foundation statute has been determined, the validity of a point system is subject to the same criteria as to reasonableness, et cetera, as statutory point systems and other license regulatory legislation.

(6) Application of a point system to violations committed prior to the adoption of the system will not be held to be an *ex post facto* application of the law unless the violations occurred prior to the adoption of the statute or statutes on which a point system is founded.

(7) Whenever a Department has authority to suspend, as for "habitually reckless and negligent driving," it probably has the authority to use a system of points in reaching a determination as to whether a particular driver was in fact "habitually reckless and negligent." Perhaps the most significant language contained in either the South Carolina or the Kentucky cases was the language of the Kentucky court to the effect that the foundation statute being valid, it made no difference that the Department used a system of points in reaching its determination that Beard was an habitually reckless driver.

RECOMMENDATIONS

It is not within the province of the legal study of point systems to recommend one method of establishing a point system over any other method, since, in the opinion of this writer, that constitutes a question of policy only. Assuming however, *arguendo*, that it is desired to establish a point system, and that such a system can be established in the manner in which the appropriate administrative agency may choose, certain legal factors should be re-iterated. Namely:

(1) A point system, including schedule of points, written into the statutes through legislative enactments, presents fewer legal questions than systems authorized by statute or permitted by statute. Such a system, however, results in a loss of flexibility.

(2) From a legal standpoint, statutory authority for establishment of a point system, presents fewer legal difficulties than establishment of such a system based upon "broad discretionary" powers. Such authority is subject, however, to the general rule of law that the legislature must provide sufficient standards to govern and limit the department in its establishment of such system.

(3) Point systems based upon broad discretionary powers must meet a twofold test in addition to the other questions raised by such point systems. First, are the foundation statutes themselves valid, and second, do they in fact authorize the establishment of a point system?

Whenever a decision has been made that it is desirable to establish a point system based upon the broad discretionary powers of the appropriate administrative agency, it is recommended that the statutes that are to be relied upon to support the establishment of such a system be measured against the

general rules of law herein presented, and if there is reasonable doubt that such statutes will support the establishment of such a system, that such supporting statutes first be strengthened.

While no attempt can be made to specify all the possible statutory words that will presumably withstand an attack on constitutional grounds, it has been demonstrated that the usual "habitual violator" and "habitually reckless and negligent operator" statutes will probably withstand an attack on the grounds that they are invalid as an unconstitutional delegation of legislative powers. It is suggested that a statute which authorizes the department to suspend the license of any person who "has been convicted with such frequency of serious offenses against traffic regulations governing the movement of vehicles as to indicate a disrespect for traffic laws and a disregard for the safety of other persons on the highway,"[58] would be sufficient in any jurisdiction to support the establishment of a point system.

SB-310

TO: House Judiciary

SUBJECT: CSSB 310
Venue Bill

HISTORY

In December 1970 a number of legislators, native leaders, members of the judiciary, State Police, Health, Education and Welfare officials, and officials of the Division of Corrections met at Mt. Alyeska near Anchorage, Alaska, to discuss criminal justice in the rural areas of Alaska. This became commonly known as the "Bush Justice Conference." One of the results of this conference was a recommendation that criminal trials in Alaska be held in areas other than the three or four major urban cities.

The First Session of the Seventh Alaska Legislature amended AS 22.10.030 and in effect decreed a change in the Criminal Rules, in that the place of trial for any crime committed in the state was to be in the Election District. Shortly thereafter the supreme court handed down a decision in Cloyd Alvarado v. State of Alaska (Exhibit A) in which they indicated that the law of Alaska required that a man accused of a crime in the State of Alaska should be tried by a jury of his peers, and should be tried in an area that would reasonably insure that the same ethnic group to which the accused belong would be represented in the jury selection.

As time passed it became readily apparent that as a practical matter this statute created many hardships because in vast areas of this great state there are absolutely no facilities available for holding criminal trials. In order to relieve this problem to a certain extent, the supreme court issued Supreme Court Order No. 136 (Exhibit B). Among other things in the Supreme Court Order, they directed the Administrative Director of Courts to investigate and report to the presiding superior or district court judge in the judicial district in which the trial was to be held, the availability of appropriate facilities in the area. It is to be pointed

~~only~~ OUT that the order could not and did not supersede the statute and that if a crime was committed in a rural district and there was no facility available, then the court was required to move to that area and attempt to set up some type of temporary quarters in which to hold the trial. This not only was a hardship on the court and jurors, but became a tremendous expense to the taxpayers of this state. Fortunately no lengthy trial has been required in a remote area as yet. However, the potential is always there.

CSSB 310

CSSB 310 would amend the present statute in two major areas. The present statute states that trials must be held in "election districts," this being the House Election Districts. The present bill would change this to a senate district, which would encompass a much larger area (see attached map). In addition to expanding this geographical area it states that if a crime is committed within the boundaries of a borough, then the location shall be at a place within the borough that will best serve as a place for trial. This will also take into consideration some problem areas such as the city of Anchorage, where there are four senate districts, and in areas adjacent to Fairbanks which is a separate senate district. The second point is that the Administrative Director of Courts may move a trial to the next closest senate district if he feels that there are absolutely no reasonably suitable facilities within a senate district.

The Senate Judiciary Committee has had under consideration CSSB 310 since the beginning of the session and has contacted members of the judiciary, the Administrative Director of Courts, members of this body representing the rural areas of our state, and the committee feels that this bill will preserve the spirit of the Bush Justice Conference, the decision of Alvarado v. State, and the feelings and desires of the citizens of rural Alaska, but yet be flexible enough to take away the financial burden imposed by the former statute.

WILLIAM H. SANDERS, PRESIDING JUDGE

January 17, 1972

The Honorable Robert C. Erwin
Associate Justice of the Supreme Court
Alaska Court System
941 Fourth Avenue
Anchorage, Alaska 99501

Re: Reapportionment and Judicial Districts

Dear Bob:

It is my understanding that you are the court system's liaison with the legislature and for that reason am sending you this request to have the legislature straighten out our judicial district. We have criminal law problems in this area with present boundaries.

Please note that AS 22.10.010 is in part as follows:

> "There shall be one superior court for the state. The court shall consist of four districts bounded as follows: . . . Second District: the area within election district numbered 21 to 24, both inclusive, as said districts are described in art. XIV of the state constitution on March 19, 1959."

Would suggest that if the present proposed reapportionment is approved that this particular portion of the statute be amended as follows:

> "There shall be one superior court for the state. The court shall consist of four districts bounded as follows: . . . Second District: the area within the election districts numbered 18, 19 and 20."

You will note that the statute was passed setting up these districts March 19, 1959. No amendment was made to this statute

after reapportionment in 1962.

The legislature in 1959 followed election district in establishing judicial districts. There are sound reasons for following this procedure. At the present time a Superior Court Judge or District Judge running for re-election would have to follow the old election district boundaries set in 1959. This would create problems with the election supervisors in distributing the judicial ballots and tallying the judicial vote.

The constitutional provision that allows the legislature to establish judicial districts is as follows: (Art. IV, §1)

> "The judicial power of the State is vested in a supreme court, a superior court, and the courts established by the legislature. The jurisdiction of courts shall be prescribed by law. The courts shall constitute a unified judicial system for operation and administration. Judicial districts shall be established by law."

It may be that you will want to amend AS 22.10.010 to cover all four judicial districts.

Sincerely,

Bill

William H. Sanders

SB-377

whether such purchaser is an underwriter or dealer in securities, and, if not, whether the purchase of such a block of securities for investment is consistent with its general operations; and (3) the length of time elapsing between the acquisition of the securities by the initial purchaser and the date of their proposed resale.

Of course, if the securities in question were in fact purchased by the initial purchaser for investment rather than for resale, dealers' sales thereof to the public would not necessitate registration under the Securities Act.

In conclusion, I feel that I should point out that even though a dealer is satisfied that a particular block of unregistered securities was bought by an initial purchaser for investment, he nevertheless takes the risk that, if his determination is incorrect, sales by him of such securities will be in violation of the registration requirements of the Act.

[Release No. 33-603, December 16, 1935, 11 F. R. 10955.]

[¶ 2755] Public Offerings of Investment Contracts Providing for the Acquisition, Sale or Servicing of Mortgages or Deeds of Trust

This release refers to the Act as in effect prior to the 1964 amendments. CCH.

Release Nos. 33-3892 and 34-5633. January 31, 1958, 23 F. R. 840.

Reg. § 231.3892 (§ 241.5633). Statement of the Commission regarding public offerings of investment contracts providing for the acquisition, sale or servicing of mortgages or deeds of trust.

Questions are presented to the Securities and Exchange Commission from time to time as to the application of the federal securities laws to offerings of whole or fractional interest in mortgages or deeds of trust under arrangements which provide for a variety of services to the investor. In the opinion of the Commission such an arrangement frequently constitutes an "investment contract", which is a "security" within the meaning of the federal securities laws. The public offering and sale of these investment contracts may invoke the registration provisions of the Securities Act of 1933 and other provisions of the federal securities laws. It should be emphasized, in this connection, that exemptions from registration provided by section 4 (1) of the Securities Act of 1933 and Regulation A-R* thereunder, usually relied upon for the underlying mortgage and deed of trust notes, would not be available for a public offering of the investment contracts. Recently the Commission has obtained injunctions against sellers who failed to register such investment contracts offered through nationwide advertising.[1]

[¶ 2756] [Services and Other Attributes of Arrangement]

Among the more common services and other attributes of the arrangements, offered in relation to the mortgages or deeds of trust, which have come to the attention of the Commission and which in the opinion of the Commission may give rise to the creation of "investment contracts" within the meaning of the securities laws are:

(a) Complete investigation and placing service.

(b) Servicing collection, payments, foreclosure, etc.

[1] See *SEC v. Mortgage Clubs, Inc.*, D. Mass. Civ. Act. No. 57-385-N, Litigation Release No. 1106 and *SEC v. Backers Discount and Finance, Inc.*, D. N. J. C. A. No. 14-58, Litigation Release No. 1200.

* [Regulation A-R was rescinded December 8, 1960 (¶ 70,732). CCH.]

In *In re Natural Resources Corporation*, 8 S. E. C. 635, 637, the Commission stated that "* * * transactions which in form appear to involve nothing more than the sale of real estate, chattels, or services have been held to be investment contracts where in substance they involve the laying out of money by the investor on the assumption and expectation that the investment will return a profit without any active effort on his part, but rather as the result of the efforts of someone else."

It should also be noted that persons engaged in the business of buying and selling mortgage or trust notes would ordinarily be brokers or dealers, or both, within the meaning of the Securities Exchange Act of 1934, and absent an exemption would be required to be registered as such with the Commission under the provisions of section 15 of the Act. Rule 15a-1 would not provide an exemption for such a broker or dealer who is offering investment contracts of the type referred to above. Moreover, such a broker or dealer usually would be subject to the Commission's Rule 15c3-1 whether or not he is registered. A broker or dealer subject to this rule could not use the mails or federal instrumentalities to effect a transaction in a non-exempt security otherwise than on a national securities exchange if his "aggregate indebtedness" exceeds 20 times his "net capital" as those terms are defined in the rule.

In addition to all of the foregoing, it should be emphasized that the antifraud provisions of the Acts and regulations administered by the Commission (including specifically section 17 (a) of the Securities Act of 1933 and Rules 10b-5 and 15c1-2 under the Securities Exchange Act of 1934) would apply to advertisements, literature, and any other statements and representations made in connection with the offer or sale of any of the securities referred to herein.

Persons engaging in this type of business should consult with the nearest regional office of the Commission or with the headquarters office in Washington, D. C.

NOTE: The text of § 241.5633 is identical with that appearing in § 231.3892.

This release becomes effective January 31, 1958.

[Release No. 33-3892, January 31, 1958, 23 F. R. 840.]

[¶ 2765] Real Estate Investment Trust

This release refers to the Act as in effect prior to the 1964 amendments. CCH.

Release Nos. 33-4298, 34-6419, and IC-3140. November 18, 1960, 25 F. R. 12177.

Reg. § 231.4298 (§§ 241.6419 and 271.3140). Statement of the Commission as to the applicability of the Federal securities laws to real estate investment trusts.

The Securities and Exchange Commission has received a number of inquiries as to the applicability of the Federal securities laws to real estate investment trusts as defined in a recent amendment to the Internal Revenue Code (Public Law 86-779, September 14, 1960). This amendment provides substantially the same tax treatment for qualified trusts which are substantially limited to investments in real estate and real estate mortgages as is provided for "regulated investment companies", but it does not amend any of the statutes administered by this Commission. A real estate investment trust may be subject to the provisions of the Federal securities laws, depending upon the circumstances involved in offering its securities for sale, the nature of such securities, and the character of the trust's investments.

The amendment, among other things, requires that, in order to qualify for the special tax treatment provided, the trust's securities must be bene-

THE WHITE HOUSE

TEXT OF AN ADDRESS BY THE PRESIDENT
NATIONAL CONFERENCE ON THE JUDICIARY
WILLIAMSBURG, VIRGINIA

As one who has practiced law; as one who deeply believes in the rule of law; and as one who now holds the responsibility for faithful execution of the laws of the United States, I am honored to give the opening address to this National Conference on the Judiciary.

It is fitting that you come together here in Williamsburg. Like this place, your meeting is historic. Never in the history of this Nation has there been such a gathering of distinguished men of the judicial systems of our States. I salute you all for your willingness to come to grips with the need for court reform and modernization. And I would like to salute especially the man who has been the driving force for court reform; a man whose zeal for reshaping the judicial system to the need of the times carries on the great tradition begun by Chief Justice John Marshall -- the Chief Justice of the United States, Warren Burger.

I recall that when I took my bar examination in New York City a few years ago, I dwelt at some length on the wisdom of the separation of powers. My presence here today indicates in no way an erosion of that concept; as a matter of fact, I have come under precedents established by George Washington and John Adams who both spoke out for the need for judicial reform. And President Lincoln, in his first annual message to the Congress, made an observation that is strikingly current -- that, in his words, "the country generally has outgrown our present judiciary system."

There is also a Lincoln story -- an authentic one -- that illustrates the relationship of the judicial and executive branches. When Confederate forces were advancing on Washington, President Lincoln went to observe the battle at Fort Stevens. It was his only exposure to actual gunfire during the Civil War -- and he climbed up on a parapet, against the advice of the military commander, to see what was going on. When, not five feet from the President, a man was felled by a bullet, a young Union captain shouted at the President: "Get down, you fool!" Lincoln climbed down and said gratefully to the captain: "I'm glad you know how to talk to a civilian."

The name of the young man who shouted "Get down, you fool!" was Oliver Wendell Holmes, who went on to make history in the law. From that day to this, there has never been a more honest and heartfelt remark made to the head of the executive branch by a member of the judicial branch -- though a lot of judges over the years must have felt the same way.

Let me address you today in more temperate words, but in the same spirit of candor.

The purpose of this conference is "to improve the process of justice." We all know how urgent the need is for that improvement at both the State

(MORE)

and Federal level. Interminable delays in civil cases; unconscionable delays in criminal cases; inconsistent and unfair bail impositions; a steadily growing backlog of work that threatens to make the delays worse tomorrow than they are today -- all this concerns everyone who wants to see justice done.

Overcrowded penal institutions; unremitting pressure on judges and prosecutors to process cases by plea bargaining, without the safeguards recently set forth by the American Bar Association; the clogging of court calendars with inappropriate or relatively unimportant matters -- all this sends everyone in the system of justice home at night feeling as if they have been trying to brush back a flood with a broom.

Many hardworking, dedicated judges, lawyers, penologists and law enforcement officials are coming to this conclusion: A system of criminal justice that can guarantee neither a speedy trial nor a safe community cannot excuse its failure by pointing to an elaborate system of safeguards for the accused. Justice dictates not only that the innocent man go free, but that the guilty be punished for his crimes.

When the average citizen comes into court as a party or a witness, and he sees that court bogged down and unable to function effectively, he wonders how this was permitted to happen. Who is to blame? Members of the bench and the bar are not alone responsible for the congestion of justice.

The Nation has turned increasingly to the courts to cure deep-seated ills of our society -- and the courts have responded; as a result, they have burdens unknown to the legal system a generation ago. In addition, the courts had to bear the brunt of the rise in crime -- almost 150% higher in one decade, an explosion unparalleled in our history.

And now we see the courts being turned to, as they should be, to enter still more fields -- from offenses against the environment to new facets of consumer protection and a fresh concern for small claimants. We know, too, that the court system has added to its own workload by enlarging the rights of the accused, providing more counsel in order to protect basic liberties.

Our courts are overloaded for the best of reasons: because our society found the courts willing -- and partially able -- to assume the burden of its gravest problems. Throughout a tumultuous generation, our system of justice has helped America improve herself; there is an urgent need now for America to help the courts improve our system of justice.

But if we limit ourselves to calling for more judges, more police, more lawyers operating in the same system, we will produce more backlogs, more delays, more litigation, more jails and more criminals. "More of the same" is not the answer. What is needed now is genuine reform -- the kind of change that requires imagination and daring, that demands a focus on ultimate goals.

The ultimate goal of changing the process of justice is not to put more people in jail or merely to provide a faster flow of litigation -- it is to resolve conflict speedily but fairly, to reverse the trend toward crime and violence, to reinstill a respect for law in all our people.

(MORE)

The watchword of my own administration has been reform. As we have undertaken it in many fields, this is what we have found. "Reform" as an abstraction is something that everybody is for, but reform as a specific is something that a lot of people are against.

A good example of this can be found in the law: Everyone is for a "speedy trial" as a constitutional principle, but there is a good deal of resistance to a speedy trial in practice.

The founders of this nation wrote these words into the Bill of Rights: "the accused shall enjoy the right to a speedy and public trial." The word "speedy" was nowhere modified or watered down. We have to assume they meant exactly what they said -- a speedy trial.

It is not an impossible goal. In criminal cases in Great Britain today, most accused persons are brought to trial within 60 days after arrest. Most appeals are decided within three months after they are filed.

But here in the United States, this is what we see: In case after case, the delay between arrest and trial is far too long. In New York and Philadelphia the delay is over five months; in the State of Ohio, over six months; in Chicago, an accused man waits six to nine months before his case comes up.

In case after case, the appeal process is misused -- to obstruct rather than advance the cause of justice. Throughout the State systems, the average time it takes to process an appeal is estimated to be as long as 18 months. The greater the delay in commencing a trial, or retrial resulting from an appeal, the greater the likelihood that witnesses will be unavailable and other evidence difficult to preserve and present. This means the failure of the process of justice.

The law's delay creates bail problems, as well as overcrowded jails; it forces judges to accept pleas of guilty to lesser offenses just to process the caseload -- to "give away the courthouse for the sake of the calendar." Without proper safeguards, this can turn a court of justice into a mill of injustice.

In his perceptive message on "The State of the Federal Judiciary," Chief Justice Burger makes the point that speedier trials would be a deterrent to crime. I am certain that this holds true in the courts of all jurisdictions.

Justice delayed is not only justice denied -- it is also justice circumvented, justice mocked, and the system of justice undermined.

What can be done to break the logjam of justice today, to ensure the right to a speedy trial -- and to enhance respect for law? We have to find ways to clear the courts of the endless stream of "victimless crimes" that get in the way of serious consideration of serious crimes. There are more important matters for highly skilled judges and prosecutors than minor traffic offenses, loitering and drunkeness.

We should open our eyes -- as the medical profession is doing -- to the use of paraprofessionals in the law. Working under the supervision of trained attorneys, "parajudges" could deal with many of the essentially administrative matters of the law, freeing the judge to do what only he can do: to judge. The development of the new office of magistrates in the Federal System is a step in the right direction. In addition, we should take advantage of many technical advances, such as electronic information retrieval, to expedite the result in both new and traditional areas of the law.

But new efficiencies alone, important as they are, are not enough to reinstill respect in our system of justice. A courtroom must be a place where a fair balance must be struck between the rights of society and the rights of the individual.

We all know how the drama of a courtroom often lends itself to exploitation, and, whether it is deliberate or inadvertent, such exploitation is something we must all be alert to prevent. All too often, the right of the accused to a fair trial is eroded by prejudicial publicity. We must never forget that a primary purpose underlying the defendant's right to a speedy and public trial is to prevent star-chamber proceedings, and not to put on an exciting show or to satisfy public curiosity at the expense of the defendant.

In this regard, I strongly agree with the Chief Justice's view that the filming of judicial proceedings, or the introduction of live television to the courtroom, would be a mistake. The solemn business of justice cannot be subject to the command of "lights, camera, action."

The white light of publicity can be a cruel glare, often damaging to the innocent bystander thrust into it, and doubly damaging to the innocent victims of violence. Here again a balance must be struck: The right of a free press must be weighed carefully against an individual's right to privacy.

Sometimes, however, the shoe is on the other foot: Society must be protected from the exploitation of the courts by publicity-seekers. Neither the rights of society nor the rights of the individual are being protected when a court tolerates anyone's abuse of the judicial process. When a court becomes a stage, or the center ring of a circus, it ceases to be a court. The vast majority of Americans are grateful to those judges who insist on order in their courts and who will not be bullied or stampeded by those who hold in contempt all this nation's judicial system stands for.

The reasons for safeguarding the dignity of the courtroom and clearing away the underbrush that delays the process of justice go far beyond questions of taste and tradition. They go to the central issue confronting American justice today.

How can we answer the need for more, and more effective, access to the courts for the resolution of large and small controversies, and the protection of individual and community interests? The right to representation by counsel and the prompt disposition of cases -- advocacy and adjudication -- are fundamental rights that must be assured to all our citizens.

In a society that cherishes change; in a society that enshrines diversity in its constitution; in a system of justice that pits one adversary against another to find the truth -- there will always be conflict. Taken to the street, conflict is a destructive force; taken to the courts, conflict can be a creative force.

What can be done to make certain that civil conflict is resolved in the peaceful arena of the courtroom, and criminal charges lead to justice for both the accused and the community? The charge to all of us is clear.

We must make it possible for judges to spend more time judging, by giving them professional help for administrative tasks. We must change the criminal court system, and provide the manpower -- in terms of court staffs, prosecutors, and defense counsel -- to bring about speedier trials and appeals.

(MORE)

We must ensure the fundamental civil right of every American -- the right to be secure in his home and on the streets. We must make it possible for the civil litigant to get a hearing on his case in the same year he files it.

We must make it possible for each community to train its police to carry out their duties, using the most modern methods of detection and crime prevention. We must make it possible for the convicted criminal to receive constructive training while in confinement, instead of what he receives now -- an advanced course in crime.

The time has come to repudiate once and for all the idea that prisons are warehouses for human rubbish; our correctional systems must be changed to make them places that will correct and educate. And, of special concern to this conference, we must strengthen the State court systems to enable them to fulfill their historic role as the tribunals of justice nearest and most responsive to the people.

The Federal Government has been treating the process of justice as a matter of the highest priority. In the budget for the coming year, the Law Enforcement Assistance Administration will be enabled to vigorously expand its aid to State and local governments. Close to one half billion dollars a year will now go to strengthen local efforts to reform court procedures, police methods and correctional action and other related needs. In my new special revenue sharing proposal, law enforcement is an area that receives increased attention and greater funding -- in a way that permits States and localities to determine their own priorities.

The District of Columbia, the only American city under direct Federal supervision, now has legislation and funding which reorganizes its court system, provides enough judges to bring accused persons to trial promptly, and protects the public against habitual offenders. We hope that this new reform legislation may serve as an example to other communities throughout the Nation.

And today I am endorsing the concept of a suggestion that I understand Chief Justice Burger will make to you tomorrow: the establishment of a National Center for State Courts.

This will make it possible for State courts to conduct research into problems of procedure, administration and training for State and local judges and their administrative personnel; it could serve as a clearinghouse for the exchange of information about State court problems and reforms. A Federal Judicial Center along these lines already exists for the Federal court system and has proven its worth; the time is overdue for State courts to have such a facility available. I will look to the conferees here in Williamsburg to assist in making recommendations as to how best to create such a center, and what will be needed for its initial funding.

The executive branch will continue to help in every way, but the primary impetus for reforming and improving the judicial process should come from within the system itself. Your presence here is evidence of your deep concern; my presence here bears witness to the concern of all the American people regardless of party, occupation, race or economic condition, for the overhaul of a system of justice that has been neglected too long.

I began my remarks by referring to an episode involving Justice Oliver Wendell Holmes. There is another remark of Holmes not very well known, that reveals an insight it would be well for us to have today.

(MORE)

Judge Learned Hand told of the day that he drove Justice Holmes to a Supreme Court session in a horsedrawn carriage. As he dropped the Justice off in front of the Capitol, Learned Hand said, "Well, sir, goodbye. Do justice!" Mr. Justice Holmes turned and said, most severely, "That is not my job. My job is to play the game according to the rules."

The point of that remark, and the reason that Learned Hand repeated it after he had reached the pinnacle of respect in our profession, was this: Every judge, every attorney, every policeman wants to "do justice." But the only way that can be accomplished, the only way justice can truly be done in any society, is for each member of that society to subject himself to the rule of law -- neither to set himself above the law in the name of justice, nor to set himself outside the law in the name of justice.

We shall become a genuinely just society only by "playing the game according to the rules," and when the rules become outdated or are shown to be unfair, by lawfully and peaceably changing those rules.

The genius of our system, the life force of the American Way, is our ability to hold fast to the rules that we know to be right and to change the rules that we see to be wrong. In that regard, we would all do well to remember our constitutional roles: for the legislatures, to set forth the rules; for the judiciary, to interpret them; for the executive, to carry them out.

The American Revolution did not end two centuries ago; it is a living process. It must constantly be reexamined and reformed. At one and the same time, it is as unchanging as the spirit of laws and as changing as the needs of our people.

We live in a time when headlines are made by those few who want to tear down our institutions, by those who say they defy the law. But we also live in a time when history is made by those who are willing to reform and rebuild our institutions -- and that can only be accomplished by those who respect the law.

Remarks of Warren E. Burger
Chief Justice of the United States
National Conference on the Judiciary
Williamsburg, Virginia
March 12, 1971 - 9:00 a.m.

FOR RELEASE
ON DELIVERY

DEFERRED MAINTENANCE

This Conference is unique in one respect that we should recognize at the outset for it brings together a cross-section of state and federal judges and of state and federal law enforcement authorities, and others seeking to avert an impending crises in the courts. The only counterpart to this Conference in the past century was the Attorney General's Conference on Court Congestion and Delay convened by Attorney General Herbert Brownell more than fifteen years ago. Fifty years before Attorney General Brownell called his Conference, Roscoe Pound had warned the legal profession in the strongest terms that we were on the threshold of a crisis. Periodically we respond and experience some relief but we are soon overwhelmed by a new tide of problems.

Today the American system of criminal justice in every phase -- the police function, the prosecution and defense, the courts and the correctional machinery -- is suffering from a severe case of deferred maintenance. By and large, this is true at the state, local and federal levels. The failure of our machinery is now a matter of common knowledge, fully documented by innumerable studies and surveys.

As a consequence of this deferred maintenance we see

First, that the perpetrators of most criminal acts are not detected, arrested and brought to trial;

Second, those who are apprehended, arrested and charged are not tried promptly because we allow unconscionable delays that pervert both the right of the defendant and the public to a speedy trial of every criminal charge; and

Third, the convicted persons are not punished promptly after conviction because of delay in the appellate process. Finally, even after the end of litigation, those who are sentenced to confinement are not corrected or rehabilitated, and the majority of them return to commit new crimes. The primary responsibility of judges, of course, is for the operation of the judicial

machinery but this does not mean we can ignore the police function or the shortcomings of the correctional systems.

At each of these three stages -- the enforcement, the trial, the correction -- the deferred maintenance became apparent when the machinery was forced to carry too heavy a load. This is the thing that happens to any machinery whether it is an industrial plant, an automobile or a dishwasher. It can be no comfort to us that this deferred maintenance crisis is shared by others; by cities and in housing, in the field of medical care, in environmental protection, and many other fields. All of these problems are important, but the administration of justice is the adhesive -- the very glue -- that keeps the parts of an organized society from flying apart. Man can tolerate many shortcomings of his existence, but history teaches us that great societies have foundered for want of an adequate system of justice, any by that I mean justice in its broadest sense.

I have said nothing of civil justice -- that is the resolution of cases between private citizens or between citizens and government. This unhappily is becoming the stepchild of the law as criminal justice once was. Most people with civil claims, including those in the middle economic echelons, who cannot afford the heavy costs of litigation and who cannot qualify for public or government-subsidized legal assistance, are forced to stand by in frustration, and often in want, while they watch the passage of time eat up the value of their case. The public has been quiet and patient, sensing on the one hand the need to improve the quality of criminal justice but also experiencing frustration at the inability to vindicate private claims and rights.

We are rapidly approaching the point where this quiet and patient segment of Americans will totally lose patience with the cumbersome system that makes people wait two, three, four or more years to dispose of an ordinary civil claim while they witness flagrant defiance of law by a growing number of law-breakers who jeopardize cities and towns and life and property of law-abiding people, and monopolize the courts in the process. The

courts must be enabled to take care of both civil and criminal litigants without prejudice or neglect of either.

THIS IS WHY WE ARE HERE TODAY.

The question is -- what will happen as a result of our being here? What will each of us do when we return to the daily tasks we have temporarily laid aside to gather at this Conference? Let me suggest some of the problem areas and then let me venture some thoughts on what we might try to do about them.

There are many areas which we should study and consider, and indeed, that we must consider, but if we try too much at once we may fail in all our endeavors. I am thinking, for example, of substantive problems which cry out for re-examination, including the handling of personal injury claims, which especially clog the state courts; the need to ask questions about other areas of jurisdiction, such as receivorships of insolvent debtors, the adoption of children, land-title registration in some states, and possibly even such things as divorce jurisdiction and child-custody matters. We need a comprehensive re-examination of the whole basis of jurisdiction in order to eliminate whenever possible all matters which may be better administered by others so as to restore the courts to their basic function of dealing with cases and controversies.

We can see in the development of common law institutions many examples of changing jurisdiction and evolution of new remedies. I suggest no specific changes but I trust it will not be regarded as subversive to suggest the need for study and thought on these problems, remembering that subjects once committed to the courts are not the province of the other governmental bodies. The common law tradition teaches that rights and remedies are never fixed or static but a continuing process of change. For example, working men once had either no rights at all or common law rights based on negligence when they were injured in their work. The deficiencies of the common law remedies inspired lawyers to find other and better ways of dealing with the claims of injured workmen and I think no one would seriously consider turning the clock back to the old ways. A large area of

regulatory activity was once imposed on courts but for the larger part of this century that has been vested in a wide array of administrative and regulatory bodies with limited judicial review.

All of us attending this Conference share and are the beneficiaries of the great common law tradition that undergirds American jurisprudence and virtually all aspects of our procedure, both state and federal. As lawyers and judges we can be proud of the great tradition of the common law and even have a pardonable pride in the improvements and developments that American lawyers and judges have added to it. We do not disparage or undermine the common law when we consider change. Indeed, change is the very essence -- the very heart -- of the common law concept that springs from England and has been followed in all English-speaking countries the world over.

PRIORITIES

The challenges to our systems of justice are colossal and immediate and we must assign priorities. I would begin by giving priority to methods and machinery, to procedure and techniques, to management and administration of judicial resources even over the much-needed reexamination of substantive legal institutions that are out of date. That reexamination is importan', but 't is inevitably a long range undertaking and it can wait.

I have said before, but I hope it will bear repeating, that with reference to methods and procedure we may be carrying continuity and tradition too far when we see that John Adams, Hamilton or Burr, Jefferson or Marshall, reincarnated, could step into any court today and after a minimal briefing on procedure and up-dating in certain areas of law, try a case with the best of today's lawyers. Those great eighteenth century lawyers would need no more than a hurried briefing and a Brooks' Bros. suit. They would not even need a hair cut, given the styles of our day.

This is not necessarily bad, and I propose nothing specific on how we should dhange our methods of resolving conflicts in the courtroom, but I do know this -- and so does anyone who has read legal history and read the newspapers in recent years - that John Adams, and his reincarnated col-

leagues at the bar, would be shocked and bewildered at some of the antics and spectacles witnessed today in the courtrooms of America. They would be as shocked and baffled as are a vast number of contemporary Americans and friends of America all over the world. They would not be able to understand why so many cases take weeks or months to try. No one could explain why the jury selection process, for example, should itself become a major piece of litigation consuming days or weeks. Few people can understand it and the public is beginning to ask some searching questions on the subject.

STATE-FEDERAL COOPERATION

I need not burden this well-informed audience on the subject of the tension and the strains existing between the state and federal courts in recent years. Because of the existence of those problems and the reasons underlying them I urged last August, at the ABA Convention in St. Louis, that the Chief Justice of each state take the initiative to create an informal ad hoc state-federal judicial council in each state. The purpose, of course, was to have these judges meet together informally to develop cooperation to reduce the tensions that have existed in recent years. I was pleasantly surprised, even astonished, at the speed with which the Chief Justices responded, for I am now informed that such Councils are in actual operation in 32 of the states. Many of these Councils have been created by formal order of the State Supreme Court. I am also informed that once the channels of communication were opened these state and federal judges found other areas of fruitful cooperation and exchange of ideas. I regard this development of such importance that I wish to express my appreciation to the Conference of State Chief Justices and to Chief Justice Calvert of Texas, its Chairman.

In urging the cooperation between the state and federal judges, and in urging the state judges to call upon the state bar associations and on the American Bar Association, I have no thought whatever that all state court systems or all judges be cast in one mold. Far from this, I have an abiding conviction that the strength of our entire system in this country and the

essence of true Federalism lies in diversity among the states. It will not impair this diversity, however, to work together to develop effective post-conviction remedies for example, or common standards of judicial administration, common standards of professional conduct for lawyers, and, indeed, for judges, or the improvement in the method of selection, the tenure, and compensation of judges.

The diversity that has existed in our system and the innovativeness of state judges accounts for many of the great improvements that the federal system has adopted from the states. One of the most crucial is in the developing area of using trained court administrators or executives in the administration of the courts. The states have been a whole generation ahead of the federal system in this matter. When we sought to create the Institute of Court Management in 1969 the first step was to call on state court administrators for guidance and advice.

We should never forget that under our federal system, the basic structure of the courts of this country contemplated that state courts would deal with local matters while federal courts would serve a limited and narrow function. I hope we will never become so bigoted as to think that state judges are any less devoted to the principles of the federal Constitution than other judges and lawyers.

STANDARDS OF ADMINISTRATION

I do not especially like pharases like "management of judicial resources," or "maximum utilization of judge power." They seem stilted to me as they do to most lawyers and judges. But these phrases are simply "shorthand" and if we accept them as such they become tolerable. The important thing is the concept underlying these "shorthand" terms. Every profession and every area of human activity has had to grapple with the hard realities behind the shorthand. The difference is judges and lawyers have lagged far behind the rest. I do not suggest that justice can ever become automated or that production line processes are adaptable to courts.

But we must acknowledge that the practice of the healing arts, for example, is surely a sensitive and delicate matter, perhaps as much so as the administration of justice. Yet the medical profession has responded and necessity has forced innovative changes that make it possible today for one physician or surgeon, depending on the individual, to do from three to ten or fifteen times what his counterpart could do even as recently as twenty or thirty years ago. And with this enormous increase in productivity, by and large we have in this country a better quality of medical care today than at any time in the history of mankind.

In terms of methods, machinery and equipment, the flow of papers -- and we know the business of courts depends on the flow of papers -- most courts have changed very little fundamentally in a hundred years or more. I know of no comprehensive surveys, but spot checks have shown that the ancient ledger type of record books, sixteen or eighteen inches wide, twenty-four or twenty-six inches high, and four inches thick are still used in a very large number of courts and these cumbersome books, hazardous to handle, still call for longhand entries concerning cases. I mention this only as one symptom of our tendency to cling to old ways. We know that banks, factories, department stores, hospitals and many government agencies have cast off anachronisms of this kind.

With relatively few exceptions, we still call jurors as in the past. We still herd them into a common room in numbers often double the real need because of obsolete concepts of arranging and managing their use. This is often complicated by the unregulated arbitrariness of a handful of judges, for example, who demand more jurors than they can possibly use to be allocated each day for their exclusive use. There is almost a total absence of even the most primitive techniques in predicting the need for jurors just as there is a large vacuum in the standards and procedures to coordinate the steps of bringing a case and all of its components -- the lawyers, witnesses, experts, jurors and court staff -- to the same place at the same time.

Happily, a very distinguished committee of the American Bar Association under the chairmanship of Judge Freedman of the United States Court of Appeals of the Third Circuit is now launching a comprehensive program of bringing up to date the minimum standards of judicial administration.

Independent of what we do in the courtroom itself, we need careful study to make sure that every case which reaches the courtroom stage is there only after every possibility of settlement has been exhausted. Those parties who impose upon the judicial process and clog its functioning by carrying the cases through jury selection before making a settlement which could have been made earlier should be subject to the risk of a very substantial discretionary cost assessment at the hands of the trial judge who can evaluate these abuses of the system. Someone must remind the bar and the public of the enormous cost of a trial. Reliable estimates have been made indicating that the cost is in the meighborhood of $250 per working hour in some courts, not including plant and equipment cost -- or lawyers.

COURT EXECUTIVE OFFICERS

As litigation has grown and multiple-judge courts have steadily enlarged, the continued use of the old equipment and old methods has brought about a virtual breakdown in many places and a slowdown everywhere in the efficiency and functioning of courts. The judicial system and all its components have been subjected to the same stresses and strains as hospitals and other enterprises. The difference is that, thirty or forty years ago, doctors and nurses recognized the importance of system and management in order to deliver to the patients adequate medical care. This resulted, as I have pointed out on other occasions, in the development of hospital administrators and today there is no hospital of any size in this country without a trained hospital administrator who is the chief executive officer dealing with the management and efficient utilization of all of the resources of the institution. Courts and judges have, with few exceptions, not responded in this way. To some extent, imaginative and resourceful judges and court clerks have moved partially into the vacuum, but the function of a clerk and the function of a court executive are very different, and a

court clerk cannot be expected to perform both functions.

From the day I took office, twenty-one months ago, this seemed to me the most pressing need of the courts of this country, and particularly so in my area of responsibility, the federal courts. The first step I took was to lay the foundations for a facility to train executives and I requested the American Bar Association to take the leadership in accomplishing this. That Association did so with the American Judicature Society and the Institute of Judicial Administration as co-sponsors, creating the Institute of Court Management at the University of Denver Law School. That Institute has now graduated the first group of trainees with an intensive full-time course over a period of six months including actual field training in the various courts. It will train two additional classes this year. This is not a federal facility -- I expect most of its output will go to state court systems.

In the meantime, the Congress has taken one of the most important steps in a generation in the administration of justice by providing for a Court Executive in each of the eleven Federal Circuits. The Court Executive will work under the direction of the Judicial Council of each Circuit. I need not say, surely, to an audience including many Chief Judges and administrative judges, that this will not only relieve Chief Judges to perform their basic judicial functions, but it will provide a person who will, in time, be able to develop a new methods and new processes which busy judges could not do in the past.

The function of a Court Executive is something non of us really knows very much about. There are only a handful of court administrators or executives in this country and up to now they are all self-taught. The few who were in being were, for the most part, called upon to be members of the teaching faculty for the new Court Management Institute. The concept of Court Executive or Court Administrator will have its detractors but I predict they will not be heard for very long. The history books tell us how the Admirals reacted when General William Mitchell insisted that an airplane could sink a battleship.

This desperate need for court executive officers does not alter the fact that it will require great patience and industrious homework on the part of judges and chief judges to learn to utilize these officers for their courts.

RULEMAKING POWER

A great many of the infirmities in our procedures could be cured if judges had broad rulemaking power and exercised that power. The best example of this was given a generation ago in the Federal Rules of Civil Procedure and later in the Criminal and Appellate Procedure Rules.

For the past 30 years or more state legislatures, like the Congress, have been overwhelmed by a multitude of new problems and it is increasingly difficult to get their attention on mundane subjects like rules or procedure and other internal matters of the courts. In addition, judges, by and large, have been under increasing pressure of their own daily work and have not brought these matters to the legislators.

The rulemaking process as developed in this country beginning 35 years ago is the best solution yet developed for sound procedural change. Since it is a cooperative process involving not only the legislative and judicial branches officially, but lawyers, judges and law professors, it can synthesize the best thinking at every level.

If your state does not provide for rulemaking power comparable to that vested in the Supreme Court of the United States in conjunction with Congress, I urge you to study closely the potential of this mechanism. In federal habeas corpus review of state cases it could have saved a great deal of confusion in recent years. Flexible rulemaking processes could have promptly developed post-conviction remedy procedures to blunt the impact of the imposition of federal standards on the states.

SELECTION, TENURE AND COMPENSATION OF JUDGES

The combined experience of this country for nearly two hundred years now, with elective judges in most of the states holding office for limited

terms and federal judges who are appointed with tenure, affords a basis for a careful reexamination of the whole method of the selection of judges. This is part of the long range problem, but it deserves some mention. The aggregate of two centuries of experience should be sufficient to affort a basis for a comprehensive reexamination of the methods of selection and the tenure of state judges. In saying this, I, of course, intend no reflection whatever on those state systems of limited terms and the many splendid judges in those states.

It may be that the fine quality of judicial work of state judges is in spite of, not because of, the method of selection.

The election of judges for limited terms is a subject on which reasonable men can reasonable have different views. Nevertheless the very nature of the judicial function calls for some comprehensive studies directed to the alternative methods developed in the last generation in some states. These alternatives tend to preserve the virtues of popular choice of judges and at the same time develop a high degree of professionalism, offering an inducement for competent lawyers to make a career of the bench.

We know that while there are certain patterns common in the fifty states as to the selection and tenure of judges, that there is at the same time a wide disparity in the compensation. In such states as New York, California and Illinois, to mention but three of the large states, the compensation of judges of the highest courts is as much as three times the compensation of their counterparts in some other states of the Union.

As lawyers and judges we know that the function of the courts in a small state is essentially the same as the function of the courts in the larger state. The size of the state has no relationship to the nature of the function, the degree of the responsibility, and the degree of the professional competence called for. It is, therefore, an anomaly for a wide disparity to continue. At the same time I do not suggest, by any means, that there need be a rigid, uniform standard of compensation or tenure for all the states. All I suggest is that the judges in the small states are performing

essentially the same function as that of their brothers in a large state, and the conditions of their service should not vary excessively. It is not a wholesome or a healthy thing for the administration of justice to have the highest court of a geographically large and economically powerful state receive two or three times as much as his counterpart a few hundred miles away.

A NATIONAL CENTER FOR STATE COURTS

As I range over this rather wide variety of subjects you are bound to take notice that in many instances I have been obliged to refer to matters of common or general knowledge or the result of spot checks, or other sources that are not wholly trustworthy. This suggests strongly the need for some facility that will accumulate and make available all information necessary for comprehensive examination of the problems of the judiciary in the fifty states. Recently a judicial conference developed an accumulation of 500 or more specific problems of courts.

Each of the points I have raised in the list of what seem to me the urgent priorities can be more readily treated and with better solutions if there is a pooling of ideas and efforts of the states.

For a long time we have talked of the need for a closer exchange and closer cooperation among the states and between the states and the federal courts on judicial problems. No state is without grave problems in the administration of justice. The problems vary chiefly in degree from those states with grave troubles to those on the threshold of disaster in their courts. The valuable work of the National College of Trial Judges is just one example of the value of cooperative enterprise.

We now have in this country a great ferment for court improvement which has been gaining momentum slowly over a long period of time. More recently, this has taken on a new thrust and force under the leadership of the American Bar Association. The time has come, and I submit that it is here and not at this Conference, to make the initial decision and bring into being some kind of national clearinghouse or center to serve all the states and to cooperate with all the agencies seeking to improve justice at every

level. The need is great, and the time is now, and I hope this Conference will consider creating a working committee to this end before you adjourn. I know that you will do many important things while you are here to the benefit of our common problems, but if you do no more than launch this much-needed service agency for the state courts, your time and attendance here would be justified.

I hope that in raising this subject of a need for a facility to serve as a clearing house and service agency for the states you will not think me unduly presumptuous if I make some specific suggestions for your consideration.

It seems to me obvious that the states should make the final choices and the final decisions. In offering these thoughts, I draw particularly on my experience in the twenty-one months I have been in my present office. I now see the legal profession's strongest voice, the American Bar Association, from a point of view which I never fully appreciated in my years of private practice or even in the period when I was a member of the Court of Appeals.

The American Bar Association is a force for enormous, almost unlimited, good with respect to every problem in the administration of justice. It is a force that cannot be directed or controlled by any particular group or any selfish interest because it includes approximately 150,000 lawyers and judges and law professors representing 1,700 state and local bar associations and other legal groups. Its governing body, the House of Delegates, represents 90% of all the practicing lawyers in this country. I mention these factors because the American Bar Association is essentially a grass-roots institution whose components spring from the 50 states. The facilities and power, the influence and prestige of this association are literally on the door step of every state capital through the State Bar Association, and that power and influence can be put to work in terms of achieving the objectives I have suggested to you.

My suggestion, therefore, is that in shaping the national organization or center to serve all the states, that you consider calling primarily on this great association and its 50 component state associations, along with other

groups that specialized in judicial administration. There area additional existing structures representative of all the states and a cross section of the legal profession. I refer now to the American Judicature Society, the Institute of Judicial Administration, the Conference of State Trial Judges, the Appellate Judges Conference, the Council of State Governments, and the Conference of Chief Justices. I am confident there will be widespread interest in the formation of such a group as this but it will take time to marshal all of the large resources necessary to its accomplishment. To build soundly, you must build carefully. You must have plans and time. This is not a matter than can be adequately dealt with hastily in a few hours in a busy Conference such as you are now beginning. A Steering Committee can select five to ten representative leaders empowered to convene a larger group to perfect an organization.

The first step will be the decision to create a national center for state courts of the kind I outlined. It is desperately needed and long overdue.

In emphasizing the problems of administration, management and efficiency we must always remember that efficient administration is the tool, not the goal, of justice. Therefore it is as a means to an end that we should place high priority on changes in our methods and our machinery. The noblest legal principles will be sterile and meaningless if they cannot be made to work.

In closing, I offer the full cooperation of my own office and the facilities of the Federal Judicial Center and The Administrative Office of the United States Courts. But bearing in mind my own concepts of federalism I will participate only when you ask me to do so.

Dear Sir:

Re: Alaska nonprofit corporations and trusts - Tax Reform Act of 1969

Enclosed is a self-explanatory letter sent to Mary LaFollette of the Alaska Bar Association on January 20, 1971, pertaining to proposed non-controversial legislation.

I am also enclosing drafts of proposed legislation to which I have not assigned any Alaska statute numbers, pending review by your office.

Will appreciate your reviewing this proposed legislation and recommending its passage to the Judiciary Committees of both houses of the Legislature.

Very truly yours,

Stanley H. Reitman

Dear Mary:

Re: Work of the Committee on Corporation, Banking, Business Law and Taxation

At the present time the Committee is working on a review of the Uniform Commercial Credit Code. We had been meeting every two weeks, with a minor interruption over the holidays. Presently we are meeting once a week. This review more than likely will not be completed before a minimum of sixty days. Accordingly, any legislative recommendations for this session are not contemplated.

As to our Model Business Corporation Act, as you may recall, I had indicated to our Board of Governors the Committee was going to draft legislation intended to update this uniform Act. In discussing this objective, the Committee members' concensus was that we defer making any suggestions regarding the existing Model Act pending a review and analysis of some of the more modern corporation acts recently enacted by the States of Delaware and New York. Rather than amend the Act piecemeal, it was felt a more comprehensive review should be made of the latest thinking in the field of corporate statutory law. The Committee now has set a goal of undertaking such review after the UCCC study is behind us.

The only legislation the Committee currently recommends are two rather technical changes in the area of non-profit corporations and administration of trusts, grounded upon the Federal 1969 Tax Reform Act. In the latter area we do

not have any statutory law. Enclosed is a self-explanatory letter dated October 30, 1970 from the Chairman of the Section on Real Property, Probate and Trust Law of the American Bar Association. Mary, you will recall this letter initially flowed through your hands before it reached my desk.

The enactment of these suggested provisions will obviate or eliminate the need for amendments of non-profit corporations and trusts which operate in the private foundation area. Admittedly, in Alaska there may not be more than a handful of such organizations. Personally, I am aware of at least four or five. To amend a non-profit corporation is not a significant technical problem, as our non-profit statute provides a procedure for doing so. However, with respect to trusts, and particularly testamentary trusts, a court proceeding will be necessary. In our view, the suggested ABA language pertaining to non-profit corporations can be readily added to the statute in 10.20. As to the trust language, it is admittedly a little more troublesome to find a home or area of the Alaska statutes to tie into. Apparently Title 13 may be the most logical title.

This probably should be cleared with personnel of the Alaska Legislative Council.

Best regards,

Stanley H. Reitman

Section of Real Property, Probate and Trust Law

AMERICAN BAR ASSOCIATION

1155 East 60th, Chicago, Illinois 60637 Telephone (312) 493-0533

October 30, 1970

NOV 17 1970

Dear Sir: ALASKA BAR ASSOCIATION,

A serious and urgent problem has been presented to all Private Foundations by the Tax Reform Act of 1969. That Act requires all existing Private Foundations, in order to maintain exemption from Federal Income taxation, to change their governing instruments to comply with the Act or to bring suit to reform their instruments. This must be done before January 1, 1972. [Internal Revenue Code Sec. 508 (e)].

The Section of Real Property Probate and Trust Law of the American Bar Association has been disturbed by the possible crowding of court dockets and confusion caused by such suits and by the damage which might be done to those Private Foundations which for any reason failed to take action before the deadline. The Internal Revenue Service has indicated that the requirements of the Act can be met by statutes passed by the several states. To be most useful any such statute should be adopted in the 1971 Legislative session.

Accordingly, as a matter of information and to furnish a vehicle for study and consideration, a subcommittee of this Section's Committee on Charitable Trusts has prepared two draft acts - one for corporations and one for trusts.

Copies of these two draft acts are enclosed. The shortness of time has so far made it impossible to have these drafts considered by other appropriate bodies of the American Bar Association or other organizations to whom we are also sending copies. We hope you will find these drafts helpful. If you wish additional copies or further information, please get in touch with John E. Rogerson, One Boston Place, Boston. Massachusetts 02108, Telephone 617-723-7020, the Chairman of the Committee which prepared these drafts.

Sincerely yours,

G. Van Velsor Wolf

Chairman

THESE DRAFTS HAVE BEEN PREPARED BY A SUBCOMMITTEE OF THE COMMITTEE ON CHARITABLE TRUSTS OF THE SECTION OF REAL PROPERTY PROBATE AND TRUST LAW OF THE AMERICAN BAR ASSOCIATION AND ARE SUBMITTED FOR INFORMATION, CONSIDERATION AND DISCUSSION ONLY. THEY HAVE NOT YET BEEN CONSIDERED OR RECOMMENDED FOR ADOPTION BY THE AMERICAN BAR ASSOCIATION OR ANY OF ITS SECTIONS.

(1) No corporation which is a "private foundation" as defined in §509(a) of the Internal Revenue Code of 1954, shall

(a) engage in any act of "self-dealing" (as defined in §4941(d) of the Internal Revenue Code of 1954), which would give rise to any liability for the tax imposed by §4941(a) of the Internal Revenue Code of 1954;

(b) retain any "excess business holdings" (as defined in §4943(c) of the Internal Revenue Code of 1954), which would give rise to any liability for the tax imposed by §4943(a) of the Internal Revenue Code of 1954;

(c) make any investment which would jeopardize the carrying out of any of its exempt purposes, within the meaning of §4944 of the Internal Revenue Code of 1954, so as to give rise to any liability for the tax imposed by §4944(a) of the Internal Revenue Code of 1954; and

(d) make any "taxable expenditures" (as defined in §4945(d) of the Internal Revenue Code of 1954) which would give rise to any liability for the tax imposed by §4945(a) of the Internal Revenue Code of 1954.

(2) Each corporation which is a "private foundation" as defined in §509 of the Internal Revenue Code of 1954 shall distribute, for the purposes specified in its articles of organization, for each taxable year, amounts at least sufficient to avoid liability for the tax imposed by §4942(a) of the Internal Revenue Code of 1954.

(3) The provisions of §§1 and 2 shall not apply to any corporation to the extent that a court of competent jurisdiction shall determine that such application would be contrary to the terms of the articles of organization or other instrument governing such corporation or governing the administration of charitable funds held by it and that the same may not properly be changed to conform to such sections.

(4) Nothing in this act shall impair the rights and powers of the courts or the attorney general of this state with respect to any corporation.

(5) All references to sections of the Internal Revenue Code of 1954 shall include future amendments to such sections and corresponding provisions of future Internal Revenue laws.

THESE DRAFTS HAVE BEEN PREPARED BY A SUBCOMMITTEE OF THE COMMITTEE ON CHARITABLE TRUSTS OF THE SECTION OF REAL PROPERTY, PROBATE AND TRUST LAW OF THE AMERICAN BAR ASSOCIATION AND ARE SUBMITTED FOR INFORMATION, CONSIDERATION AND DISCUSSION ONLY. THEY HAVE NOT YET BEEN CONSIDERED OR RECOMMENDED FOR ADOPTION BY THE AMERICAN BAR ASSOCIATION OR ANY OF ITS SECTIONS.

(1) In the administration of any trust which is a "private foundation", as defined in §509 of the Internal Revenue Code of 1954, a "charitable trust", as defined in §4947 (a) (1) of the Internal Revenue Code of 1954, or a "split-interest trust" as defined in §4947 (a) (2) of the Internal Revenue Code of 1954, the following acts shall be prohibited:

(a) engaging in any act of "self-dealing" (as defined in §4941 (d) of the Internal Revenue Code of 1954), which would give rise to any liability for the tax imposed by §4941 (a) of the Internal Revenue Code of 1954;

(b) retaining any "excess business holdings" (as defined in §4943 (c) of the Internal Revenue Code of 1954) which would give rise to any liability for the tax imposed by §4943 (a) of the Internal Revenue Code of 1954;

(c) making any investments which would jeopardize the carrying out of any of the exempt purposes of the trust, within the meaning of §4944 of the Internal Revenue Code of 1954, so as to give rise to any liability for the tax imposed by §4944 (a) of the Internal Revenue Code of 1954; and

(d) making any "taxable expenditures" (as defined in §4945 (d) of the Internal Revenue Code of 1954) which would give rise to any liability for the tax imposed by §4945 (a) of the Internal Revenue Code of 1954;

provided, however, that this section shall not apply either to those split-interest trusts or to amounts thereof which are not subject to the prohibitions applicable to private foundations by reason of the provisions of §4947 of the Internal Revenue Code of 1954.

(2) In the administration of any trust which is a "private foundation" as defined in §509 of the Internal Revenue Code of 1954, or which is a "charitable trust" as defined in §4947 (a) (1) of the Internal Revenue Code of 1954, there shall be distributed, for the purposes specified in the trust instrument, for each taxable year, amounts at least sufficient to avoid liability for the tax imposed by §4942 (a) of the Internal Revenue Code of 1954.

(3) The provisions of §§1 and 2 shall not apply to any trust to the extent that a court of competent jurisdiction shall determine that such application would be contrary to the terms of the instrument governing such trust and that the same may not properly be changed to conform to such sections.

(4) Nothing in this act shall impair the rights and powers of the courts or the attorney general of this state with respect to any trust.

(5) All references to sections of the Internal Revenue Code of 1954 shall include future amendments to such sections and corresponding provisions of future Internal Revenue laws.

THESE DRAFTS HAVE BEEN PREPARED BY A SUBCOMMITTEE OF THE COMMITTEE ON CHARITABLE TRUSTS OF THE SECTION OF REAL PROPERTY, PROBATE AND TRUST LAW OF THE AMERICAN BAR ASSOCIATION AND ARE SUBMITTED FOR INFORMATION, CONSIDERATION AND DISCUSSION ONLY. Alaska Judicial Council
941 FOURTH AVENUE
ANCHORAGE, ALASKA

February 26, 1971

The Honorable Governor William A. Egan
Pouch A
State Capitol
Juneau, Alaska

Re: Juneau Court Facilities

Dear Governor Egan:

At present the Alaska Court System facilities in Juneau are located in the State Capitol building. These facilities are inadequate for present needs not only from the standpoint of inadequate space but also by way of the nature of the facilities and their physical layout. Plans for the new state office building in Juneau do not include space for the Alaska Court System. For this reason, there is an urgent need that a separate court facility be constructed in Juneau.

At my request, the Juneau Bar Association formed a committee to inquire into the needs and requirements of a State courthouse in Juneau. Recommendations were received by that committee from those agencies having a potential requirement for space in a new court facility. The following is a summary of those recommendations:

(a) Supreme Court - Justice John H. Dimond, of the Supreme Court residing in Juneau, provided an estimate in the amount of 8,239 square feet for the Supreme Court. This estimate includes a courtroom, offices for five justices, secretaries' office and reception area, offices for two law clerks, clerk's office, chief deputy and deputy clerk's office, workroom area, supply and storage area, restrooms and library facility. It is anticipated to be adequate for the Supreme Court needs in the foreseeable future.

(b) Superior Court - Presiding Judge Thomas B. Stewart has provided an estimate of total space requirements of the Superior Court of a minimum of 25,000 to 30,000 square feet of floor space. This area would be sufficient for the following facilities: two courtrooms, two jury rooms, one judges' robing room, one conference room, two judge's chambers with reception rooms and secretarial space, one office for visiting judge, one office for two law clerks, one jury assembly room, one witness assembly room, two attorney-witness conference rooms, one judges' lounge, one attorneys' lounge, one judges' library, one pressroom, one office for Clerk of Court, one office for Court Trustee functions, one office for marriage counselor functions, one office for clerk's counter and general filing space, one office for transcribing functions, and one public law library for a capacity of 50,000 volumes.

(c) District Court - Presiding District Judge Bruce Monroe estimates a 25,000 to 30,000 square feet requirement to include three courtrooms, two of which are suitable for jury trials. This space would also accommodate court personnel for the District Court including: a coroner-public administrator and clerical personnel, office spaces and counter area to accommodate five clerks, one secretarial space and a reception room for the judges' chambers, witness lounges, jury lounges, and attorneys' conference rooms.

(d) Recording Office - Judge Monroe states that if land records are kept on microfilm, the above estimate for District Court space should be adequate for a recording office.

(e) Administrative Office - The office of the Administrative Director, Alaska Court System, recommends that 2,000 square feet be available for administrative personnel to include a 600 square foot conference room which would provide space for executive meetings and work space for visiting Anchorage personnel.

(f) State Police Service Section - Mr. Personnet, former Commissioner of the Department of Public Safety, estimated that Juneau judicial services functions would require space of approximately 1,000 square feet.

(g) Press facilities - 300 square feet estimated.

(h) Health and Welfare - Mr. Keith Stell, Regional Administrator of Probation and Parole, estimates that 1,540 square feet of office space are needed for six probation officers, a regional administrator and secretarial staff. Also needed are adequate separate holding facilities for adult and juvenile prisoners brought to court for arraignment or trial. Two cells of a total of 300 square feet should be adequate. Mr. Stell believes that juvenile short-term detention facilities should be in another building near the court.

The Alaska Judicial Council recommends that monies be appropriated during the current legislature for preconstruction planning and site acquisition for the Juneau Court facility to satisfy the requirements set forth above. We are attaching copies of correspondence describing in detail the needs of the agencies listed above.

Very truly yours,

George F. Boney

Mr. Russell Dunn
Staff Executive
Alaska Judicial Counsel
429 "D" Street, Suit 201
Anchorage, Alaska 9[illegible]1

Dear Mr. Dunn:

In response to our telephone conversation of this date, let me reconfirm the information I discussed with you.

I believe that Mr. Cain has adequately summarized our space needs in terms of the Probation Office in the new court building. Hopefully this space will be in a close proximity to the Superior Court (like on the same floor). I do want to clarify, too, the difference between a holding cell and a detention facility. First of all, the detention facility should be in a more informal setting and not in the Court building itself. In terms of planning then, for this particular structure I do not think that you should consider the space needs of a detention facility. The holding cell is another matter entirely, however, and I believe that it should be considered.

Alaska Statutes indicate that you cannot hold juvenile inmates in the presence of adult inmates. It often happens that secure cell-like holding facilities are needed at the same time in the Court House. Therefore, plans should be made for separate holding facilities for both juveniles and adults. These facilities should be designed to hold individuals for no longer than one hour at most. They need not be large but they do need to be secure. I believe that 150 square feet for each holding facility would be adequate. That would be a total of 300 square feet for both adults and juveniles.

Thank you for your patience in this matter and I am sorry to say that the letter John sent to you was apparently sent to the wrong address and returned to us. It is in the mail now and for that matter you should have received it again by this time. If we can be of any further assistance, please let us know as we are as anxious as anyone to see that the new Court facility has adequate space for our program needs.

Sincerely,

Keith Stoll
Southeastern Regional Administrator
Probation-Parole

P. O. Box 1224
Juneau, Alaska 99801

February 22, 1971

Mr. Russell Dunn
Staff Executive, Judicial Counsel
201429 "D" Street
Anchorage, Alaska 99501

Dear Mr. Dunn:

This will confirm our telephone conversation of 2/19/71, concerning space needs for the Probation Office in the proposed Juneau Court Facility. It is our understanding that you are now in the process of preparing plans for this.

The Probation Office would need approximately 1540 square foot. This breaks down as follows:

6 Probation Officers @ 120 sq. ft. each =	720 sq. ft.
Regional Administrator's Office	200 sq. ft.
Space for 3 Secretaries	240 sq. ft.
Conference Room	180 sq. ft.
Reception Area	200 sq. ft.
Total	1,540 sq. ft.

To the best of my knowledge, this would be the extent of our space need in the court facility. We are assuming that Mr. Stoll, in his letter to you of October 21, 1970, did not intend to convey the thought that a detention facility should be built into the court building itself, but rather be located elsewhere. We think 150 square foot would be adequate for a juvenile holding cell for the court.

We would be pleased to hear from you as plans for the court facility progress. We are presently in dire need of space. We have two staff vacancies which we are unable to fill for lack of working area.

Sincerely,

John L. Cain
Probation-Parole Officer

Dear Mr. Dunn:

The Office of the Administrative Director for the Court System will require at least 2,000 square feet of space in the new court building which is being planned for Juneau. This office intends to maintain a full time Assistant Court Administrative Director in the Juneau area with offices for backup as well as a full conference room.

This space will be needed immediately upon completion of the new court building.

Sincerely,

John W. Abbott

Dear Bill:

This is in reference to Chief Justice Boney's letter to you of September 29, 1970 regarding the court building at Juneau. On page 3 Chief Justice Boney suggests that you consult with me as to the requirements of the supreme court and that your committee come up with the recommended square foot estimate of the supreme court needs in the new building.

Attached is a document entitled "Projected Space Requirements for Supreme Court". The total area which we shall require, 8,239 square feet, will take care of the needs of the supreme court in the foreseeable future.

It is my understanding that Mr. Eastaugh is Chairman of the Committee you appointed to investigate the needs and requirements for a state courthouse in Juneau. I am sending a copy of this letter and the enclosure to Mr. Eastaugh, as well as to Chief Justice Boney.

As I told you on the telephone the other day, it is most important that Chief Justice Boney have a report on the complete requirements for a state courthouse in Juneau in time for the Judicial Council meeting in Anchorage on October 23, 1970.

Sincerely,

John H. Dimond

Anchorage, Alaska 99501

Dear Chief Justice Boney:

Your recent letter concerning a proposed new court building at Juneau coincided with a like request from the Juneau Bar Association for initial recommendations as to space needs of the superior court in such a structure. THis response is intended to answer both letters, as well as to provide information directly to the Alaska Judicial Council, which, I understand, will consider the subject at its next meeting.

In the brief time since these requests were received, my trial calendar has virtually no time to prepare adequately considered recommendations. The following statement of needs is therefore offered as only preliminary and subject to substantial revision upon opportunity for a complete review.

The structure should include at least the following facilities:

2 courtrooms
2 jury deliberation rooms (adjacent to the courts and with attendant bailiff space, with one room large enough for grand jury use)
1 judge's robing room
1 conference room (appropriate for children's proceedings, pre-trial conference, etc.)
2 judge's chambers, with an attendant reception room for secretaries to two judges
1 office for a visiting judge
1 office for two law clerks
1 jury assembly room
1 witness assembly room
2 attorney-witness conference rooms
1 judges' lounge
1 attorneys' lounge
1 judges' library
1 press room

1 office for the clerk of court
1 office for court trustee functions
1 office for marriage counselor functions
1 office for clerk's counter and general filing space
1 office for transcribing functions
1 public law library, with associated "stack" space for 50,000 volumes

The above space would serve only operations of the superior court, apart from related legal and staff services, and it would require a minimum of 25,000-30,000 square feet of floor space. This estimate would include circulation space, public toilets, mechanical services and stairways.

Consideration must of course be given to court-related functions such as those of the district attorney, public defender, probation and parole, process services of the State Police, holding cells for prisoner-defendants, etc. Particular concern must be taken (in early planning stages) for unique acoustical requirements for court recording, court furnishings, and other special needs of court operations. All courtrooms should be interior space without window exposures to outside traffic noise and other distractions. Attention must be given to private access to and private circulation within working areas for judges. Air conditioning apparatus without attendant background noise is essential in the courtrooms.

Some general considerations of major importance include ample off-street parking, substantial setback of the structure to permit dignified landscaping of the surrounding grounds, and exterior design and location fitted within the long-range state capital complex plans.

I will look forward to the opportunity to participate in more detailed and systematic planning for this significant capital improvement program for better judicial administration at Juneau.

Very truly yours,

Thomas B. Stewart

RE: Juneau District
Court Facilities.

Dear Frank;

You have asked that I be more specific, in terms of square footage, about the anticipated requirements of the District Court at Juneau. I have included a copy of a letter to William G. Ruddy, President of the Juneau Bar Association, for your reference. In this letter I outline this Court's anticipated needs simply by describing the number of rooms and uses for those rooms. The comments in this letter should be read in light of my earlier letter to Mr. Ruddy.

It is my present belief that the needs of the District Court can be fulfilled with a minimum of 25,000 to 30,000 square feet of floor space. This footage would include three courtrooms. Two of the courtrooms should be capable of handling jury trials while the other should be designed as an arraignment room and a court-room for trials without jury. The latter courtroom would also be used for coroner's hearings, motions and hearings of that general nature. The footage should accommodate support personnel for the District Court which would include:

1. Coroner-Public Administrator and one clerical personnel for his office.

2. Office space and counter area to accommodate five clerks.

3. One secretarial position and reception room for the judges chambers.

4. Attendant rooms for witness lounges, jury lounges and attorneys conference rooms.

It should be noted that all courtrooms should be in accordance with established American Bar Association standards for newly constructed courtrooms. The same standards should also be applied to attendant rooms such as jury chambers, witness lounges and attorneys conference rooms.

With approximately 25,000 to 30,000 square feet it is my belief anticipated growth of this area could be accommodated. I would anticipate a maximum of four judges could work out of the three courtrooms should our case load ever require additional judges. Prior to that time excess court space could be utilized, on an as needed basis, by Superior Court overages. I would also predict that a minimum of 25,000 to 30,000 square feet would allow additional attendant personnel such as law clerks to serve the District Judges.

If you have any further questions I will be happy to give you my opinion. Please do not hesitate to call on me.

Very truly yours,

Bruce

William G. Ruddy, Esq.
Juneau Bar Association
P. O. Box 1211
Juneau, Alaska 99801

Dear Bill:

Thank you for providing me with your correspondence with Chief Justice Boney. With very little changes, perhaps only in terminology, I would subscribe to his basic proposal for District Court facilities.

With anticipated growth I predict the District Court will need at least two courtrooms capable of handling jury trials and one courtroom for trials without jury. We will need an office for the Coroner-Public Administrator and one clerical personnel for his office. We will need one office space and counter area to accommodate five clerks. As many as three of these clerks might be in court at one time while others attend to clerical chores and serve the public. There should be one room devoted to secretarial help and a reception room for the judges chambers. We would also need attendant rooms for a witness lounge and jury lounge.

With two courtrooms capable of conducting jury trials and one courtroom which could be used for trials without a jury, arraignments, motions and coroners deliberations we would have the necessary flexibility to accommodate as many as four District Judges should the caseload ever justify this number.

I have not taken into account library facilities or recording office for the District Court. It is my understanding long term planning includes removing the recording function from the offices of the District Court. Should the District Court retain the recording function space would depend upon whether or not micro-filming would be used. This decision rests with the Chief Justice and I'm not familiar with his feelings in this matter.

Very truly yours,

Bruce

Mr. F. O. Eastaugh
Juneau Bar Association
Chairman, Committee on
Proposed Juneau Courthouse
P. O. Box 1211
Juneau, Alaska 99801

Dear Mr. Eastaugh:

With reference to our telephone conversation of yesterday, let me offer the following information concerning the proposed Juneau Court facility. Speaking specifically to the needs of probation for the future, keeping in mind an increased emphasis on the community service type programming I see that probation services are becoming involved in three basic spheres which in turn will have their impact upon the office space, location and function. In my brief analysis of the problem and projected needs, I am keeping in mind the statistics you referred to me concerning population growth in the Juneau area by 1975 and 1980 as set out by the State Department of Labor; these figures being 25,000 and 27,000 respectively.

The three program areas which I made reference to earlier are the relationship with the Superior Court-Children's Court, the relationship with the community and the working relationship the Probation Office should have with the detention facility located in a close proximity with the Children's Court. So when we speak of office space for probation, we are really talking about program service space and our programs are in these three basic areas. I believe they are all best utilized in a close proximity to the Superior Court, however, not all in the same building. For example, at the present time, we are establishing a Neighborhood Probation Center in downtown Juneau which is funded largely by Law Enforcement Assistance Act funds, Model City funds and State funds. This Center calls for a staff of four which includes three probation officers. At the same time, we have our offices in the Capitol Building which are in very close proximity to Superior Court. This is very helpful and is to be desired. Communication with the Superior Court is a necessity for the best possible programming. (As an aside, I would like to state that I think it is very difficult

for the Anchorage Probation Office to complete a satisfactory job for the Superior Court in Anchorage when there are many blocks across town, a fact in itself which creates barriers to communication, breakdown in communication and distorted communication, all of which work to the detriment of the program trying to be established.)

I would like then to project briefly our needs in these three categorical spheres as follows:

1) Office space immediately accessible to the Superior Court (in the same building). Space should be available here for not less than six probation officers, one office for Regional Administrator and secretarial staff of three. At this time, we have positions as follows: One Regional Administrator, five Probation Officers and a secretarial staff of two.

2) The second area under discussion will be the Neighborhood Probation Center which is a "store front" type facility which should be located in downtown Juneau close to the movie theaters and restaurants, also within a short distance of the Superior Court facility. This office should be staffed with at least four, hopefully, five probation officers, plus a clerical staff of two. Work at this level is primarily that of prevention of delinquency and work with the young child, the first offender, as well as school dropouts and large amounts of time devoted to community program participation.

3) The third basic area I have mentioned is the short term detention facility for juveniles (this is not to be confused with the very short time holding cell for adult prisoners being brought to Court on arraignment or some other purpose). The detention facility could be placed in a close proximity with the Court to aid in communication as mentioned previously and it should be under the direction of the Regional Administrator of Probation and Parole. The Children's Court Rules indicate clearly that the Superior Court Judge or his designee have the power to detain or release children based on protection to themselves, society, or to insure their presence at further court hearings. The primary reason for the location of the facility, however, is that re-

should not be severed upon the child being placed in a detention facility. Attempts should be made repeatedly to resolve the problems that are causing the child to behave in an unacceptable manner. These problem-solving attempts are only hampered by the inability of a parent or relative to be able to converse with their child because the facility is located several miles out of town and they have not taxi fare or transportation to and from the detention unit. These problems can be solved if a detention unit is placed in close proximity to the Superior Court in the more populated area of the City of Juneau.

As to the location of the Court itself, I personally believe that the Court should be located within the city limits of Juneau within reasonable walking distance of the Federal Building and the new Capitol Office Building and provided with adequate parking.

To summarize briefly then, we need three basic offices, one unit works very close with the Superior Court, the second unit concentrates larger amounts of time to prevention and community activities and the third unit is a d tention type facility staffed appropriately for twenty-fou hour service and under the direction of the Regional Administrator, Probation and Parole of the Division of Corrections.

All of the above units must be close to the courthouse. The first unit and the last unit should be incorporated in the design of the structure.

Sincerely,

Keith Stell
Regional Administrator
Probation-Parole

Re: State Courthouse Committee

Dear Bill:

The committee you appointed met October 12th and divided the assignments between themselves, the results of which are as follows:

1. Supreme Court Requirements - letter from Justice Dimond. Area requirement estimated as 8,239 square feet.

2. Superior Court Requirements - letter from Judge Stewart through Robert Boochever. Area requirement estimated as between 20,000-30,000 square feet without related facilities allowance.

3. District Court - letter from Judge Monroe. Functional needs described but no estimated area requirements included.

4. Public Safety - letter from Commissioner Personett. Area needs estimated at 1,000 square feet.

5. Press - no letters yet received, but orally I have been informed an area approximately 300 square feet would be sufficient.

6. Division of Corrections - letter from Keith Stell describing the needed functions but not providing area requirements.

Due to the delay in getting the foregoing from some of the sources, I am sending a copy of this letter, with copies of all of the mentioned letters, directly to Frank Doogan to carry to the meeting of the Judicial Council.

I cannot add anything more at this time, except to request Frank to convey to the Council the recommendation from the Juneau Bar Association that there is a great need for the project. The Committee will meet again soon and further consider these matters and this preliminary report.

Very truly yours,

F. O. Eastaugh

THE FOLLOWING PAGES WERE TREATED AS
A UNIT IN THE ORIGINAL FILE.

PROPOSED ACT DEALING WITH THE
ADMINISTRATION OF TRUSTS IN THE STATE OF ALASKA
WITH REFERENCE TO THE FEDERAL TAX REFORM ACT OF
1969

1. In the administration of any trust which is a "private foundation" as defined in Section 509 of the Internal Revenue Code of 1954, "charitable trust" as described in Section 4947(a)(1) of the Internal Revenue Code of 1954, or "split-interest trust" as described in Section 4947(a)(2) of the Internal Revenue Code of 1954, the acts described in Section 2 shall be prohibited.

2. The trust instrument of any trust described in Section 1 above shall be deemed to contain provisions prohibiting the trustee from:

(a) engaging in any act of "self-dealing" as defined in §4941(d) of the Internal Revenue Code of 1954), which would give rise to any liability for the tax imposed by §4941(a) of the Internal Revenue Code of 1954;

(b) retaining any "excess business holdings" (as defined in §4943(c) of the Internal Revenue Code of 1954) which would give rise to any liability for the tax imposed by §4943(a) of the Internal Revenue Code of 1954;

(c) making any investments which would jeopardize the carrying out of any of the exempt purposes of the trust, within the meaning of §4944 of the Internal Revenue Code of 1954, so as to give rise to any liability for the tax imposed by §4944(a) of the Internal Revenue Code of 1954; and

(d) making any "taxable expenditures" (as defined in §4945(d) of the Internal Revenue Code of 1954) which would give rise to any liability for the tax imposed by §4945(a) of the the Internal Revenue Code of 1954;

provided, however, that this section shall not apply either to those split-interest trusts or to amounts thereof which are not subject to the prohibitions applicable to private foundations by reason of the provisions of §4947 of the Internal Revenue Code of 1954.

3. The trust instrument of each trust described in Section 2 above, except "split-interest" trusts, shall be deemed to contain a provision requiring the Trustee to distribute, for the purposes specified in the trust instrument, for each taxable year of the trust, amounts at least sufficient to avoid liability for the tax imposed by Section 4942(a) of the Internal Revenue Code of 1954.

4. Nothing in this Act shall impair the rights and powers of the courts or the attorney general of this state with respect to any trust.

5. All references to sections of the Internal Revenue Code of 1954 shall include future amendments to such sections and corresponding provisions of future Internal Revenue laws.

6. Nothing in this Act shall limit the power of a person who creates a trust after the effective date of this Act or the power of a person who has retained or has been granted the right to amend a trust created before the effective date of this Act, to include a specific provision in the trust instrument or an amendment thereto, as the case may be, which provides that some or all of the provisions of Sections 2 and 3 of this Act shall have no application to such trust.

7. If any provision of this Act or the application thereof to any trust is held invalid, such invalidity shall not affect the other provisions or applications of the Act which can be given effect without the invalid provision or application, and to this end the provisions of this Act are declared to be severable.

PROPOSED ACT DEALING WITH
ALASKA NONPROFIT CORPORATION ACT
WITH REFERENCE TO THE TAX REFORM ACT OF
1969

1. This Act shall apply to every Alaska nonprofit corporation to which A.S. 10.20 applies, and which is a "private foundation" as defined in §509 of the Internal Revenue Code of 1954, and which has been or shall be incorporated under the laws of the State of Alaska.

2. The articles of incorporation of every corporation to which this Act applies shall be deemed to contain provisions prohibiting the corporation from:

(a) engaging in any act of "self-dealing" (as defined in §4941(d) of the Internal Revenue code of 1954), which would give rise to any liability for the tax imposed by §4941(a) of the Internal Revenue Code of 1954;

(b) retaining any "excess business holdings" (as defined in §4943(c) of the Internal Revenue Code of 1954), which would give rise to any liability for the tax imposed by §4943(a) of the Internal Revenue Code of 1954;

(c) making any investment which would jeopardize the carrying out of any of its exempt purposes, within the meaning of §4944 of the Internal Revenue Code of 1954, so as to give rise to any liability for the tax imposed by §4944(a) of the Internal Revenue Code of 1954; and

(d) making any "taxable expenditures" (as defined in §4945(d) of the Internal Revenue Code of 1954) which would give rise to any liability for the tax imposed by

§4945(a) of the Internal Revenue Code of 1954.

3. The articles of incorporation of every corporation to which this Act applies shall be deemed to contain a provision requiring such corporation to distribute, for the purposes specified in its articles of incorporation, for each taxable year, amounts at least sufficient to avoid liability for the tax imposed by §4942(a) of the Internal Revenue Code of 1954.

4. Nothing in this Act shall impair the rights and powers of the courts or the attorney general of this state with respect to any corporation.

5. All references to sections of the Internal Revenue Code of 1954 shall include future amendments to such sections and corresponding provisions of future Internal Revenue Laws.

6. Nothing in this Act shall limit the power of any nonprofit corporation now or hereafter incorporated under the laws of the State of Alaska:

(a) to at any time amend its articles of incorporation or other instrument governing such corporation by any amendment process open to such corporation under the laws of the State of Alaska to provide that some or all provisions of sections 2 and 3 of this Act shall have no application to such corporation, or

(b) in the case of any such corporation formed after the effective date of this Act, to provide in its articles of incorporation that some or all provisions of sections 2 and 3 of this Act shall have no application to such corporation.

7. If any provision of this Act or the application thereof is held invalid, such invalidity shall not affect the other provisions or applications of the Act which can be given effect without the invalid provision or application, and to this end the provisions of this Act are declared to be severable.

February 10, 1971

The Honorable William A. Egan
Governor, State of Alaska
Pouch A
Juneau, Alaska 99801

Dear Bill:

Re: Anchorage Judicial Complex

As I agreed to during our conversation in Juneau on February 5, I am enclosing for your consideration the report concerning the adequacies of the proposed additions of the judicial complex in Anchorage.

In order to meet the needs through 1975, the courts must have a building addition of 128,350 square feet. This building would be adequate to house all the courts in the Anchorage area, along with the offices of other state agencies which participate in the administration of justice. Adequate space would be provided for the attorney general, district attorney, public defender, and the Division of Corrections. This facility would provide adequate holding cells and feeding facilities for prisoners who would be transported from the new state jail at Eagle River to the state courthouse. At the present time we have $3,782,000 to construct an addition to our present courthouse. Present construction estimates supplied to us by the architect average $50 per square foot. This means that our total costs would be $6,417,500. It is my opinion that it is imperative that we obtain authorization for the issuance of additional ASHA bonds in the amount of $2,645,500.

As I mentioned to you in our conversation, the court has no way to expand except to the four lots to the east. Three of these lots are vacant and one has a building which is approximately 35 years old. From the best information obtainable, I believe that the maximum value of these four lots including the building should not exceed $500,000.

It would be deeply appreciated if you would consider recommending these capital improvements and submitting a bill to the legislature during this session. If the enabling legislation is passed this session, construction could begin during this construction season. In order to expedite this matter, I am sending Robert N. Reeves, administrative director, to meet with you and your designated commissioners.

If you have any further questions concerning this matter, please do not hesitate to call upon me.

With very good wishes, I remain,

Most sincerely,

George F. Boney
Chief Justice

GFB:ch

Supreme Court

State of Alaska

CHIEF JUSTICE
GEORGE F. BONEY

ASSOCIATE JUSTICES
JOHN H. DIMOND
JAY A. RABINOWITZ
ROGER G. CONNOR
ROBERT C. ERWIN

941 FOURTH AVENUE
ANCHORAGE, ALASKA
99501

February 10, 1971

Mr. Robert N. Reeves
Administrative Director
Alaska Court System
941 Fourth Avenue
Anchorage, Alaska 99501

Dear Mr. Reeves:

As chairman of the committee on space requirements for the new courthouse, I am including herewith a copy of the report and recommendations of the committee concerning space requirements for the new courthouse. These recommendations were agreed to by the members of the committee herein, and constitute the considered opinion of the people involved. It is further the very strong recommendation of the committee that it would be far better to await construction on an adequate building than it would be to start construction on a building with inadequate space at the present time. The committee specifically recommends the following steps be taken:

1. That the remaining four lots in the courtroom block be immediately acquired for long-term expansion plans of the court system.

2. That the present building be primarily occupied by the District Court and offices and that a minimum of modification of the building take place until a comprehensive plan can be worked out taking into account borough-city unification, area-wide police services and assumption of city court facilities in the present building.

3. That the new building to be built include as large a square footage on each floor as possible, but in the minimum from 18,000 to 20,000 square feet, in order to permit the grouping of the various services as closely as possible for reasons of both efficiency and public convenience.

4. That in long-range planning the new court building be primarily a superior court building with the law library on the first floor and in the basement, with the upper floors being occupied by the supreme court and the court administrative office. It is ultimately considered that the supreme court and the administrative office in future expansion would be removed from the building the the superior court ultimately to be expanded throughout the entire structure.

5. That at the present time the public defender's office, the attorney general's office, the district attorney's office, the state police judicial services section, the division of corrections, and if at all possible, the borough attorney's prosecuting office be incorporated into the office space in the existing structure, and on one full floor of the new building to be built. In the ultimate long-range plan, these offices would be moved to the third phase of the project, along with the supreme court, and the ultimate need for parking which would be incorporated into a third building.

6. That as presently conceived the building of approximately five stories and a full basement with 12,000 square feet per floor is simply not sufficient to permit reasonable operation for any of the member agencies which might occupy the building and does not provide sufficient net working space to permit efficiency of operation. This can readily be seen by the listing of space requirements which follows for the various courts and agencies:

Superior Court -	67,000 sq. feet
District Court -	40,000 sq. feet
Attorney General -	6,000 sq. feet
District Attorney -	5,000 sq. feet
Public Defender -	3,100 sq. feet
Division of Corrections - (Probation & Jail holding facilities)	7,000 sq. feet
Borough Attorney -	750 sq. feet

Supreme Court Administrative Office -	16,600 sq. feet
Law Library -	18,000 sq. feet
Administrative office supply facility -	7,000 sq. feet
Supreme Court -	18,000 sq. feet
TOTAL SPACE REQUIREMENTS FOR THREE TO FIVE YEAR PROJECTIONS:	186,350 sq. feet

When you subtract from this total the usable square footage in the present building of 58,000 square feet, we are left with an immediate space requirement for a three-year projection which would be the approximate time for completion of the building, of 128,350 square feet. Thus, in any building which would only have five floors and a full basement, including 70,000 usable square feet, of which one-third must be reduced for the public spaces necessary in high-rise buildings, we have a building not capable of efficient use by anyone.

7. We urge that immediate steps be taken to authorize additional AHA Bonds in the approximate amount of $2,500,000 to $3,000,000 to complete the erection of an adequate courthouse and supporting services building necessary in Anchorage at the present time, and which would not take into account the possible building of the pipeline or the Native Land Claims settlement, both of which could substantially increase the need referred to herein.

Sincerely yours,

Robert C. Erwin

Mr. Robert Ziegler
Chairman, Senate Judiciary Committee
Pouch 5
Juneau, Alaska 99801

Gentlemen:

This letter is simply to inform you of certain problems which are presently facing the court system at Anchorage, Alaska, with regard to the new addition to be constructed behind the present courthouse, and with certain additional statewide problems which call for immediate action on the supplemental appropriation.

At the present time, I am enclosing a letter which indicates the space requirements for the various agencies who wish office facilities in the new building. As you are aware, ASHA bond financing had been arranged by the last legislature, and the sum of $4,500,000 was available for the construction of this new courthouse facility. The construction budget is approximately $3,750,000 at the present time, with the other costs going to design, etc. We have preliminary estimates from the architect, Mr. Don Coolidge, which indicate that for the construction budget as presently noted, that a building of approximately 70,000 gross square feet can be built and that

amount must be reduced by approximately 15% for public space, etc., available to the court system.

The immediate problem is the fact that the superior court alone at Anchorage, Alaska, needs space of 67,000 square feet in order to take care of the present expansion of superior court judges in Anchorage and to have available facilities at the time that the new courthouse opens approximately two years hence.

The superior court in Anchorage has experienced unprecedented growth at the present time and well in advance of any possible anticipated growth which is a result of the pipeline or native land claims settlement. Judge Fitzgerald has indicated that the superior court has seven resident superior court judges and has the use of one full-time extra superior court judge by virtue of reassignment of either Judge Hanson of Kenai or Judge Burke of Kodiak, with a total of eight superior court judges available at any one time. Additionally, Judge Sanders has been brought to Anchorage at various times in order to handle matters because of the large workload in this area. In the present structure at 941 Fourth Avenue, Anchorage, Alaska, there are only four superior court courtrooms, and a fifth superior court courtroom for family matters was constructed on the first floor, approximately a year ago. Additionally, there is no office space for the additional superior court judges and at the present time, Judge Hanson, Judge Burke and Judge Singleton are making do with makeshift offices with an absolute minimum of space to work.

In order to make the maximum possible use out of the courtroom space available, Judge Fitzgerald ordered double shifting of the courts with court starting in each courtroom at 8:00 a.m. and going through to 1:00 p.m., when the judge on the morning shift would vacate the bench, and the judge on the afternoon shift would take up with a totally new trial from 1:00 p.m. to 6:30 to 7:00 p.m. While this has given us a maximum utilization of the courtroom facilities, it has not been possible to satisfy many of the complaints of the supporting staff who understandably are reluctant to

come to work at 7:30 in the morning and continue through to 6:30 at night. This necessitates a shifting of the personnel so far as hours of employment are concerned, and, of course, gives us quite a problem with the paperwork attendant with the filing and trial of all cases. The supporting staff is almost always required to do certain work in the clerk's office to make certain that we have no problems in that regard.

The shifting has caused serious burdens on them, but so far they have gone along because of the necessity to clear trials.

The double shifting has created another problem, and that is with the calendaring of a large number of cases. A trial court administrator was obtained after aid was given by the legislature for this position, and at the present time, he has taken over the very difficult chore of calendaring all of the cases in the superior court with the exception of family court division, in order to free Judge Fitzgerald of a great number of administrative burdens which were growing impossible. This aid has been quite successful, and at the present time a calendar study by the accounting firm of Ernst & Ernst has prepared a preliminary draft of the calendar system which we hope will work in this district. It goes without saying that if there is no space for the judges to operate, a calendar study would seem to be somewhat useless under the circumstances.

In the district court, Judge Paul Jones has noted at least a 50% increase in cases from last year, due primarily to the new contract between the city and the Spenard Service Area of Anchorage. Police services are now available on a full-time basis in the Spenard area, which in the past was served by the State Police when they could get there. They did a fine job for the personnel that they had, but the State Police are not equipped to provide urban police services and in heavily populated areas. As a result of a comprehensive police activity in this area, 3,000 additional misdemeanor cases a month are coming into the district court at the courthouse at 941 Fourth Avenue. Previously, these cases were simply not filed,

and it is now taking almost the full time of two district court judges to handle what was not in existence four or five months ago. An attendant problem with this is the fact that the district court courtrooms at Anchorage are of very small size and will not accommodate more than 50 to 60 people at one time. Arraignments on traffic matters in the past few months bring in as many as 200 to 250 people, and there is not a courtroom to accommodate them.

An additional problem is created by the fact that the new courtrooms constructed on the first floor by the superior court have taken all of the district court jury facilities, etc., and at the present time the jurors mingle in the halls with those charged with traffic violations, and defendants in the cases they are about to sit on. This problem co-exists in the superior court where the use of every available square foot of space by both administrative and supporting functions and the judges themselves has taken away all jury assembly rooms, etc., and the jurors must stand in the hallway without chairs. The public, of course, is very upset about this situation, as are the jurors who must co-mingle with everyone, including lawyers, defendants and witnesses which appear in the trials.

Judge Jones indicates that an additional problem will be created because of the inability to get agreement with the Anchorage City Council for funding of court activities in the municipal court, which is presently carried on at 6th and C Street in Anchorage. The city has refused to enter into a new contract for judicial services, and to pay its share of expenses, and therefore it appears it will become necessary for us to vacate those facilities and to bring the city cases down to the 941 Fourth Avenue location. Since the city hears approximately 3,000 cases a month, the additional burden on the district court is not difficult to realize. An additional problem, however, will be created by the lack of jail holding facilities in the courthouse which is magnified by the problem that normally in city court there is arraignment of 40 to 50 prisoners every morning. These prisoners are misdemanant defendants who have

been arrested by the city police in downtown areas during the preceding evening. If they must be transferred to the present courthouse, then we have a definite security problem, both transporting and holding them. While a great deal can be done about arraigning them in the jail, etc., there is still the additional problem created by the sheer numbers of people involved in this particular transaction.

Judge Jones further anticipates substantial growth if there is a full unification of the City of Anchorage and the Greater Anchorage Area Borough, and he can predict an immediate one-third increase very similar to the increase which happened when the Spenard Service Area obtained extensive police services. Since the population in that area would be roughly equivalent to what happens in Spenard, the prediction would appear to be accurate, and will call for some rather fancy footwork so far as handling of traffic and misdemeanor matters is concerned.

Again, these requirements have been placed upon us in the absence of both a pipeline and a native land claims settlement, and we are almost unable to judge at the present time how great a growth will be necessary in the district court except that it appears that the growth will be very substantial. It is our present plan that as soon as the present courthouse has more space available, that the district court will expand into the area vacated by the superior court to take advantage of the necessary courtroom space, etc.

The aforementioned problems afford a very critical analysis of the problem facing the court system with regard to its supplemental appropriation, and the need for additional jury monies and construction costs for remodeling the courthouse in Anchorage. The tremendous increase of caseload in the district court, the double shifting in the superior court, and the increase by the Supreme Court of jury fees paid to each individual from $9 to $21 have seriously overtaxed the budget of the court system. In fact, at the present time, the jury fee account

has been overspent to approximately $75,000 and this matter increases by geometric proportions each month as we continue to double up on use of the facilities.

The Supreme Court is faced with the alternative of continuing to have jury trials to dispose of the cases in the time requirement set by the United States Constitution, or to in fact cut out jury trials because of the lack of money and the possibility of foundering our own budget in an attempt to keep the trials going. Unless the legislature provides some relief immediately, the Supreme Court will be forced to make a decision to stop all jury trials with the attendant disruption of calendars which are normally set six to seven months in advance, and with the attendant problem of figuring out methods of release for those prisoners who cannot be tried but who are available for trial because they have been incarcerated. It would not be permissible under prevailing constitutional law to deny a person a jury trial because of lack of money for such service and to keep him incarcerated during this period of time.

An additional part of the supplemental appropriation is the actual construction of two additional courtrooms in the present space in Anchorage, Alaska, which was made possible by moving out the probate department of the superior court which has been placed in a house trailer directly behind the courthouse, and the recorder's office which will be moved to the Voyager Hotel. While neither of these arrangements is satisfactory, it will at least give the present judges more space to hear cases and enable us to ease up on the double shifting problem which has overtaxed the administrative staff to a great degree.

These problems, of course, point out the urgent need for a building at Anchorage, Alaska, with sufficient space to accommodate the various purposes. The attached letter points out a need for approximately 128,000 square feet of usable space, and, of course, that is far in excess of the ability to pay at the present time. It is therefore the suggestion of the committee that all of the funds that are available be used immediately to

construct a superior court court building behind the present structure of four floors, with the top two floors being left entirely vacant and the other floors finished to take care of immeidate needs. Without question, before the building is moved into, there will be a requirement for a finishing of the third floor in order to accommodate even the available judges as well as a certain increase in the number of judges necessary to handle judicial duties in the superior court at Anchorage. We are anticipating a need for a minimum of 11 to 12 courtrooms, and, of course, the finishing only of the basement and the two floors on the present construction budget would not permit that many courtrooms to be constructed.

Because of the need for additional construction on the top two floors of the new courthouse, a need for a courthouse in Juneau, a need for a courthouse in Sitka, and requests from the federal government to purchase the courthouse in Nome, we would ask for authorization through ASHA bond financing or such other method as the legislature deems feasible, to provide monies for these various projects.

Particularly in Anchorage the funding would be such to permit the finishing of the superior court court building, the acquisition of the additional four lots in the courthouse block here in Anchorage at a cost of approximately $600,000, and the construction of a court-related office building which would house the Supreme Court of Alaska, the attorney general's office, the district attorney's office, the public defender's office, the highway section of the attorney general's office, the borough prosecution office, the Alaska court administrative office, and parking facilities. In this manner we could develop a plan for the orderly transition in the various buildings and provide service to the public which would be appropriate. We are not talking about judicial frills; we are talking about the basic minimum service that is required by the Constitution of the United States and of the State of Alaska.

While this letter is somewhat rambling in content, it is meant simply to set down on paper the problems which we are immediately faced with and the urgent need of seeking some sort of solutions to them. It is fairly obvious that if we have these problems without the building of a pipeline, or a native land claims settlement, their impact on this problem area may very well completely break down the machinery of justice which is necessary for a vitally functioning state.

Sincerely,

Robert C. Erwin

Bush Justice

RICHARD WHITTAKER
ATTORNEY AT LAW
BOX 13 KETCHIKAN, ALASKA 99901
107 STEDMAN STREET CA 5-5333

April 24, 1971

The Honorable Chief Justice George Boney
Alaska Supreme Court
941 - Fourth Avenue
Anchorage, Alaska 99501

Dear Chief Justice Boney:

Your visit to Juneau and attendance at the meeting of the House of Representatives bush league meeting and a recent conversation I had with Justice Dimond have brought to mind a couple of matters which I wanted to mention to you, and I am taking the liberty of addressing myself to the problems by mail, in order to get them to your attention as quickly as possible.

The Supreme Court should be aware that in the early part of January of next session, the House Local Government Committee intends to work over the various bills which aim toward setting up a Department of Community and Regional Affairs, including the Rural Alaska Development Group bill, which would set up regional government and use it as a means of compelling service from State government. The committee and others are looking at several different ways of bringing State government closer to the people of the bush. Indeed, the House Local Government Committee in passing out the Governor's regional service area bill, did so on the theory that if nothing else, it would give people in the unorganized borough a chance to experiment with area government as a concept. What this is all leading up to is that in reading through the bush justice conference report, which I have at hand, it occurs to me that one of the basic concepts is completely incorrect. I refer of course to the fact that the State agency which so often has the most contact with villages on a regular basis is the Department of Public Safety. I simply do not believe that the State of Alaska puts its best foot forward when Troopers are sent to the villages. What should be sent is a governmental officer of relatively high rank, who is trained in all the departmental needs, and acts as an ombudsman of sorts, and who can do some investigatory work if necessary and transport prisoners if necessary, but who is a person who is able to develop action for areas which are lacking action and who serves perhaps as some

quasi-judicial authority. In short, a completely different concept. What we require now is a State Trooper who functions in this fashion, but of course it's impossible because of lack of training and a different direction. In the old days of Tammany Hall, the smiling Irish cop on the beat had many of the attributes I have set forth because he related to a political machine which was able to bring about answers outside of the police and legal machinery.

I think additionally that the Court should give considerable consideration to revising the Rules of Court which relate to the magistrate's court and indeed the District Court unless the District Court has become such a magnificent forum that no one except he who is represented by counsel may attend. I think that we need to completely review the need of a District Court in the bush, and even as it applies to larger communities, and provide rules and laws in its jurisdiction which are relatively easier of administration. Perhaps I am still in legislative shock. It occurs to me that a manual could be written and adopted setting forth both the criminal and civil jurisdiction and the rules of court which would solve 90% of the problems brought to court and which would allow two intelligent men without the need of counsel with a judge who is disposed to seek truth and justice, whatever they are, to accomplish the ends of justice. At least this must needs be done before the magistrate's court. Perhaps this is how that court functions now in any one given community, but I think that the lawyers amongst us can go a long way in helping to clarify some of the legal ideas which are involved in the use of the magistrate's court.

Thirdly, I should like to recommend most strongly that the Supreme Court review the situation of the small claims court. I know that as a general rule lawyers don't go there, but when I opened up my practice in Ketchikan before the advent of Legal Services, Inc., I did go to that court to defend persons who had been harrassed by collection agencies, and I found that there were no rules, and what rules there were were incomprehensible. The problem in the small claims court is that it is not a people's court as it was intended, but rather a court for the few, i.e., the collection agencies. I have discussed with other attorneys in Ketchikan the possibility of trying to work out a plan of attack on the need for rules in the small claims court as a project of the Ketchikan Bar Association, but none of us have had time to

do this, and I do not foresee in the near future any particular amount of time that I will have, the Legislature having done such damage to my law practice.

In conclusion, I want to applaud the court system for attending to the needs of the bush as it has, particularly in a time of crisis, where the court system is being accused of all kinds of strange things, including "crime in the streets", whatever that is. I have taken a view on the floor of the House of Representatives which is defensive of the court system. The court has come under attack whenever we talk about loaded dockets and criminal problems as if it were the court which had created these problems. I disagree that the court has, and have urged on my colleagues that it has been the State Police and the Department of Fish and Game and certain other agencies which have caused more problems than they seek to solve. I particularly like to refer to the "celebrated dingo" case at Fairbanks, which unfortunately is typical of the kind of thing the Department of Fish and Game likes to foist on the court system during the winter months when they have nothing better to do. I would further point out to the court that much time is utilized in the lesser courts of the State handling speeding matters, which is rather strange to me because I have been told by the Department of Highways that speed limits are set by following radar study and an averaging of speeds. If this is true, then it's ridiculous that the State Police waste the time of the court by bringing in anybody who has done any less than 20 miles over the speed limit, unless it truly can be said that he is driving in an unsafe fashion.

I do not seek an answer to this letter, as I know you are very busy, but did want to call these matters to your attention, and perhaps some time we could discuss them further.

Sincerely yours,

RICHARD WHITTAKER

ANCHORAGE, ALASKA
99501

BUSH JUSTICE CONFERENCE

MT. ALYESKA

GIRDWOOD, ALASKA

DECEMBER 8 - DECEMBER 11

JUDICIAL COUNCIL MEMBERS

Chief Justice George F. Boney, Chairman
Lester W. Miller, Law Member, Anchorage
V. Paul Gavora, Lay Member, Fairbanks
Ken Brady, Lay Member, Anchorage
Frank M. Doogan, Law Member, Juneau
Peter D. Meland, Lay Member, Sitka
Michael A. Stepovich, Law Member, Fairbanks

CONFERENCE RESOLUTIONS

WHEREAS: THE QUALITY OF JUSTICE IN THE ALASKAN BUSH AREAS SHOULD BE IMPROVED:

BE IT RESOLVED THAT:

1. THE LOCUS OF DECISION-MAKING IN THE ADMINISTRATION OF JUSTICE IN VILLAGE ALASKA MUST MOVE CLOSER TO THE VILLAGE. TO ACHIEVE THIS RESULT THERE MUST BE GREATER NATIVE PARTICIPATION AT ALL LEVELS IN THE ADMINISTRATION OF JUSTICE.

a. There should be greater direct participation by Native citizens in the administration of justice at all levels, including their employment in policy-making positions in all agencies involved. Every agency should examine its qualifications requirements in order to revise them wherever they may arbitrarily exclude otherwise qualified Alaskan Natives. Examples include the height requirements for Alaska State Troopers, minor criminal records, formal education, etc..

b. Appointment of an Alaskan Native to membership on the Judicial Council and the Judicial Disqualification Commission is recommended.

c. The selection and removal of magistrates should be made more responsive to the desires of the communities served. Continuing critical evaluation of performance of duties by magistrates should be made. Consideration should be given to assigning principal responsibility for appointment and removal of magistrates to presiding district court judges.

d. The strengthening of village councils is central to the administration of justice in remote Alaska.

e. The Local Affairs Agency must be strengthened and upgraded to department level and its technical assistance functions fostered if there is to be successful administration of justice in the villages.

Representatives of the Local Affairs Agency should visit villages to work with local officials. They should help the villages draft and revise ordinances, facilitate participation of villages in revenue-sharing programs, and improve law enforcement techniques.

2. THERE MUST BE A GREATER ACCESS TO LEGAL SERVICES AND THE PROCESS OF JUSTICE IN VILLAGE ALASKA.

a. The ordinary method of travel in the bush is by air. To meet the basic requirements of regular travel and to enable emergency service, State Troopers should be authorized to operate leased or state owned aircraft for their official duties and to aid officers of the court and associated agencies in the performance of their duties.

b. The Alaska Legislature should fund a program creating village constables in village Alaska to be chosen by village governing bodies to serve at their pleasure and to act as village law enforcement officers with the support of the Alaska State Troopers.

c. The travel budgets of the superior and district courts should be increased so that they may hold trials where the parties and witnesses live. When trials are elsewhere, but witnesses live in the bush, the courts should use special masters to take evidence in the witnesses' villages. When actions are filed in places not accessible to defendants or their witnesses, changes of venue to the defendants' homes should be liberally allowed. These changes would facilitate more accurate factual determinations, avoid unfair default judgments, and provide education in judicial processes and substantive law in the bush.

d. The Supreme Court is encouraged to order at least an annual circuit court session of the superior court in the major community

in each House election district.

e. The State Legislature should fund staff offices in Bethel and Nome for Alaska Legal Services Corporation and a Public Defender Agency office in Bethel as a step toward creation and support of rural principal judicial centers.

f. Techniques should be explored to encourage the private bar associations to provide better services in Alaska villages. As an example, group legal services experiments in other states should be studied. Public interest law firm efforts might also be encouraged.

g. Every village should have a detention facility and a juvenile detention facility separate from the detention facility and standards should be established for such facilities. These are needed to protect villages from dangerous persons without delay and without unduly long incarceration because of transportation time.

h. Special emphasis must be given to the development of manpower capable of dealing effectively with the administration of justice in village Alaska, and to appropriate education for the affected public.

(1) The colleges and universities within the state should establish programs for the training and continuing education of magistrates, constables, paralegal and other associated personnel. Such programs should be developed and operated in cooperation with the Judicial Council, the Department of Public Safety, the Alaska Federation of Natives, and other appropriate agencies and organizations. Major emphasis should be placed on on-the-job training.

(2) The University of Alaska should establish an institute to train legal personnel in both rural and urban areas in Native culture and languages. Incentives should be provided for attendance at this institute.

(3) The Department of Education should develop curriculum

concerning legal concepts, processes, rights and remedies for junior high school students throughout Alaska.

(4) The colleges and universities within the state should establish adult education programs concerning legal concepts, processes, rights and remedies for Alaskan villages. This program should include dissemination of printed materials in attractive format which explain the rights of individuals under the statutes and decisions.

(5) A program should be established for recruiting bi-lingual lawyers fluent in English and another recognized language common to a region of Alaska to serve in Alaskan public programs which relate to the administration of justice. Such a program would work through law school scholarships and financial grants equivalent to what bi-lingual college graduates might otherwise earn if they chose to work in other Alaskan community leadership or service positions.

(6) The colleges and universities within the state should be encouraged to establish a training and continuing education program for the development of paralegal personnel. Persons participating in and successfully completing such a program should be considered for certification to counsel persons within the limits of their training and expertise.

i. Greater understanding of and more information about all direct and related aspects of judicial administration are needed to provide a basis for policy making, for establishing appropriate administrative arrangements, for training and education, and for improving other aspects of providing justice in rural areas. In particular, the cultural context and impact of judicial administration must be thoroughly understood by all involved in the system of bush justice. Toward these ends, the Judicial Council, the State Administration, the University of Alaska, and other appropriate organizations should initiate, sponsor

and undertake programs of research concerning such areas as the character and processes of village law-making, judicial administration, and law enforcement.

3. SOME MODIFICATIONS IN SUBSTANTIVE LAW ARE NECESSARY TO CORRECT INEQUITIES IN VILLAGE ALASKA. SUCH MODIFICATIONS RELATE TO THE ADMINISTRATION OF JUSTICE IN URBAN ALASKA AS WELL.

a. There should be a study of the program effectiveness of present correctional and dispositional alternatives in village Alaska. If particular techniques are inefficacious, they should no longer be employed.

b. Dispositional process alternatives prior to invocation of the criminal and juvenile process should be legitimated and encouraged. In the process, there should be guidance on what dispositional alternatives prior to invocation of the criminal process are appropriate.

c. Local alternatives for the control and rehabilitation of juveniles should be developed.

d. Review and changing of the laws concerning alcohol-related offenses should be continued to provide non-criminal alternatives. This conference recommends that detoxification facilities be established as an alternative to incarceration for alcoholic and alcohol-related offenders throughout all areas of the state. This conference further recommends that training be given to all officers of the criminal justice system to recognize alchoholism as an illness and that this be done in conjunction with broad community education.

e. Waivers of rights to counsel, silence, trial by jury, trial by the district court, and other related rights, should be accepted by magistrates only after the most careful scrutiny for voluntariness

and understanding. Advice as to rights should be thorough and discursive and in the language primarily spoken by the defendant. Where an attorney or appropriate paraprofessional is available, his presence on behalf of the defendant should ordinarily be obtained.

f. It shall be a mitigating factor in sentencing, but not in the determination of guilt, that an act, violative of law, was committed pursuant to custom.

g. The courts and legislature should recognize customary adoptions common among Alaska Native people. Recognition of customary adoptions should not involve lengthy court procedures but rather summary procedures.

h. Court arraignment procedures must include the advising of constitutional rights in a language understandable to the defendant. Boards of qualified interpreters should be established and funded and their services made available throughout the state for this purpose.

i. It is recommended that the boundaries and number of judicial districts be examined and changed where necessary to facilitate access to judicial services. The social and transportation patterns of the individuals to be served should be given prime consideration in the establishment of judicial districts. Example: Barrow should be part of the fourth judicial district and Bethel should be either part of the third judicial district or a new special Superior Court District should be created for Bethel.

j. The Alaska Administrative Procedures Act and the Alaska Administrative Code should be amended to:

(1) Require that hearings on administrative licenses, rules, and orders be held in the organized community or communities affected by the issuance of the license, rule or order.

(2) Extend the time allowed for administrative appeals from

30 days to 60 days.

(3) Require the posting of notice at the situs, the publication of notice in the newspaper published nearest the situs and public hearing be held at the situs or community nearest the situs prior to the granting of the application, the license or any interest in tidelands or property, in order to adequately protect rights or interests in these tidelands or property.

k. Civil Rule 53 should be interpreted and implemented to allow for the liberal appointment of special masters to take factual evidence in areas not frequently served by the superior court and where required for the ends of justice.

l. Changes in venue requirements should be as follows:

(1) For criminal actions, venue should be originally set in the election district in which the alleged crime was committed; for civil actions venue shall originally be set in the election district which has the most significant contacts with the transaction which is the subject of the action.

(2) AS 22.10.040 should be amended by deleting subsection (2) and enacting a new statute in the place of subsection (2) which reads:

A motion for change of venue <u>shall</u> be granted when required for the convenience of the witnesses and the ends of justice.

(This amendment will change the existing law which places a venue change for witness convenience and justice in the discretion of the superior court judge to a mandatory change requirement in this one instance.)

BE IT FURTHER RESOLVED THAT:

4. THE STATE SHOULD ENCOURAGE AND PROVIDE PLANNING ASSISTANCE IN THE ESTABLISHMENT OF COMMUNITY MENTAL HEALTH CENTERS IN THE REGIONAL

SERVICE CENTERS OF THE STATE, SUCH AS BETHEL, NOME, KOTZEBUE, BARROW, FORT YUKON AND OTHERS. ALSO, THE COMMISSIONER OF THE DEPARTMENT OF HEALTH AND WELFARE SHOULD CONSULT WITH THE DIRECTOR OF MENTAL HEALTH AND THE SUPERINTENDENT OF THE ALASKA PSYCHIATRIC INSTITUTE TO PROVIDE RESIDENT QUARTERS FOR PERSONS REFERRED BY THE COURTS FROM RURAL AREAS FOR EVALUATION AND REFERRAL UNTIL SUCH TIME AS MENTAL HEALTH FACILITIES ARE AVAILABLE.

5. THE STATE DIRECTOR OF COMMUNICATIONS SHOULD COORDINATE PRESENT EXISTING RADIO COMMUNICATIONS NETS AND ESTABLISH OTHERS AS REQUIRED, WHEREBY ALL AREAS NOT HAVING ACCESS TO COMMUNICATIONS MAY BE SERVED. THE CENTER OF EACH NET SHOULD BE LOCATED IN THE AREA OF EACH PRESIDING DISTRICT COURT JUDGE OF EACH JUDICIAL DISTRICT AND BE MADE AVAILABLE TO ALL AGENCIES AND PERSONS ASSOCIATED WITH THE JUSTICE SYSTEM ON A 24 HOUR PER DAY BASIS. IN CONJUNCTION WITH THE ABOVE, THE JUDICIAL COUNCIL OR OTHER APPROPRIATE AGENCIES SHOULD INTERVENE IN THE FCC DOCKET ON DOMESTIC SATELLITES TO URGE THE NEED IN VILLAGE ALASKA FOR IMPROVED COMMUNICATIONS IN THE ADMINISTRATION OF JUSTICE.

6. AS EACH COMMUNITY SHOULD HAVE BETTER CONTROL OF ITS AFFAIRS, LEGISLATION SHOULD BE ENACTED TO AUTHORIZE THE ISSUANCE OF PACKAGE AND BY-THE-DRINK LIQUOR LICENSES TO CORPORATIONS WHOLLY OWNED BY MUNICIPAL CORPORATIONS OR ORGANIZED COMMUNITIES.

7. THIS CONFERENCE RECOMMENDS THAT ANOTHER JUSTICE IN THE BUSH CONFERENCE BE HELD SOMEWHERE IN A RURAL COMMUNITY.

INTRODUCTION

The Alaska Judicial Council is established by Article IV, Section 9 of the Constitution of the State of Alaska. The Council is composed of seven members including the Chief Justice of the Alaska Supreme Court who serves as Chairman. Three of its members are appointed by the Board of Governors of the Alaska Bar Association. Three members are non-lawyers appointed by the Governor, and confirmed by the legislature. The Council has two functions. First, it makes nominations to the Governor for the appointment of persons to vacant positions in the Judiciary or to the post of Alaska Public Defender. The Council also conducts studies and makes recommendations for improvements in the administration of justice throughout the State. It is required by the Constitution to submit a report and recommendations to the Supreme Court and to the legislature at intervals of not more than two years.

The judicial nomination process engaged in by the Council begins with the solicitation by the Secretary of the Council for applicants for specific judgeships. Notice is given to all active members of the Alaska Bar Association. All applicants are then brought to a meeting of the Judicial Council, at the expense of the Council, for personal interviews. At this time the Council also considers the results of a qualifications poll which has been conducted with respect to each candidate by the Alaska Bar Association. The Council then votes to nominate applicants to the Governor for specific

judgeships. The Governor then appoints from the list of nominees.

To arrive at its recommendations for improvement of the administration of justice in Alaska the Council engages in various activities. First, of course, are the regular Council meetings wherein various problems are brought to the attention of the Council either by its members or by persons who have requested to appear. Also, the Council conducts public hearings throughout the State on the subject of the administration of justice. The Council also sponsors and conducts seminars and studies relating to specific problem areas. Ultimately drawing upon all of these sources, the Council makes its recommendations to the legislature, the Court System or the Governor for action to be taken for the improvement of justice.

This report covers the activities of the Council in carrying out its Constitutional mandate during the years 1969 and 1970 and contains the current recommendations of the Council for improvements in the administration of justice in the State of Alaska. This report is not meant to be repetitive of prior reports and because of this will refer to material contained in those reports without fully reproducing it.

II.

SUMMARY OF MEETINGS

February 20, 1969 - Juneau, Alaska

The first meeting of 1969 was held in Juneau on February 20th. Present were Chief Justice Buell A. Nesbett, Chairman; Mr. Jack Werner, lay member of Seward; Mr. Frank Doogan, law member of Juneau; Mr. Peter Meland, lay member of Sitka; and Mr. V. Paul Gavora, lay member of Fairbanks. Mr. Michael Stepovich, law member of Fairbanks was absent outside the state and Mr. Lester W. Miller, law member of Anchorage, was present for the afternoon session. The Chairman opened the meeting by reviewing the Council's recommendations in its Fifth Report. These were: establishment of a public defender agency, increase of judicial salaries, relieving District Judges of coroner-public administrator duties, and micro-filming of public records. It was agreed that no priorities be given to these items. The Council then generally discussed each of these items in turn. The proposed bill for handling the coroner-public administrator problem was presented and reviewed by the Council and the Council voted to go on record favoring the concept of the transfer of the duties of coroner and public administrator to the Commissioner of Public Safety.

After reviewing the legislature program, the Council considered a report by the Statewide Committee on Sentencing and Appellate Review of Sentences which included a recommendation to amend AS 22.05.010 to give the Supreme

Court jurisdiction to hear appeals from sentences imposed by the Superior Court on the grounds that the sentence was either excessive or too lenient and to modify the sentence accordingly. The report also proposed that for this purpose that the Supreme Court be permitted to sit in divisions. It contained an additional provision providing for appeal from the District Court to Superior Court in some cases. The recommendation included other proposals for reform of the appellate system. The Council voted to approve the committee report, following lengthy discussion, and to recommend to the legislature that it be implemented.

The Chairman also presented the report prepared by the Subcommittee on Probation and Parole which had been approved by the Statewide Committee. The report related to several subjects including: (1) increasing the probation personnel of the Division of Corrections; (2) changing the personnel requirements so as to reduce turnover within the Division of Corrections; (3) the placing of more persons under probation-parole supervision; (4) giving more supervision to offenders; (5) protecting the society at large by virtue of adequate supervision and evaluation of persons placed on probation and (6) salvaging of more criminal offenders as a result of adequate probation. The report also questioned whether the Division of Corrections should be in the Department of Health and Welfare. The Council then voted to go on record urging the legislature to implement the present

probation staff in order that it become more effective; the Council further determined to make a study regarding the desirability of the probation function being moved from the Department of Health and Welfare and placed in the court system.

In the afternoon the Council met with Governor Miller and discussed its recommendations as contained in the Fifth Report. The need for a public defender agency was stated and Council member Lester Miller advised the Governor that the Bar Association wholeheartedly supported such a program. The Chairman then advised the Governor that the need for a salary increase for judges was urgent and that Governor Hickel had previously agreed with the Council's recommendation that state judicial salaries should be equated with those paid the federal judiciary. The Governor assured the Council that a salary bill would be forthcoming. The Council also advised the Governor of its recommendations with respect to appellate review of sentences, probation, micro-filming of public records and the proposed coroner-public administrator legislation. The Governor concluded the meeting by thanking the members of the Council for their attendance and assuring the Council that he would do everything possible on behalf of the salary recommendation.

The Council then met with members of the House and Senate Joint Judiciary and Finance Committees. Legislators present were Senator Vance Phillips, Representatives Ray,

Banfield, Croft and Metcalf. Each of the Council's recommendations which had been discussed with the Governor was discussed with the legislators. Also, at the request of Senator Phillips, the Chairman reviewed with the legislators the manner in which judicial applicants are nominated by the Council.

Following meeting with the legislators the Council reconvened briefly. Mr. Werner advised the Council that as his term was expiring this would probably be his last meeting. He commended the Chief Justice for his contributions as Chairman and stated in the ten years he had been a part of the Council he felt it operated well without political considerations and in a progressive forthright manner. The Chairman responded commending Mr. Werner on his service and contributions to the Council and to the State of Alaska.

June 20, 1969 - Anchorage, Alaska

The primary purpose of the June 20th meeting was to nominate to the Governor candidates for the office of Public Defender for the State of Alaska. All members of the Council were present including newly-appointed member Mr. Ken Brady, lay member from Anchorage, who succeeded to the position previously held by Mr. Jack Werner of Seward. The Chairman reported on the results of the Council's legislative program for the 1969 legislature. The recommendations on appellate review passed the legislature. The coroner's legislation was opposed and did not pass. The Public Defender bill had passed

substantially as hoped for by the Council, but the Chairman believed the appropriation to be inadequate. The Chairman reported that the principal office of the Public Defender would be located in Anchorage with field offices in Fairbanks and Juneau. The Judicial Qualifications Commission had been organized with Associate Justice John Dimond as chairman. However, the finance committee had not passed on the supplementary budget and the Judicial Qualifications Commission was without funds. The chairman stated that the Commission would be treated as an independent budget by the administrative office of the Court System which would process claims and vouchers at the request of the chairman.

The Chairman reported that there were vacancies in the District Court, but in view of the fact the salaries of District Court judges had been raised by only $1,500 he recommended that the Council not solicit applicants for the vacancies until the salary was increased; the judgeships would be held on an interim basis pending that time. In this regard, Chief Justice reported that the resistance to District Court salary increases was intense in the recently concluded legislature. Several of the members indicated they would personally make appeals to legislators to increase the salaries.

The Council then next considered the applicants for Public Defender and nominated three candidates to the Governor. The Council further discussed the urgent need for improve-

ment of judicial salaries and voted to establish a committee for the purpose of presenting a salary plan for the upgrading of judicial salaries. The Chairman also reported on the status of the Anchorage court facility expansion plan. He stated that the legislature had authorized a bond issue sufficient to cover the construction project, but that the interest ceiling on the bond issue would preclude sale of the bonds. Therefore, the legislature might have to take steps to improve the saleability of the bond issue by increasing the interest ceiling during the next session. Mr. Stepovich requested that the matter of additional Superior Court judges for the Alaska Court System be placed on a future agenda and in view of the general feeling that there was a growing need for additional judges the Chairman directed that this be done.

November 6 & 7, 1969 - Anchorage, Alaska

The principal purpose of the November meeting was to consider the Council's 1970 legislative program. Present were Michael Stepovich, law member of Fairbanks; Frank Doogan, law member of Juneau; Lester W. Miller, law member of Anchorage; Kenneth Brady, lay member of Anchorage; and Paul Gavora, lay member of Fairbanks. Chief Justice Nesbett, the Chairman, was undergoing treatment in San Diego for injuries sustained in an aircraft accident and Mr. Meland of Sitka was required to be absent for business reasons. Associate Justice John H. Dimond was also in attendance. In view of

the Chief Justice's absence Vice Chairman Michael A. Stepovich presided. The first agenda item considered was that of judicial salaries. Justice Dimond stated to the Council that there was an urgent need for increase in judicial salaries, noting that increases by the previous session of the legislature were inadequate. He reported that the Alaska Bar Association was completely behind the Court System and the Council with respect to judicial salaries and stated that young, capable lawyers were not interested in judicial positions because they could not afford it. Mr. Peter LaBate, president of the Anchorage Bar Association, appeared to state the Anchorage Bar Association's position with repsect to judicial salaries. He pointed out that existing salaries were inadequate to attract experienced lawyers into the judiciary and stated his opinion that the Superior Court judges should be paid at least $40,000 and the District Court judges at least $25,000. Presiding District Court Judge Paul B. Jones of the Third Judicial District also appeared. He pointed out that for many people their contact with the Court System occurred in the District Court and it was imperative that salaries at that court be attractive to encourage applicants for judgeships. Also appearing was former District Court Judge James Hanson who stated that he had recently resigned from the court because promised salary increases were not forthcoming. It was determined that the Council invite Senator Vance Phillips to discuss the matter of salaries with the Council at the next Council meeting

Mr. James Fisher, an attorney from Kenai, Alaska, appeared before the Council to state the need for a Superior Court judge for Kenai and Kodiak. Mr. Roy Madson of Kodiak also appeared urging that a Superior Court judge be made available for these two communities.

The next agenda item to be considered by the Council was that of additional Superior Court judgeships. Mr. Doogan discussed the need for an additional Superior Court judge in Southeastern Alaska pointing out that the one judge available did not have time to take care of all his business. He did not make a specific recommendation as to where the judge should be located. The Council voted to recommend the creation of an additional Superior Court judgeship in the First Judicial District.

Mr. Stepovich then discussed the need for an additional judge in the Fairbanks area in view of the increase of population and increased activity on the Arctic North Slope. The Council unanimously voted to recommend an additional Superior Court judge for the Fourth Judicial District.

Judge James M. Fitzgerald of the Third Judicial District appeared and concurred with the need for higher salaries, pointing out the judicial salaries in Alaska have consistently dropped behind salaries paid to other officials. For example, he recalled when there was $3,000 difference in the salaries between the federal district judges and Alaska

Superior Court judges and noted that the difference had grown to over $13,000. He recommended establishment of an independent salary commission to recommend salaries to the legislature. Judge Fitzgerald also reported on the need for additional judges in the Third Judicial District. He believed two additional judges were needed. Judge Fitzgerald also urged the creation of a court administrator in the Third Judicial District for the Superior Court to free the presiding judge from many administrative duties. The Council then resolved that it be recommended to the legislature that the Third Judicial District be provided with two additional Superior Court judges and that the Superior Court be permitted to hire a trial court administrator.

Judge Fitzgerald also reported that he felt that judges should be reimbursed for their actual expenses when traveling on court business as is done in the federal system. However, on the recommendation of Justice Dimond the Council moved to recommend to the legislature that Court System personnel traveling on court business be granted $35 per day.

The Council also considered the question of how the peremptory challenge law was operating. Judge Fitzgerald stated that he did not believe most attorneys were abusing the law although peremptory challenges cause some problems in calendaring cases. The Council determined to make no recommendation with respect to the peremptory challenge law.

The Council received a report from Mr. Victor Carlson, Public Defender, who appeared at the meeting. He also presented the Council with his 1970-71 budget. Following his report the Council voted to recommend to the legislature that the Public Defender Agency's budget be adequately funded.

Again the Council considered the question of judicial salaries. Mr. Reynolds, secretary to the Council, reported that the Chief Justice had expressed by telephone his wish that judicial salaries be equated with those paid in the federal court system. Mr. Reynolds reported that in 1969 the Council had recommended that the existing federal scale be applied. However, in the interim there had been a salary increase in the federal judiciary. It was noted by Justice Dimond that although the legislature and other state employees had received salary increases in the past legislature of from 12 to 14 percent the judiciary received an average increase of about 4 percent. The Council voted to recommend to the legislature that the salaries of Supreme Court and Superior Court judges be equated with the Federal Circuit Court of Appeals and U. S. District Courts respectively, and that State District Court judge salaries be raised a commensurate percentage. The Council also discussed the need for a permanent salary commission to make studies and recommendations for salary increases in proportion to the cost of living and other factors. The Council, following the discussion of District Court vacancies in Sitka, Wrangell, Kodiak and Anchorage, voted to circularize

to fill these positions. The Council discussed improvements in the method of polling the Bar Association on judicial applicants.

The question of the need for expansion of the Anchorage Court facility was considered together with the action taken by the legislature in this regard during the 1969 session. Although bonds had been provided, they apparently were not saleable at the six percent interest rate. In view of the seriousness of the situation, Justice Dimond proposed, and the Council passed, a resolution to the Governor to appraise him of the situation and urge him to take all necessary action to expedite the Anchorage expansion. In the resolution the Council pointed out that if the new facility was not available in eighteen months, minimum necessary standards for the administration of justice could not be met.

The Council determined that public hearings should be conducted in Fairbanks, Anchorage and Juneau prior to the 1970 legislative session. The topics stated in the notice of hearing would include, adequacy of court facilities and services, use and selection of judges, delays in the judicial process, and other areas affecting the administration of justice. Hearings were scheduled for Fairbanks January 5, 1970, Anchorage January 6, 1970, and Juneau January 8, 1970.

The Council voted to recommend to the legislature that coroner-public administrator positions in the Court System budget be approved. The Council also voted to endorse

micro-filming program contained in the fiscal 1969-70 budget. The Council then discussed the serious difficulties that the Court System had in obtaining appropriate classification for its personnel by Department of Administration. Justice Dimond reported that there were apparent inequities in the classifications existing in the judicial branch and the Council voted to authorize the administrative director to expend up to $5,000 of the Council's funds to obtain an independent study of Court System personnel classifications and salaries. The Council discussed the fiscal year 1970-71 Alaska Court System budget emphasizing the need for adequate budgeting for the judicial system. It also considered the Judicial Council's budget and voted that the consideration of that budget was a matter within the sole authority of the Council although the mechancis of preparation and accounting procedures would remain within the Court System. The Council then voted to approve its budget in the amount of $8,000 for travel and per diem and $20,000 for studies during the fiscal year 1970-71. A committee was appointed to meet with the Governor prior to the coming legislature to discuss matters pertaining to the recommendations of the Judicial Council.

January 5, 6 & 8, 1970 - Fairbanks, Anchorage & Juneau

The January 5, 6 & 8th meetings were held respectively in Fairbanks, Anchorage and Juneau. These meetings were for the purpose of holding public hearings regarding the

administration of justice in the State of Alaska. In attendance at the Fairbanks meeting as members of the Council were Michael Stepovich, law member of Fairbanks; Frank Doogan, law member of Juneau; Lester W. Miller, law member of Anchorage; V. Paul Gavora, lay member of Fairbanks; and Peter Meland, lay member of Sitka. Testimony was taken regarding a wide range of matters relating to the administration of justice and the testimony was recorded and a transcript subsequently prepared. The Anchorage meeting was held on January 6, 1970 and all members were present except Chief Justice Nesbett who was still recuperating from injuries suffered in an aircraft accident. The Council then met on January 8, 1970 in Juneau with all members in attendance except Chief Justice Nesbett and Lester Miller, law member of Anchorage. The entire proceedings were transcribed.

While in Juneau the Council held a business meeting at which it determined to recommend to the legislature that the office of the Chief Justice of the Supreme Court be rotated among the five justices once every three years.

The Council also discussed the presentation of its legislative program to the legislature and the individual Council members were assigned to present each aspect of the program.

January 29, 1970 - Juneau, Alaska

The January 29th meeting was held in Juneau for

the purpose of presenting the Judicial Council's 1970 legislative program to the Senate and House Finance and Judiciary Committees. All members of the Council were in attendance except Mr. Ken Brady, lay member of Anchorage, who was outside the State and Chief Justice Nesbett who was undergoing medical treatment in California. Justice John H. Dimond of the Alaska Supreme Court also attended. The Council met with the Senate and House Finance and Judiciary Committees. Senators Vance Phillips, Lewis, Blodgett, Rader, Miller, Koslosky, Bradshaw, Haggland and Merdes were present as were House members E. Miller, Metcalf, Fink, Croft, Cornelius, Banfield, Ray and Kay. Members of the Council presented each topic in the legislative program. At this meeting Senator Vance Phillips stated his disapproval of the request for increased judicial salaries. Following the meeting with the legislators the Council held a regular business meeting in which it endorsed in principle raising the monetary jurisdiction of the District Court from $3,000 to $7,500, providing that the jurisdiction should be concurrent with that the Superior Court.

The Secretary to the Council reported that the personnel study had not yet been undertaken as authorized because the Division of Personnel was conducting a study which should be completed first.

April 30, 1970 - Anchorage, Alaska

The principal purpose of the April 30th meeting was

to nominate to the Governor candidates to fill the positions of Chief Justice of the Supreme Court of the State of Alaska. All members of the Council were present. On April 1, 1970 Chief Justice Buell A. Nesbett had retired and the chairmanship of the Council was vacant.

Mr. Robert Erwin, of Anchorage and Chairman of the Alaska Bar Association's legislative liaison committee reported on the progress of the Judicial Council's legislative program. He reported that most of the program had been considered by the legislature with the main problem occurring with respect to the increase in salaries and Salary Commission bill. He reported that the House had passed a bill providing for increased judicial salaries and hoped that it would pass the legislature. He reported that there were two bills for consideration relating to rotation of the office of Chief Justice. The bond bill had passed both Houses raising the ASHA bond interest rate to seven percent which would hopefully assure additional Anchorage court facilities. He reported that the Bar Association was supporting an increase in the District Court salary to $25,000. A general discussion ensued wherein Mr. Erwin answered specific questions regarding the progress of the Council's legislative program.

The Council was advised that there had been favorable comment within the legislature regarding the public hearings held in January. Also, at least one change in the Court System had evolved as a result of the hearings with respect to

the holding of arraignments in District Court in Fairbanks. It was determined that a representative body of the Judicial Council have public hearings in Sitka, Juneau, Kenai and Kodiak prior to recommending locations for new Superior Court judgeships. The Council discussed at length the general subject of public hearings. The Secretary reported that the Council had expended all of its travel and per diem funds. Funds were available, however, from the study funds in the Council budget.

The Council then considered the applicants for the position of Chief Justice. Each of the applicants appeared before the Council and the Council made two nominations to the Governor.

June 18, 1970 - Anchorage, Alaska

The June 18th meeting was attended by all members of the Council and presided over by Chief Justice George F. Boney, the new Chairman. Chief Justice Boney advised the Council that judicial salaries had been raised to $36,000 for Supreme Court Justices, $33,000 for Superior Court Judges and $25,000 for District Court Judges. He also advised that the trial court administrator had been funded. He stated that he would propose a central filing system for public records to be placed on micro-film.

Mr. Harold Toby, District Attorney for Anchorage appeared and commented upon Grand Jury reports recently hand-

ed down which were critical of the administration of criminal justice. He reported that the Grand Jury generally wished to express displeasure regarding sentencing and bail in criminal cases. He responded to questions from the Council regarding these matters. Mr. Tobey stated that the Grand Jury was concerned about cases where persons found guilty of aggravated crimes receive suspended sentences. The Council also heard Judge James M. Fitzgerald, presiding judge, Third Judicial District, with repsect to the Grand Jury reports. He stated that a great number of sentences imposed by the Superior Court were imposed upon the recommendation of the District Attorney's office following a plea negotiation. With respect to bail Judge Fitzgerald pointed out that in 1969 out of 435 cases filed in the Superior Court a bail forfeiture occurred in only eight. He stated that it appeared to him that if the purpose of the bail system was to guarantee appearance at trial, it was working. He said that he felt that the answer to the bail problem was not preventive detention, but rather bringing defendants quickly to trial. He responded to questions from the Council on these matters. The Council discussed at length the questions raised by the Grand Jury report and by the presentations of Judge Fitzgerald and Mr. Tobey. Council then determined to call the foreman in the Grand Jury and permit him to appear to discuss these questions. Mr. Johnson appeared from the Grand Jury. He reported that one matter, among others, that had concerned the Grand Jury was the number

of persons whose names came before the Grand Jury who had prior records. The Council then interviewed applicants for the position of Associate Justice of the Supreme Court, which had been vacated upon the appointment of Justice Boney as Chief Justice, and made nominations to the Governor.

June 19 and 20, 1970 - Kodiak, Kenai, Alaska

On June 19, 1970 the Council held public hearings at Kodiak, Alaska. Present were Chief Justice George Boney, Chairman; Frank Doogan, Juneau law member; Michael Stepovich, Fairbanks law member; Paul Gavora, Fairbanks lay member; Peter Meland, Sitka lay member; and Lester W. Miller, Anchorage law member. On June 20th, the hearings were continued in Kenai. A number of residents and local lawyers appeared to advise the Council of the need for a Superior Court judge in those communities. The residents also pointed out the scarcity in State Troopers for local law enforcement. Following the hearing in Kenai the Council held a brief business meeting at which it voted to solicit candidates for vacant District and Superior Court judgeships. It also determined its itinerary for public hearings to be held in Southeastern Alaska in July.

July 14, 15 & 16, 1970 - Southeastern Alaska

On July 14th, 15th and 16th the Council met in Sitka, Juneau and Ketchikan for the purpose of conducting public

hearings. Present on the Council were Chief Justice George Boney, Chairman; Frank M. Doogan, Juneau law member; Peter Meland, Sitka lay member; Lester W. Miller, Anchorage law member; and Ken Brady, Anchorage lay member. Mr. Gavora of Fairbanks joined the hearings later that day and Mr. Stepovich, law member of Fairbanks, was involved in a trial and unable to attend. The purpose of the hearing was to gather facts helpful to the administration of justice and improvement of the Court System.

September 16 - 19, 1970 - Anchorage, Fairbanks and Nome, Alaska

At the Council meeting in Anchorage on September 16, 1970 the Council interviewed applicants for Superior Court judgeships. All members were present. The Council moved to Fairbanks on September 17, and continued the interviews. On September 19, the Council conducted public hearings in Nome and concluded the interviews of Superior Court applicants. While in Nome, the Council voted to recommend that the new Superior Court judgeships be located as follows: Third Judicial District, one each in Kenai, Kodiak and Anchorage; First Judicial District, Sitka. The Council also elected Theodore R. Dunn as executive secretary to the Council.

October 23, 1970 - Anchorage, Alaska

All members were present at the October 23rd meeting except Mr. Meland, lay member of Sitka. The Council

discussed its proposed budget in a total amount of $55,220 and voted to approve it as to amount. The fiscal year 1971-72 budget contained allowances for an executive secretary and a part-time clerk-stenographer. These additions were necessary in order to insure the independence of the Council and continuity in its activities as well as to give the public a day-to-day point of contact with the Council. The Council also considered the problems that would occur in Valdez relating to the administration of justice when population increased as a result of pipeline work. It then voted to recommend that a District judgeship be created in Valdez when needed.

The Council also made plans for a seminar on bush justice to be held at Alyeska on December 8, 9 and 10, 1970. Several nation-wide organizations were to participate and the Council voted to sponsor the program as a preliminary program on bush justice.

The Council then determined to conduct personal interviews of applicants for District Court appointments. It was also determined that Superior Court candidates who had been interviewed at the last meeting and who were unsuccessful could be considered for a District Court appointment if they so wished. The executive secretary was directed to notify the unsuccessful Superior Court candidates as soon as appointments were made for those positions.

The Council then discussed those conditions which it had observed in Nome for the detention of juvenile offenders. These facilities were deemed woefully inadequate and the Council directed that a letter be written to the Department of Health and Welfare advising that agency of the problem.

November 9, 1970 - Anchorage, Alaska

The November 9th meeting was called principally to interview and nominate candidates for District Court judgeships in Kodiak, Sitka, Wrangell, Anchorage and Barrow. All members of the Council were present. The applicants appeared and were interviewed. Following the discussion of the qualifications of these applicants nominations were made to the Governor.

Judge Thomas Stewart, presiding judge of the Superior Court, First Judicial District, appeared before the Council and advised it of the desperate need for a new court facility in Juneau and the Council discussed this matter with him..

November 28, 1970 - Anchorage, Alaska

All members of the Council were present at the November 28, 1970 meeting except Mr. Stepovich who had been called out of the State on an emergency matter. The Council interviewed candidates for the position of Public Defender which had been vacated following the appointment of Victor Carlson as Superior Court Judge in the First Judicial District.

The Council nominated to the Governor for appointment two of the applicants.

The Council then considered at length the need for a separate courthouse facility in Juneau. The Chief Justice reported that approximately 55,000 square feet of space was needed. The Council then voted to recommend to the legislature that monies be authorized and appropriated for site acquisition and pre-construction planning for a separate court facility in Juneau. The Council also voted to recommend to the legislature that salaries of Alaska judges be equated with those paid the federal judiciary and that a salary commission be established to maintain equality of salaries.

Also, the Council considered the advisability of increasing the jurisdiction of District Judges. The Chief Justice pointed out the need of making the courts available to more people and expanding the quality of judicial services throughout the State. It was also believed that the increased jurisdiction would relieve the Superior Court calendar. The Council then voted to recommend to the legislature that jurisdiction of the District Courts be increased to $10,000 to include equity jurisdiction in lien foreclosure matters involving up to $10,000.

The Council then discussed problems of criminal law enforcement. Some members expressed concern that the relationship between the State Troopers and the Attorney General's office was not as it should be. It was hoped that new per-

sonnel with the incoming administration would help resolve the problem.

The Council then took note that this was the last meeting to be attended by Mr. Meland, lay member of Sitka, and unanimously voted to commend him for outstanding service as a member of the Council since his appointment in 1966.

III.

SELECTION OF JUDGES

I. Supreme Court Justices

On April 1, 1970 Chief Justice Buell A. Nesbett retired following a lengthy convalescence from injuries suffered in an aircraft accident the previous year. Notice of the vacancy was given to members of the Alaska Bar Association and applicants were received by the Council for nominations to fill the vacancy. At its April 30, 1970 meeting the Council interviewed those persons who had applied for Chief Justice of the Alaska Supreme Court. These applicants were: Justices George F. Boney and John H. Dimond of the Supreme Court and Superior Court Judge C. J. Occhipinti. The Council nominated Justices Dimond and Boney for the position of Chief Justice. Governor Keith Miller subsequently appointed Justice George F. Boney as Chief Justice.

Shortly thereafter notice was given that applications would be accepted for the Associate Justice position vacated by Justice Boney. A Bar poll was conducted and on June 18, 1970 the Council interview applicants. Those applicants were: Superior Court Judge William H. Sanders of Nome, Superior Court Judge C. J. Occhipinti of Anchorage, Superior Court Judge Eben H. Lewis of Anchorage, Robert C. Erwin of Anchorage, L. S. Kurtz, Jr. of Anchorage, and Robert A. Parrish of Fairbanks. At the conclusion of its meeting the Council nominated Robert C. Erwin, L. S. Kurtz, Jr., Superior Court Judge Eben

H. Lewis, and Robert A. Parrish for the position of Associate Justice. The Governor subsequently appointed to that position Robert C. Erwin.

II. Superior Court Judges

The 1970 legislature voted to add one Superior Court Judge in the First Judicial District, three Superior Court Judges in the Third Judicial District and one Superior Court Judge in the Fourth Judicial District.

The Judicial Council solicited applications for these new judgeships and the Bar Association conducted a poll of its membership. On September 16, 1970 the Judicial Council interviewed the applicants. Prior to conducting its interviews the Council determined that the new First Judicial District judge would be assigned to Sitka and in the Third Judicial District one judge would be assigned to Anchorage, one to Kodiak and one to Kenai. The new Fourth Judicial District judge would be in Fairbanks. The applicants in the Third Judicial District were asked to state the locations within that District for which they wished to apply. The following applicants were interviewed for the position and the location stated.

S. J. Buckalew, Jr.	Anchorage, Kenai, Fairbanks
Edmond Burke	Sitka, Anchorage, Kenai, Kodiak
Victor Carlson	Sitka, Anchorage, Kenai, Kodiak Fairbanks
Warren Christianson	Sitka
Hugh Connelly	Fairbanks
M. Ashley Dickerson	Sitka, Anchorage, Kenai, Kodiak, Fairbanks
Wm. Erwin	Anchorage, Kenai
Marvin Frankel	Anchorage
Dorothy Hawes Haaland	Anchorage

Robert E. Hammond	Anchorage, Kenai
James Hanson	Sitka, Kenai, Anchorage
Peter J. Kalamarides	Anchorage
Henry Keene, Jr.	Sitka
Denis Lazarus	Anchorage, Kenai, Kodiak
Roy Madsen	Kodiak
James Merbs	Anchorage
Mary Alice Miller	Fairbanks
James Nordale	Sitka, Anchorage, Kenai, Kodiak Fairbanks
Robert Opland	Anchorage
David Pree	Anchorage, Kenai, Kodiak
Ernest Rehbock	Anchorage
Wm. Sanders	Anchorage, Kenai, Kodiak, Fairbanks
Thomas Schultz	Sitka, Anchorage, Kenai, Kodiak, Fairbanks
Sylvia Short	Anchorage, Kenai, Kodiak
J. H. Shortell	Sitka, Anchorage, Kenai, Kodiak, Fairbanks
James Singleton	Sitka, Anchorage, Kenai, Kodiak, Fairbanks
Gerald Van Hoomissen	Fairbanks
Benjamin Walters	Sitka, Anchorage, Kenai, Kodiak

Following the interviews the Council nominated the following persons:

Sitka	James Hanson, Thomas Schultz James Singleton, Edmond Burke, Victor Carlson
Anchorage	S. J. Buckalew, Edmond Burke, Wm. Erwin, Peter J. Kalamarides, Ropert Opland, James Hanson, Victor Carlson, James Singleton, Thomas Schultz
Kenai	S. J. Buckalew, Edmond Burke, William Erwin, James Singleton, James Hanson, Victor Carlson, William Sanders, Thomas Schultz
Kodiak	Edmond Burke, Roy Madsen, James Singleton, J. H. Shortell, Victor Carlson, Wm. Sanders, Thomas Schultz

Fairbanks — Victor Carlson, Gerald Van Hoomissen, Mary Allice Miller, S. J. Buckalew, James Singleton

Governor Miller made the following appointments: First Judicial District at Sitka, Victor Carlson; Third Judicial District at Anchorage, James Singleton; at Kodiak, Edmond Burke; at Kenai, James Hanson; Fourth Judicial District at Fairbanks, Gerald Van Hoomissen.

III. District Court Judges

During the years 1969 and 1970 several of the positions of District Court judges were being held on an interim basis and others became vacant. As a result, the Judicial Council gave notice of accepting applications for a District Court judgeship in each of the following locations: Kodiak, Sitka, Wrangell, Anchorage and Barrow. At its meeting on November 9, 1970 the Council interviewed applicants for those positions. These applicants were Hal Horton of Fairbanks (Kodiak, Sitka, Wrangell, Anchorage); Roger DuBrock of Sitka (Sitka, Kodiak and Wrangell); Harris Bullerwell of Wrangell (Wrangell, Sitka); Edith Glennon of Kodiak (Kodiak, Wrangell, Sitka, Anchorage and Barrow); Louis Agi of Anchorage, (Anchorage, Kodiak); John Mason of Anchorage, (Anchorage, Kodiak, Sitka, Wrangell); Thomas Payne of Anchorage (Anchorage, Kodiak, Sitka, Wrangell, Barrow); William Tull of Anchorage (Anchorage); Virgil Vochoska of Anchorage (Anchorage); L. Eugene Williams of Anchorage (Anchorage). Following the

interviews and consideration of the Bar poll which had been taken on these applicants the following nominations were made to the Governor:

First Judicial District - Sitka	Harris R. Bullerwell Roger W. DuBrock Hal R. Horton Thomas B. Payne
First Judicial District - Wrangell	Harris R. Bullerwell Roger W. DuBrock Hal R. Horton
Third Judicial District - Kodiak	Roger W. DuBrock Hal R. Horton Thomas B. Payne
Third Judicial District - Anchorage	Hal R. Horton John D. Mason Virgil D. Vochoska L. Eugene Williams

Governor Miller subsequently made the following appointments:

Roger W. DuBrock	First Judicial District - Sitka
Harris R. Bullerwell	First Judicial District - Wrangell
Hal R. Horton	Third Judicial District - Kodiak
John D. Mason	Third Judicial District - Anchorage

It had been determined following the interviews of all candidates by the Council that it would not submit nominations to fill the post at Barrow.

IV. Public Defender

The 1969 legislature established the Public Defender Agency. SLA 1969, Chapter 109. The legislation provided that the Governor appoint the Public Defender from among two or more persons nominated for that position from the Judicial Council. On June 20, 1969 the Council interviewed applicants for the position of Public Defender. The Bar Association had previously conducted a poll of the qualifications of the

applicants which was made available to the Judicial Council. Those applicants were: Victor D. Carlson of Anchorage; Charles K. Cranston of Juneau; Stanley Ditus, formerly of Anchorage; Marvin S. Frankel of Anchorage; Johnston Jeffries of Soldotna; Irvin Raven of Fairbanks; Warren A. Taylor of Fairbanks; Harold W. Tobey of Anchorage; and Benjamin O. Walters, Jr. of Anchorage. Following the interviews the Council nominated to the Governor Victor D. Carlson, Marvin S. Frankel and Harold W. Tobey. Subsequently, the Governor appointed Victor D. Carlson.

In November of 1970, Victor Carlson was appointed Superior Court Judge, First Judicial District. Applications were solicited by the Judicial Council to fill the vacancy in the office of Public Defender and a poll of the applicants' qualifications was conducted by the Bar Association. On November 28th the Judicial Council interviewed the candidates for Public Defender, who were: Herbert Soll of Anchorage, Richard Madsen of Fairbanks, and Stanley Ditus, presently residing outside the State of Alaska. The Council nominated to the Governor for appointment Herbert Soll and Richard Madsen. Governor Egan appointed Herbert Soll as Public Defender following his assumption of the office of Governor in December, 1970.

IV.

STUDIES, HEARINGS AND PROGRAMS

In order to determine what recommendations it should make to the legislature and the Supreme Court the Judicial Council is required to conduct studies for the purpose of determining the problems which exist in the administration of justice and arriving at solutions to these problems. Not all of the studies conducted result in specific proposals to the various branches of government, however, each broadens the knowledge of the Council and its ability to deal with related problems.

A. Public Hearings and Conferences 1969-70

February 19, 1969 - Juneau, Alaska — Alaska Judicial Council Statewide Committee on Sentencing and Appellate Review of Sentences

In December, 1968 at Sitka, a committee appointed by the Chief Justice under the auspices of the Judicial Council met to consider sentencing and appellate review of sentences. The committee was reconvened in February, 1969 at Juneau, The committee was composed of more than fifty persons from various backgrounds and interests, most of whom, of course, were not members of the Council. At the Juneau meeting reports of subcommittees were presented. The Statewide Committee then adopted the subcommittee report on appellate review of sentences and recommended it to the Alaska Judicial Council which in turn recommended that the proposals contained in that

report be adopted by the legislature. As a result, the 1969 legislature enacted SLA 1969, Chapter 117 which provided for appellate review of criminal sentences along the lines recommended.

January 5, 6, 8, 1970 - Fairbanks, Anchorage, Juneau

Public Hearings on Improvement of the Administration of Justice

In early January, 1970 the Council held public meetings in Fairbanks, Anchorage and Juneau wherein testimony was heard from all interested persons relating to recommendations for the improvement in the administration of justice in the State of Alaska. The first in this series of public hearings was held in Fairbanks. The two Superior Court Judges from Fairbanks testified regarding judicial salaries and retirement and the need for an additional Superior Court Judge. Also testifying were persons from the Alaska State Troopers and the general public. The testimony covered a wide range of subjects. The Council then moved to Anchorage where testimony was taken from over twenty-five persons including Superior Court Judges, District Court Judges, attorneys, public officials (including representatives of law enforcement agencies) and other interested individuals. Judge Butcher of the Family Court, Third Judicial District, presented testimony relating to problems in Family Court matters, particularly in the handling of juvenile offenders. Judge Fitzgerald, the Presiding Judge

of the Superior Court, Third Judicial District, presented a report of the case load of the Superior Court in that District. He recommended increasing the jurisdiction of the District Court in order to relieve this case load. He also stated that the Superior Court was encountering a space problem in its existing facility. Testimony was also presented on the case load of the District Court. Attorneys and judges presented testimony regarding the need for increased judicial salaries and more liberal per diem allowances for officers of the judiciary when traveling. The Council then moved on to Juneau. In Juneau the presiding Superior Court and District judges testified in the morning followed by six members of the public in the afternoon. Testimony covered a broad range including judicial salaries and the inadequacy of the Juneau court facilities.

June 19 and 20, 1970 - Kodiak, Kenai — Public Hearings on Improvement of the Administration of Justice

These hearings were held to inquire into specific problems in the administration of justice in Kenai and Kodiak. Much of the testimony in both locations related to the need for a Superior Court Judge to serve these communities. Additionally, in Kodiak there was extensive testimony relating to the need for improved criminal law enforcement both by providing additional State Police officers and improving enforcement facilities. Similar testimony was presented in Kenai. In both

communities local members of the Bar testified as well as public officals and other persons. Persons of both communities expressed concern over the delay in obtaining judicial services and testimony was presented to the effect that a more readily available Superior Court judge would increase the lawyer population and provide better judicial services for the residents.

July 14 - 16, 1970 - Southeastern Alaska — Public Hearings on Improvements of the Administration of Justice

On July 14, 15 and 16, 1970 the Council held hearings in Sitka, Juneau and Ketchikan respectively. In each community testimony was given by members of the general public, public officials and members of the Bar including judges. In Sitka considerable testimony was presented relating to the need for a Superior Court judge. Residents testified with regard to the problems involved in litigating matters within the jurisdiction of the Superior Court when no judge was available in the community. In Juneau testimony was similarly presented on the need for an additional Superior Court judge. Also considerable concern was expressed regarding the inadequacy of Court facilities in Juneau.

The Ketchikan hearings also related to the inadequacy of Court facilities in that community. Superior Court Judge Hubert Gilbert presented a statement expressing his concern

for the need for more adequate facilities for the detention of juvenile offenders and their rehabilitation.

September 19, 1970 - Nome, Alaska — Public Hearings on Improvement of the Administration of Justice

The public hearings in Nome, while of a general nature, focused upon the problems of administration of justice in bush areas. Local Superior Court and District Court judges testified, as well as attorneys and law enforcement officials, on these problems. Also it was pointed out that judicial facilities in Nome were not adequate. While in Nome the Council personally inspected the Beltz School and juvenile detention facilities. The detention facilities were found to be woefully inadequate by the Council.

December 8-11, 1970 - Mt. Alyeska, Alaska — Alaska Bush Justice Conference

On December 8 to December 11, 1970, the Alaska Judicial Council sponsored a Bush Justice Conference which was held at Mt. Alyeska, Girdwood, Alaska. The purpose of this conference was to assemble in one place a number of individuals who possess different talents and experiences in an endeavor to formulate specific problems with recommended solutions. Distinguished members of the bench and bar, members of State agencies, university professors, recognized native leaders, law enforcement officials and a number of individuals in related

fields used both their knowledge and experience to narrowly define the problems that presently exist in the bush areas of Alaska. Having pinpointed the problem areas, specific recommendations were forthcoming for action by the judiciary, the legislature and the executive branch of Government.

The Chief Justice gave the opening conference address. This first day of the conference was construed as a problems day. Emphasis was placed upon pinpointing problem areas in the Alaskan villages rather than making specific recommendations for change. Various speakers presented their views as to what problems existed in the bush areas. These speakers included such persons as Nora Guinn, District Court Judge for Bethel, Alaska; Arthur Hippler, Professor at the University of Alaska; Captain William Nix of the Alaska State Troopers; Sadie Neakok, Magistrate for Barrow, Alaska; Elias Joseph, President of the Village Council for Alakanuk, Alaska; and Professor Douglas Schmeiser from the University of Saskatchewan, Saskatoon.

The second day of the conference focused on formal presentations by selected individuals heading speaker groups. Four groups of keynote speakers and team members presented to four different groups of conferees a one and a half hour presentation on four different general topics. In this manner, all of the conferees were able to hear all of the general topic areas presented to them on the second day. These topics included such areas as the sociological, cultural and political

fields used both their knowledge and experience to narrowly define the problems that presently exist in the bush areas of Alaska. Having pinpointed the problem areas, specific recommendations were forthcoming for action by the judiciary, the legislature and the executive branch of Government.

The Chief Justice gave the opening conference address. This first day of the conference was construed as a problems day. Emphasis was placed upon pinpointing problem areas in the Alaskan villages rather than making specific recommendations for change. Various speakers presented their views as to what problems existed in the bush areas. These speakers included such persons as Nora Guinn, District Court Judge for Bethel, Alaska; Arthur Hippler, Professor at the University of Alaska; Captain William Nix of the Alaska State Troopers; Sadie Neakok, Magistrate for Barrow, Alaska; Elias Joseph, President of the Village Council for Alakanuk, Alaska; and Professor Douglas Schmeiser from the University of Saskatchewan, Saskatoon.

The second day of the conference focused on formal presentations by selected individuals heading speaker groups. Four groups of keynote speakers and team members presented to four different groups of conferees a one and a half hour presentation on four different general topics. In this manner, all of the conferees were able to hear all of the general topic areas presented to them on the second day. These topics included such areas as the sociological, cultural and political

video taping of the program included the first day of speakers and a full day of coverage which included four different presentations by the speaker teams. All of the formal presentations by the speaker teams were recorded on the soundscriber. Also, on the last afternoon the general conference meeting which voted on the final resolutions was recorded on video tape. In addition to the formal presentations which were made to all of the conferees, each individual conferee was presented with a booklet which gave the agenda for the conference and also included selected writings which focused upon problems in the bush areas. Such writings included a work by Professor Douglas Schmeiser on "Indians, Eskimos and the Law", which gave a detailed analysis of the legal experience with the natives in Canada, particularly in the Yukon territory. Other articles included, "The Public Offender in Alaska, a Survey of Inmates Incarcerated under Alaskan Statutes", which was prepared by the Statewide Planning Project for Vocational Rehabilitation Services. Other miscellaneous articles which dealt in one way or another with problems in the bush areas and problems with the natives were included with this booklet for the edification of the conferees.

Funding for the Bush Justice Conference came from three sources; members of the State agencies participating in the planning and presentation of the conference provided matching funds by way of their salary costs and transportation costs which were matched by Federal funds from the Law Enforce-

ment Assistance Administration, and Alaska Legal Services contributed $500. A special action grant from the Criminal Planning Agency in Juneau in the amount of some $13,000 was made available to defray the expenses of the conference, including transportation, meals and lodging.

After the final resolutions were voted on by the conferees, they were submitted to the Office of the Administrative Director of the Alaska Court System for final stylistic changes. When the changes were affected, the resolutions were formally presented to the Chief Justice as Chairman of the Alaska Judicial Council. These resolutions are found in Appendix A.

B. Judicial Council Programs - 1971-72

In the next two years the Judicial Council plans to conduct studies with regard to the following subjects. These studies will include public hearings, seminars and studies to be conducted by the staff of the Judicial Council and other agencies.

1. Magistrate Training and Bush Justice in Practical Application

The December, 1970 Seminar on Bush Justice concerned these subjects. This Seminar, however, was preliminary only and served the purpose of defining specific problem areas. Future studies in depth are needed.

2. Correlation of Crime, Punishment, Rehabilitation and Protection of the Public

Throughout its hearings in 1969 and 1970, comment

was received by the Council regarding problems in criminal law enforcement particularly with regard to rehabilitation and punishment following conviction. A Grand Jury report in Anchorage in 1970 was critical of the judiciary in these respects. In view of public concern, and the very real need for improvement in these matters, the Council feels it is urgent that studies be conducted.

3. Law Enforcement Assistance Administration and Ford Foundation Funds through Grants for Alaska

In the summer of 1970 the Chief Justice and Mr. Lester Miller, law member of Anchorage, together with the Administrative Director of the Alaska Court System consulted in Washington, D. C. with various agencies and private foundations which have funds available for improvement in the administration of justice by the State. Two such agencies are the Law Enforcement Assistance Administration and the Ford Foundation. The Council is studying how these funds can be obtained and the uses to which such funds can best be put.

4. Problems Relating to Crime in the Bush

Crime in the bush in Alaska presents unique problems due to the lack of law enforcement officers, the remoteness of courts, and the nature of the crimes which generally occur. These questions were considered at the Alaska Bush Justice Seminar and further study is required. Considerable comment on problems in this regard was received by the Council at its Nome hearings.

5. Management and Custody of Juveniles Prior to Hearing and Custody Designation after Hearing

During its Nome hearings the Council visited juvenile detention facilities in Nome and found them completely inadequate. During its Southeastern hearings in the summer of 1970 the Council heard testimony regarding the need for improved facilities in that area. Because of the need to insure that juvenile offenders are treated fairly and rehabilitated at the earliest possible time the Council believes this to be a particularly urgent study area.

6. Study of Improved Methods of Recording Land Transactions and Care of Land Records

The State of Alaska has no central office for the maintenance of land records. Some of the outlying areas have extremely poor recording facilities. The Council believes that orderly population and industrial growth in Alaska is reliant upon safe and adequate land records. Improvements in this area are needed.

7. Security of Courtrooms, Judicial Officers and Witnesses

Although this problem is not as acute in Alaska as in other states, the Council believes it to be important that adequate measures be taken to insure the safety of Judicial officers and witnesses in order that the Judicial System be free from improper influence or disruption.

8. Improvement in Service of Process

Delay in service of process has been a continuing problem in the Alaska Court System. This is particularly true when process must be served in the outlying area and when an Injunction, Attachment or Writ of Execution is to be served.

9. Improvement in Court Calendaring

Problems in court calendaring result in delay and inefficiency in the judicial process. As the case load of the judges has increased the calendaring problem has become more complex. Improved calendaring is required to reduce delays in litigation.

V.

RECOMMENDATIONS FOR THE IMPROVEMENT OF THE ADMINISTRATION OF JUSTICE DURING 1969 and 1970

A. Recommendations of the last Judicial Council Fifth Report 1967-68

1. Establishment of a Statewide Public Defender Program

This recommendation was acted upon by the legislature in 1969, which established the Public Defender Agency for the State of Alaska. SLA 1969, Chapter 109.

2. Establishment of a Coroner-Public Administrator

In its last report the Council urged that District judges be relieved of statutory duties as coroners and administrators of the property of deceased persons because these non-judicial duties were interfering with the judge's performance of his judicial duties. In 1970 the legislature enacted a Public Administrator Act authorizing the presiding judge of the District Court in each Judicial District, when authorized by the Supreme Court, to appoint a person to act as Public Administrator and as Coroner. SLA 1970, Chapter 216. This statute was substantially along the lines recommended by the Council.

3. Judicial Salaries

In its Fifth Report the Council recommended that salaries for Justices and Judges of the Supreme and Superior Courts be equated with those paid to judges of the Circuit Court of Appeals and United States District Courts respec-

tively and that Alaska District judges' salaries be set at a rate comparable to that of U. S. Magistrates. This recommendation was not followed by the legislature. However, the 1969 and 1970 legislatures made progressive increases in the salaries to the point that Supreme Court justices are now paid $36,000 annually, Superior Court judges $33,000 and District Court judges $25,000. SLA 1969, Chapter 101 and SLA 1970, Chapter 193. These salaries are still not comparable to those paid in the Federal Court System and the Council believes them inadequate. The Council, in this report, makes additional recommendations regarding judicial salaries.

4. Micro-filming of Public Records

The Alaska Court System budgeted funds in its 1970-71 budget for micro-filming of public records generally along the lines recommended in the Fifth Report of the Judicial Council. This budget was approved and the program is being implemented.

B. Additional Recommendations made during 1969-70

1. Appellate Review of Sentences

The Council recommended that the 1969 legislature adopt the proposals of the Statewide Committee on Sentencing and Appellate Review relating to Appellate Review of Criminal Sentences. In SLA 1969, Chapter 117 these recommendations were substantially enacted by the legislature.

2. Establishment of Judicial Salary Commission

In its 1970 legislative program the Judicial Council recommended in addition to an increase in judicial salaries that a salary commission to activated for continuing review of judicial salaries. This legislation was not enacted, but is contained in the current recommendations.

3. Rotation of the Office of Chief Justice

The Council also recommended to the 1970 legislature that the office of Chief Justice of the Supreme Court be rotated among the five Justices once each three years. The legislature voted that a Constitutional amendment providing for rotation of the office of Chief Justice be placed on the ballot at the next general election. In the August, 1970 elections this matter was voted favorably upon by the electorate and the Constitutional amendment adopted.

4. Increased District Court Jurisdiction

In its January 29, 1970 meeting the Council endorsed in principle pending legislation which would have increased the monetary jurisdiction of the State District Court to $7,500 to run concurrently with that of the Superior Court. This legislation was not enacted and a comparable recommendation is made with the current recommendations of the Council.

VI

CURRENT RECOMMENDATIONS

Pursuant to its constitutional directive, the Council makes the following recommendations for improvements in the administration of justice in the State of Alaska:

1. Increase in Civil Jurisdiction of District Courts.

The Council recommends that the legislature increase the monetary limitation on the jurisdiction of the District Courts of the State of Alaska from $3,000 to $10,000. The Council also recommends that the District Court jurisdiction be expanded to include equity jurisdiction in lien foreclosure matters where the amount in controversy is less than $10,000.

The Council believes that recent salary increases and changes in the qualifications required for a district judge have upgraded the quality of the court to the point where $10,000 jurisdiction is appropriate. It is believed that by so increasing the District Court jurisdiction, the case load of the Superior Court can be relieved. Also, an increase in District Court jurisdiction provides a more complete range of legal services in bush areas where Superior Courts are not readily available. Finally, such an increase in jurisdiction will make the court more attractive for future applicants for judgeship positions.

2. Juneau Court Facility. The Council recommends that monies be appropriated by the legislature for a preconstruction planning and site acquisition of a separate court facility in Juneau totaling not less than 75,000 square feet of office space.

The existing court facilities in Juneau are inadequate. Plans for the new State Office Building do not include space for the court facility. Therefore, the Judicial Council, working with the Juneau Bar Association, the court system and all interested state agencies, has conducted an inquiry to determine the total space requirements for a new court building. These requirements include those of the Supreme Court, Superior Court, District Court and Recording Office, Department of Health and Welfare, Department of Public Safety, Alaska Court System Administrative Offices and the news media.

Based upon the information received, the Council has made the foregoing recommendation. The Council believes that requirements for a new court facility in Juneau are urgent.

3. Judicial Salaries. The Council recommends that the salaries of judges in the Alaska Court System be equated to those paid the Federal Judiciary. The Council also recommends that a permanent salary commission be established to insure that judicial salaries in Alaska remain adequate.

The Judicial Council believes it to be of utmost importance that judicial salaries be such as to be attractive to experienced and well qualified lawyers so that the best available persons can serve as judges. To this end, the Council recommends that salaries of Justices of the Alaska Supreme Court be equated with those paid to the Judges of the

Unites States Court of Appeals, $42,500, and that Superior Court salaries be equated to those paid to United States District Judges, $40,000. Alaska District Judges should receive $30,000, as do Federal Magistrates. Moreover, because of continuing increases in the cost of living, it is important that these salaries be periodically reviewed. Therefore, the Council proposes a permanent salary commission to adjust judicial salaries subject to legislative veto.

4. Anchorage Court Facility. The Judicial Council is opposed to continuation of present plans for expansion of the existing Anchorage Court Building and recommends immediate appointment of a commission to explore the feasibility of constructing a judicial complex in Anchorage based upon a full consideration of long range needs.

The Council recognizes that there are present urgent space requirements for the Court System in Anchorage. However, the Council believes that the current, authorized expenditure of less than four million dollars is inadequate to properly provide for the long range needs of the Court System. These needs will be better and more efficiently served by an adequate appropriation based upon a thorough study of present and future requirements. The Council believes that to proceed with inadequate funds at present is to engage in a piecemeal approach to the immediate needs without fully considering the needs of the future.

APPENDIX A

BE IT RESOLVED THAT:

1. THE LOCUS OF DECISION-MAKING IN THE ADMINISTRATION OF JUSTICE IN VILLAGE ALASKA MUST MOVE CLOSER TO THE VILLAGE. TO ACHIEVE THIS RESULT THERE MUST BE GREATER NATIVE PARTICIPATION AT ALL LEVELS IN THE ADMINISTRATION OF JUSTICE.

a. There should be greater direct participation by Native citizens in the administration of justice at all levels, including their employment in policy-making positions in all agencies involved. Every agency should examine its qualifications requirements in order to revise them wherever they may arbitrarily exclude otherwise qualified Alaskan Natives. Examples include the height requirements for Alaska State Troopers, minor criminal records, formal education, etc.

b. Appointment of an Alaskan Native to membership on the Judicial Council and the Judicial Disqualification Commission is recommended.

c. The selection and removal of magistrates should be made more responsive to the desires of the communities served. Continuing critical evaluation of performance of duties by magistrates should be made. Consideration should be given to assigning principal responsibility for appointment and removal of magistrates to presiding district court judges.

d. The strengthening of village councils is central to the administration of justice in remote Alaska.

e. The Local Affairs Agency must be strengthened and upgraded to department level and its technical assistance functions fostered if there is to be successful administration of justice in the villages. Representatives of the Local Affairs Agency should visit villages to work with local officials. They should help the villages draft and revise ordinances, facilitate participation of villages in revenue-sharing programs, and improve law enforcement techniques.

2. THERE MUST BE A GREATER ACCESS TO LEGAL SERVICES AND THE PROCESS OF JUSTICE IN VILLAGE ALASKA.

a. The ordinary method of travel in the bush is by air. To meet the basic requirements of regular travel and to enable emergency service, State Troopers should be authorized to operate leased or state owned aircraft for their official duties and to aid officers of the court and associated agencies in the performance of their duties.

b. The Alaska Legislature should fund a program creating village constables in village Alaska to be chosen by village governing bodies to serve at their pleasure and to act as village law enforcement officers with the support of the Alaska State Troopers.

c. The travel budgets of the superior and district courts should be increased so that they may hold trials where the parties and witnesses live. When trials are elsewhere, but

witnesses live in the bush, the courts should use special masters to take evidence in the witnesses' villages. When actions are filed in places not accessible to defendants or their witnesses, changes of venue to the defendants' homes should be liberally allowed. These changes would facilitate more accurate factual determinations, avoid unfair default judgments, and provide education in judicial processes and substantive law in the bush.

d. The Supreme Court is encouraged to order at least an annual circuit court session of the superior court in the major community in each House election district.

e. The State Legislature should fund staff offices in Bethel and Nome for Alaska Legal Services Corporation and a Public Defender Agency office in Bethel as a step toward creation and support of rural principal judicial centers.

f. Techniques should be explored to encourage the private bar associations to provide better services in Alaska villages. As an example, group legal services experiments in other states should be studied. Public interest law firm efforts might also be encouraged.

g. Every village should have a detention facility and a juvenile detention facility separate from the detention facility and standards should be established for such facilities. These are needed to protect villages from dangerous persons without delay and without unduly long incar-

ceration because of transportation time.

h. Special emphasis must be given to the development of manpower capable of dealing effectively with the administration of justice in village Alaska, and to appropriate education for the affected public.

(1) The colleges and universities within the state should establish programs for the training and continuing education of magistrates, constables, paralegal and other associated personnel. Such programs should be developed and operated in cooperation with the Judicial Council, the Department of Public Safety, the Alaska Federation of Natives, and other appropriate agencies and organizations. Major emphasis should be placed on on-the-job training.

(2) The University of Alaska should establish an institute to train legal personnel in both rural and urban areas in Native culture and languages. Incentives should be provided for attendance at this institute.

(3) The Department of Education should develop curriculum concerning legal concepts, processes, rights and remedies for junior high school students throughout Alaska.

(4) The colleges and universities within the state should establish adult education programs concerning legal concepts, processes, rights and remedies for Alaskan villages. This program should include dissemination of printed materials in attractive format which explain the rights of individuals under the statutes and decisions.

(5) A program should be established for recruiting bi-lingual lawyers fluent in English and another recognized language common to a region of Alaska to serve in Alaskan public programs which relate to the administration of justice. Such a program would work through law school scholarships and financial grants equivalent to what bi-lingual college graduates might otherwise earn if they chose to work in other Alaskan community leadership or service positions.

(6) The colleges and universities within the state should be encouraged to establish a training and continuing education program for the development of paralegal personnel. Persons participating in and successfully completing such a program should be considered for certification to counsel persons within the limits of their training and expertise.

i. Greater understanding of and more information about all direct and related aspects of judicial administration are needed to provide a basis for policy making, for establishing appropriate administrative arrangements for training and education, and for improving other aspects of providing justice in rural areas. In particular, the cultural context and impact of judicial administration must be thoroughly understood by all involved in the system of bush justice. Toward these ends, the Judicial Council, the State Administration, the University of Alaska, and other appropriate organizations should initiate, sponsor and undertake programs of research concerning such areas as the character and processes of village law-making, judicial

administration, and law enforcement.

3. SOME MODIFICATIONS IN SUBSTANTIVE LAW ARE NECESSARY TO CORRECT INEQUITIES IN VILLAGE ALASKA. SUCH MODIFICATIONS RELATE TO THE ADMINISTRATION OF JUSTICE IN URBAN ALASKA AS WELL.

a. There should be a study of the program effectiveness of present correctional and dispositional alternatives in village Alaska. If particular techniques are inefficacious, they should no longer be employed.

b. Dispositional process alternatives prior to invocation of the criminal and juvenile process should be legitimated and encouraged. In the process, there should be guidance on what dispositional alternatives prior to invocation of the criminal process are appropriate.

c. Local alternatives for the control and rehabilitation of juveniles should be developed.

d. Review and changing of the laws concerning alcohol-related offenders throughout all areas of the state. This conference further recommends that training be given to all officers of the criminal justice system to recognize alcoholism as an illness and that this be done in conjunction with broad community education.

e. Waivers of rights to counsel, silence, trial by jury, trial by the district court, and other related rights, should be accepted by magistrates only after the most careful scrutiny

for voluntariness and understanding. Advice as to rights should be thorough and discursive and in the language primarily spoken by the defendant. Where an attorney or appropriate paraprofessional is available, his presence on behalf of the defendant should ordinarily be obtained.

f. It shall be a mitigating factor in sentencing, but not in the determination of guilt, that an act, violative of law, was committed pursuant to custom.

g. The courts and legislature should recognize customary adoptions should not involve lengthy court procedures but rather summary procedures.

h. Court arraignment procedures must include the advising of constitutional rights in a language understandable to the defendant. Boards of qualified interpretors should be established and funded and their services made available throughout the state for this purpose.

i. It is recommended that the boundaries and number of judicial districts be examined and changed where necessary to facilitate access to judicial services. The social and transportation patterns of the individuals to be served should be given prime consideration in the establishment of judicial districts. Example: Barrow should be part of the fourth judicial district and Bethel should be either part of the third judicial district or a new special Superior Court District should be created for Bethel.

j. The Alaska Administrative Procedures Act and the Alaska Administrative Code should be amended to:

(1) Require that hearings on administrative licenses, rules, and orders be held in the organized community or communities affected by the issuance of the license, rule or order.

(2) Extend the time allowed for administrative appeals from 30 days to 60 days.

(3) Require the posting of notice at the situs, the publication of notice in the newspaper published nearest the situs and public hearing be held at the situs or community nearest the situs prior to the granting of the application, the license or any interest in tidelands or property, in order to adequately protect rights or interests in these tidelands or property.

k. Civil Rule 53 should be interpreted and implemented to allow for the liberal appointment of special masters to take factual evidence in areas not frequently served by the superior court and where required for the ends of justice.

l. Changes in venue requirements should be as follows:

(1) For criminal actions, venue should be originally set in the election district in which the alleged crime was committed; for civil actions venue shall originally be set in the election district which has the most significant contacts with the transaction which is the subject of the action.

(2) AS 22.10.040 should be amended by deleting subsection (2) and enacting a new statute in the place of subsection (2) which reads:

A motion for change of venue shall be granted when required for the convenience of the witnesses and the ends of justice.

(This amendment will change the existing law which places a venue change for witness convenience and justice in the discretion of the superior court judge to a mandatory change requirement in this one instance.)

BE IT FURTHER RESOLVED THAT:

4. THE STATE SHOULD ENCOURAGE AND PROVIDE PLANNING ASSISTANCE IN THE ESTABLISHMENT OF COMMUNITY MENTAL HEALTH CENTERS IN THE REGIONAL SERVICE CENTERS OF THE STATE, SUCH AS BETHEL, NOME, KOTZEBUE, BARROW, FORT YUKON AND OTHERS. ALSO, THE COMMISSIONER OF THE DEPARTMENT OF HEALTH AND WELFARE SHOULD CONSULT WITH THE DIRECTOR OF MENTAL HEALTH AND THE SUPERINTENDENT OF THE ALASKA PSYCHIATRIC INSTITUTE TO PROVIDE RESIDENT QUARTERS FOR PERSONS REFERRED BY THE COURTS FROM RURAL AREAS FOR EVALUATION AND REFERRAL UNTIL SUCH TIME AS MENTAL HEALTH FACILITIES ARE AVAILABLE.

5. THE STATE DIRECTOR OF COMMUNICATIONS SHOULD COORDINATE PRESENT EXISTING RADIO COMMUNICATIONS NETS AND ESTABLISH OTHERS AS REQUIRED, WHEREBY ALL AREAS NOT HAVING ACCESS TO COMMUNICA-

TIONS MAY BE SERVED. THE CENTER OF EACH NET SHOULD BE LOCATED IN THE AREA OF EACH PRESIDING DISTRICT COURT JUDGE OF EACH JUDICIAL DISTRICT AND BE MADE AVAILABLE TO ALL AGENCIES AND PERSONS ASSOCIATED WITH THE JUSTICE SYSTEM ON A 24 HOUR PER DAY BASIS. IN CONJUNCTION WITH THE ABOVE, THE JUDICIAL COUNCIL OR OTHER APPROPRIATE AGENCIES SHOULD INTERVENE IN THE FCC DOCKET ON DOMESTIC SATELLITES TO URGE THE NEED IN VILLAGE ALASKA FOR IMPROVED COMMUNICATIONS IN THE ADMINISTRATION OF JUSTICE.

6. AS EACH COMMUNITY SHOULD HAVE BETTER CONTROL OF ITS AFFAIRS, LEGISLATION SHOULD BE ENACTED TO AUTHORIZE THE ISSUANCE OF PACKAGE AND BY-THE-DRINK LIQUOR LICENSES TO CORPORATIONS WHOLLY OWNED BY MUNICIPAL CORPORATIONS OR ORGANIZED COMMUNITIES.

7. THIS CONFERENCE RECOMMENDS THAT ANOTHER JUSTICE IN THE BUSH CONFERENCE BE HELD SOMEWHERE IN A RURAL COMMUNITY.

ALASKA JUDICIAL COUNCIL
SIXTH REPORT
SUPPLEMENT

In response to inquiries and suggestions received from the Joint Senate and House Judiciary and Finance Committees, and to other matters which have come to the Council's attention during its Juneau session held on March 2 and 3, 1971, the Council submits the following supplementary report to be incorporated as a part of its Sixth Report.

1. Increase in Civil Jurisdiction of District Courts. In addition to the recommendations contained on page 47 of the Sixth Report relating to increased District Court jurisdiction, the Council recommends that such jurisdiction be concurrent with that of the Superior Court. Appeal from the District Court shall be to the Superior Court which may in its discretion augment the record on appeal, in whole or in part, or hold a hearing de novo.

2. Limitation on Penalties for Petty Offenses. As a result of the Supreme Court decision in Baker v. City of Fairbanks, 471 P. 2d 386 (Alaska 1970), persons accused of crimes which carry as a penalty the possibility of incarceration are entitled to a trial by jury. The result has been a tremendous increase in the number of jury trials in prosecutions for minor or petty violations, with a corresponding increase in cost both in jury fees and court time. Therefore, the Council recommends that the legisla-

ture act to limit the penalty imposed for all petty offenses, such as, but not restricted to, minor traffic violations, in all State statutes and municipal ordinances so that the element of criminality and the possibility of incarceration is deleted.

3. Jury Service. In a further effort to reduce the costs of jury trials, while at the same time limiting the burden of jury service on participating citizens, the Council reommends to the Supreme Court and the Legislature that, unless otherwise directed by the Supreme Court, citizens selected for jury service should not be required to serve for a period longer than 30 consecutive days; except that jurors who commence sitting in a trial within the 30 day period shall continue to sit in that matter until discharged by the trial court. The Council further recommends that fees for jury service be reduced to $15 per day for service of more than one-half day, or $7.50 per day for one-half day or less, such fees to be paid only upon receipt of an affidavit from the juror stating that he is not being compensated for his time by a source other than the Alaska Court System.

4. Alaska Court System Autonomy. The Council recommends to the legislature that it act to make the Alaska Court System autonomous in all fiscal planning and personnel classification matters.

5. Six-man Juries. In line with the interest

expressed by the Senate and House Joint Committees, the Council is undertaking a study to determine the desirability of recommending a constitutional amendment reducing the size of juries from twelve to six persons.

THE FOLLOWING PAGES WERE TREATED AS
A UNIT IN THE ORIGINAL FILE.

Judges' Salaries

Alaska Judicial Council
941 FOURTH AVENUE
ANCHORAGE, ALASKA
99501

April 23, 1971

Representative William J. Moran
Alaska State House
Pouch V
Juneau, Alaska 99801

Dear Representative Moran:

As you know, the Alaska Judicial Council this year recommended increases in judicial salaries. The Council also recommended the establishment of a Judicial Salary Commission to provide periodic review of judicial salaries. A bill was introduced this session providing for such a commission to include review of legislative and executive salaries. Although it appears that salary increases will not be voted this session, the Council again urges that a salary commission be established at this time. This is particularly important because recent and anticipated pay increases to classified employees will create a situation where judges in some cases are compensated less than some classified employees of the state. Appropriate balance in compensations between classified employees and executive, legislative and judicial officials can only be maintained by periodic review of all salaries.

Very truly yours,

Theodore Russ Dunn
Executive Secretary to the Council

Mental Competency

THE SUPREME COURT OF THE STATE OF ALASKA

ARLIE ROY POPE,

Appellant,

v.

STATE OF ALASKA,

Appellee.

File No. 1127

O P I N I O N

[No. 660 - December 21, 1970]

Appeal from the Superior Court of the State of Alaska, Third Judicial District, Anchorage, Ralph E. Moody, Judge.

Appearances: James R. Clouse, Jr., Anchorage, for Appellant. G. Kent Edwards, Attorney General, Juneau, Harold W. Tobey, District Attorney, and Richard R. Felton, Assistant District Attorney, Anchorage, for Appellee.

Before: Boney, Chief Justice, Dimond, Rabinowitz, Connor and Erwin, Justices.

ERWIN, Justice.
CONNOR, Justice, concurring in part and dissenting in part.

Appellant, Pope, was convicted of second degree murder in connection with the death of one David Silva on July 9, 1968. According to his own testimony, he arose on that date at his usual hou· and prepared himself for work. While driving to work he began to feel sick and decided to have only coffee in place of his usual breakfast. As appellant continued towards his job, the sickness became more severe and he

decided to turn around and drive back to his motel He testified that this condition of nervousness and sickness at his stomach had occurred with frequency in the period of time shortly before the shooting occurred.

After returning to his motel room, appellant consumed a little less than one-half of a pint of alcoholic beverage, remaining in his room and watching television. He made several attempts to reach his former wife, Irma Pope, and was at last successful. However, Mrs. Pope refused to speak with him, slamming down the telephone. Appellant stated that the reason that he had attempted to call his former wife was that he felt really sick and was looking for help from someone.

After being rejected over the telephone, appellant described a strange feeling, "like something was spinning around the top of my head, from right to left, right underneath the skin against the skull and when you closed your eyes you could see -- could see a streak of light coming around and around. . . ." He described the light as not being mean or anything, but the light said "kill him, kill him, kill him" -- just kept repeating it; and finally he said it to himself and as soon as he did he felt very good and was not sick any more. Appellant further stated that after the lights had stopped in his head, he felt very sorry for David Silva because of what was going to happen; he did not think there was anything that he could do to prevent the killing of David Silva, and he knew he was going to do it, but he didn't yet know just how. When

appellant finally agreed with the light in his head which told him to kill Silva, the nervousness disappeared, as did his upset stomach.

Appellant's recollection of the events that occurred after he left the motel was hazy and vague. He recalled only being near the parking lot at Anchorage Bedding and Furniture and next seeing the gun in his hand on the door ledge of his automobile. Appellant did not recall shooting the decedent, but only remembered watching the decedent sitting down and then lying backwards on the ground.

Officer Pavlovich was the first law enforcement officer to arrive on the scene. Upon arriving he observed the deceased, a woman at the head of the decedent, and another man, later identified as the appellant, alongside the decedent in either a squatting or kneeling position. Officer Pavlovich went over to the decedent, checked his pulse, and pronounced him dead. He next asked the woman what had happened. The woman, Mrs. Silva, indicated that appellant had shot Mr. Silva. In response to this, Pavlovich stood the appellant up and started to search him for weapons.

At this point in the sequence of events there is a dispute as to the actual occurrences. A Mr. McConnell testified that he observed Officer Pavlovich going over to appellant and questioning him for a minute or two before finally searching him for a weapon. The officer, on the other hand, testified that after he had examined Silva he immediately started to search

appellant. Appellant's version of the story is that as he was being frisked by Officer Pavlovich, he was asked if he had a gun, to which he responded yes, that it was in the car. Officer Pavlovich claims that the information about the gun was volunteered by Pope and that no such question had been asked.

Mr. McConnell stated that after eliciting this information, Officer Pavlovich proceeded to appellant's car, with his arm on appellant's arm, to retrieve the weapon, which was located in the middle of the front seat. Officer Pavlovich stated that after Pope had volunteered the information as to the whereabouts of the gun, Pope proceeded to the automobile and Pavlovich hurried to beat him to the car in an effort to retrieve the weapon.

On cross-examination Officer Pavlovich described the appellant's appearance as being dazed and testified that his feeling at the time was that appellant was not drunk, but either dazed or at least under the influence of alcohol -- but he could not tell which. Officer Pavlovich further testified that although he detected nothing radically wrong with appellant, that is, appellant walked normally and spoke clearly and distinctly, albeit very slowly, he nevertheless seemed to be preoccupied. At another point in his testimony Pavlovich stated that he thought appellant was either under the influence of alcohol or in a state of shock. Furthermore, he was not sure whether appellant was in possession of his faculties at this time.

On August 5, 1968, Pope was indicted by the grand jury for first degree murder and arraigned immediately thereafter.

Appellant entered a plea of not guilty, and the trial date was set for December 12, 1968, before the Honorable Edward V. Davis, Superior Court Judge. Prior to trial, on November 29, 1968, at the request of the prosecutor, a competency hearing was held. On January 16, 1969, the Superior Court entered an order to the effect that the appellant was competent to stand trial.

Because of continuances, trial did not begin until February 10, 1969. At that time the defendant appeared before the Honorable Ralph E. Moody, Judge of the Superior Court, rather than Edward V. Davis, to whom the case had been assigned originally. Timely objection was made by appellant to the unannounced change. On February 18, 1969, the jury returned a verdict of guilty of murder in the second degree. Notice of appeal was duly filed.

Appellant raises four specifications of error in the trial below. His first specification is that the court committed prejudicial error in reassigning appellant's case from Judge Davis to Judge Moody without giving appellant five days from the date of reassignment to consider and possibly file a peremptory challenge affidavit as provided in AS 22.20.022; his second, that the trial court erred in overruling the appellant's motion to suppress the evidence seized by Officer Pavlovich from the appellant's car prior to a lawful arrest; and his third, that the trial court incorrectly admitted the statements of appellant made prior to his being given the proper Miranda warnings and after he had become a suspect in the crime and had been substantially deprived of his freedom of action.

Finally, he contends that the trial court should have ruled as a matter of law that the burden of proving sanity is on the state rather than the burden of proving insanity being upon the defendant, when there was some evidence in the record to indicate that sanity was at issue.

I

In his first claim of error, appellant contends that because of the assignment procedure used herein,[1] he did not have sufficient opportunity to determine and if necessary file an affidavit alleging he believed that he could not obtain a fair and impartial trial.

Trial proceeded on February 10, 1969, appellant making timely motion,[2] which motion was denied.

---

[1] There was no advance notice to counsel of the reassignment of this case from Judge Davis to Judge Moody on the day of trial. It should be noted that subsequent to the trial herein this court in the case of Roberts v. State, 458 P.2d 340, 346 (Alaska 1969) pointed out the potential problems of such a practice in suggesting that this method of reassignment of a case should be avoided in the future:

> A method should be devised and utilized to make assignment of cases to judges sufficiently in advance of trial or hearing, with notice of the assignment being given to the parties, so that the parties can be afforded their rights under AS 22.20.022 without interfering with the scheduled hearing or trial dates.

[2] The motion was as follows:

> Mr. Clouse: Your Honor, for the record, at this time, I would like to state an objection to the Court's requiring us to go to trial at this time and not before the -- Judge Davis who was previously assigned this case. This deprives the defendant of the opportunity to investigate and exercise any challenge that he may have within the five day period as provided by rule and statute.

Appellant correctly points out that the granting of the five-day period is to allow a party or his attorney an opportunity to investigate the judge to whom the case is assigned and if necessary file the requisite affidavit for disqualification, thus avoiding the waste of judicial time which would result if an affidavit or disqualification were not filed until the date of trial because this would mean that the case would have to be continued until another judge could be assigned and the disqualified judge would not be ready at that time to start the trial of another action.[3] Appellant

---

2 [Contd.]

> The Court: Motion's denied since this is merely a procedural matter and it delays the -- delays the carrying on of Court business if we give effect to that for the five days rule. Other than the objection, is defense ready to proceed?
>
> Mr. Clouse: Yes, your Honor.

AS 22.20.022 states in relevant part:

> "Peremptory disqualification of a superior court judge. (a) If a party or his attorney in a superior court action, civil or criminal, files an affidavit alleging under oath that he believes that he cannot obtain a fair and impartial trial, the presiding judge shall at once, and without requiring proof, assign the action to another judge of that district, or if there is none, the chief justice of the supreme court shall assign a judge for the hearing or trial of the action. The affidavit shall contain a statement that it is made in good faith and not for the purpose of delay."
>
> * * *
>
> "(c) The affidavit shall be filed within five days after the case is at issue upon a question of fact, or within five days after the issue is assigned to a judge, whichever event occurs later, unless good cause is shown for the failure to file it within that time."

3 Roberts v. State, 458 P.2d 340, 346 (Alaska 1969).

further correctly argues that the provisions of this statute have been interpreted by this court to mean that once the affidavit is filed, the judge involved is without power or jurisdiction to take any further action in the proceeding. Channel Flying Inc. v. Bernhardt, 451 P.2d 570 (Alaska 1969).

But appellant has not shown that any harm resulted to him from the denia. of his motion. Instead, he invites us to speculate that he suffered some possible prejudice, even though he did not challenge the trial judge because he felt that any challenge he made might have a prejudicial effect on the jury. The gist of appellant's argument appears to be that since any challenge might affect the jury he never seriously considered whether or not he should exercise the challenge because the reassignment made the choice more difficult. Since appellant could have exercised the challenge at any time within five days of reassignment, even during trial, we hold that his failure to do so was a waiver of his right to a peremptory challenge to the trial judge, and it was not error for the court to refuse to grant a continuance of five days to permit appellant to ponder this matter at length.

II

Appellant claims that the trial court committed error in refusing to suppress as evidence (1) appellant's oral statement about the gun, and (2) the gun itself, which the officer seized in appellant's car. The argument is that this evidence is tainted because the required warnings under Miranda v.

Arizona, 384 U.S. 436, 16 L.Ed.2d 694 (1966) were not given by the officer until after the seizure of the gun, that appellant had already become a suspect in the crime, and that he had been substantially deprived of his freedom in a significant way. The test of when warnings must be given under Miranda is whether the accused has been "taken into custody or otherwise deprived of his freedom by the authorities in any significant way and is subjected to questioning." 384 U.S. at 478, 16 L.Ed.2d at 726.

We need not explore such problems as whether the "in custody" test of Miranda displaces the "focus" test of Escobedo v. Illinois, 378 U.S. 478, 12 L.Ed.2d 977 (1964), or whether the two tests can be regarded as alternatives to some extent.[4] For it is plain to us that this case falls within an important exception stated by the court in its opinion in Miranda. After pointing out that it did not intend to hamper the traditional function of police officers in investigating crime, the court said:

> General on-the-scene questioning as to facts surrounding a crime or other general questioning of citizens in the fact-finding process is not affected by our holding. It is an act of responsible citizenship for individuals to give whatever information they may have to aid in law enforcement. In such situations the compelling

[4] United States v. Hall, 421 F.2d 540 (2nd Cir. 1969); Graham, What is Custodial Interrogation?: California's Anticipatory Application of Miranda v. Arizona, 14 U.C.L.A. L.Rev. 59, 114-15.

> atmosphere inherent in the process of in-custody interrogation is not necessarily present. 384 U.S. at 477-78, 16 L.Ed.2d at 725-26.

In interpreting Miranda various courts have had to draw lines between what are permissible investigative interviews and custodial interrogations. The United States Supreme Court itself has made it plain that custodial interrogation could take place outside the station-house where one was "not free to go where he pleased but was 'under arrest.'" Orozco v. Texas, 394 U.S. 324, 325, 22 L.Ed.2d 311, 314 (1969). The courts must determine, therefore, in each case whether the atmosphere and setting of an interrogation are of such coercive effect or indicate such significant restraint as to trigger the need for a Miranda warning. There is not always agreement about the criteria for such a determination.

But the case at bar is a strong one for applying the "on-the-scene questioning" exception to the Miranda warning requirement. The officer here was presented with a situation of great emergency. A crime of violence had occurred, the victim was lying on the ground dead. There was more than one person present. Both to protect his own safety and that of others, the officer had to elicit information about what had happened, and about the gun which had obviously been used in the killing. For the same reason the officer also had the right to conduct a strictly limited search ("frisk") of Pope's person for weapons under the rule of Terry v. Ohio, 392 U.S. 1, 20 L.Ed.2d 889 (1968),

which he did.[5] To hold that, while a policeman faced with an emergency such as the one which confronted Officer Pavlovich may "frisk" a suspect for weapons he may not simultaneously ask him whether he is armed, would be an unrealistic and unreasonable extension of the Miranda rule.

Appellant also contends that, because the revolver was seized from Pope's automobile prior to the time he was placed under arrest, it was inadmissible because it was not the product of a search incident to arrest. The difficulty with this line of argument is that the gun was not the product of a "search" at all; it was lying on the front seat of the car in plain view. As soon as he saw it, Officer Pavlovich seized it and unloaded it, both to preserve it and its cartridges as evidence and to prevent appellant, who was standing beside him, from getting hold of it. His conduct was entirely justified.

> It has long been settled that objects falling in the plain view of an officer who has a right to be in the position to have that view are subject to seizure and may be introduced in evidence.[6]

III

The final point raised by appellant is a challenge to the burden of proof in insanity cases as set forth in the

[6] Harris v. United States, 390 U.S. 234, 236, 19 L.Ed.2d 1067, 1069 (1968); Creighton v. United States, 406 F.2d 651 (D.C. Cir. 1968); Klockenbrink v. State, 472 P.2d 958, 961 (Alaska 1970). See Stevens v. State, 443 P.2d 600, 602 (Alaska 1968).

opinion of this court in Chase v. State.[7] A review of the record reveals that the only testimony before this court in reviewing this point is the testimony of Officer Pavlovich, the appellant, Pope, Bill McConnell, and the cross-examination of appellant's ex-wife. Testimony given by Dr. J. Ray Langdon, a psychiatrist, and Marie Doyle, a psychologist, at the trial, as well as the testimony of additional police officers and others at the scene of the crime, was not made a part of the record on appeal.

While proper objections were made at the trial concerning burden of proof in insanity cases, no objection was made to instructions on the test for insanity as given by the trial court, nor was any testimony presented nor instructions requested concerning such an issue.

Since in our opinion the burden of proof as to the defense of insanity and the actual test for insanity are inseparably intertwined,[8] we are placed in the position of attempting to review the entire basis for the present rule on the defense of insanity in Alaska on an inadequate record without complete presentation of these issues to the trial court. This we decline to do.[9]

---

[7] 369 P.2d 997, 1003 (Alaska 1962).

[8] Approximately one-half of the states put the burden on the defendant while the other half and the federal courts put the basic burden on the prosecution. See annot. 17 A.L.R.3rd 146 (1968).

[9] For a similar action by a federal court, see Ramer v. United States, 390 F.2d 564 (9th Cir. 1968).

The importance of the defense of insanity has been underscored recently by a series of excellent opinions in federal courts which have considered, and in many cases adopted, the A.L.I. test for insanity,[10] and a series of equally searching state court opinions which have noted more than one position, but have tended to retain the M'Naghten rule.[11] These opinions note that there are presently four separate tests for insanity[12] which have received varying degrees of judicial acceptance. They serve to underscore the difficulty of choosing a proper test for insanity and the corresponding burden of proof without

complete presentation on the issue in the trial court and ultimately in this court.[13]

The judgment of the Superior Court is hereby affirmed.

---

[13] Once before this court has refused to review the test for insanity for Alaska based on an inadequate record. See Dimmick v. State, 449 P.2d 774, 776 (Alaska 1969).

CONNOR, J., concurring in part and dissenting in part.

I concur with the majority opinion except the portion dealing with the burden of proof in insanity cases, and allied questions. As to that portion of the majority opinion I must respectfully dissent.

This case went to the jury on instructions concerning the defense of insanity which were patterned on those approved by this court in Chase v. State, 369 P.2d 997 (Alaska 1962). Counsel for appellant objected to those instructions as improperly placing the burden on the accused to establish his insanity by a preponderance of the evidence. He thus raised and preserved for appeal the questions of what is the burden of proof and where it should be placed in these cases. He is properly entitled to a decision on those questions.

The majority of my colleagues feel that the burden of proof question and the substantive test of insanity are interrelated. I agree. But for that very reason I believe that both topics logically can, and properly should, be determined by the court.[1/]

The lack of an adversary presentation of the legal arguments bearing upon the proper test of insanity in criminal cases should not be an impediment to decision in this particular instance. Ultimately one must read a large body of legal and

---

1/ For a case in which a distinguished court took a relaxed view of the manner in which counsel raised the question of the proper test of insanity in the trial court, see United States v. Freeman, 357 F.2d 606 (2d Cir. 1966). The failure of trial counsel in that case to object to the insanity test itself was not deemed critical.

psychiatric material even to become conversant with these subjects. Appellate briefs are of much less value here than in the resolution of more usual questions.[2] Surely this would not be the first time that this court decided a case on grounds or under a doctrine not fully presented in the briefs.[3]

There is another reason why we should decide these questio.. now, not later. In my opinion the test currently obtaining under Chase v. State, supra, is so inherently unfair as to dissuade either defendants or their counsel from raising the defense of insanity, or adducing evidence in support of it. Thus it is difficult to get the insanity question before us on appeal.

The insanity defense is much like a confession and avoidance. One virtually admits all factual elements of the crime but claims insanity as a special ground of exoneration. One claiming that he did not commit the offense, but who alternatively claims that he was insane when he did commit it, has little hope of success. While such an approach is procedurally permissible, as a practical matter it is a foolhardy strategy.

2/ The question of the test of insanity as a criminal defense has already been briefed in Chase v. State, 369 P.2d 997 (Alaska 1962). There the state urged that if the M'Naghten test was not employed, the American Law Institute test (discussed later herein) would be the most suitable.

3/ One such case was Grossman v. State, 457 P.2d 226 (Alaska 1969), adopting an objective standard of entrapment, though neither party directly briefed that doctrine. Surely others could be found by searching the briefs and comparing them with the opinions rendered by this court during the last ten years.

A person invoking the Alaska rule on insanity, even in a strong case, has almost precluded himself from an acquittal. The current test thus exerts a chilling effect upon one who might seek a change in the law through the appellate process. This is true even though he may have suffered from serious mental illness, of a psychotic type, at the time he committed the act with which he is charged. Because of the in terrorem effect of the current Alaska test, I see no reason to postpone corrective measures, especially if we believe that the test can be improved.

I

All discussion of the tests of criminal responsibility inevitably must refer to M'Naghten's Case, 10 Cl. & Fin. 200, 8 Eng. Rep. 718 (1843), which is regarded as the English source of the rule followed in most American jurisdictions for over a century. In that case Daniel M'Naghten attempted to assassinate Robert Peel, the Prime Minister. Because Peel, on the fatal day, happened to ride in Queen Victoria's carriage instead of his own, M'Naghten shot into the wrong carriage and killed Drummond, Peel's secretary. From all of the available information it seems quite plain that M'Naghten was suffering from psychotic delusions of persecution. At his trial Lord Chief Justice Tindal virtually directed a verdict in his favor.[4/] At the trial the medical witnesses and the court had been influenced by the writings and

4/ Guttmacher & Weihofen, Psychiatry and the Law, 403 (1952); Roche, "Criminality and Mental Illness - Two Faces on the Same Coin," 22 U. Chi. L. Rev. 320, 324 (1955); Biggs, The Guilty Mind, 95-97, 102 (1955).

theories of such advanced thinkers as Dr. Isaac Ray, the first great forensic psychiatrist in America. It was Dr. Ray's thesis that insanity must be measured by evaluating the entire personality structure of an individual, and not by tests such as merely the ability to know right from wrong.[5/] At any rate, M'Naghten was acquitted. Unfortunately for the development of law, the case did not end there.

Despite commitment of the hapless M'Naghten to an insane asylum, Queen Victoria was outraged by the acquittal, probably because there had already been three attempts on her life and one on that of the Prince Consort. In a letter to Sir Robert Peel, the Queen deplored the action of the judges in allowing verdicts of not guilty by reason of insanity in cases of this kind because she was convinced that such malefactors "were perfectly conscious and aware of what they did." She pressed for legislation to require judges "to interpret the law in this and no other sense in their charges to the Juries."[6/] The House of Lords was convened, and the fifteen judges of the common law courts were called upon, in an atmosphere of political pressure, to answer five rather vacuous questions about criminal responsibility in English law. Interestingly enough, it was Lord Chief Justice Tindal who

---

5/ Dr. Ray's views have a modern ring. "[T]he insane mind is not entirely deprived of ... power of moral discernment, but on many subjects is perfectly rational and displays the exercise of a sound and well balanced mind." Ray, Medical Jurisprudence of Insanity 13 (3d ed. 1853).

6/ Biggs, supra n. 4, 103.

responded with a test more rigid than that which he had used when M'Naghten was tried before him. The M'Naghten rule in essence is:

> "[T]o establish a defence on the ground of insanity, it must be clearly proved that, at the time of committing of the act, the party accused was labouring under such a defect of reason, from disease of the mind, as not to know the nature and quality of the act he was doing: or, if he did know it, that he did not know he was doing what was wrong." 10 Cl. & Fin., at 210, 8 Eng. Rep., at 722.

Thus, in a case which was no longer a case, in response to hypothetical questions based on notions of phrenology and monomania which were then in vogue, the judges, in a dramatic departure from common law decisional technique, acting more as a governmental committee than a court, pronounced a rule which has been followed unthinkingly by many courts ever since. Of little avail was the restrained observation of Sir James Stephen that "every judgment delivered since the year 1843 has been founded upon an authority which deserves to be described as in many ways doubtful."[7/] The test could at least have been limited to cases of paranoia like that suffered by M'Naghten, but instead it was applied by many courts as a rule of universal and implacable validity, appropriate for all types of mental and emotional derangement.

The M'Naghten test has been supplemented in many jurisdictions by the "irresistible impulse" test, under which one suffering from a mental disease, of such severity that the

7/ II Stephen, History of the Criminal Law of England 153 (1883).

freedom of will is destroyed, may be excused from culpability.[8]

In Alaska, before statehood, the right-and-wrong test, supplemented by the irresistible impulse test, was considered the applicable rule.[9] In Chase v. State, 369 P.2d 997 (Alaska 1962), however, this court adopted a particular version of what it regarded as the M'Naghten rule. The test laid down there was that in order to exculpate the defendant he must be laboring under such mental disease or derangement at the time of the act "as to render him incapable of knowing the nature and quality of his act and of distinguishing between right and wrong in relation to the act with which he is charged." 369 P.2d, at 998. (Emphasis supplied.) This results in a formulation more rigid than the M'Naghten test, and without the irresistible impulse supplement which had previously obtained in Alaska.[10] In that sense the Chase case is a retrograde decision in a time of

---

8/ As of 1955, about 14 states, and the federal judiciary, had adopted the irresistible impulse addition to the test.

Mod. Penal Code, Tent. Dr. No. 4,161 (1955).

9/ Matheson v. United States, 227 U.S. 540 (1913); Davis v. United States, 165 U.S. 373 (1897); Sauer v. United States, 241 F.2d 640 (1957), cert. denied 354 U.S. 940: Rivers v. United States, 270 F.2d 435 (1959).

10/ That the Alaska test is more restrictive than M'Naghten is apparent from the following example. One laboring under a psychotic delusion, such as that he is being persecuted or that God has ordained that he must kill, may well know the nature of the act committed, yet not be able to appreciate its wrongfulness. Under M'Naghten he would not be culpable, but under Chase he could not be acquitted. Cf. People v. Schmidt, 110 N.E. 945 (N.Y. 1915), per Cardozo, J.

generally forward legal progress.[11/]

The court in Chase relied on three cases: Jessner v. State, 202 Wis. 184, 231 N.W. 634, 71 A.L.R. 1005 (1930); Maas v. Territory, 10 Okla. 714, 63 P. 960 (1901); and Montgomery v. State, 68 Tex. Crim. 78, 151 S.W. 813 (1912). As the Note, "Criminal Insanity," UCLA-Alaska L. Rev., 8 Alaska L.J. 152, 153-54 (Aug. 1970), points out, these cases were decided before many of the modern advances in psychiatry had been widely disseminated. Moreover, the instructions given in these cases lacked clarity and therefore were extremely confusing. Jessner and Montgomery indeed held that the phrases "the nature and quality of the act" and "the difference between right and wrong" were synonymous; if the defendant could not understand the one, he could not distinguish the other. However, as the Note, supra, indicates, these phrases are not at all synonymous in ordinary speech.

To torture English into performing such a linguistic cakewalk requires unusual skill. Since juries are composed of but ordinary reasonable laymen, additional complicated instructions would have to be given to insure that the jury does not consider the terms according to their usage in common everyday

---

11/ Speculation persists in Alaska legal circles that the use of the conjunctive "and" in the instructions which were validated in Chase possibly came about through a typographical error by the secretary to the trial court judge. If this is so, then Chase is no less an historical accident than M'Naghten's Case.

speech and thereby misapply the law. Such verbal gymnastics should not be employed in jury instructions. The purpose of jury instructions is to instruct and enlighten the jury on the law, not to confuse them.[12/]

It also appears that the instructions in Jessner focused solely on the defendant's ability to distinguish between right and wrong, ignoring completely his ability to understand the nature and quality of his act.[13/] In Maas, the actual instruction did follow the disjunctive form of the M'Naghten test.[14/] If anything, this case stands for an adoption of the true M'Naghten rule, not the rule of Chase. In sum, I do not find any of these cases of sufficient precedential value to warrant an adherence by this court to what is little more than a modified "wild beast" test.[15/]

Since the M'Naghten case, and even in the eight years since Chase v. State was decided, a great deal of critical

---

12/ "But 'glory' doesn't mean 'a nice knockdown argument,'" Alice objected.

"When I use a word," Humpty Dumpty said, in rather a scornful tone, "it means just what I choose it to mean--neither more nor less."

"The question is," said Alice, "whether you can make words mean so many different things."
