MEMORANDUM

TO: The Honorable William Moran
Chairman, House Judiciary Committee

FROM: Frederick McGinnis, Commissioner
Department of Health and Welfare

SUBJECT: House Bill 5

DATE: February 3, 1971

Mr. F. E. Kester, Registrar of Vital Statistics, has raised a significant point in relation to the filing of death certificates should HB 5 (Alaska Probate Code) become law. His specific concerns are outlined in the attached memorandum.

It is requested that Mr. Kester be afforded the opportunity to appear before your Committee in order that he might speak to these concerns.

FM:JFM:smb
cc: Office of the Attorney General
Division of Administrative Services

MEMORANDUM

State of Alaska

RECEIVED

1971

Office of the Commissioner

TO: Frederick P. McGinnis, Commissioner
Department of Health and Welfare

Thru: V.L. Iverson, Director
Division of Administrative Services

DATE : February 1, 1971

FROM: F. E. Kester, State Registrar
of Vital Statistics

SUBJECT: HB 5, Probate Code

HB 5 revises and codifies the Alaska Probate Code. It is the same bill introduced in 1968 (HB 349) and in 1969 (HB 39). It repeals many existing statutes, among them AS 20.05.130(b), which is quite vital in determination of presumptive death after six years disappearance. We cannot find that this has been adequately replaced in the new proposed code.

The present statute says in part "If a missing person is not heard from for a period of six continuous years, he is presumed to be dead ....." This combined with AS 09.55.050 gives an authority for filing a certificate of death in these cases. Both the Bureau of Vital Statistics and the Supreme Court (Rule 5, Probate Rules) have implemented this, and the resulting death certificates have proven very useful in the settling of estates and other claims.

There are several references to such presumption of death and missing persons in the proposed code; for example:

AS 13.16.070	page 19
AS 13.16.075	20
AS 13.16.085(3)	21
AS 13.36.010	72
AS 13.36.400(b)	87
AS 13.36.410(3)	87

However, no place states specifically that the court may make a finding of presumptive death; nor does it set a standard such as the six years in the present statute.

Possibly the proposed wording is sufficient. We do not feel that this should be assumed. If it is not sufficient authority, we will again have a group of persons for whom we cannot file a death certificate.

I suggest that we call this to the attention of the House Judiciary Committee to see if they have considered this angle. I would like to discuss this rather involved matter with the Committee.

The American Assembly
Columbia University

The Ombudsman

Report of the Thirty-second American Assembly
October 26-29, 1967
Arden House
Harriman
New York

PREFACE

On October 26, 1967, the Thirty-second American Assembly —on *The Ombudsman*—opened at Arden House, on the Harriman (New York) campus of Columbia University. There were 72 participants from the worlds of business, education, communications, labor, and government, and from the clerical, legal and military professions.

For three days, in small discussion groups, they considered in depth various aspects of citizen grievance and redress vis-à-vis government (local, state, and federal); and on the fourth day in plenary session they reviewed and approved the report contained in these pages.

As background for their discussions participants read a volume entitled *Ombudsmen for American Government?* prepared under the editorial supervision of Dr. Stanley V. Anderson of the University of California at Santa Barbara, with chapters and authors as follows:

Chapter 1 —*The Spread of the Ombudsman Idea*—Donald C. Rowat, Carleton University, Ottawa, Canada.

Chapter 2 —*Transferring the Ombudsman*—William B. Gwyn, Tulane University.

Chapter 3 —*State Government and the Ombudsman*—John E. Moore, University of California (Santa Barbara).

Chapter 4 —*The Ombudsman and Local Government*—William H. Angus and Milton Kaplan, State University of New York at Buffalo.

Chapter 5 —*Proposals and Politics*—Stanley V. Anderson.

Appendix —*Annotated Model Ombudsman Statute*—Walter Gellhorn, Columbia University.

Regional Assemblies on *The Ombudsman*, making use of the above-named chapters and The American Assembly conference technique, will be held across the nation with the cooperation of other educational institutions.

The report of The Thirty-second American Assembly reflects the views of the participants in their private, not their official, capacities. The American Assembly itself, a nonpartisan educational organization, takes no position on matters it presents for public discussion, and The Ford Foundation, which generously provided support for this program, similarly takes no official position on the opinions contained herein.

CLIFFORD C. NELSON
President
The American Assembly

Ombudsmen for American Government? (ed. Stanley V. Anderson) will be published by Prentice-Hall, Inc., Englewood Cliffs, New Jersey, in January 1968.

FINAL REPORT

of the

THIRTY-SECOND AMERICAN ASSEMBLY

At the close of their discussions the participants in the Thirty-second American Assembly on *The Ombudsman* reviewed as a group the following statement. The statement represents general agreement; however no one was asked to sign it, and it should not be assumed that every participant necessarily subscribes to every recommendation.

Millions of Americans view government as distant and unresponsive, if not hostile. Though often the targets of the resentment which ensues, government officials are usually not the cause of remoteness, but sometimes its victims. Dehumanized government derives from the impersonality of modern mass society. Improving the means by which individual citizens can voice dissatisfaction with governmental action or inaction will make for a more democratically effective society.

Many devices—governmental and private, formal and informal—already serve to amplify the voice of the individual in the halls of government. Administrative agencies may provide him internal avenues of appeal. Courts may hear his case. Elected representatives may handle his complaint. Public legal aid may be available. News media or private organizations may take up his cause.

All these means of access to government are useful. We should strive further to improve them. Because these existing devices have important functions to serve other than handling citizens' complaints, there is a need in today's large and complex government for mechanisms devoted solely to receiving, examining, and channeling citizens' complaints, and securing expeditious and impartial redress. We believe that

American utilization of the Ombudsman concept will help to fill that need.

What is an Ombudsman?

The Ombudsman is an independent, high-level officer who receives complaints, who pursues inquiries into the matters involved, and who makes recommendations for suitable action. He may also investigate on his own motion. He makes periodic public reports. His remedial weapons are persuasion, criticism and publicity. He cannot as a matter of law reverse administrative action.

What Does an Ombudsman Do?

When the Ombudsman receives a complaint which seems to him to have validity, he asks the agency for an explanation. If necessary he consults further with the complainant and again with the agency. He reports his findings to those concerned. He may suggest a specific remedy to correct individual injustices and he may suggest an improvement in agency procedure.

After consideration, if he finds a complaint to be unfounded, he may discover that the agency has failed adequately to explain its action to the citizen. In this case he may urge the agency to improve its techniques of communication. In other cases he may report to the complainant why his grievance was unfounded. In addition to handling individual complaints, the Ombudsman may make studies and recommendations for the improvement of administration.

The Ombudsman proceeds without cost to the complainant. He is able to operate informally and expeditiously without formal hearing procedures.

Establishment of an Ombudsman

We recommend that Ombudsman offices be established in American local and state governments. We do not recom-

mend the establishment of a single office of Ombudsman for the entire federal government, but we do recommend that applications of the concept be undertaken at the federal level.

The Ombudsman must be selected in a manner which assures public confidence in his independence, impartiality and professional attainments. He should be given a salary which will reinforce his high status in the community.

The Ombudsman should designate his own subordinates. The Ombudsman's term of office should be sufficiently long to minimize his preoccupation with reappointment and should not be coterminous with that of the selecting authority. Provision for his removal from office for cause should be made in such manner as not to interfere with his independence while in office.

The authority of the Ombudsman should extend to public agencies exclusive of courts, legislatures and chief executives. On the other hand, the experience of California and other states with a commission on judicial qualifications—an ombudsmanlike institution—should be given serious consideration as a means for reducing the abuse of judicial authority.

Since American local governments vary greatly in size, population, and legal structure, no uniform design need be followed and advantages are to be derived from experimentation. Such experimentation should include meaningful accessibility to the Ombudsman by all sectors of society.

How Far Does the Ombudsman Go?

An Ombudsman, concerned with mistaken or imperfect action, is a valuable resource. But an Ombudsman often can not provide all the help a citizen may need when confused by or in conflict with the officials who administer public affairs.

At times the citizen must have recourse to an active advocate who can press a demand on his behalf or plan

a defense against governmental action. This need is for adequate legal services. Then, too, citizens require information about governmental services. This need is more properly provided by easily accessible information and referral agencies.

Of course, neither an Ombudsman nor legal and information services can eliminate profound social and economic injustice, which calls for essentially political solutions.

While the Ombudsman does not make policy, his office has two important indirect effects on policy-making. First, the Ombudsman's findings provide the Legislature and the Executive with additional significant information and advice upon which to base major policy improvements. Secondly, the legislative process is enhanced to the extent that the Ombudsman's existence permits and encourages legislators to give increased attention to lawmaking.

Conclusion

We urge the prompt enactment of laws to create the special office required to handle citizens' complaints—the Ombudsman.

ABOUT THE AMERICAN ASSEMBLY

The American Assembly was established by Dwight D. Eisenhower at Columbia University in 1950. It holds nonpartisan meetings and publisnes authoritative books to illuminate issues of United States policy.

An affiliate of Columbia, with offices in the Graduate School of Business, the Assembly is a national, educational institution incorporated in the State of New York.

The Assembly seeks to provide information, stimulate discussion, and evoke independent conclusions in matters of vital public interest.

American Assembly Sessions

At least two national programs are initiated each year. Authorities are retained to write background papers presenting essential data and defining the main issues in each subject.

About 60 men and women representing a broad range of experience, competence, and American leadership meet for several days to discuss the Assembly topic and consider alternatives for national policy.

All Assemblies follow the same procedure. The background papers are sent to participants in advance of the Assembly. The Assembly meets in small groups for four or five lengthy periods. All groups use the same agenda. At the close of these informal sessions participants adopt in plenary session a final report of findings and recommendations.

Regional, state, and local Assemblies are held following the national session at Arden House. Assemblies have also been held in England, Switzerland, Malaysia, Canada, the Caribbean, South America, Japan and the Philippines. Over ninety institutions have co-sponsored one or more Assemblies.

Arden House

Home of The American Assembly and scene of the national sessions is Arden House, which was given to Columbia University in 1950 by W. Averell Harriman. E. Roland Harriman joined his brother in contributing toward adaptation of the property for conference purposes. The buildings and surrounding land, known as the Harriman Campus of Columbia University, are 50 miles north of New York City.

Arden House is a distinguished conference center. It is self-supporting and operates throughout the year for use by organizations with educational objectives. The American Assembly is a tenant of this Columbia University facility only during Assembly sessions.

American Assembly Books

The background papers for each Assembly program are published in cloth and paperbound editions for use by individuals, libraries, businesses, public agencies, non-governmental organizations, educational institutions, discussion and service groups. In this way the deliberations of Assembly sessions are continued and extended.

The subjects of Assembly programs to date are:

1951 — United States-Western Europe Relationships
1952 — Inflation
1953 — Economic Security for Americans
1954 — The United States' Stake in the United Nations
The Federal Government Service
1955 — United States Agriculture
The Forty-Eight States
1956 — The Representation of the United States Abroad
The United States and the Far East
1957 — International Stability and Progress
Atoms for Power
1958 — The United States and Africa
United States Monetary Policy
1959 — Wages, Prices, Profits, and Productivity
The United States and Latin America
1960 — The Federal Government and Higher Education
The Secretary of State
Goals for Americans

Strong and Lundt were the sole owners of both corporations, the payments were made by one corporation and the cross-petition was filed by the other. Strong and Lundt deny personal liability herein and did not join Guardian in its cross-petition. It is their position that they signed for the corporation in a representative capacity. The contract itself would seem to indicate otherwise, but in view of our holding on the plaintiff's action and the position of Strong and Lundt, it is not necessary to discuss or meet that issue.

We affirm the judgment of the trial court dismissing both the petition and the cross-petition.

AFFIRMED.

STATE OF NEBRASKA, APPELLEE, V. JUDITH WAYNE GOODSEAL, APPELLANT.

— N. W. 2d —

Filed January 29, 1971. No. 37605.

1. **Criminal Law: Constitutional Law: Statutes.** The definition of crimes and the penalties for their violation are statutory in this state, and a statute which has the effect of delegating to a private person the punishment to be assessed for a crime is subject to constitutional objection.
2. **Criminal Law: Constitutional Law: Self-Defense.** The Nebraska Self-Defense Act, section 29-114, R. S. Supp., 1969, is unconstitutional and void in that it delegates to a person asserting self-defense the determination of the amount and extent of the force to be used in defending his person as a legal justification for crime.
3. **Constitutional Law: Statutes: Appeal and Error.** Where an unconstitutional statute is relied on to sustain the position of one or more of the parties, this court will, in a proper case, notice the plain error in the premise on which the case was tried and declare the unconstitutionality of the act even though that issue was not raised by the parties.
4. **Criminal Law: Self-Defense.** Killing in self-defense is grounded upon necessity. It exists only in extremity where no other practical means exists to avoid death or great bodily harm apparent to the person resorting to it.
5. ———: — ——. In order to excuse or justify a killing in self-

Re HB 40

defense, the accused must not only have entertained the belief that his life was in danger or that he was in danger of suffering great bodily harm, but the belief must have been reasonable and in good faith.

6. ———: ———. Whether or not an accused killed in fear of death or great bodily harm, or whether or not the killing was motivated by anger, punishment, or vengeance is an issue of fact to be determined by the jury.

7. ———: ———. The bad character of the accused and the fact that she was an acknowledged prostitute does not deprive her of the right of self-defense, but such facts are circumstances to be considered in determining the necessity for and the extent and reasonableness of the force used in connection with the other evidence in the case.

8. Criminal Law: Trial. It is the province of the jury to determine the circumstances surrounding the crime charged; and if, assuming as proved the facts which the evidence tends to establish, they can be accounted for upon no rational theory which does not include the guilt of the accused, the proof cannot, as a matter of law, be said to have failed.

9. Criminal Law: Trial: Appeal and Error. After a jury has considered the evidence in the light of the rule regarding circumstantial evidence and returned a verdict of guilty, the verdict on appeal may not, as a matter of law, be set aside for insufficiency of the evidence if the evidence sustains some rational theory of guilt.

10. Trial: Instructions. It is not error to refuse a tendered instruction where its content is covered by other instructions given by the court.

11. ———: ———. A party may not properly complain of an instruction given by the court when such instruction is more favorable to him than that to which he was entitled.

Appeal from the district court for Douglas County: DONALD BRODKEY, Judge. Affirmed.

Paul E. Watts and Michael N. Schirber, for appellant.

Clarence A. H. Meyer, Attorney General, and Harold Mosher, for appellee.

Heard before WHITE, C. J., CARTER, SPENCER, BOSLAUGH, SMITH, McCOWN, and NEWTON, JJ.

CARTER, J.

The defendant, Judith Wayne Goodseal, was charged

in the district court for Douglas County with murder in the second degree for the killing of Dick Edgar Williams on July 8, 1969. The jury returned a verdict of guilty and the trial court imposed a sentence of 10 to 15 years imprisonment at hard labor in the Nebraska Reformatory for Women. The defendant has appealed.

On July 8, 1969, the body of Williams was found on the street edge of the sidewalk in front of a vacant building at 5208 South 28th Street in Omaha. It was later determined that he had been shot five or six times with .32 caliber bullets. That Williams was the victim of a homicide seemed apparent. The defendant admitted shotting the deceased and asserted that it was done in self-defense.

The deceased and Lee Dunbar were employed at a service station in Omaha. After closing the station in the evening of July 7, 1969, deceased suggested that they go out on the town. They went to several bars, purchased and drank some beer, and finally drove to the Eldorado Club at about 1 a.m. Deceased had previously inquired of a taxi driver as to where they might find some women. They parked Dunbar's car near the Eldorado Club where deceased accosted the defendant who was driving a car leased to Larry W. Pullian and after some negotiation offered $20 for her intimate association. Deceased purported to give defendant two $10 bills which she soon discovered to be two $1 bills and returned them to him. She told him to get out of the car and, according to her testimony, he proceeded to force his desires upon her.

The defendant was 24 years of age, was married, and separated from her husband. She had her two small children in her custody. She had been living with Larry W. Pullian, a single man, for about a year. She admitted that she had engaged in prostitution and admitted further that she had negotiated with deceased for such an act with him. Pullian testified that he had a .32 caliber pistol that he had taken as security for a loan. He stated

that he had placed the pistol on the floor of his car under the driver's seat, but had no knowledge as to whether or not it was loaded. Defendant testified that she did not know there was a gun in the car until immediately before the shooting.

Dunbar testified that after deceased entered defendant's car, defendant and deceased drove around the block and Dunbar followed in his car. Defendant parked her car and Dunbar parked his car about 5 to 10 feet behind it. After some delay he approached the car driven by defendant and made some inquires during the course of which deceased asked him if he had his gun. On signal from the deceased, he answered in the affirmative although he had no gun. Some time later, Dunbar heard five or six pops somewhat similar to exploding firecrackers. He saw defendant drive away and attempted to follow. He saw a man in the back seat but was unable to follow the car. He made an anonymous call to the police and informed them that there had been a shooting in the area. He gave the police the color and license number of the car. The call was verified and answered by the police, but evidence of a shooting was not discovered until the body was later found on the sidewalk in front of 5208 South 28th Street.

Defendant testified that deceased said he did not have $20. She said he tried to force her to remove her clothing which she resisted. She did not testify to making an outcry or to any attempt to open the car door or to leave the car. He finally spun her around with her legs toward him and was threatening to strike her which he did not do. He partially removed his own clothing. She said that she was afraid of deceased and fearful because she knew the man following them had a gun. As he turned her around in the seat, she said her left hand dropped down and came in contact with a gun. She got the gun in her left hand, pointed it at deceased, and squeezed it until all the bullets in the automatic pistol were fired. Deceased slumped back against the door of

the car. She drove the car back in front of the Eldorado Club, honking the horn to attract the attention of Pullian. As she came in front of the Eldorado Club, Pullian came out and, seeing the deceased in the car and the blood on defendant, signaled her to pull over to the curb. She went on, turned the corner, and stopped. He followed and when he reached the car he opened the front door on the right-hand side and the body fell out on the edge of the sidewalk where it was later found by the police. He then got in the back seat because, as he testified, the front seat was covered with blood.

Defendant and Pullian drove away and went home without reporting the incident to anyone. On arrival at their home, Pullian put the gun away and produced it in court at the trial. He washed the floor mats and upholstering to remove the blood stains. The floor mats and upholstering were still damp and the odor of vinegar was noticeable when the car was searched that afternoon by the police.

We point out that defendant admits shooting the deceased with a .32 caliber automatic pistol which she found under the seat of the car. She claims that she squeezed the trigger of the gun until all its shells were fired into the body of the deceased. She contends that she did the shooting while in fear of the deceased and Dunbar who admittedly had followed the Pullian car and had told the deceased in defendant's presence that he had a gun. The evidence is clear that defendant and Pullian had left the body of deceased on the sidewalk in front of a vacant building at 5208 South 28th Street. They left the scene immediately and did not report the killing of the deceased to anyone. On arriving home, the gun was put away and the floor mats and upholstering washed to remove the blood stains and thereby remove evidence of the killing. There is evidence that would sustain a finding of self-defense. On the other hand, there is evidence that defendant attempted to conceal her participation in the killing, an indication of guilt. It was for

the jury to determine under all the facts and circumstances whether or not defendant purposely and maliciously killed Williams without deliberation and premeditation or whether or not she killed him in self-defense as that defense is defined by the law of this state. The jury resolved these issues against the defendant and thereby found beyond a reasonable doubt that defendant did not kill Williams in self-defense and found also that the evidence shows beyond a reasonable doubt the defendant did kill Williams purposely and maliciously but without deliberation and premeditation.

The defendant contends the rule as to the weight to be given to the circumstantial evidence supports the assignment of error that the evidence was insufficient to sustain the conviction. The jury was properly instructed on the circumstantial evidence rule by instruction No. 15 and its giving is not assigned as error. The jury considered the circumstantial evidence in the light of this instruction and concluded that the facts and circumstances tend to connect the accused with the crime charged and were of such a conclusive nature as to exclude to a moral certainty every rational hypothesis except that of guilt. After a verdict of guilty in part on circumstantial evidence and on appeal therefrom for insufficiency of the evidence, the verdict may not be set aside as a matter of law for insufficiency of the evidence if the evidence sustains some rational theory of guilt. State v. Reeder, 183 Neb. 425, 160 N. W. 2d 753; State v. Williams, 183 Neb. 257, 159 N. W. 2d 549; State v. Ohler, 178 Neb. 596, 134 N. W. 2d 265. The evidence is sufficient to sustain the finding of the jury.

Defendant assigns as error the trial court's refusal to give her requested instruction applicable to the law of self-defense. The requested instruction is: "Defendant contends that she acted in self-defense. Self-defense is defined as the use of such force by any means necessary to repel an attack as at the time appeared to defendant to be necessary, although she may have been

mistaken as to the extent of the actual danger, if a reasonable person would also have been so mistaken. The defendant was justified in acting upon the facts as they appeared to him and is not to be judged by the facts as they actually were.

"When a person is threatened or attacked in such a manner that it causes him to believe he is in danger of receiving bodily injury, he may use self-defense to defend himself.

"It is necessary for conviction that the state prove beyond a reasonable doubt that the defendant was not acting in self-defense, and there is no burden on the defendant to prove that she was acting in self-defense."

The foregoing requested instruction was given verbatim by the trial court as instruction No. 9, except that the court inserted a paragraph between the second and third paragraphs of the tendered instruction. The inserted paragraph stated: "However, when the person threatened or attacked uses more force than permitted by the above definition of self-defense, she is guilty of unlawful conduct and is criminally responsible therefor." It is the contention of the defendant that it was error for the trial court to give an instruction which requires the jury to weigh the type and degree of force and means used.

The defendant relies upon the defense of self-defense as defined by section 29-114, R. S. Supp., 1969, referred to herein as the Nebraska Self-Defense Act. The requested instruction tendered by the defendant is based upon the Nebraska Self-Defense Act which became effective on June 5, 1969. The State relies solely upon an interpretation of the act. It is readily apparent that the constitutionality of the act is not raised by either the State or the defendant.

The pertinent part of the act provides: "No person in this state shall be placed in legal jeopardy of any kind whatsoever for protecting, by any means necessary, himself, his family, or his real or personal property, or

when coming to the aid of another who is in imminent danger of or the victim of aggravated assault, armed robbery, holdup, rape, murder, or any other heinous crime." § 29-114, R. S. Supp., 1969. The State argues that the language of the statute preserves the concept of the use of reasonable force only in defending one's person or property. On the other hand, the defendant argues that the act provides that a person may use unlimited force in repelling an aggressor and that the common law rule that one may use only reasonable force has been abrogated by the act. It is shown that amendments by the Legislature were twice offered and defeated to change the words "any means necessary" to "any reasonable means necessary." It was clearly the intention of the Legislature to eliminate the word "reasonable" from the common law rule and it would be an act of legislation for this court under such circumstances to place it back in the act by judicial pronouncement. On the other hand, we do not subscribe to defendant's view that the words "by any means necessary" were an opening of the door for the use of extreme and brutal force by an aggressor in every case to protect against minor infringements of personal and property rights. Necessary force does not mean unnecessary force. Nor does "any means necessary" mean "any reasonable means necessary" under the legislative history here shown.

Killing in self-defense is grounded upon necessity. The right exists only in extremity where no other practicable means to avoid the threatened harm is apparent to the person resorting to it. If there is no real or apparent necessity for the killing, the defense fails. In order to be entitled to assert self-defense as an excuse or justification for the killing, the defendant must have been in imminent danger of death or great bodily harm at the time of the commission of the act. In order to justify or excuse a killing in self-defense, the accused must not only have entertained the belief that his life was

HB-7 and HB-17

March 19, 1971

The Honorable William J. Moran,
Chairman
Judiciary Committee
House of Representatives
Pouch V
Juneau, Alaska 99801

SUBJECT: Ombudsman

Dear Bill:

As state chairman of the American Bar Association Committee on the Ombudsman I am enclosing for your information a copy of the report of the 32nd American Assembly on the Ombudsman and a brief outline on the Ombudsman prepared by the Ombudsman Committee of the American Bar Association.

As you are a member of the Judiciary Committee I am also enclosing a copy of an article, "The Ombudsman and Human Rights", by Bernard Frank, a reprint from the Administrative Law Review of April, 1970.

Although I understand that at least one key committee chairman is opposed to the enactment of any Ombudsman legislation by this legislature, I hope that our furnishing you with this material may induce legislative leaders to permit both committee and floor action on the Ombudsman bills now before the legislature.

Although Alaska is a small state and aggrieved citizens have much more than the usual opportunity to obtain informal relief through the political process, I still believe that Alaska needs and should have an Ombudsman. Hawaii, a state which also has a small population, has reported outstanding success with their new Ombudsman.

I believe that Alaska should place its Ombudsman, for administrative purposes, under the Legislative Council or, if the Legislative Audit Committee is upgraded, under the aegis of that committee. Indeed, historically, the Ombudsman function developed out of the Legislative Audit role of the Swedish Parliament.

Even though this session is drawing to a close, I hope that you will be able to act on the Ombudsman bills and, if floor action cannot be completed, that the bills could be assigned to the Legislative Council or to other committees for interim studies.

Sincerely,

Barry W. Jackson

Barry W. Jackson

HB-7 and
HB-17

AMERICAN BAR ASSOCIATION
ADMINISTRATIVE LAW SECTION
OMBUDSMAN COMMITTEE

THE OMBUDSMAN

1. **Definition**

   The Ombudsman is an independent governmental official who receives complaints against government agencies and officials from aggrieved persons, who investigates, and who, if the complaints are justified, makes recommendations to remedy the complaints.

2. **Basic Concept**

   The Ombudsman system is one of the institutions essential to a society under the Rule of Law, a society in which fundamental rights and human dignities are respected. Human rights are not protected simply by constitutions or legislation, by guarantees or speeches, by proclamations or declarations, but primarily by the availability of remedies. The Ombudsman system is one of the remedies which seeks to preserve human rights.

3. **Reasons for Ombudsman**

   (a) The post-World War II growth of the welfare state. Government grew in size and extensive powers were given to agencies. Protection is needed against executive and administrative mistake and abuse of power.

   (b) The activities of public administration have become so comprehensive and the power of the bureaucracy so great that the legal status of the individual needs additional protection.

   (c) Existing mechanism — courts, legislatures, the executive, administrative courts, and administrative agencies — are not sufficient to cope with the grievances of the aggrieved and there is a need for a supplementary institution.

   (d) The presence of the Ombudsman has psychological value. His office gives the citizen confidence that there exists a watchdog for the people who will hold government accountable.

   (e) The legislature traditionally concerned with the observance of laws and rulings by public officials has at the same time extensively delegated powers to the administrative authorities. The Ombudsman can serve to aid the legislature in its function of supervising the executive and administrator.

   (f) The Ombudsman gives the citizen an expert and impartial agent without personal cost to the complainant, without time delay, without the tension of adversary litigation, and without requirement of counsel or the intervention of those highly placed.

4. **Types of Action or Inaction Which Give Rise to Complaints**

(a) The Ombudsman investigates complaints arising from administrative action or inaction as a result of which any person has been aggrieved. Such types of action or inaction are:

(1) Injustice.
(2) Failure to carry out legislative intent.
(3) Unreasonable delay.
(4) Administrative error.
(5) Abuse of discretion.
(6) Lack of courtesy.
(7) Simple clerical error.
(8) Oppression.
(9) Oversight.
(10) Negligence.
(11) Inadequate investigation.
(12) Unfair policy.
(13) Partiality.
(14) Failure to communicate.
(15) Rudeness.
(16) Maladministration.
(17) Unfairness.
(18) Unreasonableness.
(19) Arbitrariness.
(20) Arrogance.
(21) Inefficiency.
(22) Violation of law or regulations.
(23) Abuse of authority.
(24) Discrimination.
(25) Disability to act.
(26) Errors, mistakes, carelessness.
(27) Disagreement with discretionary decisions.
(28) Inconsistent with general course of an agency's function.
(29) Mistakes in law or arbitrary in ascertainment of facts.
(30) Based on irrelevant consideration.
(31) Unclear or inadequately explained when reason should have been revealed.
(32) Inefficiently performed.
(33) All other acts of injustice that frequently the governors inflict upon the governed, intentionally or unintentionally.

(b) The Ombudsman may also recommend clarification, amendment, or initiation of legislation and administrative rules and regulations.

5. American Bar Association Resolution

The following Resolution dealing with the establishment of an Ombudsman was adopted by the American Bar Association at the Midyear Meeting of the House of Delegates in 1969:

Be it Resolved, That the American Bar Association recommends:

1. That state and local governments of the United States should give consideration to the establishment of an ombudsman authorized to inquire into administrative action and to make public criticism.

2. That each statute or ordinance establishing an ombudsman should contain the following twelve essentials: (1) authority of the ombudsman to criticize all agencies, officials, and public employees except courts and their personnel, legislative bodies and their personnel, and the chief executive and his personal staff; (2) independence of the ombudsman from control by any other officer, except for his responsibility to the legislative body; (3) appointment by the executive with confirmation by a designated proportion of the legislative body, preferably more than a majority, such as two-thirds; (4) independence of the ombudsman through a long term, not less than five years, with freedom from removal except for cause, determined by more than a majority of the legislative body, such as two-thirds; (5) a high salary equivalent to that of a designated top officer; (6) freedom of the ombudsman to employ his own assistants and to delegate to them, without restraints of civil service and classification acts; (7) freedom of the ombudsman to investigate any act of failure to act by any agency, official, or public employee; (8) access of the ombudsman to all public records he finds relevant to an investigation; (9) authority to inquire into fairness, correctness of findings, motivation, adequacy of reasons, efficiency, and procedural propriety of any action or inaction by any agency, official, or public employee; (10) discretionary power to determine what complaints to investigate and to determine what criticisms to make or to publicize; (11) opportunity for any agency, official, or public employee criticized by the ombudsman to have advance notice of the criticism and to publish with the criticism an answering statement; (12) immunity of the ombudsman and his staff from civil liability on account of official action.

3. That for the purpose of determining the workability of the ombudsman idea within the federal government, the Administrative Conference should (a) experiment by constituting itself an ombudsman for limited areas of federal activity, and (b) encourage and study experimentation by particular agencies with the ombudsman idea.

4. That establishment of a federal government-wide ombudsman system, whether or not designed to assist congressmen in handling constituents' complaints about administration, should await findings based upon the experimentation recommended.

Be it Further Resolved, That the Section of Administrative Law is authorized to present the views of the Association and to encourage the establishment of ombudsmen in accordance with the provisions of this Resolution, by all necessary and appropriate means.

An effort is made to survey the current status of the ombudsman throughout the world. The author is deputy chairman of the Federal Bar Association's Committee on the Ombudsman.—The Editors.

THE OMBUDSMAN AND HUMAN RIGHTS

By
BERNARD FRANK*

The Geneva Conference on World Peace Through Law in 1967 recommended that the World Peace Through Law Center "disseminate widely information about the role which an ombudsman can perform in protecting citizens against violation of their rights by administrative authorities; and seek to assist financially or otherwise projects designed to encourage research on the establishment of ombudsmen."[1] It is, therefore, appropriate to discuss at this Bangkok World Conference on World Peace Through Law the subject, "Man, Rights and Law (Ombudsman)."

WHAT IS AN OMBUDSMAN?

The "Ombudsman" is an independent governmental official who receives complaints against government agencies and officials from aggrieved persons, who investigates, and who, if the complaints are justified, makes recommendations to remedy the complaints. To this definition must be added the basic concept that the Ombudsman system is one of the institutions essential to a society under the Rule of Law, a society in which fundamental rights and human dignities are respected. Therefore, our frame of reference when we discuss the Ombudsman is concern with the preservation of human rights.

EXISTING NATIONAL OMBUDSMAN INSTITUTIONS

Today there are national Ombudsman officials in Sweden, Finland, Denmark, Norway, New Zealand, Guyana, Tanzania, Great Britain, and Northern Ireland. Space limitations will permit only a mini-analysis of the institution in each country.[2] This work paper has excluded consideration of Military Ombudsmen in Norway and West Germany.

A. Sweden.[3]

In 1968, the offices of the Justitieombudsman (created in 1809) and the Militieombudsman (concerned with military affairs since 1915) were combined into one institution with three seperate Ombudsmen each known as Justitieombudsman: Alfred Bexelius, handling social and institutional welfare; Hugo Henkow, who is in charge of military and taxation matters, shares the task of controlling the courts, the prosecutors, and the police, with Ulf Lundvik, who also supervises sheriffs, local government, and the rest of civil administration.[4] The Ombudsmen with a common staff do not operate as a committee, each working separately and deciding his own cases.[5] The following selected characteristics of the office are noted: *Principal duties*-to supervise observance of laws by courts, public officials, and military officers; *Jurisdiction*-includes all officials (except members of the Cabinet, and the Chancellor of Justice), judges (with some limitations where members of the Supreme Court of Justice and the Supreme Administrative Court are concerned), municipal boards and officials (except elected members of municipal councils), clergymen of the State Lutheran Church, and military officers and officials; *Complaints*-may be made by anyone in writing or investigation may be initiated by Ombudsman, who also has discretion to decide which complaints shall be investigated; *Investigations*- has power to investigate with access to files and minutes of courts and agencies, and call upon officials for assistance; *Remedies*-may prosecute or commence disciplinary proceeding but the most frequent device used is a letter of admonition or reminder; has no power to change a decision of a court or an administrative agency; *Defects in laws*-may call attention to defects in laws and suggest amendments or

ask an administrative agency to change a practice; *Inspection*-may make inspections of courts, police, prosecutors, agencies, and institutions; *Discretionary decisions*-may review but does so only in exceptional cases; *Exhaustion of other remedies*-not required; *Parliament*-annual reports are made to Parliament; each year administration is examined by a committee of Parliament; *Election*-elected by 48 electors of the Riksdag for a term of four years or term of Parliament and may be reelected; *Case load*-in 1968, received 2120 complaints and originated 494 on their own initiative; about 80% of the cases are unfounded or without evidence.

B. Finland.[6]

Risto Leskinen, the Finnish Parliamentary Commissioner (an office created in 1919) has functions which are to a great extent comparable with the Chancellor of Justice appointed by the President. Most of the selected characteristics of the Swedish Ombudsman are applicable and separate comment need be made only with respect to the following: *Principal duties*-to see that "laws, decrees and official regulations are observed by judges and other officials."; *Jurisdiction*-public administration, including judges, members of the Cabinet, local officials, military officers, and ecclesiastical organizations or organs functioning with the responsibility of public officials;[7] *Discretionary decision*-may be reviewed if the official exceeds his discretionary power, raising a question of legality; *Reopening cases*-can request the Supreme Court or the Supreme Administrative Court to annul prior decisions and reconsider a case if there "has been a fault in the procedure, if the evidence was based on perjury or false documents," if there is "new relevant evidence or if the application of the law has been evidently erroneous";[8] *Election*-elected by Parliament for a term of four years and may be reappointed; *Case load*-in 1967, received 1294 complaints, took up 136 on his own initiative, and the Chancellor of Justice referred 136.[9]

C. Denmark.[10]

has been held by its only incumbent, Professor Stephan Hurwitz, since 1955. The office differs appreciably from Sweden's, as is apparent from the following selected characteristics: *Principal duties*-to keep "himself informed as to whether any person within his jurisdiction pursues unlawful ends, takes arbitrary or unreasonable decisions or otherwise commits mistakes or acts of negligence in the discharge of his or her duties";[11] *Jurisdiction*-all Ministers, civil servants, and all other persons acting in central government service (except judges) including military administration, local government (with some limitation), and civil servants of the Lutheran Church (except in matters which involve tenets or preachings); *Complaints*-as far as possible in writing with name and address and with a one year statute of limitations; has discretion to decide which complaints he shall investigate; *Investigation*-can investigate with all government (state and local) officials required to give information and supply documents and records (subject to limitations regarding state secrets and rules in the Administration of Justice Act); *Remedies*-cannot prosecute but does give his views, has no power to change an administrative decision; *Defects in laws*-may call attention to defects in existing legislation or administrative regulations; *Inspections*-may inspect any state agency (subject to limitations set forth in Administration of Justice Act) and may inspect premises of local government in connection with a case involving local government; *Discretionary decisions*-criticizes such decisions when supported by experts and "when as far as can be ascertained, there exists reliable documentary evidence of an arbitrary or unreasonable decision;"[12] *Exhaustion of other remedies*-except in cases where the Ombudsman has acted on own initiative, complaints against decisions which may be set aside by a higher administrative authority may not be brought before him until the higher authority has given its decision; the Ombudsman has pointed out that this restriction applies only to "decisions" and not to mistakes made in the treatment of cases by subordinate authorities or the conduct of the officials concerned;[13] *Civil servants*-a civil servant has the right when complained against to have his case removed to disciplinary investigation by the agency concerned; *Election*-elected after every general Parliamentary election for term of Parliament and may be

re-elected; *Parliament*-annual reports and special communications to Parliament are made through a Parliamentary Committee; *Case load*-about 1000 cases a year with only 10% to 15% found justified.

D. Norway.[14]

In 1962, the Ombudsman for Public Administration was established, an office held by Andreas Schei. Norway was influenced by both the Swedish and the Danish systems but more particularly by Denmark, as is indicated by the following selected characteristics: *Principal duties*-to "endeavour to ensure that the public administration does not commit any injustice against any citizen and that civil servants and others in the service of the administration do not commit errors or neglect their duties";[15] *Jurisdiction*-covers government administrative organs, Cabinet Ministers as heads of ministries, civil servants, and others in the service of the government, as well as local government (since January 1, 1969), but excludes Cabinet decisions, the courts, the Auditor of Public Accounts, and matters which come within the province of the Military Ombudsman; *Complaints*-must be in writing and signed (but with a one year statute of limitations) from someone personally wronged; has discretion to dismiss a complaint obviously unfounded; since the Ombudsman can investigate on own initiative, can take up cases which lack the necessary personal interest or which are stale;[16] *Investigation*-has power to investigate, with the right to obtain information from all officials and with access to documents and records (but not internal work papers); *Remedies*-only sanction is to express an opinion with no power to compel compliance or to change or make an administrative decision; *Defects in laws*-may call attention to defects in acts, administrative regulations, or administrative practices; *Inspections*-no general inspection duties but may visit or inspect agencies in course of an investigation; *Discretionary decisions*-can review and give opinion concerning discretionary decisions which are "manifestly unreasonable or otherwise contrary to proper administrative practices"; *Exhaustion of remedies*-administrative remedies must be exhausted unless there is a particular reason for the Ombudsman to handle without delay; *Election*-selected by Parliament after each general election for four years or until the next general election; *Parliament*-barred from dealing with a

complaint if subject is one under consideration by Parliament or the Standing Committee on Parliamentary Control, Ombudsman makes annual and special reports; can be referred cases from Parliament; *Case load*-about 1000 complaints annually; about 15% are justified.

E. New Zealand.[17]

Sir Guy Powles is the Parliamentary Commissioner, an office created in 1962. New Zealand was influenced by the Danish system but the first country outside of Scandinavia to transplant the Ombudsman did so with striking variations, again illustrated by selected characteristics: *Principal function*-"to investigate any decision or recommendation made (including any recommendation made to a Minister of the Crown), or any act done or omitted, relating to a matter of administration and affecting any person or body of persons in his or its personal capacity, in or by any person of the Departments or organizations named in Parts I and II of the Schedule to this Act, or by any officer, employee, or member thereof in the exercise of any power or function conferred on him by any enactment";[18] *Jurisdiction*—limited to government departments and other organizations enumerated in a Schedule to the Act; has no direct power over Ministers but can investigate a recommendation to a Minister and may apply to the Supreme Court for a declaratory order where a question arises as to jurisdiction; noteworthy among omissions are the local government, administrative tribunals, and the courts; in 1968, the Ombudsman obtained jurisdiction over Education and Hospital boards; jurisdiction is limited with respect to members of the Armed Forces; the powers conferred on the Commissioner may be exercised notwithstanding any provision in any enactment as to finality of an administrative act or that there shall be no right of appeal or that no proceeding or decision shall be challenged, reviewed, quashed or questioned; *Complaints*-must be written; requires payment of two dollars (which can be waived); has discretion not to investigate including where complainant had knowledge of matter for more than twelve months before complaint received by Commissioner or does not have sufficient personal interest in the subject matter; can investigate on his own motion; *Investigation*-has the power to investigate (must be in private) and to obtain information from such

[18] Parliamentary Commissioner (Ombudsman) Act 1962, Section 11 (1). A 1968 Amendment 11 (2) relates to Part III of the Schedule adding Specified Local Organizations.

persons as he thinks fit; has the power to require production of documents or papers and to compel attendance of officials and complainants to be examined on oath, subject to the right of the Attorney General to certify that certain limited matters should not be disclosed; *Remedies*-limited to reporting his opinion and recommendations to the department and the Minister concerned and if no action is taken which he considers adequate may report to the Prime Minister and Parliament; the grounds on which he may make a report and recommendation are broad: contrary to law; unreasonable, unjust, oppressive, or improperly discriminatory in accordance with a rule of law, statute, or practice that is or may be unreasonable, unjust, oppressive, or improperly discriminatory; based wholly or partially on mistake of law or fact; or was wrong; *Defects in laws*-in any case, can call attention to altering of practices or reconsideration of law; *Inspections*-during investigations can make on site inspection; *Discretionary decisions*-can investigate where discretionary power has been exercised for an improper purpose or on irrelevant grounds or with irrelevant considerations or where reason should have been given for decision; *Exhaustion of remedies*-cannot investigate an administrative act which could be appealed on its merits to any court or administrative tribunal; *Parliament*-makes annual and interim reports to Parliament; any Committee of the House of Representatives may refer to him for investigation and report petitions; *Election*-appointed on recommendation of House of Representatives by Governor General for three or four year term (depending on session at which recommendation is made) and may be reappointed; *Case load* in the year ending March 31, 1968, received 631 complaints, handled a total of 555 cases, found 56 justified, and issued formal recommendations in six cases.[19]

F. Guyana.[20]

The 1966 Constitution of Guyana established the office of Ombudsman, a position held by Gordon S. Gillette. The Guyana Ombudsman is generally based on the New Zealand system, but again in the process of transplantation variations were made, as indicated in the following selected characteristics: *Principal Function*-to investigate any administrative action taken on or after May 26, 1966, by any department of government, other authorities, or by Ministers, officers or

[19]Report of the New Zealand Ombudsman, 31 March 1968, 5-6.

members of such a department or authority (but excluding courts); *Jurisdiction*-a First Schedule to the Constitution sets forth action and matters not subject to investigation; *Complaints*-must be in writing and allege that the complainant has sustained injustice in consequence of a fault in administration; has discretion not to investigate including where complainant had knowledge of action for more than twelve months before complaint received by Ombudsman; may investigate on own initiative; a Minister or a member of the National Assembly may request an investigation by the Ombudsman; *Investigation*-must be in private; may obtain information from such persons as he thinks fit; can require the production of documents or papers and to compel attendance of witnesses to be examined under oath; *Remedies*-recommendations only and if, within a reasonable time, no satisfactory action has been taken, may report the matter to the National Assembly; *Inspection*-for purposes of investigation, has power to inspect after prior notice, subject to certain limitations; *Exhaustion of Remedies*-cannot investigate any action if there is remedy in court or right of appeal to a tribunal but has discretion to investigate if satisfied that in the particular circumstances not reasonable to expect the complainant to take or to have taken such proceedings and is not precluded from investigation because the complainant may apply to the High Court for redress under the Constitution for contravention of provisions for the protection of fundamental rights and freedoms; *National Assembly*-annual report to National Assembly; *Election*-appointed for a four year term by the Governor General acting on the recommendation of the Prime Minister after consultation with the Leader of the Opposition; *Case load*-in 1968, received 192 cases and handled four from the previous year. Seventeen cases were found to be justified.[31]

G. The United Republic of Tanzania.[32]

The Interim Constitution and Act 25 of 1966 provides for a Permanent Commission of Enquiry in the one party state of Tanzania. The present Commissioners are E.A.M. Mang'enya, Chairman, Sheikh Mohamed Ramiya, and K.M. Kikwete. There are many variations from

[31] 1968 Report of the Guyana Ombudsman, supra note 20, 3-5; letter from Gordon S. Gillette to Bernard Frank, April 14, 1969.

[32] Annual Report of the Permanent Commission of Enquiry, June 1966–June 1967, Dar Es Salaam (1968); Account of the Origin, Practice and Procedure of the Permanent Commission of Enquiry in Tanzania, The Tanzania Standard, Dar Es Salaam, May 15, 1968, p. 4, and May 16, 1968, p. 4 and 7; Mang'enya, 'Watch-Dog' Guards the Rights of All Tanzanians, The Tanzania Standard, Dec. 6, 1968, p. XII; and The Nationalist, Dar Es Salaam, July 17, 1969 and July 18, 1969.

the other Ombudsman systems as indicated in the following selected characteristics: *Principal Functions*-"to enquire into the conduct of any person to whom this section applies in the exercise of his office or authority, or in abuse thereof".[33] The Commission deals with "arbitrary decisions or arrests, omissions, improper use of discretionary powers, decisions made with bad or malicious motive, a decision that has been influenced by irrelevant considerations, unnecessary and unexplained delays, obviously wrong decisions, misapplications and misinterpretations of laws, by laws, and regulations";[34] *Jurisdiction*-central and local government officials, party office holders, local government authorities, and, in addition, commissions, corporate bodies, public authorities or boards listed in a First Schedule to the Act 25 of 1966; excluded are decisions made by the courts or tribunals in exercise of their judicial functions; included are administrative decisions made by members of the judiciary, the administration (including Ministers and the Second Vice President but excluding the President and the First Vice President), party officials and scheduled organization officials; *Complaints*-may be made orally or in writing or the Commission may investigate on its own initiative; in all instances, the President can direct that there be no investigation; the President may also request investigation; the Commission has discretion not to investigate including if case is too old; *Investigation*-conducted in private; the Commission has the power to examine anybody who can give testimony or produce documents, subject to the right of the President to limit the production of information or documents which might prejudice security, defense, or Cabinet deliberations; *Remedies*-the Commission can express an opinion only and, make a report to the President; *Exhaustion of remedies*-the Commission will decline a case if under the law or existing administrative practice there is an adequate remedy or right of appeal which has not been exhausted; *Defects in laws*-not within the jurisdiction of the Commission; *Commission action*-when a Commissioner does not agree with his fellow Commissioners on any report to the President, the report contains a statement of the disagreement; *Finality*-except on ground of lack of jurisdiction, no action of the Commission can be challenged, quashed, or questioned; *Election*-members are appointed by the President to serve for two years with a right of reappointment for another two years; *Reports*-annual reports are made to the President who places them before the National Assembly; *Case Load*-in the year ending June 30, 1968, the Commission dealt with 443 left over from the

[33] Interim Constitution of Tanzania, Sec. 67 (1).

[34] Mang'enya, supra note 22, XIII.

previous year, received 783 cases, completed 585, and found 114 justified.

H. Great Britain.[25]

The British Parliamentary Commissioner Act 1967 created the office of Parliamentary Commissioner for Administration which is held by Sir Edmund Compton. The Act is a blend of the Scandinavian Ombudsman, New Zealand Ombudsman, and the British Comptroller and Auditor-General systems, with the following selected characteristics: *Principal function*-to receive complaints through members of the House of Commons from persons who claim to have sustained injustice in consequence of maladministration as the result of action by a government department or other authority; *Jurisdiction*-limited to departments and authorities listed in a Schedule Two and covering roughly the central government excluding local government, nationalized industries and independent boards. A Schedule Three sets forth types of action by the central government which are excluded; *Complaints*-must be in writing and must come only through a M.P.; has discretion not to investigate; unless special circumstances exist will not investigate a complaint which was made later than twelve months from day on which complainant first had notice of the matters alleged in complaint; has no power to initiate investigation on own motion; *Investigation*-may obtain information from such persons and in such manner and make such inquiries as he thinks fit; can compel furnishing of information and production of documents; has access to all departmental documents including internal papers and records (except proceedings of the Cabinet); *Remedies*-reports results of investigation only with no power to prosecute or invoke sanctions; *Discretionary decisions*-cannot question discretionary decision taken without maladministration but in 1968 accepted a recommendation of the Select Committee on the Parliamentary Commissioner for Administration that if he found a decision which judged by its effect on an aggrieved person appeared to him to be thoroughly bad in quality, he might infer there had been an element of maladministration in the decision;[26] *Exhaustion of Remedies*-

TORONTO L.J. 158 (1968); Wade, The British Ombudsman, 20 AD. L. REV. 409 (April 1968).

[26] Second Report from the Select Committee on the British Parliamentary Commissioner for Administration, Session 1967-68, VI-VIII.

will normally not investigate a case where the complainant has or had a remedy by way of appeal to a tribunal or by way of proceeding in a court of law but has discretion to act if satisfied there are special circumstances which prevent or prevented the complainant from seeking such a remedy; *Reports*-special interim and annual reports to Parliament which are received and acted upon by the Select Committee on the Parliamentary Commissioner for Administration; *Election*-appointed by the Crown and holds office during good behavior or until year of service in which he attains age 65; *Case load*-from April 1, 1967, to December 31, 1967, received 1069 complaints of which he completed 849 and found maladministration in 19 cases;[27] during the calendar year of 1968 he received 1120 complaints and had a carryover of 220 from 1967, making a total of 1340 cases of which he completed 1181, finding maladministration in 38 cases.[28]

l. Northern Ireland.

The Parliamentary Commissioner Act (Northern Ireland) 1969, virtually identical with the British Parliamentary Commissioner Act 1967, came into operation on July 1, 1969 by an Order in Council of the Governor. The designation of Sir Edmund Compton, British Parliamentary Commissioner for Administration, to serve as Northern Ireland Parliamentary Commissioner for Administration, had earlier been announced by the then Prime Minister, Captain O'Neill. Sir Edmund Compton assumed office on July 1, 1969, and presented his first report to the Parliament of Northern Ireland on September 30, 1969. He revealed that for the three-month period he had received eight complaints from six of the 56 members of the House of Commons, which he noted was in recess. He promised not to be an absentee Ombudsman.[28.1]

THE OMBUDSMAN SYSTEM—ITS PRINCIPAL ELEMENTS

Since the Ombudsman is easily adaptable to the differing needs of various countries, each nation has made its Ombudsman to its own fashion. However, an analysis reveals a number of principal elements common to the institution. The Ombudsman:

1. Is an arm of the legislature, except in Tanzania.

---

[27] Fourth Report of the British Parliamentary Commissioner for Administration, Session 1967-1968, Annual Report for 1967, 3-5.

[28] Second Report of the British Parliamentary Commissioner for Administration, Session 1968-1969, Annual Report for 1968, 3-5.

[28.1] First Report of the Northern Ireland Parliamentary Commissioner for Administration, p. 3-4 (1969).

2. Is generally independent even of the legislature although there may be controls over finances and staff and examination by a legislative committee.
3. Is a figure of prestige and influence based upon his independence, objectivity, competence, and fairness.
4. Receives complaints of abuse by government departments or agencies from the public or acts on his own initiative, except in Great Britain where complaints are channeled through the M.P.
5. Conducts an impartial investigation, calls upon all persons for information, requires the production off documents, and has access to governmental records, subject in some countries to specific limitations.
6. Uses fast, inexpensive, and informal procedures.
7. Has no power to give orders or impose sanctions, except in Sweden and Finland. The Ombudsman has no right to quash or reverse a decision or order of any official and can only report or recommend or suggest. But, even in Sweden and Finland, the most potent weapon of the Ombudsman is an expression of his opinion.
8. Issues annual and in some countries more frequent reports of the results of his investigations.
9. Gives reasons for dismissal of a complaint if a complaint is unfounded or beyond his jurisdiction.
10. Has the power to inspect agencies, institutions or departments either as a general power or as a power in connection with investigation of a complaint.
11. Is easily accessible: The complaint procedures are without cost to the complainant, do not require counsel, and once filed the Ombudsman is the moving party.
12. Generally may suggest changes or improvements in administrative procedures or changes in legislation.

WHY THE OMBUDSMAN?

The roll call of grievances against abuses of government grows larger each day. Complaints arise out of acts or the failure to act of officials and range from simple clerical errors to oppression and include oversight, negligence, inadequate investigation, unfair policy, delay, partiality, failure to communicate, rudeness, maladministration, unfairness, unreasonableness, arbitrariness, arrogance, inefficiency, improper motivation, violation of laws or regulations, abuse of authority, discrimination, disability to act, errors, mistakes, carelessness, and all of the other acts of injustice that frequently the governors inflict upon the governed, intentionally or unintentionally.

Why was it determined that a political institution founded in 1809 in

Sweden, not adopted next until 1919 in Finland, and today existing in seven other countries, three Canadian provinces and two states in the United States would help to adjust complaints of citizens? There are many reasons and the most pertinent are summarized below:

1. The post World War II growth of the Welfare State resulted in the proliferation of administrative agencies. As the State assumed a multitude of functions in welfare, education, medical care, social security and housing, government grew in size and extensive powers were given to agencies. The growth of the Welfare State made necessary new protection against executive and administrative mistake and abuse of power.

2. The traditional concern for the guaranty of the legal rights of the individual has become even greater in modern society. The activities of public administration have become so comprehensive and the power of the bureaucracy so great that the legal status of the individual needs additional protection.

3. The legislature traditionally concerned with the observance of laws and rulings by public officials has at the same time extensively delegated powers to the administrative authorities. The Ombudsman can serve to aid the legislature in its function of supervising the executive and administrator.

4. The presence of the Ombudsman has psychological value. His office gives the citizen confidence that there exists a watchdog for the people who will hold government accountable.

5. The Ombudsman can best be engrafted upon the political and legal systems of a country.[29]

6. Existing mechanisms for adjusting grievances are inadequate.

(a) The legislator (if he investigates complaints) is taken away from his main function of studying and passing legislation. His role in adjusting complaints is frequently limited because of lack of sufficient funds and staff and inability to have direct access to files and information. He must of necessity rely in most cases upon a reply from the agency or department he is investigating. Party consideration may affect his role in handling grievances.

(b) The courts everywhere play a major role in the correction of abuses by government. But litigation is expensive, tension creating, protracted and slow moving and, in many cases, the citizen bears with injustice because he cannot afford or does not wish litigation. Courts may be precluded from hearing appeals either by law or by technicalities

[29]Seminar on the Effective Realization of Civil and Political Rights at the National Level, Kingston, Jamaica, April 25-May 8, 1967, p. 55, paragraph 258, United Nations, 1967, ST/TAO/HR/29.

of form, time, standing, jurisdiction, nature and extent of interest, the character of the administrative act, and the wording of statutes. Review of administrative acts may be limited by such questions as to whether the agency acted within its powers, was the ruling supported by substantial evidence or was the action reasonable and not arbitrary. Courts cannot conduct informal investigations and are limited by rules for the production of evidence. Courts are limited to basically adversary party proceedings.

(c) Administrative courts even using procedures as informal as possible still follow court-like adversary procedure. Legal representation is the normal rule. Such courts frequently move slowly and there is great delay in ensuring the execution of the judgment when delivered. Grievances must concern an administrative decision and must be brought before local courts or regional courts initially, even in France, except in certain cases.

(d) The executive may frequently handle grievances but is in essence investigating himself and in great part relying on the reply from the agency or official against whom the complaint was made. Party affiliation of the person making the complaint may be important. Executive complaint agencies lack the essential characteristic of independence from the executive.

(e) Administrative agencies may have within their structure channels for complaint but such a system lacks impartiality. The appeal system, if one exists, is expensive and time consuming.

7. The Ombudsman gives the citizen an expert and impartial agent without personal cost to the complainant, without time delay, without the tension of adversary litigation, and without requirement of counsel or the intervention of those highly placed.

Objections to the Adoption of the Ombudsman System

No study of the Ombudsman would be complete without a list of objections that have been stated against the Ombudsman:

1. The Ombudsman can work only in small countries with homogeneous populations.
2. Concentration on the adjustment of grievances of individuals bogs down the processes of government and places undue emphasis on relatively minor matters.
3. Legislators who receive complaints are already performing the functions of Ombudsmen. The relatively large number of legislators is more effective to bridge the gap between the citizenry and government than a single Ombudsman or even several.

4. Courts, administrative courts and tribunals are adequate and, where required, reforms can be made to make them more responsive.
5. Too much power is placed in a single individual. There is little or no review of the Ombudsman's actions.
6. The executive grievance handling machinery is adequate and, if not, can easily be corrected or adjusted.
7. The Ombudsman causes the civil servant to be cautious and timid. Emphasis may be on keeping records rather than action.
8. The Ombudsman system simply creates another bureaucratic institution with more red tape.
9. The Ombudsman is a generalist who attempts to do more than he is qualified to do.
10. The Ombudsman will not obtain the support and assistance of administrators whose support he needs to function successfully.
11. The system impedes progress toward strengthening existing institutions.
12. Administrators and legislators are inclined to treat his general proposals for reform as impractical.
13. After a while the Ombudsman becomes government-minded.
14. The system interferes with the doctrine of ministerial responsibility.
15. The Ombudsman's accomplishments are exaggerated. He does not really do an effective job.
16. The institution cannot successfully be transplanted from the Scandinavian countries.
17. In a large country, the Ombudsman could not handle the vast number of complaints without an equally vast bureaucratic organization.
18. The Ombudsman may cause officials who believe they are correct to agree with him not because his judgment is valid but because of his status and prestige. This does not make for good government.
19. The Ombudsman attempts to apply a rule of conscience as opposed to the rule of law.[30]
20. The Ombudsman tends to create the illusion that all is well with government.
21. The Ombudsman is part of the "Establishment."
22. The office of Ombudsman ignores the desirability of participation by the people themselves in the processes of revision and reform.[31]
23. The Ombudsman after all deals only with relatively little matters.
24. Most complaints are unfounded and the system encourages filing of such complaints.

---

[31] Rosenblum, Controlling the Bureaucracy of the Antipoverty Program, Vol. 31, Law and Contemporary Problems, 187, 195, Duke University School of Law (1966).

25. The office is adaptable only to parliamentary countries.
26. The Ombudsman works best in a society that doesn't need him.
27. The Ombudsman stays away from the pertinent social problems and keeps to the safe subjects.

GROWTH OF THE OMBUDSMAN SYSTEM

Interest in the Ombudsman has grown in recent years. It has been discussed at numerous seminars and conferences by two major groupings:

1. The regional seminars sponsored by the United Nations Division of Human Rights on the general topic of judicial and other remedies against the abuse of administrative authority in Ceylon (1959), Buenos Aires (1959), and Stockholm (1962). In April-May, 1967, the United Nations Division of Human Rights in co-operation with Jamaica organized a Seminar on the Effective Realization of Civil and Political Rights at the National Level which endorsed the Ombudsman system.[32]
2. The conferences and congresses of the International Commission of Jurists, including: the South-East Asian and Pacific Conference in Bangkok (1965),[33] the Colloquium on the Rule of Law at Colombo (January, 1966),[34] and the Conference on the Individual and the State held at Strasbourg (October, 1968).[35]

A survey of developments throughout the world shows that the Ombudsman has been placed on the world agenda for most serious consideration.

A. Canada.

Proposals have been put forward on the Federal level and on the province level.[36] Three of the ten provinces have Ombudsmen: W.T. Ross Flemington, New Brunswick, since October 11, 1967; George B. McClellan, Alberta, since September 1967; and Louis Marceau, Quebec,

since May 1, 1969. The Manitoba Legislature enacted an Ombudsman Bill on September 30, 1969.

B. Ghana.

The new Constitution of Ghana adopted in 1969 contains provisions requiring the establishment of the Ombudsman system by Parliament.

C. Great Britain.

Prime Minister Wilson announced in Parliament on July 22, 1969 that an Ombudsman system would be established to investigate complaints of maladministration by local government. It would be separate from the Parliamentary Commissioner for Administration system but the scope and relationship to local government would be similar to the scope of the Parliamentary Commissioner for Administration in central government affairs. In addition, the Prime Minister approved in principle a Health Commissioner to look into complaints against the National Health Service.[37]

D. Greece.

In June 1968, the Greek Government announced it would appoint an Ombudsman answerable personally to the Prime Minister and later to Parliament.[38] In July 1969, the Greek Government announced the appointment of Maj. Gen. Spyridon Vellianitis as an Administration Commissioner, or Ombudsman, to keep an eye on the Administration to see that it is "honest, just and fair," according to the decree creating the position. The Commissioner is empowered to investigate any state employe's behavior "as regards the discharge of his duties and his demeanor in society, as related to morals, dignity and honesty."[39] Necessary legislation is pending.[40]

F. Hong Kong.

On June 23, 1969, a question was put in the British House of Lords to the Minister of State, Foreign and Commonwealth Office, concerning the appointment of an Ombudsman for consultation with the underprivileged Chinese. The reply was made that very careful consideration had been given by the Minister of State and the Governor of Hong Kong to the matter of the Ombudsman and that both regarded the City District Officer scheme as "perhaps the first step in such a system."[41]

[40] Letter from S. Vellianitis to Bernard Frank, Oct. 29, 1969.
[41] 732 HANSARD, HOUSE OF LORDS, 1 and 2 (1969).

Under date of July 12, 1969, the Hong Kong Branch of Justice (the British Section of the International Commission of Jurists) issued a report urging the appointment of an Ombudsman, pointing out that the "system has a strong backing in Chinese History and its introduction can well be explained in terms of the Censorial System of Ancient China."

F. Indonesia.

In October 1967, six associations—the Indonesian Judges Association, the Indonesian Jurists Association, the Association of Prosecutors, the Association of Scholars of Political Science, the Indonesian Bar Association, and the League of Human Rights, formed the Pengabdi Hukum to handle "complaints by individuals of treatment by public authorities as well as by society itself." The institution is entirely private and consists of a joint secretariat, the executive of which is manned by six members each appointed by the respective organization. During its first year from October 1967 through December 1968, it handled 202 complaints, settling 154.[42]

G. India.

Establishment of a two tier system of Ombudsmen has been proposed by the Government: the Lok Pal would be appointed by the President after consultation with the Chief Justice and the Leader of the Opposition, and the Lokayutkas by the President after consultation with the Lok Pal. Jurisdiction would cover complaints of injustice due to maladministration or complaints alleging corruption based on actions of all central government public servants including Ministers and Secretaries.[43]

H. Ireland.

A Commission has issued a report recommending a major reorganization of the public services in Ireland. Included is a proposal for the creation of an Ombudsman.[44]

I. Israel.

The State Controller without express legal authority deemed himself the institution to handle complaints because he had "also to examine whether the inspected bodies have operated efficiently, economically, and in a morally irreproachable manner."[45] In 1966, the Knesset formed a

committee to look into the handling of public complaints and to determine whether to set up an Ombudsman as a separate institution or whether to delegate this task to the State Controller by statutorily broadening his power. In November 1968, the Committee reported that the office of Ombudsman be created to be operated by the State Controller through a special division of his office; a recommendation was adopted by the Cabinet on December 15, 1968. A draft law is in preparation.

The City of Jerusalem has had an Ombudsman, Shelomo Kaddar, since July 1967. From July 1967 to March 1968 inclusive, he handled 532 complaints and found 262 justified.[46] Tel Aviv similarly has an Ombudsman.

J. Jamaica.

The Jamaican Section of Justice has issued a report recommending the establishment of the Ombudsman system in Jamaica.

K. Malaysia.

On the invitation of the Government of Malaysia, the New Zealand Ombudsman, Sir Guy Powles, spent nearly four weeks in Malaysia in February—March, 1968, and completed and delivered a report to the Malaysian Government on the desirability and practicability of setting up an Ombudsman system in that Country. However, the Malaysian Government has apparently concluded the adoption of the Ombudsman system would not be expected to produce better results than that already achieved by the Anti-Corruption Agency set up in 1958 as a unit of the Prime Minister's Department. This Agency was reorganized in 1967 and was set up with headquarters in Kuala Lumpur and a branch office in every state capital effective October 1967. The director is senior member of the Legal Service and the staff of the Agency is drawn from the Legal Service, the Administrative Service and the police. The Agency has two functions: research and prevention of corruption and the investigation and prosecution of all cases of corruption under the criminal laws.[47]

L. Mauritius.

The Mauritius Constitution provides for an Ombudsman. The Legislative Assembly enacted supplementary provisions for the proper functioning of the Office of Ombudsman on May 13, 1969 (Ombudsman Act, 1969).

[47]Report of the New Zealand Ombudsman, 1968, p. 10; and letter from M. Ben Haron, First Secretary, Embassy of Malaysia, Washington, D.C., to Bernard Frank, July 9, 1969.

M. The Netherlands.

In June 1969, the Dutch Government submitted to Parliament a proposal that an Ombudsman be appointed by Parliament. The jurisdiction of the Ombudsman would be restricted to complaints about the administration of the Central Government and would exclude complaints about generally binding regulations and about matters of general government policy. Complaints would be referred to the Ombudsman by the Committees for Petitions in both Chambers of Parliament. Complaints received directly by the Ombudsman would be dealt with after authorization by the Committee for Petitions of the Second Chamber.[48]

N. Northern Ireland.

Legislation was introduced in the House of Commons on September 30, 1969, to appoint a Commissioner for Complaints to investigate complaints from persons who claim to have sustained injustice in consequence of maladministration in connection with action taken by local and public bodies outside the sphere of central government.[49]

O. Singapore.

A special Constitution Commission recommended an Ombudsman but the Government has put aside the recommendations for five years.[50] Complaints of corruption or uncivil behavior by Government employees may be referred to the Anti-Corruption Bureau whose officials are answerable only to the Attorney General.

P. The United States.

Interest in the United States in the Ombudsman has become widespread. Federal legislation was proposed in the last Congress by Senator Edward Long for a Federal Administrative Ombudsman, a District of Columbia Ombudsman, and a Missouri Ombudsman. Congressman Henry Reuss has introduced in the 91st Congress his three-times-before-introduced bill for a Congressional Ombudsman handling complaints only through Congress. Legislation has been introduced in most of the

[50] Letter from Hing Yong Cheng to Bernard Frank, March 29, 1969; Republic of Singapore, Report of the Constitutional Commission, p. 18-22 (1966).

states and passed in two. In Hawaii, Herman S. Doi took office on July 1, 1969, as Ombudsman under Act 306 passed in 1967. During his first three months in office he received 218 complaints, 153 of which were received by telephone.[51] The Nebraska Act creating the office of Public Counsel was approved on July 29, 1969. In Oregon, Marko L. Haggard was appointed by the Governor to fill the post of Ombudsman created by executive action on July 1, 1969. The American Assembly of Columbia University devoted its October 1967 Conference to the Ombudsman and in its final report recommended state and local Ombudsmen with experimentation on a Federal level, essentially the same conclusion reached by the American Bar Association in January 1968. The National Conference of Commissioners on Uniform State Laws is preparing to start work on a uniform Ombudsman law. The National Commission on Violence and Law Enforcement in its report issued on November 1, 1969, recommended independent citizens' grievance agencies on a state and local level and that consideration be given to a federal citizens' grievance agency to act on complaints against federal employees and departments.

Proposals have been made for Ombudsmen in New York City, Newark, Philadelphia, Minneapolis, and other cities. Citizens' complaint offices exist in a number of local communities including Nassau County, New York, and Buffalo where the Citizens' Administrative Services is a project of the University of Buffalo Law School. In the United States there are proposals for college and university, consumer, airport, corporation, union, department store, newspaper, TV and radio station Ombudsmen. The most noteworthy of these are the "action line" activities of the press, radio, and TV and the emergence of Ombudsmen on at least three dozen or so campuses.

Consideration of Several Special Problems With Respect to the Ombudsman

A study of the Ombudsman brings to mind several special problems for brief discussion:

A. Should the Ombudsman be a Commission or Board?

It should be noted that the national Ombudsman is a single individual except in Tanzania where there is a Commission of three and in Sweden where there are three Ombudsmen. It was concluded at the Ceylon Colloquium on the Rule of Law that whether there should be one

[51] Herman S. Doi, speech delivered in Oct. 1969.

Ombudsman or several depends on the constitutional structure of the country concerned and the size and distribution of the population.[82] The real problem is not the number but whether the Ombudsmen are part of a committee operating on majority vote or individuals operating independently in a geographic or subject area. The Ombudsman generally everywhere relies on his power to persuade—he has no power to compel compliance (except in Sweden and Finland). A two-to-one recommendation by a commission signals some doubt as to whether or not there was abuse of a citizen. Government will not easily be persuaded to comply where even the Ombudsmen disagree.

B. Is the Ombudsman a Device in Bridging the Gap Between Government and Youth?

Recently a study for the United Nations stated that student demonstrations in more than 50 countries during 1968 represented only a warning of bigger and bolder protests to be expected from youth in the future. Young people are concerned with bureaucratization, bigness, and dehumanization of society (concerns shared equally by adults, of course). A lack of responsiveness by government to their demands is felt by the young who conclude that direct action is necessary. The question may be asked whether the Ombudsman would bridge the gap between the "Establishment" and youth? Certainly, the Ombudsman—considered by some as part of the "Establishment"—would not be of any help with those who have as a goal the destruction of present society's institutions. But to those youth still "with us," the Ombudsman with his informal, easily accessible, inexpensive, machinery in the handling of complaints may be a "bridging the gap" factor if the Ombudsman can convince the youth he is independent and will listen and give redress to legitimate complaints. On the other side of the coin is the inability of the Ombudsman to enforce his decisions which may render him an ineffective institution in handling problems of frustrated and impatient youth in dealings with bureaucracy. Perhaps the only answer is to experiment because not to have tried may be a greater fault.

C. Can the Ombudsman System Help the Poor?

The problem of poverty has become one of the greatest problems of modern society, even in the affluent countries, and the greatest problem of poverty has been the inability of the law to earn the respect of the poor because, as has been stated by a United States Federal Judge, "Rather than helping the poor surmount their poverty, the law has all

[82] 26 Bulletin of the International Commission of Jurists, 8 (June 1966).

too frequently served to perpetuate and even exacerbate their despair and helplessness."[83]

The National Commission on the Causes and Prevention of Violence in recommending independent citizens' grievance agencies said it supported this recommendation upon "evidence that the poor experience special frustrations in their relationship with the government and that these frustrations breed disrespect for law."

To the extent that the use of other existing remedies to handle complaints of the aggrieved requires financial resources and sophistication, the Ombudsman system with its lack of cost and easy access is of help. But is this sufficient? Can an institution which can recommend only be effective when complaints run contrary to public attitudes or to the views of a bureaucracy intent on its own conception of handling the problems of the poor? Can an institution which may only persuade, not compel, be effective if its enters into cases involving intense social problems, frequently with political overtones? It has been said that "Ombudsmanship promises the poor a good deal more than it can deliver."[84] Briefly stated objections which are said to impair its utility are: that he is part of the "Establishment," ignores the participation of the poor in the process of revision and reform, that an Ombudsman will fail because his recommendations would run counter to public attitudes towards the rights of the poor, that selection of cases of a nonpolitical nature would eliminate from scrutiny most administrative injustices perpetrated upon the poor, that injustices are so great that an Ombudsman system would be overwhelmed; and that only basic reform will achieve justice for the poor.[85] Yet even critics conclude that the fact that "the Ombudsman alone cannot cope with all the problems of the administrative state is hardly an adequate reason for arguing against its establishment as a supplement to other devices."[86]

Society is today threatened by its failure in the past to have recognized fully that poverty is inconsistent with democracy. Society has, therefore, nothing to lose and may gain if it experiments with the adoption of the Ombudsman system.

D. Can the Ombudsman Help in Aiding Minorities Against Discrimination?

The reports of the Scandinavian Ombudsmen and the British Parliamentary Commissioner do not indicate any special and pressing

[86] Rosenblum, supra note 31, 194.

concern with the treatment of minorities. The New Zealand Ombudsman in his report for the year ended March 31, 1968, indicates that out of 555 cases, 8 involve Maori affairs, of which 2 were not justified, 1 discontinued, 1 declined, 3 withdrawn, and 1 under investigation. The Tanzania Commission Chairman has stated that very few non-Africans (Asians and Europeans) have lodged complaints to the Commission and queries as to the reason for this, speculating one reason is that the non-African communities are suspicious of the Commission and another reason is that these people do not like to jeopardize their stay in Tanzania.[57] In Guyana, the racial imbalance with resulting racial discrimination resulted in the recommendation for an Ombudsman by the International Commission of Jurists. In the 1967 report, the Ombudsman stated that he received 161 complaints of which only one alleged racial discrimination and that one was unjustified.[58] Mauritius, with a multi-racial population, has provided in its Constitution for an Ombudsman and it was thought that the system would be valuable in protecting minorities against discrimination, but as yet no Ombudsman has been named. In Northern Ireland, where there is great religious antagonism between the Catholic and Protestant population, Sir Edmund Compton, the British Parliamentary Commissioner, has also taken office as the Northern Ireland Parliamentary Commissioner. It has been suggested that "given the religious antagonism in Ulster, the only way of choosing an acceptable neutral was to bring in someone from outside."[59]

We conclude that the Ombudsman has not developed an effective record of protecting minorities because in homogeneous populated countries no serious problem has evolved and in the heterogeneous populated countries the Ombudsman appears not to have been utilized. Nevertheless, there is a belief in some countries that the system will help to relieve tension where there is serious possibility of conflict between people.

As before, we wonder at the efficacy of an institution to help with intense problems where it can recommend only. The fight against discrimination requires more—anti-discrimination legislation and anti-discrimination agencies—with the Ombudsman as a supplement. As before we conclude that experimentation with the Ombudsman system is required before a definitive answer can be given.

[57] Mang'enya, supra note 22, p. XIV.

[58] 1967 Report of the Guyana Ombudsman, supra note 20, 5.

[59] Letter from Rudolf Klein, Chief Leader Writer, Observer, London, to Bernard Frank, March 31, 1969.

E. Can the Ombudsman Work Only in Small Developed Countries With Homogeneous and Stable Populations?[200]

One of the most frequent criticisms of the Ombudsman system is that it will work only in a small country with a stable and homogeneous population. Today there are Ombudsmen in small countries with homogeneous populations (the Scandinavian countries and New Zealand), with multi-racial populations (Guyana and Tanzania), and with a mixed religious population (Northern Ireland). Great Britain is the first populous country to establish the system. But to say that because the system evolved in small developed countries with homogeneous and stable populations it cannot be properly transplanted is (as has been said frequently by others) to "stand logic on its head." A more pertinent question is why such countries required an Ombudsman? And from this question deduce that big or small countries, developing or developed, homogeneous or mixed, require an external supervisor to supplement existing institutions. Nevertheless, the problems of the reluctance of minorities to use the Ombudsman because of lack of confidence or the possibility of the receipt of an overwhelming number of complaints with the necessity of greater bureaucratization of the office, must not be overlooked.

EVALUATION

Evaluation of the Ombudsman system based upon its operation in nine countries is not premature.

Existing mechanism—courts, legislatures, the executive, administrative courts, and administrative agencies—are not sufficient to cope with the grievances of the aggrieved and there is a need for a supplementary institution. The Ombudsman system provides an informal, independent, and impartial public official who, with relative speed and without cost to the complainant, investigates, with access to governmental records, and recommends relief when the complaint is justified. The system can be transplanted and since its form is not rigidly fixed can be varied to suit the characteristics and needs of each country.

The Ombudsman cannot accomplish all of the promises of some of his most enthusiastic proponents. He is not a super-administrator and does not make policy. He cannot remake society or cure its problems. The Ombudsman generally can recommend only and whether this is a

---

[200] CHENG, Emergence and Spread of the Ombudsman Institution, Annals, supra note 2, 20, 26-29; CAIDEN, Ombudsmen for Under-Developed Countries, Public Administration in Israel and Abroad 1967, 100, Jerusalem (1968).

virtue or defect cannot be conclusively determined at this early date in the life span of the system. But a tentative conclusion would lean toward the deficit side of the ledger. He can only supplement existing institutions which must be strengthened and made more responsive to the grievances of the citizens. But he does serve a steam valve function, permitting the release of frustration by the mere fact of complaint.

Officials also are the beneficiaries of the Ombudsman system. Unjustified complaints against them are determined to be such by an impartial adjudicator. Civil servants have also utilized the machinery for their own complaints, an interesting by-product of the system. In addition, officials are ofttimes influenced by the mere fact of the existence of the Ombudsman and make an effort to anticipate him and make changes earlier rather than later. A result which may weaken the effectiveness of officials is the willingness to agree with the Ombudsman on occasion even though they believe him to be wrong because they do not wish to tilt with the Ombudsman because of his status and prestige.

The Ombudsman does not appear to be flooded with complaints in any country which means not that grievances are non-existent but that many aggrieved are not aware of the Ombudsman or do not know how to invoke his aid or do not care to.

CONCLUSION

The Ombudsman, with his limitations and weaknesses, is on the world agenda for serious consideration. The growing list of countries, provinces, states, and local governments adopting the system indicates its great appeal. We believe this to be because it has long been evident that human rights are not protected simply by constitutions or legislation, by guarantees or speeches, by proclamations or declarations, but primarily by the availability of remedies. The Ombudsman system is one of the remedies which seeks to preserve human rights.

in danger or that he was in danger of suffering great bodily harm, but the belief must have been reasonable and in good faith. 40 Am. Jur. 2d, Homicide, §§ 151 to 159, pp. 439 to 447. Ordinarily a woman is justified in taking human life in protecting her chastity where she has been placed in fear for her life or great bodily harm. Here the defendant was admittedly engaged in prostitution and had negotiated with the deceased to engage in an act of prostitution with him for the sum of $20. It was for the jury to determine whether or not she killed in fear of death or of suffering great bodily harm, or on the other hand, whether or not the killing was motivated by anger, punishment, or vengeance. The character of the defendant and the fact of her engaging in prostitution did not deprive her of the right of self-defense, but they were circumstances to be considered by the jury, along with all other facts and circumstances shown by the evidence in determining the necessity for and the extent of the force used. The jury and not this court was charged with the duty of deciding these issues of fact.

Common law crimes are unknown to the law of this state. The definition of crimes and the punishment to be assessed for their violation are fixed by statute. If section 29-114, R. S. Supp., 1969, means ,as the defendant contends, that any person who finds it necessary in his own judgment to protect his person or property from another, no matter how great or trivial the invasion of his rights may be, to use force to the fullest extent, even beyond all reason, the punishment of the aggressor is placed with the person claiming self-defense and not with the state. Without fixing the amount of force that may properly be exercised in resorting to justifiable self-defense, over and above which is criminal, the Legislature has delegated the fixing of the punishment to the person asserting self-defense which it cannot do. The criminal laws under which we live in our social order are prescribed by the state through the Legislature and the

penalties for their violation are likewise prescribed by legislative enactment. Any attempt to delegate either of such powers to private persons with the excesses that naturally follow when crime or punishment are placed elsewhere than with the state, is violative of the powers placed exclusively with the Legislature by our state Constitution.

The argument has been advanced that section 29-114, R. S. Supp., 1969, when properly interpreted, has not changed the preexisting rule which has long been upheld in this state and elsewhere. We cannot accept the basis of this argument for two reasons, first, because unless the amendment here put in isuse was intended to change the existing law there would have been no reason for enacting section 29-114, R. S. Supp., 1969, and second, amendments were twice offered and rejected in the Legislature to properly limit the defense of self-defense. The intent of the Legislature, which we are required to determine and follow, is clear and not constitutionally acceptable.

We cannot in effect rewrite the statute to meet constitutional requirements. On the other hand, the constitutionality of the act is not raised which ordinarily precludes us from a consideration of that question. But where the invalidity of the act is plain, and such a determination is necessary to a reasonable and sensible disposition of the issues presented, we are required by necessity to notice the plain error in the premise on which the case was tried. Consequently we hold that section 29-114, R. S. Supp., 1969, is unconstitutional and void.

Instruction No. 9 contains no error prejudicial to the rights of the defendant, in fact, the instruction was more favorable to the defendant than she was entitled to. Defendant's requested instruction herein discussed was in effect given by inclusion in instruction No. 9 and it was properly denied by the trial court. The evidence is sufficient to sustain the verdict of the jury and the

judgment of the trial court ought to be and is affirmed.

AFFIRMED.

SPENCER and BOSLAUGH, JJ., dissenting.

The majority opinion herein violates a fundamental principle of constitutional construction. Neither the State nor the defendant raise an issue as to the constitutionality of the Self-Defense Act, section 29-114, R. S. Supp., 1969. Yet the majority opinion declares the statute invalid without the benefit of briefs or arguments upon the issue of constitutionality.

The following from Stanton v. Mattson, 175 Neb. 767, 123 N. W. 2d 844, indicates the extent of this abrupt departure from well-defined precedent: "All acts of the Legislature are presumed to be constitutional. The courts will not declare an act of the Legislature unconstitutional except as a last resort on the facts before the court. Courts will not decide questions of constitutionality unless they have been raised by a litigant whose interests are adversely affected. A court has no power to summarily pass upon the constitutionality of an act of the Legislature."

It is unnecessary to reach any question of the constitutionality of section 29-114, R. S. Supp., 1969, in this case. The instruction relating to self-defense, which was given in this case, advised the jury that self-defense was "the use of such force *by any means necessary* to repel an attack as at the time appeared to defendant to be necessary." (Emphasis supplied.) The instruction conformed to the statute in that the only limitation placed upon the force that might be used was that it be "necessary."

The instruction as given also conformed to the instruction requested by the defendant except that the trial court included a paragraph, taken from NJI 14.33, stating that a person who uses more force than that permitted by the definition contained in the instruction is criminally responsible therefor. The defendant contends that this part of the instruction was erroneous.

The Self-Defense Act does not authorize the use of unlimited force nor does it provide that persons who use more force than necessary should be immune from prosecution. The defendant's criticism of the instruction given is without merit.

STATE OF ALASKA
THE LEGISLATURE
LEGISLATIVE AFFAIRS AGENCY

POUCH Y - STATE CAPITOL
JUNEAU, ALASKA 99801

February 9, 1971

Mr. Jack W. Rodgers
Director of Research
Nebraska Legislative Council
State House
Lincoln, Nebraska 68509

Dear Mr. Rodgers:

A local news article mentioned that your self-defense statute was held invalid by your supreme court on January 29. Please send a copy of the court's decision. Presumably the statute in question is sec. 29-114 of the Nebraska Revised Statutes, Supp. 1969. If not, please send a copy of the right statute too.

Our legislature is presently considering enactment of a more-or-less similar statute (using the phrase "reasonably necessary force" rather than "by any means necessary"), and your early reply would be much appreciated. Thank you.

Yours truly,

Arthur H. Peterson
Revisor of Statutes

AHP/sm

re HB 40

Nebraska Revised Statutes, Supp. 1969

shall have been issued, nor shall any person be prosecuted, tried or punished for any misdemeanor or other indictable offense below the grade of felony, or for any fine or forfeiture under any penal statute, unless the indictment, information or action for the same shall be found or instituted within one year and six months from the time of committing the offense or incurring the fine or forfeiture, or within one year for any offense the punishment of which is restricted by a fine not exceeding one hundred dollars and to imprisonment not exceeding three months; *Provided*, nothing herein contained shall extend to any person fleeing from justice; *provided further*, where any suit, information or indictment for any crime or misdemeanor is limited by any statute to be brought or exhibited within any other time than is hereby limited, then the same shall be brought or exhibited within the time limited by such statute; *and provided further*, where any indictment, information or suit shall be quashed or the proceedings in the same set aside or reversed on writ of error, the time during the pendency of such indictment, information or suit so quashed, set aside or reversed, shall not be reckoned within this statute so as to bar any new indictment, information or suit for the same offense.

Effective date December 25, 1969.

29-114. Legal jeopardy; self defense; aiding another; indemnification; reimbursement. No person in this state shall be placed in legal jeopardy of any kind whatsoever for protecting, by any means necessary, himself, his family, or his real or personal property, or when coming to the aid of another who is in imminent danger of or the victim of aggravated assault, armed robbery, holdup, rape, murder, or any other heinous crime.

When substantial question of self defense in such a case shall exist, which needs legal investigation or court action for the full determination of the facts, and the defendant's actions are subsequently found justified under the intent of this section, the State of Nebraska shall indemnify or reimburse such defendant for all loss of time, legal fees, court costs, or other expense involved in his defense.

Effective date June 5, 1969.

ARTICLE 2
POWERS AND DUTIES OF CERTAIN OFFICERS

29-204. Constables; powers and duties.

Constables have authority to execute writs and process throughout the county. State v. Carpenter, 181 Neb. 639, 150 N.W.2d 129.

29-206. City and village marshals; general powers and duties.

Police officers had the right to stop motor vehicle outside the limits of city where circumstances indicate commission of crime. State v. Carpenter, 181 Neb. 639, 150 N.W.2d 129.

ARTICLE 4
WARRANT AND ARREST OF ACCUSED

Section.
29-401. Law violators; arrest by sheriff or other peace officer.
29-404. Complaint; county attorney; Attorney General; other complainant with consent of county attorney; filing; consent to filing when given; warrant; issuance.
29-404.01. Warrant; supplemental act.
29-404.02. Warrant; arrest; when not required.
29-404.03. Warrant; reasonable cause for arrest; conditions.
29-411. Warrants; execution; powers of officer; direction for executing.

29-401. Law violators; arrest by sheriff or other peace officer. Every sheriff, deputy sheriff, constable, marshal or deputy marshal, watchman, police officer, or peace officer as defined in subdivision (17) of section 49-801, shall arrest and detain any person found violating any law of this state, or any legal ordinance of any city or incorporated village, until a legal warrant can be obtained.

MEMORANDUM State of Alaska

TO: John E. Havelock
Attorney General

DATE: February 2, 1971

SUBJECT: HB 47 (Rep. Colletta)

FROM: M. Gregory Papas
Assistant Attorney General

The following comments were made by me during a hearing of the House Judiciary Committee, held on January 29, 1971, in response to an invitation to the department to offer testimony regarding the above-mentioned bill. I made no recommendations as to what type of bill the department would wish to see enacted but limited myself to a statement of the arguments pro and con which have developed in the current judicial examination of the felony-murder rule. This discussion is in outline form since taken from my pre-hearing notes.

1. Alaska does not presently have a genuine felony-murder rule due to the use of the word "purposely" in our murder statute, AS 11.15.010.
   a) Gray v. State, 463 P.2d 902 (1970) points out this fact clearly.
   b) Smith v. Myers, (Pa. 1970) 261 A.2d 550 interpretes the Ohio statute, after which the Alaska Statute was patterned, as not being a true felony-murder rule.

2. HB 47 is a true felony-murder statute.
   a) Effect of rule at common law: To imply malice aforethought in a murder which occurred during the commission of one of the named felonies.
   b) Effect of HB 47: (1) Imputes the act of killing to the felon, whether he is the physical killer or not. This was not common in the United States until about 30 years ago.
      (2) Imputes the element of malice aforethought to raise a criminal homicide to murder in the first degree.
   c) Applications of the felony-murder rule:
      (1) i, felon kills victim
          ii, felon kills co-felon
          iii, felon kills resister (cop/ 3rd person)
          iiii, felon kills bystander

(2) i, victim kills felon
ii, cop kills felon
iii, cop or victim kills bystander
iiii, unusual situations
(victim kills co-victim)

d) Under those situations denominated as c(1), above, successful prosecution does not depend entirely upon the felony-murder doctrine; whereas in those situations denominated as c(2), above, the felony-murder rule is essential if stern prosecution is desired.

3. Many states still follow the rule that any killing which is perpetrated in the commission or attempt to commit one of the enumerated felonies, even if accidental or unintentional, is first degree murder.

a) The wording of section B of the bill (HB 47) makes completely unnecessary proof of a strict causal connection between the felony and resultant homicide.

b) The only specific intent is that needed to commit the felony involved.

c) Courts in states following this concept apply the civil tort concept of "proximate cause", i.e. a felon is criminally responsible for the natural or reasonably foreseeable results of his felonious undertakings.

4. Theoretical criticisms of the broad rule which are applicable, equally, to HB 47.

a) The extension of the common law doctrine to its present stage is based on a misinterpretation of the word "murder" to mean "killing". The common law application was, first, to classify the killing as murder, manslaughter or justifiable or excusable homicide and, if found to be murder, then to characterize it as in the first degree. That is, under a proper application of the rule as taken from the common law malice aforethought may be imputed to the felon but not the act of killing; that the mere coincidence of homicide and felony is not enough to satisfy the requirements of the felony-murder doctrine. Under this view the rule is limited in application to situations where the felon is the physical killer. See Clark & Marshall, section 10.07.

b) The presumption which is utilized when imputing the act of killing to the felon in cases where he provokes another person to kill is subject to possible Constitutional strictures.

(1) Background: the U.S. Supreme Court has rejected the idea that a state legislature has the power to create any presumtion it wishes. The constitutional right to a fair trial and the presumption of innocence requires the prosecution to prove beyond a reasonable doubt

every element of the offense charged; that is, there can be no directed verdicts of guilty in a criminal case. Purely arbitrary presumptions violate these rights.

(2) Premise: a criminal statutory presumption must be regarded as irrational or arbitrary, and hence unconstitutional, unless it can at least be said with substantial assurance that the presumed fact is more likely than not to flow from the proved fact on which it is made to depend. Leary v. U.S., 395 US at 36.

(3) In HB 47 the proved fact is the commission of a felony, the presumed fact is that the felon committed the act of killing.

(4) HB 47 glosses over the numerous distinctions between types of homicides by use of this presumption and lumps them all together as murder first.

c) The concept of proximate cause in connection with felony-murder has been abolished in Penn. and Calif.; other states have recognized numerous limitations in its application.

(1) Smith v. Myers, supra, held that the concept of proximate cause has undergone great expansion in recent years; utilizing this concept in prosecutions for criminal homicide would be to extend possible criminal liability to persons chargeable with unlawful or reckless conduct in circumstances not generally considered to present the likelihood of a resultant death.

(2) People v. Washington, (Calif. 1965) 402 P.2d 130 held that the felony-murder doctrine expresses a highly artificial concept that deserves no extension beyond its required application, thus by implication rejecting the proximate cause argument.

(3) Later Calif. cases have rejected the rule's use in situations where the underlying felony is assault with a deadly weapon, on the basis of the "included in fact" test, in

an effort to preserve distinctions between types of homicides. 22 Stan. L. Rev., No. 5, 1970.

d) The felony-murder concept is legally unsound.
(1) A crime is generally defined as the unity or joint operation of an act (declared unlawful) and intent (to do that act).
(2) It is argued that the unity of act and intent that exists when the felony-murder doctrine is utilized is fictitious at best for it is the combination of the intent to do one act (the felony) with the commission of another act (the homicide).
(3) The presently accepted theory is characterized as particularly unsound when it is carried one step further by considering a homicide to be murder when the actual, physical killer (cop/victim/3rd person) has no legal or moral culpability. The argument is that the felon's guilt should be no greater than the actual killer's.

e) Absence of Mens Rea.
(1) Homicides are distinguished on the basis of the state of mind of the perpetrator; that is, whether his act is wilfull, deliberate and premeditated, upon a sudden heat of passion, in the commission of an unlawful act, or constitutes culpable negligence.
(2) The felony-murder rule sweeps all these distinctions away, notwithstanding the facts of the particular case. It thus imposes the most serious penalties in cases otherwise meriting lesser punishment.

5. Arguments which favor application of the rule in its broadest terms.

a) Underlying each of the arguments in support of the rule is the statement of justice Oliver Wendell Holmes in The Common Law:
"Acts should be judged by their tendency under the

known circumstances, not by the actual intent which accompanies them. . . the object of the law is to prevent human life being endangered or taken. . . the law requires [men] at their peril to know the teachings of common experience, just as it requires them to know the law. . . the test of murder is the degree of danger to life attending the act under the known circumstances of the case".

b) The moment that a person forms the intent to commit a felony which is inherently dangerous to human life he develops a man endangering state of mind, which is malice aforethought. Thereafter any killing is a product of that malice. The law does this very thing in other circumstances. Example - it is first degree murder to shoot and kill one man even though the actor's intent was to kill another person.

c) A killing (done by any person) is initiated by the felon since: (1) he is committing an act in itself dangerous to human life and (2) the killing would not have occured but for the provocation of the felony. The law does not measure the delicate scruples of a felon but rather imputes to him the knowledge that he is inviting dangerous countermeasures.

d) The legislature may properly classify murders committed with premeditation, or by torture, poison, or lying in wait as first degree. It may also classify murders during heinous felonies as first degree.

e) America is experiencing a rampant crime wave, which necessitates, for the protection of society in general, sentences which are commensurate punishment for the crime. This means severe sentences which will act as a deterrent to prospective and repeating criminals. The argument implies that the sentence for robbery, for example, should be more severe when a killing occurs than when no harm is caused.

APPENDIX A

During the course of the discussion, in which I characterized the arguments against the felony-murder rule as somewhat theoretical and those in support as a hard-line approach, it became apparent that the bulk of the committee were not overly impressed with those theoretical arguments. One of the committee members commented that a victim or bystander is just as dead whether killed by the felon or some other person. Chairman Moran, Mr. Hillstrand, Mrs. Banfield and one other seemed to prefer the view that a felon be charged with the consequences of his act. However, each member seemed to grasp the validity of some of the arguments against the rule and expressed a desire to avoid the pitfalls which are becoming evident. The Chairman thereupon inquired if the department has any recommendation, to which I responded that none had formally been agreed upon. However, as a point of discussion, I threw out the formulation of the rule which I proposed in my January 27 memo to you. This statement, plus a committee substitute for HB 47, are currently under consideration. The chairman expressed a wish to proceed judiciously and has agreed to accept further testimony from this department regarding our suggested approach to the problem. My specific request for additional time during which you will be able to formulate the department's position was granted. At this point the committee awaits your pleasure.

One suggestion that I would make, in view of the committee's attitude, is to adopt my suggestion of January 27, 1971 (which is a restatement of HB 496, 6th Legis. - Second Session, introduced at the request of the governor) which fixes the felon's responsibility for his direct acts. In combination with this AS 11.15.080 (negligent homicide) might be beefed up to refer specifically to situations where a felon provokes another person to kill when the killing occurs as a result of resistance to the commission of the felony or during the apprehension of the felons. This approach is, I feel, preferable to the features of CSHB 47 which would necessitate the exploration of what is a probable result of the commission of a felony.

House Judiciary Committee

HB-47

THE SUPREME COURT OF THE STATE OF ALASKA

ARLIE ROY POPE,

Appellant,

v.

STATE OF ALASKA,

Appellee.

File No. 1127

OPINION

[No. 660 - December 21, 1970]

Appeal from the Superior Court of the State of Alaska, Third Judicial District, Anchorage, Ralph E. Moody, Judge.

Appearances: James R. Clouse, Jr., Anchorage, for Appellant. G. Kent Edwards, Attorney General, Juneau, Harold W. Tobey, District Attorney, and Richard R. Felton, Assistant District Attorney, Anchorage, for Appellee.

Before: Boney, Chief Justice, Dimond, Rabinowitz, Connor and Erwin, Justices.

ERWIN, Justice.
CONNOR, Justice, concurring in part and dissenting in part.

Appellant, Pope, was convicted of second degree murder in connection with the death of one David Silva on July 9, 1968. According to his own testimony, he arose on that date at his usual hour and prepared himself for work. While driving to work he began to feel sick and decided to have only coffee in place of his usual breakfast. As appellant continued towards his job, the sickness became more severe and he

decided to turn around and drive back to his motel. He testified that this condition of nervousness and sickness at his stomach had occurred with frequency in the period of time shortly before the shooting occurred.

After returning to his motel room, appellant consumed a little less than one-half of a pint of alcoholic beverage, remaining in his room and watching television. He made several attempts to reach his former wife, Irma Pope, and was at last successful. However, Mrs. Pope refused to speak with him, slamming down the telephone. Appellant stated that the reason that he had attempted to call his former wife was that he felt really sick and was looking for help from someone.

After being rejected over the telephone, appellant described a strange feeling, "like something was spinning around the top of my head, from right to left, right underneath the skin against the skull and when you closed your eyes you could see -- could see a streak of light coming around and around. . . ." He described the light as not being mean or anything, but the light said "kill him, kill him, kill him" -- just kept repeating it; and finally he said it to himself and as soon as he did he felt very good and was not sick any more. Appellant further stated that after the lights had stopped in his head, he felt very sorry for David Silva because of what was going to happen; he did not think there was anything that he could do to prevent the killing of David Silva, and he knew he was going to do it, but he didn't yet know just how. When

appellant finally agreed with the light in his head which told him to kill Silva, the nervousness disappeared, as did his upset stomach.

Appellant's recollection of the events that occurred after he left the motel was hazy and vague. He recalled only being near the parking lot at Anchorage Bedding and Furniture and next seeing the gun in his hand on the door ledge of his automobile. Appellant did not recall shooting the decedent, but only remembered watching the decedent sitting down and then lying backwards on the ground.

Officer Pavlovich was the first law enforcement officer to arrive on the scene. Upon arriving he observed the deceased, a woman at the head of the decedent, and another man, later identified as the appellant, alongside the decedent in either a squatting or kneeling position. Officer Pavlovich went over to the decedent, checked his pulse, and pronounced him dead. He next asked the woman what had happened. The woman, Mrs. Silva, indicated that appellant had shot Mr. Silva. In response to this, Pavlovich stood the appellant up and started to search him for weapons.

At this point in the sequence of events there is a dispute as to the actual occurrences. A Mr. McConnell testified that he observed Officer Pavlovich going over to appellant and questioning him for a minute or two before finally searching him for a weapon. The officer, on the other hand, testified that after he had examined Silva he immediately started to search

appellant. Appellant's version of the story is that as he was being frisked by Officer Pavlovich, he was asked if he had a gun, to which he responded yes, that it was in the car. Officer Pavlovich claims that the information about the gun was volunteered by Pope and that no such question had been asked.

Mr. McConnell stated that after eliciting this information, Officer Pavlovich proceeded to appellant's car, with his arm on appellant's arm, to retrieve the weapon, which was located in the middle of the front seat. Officer Pavlovich stated that after Pope had volunteered the information as to the whereabouts of the gun, Pope proceeded to the automobile and Pavlovich hurried to beat him to the car in an effort to retrieve the weapon.

On cross-examination Officer Pavlovich described the appellant's appearance as being dazed and testified that his feeling at the time was that appellant was not drunk, but either dazed or at least under the influence of alcohol -- but he could not tell which. Officer Pavlovich further testified that although he detected nothing radically wrong with appellant, that is, appellant walked normally and spoke clearly and distinctly, albeit very slowly, he nevertheless seemed to be preoccupied. At another point in his testimony Pavlovich stated that he thought appellant was either under the influence of alcohol or in a state of shock. Furthermore, he was not sure whether appellant was in possession of his faculties at this time.

On August 5, 1968, Pope was indicted by the grand jury for first degree murder and arraigned immediately thereafter.

Appellant entered a plea of not guilty, and the trial date was set for December 12, 1968, before the Honorable Edward V. Davis, Superior Court Judge. Prior to trial, on November 29, 1968, at the request of the prosecutor, a competency hearing was held. On January 16, 1969, the Superior Court entered an order to the effect that the appellant was competent to stand trial.

Because of continuances, trial did not begin until February 10, 1969. At that time the defendant appeared before the Honorable Ralph E. Moody, Judge of the Superior Court, rather than Edward V. Davis, to whom the case had been assigned originally. Timely objection was made by appellant to the unannounced change. On February 18, 1969, the jury returned a verdict of guilty of murder in the second degree. Notice of appeal was duly filed.

Appellant raises four specifications of error in the trial below. His first specification is that the court committed prejudicial error in reassigning appellant's case from Judge Davis to Judge Moody without giving appellant five days from the date of reassignment to consider and possibly file a peremptory challenge affidavit as provided in AS 22.20.022; his second, that the trial court erred in overruling the appellant's motion to suppress the evidence seized by Officer Pavlovich from the appellant's car prior to a lawful arrest; and his third, that the trial court incorrectly admitted the statements of appellant made prior to his being given the proper Miranda warnings and after he had become a suspect in the crime and had been substantially deprived of his freedom of action.

Finally, he contends that the trial court should have ruled as a matter of law that the burden of proving sanity is on the state rather than the burden of proving insanity being upon the defendant, when there was some evidence in the record to indicate that sanity was at issue.

I

In his first claim of error, appellant contends that because of the assignment procedure used herein,[1] he did not have sufficient opportunity to determine and if necessary file an affidavit alleging he believed that he could not obtain a fair and impartial trial.

Trial proceeded on February 10, 1969, appellant making timely motion,[2] which motion was denied.

---

[1] There was no advance notice to counsel of the reassignment of this case from Judge Davis to Judge Moody on the day of trial. It should be noted that subsequent to the trial herein this court in the case of Roberts v. State, 458 P.2d 340, 346 (Alaska 1969) pointed out the potential problems of such a practice in suggesting that this method of reassignment of a case should be avoided in the future:

> A method should be devised and utilized to make assignment of cases to judges sufficiently in advance of trial or hearing, with notice of the assignment being given to the parties, so that the parties can be afforded their rights under AS 22.20.022 without interfering with the scheduled hearing or trial dates.

[2] The motion was as follows:

> Mr. Clouse: Your Honor, for the record, at this time, I would like to state an objection to the Court's requiring us to go to trial at this time and not before the -- Judge Davis who was previously assigned this case. This deprives the defendant of the opportunity to investigate and exercise any challenge that he may have within the five day period as provided by rule and statute.

Appellant correctly points out that the granting of the five-day period is to allow a party or his attorney an opportunity to investigate the judge to whom the case is assigned and if necessary file the requisite affidavit for disqualification, thus avoiding the waste of judicial time which would result if an affidavit or disqualification were not filed until the date of trial because this would mean that the case would have to be continued until another judge could be assigned and the disqualified judge would not be ready at that time to start the trial of another action.[3] Appellant

---

2 [Contd.]

> The Court: Motion's denied since this is merely a procedural matter and it delays the -- delays the carrying on of Court business if we give effect to that for the five days rule. Other than the objection, is defense ready to proceed?
>
> Mr. Clouse: Yes, your Honor.

AS 22.20.022 states in relevant part:

> "Peremptory disqualification of a superior court judge. (a) If a party or his attorney in a superior court action, civil or criminal, files an affidavit alleging under oath that he believes that he cannot obtain a fair and impartial trial, the presiding judge shall at once, and without requiring proof, assign the action to another judge of that district, or if there is none, the chief justice of the supreme court shall assign a judge for the hearing or trial of the action. The affidavit shall contain a statement that it is made in good faith and not for the purpose of delay."
>
> * * *
>
> "(c) The affidavit shall be filed within five days after the case is at issue upon a question of fact, or within five days after the issue is assigned to a judge, whichever event occurs later, unless good cause is shown for the failure to file it within that time."

3 Roberts v. State, 458 P.2d 340, 346 (Alaska 1969).

further correctly argues that the provisions of this statute have been interpreted by this court to mean that once the affidavit is filed, the judge involved is without power or jurisdiction to take any further action in the proceeding. Channel Flying Inc. v. Bernhardt, 451 P.2d 570 (Alaska 1969).

But appellant has not shown that any harm resulted to him from the denial of his motion. Instead, he invites us to speculate that he suffered some possible prejudice, even though he did not challenge the trial judge because he felt that any challenge he made might have a prejudicial effect on the jury. The gist of appellant's argument appears to be that since any challenge might affect the jury he never seriously considered whether or not he should exercise the challenge because the reassignment made the choice more difficult. Since appellant could have exercised the challenge at any time within five days of reassignment, even during trial, we hold that his failure to do so was a waiver of his right to a peremptory challenge to the trial judge, and it was not error for the court to refuse to grant a continuance of five days to permit appellant to ponder this matter at length.

II

Appellant claims that the trial court committed error in refusing to suppress as evidence (1) appellant's oral statement about the gun, and (2) the gun itself, which the officer seized in appellant's car. The argument is that this evidence is tainted because the required warnings under Miranda v.

Arizona, 384 U.S. 436, 16 L.Ed.2d 694 (1966) were not given by the officer until after the seizure of the gun, that appellant had already become a suspect in the crime, and that he had been substantially deprived of his freedom in a significant way. The test of when warnings must be given under Miranda is whether the accused has been "taken into custody or otherwise deprived of his freedom by the authorities in any significant way and is subjected to questioning." 384 U.S. at 478, 16 L.Ed.2d at 726.

We need not explore such problems as whether the "in custody" test of Miranda displaces the "focus" test of Escobedo v. Illinois, 378 U.S. 478, 12 L.Ed.2d 977 (1964), or whether the two tests can be regarded as alternatives to some extent.[4] For it is plain to us that this case falls within an important exception stated by the court in its opinion in Miranda. After pointing out that it did not intend to hamper the traditional function of police officers in investigating crime, the court said:

> General on-the-scene questioning as to facts surrounding a crime or other general questioning of citizens in the fact-finding process is not affected by our holding. It is an act of responsible citizenship for individuals to give whatever information they may have to aid in law enforcement. In such situations the compelling

[4] United States v. Hall, 421 F.2d 540 (2nd Cir. 1969); Graham, What is Custodial Interrogation?: California's Anticipatory Application of Miranda v. Arizona, 14 U.C.L.A. L.Rev. 59, 114-15.

> atmosphere inherent in the process of in-custody interrogation is not necessarily present. 384 U.S. at 477-78, 16 L.Ed.2d at 725-26.

In interpreting Miranda various courts have had to draw lines between what are permissible investigative interviews and custodial interrogations. The United States Supreme Court itself has made it plain that custodial interrogation could take place outside the station-house where one was "not free to go where he pleased but was 'under arrest.'" Orozco v. Texas, 394 U.S. 324, 325, 22 L.Ed.2d 311, 314 (1969). The courts must determine, therefore, in each case whether the atmosphere and setting of an interrogation are of such coercive effect or indicate such significant restraint as to trigger the need for a Miranda warning. There is not always agreement about the criteria for such a determination.

But the case at bar is a strong one for applying the "on-the-scene questioning" exception to the Miranda warning requirement. The officer here was presented with a situation of great emergency. A crime of violence had occurred, the victim was lying on the ground dead. There was more than one person present. Both to protect his own safety and that of others, the officer had to elicit information about what had happened, and about the gun which had obviously been used in the killing. For the same reason the officer also had the right to conduct a strictly limited search ("frisk") of Pope's person for weapons under the rule of Terry v. Ohio, 392 U.S. 1, 20 L.Ed.2d 889 (1968),

which he did.[5] To hold that, while a policeman faced with an emergency such as the one which confronted Officer Pavlovich may "frisk" a suspect for weapons he may not simultaneously ask him whether he is armed, would be an unrealistic and unreasonable extension of the Miranda rule.

Appellant also contends that, because the revolver was seized from Pope's automobile prior to the time he was placed under arrest, it was inadmissible because it was not the product of a search incident to arrest. The difficulty with this line of argument is that the gun was not the product of a "search" at all; it was lying on the front seat of the car in plain view. As soon as he saw it, Officer Pavlovich seized it and unloaded it, both to preserve it and its cartridges as evidence and to prevent appellant, who was standing beside him, from getting hold of it. His conduct was entirely justified.

> It has long been settled that objects falling in the plain view of an officer who has a right to be in the position to have that view are subject to seizure and may be introduced in evidence.[6]

III

The final point raised by appellant is a challenge to the burden of proof in insanity cases as set forth in the

opinion of this court in Chase v. State.[7] A review of the record reveals that the only testimony before this court in reviewing this point is the testimony of Officer Pavlovich, the appellant, Pope, Bill McConnell, and the cross-examination of appellant's ex-wife. Testimony given by Dr. J. Ray Langdon, a psychiatrist, and Marie Doyle, a psychologist, at the trial, as well as the testimony of additional police officers and others at the scene of the crime, was not made a part of the record on appeal.

While proper objections were made at the trial concerning burden of proof in insanity cases, no objection was made to instructions on the test for insanity as given by the trial court, nor was any testimony presented nor instructions requested concerning such an issue.

Since in our opinion the burden of proof as to the defense of insanity and the actual test for insanity are inseparably intertwined,[8] we are placed in the position of attempting to review the entire basis for the present rule on the defense of insanity in Alaska on an inadequate record without complete presentation of these issues to the trial court. This we decline to do.[9]

---

[7] 369 P.2d 997, 1003 (Alaska 1962).

[8] Approximately one-half of the states put the burden on the defendant while the other half and the federal courts put the basic burden on the prosecution. See annot. 17 A.L.R.3rd 146 (1968).

[9] For a similar action by a federal court, see Ramer v. United States, 390 F.2d 564 (9th Cir. 1968).

The importance of the defense of insanity has been underscored recently by a series of excellent opinions in federal courts which have considered, and in many cases adopted, the A.L.I. test for insanity,[10] and a series of equally searching state court opinions which have noted more than one position, but have tended to retain the M'Naghten rule.[11] These opinions note that there are presently four separate tests for insanity[12] which have received varying degrees of judicial acceptance. They serve to underscore the difficulty of choosing a proper test for insanity and the corresponding burden of proof without

complete presentation on the issue in the trial court and ultimately in this court.[13]

The judgment of the Superior Court is hereby affirmed.

---

[13] Once before this court has refused to review the test for insanity for Alaska based on an inadequate record. See Dimmick v. State, 449 P.2d 774, 776 (Alaska 1969).

CONNOR, J., concurring in part and dissenting in part.

I concur with the majority opinion except the portion dealing with the burden of proof in insanity cases, and allied questions. As to that portion of the majority opinion I must respectfully dissent.

This case went to the jury on instructions concerning the defense of insanity which were patterned on those approved by this court in Chase v. State, 369 P.2d 997 (Alaska 1962). Counsel for appellant objected to those instructions as improperly placing the burden on the accused to establish his insanity by a preponderance of the evidence. He thus raised and preserved for appeal the questions of what is the burden of proof and where it should be placed in these cases. He is properly entitled to a decision on those questions.

The majority of my colleagues feel that the burden of proof question and the substantive test of insanity are interrelated. I agree. But for that very reason I believe that both topics logically can, and properly should, be determined by the court.[1/]

The lack of an adversary presentation of the legal arguments bearing upon the proper test of insanity in criminal cases should not be an impediment to decision in this particular instance. Ultimately one must read a large body of legal and

1/ For a case in which a distinguished court took a relaxed view of the manner in which counsel raised the question of the proper test of insanity in the trial court, see United States v. Freeman, 357 F.2d 606 (2d Cir. 1966). The failure of trial counsel in that case to object to the insanity test itself was not deemed critical.

psychiatric material even to become conversant with these subjects. Appellate briefs are of much less value here than in the resolution of more usual questions.[2] Surely this would not be the first time that this court decided a case on grounds or under a doctrine not fully presented in the briefs.[3]

There is another reason why we should decide these questions now, not later. In my opinion the test currently obtaining under Chase v. State, supra, is so inherently unfair as to dissuade either defendants or their counsel from raising the defense of insanity, or adducing evidence in support of it. Thus it is difficult to get the insanity question before us on appeal.

The insanity defense is much like a confession and avoidance. One virtually admits all factual elements of the crime but claims insanity as a special ground of exoneration. One claiming that he did not commit the offense, but who alternatively claims that he was insane when he did commit it, has little hope of success. While such an approach is procedurally permissible, as a practical matter it is a foolhardy strategy.

2/ The question of the test of insanity as a criminal defense has already been briefed in Chase v. State, 369 P.2d 997 (Alaska 1962). There the state urged that if the M'Naghten test was not employed, the American Law Institute test (discussed later herein) would be the most suitable.

3/ One such case was Grossman v. State, 457 P.2d 226 (Alaska 1969), adopting an objective standard of entrapment, though neither party directly briefed that doctrine. Surely others could be found by searching the briefs and comparing them with the opinions rendered by this court during the last ten years.

A person invoking the Alaska rule on insanity, even in a strong case, has almost precluded himself from an acquittal. The current test thus exerts a chilling effect upon one who might seek a change in the law through the appellate process. This is true even though he may have suffered from serious mental illness, of a psychotic type, at the time he committed the act with which he is charged. Because of the in terrorem effect of the current Alaska test, I see no reason to postpone corrective measures, especially if we believe that the test can be improved.

I

All discussion of the tests of criminal responsibility inevitably must refer to M'Naghten's Case, 10 Cl. & Fin. 200, 8 Eng. Rep. 718 (1843), which is regarded as the English source of the rule followed in most American jurisdictions for over a century. In that case Daniel M'Naghten attempted to assassinate Robert Peel, the Prime Minister. Because Peel, on the fatal day, happened to ride in Queen Victoria's carriage instead of his own, M'Naghten shot into the wrong carriage and killed Drummond, Peel's secretary. From all of the available information it seems quite plain that M'Naghten was suffering from psychotic delusions of persecution. At his trial Lord Chief Justice Tindal virtually directed a verdict in his favor.[4/] At the trial the medical witnesses and the court had been influenced by the writings and

4/ Guttmacher & Weihofen, Psychiatry and the Law, 403 (1952); Roche, "Criminality and Mental Illness - Two Faces on the Same Coin," 22 U. Chi. L. Rev. 320, 324 (1955); Biggs, The Guilty Mind, 95-97, 102 (1955).

theories of such advanced thinkers as Dr. Isaac Ray, the first great forensic psychiatrist in America. It was Dr. Ray's thesis that insanity must be measured by evaluating the entire personality structure of an individual, and not by tests such as merely the ability to know right from wrong.[5/] At any rate, M'Naghten was acquitted. Unfortunately for the development of law, the case did not end there.

Despite commitment of the hapless M'Naghten to an insane asylum, Queen Victoria was outraged by the acquittal, probably because there had already been three attempts on her life and one on that of the Prince Consort. In a letter to Sir Robert Peel, the Queen deplored the action of the judges in allowing verdicts of not guilty by reason of insanity in cases of this kind because she was convinced that such malefactors "were perfectly conscious and aware of what they did." She pressed for legislation to require judges "to interpret the law in this and no other sense in their charges to the Juries."[6/] The House of Lords was convened, and the fifteen judges of the common law courts were called upon, in an atmosphere of political pressure, to answer five rather vacuous questions about criminal responsibility in English law. Interestingly enough, it was Lord Chief Justice Tindal who

---

5/ Dr. Ray's views have a modern ring. "[T]he insane mind is not entirely deprived of ... power of moral discernment, but on many subjects is perfectly rational and displays the exercise of a sound and well balanced mind." Ray, Medical Jurisprudence of Insanity 13 (3d ed. 1853).

6/ Biggs, supra n. 4, 103.

responded with a test more rigid than that which he had used when M'Naghten was tried before him. The M'Naghten rule in essence is:

> "[T]o establish a defence on the ground of insanity, it must be clearly proved that, at the time of committing of the act, the party accused was labouring under such a defect of reason, from disease of the mind, as not to know the nature and quality of the act he was doing: or, if he did know it, that he did not know he was doing what was wrong." 10 Cl. & Fin., at 210, 8 Eng. Rep., at 722.

Thus, in a case which was no longer a case, in response to hypothetical questions based on notions of phrenology and monomania which were then in vogue, the judges, in a dramatic departure from common law decisional technique, acting more as a governmental committee than a court, pronounced a rule which has been followed unthinkingly by many courts ever since. Of little avail was the restrained observation of Sir James Stephen that "every judgment delivered since the year 1843 has been founded upon an authority which deserves to be described as in many ways doubtful."[7/] The test could at least have been limited to cases of paranoia like that suffered by M'Naghten, but instead it was applied by many courts as a rule of universal and implacable validity, appropriate for all types of mental and emotional derangement.

The M'Naghten test has been supplemented in many jurisdictions by the "irresistible impulse" test, under which one suffering from a mental disease, of such severity that the

7/ II Stephen, History of the Criminal Law of England 153 (1883).

freedom of will is destroyed, may be excused from culpability.[8]

In Alaska, before statehood, the right-and-wrong test, supplemented by the irresistible impulse test, was considered the applicable rule.[9] In Chase v. State, 369 P.2d 997 (Alaska 1962), however, this court adopted a particular version of what it regarded as the M'Naghten rule. The test laid down there was that in order to exculpate the defendant he must be laboring under such mental disease or derangement at the time of the act "as to render him incapable of knowing the nature and quality of his act and of distinguishing between right and wrcng in relation to the act with which he is charged." 369 P.2d, at 998. (Emphasis supplied.) This results in a formulation more rigid than the M'Naghten test, and without the irresistible impulse supplement which had previously obtained in Alaska.[10] In that sense the Chase case is a retrograde decision in a time of

---

8/ As of 1955, about 14 states, and the federal judiciary, had adopted the irresistible impulse addition to the test.

Mod. Penal Code, Tent. Dr. No. 4,161 (1955).

9/ Matheson v. United States, 227 U.S. 540 (1913); Davis v. United States, 165 U.S. 373 (1897); Sauer v. United States, 241 F.2d 640 (1957), cert. denied 354 U.S. 940; Rivers v. United States, 270 F.2d 435 (1959).

10/ That the Alaska test is more restrictive than M'Naghten is apparent from the following example. One laboring under a psychotic delusion, such as that he is being persecuted or that God has ordained that he must kill, may well know the nature of the act committed, yet not be able to appreciate its wrongfulness. Under M'Naghten he would not be culpable, but under Chase he could not be acquitted. Cf. People v. Schmidt, 110 N.E. 945 (N.Y. 1915), per Cardozo, J.

generally forward legal progress.[11/]

The court in Chase relied on three cases: Jessner v. State, 202 Wis. 184, 231 N.W. 634, 71 A.L.R. 1005 (1930); Maas v. Territory, 10 Okla. 714, 63 P. 960 (1901); and Montgomery v. State, 68 Tex. Crim. 78, 151 S.W. 813 (1912). As the Note, "Criminal Insanity," UCLA-Alaska L. Rev., 8 Alaska L.J. 152, 153-54 (Aug. 1970), points out, these cases were decided before many of the modern advances in psychiatry had been widely disseminated. Moreover, the instructions given in these cases lacked clarity and therefore were extremely confusing. Jessner and Montgomery indeed held that the phrases "the nature and quality of the act" and "the difference between right and wrong" were synonymous; if the defendant could not understand the one, he could not distinguish the other. However, as the Note, supra, indicates, these phrases are not at all synonymous in ordinary speech.

To torture English into performing such a linguistic cakewalk requires unusual skill. Since juries are composed of but ordinary reasonable laymen, additional complicated instructions would have to be given to insure that the jury does not consider the terms according to their usage in common everyday

---

11/ Speculation persists in Alaska legal circles that the use of the conjunctive "and" in the instructions which were validated in Chase possibly came about through a typographical error by the secretary to the trial court judge. If this is so, then Chase is no less an historical accident than M'Naghten's Case.

speech and thereby misapply the law. Such verbal gymnastics should not be employed in jury instructions. The purpose of jury instructions is to instruct and enlighten the jury on the law, not to confuse them.[12/]

It also appears that the instructions in Jessner focused solely on the defendant's ability to distinguish between right and wrong, ignoring completely his ability to understand the nature and quality of his act.[13/] In Maas, the actual instruction did follow the disjunctive form of the M'Naghten test.[14/] If anything, this case stands for an adoption of the true M'Naghten rule, not the rule of Chase. In sum, I do not find any of these cases of sufficient precedential value to warrant an adherence by this court to what is little more than a modified "wild beast" test.[15/]

Since the M'Naghten case, and even in the eight years since Chase v. State was decided, a great deal of critical

evaluation and development has occurred, in an effort to achieve more advanced and just techniques for handling this serious problem.

The torrent of legal writing is so vast that it is nearly impossible for all but a few to read or comprehend everything which has been said on this basic issue of criminal responsibility. Still, certain broad outlines can be stated. There is nearly universal dissatisfaction with the M'Naghten rule on the part of scholars, jurists, and psychiatrists who have seriously inquired into the subject. The main difficulty with the M'Naghten rule is that it focuses exclusively on the cognitive element in mental life, that is, the knowledge of right and wrong or of the nature of one's act. One of its underlying assumptions is that mental illness is a failure of intellectual function. This reflects an artificial dualism of mind and emotions which ignores the affective aspects of the human personality. While there are many schools of psychiatric thought, there is broad agreement that mental illness can be understood only by looking at man as an integrated, psychobiological whole.[16/] Because the M'Naghten

16/ "Psychiatry may be defined as that branch of medicine which deals with the genesis, dynamics, manifestations and treatment of such disordered and undesirable functionings of the personality as disturb either the subjective life of the individual or his relations with other persons or with society.... Viewed a little differently, psychiatry may be regarded as the science which deals with the psychopathological aspect of human biology. The latter considers man not only as a living organism but also as a thinking, feeling and striving one." Noyes & Kolb, Modern Clinical Psychiatry (5th Ed. 1958), 1.

rule views man within the artificial strictures of cognition, courts and juries are deprived of much of the benefit to be gained from the modern science of psychiatry.[17]

Other criticisms of the M'Naghten rule would probably be applicable to any verbal formulation.[18] The difficulty stems from the different functions and purposes of law and psyciatry. The aim of psychiatry is to examine human behavior and mental disease in a scientific manner and to develop therapeutic methods of dealing with the emotional problems of mankind. On the other hand, it is the task of the law to develop normative rules to control human behavior. It has always been recognized that certain persons must be regarded as not the proper subjects of criminal conviction, and that because of their mental aberrations it would be unjust to hold them responsible for their conduct.[19] Ultimately this is an ethical and social judgment and not a medical determination.

Scholars and jurists have expended great effort over the years to achieve a standard reflecting both society's need for criminal accountability and the converse demand for a rule flexible enough to cover the varieties and combinations of serious emotional and mental illness which destroy the capacity to commit a crime, in any just conception of the term.

19/ A. Platt & B. Diamond, "The Origins of the 'Right and Wrong' Test of Criminal Responsibility and Its Subsequent Development in the United States: An Historical Survey," 54 Calif. L. Rev. 1227 (1966). In early law the "insane" were considered homologous to children.

One great developmental breakthrough occurred with the famous decision in Durham v. United States, 214 F.2d 862 (D.C. Cir. 1954). There Judge Bazelon laid down a test under which a defendant was to be held not responsible "if his unlawful act was the product of mental disease or mental defect." 214 F.2d at 874. This was an adaptation of a rule which had previously existed solely in New Hampshire, and which had developed under the influential work of Dr. Ray. State v. Pike, 49 N.H. 399 (1870). While Durham represents a courageous attempt to state a modern standard of responsibility, certain deficiencies were encountered in its administration. For example, the use of the term "product" created difficult problems of causation.[20/] And as Judge (now Chief Justice) Burger complained, concurring in Blocker v. United States, 288 F.2d 853, 860 (D.C. Cir. 1960), the test in many cases put the legal determination in the hands of psychiatric witnesses rather than judge and jury. Finally, in Washington v. United States, 390 F.2d 444 (D.C. Cir. 1967), Judge Bazelon noted certain shortcomings of the Durham test, in that it allowed the psychiatrist to make too many legal and moral judgments which should be within the province of the jury. In substance, he appears to have acceded at least partially to the view of Judge Burger that psychiatrists should no longer be permitted to render an opinion on whether the act was a "product" of mental disease. A lengthy form of instruction was adopted to clarify the respective functions of expert

20/ Weihofen, "The Flowering of New Hampshire," 22 U. of Chi. L. Rev. 356, 360 (1955).

witness and jury.

Shortly after the Durham rule was announced, the American Law Institute promulgated a draft rule on this subject. This rule represents the collective efforts of some of the leading thinkers in this field. After nine years of research and consideration, the proposed rule was stated as follows:

> "(1) A person is not responsible for criminal conduct if at the time of such conduct as a result of mental disease or defect he lacks substantial capacity either to appreciate the wrongfulness of his conduct or to conform his conduct to the requirements of law.
>
> "(2) The terms 'mental disease or defect' do not include an abnormality manifested only by repeated criminal or otherwise anti-social conduct."
>
> A.L.I. Mod. P. Code §4.01 (final draft) (1962).

Since then this test, or some variant of it, has met with increasing judicial acceptance, particularly in the federal courts. In a luminous opinion by Judge Kaufman, the Second Circuit adopted the test in United States v. Freeman, 357 F.2d 606 (2nd Cir. 1966). Chief Judge Haynsworth adopted it for the Fourth Circuit in United States v. Chandler, 393 F.2d 920 (4th Cir. 1968) (en banc), and the Ninth Circuit has now embraced it in Wade v. United States, 426 F.2d 64 (9th Cir. March, 1970)(en banc). The M'Naghten test has now been overthrown in all but the First Circuit.[21] These

21/ In addition to the above cited cases, see United States v. Currens, 290 F.2d 751 (3rd Cir. 1961); Blake v. United States, 407 F.2d 908 (5th Cir. 1969) (en banc); United States v. Smith, 404 F.2d 720 (6th Cir. 1968); United States v. Shapiro, 393 F.2d 680 (7th Cir. 1967) (en banc); Pope v. United States, 372 F.2d 710 (8th Cir. 1967) (en banc), vacated on other grounds, 392 U.S. 651 (1968); Wion v. United States, 325 F.2d 420 (10th Cir. 1963) (en banc), cert. denied, 377 U.S. 946 (1964). While not all of these cases embrace the A.L.I. test totally, they reject the

cases contain excellent disquisitions on the M'Naghten rule, its deficiencies, and the legal and psychiatric framework underlying the A.L.I. test. As Chief Judge Haynsworth said of the A.L.I. test:

> "With appropriate balance between cognition and volition, it demands an unrestricted inquiry into the whole personality of a defendant who surmounts the threshold question of doubt of his responsibility. Its verbiage is understandable by psychiatrists; it imposes no limitation upon their testimony, and yet, to a substantial extent, it avoids a diagnostic approach and leaves the jury free to make its findings in terms of a standard which society prescribes and juries may apply. [Footnotes omitted.]" United States v. Chandler, supra, at 926.

This wide acceptance of the American Law Institute test is significant. I believe that this formulation affords a workable standard, permitting realistic expert testimony about the personality and characteristics of the defendant as a whole man, but leaving to the court and jury the ultimate legal pronouncement. It avoids many of the problems encountered under the Durham rule.

No verbal formulation of this standard can achieve perfection, as there may always be doubt about the application of general terms to marginal situations. Yet the American Law Institute standard, in the view of many, does represent the best in current thinking on this subject. It is the standard

---

21/ [cont'd] M'Naghten rule and include a test whereby the effect of mental illness on one's capacity to conform his conduct to law is stressed. Judge (now Chief Justice) Burger, in his separate concurring opinion in Blocker v. United States, 288 F.2d 853 (D.C. Cir. 1960), laid great emphasis on a test which would focus on the relationship between mental illness and one's capacity to refrain from wrongdoing.

which should be employed in Alaska.[22] I regard it unfortunate that we are not taking this step today.

II

Appellant has raised the question of where the burden of proof should be placed in these cases. In Chase v. State, supra, this court adopted the rule that the burden was on the defendant to establish his insanity by a preponderance of the evidence. Approximately one-half of the states follow this rule.[23] But in the rest of the states, and in the federal

---

22/ The standard need not be frozen entirely within only one rigid form of words. In appropriate cases the testimony might require some amplification of the test in the instructions to the jury. Nor is this an occasion to consider the undue resort to diagnostic labels and conclusionary medical terms which plagued the court under the Durham rule and which the court sought to limit in Washington v. United States, 390 F.2d 444 (D.C. Cir. 1967). Hopefully, care would be taken to see that experts explain such labels and terms in language understandable to the jury.

courts, the accused need only show some evidence of insanity. The prosecution must then prove his sanity beyond a reasonable doubt.[24/]

Those who place the burder of establishing sanity on the defendant usually argue that this accords with the presumption of sanity. Because there is a presumption, it is said that the prosecution should not be put to proving that which normally is not imposed upon it. But under the federal rule, the presumption of sanity is still employed. It is operative until some evidence is produced which adequately brings into issue the sanity of the defendant. The presumption then disappears and the mental capacity of the defendant to commit the crime becomes an essential element, to be proved beyond a reasonable

Barry, 92 N.W. 809 (N.D. 1902); New Hampshire, State v. Bartlett, 43 N.H. 224 (N.H. 1861); New Mexico, State v. Roy, 60 P.2d 646 (N.M. 1936); New York, People v. Kelley, 99 N.E. 2d 552 (N.Y. 1951); Oklahoma, Whisenhunt v. State, 279 P.2d 366 (Okla. 1954); South Dakota, State v. Waugh, 127 N.W.2d 429 (S.D. 1964); Tennessee, Jordan v. State, 135 S.W. 327 (Tenn. 1911); Utah, State v. Green, 40 P.2d 961 (Utah 1935); Wisconsin, State v. Esser, 115 N.W.2d 505 (Wis. 1962); Wyoming, State v. Pressler, 92 P. 806 (Wyo. 1907). The District of Columbia also follows this rule: Jones v. United States, 284 F.2d 245 (D.C. Cir. 1960). See 17 A.L.R.3d 146 (1968).

doubt, like any other.[25/]

It has been said that the burden of establishing insanity should be placed on the accused because sanity is not an element of the offense but a quality of the one who commits it. Chase v. State, supra, at 1003. But this overlooks the important consideration that once sanity is in issue it is a fact to be established like any other ultimate fact essential to culpability. The United States Supreme Court made this plain in Davis v. United States, 160 U.S. 469 (1895), when it said:

> "No man should be deprived of his life under the forms of law unless the jurors who try him are able, upon their consciences, to say that the evidence before them, by whomsoever adduced, is sufficient to show beyond a reasonable doubt the existence of every fact necessary to constitute the crime charged." (Emphasis supplied.) 160 U.S. at 493.

Realistically speaking, when sanity is an issue, it is not only a major element of the criminal proof, it may be the central factual issue in the case. For that matter, it may be the only issue. Logically, sanity is an essential element of a crime because mens rea is a necessary primary factor. If insanity exists at the time of the criminal act, mens rea fails, there is

---

25/ Fitts v. United States, 284 F.2d 108 (10th Cir. 1960). There the court said:

> "When, however, evidence of insanity is produced, from whatever source, the presumption of sanity disappears, and the mental capacity of the accused to commit the crime becomes an essential element to be proved by competent evidence beyond a reasonable doubt." 284 F.2d at 112.

This is the general rule which is followed in approximately one-half or more of the jurisdictions of the United States.

no jointure of act and intent, and under the traditional analysis no crime has been committed. As Mr. Justice Frankfurter noted, dissenting in Leland v. Oregon, 343 U.S. 790, 803 (1952):

> "Even though a person be the immediate occasion of another's death, he is not a deodand to be forfeited like a thing in the medieval law. Behind a muscular contraction resulting in another's death there must be culpability to turn homicide into murder."

Placing the burden on the prosecution has substantial advantages. First, it accords with the presumption of innocence and the thesis that the accused need not undertake to prove anything in a criminal case.[26/]

An additional advantage is that the jury is not given the confusing task of juggling two different burdens, each of which carries a different standard. This anomaly is pointed out by Professor McCormick:

> "Thus it seems inconsistent to demand as to some elements of guilt, such as an act of killing, that the jury be convinced beyond a reasonable doubt, and as to others, such as duress or capacity to know right from wrong, the jury may convict though they have such doubt. Accordingly, the recent trend both in English and American decisions is to treat these so-called matters of defense as situations wherein the accused will usually have the first burden of producing evidence in order that the issue be raised and submitted to the jury, but at the close of the evidence the jury must be told that if they have a reasonable doubt of the fact on which the justification is based they must acquit." McCormick, Evidence § 321, p. 684 (1954). (Footnote omitted.)

26/ As a practical matter the accused often must undertake to adduce proof of insanity if he is to prevail in creating a reasonable doubt on the whole evidence.

There are also important aspects of constitutional policy to be weighed in the balance. It has been held unconstitutional to shift the burden of persuasion on the defense of alibi to the accused. Stump v. Bennett, 398 F.2d 111 (8th Cir. 1968) (en banc), and cases cited therein. This may or may not represent some future trend. But when it comes to shifting burdens, there is not much difference between proof that a defendant was physically present, and not elsewhere, at the commission of a crime, and that he was "mentally present," in the sense that he was sane.

Lastly, the experience of the federal courts, in their treatment of the burden of persuasion, is of value. The federal courts have worked under the rule of Davis v. United States, supra, since 1895, and have not found it a handicap in effecting criminal justice. In my view, when sanity is in issue, the burden of persuasion should be upon the prosecution to establish the sanity of the accused beyond a reasonable doubt.

III

In fairness, to avoid surprise, the prosecution should be entitled to notice that it must adduce evidence of the defendant's sanity. Because the mental status of an accused, in terms of sanity, is usually not in issue in a criminal prosecution, it would be an unfair burden to require the state invariably to guess at whether this issue might be raised at trial, and possibly to prepare on this issue, only to have it not raised at all. Nor is it fair for defendants to wait in

ambush until trial to inject the sanity issue as a surprise tactic.

Therefore, if we were to alter our insanity rules, we should also change our procedural rules to require that at the time of plea, or within a certain number of days thereafter, one intending to raise the issue of insanity at his trial must specially plead that he was insane at the time he committed the act charged.

For the reasons given I would reverse and remand for a new trial.

STATE OF ALASKA
THE LEGISLATURE
LEGISLATIVE AFFAIRS AGENCY

POUCH Y - STATE CAPITOL
JUNEAU, ALASKA 99801

January 27, 1971

MEMORANDUM

TO: Rep. William J. Moran, Chairman
House Judiciary Committee

FROM: Arthur H. Peterson AHP
Revisor of Statutes

SUBJECT: HB-47, felony-murder, insanity and mens rea

I.

You will find attached as Appendix A a draft of a committee substitute for HB-47, adopting an "aggravated offense" approach as an alternative to the broad, common law felony-murder doctrine, as requested by the committee. (Regarding the present Alaska law, see Gray v. Alaska, 463 P 2d 897 (Alaska, 1970).) Concerning four basic purposes of the criminal law -- deterrence, punishment ("an eye for an eye"), rehabilitation, and isolation -- the felony-murder doctrine appears quite inadequate with regard to the first (because, even if the gas station robber, for example, knowsthe law, it is usually not his intent that anybody be killed in connection with the robbery), it is unnecessary and frequently results in great injustice with regard to the second (as illustrated during earlier committee discussions), it appears to be irrelevant to the third, and while it results in isolating the defendant from the community it often does so without benefit to the community and without justice to the defendant.

In 1968 the legislature provided for an additional penalty if a firearm is used or carried during the commission of specified offenses. As a further deterrent to the use of weapons in the commission of these offenses, sec. 3 of the committee substitute changes "firearm" to read "dangerous weapon". (Regarding the latter, see Berfield v. Alaska, 458 P 2d 1008 (Alaska, 1969) and Ransom v. Alaska, 460 P 2d 170 (Alaska, 1969).)

Note that sec. 3 goes so far as to impose the additional penalty for merely carrying the weapon. In light of the Berfield and Ransom cases, supra, holding that boots on a person's feet may be considered dangerous weapons, the committee may wish to consider again whether it wants to make this change in AS 11.15.295.

HB-47

Also, see Whitton v. Alaska, 479 P 2d 302 (Ak. 1970)

Sec. 1 of the committee substitute deals specifically with the case of a reasonably foreseeable death occurring during the commission of or attempt to commit specified offenses and in which situation the offender is not guilty under the provisions on first degree murder, second degree murder, manslaughter or negligent homicide. (See Appendix B, which sets out the text of those provisions, along with various assault provisions and the section on carrying or using a firearm during the commission of certain crimes.)

Sec. 2 deletes the felony-murder concept from the first degree murder provision. It also deletes the specific reference to poison, on the understanding that it is not necessary to enumerate the means of effecting the killing and that use of poison is just one means. And it deletes the somewhat anomolous reference to "sound memory and discretion" appearing in the present wording of the provision. (See Item 7 on page 3 of the attached Appendix C, which is a memorandum from Don Craddick, the Assistant Public Defender for Juneau, to Herbert Soll, the Alaska Public Defender.) However, this section does not delete the word "deliberate", as the committee had requested. Upon reading the annotations under AS 11.15.010 and the definition of the word in Black's Law Dictionary (4th Edition, 1957), it appears to have some merit in that section, being something more than simply a repetition of the concepts embodied in "purposely" and "premeditated malice". Appendix C presents a summary of Mr. Craddick's January 16 testimony before the committee, and is helpful in understanding felony-murder and the attached committee substitute.

II.

Black's Law Dictionary (4th Edition, 1957) defines "mens rea" simply as "A guilty mind; a guilty or wrongful purpose. Guilty knowledge and wilfulness. United States v. Greenbaum, C.C.A.N.J., 138 F. 2d 437, 438." Related to the idea of the "guilty mind" is insanity -- a condition usually thought to preclude formation of the guilty mind and, when made an issue in a criminal proceeding, is usually raised as a defense to the charge. Thus the legal system is faced with the task of establishing criteria for determining insanity. The 1962 Annual Survey of American Law (at page 72) describes the Alaska Supreme Court's efforts in establishing the criteria in Chase v. Alaska, 369 P 2d 997 (Alaska, 1962): "Our next to newest state, Alaska, had the opportunity to choose any test it desired, without the fetters of case precedent. It chose a test no one could have foreseen. M'Naghten plainly exculpates a defendant who does not know the nature and quality of his act or the wrongfulness of his act. Alaska's highest court ... concluded that the defendant cannot be exculpated unless both his knowledge of the nature and quality of the act and his knowledge of the wrongfulness of the act are obliterated." (Emphasis in original.)

The dissenting opinion of Justice Connor in Pope v. Alaska, Ak. Sup. Ct. Opin. No. 660 (Dec. 21, 1970), presents a good explanation and historical review of mens rea and the defense of insanity, and

there is no need for a repetition of that here. (And since you distributed copies of the case to all committee members it is not attached to this memorandum.) At page 13 of his dissent, Justice Connor indicates his preference for the American Law Institute's Model Penal Code insanity-defense formulation because it "affords a workable standard, permitting realistic expert testimony about the personality and characteristics of the defendant as a whole man, but leaving to the court and jury the ultimate legal pronouncement." See Mod. P. Code, sec. 4.01, quoted at page 12 of the dissent.

Norval Morris and Gordon Hawkins, in their The Honest Politician's Guide to Crime Control (Univ. of Chicago Press, 1970), rather persuasively offer a different approach -- abolish the insanity defense altogether. Pages 174 -- 185 of their book are attached as Appendix D. Their point calls to mind the comments of Justice Connor at page 16 of his dissent, where he discusses the question of who has the burden of proof on the sanity issue. He states "... once sanity is in issue it is a fact to be established like any other ultimate fact essential to culpability. *** Logically, sanity is an essential element of a crime because mens rea is a necessary primary factor. If insanity exists at the time of the criminal act, mens rea fails, there is no jointure of act and intent, and under the traditional analysis no crime has been committed." However, whereas Justice Connor, agreeing with Justice Frankfurter's statement that "Behind a muscular contraction resulting in another's death there must be culpability to turn homicide into murder.", apparently would view a successful insanity defense as exculpating the defendant, Prof. Morris and Mr. Hawkins introduce the term "insane mens rea" (at page 180, stating that it is not a contradiction in terms) and argue for the greater justice (practically and morally) of their approach. A summary here could not do justice to their theory, and a close, critical reading of Appendix D is suggested.

The majority of the Alaska Supreme Court in the Pope case refused to decide the insanity issues, and we are left with the rule of the Chase case unless the legislature resolves the matter -- perhaps along the lines of the American Law Institute approach (as suggested by Justice Connor) or perhaps along some other lines. The Morris-Hawkins book and the Model Penal Code, as well as other materials, are available to committee members wishing to study the matter. A bill will be prepared at the committee's request.

IN THE HOUSE BY THE JUDICIARY COMMITTEE

CS FOR HOUSE BILL NO. 47

For an Act entitled: "An Act relating to first degree murder and crimes involving dangerous weapons; and providing for an effective date."

BE IT ENACTED . . .

* Section 1. AS 11.05 is amended by adding a new section to read:

Sec. 11.05.160. ADDITIONAL PENALTY FOR CERTAIN OFFENSES. If a person is killed during the commission of or the attempt to commit arson, burglary, kidnapping, rape, or robbery, and the killing is a reasonably foreseeable consequence of the crime, the person committing or attempting to commit the crime is punishable by imprisonment for not more than five years in addition to the penalty specified for the crime. This provision does not apply if the person committing or attempting to commit a crime listed in this section has violated AS 11.15.010, 11.15.030, 11.15.040, or 11.15.080, and is punishable under one of those sections.

* Sec. 2. AS 11.15.010 is repealed and re-enacted to read:

Sec. 11.15.010. FIRST DEGREE MURDER. A person is guilty of first degree murder if he kills another person purposely, deliberately and with premeditated malice. A person who is convicted of first degree murder shall be sentenced to imprisonment for not less than 20 years to life.

* Sec. 3. AS 11.15.295 is amended to read:

Sec. 11.15.295. USE OF DANGEROUS WEAPON /FIREARM/ DURING THE COMMISSION OF CERTAIN CRIMES. A person who uses or carries a

dangerous weapon /FIREARM/ during the commission of a robbery, assault, murder, rape, burglary, or kidnapping is guilty of a felony and upon conviction for a first offense is punishable by imprisonment for not less than 10 years. Upon conviction for a second or subsequent offense in violation of this section, the offender shall be imprisoned for not less than 25 years.

Sec. 11.15.010. First degree murder. A person who, being of sound memory and discretion, purposely, and either of deliberate and premeditated malice or by means of poison, or in perpetrating or in attempting to perpetrate, rape, arson, robbery, or burglary kills another, is guilty of murder in the first degree, and shall be sentenced to imprisonment for not less than 20 years to life. (§ 65-4-1 ACLA 1949; am § 4 ch 132 SLA 1957; am § 5 ch 43 SLA 1964; am § 4 ch 68 SLA 1965)

Sec. 11.15.030. Second degree murder. Except as provided in §§ 10 and 20 of this chapter, a person who purposely and maliciously kills another is guilty of murder in the second degree, and shall be sentenced to imprisonment for a term of not less than 15 years to life. (§ 65-4-3 ACLA 1949; am § 7 ch 43 SLA 1964; am § 6 ch 68 SLA 1965)

Sec. 11.15.040. Manslaughter. Except as provided in §§ 10—30 of this chapter, a person who unlawfully kills another is guilty of manslaughter, and is punishable by imprisonment in the penitentiary for not less than one year nor more than 20 years. (§ 65-4-4 ACLA 1949; am § 8 ch 43 SLA 1964)

Sec. 11.15.080. Negligent homicide. Every killing of a human being by the culpable negligence of another, when the killing is not murder in the first or second degree, or is not justifiable or excusable, is manslaughter, and is punishable accordingly. (§ 65-4-8 ACLA 1949)

Sec. 11.15.160. Assault with intent to kill or commit rape or robbery. A person who assaults another with intent to kill, or to commit rape or robbery upon the person assaulted, is punishable by imprisonment in the penitentiary for not more than 15 years nor less than one year. (§ 65-4-16 ACLA 1949)

Sec. 11.15.190. Assault while armed. A person who assaults, or assaults and beats another with a cowhide, whip, stick or like thing, having at the time in his possession a pistol, dirk, or other deadly weapon, with intent to intimidate and prevent the other person from resisting or defending himself, is punishable by imprisonment in the penitentiary for not more than 10 years not less than one year. (§ 65-4-19 ACLA 1949)

Sec. 11.15.200. Careless use of firearms. (a) A person who intentionally, and without malice, points or aims a firearm at or toward a person, or discharges a firearm so pointed or aimed at a person, or points and discharges a firearm at or toward a person or object without knowing the identity of the object and maims or injures a human being, is guilty of the careless use of firearms, and upon conviction is punishable by a fine of not more than $1,000, or imprisonment for not more than one year, or by both.

(b) If death ensues from the maiming or injuring, the person discharging the firearm may, in the discretion of the prosecuting officer or grand jury, be charged with the crime of manslaughter.

(c) This section does not apply to a case where firearms are used in self-defense or in the discharge of official duty, or in case of a justifiable homicide. (§ 65-4-20 ACLA 1949)

Sec. 11.15.220. Assault with dangerous weapon. A person armed with a dangerous weapon, who assaults another with the weapon, is punishable by imprisonment in the penitentiary for not more than 10 years nor less than six months, or by imprisonment in jail for not more than one year nor less than one month, or by a fine of not more than $1,000 nor less than $100. (§ 65-4-22 ACLA 1949)

Sec. 11.15.230. Assault and assault and battery. A person not armed with a dangerous weapon, who unlawfully assaults or threatens another in a menacing manner, or unlawfully strikes or wounds another, is punishable by a fine of not more than $500, or by imprisonment in a jail for not more than six months, or by both. (§ 65-4-23 ACLA 1949)

Sec. 11.15.295. Use of firearms during the commission of certain crimes. A person who uses or carries a firearm during the commission of a robbery, assault, murder, rape, burglary, or kidnapping is guilty of a felony and upon conviction for a first offense is punishable by imprisonment for not less than 10 years. Upon conviction for a second or subsequent offense in violation of this section, the offender shall be imprisoned for not less than 25 years. (§ 1 ch 144 SLA 1968)

APPENDIX C

MEMORANDUM State of Alaska

TO: Herbert D. Soll
Public Defender
Anchorage

DATE : January 18, 1971

SUBJECT: House Bill 47
(First Degree murder;
amendment to A.S. 11.15.101)
DD

FROM: Donald L. Craddick
Assistant Public Defender
Juneau

Friday, January 15, I received a call from the secretary of the House Judiciary Committee, Mrs. Mason (586-1303) who advised that the committee was holding a hearing on House Bill 47 Saturday morning at 10:00 a.m. and wished to have someone present from the Public Defender Agency to present the position of that agency with reference to the bill. I tried to reach you on this matter, but my call to the Anchorage office was not returned.

Saturday morning I appeared before the committee, which is chaired by Representative William Morran. I advised the committee that as I had not been able to contact the Anchorage office, I was not presenting an official position of the Public Defender Agency on the bill but would be glad to give my views as an Assistant Public Defender if they were interested. They were, and we then proceeded, for approximately 45 minutes, to discuss the following aspects of the bill:

1. The bill was generated by the Alaska Supreme Court decision in Gray v. Alaska, (Jan. 16, 1970) 463 P. 2d 897 and by strong public opinion as a result of two recent incidents in Anchorage involving shootings during armed robberies. (Mr. Colletta, sponsor of the bill, was present and advised that these were the reasons for the bill being introduced.)

2. The bill removes the "purposeful" killing requirement for there to be a felony murder. I advised that if the felony murder concept is to be retained, then this is a good aspect of the bill as homicides occurring during the commission of felonies are accidental (the felon never having intended any such occurrence); more over, whenever a "purposeful" killing can be shown there is true murder without having to resort to the felony murder concept.

3. This bill removes the requirement that the killing be performed by the person ultimately charged as the felony murderer. I advised that this would be in keeping with the standard felony murder concept.

4. This bill enlarges the category of crimes to be included under the felony murder rule by adding escape and lewd or lascivious acts toward a child. In this regard we discussed the matter of crimes which should be covered: namely, those involving inherently dangerous acts. It was pointed out that an escape from prison could be such an act but hardly so if performed by a person who merely ran away from a police officer who had just made an arrest and where no violence or remote possibility of violence was involved; also, the absurd lewd or lascivious act possibilities were illustrated by committee member Mike Rose who pointed out that a child frightened by an exhibitionist might run out into a street and be killed by a passing car, which could result in a first degree murder charge being brought against the exhibitionist.

5. I argued against retention of the felony murder concept in the State of Alaska on the grounds that it did not serve any salutary purpose and could lead to absurd results. I gave the following illustrations:

   A. The get-away car driver (outside in the street) in an armed robbery situation who could be charged with first degree murder if a store owner shot down his cohort (in the store) in armed robbery. Note: This is an actual case which was handed down by the California Supreme Court in Taylor v. Superior Court (Dec. 1970). (See the Criminal Law Reporter, Volume 8, Pg. 1049, 2216-2217.) I left a copy of this decision with the committee.

   B. The bank robber who could be charged with first degree murder if a bank guard shot at him and killed an innocent bystander.

6. I suggested that if the legislature nonetheless felt it desirable to direly punish a person involved in a crime when the commission of that crime led in a natural dequence of events to the dealth of another person, then they could use an "aggrevated crime" approach---perhpas something as simple as adding additional years on the sentence in such a situation. The precedent for this could be the recently enacted gun laws which add additional penalties when a fire arm is used in

connection with a crime. (For example: see Alaska Statute 11.15.295)

In this regard, however, I advised the committee that they should bear in mind that there is a very strong doubt that any legislation such as the felony murder rule or even an aggrevated crime approach would act as a deterent to homocides during the perpetration of felonies; the reason being that it is one thing to deter an intentional act, such as the carrying of a fire arm, but entirely another to try to deter an event which was never intended to happen in the first place but happened because things got out of hand.

7. The last aspect of the bill considered was the deletion by the bill of the language contained in the present first degree murder statute that the person involved must be of "sound memory and discretion" before he is guility of any kind of first degree murder.

I made the following comments on this:

a. The phrase which is usually used in a civil context, such as the drafting of wills, has no place in the criminal laws dealing with insanity.

b. This language actually makes it possible for a person who is not insane even under the most liberal rule (Durham) to avoid a conviction of first degree murder.

c. Therefore, what is needed is a statute governing criminal responsibility in all cases and denotes the test of insanity to be applied.

You will be pleased to know that the committee appeared to be in agreement with this and is going to undertake to write up such a statute. The committee did not seem to be too taken with the McNaughton test of knowing right and wrong and seemed to be disturbed over Alaska's even more stringent rule as set forth in the Chase v. Alaska case (1962) 369 P 2d 997.

The committee chairman referred the committee to the recent decision in Pope v. Alaska (Dec. 21, 1970) Opinion 660, File 1127, in which Justice Conner, in the dissent, reviews and criticizes the development of Alaska's present law of insanity and emphasizes the desirability of adopting the American Law Institute Model Penal Code Provision, Sec. 4.01 (final draft 1962)....see page 12 of the Pope decision, wherein this test is set out verbatim.

I suggested to the committee that one of the contributing factors which might have led to the Chase decision could be (though it is not discussed in the opinion) the lack of facilities in Alaska to care for the insane should a less stringent rule apply in Alaska and should there be a result in the increase in the number of persons needing institutionalization.

You might consider writing to the committee as Public Defender should you wish to have the agency take a position on this bill. It seems to me it would be very ehlpful if the agency were also to take a position or make recommendations with reference to the legal test of insanity. We need not necessarily go as far as the Durham rule, but it is certainly time to move beyond the almost medieval concept of the McNaughton tests. Of the present alternatives I favor the American Law Institute approach.

DONALD L. CRADDICK

Norval Morris and Gordon Hawkins

the honest politician's guide to crime control

The University of Chicago Press • Chicago and London

The accused is, we are informed, "psychotic," and should therefore not be convicted of a crime. Further, though "acquitted" because of his mental illness, he is "dangerous" and should therefore be detained until he is both "cured" of his malady and no longer "dangerous." Lewis Carroll, in *Through the Looking-Glass*, offered a fine commentary on the superficialities involved in such a traditional response to the psychologically disturbed offender:

> "What sort of insects do you rejoice in, where *you* come from?" the Gnat inquired.
>
> "I don't *rejoice* in insects at all," Alice explained, "because I'm rather afraid of them – at least the large kinds. But I can tell you the names of some of them."
>
> "Of course they answer to their names?" the Gnat remarked carelessly.
>
> "I never knew them to do it."
>
> "What's the use of their having names," the Gnat said, "if they won't answer to them?"
>
> "No use to *them*," said Alice; "but it's useful to the people that name them, I suppose. If not, why do things have names at all?"

Our program on crime and the psychiatrist is designed both to eliminate our present futile name-calling from the criminal justice system and to engage the psychiatrist in the treatment of certain dangerous criminals, a task he now eschews. We achieve these results by three ukases:

1. The defense of insanity shall be abolished. The accused's mental condition will be relevant to the question of whether he did or did not, at the time of the crime, have the *mens rea* of the crime of which he is charged. His mental condition will, of course, also be highly relevant to his sentence and his correctional treatment if he is convicted.
2. High priority shall be accorded to research aimed at the definition of social dangerousness and the development of prediction tables designed to deal with the "dangerous," psychologically disturbed offender.
3. Special institutions for the treatment of "dangerous" psychologically disturbed offenders, on the lines set out in this chapter, shall be established in all states.

The vast literature dealing with psychiatric or psychoanalytic criminology ranges from detailed studies of particular cases to attempts to explain all criminal behavior in terms of psychopathy. Yet apart from providing a profusion of new labels the practical contribution that psychiatry has made to the problems of defining and treating the offender is very limited. This is in part, but by no means entirely, the fault of psychiatrists themselves. There is no doubt, however, that the leaders in corrections and in criminal law policy accord the psychiatrist a slim role indeed in treating the behavior disorders that come to the courts, the prisons, and other correctional agencies. The slight attention given to the role of the psychiatrist in the report of the President's Crime Commission, *The Challenge of Crime in a Free Society*, and in the same commission's task force report on corrections, is recent testament to this neglect. Let us be clear about this. We are not suggesting that the judges, academic and practicing lawyers, correctional administrators, and criminologists prominent in the criminal justice system are reactionary, or that they fail to keep up with the literature in the social sciences; their attitude to psychiatry is not usually one of ignorance, it is rather a thoughtful rejection. They see psychiatrists, as too frequently psychiatrists see themselves, merely as diagnosticians, classifiers, separating out from the bulk of criminal offenders those whose psychological disturbance is at the level of psychosis. Where, it is asked, are psychiatrists successfully treating criminal offenders? The psychiatrist is useful, it is agreed, in classification and in staff training, but he is not seen as a serious ally in the correctional process.

We do not share this view. We believe there has been gross failure both by leading forensic psychiatrists and by those responsible for the criminal justice system sufficiently to mobilize psychiatric resources for the prevention and treatment of crime. We believe part of the fault lies in our national monomania, our *folie à collective*, concerning criminal responsibility and the defense of insanity. This has distracted us from many important tasks, two of which we shall deal with in this chapter – first, the task of defining the dangerous offender for sentencing and treatment purposes, and second, the task of better mobilizing psychiatric and other clinical resources for the treatment of such criminals. We believe these three themes – the defense of insanity, the definition of dangerousness, and the mobilization of clinical resources for the treatment of criminals who are dangerous and psychologically disturbed – are closely interconnected. The importance of all three issues must be recognized if the psychiatrist is to assist appreciably in efforts to protect the community and to treat the criminal.

Abolition of the Defense of Insanity

Rivers of ink, mountains of printers' lead, and forests of paper have been expended on an issue that is surely marginal to the chaotic problems of the effective, rational, and humane prevention and treatment of crime. We determinedly insulate ourselves from the realities we are facing – the role of psychological disturbance in criminality and the measures we might effectively and fairly use to deal with psychologically disturbed and dangerous criminals. We do not propose here to contribute to the wastage or to pursue the traditional minutiae. Our view is that the defense of insanity itself is moribund and should be interred. We are not suggesting amendments to the rules concerning fitness to plead; that issue is relevant to our present topic, but it is not one we now wish to consider.

The suggestion that the defense of insanity should be abolished is not original. Many authorities including Lady Barbara Wootton, Professor H. L. A. Hart, and Chief Justice Joseph Weintraub of New Jersey among others have advocated its abolition, though for diverse reasons and with diverse substitutes for it. We do not propose to marshal and analyze their reasons and their suggestions. We have put forward a ukase on this topic and we shall here advance some of the reasons underlying it, a few of which are not to be found in the writings of the authorities on this subject.

Why should there be a defense of insanity?

The question strikes deep into the social function of the criminal law. Over the years, we have found the traditional answers less and less convincing – such as the uncritical acceptance of what is by the Royal Commission on Capital Punishment:

> It has for centuries been recognized that, if a person was, at the time of his unlawful act, mentally so disordered that it would be unreasonable to impute guilt to him, he ought not to be held liable to conviction and punishment under the criminal law. Views have changed and opinions have differed, as they differ now, about the standards to be applied in deciding whether an individual should be exempted from criminal responsibility for this reason; but the principle has been accepted without question.

Or the answer in the American Law Institute's Model Penal Code:

> What is involved specifically is the drawing of a line between the use of public agencies and public force to condemn the offender by conviction, with resultant sanctions in which there is inescapably a punitive ingredient (however constructive we may attempt to make the process of correction) and modes of disposition in which that ingredient is absent, even though restraint may be involved. To put the matter differently, the problem is to discriminate between the cases where a punitive-correctional disposition is appropriate and those in which a medical-custodial disposition is the only kind that the law should allow.

Or that offered by Sir Owen Dixon:

> Now it is perfectly useless for the law to attempt, by threatening punishment, to deter people from committing crimes if their mental condition is such that they cannot be in the least influenced by the possibility or probability of subsequent punishment; if they cannot understand what they are doing or cannot understand the ground upon which the law proceeds.

Or that in the Durham case:

> Our collective conscience does not allow punishment when it cannot impose blame.

Our position, putting aside the difficult and important issue of fitness to plead – competency to be tried – is very simple. The accused's mental condition should be relevant to the question of whether he did or did not, at the time of the crime, have the *mens rea* of the crime of which he is charged. There should be no special rules of the M'Naughten or Durham types. The defense of insanity being abrogated, evidence of mental illness would be admissible on the *mens rea* issue to the same limited extent that deafness, blindness, a heart condition, stomach cramps, illiteracy, stupidity, lack of education, "foreignness," drunkenness, and drug addiction are admissible. In practice, such cases are rare, and they would remain rare were mental illness added to the list. There would not merely be a shifting of psychiatric testimony to the *mens rea* issue with the same problems as beset the courts which hear it in the defense of insanity. A quite different issue would be raised, and one traditionally within the competence of the

finder of fact. The convicted person's mental condition would, of course, be highly relevant to his sentence and to his correctional treatment if he were convicted.

Historically the defense of insanity made good sense. The executioner infused it with meaning. And in a larger sense, all criminal sanctions did so too, since they made no pretense of being rehabilitative. In the present context of the expressed purposes and developing realities of both the criminal justice system and the mental health system this defense is an anachronism. In the future, this defense would be not only anachronistic, it would be manifestly inefficient as well.

Let us offer a small statistical point before turning to the moral issue. In this country the defense of insanity is pleaded in about 2 percent of the criminal cases which come to jury trial. Overwhelmingly, of course, criminal matters are disposed of by pleas of guilty and trials by a judge sitting without a jury. Only the exceptional case goes to trial by jury. And of these exceptional cases, in only two of every hundred is this defense raised. In the United Kingdom, for the period on which the Royal Commission on Capital Punishment reported, the situation was very similar. The verdict of "guilty but insane" was returned, over a five-year period, in 19.8 percent of murder trials, whereas over the same period it was returned in only 0.1 percent of trials for other offenses. Does anyone believe that this measures the significance of gross psychopathology to crime? Let him visit the nearest criminal court or penitentiary if he does. Is not this defense clearly a sop to our conscience, a comfort for our failure to address the difficult arena of psychopathology and crime?

The practical difference between traditional tests of insanity and modern revisions was recently empirically tested. Various juries were given instructions based on the M'Naughten rules, the Durham test, and the following simple and uncluttered formula: "If you believe the defendant was insane at the time he committed the act of which he is accused, then you must find the defendant not guilty by reason of insanity." The juries failed to see any operative differences in the three instructions. Do we need to labor another century and a half to produce a mouse of such inconsequence?

Yet the moral issue remains central. Should we exculpate from criminal responsibility, or from "accountability" to use the preferable European concept, those whose freedom to choose between criminal and

lawful behavior has been curtailed by mental illness? It is too often overlooked that the exculpation of one group of "criminal actors" confirms the inculpation of others. Why not a defense of "dwelling in a Negro ghetto"? This defense would not be morally indefensible. Such an adverse social and subcultural background is statistically *more* criminogenic than is psychosis, and it also severely circumscribes the freedom of choice which a nondeterministic criminal law (and that describes all present criminal law systems) attributes to accused persons.

True, a defense of social adversity would be politically intolerable; but that does not vitiate the analogy for our purposes. Insanity, it is said, destroys, undermines, or diminishes man's capacity to reject the wrong and adhere to the right. So does the ghetto – more so. But surely, you might ask, you would not have us punish the sick? Indeed we would, if you insist on punishing the grossly deprived. To the extent that criminal sanctions serve punitive purposes we fail to see the difference between these two defenses; to the extent that they serve rehabilitative, treatment, and curative purposes, we fail to see the need for the difference. Some reply: it is not a question of freedom or morality, it is a question of stigmatization, and to this we shall return; but let us not brush aside the moral issue so lightly.

In Shavian terms: Vengeance is mine, saith the Lord – which means that it is not the Lord Chief Justice's! It seems to us clear that there *are* different degrees of moral turpitude in criminal conduct and that the mental health or illness of an actor is relevant to an assessment of that degree – as are many other factors in the social setting and historical antecedents of a crime. This does not mean, however, that society is obliged to measure any or all of these pressures for purposes of a moral assessment which will lead to conclusions concerning criminal responsibility.

In a few cases the question of moral irresponsibility is so clear that there is no purpose in invoking the criminal process. The example of accident, in its purest and least subconscious accident-prone form, is a situation where there is little utility in invoking the criminal process. The same is true of a person who did not know what he was doing at the time of the alleged crime. But to exculpate him there is no need for the M'Naughten or Durham rules for he falls clearly within general criminal law exculpatory rules. He simply lacks the *mens rea* of the crime. Thus, it seems to us that all we need to achieve within the

area of criminal responsibility and psychological disturbance is already achieved by existing and long-established rules of mental intent and crime, and we would allow a sane or insane *mens rea* to suffice for guilt.

Perhaps an example of this principle may help. The *Hadfield* case will serve our purpose admirably. Hadfield had been severely wounded in the head in the Napoleonic wars and subsequently decided that it was necessary for the salvation of the world that he kill George III. He equipped himself with a blunderbuss and secreted himself in the Drury Lane Theatre in a position from which he hoped to shoot George III as he waddled into the royal box. Hadfield saw the flabby creature in the royal box and discharged his blunderbuss in the direction of the king, unfortunately missing him.

There was no doubt of Hadfield's brain damage or of his psychosis, his gross psychological disturbance. He did, however, clearly intend to kill the king. He had the insane *mens rea* of murder, and indeed of treason. We do not regard the phrase "insane *mens rea*" as a contradiction in terms. Had his psychological disturbance led him to think that he was discharging the blunderbuss to start the performance on the stage, or to burst a balloon, he would have lacked the *mens rea* of murder and of treason. But he saw himself as sacrificing himself for the good of the world -- and he may not have been far wrong. We do not deplore the fact that Hadfield was held to be not guilty on the grounds of insanity. We do, however, maintain that there would be no greater injustice involved in convicting in such a case and applying the psychological diagnosis to the decision how to treat the offender than in convicting in any of the other thousands of cases that daily flow through our criminal courts.

Clearly the crucial question in this context is: what are the consequences of the defense of insanity? Is there an operative difference between peno-correctional and psychiatric-custodial processes which renders benefit to the accused who is found not guilty on the grounds of insanity? To this important inquiry we offer two replies. First, the differences if they exist are marginal; and second, the defense of insanity is an extraordinarily inefficient mechanism of deciding on the allocation of psychiatric treatment resources.

The American Law Institute's recommended modification of the M'Naughten rules in its Model Penal Code was accompanied by a recommendation requiring the indeterminate commitment of those found not guilty by reason of insanity. Likewise, within a month of the adoption of the Durham rules in the District of Columbia, Congress provided that being found not guilty on the grounds of insanity should be followed, mandatorily, not in the discretion of the court, by indeterminate commitment to Saint Elizabeth's Hospital until such time as the person so committed could meet the requirements that he prove, beyond reasonable doubt, his freedom from "any abnormal condition" and that he is not likely to repeat the act which resulted in his insanity acquittal. Dr. Winfred Overholser, the late superintendent of the mental hospital to which the recipients of this benevolence in the District of Columbia are sent, put the matter precisely: "The notion that a verdict of not guilty by reason of insanity means an easy way out is far from the truth. Indeed the odds favor such a person spending a longer period of confinement in the hospital than if the sentence was being served in jail."

Facilities and practice differ from country to country, and in this country from state to state. The point we wish to stress is that it is error to *assume* benevolence and to assume that there are more psychiatric treatment resources, better physical conditions, and earlier release practices pursuant to a finding of not guilty on the grounds of insanity than pursuant to a conviction. It all depends. We know of systems where there are more facilities per patient for psychiatric treatment in the penitentiary holding psychologically disturbed prisoners than in the nearby state mental hospitals. Frequently the converse is true.

Let us offer a final point on the sometimes assumed benevolence of the defense of insanity. It is more than a straw in the wind, more than a suggestion that this is not a liberal, benevolent, humanely exculpating defense, when one finds the prosecution alleging at trial the insanity of the accused at the time of the crime while the defense urges his sanity; but this has occurred in both the United Kingdom and this country. Lady Barbara Wootton has discussed at least six cases in which "the witness called by the Crown to rebut evidence of diminished responsibility sought to establish that the accused was in fact insane." And in a judgment in the House of Lords, Lord Denning said: "The old notion that only the defense can raise a defense of insanity is now gone. The prosecution are entitled to raise it and it is their duty to do so rather than allow a dangerous person to be at large."

It might be suggested that our attack on the defense of insanity mis-

conceives the problem. The task of the law, it might be suggested, is mainly to protect the community, and the defense of insanity will indeed permit better psychiatric treatment and, if necessary, longer custodial supervision of the disturbed and dangerous criminal. Later in this chapter we shall deal with the definition and prediction of social dangerousness; in the meantime, it suffices to note that the defense of insanity started on moral premises different from this, and that the defense is both unnecessary and inefficient to achieve this protective purpose.

A more sophisticated critic might suggest that we are missing the point in a different way. Criminal processes are, he might say, public morality plays. They have deterrent purposes, perhaps, but they certainly aim dramatically to affirm the minimum standards of conduct society will tolerate. By public ceremonial and defined liturgy, criminal trials stigmatize those who fail to conform to society's standards. In short, the criminal justice system is a name-calling, stigmatizing, community superego reinforcing system. And, it could be urged, we should not stigmatize the mentally ill. They are mad not bad, sick not wicked; it is important that we not misclassify them. Is there a rebuttal to this defense of the defense of insanity? We believe there is – the fact of "double stigmatization."

Consider the question, Are psychologically disturbed criminals seen by prison authorities only as "criminal," and are the mentally ill who have committed or have been charged with crime seen only as "mentally ill" by the hospital authorities? Or are the former seen as "mentally ill criminals" and the latter as "criminal and mentally ill"? Are the systems separate or confused in the minds of the staff and of the "patients"? It is clear that some belief in the separateness and purity of the two systems infects the position of those who advocate retention of the defense of insanity. Yet the fact is that the prison authorities regard their inmates in the facilities for the psychologically disturbed as both criminal and insane, bad and mad; and the mental hospital authorities regard their inmates who have been convicted of crime or even arrested and charged with crime as both insane and criminal, mad and bad.

In mental hospitals the fact that an inmate was arrested for a crime seriously influences the date of his likely discharge. Note, it is an arrest without a conviction that has this effect. Likewise the conditions of incarceration in the psychiatric divisions of correctional systems are

frequently less desirable than elsewhere in the system and the chances of obtaining parole are substantially lower. The truth is that our present intellectually loose approach to this problem inflicts gratuitous extra suffering both on those who are categorized as criminal and mentally disturbed and those who are categorized as mentally disturbed and criminal. The police power of the state and the mental health power of the state are surely sufficient unto themselves, separately, to control questions of dangerousness and the upper limits of power over individual citizens. It is mutually corruptive and a potent source of injustice loosely and thoughtlessly to blend these two powers, and thus to gloss over in each the proper balance between state power and the freedom of the individual.

There is one concept common to both, the concept of social dangerousness. The problem for both the prison authorities and the mental health authorities is reasonably and effectively to make assessments of social dangerousness and to design a process by which that assessment can be fed into the releasing procedure. We do not facilitate this difficult task by making a porridge, a farrago, out of the two powers – the mental health power and the police power – and using this mess to avoid facing and trying to dispose of a genuinely difficult problem.

Thus, in terms neither of the morality of punishment nor of stigmatization is the defense of insanity now essential or operative. Similarly, it is neither a necessary nor effective principle around which to mobilize clinical resources for the rational treatment of the psychologically disturbed criminal actor. It is, however, in our view, a political issue of some difficulty and the politics are concerned with the stigmatizing role of the criminal law.

While the hangman, or in this country the fryman, and the capital punishment controversy lurk in the background, the issue of criminal irresponsibility in relation to homicide is intractable. Yet, in the five years 1964, 1965, 1966, 1967, and 1968, the number of executions in this country was, respectively, 15, 7, 1, 2, and 0. Our ukase on this matter does no more than hasten the inevitable. Moreover, when one looks at the pattern of capital punishment for murder in the world, it becomes clear that this is a rapidly declining sanction. We can reasonably exclude it from our consideration of the future. What remains then is the question of stigmatization of conduct as either wicked or the product of sickness, as either bad or mad. This difference in stigmatization may result in different treatments but the differences are neither

essential to our system of criminal justice nor necessarily involved in either our correctional or mental health systems. The essential difference is the difference of nomenclature, of overt public stigmatization.

For our part, we look toward a future in which moral outrage and name-calling will not so significantly influence our reaction to the behavior of others. This is a generation that despoils our natural resources and prepares to terminate human life on this planet; but if the ruination of our environment and the eliminating of our species are avoided, if aggressions are controlled in favor of decency and creativity, we do not believe that systems of justice in which name-calling and vengeance figure so prominently can long survive. If this be so, then the issue becomes one of how we can, as rapidly as the traffic will allow, destigmatize our criminal law processes.

There is a choice. We could follow the pattern of a gradual extension of the exculpatory and allegedly destigmatizing processes of the defense of insanity, opening it more and more widely to cover larger and larger slices of criminal conduct until most criminal behavior is encompassed. Many of those working in this field, men whom we respect, favor that engulfing process. We do not oppose their purpose; but we think their political judgment wrong. It seems to us that we should not make an artificial and morally unjustifiable exception to a false general rule and allow the exception to swallow the rule. It seems to us better to support the advance that is now taking place, certainly in theory and rhetoric, in the treatment of all criminal conduct, and to a degree in correctional practice. In other words, to put it aggressively, we think society will move faster toward a rational system of criminal justice through honesty than by self-deception; and we think it dishonest to creat an artificial, morally unjustifiable, practically ineffective exception to the general rules of criminal responsibility. We think the English judges went wrong in the nineteenth century and that it is time we got back to earlier and truer principles.

We find it impossible morally to distinguish the insane from others who may be convicted though suffering deficiencies of intelligence, adversities of social circumstances, indeed all the ills to which the flesh and life of man is prey. It seems to us that our approach better accords with the total role of the criminal law in society than does a system which makes a special exculpatory case out of one rare and unusual criminogenic process, while it determinedly denies exculpatory effects to other, more potent processes. In the long run we will better

handle these problems, as well as the whole and more complex problem of criminality in the community, if we will recognize that within crime itself there lies the greatest disparity of human wickedness and the greatest range of human capacities for self-control.

Our perennial perseverations about the defense of insanity impede recognition of this diversity, since they push us to a false dichotomy between the responsible and the irresponsible. They should be abandoned. One occupation for the energies thus released might be suggested, a task in which the psychiatrist has an important role to play: the defining of those categories of psychologically disturbed criminals who are serious threats to the community and to whom special treatment measures should therefore be applied.

On Defining and Predicting Dangerousness

The policeman, the prosecutor, the jury, the judge, the probation officer preparing a presentence report, the clinician in the diagnostic and classification center, the correctional officer planning the inmate's treatment and custody, the parole board and the parole officer — all, like it or not, must make predictions about the possible social dangerousness of the offender they confront. This is frequently a complex and difficult task to which psychiatric insights are often relevant. It involves at least two interacting issues: what kinds of behavior are sufficiently threatening to be called "dangerous" and with what degree of certainty must the prognosis establish the likelihood of recurrence of the kind or kinds of behavior designated "dangerous" and over what period of time?

The task of conceptualizing and providing methodologically sound processes for reaching decisions on these twin aspects of "dangerousness" is of central importance to the development of the criminal law. It is critical at every level of the criminal justice system. The report of the President's Crime Commission stresses the

> necessity for identifying those dangerous or habitual offenders who pose a serious threat to the community's safety. They include those offenders whose personal instability is so gross as to erupt periodically in violent and assaultive behavior, and those individuals whose long-term exposure to criminal influences has produced a thoroughgoing commitment to criminal values that is resistive of superficial efforts to effect change. . . .

F O R E W O R D

AS 24.20.065(a) requires the legislative council to examine annually administrative regulations, published opinions of state and federal courts and of the Department of Law that rely on state statutes, and final decisions adopted under the Administrative Procedure Act (AS 44.62) to determine whether or not

1) the courts and agencies are properly implementing legislative purposes;

2) there are court or agency expressions of dissatisfaction with state statutes;

3) the opinions or regulations indicate unclear or ambiguous statutes.

Under AS 24.20.065(b) the council is to make a comprehensive report of its findings and recommendations to the members of the legislature at the start of each regular session. The discussions on the following pages are not intended as in-depth analyses of the cases or issues involved, but merely present matters suggesting legislative action.

JOHN M. ELLIOTT
Executive Director

January 1972

A. ALASKA SUPREME COURT OPINIONS

This report is based on a review of Alaska Supreme Court Opinions Nos. 585, dated November 3, 1969, through 718, dated September 14, 1971, and No. 737, dated November 15, 1971.

(1) Harmon v. North Pacific Union Conference Association of Seventh Day Adventists, 462 P 2d 432 (Opin. No. 591, 12/15/69):

Facts. After its appeal to the Greater Anchorage Area Borough's board of equalization was denied, the appellee, a religious organization, brought an action against officials of the Greater Anchorage Borough and the borough itself, seeking a declaratory judgment that three parcels of residential property owned by the appellee were, under AS 29.-10.336, exempt from real property taxation. Of the three parcels, one was used by a minister of the church who also served as president of the church's statewide operations, another was used by another minister of the church who also served as treasurer of the statewide operations, and the third was used by a non-minister who was the principal of the church's parochial school. The lower court granted the church's motion for summary judgment, declaring the property in question to be exempt from real property taxation. The borough and its officials appealed, arguing (1) that because the church brought an action for declaratory judgment instead of directly appealing the decision of the board of equalization it was barred from litigating the claimed tax exemption, and (2) that the property in question was not exempt from taxation. The substantive aspect of the case turned upon the interpretation of AS 29.10.336, and the supreme court expressly stated, in its footnote 1, that it was not determining the constitutional validity of religious property tax exemptions.

Statute. The pertinent parts of the statute central to the substantive aspect of this case (AS 29.10.336) state:

> "(a) Property . . . used exclusively for nonprofit religious . . . purposes . . . [is] exempt from [property] taxation.
>
> (b) The term 'property used exclusively for religious purposes' includes the following types of property owned by a religious organization:
>
> (1) the residence of the pastor, priest, rabbi, minister, or religious order, which residence is owned by a recognized religious organization;

(2) a structure, and the land it stands on, which is used for public worship, solely charitable purposes, religious education, or a nonprofit hospital;

(3) the furniture and fixtures in a structure used exclusively for religious purposes;

(4) lots adjacent to a structure or residence mentioned in (1) or (2) of this subsection and which are reasonably necessary to the convenient use of the structure;

(5) lots required by local ordinance for parking in connection with the structure as defined in (2) of this subsection.

(c) Property or part of the property described in (a) or (b) of this section from which rentals or income are derived is not exempt from taxation under (a) of this section, unless the rentals or income are derived from the rental of the property by religious or educational groups for classroom space."

Decision. After ruling that the church's terming its action before the superior court an original action for declaratory relief instead of an appeal from the board of equalization did not bar litigation of the exemption issue, a majority of the supreme court held that the three pieces of property involved are not exempt from taxation. The exemption provision was rewritten in 1964, and the majority of the court stated "We view the action of the legislature in deleting the language 'and other property of the organization not used for business, rent, or profit,' as narrowing the type of residence which can be exempt from property taxation under AS 29.10.336(b)(1), as it now reads." The majority further stated, with reference to that provision, "To us the words 'the residence of the pastor,' etc., imply that only those residences may qualify that have some direct relationship to a structure used primarily as a house of worship. If the legislature desires a broader form of exemption, it may amend the statute." (Court's emphasis; footnote omitted.)

One justice concurred with the majority's opinion on the procedural issue but dissented from that opinion on the substantive issue. He stressed the difficulty in determining legislative intent, noting (in his footnote 7) that "Not untypically, the legislature has failed to provide an adequate record of the legislative history of the questioned amendments."

Legislative action. First of all, the legislature should continue its trend toward including more explanatory committee

reports in the legislative journals in order to furnish an interpretative aid to the public, administrative officers, lawyers, and the judiciary. Secondly, if the legislature believes that the court has construed the religious property exemption too narrowly, AS 29.10.336(b)(1) could be amended to read "a residence of a pastor . . ." or "residences of pastors. . ." with the addition of a phrase such as "or other employee or member of the religious organization". It should be noted, however, that the constitutionality of religious property tax exemptions is at least questionable. In Walz v. Tax Comm. of the City of New York, 395 US 957, 23 L ed 2d 744, 89 S Ct 2105 (6/16/69), the United States Supreme Court has granted review to determine this question.

(2) Inglima v. Alaska State Housing Authority, 462 P 2d 1002 (Opin. No. 594, 1/2/70):

Facts. The appellee filed condemnation proceedings to acquire land owned by the appellants in order to carry out an urban renewal project occasioned by the 1964 Alaska earthquake. The master's award exceeded the amount deposited in court by the appellee and the latter appealed to the superior court; the property owner did not appeal to the superior court. After the jury had been selected but before the trial began, the housing authority (appellant in the superior court) filed notice of dismissal of its appeal, to which the property owner objected, arguing that the right to a jury trial vested in both parties to the eminent domain proceeding when either party filed a notice of appeal. The superior court took the question of dismissal under advisement, but ordered the trial to proceed. At the close of trial, the jury awarded an amount greater than the master's award, but the superior court allowed the housing authority's dismissal and entered judgment for the amount awarded by the master. The property owner then appealed to the supreme court.

Statute. The statute which governs generally the rights of the parties upon appeal from a master's award is AS 09.-55.320, which provides:

> "An interested party may appeal the master's award of damages and his valuation of the property, in which case there shall be a trial by jury on the question of the amount of damages and the value of the property, unless the jury is waived by the consent of all parties to the appeal."

Decision. The supreme court reversed and remanded with directions that judgment be entered on the verdict of the jury, stating "We believe that the legislature intended in these circumstances that the owner against whom appeal is

taken is entitled to look forward to a jury trial as a matter of right, even though he may be the passive party. We are persuaded by the argument that the proceedings after the master's report are an appeal in name only and that the right to a jury trial vests by operation of law in all parties to the appeal."

Legislative action. To remove an ambiguity in the statute, the legislature could amend AS 09.55.320 by adding a sentence such as "The appeal may not be dismissed without the consent of all parties to it." if that would effectuate the legislative intent. This would make clear that not only does each party have a right to a jury trial, when there is a trial, but that he has a right to a trial in the first place.

(3) Gray v. Alaska, 463 P 2d 897 (Opin. No. 595, 1/16/70); and Pope v. Alaska, 478 P 2d 801 (Opin. No. 660, 12/21/70), rehearing denied 480 P 2d 697:

Summary. The Gray case involved two brothers who burglarized a liquor store in which a police officer was hiding. One brother, who was not carrying a weapon, was shot in the leg by the officer, and, as he lay on the floor, his brother shot and killed the officer. Both brothers were convicted of first degree murder, and one of the main issues in the case involved application of the felony-murder theory which states, essentially, that a killing occasioned by the commission of a felony is murder, rather than manslaughter, negligent homicide, etc. Formulations of the rule vary, but traditionally it does not require that an intent to kill be present. However, because of the wording of Alaska's first degree murder statute (AS 11.15.010), which includes a felony-murder provision, the court overturned the felony-murder convictions (issues separate from the other, respective murder convictions of the two brothers). Introduction of the Seventh Legislature's House Bill No. 47, substantially rewriting AS 11.15.010, was a response to this ruling.

Related to this bill and the Gray case, with regard to the matter of criminal intent, is the Pope case. In it, the defendant raised the defense of insanity, in response to a murder charge; the dissenting justice presented a good explanation and historical review of mens rea (guilty mind) and the defense of insanity and urged the overruling of Chase v. Alaska, 369 P 2d 997 (Alaska, 1962). He also indicated his preference for the American Law Institute's Model Penal Code insanity-defense formulation.

Material concerning HB 47 and these and related cases is in the files of the House Judiciary Committee, as is a

draft of a proposed committee substitute. The re-revision of the criminal code, to be introduced during the 1972 legislative session at the request of the Alaska Legislative Council, is based on the Model Penal Code and covers the points involved in these cases. Of substantial value to legislators considering a criminal code revision is Norval Morris' and Gordon Hawkins' The Honest Politician's Guide to Crime Control (Univ. of Chicago Press, 1970), which also specifically discusses mens rea.

(4) Thorsheim v. Alaska, 469 P 2d 383 (Opin. No. 611, 5/22/70):

Facts. The plaintiff, as administratrix of her husband's estate, filed a claim for death benefits under the Alaska Workmen's Compensation Act (AS 23.30). Her husband, employed by a flying service which was under contract to the Alaska Department of Administration, was killed while flying an agent of the Department of Fish and Game on a stream survey flight. The flying service did not carry workmen's compensation insurance, and the claimant argued that the State of Alaska, as a prime contractor, was liable under AS 23.30.045(a). The Workmen's Compensation Board and the superior court denied the claim, and the question for the supreme court was whether the state was a "contractor" and the flying service was a "subcontractor" under AS 23.30.-045(a).

Statute. The relevant portion of AS 23.30.045(a), referred to as the "contractor-under" provision, states:

> "If the employer is a subcontractor, the contractor is liable for and shall secure the payment of the compensation to employees of the subcontractor unless the subcontractor secures the payment."

Decision. A majority of the supreme court affirmed the superior court's denial of the claim, holding that the state was not a contractor in the circumstances of this case. The majority stated that the absence of statutory definitions of the terms "contractor" and "subcontractor" posed especial difficulty, and employed the following for the purposes of interpreting AS 23.30.045(a): "contractor" means "a person who undertakes, by contract, the performance of certain work for another, including the furnishing of goods and services", and "subcontractor" means "a person to whom a contractor sublets all or part of his initial contractual undertaking."

One justice dissented, suggesting that "contractor" be defined "in terms of fitness to perform the function envisaged by the legislature, not in terms of the common law meaning of the semantic root of the word 'contractor'." He said it

should be construed to mean "one whose regular occupation is to undertake for others to do jobs by contracting with third persons for all or part of the performance."

Legislative action. The legislature should add a new subsection to AS 23.30.045, defining "contractor" and "subcontractor" for the purposes of that section. The suggestion in the majority opinion or in the dissent could be used.

(5) Glasgow v. Alaska, 469 P 2d 682 (Opin. No. 616, 5/29/70):

Facts. The appellant was convicted of two counts of an indictment charging four counts of larceny in a building. The main issue before the supreme court was the appellant's right to a "speedy trial" under the United States and Alaska Constitutions. Excluding those periods of time that can properly be attributed to the appellant, trial was delayed some 14 months.

Decision. Attempting to maintain a proper balance "between the needs of the accused and the commitments of the judicial process," the court stated "We think 14 months' delay is an improper balance to strike." The conviction was overturned. In its opinion, the court observed that in Alaska there is "no statutory provision by which to measure the definite time within which trial must be held." Footnote 9 states "Virtually all of the leading authorities who have studied the matter, however, agree that the right to speedy trial should be fixed in terms of days or months running from a specified event, excluding certain periods of necessary delay or delays at the instance of the defendant, which should also be identified precisely." Several states were cited as having such provisions, and the court referred to the "Standards Relating to Speedy Trial", sec. 2.1, Approved Draft, A.B.A. Project on Minimum Standards for Criminal Justice (1968).

Legislative action. The legislature should consider specifying, probably somewhere in AS 12.45, a statutory time limit for permissible delay. In most jurisdictions which so specify, the permissible delay ranges between 75 days and six months. (See the court's footnote 12.)

(6) Searfus v. Northern Gas Company, Inc., 472 P 2d 966 (Opin. No. 630, 7/31/70):

Facts. The appellant brought an action for personal injuries against the appellee Northern Gas Company. The gas company denied any negligence on its part, asserted that the appellant was contributorily negligent, and contended that since appellant was its employee at the time of the

injury her sole remedy was under the Alaska Workmen's Compensation Act (AS 23.30). The superior court jury specially found that she was an employee of the gas company, and returned a general verdict in favor of the company. The main issue on appeal involved the definition of the word "employee".

Statute. In the present wording of Alaska's Workmen's Compensation Act, AS 23.30.265(11) defines "employee" as "an employee employed by an employer as defined in paragraph (12)", and AS 23.30.265(12) defines "employer" as "the state or its political subdivision or a person employing one or more persons in connection with a business or industry coming within the scope of this chapter and carried on in this state." These definitions are of little help in resolving the frequent question whether a person is an employee or is a contractor or subcontractor.

Decision. While holding that the superior court's jury instruction defining "employee" was not prejudicial error, and affirming the judgment, the supreme court rejected the common law definition of "servant" as the definition of "employee" for workmen's compensation purposes and adopted instead the "relative nature of the work" test. The court stated, "Designation of the precise boundaries of, and the relevant factors involved in, the 'nature of the work' test must, absent legislative definition, await further development through judicial decision."

Legislative action. The legislature should consider amending AS 23.30.265(11) to distinguish "employee" from "independent contractor". The court and authorities cited by it discuss factors relevant to evaluating the nature of the work, and in footnote 12 the court quotes AS 23.20.-525(a)(4)(A), (B), and (C), the Alaska Employment Security Act's definition of "employment" at the time the decision was written. All of this, plus the present wording of AS 23.-20.525(a), should provide guidance in selecting language for the amendment.

(7) Dimmick v. Alaska, 473 P 2d 616 (Opin. No. 632, 8/7/70):

Summary. In this appeal from a conviction of robbery, one of the main issues was whether the appellant's accomplice's testimony was inadmissible because the police had obtained a statement from him in violation of the standards for custodial police interrogation set out in Miranda v. Arizona, 384 US 436, 16 L ed 2d 694 (1966). When the appellant was arrested he was with his accomplice who was not arrested (because the victim could not identify him), but both were advised of their right against self-incrimination and their right to have an attorney. The accomplice requested an attorney but

then made a confession without having one. One police officer testified, "the decision was made to go ahead and interview [the accomplice] after he had requested an attorney full-well knowing that then this confession could not be used against him but merely for the value of the confession against Mr. Dimmick."

With one vacancy on the supreme court, two justices favored affirming the superior court's conviction and two favored reversal, the result of which was to affirm the lower court. The affirming opinion reasoned that "The focus of Miranda was upon the right of an individual not to be compelled to incriminate himself," stating that the "constitutional prohibition against compelling any person in a criminal case 'to be a witness against himself'" is personal in nature and that the right "pertains only to the person from whom a statement is obtained." Thus, since the accomplice's illegally obtained confession was to be used against the appellant and not against the accomplice himself, his testimony was held admissible.

This opinion rejected the suggestion, made (in a separate opinion) by one of the two justices favoring reversal, that affirming the conviction would encourage the police to conduct "incommunicado custodial police interrogation, with concomitant violations of the constitutional rights of the persons subjected to questioning." The two affirming justices said that those whose constitutional rights are violated by reason of police activity may seek redress under the federal Civil Rights Act (see 42 U.S.C., sec. 1983), and that "Furthermore, Alaska's legislature is not without the authority, if it chooses to exercise it, to make certain types of police conduct a crime, or even to extend the exclusionary rule of Miranda and provide that statements obtained in violation of that rule are inadmissible against anyone for any purpose."

Each of the two justices favoring reversal wrote a separate opinion, and the final resolution of the main issue on which they disagree with the controlling opinion in this case will have to be achieved in a future decision which avoids the two-to-two split. Whatever the judicial outcome may be, the legislature could "make certain types of police conduct a crime, or. . . extend the exclusionary rule of Miranda."

(8) Delahay v. Alaska, 476 P 2d 908 (Opin. No. 648, 11/2/70):

Summary. The appellant questions the legality of his termination as a district judge of Alaska and the validity of the appointment of his successor. His termination resulted from 1966 and 1967 legislation changing the method of selection

and retention of district judges and terminating the appointments of all district judges sitting on a specified date. See ch. 138 SLA 1966 and ch. 117 SLA 1967.

The main question of legislative intent involved sec. 2 of the latter Act (AS 22.15.170(a)), which provided in part that "The governor shall fill a vacancy in an office of district judge by appointing one of two or more persons nominated by the judicial council." Under this provision, the judicial council nominated four persons for the three district judgeships in the fourth judicial district, interpreting the "two or more persons" requirement as meaning that the governor could select from among all four nominees for the first position, from among three for the second, and between two for the third. Referring to the proceedings of the Constitutional Convention which indicate an intent "to maximize the role of the judicial council in selection of judicial candidates", the supreme court agreed that the judicial council's action in sending the governor only one more nominee than the number of positions to be filled constituted compliance with the statute. The decision of the superior court, rejecting the appellant's position, was affirmed.

The legislature may wish to consider whether this interpretation of that part of AS 22.10.170(a) quoted above does, in fact, implement the legislative intent, especially since that language is virtually identical to that in the Alaska Constitution regarding selection of supreme court justices and superior court judges (art. IV, sec. 5).

(9) Lynch v. McCann et al., 478 P 2d 335 (Opin. No. 659, 12/18/70):

Facts. Paul and June Lynch had been in partnership with Joseph and Margaret Reilly in the ownership and operation of an Anchorage bar, which the latter couple wished to expand by adding a restaurant. The Lynches did not wish to do so, and the Reillys bought them out, borrowing some money from a bank upon the security of a deed of trust and executing a second deed of trust to the Lynches. After the trust deeds had been recorded, the Reillys began construction of an addition to the existing bar building and began refurbishing the old building. The addition was about one-seventh the size of the old building. The appellees furnished labor and materials, and subsequently the Reillys defaulted on their obligations to the Lynches and to the appellees. After the Lynches foreclosed their deed of trust and purchased the property at the foreclosure sale, the appellees instituted foreclosure actions on their respective mechanics' liens. The lower court granted the lienors foreclosure insofar as the new addition was concerned, stating that as to that property their liens were prior and paramount to all other interests of the other parties.

Statutes. The appellants would have priority under AS 34.20.090(b), which provides:

> "The purchaser at a [foreclosure] sale, his heirs and assigns are, after the execution of a deed to him by the trustee, entitled to the possession of the premises described in the deed as against the party executing the deed of trust or any other person claiming, through or under him, after filing the deed of trust for record in the recording district where the property is located."

The appellees would have priority under AS 34.35.-060(c), which provides:

> "A lien created by secs. 50 - 120 of this chapter in favor of a person actually performing labor upon or furnishing material used in a building or other improvement in its original construction is preferred to a prior lien, mortgage, or other incumbrance upon the land on which the building or other improvement is constructed."

Decision. Stating that the basic issue was whether the addition to the old building constituted "original construction" under AS 34.35.060(c), the supreme court held that it was not, and reversed the judgment in favor of the lienors. Observing that "Alaska's use of the phrase 'original construction' appears to be sui generis in the lien laws of this country," the court stated "Analysis of the text of AS 34.35.060(c) discloses a legislative intent to limit the priority granted generally to situations where the construction preceded all other construction in and upon a given area of vacant or cleared land." The court discussed Judge Ritchie's opinion in Wagner v. Shaw, 6 Alaska 647 (1922), as further evidence of legislative intent, but mentioned that "In the absence of a clearer indication as to the legislature's intent, more precise definition of the term must await decisional delineation."

Legislative action. The legislature should consider adding a definition of "original construction" to AS 34.35.-060 or amending AS 34.35.060(c) to delete that phrase and state the priority in terms of its basic purpose. Again, a legislative committee report, explaining the measure and giving some clue to the motivation behind it, would be helpful.

(10) Application of Park, 484 P 2d 690 (Opin. No. 690, 4/30/71):

Summary. The petitioner passed the Alaska bar examination and met all other requirements for admission to the bar,

except that he was not a citizen of the United States as required by AS 08.08.130(a)(1) and Alaska Bar Rule II. The Alaska Supreme Court did not reach the question of the constitutional requirement of equal protection, but held that AS 08.08.130(a)(1) violated the Alaska Constitution's art. IV, sec. 1, which vests the judicial power of the state in a supreme court, superior court and courts established by the legislature. In a consistent line of decisions, the court has ruled that it can not be required to admit attorneys "on standards other than those accepted or established by the court" and that admission requirements must have "a rational connection with one's fitness to practice law in Alaska." In the instant case, the citizenship requirement was held unacceptable to the court, after reviewing several arguments made in its defense. (The court also held the same requirement stated in its own Alaska Bar Rule II to be of no force and effect.) The court went on to suggest, however, that lawful residence and a sincere intent to become a citizen could be required, and Supreme Court Order No. 147, dated November 23, 1971, amended Alaska Bar Rule II to so provide.

AS 08.08.130(a)(1) should be amended to read: "is a citizen of the United States, or is a resident alien in the United States who intends to become a citizen of the United States." A section proposing this amendment will be included in the 1972 general revisor's bill. The legislature should also consider repealing or amending other United States citizenship requirements where they still exist in occupational licensing statutes (e.g., AS 08.62.100(2), 08.80.110(1) and 08.88.211(a)(5) and (b)(4)).

(11) Alvarado v. Alaska, 486 P 2d 891 (Opin. No. 704, 7/6/71):

Facts. The appellant sought reversal of his conviction for rape of his sister-in-law, contending that the jury which found him guilty was improperly constituted because of the long-standing practice in the third judicial district of selecting all prospective jurors from the area within a radius of 15 miles of Anchorage. (Neither did he live within that area nor was the location of the alleged crime in that area.) The result of this practice was the almost total exclusion from jury service of village residents. The appellant asserted that this deprived him of his constitutional rights to an impartial jury and to due process of law.

Statutes. Closely related to the problems involved in this case, but not interpreted in it, are AS 09.20.050 and 22.10.030. The relevant part of the latter is quoted below, in the discussion of the court's decision. In AS 09.20.050, subsection (b) specifies the sources of the names for the jury lists: persons who purchased a resident hunting, fishing or trapping license, persons who filed a state income

tax return showing an Alaskan address, and persons who have registered to vote. AS 09.20.050(a) provides as follows:

> (a) At such times as need may require, but not later than March 15 of each year, the administrative director of courts shall prepare for each judicial district a list of the names of the residents of the district who are qualified by law for jury service. If the superior court is located in different cities in the same judicial district, the administrative director shall prepare for each location of the court a list of the names of the qualified residents of that portion of the district considered by him to be appropriate.

Decision. After reviewing authority and considering pertinent sociological and anthropological factors in some depth, the supreme court reversed and remanded, holding that "an individual should not be forced, against his will, to stand trial before a jury which has been selected in such a manner as to exclude a significant element of the population of the community in which the crime was allegedly committed." The court stated that "in determining whether the source from which a given jury is selected represents a fair cross section of the community, we must adhere to a notion of community which at least encompasses the location of the alleged offense", observing that two alternatives would be selection from among residents of the entire judicial district (see the court's footnote 26) in which the crime is alleged to have occurred or from among residents of the senate district in which the crime is alleged to have occurred.

In connection with this second alternative, the court (in its footnote 40) referred to ch. 126 SLA 1971 (see AS 22.10.030(d)) which requires that the actual place of trial in criminal cases be "in an election district within the judicial district at a location which would best serve the convenience of the parties and witnesses," pointing out that the "administrative and financial impact of selecting jurors from within the [senate] district in which the crime occurred will be considerably diminished given the fact that trial will at any rate have to be held within the district." Affirming the notion that expense does not "justify the perpetuation of a system which denies to a large segment of our citizens the opportunity to participate in our system of justice," the court quoted from its earlier decision in Baker v. City of Fairbanks, 471 P 2d 386 (Alaska, 1970), to the effect that:

> "If an individual right is vested by the Constitution, the overriding demands of governmental efficiency must be of a compelling nature and must be identifiable as flowing from some enumerated constitutional power. To

allow expediency to be the basic principle would place the individual constitutional right in a secondary position, to be effectuated only if it accorded with expediency.

"This would negate our entire theory of constitutional government."

Legislative action. AS 09.20.050(a) could be amended to require the administrative director of courts to prepare jury lists by senate district, which the court seems to prefer to judicial districts or election districts while still meeting constitutional requirements. Also, for the sake of consistency, AS 22.10.030(d) (added by ch. 126 SLA 1971) could be amended to refer to "senate district" rather than "election district". (The Alaska Constitution's distinction between these two terms should be borne in mind. In art. XIV, sec. 1, for example, "election district" means "house of representatives election district", and in art. XIV, sec. 2, senate districts are described in terms of their component election districts. This usage of the terms seems to be consistent in our constitution; see, e.g., art. XV, sec. 10.)

(12) RLR v. Alaska, 487 P 2d 27 (Opin. No. 706, 7/9/71):

Summary. This is one of several recent significant decisions in the long constitutionally neglected area of children's rights. (Also see, e.g., Doe v. Alaska, 487 P 2d 47 [Opin. No. 707, 7/9/71]; In re EMD, 490 P 2d 658 [Opin. No. 737, 11/15/71]; and In re GMB, 483 P 2d 1006 [Opin. No. 687, 4/8/71].) On the main issue in this case -- that of a child's right to a jury trial -- the court stated "We hold that whenever a child in a delinquency proceeding is charged with acts which would be a crime, subject to incarceration if committed by an adult, the Alaska Constitution guarantees him the right to jury trial," and in its footnote 35 added "To the extent In re White, 445 P 2d 813 (Alaska 1968), is inconsistent with this opinion, it is overruled. Implicit in our holding is that AS 47.10.070 is unconstitutional insofar as it denies the right to a jury trial to the child in the adjudicative phase of the delinquency proceeding." The supreme court did not reach the issue whether this unconstitutionality required reversal; it vacated and reversed the superior court's adjudicative and dispositive orders, however, on the grounds that the procedures below were a blatant violation of Children's Rule 12(c)(1) which requires the presence of the child at the child hearing.

The portions of AS 47.10.070 which most clearly require legislative action in light of this case state:

"The court may conduct the hearing in an informal manner in the courtroom or in chambers. All hearings under this chapter are without a jury and the usual rules of evidence do not apply. . . . The public shall be excluded from the hearing, but the court, in its discretion, may permit individuals to attend a hearing, if their attendance is compatible with the best interests of the minor."

The court's footnote 74 contains the statement that "The statute providing for exclusion of the public from juvenile hearings is procedural, so is outside the scope of legislative authority unless two-thirds of each house of the legislature votes to change the rule promulgated by the supreme court in this matter. Alaska Const. art. IV, sec. 15." Since the statutory language was enacted in ch. 145 SLA 1957, before the effective date of the Alaska Constitution and before adoption of the Alaska Rules of Court Procedure and Administration and adoption of the Alaska Statutes, this statement appears to overrule the decision made in the preparation of those two bodies of material; the 1963 foreword to the Court Rules states (on its fourth page) "The objective of this [recodification] program was to separate all procedural law from the existing statutes, recodify the remaining substantive law into new titles and promulgate the procedural provisions as rules of court." Using that approach, what is now AS 47.10.070 was left in the statutes.

The July 1971 decision in this case, then, suggests that the legislature not deal with this point unless it does so as a change of the Court Rules under art. IV, sec. 15 of the Alaska Constitution. That special handling is not required in order to repeal AS 47.10.070 or delete the quoted language in line with the RLR case. However, the legislature may wish to go further than simply delete this language which denies a child the right to a public trial by jury; the entire section could be rewritten and AS 47.10.075, providing for "young adult advisory panels", could be amended to provide for actual jury service by minors (an issue mentioned but not decided by the court). (Cf. AS 09.20.050.)

(13) In re EMD, 490 P 2d 658 (Opin. No. 737, 11/15/71):

Summary. In this case the court was called upon to decide whether a minor who has been adjudged a "child in need of supervision", under AS 47.10.080(j), could be institutionalized. "Child in need of supervision" is a category created in 1970 to lie between "dependent child" and "delinquent child". As defined in AS 47.10.290(7), the term does not describe a child who has committed a crime. (See AS 47.10.010(a)(2), (3) and (6).) Under our statutory arrangement, only a child who violates a law, ordinance or regulation, i.e., a delinquent child, may be institutionalized. (See AS 47.10.080, 47.10.290(2) and 47.10.010(a)(1).)

The state argued that since AS 47.10.080(j)(1) allows any order for a child in need of supervision which is authorized for a dependent child (see AS 47.10.080(c)) and since one of those authorized orders is commitment to the Department of Health and Social Services, the department may institutionalize a child in need of supervision under AS 47.10.190 which provides:

> "When the court commits a minor to the custody of the department, the department shall arrange to place the juvenile in a detention home, facility or another suitable place which the department designates for that purpose. A juvenile detained in a jail or similar institution at the request of the department shall be held in custody in a room or other place apart and separate from adults."

The supreme court held that the department does not possess broader powers of commitment than does the trial court. In the supreme court's view, AS 47.10.190 "prescribes conditions of confinement after the court has lawfully determined that a child should be confined in an institution." (Footnote omitted.) The legislature could amend that section to reflect more clearly that interpretation.

B. ALASKA SUPERIOR COURT OPINIONS

All superior court opinions published in the Alaska Law Journal in 1970 and through May 1971 have been reviewed. However, none of those reported has been found to be relevant to this report. The last Alaska Law Journal was issued in May 1971, but will again be published in 1972. Therefore, any relevant opinions handed down between May and December 1971 will be included in the oversight report covering 1972. One unpublished superior court opinion which is a matter of special interest to the legislature is the March 15, 1971 opinion in the case of Bozanich v. Noerenberg, (No. 70 - 389 Civil).

The plaintiffs, Bozanich, et al., challenged the constitutionality of ch. 186 SLA 1968 (relating to persons eligible to obtain fishing gear licenses) in an action for a declaratory judgment and for a permanent injunction against the enforcement of the law (see AS 16.05.536, 16.05.540 and 16.05.250(12)). The plaintiffs based their challenge to the law on art. I, secs. 1 and 7, and art. VIII, secs. 3, 15 and 17, Constitution of Alaska.

Some of the plaintiffs had earlier challenged the same law in the U. S. District Court and a three-judge panel ruled the act was unconstitutional as being in violation of the United States Constitution and the Alaska Constitution. Bozanich v.

Reetz, 297 F. Supp. 300 (D. Alaska 1969). The three-judge U. S. District Court decision was set aside by the United States Supreme Court as violating the doctrine of abstention. Reetz v. Bozanich, 397 U.S. 82, 25 L.Ed. 2d 68 (1970). The supreme court did not consider the merits of the case but remanded it to the district court, staying proceedings in order for the parties to litigate the Alaska Constitutional questions in the Alaska courts.

The plaintiffs' motion for summary judgment in the subsequent state court action was granted by Judge Victor Carlson and the law was held unconstitutional. The court found that the statute violated the equal protection guarantee of art. I, sec. 1, the common use provision of art. VIII, sec. 3, and the prohibition of an exclusive right of special privilege of the fishery provision of art. VIII, sec. 15, Constitution of Alaska. The court stated that the "general meaning of the words of the constitutional provision require that no distinction between persons equally situated is to be made with regard to fish in their natural state." The case has not been appealed to the Alaska Supreme Court and it is anticipated that the invalid language will be removed by the 1972 general revisor's bill.

Another unpublished superior court opinion, also by Judge Carlson, which is of interest to the legislature is that in the case of Bomhoff v. Boucher, (No. 70-359 Civil).

The plaintiffs, Bomhoff, et al., brought suit to enjoin the lieutenant governor from issuing a call for a constitutional convention based on the results of the referendum proposition approved by the Alaska electorate on November 3, 1970, and to have the following proposition placed on the ballot in the next general or special election: "Shall there be a Constitutional Convention?" with appropriate boxes for marking "yes" or "no".

The challenged referendum proposition on the November 3, 1970, general election ballot was set out, punctuated but not spaced or set in the following type:

Referendum
As required by the
Constitution of the State of Alaska
Art. XIII, Sec. 3
Shall there be a constitutional
convention?

YES [ ]
NO [ ]

The court, in finding for the plaintiffs, held that the language of art. XIII, sec. 3, is mandatory and specific in the form of the question that is to be submitted to the voters when it says: "If during any ten-year period a constitutional convention has not been held, the secretary of state shall place on the ballot for the next general election the question: 'Shall there

be a Constitutional Convention?'" Since the proposition required by the constitution was not presented to the voters, the lieutenant governor was held to have no election results on which to base a call for a constitutional convention, and was therefore enjoined from doing so.

The court further found that the unauthorized introductory words in the proposition were misleading and confusing and held that "the election process is to be kept free from taint and the suggestion of impropriety, however unintentional. . . . The electorate should be given the opportunity to cast their ballots free from confusing, extraneous, or superfluous verbiage in the proposition."

A new election was ordered to be held at the next general election in 1972.

C. OPINIONS OF UNITED STATES DISTRICT COURT, DISTRICT OF ALASKA

First National Bank of Fairbanks v. Camp, 326 F. Supp. 541 (1971):

Facts. Plaintiff, First National Bank of Fairbanks, filed suit for declaratory judgment and injunctive relief with respect to approval by the defendant, Camp (Comptroller of the Currency), of an application of the First National Bank of Anchorage to open a branch in Fairbanks. On cross motions for summary judgment, the district court held that the defendant was not required to follow interpretive declarations by the state banking director with respect to an Alaska statute governing approval of branch banks, that the approval had rational basis in light of the state statutory requirements and that the plaintiff was not denied administrative due process by failure of the defendant to state reasons for his approval. Summary judgment for defendant.

Statute. Congress has authorized the Comptroller of the Currency to approve the establishment and operation of branch offices by national banks "if such establishment and operation are at the time authorized to State banks by the statute law of the State in question by language specifically granting such authority affirmatively and not merely by implication or recognition, and subject to the restrictions as to location imposed by the law of the State on State banks." (12 U.S.C. 36(c)(2)).

The director of the division of banking and securities of Alaska is, in authorizing state banks to operate a branch, subject to the provisions of AS 06.05.415, which provides in pertinent part that

> "The department shall issue a certificate of authority to operate a branch bank ... if (1) the department determines

that the addition of the proposed facilities in the community is not detrimental to a sound banking system;"

Decision. The part of the court's decision relevant to this oversight report is that in which the court, in deciding the issue of whether the defendant's decision to allow the establishment of a branch bank had rational basis in the light of state statutory requirements, stated:

> "No Alaska statute or cases have been found which define what is meant by 'a sound banking system' or which suggest factors, proof of which would show that a proposed branch was or was not 'detrimental to a sound banking system.' In the absence of any binding State standard and because the Comptroller had sufficient evidence from which to determine whether or not the new branch would be detrimental to the soundness of Fairbanks' banking system, his construction of that criterion cannot be upset."

Legislative Action. The legislature may wish to remove the ambiguity in AS 06.05.415(1) which allowed the Comptroller of the Currency to substitute his own standards of what is meant by a "sound banking system" for those of the state. This action should be in the nature of legislatively prescribed standards of what constitutes a "sound banking system."

D. ATTORNEY GENERAL OPINIONS

There have been no numbered, formal opinions issued by the Office of the Attorney General since 1969. It is the understanding of the Legislative Affairs Agency that formal opinions of the attorney general will again be issued and numbered beginning in 1972 and that certain informal opinions issued in 1970 and 1971 will be given numbers and published as formal opinions. All of these opinions will be reviewed for the oversight report covering 1972.

E. ADMINISTRATIVE REGULATIONS

(1) Revision of Alaska Administrative Code:

Again, this year's report does not contain a review of administrative regulations because in prior years the staff has reviewed the regulations of all administrative agencies of the state and because the revision of the Alaska Administrative Code, under 1967 Senate Concurrent Resolution No. 15 and sec. 2, ch. 70 SLA 1966, is still in progress. As part of this project, the Drafting Manual for Administrative Regulations has been revised; this fourth edition is dated August 1971.

In actions related to this project, the attorney general recently designated a "regulations attorney" under AS 44.62.125, and a member of the lieutenant governor's staff is now working on coordinating the regulation-adopting efforts of the various state agencies and encouraging adoption of revisions of their respective regulations. In addition, information is being gathered and bid specifications being prepared for eventual professional publication of the Alaska Administrative Code and Alaska Administrative Register (the quarterly supplement to the code). The following indicates the present status of the revision project:

Preface -- revised at least twice and presently in good shape.

Title 1 (General Provisions) -- old title repealed and a new title prepared but not yet adopted.

Title 2 (Department of Administration) -- no regulations ever filed for publication in the AAC. However, the department is completing preparation of the state personnel rules for voluntary filing under AS 44.62.-120. In addition, the department's Division of Supply is drafting some regulations to be included in the AAC.

Title 3 (Department of Commerce) -- revision almost completed, with a couple of batches yet to go.

Title 4 (Department of Education) -- revision completed.

Title 5 (Department of Fish and Game) -- revision completed, and revised again.

Title 6 (Governor's Office) -- revision virtually complete.

Title 7 (Department of Health & Social Services) -- a large, unrevised title with little spots of revision.

Title 8 (Department of Labor) -- a relatively large, unrevised title.

Title 9 (Department of Law) -- no regulations ever filed for publication in the AAC.

Title 10 (Department of Military Affairs) -- four pages of old regulations were recently repealed and have not been replaced.

Title 11 (Department of Natural Resources) -- a large, unrevised title with little spots of revision.

Title 12 (Professional and Vocational Boards and Commissions) -- partially revised. There are 17 of these licensing

agencies, not counting the Alaska Bar Association (which is not required to file its regulations under the Administrative Procedure Act [AS 44.62] for publication in the Alaska Administrative Code. In 1963, however, the bar association's regulations were published in the AAC as chapter 2 of Title 12 [12 AAC 2], where they remain, unrevised. The relationship between these regulations and the association's bylaws and the supreme court's Alaska Bar Rules is not entirely clear.) Of the 17, regulations of only the Collection Agencies Board and the Board of Nursing have been neither revised nor reviewed. During the past three-and-a-half years, regulations of the remaining 15 have been revised by or revisions of them have been reviewed by the staff of the Legislative Affairs Agency; these are: Board of Public Accountancy, Board of Barber Examiners, Board of Chiropractic Examiners, Board of Hairdressing and Beauty Culture Examiners, Board of Dental Examiners, Board of Electrical Examiners, Board of Engineers and Architects Examiners, State Medical Board, Board of Examiners in Optometry, Board of Pharmacy, Board of Marine Pilots, Board of Psychologist Examiners, Real Estate Commission, Board of Veterinary Examiners, Board of Welding Examiners. Of these 15, revised regulations of only six have actually been adopted; these are for the chiropractors, dentists, doctors, optometrists, marine pilots, and veterinarians. Adoption of the regulations is, of course, the responsibility of these individual agencies.

Title 13 (Department of Public Safety) -- revision completed.

Title 14 (Department of Public Works) -- a relatively small, unrevised title.

Title 15 (Department of Revenue) -- a relatively small, unrevised title.

Title 16 (Department of Economic Development) -- revision completed. Before the October 1971 register, there were no regulations in this title. The few pages of new ones are in the new format.

Title 17 (Department of Highways) -- revision apparently completed.

Title 18 (Department of Environmental Conservation) -- a new title with new regulations in the new format.

This summary does not take into account corrections that should be made in various revised titles, nor does it consider the absence of required regulations.

(2) A special regulation:

A regulation handled somewhat differently from those discussed above is the one adopted April 13, 1971 by the commissioner of highways in his Order No. 71-1. This document prohibits the operation of a motor vehicle equipped with studded snow tires upon a paved portion of the state highway system between May 1 and September 15 of each year. AS 19.-05.010, 19.05.020, 19.10.060 and 28.05.020 were cited as authority for the regulation.

The order also stated that the regulation was adopted in accordance with AS 44.62.040 and 44.62.290 (sections in the Administrative Procedure Act). The latter is the provision exempting from the effective date, notice, hearing, etc., requirements regulations which are not required to be submitted to the lieutenant governor under the Administrative Procedure Act. The former section, in its (a)(2), states that submission under the APA is not required for a regulation which "relates to the use of public works, including streets and highways, under the jurisdiction of a state agency if the effect of the order is indicated to the public by means of signs or signals." The seasonal ban on studded snow tires has been indicated on large signs posted on the edge of highways throughout the state.

This regulation has been treated as exempt from the APA, and therefore the APA requirements of notice and public hearing have not been followed. The legislature should consider whether this properly implements the legislative intent in enacting AS 44.62.040(a)(2). It should be noted that under the Department of Highways' interpretation of this provision, virtually every regulation pertaining to use of highways could be adopted without notice or a public hearing, so long as the regulation was proclaimed by means of a sign or signal. Two consequences of this would be the circumvention of the Administrative Procedure Act and the cluttering of the roadside with hundreds or thousands of signs. Perhaps the original intent of AS 44.62.040(a)(2) covered only such things as stop signs and lights, and indication of no-passing zones, one-way streets and speed limits.

'M' Stands For Methodist

Dear Editor:

I was dismayed by the interview with Lewi
Simpson as reported in Thursday's Times. Simp
son, head of Alaska Methodist University's presi
dential search committee, said some things tha
could not help but disturb anyone interested in th
survival of the only avowedly Christian universit
in the State of Alaska. In such a choice positio
AMU should be able to give moral and spiritua
leadership, not only to its students, but also to th
state. In a day and age when young and old alik
are grasping for firm belief and solid foundations
AMU should be free, as the only sectarian school i
the state, to take the lead boldly and creatively

Simpson said the new president must b
supreme in being a politician, a fund raiser, an
administrator. He said nothing about the new pres
ident's concern for students or about his integrit
and honesty or about his moral leadership qualitie
or about his vision or about his personal achieve
ments. It would seem to me that if AMU could b
creatively sectarian it could challenge and inspir
the students so that its life would not have to rel
upon a politician-fund raiser-administrator for it
continuance.

Simpson said that AMU places no emphasi
upon religion courses and is attempting to be trul
non-sectarian. Why is there no emphasis upo
good, creative, challenging religion courses tha
cause people to think and grow? AMU is the onl
university so far in this state that ha
the freedom to be openly and unapologetically
sectarian. Why shouldn't it be? Is someone afra
religion might be offensive to some sensitive ath
ist? A church-related university without an em
phasis upon the faith which founded it is an oc
kind of animal to say the least.

As for being non-sectarian — that is ridiculous
The University carries Methodist in its name.
has a Methodist instructor of religion and philos
phy. It was built at the behest of the United Met
odist General Conference — a national body of th
United Methodist Church. It was admitted in th
article that $1 million is being sought from Unite
Methodist people in the Southeastern Jurisdictio
of the United Methodist Church. It is on the ad
anced special giving list of every church and co
ference in United Methodism. Whether Simpso
likes it or not, sectarian interests provide a gre
deal of the bread and butter for AMU.

In a day and age when the drug culture is bein
dropped by great numbers of kids because the
find more offered them in the Christian faith or,
least, in some form of belief, the position of Sim
son seems to be especially cowardly and unenlig
tened. Personally, I hope they go for someone wi
is less interested in success than he is in goo
honest, creative, sectarian leadership in high
education.

It is interesting to note that Simpson's two so
attend Pacific Lutheran -- an avowedly sectaria
school operated unashamedly by the America
Lutheran Church. I wonder why?

Church of the New
Covenant (United Methodist)
Kenai

HB-52

March 23, 1971

Dear Bill Moran

Admittedly, my concern for the financial condition of Alaska Methodist University has prompted me to write this letter, but there are other, more important reasons that I urge you to ensure the passage of the legislation known as the "Tuition Remission Bill" and the "Contractual Services Bill", House Bill 52.

I am a graduating senior in Business Administration at AMU and I am also a second-generation Alaskan. Because I am concerned for the welfare of all Alaskans, I am shocked at the unwillingness of the members of the legislature to favor the program I have mentioned.

If the purpose of state government is to benefit the citizens of the state, then one wonders why the elected officials refuse to assist in implementing the financial aids program. One part, as I understand it, will provide supplimentary funds to ALASKA RESIDENTS in order to assist them to earn a college degree In The State Of Alaska. If one can assume that most, if not all of those given assistance will remain in Alaska, then can it not be said that their education will benefit the entire population of the state? I feel that the financial aids proposition can only help the state. Why then, are the legislators so hesitant?

I feel I can say without fear of contradiction that Alaska Methodist University is a beneficial entity in the Anchorage (and for that matter, Alaskan) environment. If it is also true that the cost (not the income from students)

of educating a resident for one year at the University of Alaska is nearly $3,600.00 , and the program provides for something less than $1,200.00 in aid to AMU and Sheldon Jackson, then it is evident that the state will spend less to educate a student because private institutions are willing to charge the state less for furnishing the same services. The State Government spends less money, and thus saves money, does it not?

I have heard no valid reasons for opposing the program to provide financial aid to the private sector of Education in Alaska, while I have heard many impressive arguments favoring the program. I have stated only a few of my own observations. I hope that the elected officials of the state will see fit to hasten the passage of this legislation for the benefit of all Alaskans.

Respectfully,

Don Karabelnikoff

HB 52

THE SEVENTH LEGISLATURE, FIRST SESSION
State of Alaska
Pouch V, State Capitol
Juneau, Alaska 99801

Dear Bill —

Please forgive this format. However, we wish to address each member of the Seventh Legislature and believe this the most expeditious means of communication open to us.

In 1960 (RAF) and 1962 (SAF) we came to Alaska from the Midwest and Europe to serve on the Faculty of Alaska Methodist University. We have taught in the fields of history, art and speech to Alaskans (young and old) and students from other states and foreign countries. We have now seen ten graduating classes many of whose members have remained in the Great Land to serve the growing edge of civilization in the North. Along the way, each of us have given something of our talents and time to Alaska-at-Large. We have come to love AMU and Alaska. If at all possible, we wish to continue our work in this State.

As members of the teaching profession and as citizens, each of us believes that higher education in our new State should provide for a variety of institutions and curricula. This is why, after conferences with Dr. Patty, then President of the University of Alaska, officials of our state university encouraged the Board of National Missions to found AMU. In the years since, Alaskan and non-Alaskan private citizens and the Methodist Church have contributed millions of dollars of non-tax monies for Alaskan higher education. Such monies would not otherwise be contributed for these purposes if AMU and Sheldon Jackson College did not exist. For the record it should be remembered that Sheldon Jackson was the first educational institution in Alaska's American period.

As long as Sheldon Jackson College and AMU continue to live, private monies will continue to be invested in Alaskan higher education. The Tuition Equalization Act of the last session and HB52 now before this Legislature would make the State of Alaska a partner in the lives of these two important educational endeavors. It should be remembered that the physical plants and operating costs heretofore have not been financed with State funds nor would the State's share ever amount to the full amount necessary for year-to-year operation. Each of us is optimistic that the passage of HB52 and new leadership will assure a successful partnership in the years ahead. It is our opinion that HB314 should not be passed without a full hearing or prior to a Legislative study of higher educational institutions in Alaska. We urge the passage of HB52 in this Session.

Respectfully,

Robert A. Frederick
Professor of History

Respectfully,

Saradell A. Frederick
Professor of Art and Speech

HB #52

Representative William J. Moran
Pouch V
Juneau, Alaska 99801

Dear Representative Moran:

It is with surprise and dismay that I learn that (1) CSHB 52 has been returned to the House Finance Committee, and (2) HB 314 has been written. The former is a model of progressive legislation which will be of great benefit, not only to the people of Alaska, but because of its national significance, to the people of our nation. HB 314, relatively, is retrogressive legislation and effectively maintains the status quo. Maintenance of the status quo is sometimes good, but in the case of higher education such a position cannot be justified in light of the volumes of material available which collectively call for substantial changes in our approach to higher education.

Let me explain why I conclude that CSHB 52 should be acted on positively by you and your colleagues. In doing so, I will only mention its relationship to AMU, Sheldon Jackson and the University of Alaska. These are cogent and valid arguments to be sure, but I am sure that you are familiar with them. Instead, I should like to concentrate my remarks on what I think is the most important facet of the bill and one which has not been mentioned very often.

If we agree that higher education, public or private, is of fundamental importance to a democratic style of governing ourselves and, therefore, of intrinsic value to our society, it follows that the citizens of that society have a right to choose a form of education best suited to their needs and aspirations. This, of course, is the constitutional basis for taxation of peoples for a purpose which is not required of nor available to the whole. The important word, to me, is choice. For the first time in the history of Alaska, HB 52 will allow, within the limits of institutional accommodation and public funds, an honest choice to Alaska citizenry, not only between public and private higher education, but more important between styles of education. The present system of public support for higher education is grossly unfair not only to the taxpayer, but to the student, an unfairness which HB 314 will maintain and CSHB 52 eliminates.

To a graduating high school senior, the present system says the following: "You have the credentials to enter an institution of higher learning; we, therefore, through taxation, offer you a $7,000 scholarship for each year you attend." (I am unsure as to the cost/year/student at the University of Alaska.) "However, if the University of Alaska does not offer a program or the caliber of program to your choosing, we will not give you a scholarship."

Although we commonly do not use the term scholarship as synonymous with free tuition, they are the same in this case.

Thus the student who qualifies for Harvard, Princeton, Stanford, etc. is patently dismissed from financial aid from the state because he does not choose the University of Alaska.

This stance, I maintain, is unfair to the taxpayer, the student (who may be a taxpayer), prohibits the important element of choosing a personally compatible program of study, and can lead to empire building by state universities because a monopoly on higher education aspirants.

Other states have recognized the value of private higher education to their citizens. Recently the United States Congress recognized the value of choice when they ruled that private schools of higher education should be included in the educational support for the Native student (in effect, HB 52 gives the non-native student the same choice as the native student). By doing so they have recognized the intrinsic value of choice as a fundamental aspect of our society. I ask you to give Alaskans that choice by passing CSHB 52 and rejecting HB 314.

Cordially yours,

Ross G. Schaff

ANCHORAGE ALASKA 27
HONORABLE MIKE ROSE
HOUSE OF REPRESENTATIVES JUN
RE HOUSE BILL 54. THANK YOU FOR SENDING ME COPY OF
BILL. THIS BILL ATTEMPTS TO NULLIFY THE LAW AS LAID
DOWN BY OUR SUPREME COURT IN PHILLIPS VERSUS STATE.
NOT ONLY IS THIS UNFAIR TO THE MOTORISTS OF THE
STATE AND ENCOURAGES NEGLIGENCE ON THE PART OF EMPLOYEES
OF THE STATE HIGHWAY DEPT BUT IT IS PROBABLY BEYOND THE
POWER OF THE LEGISLATURE, WHICH CAN ONLY LEGISLATE WITH
RESPECT TO PROCEDURE IN SUITS AGAINST THE STATE,
UNDER ARTICLE 2 SECTION 21 OF THE ALASKA CONSTITUTION.
ACCORDINGLY THIS BILL AND THE PRESENT RESTRICTIONS IN THE
LAW ARE FAR TOO RESTRICTIVE AND PROBABLY
UNCONSTITUTIONAL BECAUSE THEY VIOLATE THE SECTION OF THE
CONSTITUTION JUST CITED. SUGGEST PRESENT STATUTE BE REPLACED
BY A SIMPLE LAW PROVIDING THAT THE STATE OF ALASKA MAY BE
SUED IN THE SAME MANNER AND FOR THE SAME CAUSES AS ANY
PRIVATE PERSON. THIS WAS THE LAW IN EFFECT WITH RESPECT
TO THE TERRITORY OF ALASKA WHEN THE CONSTITUTIONAL
PROVISION REFERRED TO ABOVE WAS ADOPTED AND WAS UNDOUBTLY
WHAT THE FFRAMERS OF THE CONSTITUTION HAD IN MIND.
ALSO, DISCRIMINATORY REQUIREMENT OF COST BONDS SHOULD BE
ELIMINATED ENTIRELY AS IT IS REGULARLY USED TO DEFEAT
OR IMPEDE MERITORICUS CLAIMS BY POOR PERSONS AGAINST
THE STATE. ALSO SUGGEST ENACTMENT OF A GENERAL LAW PERMITTING
POOR PERSONS TO SUE OR PROCEED IN ANY COURT OF THE STATE
WITHOUT PRE-PAYMENT OF OR SECURITY FOR FILING FEES OR
COSTS OF ANY KIND. RESPECTFULLY,
EDGAR PAUL BOYKO

54 2 21.

HB 113

THE SUPREME COURT OF THE STATE OF ALASKA

In the Matter of)	
)	File No. 1524
E.M.D.)	
)	O P I N I O N
A Minor Child.)	
)	[No. 737 - November 15, 1971]

Appeal from the Superior Court of the State of Alaska, Third Judicial District, Anchorage, Harold J. Butcher, Superior Court Judge.

Appearances: Herbert D. Soll, Public Defender, and Bruce A. Bookman, Assistant Public Defender, Anchorage, for the minor child. John E. Havelock, Attorney General, Juneau, Seaborn J. Buckalew, Jr., District Attorney, and Robert L. Eastaugh, Assistant District Attorney, Anchorage, for the State of Alaska.

Before: Boney, Chief Justice, Dimond, Rabinowitz, Connor, and Erwin, Justices.

RABINOWITZ, Justice.

In this appeal we are called upon to decide whether a minor who has beer adjudged a child in need of supervision can be institutionalized under our children's code.

Both Alaska's statutes relating to children's proceedings and the rules of procedure governing such proceedings establish three distinct categories of children. Thus, a child can be declared a dependent minor, a child in need of supervision, or a delinquent minor. AS 47.10.290(7) defines a "child in need

of supervision" as a minor whom the court determines is within the provisions of AS 47.10.010(a)(2), (3), or (6). Those provisions include a minor who:

> (2) by reason of being wayward or habitually disobedient is uncontrolled by his parent, guardian, or custodian;
>
> (3) is habitually truant from school or home, or habitually so conducts himself as to injure or endanger the morals or health of himself or others;
>
> . . . .
>
> (6) associates with vagrant, vicious or immoral people, or engages in an occupation or is in a situation dangerous to life or limb or injurious to the health, morals, or welfare of himself or others.[1]

Regarding the dispositive phase of children's proceedings, Alaska's children's code provides that if the court determines the minor is a child in need of supervision, it shall make any of the following orders of disposition regarding the minor's supervision, care, and rehabilitation:

> (1) any order which is authorized under (c) of this section; or
>
> (2) order the minor placed on probation under those conditions and limitations that the court may prescribe.[2]

Under section (c) of AS 47.10.080, the court is

---

[1] Compare R. 12(b), Rules of Children's Procedure.

[2] AS 47.10.080(j).

empowered to order the minor committed to the Department of Health and Welfare or order the minor released to his parents, guardian, or some other suitable person.[3]

In the case at bar, the superior court found that E.M.D., a 14-year-old-runaway girl, was a child in need of supervision. The court's findings were made after several hearings before a master and the superior court, and were based largely upon the master's findings of fact and recommendations. In the dispositive portion of the trial court's judgment, it was ordered that E.M.D. be

> committed to the custody of the Department of Health and Welfare for an indeterminate period . . . .

The court further ordered that E.M.D.

> be placed by the Department in a correctional or detention facility

---

[3] AS 47.10.080(c) reads in part as follows:

> (1) order the minor committed to the department for an indeterminate period of time not to exceed the date the minor becomes 19 years of age, except that the department may petition the court for continued supervision for an additional one-year period for minors who have not responded to treatment;
>
> (2) order the minor released to his parents, guardian, or some other suitable person; if the court releases the minor, it shall direct the department to supervise the care and treatment given to the minor; the department's supervision may not extend past the date the minor becomes 19 years of age, except that the department may petition the court for continued supervision for an additional one-year period for minors who have not responded to treatment . . . .

> as defined in AS 47.10.080(b)(1), to be held in that facility until released therefrom upon a showing by an officer of the Division of Corrections that the minor has completed a program of rehabilitation and has been amenable thereto, and that the Court has been advised in writing that such release is contemplated.

In this appeal it is argued that the superior court exceeded its authority in ordering the institutionalization of E.M.D. who was found to be a child in need of supervision. We are in agreement with the minor's contentions. As mentioned at the outset, Alaska's pertinent statutory provisions and procedural rules distinguish between categories of children for purposes of administering our children's laws. Of controlling significance here is that each class or category mandates distinct differences regarding the permissible content of any dispositional order the trial court can enter.

Study of our childrer's laws leads to the conclusion that the legislature has authorized institutionalization only where the child is found to be a delinquent minor. The term "delinquent minor" is defined as a child who has violated a law of the state, or an ordinance or regulation of a political subdivision of the state.[4] As to the appropriate disposition once the child has been determined to be a delinquent minor, the

---

[4] AS 47.10.290(2).

legislature has in part provided that the court shall order the minor committed to the Department of Health and Welfare for an indeterminate period and

> may direct the minor's placement in a juvenile correctional school, detention home, or detention facility designated by the department. . . . .[5]

Thus the only instance under our children's laws authorizing institutionalization or incarceration is when the child has violated the laws of the state, or any of its political subdivsions, and in turn has been adjudged a delinquent minor. Since the runaway child in the case at bar was found to be a child in need of supervision, not a delinquent minor, no legal basis existed for her incarceration.[6]

In reaching this conclusion, we have rejected the state's contention that the trial court's order of incarceration is sustainable in light of the legislature's broad policy declaration to the effect that protection of children is the paramount purpose governing its enactment of laws pertaining

---

[5] AS 47.10.080(b)(1).

[6] Cf. Fish v. Horn, 14 N.Y.2d 905, 200 N.E.2d 857 (1964).

to children's courts and institutions.[7] In another context we recently held that the benevolent social theory supposedly underlying children's court acts does not furnish justification for dispensing with constitutional safeguards.[8] As to the case at bar, it is equally appropriate to note that notions of benevolent protective policies cannot be used to validate departures from positive law relating to the adjudicative and dispositive phases of children's proceedings.

We also reject the suggestion that the Department of Health and Welfare possesses the authority to institutionalize any minor, including one who has been declared a child in need of supervision, who has been committed to its custody. We find it unreasonable to construe our children's statutes in a manner which would result in the grant to the Department

---

[7] AS 47.10.280 provides:

> The purpose of this chapter is to secure for each minor the care and guidance which is as nearly as possible equivalent to that which should be given him by his parents. The principle is recognized that minors under the jurisdiction of the court are wards of the state, subject to its discipline and entitled to its protection, and that the state may act to safeguard them from neglect or injury and to enforce the legal obligation due to them and from them.

[8] RLR v. State, 487 P.2d 27, 30-31 (Alaska 1971).

of Health and Welfare of broader powers of commitment than possessed by the trial court.[9] In our view the statute relied upon by the state for this construction prescribes conditions of confinement after the court has lawfully determined that a

---

[9] The state argues that even if the trial court lacks power to institutionalize a child in need of supervision, it can order the child committed to the Department of Health and Welfare which in turn can place the child in a detention facility. The argument is that under AS 47.10.080(c)(1) a minor can be committed to the Department of Health and Welfare. The state argues that AS 47.10.190 permits the department to institutionalize any minor committed to them. AS 47.10.190 reads as follows:

> When the court commits a minor to the custody of the department, the department shall arrange to place the juvenile in a detention home, facility or another suitsuitable place which the department designates for that purpose. A juvenile detained in a jail or similar institution at the request of the department shall be held in custody in a room or other place apart and separate from adults.

child should be confined in an institution.[10]

One additional aspect of this appeal should be discussed for we think it appropriate that an explanation be given as to why this matter has been treated as an appeal rather than coming before us for review. Counsel for the minor sought to invoke our discretionary review jurisdiction in the belief that appeal was unavailable for two reasons. First, he cites In re White, 445 P.2d 813, 815 (Alaska 1968) (Rabinowitz, J., concurring). There this court interpreted AS 22.20.022, which allows peremptory disqualification of a superior court judge in a civil or criminal action. A majority of the court in White said:

> While juvenile proceedings have some of the characteristics of both civil and criminal actions, we hold that they are basically different from both, and that the words 'civil or criminal' as used in AS 22.20.022 must be strictly construed. The trial judge was correct

---

[10] We note with approval the state's candor in briefing the issues in this case. The state, in its brief, initially conceded that if this court looks only to the express language of AS 47.10.080(j) and 47.10.080(c), a strong argument can be made that the judgment entered below exceeded the court's disposition jurisdiction. The final portion of the state's brief concludes on the following note:

> Nevertheless, it is the belief of the Department of Law that the judgment ordering petitioner detained exceeded the authority of the court below. This belief is founded on the State's concern that courts should comply with their granted powers even where, as here, the factual circumstances cry out for a disposition beyond the fingertips of the lower court.

> in holding that peremptory challenge procedure applied only to civil and criminal actions and not to juvenile proceedings.

Counsel for the minor reads White as requiring the filing of a petition for review because the final judgment rule embodied in Supreme Court Rule 6 applies only to civil or criminal actions.[11] Such an expansive reading of White, assuming without deciding its continued validity in light of several of our recent decisions which vindicated certain constitutional and procedural rights of children in children's proceedings,[12] would result in precluding any review of children's decisions. For the rules which delineate this court's review jurisdiction limit such jurisdiction to "any order or decision of the superior court, not otherwise appealable under Rule 6, in any action or proceedings, civil or criminal . . . ."[13] Adoption

---

[11] In regard to what may be appealed, Supreme Ct. R. 6 states:

> An appeal may be taken to this court from a final judgment entered by the superior court or a judge thereof in any action or proceeding, civil or criminal, except that the state shall have a right to appeal in criminal cases only to test the sufficiency of the indictment or on the ground that the sentence is too lenient.

[12] Doe v. State, 487 P.2d 47 (Alaska 1971); RLR v. State, 487 P.2d 27 (Alaska 1971).

[13] Supreme Ct. R. 23.

of counsel's interpretation of White would also conflict with AS 22.05.010 which places final appellate jurisdiction in all cases in the supreme court.[14] We think White should be limited to its interpretation of the peremptory disqualification statute. On the other hand, we hold that the right to appeal from the type of disposition order which was entered in this children's proceeding has been clearly established by the legislature. In this regard, AS 47.10.080(i) provides:

> A minor, his parent, or guardian acting on his behalf, or the department may appeal a judgment or order or the stay, modification, setting aside, revocation, or enlargement of a judgment or order issued by the court under this chapter.

The dispositive provisions of the superior court's judgment are set aside and the matter is remanded for such further disposition proceedings as are necessary and the entry of an appropriate disposition order.

---

[14] For a discussion of another facet of this court's final appellate jurisdiction see State v. Browder, 486 P.2d 925, 929-33 (Alaska 1971).

272-9461

HB-132

ANCHORAGE COMMUNITY HOSPITAL
825 L Street, Anchorage, Alaska 99501

March 24, 1971

The Honorable William J. Moran
Alaska State House of Representatives
Pouch "V" State Capitol Building
Juneau, Alaska 99801

Dear Sir:

I strongly support and urge you to support House Bill 132 and Senate Bill 42, an act authorizing state loans from a revolving loan fund, for hospitals and related health facilities and providing for an effective date.

This legislation is necessary to the future development of health resources for the people of the State of Alaska. This is good legislation as it perserves the principle of State funds intact, earns interest income for the State and results in expanded health service for the people of the State.

We also strongly support a separate bill "an act authorizing state grants for hospitals and related health facilities, and providing for an effective date".

House Bill 276 could be supported if the new language being added to the bill was changed to include the words "or non-profit facility" following the words "local government", and other changes as shown in the attached proposed substitute for House Bill 276.

Sincerely,

Robert O Byrnes

Robert O. Byrnes
Administrator

SEVENTH LEGISLATURE - FIRST SESSION

Proposed Substitute for HB 276

For an Act entitled: "An Act relating to state aid for hospitals, health facilities and health services; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*Section 1. AS 43.18.010(h) is amended to read:

(h) During each fiscal year the state shall pay to an organized borough or a city outside an organized borough, in which a health facility is operated, a sum equal to $1,500 ($1,000) for each bed licensed by the State Dept. of Health and Welfare (actually used)for patient care within the facility, (limited to the maximum number of beds provided for in the construction design of the facility) or $4,000 for a facility, if the local government elects to accept payment on that basis for a particular facility. In addition, if construction of a facility was begun by a local government or non-profit facility after January 1, 1968 the state shall pay to the local government during each fiscal year a sum equal to $5,000 per bed for the maximum number of beds provided for in the construction design of the facility, until the local government has received from this aid an amount equal to 25 per cent of the total project cost. Sums received by a local government under this subsection shall be used for expenses of operation, maintenance or health services or facilities, as the health facility determines. (local government determines)

*Sec. 2. AS 43.18.010 (i) is amended to read:

(i) In (h) of this section "health facility" or "facility" includes hospitals, public health centers, community mental health centers, facilities for the mentally or physically handicapped, nursing homes and convalescent centers which are determined by the commissioner of health and welfare to satisfy minimum standards of safe and adequate patient care LICENSED BY THE STATE UNDER AS 18.20.010 - 18.20.130 and are owned or operated or both by a local government or by a nonprofit corporation or other nonprofit sponsor; the term excludes facilities operated or wholly supported by the state or the federal government.

*Sec. 3. This Act takes effect July 1, 1971.

Alaska Legislation
HB 164

February 23, 1971

Mr. Carl W. Jones (3)
O f f i c e

Reference is made to your communication of February 22, 1971, with its attached House Bill No. 164.

I only wish to add two comments to my memo of March 17, 1970.

1. I honestly believe that passage of HB 164 can only unreasonably stifle economic growth and development of the resources in Alaska. HB 164 as its predecessor SB 392 makes every combine operating on the North Slope illegal. I believe the same is true for the contemplated Alaskan pipeline.

2. Sec. 45.51.080. EXEMPTION FOR COMMERCIAL FISHING. In substance, commercial fishing is exempt from the provisions of HB 164. For economic and growth reasons, it makes as much sense to exempt the Petroleum industry.

Lewis J. Ottaviani

March 26, 1970

Re: SB 392 - Alaska Legislature
An Act Prohibiting Monopolies
and Combinations in Restraint
of Trade

Mr. W. W. Hopkins
Alaska Oil and Gas Association
c/o Baranof Hotel
Second & Franklin Street
Juneau, Alaska 99801

Dear Mr. Hopkins:

Phillips Petroleum Company has asked one of our most experienced antitrust lawyers to review the bill. He has described it as ambiguous, confusing, onerous and generally poorly written. Whether by design or not, it will undoubtedly foster much irresponsible treble damage litigation with attendant great expense to all major business enterprises. Some of the comments expressed by our antitrust attorney are as follows:

Sec. 45.51.010. This provision is obviously taken from Sec. 1 of the Sherman Act of 1890. In interpreting Sec. 1 of the Sherman Act the courts have long since held that not every contract in restraint of trade is illegal--only those which unreasonably restrain trade. It seems to me that an 1890 act should be improved upon in 1970 by reciting the test in the act itself. Accordingly, this provision should be amended to read: "Each contract, combination in the form of trust or otherwise, or conspiracy, in (unreasonable) restraint of trade or commerce is illegal." For 60 years the Supreme Court has been holding that the legislators in 1890 must have intended that only unreasonable restraints are illegal. A 1970 legislature should make this test clear on the face of the act.

Sec. 45.51.020. PROHIBITED ACTS. Subsections (1) through (7) and subsection (b) should be deleted since they add nothing that is not already covered in the preceding paragraph. If these specific prohibitions remain, I fear that in the long run the court may hold that the legislators must have intended that these specifics be per se illegal.

Subsection (a) of Sec. 45.51.020 is ambiguous. It appears that it may be intended to exclude bathtub or intracorporate conspiracies from coverage. If so, this is desirable from our standpoint since parents and their subsidiaries have been found to have conspired under the federal law. This provision should be deleted as written and Sec. 45.51.020 should simply contain an exclusion from the act's coverage for single business entities and their subsidiaries.

Sec. 45.51.020. ACTS PERMITTED. The acts "permitted" by subsections (1) through (4) are taken away by the first three lines of the section. As written, subsections (1) through (4) permit reasonable specified activity for a legitimate business purpose for a reasonable time and area but only if competition is not substantially lessened. Under the comparable federal statute, the activities in subsections (1) through (4) are considered reasonable restraints and therefore lawful (whether or not competition is substantially lessened) because the objective and purpose is the protection of legitimate business rights for a reasonable time and over a reasonably limited area. Accordingly, the words "Unless the effect . . . in any part of the state" should be deleted.

Sec. 45.51.040. MERGERS, ACQUISITIONS, HOLDINGS, AND DIVESTITURES. In part, subsection (a) is ex post facto. It includes mergers, acquisitions, etc. "whether or not acquired before the effective date of this act." Further, although this is patterned after Sec. 7 of the Clayton Act, ultimately it will be more onerous than Sec. 7. Sec. 45.51.040 prohibits any merger, etc., which may substantially lessen competition or tend to create a monopoly in any line of commerce in any section of the state. In Alaska, this could mean that an acquisition of a single jobber, single dealer, or even a single service station may well be illegal in some town, village, or hamlet.

Subsection (b) is poorly written. The test of illegality under subsection (a) is "may be substantially to lessen competition," etc. Yet, under subsection (b) the court is to order divestiture if the court finds that the effect of the acquisition "is substantially to lessen competition." In other words, the test of illegality concern probability but divestiture depends upon a finding of actual substantial lessening of competition.

Sec. 45.51.050. INTERLOCKING DIRECTORATES AND RELATIONSHIPS. In essence, this is copied from Sec. 8 of the Clayton Act. However, it also adds "officer," "partner" or "trustee" whereas Sec. 8 relates to directors. In addition, the federal provisions (Sec. 8) prohibit interlocking directorates when any one of the "corporations" . . . "has capital, surplus, and undivided profits aggregating more than $1,000,000 . . ." Sec. 45.51.050 in the long run will be very onerous since it is an absolute bar to interlocking directorates, officers, partners, trustees regardless of the size of the business entities, regardless of the commerce involved. Accordingly, the only test of illegality depends upon whether the business entities "are or shall have been theretofore . . . competitors."

I am unable to determine the full import of subsection (b) which does not appear in the comparable federal statutes. However, it would in my view virtually prevent a bank officer from being on the board of a company that borrows money from the bank. In our case, I believe that a Phillips employee would have a most difficult time justifying his being a member of the board of a partially owned jobber or dealer company. This subsection (b) coupled with subsection (a) authorizing private suits would virtually dictate that Phillips not be represented on the board of any majority or minority owned retail subsidiary.

Sec. 45.51.110. SUITS BY PERSONS INJURED. This provision is patterned after the federal statute which authorizes treble damage actions. However, Sec. 45.51.110 authorizes trebel damage actions even in connection with interlocking directorates. As the federal provision, this provision also permits the successful plaintiff to recover costs and attorney fees. However, the successful defendant is not entitled to costs or attorney fees. Such a situation will encourage spurious lawsuits and legal blackmail just as the federal provision has.

Sec. 45.51.120. SUITS BY STATE OR LOCAL GOVERNMENT. Under the federal law, the federal government can only recover actual damages although states suing under the federal law can recover treble damages. The state or local governments, etc., suing under their own statutes should be limited to actual damages. This is particularly so in this instance since it will be relatively simple to find violations of this statute.

If subsection (b) means what it says, it will be much cheaper not to do business in the State of Alaska. As I read this provision, if the State of Alaska has a cause of action, then the Attorney General may undertake class actions on behalf of everybody and everything. This includes the state, counties, all political subdivisions, municipalities, governmental agencies, businessmen, and each and every citizen of the State of Alaska. Such suit can be maintained for violating the federal antitrust law as well as Alaska's, and the latter's clearly includes treble damages for everyone even under the merger and interlocking directorate provision. A defendant will never even know who the Attorney General represents except by class designations.

Sec. 45.51.130. PENALTY FOR VIOLATION. This provision converts the entire act into a criminal statute. The fine of $10,000 and/or one year in jail applies with equal force to merger situations and interlocking directorates as well as the basic restraint of trade provision. This, of course, is not the case under the federal statute. Only violations of Secs. 1 and 2 of the Sherman Act subject an individual or corporation to criminal penalties.

Sec. 45.51.140. JUDGMENT IN FAVOR OF THE STATE AS EVIDENCE IN ACTION; SUSPENSION OF LIMITATION. This provision is patterned after the federal statute but is much more onerous. The federal statute only applies to final judgments or decrees rendered after evidence has been taken or to guilty pleas. Consent judgments or decrees entered before evidence is taken are excluded under the federal provision. The Alaskan bill only excludes consent judgments or decrees entered before any complaint is filed.

Members of Congress have for many years tried to include the nolo plea and consent judgments and decrees within the prima facie category. Each time the Department of Justice and the Antitrust Division have opposed such proposals primarily because it would virtually eliminate inducements to plead nolo or to consent to judgments and thus substantially increase the number of cases that would go on to trial.

Sec. 45.51.130. ANTITRUST FUND. Obviously, this provision will set up a permanent war chest which will continually breed antitrust litigation. This is particularly onerous in view of Sec. 45.51.120 which empowers the Attorney General to sue on behalf of virtually every resident and entity in the State of Alaska. Thus, it will be a war chest for private actions as well as state actions.

Yours very truly,

Thomas M. Blume
Division Chief Attorney

MEMORANDUM

April 7, 1971

Statement of James Waters to House Judiciary Committee on

HB 164

H.B. 164 would enact a general antitrust statute for Alaska. In brief summary it would cover agreements in restraint of trade and certain acquisitions and management interlocks, with injunctive, treble damage and criminal sanctions for violation of any of the substantive provisions. For reasons detailed below, this bill should not be enacted without substantial revision.

Section 10. This section uses the language of section 1 of the Sherman Act to forbid "each contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade * * *." Although section 1 of the Sherman Act uses the same language, the Supreme Court has held that it forbids only "unreasonable" restraints of trade. It reached that result because any commercial arrangement to some extent restrains trade, and therefore the statute properly should be limited to agreements that effect unreasonable restraints. To make sure that this fundamental "rule of reason" would be applied in Alaska, the word "unreasonable" should be inserted in section 10 before the word "restraint" in line 15, page 1.

Another difficulty with section 10 is its failure to define the market in relation to which "trade or commerce" may be restrained. It is impossible to measure the reasonableness or unreasonableness of a restraint of trade except with reference to a market. The relevant market or geographic area in which suppliers may sell the particular product or service in effective competition with one another is not, of course, necessarily coterminous with the boundaries of Alaska. Therefore in determining whether challenged conduct unreasonably restrains trade it would be desirable to include the entire area in which the suppliers can effectively compete for sales. This can be achieved by designating the present substantive provision of section 10 as part ("a") and by adding part ("b") as follows: "(b) In deciding whether conduct unreasonably restrains trade or commerce determination of the relevant market or effective area of competition shall not be limited by the boundaries of this state."

Section 20. This section sets forth seven categories of unlawful agreements in restraint of trade, and is obviously designed to particularize specific examples of restrictive agreements within the scope of section 10. Section 20 provides as follows:

> "(a) No person, exclusive of members of a single business entity consisting of sole proprietorship, partnership, corporation or other single business entity, may agree, combine, or conspire, with any other person or persons, or enter into, become a member of, or participate in any understanding, arrangement, contract, pact, or trust, directly or indirectly, to
>
> (1) create or carry out restrictions in trade or commerce;
>
> (2) limit or restrict the production, or maintain or increase the price of any article of trade;
>
> (3) prevent competition in the harvesting, extraction, production, manufacturing, making, transportation, sale or purchase of any article of trade;
>
> (4) fix any standard of quality in respect to any article of trade intended for sale, barter, use or consumption in this state, whereby its price to the public, consumer or purchaser of any kind shall be in any manner controlled, maintained or increased;
>
> (5) agree not to sell, dispose of or transport any article of trade below a common standard, figure or fixed value;
>
> (6) agree to keep the price of any article of trade at a fixed or graduated figure;
>
> (7) establish or settle the price of any article of trade so as to preclude a free and unrestricted competition in the sale or transportation of such article of trade;

(b) Nothing in subsection (a) of this section shall limit the generality of sec. 10 of this chapter."

In view of the breadth of section 10 there is really no need for section 20. All of the conduct attempted to be particularized would violate section 10 if it satisfied the basic test by effecting an unreasonable restraint of trade. Moreover, the confusing and antiquated language of section 20 is of doubtful meaning and could be applied in anticompetitive rather than procompetitive ways.

For example, the introductory language, describing the persons who may not combine or conspire, expressly exempts agreements between "members of a single business entity consisting of sole proprietorship, partnership, corporation or other single business entity." This language implies that it would be improper for a parent company and its subsidiaries to agree upon such things as prices and the areas in which each shall market, although such arrangements could have no anticompetitive effect in any relevant market.

The specific categories, numbered 1 through 7, are substantially the same as those used to define unlawful "trusts" under California's Cartwright Act (Cal.Bus.& Prof. Code § 16720). Since the Cartwright Act has no provision comparable to section 1 of the Sherman Act or section 10 of S.B. 392, it made sense to attempt a particularization of those agreements or arrangements sought to be prohibited. But it is undesirable and unnecessary to do so if the basic principle of regulation is stated as in section 10.

In addition, the wording of many of the categories in section 20 is so obscure that it could lead to unsound decisions. In the first place, none of these categories is modified by the term "unreasonable," which could lead to condemnation of ordinary commercial arrangements having no unduly restrictive effects. To take an obvious example, any contract for the purchase of goods or services, whatever its duration or quantities, restricts trade because the buyer has committed himself to a particular supplier, which to that extent prevents other suppliers from filling the buyer's needs. But even though the usual supply contract should not be condemned under the antitrust laws, it could be held to fall within subpart (1) of section 20. Similarly, subparts (5) and (6) could be construed to forbid ordinary and wholly innocuous supply arrangements merely because they

establish the prices at which the products will be sold or the cost of their transportation.

It is therefore recommended that section 20 be dropped in favor of reliance on the appropriately broad language of section 10 (amended to add "unreasonable") which will outlaw each of the particularized kinds of conduct to the extent that it would effect an unreasonable restraint of trade.

Section 30. This section would exempt certain agreements from sections 10 and 20 if they do not "substantially lessen competition or * * * create a monopoly in any line of commerce in any part of the state." Exempted are certain agreements by the seller of a business not to compete with the buyer, by a partner not to compete with the partnership following his withdrawal, by a licensee restricting his use of leased property, and by an agent restricting his use of the principal's trade secrets.

Apart from the vague and obscure wording of these stated exemptions,* they would be most unfortunate because there are numerous other arrangements that have been approved under the Sherman Act and comparable state legislation as lawful restraints when they are reasonably ancillary to legitimate business goals and are not seriously anticompetitive.**

---

* E.g., subpart (1) refers to an agreement "not to compete" without indicating with what the covenantor is not to compete; the word "for" in subpart (2) should presumably be "after"; and subpart (3) refers to restricting the use of leased property "to certain business or agricultural areas," whatever that may mean. Note also that subpart (4) would forbid the use of trade secrets only if used in competition with their owner. In contrast, the general rule at common law protects against any unauthorized appropriation and use. 2 Restatement, Agency 2d, §§ 395,396.

** See generally United States v. Addyston Pipe & Steel Co. (6 Cir. 1898) 85 Fed. 271, 280-283, affirmed (1899) 175 U.S. 211; 2 Restatement, Contracts, § 516. See also, Snap-On Tools Corporation v. F.T.C. (7 Cir. 1963) 321 F.2d 825, 837; Nelson Gas Stations Number Six, Inc. v. Shell Oil Company (4 Cir. 1962) 307 F.2d 306, certiorari denied (1963) 372 U.S. 911.

The development of these exceptions was begun at common law and has continued under the Sherman Act's "rule of reason" concept. It is therefore recommended that the advantage of this adaptability be taken in Alaska by inserting "unreasonable" in section 10, as noted above, and by eliminating section 30 as too restrictive, confusing, and indeed superfluous.

Sections 40 and 50. These sections would largely enact for Alaska the essence of sections 7 and 8 of the Clayton Act which, respectively, regulate acquisitions and interlocking directorates.* Thus, section 40 states, subject to limited exemptions, that no corporation may acquire the whole or any part of the stock or assets of another corporation (even if acquired before passage of this bill!) if the effect "may be substantially to lessen competition or to tend to create a monopoly in any line of commerce in any section of the state." If the court finds that the effect of the acquisition "is substantially to lessen competition or tends to create a monopoly" it shall order divestiture if that is "necessary to eliminate" such effect and if the assets "are reasonably identifiable and separable, and the disposition can be done without causing undue hardship on the economic entity."

No good reason has ever been put forward why a state should have an antimerger provision in the nature of section 7 of the Clayton Act. In the first place, any merger within Alaska that threatened monopoly or an unreasonable restraint of trade, would be cognizable under the general language of section 10. Moreover, in view of the Federal courts' liberal interpretation of what is interstate commerce, it is likely that any merger of this kind would violate Clayton 7 and hence would be subject to the expert and experienced staffs both of the Antitrust Division of the United States Department of Justice and of the Federal Trade Commission. Thus, it seems reasonable to conclude that any merger or acquisition in Alaska not subject to section 10 of this bill or Clayton 7 would have only a de minimis effect on the state's commerce. A provision with no more utility than that would merely burden the courts with trivial claims having no significant bearing on free competition in the state.

---

* 15 U.S.C. 18, 19.

Section 50 is equally unnecessary for the proper regulation of a state's commerce. The general provision of section 8 of the Clayton Act forbids any person to be a director in two or more corporations any one of which has capital, surplus and undivided profits aggregating more than $1 million, which are engaged in any interstate commerce, "if such corporations are or shall have been theretofore, by virtue of their business and location of operation, competitors, so that the elimination of competition by agreement between them would constitute a violation of any of the provisions of any of the antitrust laws." Proposed section 50 would go beyond what the Federal Government has seen fit to prohibit, by dropping any requirement as to the size of the businesses involved and by covering not only a director but an "officer, partner, or trustee in any two or more firms, partnerships, trusts, associations, or corporations" if they or any combination of them "are or shall have been theretofore, by virtue of their business and location of operation, competitors, so that the elimination [of competition?] by agreement between them would constitute a violation of this chapter."

No evidence has ever been presented or is likely to be found that there are interlocking management relationships between entities which threaten the effectiveness of intrastate competition. Thus, at most, section 50 appears to be an unnecessary and even more encompassing imitation of Clayton 8. Here as with the proposed antimerger provision, it is likely that the chief result of section 50 would be to burden the judiciary with trivial claims whose resolution would be of no importance to the free economy of Alaska.

It should be borne in mind in connection with sections 40 and 50 that the antitrust enforcement efforts of the states have been minor compared with those of the Federal government. It seems clear that one reason for this is the typical proliferation of state trade regulation statutes, which must dilute and impede the effective enforcement that could otherwise be given to an appropriate general prohibition against unreasonable restraints of trade.

Section 60 seeks to exempt labor organizations and apparently also agricultural cooperatives from the operation of this antitrust act. At least some of the language appears now to be antiquated (e.g., the requirement that labor organizations not have capital stock) or vague,

and hence these appropriate objectives could be more effectively achieved by using the following language for section 60:

> "(a) This Chapter does not forbid the existence or operation of labor, agricultural or horticultural organizations created for the purpose of mutual help, and not conducted for profit, or forbid or restrain members of such organizations from lawfully carrying out the legitimate objects thereof; nor are those organizations or members illegal combinations or conspiracies in restraint of trade under the provisions of this Chapter.
>
> "(b) Nothing contained in this Chapter shall be construed to forbid actions or arrangements authorized or regulated under those acts of the United States which exempt such actions or arrangements from the antitrust laws of the United States or under the following statutes of this state.
>
> (1) AS 10.15 (3) AS 31.05.100 [*]
>
> (2) AS 21.87 (4) AS 31.05.110."*

Section 100 states that any contract or agreement violating the statute "is void and is not enforceable at law or in equity." In view of the substantial sanctions proposed by S.B. 392 (discussed below), this provision is unnecessary. Moreover, it could lead to undesirable results. For example, the Supreme Court of the United States has held (see, e.g., Kelly v. Kosuga (1959) 358 U.S. 516) that ordinary supply arrangements are not made unenforceable merely because, for example, the goods sold were subject to a combination or conspiracy to affect their price. The Court has reasoned that in view of the adequate and independent antitrust sanctions available to the Government and to private parties, it is not necessary to create an additional sanction at the cost of rendering ordinary commercial transactions unenforceable. Thus, section 100 should be deleted.

Section 110 provides in part that "A person who is injured in his business or property by reason of anything forbidden or declared unlawful by this chapter" may sue to enjoin the unlawful practice and may recover threefold the

---

* Oil or gas drilling units and unitization arrangements authorized under either of these sections should be included. The express exemption provided in AS 31.05.110 (1) might be held not to apply to a later antitrust statute or to drilling units under AS 31.05.100.

damages sustained, along with costs and a reasonable attorney's fee. Even though damages are mandatorily trebled for violations of the Federal antitrust laws, there is reason to believe that the inflexibility of this punitive sanction has in many cases caused severe economic hardship well beyond any appropriate redress of the wrong committed. It would therefore seem desirable to provide for the recovery of actual damages subject to the court's discretion to increase the award up to three times that amount in cases of wilful and substantial violations. This would permit the court to assess the degree of the wrong and to award an appropriate judgment in the light of all circumstances. The damage sanction would remain an adequately strong deterrent, for in cases of wilful and substantial wrongs the court would be expected to increase the damages commensurately. This change could be accomplished by omitting "threefold" in line 24, and by adding after "suit" in line 26 these words: "provided that the court in its discretion may in cases of wilful and substantial violations increase damages to an amount not in excess of 3 times the actual damages sustained."

Subpart (a) (2) of section 110 authorizes private injunctive proceedings. This unduly terse provision should be expanded to make clear that the court will be guided by traditional equitable principles in granting such relief. It is therefore recommended that the following language be substituted for present lines 29 through 2?:

> "(2) may bring proceedings for injunctive relief, temporary or permanent, against threatened loss or damage to his property or business by a violation of this Act, when and under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity, under the rules governing such proceedings, and upon the execution of proper bond against damages for an injunction improvidently granted and a showing that the danger of irreparable loss or damage is immediate, a preliminary injunction may issue. If the court issues a permanent injunction, the plaintiff shall be awarded reasonable attorneys' fees together with the cost of suit."

It would also be desirable to amend section 110 to limit suits for multiple damages to plaintiffs other than the state or its governmental agencies. The purpose of providing multiple damages is to encourage enforcement of the

statute through private suits. No such encouragement is necessary when the plaintiff is the state itself or one of its political subdivisions or agencies. This is particularly true where, as here, the Attorney General is authorized to bring damage actions in behalf of "the state or any of its political subdivisions or governmental entities." This limitation can be achieved by inserting after "person" in the first line of section 110 the following parenthetical statement: "(other than a governmental body, the state, or any of its political subdivisions or public agencies)," and by amending section 120 as noted below.

Section 120. This section would give the state and any of its governmental entities injured by an antitrust violation the same remedy provided in section 110, i.e., to recover threefold the damages sustained. For the reasons stated above, this would be inappropriate and therefore subpart (a) of section 120 should be amended by inserting the words "it may sue for the actual damages by it sustained, and the cost of suit, as determined by the court" in place of the words "it shall have the same remedies provided in sec. 110 of this chapter."

Subpart (b) of section 120 authorizes the Attorney General to sue "on behalf of any citizen or class of citizens of the state if the state or its political subdivision also has a cause of action, to enforce the provisions of this chapter, or any comparable provisions of federal law." A comparison of this provision with Rule 23 of the Federal Rules of Civil Procedure indicates that it is far too brief and general to be workable. In short, no effort should be made to provide antitrust class actions without appropriate criteria to govern when a class action would be appropriate, e.g., whether the members of the class are too numerous to be joined as plaintiffs, whether there are common questions of law or fact that predominate over questions affecting only certain members of the class, whether the plaintiff's interest is such that the interests of the other members of the class will be fairly and adequately protected, etc. But apart from these difficulties, there does not appear to be any reason why there should be recommended to the Attorney General the added burden of prosecuting antitrust class actions in behalf of private parties. Nothing comparable has been done with respect to the Department of Justice or the Federal Trade Commission.

Section 150 would provide that any person or his agent who violates sections 10, 20, 40 or 50 "is punishable, if a natural person, by a fine not exceeding $10,000 or by imprisonment not exceeding one year, or by both; if the person is not a natural person then by a fine not exceeding $20,000." Under the Federal antitrust laws there are no criminal penalties for violations of section 7 or 8 of the Clayton Act, but only for violations of the Sherman Act. Nor should there be any criminal sanctions for violations of the proposed comparable sections 40 and 50, which as noted above, should be deleted for other reasons. But even if the substantive provisions of this bill were appropriately narrowed to the restraint of trade prohibitions of section 10, there would seem to be no reason to characterize such violations as crimes. Particularly is this true where, as with section 10, the language is broad enough to be applied ex post facto to new developments not defined as violations when the conduct was initiated. This problem has been handled under the Sherman Act by the Antitrust Division's declining to bring criminal proceedings except where clear cut flagrant violations are involved. There can be no assurance, however, that like restraint would be exercised by a state attorney general. The problem can be obviated, while providing a fully adequate deterrent, simply by limiting the sanctions to "civil penalties" in stated amounts to be imposed for "substantial and wilful violations" of section 10. This would also avoid the more cumbersome and formalistic criminal proceeding in favor of a relatively simple and efficient civil action to recover the penalties. It would also seem desirable to reduce the maximum fine for individuals to $5,000 per violation. This should prove an adequate deterrent without the crushing prospect that the larger fine could present for many individual defendants.

The foregoing changes could be effected by substituting for lines 24 through 27 of section 150, page 7, the following language:

> "shall if an individual pay to the state a civil penalty of not more than $5,000, and shall if a corporation, association, firm or partnership pay to the state a civil penalty of not more than $20,000."

Section 160. This section provides that "A final judgment or decree rendered in any civil or criminal proceeding brought by the state under this chapter shall be

prima facie evidence against the defendant in any other action or proceeding brought by any other party under this chapter, or by the state, a city or borough, under sec. 120, as to all matters respecting which the judgment or decree would be an estoppel between the parties in such other action or proceeding." This provision should be amended in several respects for, unlike the comparable Clayton Act provision,* it (1) does not limit the state proceedings to those brought to obtain an injunction or penalties, as distinguished from governmental damage actions, and (2) it is not required that the final judgment or decree be to the effect that the defendant has violated the state's antitrust law.

No reason appears why a state's provision of this kind should be broader than the Federal one. Subpart (a) could be brought into conformity with the comparable provision of the Clayton Act by amending it as follows:

> "A final judgment or decree rendered in any civil proceeding for injunctive relief or civil penalties brought by the state under this chapter to the effect that a defendant has violated this chapter shall be prima facie evidence against such defendant in any action or proceeding brought by any other party against such defendant under this chapter or by the state, a city or a borough, under sec. 120, as to all matters respecting which said judgment or decree would be an estoppel as between the parties thereto."

Subpart (b) of section 160 provides that the prima facie effect provision would not apply to consent judgments or decrees "entered before any complaint has been filed." This provision, like its Federal counterpart, is designed to save the enforcement resources of the government by encouraging compromise and settlement. But you cannot have a "consent judgment or decree" unless a complaint is on file to which it can relate. Therefore, following the Federal provision, the words in line 14 should be changed to read "entered before any testimony has been taken." Under Federal cases judgments upon pleas of nolo contendere have been held to be "consent judgments" within the meaning of the comparable Federal exception.

---

* Section 5(a), 15 U.S.C. 16(a).

Subpart (d), however, would provide that judgments rendered upon nolo contendere pleas would be given prima facie effect in subsequent proceedings. While it was recommended above to eliminate the proposed criminal sanctions, it should be noted that if retained, subpart (d) should be eliminated. Judgments upon pleas of nolo contendere serve the same function of compromise in criminal proceedings as consent decrees do in civil proceedings. No reason appears why this useful enforcement method should be vitiated.

Subpart (c) of section 160 should be deleted. It provides that for 60 days after a consent decree is filed any one "interested" under section 110 (private plaintiffs) or section 120 (governmental plaintiffs) may file "exceptions" to the form or substance of the decree which will be resolved by the court after a full hearing. There is no reason to believe that the executive discretion lodged in the Attorney General is inadequate to protect the public interest or should be subjected to review by plaintiffs free themselves to sue if they see fit. Note also that the proposed power of the court, after hearing, to "modify" the consent decree is incongruous. The court could not properly issue an unconsented to decree or judgment except upon the record after a full trial.

Section 170. This would bar any proceeding under the bill "unless commenced within four years after the claim accrues."* But this section goes on to provide that "a claim for a continuing violation is deemed to accrue at any time during the period of the violation."

There are two objections to section 170. The first is that the word "claim" in line 7 is not as clear as the words "cause of action," which are used in the comparable provision in section 4 B of the Clayton Act (15 U.S.C. 15b). The second objection is that if a claim for a continuing violation is deemed to accrue at any time during the period of the violation, it can be argued that if any damage was sustained within

---

* Except when the statute is suspended under section 160(c) which, like section 5(b) of the Clayton Act, suspends the statute of limitations during the pendency of civil or criminal government proceedings, and for one year thereafter, as to any private damage action based in whole or in part on any matter complained of in the government proceeding.

four years of commencement of the action then all damages deriving from the same course of conduct could be recovered even if they accrued decades before the action was brought. This would contradict the provision's purpose to prevent litigation over stale claims. The second sentence of section 170 should be deleted. Its apparent purpose is simply to provide that a plaintiff can recover for damages sustained within four years of commencement of his suit even if the continuing unlawful conduct was initiated more than four years prior to such commencement. This same result is reached under the general language of section 4 B of the Clayton Act.

Humble Oil comments 4-24-71

March 22, 1971

Re: 1971 Alaska Legislature
H.B. 154

H.B. 154 would enact a general antitrust statute for Alaska. The scheme of the bill is to adopt some of the general language of the Sherman Act, but to combine with it some particularized prohibitions found in the statutes of other states. This is an illogical combination which will cause much confusion and rob the statute of effectiveness.

Sections 10, 20 and 30. Section 10 adopts the language of Section 1 of the Sherman Act, prohibiting every contract, combination or conspiracy in restraint of trade or commerce. Of course, such a general prohibition cannot be literally applied, because every contract made in the ordinary course of business restrains trade in the strictest sense. For instance, the owner of an article can sell it but once, and when he contracts to sell it to another, the contract restrains him from selling it to any third person. Recognizing this, the federal courts have established the "rule of reason" which is the cornerstone of the great body of antitrust law of the nation. It is this rule which gives the courts the flexibility necessary to apply the principles of the antitrust laws to constantly changing business practices and patterns. To make certain that the fundamental rule of reason will be applied in Alaska, the word "unreasonable" should be inserted in Section 10 before the word "restraint."

Section 20 adds prohibitions against seven specified types of conduct, apparently patterned after California's Cartwright Act (Cal. Bus. & Prof. Code, §16720). There is some need for such provisions in the Cartwright Act because it contains no general prohibitions against restraints of trade like Section 1 of the Sherman Act and Section 10 of H.B. 154. But with this general prohibition in H.B. 154, the particularized prohibitions of Section 20 are unnecessary and can only cause confusion. For instance, Section 20 literally applies to every person "exclusive of members of a single business entity consisting of sole proprietorship, partnership, corporation or other single business entity." Taken literally, this would apply the provisions of Section 20 to the most ordinary relations between a parent and subsidiary corporations, even though these could not possibly involve any objectionable restraint of trade. The language of the various subsections is extremely vague and confusing and could only cause the courts great trouble in applying the act. For instance, no less than four of the seven subsections deal with price-fixing in varying language (subsections 2, 5, 6 and 7). Taken literally, Section 20 would

prohibit even the most ordinary and innocent business transaction. Any contract of sale might be said to "create ... restrictions in trade" (subsection 1) or to "establish or settle the price of any article of trade" (subsection 7).

All of the actually anticompetitive arrangements which Section 20 are designed to deal with would in fact be covered by the general language of Section 10 with the addition of the word "unreasonable" as recommended above. Section 20 should be deleted entirely.

Section 30 is designed to except from the effect of Sections 10 and 20 certain specified transactions, "(u)nless the effect ... shall be to substantially lessen competition or to create a monopoly ...." The exceptions specified would permit the sellers of businesses and withdrawing partners to agree not to compete, would permit leases of business property to contain certain restrictions upon the use of property by the lessee and the lessor (assuming that the word "lessee" in the third line of subsection 3 is a misprint, intended to read "lessor") and would permit an employee to agree not to use his employer's trade secrets in competition with the employer. These exceptions, in themselves, are reasonable, but they fail to include various other arrangements which have been found by the courts not to be anticompetitive in effect, yet which might be held to be condemned by the literal language of Section 20.* It is very undesirable to attempt the specification of exceptions to the literal language of the statute, when the list will undoubtedly be incomplete, thereby raising serious questions about the legality of perfectly innocent conduct. This merely illustrates further how unwise it is to attempt the particularization of prohibited acts such as is found in Section 20. It shows the wisdom of relying, instead, upon a statement of general principle such as Section 1 of the Sherman Act and Section 10 of H.B. 194 (with the addition of the word "unreasonable"), which will much more effectively accomplish the actual purposes of the bill.

---

* See generally United States v. Keystone Pipe & Steel Co. (5 Cir. 1898) 85 Fed. 271, 280-83, affirmed (1899) 175 U. S. 211; 2 Restatement, Contracts, § 516. See also, Snap-On Tools Corporation v. F.T.C. (7 Cir. 1963) 321 F.2d 825, 837; Savon Gas Stations Number Six, Inc. v. Shell Oil Company (4 Cir. 1962) 309 F.2d 305, certiorari denied (1962) 372 U.S. 911.

Section 50. This section provides that no person may at the same time be a director, officer, partner or trustee of two or more corporations or other entities which are competitors. It was patterned after Section 8 of the Clayton Act, but it goes further than the Clayton Act in two respects: No minimum size criterion is provided; and Section 50 applies not only to directors, but also to officers, partners and trustees. It seems doubtful that the state needs any such statute as Section 50, because combinations in unreasonable restraint of trade would be reached by Section 10, and interlocking directorates of any significance would be reached by the federal law. If such provision is to be enacted, it certainly seems reasonable that it should not go beyond the provisions of the Clayton Act, and especially that it should provide some minimum size criterion (although the Clayton Act's standard of $1 million might be too high).

Sections 50 and 70. These sections provide exemptions for labor organizations and certain cooperative associations. It is most important that language be added to include actions or arrangements authorized or regulated under AS 31.05.100 and AS 31.05.110, which authorize oil and gas drilling units and unitization arrangements. AS 31.05.110 contains an antitrust exemption, but this should also be expressed in the antitrust statute itself, to avoid any question about the effect of the later statute and any question about the effect on AS 31.05.100. Cmp. AS 38.05.180

Section 100. This section provides in the most general language that any agreement in violation of any provision of the chapter is void and unenforceable. The literal application of this language would go well beyond the effect of the federal antitrust laws, which are held to avoid contracts only if the enforcement of them would give effect to the illegal provisions themselves. Kelly v. Kosuga, 358 U.S. 516. Section 100 could have two very unfortunate effects: (1) it could give a windfall to guilty parties, for instance, by allowing them to refuse to pay for goods sold and delivered; and (2) it could result in antitrust defenses being raised in a great many ordinary suits arising out of commercial transactions, which would unduly burden the courts and might result in serious distortion of the antitrust laws by forcing the courts to interpret them in cases between private litigants where the public interest is not properly represented by any public official. Section 100 should be deleted, leaving the Alaska courts to follow the federal law on this subject, refusing to enforce provisions of contracts which actually constitute unreasonable restraints of trade under Section 10.

Section 120. Subsection (b) provides that the attorney general not only may bring actions on behalf of the state or any political subdivision but also "on behalf of any citizen or class of citizens of the state" if the state or any political subdivision also has a cause of action. There is no such provision as this in the federal law and no need for it has ever appeared. It would surely burden the attorney general unduly to require him to represent private parties. But the most serious defect in this provision is that it attempts to provide for class actions in the few words quoted above, without providing any criteria whatever to guide the courts in determining whether a class action is appropriate or feasible. Experience under Rule 23 of the Federal Rules of Civil Procedure shows that it is essential that such criteria be provided. The above quoted provision of Subsection (b) should be deleted.

Section 160. This section provides that judgments in proceedings brought by the state shall be prima facie evidence against the same defendant in private actions. It goes beyond Section 5(a) of the Clayton Act in that it is not limited to actions brought by the state for injunction or penalties. It could apply judgments in simple damage suits brought by the state. Subsection (a) should be modified to read "in any criminal proceeding or injunction suit brought by the state."

Subsection (b) provides that the Section shall not apply to consent judgments or decrees entered "before any complaint has been filed." It is not apparent how a judgment could be entered before any complaint is filed. Apparently this language should be changed to read "before any testimony has been taken," like the Clayton Act.

Subsection (c) of Section 160 apparently would authorize the court to modify consent decrees without the consent of the parties. This, of course, should not be done, since no final judgment can be entered without the consent of the parties, except after trial of the case.

Section 170. This Section provides a four-year statute of limitations, but in the provision preserving causes of action for continuing violations, language is used which could be construed to authorize recovery of damages accrued more than four years before commencement of the action, if the violation has continued to a time within the four-year period. This should be changed to accord with 50 U.S.C.A. §15b to make it plain that even though causes of action for continuing violations extending to a time within the statute are preserved, damages accrued more than four years before commencement of the action cannot be recovered.

HB 164

UNITED STATES DEPARTMENT OF JUSTICE

WASHINGTON, D.C. 20530

Address Reply to the
Division Indicated
and Refer to Initials and Number

June 7, 1971

RWMcL:DIB:BG
60-03-13

Mr. Arthur H. Peterson
Revisor of Statutes
The Legislature
State of Alaska
Pouch Y - State Capital
Juneau, Alaska 99801

Dear Mr. Peterson:

This is in response to your letter of March 26, 1971, requesting the Antitrust Division's comments on Alaska House Bill No. 164 (7th Leg., 1st Sess.).

We are pleased to learn that Alaska is considering the enactment of state antitrust legislation. Many forms of anticompetitive conduct, injurious to the economy of a state and the welfare of its citizens, do not clearly affect interstate commerce and may therefore be outside the scope of the federal antitrust laws. This may be particularly true with respect to local service industries, which are a major source of today's inflationary pressures.

We have analyzed the various provisions of House Bill No. 164 and, pursuant to your request, shall indicate below a number of suggestions which we believe would make this particular legislation more effective. Initially, however, a few general comments may be helpful.

The goal of a state antitrust law should be effective enforcement at a low cost. This implies several points. First, excessive detail and complexity should be avoided in draftsmanship. Complex statutes have tended to bog down antitrust enforcement in many states, as the courts have attempted to deal with a maze of overlapping or conflicting statutory provisions of great specificity. Therefore, in view of this experience, we feel that simplicity without omission should be the goal in a statute which attempts to create a basis for effective state antitrust enforcement. Secondly, the substantial existing body of federal case law should be utilized by the states, wherever appropriate. This can be done by use of substantive statutory provisions following closely the federal provisions or by statutory language and legislative history making clear the intent of the Alaskan legislature to adopt this body of federal jurisprudence. This should be of significant assistance to the courts of the state as they attempt to apply the law to specific factual situations. Thirdly, the importance of relief and investigative provisions in an antitrust statute should not be underestimated; state enforcement officers must be provided with effective means by which to discover violations of the statute if vigorous enforcement is to be achieved. Finally, the private sector, properly motivated, can be a significant aid to state enforcement. The theme of these very general comments will reoccur in the ensuing discussion of specific provisions of the proposed statute.

I. Substantive Provisions

Section 45.51.010

Section 10 of the proposed bill declares contracts, combinations and conspiracies in restraint of trade to be illegal in language virtually the same as that used in the first sentence of Section 1 of the Sherman Act (15 U.S.C. 1). The use of such language will probably imply to the

Alaska courts a legislative intent to adopt the body of jurisprudence which has evolved under Section 1 of the Sherman Act. However, the use of a general prohibition in Section 10 and both specific and general prohibitions in Sections 20, 40 and 50 could cause certain confusion with respect to relief and enforcement. Thus, if the major purpose of Section 10 is to indicate a legislative intent to adopt federal antitrust precedent, this intention could be made even more explicit by substituting for the proposed general language more specific language such as that found in New Jersey's recent antitrust law, N.J.S.A. 56: 9-18, which requires that the state statute be interpreted in harmony with federal antitrust precedent.

Therefore, we would suggest that Section 10 read as follows:

> Section 45.51.010 - Construction. This Act shall be construed in harmony with judicial interpretations of comparable Federal antitrust statutes.

Sections 45.51.020. 45.51.040. 45.51.050

The enumerations in these sections which, along with Section 10, comprise the substantive portion of the statute, illustrate the difficulties which have resulted from unnecessary attempts to be overly precise in drafting this kind of legislation. For example, in Section 20, the first of the seven prohibited acts of agreement is to "create or carry out restrictions in trade or commerce." This seems intrinsically as broad as the Sherman Act formulation in Section 10, but brings to the bill none of the accumulated judicial interpretations which have given the Sherman Act certain specific meanings including

the essential "rule of reason" construction and a list of "per se" violations. The third prohibited act, to "prevent competition," is too narrow because antitrust violations restrain competition; they seldom prevent it. The sixth and seventh prohibited acts are confusingly similar definitions of price fixing.

Sections 40 and 50 are modeled after provisions of the federal antitrust laws and, like those laws, contain imprecise terms and significant weaknesses. Section 40 would be applicable only to corporations, and thus might be too narrow in scope. Section 50 contains some confusing provisions concerning designees.

Section 20 could, in our opinion, be usefully employed to both broadly prohibit participation in anticompetitive agreements and the agreements themselves, and to enumerate, in plain language specific anticompetitive acts. Section 20 could also be used to incorporate the substance of Section 3 of the Clayton Act (15 U.S.C. 14) which is directed at tie-in sales, exclusive dealing, requirements contracts, and "full line forcing." Each of these is a serious anti-competitive practice not now covered by the bill except as it may constitute a generalized restraint of trade. Finally, Section 20 could incorporate the anti-merger provisions and the interlock provisions of the bill now contained in Sections 40 and 50. The remedial provisions of Sections 40 and 50 could more clearly be stated in a general relief section. Section 20 could, therefore, read as follows:

Section 45.51.020 - Prohibited Acts

(A) It shall be a misdemeanor for two or more persons to enter into an agreement with each other for the purpose of restraining trade or lessening competition by establishing, determining, or substantially influencing, as to any commodity or service,

(1) the price or other consideration which any person shall cha·ge or pay;

(2) the quantity which any person shall produce, sell or buy, or in which such person shall deal;

(3) the portion or share of the total supply or demand in any transaction to be produced, sold, bought, dealt in or accounted for by any person;

(4) the geographical area in which any person may produce, sell, buy, deal or conduct transactions; or

(5) the person or persons to whom sales may be made, or from which purchases may be made, or with whom dealings may be had or transactions conducted.

(B) It shall be a misdemeanor for any person to monopolize or attempt or conspire to monopolize trade in any commodity or service.

(C) It shall be a violation of this Act:

(1) for any person to do anything prohibited by subsections (A) or (B);

(2) for any person to enter into any agreement with the purpose, or with the effect, of unreasonably restraining trade or lessening competition in any commodity or service;

(3) for any person to sell, purchase or lease any commodity or service on the condition, express or implied, that the other party to the transaction, or any other person,

(a) purchase, sell, or lease any additional commodity or service from or to such person, or any person designated by him; or

(b) not purchase, sell, or lease any commodity from or to any other person;

where the effect may be to substantially lessen competition in any line of commerce in the State of Alaska or any part thereof;

(4) for any person to, at the same time, be a director, officer, partner, manager or trustee in (a) any two or more firms if such firms are or shall have been theretofore, by virtue of their business and location or operation, competitors, or (b) in any two or more firms where the effect may be to substantially lessen competition or tend to create a monopoly; or

(5) for any person to acquire, directly or indirectly, an asset from any person if the effect may be to substantially lessen competition in any line of commerce in the State of Alaska or any part thereof.

Section 20 as proposed above would be divided into three subsections. The first, 45.51.020(A), is basically limited to those actions which are per se violations of federal antitrust statutes. Thus, it prohibits price fixing, output limitations, production and territorial sharing, and group boycotts. The anticompetitive effects of these practices are most serious and their illegality under federal antitrust law is clearly established; therefore criminal prosecution is appropriate.

The second subsection, 45.51.020(B), is based upon Section 2 of the Sherman Act and would make criminal monopolization, and attempts or conspiracies to monopolize.

The third subsection, 45.51.020(C), contains the remainder of the substantive provisions of the statute. It is contemplated that violations of this subsection would be subject to civil remedies -- injunctive relief or actions for damages -- since the legality of the practices prohibited therein and not covered in subsections (A) or (B) may turn upon an analysis of their competitive effect under particular market conditions. It should be noted that subsection (C) includes all the acts enumerated in subsection (A) or (B). Thus, violations of subsections (A) or (B) could be proceeded against by criminal and/or civil process. Subsection (C)(3) covers tie-ins, reciprocity, exclusive dealing arrangements and negative covenants. Subsection (C)(4) covers interlocks, making interlocks illegal, irrespective of proof of anticompetitive effect if the firms are or could be direct competitors, and applying the Clayton Act competitive effect standard to all other interlocks. This permits the dissolution of interlocks, and thus increases the possibility of competition, between potential competitors. Finally, subsection (C)(5) covers acquisitions, but unlike Clayton Act §7 (15 U.S.C. 18), it is not limited to acquisitions by and from a corporation. Any acquisition made by a person, as defined infra, is subject to the law, whether the vendor or purchaser is a corporation or not.

Section 45.51.030

Section 30 sets forth four kinds of acts which will be presumptively lawful unless the effect "shall be to substantially lessen competition or to create a monopoly." Since most of these practices have traditionally been found to be legal with respect to the federal antitrust laws, it seems unnecessary and perhaps unwise to single them out from other legal practices.

II. Enforcement Provisions

Section 45.51.100

Section 100 would render void and unenforceable agreements violative of the Act. As currently worded, Section 100 could allow businessmen to use the antitrust laws as a means of avoiding normal contract responsibilities, i.e., payment for goods already received, where it was to their advantage to do so. Thus, we feel that the provision is overly broad and might result in courts refusing to find a violation in order to avoid an inequitable decision between the private litigants. On the other hand, the provision has some obvious usefulness as a deterrent. Therefore, we would suggest altering this provision so that a party could not refuse to pay for goods already received, but could refuse to continue performing under a contract which violated this Act. Cf. Kelly v. Kosuga, 358 U.S. 512 (1959). Such a provision might read as follows:

> Section 45.51.100 - Contracts Voidable. A contract or agreement in violation of any provision of this chapter is voidable by either party as to any future performance by either party, except for payment for goods already received, and such future performance, except for payment for goods already received, may not be enforced at law or in equity.

Section 45.51.120

Section 120 provides the state and its subdivisions the same injunctive and treble damage remedies provided private litigants under Section 110. This is a departure from federal law (15 U.S.C. 12a) which limits the United States' recovery to single damages for its injuries.

Section 45.51.130

Section 130 provides that the Attorney General may bring proceedings to enjoin violation of this Act. Consideration might be given to providing borough attorneys with concurrent enforcement jurisdiction. Such a measure might create a mechanism for effective enforcement. Under a system of dual enforcement responsibility, however, the Attorney General should be allowed to assume control of any litigation initiated by borough officials. We would suggest the following language:

> Section 45.51.130 - Enforcement. Jurisdiction to enforce this Act, in addition to that noted in Section 110, is vested concurrently in the Attorney General and borough attorneys. When a borough attorney brings an action under this Act, however, the Attorney General may assume full control of the investigation and litigation by giving appropriate notice to the borough attorney.

Section 45.51.150

Section 150 provides the penalties for violation of the Act. As drafted, it does not seem to us to take into account the differences between the actions which would violate this statute. There has also been a belief in some quarters that inflexibly harsh penalties discourage effective enforcement of state antitrust statutes. We

feel that criminal penalties should be limited to the clearly illegal activities of violators, and that injunctive relief should be flexible and left to the discretion of the court. We would suggest the following language:

> Section 45.51.150 - Penalties for Violation
>
> (A) A violation of Section 20(A) or (B) of this Act shall constitute a misdemeanor, and shall be punishable by fine of up to $50,000, or by imprisonment for up to one year, or both.
>
> (B) A finding of a violation of Section 20(A),(B) or (C) of this Act shall empower the superior court to issue such judgment or decree as it considers necessary to remove the effects of any violation which it finds, and to prevent such violation from continuing or from being renewed in the future. The court may, at its discretion, exercise all equitable powers necessary for this purpose, including, but not limited to, injunction, divestiture of property, termination of business relationships, divorcement of business units, dissolution of corporations or associations, and suspension or termination of a license, franchise, or charter issued under the authority of this state.

In view of the size of many potential violators, we have suggested making the maximum fine $50,000 rather than $20,000 in order to provide a more meaningful deterrent.

Section 45.51.160

Section 160 contains the prima facie provisions, giving such effect in subsequent cases to final judgments obtained by the state. These provisions parallel §5 of

the Clayton Act (15 U.S.C. 16). Unlike the Clayton Act, the state itself would be able to rely on its final judgment in a subsequent damage action. Section 160(b) makes the basic provision inapplicable to "consent judgments or decrees entered before any complaint has been filed." We doubt that the state would submit, or a court accept, a consent judgment without an accompanying or previously filed complaint. Indeed, a court might lack jurisdiction under those circumstances. We therefore suggest a return to the Clayton Act language, "consent judgments or decrees entered before any testimony has been taken." We would favor rewording these provisions as follows:

> Section 45.51.160 - Judgment in Favor of the State as Evidence in Action. The final judgment or decree rendered in any action brought by the State of Alaska under Section 20, to the effect that defendant has violated Section 20, shall be prima facie evidence against such defendants in any action brought by any party against said defendants under Sections 110 or 120, as to all matters respecting which said judgment would be an estoppel as between the parties thereto. This Section shall not apply to consent judgments or decrees entered both before any testimony has been taken and before any finding of illegality by the court, but shall apply to judgments or decrees entered on pleas of nolo contendere.

III. Investigatory Provisions

Effective enforcement requires comprehensive investigation before civil or criminal proceedings are initiated. Enforcement officers should have the power to obtain information necessary to make a responsible

decision as to whether to initiate formal proceedings. H.B. 164 does not confer any specific discovery powers upon the Attorney General. If the proposed law is to be effective, this omission must be rectified.

Since 1962, the Antitrust Civil Process Act (15 U.S.C. 1311-1314) has allowed the Department of Justice, prior to the institution of an action, to serve a civil investigative demand upon any legal entity, requiring it to produce documents for examination. Several states have such provisions, but they vary widely in scope. Some are similar to the federal statute, e.g., N.C. Gen. Stats. §75-10, and some are broader, e.g., N.Y. Gen. Bus. Law §343.

The federal statute has some significant limitations. It applies only to documents, and only to persons under investigation. This obviously limits the effectiveness of the provision in compiling adequate investigatory records from which decisions on the initiation of formal proceedings must be made. In contrast, the recently-enacted New Jersey Antitrust Act contains a very broad investigatory provision, giving the Attorney General discretionary power to institute investigation, subpoena witnesses and compel the production of documents. N.J.S.A. 56:93 (1970).

We believe that the appropriate provision for a state antitrust statute would be somewhere in between these two examples. The enforcing officer should not be limited to compelling the production of documents but should also be permitted to depose individuals for relevant information. With the proper safeguards, the enforcing officer should also be able to compel documents and testimony from individuals who are not themselves being investigated but who have information necessary to a properly instituted investigation. Therefore, we would suggest that any statute finally adopted include the following provisions:

(A) The Attorney General shall have the power to investigate alleged or suspected violations of this Act and to (1) compel the appearance and examination under oath of any person under such investigation, including the officers and directors of any corporation under such investigation, and (2) to compel the production of, and to inspect and copy, any or all tangible documents or recordings in the possession of or under the control of any person under such investigation, or any officer or director of any organization under such investigation.

(B) Upon a showing to the superior court that such is reasonably necessary to an investigation under subsection (A) of this Section, the Attorney General shall have the power to (1) compel the appearance and examination under oath of any person, and (2) to compel the production of, and to inspect and copy, any and all tangible documents or recordings.

The statute should also contain provisions for the enforcement of these discovery powers, as well as provisions which would take into account the possibility of the privilege against self-incrimination being raised as a bar to production of documents or testimony. See, e.g., 38 Ill. Rev. Stats. §§60-7.6, 60-7.7.

IV. Definitions

If the above suggestions were to be adopted, the bill should include the following definitions in an appropriate section:

"Person" shall mean any natural person, or any corporation, partnership or association of persons.

"Asset" shall include any property, tangible, real, personal, or mixed, and wherever situate, and any other thing of value.

"Commodity" shall mean any kind of real or personal property.

"Service" shall mean any activity not covered by the definition of "commodity" which is performed in whole or part for the purpose of financial gain.

We hope that our comments have been responsive to your request. If we can be of any further assistance to you in this or other matters related to our experience, you can count on our continued cooperation.

Sincerely yours,

RICHARD W. McLAREN
Assistant Attorney General
Antitrust Division

Acting Director of Policy Planning

HB-164

RE: Proposed Antitrust Legislation

My general feeling is that the antitrust bill which has passed the House is unduly vague for an area of the law which has as much history as antitrust. I am thoroughly in agreement with the recommendations of the U. S. Department of Justice which were mailed to Arthur H. Peterson, Revisor of Statutes, in connection with this bill. However, if we wish to continue with this existing bill which has passed the House I would want to recommend the following amendments:

1. A provision utilizing the juris prudence which is involved under the Sherman Act should be inserted. An example is provided by the U. S. Department of Justice: "This act shall be construed in harmony with judicial interpretations of comparable federal antitrust statutes."

2. HB 164 states:

> Sec. 45.51.010(c) In deciding whether conduct unreasonably restrains, monopolizes or attempts to monopolize trade or commerce, the determination of the relevant market or effective area of competition shall not be limited by the boundaries of this state.

It would seem to be understood that where the relevant market goes beyond the State of Alaska that relevant market should be considered. Thus, this paragraph would seem to be

unnecessary, unless the promoters are seeking to use it for the purpose of reading in a legislative intent not to prosecute multi-state companies located in Alaska.

For example, the oil companies have operations in the other northwest states. In those other states there is a competitive oil and gas distribution situation. In Alaska, however, there are only a few competitors of which Standard Oil of California is clearly dominant. Normally one would interpret the relevant market for gasoline and oil products to be a market in which the consumer has the opportunity to choose from which to purchase. However, by adding this provision those companies could argue, assuming they were accused of monopolization, that since their total market is competitive they are exempt from the Alaska antitrust law.

Reasoning such as this could destroy the usefulness of the antitrust law in the case of multi-state corporations but retain its usefulness for corporations which operate only in Alaska. Such discrimination does not seem reasonable and thus the provision, paragraph (c), would be better left out.

3. AS 45.51.020 refers to contracts voidable. This provision has a danger of allowing businessmen to use antitrust laws as a means of avoiding normal contract responsibilities. Thus, where such a provision is included, it should be very specific. Here again I suggest the Justice Department provision:

> A contract or agreement in violation of any provision of this chapter is voidable by either party as to any future performance by either party, except for payment for goods already received, and such future performance, except for payment already received, may not be enforced at law or in equity.

RE: Antitrust Legislation

The United States Department of Justice, Antitrust Division, made some comments on Alaska's proposed antitrust bill. Their revisions were based on the following premises:

> The goal of a state antitrust law should be effective enforcement at a low cost. This implies several points. First, excessive detail and complexity should be avoided in draftsmanship. Complex statutes have tended to bog down antitrust enforcement in many states, as the courts have attempted to deal with a maze of overlapping or conflicting statutory provisions of great specificity. Therefore, in view of this experience, we feel that simplicity without omission should be the goal in a statute which attempts to create a basis for effective state antitrust enforcement. Secondly, the substantial existing body of federal case law should be utilized by the states, wherever appropriate. This can be done by use of substantive statutory provisions following closely the federal provisions or by statutory language and legislative history making clear the intent of the Alaskan legislature to adopt this body of federal jurisprudence. This

should be of significant assistance to the courts of the state as they attempt to apply the law to specific factual situations. Thirdly, the importance of relief and investigative provisions in an antitrust statute should not be underestimated; state enforcement officers must be provided with effective means by which to discover violations of the statute if vigorous enforcement is to be achieved. Finally, the private sector, properly motivated, can be a significant aid to state enforcement. The theme of these very general comments will reoccur in the ensuing discussion of specific provisions of the proposed statute.

This principles are sound and are given to us by an organization with much more expertise than we can find within the state.

Attached is a draft of an antitrust bill using provisions they have suggested plus a few additions especially pertinent to Alaska.

OKH:agm

Attachment

PROPOSED AMENDMENTS TO HOUSE BILL NO. 164, entitled
"An Act prohibiting monopolies and combinations in
restraint of trade."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

Section 1. AS 45 is amended by adding a new chapter to read:

CHAPTER 51. MONOPOLIES: RESTRAINT OF TRADE.

ARTICLE 1. SUBSTANTIVE PROVISIONS.

[Amend section 10 as follows:]

Sec. 45.51.010. UNREASONABLE RESTRAINTS OF TRADE OR COMMERCE, MONOPOLIES PROHIBITED. (a) Every contract, combination in the form of trust or otherwise, or conspiracy, in unreasonable restraint of trade or commerce is unlawful.

(b) It is unlawful for any person to monopolize or attempt to monopolize trade or commerce in the relevant market for the specific purpose of excluding competition or controlling, fixing or maintaining prices.

(c) In deciding whether conduct unreasonably restrains, monopolizes or attempts to monopolize trade or commerce, the determination of the relevant market or effective area of competition shall not be limited by the boundaries of this state.

[Delete present sections 20 through 50.
Renumber as section 20 and amend present
sections 60, 70 and 80 as follows:]

Sec. 45.51.020. EXEMPTION OF LABOR ORGANIZATIONS, CERTAIN COOPERATIVE ORGANIZATIONS, CERTAIN SPECIALLY REGULATED INDUSTRIES AND COMMERCIAL FISHING. (a) This chapter does not forbid the existence or operation of labor, agricultural or horticultural organizations created for the purpose of mutual help, and not conducted for profit, or forbid or restrain members of such organizations from lawfully carrying out the legitimate objects thereof; nor are those organizations or members illegal combinations or conspiracies in restraint of trade under the provisions of this chapter.

(b) Nothing contained in this chapter shall be construed to forbid actions or arrangements authorized or regulated under those acts of the United States which exempt such actions or arrangements from the antitrust laws of the United States or under the following statutes of this state.

(1) AS 10.15
(2) AS 21.87
(3) AS 31.05.100
(4) AS 31.05.110

(c) Persons engaged in the business of commercial fishing may act together in associations, corporate or otherwise, with or without capital stock, in collectively handling and marketing fish without violating the provisions of this chapter. Such associations may have marketing agencies in common; and such associations and their members may make the necessary contracts and agreements to effect such purposes.

ARTICLE 2. ENFORCEMENT PROVISIONS.

[Delete present section 100. Renumber and amend present section 110 as follows:]

Sec. 45.51.100. SUITS BY PERSONS INJURED. (a) A person (other than a governmental body, the state, or any of its political subdivisions or public agencies) injured in its business or property by reason of a violation of the provisions of this chapter

(1) may recover actual damages sustained, and reasonable attorneys' fees and the costs of the suit. The court in its discretion may in cases of wilful and substantial violations increase damages to an amount not in excess of three times the actual damages sustained; and

(2) may bring proceedings for injunctive relief, temporary or permanent, against threatened loss or damage to his property or business by a violation of this chapter, when and under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity, under the rules governing such proceedings; and upon the execution of proper bond against damages for an injunction improvidently granted and a showing that the danger of irreparable loss or damage is immediate,

a preliminary injunction may issue. If the court issues a permanent injunction, the plaintiff shall be awarded reasonable attorneys' fees together with the costs of suit.

(b) The remedies provided in this section are cumulative and may be sought in one action.

[Renumber as section 110 present sections 120 and 130, and amend as follows:]

Sec. 45.51.110. SUITS BY STATE OR LOCAL GOVERNMENT. (a) The attorney general may institute proceedings to prevent and restrain violations of this chapter. In addition to granting prohibitory injunctions and other restraints for a period and upon terms and conditions necessary to deter the defendant from, and insure against, the committing of a future violation of this chapter, the court may grant mandatory injunctions reasonably necessary to restore and preserve competition in the trade or commerce affected by the violation. The court may issue temporary restraining orders or prohibitions. The court may enter consent decrees.

(b) A governmental body, the state, or any of its political subdivisions or public agencies injured in its business or property by reason of anything forbidden in this chapter may recover the actual damages by it sustained and the cost of

suit, as determined by the court. The attorney general on behalf of the state or any of its political subdivisions or public agencies, or the political subdivision or public agency at the direction of, or with the permission of the attorney general, may institute this action or damage action for a violation of comparable federal law.

[Renumber present section 140 as 120.]

Sec. 45.51.120. JURISDICTION OF COURT. Actions allowed by this chapter shall be brought in the superior court.

[Renumber as section 130 present section 150, and amend as follows:]

Sec. 45.51.130. PENALTY FOR VIOLATION. (a) A person who violates section 10 of this chapter, including any principal, manager, director, officer, agent, servant or employee, who has engaged in or has participated in the determination to engage in an activity that has been engaged in by any association, firm, partnership, trust or corporation, which is in violation of section 10 of this chapter, shall if an individual pay to the state a civil penalty of not more than $5,000, and shall if an association, firm, partnership, trust or corporation pay to the state a civil penalty of not more than $20,000.

(b) Whenever a corporation violates section 10 of this chapter, the violation shall be deemed to be also that of the individual director, officer or agent of the corporation who has authorised, ordered or done any of the acts constituting in whole or in part such violation.

[Renumber as section 140 present section 160, and amend as follows:]

Sec. 45.51.140. JUDGMENT IN FAVOR OF THE STATE AS EVIDENCE IN ACTION: SUSPENSION OF LIMITATION. (a) A final judgment for injunctive relief or civil penalties brought by the state under this chapter to the effect that a defendant has violated this chapter shall be prima facie evidence against such defendant in any action or proceeding brought by any other party against such defendant under this chapter or by the state, a city or a borough under sec. 110(b), as to all matters respecting which said judgment or decree would be an estoppel as between the parties thereto.

(b) This section does not apply to consent judgments or decrees entered before any testimony has been taken.

(c) Whenever a proceeding is instituted by the state to prevent or restrain violations of this chapter, or to recover civil penalties therefor, the running of the statute of limitations in respect of each private right of action arising under sec. 100 (a) (1) of this chapter, and based in whole or in part on any matter complained of in the proceeding, shall be suspended during the pendency thereof, including any appeal, and for one year thereafter; provided, however, that whenever the running of the statute of limitations in respect of a cause of action arising under sec. 100(a) (1) of this chapter is suspended hereunder, any action to enforce such cause of action shall be forever barred unless commenced either within the period of suspension or within four years after the cause of action accrued.

[Renumber as section 150 present section 170, and amend as follows:]

Sec. 45.51.150. LIMITATION OF ACTIONS. An action under this chapter is barred unless commenced within four years after the cause of action accrued, except as otherwise provided in sec. 140 of this chapter. No cause of action barred on the effective date of this chapter is revived by this chapter.

ARTICLE 3. GENERAL PROVISIONS.

Sec. 45.51.200. DEFINITIONS. In this chapter

(1) "article of trade" includes, but is not limited to, goods, merchandise, natural resources, whether or not severed, extracted, harvested or produced, agricultural products, produce, choses in action, commodities, and any other article of commerce; it includes trade or business in service trades, transportation, insurance, banking, lending, advertising, bonding and any other business whether or not that business furnishes a personal service;

(2) "purchase" or "buy" includes "contract to buy," "lease" and "contract to lease";

(3) "sale" or "sell" includes "contract to sell," "lease" and "contract to lease."

WILLIAM A. EGAN, GOVERNOR

DEPARTMENT OF LAW

OFFICE OF THE ATTORNEY GENERAL / POUCH K — STATE CAPITOL
JUNEAU 99801

April 6, 1971

The Honorable Walter M. Hickel, Chairman
House Commerce Committee
Alaska State Legislature
Rm. Y, Capitol Building
Juneau, Alaska

Re: House Bill No. 104, Your Letter of March 26, 1971 Requesting Comments

Dear Representative Hickel:

I regret that our shorthanded staff and the many requirements on this Department have prevented me from answering this letter earlier and from answering it in the detail which we would prefer. However, there is some question whether much time need be spent lingering over those provisions which are taken from the historic body of federal anti-trust law. The objections made have been made in one form or another since 1890 and have been discussed more adequately on many previous occasions than I could do here. The basic opposition to anti-trust legislation comes not from individuals or corporations who feel that a particular section is onerous, unwieldy or unworkable, but from those who feel that no anti-trust legislation should be adopted.

With regard to the specific points raised:

1. "Passage of HB 104 can only unreasonably stifle economic growth and development of the resources in Alaska."

This criticism is based on the premise that the opportunity to engage in combinations in restraint of trade tend to monopolize industry in the State of Alaska have contributed to the economic growth and development of

the State. Nothing could be further from the truth. [illegible] is a predatory, non-free enterprise system enactment. It is based on the assumption that economic growth and development will take place at the optimum rate if the State acts to inhibit the activity of those who prefer not to trust in the workings of the laissez-faire system, but wish to establish new ground rules.

2. "S 104 makes every combine operating on the North Slope illegal. The same is true for the Alaskan pipeline."

I am sure this is not true, otherwise, the federal authorities would have moved in by now. They will certainly be so later as the product of this effort moves into interstate commerce. Needless to say, I could not rule on the legality of any arrangement on the North Slope in the absence of it being specifically brought to my attention. However, from my existing status familiarity with operations in that area, I know of no obvious violations. The actual [illegible] operators on the North Slope and Alyeska Pipeline Service Company make it all but impossible for [illegible] to avoid the impact of federal anti-trust. I would submit that these major companies are quite careful to conduct themselves with circumspection in the vicinity of the subject of these laws.

3. "S 104 exempts commercial fishing from the [illegible] of the act. For economic and growth reasons, it would seem sound to exempt the [illegible] industry."

I am sure that the commercial fishermen of Alaska [illegible] this analogy with [illegible]. The reason the commercial fishing industry is exempted is that commercial fishing in Alaska is [illegible] of thousands of very small operations. The commercial fisherman is much more analogous in his relations to [illegible] to the individual workman who, in effect is selling his own labor. At the same time, his prosperity [illegible] upon his ability to bargain with far larger economic units [illegible] the fish processing industry. The exemption for the fishermen is put in the act for much the same reason labor unions are exempt under the federal act.

4. As to S.1.010 should improve on the Sherman Act by inserting, the word "unreasonable" before "restraint of trade."

As the commentator points out, for 60 years the Supreme Court of the United States has been holding that this is generally what the 1890 Legislature intended. There is an enormous advantage in adopting the wording of a statute from another jurisdiction in toto. With that wording, the patina of interpretation of the courts grown up over a period of years is accepted. When that language is altered, it opens the door to new arguments about what the new legislative enactment might be. All anti-trust lawyers know what the Sherman Act prohibition means. We would have a whole new line of litigation testing the meaning of the new act if this wording was changed.

5. "The specific enumeration of prohibited acts under proposed AS 45.51.020 adds nothing and may be subject to misconstruction by the courts."

The absence of these provisions might also be misconstrued by the courts. Again, these are provisions from federal anti-trust law and our courts might draw some negative implication from their absence.

Any act of this nature, which is now part of the entire common law of anti-trust, represents some kind of balance between general terms and specific terms. The meaning of the former is really restricted to lawyers skilled in the law, knowing how the courts have interpreted the terms, would have much less of the nature of their application. Specific prohibitions can be addressed to specific practices. They are warnings to industrialists as well as lawyers, as to specific matters which the general proposition contemplates.

In addition, the decisions give additional details with regard to the specific provisions which also would be helpful to be referred to as the common law develops. To now borrow only the specific items of prohibited practices without the general definitions and specifications which have been based on practices of the past may be misleading. These provisions are intended to apply in Alaska.

6. "Proposed AS 45.51.040 is ambiguous. It does not state that it may be intended to exclude bona fide cooperative conspiracies from coverage. This is explicitly provided under federal law, parents and their subsidiaries

...have been found to have conspired. The provision should be deleted and rewritten to exclude from the act's coverage single business entities and their subsidiaries.

A careful reading of the provision does not find the exclusion anywhere near so broadly. The provision is intended to exclude from the impact of the section agreement between partners in the same business entity, corporate officers, etc. The provision grants no exclusion to "single business entities and their subsidiaries." The author of the provision obviously wants to expand the scope of the exemption.

7. "Proposed AS 45.51.040 contradicts itself by ... certain types of conduct while at the same ti... ...the effects of the permission with the proviso that ... conduct is lawful 'unless the effect shall be to substantially lessen competition or create a monopoly.'"

There is a substantial difference between declaring certain conduct per se legal and declaring that it is not per se legal. The purpose of the proviso is to prevent people from stretching covenants not to compete, etc., beyond their legitimate purposes as instruments of monopoly.

8. "Proposed AS 45.51.040 is an ex post facto law."

This provision merely recognizes that the ... of a monopoly position or the maintenance of ... ...on which substantially lessens competition may be ... to the act of acquisition which pre-dates the effective ... of the act. The maintenance of the monopoly or the ...ination on trade must be subsequent to the effective ... of the act for the act to be effective on it.

9. "The effect of proposed AS 45.51.040 ... ...an acquisition of a single jobber, single dealer, or ... single service station may well be illegal in some ... village, or hamlet."

First, the court will have to define the relevant ... through interpreting "in any section of the state." ... a specific set of circumstances, where the market ... ascertainable only as the particular town or village, ... acquisition may be in violation of the act. However, ... the years a number of doctrines have grown up aroun...

the anti-trust laws which preserve the public interest in the application of Section 7 of the Clayton Act, from which it is taken, and it is obvious that a number of these doctrines will be applied to local Alaska conditions. Perhaps new doctrines will be promulgated following the rule of reasonableness. One of the most obvious exceptions is the "failing business doctrine" which allows an acquisition even though it may result in a monopoly or lessening of competition when the business being acquired is in poor shape. Other cases have held that where the convenience and needs of a community to be served by a merger clearly outweigh any anti-competitive effects, the proposed merger may be made.

16. "Subsection (a) of proposed AS 45.51.060 prohibits mergers the effect of which 'may be substantially to lessen competition'. Yet, under (b), the court is to order divestiture if the court finds that the effect of an acquisition is substantially to lessen competition.' Thus, in one case, the test of illegality concerns probabilities whereas the other depends upon a finding of actual substantial lessening of competition."

Statutes frequently distinguish between what is prohibited before action by injunction and what a court will authorize to be undone after the act has been done. There is no necessary inconsistency here between subsection (a) which allows injunction where the effect of the acquisition may be to lessen competition, but subsection (b) will only undo the merger which has already taken place where there is a finding that the merger has in fact substantially lessened competition, etc.

17. "Proposed AS 45.51.050 is broader than the federal enactment."

The application of the principles of Section 8 of the federal Act from which this is taken, obviously will have to be modified to apply to conditions prevailing in Alaska. Presently interlocking commercial ventures of almost any description are outside of the limitation on the conduct of "directors" and the conduct of officers, partners, or trustees only recognizes the corporate reality. A dual officer is far more influential in obtaining the elimination of competition by agreement than an interlocking director. Even in the wider Alaska conditions of today, the application of this section to multi-million dollar

...orations. A limitation of convenience under the federal ... the effects of conduct limiting competition can be as severe in the smaller, isolated markets of Alaska with corporations under the million dollar line.

12. "Proposed AS 45.51.050(b) would prevent a representative of a distributor from being represented on the board of a retail subsidiary."

This would sometimes be true if the subsidiary and the distributor were in competition and if agreement between them would eliminate that competition. We see nothing offensive about such a provision. I would gather that the criticism of the attorney that his chart does ... with its own retailers.

13. "The statute should provide that a successful defendant is entitled to costs or attorney's fees ... these spurious lawsuits and legal blackmail will be discouraged." (directed at proposed AS 45.51.110.)

This criticism is evidently based on ignorance of ... Alaska law which entitles the prevailing party to recover his costs including an attorney's fee, whether ... plaintiff or defendant.

14. "AS 45.... allows the State to recover ... damages under it ... state although the federal ... can only recover actual damages under the federal ... here can recover treble damages under the ... statute under existing law.)"

This is a policy question for the legislature. ... damages provisions are intended to be an additional deterrent against violations of the act which would ... others. If the legislature believes that ... damages would be a sufficient deterrent, then it ... amend this law to suit the criticism raised.

15. "Proposed AS 45.51.120(b) will frighten ... States out of Alaska because it gives the Attorney General the authority to undertake class actions."

I believe that much of this authority, as applied ... anti-trust, is available to an Attorney General ... The purpose of this kind of provision is to avoid a ... of suits which clog the courts and to join

...e causes of action of a number of plaintiffs whose individual damages may be too small to justify the expense of a ...wyer so that they will recover the damages done to them. ...e see no policy reason why this authority should be stricken. ...s unlikely, to say the least, that any business is going to be so intimidated by this section that it will refrain ...om doing business in Alaska. Of course, any Attorney General can go on a rampage under any existing law in such a manner as to do damage to the business climate. The political system acts as an effective restraint on this type of conduct.

16. "The penalty provision is broader than the Sherman Act since it provides for criminal penalties for the full range of violations."

This is necessary because, through the Federal Trade Commission, the federal anti-trust laws provide for a wide range of administrative enforcement techniques including criminal penalties for the violation of administrative orders. As a practical matter, no Attorney General would find it feasible to bring a proceeding for the enforcement of the criminal penalty in an 040 or 050 situation and no court is going to enforce criminal sanctions in such cases without proof of specific intent.

17. "The use of consent judgments in evidence in ...ivil actions is more onerous than the equivalent federal ...rovision."

True, the state law is stricter. As the letter suggests, this aspect of federal law has been quite controversial but the argument has had two sides. There has been criticism of the federal provision as giving the Attorney General too much leeway to excuse violations at the expense of injured parties.

18. Proposed AS 45.51.180 is not included in the ...rrent draft and the criticism is therefore irrelevant.

I hope this information is of some service to you.

Sincerely,

John E. Havelock
Attorney General

...ajt

HB-164

STATE OF ALASKA

WILLIAM A. EGAN, GOVERNOR

DEPARTMENT OF LAW

OFFICE OF THE ATTORNEY GENERAL / POUCH K — STATE CAPITOL JUNEAU 99801

April 23, 1971

The Honorable William J. Moran
State House of Representatives
Capitol Building
Juneau, Alaska 99801

Re: Anti-Trust Legislation

Dear Representative Moran:

We have reviewed the proposed change in HB 164 and the statement of James Waters to the House Judiciary Committee on April 7, 1971 and have the following comments:

In Section 10, of the proposed amendment to the legislation, an attempt is made to define the marketing area to determine the reasonableness or unreasonableness of the restraint of trade. In this connection, it is suggested that in deciding whether conduct reasonably restrains trade or commerce determination of the relevant market or effective area of competition should not be limited by the boundaries of this state.

It would be the position of the Department of Law, that the legislation should not contain an express invite to enlarge marketing areas beyond the State of Alaska. Alaska is geographically separate from the rest of the continental United States and has shown unique marketing problems. The area can best be developed through the use of case law and if the defendants are able to persuade the court that the actual marketing area is indeed broader than the State of Alaska, it should be handled through the judicial process on a case by case basis. It is therefore our recommendation that no definition of marketing area be included in the legislation.

The comments relative to sections 20, 30, 40, and 50, can be summarized by stating: that these sections set forth certain types of prohibited activity. Anti-trust laws require judicial interpretation which sets

forth the specific and basic guidelines for construction. It must be presumed that the courts will follow and interpret the legislation in the light of economic and practical realities. This fact is noted in the statement of Mr. Waters wherein he indicates that the Supreme Court has placed the word "unreasonable" in front of all violations.

It is also suggested in the proposed amendments to these sections, that the State of Alaska not adopt the legislation, as there is federal legislation and the matter should be left to the staff of the Federal Government. The primary purpose of a state adopting its own anti-trust laws is to regulate those activities which are not large enough in scope for the federal intervention, or which do not involve inter-state commerce. In addition, some cognizance must be given to the fact that Alaska's geographical location and economic base which may result in cases not sufficiently large to interest the justice department, or which are not within the Clayton Act, because of the lack of assets. However, these cases would nevertheless under Sections 20-50 of proposed legislation, be actionable under the proposed State Anti-trust law.

The remainder of the comments in Mr. Waters' bill go to the remedies available, which include section 100 and subsequent sections. It should be noted in here that again an obscure example is cited for the unenforceability of contracts made in violation of the State's proposed anti-trust law. If these and the subsequent suggestions for modification were adopted, the act in summary would provide for the following remedies:

> The contract, although made in violation of the proposed State Anti-trust law, would still be enforceable.
> The treble damage provision, except for wilful and substantial wrongs, would be eliminated and actual damages awarded.

Under these provisions it would appear that there is little, if any, incentive to comply with anti-trust laws as the violation only requires the return of those actual damages sustained with the contract still enforceable.

Section 120 of the Act, contains various authority by the Attorney General to bring suit on behalf of others. Such a provision could be desirable in that the Attorney

General would have the information available, which may not be available to other parties or they may not even be aware of the action. However, this should be a matter of legislative determination on whether or not they wish the Attorney General to exercise such authority. It should be noted that in the basic area of consumer protection, such as the legislation last session on the consumer protection act, clearance by the Attorney General is required prior to a class action also the act recognizes the Governments duty to protect its private citizens from certain wrongdoing.

From the foregoing it is the Department of Law's position that:

1. The legislation should not set forth the proposed market areas, but they should be left to a matter of judicial determination on whether or not a market area exceeds the physical boundaries of the State of Alaska.

2. Sections 20,30,40, and 50 should be retained in the Act as a legitimate State function within the State of Alaska as pointed out many corporations which for one reason or another are not subject to sanction by the Federal Trade Commission or the Anti-trust Division of the Justice Department, because of geographical and economical problems, would be subject to the State of Alaska jurisdiction.

3. Contracts made in violation of the Act should be unenforceable and the treble damage provision should be maintained in order to insure adequate penalty for violation of the Act.

Very truly yours,

JOHN E. HAVELOCK
ATTORNEY GENERAL

By
Donald J. Beighle
Assistant Attorney General

HB-164

FAULKNER, BANFIELD, BOOGREVER & DOOGAN
ROOM 201, 311 FRANKLIN STREET
PHONE 586-2210
JUNEAU, ALASKA 99801

March 12, 1971

The Honorable Jalmar M. Kerttula
Chairman, Commerce Committee
House of Representatives
Juneau, Alaska 99801

Dear Mr. Chairman:

Re: H.B. No. 164, Anti-Trust Bill

I previously wrote to you on February 23, as a representative of American Mutual Insurance Alliance, stating I would investigate the impact which H.B. No. 164 would have on the insurance industry in Alaska and report to you.

Congress has the right to regulate the insurance industry by reason of the fact that it is engaged in interstate commerce. In 1945, it passed the McCarran-Ferguson Act (15 USCA 1011, et seq), which provides that the business of insurance shall be subject to the laws of the several states which relate to the regulation and taxation of the industry. It also provided that the Sherman Anti-Trust Act, the Clayton Act, the Federal Trade Commission Act and the Robinson-Patman Anti-Discrimination Act would not apply to the business of insurance until June 30, 1948, and after that date said Acts shall be applicable to the business of insurance "to the extent that such business is not regulated by state law." Therefore, the states have the right to regulate monopolies and combinations in restraint of trade in the insurance industry. Many states have anti-trust statutes such as proposed by H.B. 164, but New York is the only state which did not exempt the insurance industry. However, when New York did enact such a law on January 1, 1970, it specifically exempted the setting of rates through rating bureaus. The reason various states other than New York have not attempted such regulation is that the Insurance Departments have complete control over discrimination, unfair trade practices, etc., under the Insurance Code. The Insurance Departments, therefore, have control insofar as they care to exercise it, but they recognize that rating bureaus are an absolute necessity. There are other practices in the industry which might be said to be combinations in restraint of trade, such as formulating and adhering to standard insurance policies, the content of which are, in turn, under the control of the State Commissioners. The State Commissioners have their own

association to which the industry goes for guidance with the result that the standard fire insurance policy is used everywhere and any deviations from it can be used only with the approval of the State Director of Insurance. You can understand what a chaotic situation would be created, especially for the consumers, if you had 200 different types of insurance policies in Alaska and how difficult it would be for the Director to regulate the industry.

The reason the companies use rating bureaus to recommend how much they should charge and the State Commissioners use the same bureaus to ascertain what they should allow to be charged, is because the loss experience of all the companies in an area especially under standard policies, is more reliable for rate making than individual loss experience. Therefore, our Director is a subscriber to and pays to support the various bureaus which specialize in rate making for particular purposes. These must be continued, but H.B. No.164 would prohibit such use of, rating bureaus.

From the foregoing, I think it is evident that the industry should be exempt from H.B. No. 164 since it is completely regulated in the same respects by the Insurance Code. If the state should decide to do like New York and prohibit monopolies and regulate the insurance industry under a bill of this type, then it is necessary to work out some specific exemptions such as has been done in New York. Whereas New York is the state in which most of the big companies are incorporated and it is the insurance center of the Western Hemisphere, Alaska is at the opposite end of the spectrum and is in no position to competently regulate the insurance industry except through its Director of Insurance. Therefore, unless the industry is exempt from the provisions of this bill there is a need for specific amendments which can be patterned after the recent New York law. I am furnishing to your staff and particularly Mr. Rhode, a copy of a report made by Mr. Edwin M. Zimmerman, of Washington, D.C., who talked on "Insurance Underwriting Under Antitrust" at a meeting of the 1970 Mutual Insur-

ance Technical Conference at Philadelphia, last November. It will give him some idea of the complexity of the subject of trying to regulate insurance companies under limited exemptions such as are contained in the New York Act.

Yours very truly,

N. C. Banfield

Plaintiff,

vs. CIVIL ACTION NO._____

_____
_____,
Defendant

NOTICE AND ASSERTION
OF EXEMPTIONS

PART I: NOTICE OF EXECUTION

The _____ Court of the State of Alaska, _____ Judicial District, has issued a judgment that you must pay to _____ the sum of $_____: A Writ of Execution on the Judgment has been issued against you, a copy of which is attached to this form. This Writ is an order of the Court by which your property can be taken from you and sold in order to pay the Judgment and any court costs which have been assessed against you.

The following property, believed to be yours, has been seized and is now being held by the Court:

DESCRIPTION	PERSON IN POSSESSION AT TIME OF LEVY	DATE OF LEVY

Final sale or disposition of this property will be sought FIFTEEN (15) DAYS after you have received this Notice.

Some of the property listed may be exempt from execution under either State or Federal law. A general explanation of these exemptions is given in Part II of this form. If you have any questions or desire a more detailed explanation after reading Part II carefully, you should contact your lawyer, your local legal services office, or other local agency providing legal advice.

If any of the property listed above is exempt, you may prevent loss of that property by doing all of the following things within FIFTEEN (15) days of the time you receive this Notice:

Step 1: Fill out Part II of this form, following the directions carefully. Please type or print carefully. This is to notify the court of your property you claim as exempt.

Step 2: Read carefully the paragraph headed STATEMENT and sign the form.

STEP 3: Mail or deliver one copy of the form to this address:

Clerk of Court

_____, Room_____

_____, Alaska _____

The other copy is for you. Keep it for your records. Keep also the copy of the Writ of Execution which came with the form.

Step 4: Fill out the notice form which came with this form, and mail it as instructed by the information sheet.

If these steps are followed within FIFTEEN (15) days of the date you receive this Notice, the Court will hold a hearing to determine whether the property you claim as exempt is actually exempt under the law. You will be notified of the time and place of the hearing, to which you should come.

NOTE: IF YOU DO NOT FILL OUT PART II OF THIS FORM AND TURN IT IN TO THE CLERK OF THE COURT, YOU WILL LOSE YOUR EXEMPTIONS, AND ALL OF THE PROPERTY LISTED WILL BE SOLD OR DISPOSED OF.

PART II: EXEMPTIONS

The word "property" as used in this form means anything you own, including such things as:

a. Real Estate;

b. Personal property of any kind (whether in your possession or held by someone else);

c. Your money (whether in your possession or in a bank);

d. Money that is owed to you (such as your wages that have not been paid yet).

Property subject to execution or garnishment means anything the Court can take from you to pay the Judgment; exempt property is property which you may keep, provided you claim your exemption on this form.

You do not have to claim your exemptions. If you do not wish to claim any, simply do nothing further with this form, and all of the property listed in Part I will be sold or disposed of. If you do not wish to claim some particular exemption, simply leave that item blank on this form.

This form is used to claim exemptions only for property listed in Part I. The Writ of Execution is not being used to take any of your property which is not listed.

If the property listed in Part I includes any of the following items, you may claim your exemptions by filling in the blanks according to the directions accompanying each item.

A. INCOME:

You may claim at least some of your income (wages, salary, etc.) as exempt. There are two laws which provide this kind of exemption: State and Federal. You must figure your **State Law** exemption yourself in Item I below. Your **Federal Law** exemption is an automatic exemption, because the Writ of Execution does not allow the exempt part of your income to be seized.

Item 1: How to Figure Your Exemption Under State Law.

a. Look back to the list of property in Part I of this form and find the date of levy listed for your wages, salary or other income. Count back 30 days from that date.

b. Add up all of the wages, salary, tips, or commissions you were actually paid (take-home pay after withholding) for work done during those 30 days. Write the total here: $_____

c. Add up all money you received during those 30 days from any other source except wages, salary, tips, or commissions. For instance, if you are renting out any property, receiving interest on any money, receiving stock dividends, etc., add these items in. Write the total here: $_____

d. Add up all of the money (take-home pay) which you should have been paid for work done during those 30 days only, which you have not yet received (unpaid back wages, etc.). Write the total here: $_____.

e. Add up all of the money which you paid out during those 30 days which you were required to pay by order of any court. Include such things as alimony, child support, payments on a property settlement or any other court judgment. Write the total here: $_____.

f. Add the amounts in blanks b, c, and d together. Write the total here: $_____.

g. Subtract the amount in blank e from the amount in blank f. Write the result here: $_____.

h. If you <u>are</u> the <u>head of a family</u>, and your family is supported either partly or completely by your income, your <u>State Law</u> exemption is the amount in blank g, <u>unless</u> that amount is <u>more</u> than $350.00. If the amount shown in blank g is <u>more</u> than $350.00, your state law exemption is $350.00.

If you <u>are</u> the <u>head of a family</u>, write your state law exemption here: $_____. If you are <u>not</u> the head of a family, skip this blank.

i. If you are not the head of a family, your state law exemption is the amount shown in blank g, unless that amount is more than $200.00. If the amount in blank g is more than $200.00, your State law exemption is $200.00.

If you are not the head of a family, write your state law exemption here: $_____. If you are the head of a family, skip this blank.

Item 2: Your Automatic Exemption under Federal Law.

Under Federal law, you must get a certain automatic minimum exemption on your wages, salary or other earnings. Under the Writ of Execution, only that part of your earnings which is not exempt under Federal law should be listed in Part I. In order for the court to check on this and make sure that you have received your automatic federal exemption, please fill in these blanks:

a. If you are employed, check here how often you get paid.

☐ Once each week

☐ Once every two (2) weeks

☐ Twice each month

☐ Other (explain)_____

_____

b. Each time you get paid, how much money do you get? Write the amount here: $_____.

c. Do you get any pension or retirement payments?

☐ Yes

☐ No.

d. If you checked "yes" in blank c, how often do you get your pension or retirement payments? _____.

If you checked "no" in blank c, skip this blank.

e. If you checked "yes" in blank c, how much money do you get each time you get a pension or retirement payment? Write the amount here: $_____. If you checked "no" in blank c, skip this blank.

B. CHILD SUPPORT:

Item 1. Payments to court trustee.

If you have been ordered by any court to pay child support to a court trustee, you may claim this money as exempt by filling in these blanks.

a. Write here how much you pay to the Trustee each month: $_____.

b. Fill in the title of the court which ordered the payments: _____Court of the State of _____.

c. Write here the date of the decree or order: _____, 19____.

d. Write here the case number of the child support case: _____.

If you do not make your payments to a court trustee, you may not claim any exemption under Item 1.

Item 2: Child Support Payments Made by Your Employer.

If any court of Alaska has ordered child support payments to be withheld from your pay and paid to a court trustee or clerk of the court by your employer, you may claim these payments as exempt by filling in these blanks:

a. How much is each payment: $_____.

b. How often is the payment made: _____.

c. Fill in the title of the court which ordered the payments: _____ Court of the _____ Judicial District.

d. Write here the date of the decree or order: _____, 19____.

e. Write here the case number of the child support case: _____.

If your child support payments are not withheld from your pay by your employer, you may not claim any exemption under Item 2.

C. PERSONAL PROPERTY:

If any of these things listed below have been seized and listed in Part I of this form, you may claim an exemption for them by checking the boxes which apply:

☐ 1. Books, pictures, and musical instruments belonging to you up to $300 in value.

☐ 2. Wearing apparel (clothing, shoes, etc.) which is needed for your use or for your family's use.

☐ 3. Your watches or jewelry up to $200 in value.

☐ 4. Things which you need to earn a living, including cars, trucks or other vehicles if you use them in your work or to get to work; tools, books you use in your business, office furniture, business files, laboratory equipment, farm animals or other working animals, and a supply of food for the animals. If you claim any of these things, and use them to earn a living, check this box. You will not be allowed to keep more of these things than have a total value of $1,800.

☐ 5. Household goods, furniture, and utensils used by your family; animals used by your family; food for these animals, and food for yourself and your family. The total value of these items which you are allowed to keep will not be greater than $1,200, and you may keep only enough food to

support you and your family, and the animals, for 6 months. If you claim <u>any</u> of these things, check this box. ☐

WARNING: You may <u>not</u> claim an exemption for any of the things in the list above if the Judgment under which the thing seized was for the purchase price of that thing. For example, if the Judgment is for the purchase price of your car (Box 4), you could not claim any exemption for that car; but you could claim any of the other exemptions on the list.

D. LIQUOR LICENSE

Do you own a liquor license?

☐ Yes

☐ No

If you own one, you can claim your liquor license as exempt by filling in the <u>number</u> of the license here:

_____

E. HOMESTEADS

There are three (3) laws under which you might be able to claim a homestead exemption: the State homestead exemption law, and two (2) Federal laws. Read the three items below and check all boxes which you believe apply to you:

<u>Item 1</u>: <u>State Homestead Exemption Law</u>

Please answer these questions:

a) Do you own the home you live in?
If there is a mortgage on your home, you may still answer "yes."

☐ Yes

☐ No

b) Does your family live in your home with you?

☐ Yes

☐ No

c) Is the judgment mentioned in Part I of this form a judgment to foreclose a mortgage or deed of trust on your home?

☐ Yes

☐ No

If you answered "yes" to questions a and b and "no" to question c, you may claim an exemption on your home under state law. If you claim this exemption, check here: ☐

Note: This exemption may not completely protect your home. If your home is worth more than $8,000, it may still be sold or part of your land may be sold. If the entire homestead is sold, you still will get to keep $8,000 of the price under this exemption. If you live outside a town or city and your homestead is larger than 160 acres, only 160 acres is exempt. If you live in a town or city and your homestead is larger than 1/4 acre, only 1/4 acre is exempt under state law.

Item 2: The Federal Homestead Law

Please answer these questions:

a) Do you have a homestead which you obtained under the Federal Homestead Law (by filing and proving-up, etc.)?

☐ Yes

☐ No

b) Is the judgment mentioned in Part I of this form a judgment for a debt which arose before you received a patent on your homestead from the Government?

☐ Yes (If you have not received a patent, check "yes.")

☐ No

If you answered both questions a and b "yes," you may claim an exemption on your entire homestead. If you claim this exemption, check here: ☐

Item 3: Native Homesteads and Townsites

Please answer these questions:

a) Are you an Alaskan Native (Alaskan Indian, Aleut or Eskimo)?

☐ Yes (If you are only part Alaskan Native, you may still answer "yes.")
☐ No

b) Do you have a Native Homestead Allotment from the Department of the Interior?

☐ Yes
☐ No

c) Do you own land in a Native Village under a Restricted Title from the Department of the Interior?

☐ Yes
☐ No

If you have a Native Homestead Allotment or own land in a Native Village under a Restricted Title, your land is not exempt under Federal law, but you may still claim your State homestead exemption (Item 1 above).

F. CEMETERY LOTS

If you own a cemetery lot which you purchased from a cemetery association, and you bought the lot for burial purposes only, you may claim it as exempt. You may not claim this exemption if you are holding the lot to sell again for profit. If you claim this exemption, check here: ☐

G. UNEMPLOYMENT

If you have received Unemployment Payments, you may claim an exemption for all of this money if you have kept it separate from your other money. You may not claim this exemption if the judgment mentioned in part I of this form is a judgment for the price of necessities (food, clothing, rent, etc.) bought by you or your family during the time you were unemployed.

1. If you claim this exemption, check here: ☐

2. Write the amount of your unemployment payments here_____.

H. WORKMEN'S COMPENSATION

If you have received or are receiving Workmen's Compensation payments, please check here: ☐

Write the amount of your Workmen's Compensation payments here_____.

These payments are exempt.

I. INSURANCE BENEFITS

In some cases, the benefits from insurance policies may be exempt from execution. If you have received or are receiving benefits from any of the kinds of insurance policies listed here, please check the boxes which apply to you. At the hearing on your exemptions, the Court will decide whether your benefits are exempt under the law.

Have you received, or are you receiving benefits under any of these kinds of policies (if benefits are due to you, but have not been paid yet, you should check the box which applies):

☐ 1. Group Life Insurance

☐ 2. Disability Insurance

☐ 3. Annuity Policy

J. TEACHER'S RETIREMENT

Please answer these questions:

1. Are you a retired Schoolteacher?

☐ Yes

☐ No

2. Are you receiving teacher's retirement payments from the State of Alaska?

☐ Yes

☐ No

3. If you answered "yes" to questions 1 and 2, write the amount of your teacher's retirement payments here_____.

K. PUBLIC EMPLOYEES' BENEFITS

Please answer these questions:

1. Are you a retired public employee of the State of Alaska?

☐ Yes

☐ No

2. Are you the widow of a public employee of the State of Alaska?

☐ Yes

☐ No

3. Check the block which applies to you if you are receiving any of the following benefits from the State of Alaska:

☐ Public Employees Retirement

☐ Public Employees Widow's Pension

☐ Public Employees Disability Pension (Either occupational or non-occupational).

If you checked <u>any</u> of the blocks under question 3, the money you receive under this program <u>cannot be seized before it is paid to you</u>. You may <u>not</u> claim any exemption for money you have already received from the State.

L. WELFARE

If you are receiving or have recently received any of these kinds of welfare payments, you may claim an exemption for them by filling in the blanks under the kind of payment which you receive:

Item 1. <u>General Relief</u>

a) If you claim an exemption for relief money, check here: ☐

b) Write here the amount of money you receive on relief each month._____

Item 2. <u>Old Age Assistance</u>

a) If you claim an exemption for Old Age Assistance money, check here: ☐

b) Write here the amount of money you receive from Old Age Assistance each month._____

Item 3. Aid to the Blind

a) If you claim an exemption for money you receive as Aid to the Blind, check here: ☐

b) Write here the amount of money you receive each month as Aid to the Blind._____

Item 4. Aid to the Permanently and Totally Disabled

a) If you claim an exemption for money you receive as Aid to the Permanently and Totally Disabled, check here: ☐

b) Write here the amount of money you receive as Aid to the Permanently and Totally Disabled each month._____

M. OTHER FEDERAL EXEMPTIONS

Under Federal law, certain kinds of wages, benefits and other money may be claimed as exempt. Please read the following items and fill in any which apply to you.

Item 1. Federal Employees (Civil Service) Retirement Benefits

a) Are you receiving Federal Employees Retirement Benefits:

☐ Yes

☐ No

If you are, these payments are exempt.

b) How much do you receive each month? $_____

Item 2. Military Annuities

a) Are you the surviving spouse or child of a deceased person who was retired from the armed forces:

☐ Yes

☐ No

b) If you answered "yes" to question a, are you receiving an annuity from the military?

☐ Yes

☐ No

c) If you are, the amount of your annuity is exempt. Write the amount you receive each month here: $_____.

Item 3. Foreign Service Retirement

a) Are you retired from the Foreign Service of the United States?

☐ Yes

☐ No

b) Are you receiving retirement benefits from the Foreign Service?

☐ Yes

☐ No

These benefits are exempt. Write in the monthly amount you receive here: $_____

Item 4. Federal Judicial Survivor's Annuity

a) Are you the widow or child of a Federal Judge who has died?

☐ Yes

☐ No

b) Are you receiving an annuity from the Judicial Survivor's Annuity Fund?

☐ Yes

☐ No

Monthly amount: $_____

These annuities are exempt.

Item 5. Longshoreman and Harborworkers

a) Are you receiving benefits under the Longshoreman's and Harborworkers Compensation Act?

☐ Yes

☐ No

b) If you are, you may claim them as exempt by checking here ☐ and writing in the amount you receive each month here: $_____

Item 6. Veteran's Benefits

a) Do you receive Veteran's Benefits of any kind from the Veteran's Administration?

☐ Yes

☐ No

b) You may claim your exemption for these benefits by checking here: ☐

c) Write the amount of your benefits here: $_____

Item 7. Social Security

a) Do you receive Old Age or Survivor's Benefits under Social Security?

☐ Yes

☐ No

b) How much do you receive each month? $_____

These benefits are exempt.

Item 8. Railroad Retirement Benefits

a) Are you a retired railroad worker?

☐ Yes

☐ No

b) Do you receive benefits under the Railroad Retirement Act?

☐ Yes

☐ No

c) How much do you receive each month? $_____

These benefits are exempt.

Item 9. Railroad Worker's Unemployment

a) Do you receive benefits from Railroad Workers' Unemployment Insurance?

☐ Yes

☐ No

b) How much do you receive each month? _____

These benefits are exempt.

Item 10. CIA Retirement Act

If you are a retired member of the Central Intelligence Agency, and you receive benefits under the CIA Retirement Act of 1964 for Certain Employees, your benefits are exempt. If you claim such an exemption, check here: ☐ Enter the monthly amount of your benefits here: $_____

Item 11. Bankruptcy

If you have ever gone into bankruptcy in the Federal Court, you may have some additional exemptions. In order to help the court decide on this, please answer these questions:

a) Have you ever gone into Bankruptcy in a Federal Court?

☐ Yes

☐ No

b) If you are now involved in a bankruptcy case, check here: ☐

c) If you have gone through bankruptcy in the past write the date your bankruptcy proceeding ended here:_____

d) Write the number of your bankruptcy case here:

_____

e) Where did you go through bankruptcy? (City and State) _____

Item 12. Fishermen and Seamen

a) Are you a fisherman who works on a fishing boat?

☐ Yes

☐ No

b) Are you a seaman?

☐ Yes

☐ No

If you checked "yes" under either a or b, you may claim an exemption for any back wages owed

to you for working on a fishing boat or as a seaman. If you claim this exemption, check here: ☐

Write the amount of back wages owed to you here_____

STATEMENT

PLEASE READ THIS CAREFULLY: I have read this form in full, or had it read to me. The answers I have given are true. I know that I will be required to swear under oath before the Court at my hearing that my answers are true to the best of my knowledge. I also know that the Court must decide, at my hearing, whether the property I have claimed as exempt really is exempt under the law, and that some of my claimed exemptions may not be allowed to me if the Court finds that they are not legally exempt.

1971 HB 172

JOURNAL

SUPPLEMENT

HOUSE - SUPPLEMENT NO. 3 February 13, 1970

"Judiciary Committee Report

on

HOUSE BILL NO. 363

This bill modifies the procedural requirements for execution upon the assets of a judgment debtor, where no attorney has appeared or where judgment was obtained by default. In such cases many people, particularly the indigent or unlearned, are completely unaware that state and federal law exempt a basic minimum of property from execution to satisfy a judgment. Existing law, however, also permits execution without any notification to the judgment debtor of those rights.

This defeats the established policy of this State, which is intended to enable judgment debtors to retain minimal income and property for their support. A more effective procedure is needed to insure the use of existing exemption rights by indigents and those unaware of their rights.

First, the bill prohibits property from being sold or otherwise disposed of pursuant to a writ of execution for a period of 15 days. This waiting period will not unduly burden the judgment creditor in that assets capable of movement or seizure will be protected by the court.

Second, it provides for a prompt hearing on exemptions claimed, if possible within three days after the judgment debtor has received notice.

Third, the debtor in such cases must receive a notice specifying the property seized or to be sold, which notice must be filed in court with proof of service. The notice must contain an explanation, capable of being understood by a layman, of the various exemptions which exist and a form on which the claimed exemptions may be asserted.

The bill provides that the Alaska Supreme Court prescribe the proper forms to be used. Attached to this report are sample forms, noted with approval by the committee, and it is urged that such forms be adopted by the court to the extent consistent with existing style and form of pleadings and other papers prescribed by the court.

Barry W. Jackson
Chairman
House Judiciary Committee"

SAMPLE NOTICE FORM

IN THE _____ COURT OF THE STATE OF ALASKA

_____ JUDICIAL DISTRICT

Plaintiff,
v.
Defendant.

No. _____

A Writ of Execution has been issued against you. The following property claimed to be your property has been seized:

_____

_____

_____

_____

A copy of the Writ of Execution is attached to this notice.

Final sale or disposition of this property will be sought fifteen (15) days after you receive this notice.

Certain of your property may be exempt from execution under Alaska or federal law. These exemptions are explained below. If the execution is directed against exempt property, you may prevent loss of this property by following these steps within fifteen (15) days:

1. Fill out the attached "Assertion of Exemption" form, indicating which of the property stated in the Writ of Execution you claim as exempt, and sign the form.

2. Mail or deliver the form to the clerk of the court _____, room _____, _____, Alaska.

3. Mail or deliver copies of the form to the plaintiff or his attorney. (See above.)

4. Mail or deliver a copy of the form to any person having possession of any property you claim as exempt. For instance, your employer, if you claim that your wages are exempt.

If these steps are followed within fifteen (15) days of the date you received this notice, the property you claim as exempt will not be disposed of. You will then be notified that a hearing will be held to determine whether the property is exempt.

Explanation of Exemptions:

The form is used only to claim an exemption as to property stated in the Writ of Execution.

If the property stated in the Writ of Execution includes any of the following items, fill out the forms and deliver or mail copies as explained above.

The first item on the form, A.1., should be checked and filled in if the Writ of Execution states that your wages, or other money owed to you, is to be attached. A single person may keep $90 after taxes, in any thirty (30) day period, the head of household may keep $120 after taxes. Therefore, add all the money you have earned, even if you haven't been paid, from all sources in the last thirty (30) days.

Items A.2., A.3., A.4., A.5. refer to exemptions of other personal property. If the Writ of Execution specifies any of these items, check the appropriate places on the form.

Item B. is for exemption of money paid to you as child support under a court order. If the Writ of Execution is against any money you have received for

child support, under a court order, whether you have the money or it is in the bank, this item should be checked.

Item D. is your homestead exemption. If the Writ of Execution states that the place where you live, and which you or a member of your family owns, is to be attached, this item should be checked.

Item E. should be checked if the Writ of Execution is directed to any money you have received as unemployment benefits in Alaska. This may only be used if the money has been kept separate from your other money.

Item F. should be checked if the Writ of Execution is directed to money you have received as an award for Workmen's Compensation in Alaska, even if you have put it in the bank.

Item G. includes various exemptions you are allowed under federal law. If the Writ of Execution states that any money is to be attached and you got the money from a Federal pension, soldier's bonus, railroad retirement or soldier's savings, this item should be checked.

_____
ATTORNEY FOR PLAINTIFF

SAMPLE EXEMPTION FORM

IN THE _____ COURT OF THE STATE OF ALASKA

_____, JUDICIAL DISTRICT

Plaintiff,

v.

Defendant,

No. _____

ASSERTION OF EXEMPTION

Notice of execution was received by me _____ _____ on _____ _____, 19__; Of the property specified in the notice for which execution is sought, exemption is claimed to the following extent, and by the following authority:

A. A.S. 9.35.080

( ) 1. In the past 30 days I have earned $_____, after taxes, from all sources. I therefore claim as exempt the sum of $_____. (In a thirty-day period, you are entitled to $200 as a single person, $150 as head of a household. It doesn't matter if you haven't been paid yet.)

( ) 2. Books, pictures and musical instruments up to $300 in value.

( ) 3. Clothing for the use of the family, or watches and jewelry to $200 in value.

( ) 4. Tools, equipment or vehicles used in earning a living, up to $1800 in value.

( ) 5. Furniture, household goods, utensils or animals used by family, to $12,000 in value.

B. A.S. 9.35.080

( ) The sum of $_____ which was paid to me under order of court as child support. The child support case is No. _____.

C. A.S. 9.35.087

( ) A liquor license owned by me.

D. A.S. 9.35.090

( ) The home owned by a member of the family, to the value of $8,000, consisting of up to 160 acres if outside a city or town, or up to 1/4 acre if within a city or town.

E. A.S. 23.20.405

( ) The sum of $_____ received by me as a benefit under the Alaska Employment Security Act, (unemployment payments), which sum has been kept separate from any other funds.

F. A.S. 23.30.160

( ) The sum of $_____ received by me as a payment of compensation under the Alaska Workmen's Compensation Act,

G. Federal exemptions

( ) Under federal law, the sum of $_____ exempt as _____.
(Exemptions allowed are pension money - 38 USC 454a; soldier's bonus - 38 USC 618, 618c; homestead 43 USC 175; railroad retirement - 45 USC 228 a-y; soldier's savings - 10 USC 906.)

The claim which gave rise to this execution notice is not based on the purchase price of any property claimed as exempt under Items A(2), A(3), A(4), or A(5).

The above statements of indicated exemptions are correct and valid to the best of my knowledge.

DATED at _____, Alaska,

SB-112
HB-172

April 16, 1971

To: Representative Moran

From: Senator Ziegler

Re: SB 112

Bill:

You and I are probably in accord that Chapter 170, SLA 70 is one of the world's most abominable pieces of legislation, although I am sure we were well-intended at the time it was passed.

This bill, of course, refers to execution of judgments, notice to the non-represented default judgment defendant.

The courts, the clerks thereof, the lawyers, plaintiffs and defendants are all in agreement that the bill does absolutely nothing except create work for everybody and that it does not help those people which it was designed to help.

Attached are many documents which will give you all the back-up material in the world you will need to push SB 112 through. It is an absolute repealer of the 70 statute, coupled with a written guarantee of the Supreme Court of the state of Alaska that a new form of summons will be promulgated by the Court which will tell the defendant that in addition to the fact that a default judgment might be taken against him, that he has certain rights and privileges and what he must do to excercise the same.

I could go on, but if you'll take the time to read the attachments, I think you'll agree with me that the obliteration of the statute plus a more comprehensive summons is a better way to go than Harris's HB 172, which merely conforms to existing statutory law but would shorten the 19-page document which plaintiff's counsel must currently complete and serve.

Gentlemen:

The legislature in its wisdom enacted into law last year a statute pertaining to executions. Chapter 170 SLA 1970 is now AS 09.35.035.

Almost everyone seems to think that the concept of acquainting a judgment debtor with all his rights is good, but according to all the information the committee can glean, the rigamarole with which everyone must contend to carry out the provisions

of the chapter are much too onerous upon all hands--the plaintiff, the defendant and the judiciary.

I recently introduced SB 112 which would repeal the entire act, thereby putting us back in the position which existed prior to 1970. By no means do I contend that this is the ideal solution, but I think it's preferable to existing law pertaining to executions and the attendant cumbersome procedures.

It has been suggested that the standard form for summonses be modified to spell out in more detail what will happen to a defendant if he doesn't avail himself of his rights. Those rights presumably could be spelled out in less than 19 pages which, of course, a plaintiff must correctly complete and serve upon an unrepresented default defendant under existing law.

The Senate Judiciary committee would appreciate hearing from everyone as to recommended courses of action.

It has also been suggested that a repealer might well be indicated and that the Supreme Court might consider supplementing the repealer with a new form of summons which will alert the debtor to the fact that dire things might happen to him (other than a default judgment being taken against him) if he doesn't assert his rights within a time certain.

Very truly yours,

Robert H. Ziegler, Sr.

April 12, 1971

The Honorable Robert H. Ziegler, Sr.
Alaska State Senator
c/o Baranof Hotel
Juneau, Alaska 99801

Dear Senator Ziegler:

I am enclosing herewith a copy of a memorandum which I had prepared for me by our staff, concerning the Federal requirements in the execution process.

After review of this matter, it appears that we can satisfy all Federal requirements, even those which we anticipate may come in the future by expanding somewhat on the summons concerning the fact that default judgment may be taken against a party and execution will issue if he does not answer, by including in the execution documents to the police officer a statement of the Federal standards, and by requiring notice of default being given to each judgment debtor before execution issues.

The only basic change that would be required would be an expansion of language in the summons and the execution itself, and a change in the rule which requires notice of default only be sent in those cases where an attorney is present. The same three-day period could be retained, but it would be expanded to include all cases.

While there is distinctly a problem with regard to Federal law and the notice requirements as set down in Sniadach v. Family Finance Corp., 395 U.S. 337 (1969), we

feel that it would be better to be safe in anticipating Federal standards with the notice of default than to ignore this probability and possible case law which would require notice before the execution could be issued.

We realize that we are on the safe side of this particular issue and we are attempting to anticipate the movement of either Federal case or statutory law. An argument can be made either way. However, the Supreme Court is interested in solving the rather difficult problem posed by the statute requiring us to explain all exemptions to the judgment debtor (which practically is impossible while still complying with federal standards expressed in both federal case law and new federal statutes.

Sincerely,

Robert C. Erwin

Re: Opinions on Alaska Statute 09.35.035:
Default Judgment or NonAppearance of Attorney
for Judgment Debtor

My dear Senator Ziegler:

My comments with respect to the Alaska Statute your Senate Bill No. 112 would repeal are in addition to those sent in by my Clerk, Mrs. Doris Volzke. I can only amplify what she has said because she is actually the person to whom I have delegated the onerous work made necessary by the passage of Chapter 175 of the Session Laws of 1970. This added Alaska Statute 09.35.035 to our Code of Civil Procedure.

This law in the main affects persons in Small Claims Court which now involve amounts up to $1,000.00. Generally, such claims are prosecuted by nonlawyers against persons who do not employ a lawyer. The intent of a Small Claims Court is to settle disputes involving small amounts of money without the expense, time, or technical procedures required in the employment of attorneys. The basic idea has always been for two people to come into a court and informally advise the judge of the nature of the complaint and to have the judge settle the matter for them. Very seldom does an attorney appear in Small Claims Court. This, of course, was the situation prior to the passage of the instant legislation which resulted in the appearance of a 19-page document emanating from the Alaska Supreme Court. This document is so complicated and so detailed that I have never been able to read it at one sitting. Attorneys who have seen it have refused to use it without first conferring with an accountant. The average layman to whom it is referred is immediately struck with the complexity of the document.

Through the use of the form setting forth exemptions to which the defendants are entitled, the burden of the proof is shifted to the plaintiff, who must prove that the defendant is not entitled to certain exemptions, and therefore, the money the plaintiff has found is subject to payment of the debts. There is no provision for service. The cost of service required by the delivery of the document to the defendant is added to the defendant's cost and, therefore, compounds his indebtedness. Although there is an acknowledgment section of the document for the defendant acknowledging that he has received this, there is no onus upon him to actually fill this out and return it to the court.

The personnel of the court are required to give legal advice in all cases to persons required as plaintiffs to provide these documents and as defendants to know what they have in their hand. The clerks are not lawyers. I do not think that it is the intent of this particular piece of legislation to call upon the courts to provide free legal advice for small claims matters to this extent.

The instant statute also requires the court to designate a Trustee, and provides that the funds attached be handled in a special manner by this Trustee. This places upon the Trustee a burden entailing liability for the proper and special handling of the funds. This is an increasing burden upon the Clerk of the Court in handling Small Claims, which are supposed to be handled in a simplified manner.

Not only is the court required to give advice and educate people on the meaning of these forms, but at the same time the court is required to maintain a supply of the forms, to store them, to provide them, and to charge for them, in accordance with the orders of the Administrative Director of the courts.

In view of the fact that the Supreme Court of the State of Alaska has in the past not provided instructions for the operation of the Small Claims Court, I feel that this implementation of the instant statute is an extremely technical, work-producing and unnecessary facet of Small Claims into which the Court has thrust itself, complicating and destroying the entire intent of the mechanism of this particular branch of the District Court.

I hope that somewhere in this material which I am forwarding to you, you will find points of justification for the repeal of Alaska Statute 09.35.035. I am certain the the repeal of this statute will benefit all parties concerned, including the parties defendant who were intended to be protected thereby.

Very truly yours,

HCK:el

KETCHIKAN, ALASKA

99901

18th February 1971

The Honorable R. H. Ziegler, Sr.
Senator
Alaska State Senate
Pouch U
Juneau, Alaska 99801

RE: HB 363 am S

SENATE BILL NO. 112

Dear Bob:

This is in reference to HB 363 am S passed some months ago relating to the executions of judgment. Effective date of said bill was September 7, 1970.

Prior to passage of this bill, the work load in this District Court office pertaining to civil was 60%, criminal case load 25%, other 5%.

Since September 1970, paper work pertaining to civil cases(closed) has increased threefold in that;

The HB-363-am-S bill reqires that for every execution issued that a nineteen(19) page form be filled out by the defendant, form furnished by the plaintiff; the 19 page form with all questions to be answered by the defendant scares the defendant and he feels by this time he must obtain an attorney; which means additional cost for an attorney, costs of service fees of said writ to be served to employer and copy of writ to be served to the defendant, end results--costs added to defendants bill;

if the defendant signs the for claiming exemptions, a hearing date must be set by the court-additional cost of serving notice of hearing--all this time and typing of course is time consuming by staff of the courts.
Hearing is held--decisions rendered--more paper work by the clerk, more filing cabinet space needed.

The intent of this bill is to protect the judgment debtor. Todate it has caused confusion, added costs to judgment debtor, added work

to the court and staff, and as Clerk of this District Court for 11 years I see no advantage of this bill.

I personally thank you for introducing SENATE BILL NO. 112.

Passage of Senate Bill No. 112 will lessen civil case load of the courts and I know that all persons concerned will be ever grateful.

Thanking you in advance for your time and effort, I remain,

Sincerely,

Doris M. Volzke

(Mrs) Doris M. Volzke
Clerk-District Court
P. O. Box 707
Ketchikan, Alaska 99901

3/24/71

COMMENTS ON HOUSE BILL NO. 180

"AN ACT RELATING TO MARINE RADIO COMMUNICATIONS"

In an effort to determine whether the proposed Act was in conflict with existing regulations, either international or domestic, I have reviewed the laws covering the use of radiotelephone on vessels of varying sizes. Extracts from the International Safety of Life at Sea (SOLAS), The Communications Act of 1934, and the Federal Communications Commission's Rules and Regulations are attached.

It would appear that a gap exists in these regulations so far as requiring radiotelephone capability on the bridge of vessels which are required to be equipped with radiotelegraph by international law. There further appears to be no clear-cut requirement for small cargo vessels to be equipped with radiotelephone.

There is another section of the regulations that seems to leave some doubt as to what is actually required or intended.

In the attached FCC regulations, Section 83.223 and Section (b) reads in part, "...shall, during its hours of service for telephony, maintain an efficient watch for the reception of A3 and A3H emissions on the authorized carrier frequency 2182 kc/s,..." I have requested from the FCC clarification of the "...hours of service for telephony,..." but have not yet received a reply.

The proposed bill has been discussed with the Engineer in Charge for the FCC in Alaska, who offered the suggestion that the Act be referred to the FCC for review and comments. Such a procedure would, of course, take considerable time.

The intent of House Bill No. 180, to insure better communications between itinerant and local vessels, is certainly in the best interest of all concerned. Some minor changes in the wording might be helpful in clarifying the requirements of the proposed Act; for instance, line 21 could be made to read:

"With at least five channels, including standard VHF calling and distress frequencies,..."

Lines 23 and 24 could read:

"...channels, including standard radiotelephone calling and distress frequencies is installed and capable of being operated from the bridge or wheelhouse of the vessel."

Line 26 could read:

"...times on the applicable standard calling and distress frequency by a person qualified to operate radio equipment of the type..."

Section 30.07.020 appears to be blanket authority for the Department of Commerce to write regulations controlling all marine communications in the State. I doubt that this is either necessary or desirable.

C. L. Buck, Director
Division of Communications

EXCERPTS FROM

INTERNATIONAL SAFETY OF LIFE AT SEA

(SOLAS)

March 24, 1971

Regulation 3 - Radiotelegraph Station

Passenger ships irrespective of size and cargo ships of 1,600 tons gross tonnage and upwards, unless exempted under Regulation 5 of this Chapter, shall be fitted with a radiotelegraph station complying with the provisions of Regulations 8 and 9 of this Chapter.

Regulation 4 - Radiotelephone Station

Cargo ships of 300 tons gross tonnage and upwards but less than 1,600 tons gross tonnage, unless fitted with a radiotelegraph station complying with the provisions of Regulations 8 and 9 of this Chapter shall, provided they are not exempted under Regulation 5 of this Chapter, be fitted with a radiotelephone station complying with the provisions of Regulations 14 and 15 of this Chapter.

Regulation 5 - Exemptions from Regulations 3 and 4

(a) The Contracting Goverrments consider it highly desirable not to deviate from the application of Regulations 3 and 4 of this Chapter; nevertheless the Administration may grant to individual passenger or cargo ships exemptions of a partial and/or conditional nature, or complete exemption from the requirements of Regulation 3 or Regulation 4 of this Chapter.

(b) The exemptions permitted under paragraph (a) of this Regulation shall be granted only to a ship engaged on a voyage where the maximum distance of the ship from the shore, the length of the voyage, the absence of general navigational hazards, and other conditions affecting safety are such as to render the full application of Regulation 3 or Regulation 4 of this Chapter unreasonable or unnecessary. When deciding whether or not to grant exemptions to individual ships, Administrations shall have regard to the effect that exemptions may have upon the general efficiency of the distress service for the safety of all ships. Administrations should bear in mind the desirability of requiring ships which are exempted from the requirement of Regulation 3 of this Chapter to be fitted with a radiotelephone station which complies with the provisions of Regulations 14 and 15 of this Chapter as a condition of exemption.

(c) Each Administration shall submit to the Organization as soon as possible after the first of January in each year a report showing all exemptions granted under paragraphs (a) and (b) of this Regulation during the previous calendar year and giving the reasons for granting such exemptions.

Regulation 7 - Watches--Radiotelephone

(a) Each ship which is fitted with a radiotelephone station in accordance with Regulation 4 of this Chapter shall, for safety purposes, carry at least one radiotelephone operator (who may be the master, an officer or a member of the crew holding only a certificate for radiotelephony) and shall, subject to the provisions of paragraph (b) of this Regulation, while at sea, maintain continuous listening watch on the radiotelephone distress frequency, in the place on board from which the ship is usually navigated, using a loud-speaker or other appropriate means.

(b) Listening may be discontinued

(i) when the receiving equipment is being used for traffic on another frequency and a second receiver is not available; or

(ii) when, in the opinion of the master, conditions are such that maintenance of the listening watch would interfere with the safe navigation of the ship.

Listening watch should, however, as far as possible be maintained during the silence periods provided for in the Radio Regulations.

Regulation 14 - Radiotelephone Stations

(a) The radiotelephone station shall be in the upper part of the ship and so located that it is sheltered to the greatest possible extent from noise which might impair the correct reception of messages and signals.

(b) There shall be efficient communication between the radiotelephone station and the bridge.

(c) A reliable clock shall be securely mounted in such a position that the entire dial can be easily observed from the radiotelephone operating position.

(d) A reliable emergency light shall be provided, independent of the system which supplies the normal lighting of the radiotelephone installation, and permanently arranged so as to be capable of providing adequate illumination of the operating controls of the radiotelephone installation, of the clock required by paragraph (c) of this Regulation and of the card of instructions required by paragraph (f).

(e) Where a source of energy consists of a battery or batteries, the radiotelephone station shall be provided with a means of assessing the charge condition.

(f) A card of instructions giving a clear summary of the radiotelephone distress procedure shall be displayed in full view of the radiotelephone operating position.

Regulation 15 - Radiotelephone installations

(a) The radiotelephone installation shall include a transmitter, a receiver and a source of energy.

(b) The transmitter shall be capable of transmitting on the radiotelephone distress frequency and on at least one other frequency in the bands between 1,605 kc/s and 2,850 kc/s, using the class of emission assigned by the Radio Regulations for these frequencies. In normal operation the transmitter shall have a depth of modulation of at least 70 per cent, at peak intensity.

(c) (i) In the case of cargo ships of 500 tons gross tonnage and upwards but less than 1,600 tons gross tonnage the transmitter shall have a minimum normal range of 150 miles; i.e., it shall be capable of transmitting clearly perceptible signals from ship to ship by day and under normal conditions and circumstances over this range* (Clearly perceptible signals will normally be received if the R.M.S. value of the field strength produced at the receiver by the unmodulated carrier is at least 25 microvolts per metre):

(ii) In the case of cargo ships of 300 tons gross tonnage and upwards but less than 500 tons gross tonnage--

for existing installations the transmitter shall have a minimum normal range of at least 75 miles;

for new installations the transmitter shall produce a power in the aerial of at least 15 watts (unmodulated carrier).

(d) The transmitter shall be fitted with a device for generating the radiotelephone alarm signal by automatic means. The device shall be capable

---

*In the absence of field strength measurements, it may be assumed that this range will be obtained by a power in the aerial of 15 watts unmodulated carrier) with an aerial efficiency of 27 per cent.

Regulation 15 - Radiotelephone Installations (cont'd)

of being taken out of operation at any time in order to permit the immediate transmission of a distress message. The Administration may delay the application of the requirement for the device in the case of existing installations for a period not exceeding three years from the date of coming into force of the present Convention.

(e) The device required by paragraph (d) of this Regulation shall comply with the following requirements:--

(i) The tolerance of the frequency of each tone shall be ± 1.5 per cent;

(ii) The tolerance on the duration of each tone shall be ± 50 milliseconds;

(iii) The interval between successive tones shall not exceed 50 milliseconds;

(iv) The radio of the amplitude of the stronger tone to that of the weaker shall be within the range 1 to 1.2.

(f) The receiver required by paragraph (a) of this Regulation shall be capable of receiving the radiotelephone distress frequency and at least one other frequency available for maritime radiotelephone stations in the bands between 1,605 kc/s and 2,850 kc/s, using the class of emission assigned by the Radio Regulations for these frequencies. In addition, the receiver shall permit the receiption of such other frequencies, using the class of emission assigned by the Radio Regulations, as are used for the transmission by radiotelephony of meteorological messages and such other communications relating to the safety of navigation as may be considered necessary by the Administration. The receiver shall have sufficient sensitivity to produce signals by means of a loudspeaker when the receiver input is as low as 50 microvolts.

Regulation 15 - Radiotelephone Installations (cont'd)

(g) The receiver used for maintaining watch on the radiotelephone distress frequency shall be preset to this frequency, or so arranged that setting to the frequency may be carried out in a rapid and precise manner and that, when set to this frequency, the receiver shall not easily be detuned accidentally. The Administration may delay the application of the requirements of this paragraph in the case of existing installations for a period not exceeding three years from the date of coming into force of the present Convention.

(h) To permit rapid change-over from transmission to reception when manual switching is used, the control for the switching device shall, where practicable, be located on the microphone or the telephone handset.

Attachment II

EXCERPTS FROM

THE COMMUNICATIONS ACT OF 1934

AS AMENDED

March 24, 1971

Section 351. Ship Radio Installations and Operations

(a) Except as provided in Section 352 hereof it shall be unlawful--

(1) For any ship of the United States, other than a cargo ship of less than five hundred gross tons, to be navigated in the open sea outside of a harbor or port, or for any ship of the United States or any foreign country, other than a cargo ship of less than five hundred gross tons, to leave or attempt to leave any harbor or port of the United States for a voyage in the open sea, unless such ship is equipped with an efficient radio installation in operating condition in charge of and operated by a qualified operator or operators, adequately installed and protected so as to insure proper operation, and so as not to endanger the ship and radio installation, as hereinafter provided, and in the case of a ship of the United States, unless there is on board a valid station license issued in accordance with this Act: Provided, That the Commission may defer the application of the provisions of this section for a period not beyond January 1, 1955, with respect to cargo ships of less than sixteen hundred gross tons not subject to the radio requirements of the Safety Convention when it is found impracticable to obtain or install equipment necessary for compliance therewith;

(2) For any ship of the United States of sixteen hundred gross tons, or over, to be navigated outside of a harbor or port, in the open sea, or for any such ship of the United States or any foreign country to leave or attempt to leave any harbor or port of the United States for a voyage in the open sea, unless such ship is equipped with an efficient radio

Section 351. Ship Radio Installations and Operations (cont'd)

direction finding apparatus (radio compass) properly adjusted in operating condition as hereinafter provided, which apparatus is approved by the Commission: Provided, That the Commission may defer the application of the provisions of this section with respect to radio direction finding apparatus to a ship or ships between one thousand six hundred and five thousand gross tons for a period not beyond November 19, 1954, if it is found impracticable to obtain or install such direction finding apparatus.

(b) A ship which is not subject to the provisions of this part at the time of its departure on a voyage shall not become subject to such provisions on account of any deviation from its intended voyage due to stress of weather or any other cause over which neither the master, the owner, nor the charterer (if any) has control.

Section 354. Operators, Watches--Radiotelephone Equipped Ships

(a) Each cargo ship fitted with a radiotelephone installation in accordance with section 356 shall, for safety purposes, carry at least one qualified operator who may be a member of the crew holding only a certificate for radio telephony.

(b) Each cargo ship of the United States fitted with a radiotelephone installation in accordance with section 356 shall, while being navigated outside a harbor or port, keep a listening watch in such manner and during such periods as determined by the Commission.

Section 356. Technical Requirements--Radiotelephone Equipped Ships

Cargo ships of less than sixteen hundred gross tons may, in lieu of the radiotelegraph installation prescribed by section 355, carry a radiotelephone installation meeting the following requirements:

(a) The ship's radiotelephone installation shall be in the upper part of the ship and, unless situated on the bridge, there shall be efficient communication with the bridge.

(b) The radiotelephone installation shall be capable of transmitting and receiving on the frequencies and with types of emissions designated by the Commission pursuant to law for the purpose of distress and safety of navigation.

(c) The transmitter shall be capable of transmitting clearly perceptible signals from ship to ship during daytime, under normal conditions and circumstances, over a minimum normal range of one hundred and fifty nautical miles.

Section 381. Radio Installations on Vessels Carrying Passengers for Hire

Except as provided in section 382, it shall be unlawful for any vessel of the United States, transporting more than six passengers for hire, to be navigated in the open sea or any tidewater within the jurisdiction of the United States adjacent or contiguous to the open sea, unless such vessel is equipped with an efficient radiotelephone installation in operating condition.

Section 385. Radio Installations on Vessels Carrying Passengers for Hire.

The Commission shall make such inspections as may be necessary to insure compliance with the requirements of this part.

EXCERPTS FROM

THE COMMUNICATIONS ACT OF 1934

AS AMENDED

March 24, 1971

Section 351. Ship Radio Installations and Operations

(a) Except as provided in Section 352 hereof it shall be unlawful--

(1) For any ship of the United States, other than a cargo ship of less than five hundred gross tons, to be navigated in the open sea outside of a harbor or port, or for any ship of the United States or any foreign country, other than a cargo ship of less than five hundred gross tons, to leave or attempt to leave any harbor or port of the United States for a voyage in the open sea, unless such ship is equipped with an efficient radio installation in operating condition in charge of and operated by a qualified operator or operators, adequately installed and protected so as to insure proper operation, and so as not to endanger the ship and radio installation, as hereinafter provided, and in the case of a ship of the United States, unless there is on board a valid station license issued in accordance with this Act: Provided, That the Commission may defer the application of the provisions of this section for a period not beyond January 1, 1955, with respect to cargo ships of less than sixteen hundred gross tons not subject to the radio requirements of the Safety Convention when it is found impracticable to obtain or install equipment necessary for compliance therewith;

(2) For any ship of the United States of sixteen hundred gross tons, or over, to be navigated outside of a harbor or port, in the open sea, or for any such ship of the United States or any foreign country to leave or attempt to leave any harbor or port of the United States for a voyage in the open sea, unless such ship is equipped with an efficient radio

Section 351. Ship Radio Installations and Operations (cont'd)

direction finding apparatus (radio compass) properly adjusted in operating condition as hereinafter provided, which apparatus is approved by the Commission: Provided, That the Commission may defer the application of the provisions of this section with respect to radio direction finding apparatus to a ship or ships between one thousand six hundred and five thousand gross tons for a period not beyond November 19, 1954, if it is found impracticable to obtain or install such direction finding apparatus.

(b) A ship which is not subject to the provisions of this part at the time of its departure on a voyage shall not become subject to such provisions on account of any deviation from its intended voyage due to stress of weather or any other cause over which neither the master, the owner, nor the charterer (if any) has control.

Section 354. Operators, Watches--Radiotelephone Equipped Ships

(a) Each cargo ship fitted with a radiotelephone installation in accordance with section 356 shall, for safety purposes, carry at least one qualified operator who may be a member of the crew holding only a certificate for radio telephony.

(b) Each cargo ship of the United States fitted with a radiotelephone installation in accordance with section 356 shall, while being navigated outside a harbor or port, keep a listening watch in such manner and during such periods as determined by the Commission.

Section 356. Technical Requirements--Radiotelephone Equipped Ships

Cargo ships of less than sixteen hundred gross tons may, in lieu of the radiotelegraph installation prescribed by section 355, carry a radiotelephone installation meeting the following requirements:

(a) The ship's radiotelephone installation shall be in the upper part of the ship and, unless situated on the bridge, there shall be efficient communication with the bridge.

(b) The radiotelephone installation shall be capable of transmitting and receiving on the frequencies and with types of emissions designated by the Commission pursuant to law for the purpose of distress and safety of navigation.

(c) The transmitter shall be capable of transmitting clearly perceptible signals from ship to ship during daytime, under normal conditions and circumstances, over a minimum normal range of one hundred and fifty nautical miles.

Section 381. Radio Installations on Vessels Carrying Passengers for Hire

Except as provided in section 382, it shall be unlawful for any vessel of the United States, transporting more than six passengers for hire, to be navigated in the open sea or any tidewater within the jurisdiction of the United States adjacent or contiguous to the open sea, unless such vessel is equipped with an efficient radiotelephone installation in operating condition.

Section 385. Radio Installations on Vessels Carrying Passengers for Hire.

The Commission shall make such inspections as may be necessary to insure compliance with the requirements of this part.

Attachment III

EXCERPTS FROM

FEDERAL COMMUNICATIONS COMMISSION

RULES AND REGULATIONS, PART 83 SHIPBOARD MARITIME SERVICE

March 24, 1971

Section 83.103 Location of station.

All components of a station on board ship subject to this part, including the antenna(s), antenna supporting structures, and source(s) of power used to energize the station equipment, shall be located on board the vessel identified in the station license, even though the vessel be temporarily moored. For purposes of communication, no component of a ship station shall be connected by wire line directly or indirectly to any equipment, apparatus, or facilities which are not located entirely on board the vessel identified in the station license: Provided, That the limitations of this section shall not apply (a) when the station is being operated in an emergency under provisions of Section 83.75, or (b) when it is necessary, while the ship is temporarily moored, to energize one or more components of a main installation or an emergency installation by means of a source of power not located on board the ship, for the purpose of assuring compliance with any applicable safety radio requirement of law.

Section 83.104 Operating controls.

(a) In each ship station, operating controls shall be readily available at the principal operating location of the station for instant use by the authorized operator in accordance with the provisions of Section 83.154, whenever the station is being used for transmission, capable of being used to:

(1) Commence and discontinue normal operation of the station;

(2) Change normally from each operating radio-channel to any other associated operating radio-channel in the same characteristic portion of the spectrum; and

(3) Change normally from transmission to reception and vice-versa.

(b) Every ship station using telegraphy for normal traffic shall be provided with a device permitting changeover from telegraph transmission to telegraph reception and vice versa without manual switching. In addition, these stations should be able to listen on the reception frequency during the course of periods of transmission.

(c) Every ship station using telephony shall, when an authorized operator is present at the principal operating location, be capable of change-over from telephone transmission to telephone reception and vice-versa within a total period of two seconds under circumstances which do not require a change in operating radio-channel at the same time.

(d) Every ship station shall, during its hours of service and when the authorized operator is present at the principal operating location, be capable of:

(1) Commencing operation within one minute after the need to do so occurs;

Section 83.104 Operating controls (cont'd).

(2) Discontinuing all emission within five seconds after emission is no longer required or after the necessity arises for emission to cease.

(e) Each ship station using a multichannel installation for telegraphy (except equipment intended for use only in emergencies on frequencies below 515 kc/s) shall, when the authorized operator is present at the principal operating location, be capable of changing, after the need to do so occurs, from each operating radio channel to any other operating radio channel for transmission or reception by means of telegraphy within:

(1) A period of five seconds if the particular radio channels are within the same characteristic portion of the spectrum; or

(2) A period of fifteen seconds if the particular radio channels are not within the same characteristic portion of the spectrum.

(f) Every ship station and marine-utility station using a multi-channel installation for telephony shall, when the authorized operator is present at the principal operating location, be capable of changing, after the need to do so occurs, from one operating radio-channel to another operating radio-channel for transmission or reception by means of telephony within:

(1) A period of five seconds, when changing from the calling frequency to a working frequency and vice versa within the band 1600-4000 kc/s; or

(2) A period of three seconds, when changing from the calling frequency to a working frequency and vice versa within the band 156-174 Mc/s.

(g) Whenever the same carrier frequency is used for radiotelephone transmission and reception, means shall be provided so that transmission may be either automatically "voice-controlled" or controlled manually by the person whose speech is being transmitted.

Section 83.104 Operating controls (cont'd).

(h) (1) Subject to the provisions of subparagraph (2) of this paragraph, each ship station using telegraphy on frequencies within the band 405 kc/s to 535 kc/s must, with respect to the use of any transmitter capable of a plate input power in excess of 450 watts and completed in construction subsequent to January 1, 1952, be provided with an arramgenent readily permitting the use of a plate input power for telegraphy which is not in excess of 200 watts. Each such transmitter shall be furnished with a durable nameplate with the month and year of its completion permanently inscribed thereon.

(2) The requiremen. of subparagraph (1) of this paragraph shall not apply when there is available in the same station a duly authorized radiotelegraph transmitter capable of operation on the international calling frequency 500 kc/s and at least one working frequency within the band 405 kc/s to 485 kc/s, capable of being energized by a source of power other than an emergency power supply installed for compliance with applicable provisions of treaty or statute, and not capable of a plate input power in excess of 450 watts when operated on such frequencies.

(i) The frequency selector switch on transmitters employing single sideband shall automatically provide for A3H emission when the transmitter is operated on 2003 (in the Great Lakes area), 2182 or 2638 kc/s.

Section 83.106 Required frequencies for radiotelephony.

(a) Each ship radiotelephone station licensed to operate in the band 1605 to 3500 kc/s shall be able to transmit A3 or A3H emission[1] and receive A3 emission[1] on the carrier frequency 2182 kc/s, and, if used for other than safety communication, shall be capable also of transmitting A3 or A3H emission[1] and receive class A3 emission[1] on at least two other frequencies within that band.

(b) Each ship station equipped with radiotelephony to work in the authorized bands between 156 and 162 Mc/s shall be able to transmit and receive Class F3 emission on:

(1) The Distress, Safety and Calling frequency 156.800 Mc/s;

(2) The primary Intership Safety frequency 156.300 Mc/s;

(3) One or more working frequencies; and

(4) All other frequencies necessary for its service;

(5) Exceptionally, however, single or dual channel equipment which otherwise conforms to the technical requirements of this part, may be used solely for navigational communications on a ship's bridge, on a frequency designated for such navigational purposes, in those cases where such ships have no requirement for other VHF communications.

---

[1] Subject to the limitations set forth in Section 83.132.

NOTE: The licensee of a ship station authorized prior to September 3, 1968, for single channel or dual channel equipment may continue to use such equipment in the same station until January 1, 1974.

Section 83.153 Location of operator.

When an operator is required for the operation of a station subject to this part, such operator shall, whenever the transmitting apparatus is being operated, be on duty at the principal operating position or a control point of the station and, subject to the lawful authority of the master, shall be in charge of the station.

Section 83.155 Operator(s) required by Title III of Communications Act of 1934.

(a) Each passenger ship of the United States which in accordance with Part II of Title III of the Communications Act is equipped with a radiotelegraph station shall for safety purposes carry at least one radio officer holding a radiotelegraph first-class operator license, and in addition at least one radio officer holding a radiotelegraph first- or second-class operator license or a temporary limited radiotelegraph operator license: Provided, That the holder of a radiotelegraph second-class operator license or a temporary limited radio-telegraph operator license may not act as chief radio officer.

(b) Each cargo ship of the United States which in accordance with Part II of Title III of the Communications Act is equipped with a radiotelegraph station, which is not fitted with a radiotelegraph auto alarm in proper operating condition, shall for safety purposes carry at least two radio officers, each of whom shall hold a radiotelegraph first- or second-class operator license or a temporary limited radiotelegraph operator license: Provided, That the holder of a radiotelegraph first- or second-class operator license or a temporary limited radiotelegraph operator license may not act as chief radio officer until he has had at least 6 months satisfactory service in the aggregate as a qualified radiotelegraph operator in a station on board a ship or ships of the United States.

(c) Each cargo ship of the United States which in accordance with Part II of Title III of the Communications Act is equipped with a radiotelegraph station, which is fitted with a radiotelegraph auto alarm in proper

Section 83.155 Operator(s) required by Title III of Communications Act of 1934 (cont'd).

operating condition, shall for safety purposes carry at least one radio officer holding a radiotelegraph first- or second-class operator license or a temporary limited radiotelegraph operator license, who has had at least 6 months' satisfactory service in the aggregate as a qualified radiotelegraph operator in a station on board a ship or ships of the United States.

(d) Each cargo ship of the United States which in accordance with Part II of Title III of the Communications Act is equipped with a radiotelephone station shall for safety purposes carry at least one qualified operator. Where the power of the station does not exceed 250 watts carrier power or 1,000 watts peak envelope power, such operator shall hold a radiotelephone third-class operator permit or higher class of operator authorization. Where the power of the station exceeds 250 watts carrier power or 1,000 watts peak envelope power, such operator shall, as a minimum, hold a radiotelephone second-class operator license.

(e) Each vessel of the United States transporting more than six passengers for hire, which in accordance with Part III of Title III of the Communications Act is equipped with a radiotelephone installation, shall for safety purposes carry at least one qualified operator. Where the power of the station does not exceed 250 watts carrier power or 1,000 watts peak envelope power, such operator shall hold a radiotelephone third-class operator permit or higher class of operator authorization. Where the power of the station exceeds 250 watts carrier power or 1,000 watts peak envelope power, such operator shall, as a minimum, hold a radiotelephone second-class operator license.

Section 83.156 Operator(s) required by the Safety Convention.

(a) Each ship of the United States which is not subject to Part II of Title III of the Communications Act but which in accordance with the radio provisions of the Safety Convention is equipped with a radiotelegraph station, shall for safety purposes carry at least the number of radio officers specified in subparagraphs (1) and (2) of this paragraph:

(1) If fitted with a radiotelegraph auto alarm in proper operating condition:

(i) Each cargo ship, and each passenger ship carrying or certificated to carry 250 passengers or less, or more than 250 passengers but engaged on a voyage of less than 16 hours duration between two consecutive ports, shall carry at least one radio officer holding a radiotelegraph first- or second-class operator license or a temporary limited radiotelegraph operator license; who has had at least 6 months' satisfactory service in the aggregate as a qualified radiotelegraph operator in a station on board a ship or ships of the United States;

(ii) Each passenger ship carrying or certificated to carry more than 250 passengers and engaged on a voyage exceeding 16 hours duration between two consecutive ports, shall carry at least two radio officers, each of whom shall hold a radiotelegraph first- or second-class operator license or a temporary limited radiotelegraph operator license: Provided, That the holder of a radiotelegraph second-class operator license or a temporary limited radiotelegraph operator license may not act as chief radio officer until he has had at least 6 months' satisfactory service in the aggregate as a qualified radictelegraph operator in a station on board a ship or ships of the United States;

Section 83.156 Operator(s) required by the Safety Convention (cont'd).

(2) If not fitted with a radiotelegraph auto alarm in proper operating condition:

(i) Each cargo ship shall carry at least two radio officers, each of whom shall hold a radiotelegraph first- or second-class operator license or a temporary limited radiotelegraph operator license: Provided, That the holder of a radiotelegraph first- or second-class operator license or a temporary limited radiotelegraph operator license may not act as chief radio officer until he has had at least 6 months' satisfactory service in the aggregate as a qualified radiotelegraph operator in a station on board a ship or ships of the United States;

(ii) Each passenger ship shall carry at least one radio officer holding a radiotelegraph first-class operator license, and in addition at least one radio officer holding a radiotelegraph first- or second-class operator license or a temporary limited radiotelegraph operator license: Provided, That the holder of a radiotelegraph second-class operator license or a temporary limited radiotelegraph operator license may not act as chief radio officer.

(b) Each cargo ship of the United States which is not subject to Part II of Title III of the Communications Act but which in accordance with the radio provisions of the Safety Convention is equipped with a radiotelephone station, shall for safety purposes carry at least one qualified operator. Where the power of the station does not exceed 250 watts carrier power or 1,000 watts peak envelope power such operator shall hold a radiotelephone third-class operator permit or higher class of operator authorization.

Where the power of the station exceeds 250 watts carrier power or 1,000

Section 83.156 Operator(s) required by the Safety Convention (cont'd).

watts peak envelope power such operator shall, as a minimum, hold a radiotelephone second-class operator license.

Section 83.159 Operator requirements for noncompulsory stations.

Description of station	Minimum Operator Authorization
Public ship telegraph, all categories	T-2 or TLT
Limited ship telegraph	T-3
Public or limited ship telephone, more than 250 watts carrier power or 1,000 watts peak envelope power	P-2
Public or limited ship telephone, not more than 250 watts carrier power or 1,000 watts peak envelope power	P-3
Public or limited ship telephone, not more than 100 watts carrier power or 400 watts peak envelope power	RP
Marine utility ship	RP
Ship radiolocation-test, using radar only	P-2, with ship-radar endorsement.

Section 83.173 Authority of the master.

(a) Except as may be regulated by law or international agreement or by the rules of the Commission, the service of each station on board ship shall at all times be under the supreme control of the master, who shall require that each operator of such station comply with the International Radio Regulations in force and that the ship station for which the operator is responsible is used, at all times, in accordance with those regulations.

(b) However, during any period in which the Department of Defense lawfully may exercise and is in fact lawfully exercising emergency controls over United States merchant shipping, no provisions of the Commission's rules and regulations shall prevent the master of any ship of the United States from taking any action whatsoever in regard to the radio installation, the operators, the transmission and receipt of messages, and the radio service of the ship whenever in his discretion such action is necessary to carry out instructions of the Department of Defense.

Section 83.183 Hours of service of ship stations.

(a) Ship stations whose service is not continuous may not close before:

(1) Finishing all operations resulting from a distress call, or urgency or safety signal;

(2) Exchanging, so far as practicable and within the scope of their normal operation, all traffic originating in or destined for public coast stations situated within their range and mobile stations which, being within their range, have indicated their presence before the actual cessation of communication.

Section 83.202 Watch required on vessels subject to the Communications Act.

(a) Each ship of the United States which is equipped with a radiotelegraph station for compliance with part II of title III of the Communications Act shall, while being navigated in the open sea outside of a harbor or port, keep a continuous and efficient watch on 500 kc/s by means of radio officers: Provided, however, That in lieu thereof on a cargo ship equipped with a radiotelegraph auto alarm in proper operating condition an efficient watch on 500 kc/s shall be maintained by means of a radio officer for at least 8 hours per day in the aggregate; i.e., for at least one-third of each day or portion of each day that the vessel is navigated in the open sea outside of a harbor or port.

(b) Each cargo ship of the United States which is equipped with a radiotelephone station for compliance with part II of title III of the Communications Act shall, while being navigated in the open sea outside of a harbor or port, keep a continuous and efficient watch on 2182 kc/s in the room from which the vessel is normally steered while at sea, whenever such station is not being used for authorized traffic. Such watch shall be maintained by at least one officer or member of the crew of the vessel who has been designated by the master to do so. The person designated by the master may simultaneously perform other duties relating to the operation or navigation of the vessel, provided such other duties do not interfere with the effectiveness of the watch.

(c) Each vessel of the United States transporting more than six passengers for hire, which is equipped with a radio-telephone installation for compliance with part III of title III of the Communications Act shall, while being

Section 83/202 Watch required on vessels subject to the Communications Act (cont'd).

navigated in the open sea or any tidewater within the jurisdiction of the United States adjacent or contiguous to the open sea, keep a continuous and efficient watch on 2182 kc/s in the case of an installation operating in the 1605-3500 kc/s band, or on 156.8 Mc/s in the case of an installation operating in the 156-174 Mc/s band, whenever such installation is not being used for authorized traffic. Such watch shall be maintained by at least one officer or member of the crew of the vessel who has been designated by the master to do so. The person designated by the master may simultaneously perform other duties relating to the operation or navigation of the vessel, provided such other duties do not interfere with the effectiveness of the watch.

83.203 Watch required on vessels subject only to the Safety Convention.

(a) Each ship of the United States which is equipped with a radiotelegraph station for compliance with the Safety Convention, but which is not fitted with a radiotelegraph auto alarm in proper operating condition, shall while at sea keep a continuous and efficient watch on 500 kc/s by means of radio officers. If fitted with a radiotelegraph auto alarm in proper operating condition, such watch shall be kept while at sea as follows:

(1) Each cargo ship, and each passenger ship carrying or certificated to carry 250 passengers or less, or more than 250 passengers but engaged on a voyage of less than 16 hours duration between two consecutive ports, at least 8 hours watch a day in the aggregate;

(2) Each passenger ship carrying or certificated to carry more than 250 passengers and engaged on a voyage exceeding 16 hours duration between two consecutive ports, at least 16 hours watch a day in the aggregate.

(b) Each cargo ship of the United States which is equipped with a radiotelephone station for compliance with the Safety Convention shall, while at sea, keep a continuous and efficient watch on 2182 kc/s in the manner prescribed by Section 83.202 (b).

Section 83.223 Watch on 2182 kc/s.

(a) Each ship station on board a ship navigating the Great Lakes and licensed to transmit by telephony on one or more frequencies within the band 1605 to 3500 kc/s shall, during its hours of service for telephony, maintain an efficient watch for reception of A3 and A3H emissions on the authorized carrier frequency 2182 kc/s, whenever the station is not being used for transmission on that frequency or for communication on other frequencies.

(b) Except for stations on board vessels required by law to be fitted with radiotelegraph equipment, each ship station (in addition to those ship stations specified in paragraph (a) of this section) licensed to transmit by telephony on one or more frequencies within the band 1605 to 3500 kc/s shall, during its hours of service for telephony, maintain an efficient watch for the reception of A3 and A3H emissions on the authorized carrier frequency 2182 kc/s, whenever such station is not being used for transmission on that frequency or for communication on other frequencies. When the ship station is in Region 1 or 3, such watch shall, insofar as is possible, be maintained at least twice each hour for 3 minutes commencing at x h. 00 and x h. 30, Greenwich mean time.

Section 83.224 Watch on 156.800 Mc/s.

Each ship station, or, if more than one maritime mobile station is being operated from a vessel than at least one station, licensed to transmit by telephony on one or more frequencies within the band 156-162 Mc/s shall, during its hours of service for telephony in this band, maintain an efficient watch for the reception of F3 emissions on the authorized carrier frequency 156.800 Mc/s whenever such station is not being used for transmission on other frequencies: Provided, however, That ship stations licensed under the provisions of Section 83.106 (d) (5) or operating under the provisions of the note to Section 83.106 of the rules are exempt from the watch requirements on 156.800 Mc/s.

HB 186

Dear Senator Thomas:

The A.S.M.A. opposes HB 186, an act relating to physical examination of nonresident employees.

Frankly, we were totally unaware of AS 18.15.060-110, which HB 186 amends. None of us has ever seen the health certificate referred to.

The intent of the original statute in 1949 must have been to exclude individuals with important contagious diseases such as tuberculosis, diphtheria, smallpox, and syphilis. Certainly the intent was not to detect minor contagious diseases such as viral respiratory infections or athlete's foot, though the language of the statute does not make this clear.

The present incidence of dangerous communicable infectious diseases is so low that pre-employment examinations to detect them are not worthwhile in terms of cost and inconvenience.

The emphasis rather should be to discover conditions such as heart disease, syncope, defective vision, defective hearing, hernias, back conditions, accident proneness, alcoholism, drug addiction, sociopathy, and other mental disease which could be costly to the individual, employer, and public alike. An aim should be to reduce workmen's compensation claims.

There is no medical reason to distinguish between resident and non-resident prospective employees.

Responsible employers have pre-employment examination programs for these purposes. All employers should be encouraged to provide such examinations, though it may not be appropriate to require owners of small business to do so, particularly for temporary positions.

In summary we see no merit in HB 186 and none in the original xenophobic statute. AS 18.15.060-110 should either be repealed as archaic and wasteful of people's time and money or extensively modified to protect against the conditions described above.

Sincerely,

Rodman Wilson, M.D., Chairman
Legislative Committee

HB 204

March 24, 1971

The Honorable Members of the House of Representatives
State of Alaska
Juneau, Alaska

Subject: House Bill 204

Gentlemen:

With Alaska municipalities anticipating the need for tremendous sums to finance capital improvements, we find it difficult to understand the introduction of legislation that would limit the sources of bond financing.

As we understand it, House Bill 204 would prohibit a person who provides financial or programming assistance to a political subdivision from bidding on the bonds at public sale or negotiating for their purchase at a private sale. Admittedly, such a restriction might not harm the marketability of the municipal bonds issued by the larger municipalities, but it could very materially limit the marketability of bonds issued by the smaller municipalities. As you know, Anchorage and Greater Anchorage Area Borough have locally adopted such restrictions. The City and Borough of Juneau has restricted the financial consultant from purchasing bonds on a negotiated basis, but the financial consultant is allowed to bid at a public sale. Such local regulation is entirely proper since it allows each municipality to determine whether the restriction will be harmful to its particular bond issues.

To our knowledge, no state law restricts a financial consultant from bidding at a public sale. At one time this was true in Oregon, but that is no longer the case.

As a firm specializing in underwriting Alaska and Northwest municipal bonds, we feel very strongly that the municipal corporation should not be restricted by state law in the available methods of marketing their bond issues.

Very truly yours,

James C. Pierce
President

Form SA 1

MEMORANDUM State of Alaska

TO: The Honorable William J. Moran
Chairman, House Judiciary Committee
Alaska State Legislature
Juneau, Alaska 99801

DATE : March 18, 1971

FROM: Eric E. Wohlforth, Commissioner
Department of Revenue

SUBJECT: House Bill 204 - An Act Relating to the Sale of Public Bonds

Some background of the structure of the market for State and municipal bonds is necessary in analyzing the bill.

1. In general the State and Municipal bond market is a high volume market growing in size almost every month. In the year 1970 a total of $17,761,645,833 in municipal bonds were sold surpassing the previous yearly high of $16,374,332,960. In the month of January, 1971 financing by State and local governments reached an all time high of $2,599,020,490.

In contrast, during the calendar year 1970 the State of Alaska issued $35,726,000 in bonds or a fraction of .020141 of the total amount of municipal bonds issued during 1970 throughout the country.

2. As the Committee knows, all Alaska State bonds are sold at public sale. The mechanics of sale and marketing of bonds are very roughly as follows.

Each time an issue is announced prior to its legal advertisement historical accounts of bond underwriters meet with tentative price suggestions. These underwriters include the large commercial banks as well as investment banking houses which specialize in the underwriting of municipal issues. Pricing ideas are developed among account members sometimes until the last hour before sealed bids are submitted. Account members may drop out because of dissatisfaction with the price, and late economic developments such as Federal discount prime rate increases or decreases may dramatically alter the price which the underwriting syndicate is willing to pay.

Although members of the account may run into the hundreds, one or more majors are usually designated to submit the bid in behalf of the account after a syndication agreement is signed by the members of the account.

Once the bid is submitted and the apparent winning bid is known, the bond underwriters begin a strenuous sales effort towards selling the bonds at the agreed on price at the final syndicate meeting. If the bonds are priced correctly from the underwriters point of view the complete issue may be sold within a matter of hours after submission of the apparent winning bid.

The prime objective of the underwriters is to achieve a sale as soon as possible and distribution ability is the key to market success given the correct price.

The actual profit which the underwriting group makes on a bond sale is ascertainable by comparison of the yield spreads translated into price for each maturity of the bonds in the winning bid with the yields stated in the re-offering advertisement as published in the national financial journals. Usually, the national financial journals point out how rapidly the bonds sell and a rough estimate can always be made of the underwriting spread.

3. In my opinion and in my experience it is clear that an investment house which has aggressively bid for and purchased Alaska issues has by far the best feel of the market. It is also clear that the market for Alaska municipal bonds has broadened very substantially since the oil lease sale with many first time owners of Alaska municipal bonds.

An intimate knowledge of the structure of the market for Alaska municipal bonds is of extreme value to the State Bond Committee.

Someone with this knowledge can tell the Bond Committee of the length and amount of an issue which the market may accept. This was dramatically illustrated with the recent conflicting advice received from two financial houses prior

to the last State bond sale. The bond advisors selected for the most recent General Obligation bond issue of $21,325,000 advised us that the market could support an issue of this size with the maturity schedule running it up to 22 years. Other advice cautioned against a sale of this size and also indicated that combining bonds with maturity limitations of 6% with limitations of 7% would confuse the market and make for fewer bids.

The attached copy of Revenue News of the Department of Revenue dated February 16, 1971 shows that the advice to sell the $21,325,000 issue out to 22 years was correct. Five bids were received from four of the largest banks in the country and as noted in the article the winning bid was the best rate received on Alaska bonds in over three years.

The bond advisor was a member of one of the accounts bidding for the bonds which was unsuccessful in their bid. The spread between the bid of the group in which Nuveen was a manager and the winning bid was .0922%.

It is interesting to note that the bidding and marketing practices in the municipal bond field have never drawn an anti-trust prosecution. Attorney General Kennedy in the 1960's drew some national attention to the possibility of collusive bids but no prosecution resulted.

4. Denying us the expertise of an underwriting firm acting as financial or fiscal advisor could hamper our bond issuing operations. We need access to a firm which can give us the best advice on maturities and amount of issue as well as analysis of when we should go to market. In my opinion the few firms that provide financial advice but do not bid on the bonds are simply not close enough to the market to materially assist us.

In conclusion, I do not feel that with the active competition for Alaska State bonds the danger exists of a financial advisor somehow of structuring the issue to fit his own needs rather than the market in general. The test of the

financial advisors experise is his ability to structure an issue to gain the widest possible interest and the maximum number of bids. The informational media available in the municipal bond field are so extensive that there is no opportunity whatsoever to cut down the amount of publicity given to a bond issue. Our most recent bond sale was publicized in the Bond Buyer which is a trade journal of the municipal bond financing as well as through announcement in financial papers and advertisement here in Alaska. 1,086 copies of the Official Statement were sent out to potential purchasers.

I enclose a chart showing the activity of three of the leading purchasers of Alaska State bonds over a period of time. I may mention that permitting the financial advisor to bid for bonds has been uniform practice since Statehood.

Nome	Front Street	443-2441
Juneau	240 S. Franklin	586-1870

OIL LEASE SALE PROCEEDS

The Department of Revenue reports that as of January 27, 1971, the total investments in the General Fund held both in the Bank of America and in Alaska amount to $904,491,680. This compares with the figure of $923,202,321 which was the amount in the General Fund on November 30, 1970. These figures represent the principal or par value of the securities held. The market value of the investments, that is, the price they would command if sold, was $925,147,103.86 as of January 1, 1971.

It is still correct to refer to $900,000,000 in the General Fund, but very shortly the Fund will fall below this amount. Figures supplied by the Department of Administration based on our current budget now indicate that the Fund will fall to $814,905,600 (par value) by the end of this fiscal year, which is June 30, 1971. This figure represents the effect of charges against the Fund. The cash balance should be much higher. By the next year, that is, by June 30, 1972 it is estimated, based on the proposed budget, that the Fund will fall to $709,144,200 and will steadily drop thereafter to a balance of under $100,000,000 by June 30, 1976.

The increase of our State expenditures each year should increase and benefit the quality of life in Alaska. In a very real sense the question of what the 900 million dollars is doing for the State of Alaska is answered by the fact of increased annual expenditure for education, health and other State services and programs. The direct Alaskan investment of the General Fund includes $100,000,000 in five-year State deposits with Alaska banks, $6,805,000 in Alaska local government bonds and in mortgages purchased by the State.

With the necessity of spending portions of oil lease sale proceeds in the General Fund to maintain or improve the quality of life in Alaska, it becomes vitally important that we determine exactly how much money we can devote to long-range programs to carry through until the time when increased revenue becomes available. The existing

Mortgage Loan Participation program has been temporarily suspended while we evaluate whether purchase of mortgages through the banking system has the actual or potential effect of significantly reducing the cost of housing in Alaska. At the same time we are developing a series of computer projections to determine a high-low estimate of the Fund balance on differing expenditure and rates-of-return assumptions. This computer model will have the capacity to receive information such as the amount of a suggested program or a delay in anticipated oil revenues and tell us in minutes what effect this has on the balance in the general fund.

MONEY MARKET OPERATIONS

As bonds and notes now held in the fund mature, they can only be re-invested in securities yielding less interest under current market conditions. This is because the nation is experiencing a period of easy money with an active Federal Reserve policy to make more credit available through the banking system. On November 30, 1970 the average yield to maturity of the Fund was 7.34%, today the average yield is 7.22%. One year ago the prime commercial bank rate, that is, the rate charged "best quality borrowers" was 8-1/2%, currently it is 6%. With very substantial maturities scheduled during 1971, the fund should experience a further reduction in average yield due to a lowering of interest rates available for re-investment of maturing securities.

We can, however, increase the amount of dollars earned by the Fund by selling some of the present holdings which are now worth much more than their original purchase price and re-invest in other securities offering a higher rate of return over the remaining period of the original holdings. In this way more actual dollars will accrue to the portfolio even though the average yield on holdings in the manner reported in the past would decline somewhat. We will set up a new method of reporting yields to give effect to capital gains profit in investment performance. In our opinion the most significant feature of investment management is the actual increase in dollars to the Fund rather than the yield alone. We are continually evaluating conservative investment opportunities to maximize return on our holdings and further capital gains.

GENERAL OBLIGATION BOND SALE

On February 2, 1971 the State Bond Committee received five bids for a total of $21,325,000 of State bonds, representing the largest issue of State general obligation bonds sold to date. The winning bid of 5.07% submitted by The Chase Manhattan Bank and Salomon Brothers of New York City was the best interest rate on Alaska bonds in over three years. In addition the sale was a departure from recent policy of short-term issues with maturities scheduled out to twenty-two years corresponding more nearly to the useful life of the projects. The chart below illustrates the extent of improvement in the market for Alaska bonds represented by this issue:

Date of Sale	Daily Bond Buyer Average Reported Nearest to Sale Date	State Bonds Average Net Interest Cost	Maturities	Amount of Issue
May 1, 1967	3.79	4.5016	1967-92	$15,325,000
Sept. 1, 1967	4.07	4.903	1968-92	$10,200,000
April 1, 1968	4.31	5.1867	1968-88	$14,525,000
May 1, 1969	5.10	5.75	1970-79	$ 8,200,000

NEW DEVELOPMENTS IN TAXATION
MULTISTATE TAX COMMISSION

The Multistate Tax Commission, which Alaska joined on July 1, 1970, was formed for the purpose of establishing uniformity among state and local governments for the taxation of interstate business, an area of acute concern in Alaska tax administration.

Currently the Multistate Tax Commission is trying to formulate a comprehensive plan for taxation of interstate business which would serve as a backup plan in case Congress should reconsider Federal legislation in this field. The idea here is to establish an accord among the various states for a plan that would be acceptable to business and states alike for presentation to Congress if it decides to act in this area. Development of appropriate interstate tax legislation is vital if Alaska is to capture its fair share of revenue in the oil development of the 1970's.

The Multistate Tax Commission has also formed an audit capability who will also coordinate the activities of the various states in conducting joint audits. This program will result in a greater consistency of audit programs, a greater compliance among the various companies, and should produce an increase in income for many of the states involved. At the same time, it will help the various companies who are involved in interstate business since they will be confronted with only one audit group rather than being audited by all of the states in which they do business. They will also receive more consistent treatment from the auditors.

This recent information comes from the winter meeting of the Multistate Tax Commission which was held January 24 through 26 in Washington, D. C., and was attended by alternate delegate Fred Boetsch, Director of the Audit Division. Although many of the substantive provisions of the "plan" were not resolved to everyone's satisfaction, the progress made in the Audit Committee was excellent.

INCOME TAXES

The first group of 1970 refund warrants consisting of 158 warrants amounting to $12,011.67 was made January 22, 1971.

Starting with the next group, we will be utilizing a new data processing system which will further speed up refund processing. This new system will eliminate several edit routines and will also eliminate the handling of given punch cards several times as has been done in the past. This will simplify the operation from

the standpoints of those having manual control over the refunds and the computer operators. In addition, a new scanning system developed by the Audit Division should permit us to put through refunds at a much faster rate. We estimate that these systems will reduce refunding time by about three weeks.

The Audit Division has also announced that a completely new system for informing the taxpayer of adjustments to his tax liability has been instituted. In the past a taxpayer has simply been provided with a debit and credit memo and a brief explanation of the reason for the change. Taxpayers and their accountants have been concerned that they could not reconcile the amount of tax shown on the adjustment with the amount of tax originally computed on the return. Under the new system the taxpayer will receive a photocopy of his return which for 1970 provides a column in which the Department may make any audit changes. This will show him just exactly what figures were changed and by how much. This copy will be accompanied by a covering letter explaining in detail the reason for the audit change. This improvement has been brought about primarily by the utilization of MT/ST equipment in preparing these audit adjustment letters. We believe that these letters will better inform the public as to the reasons underlying any change, and enable them to see just exactly where the changes have been made. This will contribute immensely to our public relations programs and, we believe, provide a tremendous increase in the quality of our taxpayer service.

MISCELLANEOUS TAXES

A new data processing system has also been set up in the Business License field which will result in a much faster turnaround time in the issuance of business licenses. Under the previous system, an application for licensing was received and audited, then a license issued. This required batching the applications and scheduling data processing time for a print-out of the actual licenses. Under the new system the licenses have all been pre-printed and a number pre-assigned to each individual business. This number was also indicated on the Business License Applications which were sent out. As these applications come back it will be a simple matter of auditing the applications and then pulling the correct license from the file and mailing it to the taxpayer. Turnaround time here should be reduced to about 10 to 14 days from six to eight weeks under the old system.

The Miscellaneous Tax Section is also considering a new type of withholding tax form which will provide a greater convenience to the businessman in submitting his quarterly withholding report and remittance. This new form envisions a package being sent to the businessman-employer which would include a self-addressed envelope to the Department and pre-printed data on the forms. We will have more information on this form in our next newsletter.

HB-219

FORM 10-62-16

State of Alaska

TO: The Honorable George Hohman, Chairman
House Finance Committee
Alaska State Legislature

DATE : April 16, 1971

FROM: M.R. Charney, Director
Division of Budget & Management
Department of Administration

SUBJECT: House Bill 219

Pursuant to your recent request, the following information is transmitted concerning original project proposals under Capital Improvement bond issues for which appropriations are requested in HB 219.

Section 1. $12,690,000 from the "1970 School Construction Fund". Chapter 170, SLA 1970 authorized a bond issue totaling $20,300,000 for the following projects:

Regional and Area Schools at:

Dillingham	$ 720,000
Bristol Bay	720,000
McGrath	540,000
Bethel	749,000
Anchorage	2,025,000
Fairbanks	1,500,000
Tok	495,000
Forth Yukon	630,000

HB 223

MEMORANDUM

TO: All Legislators
Members of the Judicial Council
Justices of the Supreme Court
Judges of the Superior Court
Department of Health and Welfare

Date: January 7, 1971

Subject: Proposed Amendment to Children's Code A.S. 47.10.010--290

FROM: Harold J. Butcher
Superior Court Judge
Family Court Division

The Alaska State Legislature, during the 1970 Session, amended Section 47.10.080 (Children's Code) to empower a Judge of the Superior Court to declare a minor under the age of 18 years who comes before the Court under the provisions of Sec. 47.10.080, a "child in need of supervision." This classification, i.e. child in need of supervision, was intended to make it possible to declare those minors who had not been involved in serious criminal conduct to be handled other than under the harsh declaration of delinquency.

The idea for the declaration of "child in need of supervision" came from the Colorado Children's Code where such a classification is included in the code. This classification is also found in the children's codes of many other states, sometimes called "persons in need of supervision," as in Hawaii.

In any event, the 1970 amendment, as adopted by the Alaska Legislature, limits the treatment process to that treatment afforded a dependent minor under 47.10.080(c), plus authority to place a minor declared "a child in need of supervision" on probation under those conditions and limitations that the Court may prescribe.

The Colorado Children's Code, as well as that of Hawaii and the other states referred to, in addition to the provisions authorizing the declaration of a minor as a "child in need of supervision" and placing him under conditions of probation in the home of his parents or a foster home, grants the Court authority in cases where the minor cannot be supervised in the home of his parents or a foster home, and will not abide by conditions of probation, to place him in a juvenile correctional school or detention facility.

It was the intention of the Judge of the Family Court in recommending the adoption of the 1970 amendment, to have it contain a provision permitting the Court to place a minor declared "a child in need of supervision" in an institution when circumstances and conditions, and the character of the minor, requires treatment in a correctional institution.

Many minors in Alaska will not accept supervision in the home of their parents or in a foster home, and, in fact, many minors without

necessarily violating the law become so incorrigible and so rebellious against authority that they refuse to live in the homes of their parents or in foster homes, and continue to slip around without supervision of either parents or probation officers. There is grave danger that these minors will injure themselves or others, which in fact they do rather frequently, thus some stronger kind of discipline and correction is necessary than that presently available in the 1970 amendment, if we are to change them in the direction of responsibility and good citizenship. Many instances of such rejection of authority could be cited in which minors, male and female, are at large in the Anchorage area, as well as other areas of Alaska, who have been placed under conditions of probation in the home of their parents or in foster homes and have refused to stay in those homes, in some instances even over night, and who have refused to be supervised under any conditions of probation or other controls. They have become a constant source of concern for police authorities and officers of the Division of Corrections, as well as the Court, and are corrupting other minors with whom they come in contact. We have concluded that the only solution in such cases is to place the minor in a correctional institution such as McLaughlin Youth Center, or the Alcantra Center at Wasilla, or some other available facility where the minor's supervision and rehabilitation can be exercised in a confined setting.

We have attached to this memorandum a proposed amendment to the 1970 enactment to provide an additional power to the Court to be applied in handling a minor declared a "child in need of supervision" who cannot be handled by conventional methods. The law, as it now stands, provides institutional placement only for the minor declared <u>delinquent</u>.

Thus, the only change in the existing code recommended for adoption would be to include 47.10.080(b)(1) as an additional method of treatment for a minor declared a "child in need of supervision" who cannot otherwise be treated.

Under the terms of the 1970 amendment as it presently stands, <u>only</u> those minors who have been declared delinquent for violating a Federal, State, or Municipal Law may be placed in an institution, and minors declared a "child in need of supervision" may <u>only</u> be placed on probation.

PROPOSED CHANGE IN CHILDREN'S CODE -- 47.10.080

1970 Amendment

Sec. 47.10.080. Judgments and orders. (a) The Court, at the conclusion of the hearing, or thereafter as the circumstances of the case may require, shall find and enter a judgment that the minor is or is not a delinquent, or a child in need of supervision, or dependent minor.

(b) * * * * *

(c) * * * * *

(d) * * * * *

(e) * * * * *

(f) * * * * *

(g) * * * * *

(h) * * * * *

(i) * * * * *

(j) If the court finds the minor is a child in need of supervision it shall make any of the following orders of disposition for his supervision, care and rehabilitation:

(1) any of which is authorized under (c) in this section; or

(2) order the minor placed on probation under those conditions and limitations that the court may prescribed; or

Additional Clause Proposed

(3) order the minor's placement in a juvenile correctional school, detention home, or detention facility designated by the department; the minor may be released from placement or detention and placed on probation on order of the court.

---

(3) above is identical to the present Section 47.10.080(b)(1) and is presently applicable only in cases where a minor has been declared a delinquent.

The purpose of the proposed amendment is to make institutional treatment available to a minor who has been declared a "child in need of supervision" who will not submit to supervision, and not being supervised is likely to injure himself and others.

HB-228

CITY OF ANCHORAGE ALASKA

International
Polar air crossroads of the world

POST OFFICE BOX 400
ANCHORAGE, ALASKA
99501

March 19, 1971

The Honorable William J. Moran
Alaska House of Representatives
Pouch V
Juneau, Alaska 99801

Dear Bill:

I note House Bill No. 228 appropriates $10 million for airport projects, and that $5,072,000 is for priority projects at twenty-six general aviation airports throughout the State.

As you know, Merrill Field has, in recent years, reached the saturation point with operations having ranged from 250,000 to 300,000 a year. In 1968, the Federal Aviation Administration pointed out the need for another general aviation airport in this area because Merrill Field had reached its safe optimum operations and International Airport and the Lake Spenard/Lake Hood complex could not absorb the growth in the years ahead. There is no greater concentration of aircraft or greater need for general aviation airport construction anywhere else in the State. The Mayor and Council discussed this need with a number of Anchorage area legislators prior to the current session.

This letter is being written to all members of the House of Representatives from this district with the request that an effort be made to either include Anchorage among the priority projects listed in House Bill 228 or otherwise provide funding for another general aviation airport to serve this area. House Bill No. 228 apparently appropriates all of the airport bond funds approved last Fall. This, coupled with the fact that availability of General Fund moneys are likely to be scarce for capital improvements, prompts this request for concerted action by the Anchorage delegation in the House of Representatives.

The Alaska Department of Public Works, Greater Anchorage Area Borough, and the City of Anchorage have agreed to do an airport system study to determine an appropriate location for another general aviation airport to serve the Greater Anchorage area. The estimate to improve the existing Campbell Airstraip runway is $2.6 million (approximately 40%, or $1,040,000, would be non-Federal share).

AIRMAIL IS FASTER

We do not know that the Campbell location will be selected, but we do know this will be the minimum amount needed for building another general aviation airport here.

We feel that unless there is a commitment now, before all of the bond funds are appropriated, Anchorage's needs may go wanting for some time to come.

Your assistance will be appreciated by the air industry and aircraft users of the Anchorage area.

Sincerely yours,

Robert E. Sharp

HB-239

24 March 1971

The Honorable William Moran,
Chairman, House Judiciary Committee
Alaska State Legislature

Dear Sir:

I understand you have un'er consideration HB 239, which relates to the registration of Architects, Engineers, and Land Surveyors by the State of Alaska. I am writing to urge that you bring this bill back to the floor of the House with a 'do pass' recommendation from your committee.

Passage of this act will make possible better and more efficient regulation of the professions involved, to the end that service to the public will be improved. These professions have always been self-supporting, in that funds collected in licensing fees exceed those expended in administration. Under the proposed law this situation would continue.

The proposed new law has the endorsement of the Alaska Chapter of The American Institute of Architects, The Alaska Society of Professional Engineers, and the Alaska Society of Professional Land Surveyors. Again may I urge you to bring this bill back to the House as soon as possible.

Sincerely,

Arthur R Jacobs PE
National Director for ASPE

HB 239

March 22, 1971

The Honorable Genie Chance
The House of Representatives
Juneau, Alaska 99801

Dear Madame:

At a time when most professionals recognize the need of sharing responsibility in less technical areas of their endeavors in order that they might more effectively utilize their own resources; one professional group in Alaska is attempting to stake out an all-inclusive area of responsibility.

House Bill number 239 (An Act relating to Architecture and Engineering) is such an attempt and is unacceptable for many reasons. Among which are:

Sec. 08.48.011. GENERAL PROVISIONS. Which states in part: In order to safeguard life, health and property, and to promote the public welfare, the practice of the profession of architecture, engineering and land surveying in this state is hereby declared to be subject to regulation in the public interest. Yet, in Sec. 08.48.011 (3), buildings used by two families or less are exempted!

I submit that the rights of Designers, such as myself, would be unjustly abridged by this section. The exclusion of buildings used by two families or less is very arbitrary! Why not exclude buildings used by sixteen families or less, or eight families or less or six families or less? Furthermore, persons living in or owning buildings housing two or less families certainly have the right to protection of life, health, property and welfare. The best possible way to protect the rights of persons living in or owning a building exempted from this Act is through the statewide adoption of uniform building codes. Not the suppression of free enterprise.

Sec. 08.48.151. POWERS OF THE BOARD. States in part: the board, under the hand of its president and the seal of the board, may subpoena witnesses and compel their attendance, and also may require the submission of books, papers, documents or other pertinent data, in disciplinary matters or alleged violations of this chapter.

Sec. 08.48.161. INJUNCTIVE RELIEF. States: The board is authorized in the name of the state to apply for relief by injunction in the established manner provided in cases of civil procedure, without bond, to enforce the provisions of this chapter. Or to restrain an alleged violation of this chapter. In these proceedings it is not necessary to allege or prove that either an adequate remedy at law does not exist, or that substantial or irreparable damage would result from the continued violation. The members of the board are not personally liable under this proceeding.

All or portions of these two sections may be in violation of individual rights pursuant to the constitution of the United States and of the state of Alaska.

In Sec. 08.48.191. VIOLATIONS AND PENALTIES. The penalty imposed upon conviction of violating this Act is set at not more than a sum of $10,000.00 or by imprisonment for not more than one year or both. The penalty set forth in Sec. 08.48.400 of the existing statute is $500.00 or six months imprisonment, and to my knowledge very few, if any, convictions have been recorded. Seemingly, this would make a penalty of $10,000.00 or one year imprisonment seem unnecessarily excessive.

Sec. 08.48.301. DEFINITIONS. Reads in part: The practice of Architecture means a person "who holds himself out as able to perform or who does perform any service or work the board shall by regulation determine to be the practice of architecture." The ramifications of this section are obvious.

Because many architectural firms already are compelled to send most of their actual production work to associates in other states, legislation which restricts the practice of Building Design in Alaska will only create more jobs in those states.

The existing practice of Building Designers working in association with registered engineers (who assume professional responsibility under existing statutes) has proven successful in Alaska and is common practice in many states including Oregon, California and Washington.

The profession of Building Design is recognized throughout the nation and is represented by the American Institute of Building Design, a professional organization of individuals and firms interested in advancing the design of buildings through improved planning and design.

I am sure other Alaska members of the A.I.B.D., as well as many concerned citizens, agree that House Bill 239 is unacceptable and is a self-serving document not in the public interest.

Carlin Williams

Carlin Williams A.I.B.D.

HB-249

MODEL WHITE CANE LAW

[Note: This draft proposal was prepared by Russell Kletzing, an experienced legal practitioner, and by Professor Jacobus tenBrock, an experienced law teacher and writer. Both are blind. They performed the work on behalf of the National Federation of the Blind, the nationwide organization of blind men and women.

This draft is distributed in the hope that it will commend itself to the legislatures of the various states and that they will enact it into law.

The draft is an outgrowth of an article by Professor tenBroek published in the May 1966 issue of the California Law Review entitled "The Right to Live in the World–the Disabled in the Law of Torts." Copies of that article may be secured gratis from the Berkeley office of the National Federation of the Blind, 2652 Shasta Road, Berkeley, California 94708. The article contains a detailed analysis of existing white cane laws and other relevant legislation and judicial decisions. It provides support for the enactment of the model law.]

MODEL WHITE CANE LAW

1: It is the policy of this State to encourage and enable the blind, the visually handicapped, and the otherwise physically disabled to participate fully in the social and economic life of the State and to engage in remunerative employment.

2(a): The blind, the visually handicapped, and the otherwise physically disabled have the same right as the able-bodied to the full and free use of the streets, highways, sidewalks, walkways, public buildings, public facilities, and other public places;

2(b): The blind, the visually handicapped, and the otherwise physically disabled are entitled to full and equal accommodations, advantages, facilities, and privileges of all common carriers, airplanes, motor vehicles, railroad trains, motor buses, street cars, boats or any other public conveyances or modes of transportation, hotels, lodging places, places of public accommodation, amusement or resort, and other places to which the general public is invited, subject only to the conditions and limitations established by law and applicable alike to all persons;

2(c): Every totally or partially blind person shall have the right to be accompanied by a guide dog, especially trained for the purpose, in any of the places listed in section 2(b) without being required to pay an extra charge for the guide dog; provided that he shall be liable for any damage done to the premises or facilities by such dog.

3: The driver of a vehicle approaching a totally or partially blind pedestrian who is carrying a cane predominantly white or metallic in color (with or without a red tip) or using a guide dog shall take all necessary precautions to avoid injury to such blind pedestrian, and any driver who fails to take such precautions shall be liable in damages for any injury caused such pedestrian; provided that a totally or partially

blind pedestrian not carrying such a cane or using a guide dog in any of the places, accommodations or conveyances listed in section 2, shall have all of the rights and privileges conferred by law upon other persons, and the failure of a totally or partially blind pedestrian to carry such a cane or to use a guide dog in any such places, accommodations or conveyances shall not be held to constitute nor be evidence of contributory negligence.

4: Any person or persons, firm or corporation, or the agent of any person or persons, firm or corporation who denies or interferes with admittance to or enjoyment of the public facilities enumerated in section 2 or otherwise interferes with the rights of a totally or partially blind or otherwise disabled person under section 2 shall be guilty of a misdemeanor.

5: Each year, the Governor shall take suitable public notice of October 15 as White Cane Safety Day. He shall issue a proclamation in which:

(a) he comments upon the significance of the white cane;

(b) he calls upon the citizens of the State to observe the provisions of the White Cane Law and to take precautions necessary to the safety of the disabled;

(c) he reminds the citizens of the State of the policies with respect to the disabled herein declared and urges the citizens to cooperate in giving effect to them;

(d) he emphasizes the need of the citizens to be aware of the presence of disabled persons in the community and to keep safe and functional for the disabled the streets, highways, sidewalks, walkways, public buildings, public facilities, other public places, places of public accommodation, amusement and resort, and other places to which the public is invited, and to offer assistance to disabled persons upon appropriate occasions.

6: It is the policy of this State that the blind, the visually handicapped, and the otherwise physically disabled shall be employed in the State Service, the service of the political subdivisions of the State, in the public schools, and in all other employment supported in whole or in part by public funds on the same terms and conditions as the able-bodied, unless it is shown that the particular disability prevents the performance of the work involved.

HB-251

MEMORANDUM

State of Alaska

DEPARTMENT OF COMMERCE

TO:

The Honorable Kenneth W. Kadow
Commissioner

DATE : March 4, 1971

FROM:

Robert E. Butler REB
Deputy Commissioner

SUBJECT: Banking Legislation

There were certain items in the whole package sent to Donna Spragg last week that I questicned either from a policy or legal standpoint. Only these matters are discussed herein.

1. In legislation concerning the commercial banks, an amendment is being proposed to change the liability of stockholders from twice the amount of their investment to an amount not to exceed their investment after payment of losses up to $20,000 per customer by FDIC. This is in line with the single liability imposed on stockholders of national banks.

The intent of this above referred to legislation is clear, but in my view, the new language is ambiguous and has the effect of absolving the stockholders of all liability.

Other corrective language has been suggested to Donna Spragg and Don Beighle, and they are amending this provision to make stockholders liable to the extent of their investment.

2. There is some opposition to the definition of "branch bank" as now proposed. One State bank is contending strongly that a Grandfather's Right's clause be included.

Apparently, limited facility bank charters were granted in the past. These facilities, according to one national bank president, did not fit within the definition of branch bank, and there is an implication that these facilities are possibly illegal. The new legislative proposal is an attempt to straighten this situation out. I suggest we look into it further.

3. In legislation concerning mutual savings banks, there is proposed legislation enabling those banks to invest all of their "free" capital in bank buildings.

My remarks go only to maintenance by these banks of a safe and liquid enough position to withstand runoffs and periods of crisis. It is not inconceivable that Alaska (Anchorage and Fairbanks) could in the future have many vacant houses, such as has happened in Seattle.

The legislation proposed would allow a bank to invest all of its "pure" capital (that is capital exclusive of debentures and capital notes) in bank facilities. Assuming that a bank used all of its capital for a building, or buildings, its capital would then be non-liquid. Since the mutual banks here have had a tendency to invest heavily in conventional mortgages, to that extent their loans and (used) deposits are unliquid also.

The rationale behind allowing this heavy an investment in bank building facilities and presumably providing a safety factor is:

A. Conventional loans can only be made to 80 per cent of deposits (20 per cent cushion between home value and mortgage amount);

B. A mutual can only invest in mortgages up to 80 per cent of deposits (20 per cent cushion against total withdrawals);

C. Mutuals have the authority to borrow from the Federal Home Loan Bank and other sources to any extent necessary to protect depositors.

I understand that the Federal Savings and Loan Association Law is as liberal in its approach as this proposed legislation in the amount of capital that can be used for bank buildings.

To me, however, it is inconsistent to insist on the essentiality of reserves against (conventional) loan losses and then contend on the other hand that loans (without a secondary market) can be sold timely and without loss to restore capital.

4. In another proposal for mutual savings banks, they would be allowed to invest 10 per cent of a bank's capital in the stock of a service corporation which would handle data processing and computer work. This is a cost savings idea and a good sharing device for banks. However, since this stock will be closely held by banks, it presumably is unmarketable. In the sense of its marketability, the stock resembles a debt, and its cost value should be deducted when evaluating the bank's "free" capital.

5. In another proposal, we are allowing mutuals to get into

mobile home financing including dealer paper and flooring to the extent of a maximum of 10 per cent of assets. There are two areas of possible opposition to this proposal. One is from commercial banks who may not like an invasion of their commercial business.

The second is from the savings and loan associations who got into this area last year, but are limited to investments of this kind to the maximum extent of 5 per cent of assets. Since there is a direct competition between S&L's and mutuals the S&L's may feel that the mutuals are being given a competitive edge.

These are some areas that we may want to pursue further with John Robertson.

MEMORANDUM State of Alaska

TO: The Honorable William J. Moran
State House of Representatives

DATE: April 20, 1971

FROM: Robert P. Isaac
Assistant to the Commissioner
Department of Education

SUBJECT: Rural School Deficiencies

In reference to the list of deficiencies in State-operated schools dated February 27, 1970, this information is a little more than a year old and does not reflect the work and projects completed or under construction since that time.

In my comments I will not react to allegations of inadequate libraries. While the reports, in this respect may be true, the degree of adequacy or inadequacy is a subjective judgment; secondly, libraries are not a maintenance matter.

Ivanof Bay -- 16 pupils

Last year's proposals for a well were exorbitant. New proposals are being solicited this year. The existing facilities are quite new but it is quite probable storage space is short.

Gustavus -- 10 pupils

In all probability the facilities need maintenance. This school has been on the verge of closing for several years (opened this year at the last moment), and it is likely some maintenance has been deferred. Interior and exterior painted June 1970.

Pilot Point -- 10 pupils

This is a former BIA school and is now 30 to 35 years old. The report is probably correct.

Holy Cross -- 52 pupils

This school was formerly a Catholic school. It was closed by the church in 1969 and made available to the State on a lease. The site and building were purchased by the State in 1971.

The facility does need some rehabilitation and modernizing. A project is being developed to resolve the major problems.

Teller -- 56 pupils

This is a new school with no apparent maintenance or design deficiencies.

Anaktuvuk Pass -- 35 pupils

A regular water system (well) has not been successful so far; however, the report is probably accurate. The State has entered into an engineering contract with an engineering firm for water and sewer systems design.

Sunrise Creek -- 14 pupils

The school is rented from the Galla Logging Company and is a marginal facility. It should be replaced with a relocatable classroom. No State-owned facilities are programmed at the present time.

Hughes -- 23 pupils

The Hughes school (one classroom and quarters) was originally completed several years ago. It is possible the stove needs replacement. A second classroom and school lunch kitchen were added in 1970. A new electric stove was installed September 10, 1970, and the school extensively modernized in 1970.

Belkofski -- 17 pupils

This school was originally constructed by the BIA several years ago. The facilities are considered "good."

Kobuk -- 19 pupils

A new school was completed last year. Apparently it had some "bugs" that needed to be corrected.

Kaltag -- 76 pupils

This school was transferred to the State by the BIA last year. I am not familiar with the scope of facilities and, consequently, am not in a position to comment on the report.

Squaw Harbor

This school was closed due to low enrollment.

Portage Creek (now Ohgsenakale) -- 23 pupils

A water well was constructed in 1970.

Russian Mission -- 28 pupils

This school was constructed about five years ago and is in good condition. A complete school kitchen was added in 1970.

Dot Lake -- 12 pupils

No comment.

Atmautluak -- 39 pupils

This community moved from Nunapitchuk about 1969. At that time the State leased a church building for the school. A new school, (two classrooms, school kitchen, and quarters) is scheduled for 1971 construction at an estimated cost of $180,000.

Nikolai -- 31 pupils

This school is about 15 years old, probably in "fair" condition. A new well was drilled in 1970.

Kongiganak -- 61 pupils

This community moved from Kwigillingok about 1958-59. Neither the State nor the BIA operated a school at this location prior to 1968. An application was received by the State for a school in 1968; subsequently, a log, two-classroom school was constructed jointly by the Department of Education and Rural Development Agency. The well, provided by the Public Health Service in 1969, failed and hand carrying of water is necessary. The estimated cost to develop a sewage system is $100,000. Two 50kw generators were added in 1970. The State has entered into an engineering contract with an engineering firm for water treatment and sewage disposal systems design.

Chignik Lake -- 38 pupils

Certain school equipment will be in need of replacement.

Chignik Lagoon

School probably needs repainting. Most schools in the Aleutian area weather rapidly. School was rebuilt after hot water tank exploded in 1967.

Aleknagik -- 49 pupils

Two classrooms and one quarters were constructed about three years ago. The original school, about 40 years old, is still in use. When the road between Dillingham and Aleknagik is reconstructed and suitable for year-round use, it is expected upper elementary and high school pupils will be transported daily to Dillingham, thus permitting the old school to be phased out.

Northway -- 71 pupils

No comment.

Bradfield

Rented facilities.

Minto -- 37 pupils

Since the report was made, Minto moved to a new location. The Department provided two classrooms and quarters. PHS is to provide water. The project will be completed this summer.

Ekuk -- 15 pupils

No facilities deficiencies at the present time, however, quarters are limited. School kitchen was added in 1970.

Manokotak -- 71 pupils

Former BIA school transferred to the State in 1967. Two classrooms were added in 1969. Furniture may need replacement.

Brown's Court -- 39 pupils

Three classrooms and one quarters are leased by the State. This school serves the Brown's Trailer Court (adjacent to Clear Air Force Base). When inadequacies are reported to the Department, we try to have them corrected before renewing lease.

Chitina

This school is closed.

Whittier -- 15 pupils

Space is leased from the Corps of Engineers. No comment on adequacy of library.

Kenny Lake -- 66 pupils

School is housed in several buildings. Two of the classrooms and quarters were completed in the last three years.

Kokhanok -- 25 pupils

This school is about 20 years old, quite typical of the one classroom-teacher's quarters structures of that day. A water well has been drilled, however, it has proven unsatisfactory.

Copper Center -- 32 pupils

Two large classrooms, one quarters were constructed by BIA about 1956. Report is probably correct. The heating system was rebuilt, appliances repaired in 1970.

Atka -- 27 pupils

Constructed by BIA in 1968-69. Furniture may need replacement but should have been new and in good condition as of 1969

Stoney River -- 27 pupils

Two classrooms, one quarters, hot lunch kitchen were added in 1970. Furniture may need replacement. Most small schools do not have adequate storage.

Glennallen -- 256 pupils

This is a sizable school which employs 19 staff members. Housing is limited, but State is not in a position to provide housing for this number. Since the report, the old school mentioned has been excessed.

Glennellan should be a city or borough rather than a "State" community.

Fortuna Ledge -- 38 pupils

Two classrooms and quarters were constructed in the last four years. So far no success in obtaining a well; school lunch and new generators were added in 1970.

Platinum -- 30 pupils

One classroom and quarters - 1969; school kitchen added 1970; one classroom to be added in 1971.

Cantwell -- 28 pupils

Older school constructed about 1955. Utilities have always been difficult to maintain at this location.

Tanana -- 171 pupils

This is a sizable facility currently employing 11 teachers. Several classrooms and a gymnasium are now under construction. Four relocatable teacherages were installed in 1970.

Usibelli, Vitro, Healy, Otto Lake, Lignite, Ferry, Suntrana

The school serving these railroad-mining communities is now at Healy. Several relocatable classrooms have been completed. A $530,000 basic school facility is in design. Limited housing is provided, however, a six-unit apartment building is to be constructed by local people this year.

Sand Point -- 93 pupils

School was remodeled last year. A gymnasium was added. Additional classrooms are being designed to accommodate upper grades and high school. Hopefully, the grounds can be improved as part of the current project.

Coffman Cove -- 25 pupils

State leases classrooms from logging company (two-classroom mobile unit).

Chignik -- 17 pupils

New building completed by BIA. Storage space may be inadequate, however, we are not involved in their design process.

Tok -- 221 pupils

Shop and supplemental classrooms are scheduled for this location. Storage situation should be improved when new facilities are available.

Tuxekan -- 8 pupils

Facilities are leased from logging company.

Chalkyitsik

Report is correct.

Georgetown

School is closed due to low enrollment.

Port Alice -- 17 pupils

Facilities are leased from logging company. A mobile home will be provided by the State in 1971.

Togiak -- 133 pupils

Former BIA school transferred to the State in 1967. Originally had four classrooms, two quarters. Four classrooms, multipurpose room, two sets of quarters were added by BIA in 1970. The facilities are now considered adequate.

New Stuyahok -- 68 pupils

Former BIA school. Classrooms and quarters are scheduled for 1971.

Ambler -- 44 pupils

Three classrooms and two quarters. School is located on a high bluff overlooking river. Geological conditions indicate little likelihood of developing a well, except at great expense.

Koyukuk -- 48 pupils

The Koyukuk school is quite old. The original school was constructed about 30 years ago. Several additions have been made by the State. Report is probably accurate.

Bethel -- 872 pupils

Fifty-three staff members are currently employed in the Bethel schools. Housing is limited, however, it has eased since the report was written. A number of unoccupied houses constructed by ASHA have been released to teachers.

The housing problem will increase when the regional school is completed. The number of staff members could expand to 100 or more within two to three years.

Alcantra Youth Camp

The camp is managed by the Correctional Division, however, the school is operated by the State school system. A new school is being constructed by the State this year.

Thorne Bay -- 105 pupils

The school consists of a complex of six classrooms, library, administrative space, etc. Two mobile homes for teachers are provided by the State. Other quarters are available through the logging company. Storage and administrative space is very limited.

A covered play area is to be constructed this year.

Huslia -- 49 pupils

A new school is to be constructed this year.

Tanacross -- 8 pupils

The building was constructed by the BIA in the mid 50's. It should have adequate space for storage since only eight pupils are enrolled.

Delta -- 430 pupils

Twenty-six staff members are employed. There is no State housing available. At one time general State housing was authorized but was rejected by local

people as they believed housing should be provided by private enterprise.

Anvik

Buildings painted, both interior and exterior, in 1970.

Whale Pass -- 20 pupils

Facilities are leased by State from logging company.

McGrath -- 134 pupils

Since the report was written, a gymnasium, revised water system, and classrooms have been completed. A new project for additional classrooms is now in design.

Perryville -- 14 pupils

School originally constructed by BIA in mid 50's.

Gildersleeve

School is leased by State.

Healy

See prior statement. Quarters mentioned in report no longer in use. Since the report, five relocatable teachers' quarters, three relocatable classroom units, and a kitchen and dining unit have been added.

Twin Hills

New facility under construction.

Stevens Village -- 15 pupils

Report is correct.

Chuathbaluk -- 34 pupils

Two classrooms, teachers quarters, log construction constructed in 1967-68 as a joint project with Rural Development Agency. Report is probably correct. New generators and relocatable kitchen and dining facilities installed in 1970.

Nondalton -- 73 pupils

School constructed by BIA; last addition completed in 1970. Presumably, the well and other inadequacies were corrected at the time the addition was completed.

Nulato -- 126 pupils

New school scheduled for Nulato, however, community may move to new location this year. Project will not be started until new site is agreed upon.

Akutan -- 17 pupils

Former BIA school transferred in early 50's. Report is probably correct.

Port Heiden -- 23 pupils

Report is probably correct.

Circle

Comments correct.

Anderson -- 94 pupils

No comments.

Allakaket

School is to be replaced in 1971.

Annette

Housing is very limited; some mobile homes have been provided. Relocation of airport to Ketchikan may reduce number of pupils and FAA families, thus creating new housing possibilities.

McGrath

See other comments on page 8.

Koyuk -- 44 pupils

Presumably these deficiencies have been corrected by now.

Sleetmute

Facility operational.

CARBEE
1966 YEARBOOK of SCHOOL LAWS

Chapter 5

SCHOOL PROPERTY

OWNERSHIP AND CONTROL

Title.—The title to school property is, on occasion, the subject of litigation. Because education is a state function, it follows that schools are state institutions and school property is state property. While it is generally held that title to school property is vested in the school district,[1] it is also held that "school lands are held in public trust."[2] This means that while the title is held by the district or the board, the property is actually held in trust. In California, for example, it has been held that "a [school] district is but the trustee of school property . . . , the state the beneficial owner."[3]

In Wisconsin, in a case involving the ownership of certain assets of a school district, it was held that the term "school property," as used in a statute providing that when a unified school district was created it got possession of all school property of a city school district operating under a city school plan, included money received after the formation of the unified district, for tuition, for the school year preceding the unification.[4]

Control.—The control over school property is ultimately in the

state. As was stated in Chapter 2, the district has no territorial integrity. It owes its existence to the state and its boundaries are constantly subject to change. As a result, "'the state may . . . [without a district's consent] take without compensation its property.'"[5] In Illinois, in a recent case, a school board sought to prevent the annexation of two territories, lying within the district, to a special charter district. The plaintiff contended that, since it had a property right in the revenue from these territories, the statute authorizing such annexation was unconstitutional because it had the effect of depriving the district of property without due process of law.[6] The court, in rejecting this contention, quoted with approval from the earlier *Deatherage* case (401 Ill. 25, 81 N.E. (2d) 581), which is frequently cited as precedent. (See *Yearbook of School Law 1950*, p. 17.) It said: "'A . . . school district established under enabling legislation, is entirely subject to the will of the legislature thereafter. . . . [E]ven without notice or hearing, the State may take the school facilities in the district, without giving compensation therefor, and vest them in other districts or agencies.'" From this it is clear that a school district has no property rights in the property whose title is vested in it. This, as was said, is because it holds the property in public trust.

The authority of the district to control its property is a delegation of power from the legislature. Generally, the legislature vests this authority in the district's governing body—the board of education. Where this is the case, it has been held that the taxpayers have no voice in the making of decisions concerning school buildings. Consequently it has been held that if the taxpayers and/or electors approve the issuance of bonds, the board can, within the limitation of the statement of the overall purpose of the bond issue, decide how the money is to be spent, and the taxpayers cannot complain.[7]

In exercising its control over school property, a board may decide the use to which its property is to be put, and, if it acts

reasonably, the court will not overrule its decision. In Rhode Island one interested in selling and servicing musical instruments objected to a board policy, the nature of which was not revealed, relating to the use of school premises for the sale and rental of musical instruments.[8] Without ruling on the legality of the policy, the court held that plaintiff was not an aggrieved party within the meaning of a statute that authorized such a one to appeal to the commissioner of education from a decision of the school committee.

Control by the Municipality.—Since it is generally recognized that the ultimate control of school property is vested in the legislature, and the local district exercises that control which has been granted to it, either expressly or impliedly, it is quite often believed that the school board has exclusive control over school property. This is frequently questioned by other agencies of government which attempt to exercise some control over school property also. This is particularly true of municipalities, such as villages and cities, within whose boundaries school property is located. Such a question may arise when a municipality attempts to administer a zoning plan so as to exclude schools from certain residential areas. The courts are in disagreement regarding the validity of such action. In New Jersey a case was recently brought attacking the legality of a municipal zoning ordinance that attempted to do this.[9] While this case involved a private or parochial school, the court enunciated several principles of law applicable to public schools as well. This case had its origin when a borough adopted an amendment to a zoning ordinance that barred all schools from one residential area in which the Roman Catholic Diocese owned a parcel of 20 acres on which it intended to erect a regional high school for some 1,500 boys. The Diocese brought this action, assailing the amendment on numerous grounds, including the denial of due process of law and arbitrariness. It should be noted that the zoning ordinance permitted the construction of public and parochial schools in three other residential areas. A statute forbade discrimination between public

[9] *Roman Catholic Diocese* v. *Ho-Ho-Kus Borough*, 42 N.J. 556, 202 A. (2d) 161.

and private day schools by zoning ordinances, but discrimination was not a point at issue. The lower court held that a municipality cannot zone with respect to public schools and therefore it cannot zone with respect to private schools. On appeal by the borough, the decision of the trial court was reversed. The higher court pointed out that if public schools were beyond the reach of zoning ordinances, the statute forbidding discrimination was meaningless. It noted that while the legislature could place public schools beyond the zoning power of municipalities, it had not done so. Neither was there a statute making public schools subject to such zoning authority. It also noted that, while a municipality may consider revenues in its plans for a well-balanced community, "[i]t is another matter to bar tax-exempt facilities on the ground that they are financially burdensome," since the state gives them that status because of the contribution they make to the public good. It is significant that Judge Francis, in a dissenting opinion, said: "The courts of New Jersey have never been called upon to decide the specific question whether a municipality has authority to control the location of a public school by means of a zoning ordinance. In my judgment no such authority exists and . . . the provision of the . . . ordinance [in question] . . . is *ultra vires* and invalid."

A very similar type of case arose in Pennsylvania, and the court's decision was in agreement with that of the New Jersey case just mentioned.[10] This was an appeal by the City of Philadelphia from the decision of a lower court which held the School District of Philadelphia was exempt from the zoning provisions of the City of Philadelphia. When the school district applied to the zoning board for a permit to erect a school building on a certain site, the permit was denied on the ground that the planned structure did not meet certain criteria. For example, it would be 50 feet in height, as opposed to a 35-foot maximum for this district; the plans made no provision for a back yard, whereas zoning regulations required a rear yard at least nine feet in depth; and finally it provided no off-street parking, whereas the ordinance required at least one

[10] *School District of Philadelphia* v. *Zoning Board of Adjustment*, 207 A. (2d) 861 (Pa.).

parking space for each 1000 square feet of gross floor area. The plaintiff district contended that the statute, providing for a zoning board, "did not intend for the City to interfere with the construction of public school buildings," that the sole administration of the school building program is vested in the district, and that to permit municipal interference would amount to the regulation of public schools on the part of the city. The court disagreed, saying:

> In the first place, we do not consider the imposition of a zoning regulation, enacted for the protection of the health, safety and general welfare of the community, requiring off-street parking to avoid traffic congestion to be regulation of public schools. . . . As we view the term "Regulating public schools," this deals more with the quality of public education than with the physical structures required to provide it. . . . That there is some additional cost to the educational system does not mean *ipso facto* that there is regulation of schools.

In the absence of statute specifically freeing the school district from the zoning board's requirements, the court held the school district was without power to oppose the zoning board's actions. It said: "We . . . find, in view of the School District's lack of police power, the failure of the legislative [sic] to provide minimum standards, and the lack of state preemption in this field, that the School District is not immune from such ordinances and that it must comply therewith." Again, there was a dissenting opinion in this case.

One other zoning case appeared during the year.[11] In this case the City of Chicopee, Massachusetts, was successful in enjoining defendants from using a building located in a "Residence 'A'" zone for conducting classes in painting ceramics, and defendants appealed. The ordinance in question prohibited the use of any building or premises located in a "Residence 'A'" zone for "'trade, manufacturing, or commercial purposes or for other than one or more of the following purposes' one of which is '[s]chools, colleges, public libraries, public museums.'" A statute provided that no zoning

IN THE SUPERIOR COURT FOR THE STATE OF ALASKA

FOURTH JUDICIAL DISTRICT

File

STATE OF ALASKA,

Plaintiff,

vs.

FAIRBANKS NORTH STAR BOROUGH ASSEMBLY and HAROLD GILLAM, Borough Chairman,

Defendants.

No. 67-257

FILED in the Superior Court
State of Alaska, Fourth District

JUN 19 1967

OLGA T. STEGER, Clerk

.....Deputy

MEMORANDUM OPINION

Plaintiff, State of Alaska, seeks an injunction prohibiting defendants from inviting or accepting bids for the construction of the proposed new Ryan Junior High School at Fairbanks and for requiring defendants to approve or disapprove the design for said school submitted by the Fairbanks North Star Borough District Board of Education. At the time of filing the complaint, plaintiff also moved for a preliminary injunction requesting the same relief sought in the complaint. A hearing on the motion for preliminary injunction was held on the 12th day of June, 1967, before this Court.

Plaintiff seeks injunctive relief on the basis that Section 16, Article III, Constitution of the State of Alaska, permits the Governor to institute legal proceedings to restrain any violation of constitutional or legislative power, right or duty of any officer, department, or agency of the State or

or its political subdivisions. The alleged violation is the failure of the defendants to secure approval by the Commissioner of Education of the plans for the proposed school prior to inviting bids thereon contrary to the provisions of a Department of Education regulation. The oral arguments of and memoranda filed by the parties reveal the controversy to be centered around the asserted absence in the school plans of any provision for physical education facilities enabling the proposed school to comply with certain supposed minimum requirements established by the Department for physical education activities as part of the State's minimum course of study. It is apparent, therefore, that at the heart of the matter the State, through its Department of Education, seeks to enjoin the construction of the proposed Ryan Junior High School because of a fear that there will be no compliance with regulations for the minimum requirement for physical education activities in the proposed school directly due to the lack of any provision for physical education facilities in those plans on which the Borough is now inviting bids.

Title 14, Alaska Statutes, governs education in this State and contains, inter alia, the powers and duties of the Department of Education of which the State Board of Education and the Commissioner of Education are a part; pursuant to AS 14.07.010, AS 14.07.020(4) prescribes as one of the Department's duties: to "prescribe by regulation a minimum course of study for the public schools." AS 14.07.060 directs the Department to make regulations in accordance with the Aministrative Procedure Act necessary to carry out the provisions of Title 14.

From these two statutes alone, it is obvious the Department not only may but must prescribe minimum study requirements by way of regulation among which it is reasonable to assume would be included certain minimum requirements for physical education activities. It is apparent the State, through its Department of Education, would have a vital interest in securing strict compliance with such a regulation for the benefit of the children in this school district. In that connection, it should be noted that AS 14.07.070 prohibits State funds from being paid to a school district which fails to comply with the school laws of the State or with the regulations promulgated by the Department. In addition, AS 14.07.020(6) imposes on the Department the duty to "accredit those public, private and denominational schools which meet accreditation standards prescribed by regulation by the department." The withholding of either State funds or accreditation or both from a public school appear available as effective methods of enforcement and as sanctions against a recalcitrant, non-complying school district which fails to provide minimum physical education activities due to the inability of a district board of education and the funding authority, as reasonable and mature men and women, to come to a satisfactory and understanding agreement in the construction, operation and management of the public schools in their district.

The question before this Court, however, is not whether the defendants have refused or intend refusing to comply with department regulations concerning a minimum course in physical education in the proposed school. The Court does not even have before it either a set of the school plans or the minimum course requirements for physical education. Neither does the Court have before it any evidence or indication that

the course of study in the proposed school, when opened, would be below minimum standards; or that a physical education complex will not be constructed in time for use when the proposed school opens; or for that matter that when opened the school will not itself have sufficient facilities for the offering of minimal physical education activities.

The only issues before this Court on the present motion for a preliminary injunction are whether or not defendants must secure approval of the proposed plans for the new Ryan Junior High School from the Commissioner of Education before inviting bids for the construction thereof and, if so, whether the invitation and acceptance of bids without such approval will cause the plaintiff immediate and irreparable harm without other adequate remedy thereby entitling plaintiff to a preliminary injunction.

As noted at the outset, the State premises its argument on the proposition that invitation of bids for construction of a new school prior to approval by the Commissioner of the plans, violates State law in the form of a Department of Education regulation codified as Section 22(a), Title 4, Alaska Administrative Code. Section 22 reads as follows: "The Commissioner must approve plans from an educational point of view for new schools, additions, and major rehabilitation, before bids are invited." In its memorandum, the State represents Section 22(a) to have been promulgated pursuant to authority contained in AS 14.07.020(1)[1], and AS 14.07.060(a)[2].

---

[1]"The department shall exercise general supervision over the public schools of the State except the University of Alaska."
[2]"The department shall promulgate regulations which are necessary to carry out the provisions of this title."

The "History" to Section 22 lists the effective date thereof as October 24, 1965, but the effective date of both Statutes cited by the State as authority for Section 22 was not until July 1, 1966. Further, as its "authority" Section 22 lists AS 14.10.140(1)[3] and AS 14.10.150(6)[4]; it does not list the statutes cited by the State as enabling the promulgation of Section 22. Both AS 14.10.140(1) and AS 14.10.150(6) were repealed by Section 59, Ch.98, SLA 1966 effective July 1, 1966 which is the chapter also repealing and revising entire Title 14 on education.

Chapter 98 SLA 1966 completely revised Title 14 governing public education within the State of Alaska. The 1966 legislation basically reorganized the administration of public schools to conform with a change in the local government system of mandatory boroughs. City school districts, borough school districts, and a State-operated school district were substituted for the former city, incorporated, independent, rural and special school districts. At the same time, however, new Title 14 reveals an increased delegation of control over the local school districts to the districts. Repealed AS 14.05.100 provided that, "The public school system shall be administered by the Department of Education and the local school

[3] "The department shall require annually, or at other times as it determines, a report of such facts, arranged in such form as it prescribes, from the teacher, president, superintendent or principal of each public school and other educational institution and the school board of each school district receiving state aid."

[4] "The department may * * *construct, purchase, build or rent the necessary schoolhouses or schoolrooms and maintain and equip them."

boards." There is no comparable section in the new Title 14. Repealed AS 14.15.030 provided that "each . . .independent school district . . .has a school board of five members elected as provided. The school board has the exclusive management and control of school matters in the district, subject to the State school laws and regulations promulgated by the Department of Education." (Emphasis Added) AS 14.12.020 makes no such qualification to the control over schools by the local districts. Further, repealed AS 14.10.140(6) required the Department to "prescribe rules and regulations for the general government of the public schools necessary to secure efficiency and promote the interests of the public schools." There are no sections in the new Title 14 comparable to these latter two sections. While under repealed AS 14.10.100 the Department had exclusive control over the selection of textbooks used in the schools, the present AS 14.07.050 differs in that the Department can no longer dictate what textbooks will be used in the schools other than those in the State-operated school district. In short, a comparison of the duties and powers of the Department under repealed AS 14.10.140 and AS 14.10.150 with the present duties and powers listed in AS 14.07.020 and AS 14.07.030 clearly indicate a restriction in the powers and duties of the Department and an increase in the same for the local school districts, while still remaining under the jurisdiction of the Department certain statewide functions such as certification of teachers, accreditation of schools, administration of State funds, and control of State-operated schools. Nothing in the new Title 14 in-

dicates that, although charged with the general supervision of the public schools, the Department is obligated or has the power to administer the public schools, other than in the State-operated district, with respect to matters not specifically set forth in AS 14.07.020 and AS 14.07.030 or elsewhere.

See 44.27.020 (1)(2)(3)

With respect to the construction of school facilities, repealed AS 14.10.150(6), one of the Statutes pursuant to which Section 22 was promulgated, gave the Department unqualified power to construct, purchase, build, rent, maintain and equip necessary schoolhouses. Although under repealed AS 14.15.750 as well as present AS07.15.330(a),(e) through (g) and AS 07.25.040(3) the local school districts have the power to construct school buildings, the present power of the Department to construct school buildings is strictly limited by AS 14.07.030(3) to State-operated schools. The design of and plans for construction of school facilities in the borough districts is governed by AS 07.15.330 and supervision of construction is governed by AS 07.25.040(3) neither of which Statutes mentions the Department of Education. Further, the borough assembly, under AS 14.12.020(c), is required to provide the funds for maintaining and operating the district schools. Consequently, this Court can find no enabling legislation supporting Section 22(a), Title 4, Alaska Administrative Code as a reasonable and necessary Department regulation especially in view of the fact that the former enabling Statutes were repealed with no new comparable sections.

See 14.07.020 (2)

There is no evidence or indication before the Court

that State funds are or would be used in the construction or design of the proposed Ryan Junior High School. The only apparent interest the Department has in the proposed school is the effect the supposed absence in the school plans for physical education facilities might have in the too distant future upon compliance with the Department's minimum standards for physical education. As mentioned above, there is no immediacy extant in the present situation in that respect.

Injunctive relief against a governmental body in favor of another governmental body is an extraordinary remedy and should be granted only where clearly appropriate. This is especially so with regards to a preliminary injunction. Even if the Department could validly require plans for new schools to be approved by the Commissioner before bids are invited, (which this Court finds it cannot,) there is still nothing before the Court to indicate the necessity for injunctive relief at this time when there is no showing that immediate and irreparable harm would result in the absence of an injunction as prayed for or that there exists no other adequate remedies available to the Department as previously noted.

Therefore, and in view of the foregoing, it is the Court's opinion that the plaintiff's motion for a preliminary injunction should be denied.

DATED at Fairbanks, Alaska, this 19th day of June, 1967.

EVERETT W. HEPP
Superior Court Judge

HB-265

R.C.

DRAFT

TO: The Honorable William J. Moran
Chairman, House Judiciary Committee

FROM: Robert P. Isaac

SUBJECT: House Bill 265 - "Relating to the duties of the department" (Regulation of school construction)

The State, through the cigarette tax and more recently shared revenue provisions and large direct appropriations, supports school construction on a very liberal basis. Consequently, the State does have a considerable financial interest in most school facilities.

Even during the years the cigarette tax was the only consistent approach to school construction financial support, the State's financial interest was substantial. (The annual distribution of cigarette tax has averaged $1.2 million plus for many years.)

However, the State's authority (Legislature) to regulate school construction is not necessarily related to the degree of State support for school facilities. Public school facilities, constructed with public funds, are State property and the Legislature has plenary authority in legislating whatever controls or regulation it believes necessary ~~and~~ within constitutional provisions. For this reason, and especially since SUBSTANTIAL EFFORT IS BEING MADE BY THE STATE more ~~liberal~~ approaches ~~are being made~~ to support school construction, it may be appropriate to enact more definitive law in respect to regulation of school construction than currently exists.

Copy attached

I have reviewed the material relating to the 1967 court case in Fairbanks and while I do not agree with the conclusions reached by the court as stated on page 8, it appears the current regulation pertaining to approval of school plans by the Department may not have adequate legal basis. With this in mind, we would recommend appropriate

legislation. In our opinion, House Bill 265 resolves this problem but should be revised.

AS 14.07.020 is amended by adding a new paragraph reading:

"(8) prescribe by regulation that each school district shall observe such standards and planning criteria as the Department may prescribe for school buildings and other school facilities."

In our opinion the references to building codes, specifications and penalties should be omitted as adequate provision could be made for these items in the regulations.

A most effective penalty provision already exists under

"AS 14.07.070. Withholding state funds. No state funds may be paid to a school district or teacher who fails to comply with the school laws of the state or with the regulations promulgated by the department."

HB-265

DISTRICT ONE EDUCATION ASSOCIATION

Feb. 27, 1970

LIST OF FACILITIES DEFICIENCIES IN RURAL STATE OPERATED SCHOOLS

The information contained herein was furnished by respondents to a questionnaire composed by James Ede, a member of the Executive Committee. The questionnaires were sent out December 18, 1969, and responses were received December through February.

The results were compiled and edited by Max G. Drsier of the Anchorage Regional Office of the Alaska Education Association.

IVANOF BAY

Library inadequate

Very little storage room

No water supply

GUSTAVUS

Library inadequate

School building last painted perhaps 10 years ago

Washer and drier in very poor condition

Quarters last painted perhaps 10 years ago

Storage is inadequate; school should have 3 times the storage space.

PILOT POINT

Needs new roof and water pipes

HOLY CROSS

Library inadequate

Very limited storage; bathrooms when installed will take up present storage space.

Quaters, (2), one of which is not suitable for human habitation

Appliances: One quarters has no washing machine and a barely working refrigerator.

School closed 3 weeks because power from village inadequate and no standby generator provided.

Hot water heating system with no running water in the school

Outhouses about 40 years old.

TELLER

Library inadequate

ANAKTUVUK PASS

Library inadequate

No storage space

Water source: ice. "If a heated tank were installed the water system could be much improved and cost the state less.

SUNRISE CREEK

Library inadequate

Plumbing: Toilet and sink

Water Source: Creek behind school

HUGHES

Library inadequate; very few new books.

Storage space very limited

Oil cook stove is a "headache"

BELKOFSKI

Library inadequate, many outdated books

KOBUK

Library inadequate

Errors in building that caused plumbing freezing are being corrected.

KALTAG

Needs one more classroom, as there are now 4 teachers and 3 classrooms.

SQUAW HARBOR

Library inadequate; all books burned last Easter 1969.

No storage space

No state owned quarters. Teacher was put in a shack. Faulty oil stove caused a chimney fire Dec. 13 (1969) No work has been started on promised new school and teacherage.

PORTAGE GREEK

Library inadequate, 40 books.

No plumbing; Water Source: rain water

RUSSIAN MISSION

Library inadequate

Washer and oil range in poor condition

Teachers quarters are used by cook to prepare snacks, hence lack of pricacy. Also refrigerator must be shared with snack program.

DOT LAKE

Library inadequate

ATMAUTLUAK

Hopefully large new school to be built next year

No typewriter

No storage space

Honey bucket plumbing; water source from river

NIKOLAI

Very little storage space

Well ran out of water at Christmas (1969) so facilities are water barrel (river water) and honey bucket.

Furniture in very poor condition.

Major problem is small size of living quarters

KONGIGANAK

Library inadequate

Kohler diesol power plant, 10kw., in very poor condition

No plumbing; water source is rain water, swamp water, ice in winter

Washing machine, 1 refrigerator, and 1 oil range in poor condition

Furniture in poor condition

Poor household utensils

CHIGNIK LAKE

Movie projector, filmstrip viewers, record player, and tape recorder very old.

CHIGNIK LAGOON

Not much storage space.

School building needs paint

ALEKNAGIK

3 separate buildings. One building about 1/3 mile from others-no plumbing in it. Two buildings have outhouses.

Water source for newer building is a well. No indication as to source for others.

NORTHWAY

Library inadequate, 125 books

BRADFIELD

Library inadequate, 30 books

MINTO

no sewage; tub plumbing inadequate

Water source: River

Furniture in poor condition

EKUK

Library inadequate

Well now (12-29-69) being installed; water truck now, but pump for well on order.

MANOKOTAK

Furniture in poor condition

BROWN'S COURT

School never painted, 8 yrs. old. Quarters painted maybe 6 or 7 yrs. ago.

Furniture in poor condition

Repair work and custodial service inadequate

CHITINA

Library inadequate, 50 books

No washer or drier; laundromat in town

WHITTIER

Library inadequate; 200 very old books

KENNY LAKE

Library inadequate

Storage inadequate

Deep well supplies community; people haul water. Very good water.

KOKHANOK

Classroom too small

Library OK in supplementary reading, inadequate in fiction and picture books.

KOKHANOK (con't)

Type of plumbing:"Run with water bucket."

Water source: Lake Illiamna

"For two summers I boxed up my personal effects as the school was to be redecorated. Neither summer was it touched. I face the same problem for the summer of 1970."

COPPER CENTER

Library inadequate

Washer, drier, and refrigerator in poor condition

Very poor water

Poor heating system. (It is supposed to be rebuilt in the near future.)

ATKA

Poor furniture

STONY RIVER

Storage space too small

Furniture in poor condition

GLENNALLEN

Library inadequate, but improves yearly

Quarters: Only supt. had quarters until this year. Condemned building used for other new teachers. There is no adequate housing available to teachers, especially a family man.

FORTUNA LEDGE (MARSHALL)

Library inadequate

Storage space inadequate

Of the three classrooms, one is old and small

One set of quarters in a house very near the schoolneeds rececorating and plumbing and water.

PLATINUM

Library inadequate

CANTWELL

Sewer froze every year, but they think it may be fixed now.

TANANA

Library inadequate

No washer or drier, except for one new trailer

No preventative maintenance on the housing. We need a qualified person in the different areas to serve as a maintenance man for the schools and the housing.

USIBELLI, VITRO, HEALY, OTTO LAKE LIGNITE, FERRY SUNTRANA

Housing tights and expensive

Library inadequate

4 sets of quarters - conditions vary. Some are pitifully inadequate, others are suitable. One teacher is without quarters furnished while all others have some type of furnished quarters.

SAND POINT

Clothes drier won't run. Needs new motor. Has been requested (12-29-6

Needs a duplex for teachers.

Apartment and trailer house both need painting inside.

More gravel needed around building and playground equipment.

Need better surface on playground; now either mud or large sharp rocks.

COFFMAN COVE

Library inadequate

Storage space extremely inadequate

Water piped from creek; modern plumbing

CHIGNIK

Library inadequate

No storage room for books or school supplies (Building is new, 4 mo. ol

TOK

Library inadequate

Storage space inadequate, virtually none

TUXEKAN

Library inadequate

The trailer we were to move into was being used by a logging family. A

we had a camper trailer we brought it out. However, it would be nice if these quarters were reserved for teachers.

CHALKYITSIK

Library inadequate

Water hauled from river 1/2/mile away

GEORGETOWN

Classroom too small

3 movie projectors, none work

Inadequate library

No storage space

One room quarters. Response to description of quarters, "Indescribable!"

No plumbing; water source - river

Washer and cook stove in very poor condition, as is refrigerator

Quarters are WWII quonset. The physical plant is terrible.

Furniture in poor condition

Classroom is frigid - cannot maintain heat.

Nothing works correctly.

PORT ALICE

Library inadequate

Storage space most unsatisfactory. We are using an outhouse for chemical toilets during unfrozen up weather. Plus the community recreation hall.

Plumbing, indoor. But sewers freeze up in winter. Then have to use honey bucketaffair and haul refuse for dumping in bay. No other disposal facilities available for the camp have been arranged.

Water source: Piped from creek across bay. Also freezes up in cold weather. Then water is hauled in plastic garbage cans.

School building not up to specifications of state-owned schools in such matters as lighting, floor space, air volumn per child. Ceilings are low; windows very small; no tile on hardboard floor. Ceiling painted with gloss enamel causing a horrible glare. Lighting bad.

New laundry equipment has been installed which requires 50¢ per load to wash and 25¢ for 10 minutes of drying time. We all consider this very unreasonable, but no one has been able to do anything about it.

TOGIAK

Library inadequate

Extra Classrooms (to be built this summer) are needed along with more living quarters, to solve problem of 130 children, 6 teachers and 4 classrooms.

NEW STUYAHOK

Library inadequate

AMBLER

Library inadequate (about 100 books)

Water carried from river; Plumbing: water drain.

Washer and drier in poor condition.

KOYUKUK

Storage inadequate

Plumbing: Drains, septic tanks

Water source: River - ice contract in season

Furniture in poor condition. It was very cheap when purchased and has not held up.

The school and quarters are set on pilings about 3 feet above the ground. The floors tend to be quite cold in winter and heavy footwear is required even inside.

BETHEL

Housing conditions generally poor, no running water or sanitation

Storage space inadequate

School owned quarters will accommodate only 1/4 of the staff

Furniture of poor quality

ALCANTRA YOUTH CAMP

Storage space small - most things stored in classrooms

Age of school building unknown; it is a 1940-45 quonset hut. The Camp needs a new school

THORNE BAY

Inadequate library

No storage space

Clothes drier not working (12-29-69)

HUSLIA

Inadequate storage

Needs new school

TANACROSS

Inadequate library

Storage space: attic only

Wringer type washing machine and oil cook stove in poor condition

DELTA JUNCTION

No school-owned quarters; local housing very tight

ANVIK

School building 10 yr. old; painted only once that teacher knows of

Quarters need paint

WHALE PASS

Inadequate library

Absolutely no storage space

Inside plumbing; water source: dam

Good furniture but very little of it.

McGRATH

Library inadequate

Virtually no storage space

Poor water (Does have regular plumbing & well)

PERRYVILLE

Washer, refrigerator, cook stove in poor condition; should have a small freezer and clothes drier.

Children use outdoor toilets at present. There is a chance that indoor lavatories will be installed plus new tile floor laid this summer.

GILDERSLEEVE LOGGING CAMP #2

Library inadequate. Indicates this material on order.

Small storage space, but inadequate

HEALY

One set of quarters very old, barely adequate. Has been assumed for years that quarters will no longer be used, but continue to be.

TWIN HILLS

Library inadequate

No storage space

Quarters extremely small

Mo plumbing; water source, river

Condition of furniture,poor.

STEVENS VILLAGE

Plumbing: Honey bucket; Water Source: River

CHUATHBALUK

No standard typewriter, need one very badly

No storage in classroom; storage in quarters only

Sheet iron roofing has not been put on school building

Power plant does not function properly. Mechanic has worked on plant two times this year (69-70) (as of Dec. 23, 1969) but still isn't working properly.

Floor tile should be installed in quarters and classroom; nothing in either.

NONDALTON

No library

Inadequate storage

35' well very poor and inadequate

Furniture is junk

NULATO

Library only partially adequate

Inadequate storage space

Water & plumbing: Ice & spring water. High school: drains, honey bucket. Others have no drains, have honey bucket

AKUTAN

Water source: Dam on creek that flows near school

Furniture: Every piece needs replacing

PORT HEIDEN

School needs painting

CIRCLE CITY

Library inadequate

Plumbing: "Non-creative" sinks and tub plumbing, but no toilets

Water source: Purchased and hauled from a riverside well source; about 1000 gal. storage capacity.

ANDERSON

Library inadequate

ALLAKAKET

Classrooms too small for the enrollment of the school

Library inadequate

Inadequate storage space

No Plumbing (except a drain in the kitchen sink)

Water source: River

Washing machine in poor condition; furniture is pathetic

ANNETTE

No library

Water source: lake; modern plumbing

Housing available for only two couples. Other teachers are in very inadequate housing.

ADDITIONAL 1970 NOTES: DECEMBER 1970

McGRATH

Some emergency exit lights are not operative

Should a second boiler be installed to handle facility in event of a break down? Entire school now depends on single boiler.

KOYUK

Repairs needed on boiler and hot water tank

The number one generator is not operational

The two water distillation units are not operational

SLEETMUTE

The new 25kw light plant has not yet been made operational

HOLY CROSS

There seems to be inadequate maintenance of the new water and sewer system, our reports indicate an early breakdown will likely occur.

ANIAK

The new housing unit has been installed 1 foot above ground and local observers indicate that annual floods are usually 2-3 feet deep at this spot. This was pointed out at time of installtion.

These observations presented directly to NEA-Alaska staff members 12-30-

HB-265

DISTRICT ONE EDUCATION ASSOCIATION

1427 "M" St.,
Anchorage, Alaska 99501

April 8, 1971

Honorable Eugene Guess, Speaker
Alaska State House of Representatives
Pouch V,
Juneau, Alaska 99801

Dear Mr. Speaker:

Attached are the Alaska Department of Health and Welfare sanitation regulations pertaining to Alaskan Schools. I would like to urge you to study them carefully as to their validity. You will probably discover as we did that these regulations are somewhat outdated but never the less they are the regulations that have been in effect for some time.

As you read these regulations please keep in mind the condition of the schools in your area and especially the rural schools operated by the state. You are aware that the physical condition of many of our rural schools leaves much to be desired and that it has been the responsibility of the Department of Health and Welfare to enforce these regulations. It is also the responsibility of the Department of Public Works Division of Buildings to maintain State Operated Rural Schools in conformity with the state sanitation regulations.

Seldom, if ever to our knowledge, has the Department of Health inspected any of the small rural schools to insure that these regulations are adhered to.

It is the opinion and feeling, after considerable investigation and first hand experience in rural schools by members of the Executive Board of the District One Education Association, that virtually all rural schools are in violation of at least one of these regulations and most of the schools are in violation of many of these regulations, outdated as they may be.

As an elected public official, you are well aware of the high infant mortality rate in rural Alaska and the low rate of life expectancy of our rural citizens. Perhaps the State through strict application of its sanitation regulations in its public facilities should set an example for others to follow, namely the children in our schools. These children deserve the same chance at life, education and suc-

cess that their more fortunate urban counterparts enjoy.

Hopefully you and your colleagues will use your influence to require the Department of Health and Welfare and the Department of Public Works to enforce sanitation regulations in every Alaskan School which are minimal at best.

Sincerely,

James Ede

James Ede, President
District One Education Association

Enclosure

cc: To All Members of The House of Representatives

JE/jw

SUBCHAPTER 11.

SCHOOLS

PART 2.

Sections

1210. Definitions.
1211. Construction or remodeling of school buildings.
1212. Sanitary features.
1213. Disease control.
1214. Right to make inspection.
1215. Penalty.

1210. Definitions.

The following definitions shall apply in the interpretation and enforcement of these regulations:

(a) "School" shall mean any or all education institutions owned and/or operated by federal, state or local governments, religious organizations, private agencies or individuals.

(b) "Health Officer" shall mean the Commissioner of Health and Welfare for the state of Alaska or his authorized representative.

(c) "Alaska Drinking Water Standards" shall mean standards as set forth in Title 7, Division 1, Chapter 2, Subchapter 1 of the Alaska Administrative Code.

(d) "Alaska Sewage Disposal Standards" shall mean the regulations as set forth in Title 7, Division 1, Chapter 2, Subchapter 2 of the Alaska Administrative Code.

(e) "Alaska Food Handling Standards" shall mean the regulations as set forth in Title 7, Division 1, Chapter 2, Subchapter 3 of the Alaska Administrative Code.

(f) "Alaska Plumbing Code" shall mean the regulations as set forth in Title 7, Division 1, Chapter 2, Subchapter 11, Part 1 of the Alaska Administrative Code.

Authority. A. S. Title 18; Health & Safety

History. In effect on and before July 28, 1959, effective date of Alaska Administrative Procedure Act.

1211. Construction or remodeling of school buildings.

On and after the effective date of these regulations, all school buildings or appurtenances which are constructed or remodeled shall be constructed or remodeled in accordance with the standards set forth in

these regulations.

No governmental agency, school district, city, town, church organization, individual, firm, corporation or officer or employee thereof, or other person, shall install or contract for the construction, alteration, or remodeling of any school building or part of the school physical plant until plans and specifications, together with an engineering report supporting in detail the design set forth in such plans, shall have been submitted to and approved by the Department of Health and Welfare, such approval shall be evidenced by the signature and official registration seal of the Chief Engineer of the Department of Health and Welfare.

After such plans and specifications have been approved by the Department of Health and Welfare, no material changes in the location, plans, construction, or operation of any such school building or physical plant may be made without first submitting to said Department a detailed statement of such proposed changes and receiving its approval.

All such plans hereafter to be submitted to the Department of Health and Welfare for its approval shall have been prepared by or under the supervision of an architect or professional engineer legally registered in the state of Alaska, be certified by him and bear his official seal of registration.

1212. Sanitary features.

(a) Buildings and grounds. The building shall be located, constructed and maintained to protect the health of the students. The school grounds shall be of such size, topography, cleanliness, and arrangement to encourage wholesome recreation.

Commentary

Public health reason: Multi-storied buildings without proper exits and containing unsatisfactory plumbing or buildings which are improperly oriented may entirely offset the advantages of good planning throughout the remainder of the school plant. Even though a water supply or sewer system may be properly planned and constructed, unless the plumbing is equally well planned and constructed, and the water supply protected against cross connection with an unsafe or questionable water supply, safety hazards and communicable disease may exact unnecessary illness and possibly death among school children. Improper drainage, inadequate play space, traffic hazards, unsightly debris, refuse and wastes, and other similar physical inadequacies may foster the spread of communicable disease and jeopardize the health and safety of the school children.

Satisfactory compliance: This item shall be deemed satisfied if:
The school buildings exemplified through its design and appearance, beauty and good taste are properly a part of the activities within.

The greatest practical reduction in number of stories is made and where possible an open type plan which permits expansibility and flexibility is used.

Corridors are carried through so that they may be extended when addi-

tions are necessary. Stairs are placed at right angles to corridors. Indispensable windows are not located at points where expansion may be necessary; boiler rooms are constructed so as to provide room for expansion; oversize water supply and sewage disposal systems are provided and kept well away from possible areas for additions. Plumbing, heating, electrical systems, etc., are planned so that they may operate safely and may provide for eventual expansion.

Class room widths do not exceed 20 to 25 feet or the width of rooms usable for instruction or study not greater than twice the distance from the floor to the top of the glass windows. A minimum clear height of spaces for pupil use, such as corridors, toilet rooms, is at least eight feet, six inches and at least 20 square feet of floor space per pupil is provided in all classrooms. (Cloak rooms shall not be considered class room area.)

Surface, subsoil and permafrost conditions are such that the school building physical plant including sanitary facilities and necessary access ways may be constructed in such a manner as to prevent the creation of health and safety hazards.

The site is dry or can be well drained, protected from flooding, snow slides, land slides, and is located a reasonable distance from railroads, highways, airports, or other facilities which may provide traffic hazards.

Reasonable play space is provided and suitable drive and parking areas, walk-ways, and play areas are designated. Topographical conditions, in some instances, may not permit the provision of a sufficient amount of play area.

(b) Floors. The floors of all the rooms shall be adequate in size, properly insulated, of easily cleanable material, shall be smooth, and in good repair; proper cleaning methods shall be employed systematically after school, and floors shall be kept clean.

Commentary

Public health reason: Adequate floor space is a factor in determining proper ventilation. Insulated or warm floors provide the necessary comfort. Suitable construction is a prerequisite for good maintenance. Smooth floors facilitate good maintenance for smooth floors in good repair can be more easily kept clean and are, therefore, more likely to be kept clean. Proper cleaning methods minimize dust and promote cleanliness.

Satisfactory compliance: This item shall be deemed satisfied if:
The floor space requirements of part (a) of section 1212 are met.

Direct air currents are absent from the floor.

Floors of all the rooms in the school are of such construction as to be easily cleaned, are smooth and in good repair. Floors may be of concrete, terrazo, tile, matched hardwood, or equal composition. Waxing of floors is to be encouraged. Wax produces a flexible surface and protects the floor from wear. Wood floors may be waxed or treated and made water repellent. Floors in toilet rooms should be of impervious material.

Wooden floors containing cracks, broken or poorly fitted planks containing slivers, or which otherwise fail to be tight, do not comply with this item.

Dustless methods of floor cleaning are used, or dust arresting sweeping compounds and push broom are employed. Where commercial sweeping compounds are not available, ordinary sawdust may be saturated with floor oil or moistened with water and used as a sweeping compound. The application of oils directly to the floor in excessive amounts is to be discouraged. School rooms should never be dry swept. All except emergency floor cleaning shall be done after school hours. Provisions shall be made to keep floors dry near water fountains and hand washing facilities.

All floors are kept clean and free from litter. Each room should have a metal container for paper and trash.

(c) Walls and ceilings. The walls and ceilings shall be smooth, tight, and in good repair. Walls and ceilings shall have surfaces of light color and dull finish. Walls and ceilings shall be kept clean.

Commentary

Public health reason: Smooth, tight walls in good repair are more easily kept clean and are, therefore, more likely to be kept clean. Light colored walls and ceilings reflect a greater amount of desirable light. The finish shall be dulled to prevent glare and eye strain. Clean walls and ceilings reflect more light than dirty ones and are conducive to general sanitation.

Satisfactory compliance: This item shall be deemed satisfactory if:

Walls and ceilings in all the school rooms are tight, smooth, and in good repair. Beaded wains-coating is not considered satisfactory for walls or ceiling material.

Walls and ceilings of all school rooms have a light, dull finish and are refinished as often as necessary in a manner approved by the health authorities. Suggested colors of paint for walls: light cream, light buff, or light yellow, flat finish paint. The reflecting factor for flat paint on the walls should be from 40 to 60%. Suggested colors for ceilings: white, ivory or light cream, flat finish paint. Ceiling reflection factor should be at least 65%. There should be no glare.

Walls are clean.

Inside window glass, door glass, and frames are clean. Shades are clean.

(d) Doors and windows. Outside doors shall be self-closing and shall open outward. Only panic proof hardware shall be used on all building exits. When flies or insects are present during the school season, all openings to the outer air shall be screened effectively, unless other effective means are provided to prevent the entrance of insects.

Commentary

Public health reason: Flies, mosquitoes and other insects may not

only annoy school children but may also spread infection to food, water or individuals, thus nullifying the effectiveness of all other public health safeguards.

Satisfactory compliance: This item shall be deemed satisfied if:
All openings to the outer air are effectively screened with not less than 16 mesh wire or plastic cloth and all doors are self-closing, free swinging, and outer screen doors open outward in areas where insects are present.

Flies or other insects are absent.

In places where outside opening doors are unusable because of snow accumulations, other arrangements may be made for unhampered exits of students from the school building in case of fire. Where other unhampered arrangements cannot be made, the section requiring that doors open outward may be excepted.

(c) Lighting. All rooms used for class rooms or study rooms shall be well lighted. Adequate artificial light shall be provided at times when natural light is inadequate. Storage rooms must be sufficiently lighted to permit good housekeeping.

Standards defining and providing for school lighting as reflected in the current official report "American Standard Practice for School Lighting" published by the Illuminating Engineering Society, 1860 Broadway, New York 23, N. Y., are hereby adopted by reference as school lighting standards of the Department of Health and Welfare.

Commentary

Public health reason: Ample soft light prevents eye strain and promotes cleanliness.

Satisfactory compliance: This item shall be deemed satisfied if:
The lighting is properly distributed, shadows and glare are absent from reading and working surfaces. Direct rays of the sun are controlled.

Adequate light shall be provided on all working surfaces. When adequate natural light is not available, artificial light must be provided to supplement the daylight so that high level, well diffused, glareless illumination is available at any hour of the day, any day in the year. Unshaded electric bulbs cannot give proper illumination.

Light fixtures must be designed so that they will obtain softness of light, absence of shadows, satisfactory distribution of light at various angles, pleasing appearance of the installation, and they must be easily maintained. Investigation has shown that in many schools with adequate lighting equipment, the actual illumination in the rooms falls far below the required standard because of inadequate maintenance. If the effectiveness of the lighting equipment is to be maintained, the following recommendations must be followed:

All fixtures and bulbs should be dusted at least once a month and washed once every three months.

Bulbs of less than the specified wattage must not be used.

The use of 1000 hour bulbs is recommended.

Inside frosted bulbs are preferable, and with indirect lighting are essential.

Interior decoration should not be allowed to deteriorate, as such deterioration reduces the quantity of illumination in a room.

Competent staff for janitorial work, electrical maintenance, and interior decoration should be maintained and is essential if the effectiveness of the lighting equipment is to be maintained.

It is recommended that periodical inspections be made and reports submitted to the school official in charge or other responsible authority on the quality and intensity of illumination in the school.

Where lighting units are of the enclosed focal glass style, with ceilings 12 feet or less, they should be mounted as close to the ceiling as possible. If, however, the ceilings are quite low or slanting, the control of the brightness versus fields of vision presents special problems. This uncontrolled brightness produces seeing losses, especially at low mounting heights.

Direct, indirect and fluorescent lighting may be used. In general, the following points should be remembered in use of these types of lighting. Direct lighting is not recommended as conducive to best seeing results, but circumstances in some cases are such that it may be used. Indirect lighting in a majority of cases is the best type of lighting for class room or library study; however, this type of lighting will prove unsatisfactory unless the lighting fixtures are cleaned as often as specified in a previous sentence. Fluorescent type lights are about 14 times the desirable brightness for luminous objects that are in the field of vision of students and teachers in the class room. Consequently, the only fluorescent luminars that are suitable for class room use are those that incorporate louvers, opal glass, white plastic or other diffusing media, or shields so designed as to shade the naked fluorescent lamp from the direct view of the children and the teacher.

Slight variations in power used to operate fluorescent lights may cause flickering and distracting, as well as unsatisfactory lighting. Therefore, fluorescent lights should not be used where power sources may fluctuate in any considerable amount. Fluorescent type lights are not very suitable for use with small home power plants.

(f) Heating and ventilation. All rooms of the school shall be properly heated so that the inside temperature four feet above the floor does not fall below 68° F. Ventilation shall be sufficient to provide proper circulation of air, even distribution of heat and to remove undesirable odors.

Commentary

Public health reason: Supplemental artificial heat is necessary when the natural temperature is 68° F. or less for comfort and to avoid exces-

sive clothing and strain on the vital organs of the body. Proper ventilation reduces bacterial concentration in the air, odors, condensation upon interior surfaces, and provides adequate oxygen for respiration. In the ordinary occupied spaces, harmful chemical impurities may be contributed from certain types of cooking and heating appliances including carbon monoxide, from imperfect combustion, which may be a serious hazard to life and health. When the only source of contamination is a human occupant, the minimum quantity of air appears to be that required to remove objectionable body odors or tobacco smoke. With adequate air space the rate of air change should be from 10 to 30 cubic feet per minute per person. In rooms occupied by only a few persons, such a rate of air change will be automatically attained in cold weather by normal leakage around doors and windows while it can easily be secured in warm weather by the opening of windows. In more crowded rooms the whole picture changes. Cubic space per person is less and the size of the room makes it impossible to admit untempered outside air without drafts. Here mechanical ventilation is essential. It is even more essential for thermal than for chemical reasons. It is control of thermal properties of air in order to effect the removal of the heat produced by human bodies rather than dilution of chemical poisons, which must govern practice. An equally important consideration is the aid in the prevention of the spread of upper respiratory diseases by the providing of adequate ventilation. Proper ventilation is necessary to protect and maintain the health of school children.

Satisfactory compliance: This item shall be deemed satisfied if:

The heating equipment maintains the temperature evenly throughout the classroom at 68° F. Electric current, hot water, steam and hot air furnaces are desirable sources of heat. The registers are to be so located as to maintain a uniform temperature. The central heating plant of the hot water, steam, or hot air type is recommended as most desirable. The equipment should be provided with thermostatically controlled, automatic heating equipment. Preferably the heating plant should not be located under that section of the school building in which class rooms are placed. For a small school where central heating cannot be provided, a jacketed stove is recommended. The jacketed stove consists of a stove that is enclosed in a sheet metal cylinder that is opened at the top and bottom. A fresh air duct runs from the outside of the building and is terminated beneath the jacket. In operation, this unit draws cold fresh air up between the jacket and stove and the air is warmed and discharged above to go out over the room. Some of the room air which has cooled and fallen to the floor level is also drawn into the jacket and rewarmed. Air change is insured by means of an exhaust duct with an opening at the floor level. This duct connects to a chimney or better encloses chimney, and heated gases in chimney warming the exhaust air maintain the flow of exhaust air. Dampers should be provided in both the inlet and exhaust duct.

All oil or gas heating units should be effectively vented to the outside. All stoves, furnaces, etc., should be maintained in good repair to prevent combustion gases from entering the school building.

The room is not overheated. There shall not be more than 5° F. difference in temperature at the four feet above the floor on a movable stand or moved about the room in at least four places so that temperature in the various parts of the school room may be checked. Thermometers shall record temperature accurately within 2° F. between the range of 50° F. to 80° F. Temperature records should be kept with at least four read-

ings per day at all schools where automatic heat control is not in use.

The air contains a sufficient amount of humidity to avoid dryness. Steam jets, water sprays or vaporizers, or water evaporators should be provided so that the relative humidity will be maintained above 30% in study or class rooms. Care should be taken, however, to prevent school room air from being so moist that furniture is covered with condensed moisture and windows are rendered opaque by it. Generally speaking, proper ventilation will provide the desired humidity.

Direct air currents are absent. Caution is to be observed in circulating the air. Windows open from the bottom which cause direct current of air on children, shall have window ventilators or deflectors. All windows should be adjusted at the top and bottom, and when this is the only means of ventilation, at least one half of the windows should be capable of opening from both top and bottom. Ducts and fans in connection with mechanical ventilation shall be so arranged and controlled as to eliminate objectionable air currents directly on the children. When mechanical ventilation is provided, it is not desirable to open windows.

A minimum of 30 cubic feet of air is supplied per capita per minute either through building leaks, natural ventilation or mechanical ventilation. This requirement may be waived where a minimum of 300 cubic feet of room volume is provided per capita.

Condensation on walls and windows is prevented. Condensation may be prevented by proper control of temperature and humidity providing adequate insultation is provided in the building structure. With a pressure ventilation system humidifying equipment can and should be provided. For small schools heated by conventional warm air furnaces or jacketed stoves, some humidification can be obtained by keeping the furnace water pan filled. Special radiator pans are available for hot water or steam radiators. If a room feels uncomfortably cool despite high dry bulb thermometer reading, humidity probably is too low. Dry air at a relatively high temperature feels cooler than humid air of considerably lower temperature. Condensation on walls will occur under certain conditions if humidity is too high. For example, surface condensation will occur if the relative humidity is 64% or over, if the inside temperature is 70° F. and the outside temperature is -10° F. in frame buildings having the usual frame construction with a heat transfer coefficient of 0.26 B.T.U.'s per hour per square foot per degree F. temperature. Condensation will occur on double windows at a relative humidity of about 45% for a dry bulb temperature of 70° F. inside and -10° F. outside. This is because glass has a greater heat transfer coefficient. If condensation occurs, either the humidity inside must be decreased, the walls further insulated, or the inside temperature increased. Under low temperature conditions, the humidity inside may be rapidly decreased by increasing the circulation of the much dryer cold air into the school room.

The following table shows the approximate relationship between relative humidity and wet and dry bulb thermometer readings for air movement or turbulence of 15 to 25 feet per minute:

Relative Humidity Chart

	(Relative Humidity)			
Dry Bulb Reading	68°F.	70°F.	72°F.	75°F.
Wet Bulb Reading	10%	10%	10%	10%
45	25%	20%	15%	10%
50	40%	35%	30%	25%
55	65%	55%	50%	40%
60	85%	80%	70%	60%
65	100%	95%	85%	75%
68		100%	90%	80%
70			100%	90%
72				100%
75				

The air exchange due to temperature difference, inside to outside, is a chimney effect, causing air to enter two openings at lower levels and to leave at higher levels. Although it is not appreciable in moderate climates in low buildings, this loss should be considered in tall, single story buildings with openings near the ground level and near the ceiling and in all buildings where extremely low temperatures occur. This infiltration outside air due to temperature difference causes the air to change under average conditions in the school room. It is this air change which provides the necessary circulation in rooms without mechanical ventilation which may accommodate up to 50 persons. It is generally assumed in frame buildings of a type similar to small schools used throughout Alaska that the air changes taking place as shown in the table below may be used as a guide in determining air provided for ventilation through infiltration.

Kind of Room or Building	No. of Air Changes Taking Place Per Hour
Rooms one side exposed	1
Rooms two sides exposed	1½
Rooms three sides exposed	2
Rooms four sides exposed	2
Rooms with no windows or outside doors	½ to 3/4
Entrance halls	2 to 3
Reception halls	2
Toilet rooms	

(It is quite possible that these air changes may be increased somewhat under extremely low temperature conditions.)

(g) Toilet facilities. Each school shall be provided with adequate and properly constructed and located toilet facilities. All toilet and waste disposal facilities shall conform to the provisions of the Alaska Administrative Code, Title 7, Div 1, Chapter 2. The doors of all toilet rooms shall be self-closing. Toilet rooms shall be kept in clean condition, in good repair, well lighted and ventilated. Hand washing signs shall be posted in each toilet room. In case privies or chemical closets are used, they shall be of a sanitary type, constructed and operated in conformity with the standards of the Department of Health and Welfare.

Commentary

Public health reason: Human excreta is potentially dangerous and must be properly disposed of. The organisms causing typhoid fever, paratyphoid fever, diarrhea, or dysentery may be present in the body discharges of cases or carriers. Sanitary toilet facilities are necessary to protect school lunches and physical equipment from fecal contamination by insects, rodents and hands or clothing. When the toilet facilities are of a satisfactory type and kept clean and in good repair, the opportunities for the spread of communicable diseases by the above means are minimized.

Satisfactory compliance: This item shall be deemed to have been satisfied if:

Adequate toilet facilities of the water flush type desirably located and separated and complying with the Alaska Plumbing Code are provided for both large and small children, and for each sex, and sewage wastes are disposed of by discharge into a community sewer system. In instances where sewage cannot be disposed of in a community sewerage system, waste disposal facilities designed and constructed in accordance with the Alaska Administrative Code, Title 7, Div. 1, Chapter 2, shall be provided. Water flush toilets, sewered to a community sewerage system or a treatment unit of proper design are most desirable. Sewage disposal by use of the sanitary privy is next most desirable (however, this method is somewhat impractical under extremely low temperature conditions.) The chemical toilet properly arranged and operated is the third choice for waste disposal methods. The box and can system, although undesirable is in some instances the only method which is practical at the present time. At points where no other waste disposal systems are practical, a properly operated box and can waste disposal system may be considered satisfactory.

Toilet rooms may be considered satisfactory if the finish of the floors and walls, fixtures provided, etc., are of non-absorptive materials. Floor drains should be provided, and all floors should be covered and extend at least six inches up the wall to facilitate cleaning. An abundance of natural light through outside windows and means for positive ventilation are a necessity.

Adequate fixtures are provided.

The toilet room and fixtures are kept clean, sanitary, in good repair and free from flies.

The toilet room is well lighted and ventilated to the outside air.

The toilet room doors for inside toilets are provided with springs or checks to make them self-closing.

Durable, legible signs are posted conspicuously in each toilet room and privy, directing students to wash their hands immediately after finishing at the toilet.

An ample supply of toilet paper is on hand at all times.

The best practice in use of water supply and waste disposal facilities is provided except in areas where climatic and topographic conditions may prevent the use of the most desirable facilities. In no instance should sanitary privies, chemical toilets or the box and can privy system be used when the enrollment exceeds 200. If facilities other than water flush fixtures are used, the same proportion of privy seats shall prevail as required for water closets. Urinals are to be provided and they should be constructed with at least the minimum requirements. Concrete, porcelain and metal are desirable materials. Approximately four feet of urinal space is required for each fifty male pupils.

(h) Hand washing facilities. Hand washing facilities shall be of such a type that the washing of hands under running water may be accomplished. Waste water shall be drained away to a satisfactory disposal system. The hand washing facilities shall be conveniently located and should be in close proximity with the toilets. In schools where hand washing facilities are not located in the toilet rooms, one lavatory or hand washing faucet and basin shall be provided for each school room.

Powdered or liquid soap and individual towels shall be provided and made available at all times. Hand washing facilities shall be kept clean and in good repair.

Commentary

Public health reason: The use of hand washing facilities and sanitary towels is essential to personal cleanliness and disease prevention.

Satisfactory compliance: This item shall be deemed to have been satisfied if:

Hand washing facilities are of such type that the washing of hands under running water may be accomplished.

In schools where it is not presently practicable to provide water under pressure and to provide conventional hand washing facilities in the toilet room, hand washing facilities shall be provided for each school room. In schools having water under pressure, lavatories shall be provided. It is highly desirable to locate lavatories in addition to the above in all primary school rooms.

Hand washing facilities shall be adequate and convenient. Soap and individual cloth or paper towels are provided. Most new commercial soap dispensers are satisfactory. When commercial dispensers are not available, improvised dispensers may be used. No student should return from the toilet to school activities without first washing hands. Hands should

be washed before lunch.

Hand washing facilities shall be kept clean and in good repair.

Powdered or liquid soap and single service or other type of individual towels shall be provided and made available at all times. Single service paper towels are highly desirable for use with school hand washing facilities. Cloth towels if used should not be used by more than one person and should be stored, laundered and cared for in a sanitary manner. The use of individual cloth towels is to be discouraged.

(i) Water supply. Each school building shall be provided with an ample supply of water which conforms with the Alaska Drinking Water Standards and Title 7, Div. 1, Chapter 7, Subchapter 1 of the Alaska Administrative Code. If a satisfactory community supply is not available, facilities shall be provided at the school to maintain a satisfactory water supply. The school water supply system shall be in a good working order at all times so as to adequately supply the water demands of the school.

Any water supply provided for the school shall comply with the Department of Health and Welfare minimum standards for the location, construction and operation of water supply systems.

Samples from school drinking water supplies shall be submitted regularly to the Department of Health and Welfare at such intervals as the Health Officer may require, and results shall show no evidence of dangerous contamination upon regular bacteriological analysis. The water supply should produce no disagreeable odors or tastes and should be clear and colorless in appearance.

Water shall be dispensed by means of sanitary fountains or covered water coolers and individual cups. The dipping of water from open containers will not be approved. The use of common drinking cups is prohibited. If paper cups are used they should be stored and dispensed in a sanitary manner.

Commentary

Public health reason: The location, source, protection and operation of the water supply are important factors in providing safe water. Adequate water encourages its use. Approved service is essential to safeguard the water.

Satisfactory compliance: This item shall be deemed to have been satisfied if:
Adequate water supply is available from an approved community supply.

Water is obtained from a properly constructed and operated school water supply such as a drilled well, dug well, bored well, spring, or cistern. Pumps, pipes, buildings, etc., should be maintained in good repair at all times.

In communities where one of the above-mentioned sources of water supply is not available to the school, because of climatic or geological conditions, a surface supply such as melted ice or snow water from a lake or stream may be used provided the ice, snow, pond or lake is protected

from human contamination and such water is either boiled or adequately treated. However, a supply of this type will not be approved for school use except during emergencies and in instances where a more desirable water source is not available.

The water supply meets the Department of Health and Welfare minimum standards for bacteriological quality, construction, location and operation.

Samples from the school drinking water supply are submitted regularly to the Department of Health and Welfare at such intervals as the Health Officer may require and results show no evidence of dangerous contamination upon bacteriological analysis.

Water samples should be submitted to the Department of Health and Welfare only in containers provided by the Department. Containers for water samples will be provided by the Department of Health and Welfare upon request. It shall be the responsibility of the local person in charge of each school to request and secure sufficient samples of the school water supply for bacteriological analysis. There is no charge to schools for the analysis of water samples. The cost for sending water samples from the school to the Department of Health and Welfare shall be borne by the school or its agency. No water samples will be analyzed by the Department of Health and Welfare without a proper description of the sample. Forms are provided by the Department of Health and Welfare for complete description of each sample. These forms accompany each sample container.

Water shall be dispensed by means of sanitary fountains or covered water containers and single service cups or individual cups. The dipping of water from open containers will not be approved. The use of common drinking cups is prohibited. Paper cups should be stored and dispensed in such a manner as to keep them clean at all times. Only angle stream jet type drinking fountains will be accepted provided they are equipped with a suitable guard to prevent touching the lips to the jet from which the water issues.

The use of individual single service paper cups is deemed to be most desirable for school use.

(j) Hot lunch equipment. In schools where hot lunches are prepared and served, adequate equipment shall be provided. The hot plate or stove shall have a sufficient number of burners. Water heating equipment shall be capable of furnishing water of the required temperature during the entire dish washing period. Kitchen utensils, pots, pans and similar devices shall have smooth, non-corrosive surfaces free from rust and foreign deposits and shall be maintained in a sanitary condition. Table dishes shall be free from cracks or chips and free from film. Silverware shall be free from corrosion. Tables and work benches shall have smooth surfaces which are free from cracks. Dishes following washing and sanitization shall be stored in such a manner as not to expose them to contamination.

All utensils, glasses or other dishes other than single service containers used in the serving of food or drink shall be thoroughly washed and cleansed after each separate use in hot water of not less than 110° F.

containing a suitable detergent or other effective cleaning agent so as to remove all foreign matter. Such utensils, glasses or other dishes shall then be either immersed in hot water at a temperature of 170° F. for at least two minutes immediately after washing or subjected to a thorough clear water rinse by immersion or a spraying process after which they shall be completely immersed for a period of at least two minutes in clear water containing a suitable chemical disinfecting agent. Drying cloths, if used, shall be clean and shall be used for no other purpose.

Where a community sewerage system is not available, liquid wastes shall be disposed of into a private system which includes a sanitary means of disposal, the operation of which creates neither a nuisance nor a menace to health.

All food and food service shall conform with Title 7, Division 1, Chapter 2, Subchapter 3, Alaska Administrative Code.

All milk, cream and milk products shall be of the best quality available and shall be pasteurized if such milk is available. Milk should be served in the original container as delivered by the pasteurization plant or from an approved dispenser.

All perishable food shall be stored in such a manner as to keep the temperature below 50° F. All other food stuffs shall be kept in covered containers.

Commentary

Public health reason: Numerous communicable diseases may be spread by improper food handling practice. Unless proper refrigeration, selection of foods, handling and storage of foods, and disinfection of utensils and equipment are rigidly enforced in the school food preparation unit at all times, students may be unnecessarily exposed to the dangers of food-borne illness. Approved lunch storage is necessary for protection from filth-borne diseases and to keep vermin and odors absent from the class room.

Satisfactory compliance: The proper provision for sanitation and safety in the school lunch program is highly desirable for two reasons, to protect the health and well being of both the children and the workers, and to teach the children and the workers proper sanitation and safety principles and practices. Proper attention must be given to sanitation and safety wherever school lunch programs are carried on. School lunch facilities may be in the form of hot jars, jars brought from home and warmed at school; the hot food prepared at school by teachers and pupils, and an entire lunch prepared at the school by teachers and pupils, practical workers, or professional workers. The school feeding facilities whether in the corner of the room, a single room or a complete unit, should be the cleanest area in the building. In the small one room school, storage space must be provided in a screened cupboard for storing lunches brought from home. The lunches should not be permitted to freeze or become too hot. The same cupboard may also be used for storage of cooking equipment and utensils. Staple foods such as salt, sugar, flour, etc., should be stored in well covered metal or glass containers. Canned foods must not be permitted to freeze. Matches must be kept in a tin or glass tightly closed. All work tables or other surfaces with which food

In preparing lunches, any person handling food should first wash his hands before beginning preparation of the lunch. All who handle food should wear hair nets or caps. Clothing should be protected with an apron. A separate tasting spoon should be used when cooking for the school. All food to be eaten raw should be well washed including dry fruits. Only pasteurized grade A milk or the best milk available should be used in the school. Milk bottles should be wiped carefully when they are received and before they are served. In serving the food, arrangements should be made for the children to wash their hands before lunch. Insist that each child use his own eating and drinking utensils. Make certain that children with colds or infections do not handle dishes or food to be served to others. After serving the meal, dishes should be washed carefully in accordance with the manual on eating and drinking establishments.

In certain parts of Alaska where the winter temperatures remain continuously at food preservation level, window boxes may be used for cold storage of foods. The window box, however, should not be used at any time when the outside temperature is above 30° F. In areas of Alaska where permanently frozen ground exists, it is possible to construct ice cellars or permafrost cellars as they are frequently called for storage of food and ice. A properly constructed permafrost cellar is suitable for storage of food throughout the entire year. The ice cellar may also provide a well protected and easily accessible place for storing ice for the school water supply. Where ice is cut and harvested for the school water supply, the ice should be stored in a sanitary manner. A properly constructed, drained and maintained permafrost cellar is a highly desirable means for storage of ice for the school water supply. Storage of ice above ground, where dust, dirt, dogs, and other things may contaminate the ice, will not be permitted.

Hot plates and stoves used in school lunch rooms shall have a sufficient number of burners to properly prepare food and clean up equipment. Water heating equipment shall be capable of furnishing water of the required temperature during the entire dish washing period. Kitchen utensils, pots, pans, and similar devices shall have smooth non-corrosive surfaces free from rust and foreign deposits and shall be maintained in a sanitary condition. Where a community sewer is not available, liquid wastes shall be disposed of into a private system which includes a sanitary means of disposal, the operation of which creates neither a nuisance nor a menace to health.

For help in planning school lunch programs, contact the Nutrition Section of the Department of Health and Welfare.

(k) Garbage disposal. In schools where hot lunches are prepared and served, fly-proof and watertight metal containers shall be provided for garbage. Garbage cans shall be emptied at regular intervals and never allowed to become foul smelling or a breeding place for flies or insects.

Garbage shall be disposed of in a manner which creates neither a nuisance nor a menace to health. The depositing of garbage into any lake, stream or other body of water is prohibited.

Commentary

Public health reason: All garbage, refuse and liquid waste resulting from the normal operation of a school, should be properly disposed of so as not to become [illegible] nuisance. Rodents, insects, and other disease vectors may feed upon improperly disposed of garbage and refuse. Therefore, impropor disposal of garbage will tend to create vector disease problems.

Satisfactory compliance: This item shall be deemed satisfied if:
All liquid wastes are disposed of in a public sewer or in the absence of a public sewer, by a method approved by the Department of Health and Welfare.

All plumbing complies with the Alaska Plumbing Standards and is so designed and installed as to prevent contamination of the water supply through inter-connections and back siphonage from fixtures.

All garbage is covered and kept in tight, non-absorbent, and easily washable receptacles which are covered with close fitting lids. Garbage receptacles which may be thrown away with the garbage are acceptable provided they are tight and are so constructed as to prevent depredation.

All garbage, trash and other waste materials are removed from the premises as frequently as may be necessary to prevent nuisance and unsightly conditions, and/or are disposed of in a manner approved by the Department of Health and Welfare. The most desirable means for disposal is disposal by means of a community disposal service. In areas where community disposal service is not available, sanitary fill carried on by the school officials is next best. Incineration of combustible material is satisfactory provided a safe incinerator is constructed. In many places there is not sufficient combustible material in school refuse to permit the burning of refuse and garbage without the addition of other fuels.

Careful collection and storage of refuse in areas where this material may freeze immediately upon being taken out of the school building is not desirable, but in some instances where extremely low temperature conditions exist, such a method will be approved providing at least annually all materials are buried or otherwise suitably stockpiled or removed to some remote spot where they do not create a nuisance or health hazard to the school, or the village where the school may be located.

(l) Storage. Lunches shall be stored in a clean, dry place, protected from flies and other contamination, located, preferably, outside the class room. Provision shall be made for storing outer clothing outside the class room in a well lighted and ventilated space. The general school supplies shall be stored to comply with good housekeeping. Individual service containers, if used, shall be handled and stored in a sanitary manner. Combustible or poisonous material must be stored in a manner to protect the children.

Commentary

Public health reason: Proper storage of clothing and school supplies are essential to good housekeeping and are useful in helping to prevent the interchange of infectious material. If individual service containers are not handled, stored and protected from contamination, the value of

individual service may be nullified. Approved storage of combustible and poisonous material is essential to the security of the children. Neatness, orderliness (a place for everything and everything in its place) and general good housekeeping are essential to sanitation.

Satisfactory compliance: This item shall be deemed satisfied if:
Sufficient storage space is provided to store outer clothing, rubbers, play equipment, etc. This space shall be easily accessible, well lighted and ventilated and should be so located that it can be supervised by the teacher. Lockers may be suitable in some schools, while in other schools hooks and shelves may be necessary. Garments should be hung on hooks spaced far enough apart to prevent the rubbing of one garment upon another and possible transfer of infectious material. Individual lockers or hooks should be assigned to the school children. Each child should continue to use the hook assigned to him throughout the school year. In grade schools, and for small children, it may be necessary to place the names of pupils under or on their hooks. Such an arrangement not only promotes orderliness and cleanliness, but also assists in the control of impetigo, scabies, and pediculosis.

All school supplies are stored in an approved manner.

Poisonous and combustible materials are stored so that they are inaccessible except to authorized individuals.

(m) Blackboards and furniture. The blackboards' construction, repair and location shall be such as to provide approved use. Erasers, crayon trays and furniture shall be kept clean. Blackboards and furniture shall be of a dull finish.

Commentary

Public health reason: Approved construction, good repair and correct location of the blackboards are prerequisite factors of approved use. Clean erasers and crayon trays are necessary to minimize dust. Comfortable furniture in good repair is essential to permit freedom in movement and good posture. Dull finish, clean furniture, prevents glare and promotes cleanliness.

Satisfactory compliance: This item shall be deemed satisfied if:
The material used for the blackboard is slate, composition, glass or equal construction.

The finish is smooth and no cracks exist and as few seams as possible. All blackboards which are to be refinished should be thoroughly sandpapered to remove all rough places and should be given two coats of finish.

The blackboards are not located in narrow spaces between windows; the blackboards shall be so located that they will be seen most easily by the intended user. Blackboards in primary grades must extend to within 24 inches of the floor; 28 inches of floor for intermediate grades; 32 inches of floor for upper grades.

The blackboard erasers and crayon trays are clean. This may be accomplished by cleaning the erasers daily outdoors, away from the build-

ing and cleaning the boards weekly. Only dustless chalk should be used.

The seating units are completely individualized.

The desks are so arranged that the light is admitted from the left of seated children. Many times, rows of desks beginning near the bank of windows and extending diagonally across the room provide the most advantageous arrangement. Special consideration should be given to the left handed children. Their desks should be so located that light will be over the right shoulder. When the pupil is directly seated with feet squarely on the floor, there must be no pressure from the forward edge of the seat under the knees. The height of the writing surface should be such that when the pupil is erectly seated, shoulders well down and elbows fairly close to the sides, with palms flat on the desk, both forearms in writing position will contact throughout the surface.

Provisions should be made for storing outer clothing outside of the class room. Even though a cloakroom may be constructed at the end of a class room, it should be so arranged as to be separate and should be considered separate from the instructional area or class room.

(n) Safety. All schools shall have adequate first aid facilities and fire extinguishers. The play area shall be a safe place for the children to play.

Commentary

Public health reason: The safety measures considered are essential to personal protection at school.

Satisfactory compliance: This item shall be deemed satisfied if:
Each school building has first aid material available and easily accessible. The Red Cross first aid manual (current edition) or the Boy Scout hand book are recommended as guides on technique.

At least one manually operated fire extinguisher is provided in all school buildings and so located as to be easily accessible. Each fire extinguisher should be periodically examined and kept at all times in a usable condition. School buildings which are two or more stories in height must be equipped with standard fire escapes which meet the approval of the State Fire Marshal.

All doors to the outside open outward and are equipped with panic latches. Fire drills should be held at regular intervals as specified by the State Fire Marshal.

The play area shall be such as to make a safe place for the children to play. There should be no rocks or obstructions in the area and the ground should be leveled. If the playground is situated near the road, a safety fence should be provided.

All playground equipment is well constructed and maintained in good repair. The equipment should be inspected frequently to detect defects and when found, shall be dismantled or placed out of service until repaired or replaced.

Many other safety items must be carefully noted and enforced. For example: loose boards, splintered boards, cracks and raised boards in floors should immediately be repaired or replaced. Plaster should be smooth and kept in good repair, avoiding loosening and subsequent falling. Steps within the building and leading to the building should be concrete where possible, kept in good repair, avoiding loose and rocking boards, all edges rounded, and the steps of sufficient width to give a firm tread. They should be constructed with not less than a seven-inch riser and ten-inch run. All stairs shall be provided with at least one hand rail running the full length of stairs. All elevated porches or stoops are to be enclosed with railings. All broken windows, mirrors and other glass articles should be replaced promptly. No protruding nails or other similar objects should be used.

Desks should be smooth with wide rounding edges and so constructed that they will not tip or turn over. School wiring should be frequently checked by an electrician. Damaged wiring, defective switches, fixtures and the like, should be repaired or replaced. All broken glass, rocks, cinders, dead tree limbs on trees, old boards, all dead limbs lying on the ground, all hollow trees, and all refuse should be cleared and kept cleared from the playgrounds. Some system should be worked out whereby an individual is held responsible for clearing a district school ground of weeds early in the summer before weeds are full grown, thus preventing thick heavy stubble. All abandoned holes, excavations, wells, washouts, etc., should be filled. Light poles should not be located on the school grounds. Where it is absolutely necessary to place them on the playgrounds, they should be protected by suitable padding against contact accidents.

All playground equipment should be of good design and maintained in good repair. For example, teeter-totter boards should be smooth, strong, and well secured. Foot scrapes should be recessed, or of the flat chain type, or provided with a guard over them to prevent accidents. School safety must include every precaution to prevent explosion and/or gas poisoning. Rubbish and refuse should not be allowed to accumulate; it should be removed from the school premises frequently; ashes from stoves should be placed in metal containers and removed from premises periodically. Mops, rags and other combustible material should not be stored under stairways, in closets, or other congested places. They should be stored in a separate storage room and kept in metal containers with a tight lid. Do not clean with an explosive material in school. Do not use kerosene in starting the fires.

(o) Miscellaneous. The school bus shall be cleaned and properly ventilated. The school grounds and building shall be free from rubbish and clean and orderly at all times.

Transportation of pupils by bus, car, boat or other conveyance shall be carried on in compliance with applicable safety regulations.

1213. Disease control.

No person who is affected with any disease in a communicable form or is a carrier of such disease shall work in any school, and no school board shall employ any such person or any person suspected of being affected

with any disease in a communicable form or of being a carrier of such disease.

When suspicion arises as to the possibility of transmission of infection from any employee, the Health Officer is authorized to require any or all of the following measures: the immediate exclusion of the employee from the school; adequate medical examination of the employee and his associates, with such laboratory examinations as may be indicated.

1214. Right to make inspection.

It shall be the duty of every principal, superintendent, teacher or other school official to afford the Health Officer access to any part, or all of the school, and to extend every facility for inspection purposes in the premises. Any interference with or obstruction of the Health Officer in the performance of his duties shall be a violation hereunder.

1215. Penalty.

Any person, firm or corporation violating any of the provisions of these regulations, shall be deemed guilty of a misdemeanor and upon conviction thereof shall be punished by a fine of not more than $500.00 or imprisonment for not more than ONE year, and each day that such person continues any such violation shall be deemed a separate offense.

Authority. A. S. Title 18; Health & Safety

History. In effect on and before July 28, 1959, effective date of Alaska Administrative Procedure Act.

Members of the Legislature,
Juneau, Alaska

Members:

This report of 1970 was given to the Commission of Public Works in September 1970, to date no response has come from that department as to any corrective activity on any of the schools involved.

We do not know if these conditions have been changed in any manner. We are conducting another survey and will report to various members of the legislature when the survey is completed.

Very sincerely,

Robert Van Houte

No. 3

SEVENTH LEGISLATURE - FIRST SESSION

Proposed Substitute for HB 276

For an Act entitled: "An Act relating to state aid for hospitals, health facilities and health services; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*Section 1. AS 43.18.010(h) is amended to read:

(h) During each fiscal year the state shall pay to an organized borough or a city outside an organized borough, in which a health facility is operated, a sum equal to $1,500 ($1,000) for each bed licensed by the State Dept. of Health and Welfare (actually used)for patient care within the facility, (limited to the maximum number of beds provided for in the construction design of the facility) or $4,000 for a facility, if the local government elects to accept payment on that basis for a particular facility. In addition, if construction of a facility was begun by a local government or non-profit facility after January 1, 1968 the state shall pay to the local government during each fiscal year a sum equal to $5,000 per bed for the maximum number of beds provided for in the construction design of the facility, until the local government has received from this aid an amount equal to 25 per cent of the total project cost. Sums received by a local government under this subsection shall be used for expenses of operation, maintenance or health services or facilities, as the health facility determines. (local government determines)

*Sec. 2. AS 43.18.010 (i) is amended to read:

(i) In (h) of this section "health facility" or "facility" includes hospitals, public health centers, community mental health centers, facilities for the mentally or physically handicapped, nursing homes and convalescent centers which are determined by the commissioner of health and welfare to satisfy minimum standards of safe and adequate patient care LICENSED BY THE STATE UNDER AS 18.20.010 - 18.20.130 and are owned or operated or both by a local government or by a nonprofit corporation or other nonprofit sponsor; the term excludes facilities operated or wholly supported by the state or the federal government.

*Sec. 3. This Act takes effect July 1, 1971.

HOUSE JUDICIARY COMMITTEE HEARING

ON

HOUSE BILL # 308
HOUSE BILL # 289
SENATE BILL # 152

- - - - - - - - - - - - - - -

COURTS OF RECORD -

Those whose acts and judicial proceedings are enrolled, or recorded, for a perpetual memory and testimony, and which have power to fine or imprison for contempt. It is a judicial tribunal having attributes and exercising functions independently of the person of the magistrate designated generally to hold it.

COURTS NOT OF RECORD -

Those of inferior dignity, which have no power to fine or imprison, and in which the proceedings are not enrolled or recorded. Black's Law Dictionary, Page 425 - 6.

AS 22.10.050 -

By statute, the Superior Court is made a court of record.

AS 22.10.020 (a) -

Requires the Superior Court to hear appeals from the District Court "on the record."

MAGISTRATE'S RULES OF CRIMINAL PROCEDURE - 1 (i) and Magistrate's Rules of Civil Procedure. (2) Requires that proceedings before the District Court shall be electronically recorded.

WHETHER OR NOT DISTRICT COURT IS COURT OF RECORD APPEARS TO BE MOOT INASMUCH AS ABOVE REFERENCED BILLS AFFECT THE QUESTION IN NO WAY.

AS 22.05.160 -

Authorizes the Supreme Court to appoint District Judges to act as recorders. In point of fact, District Courts and Magistrates Courts are recorders in this State.

AS 09.30.010 -

Provides that upon recording a judgment of a "court of this State" with the recorder, it becomes a lien upon real property in the recording district.

AS 09.45.790 -

Provides for the filing of lis pendens with the recorder and does not distinguish between Superior and District Court actions.

AS 09.40.050 -

Provides for recordation in the case of attachment of realty without distinguishing between District and Superior Court.

AS 35.35.005 - ET SEQ

Provides for liens and lien foreclosures. In each case, the claim of lien, regardless of the Court in which it would be enforced would have to be recorded in the District recording office.

RECORDING OF LIENS - $3.00 FOR FIRST PAGE, $2.00 FOR EACH ADDITIONAL PAGE.

OBSERVATIONS -

(1) Increasing jurisdiction for District Courts will have no effect regarding its status as a court of record.

(2) A recorded judgment is for the protection of the prevailing party in a lawsuit. He couldn't care less what court gave him his judgment. He is only concerned with establishing his lien right.

4/5/71

Bruce Monroe

re HB289

COURSE OF THE VOYAGE. By this term is understood the regular and customary track, if such there be, which a ship takes in going from one port to another, and the shortest way. Marsh. Ins. 185; Phill. Ins. 981.

COURSE OF TRADE. What is customarily or ordinarily done in the management of trade or business.

COURSE OF VEIN. In mining, the "course of the vein" appearing on the surface is the course of its apex, which is generally inclined and undulated and departs more or less materially from the strike. Stewart Mining Co. v. Bourne, C.C.A. Idaho, 218 F. 327, 329.

COURSE OF VESSEL. In navigation, the "course" of a vessel is her apparent course, and not her heading at any given moment. The Eastern Glade, C.C.A.N.Y., 101 F.2d 4, 6. It is her actual course. Liverpool, Brazil & River Plate Steam Nav. Co. v. U. S., D.C.N.Y., 12 F.2d 128, 129.

COURT. A space which is uncovered, but which may be partly or wholly inclosed by buildings or walls. Smith v. Martin, 95 Okl. 271, 219 P. 312, 313. When used in connection with a street, indicates a short street, blind alley, or open space for a short street inclosed by dwellings or other buildings facing thereon. City of Miami v. Saunders, 151 Fla. 699, 10 So.2d 326, 329.

Legislation

A legislative assembly. Parliament is called in the old books a court of the king, nobility, and commons assembled. Finch, Law, b. 4, c. 1, p. 103; Fleta, lib. 2, c. 2.

The application of the term—which originally denoted the place of assembling—to denote the assemblage, resembles the similar application of the Latin term *curia*, and is readily explained by the fact that the earlier courts were merely assemblages, in the court-yard of the baron or of the king himself, of those who were qualified and whose duty it was so to appear at stated times or upon summons. Traces of this usage and constitution of courts still remain in the courts baron, the various courts for the trial of impeachments in England and the United States, and in the control exercised by the parliament of England and the legislatures of the various states of the United States over the organization of courts of justice, as constituted in modern times. This meaning of the word has also been retained in the titles of some deliberative bodies, such as the "general court" of Massachusetts, *i. e.*, the legislature.

International Law

The person and suite of the sovereign; the place where the sovereign sojourns with his regal retinue, wherever that may be. The English government is spoken of in diplomacy as the court of St. James, because the palace of St. James is the official palace.

Practice

An organ of the government, belonging to the judicial department, whose function is the application of the laws to controversies brought before it and the public administration of justice. White County v. Gwin, 136 Ind. 562, 36 N.E. 237, 22 L.R.A. 402; Bradley v. Town of Bloomfield, 85 N.J. Law, 506, 89 A. 1009.

The presence of a sufficient number of the members of such a body regularly convened in an authorized place at an appointed time, engaged in the full and regular performance of its functions. Brumley v. State, 20 Ark. 77; Wightman v. Karsner, 20 Ala. 446.

A body in the government to which the administration of justice is delegated. A body organized to administer justice, and including both judge and jury. Houston Belt & Terminal Ry. Co. v. Lynch, Tex.Com.App., 221 S.W. 959, 960; People ex rel. Thaw v. Grifenhagen, Sup., 154 N.Y.S. 965, 970; Peterson v. Fargo-Moorhead St. Ry. Co., 37 N.D. 440, 164 N.W. 42, 49.

A tribunal officially assembled under authority of law at the appropriate time and place, for the administration of justice. In re Carter's Estate, 254 Pa. 518, 99 A. 58.

An agency of the sovereign created by it directly or indirectly under its authority, consisting of one or more officers, established and maintained for the purpose of hearing and determining issues of law and fact regarding legal rights and alleged violations thereof, and of applying the sanctions of the law, authorized to exercise its powers in due course of law at times and places previously determined by lawful authority. Isbill v. Stovall, Tex.Civ.App., 92 S.W.2d 1067, 1070.

An incorporeal, political being, composed of one or more judges, who sit at fixed times and places, attended by proper officers, pursuant to lawful authority, for the administration of justice. State v. Le Blond, 103 Ohio St. 126, 140 N.E. 510, 512. An organized body with defined powers, meeting at certain times and places for the hearing and decision of causes and other matters brought before it, and aided in this, its proper business, by its proper officers, viz., attorneys and counsel to present and manage the business, clerks to record and attest its acts and decisions, and ministerial officers to execute its commands, and secure due order in its proceedings. Ex parte Gardner, 22 Nev. 280, 39 P. 570; Hertzog v. Hertzog, 104 Or. 423, 208 P. 580, 582.

It is a passive forum for adjusting disputes and has no power to investigate facts or to initiate proceedings. Sale v. Railroad Commission, 15 Cal.2d 612, 104 P.2d 38, 41.

The place where justice is judicially administered. Co. Litt. 58a; 3 Bl. Comm. 23. Railroad Co. v. Harden, 113 Ga. 456, 38 S.E. 950; Croft v. Croft, 119 N.J.Eq. 468, 182 A. 853.

The judge, or the body of judges, presiding over a court.

The words "court" and "judge," or "judges," are frequently used in statutes as synonymous. When used with reference to orders made by the court or judges, they are to be so understood. State v. Caywood, 96 Iowa, 367, 65 N.W. 385; Sale v. Railroad Commission, 15 Cal.2d 612, 104 P.2d 38, 41.

The word "court" is often employed in statutes otherwise than in its strict technical sense, and is applied to various tribunals not judicial in their character. State v. Howat, 107 Kan. 423, 191 P. 585, 589; for example, in New Jersey, the "court of pardons"; In re Court of Pardons, 97 N.J.Eq. 535, 129 A. 624, 625.

Classification

Courts may be classified and divided according to several methods, the following being the more usual:

Courts of record and courts not of record. The former being those whose acts and judicial proceedings are enrolled, or recorded, for a perpetual

memory and testimony, and which have power to fine or imprison for contempt. Error lies to their judgments, and they generally possess a seal. Courts not of record are those of inferior dignity, which have no power to fine or imprison, and in which the proceedings are not enrolled or recorded. 3 Bl. Comm. 24; 3 Steph. Comm. 383; The Thomas Fletcher, C.C.Ga., 24 F. 481; Ex parte Thistleton, 52 Cal. 225; Erwin v. U. S., D.C.Ga., 37 F. 488, 2 L.R.A. 229; Heininger v. Davis, 96 Ohio St. 205, 117 N.E. 229, 231.

A "court of record" is a judicial tribunal having attributes and exercising functions independently of the person of the magistrate designated generally to hold it, and proceeding according to the course of common law, its acts and proceedings being enrolled for a perpetual memorial. Jones v. Jones, 188 Mo.App. 220, 175 S.W. 227, 229; Ex parte Gladhill, 8 Metc., Mass., 171, per Shaw, C. J. See, also, Ledwith v. Rosalsky, 244 N.Y. 406, 155 N.E. 688, 689.

Courts may be at the same time of record for some purposes and not of record for others. Lester v. Redmond, 6 Hill, N.Y., 590; Ex parte Gladhill, 8 Metc., Mass., 168.

Superior and inferior courts. The former being courts of general original jurisdiction in the first instance, and which exercise a control or supervision over a system of lower courts, either by appeal, error, or *certiorari;* the latter being courts of small or restricted jurisdiction, and subject to the review or correction of higher courts. Sometimes the former term is used to denote a particular group or system of courts of high powers, and all others are called "inferior courts."

To constitue a court a superior court as to any class of actions, within the common-law meaning of that term, its jurisdiction of such actions must be unconditional, so that the only thing requisite to enable the court to take cognizance of them is the acquisition of jurisdiction of the persons of the parties. Simons v. De Bare, 4 Bosw., N.Y., 547.

An inferior court is a court whose judgments or decrees can be reviewed, on appeal or writ of error, by a higher tribunal, whether that tribunal be the circuit or supreme court. Nugent v. State, 18 Ala. 521.

Civil and criminal courts. The former being such as are established for the adjudication of controversies between subject and subject, or the ascertainment, enforcement, and redress of private rights; the latter, such as are charged with the administration of the criminal laws, and the punishment of wrongs to the public.

Equity courts and law courts. The former being such as possess the jurisdiction of a chancellor, apply the rules and principles of chancery law, and follow the procedure in equity; the latter, such as have no equitable powers, but administer justice according to the rules and practice of the common law.

As to the division of courts according to their *jurisdiction,* see Jurisdiction.

As to several names or kinds of courts not specifically described in the titles immediately following, see Arches Court, Appellate, Circuit Courts, Consistory Courts, County, Customary Court-Baron, Ecclesiastical Courts, Federal Courts, Forest Courts, High Commission Court, Instance Court, Justice Court, Justiciary Court, Legislative Courts, Maritime Court, Mayor's Court, Moot Court, Municipal Court, Orphans' Court, Police Court, Prerogative Court, Prize Court, Probate Court, Superior Courts, Supreme Court, and Surrogate's Court.

As to court-hand, court-house, court-lands, court rolls, courtyard, see those titles in their alphabetical order *infra.*

General

Court above, court below. In appellate practice, the "court above" is the one to which a cause is removed for review, whether by appeal, writ of error, or certiorari; while the "court below" is the one from which the case is removed. Going v. Schnell, 6 Ohio Dec. 933.

Court in bank. A meeting of all the judges of a court, usually for the purpose of hearing arguments on demurrers, points reserved, motions for new trial, etc., as distinguished from sessions of the same court presided over by a single judge or justice.

Court of competent jurisdiction. One having power and authority of law at the time of acting to do the particular act. Ex parte Plaistridge, 68 Okl. 256, 173 P. 646, 647.

One having jurisdiction under the state Constitution and laws to determine the question in controversy. Texas Employers' Ins. Ass'n v. Nunnamaker, Tex.Civ.App., 267 S.W. 749, 751. A court for the administration of justice as established by the Constitution or statute. Bradley v. Town of Bloomfield, 85 N.J.Law, 506, 89 A. 1009.

Court of limited jurisdiction. When a court of general jurisdiction proceeds under a special statute, it is a "court of limited jurisdiction" for the purpose of that proceeding, and its jurisdiction must affirmatively appear. Osage Oil & Refining Co. v. Interstate Pipe Co., 124 Okl. 7, 253 P. 66, 71.

De facto court. One established, organized, and exercising its judicial functions under authority of a statute apparently valid, though such statute may be in fact unconstitutional and may be afterwards so adjudged; or a court established and acting under the authority of a *de facto* government. 1 Bl. Judgm. § 173; In re Manning, 139 U.S. 504, 11 S.Ct. 624, 35 L.Ed. 264; Gildemeister v. Lindsay, 212 Mich. 299, 180 N.W. 633, 635.

Full court. A session of a court, which is attended by all the judges or justices composing it.

Spiritual courts. In English law. The ecclesiastical courts, or courts Christian. See 3 Bl. Comm. 61.

COURT-BARON. In English law. A court which, although not one of record, is incident to every manor, and cannot be severed therefrom. It was ordained for the maintenance of the services and duties stipulated for by lords of manors, and for the purpose of determining actions of a personal nature, where the debt or damage was under forty shillings. Wharton; 1 Poll. & Maitl. Hist. E. L. 580.

Customary court-baron is one appertaining entirely to copyholders. 3 Bl.Comm. 33.

44-259

April 1, 1971

M E M O R A N D U M

TO: Honorable William J. Moran
Chairman, House Judiciary Committee

FROM: T. R. Dunn, Secretary
Alaska Judicial Council

Following our conversation today regarding the effect of increasing District Court jurisdiction upon recording procedures, I reviewed applicable statutes and conferred with Chief Justice Boney, Chairman of the Judicial Council. It appears that the recording statutes apply to the District Court as well as the Superior Court. Specifically, the following statutes apply:

(1) AS 09.30.010 which provides that upon recording a judgment of "a court of this state" with the recorder it becomes a lien upon real property in the recording district.

(2) AS 09.45.790 provides for the filing of lis pendens with the recorder and does not distinguish between Superior and District Court actions.

(3) AS 09.40.050 provides for recordation in the case of attachment of re lty without distinguishing between District and Superior Court.

(4) AS 35.35.005, et seq., provides for liens and lien foreclosures. In each case, the claim of lien, regardless of the court in which it would be enforced would have to be recorded in the district recording office.

It does not appear that any change in the recording laws would be necessary due to expanded District Court jurisdiction. The Chief Justice has been assured by his staff that any adjustments which are required in District Court recording procedures can be made by court rule, and he foresees no difficulty in this regard.

Theodore R. Dunn
Secretary
Alaska Judicial Council

HB 287

April 16, 1971

To: Representative Moran

From: Senator Ziegler

Re: HB 289

Bill:

We passed your HB 289 unanimously on April 15th.

I am attaching copies of documents you might want to utilize in the future if the Supreme Court doesn't do as it has promised to do.

Re: SB 152 and HB 289

Gentlemen:

It is the intent of the writer to bring everyone concerned with the two captioned bills up to date.

The Supreme Court for, in my opinion, many valid reasons, is highly desirous of having the jurisdiction of the district courts throughout the state increased from $3000 to $10,000.

Those district court judges who have been courteous enough to write to the Senate Judiciary committee have overwhelmingly indicated their willingness to assume increased responsibility and presumably an increased work load.

The Ketchikan Bar Association has done a complete 180° and now endorses both bills.

The Juneau Bar Association recently unanimously endorsed both bills.

The Anchorage Bar favored the bills on a very close vote (29-26).

As of March 26, 1971, the Tanana Valley Bar had gone on record as being in opposition to the bills; I don't have the results of any further ballots.

I endeavor to refrain from taking hasty action, as a rule. Personally, I feel that by releasing either bill at this time we might be acting prematurely, but apparently the need is great enough to warrant the action. Let us hope we are not making a mistake; we can always gain some solace by remembering that we can undo next year what we are going to do this year.

To those of you who oppose the bill, I can give you some consolation: 1) We have been assured by Chief Justice Boney of the Supreme Court that if the peremptory disqualification of district court judges bill, which has passed the Senate and which is expected to pass the House, does not in fact pass the House, then the Supreme Court will immediately promulgate a court rule authorizing peremptory disqualification procedures.

2) Remand removal will likewise be reserved by Supreme Court rule; that is to say, we can remand from the district court to the superior court in all actions involving more than $3000.

On behalf of the members of the Senate Judiciary committee, I would like to take this opportunity to thank you one and all for your interest and expressions of opinion.

It might be a good idea if the Board of Governors of the Alaska Bar Association were to have this matter placed on the agenda for the May meeting in Anchorage. The good Lord knows a lively session would thereby be assured.

Very truly yours,

Robert H. Ziegler, Sr.

HB-290

City of Anchorage

MEMORANDUM

TO: Director of Public Works **DATE:** March 19, 1971

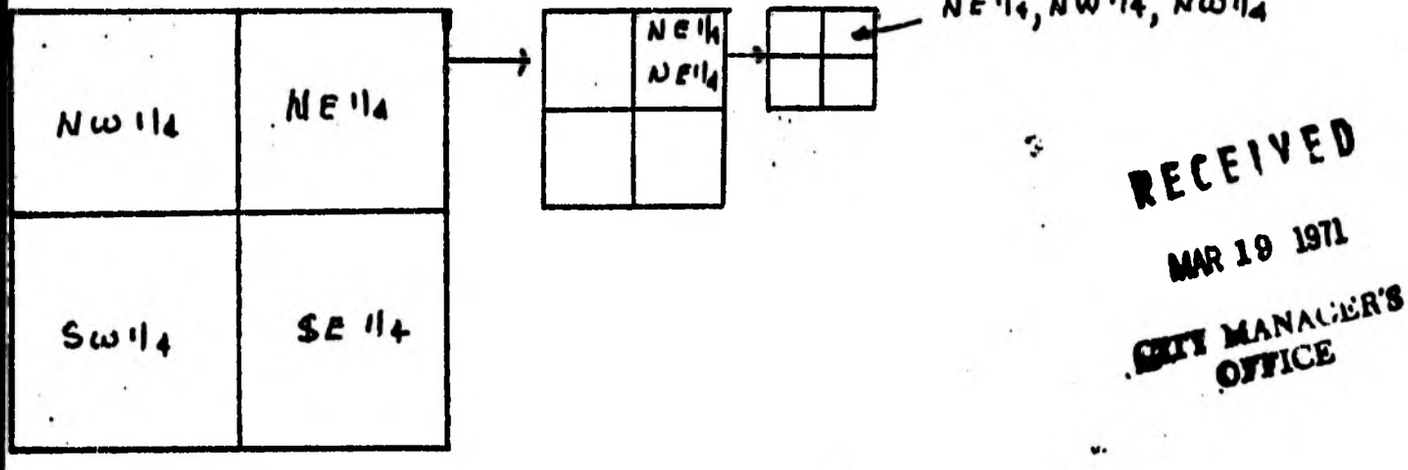
FROM: City Surveyor

SUBJECT: House Bill No. 290

The subject bill will enable a person to sell portions of his property without surveys or plats and would virtually eliminate the subdivision control of cities and borough planning commissions throughout the State.

By changing the "definition" of subdivision as per H.B. 290 a seller or his agent can divide his proerty into four or less parts and describe them by aliquot parts without any restrictions or control by any governmental agency, also it would leave the determination of what easements etc. to the sellers discretion without consulting or review of the requiring agencies of government.

Example -



RECEIVED
MAR 19 1971
CITY MANAGER'S OFFICE

As you can see from the above the rule of "four or less" parcels can be carried out indefinitely.

The above is only an example, there could be countless variations such as 1/3 or 1/8 or 1/16 or the east 50 feet of the NW 1/4 of the E 1/3 etc. and could be applied to existing subdivisions, as well as sectionalized lands. In the end we would hav complete breakdown and chaos in land subdivision in all developed a eas in Alaska.

As a final comment, the subject bill is sponsored by the Board of Realtors and has been introduced in each session for the last three years and as far as I know, the Borough, City, Professional Land Surveyors, Engineers, and Local Engineering Firms have indicated that this bill does not serve the best interests of the people of Alaska in any way.

A.W. Lahnum
City Surveyor

AWL/bmm

MEMORANDUM State of Alaska

TO: The Honorable William J. Moran
Chairman, House Judiciary Committee
Through: Kenneth W. Kadow, Commissioner
Through: W. W. Fritz, Director of Ins.

DATE : April 20, 1971

FROM: Donald P. Koch
Insurance Rate Analyst

SUBJECT: HB-293

On March 18, 1971, during an appearance before your committee, you requested additional information on Surplus Line Law exemptions. The following represents our findings.

All states provide a method to license surplus line brokers. The surplus line broker is the one who can place insurance in non-admitted markets. This seems to be contradictory to what we have found in the laws of Illinois, Texas and Wisconsin, where it appears that a carrier (insuror) may not write unless admitted to do business in those states. Further, all states except Delaware, Kentucky, Texas and Wyoming provide for the taxation of the premiums of non-admitted (unauthorized) insurors.

Some states have specific acts that concern themselves with the mechanics of serving process on unauthorized insurors. Those states, numbering 22, are: Connecticut, Delaware, Indiana, Kansas, Maine, Maryland, Massachussetts, Michigan, Minnesota, Nebraska, Nevada, New Jersey, North Carolina, North Dakota, Oregon, Pennsylvania, Rhode Island, South Dakota, Tennessee, Vermont, Virginia, and West Virginia.

Other states have specific acts that concern themselves with not only the mechanics of serving process on unauthorized insurors, but also with taxation responsibility for insuror solvency, protection of authorized insurors (who are subject to strict regulation), and with the protection of the public. States having this type of act, numbering 17, are: Alaska, Alabama, Arizona, California, Florida, Georgia, Hawaii, Idaho, Iowa, Kentucky, Louisiana, Mississippi, Montana, Ohio, Oklahoma, Utah and Washington. Copies of the exemption section of the Unauthorized Insurors Act from these states are attached, except for Mississippi which has no exemption listed. A comparison of exceptions is also attached.

Of the seventeen states listed in the last paragraph, seven states exempt aircraft owned or operated by manufactures of aircraft. These are: Alaska, Alabama, Georgia, Idaho, Louisiana, Montana and Washington. Arizona and Hawaii have similar aircraft exemption sections but are silent as regards manufacturers aircraft. California exempts aircraft. Seven states: Florida, Iowa, Kentucky, Mississippi, Ohio, Oklahoma and Utah, do not provide exemptions for aircraft.

We have been unable to learn definitive reasons for the various differences in exemptions used by the various states. It appears that lobby groups account for many of the exemptions.

THE FOLLOWING DOCUMENT(S) MAY NOT FILM LEGIBLY BECAUSE OF POOR QUALITY OF THE ORIGINAL.

AIRCRAFT EXEMPTIONS

[illegible]A — EXCLUDES INJURY CAUSED BY MEMBERS OF AIRCRAFT; AIRCRAFT TRADED IN OR USED WITHIN THEIR FACILITY; CARGO OR PASSENGER FLIGHTS; LIABILITY OF AIRCRAFT CO-EMPLOYEES (WORKERS' COMPENSATION) ARISING OUT OF THE OWNERSHIP, MAINTENANCE OR USE.

[illegible]A — SAME AS ALASKA

[illegible]A — EXCEPT AIRCRAFT OR CARGO OF SUCH AIRCRAFT, OR AGAINST EMPLOYER OTHER THAN EMPLOYER'S LIABILITY, ARISING OUT OF THE OWNERSHIP, MAINTENANCE, OR USE OF SUCH AIRCRAFT.

[illegible]A — EXCLUDES AIRCRAFT INSURANCE

[illegible]A — NO EXEMPTION

[illegible]A — SAME AS ALASKA

[illegible] — SAME AS ARIZONA

[illegible] — EXCLUDES AIRCRAFT "OWNED INTRASTATE" AND "INTERSTATE" IS REPLACED BY "COMMERCIAL INTERSTATE"

Division of Insurance

March 18, 1971

HB-293

Chapter 33 of the Alaska insurance law is the chapter dealing with unauthorized insurers and surplus lines. Insurance premium taxes due under this chapter are the responsibility of the surplus line broker who must collect same from the insured and remit to the Division of Insurance. In the case of admitted insurers the premium tax is collected as an integral part of the premium by the admitted insurer.

Several of our major aircraft operators in Alaska have been leasing aircraft from the manufacturer or purchasing aircraft on contract where title to the aircraft is retained by the manufacturer until equity of the operator reaches an agreed upon level. The operators furnish their own pilots and insurance but declare themselves exempt from the surplus line insurance premium tax due to the exemption found in AS 21.33.310 (4).

The section exempts "insurance of aircraft owned or operated by manufacturers of aircraft...". This wording allows the private operator of a manufacturer owned aircraft to avoid the premium tax on surplus line insurance. By changing the wording as indicated in HB-293 you would remove the loophole. In November of 1970 the Division of Insurance conducted an investigation which brought an actual case to light. The indicated tax loss to the State of Alaska for this one case was about $50,000, so it can be seen that the loophole is substantial.

Upon checking into the reasons for the "manufacturers of aircraft" exemption, we found that the Alaska surplus line insurance law was modeled after the Washington law. This item appears in their law as a concession to Boeing Corporation. This information was developed in a conversation with Mr. Irwin Mesher who is the arbitrator for the surplus line association of Washington. It is his opinion that we would not accomplish a solution to a tax avoidance situation. He indicated the the lessor would merely negotiate with the lessee to place the insurance and make the costs a part of the lease contract. However, we feel that this action would not circumvent liability for this tax.

ment has been served as provided in this section, the court is considered to have jurisdiction in personam of the insurer.

(b) By issuing a policy under a surplus line contract, an unauthorized insurer authorizes service of process against it in the manner and to the effect as provided in this section. The policy shall contain a provision stating the substance of this section, and shall designate the person to whom the department shall mail process. (§ 1 ch 120 SLA 1966)

Sec. 21.33.310. Exemptions from surplus line law. The provisions of this surplus line insurance law controlling the placing of insurance with unauthorized insurers do not apply to reinsurance or to the following insurances when placed by licensed insurance agents of this state:

(1) wet marine and transportation insurances;

(2) insurance on subjects located, resident, or to be performed wholly outside of this state, or on vehicles or aircraft owned and principally garaged outside this state;

(3) insurance on property or operations of railroads engaged in interstate commerce;

(4) insurance of aircraft owned or operated by manufacturers of aircraft, or aircraft operated in scheduled interstate flight, or cargo of such aircraft, or insurance against liability, other than workmen's compensation and employers' liability, arising out of the ownership, maintenance or use of the aircraft. (§ 1 ch 120 SLA 1966)

Sec. 21.33.320. Records of insureds. In order that the director may effectively administer this chapter, each person who has placed insurance with an unauthorized insurer shall, upon the director's order, produce for his examination all policies and other documents evidencing the insurance, and shall disclose to the director the amount of premiums paid or agreed to be paid for the insurance. For each refusal to obey the order the person, upon conviction, is guilty of a misdemeanor punishable by a fine of not more than $500. (§ 1 ch 120 SLA 1966)

Sec. 21.33.330. Surplus line broker defined. A surplus line broker is an individual licensed to transact business in the state or on risks in the state for an unadmitted insurer. (§ 1 ch 120 SLA 1966)

Submitted with memo from
Don Koch, Insurance Rate Analyst
HB-293 April 20, 1971

ment has been served as provided in this section, the court is considered to have jurisdiction in personam of the insurer.

(b) By issuing a policy under a surplus line contract, an unauthorized insurer authorizes service of process against it in the manner and to the effect as provided in this section. The policy shall contain a provision stating the substance of this section, and shall designate the person to whom the department shall mail process. (§ 1 ch 120 SLA 1966)

Sec. 21.33.310. Exemptions from surplus line law. The provisions of this surplus line insurance law controlling the placing of insurance with unauthorized insurers do not apply to reinsurance or to the following insurances when placed by licensed insurance agents of this state:

(1) wet marine and transportation insurances;

(2) insurance on subjects located, resident, or to be performed wholly outside of this state, or on vehicles or aircraft owned and principally garaged outside this state;

(3) insurance on property or operations of railroads engaged in interstate commerce;

(4) insurance of aircraft owned or operated by manufacturers of aircraft, or aircraft operated in scheduled interstate flight, or cargo of such aircraft, or insurance against liability, other than workmen's compensation and employers' liability, arising out of the ownership, maintenance or use of the aircraft. (§ 1 ch 120 SLA 1966)

Sec. 21.33.320. Records of insureds. In order that the director may effectively administer this chapter, each person who has placed insurance with an unauthorized insurer shall, upon the director's order, produce for his examination all policies and other documents evidencing the insurance, and shall disclose to the director the amount of premiums paid or agreed to be paid for the insurance. For each refusal to obey the order the person, upon conviction, is guilty of a misdemeanor punishable by a fine of not more than $500. (§ 1 ch 120 SLA 1966)

Sec. 21.33.330. Surplus line broker defined. A surplus line broker is an individual licensed to transact business in the state or on risks in the state for an unadmitted insurer. (§ 1 ch 120 SLA 1966)

Superintendent. As to the same unauthorized insurer and all insurance coverages issued or accepted by it under this Act, no more than one person shall at any one time be the designee to whom copies of process against the insurer, served upon the Superintendent, shall be forwarded.

(4) Where process is served upon the Superintendent as an insurer's process agent, the insurer shall not be required to answer or plead except within thirty (30) days after the date upon which the Superintendent mailed a copy of the process served upon him as required by subsection (2), above.

(5) Process served upon the Superintendent, and copy thereof forwarded as in this section provided, shall for all purposes constitute valid and binding service thereof upon the insurer.

Section 21. EXEMPTIONS. The provisions of this Unauthorized Insurers Act controlling the placing of insurance with unauthorized insurers shall not apply to reinsurance or to the following insurances when so placed by licensed agents or brokers or the ship building and/or repair industry of this State:

(1) Transportation insurance;

(2) Insurance on subjects located, resident, or to be performed wholly outside of this State, or on vehicles or aircraft owned and principally garaged outside this state;

(3) Insurance on property or operation of railroads engaged in interstate commerce; and

(4) Insurance of aircraft owned or operated by manufacturers of aircraft or aircraft operated in scheduled interstate flight, or cargo of such aircraft, or against liability, other than workmen's compensation and the employer's liability, arising out of the ownership, maintenance or use of such aircraft.

(5) Life insurance, health and accident insurance, annuities, and disability insurance.

(6) The property and operations of the ship building and ship repair industry engaged in interstate or foreign commerce, and vessels, cargoes, watercraft, piers, wharves, graven docks, drydocks, marine railways and building ways, commonly known as wet marine.

Section 22. REPORT AND TAX OF INDEPENDENTLY PROCURED COVERAGES. (1) Every insured who in this state procures or causes to be procured or continues or renews insurance in an unauthorized foreign insurer, or any self-insurer who in this state so procures or continues excess loss, catastrophe or

able as costs in the action. The director shall forthwith mail one copy of the process so served to the person designated by the insurer in the policy for the purpose, by registered mail with return receipt requested. The insurer shall have forty days after such date of mailing within which to plead answer, or otherwise defend the action.

Sec. 20. EXEMPTIONS FROM SURPLUS LINES PROVISIONS. (a) The sections of this article relative to surplus line coverages shall not apply to reinsurance, nor to the following classes of insurance when placed by licensed agents or brokers of this state:

(1) Ocean marine and foreign trade insurance.

(2) Insurance on subjects located, resident, or to be performed wholly outside this state, or on vehicles or aircraft owned and principally garaged outside this state.

(3) Insurance on property or operations of railroads engaged in interstate commerce.

(4) Insurance on aircraft or cargo of such aircraft, or against liability, other than employer's liability, arising out of the ownership, maintenance, or use of such aircraft.

(b) Agents and brokers so placing any such insurance with an unauthorized insurer shall keep a record of each such coverage in detail as required of surplus line insurance by section 14 of this article. The record shall be preserved for not less than three years from the effective date of the insurance, and shall be so kept available in this state and open to the examination of the director.

Sec. 21. RECORDS OF INSUREDS. Upon the director's request any person in Arizona who is the insured under any policy issued by an unauthorized insurer upon a subject of insurance resident, located, or to be performed in Arizona at the time the policy was issued, shall produce for examination all policies and other documents evidencing and relating to the insurance, and shall disclose the amount of the gross premiums paid or agreed to be paid for the insurance, through whom the insurance was procured, and such other information relative to the placing of such insurance as may reasonably be required.

Sec. 22. ALIEN INSURANCE FOR COVERAGE IN MEXICO. (a) No person shall in Arizona solicit or accept applications for vehicle insurance, which insurance is to be effective in Mexico and only outside the geographical limits of Arizona and is to be issued by an alien insurer or insurer not authorized to transact insurance in Arizona, unless such person is a duly licensed surplus line broker.

lish different standards for such a certification the certificate shall become void and must be surrendered to the commissioner. In that case the fees for certification and examination under the new standards shall be the same as for original certification and examination. A person shall not hold a certificate under this section while licensed as a life agent, disability only agent, or life and disability agent.

(Added by Stats. 1967, Ch. 1707.)

CHAPTER 6. SURPLUS LINE BROKERS

1760. Any citizen of this State may negotiate and effect insurance on his own property with any nonadmitted insurer.

1760.5. The provisions of this chapter limiting the insurance which may be placed with nonadmitted insurers and requiring any report thereof shall not apply to:

(a) Reinsurance of the liability of an admitted insurer.

(b) Insurance against perils of navigation, transit or transportation upon hulls, freights or disbursements, or other shipowner interests; upon goods, wares, merchandise and all other personal property and interests therein, in course of exportation from or importation into any country, or transportation coastwise, including transportation by land or water from point of origin to final destination and including war risks; and marine builder's risks, drydocks and marine railways, including insurance of ship repairer's liability, and protection and indemnity insurance, but excluding insurance covering bridges or tunnels.

(c) Aircraft insurance.

(d) Insurance on property or operations of railroads engaged in interstate commerce.

The insurance specified in the foregoing paragraphs (b), (c), and (d), may be placed with a nonadmitted insurer only by and through a special lines' surplus line broker. The license of a special lines' surplus line broker shall be applied for and procured and shall be subject to the same fees for filing on issuance in the same manner as the license of a surplus line broker, except that in lieu of the bond required by Section 1765, there shall be delivered to the commissioner a bond in the form, amounts, and conditions specified in Sections 1663, 1664 and 1665 of this code and only one fee shall be collected from one person for both licenses. Such licensee in respect to such business shall be subject to all the provisions of this chapter except Sections 1761, 1763 and 1775.5.

The commissioner may, in respect to business written or placed under the provisions of this section, require such information and reports thereof as he considers necessary, convenient or advisable for tax or statistical purposes.

Each placing of insurance in violation of this chapter is a misdemeanor.

The commissioner may revoke, suspend or deny any license granted pursuant to this code in accordance with the procedure

provided in Article 13 of Chapter 5 of this part, or any certificate of authority granted pursuant to this code in accordance with the procedure provided in Section 704 whenever he finds that the licensee or holder of the certificate has committed a violation of this section.

The premium for insurance placed by or through a special lines' surplus line broker pursuant to this section shall not be subject to the tax imposed upon such broker based upon gross premiums paid for insurance placed under authority conferred by his license.

(Added by Stats. 1937, Ch. 729; amended by Stats. 1945, Ch. 901, by Stats. 1959, Ch. 4, and by Stats. 1961, Ch. 280.)

1761. Except as provided in Sections 1760 and 1760.5, a person within this State shall not transact any insurance on property located or operations conducted within, or on the lives or persons of residents of this State with nonadmitted insurers, except by and through a surplus line broker licensed under this chapter and upon the terms and conditions prescribed in this chapter.

(Amended by Stats. 1937, Ch. 729.)

1762. (Repealed by Stats. 1937, Ch. 729.)

1763. A surplus line broker may solicit and place insurance, other than as excepted in Section 1761, with nonadmitted insurers only if such insurance can not be procured from a majority of the insurers admitted for the particular class or classes of insurance. Such part of the insurance as can not be so procured may be procured from nonadmitted insurers, if the insurance is not placed in a nonadmitted insurer for the purpose of procuring a rate lower than the lowest rate which will be accepted by any admitted insurer. It shall be conclusively presumed that insurance is placed in violation of this paragraph where the insurance is actually placed with a nonadmitted insurer at a lower rate of premium or lower premium than the lowest rate of premium or the lowest premium which could be obtained from an admitted insurer unless, at the time such insurance attaches, there is filed with the commissioner a statement describing the insurance, specifying the rate and the nearest procurable rates from admitted insurers. Unless the commissioner within five days after such filing notifies the filing broker that in his opinion the placing of the insurance constitutes a violation of this section, the broker may thereafter maintain in effect such insurance. If within such five-day period the commissioner notifies the surplus line broker that such insurance is in violation of this section and orders the broker to effect termination of such insurance within 10 days from such notice, and the broker fails or refuses to effect such termination, such failure or refusal is a violation of this section. Statements filed under this section shall not be subject to public inspection unless the commissioner determines that the public interest or the welfare of the filing broker requires that any statement be made so subject. The commissioner may make and publish reasonable rules and regulations, consistent

agent to be the true and lawful attorney of such unauthorized insurer upon whom may be served all lawful process in any action, suit or proceeding instituted by or on behalf of an insured or beneficiary arising out of any such contract of insurance and service of process effected on such commissioner, his successor or successors in office or such resident agent shall be deemed to confer complete jurisdiction over such unauthorized insurer in such action.

History.—§351, ch. 59-205.

Note.—Similar provisions found in former §625.33.

626.0510 Surplus lines law; short title; purposes.—

(1) Sections 626.0510 through 626.0534 constitute and may be referred to as "the surplus lines law."

(2) It is declared that the purposes of the surplus lines law are to provide orderly access for the insuring public of Florida to insurers not authorized to transact insurance in this state, through only qualified, licensed, and supervised surplus lines agents resident in Florida, for insurance coverages and to the extent thereof not procurable from authorized insurers; to protect such authorized insurers, which under the laws of Florida must meet certain standards as to policy forms and rates, from unwarranted competition by unauthorized insurers who, in the absence of this law, would not be subject to similar requirements; and for other purposes as set forth in this surplus lines law.

(3) This section, and this surplus lines law, do not apply as to insurance coverages which are subject to §626.0535 (report and tax of independently procured coverages).

History.—§352, ch. 59-205.

626.0511 Definitions.—As used in this surplus lines law:

(1) "Surplus lines agent" means an individual licensed as provided in part VI of this chapter to handle the placement of insurance coverages with unauthorized insurers; and to place such coverages with authorized insurers as to which the licensee is not licensed as an agent if so placed through a countersigning Florida licensed resident agent of such insurer.

(2) "Surplus lines insurer" means an unauthorized insurer in which an insurance coverage is placed or may be placed under this surplus lines law.

(3) To "export" means to place in an unauthorized insurer under this surplus lines law, insurance covering a subject of insurance resident, located, or to be performed in Florida.

History.—§353, ch. 59-205.

Note.—Similar provisions found in former §645.01.

626.0512 Surplus lines insurance authorized.—If certain insurance coverages of subjects resident, located, or to be performed in this state cannot be procured from authorized insurers, such coverages, hereinafter designated "surplus lines," may be procured from unauthorized insurers, subject to the following conditions:

(1) The insurance must be eligible for export under §626.0513 or §626.0514;

(2) The insurer must be an eligible surplus lines insurer under §626.0514 or §626.0515;

(3) The insurance must be so placed through a licensed Florida surplus lines agent resident in Florida; and

(4) The other applicable provisions of this surplus lines law must be complied with.

History.—§354, ch. 59-205.

626.0513 Eligibility for export.—

(1) No insurance coverage shall be eligible for export unless it meets all of the following conditions:

(a) The full amount of insurance required must not be procurable, after a diligent effort has been made to do so, from among the insurers authorized to transact and actually writing that kind and class of insurance in this state, and the amount of insurance exported shall be only the excess over the amount so procurable from authorized insurers.

(b) The premium rate at which the coverage is exported shall not be lower than that rate applicable, if any, and filed by and in actual and current use by a majority of the authorized insurers for the same coverage on a similar risk.

(c) The policy or contract form under which the insurance is exported shall not be more favorable to the insured as to the coverage or rate than under similar contracts on file and in actual current use in this state by the majority of authorized insurers actually writing similar coverages on similar risks; except, that a coverage may be exported under a unique form of policy designed for use with respect to a particular subject of insurance if a copy of such form is filed with the commissioner by the surplus lines agent desiring to use the same and is subject to the commissioner's disapproval within not less than ten days if he finds that use of such special form is not reasonably necessary for the principal purposes of the coverage or that its use would be contrary to the purposes of this surplus lines law with respect to the reasonable protection of authorized insurers from unwarranted competition by unauthorized insurers.

(d) Except as to extended coverage in connection with fire insurance policies and except as to windstorm insurance, the policy or contract under which the insurance is exported shall not provide for deductible amounts, in determining the existence or extent of the insurer's liability, other than those available under similar policies or contracts in actual and current use by one or more authorized insurers. This paragraph shall not apply with respect to workmen's compensation self-insurance qualified as such under chapter 440.

(2) Except, that the commissioner may by rules and regulations declare eligible for export generally and notwithstanding the provisions of paragraphs (a), (b), (c) and (d) of subsection (1), any class or classes of insurance coverage or risk for which he finds, after a hearing, which he shall hold annually or more often, of which notice thereof was given to each insurer authorized to transact such class or classes in this state, that there is no reasonable or adequate market among authorized insurers. Any such rules and regulations shall continue in effect during the existence of the conditions upon which predicated, but subject to earlier termination by the commissioner.

(3) Subsection (1) does not apply to wet marine and transportation or aviation risks which are subject to §626.0514.

History.—§356, ch. 59-205.
Note.—Similar provisions found in former §645.05.

626.0514 Eligibility for export; wet marine, aviation.—

(1) Insurance coverage of wet marine and transportation or aviation risks of a class under the supervision and control of syndicate operations of authorized insurers, such as the American hull syndicate, the tugboat syndicate and other like constituted and recognized wet marine or aviation syndicate operations, may be exported under the following conditions:

(a) The insurance must be placed only by or through a licensed Florida surplus lines agent;

(b) The insurer must be one made eligible by the commissioner specifically for such coverages, based upon information furnished by the insurer and indicating that the insurer is well able to meet its financial obligations; and

(c) The surplus lines agent shall, within sixty days after procurement of the policy or contract, file with the commissioner a copy of the policy, cover note or contract.

(2) This section shall not apply as to boats under thirty-six feet in length, nor as to private aircraft owned by private owners for business and pleasure purposes only (excluding commercial), exclusive of check flight or ferry flight coverage only.

History.—§356, ch. 59-205.
Note.—Similar provisions found in former §645.05.

626.0515 Eligible surplus lines insurers.—

(1) No surplus lines agent shall place any coverage with any unauthorized insurer which is not then an eligible surplus lines insurer as provided for under this section.

(2) No unauthorized insurer shall be or become an eligible surplus lines insurer unless made eligible by the commissioner in accordance with the following conditions:

(a) Eligibility of the insurer must be requested in writing by a licensed surplus lines agent;

(b) The insurer must be currently an authorized insurer in the state or country of its domicile as to the kind or kinds of insurance proposed to be so placed, and must have been such an insurer for not less than the three years next preceding; or must be the wholly-owned subsidiary of an already eligible surplus lines insurer that has been so eligible for a period of not less than the three years next preceding;

(c) Before granting eligibility the requesting surplus lines agent or the insurer shall furnish the commissioner with a duly authenticated copy of its current annual financial statement in the English language and with all monetary values therein expressed in United States dollars, at an exchange rate—in the case of statements originally made in the currencies of other counties—then current and shown in the statement, and with such additional information relative to the insurer as the commissioner may request;

(d) The insurer, if organized under the laws of a state of the United States, must have surplus as to policyholders of not less than the amount required under this code for a like authorized insurer; or, if an alien insurer, must have and maintain in the United States a trust fund for the protection of all its policyholders in the United States under terms deemed by the commissioner to be reasonably adequate, in the amount of not less than four hundred thousand dollars, or, in the alternative, such a trust fund in the amount of not less than two hundred fifty thousand dollars as part of surplus to policyholders maintained in the United States in amount not less than that required under this code for a like newly authorized insurer. Any such surplus as to policyholders or trust fund shall be represented by investments consisting of public obligations of the United States, or of any state, county, or municipality thereof, or by other investments of the same general character and quality as are eligible investments for like funds of like domestic insurers under part II of chapter 625 of this code;

(e) The insurer must be of good reputation as to the providing of service to its policyholders and the payment of losses and claims;

(f) The insurer must be eligible, as for authority to transact insurance in this state, under subsections (3) (management and affiliations), and (4) (voting control or operation by alien government or agency) of §624.0203; and

(g) This subsection does not apply as to unauthorized insurers made eligible under §626.0514 as to wet marine and aviation risks as in such section provided.

(3) The commissioner shall from time to time publish a list of all currently eligible surplus lines insurers, and shall mail a copy thereof to each licensed surplus lines agent at his office last of record with the commissioner.

(4) This section shall not be deemed to cast upon the commissioner any duty or responsibility to determine the actual financial condition or claims practices of any unauthorized insurer; and status of eligibility, if granted

surer shall be sued, upon any cause of action arising in this State under any contract issued by it as a surplus line contract pursuant to this Chapter, in the superior court of the county in which the cause of action arose.

(2) Every unauthorized insurer issuing or delivering a surplus line policy through a surplus line broker in this State shall be deemed thereby to have appointed the Commissioner as its attorney for acceptance of service of all legal process issued in this State in any action or proceeding arising out of such policy, and service of such process upon the Commissioner shall be lawful personal service upon such insurer.

(3) Each surplus line policy shall contain a provision stating the substance of subsection (2) of this section, and designating the person to whom the Commissioner shall mail process as provided in subsection (4) of this section.

(4) Duplicate copies of legal process against such insurers shall be served upon the Commissioner, and at time of service the plaintiff shall pay the Commissioner two ($2.00) dollars, taxable as costs in the action. The Commissioner shall forthwith mail one copy of the process so served to the person designated by the insurer in the policy for the purpose, by registered mail with return receipt requested. The insurer shall have thirty (30) days after such date of mailing within which to plead, answer, or otherwise defend the action.

56-627. Exemptions from Surplus Line Law.—The provisions of this Surplus Line Insurance Law controlling the placing of insurance with unauthorized insurers shall not apply to reinsurance or to the following insurances when so placed by licensed agents or brokers of this State:

(1) Ocean marine and foreign trade insurances;

(2) Insurance on subjects located, resident, or to be performed wholly outside of this State, or on vehicles or aircraft owned and principally garaged outside this State;

(3) Insurances on property or operation of railroads engaged in interstate commerce;

(4) Insurance of aircraft owned or operated by manufacturers of aircraft or operated in scheduled interstate flight, or cargo of such aircraft or against liability, other than workmen's compensation and employer's liability, arising out of the ownership, maintenance or use of such aircraft.

56-628. **Report of and tax on independently procured coverages.**—(1) Every insurer who in this State procures or causes to be procured or continues or renews insurance in an unauthorized insurer upon a subject of insurance resident, located, or to be performed within this State, other than insurance procured through a surplus line broker pursuant to the Surplus Lines Insurance Law of this State or exempted from such law under section 56-627, shall within thirty (30) days after the date such insurance was so procured, continued, or renewed, file a report of the same with the Commissioner, in writing and upon forms designated by the Commissioner and furnished to such an insured upon request. Such report shall state the name and address of the insured or insureds, name and address of the insurer, the subject of the insurance, a general description of the coverage, the amount of premium currently paid thereon, and such additional information as reasonably requested by the Commissioner.

(2) For the general support of the Government of this State, there is levied and there shall be collected from every such insured in this State for the privilege of so insuring his property or interests, a tax at the rate of four (4%) percent of the gross premium paid for any such insurance, after deduction of return premiums, if any. Such tax shall be paid to the Commissioner, coincidentally with the filing of the report provided for in subsection (1) above.

(3) The tax imposed hereunder if delinquent shall bear interest at the rate of six (6%) percent per annum, compounded annually.

be recovered by an action instituted by the Commissioner in any court of competent jurisdiction.

Sec. 8463.15. Suspension or Revocation of License: 1. The Commissioner may suspend or revoke any surplus line broker's license:

(1) If the broker fails to file his annual statement or to pay the tax as required by sections 8463.12, 8463.13 and 8463.14, or

(2) If the broker fails to maintain an office in this Territory, or to keep the records, or to allow the Commissioner to examine his records as required by sections 8463.01 through 8463.17, or

(3) For any of the causes for which a general agent's license may be suspended or revoked.

2. The procedures provided by this chapter for the suspension or revocation of general agents' licenses shall be applicable to suspension or revocation of a surplus line broker's license.

3. No broker whose license has been so revoked shall again be so licensed within one year thereafter, nor until any fines or delinquent taxes owing by him have been paid.

Sec. 8463.16. Exemptions: 1. The provisions of sections 8463.01 through 8463.17 controlling the placing of insurance with unauthorized insurers shall not apply to reinsurance or to the following insurance when so placed by licensed general agents of this Territory:

(1) Ocean marine insurance.

(2) Insurance on subjects located, resident, or to be performed wholly outside this Territory, or on vehicles or aircraft owned and principally garaged outside this Territory.

(3) Insurance of aircraft or cargo of such aircraft, or against liability, other than workmen's compensation and employer's liability, arising out of the ownership, maintenance, or use of such aircraft.

2. No provision of this chapter shall be construed as prohibiting any person from procuring any insurance which is not, at the time of procuring such insurance, written by any insurer authorized to transact business in this Territory.

Sec. 8463.17. Legal Process against Unauthorized Insurer: 1. An unauthorized insurer shall be sued, upon any cause of action arising in this Territory under any contract issued by it as a surplus line contract, pursuant to sections 8463.01 through 8463.17, or otherwise, in the Circuit Courts of this Territory.

2. Any of the following acts in this Territory, effected by mail or otherwise, by an unauthorized foreign or alien insurer:

(1) the issuance or delivery of contracts of insurance to residents of this Territory or to corporations authorized to do business therein,

(2) the solicitation of applications for such contracts,

(3) the collection of premiums for such contracts, or

(4) any other transaction of insurance business,

is equivalent to and shall constitute an appointment by such insurer

of this law would not be subject to similar requirements; and for other purposes as set forth in this law. [1961, ch. 230, § 255, p. 645.]

41-1212. Exemptions from surplus line law.—(1) The provisions of this surplus line law controlling the placing of insurance with unauthorized insurers shall not apply to reinsurance or, except as to subsection (2) below, to the following insurances when so placed by licensed agents or surplus line brokers of this state:

(a) Ocean marine and foreign trade insurances.

(b) Insurance on subjects located, resident, or to be performed wholly outside of this state, or on vehicles or aircraft owned and principally garaged outside this state.

(c) Insurance on operations of railroads engaged in transportation in interstate commerce and their property used in such operations.

(d) Insurance of aircraft owned or operated by manufacturers of aircraft, or of aircraft operated in commercial interstate flight, or cargo of such aircraft, or against liability, other than workmen's compensation and employer's liability, arising out of the ownership, maintenance or use of such aircraft.

(2) Brokers so placing any such insurance with an unauthorized insurer shall keep a full and true record of each such coverage in detail as required of surplus line insurance under this law. The record shall be preserved for not less than five (5) years after the effective date of the insurance and shall be kept available in this state and open to the examination of the commissioner. The broker shall furnish to the commissioner at his regular annual reporting time a report of all such coverages so placed in a designated calendar year. [1961, ch. 230, § 256, p. 645.]

See, to sec. ref. This section is referred to in §§ 41-1201, 41-1211, 41-1213.

41-1213. Definitions.—(1) "Broker" as used in this chapter means a surplus line broker duly licensed as such under this chapter.

(2) To "export" means to place an unauthorized insurer under this surplus line law insurance covering a subject of insurance resident, located, or to be performed in Idaho. [1961, ch. 230, § 257, p. 645.]

See, to sec. ref. This section is referred to in §§ 41-1201, 41-1211.

41-1214. Conditions for export.—If certain insurance coverages cannot be procured from authorized insurers, hereinafter designated "surplus lines", may be procured from unauthorized insurers, subject to the following conditions:

(1) The insurance must be procured through a licensed surplus line broker.

available to this state by virtue of Public Law 79-15, 79th Congress of the United States, Chapter 20, 1st Sess., S. 340, 59 Stat.L. 33; 15 U.S.C. 1011 to 1015 incl., as amended, which declares that the business of insurance and every person engaged therein shall be subject to the laws of the several states. [Acts 1967 (62 G.A.) c365, §3]

507A.3 Definitions- scope. Unless otherwise indicated, the term "insurer" as used in this section includes all corporations, associations, partnerships and individuals engaged in the business of insurance. Any of the following acts in this state, effected by mail or otherwise, by an unauthorized foreign or alien insurer is defined to be doing an insurance business in this State.

1. The making of or proposing to make, as an insurer, an insurance contract.

2. The taking or receiving of any application for insurance.

3. The receiving or collection of any premiums, membership fees, assessments, dues or other considerations for any insurance.

4. The issuance or delivery of contracts of insurance to residents of this state or to corporations or persons authorized to do business in this state.

5. The doing of any kind of insurance business specifically recognized as constituting the doing of an insurance business within the meaning of the statutes relating to insurance.

6. The doing or proposing to do any insurance business in substance equivalent to any of the foregoing in a manner designed to evade the provisions of the insurance laws of this state.

7. Any other transactions of business relating directly to insurance in this state by an insurer.

The venue of an act committed by mail is at the point where the matter transmitted by mail is delivered and takes effect. [Acts 1967 (62 G.A.) c365, §1]

507A.4 Transactions when law not applicable. The provisions of this chapter shall not apply to:

1. The lawful transaction of surplus lines insurance as permitted by sections five hundred fifteen point one hundred forty-seven (515.147) through five hundred fifteen point one hundred fifty (515.150) of the Code.

2. The lawful transaction of reinsurance by insurers.

3. Attorneys acting in the ordinary relation of attorney and client in the adjustment of claims or loss.

4. Transactions in this state involving a policy lawfully solicited, written, and delivered outside of this state, covering subjects of insurance not resident located, or expressly to be performed in this state at the time of issue, and which transactions are subsequent to the issuance of the policy.

5. Transactions in this state involving group or blanket insurance and group annuities where the master policy of such groups was lawfully issued and delivered in a state in which the company was authorized to do an insurance business.

6. Transactions in this state involving any policy of insurance issued prior to July 1, 1967.

7. Any life insurance company organized and operated, without profit to any private shareholder or individual, exclusively for the purpose of aiding educational or scientific institutions organized and operated without profit to any private shareholder or individual by issuing insurance and annuity contracts direct from the home office of the company and without agents or representatives in this state only to or for the benefit of such institutions and to individuals engaged in the services of such institutions; nor shall this chapter apply to any life, disability or annuity contracts issued by such life insurance company, provided such contracts otherwise comply with the statutes.

8. Insurance on vessels, craft or hulls, cargoes, marine builder's risk, marine protection and indemnity or other risk including strikes and war risks commonly insured under ocean or wet marine forms of policy.

9. Transactions involving risks located in this state where the policy or contract of insurance for such risk was principally negotiated and delivered outside this state and was lawfully issued in a state or foreign country in which the foreign or alien insurer was authorized to do an insurance business, and where such insurer has no contact with this state except in connection with inspections or losses required by virtue of the contract or policy of insurance covering the risk located in this state. [Acts 1967 (62 G.A.) ch365, §5]

507A.5 Proscribed acts binding on insurer.

1. No person or insurer shall directly or indirectly perform any of the acts of doing an insurance business as defined in this chapter except as provided by and in accordance with the specific authorization by statute. However, should any unauthorized person or insurer perform any act of doing an insurance business as set forth in this chapter, it shall be equivalent to and shall constitute an irrevocable appointment by such person or insurer, binding upon him, his executor or

quested. Upon service of process upon the commissioner and the commissioner mailing such process to the insurer's designee, the court shall be deemed to have jurisdiction in personam of the insurer.

(3) An unauthorized insurer issuing such policy shall be deemed thereby to have authorized service of process against it in the manner and to the effect as provided in this section. Any such policy shall contain a provision stating the substance of this section, and designating the person to whom the commissioner shall mail process as provided in subsection (2) of this section. (1950, c. 21, § 1)

Actions against insurance companies, where may be brought, KRS 452.445

Corporations other than foreign insurance companies, agent for service of process, KRS 271.385

304.597 Exemptions concerning placing of insurance with unauthorized insurers; records. (1) The provisions of KRS 304.580 to 304.598 controlling the placing of insurance with unauthorized insurers shall not apply to reinsurance, nor to the following insurance when so placed by licensed agents of this state:

(a) Insurance on subjects located, resident, or to be performed wholly outside of this state, or on vehicles or aircraft owned and principally garaged outside this state;

(b) Insurance on operations of railroads engaged in transportation in interstate commerce and their property used in such operations.

(2) Agents so placing any such insurance with an unauthorized insurer shall keep a full and true record of each such coverage in detail as required of surplus line insurance under KRS 304.580 to 304.598. The record shall be preserved for not less than five years from the effective date of the insurance and shall be kept available in this state and open to the commissioner's examination. The agent shall furnish to the commissioner at his request a report of all such coverages so placed in a designated calendar year. (1950, c. 21, § 1; 1954, c. 203, § 12; effective June 17, 1954)

304.598 Records of insureds. Every person for whom insurance has been placed with an unauthorized insurer pursuant to or in violation of KRS 304.580 to 304.598 shall, upon the commissioner's order, produce for his examination all policies and other documents evidencing the insurance, and shall disclose to the commissioner the amount of the gross premiums paid or agreed to be paid for the insurance. For each refusal to obey such order, such person shall be liable to a fine of not more than five hundred dollars. (1950, c. 21, § 1)

a true copy thereof, to the person designated by the insurer in the policy for the purpose by prepaid registered mail with return receipt requested. The insurer shall have forty days from the date of service upon the Secretary of State within which to plead, answer, or otherwise defend the action. Upon service of process upon the Secretary of State in accordance with this provision, the court shall be deemed to have jurisdiction in personam over the insurer.

C. An unauthorized insurer issuing such policy shall be deemed thereby to have authorized service of process against it in the manner and to the effect as provided in this Section. Any such policy shall contain a provision stating the substance of this Section, and designating the person to whom the Secretary of State shall mail process as provided in Subsection B of this Section.

§ 1269. Exemptions

A. The provisions of R.S. 22:1256 through 22:1268 and of 22:1270 controlling the placing of insurance with unauthorized insurers shall not apply to reinsurance or to the following insurances when so placed by licensed surplus line brokers of this state, except that on or before March 1st of each year a tax on the portion of the premiums received from ocean marine and foreign trade coverages which is properly allocable to the risks or exposures located in this state during the preceding calendar year shall be due at the rate of two and one-half percent per annum, such tax when collected to be paid to the State Treasurer and to be credited to the General Fund, and such licensed surplus line broker placing ocean marine insurance shall be subject to the provisions of Section 1252, notwithstanding the provisions of Section 1249 and 1252, and must show on any document issued by and/or delivered by them evidencing such insurance, all of the insurers and must clearly stamp on any such documents that on the demand of the assured or its representative the latest financial statements of any such insurers are available at its office for inspection:

(1) Ocean marine and foreign trade insurance.

(2) Insurance on subjects located, resident, or to be

performed wholly outside of this state, or on vehicles or aircraft owned and principally garaged outside of this state.

(3) Insurance on property or operation of railroads engaged in interstate commerce.

(4) Insurance of aircraft owned or operated by manufacturers of aircraft, or of aircraft operated in schedule interstate flight, or cargo of such aircraft, or against liability, other than workmen's compensation and employer's liability, arising out of the ownership, maintenance or use of such aircraft.

B. Surplus line brokers so placing any such insurance with an unauthorized insurer shall keep a full and true record of each such coverage in detail as required of surplus line insurance under this Part. The record shall be preserved for not less than five years from the effective date of the insurance and shall be kept available in this state and open to the examination of the Commissioner of Insurance. The surplus line broker shall furnish to the Commissioner of Insurance at his request and on forms as designated and furnished by him a report of all such coverages so placed in a designated calendar year.

Notwithstanding anything to the contrary herein contained, the rates for the exempt lines of insurance set out in Subsection A (1), (2), (3) and (4) shall not be regulated. (Act 185 of 1970).

§ 1270. Records of insureds

Every person for whom insurance has been placed with an unauthorized insurer pursuant to or in violation of this Part shall, upon the Commissioner of Insurance's order, produce for his examination all policies and other documents evidencing the insurance, and shall disclose to the Commissioner of Insurance the amount of the gross premiums paid or agreed to be paid for the insurance. For each refusal to obey such order, such person shall be liable for a fine of not more than five hundred dollars.

40-3425. Rules and regulations. (1) The commissioner shall make or may approve and adopt reasonable rules and regulations, consistent with this surplus line insurance law, for any or all of the following purposes:

(a) Effectuation of such law;

(b) Establishment of procedures through which determination is to be made as to the eligibility of particular proposed coverages for placement with a surplus line insurer or insurers; and

(c) Establishment, procedures, and operations of any voluntary organization of surplus line insurance agents or others designed to assist such agents to comply with such law.

(2) Such rules and regulations shall be subject to the procedures and carry the penalty provided by section 40-2710.

History: En. Sec. 290, Ch. 256, L. 1959.

Collateral References
Insurance 6-8.
44 C.J.S. Insurance § 78.

40-3426. Exemptions from surplus line law. The provisions of this surplus line insurance law controlling the placing of insurance with unauthorized insurers shall not apply to reinsurance or to the following insurances when so placed by licensed insurance agents of this state:

(1) Wet marine and transportation insurances;

(2) Insurance on subjects located, resident, or to be performed wholly outside of this state, or on vehicles or aircraft owned and principally garaged outside this state;

(3) Insurance on property or operations of railroads engaged in interstate commerce; and

(4) Insurance of aircraft owned or operated by manufacturers of aircraft, or aircraft operated in scheduled interstate flight, or cargo of such aircraft, or against liability, other than workmen's compensation and employers' liability, arising out of the ownership, maintenance or use of such aircraft.

History: En. Sec. 291, Ch. 256, L. 1959.

40-3427. Report and tax of independently procured coverages. (1) Every insured who in this state procures or causes to be procured or continues or renews insurance in an unauthorized foreign insurer, or any self insurer who in this state procures or continues excess loss, catastrophe or other insurance, upon a subject of insurance resident, located or to be performed within this state, other than insurance procured through a surplus line agent pursuant to the surplus line insurance law of this state or exempted from such law under section 40-3426, shall within thirty (30) days after the date such insurance was so procured, continued, or renewed, file a written report of the same with the commissioner on forms designated by the commissioner and furnished to such insured upon request. The report shall show the name and address of the insured or insureds, the name and address of the insurer, the subject of the insurance, a general description of the coverage, the amount of premium currently charged therefor, and such additional pertinent information as is reasonably required by the commissioner. If any such insurance covers also subjects of insurance resident, located or to be performed outside this state a

shall execute and deliver to the superintendent of insurance a bond in the sum of five thousand dollars, payable to the state, with at least two sureties, approved by the superintendent and conditioned that such person will faithfully comply with sections 3905.30 to 3905.35, inclusive, of the Revised Code, and will annually file with the superintendent in January, a sworn statement of the gross premiums charged for insurance procured or placed, and the gross premiums on such insurance canceled under such license during the year ending on the thirty-first day of December last preceding, and at the time of filing such statement will pay to the superintendent an amount equal to five per cent of the balance of such gross premiums after deducting such return premiums so reported. Such tax shall be collected from the insured by the surplus line broker placing such policy of insurance at the time of the delivery of the policy to the insured. No license issued under section 3905.30 of the Revised Code shall be renewed until such reports and tax have been filed and paid in full. The bond required by this section shall be deposited with the superintendent and kept in his office.

CASE NOTES

1. Since the penalties which are provided by statute for the act of a foreign insurance company in doing business in this state without having complied with the conditions of such statute, are to be the sole punishment for such violation of law, an insurance policy issued by a foreign insurance company which has not complied with the conditions of such statute, is valid; and accordingly, one who has paid premiums upon such an insurance policy at the request of the insured, may recover from the in

§ 1119. Exemptions from surplus lines provisions

The sections of this article relative to surplus line coverages shall not apply to reinsurance. L 1957, p. 260, § 1119.

§ 1120. Records of insureds

Upon request of the Insurance Commissioner any person in Oklahoma who is the insured under any policy issued by an unauthorized insurer upon a subject of insurance resident, located, or to be performed in Oklahoma at the time the policy was issued, shall produce for examination all policies and other documents evidencing and relating to the insurance, and shall disclose the amount of the gross premiums paid or agreed to be paid for the insurance, through whom the insurance was procured, and such other information relative to the placing of such insurance as may reasonably be required. L 1957, p. 260, § 1120.

which declares that the business of insurance and every person engaged herein shall be subject to the laws of the several states.

History: L. 1969, ch. 80, § 2.

31-38-3. Transacting insurance business in state without certificate of authority unlawful—Exceptions—What constitutes transaction—Effect of failure to obtain certificate.—(1) It shall be unlawful for any insurer to transact insurance business in this state, as set forth in subsection (2) of this section, without a certificate of authority from the commissioner; provided, however, that this section shall not apply to:

(a) The lawful transaction of surplus lines insurance.

(b) The lawful transaction of reinsurance by insurers.

(c) Transactions in this state involving a policy lawfully solicited, written, and delivered outside of this state covering only subjects of insurance not resident, located, or expressly to be performed in this state at the time of issuance, and which transactions are subsequent to the issuance of such policy.

(d) Transactions in this state involving life insurance, disability insurance or annuities provided to or by education or religious or charitable institutions organized and operated without profit to any private shareholder or individual for the benefit of such institutions and individuals engaged in the service of such institutions.

(e) Attorneys acting in the ordinary relation of attorney and client in the adjustment of claims or losses.

(f) Transactions in this state involving group life and group sickness and accident or blanket sickness and accident insurance or group annuities where the master policy of such groups was lawfully issued and delivered in and pursuant to the laws of a state in which the insurer was authorized to do an insurance business, to a group organized for purposes other than the procurement of insurance, and where the policyholder is domiciled or otherwise has a bona fide situs.

(g) Transactions in this state involving any policy of insurance or annuity contract issued prior to the effective date of this act.

(h) Transactions in this state relative to a policy issued or to be issued outside this state involving insurance on vessels, craft or hulls, cargoes, marine builder's risk, marine protection and indem-

Added, 1969

nity or other risk, including strikes and war risks commonly insured under ocean or wet marine forms of policy.

(i) Transactions pursuant to section 31-15-19, Utah Code Annotated 1953.

(2) Any of the following acts in this state effected by mail or otherwise by or on behalf of an unauthorized insurer is deemed to constitute the transaction of an insurance business in this state. The venue of an act committed by mail is at the point where the matter transmitted by mail is delivered and takes effect. Unless otherwise indicated, the term "insurer" as used in this section includes all corporations, associations, partnerships and individuals, engaged as principals in the business of insurance and also includes interinsurance exchanges and mutual benefit societies.

(a) The making of or proposing to make, as an insurer, an insurance contract.

(b) The making of or proposing to make, as guarantor or surety, any contract of guaranty or suretyship as a vocation and not merely incidental to any other legitimate business or activity of the guarantor or surety.

(c) The taking or receiving of any application for insurance.

(d) The receiving or collection of any premium, commission, membership fees, assessments, dues or other consideration for any insurance or any part thereof.

(e) The issuance or delivery of contracts of insurance to residents of this state or to persons authorized to do business in this state.

(f) Directly or indirectly acting as an agent for or otherwise representing or aiding on behalf of another any person or insurer in the solicitation, negotiation, procurement or effectuation of insurance or renewals thereof or in the dissemination of information as to coverage or rates, or forwarding of applications, or delivery of policies or contracts, or inspection of risks, a fixing of rates or investigation or adjustment of claims or losses or in the transaction of matters subsequent to effectuation of the contract and arising out of it, or in any other manner representing or assisting a person or insurer in the transaction of insurance with respect to subjects of insurance resident, located or to be performed in this state. The provisions of this subsection (2) shall not operate to prohibit full time salaried employees of a corporate insured from acting in the

Added, 1969

capacity of an insurance manager or buyer in placing insurance in behalf of such employer.

(g) The transaction of any kind of insurance business specifically recognized as transacting an insurance business within the meaning of the statutes relating to insurance.

(h) The transacting or proposing to transact any insurance business in substance equivalent to any of the foregoing in a manner designed to evade the provisions of the statutes.

(3) (a) The failure of an insurer transacting insurance business in this state to obtain a certificate of authority shall not impair the validity of any act or contract of such insurer and shall not prevent such insurer from defending any action at law or suit in equity in any court of this state, but no insurer transacting insurance business in this state without a certificate of authority shall be permitted to maintain an action in any court of this state to enforce any right, claim or demand arising out of the transaction of such business until such insurer shall have obtained a certificate of authority.

(b) In the event of failure of any such unauthorized insurer to pay any claim or loss within the provisions of such insurance contract, any person who assisted or in any manner aided directly or indirectly in the procurement of such insurance contract shall be liable to the insured for the full amount of the claim or loss in the manner provided by the provisions of such insurance contract.

History: L. 1969, ch. 80, § 3.

Compiler's Notes.

Chapter 80 of Laws 1969 carried no effective date clause.

31-38-4. Violations—Injunctive relief.—Whenever the commissioner believes, from evidence satisfactory to him, that any insurer is violating or about to violate the provisions of section 31-38-3, the commissioner may, through the attorney general of this state, cause a complaint to be filed in the district court of Salt Lake County to enjoin and restrain such insurer from continuing such violation or engaging therein or doing any act in furtherance thereof. The court shall have jurisdiction of the proceeding and shall have the power to make and enter an order or judgment awarding such preliminary or final injunctive relief as in its judgment is proper.

History: L. 1969, ch. 80, § 4.

31-38-5. Service of process—Appointment of secretary of state as agent—Method of service—Sufficiency—Default judgment.—(1)

Added, 1969

copies of such legal process either by a person competent to serve a summons, by registered mail or certified mail with return receipt requested. At the time of such service the plaintiff shall pay to the commissioner two dollars, taxable as costs in the action. The commissioner shall forthwith mail the documents of process served, or a true copy thereof, to the person designated by the insurer in the policy for the purpose by prepaid registered mail with return receipt requested. The insurer shall have forty days from the date of service upon the commissioner within which to plead, answer, or otherwise defend the action. Upon service of process upon the commissioner in accordance with this provision, the court shall be deemed to have jurisdiction in personam of the insurer.

(3) An unauthorized insurer issuing such policy shall be deemed thereby to have authorized service of process against it in the manner and to the effect as provided in this section. Any such policy shall contain a provision stating the substance of this section, and designating the person to whom the commissioner shall mail process as provided in subsection (2) of this section. [1963 c 135 § 16; 1955 c 303 § 8; 1947 c 79 § .15.15; Rem. Supp. 1947 § 45.15.15.]

48.15.160 Exemptions from surplus line requirements. (1) The provisions of this chapter controlling the placing of insurance with unauthorized insurers shall not apply to reinsurance or to the following insurances when so placed by licensed agents or brokers of this state:

(a) Ocean marine and foreign trade insurances.

(b) Insurance on subjects located, resident, or to be performed wholly outside of this state, or on vehicles or aircraft owned and principally garaged outside this state.

(c) Insurance on operations of railroads engaged in transportation in interstate commerce and their property used in such operations.

(d) Insurance of aircraft owned or operated by manufacturers of aircraft, or of aircraft operated in scheduled interstate flight, or cargo of such aircraft, or against liability, other than workmen's compensation and employer's liability, arising out of the ownership, maintenance or use of such aircraft.

(2) Agents and brokers so placing any such insurance with an unauthorized insurer shall keep a full and true record of each such coverage in detail as required of surplus line insurance under this chapter. The record shall be preserved for not less than five years from the effective date of the insurance and shall be kept available in this state and open to the examination of the commissioner. The agent or broker shall furnish to the commissioner at his request and on forms as designated and furnished by him a report of all such coverages so placed in a designated calendar year. [1949 c 190 § 22; 1947 c 79 § .15.16; Rem. Supp. 1949 § 45.15.16.]

HB-299

GREATER ANCHORAGE AREA BOROUGH

104 NORTHERN LIGHTS BOULEVARD
ANCHORAGE, ALASKA 99503

January 26, 1971

OFFICE OF THE CHAIRMAN

The Honorable William Moran
Alaska State House of Representatives
Pouch V, Capitol Building
Juneau, Alaska 99801

Dear Bill:

The Greater Anchorage Area Borough, like most governmental entities, has from time to time need of legislative action to either correct deficiencies in existing laws or to broaden the scope of these laws to enable it to survive with the ever-changing times. Because of this, we depend heavily upon our elected delegates.

This year we are asking each of the delegates to assist. Rather than overload any one of you with a heavy legislative program, we have attempted to divide our legislative package as best we could, hopefully according to your interests.

As a result, you will find a copy of our proposed Vexatious Litigant Bill enclosed. We are asking that you sponsor this Bill in the House. A letter and a copy of this legislation has been sent to Representative Mike Rose asking that he co-sponsor it with you. We have also requested the assistance of Senator Joe Josephson on this particular bill when it reaches the Senate.

If we can provide additional information or testimony, we will be happy to do so.

Very truly yours,

John M. Asplund
Borough Chairman

HB-305

Mr. Jalmar Kertulla, Chairman
House Commerce Committee
Juneau, Alaska

Dear Chairman Kertulla and Committee Members:

I have read House Bill No. 305 limiting cancellability of certain insurance policies. I certainly am in favor of legislation in the intention expressed in this Bill.

I think it is also important and that perhaps an amendment should be added providing that where policies show more than one loss payee beneficiary, such as seller and buyer, that notice of cancellation could not be effective unless the 10 day or whatever statutory notice is required is furnished to all of the beneficiaries or loss payees named in the policy and its endorsements.

The reason for this is that numerous people sell their homes under contracts or deeds of trust which require that the buyer carry insurance with the seller also named as loss payee as his interest may appear. If the buyer defaults in payment of the insurance premiums and the insurance company only notifies the buyer of the cancellation, the seller's interest goes unprotected without any notice which would otherwise result in his placing insurance to cover his interests.

We have had numerous occasions where loss has occured in this situation and I feel that it is truly a matter for the attention of the Legislature.

Very truly yours,

Paul F. Robison

HB 305

Division of Insurance

March 18, 1971

HB-305

We have noticed an increasing number of cancellations on property insurance policies for which no valid reason is apparent and for which the individual insured has no protection or recourse for reinstatement. Mid term cancellation for no stated reason places the insured in a "caveat emptor" position. We have received a substantial number of complaints recently, where the insurance carrier has terminated coverage on policies covering low value dwellings. We are sure that many cases like this are never called to our attention. The cases that we have investigated have verified our suspicions that these cancellations are for no other reason. The State of California has adopted this type of legislation and report that it is operating sucessfully.

Last year the legislature passed an automobile cancellation bill which limits the permissable reasons for cancellation of automobile insurance. This is found in AS 21.36 (ch 28 SLA 1970). When the property cancellation problem was realized we drafted a request for legislation to limit property cancellations by amending portions of the automobile cancellation bill thereby eliminating the need to repeat many sections already contained in the automobile cancellation bill. When HB-305 came down it was inserted in AS 21.42. The sections common to the automobile cancellation bill and the non-commercial property cancellation bill have not been picked up. This could be corrected by substituting the bill attached (Exhibit I) for HB-305. We have discussed this with the Deputy Director of Insurance and the Commissioner of the Department of Commerce and have their concurrence.

The common sections in the automobile cancellation bill are indicated in Exhibit II.

This proposed legislation will; give the buyer a reason for any cancellation of coverage, limit valid reasons for cancellation to 5 classes, provide a 45 day notice of non-renewal and a 20 day notice of cancellation except on non-payment cases which will provide a 10 day notice of cancellation. The present notice provides only 5 days for fire policies. There is a definite need for the additional protection this bill would afford the insuring public.

This legislation may have an adverse effect on markets for the types of lines to be covered as carriers may feel that they have to withdraw. The bill covering automobiles cancellation has not apparently affected our markets. We really do not expect any withdrawal problems but some are possible.

EXHIBIT I

IN THE LEGISLATURE OF THE STATE OF ALASKA

SEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An act relating to the cancellation and renewal of certain non-commercial insurance policies other than automobile."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*Section 1. AS 21.36.210 is amended by adding new subsections (e) and (f) to read:

(e) No insurer may exercise its right to cancel an insurance policy covering;

(1) Loss of or damage to real property which is used predominantly for residential purposes, and which consists of not more than four dwelling units.

(2) Loss of or damage to personal property in which natural persons resident in specifically described real property of the kind described in subdivision (1) have an insurable interest except personal property used in the conduct of a commercial or industrial enterprise.

(3) Legal liability of a natural person or persons for loss of, damage to, or injury to, persons or property but not including policies primarily insuring risks arising from the conduct

of a commercial or industrial enterprise

Except for reasons listed in (f) of this section.

(f) Exceptions to (e) of this section are:

(1) Nonpayment of premium, including nonpayment of any additional premiums, calculated in accordance with the current rating manual of the insurer, justified by a physical change in the insured property or a chnage in its occupancy for use.

(2) Conviction of the named insured of a crime having as one of its necessary elements an act increasing any hazard insured against.

(3) Discovery of fraud or material misrepresentation by either of the following:

(A) The insured or his representative in obtaining the insurance.

(B) The named insured in pursuing a claim under the policy.

(4) Discovery of grossly negligent acts or omissions by the insured substantially increasing any of the hazards insured against.

(5) Physical changes in the insured property which result in the property becoming uninsurable

*Section 2. AS 21.36.270 is amended to read:

Sec. 21.36.270 EFFECT OF FAILURE TO COMPLY. Notwithstanding the failure of an insurer to comply with secs 210 - 310 of this chapter termination of coverage under the policy either by cancellation or non-renewal is effective on the effective date of any other policy providing similar coverage on the same [motor vehicle or a replacement of it.] (1) risk, or (2) motor vehicle or a replacement of it.

*Section 3 AS 21.36.210 (1) is amended to read:

Sec 21.36.310 DEFINITIONS. In secs. 210 -300 of this chapter

(1) "Policy" means a policy covering the exposures listed in 210 (e) of this section or an automobile policy which includes automobile liability coverage, uninsured motorist coverage, automobile medical payments coverage, or automobile physical damage coverage, delivered or issued for delivery in this state, insuring as the named insured, one individual or husband and wife resident of the same household, and under which the insured vehicles are of the following types only:

(A) a motor vehicle of the private passenger or station wagon type that is not used as a public or livery conveyance, nor rented to others; or

(B) any other four-wheel motor vehicle with a load capacity of 1,500 pounds or less which is not used in the occupation, profession or business of the insured, nor used as a public or livery conveyance nor rented to others;

*Section 4. This act takes effect July 1, 1971.

EXHIBIT II

LAWS OF ALASKA

1970

Chapter No. 28

AN ACT

Relating to the cancellation and renewal of certain automobile insurance policies.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 21.36 is amended by adding new sections to read:

Sec. 21.36.210. LIMITS ON CANCELLATION. (a) No insurer may exercise its right to cancel an automobile insurance policy except for the following reasons:

(1) nonpayment of premium; or

(2) the driver's license or motor vehicle registration of either the named insured or of an operator who resides in the same household as the named insured or who customarily operates a motor vehicle insured under the policy has been under suspension or revocation during the policy period or, if the policy is a renewal, during its policy period or the 180 days immediately preceding its effective date.

(b) During the policy period, no modification of automobile physical damage coverage (except coverage for loss caused by collision) whereby provision is made for the application of a deductible amount not exceeding $100 is a cancellation of the coverage or of the policy.

(c) Renewal of a policy does not constitute a waiver or estoppel with respect to grounds for cancellation which existed before the effective date of the renewal.

(d) This section does not apply to the failure to renew a policy, except as to coverage in force for less than 12 months.

Sec. 21.36.220. NOTICE OF CANCELLATION. No insurer may exercise its right to cancel a policy unless a written notice of cancellation is mailed or delivered to the named insured, at the address shown in the policy, at least 20 days before the effective date of cancellation, except that when cancellation is for nonpayment of premium the notice shall be mailed or delivered to the named insured at the address shown in the policy at least 10 days before the effective date of cancellation and shall include or be accompanied by a statement of the reason for the cancellation. This section does not apply to the failure to renew a policy, except as to coverage in force for less than 12 months.

Sec. 21.36.230. STATEMENT OF REASONS. A notice of cancellation issued under sec. 210(a)(2) of this chapter shall either state the reasons for the cancellation, or contain a statement that upon the written request of the named insured, mailed or delivered to the insurer at least 10 days before the effective date of cancellation, the insurer will specify in writing the reason for the cancellation. If the reason for cancellation is not included in the notice of cancellation, the insurer shall upon written request of the named insured specify in writing the reason for cancellation. The insurer shall mail or deliver this explanation to the named insured within 10 days after receipt of a written request. Failure to specify the reason following a request constitutes a violation of this title, but does not invalidate the cancellation.

Sec. 21.36.240. FAILURE TO RENEW. No insurer may fail to renew a policy in force for less than 12 months. No insurer may fail to renew a policy in force for 12 months or more unless a written notice of nonrenewal is mailed or delivered to the named insured, at the address shown in the policy, at least 20 days before the expiration date of the policy, or of the anniversary date of a policy written for a term longer than one year or with no fixed expiration date. This section does not apply

(1) if the insurer has in good faith manifested in any way its willingness to renew;

(2) in case of nonpayment of premium for the expiring policy; or

(3) if the insured fails to pay the premium as required by the insurer for renewal.

Sec. 21.36.250. NOTICE OF ELIGIBILITY. When a policy of automobile liability insurance is cancelled, other than for nonpayment of premium, or for failure to renew a policy of automobile liability insurance to which sec. 240 of this chapter applies, the insurer shall notify the named insured of his possible eligibility for automobile insurance through the automobile assigned risk plan, or automobile insurance plan. The notification shall accompany or be included in the notice of cancellation or nonrenewal required by secs. 230 and 240 of this chapter.

Sec. 21.36.260. PROOF OF MAILING. Proof of mailing of notice of cancellation, or of nonrenewal or of reasons for cancellation, to the named insured at the address

shown in the policy, is sufficient proof of notice.

Sec. 21.36.270. EFFECT OF FAILURE TO COMPLY. Notwithstanding the failure of an insurer to comply with secs. 210 - 310 of this chapter, termination of coverage under the policy either by cancellation or nonrenewal is effective on the effective date of any other policy providing similar coverage on the same motor vehicle or a replacement of it.

Sec. 21.36.280. IMMUNITY OF INSURER, DIRECTOR AND INFORMER. There is no liability on the part of, and no cause of action of any nature may arise against, the director of insurance or against an insurer, its authorized representatives, agents, or employees, or a person furnishing to the insurer information as to reasons for cancellation, for any statement made by any of them in a written notice of cancellation, or in any other communication, oral or written, specifying the reasons for cancellation, or the providing of information pertaining to a cancellation or for statements made or evidence submitted at a hearing conducted in connection with a cancellation. However, this immunity from liability does not apply when the information furnished or statement made is untrue and the person furnishing the information or making the statement knew of the lack of truth or was grossly negligent in ascertaining the truth.

Sec. 21.36.290. POLICY PERIOD. A policy with a policy period or term of less than 12 months shall, for the purposes of secs. 210 - 310 of this chapter be considered to be written for a policy period or term of 12 months except in case of cancellation under any of the circumstances specified in sec. 210 of this chapter, and a policy written for a term longer than one year or a policy with no fixed expiration date shall be considered to be written for successive policy periods or terms of one year and termination by an insurer effective on an anniversary date of the policy shall be considered a failure to renew.

Sec. 21.36.300. APPLICABILITY OF SECS. 210 - 310 OF THIS CHAPTER. Secs. 210 - 310 of this chapter do not apply to any

(1) policy which has been in effect less than 60 days at the time notice of cancellation is mailed or delivered by the insurer unless it is a renewal policy;

(2) policy issued under an automobile assigned risk plan or automobile insurance plan;

(3) policy insuring more than four motor vehicles;

(4) policy covering the operation of a garage, automobile sales agency, repair shop, service station or public parking place;

(5) policy providing insurance only on an excess basis; or

(6) other contract providing insurance to the

named insured even though the contract may incidentally provide insurance with respect to motor vehicles.

Sec. 21.36.310. DEFINITIONS. In secs. 210 - 310 of this chapter

(1) "policy" means an automobile policy which includes automobile liability coverage, uninsured motorist coverage, automobile medical payments coverage, or automobile physical damage coverage, delivered or issued for delivery in this state, insuring as the named insured, one individual or husband and wife resident of the same household, and under which the insured vehicles are of the following types only:

(A) a motor vehicle of the private passenger or station wagon type that is not used as a public or livery conveyance, nor rented to others; or

(B) any other four-wheel motor vehicle with a load capacity of 1,500 pounds or less which is not used in the occupation, profession or business of the insured, nor used as a public or livery conveyance nor rented to others;

(2) "renewal" or "to renew" means

(A) the issuance and delivery by an insurer of a policy replacing at the end of the policy period a policy previously issued and delivered by the same insurer,

(B) the issuance and delivery of a certificate or notice extending the term of a policy beyond its policy period or term, or

(C) the extension of the term of a policy beyond its policy period or term under a provision for extending the policy by payment of a continuation premium;

(3) "nonpayment of premium" means failure of the named insured to discharge when due any of his obligations in connection with the payment of premium on a policy, or any installment of the premium, whether the premium is payable directly to the insurer or its agent or indirectly under any premium finance plan or extension of credit.

Approved by governor: March 20, 1970
Actual effective date: June 18, 1970

The Full-system Mass Transit Concept for The Small City

Re: HB 334 and HB 335

Mass transportation problems in the large cities stand out, in part at least, due to their very magnitude, and they are receiving some badly needed attention on both the local and national level. Smaller cities (100,000 or less) are also having serious mass transit difficulties, however, and there is not the same degree of concern shown about them. This proposes the "Full-system Concept" for a small city and outlines a method which could be followed in meeting public transportation needs, and help guarantee the best possible transit management, as well as full value for the money spent.

By GEORGE M. SMERK

In the past decade there has been considerable concern shown in improving mass transportation as one means of providing relief from clogged streets and increasing the mobility of urban residents. Much of this interest has been generated by the aid programs introduced by the federal government in 1961. Any efforts made in this direction are commendable after years of neglect by all levels of government. Nevertheless, little attention has been paid to the problems of mass transit in small cities—those of 100,000 population or less.

The crying need for mass transportation in large cities is so obvious that there can be no doubt that it is vital to the public interest and necessary to the functioning of the urban area. As a result, however morbid some big-city systems may be, whatever the degree of decay found in equipment and operating practices, it is obvious that the systems will somehow continue to run—even if it means ownership and operation by the city government or some other public agency. Indeed, in recent years—thanks in a large part to the federal programs and some state aid, coupled with expenditure of local funds—there have even been small but often significant improvements in mass transportation in larger cities.

On the other hand, in many cities below 100,000 in population, mass transportation is fast withering away.[1] Perhaps somewhat surprisingly, there has been remarkably little concern shown. In large part, this is because the need for transit and the problems faced when it is lacking are not as obvious and clear-cut in a small city as in a large one. Local political and community leaders usually do not have the staff resources or expertise available to help them worry about mass transport problems in addition to all the other affairs they must deal with. At the same time, there has rarely been a strong, unified, public outcry for continuation, resuscitation, or improvement of public transport in small cities. The groups which stand most to benefit—the poor, the aged, the infirm, and the young—in other words, those who most often do

[1] See, for example, Urban Mass Transportation—1962, Hearings before a Subcommittee of the Committee on Banking and Currency, United States Senate, 87th Congress, 2d Session, April 24-27, 1962 (Washington, D. C., U. S. Government Printing Office, 1962), pp. 380-390.

not have easy access to and use of an automobile—have little to bind them together into a unified, socioeconomic, or sociopolitical group.

Similarities and Differences in Small- and Large-city Transit Enterprise

ALL mass transportation enterprises, regardless of the scale involved or the size of a city in which it is located, face certain similar problems. One of the most serious of these is the competition of the automobile, which has attracted much of the total traffic and has siphoned away off-peak traffic in particular. Paradoxically, mass transit still enjoys relatively heavy peak-hour traffic. Unfortunately, resources used only in the few peak hours are a burden that must be supported throughout the off-peak times. Revenue from the peaks—heavy though it may be—is liable to be severely strained in order to support both peak and off-peak costs. The peaked demand pattern is a prime cause of the shaky financial condition of the transit industry.

The relative indifference of local government to the problems of the transit industry is another difficulty common to transit firms of all sizes. Transit operations are often carried on today under burdensome procedures and regulations designed to help thwart the transit monopoly of sixty years ago. There may be, for example, substantial difficulties faced in gaining approval of route modifications to meet changing needs. Indifference can also be found in other forms; even so simple a thing as failure of police to enforce "no parking" ordinances at bus stops can greatly hinder efficient operations.

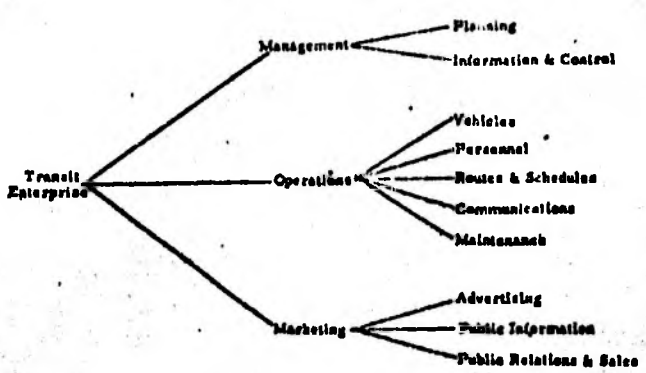
Another common problem area is transit management itself. In most cases it can best be classified as operations-oriented, management-by-reaction. Even a small transit enterprise in a small city can involve considerable complexity in operations, particularly in the scheduling of manpower and the use and maintenance of equipment. Management, usually risen from the ranks, has therefore tended to concentrate its attention on production of the service rather than marketing of the product. As a result, revenue and profit difficulties are generally not viewed as a marketing problem. The reactions to falling revenues are usually service cuts and fare increases which lead almost inevitably to a further decline in patronage.

OBVIOUSLY, there is little the transit industry or the individual firm can do about the automobile and the changes it has wrought in the patterns of demand. Furthermore, changes in the attitude of all levels of government are at present in a state of evolution but there will probably be a slow but steady increase in co-operation and aid. Therefore, in reviewing alternatives, the most feasible area for the fairly rapid relief of problems is in transit management itself.

In the large city, the major constraints imposed by the environment are the scale of the enterprise—assuming realistically that there is but one major operator—and the relatively high degree of dependence of the public upon mass transportation. The larger the scale of operation, the greater the degree of complexity and the greater the need and opportunity for managerial specialization. Large-scale enterprises need, and can justify, the purchase and use of experience, consultants, and data processing devices. Moreover, large-scale enterprise is most likely to lead to generally impersonal relations between transit management and rank-and-file personnel, and between the transit firm and the general public. Furthermore, with increasing

FIGURE I

RELATIONSHIP OF THE ELEMENTS OF THE FULL-SYSTEM MASS TRANSIT CONCEPT



public dependence upon mass transport, the greater is the need to gear plant, personnel, and equipment to match peak demands.[2] As a result, except for the peak twenty hours a week, most large-city transit firms are burdened with considerable overcapacity.

On the other hand, in small-scale, small-city operations, platoons of managerial specialists are neither possible nor necessary. Capital intensive use of exotic hardware is likewise unjustifiable. However, a close relationship is possible between supervisory and managerial personnel and the operating employees; the small-city enterprise may also have a more personal relationship with the people it serves and with city government, if care is taken to cultivate both relationships. Moreover, a lesser relative degree of public dependence upon the transit system, and the high probability of more moderate demand peaks, means that the degree of overcapacity required in a large-city system is not needed in the small city.

Small-city Mass Transit: The Dangers of the Conventional Wisdom

Unfortunately, in years past as well as today, most research and writing in transit has been aimed at big-city problems and big-city situations. Much of this transit thinking is misplaced in the case of small cities; much of it is out of date—the product of the first quarter of this century. As a result, operational concepts and management attitudes in the transit industry as a whole are geared to the conventional wisdom most appropriate to big cities in the age of the streetcar.

One of the most obvious practices of conventional thinking is the "Main Street" operating pattern. Because of the expense of construction of street railway lines, it was unwise, unless population was extraordinarily dense, to place rail facilities too close together. Using the rough rule of thumb that the reasonable service area on either side of a streetcar line was approximately a quarter of a mile, the routes were laid out in a coarse-grained pattern, approximately one-half mile apart. As a result, the streetcars usually did not penetrate the actual residential areas very deeply.

Another reason for lack of fine-grained coverage was the fact that the streetcar, particularly before the introduction of the PCC car in the mid-1930's, was relatively obnoxious. Because of noise serious objections would have been raised had more intense penetration been attempted. The "streetcar street" was not itself a choice residential location.

Today, even though the bus has generally replaced the streetcar, the buses often tend to follow the old routes with an almost religious devotion, despite rapidly changing population, employment, and shopping patterns. Where new bus lines have been established, they still tend to follow the main streets almost exclusively.[3] The difficulty is very simply this: If mass transportation is to serve the public adequately, if it is to be an effective competitor to the automobile, the public must have easy access to service that can be provided by fine-grained routing.

The typical size of the vehicles used in mass transport service is another heritage of streetcar days. In days prior to automotive competition, streetcars were justifiably large because demand was usually relatively high and fairly steady throughout the day, and the capacity and large size of the vehicle could be easily justified. Subsequently, large streetcars were replaced with large buses.

Today this practice is usually justified on the grounds that it is cheaper to pay one man to drive one large bus than to pay two men to drive two smaller vehicles, and, of course, the capacity of the vehicle *is* warranted during the hours of peak demand. There may be wisdom in this thinking in big-city systems. Because of competition in the labor market with manufacturing industry, which finds it easier to use capital to boost worker productivity, bus drivers must be paid wages competitive with those of industrial workers. A larger vehicle under one man's control is one way in which productivity can be increased, at least when there is traffic available to be moved.

In small-city operations, the relatively large size of even the smallest standard transit vehicle—a 35-passenger model—is a major cross to bear. Patronage may rarely fill them up, even during rush hours. The relatively high cost of such vehicles when new—approximately $15,000 for a 35-passenger bus in operating condition—and the

[2] One sign of gearing up for the peak can be found in the increased buying large, relatively high-capacity buses over the past twenty years. The great majority of vehicles purchased recently seat from forty-five to fifty-three persons. The "standard" bus seats thirty-five. Most of the capacity of these is greatly underutilized except during peak hours.

[3] Poor planning of new subdivisions and so-called "communities" makes it virtually impossible, in many cases, to serve them effectively and efficiently with mass transportation. City fathers, developers, and planners, insensitive to transport requirements, must share the considerable blame involved.

burdens of depreciation and operating costs make them most inappropriate equipment to use in low total and low peak demand situations. Again, the cumbersome size of the bus and the noise associated with them may make them rather unwelcome in residential neighborhoods.

In a production-oriented industry, the conventional wisdom calls for shaving cost whenever and wherever possible. In the small city this leads to combining routes, often ballooning them into large one-way loops or zigzagging back and forth to permit one line to cover the territory once served by two or more. In either case, such routing leads to excessive circuity and inconvenience for many patrons or potential users. The drive to cut costs also leads to extending the headway of a route to perhaps sixty to ninety minutes in order to permit as few vehicles as possible to cover maximum route mileage.

Furthermore, the cost-cutting syndrome usually means that many practices considered highly important in most businesses are dismissed as mere frills. Public information material, such as maps and schedules, if available at all, are usually unattractive and difficult to read. Advertising of the service is usually nonexistent. Any sort of fact gathering that threatens to be costly, regardless of its value to management, is often dropped. Lack of marketing orientation at its worst may have prevented the transit enterprise from understanding and expanding its operations to meet new potential demands in developing suburban areas.

In short, because the conventional wisdom is the child of production-oriented, big-city transit thinking, small-city transit operations may typically consist of a few routes, operated on infrequent headways by excessively large equipment on a broad-grained pattern that neither reaches nor conveniently serves the bulk of the population—which in any case is poorly informed about what service *is* available. Small wonder small-city mass transportation is in trouble.

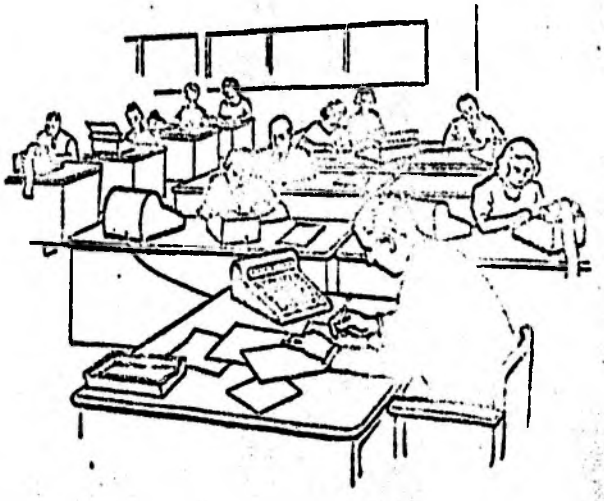
Management is the key to the survival and improvement of small-city mass transit, regardless of whether the enterprise is publicly or privately owned, subsidized to provide service, or expected to produce a return on investment. But the industry suffers from a lack of professional managers and it will be many years before federal programs to educate persons for transit management have produced a reasonable supply of trained transit managers. Probably most of these will be attracted to bigger cities. What is needed, therefore, is a concept—a star to steer by—that can help guide the small-scale transit enterprise. Just such a method of guidance is the Full-system Mass Transit Concept.

Full-system Mass Transit: The Unconventional Wisdom

In a small city in which the Full-system Concept is in operation, the visitor would have some sights to catch his eye unlike most cities of similar size. At the center of town he would discover an attractive transfer house. From time to time, in a regular pattern throughout the day, a flock of small, cheerfully painted buses would descend upon this facility and there would be the hustle and bustle of people boarding, alighting, and departing.

Wherever the visitor might take himself in the city, he would soon be bound to find one of the ubiquitous buses moving along its route. They would bear the tell-tale antennae indicating that they were radio-equipped; on the roof would be the unmistakable sign of an air-conditioning unit. Occasionally he would come across shelter houses and small, modern terminal houses at outlying shopping and work centers. At certain key places would be posted large information tablets containing maps and schedule information.

Behind the scenes would be the careful maintenance program that ensured the availability of the surprisingly small number of vehicles that performed the service, and the system of data gathering that gave the tiny management team the information needed for effective control of the operations of the system. Less modest, perhaps, would be the marketing effort, visible in the form of arresting advertisements regularly placed in the local papers, and audible



through the local radio station. Perhaps the most notable feature of all would be the fact that townspeople from all walks of life would swear by—not at—their public transit system. Moreover, because it was a useful, integral part of their community, they would use it in large numbers.

Such a picture is not pie-in-the-sky; it requires only some important changes in approach.

The Philosophy of Full-system Mass Transit

THE essence of the concept is the idea of system. Webster defines a system as "a regularly interacting or interdependent group of items forming a unified whole."[4] Despite the formidable prose of the definition, the notion is simple and straightforward. Moreover, it is obvious that urban transit abounds in system relationships. A city itself is a system, and transit is part of the circulatory subsystem that helps bind it together.

Within the transit enterprise itself, the systematic approach is crucial. For example, the kind of vehicle used can determine what sort of persons may drive them, where they may be driven, and the cost of the service that is supplied. Schedules and routes must be geared to public need and the operating capabilities of equipment; maintenance and communications are needed to insure reliable, on-time service. The neglect of system relationships obviously makes it difficult or impossible to achieve desired goals effectively and efficiently.

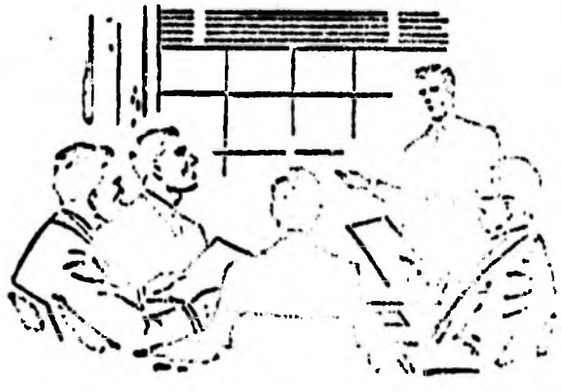
Moreover, the concept as set out here is very simple. In keeping with the scale of the enterprise. A vast and complex business or enterprise must obviously engage in systems approaches on a par with the magnitude of the effort. Batteries of engineers, scientists, and managers are needed to fit a rocket into space. Even though the basic concept remains the same, the scale of small-city transit operation makes large numbers of technicians and expensive computing hardware unnecessary; success lies more with the attitude of management.

The major guideline of the Full-system Concept is that of optimizing the results of the operations of the entire enterprise in moving toward goals. This may very well mean suboptimization—that is, increasing the cost—of some pieces of the system in order to achieve maximum total service quality—and revenues for private enterprise systems—at a reasonable cost. In other words, it means avoiding attempts to cut costs or improve performance in any one activity without regard to the impact of such cost cutting on all other activities and on the overall profitability and/or effectiveness of the enterprise. An analogy can be found in the physical distribution management concept currently attracting considerable attention in the business world. The old-fashioned traffic manager, viewing only the transportation element of a system, would buy the least costly freight service that met the firm's transportation needs, regardless of its effect on inventories, warehousing costs, packaging costs, etc.

The physical distribution manager, on the other hand, may ship by relatively expensive air freight in order to reduce packaging, warehousing, and inventory cost, if by so doing he reduces the total costs of distribution of product. By viewing all elements of the distribution system, the physical distribution manager can do a more efficient job than can the traffic manager.

SEVERAL important guidelines must be observed in carrying through the Full-system Concept. First of all, the service offered by the transit firm must be of sufficiently high quality to offer a reasonable transportation alternative to all residents. Mass transportation must overcome its reputation of abominable service performed in Coolidge-era trappings. The quality factors at issue are convenience, as reflected by fine-grained coverage of the city, schedules rigorously maintained, vehicles that are comfortable, and personnel that are courteous and well-trained. It is not enough to produce a service of such low quality that only those persons with no transport alternative whatsoever would possibly consider using it.

The second guideline is the reduction of costs to a minimum, given the quality standards that are to be maintained. The principal means of achieving minimum cost performance is to tailor plant and equipment to meet the needs of the service, and to



[4] Webster's Seventh New Collegiate Dictionary, Springfield, Massachusetts, G. and C. Merriam Company, 1965, p. 895.

George M. Smerk is professor of transportation at Indiana University, as well as the director of the Institute for Urban Transportation. He received a BA ('55) degree in business administration and his MBA ('57) at Bradley University. He earned his DBA at Indiana ('63) and then served as assistant professor of transportation at Maryland University until 1966. Mr. Smerk is the author of *"Urban Transportation: the Federal Role"* (1965) and *"Readings in Urban Transportation"* (1968), both published by Indiana University Press.

make intensive use of these assets. A systematically conceived and operated transit enterprise should be able to avoid much idle capital. The nature of small-city demand should afford this opportunity.

The final guideline is that of the long-range approach to the eventual achievement of specific goals. Regardless of whether the objective of the enterprise is a given level of profitability, minimization of loss, or a certain level of ridership, many years of careful cultivation of the market may be necessary to achieve objectives.[5] Plans should be carefully laid, so that with proper attention paid to establishment of interim targets of revenues and costs, and an effective system of controls, the desired results will be achieved. Full-system mass transit should be considered in the same light as any new product offered to the public; essentially, the success of the concept involves a critical change in the habits of consumers of transport and such changes do not come quickly.

A FURTHER word about goals is necessary. A privately owned transit enterprise is expected to turn a reasonable profit. Publicly owned transit enterprise may be expected to do no more than break even; often the goal is to produce some level of service at minimum cost, and it is assumed that the service will be perpetually subsidized. Decisions on pricing reflect the goal. Regardless of ownership, the profit goal is a powerful stimulus to efficient operations that meet public needs. Transit, however, in its preoccupation with operations and neglect of marketing, has generally fallen woefully short of doing a businesslike job of producing either profits or good transit service. Because of the discipline afforded by profit goals—and the requirement that shrewd management be concerned with both production and marketing—it seems wise that even a publicly owned enterprise should attempt to meet its service goals and eventually produce a surplus, over and above covering all its costs, depreciation, and necessary provisions for expansion.

[5] A good example is RCA's introduction of color TV. Even after a method of successfully transmitting and receiving color television was developed, years of effort were required to build the market. This included a substantial offering of color shows on NBC-TV to make the purchase of a color set worth-while to the consumer, who probably already owned a good black and white set. Few new products are financial successes from the beginning; it is extremley shortsighted to expect them to be.

The Subfunctions and Form of Full-system Mass Transit

IN the Full-system Concept, the transit enterprise is viewed as an interrelated group of activities or subfunctions—such as maintenance, or routing and scheduling—all bearing on the main function of transit service. For purpose of discussion, the subfunctions may be most conveniently bundled together in major categories of management, operations, and marketing. Figure I (page 27) shows the relationship.

Management

THE major function of management is to control the successful operation of the enterprise by careful integration of the interrelated parts. In essence, managerial activities consist of manipulating the various subfunctions of operations and marketing—including pricing—to reach the targets established for service, revenue, cost, and profit (or surplus). This approach is, therefore, in direct opposition to the "management by reaction" as practiced in mass transit today.

In order to play its role successfully, the management function must involve itself with the interrelated subfunctions of planning, and information and control systems. The breakdown of effort

into these areas does not, of course, mean that a large staff is necessary, only that the tasks of management are clearly categorized.

Planning. The subfunction of planning must have as its objective the establishment of specific goals within the structure of the enterprise, including both long- and short-range targets. A major job handled within this subfunction would be the analysis of proposed alterations and changes in service or marketing effort. For example, in consideration of the expansion of service through the operation of a new line, the planning area would determine the probable cost, the potential market, the marketing and other effort needed to implement the change, the patronage, and revenue targets to be reached over time and the effect of the change on the enterprise as a whole.

Information and control systems. Much of the work of the planning subfunction would depend upon the information and control systems subfunction. This area would have as its job the establishment and maintenance of an accounting and cost control system providing information useful and necessary in the management of the enterprise.

Cost control systems must be devised that provide required detail at reasonable cost. Management should know, for example, not only the cost, revenue, and patronage of each route, but also, if possible, have such information available for each trip. Even the boarding and alighting locations of patrons on each trip would be useful in noting the patterns of transit usage, along with information on actual origins and destinations of patrons.

Operation

THE operations function involves all those areas related to the actual production of the transit service. These include vehicles, personnel, routes and schedules, communications, and maintenance.

Vehicles. The vehicle subfunction is a critical one in mass transit, and—as has been pointed out in earlier pages—one of the major problems in the small-city environment. The size and capacity of the vehicles used, their initial cost and cost of operation and maintenance, their ability to penetrate residential areas without offense, their dependability, attractiveness, and comfort, are all factors closely related to the success of the whole venture and affect the other subfunctions intimately.

A major guideline in regard to vehicles and their selection is that the equipment used must meet both the conditions of demand and the operating conditions of the given environment. As an example, where demand is relatively light and streets narrow, with sharp corners to turn, a small bus—probably smaller than today's most modest-sized standard vehicle—would be best. On the other hand, where demand is quite heavy, a large bus is needed. If operating conditions are such that a standard transit bus is too long to navigate tight corners, then short-length, high-capacity, double-deck buses are just the ticket. The advantages of utilizing one standard type of equipment have to be weighed against possessing a variety of equipment that permits substantial flexibility in operations and higher quality service in terms of penetration and sprightly running.[6]

As pointed out earlier, a major guideline of the Full-system Concept visualizes a fine-grained operation that makes maximum use of assets. This is translatable into a fairly large number of routes, closely spaced, with fair frequency of schedules. In a small city, as defined in this article, demand is not likely to be excessively high, even at the peak, and closely spaced routes should tend to distribute the traffic rather evenly among the routes.

Regardless of seating capacity (10 to 20 presumably), the buses should be air-conditioned, have a pleasant, easy-to-clean interior, comfortable seats and springing, and be dependable. These features, plus an attractive exterior paint scheme, should make for a most beguiling bus, with a $5,000 to $12,000 price range.

Despite the aim of relatively modest cost, the vehicles should be written off as soon as possible so that they can be replaced frequently. No piece of rolling stock should be kept for more than ten years, and retention for no more than five years would be better.

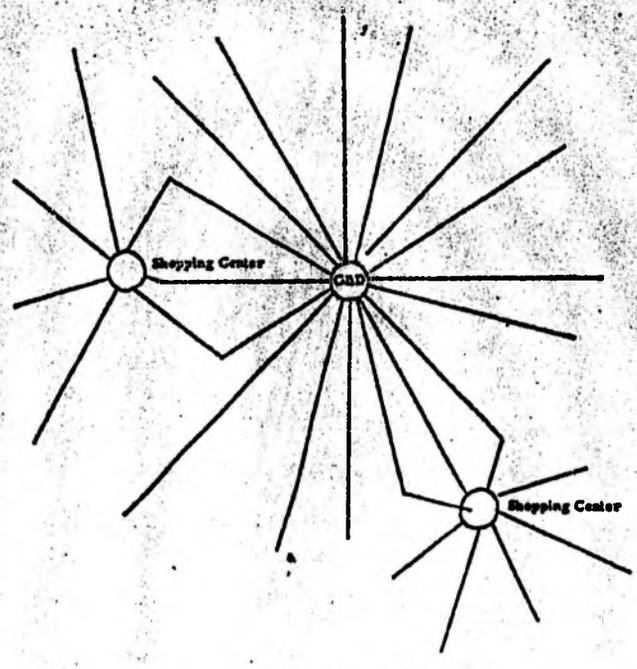
Small buses will be able to run on any residential street without needless noise and disturbance to residents; the goal of a service that successfully penetrates residential neighborhoods without offense can be realized. Wear and tear on the streets should be not much greater than that imposed by automobiles.

Moreover, the superior maneuverability of a small vehicle will enable it to maneuver its way through streams of vehicles quite easily, rather than

[6] The small bus is obviously no cure-all to small-city transit problems and the comments on such equipment are not intended to give that impression. For some highly informative comments on this point, see *"Mass Transportation in a Small City,"* The New Castle Area Transit Authority, New Castle, Pennsylvania, fall, 1968, especially pp. 9 and 29.

FIGURE II

DIAGRAMMATIC VIEW OF FULL-SYSTEM MASS TRANSIT CONCEPT ROUTING



wallowing in traffic as its big brothers are forced to do.[7]

PERSONNEL. The driver is clearly a key factor in the successful operation of mass transit service. His selection and training are not matters to be taken lightly. He is the one who meets the public and his courtesy and skill in dealing with people clearly do much to make the difference between success and failure in the undertaking.[8] Since a basic part of the Full-system Concept for small cities depends upon the use of small vehicles, the association between driver and passengers is likely to be physically close. This offers an unusual opportunity to create a close and friendly relationship between the transit enterprise and the public it serves through the medium of the driver.

All of this means that the driver must be a paragon of all those virtues which bus drivers are supposed to possess in terms of driving ability, politeness, neatness, etc. But not just anyone who can drive well—an erstwhile truck driver, for instance, will do. The driver's potential as a friendly representative of the transit enterprise is a key factor in making a ride on the bus a pleasure for patrons. He must be carefully selected and trained for the job.

Beyond a driver's role in meeting the public, skillfulness in actually handling a vehicle can result in substantial economies in operation. Carefully kept records of operating and maintenance cost, assigned to each driver as well as to each vehicle, will permit management to pinpoint inefficient drivers and take the retraining steps needed to weed out "expensive" driving habits. Moreover, as the vehicles to be used will generally be small, it will be possible to utilize women drivers, since the muscle needed to handle a large standard transit bus will be unnecessary.

ROUTES AND SCHEDULES. The routes and schedules subfunction involves the laying out of routes and the scheduling of revenue service. The routing objective of a fine-grained service can be met by planning routes that are relatively close together so that patrons will have no more than two or three blocks to walk in order to reach public transportation. To afford maximum coverage and utility, careful consideration must be given to providing service to all places of employment, shopping, personal service, recreation, schooling, and medical care, as well as residential areas. All are sources

[7] Unfortunately, as many readers are probably thinking, such an ideal vehicle does not exist. The MiniBus and Flxette, to name several small buses currently available on the market, are a bit larger and more expensive than desirable. A small bus slightly larger than the Ford Econoline, or Volkswagen Microbus, would be about right. There is an obvious vehicular need here that remains to be met in a really satisfactory manner.

[8] For some interesting information on the importance of the driver to the public, see "*A Consumer Report*," New York: The Transit Advertising Association, Inc., undated, p. 5.

of potential patronage and, within reason, none should be left untapped or unserved.

It is obviously impossible to claim that a city has real full-system mass transportation service without covering the whole of the city with mass transit in the fine-grained pattern. It is equally impossible to plan a route that connects every possible origin and destination point that its patrons may desire. The routes must, therefore, converge on one or more major transfer points to permit easy interchange. By bringing all routes to focus, patrons are given considerable flexibility and access to the whole of the city is given to the transit patron.

The central business district is the most likely site of the principal transfer house. This should also be the location of the central operating control point. Routes should radiate from the transfer house, the actual pattern determined by the street layout and the distribution of population and economic activity. Some will converge on other major foci in the urban areas, such as principal suburban shopping centers or factories. From these subcenters additional routes may radiate into suburban communities. Figure II (page 33) gives an idealized, diagrammatic view of Full-system Concept routing.

To ease transfer, the major exchange facilities should be, in effect, small terminals. Patrons must not be forced to dash madly—and at considerable personal risk and inconvenience—from corner to corner. All buses must pull up next to one another at the transfer house, and shelter from the elements should be provided to make transferring as pleasant as possible. The close proximity of the buses to one another will add to the painlessness of the process.

The matter of schedules is often a vexing one. This is especially true in the small city where demand will never be adequate to make it economically feasible to offer service on such frequent headways that the given time certain points are served is of small consequence. Schedules should also be easy for the public (and supervisory and operating personnel, as well) to remember. In small cities in the lower end of the size range, service more frequent than every thirty minutes can probably not be justified. Each route should therefore be tailored so that it can be served, out and back to the central transfer house, in a period of slightly less than thirty minutes. To ease transfer and schedule memorization, all buses should be scheduled to leave the transfer house at the same time (on the hour or half-hour).

In operation, therefore, the Full-system Concept transit enterprise will present a picture of regular ebb and flow. Remembering such a schedule will place little strain on the public and eliminate the confusion and frustration of spasmodic or seemingly capricious scheduling. If demand on a route presses too heavily upon the capacity of given vehicles at certain peak times, it would probably be best to run two smaller buses in tandem—or substitute larger vehicles customarily used in charter or other special services—rather than violate the schedule pattern.

The period of service throughout the day will, of course, depend upon the span of travel demand. Because the great majority of trips will be connected with work, school, and shopping, it is obviously unnecessary to operate beyond those periods. Initially, the period of operation should be from about 6:00 A.M. to 7:00 P.M. Since the whole approach to the Full-system Concept must be positive—that is, a constantly growing and improving service rather than one of constant cutbacks—it would be best to start off on the conservative side and add to the service period as the need proves itself.

The first task of management under the Full-system Concept is to provide a reliable, regularly scheduled and routed service. Once this is established, careful investigation of the market should provide insight into the operation of charter and special services.

An aggressively marketed charter service can be profitable to the transit enterprise and a boon to the community. Special subscription or dial-a-bus plans, providing door-to-door service under special fare and contractual agreements, and special school bus services, should also be well-researched

and evaluated and phased in as the need for them becomes clear.

COMMUNICATIONS. Perhaps more important than the frequency of service is the assurance on the part of the public that the service operates on time.

Close supervision of the system is, therefore, necessary to assure punctuality and precision of operation. Supervision is, to a large extent, a question of communication. This may be done by a variety of methods, ranging from the stationing of supervisors at fixed locations to note the time of passage, all the way up to sophisticated electronic monitoring systems.

Probably two-way radio communication between the vehicles and the central control point would be the most effective and economical means available today for small transit enterprises. Since each route will typically be served by only one bus, a serious delay can throw route schedules off for a considerable amount of time. With radio, drivers could relay information concerning delays (flat tire, mechanical trouble, traffic jams) to the control center, and relief vehicles could be put into service to maintain the schedule and to rescue passengers on the delayed bus.

Communication is of vital importance to the reliable operation of the system. It is, therefore, wise to spend a considerable sum on a high-quality communications system to assure the quality of operations. Neglecting this element, to the detriment of service quality, would be a case of the falsest sort of economy.

Maintenance. The maintenance subfunction is crucial in insuring that all vehicles are in the best possible condition as far as safety and mechanical performance are concerned. It also allows as close to 100 per cent availability of equipment as is feasible. This is the best way to avoid delays in service and permit a bare minimum of equipment to provide regularly scheduled operations.

The high standards of mechanical reliability necessary can best be met with a preventive maintenance program, rather than provocative maintenance as usually practiced by small-scale transit enterprise. As noted previously, complete records should be kept for each vehicle and for each driver. The cost of maintenance and checkups before any trouble occurs is offset by availability and reliability of equipment in service and lowering of the cost of lost patronage as a result of failure to maintain schedules. *Not* having to have additional vehicles, because much uncertainty is avoided, is another major benefit.

Marketing

THE principal objectives of the marketing function are to help provide management with necessary information concerning the market it serves, to remind the public constantly of the services offered and its advantages, and to provide information to the public concerning routes and schedules.

Advertising. The major job of the advertising subfunction is to use advertising media to keep the public reminded and informed. Through advertising the image of the transit operation as a vital and highly useful part of small-city activity will be created over time; by living up to the service claims, the image will be verified. Of course, to be effective, the advertising must be aimed at specific market segments. This may be achieved by means of careful advertising in newspapers and on radio, and perhaps through home delivered circulars and handbills. Cost savings and freedom from parking problems will probably be major themes.

In a society constantly bombarded with advertising, and surfeited with a benumbing variety of goods and services, an enterprise must advertise simply to remain in the public ken. Since the Full-system Concept aims at changing travel habits over a relatively long time period, a constant program of advertising must be maintained. This does not mean that advertising must be lavish in order to do the job. Rather, it means that it must be carefully prepared through the services of a reliable and perceptive advertising agency, and by regularly budgeting sufficient money to do an effective job.

Public Information. The subfunction of public information is closely allied to advertising. Its objective is to make sure the public knows what service is available. Attractive and easy-to-read schedules and maps are an obvious part of this program. The cost of such media is partially offset by the patronage of customers who use the service simply because they know and understand what is available. Undoubtedly, many potential patrons are lost to public transportation because information concerning service is inadequate, nonexistent, or requires a PhD in code breaking to fathom its meaning.

In addition to maps and schedules, information tablets mounted on poles or other suitable places (such as inside public buildings and apartment houses) should also contain routes and schedule information. A telephone information service must also be available. Indeed, by a tie-in with communications, a potential patron could be informed of the precise location of buses in his vicinity and be able to determine his chances of catching a given trip.

Public Relations and Sales. The public—or community—relations subfunction must provide a two-way street of information for management and for the public. More particularly, it would be the task of public relations to be in constant contact with social, fraternal, and other groups, not only to give presentations and talks on the services available, but to gather the reactions and ideas of the public concerning its needs and desires. Such information would then be relayed to management to aid in planning and decision making.

Another vital facet of public relations would be in selling various groups on utilizing charter and special services offered by the transit enterprise. This is a potentially lucrative part of the transit business and aggressive salesmanship and good service can add greatly to revenues.

A most vital role will be played by public relations in the period leading up to the inauguration of service on the Full-system Concept. In addition to meetings of various sorts to inform clubs, government bodies, and other organizations of the planned service, the flow of information to the press must be carefully handled. The six months leading up to actual commencement of operations should be a crescendo of information to whet the public appetite.

Conclusion

The Full-system Mass Transit Concept for a small city is only an idea. What has been presented is an outline of a procedure or method that could be followed.

The concept is not new or revolutionary; it is merely an attempt to bring to bear certain aspects of modern business techniques in the field of transit and on the stage of the small city.

The reaction to this idea, particularly among transit managers who have regularly faced the gruelling task of operating a mass transportation system in a small city, is not likely to be favorable at first. It flies in the face of the penny-pinching reality of the world in which they have to operate, and which, in many ways, is beyond their control. Nevertheless, the conventional wisdom of the transit industry has produced little more than deficits and declining service quality. The application of the Full-system Concept can surely do no worse.

The enterprise, regardless of whether it is privately or publicly owned, will not find it cheap in the short run to adopt the Full-system Concept. Several years of subsidy—from public or private sources—will be necessary even for systems with profit goals. However, the approach suggested seems to be a practical way of achieving either self-supporting mass transport, or a service form and managerial attitude that really meets public needs and perhaps offers substantive relief to urban congestion and isolation. Indeed, if wages continue to rise and objectives and policies demand increased service at low fares, the labor-intensive nature of any bus-oriented transit system seems to make subsidy mandatory. The Full-system Concept would at least guarantee the best possible management and full value for the money spent.

The obvious need is for the concept to be operationally tested. Prior to that, careful research work must be done on the most effective utilization of modern business techniques to the subfunctional areas set out above. Vital questions of detail as to organization, personnel selection, preventive maintenance programs, equipment selection, information systems, etc., must be answered. A host of hypotheses must be generated and a veritable draft "handbook" of full-system procedures established. The hypotheses should then be tested in the crucible of a small-city mass transit laboratory. Whatever the results, they are likely to be of substantial value to transit operations in small cities throughout the United States.

File
HB 335

February 28, 1972

Mr. Paul A. Carr, Secretary
Public Transportation Committee
Greater Anchorage Area Borough
Pouch 6-650
Anchorage, Alaska 99502

Dear Mr. Carr:

I appreciate very much your letter of February 24 relative to the Greater Anchorage Borough Planning and Zoning Commission's statement of position on public transportation. As you may be aware, the Judiciary Committee is presently considering HB 335 relative to mass transit. I am, therefore, sending a copy of your letter and position paper to the Chairman of this committee, Mr. William Moran.

Again, thank you for writing.

Sincerely,

Mike Miller, Chairman
House Local Government Committee

P.S. After dictation of this letter, HB 335 was passed out of Judiciary Committee and is now in Rules awaiting placement on the House calendar.

PLANNING DEPARTMENT

Local Affairs Committee
Alaska State House of Representatives
Pouch "V" State Capitol Building
Juneau, Alaska 99801

Gentlemen:

The enclosed "Statement of Position" paper was printed at the Transportation Hearing held in Anchorage February 5th.

This paper presents the position of the Greater Anchorage Area Borough Planning and Zoning Commission's citizen subcommittee on Public Transportation.

They hope this will assist you in understanding some of their thinking on public transportation in Anchorage. Should you need additional information or have any questions, please do not hesitate to let me know.

Sincerely,

Paul A. Carr

Paul A. Carr, Secretary
Public Transportation Committee

CLEAN AIR * CLEAN WATER * A CLEAN COMMUNITY

GREATER ANCHORAGE AREA BOROUGH
PLANNING AND ZONING COMMISSION

SUBCOMMITTEE ON PUBLIC TRANSPORTATION

STATEMENT OF POSITION

INTRODUCTION

As you are all aware, mass public transportation in the Anchorage area does not now exist. I will not go into the details of Anchorage's past transit systems or their failures. However, I feel it is significant that there are several buses now operating for the exclusive use of Federal - State programs; while we do not detract from this use we feel it further strengthens the need for a public transportation system that will utilize efficiently all those resources now available and being used for semi-public transportation in Anchorage. The simple fact is that the Anchorage area has no - or at best a limited public transportation choice.

Many groups have recognized the existence of the need for public transportation. At the urging of these various groups and individuals, the Greater Anchorage Area Borough created a subcommittee of the Planning and Zoning Commission to study public transportation. The Borough Planning Department then obtained a planning grant for $20,000 from the Urban Mass Transportation Administration. This planning grant funded a feasibility study for public transportation in the Anchorage area.

This study by John Bivens and Associates is now nearing completion. The Greater Anchorage Area Borough Public Transportation Subcommittee, which I am representing today, is making plans for a public meeting, at which we will solicit public reaction to that feasibility study as well as input on what the citizens of Anchorage feel they need and will use in the way of public transportation.

POSITION

The subcommittee's position on public transportation, which we feel is related to the purpose of this meeting, consists of several basic points. These are:

1. THAT ANCHORAGE URGENTLY NEEDS A PUBLIC TRANSPORTATION SYSTEM.

As the population increases and more motor vehicles are used, vehicle congestion and parking space will become an increasingly prominent problem unless the planning of existing street, highways, and rights-of-way extensions keeps pace. But increasing rights-of-way, extending highways, widening streets, and constructing freeways removes more and more areas from the useable tax base of the community and thereby places a greater tax burden on the areas remaining. In addition, by coordinating and developing an area to please the private automobile operator, many enjoyable features of urban living are sacrificed.

Only the creation of a public transit system complementary to the use of the private automobile will prevent the continuation of the course upon which Anchorage appears headed. As we believe private capital cannot provide public transportation and make a profit, it is, we feel, a public responsibility which all residents share.

2. THAT A PUBLIC TRANSIT SYSTEM THROUGH THE USE OF VARIOUS SIZE VEHICLES OR MODES BE ESTABLISHED TO SERVE THE ENTIRE AREA WITH RELIABLE, CLEAN, COMFORTABLE, TRANSPORTATION; AT A REASONABLE FARE THAT A TRANSIT SYSTEM BEGIN OPERATION IN A COMPLETE FORM RATHER THAN AS A PIECEMEAL EFFORT.

The initial area wide transit system should be a bus system using the best available air and noise pollution controls. However, this must be considered a phase I transit system and phase II public transit for Anchorage be planned and designed to incorporate such features as rail, guideways, moving sidewalks and personal transit vehicles where practical.

SPEED AND SAFETY

In order for a public transportation system to attract riders, it must have speeds that are comparable to those of other modes.

One of the difficulties which is recognized with bus transit systems is that the buses get snarled in the same traffic congestion as the private automobile.

Safe walkways must be provided to permit public access to bus stops and transfer stations.

COMFORT

Passenger comfort must receive attention in the selection of the vehicles as well as during their operations. It is impossible to attract riders to a system if the buses or other vehicles are cold in the winter and hot in the summer.

A transit system, to attract and hold a maximum amount of riders, must provide service that is:

1. Convenient and dependable;
2. Fast and safe;
3. Frequent in service;
4. Reasonable in cost;
5. Pleasing in appearance;
6. Flexible in that it can change with the needs of the community.

3. <u>THAT A PUBLIC TRANSPORTATION SYSTEM BE ESTABLISHED AS A PUBLIC UTILITY OF THE GREATER ANCHORAGE AREA BOROUGH AND THAT IT RECEIVE SUBSIDIZATION THROUGH TAXES, SHARED REVENUES, GRANTS AND OTHER MEANS.</u>

A transit system for Anchorage must be a public system subsidized directly or indirectly by the public. Public transportation in Anchorage is feasible only if the public accepts this responsibility. A transit system must encourage, not discourage, people to ride. In Anchorage the only way this can be accomplished is by the system being subsidized to a degree where the fare, if any, is kept at a minimum. A transit system must not only serve the entire Borough; financial support must come from the entire Borough.

The transit system should be under public ownership and control. Actual management, however, might be provided through contracts to private concerns. The transit system must be an organizational entity separate from the Borough. We believe this should be as a transit utility, not an authority, subject to the budgetary controls of the Borough Assembly, yet with greater autonomy of operation than have the municipal utilities presently serving the City and the Borough.

It will be necessary to have legislation granting authority to the City or Borough to operate public transportation systems, and we support the Guess-Bowman House Bill #335 which would grant this authority and we would ask consideration that this bill permit any transit utility operating solely within a single Borough be exempt from regulations of the Alaska Transportation Commission. We support Bill #334 which would provide state revenue to cities and boroughs providing transit facilities.

4. <u>THAT THE TRANSIT SYSTEM REMAIN FLEXIBLE SO THAT ROUTES AND FARE STRUCTURE IF ANY CAN BE ALTERED EASILY WITH NO DELAY FROM A REGULATORY AUTHORITY.</u>

As mentioned earlier, Anchorage, in the past, has experienced several attempts and failures at public transportation systems. While these systems have failed for various reasons, the major re-occurring reason is that they could not fill their intended function - that of providing a flexible and reliable system that gave adequate service to all potential riders.

Flexibility in the transit system as it is described here encompasses schedules, fares, routes, vehicles and policies.

The need for flexibility of service, scheduling, routes, etc., which we feel is an essential feature of a service-oriented transit utility requires that management be able to respond immediately to the changing conditions. This would be impossible if all changes must be approved by a presently over-burdened Alaska Transportation Commission. Fiscal control and contractual authority might well be delegated to a board by the Assembly for a period of five years, and then review of this authority should be evaluated by the Assembly at the end of that time to determine whether such a board should be continued, altered or be done away with.

To provide this flexibility the operation of the system must be continually monitored. The monitoring envisioned must be capable of signaling when there is a need for a change, it must not be costly, and it must be easy to understand and use.

5. THAT IMMEDIATE STEPS BE TAKEN TO SECURE FEDERAL FINANCING TO ESTABLISH A TRANSIT SYSTEM FOR ANCHORAGE.

Fortunately, the Federal government has at long last offered to assist urban areas in creating public transportation systems. In encourages the development of public transportation systems in all urban areas of the country through the Urban Mass Transportation Act of 1964. This act provides Federal grants to municipalities for the creation of public transportation systems.

Funds can be obtained from the Urban Mass Transit Administration of the Department of Transportation through the Federal Grant Program. These federal grants can be used to obtain buses, commuter rail cars, support equipment, and facilities. Anchorage can qualify for Department of Transportation Grants to fund at least two-thirds of the cost incurred to plan and develop a public transportation system.

6. THAT A PUBLIC TRANSPORTATION SYSTEM, WHERE POSSIBLE, BE DESIGNED TO COMPLEMENT THE EXISTING GREATER ANCHORAGE AREA BOROUGH SCHOOL BUS PROGRAM.

We do not feel that the existing school buses could effectively serve as a public transit conveyance. The reasons for this are numerous. However, we do think that a public transit system properly designed and routed can alleviate some transportation demands now made on the school bus program.

A financial arrangement might be made whereby the School District could provide financial assistance to the public transit system for payment of the pupils who would ride transit buses in lieu of regular school buses.

7. THAT THE CONCEPT OF THE AMATS PROGRAM OF SUPPLYING DATA AND PROVIDING INFORMATION ON THE TRANSPORTATION NEEDS OF ANCHORAGE BE CONTINUED.

While the subcommittee has expressed some opposition to the recently presented AMATS plan we do feel there is a need for continued transportation planning. However, we feel that a complete transportation network which provides for public transit requirements as well as continuing public participation must be a part of that planning.

The AMATS corridor concept has merit if it will be considered as a corridor reserved for unspecified transportation modes and not strictly for the exclusive use of the private automobile.

Realizing that there are others who wish to be heard I have not expanded in great detail on some of the positions with you, and hope to receive many comments at our forthcoming public meeting.

Realizing that there are others who wish to be heard I have not expanded in great detail on some of the positions presented here. However, we would be pleased to discuss these and other positions with you, and hope to receive many comments at our forthcoming public meeting.

Thank you.

Copies of our position will be forwarded to your committee by the Borough Planning Department.

HB-340

15 § 1671 COMMERCE AND TRADE

SUBCHAPTER II.—RESTRICTIONS ON GARNISHMENT

§ 1671. Congressional findings and declaration of purpose

References ...

U.S.C.A.

(a) The Congress finds:

(1) The unrestricted garnishment of compensation due for personal services encourages the making of predatory extensions of credit. Such extensions of credit divert money into excessive credit and thereby hinder the production and flow of goods in interstate commerce.

(2) The application of garnishment as a creditors' remedy is usually responsible for the loss of employment of the debtor, a result disruptive of employment, production, and consumption and constitutes a substantial burden on interstate commerce.

(b) There is no uniformity among the laws of the several States relating to garnishment now in effect. Congress has the authority under the bankruptcy laws and is enhancing the purposes thereof in many areas of the country.

On the basis of the findings in subsection (a) of this section, the Congress determines that the provisions of this subchapter are necessary and proper for the execution of certain powers vested in Congress to regulate commerce and to establish uniform bankruptcy laws.

§ 1674. Restriction on discharge from employment by reason of garnishment

(a) No employer may discharge any employee by reason of the fact that his earnings have been subjected to garnishment for any one indebtedness.

(b) Whoever willfully violates subsection (a) of this section shall be fined not more than $1,000, or imprisoned not more than one year, or both.

Pub.L. 90-321, Title III, § 304, May 29, 1968, 82 Stat. 163.

Effective Date. Section effective July 1, 1970, see section 501(c) of Pub.L. 90-321, set out as a note under section 1671 of this title.

§ 1675. Exemption for State-administered garnishments

The Secretary of Labor may by regulation exempt from the prohibitions of section 1673(a) of this title garnishments issued under the laws of any State if he determines that the laws of that State provide restrictions on garnishment which are substantially similar to those provided in section 1673(a) of this title.

Pub.L. 90-321, Title III, § 305, May 29, 1968, 82 Stat. 164.

Effective Date. Section effective July 1, 1970, see section 501(c) of Pub.L. 90-321, set out as a note under section 1671 of this title.

§ 1676. Enforcement by Secretary of Labor

The Secretary of Labor, acting through the Wage and Hour Division of the Department of Labor, shall enforce the provisions of this subchapter.

Pub.L. 90-321, Title III, § 306, May 29, 1968, 82 Stat. 164.

Effective Date. Section effective July 1, 1970, see section 501(c) of Pub.L. 90-321, set out as a note under section 1671 of this title.

§ 1677. Effect on State laws

This subchapter does not annul, alter, or affect, or exempt any person from complying with, the laws of any State

(1) prohibiting garnishments or providing for more limited garnishments than are allowed under this subchapter, or

(2) prohibiting the discharge of any employee by reason of the fact that his earnings have been subjected to garnishment for more than one indebtedness.

Pub.L. 90-321, Title III, § 307, May 29, 1968, 82 Stat. 164.

Effective Date. Section effective July 1, 1970, set out as a note under section 1671 of this title.

LAW OFFICES OF
ALASKA LEGAL SERVICES CORPORATION
111 FOURTH STREET
JUNEAU, ALASKA 99801

DICKERSON REGAN
SUPERVISING ATTORNEY

March 24, 1971

The Honorable William J. Moran
Chairman, House Judiciary Committee
Alaska State House of Representatives
State Capitol Building
Juneau, Alaska 99801

Re: House Bill 340

Dear Mr. Chairman:

The above Bill is designed to accomplish two goals. First, it would raise some what the present income exemption level. Second, it would in effect put the Alaska and Federal income exemption laws under one roof. I thought perhaps a detailed explanation would be of assistance to you.

The present Alaska income exemption is found in A.S. 09.35.080(1). It provides for an exemption of $350 for the head of the family, and $200 for a single person.

Superimposed on Alaska's statute is the Federal Consumer Credit Protection Act of 1970, commonly known as Truth in Lending, found in 15 U.S.C.A. 1673(a). This provides that the amount subject to garnishment may not exceed

(1) 25 per centum of his disposable earnings for that week,or

(2) the amount by which his disposable earnings for that week exceed thirty times the federal minimum hourly wage prescribed . . ., whichever is less.

Because of the differences, the garnishee is forced to look at both laws to determine the maximum. This can be both confusing and time consuming. This problem is further compounded by the fact that the federal exemption is automatic, while the Alaska exemption must be "reserved" by the judgment debtor after garnishment. The federal statute refers to "earnings", defined as compensation paid or payable for personal services, while the Alaska exempts "income --- earned or inured to his benefit".

The Alaska exemption for a single person has already been superceded by the federal law. The federal minimum wage is $1.60 per hour. That figure times thirty is $48 per week. With 4-1/3 weeks per month, this would mean that $208 is exempt, which exceeds Alaska's $200. For all intents and purposes, the Alaska exemption will always be exceeded by the federal law as far as a single person's earnings are concerned. The only relevance of the Alaska law would be in cases where the income was other than earnings for personal services, such as dividends, interest or the like.

House Bill 340 would increase the floor to $500 per month for the head of the household, and $350 for a person not the head of a household, or 75 per cent, whichever is greater. The 75 per cent calculation is taken from the federal law, thus assuring that Alaska will at all times be in compliance with it. Thus to the extent that the wages of the head of the household subject to garnishment exceed $666 per month, the Alaska floor figure of $500 ceases to be operative and the per cent calculation is used. The same would be true for a single person at $466 per month.

It should be pointed out that due to the superimposition of federal law in Alaska law, neither the head of the household nor the single person earning wages will ever realize the full benefit of the $150 increase, since the net benefit will be less. The two attached examples will show this in detail.

The Bureau of Labor Statistics study of the average cost of living for a four person family in the lower economic level in Anchorage in 1969 disclosed that $763 per month was required for clothing, food, shelter, medicine and recreation. Certainly a single person can live for less, and not every household consists of four persons. However, $350 and $200 is unrealistic in terms of minimum needs vis a vis Alaska's high cost of living. The new suggested floor of $500 and $350 is more realistic, and should present a fair balance between the state's interest in personal well being and the state's interest in insuring that valid claims can be satisfied.

The federal law provides that the state can do more in limiting garnishments than it has done. 15 U.S.C.A 1677. Furthermore, if this Bill does eventually become law, the State can apply for an exemption from the provisions of §1673(a), as authorized by §1675. Even if such an exemption was not specifically granted, the fact that Alaska's law provided at least equivalent protection, and in some instances greater protection would mean that reference would only have to be made to one law, making matters far more simple for all concerned.

I would be pleased to appear before the Committee if it is thought I could provide helpful information.

Respectfully,

Allen T. Compton
Supervising Attorney

ATC:fm

EXAMPLE "A"

$2.10 per hour (Alaska minimum wage) times 40 hours per week time 4 1/3 weeks per month equals $364 per month income from wages.

Current Alaska	- head of household	- $350	- subj. to garn. $ 14.
Current Federal	- 75%	- $273	- subj. to garn. $ 91.
Proposed Alaska	-	- $500	- subj. to garn. $-0-.
Current Alaska	- single person	- $200	- subj. to garn. $164.
Current Federal	- 75%	- $273	- subj. to garn. $ 91.
Proposed Alaska	-	- $350	- subj. to garn. $ 14.

The head of the household, under current laws, would pick the Alaska exemption. The single person would pick the federal exemption. The net gain to the head of the household, under the proposal, would amount to $14. To the single person, it would be $77.

EXAMPLE "B"

Assume the person has $600 per month income from wages.

Current Alaska	- head of household	- $350	- subj. to garn. $250.
Current Federal	- 75%	- $450	- subj. to garn. $150.
Proposed Alaska	-	- $500	- subj. to garn. $100.
Current Alaska	- single person	- $200	- subj. to garn. $400.
Current Federal	- 75%	- $450	- subj. to garn. $150.
Proposed Alaska	- 75%	- $450	- subj. to garn. $150.

The head of the household, under current laws, would pick the federal exemption. The single person would also pick the federal exemption. The net gain to the head of the household, under the proposal, would amount to $50. To the single person, no gain would be realized, since he would choose the per centum calculation to obtain the maximum benefit; Alaska's per centum and the federal per centum being the same, his position would not be bettered by the proposal.

HB-340

AMOUNT OF WAGES EXEMPTED FROM GARNISHMENT, BY STATES

Alabama	75%
Alaska	$350 (earned within 30 days) if married; $200 if single.
Arizona	50% (30 days)
Arkansas	100% (60 days)
California	50% (30 days); 100% where debt not for necessaries and needed to support debtor's family.
Colorado	70% for heads of families; 35% for single persons.
Connecticut	100% from attachment; post-judgment exemption set by court.
Delaware	90% (New Castle County); 60% (Kent and Sussex Counties).
District of Columbia	90% of first $200 per month, 80 % of next $300, 50% of balance.
Florida	100%
Georgia	$3 per day plus 50% of excess.
Hawaii	95% of first $100 per month, 90% of next $100, 80% of balance.
Idaho	50%; 75% where debt not for necessaries and needed to support debtor's family (30 days); maximum, $100 per month.
Illinois	85% or $45 per week, whichever is more; maximum of $200 per week.
Indiana	$15 per week plus 90% of excess.
Iowa	$35 per week for head of family plus $3 for each dependent child under 18.
Kansas	90% (3 months); 100% from garnishment by collection agencies.
Kentucky	90% of first $75 per month; maximum $67.50.
Louisiana	80%; minimum $100 per month.
Maine	$30 (one month); minimum $10.
Maryland	75% in some counties; $100 in others.
Massachusetts	100% prior to judgment; $50 per week after judgment.
Michigan	100% prior to judgment; 60% for householders having a family and 40% for others, with certain minima and maxima.
Minnesota	50%; 100% (30 days) where necessary for use of family.
Mississippi	$100 for heads of families; $50 for single persons.
Missouri	90% for heads of families.
Montana	50% (45 days); 100% where debt not for necessaries and needed for use of debtor's family.
Nebraska	90% for heads of families.
Nevada	50% (30 days); 100% where debt not for necessaries and needed for use of debtor's family.
New Hampshire	$20 per week.

New Jersey	90%; minimum $18 per week.
New Mexico	75% for heads of families.
New York	90%
North Carolina	100% (60 days) where needed for use of debtor's family.
North Dakota	$35 per week or, if head of family, $50 plus $5 for each dependent, but no more than $25 per week.
Ohio	80% of first $300 per month and 60% of balance for heads of families (minimum $150); $100 (30 days) for others.
Oklahoma	75% (90 days); 100% where needed to support family.
Oregon	$175 (30 days).
Pennsylvania	100%
Rhode Island	$30
South Carolina	100% (60 days) where needed for use of debtor's family.
South Dakota	100 % (60 days) where needed for use of debtor's family.
Tennessee	$17 per week for head of family plus $2.50 per week for each dependent under 16; $12.per week for others.
Texas	100%
Utah	50% (30 days); $50 minimum if married or head of household.
Vermont	50% or $25, whichever is less.
Virginia	75%; minimum $100 per month, maximum $150 for heads of families; for others, 50% of the above.
Washington	$35 per week and $5 for each dependent; maximum $50 per week, for persons who have families dependent on them; $25 per week for others.
West Virginia	80%; minimum $20 per week.
Wisconsin	60% (30 days) with certain minima and maxima.
Wyoming	50% (60 days).

Example "A". $500 per month income after required withholding, husband, wife and two children, income necessary to support family. 27 states have a higher exemption; 1 state has the same exemption; 20 states have a lower exemption; 2 states can't be determined.

Example "B". $500 per month income after required withholding, single person, income necessary to support self. 26 states have a higher exemption; 2 states have the same exemption; 20 states have a lower exemption; 2 states can't be determined.

The above schedule of state exemptions can be found in Brunn, Wage Garnishment in California: A Study and Recommendations, 53 Calif. L. Rev. 1214 (1965).

HB 341

Arlie Roy POPE, Appellant,
v.
STATE of Alaska, Appellee.
No. 1127.

Supreme Court of Alaska.
Dec. 21, 1970.
Rehearing Denied Feb. 25, 1971.
See 480 P.2d 697.

Murder prosecution. The Superior Court Third Judicial District, Anchorage, Ralph E. Moody, J., rendered judgment, and defendant appealed. The Supreme Court, Erwin, J., held that it would not consider claim that burden of proof on insanity issue was improperly placed, although proper objection was made concerning burden of proof, where no objection was made, testimony presented, or instructions requested concerning intertwined issue of test for insanity.

Affirmed.

Connor, J., concurred in part and dissented in part and filed opinion.

1 **Judges** ⇐53

Defendant who did not exercise challenge to judge to whom case was reassigned within five days of reassignment, even during trial, waived right to peremptory challenge. AS 22.20.022.

2 **Criminal Law** ⇐589(1)

Refusal to grant continuance of five days to permit defendant time before trial to consider and file affidavit for peremptory disqualification of judge was not error. AS 22.20.022.

3 **Criminal Law** ⇐412.2(2)
Searches and Seizures ⇐3.3(1)

Situation presented when officer appeared at scene of shooting, finding body identified by defendant and victim's wife, was within "on-the-scene questioning" exception to Miranda warning requirement, and officer could ask defendant whether he had a gun and could search his person for weapons.

4 **Criminal Law** ⇐394.4(2)

Gun taken from defendant's automobile at scene of shooting and allegedly pri-

or to defendant's arrest was admissible where it was lying on front seat of automobile in plain view and thus not product of search.

5. **Criminal Law** ⇐1038(1, 3)

Supreme Court would not consider claim that burden of proof on insanity issue was improperly placed, although proper objection was made concerning burden of proof, where no objection was made, testimony presented, or instructions requested concerning intertwined issue of test for insanity.

James R. Clouse, Jr., Anchorage, for appellant.

Harold W. Tobey, Dist. Atty., Richard R. Felton, Asst. Dist. Atty., Anchorage, G. Kent Edwards, Atty. Gen., Juneau, for appellee.

Before BONEY, C. J., and DIMOND, RABINOWITZ, CONNOR and ERWIN, JJ.

OPINION

ERWIN, Justice.

Appellant, Pope, was convicted of second degree murder in connection with the death of one David Silva on July 9, 1968. According to his own testimony, he arose on that date at his usual hour and prepared himself for work. While driving to work he began to feel sick and decided to have only coffee in place of his usual breakfast. As appellant continued towards his job, the sickness became more severe and he decided to turn around and drive back to his motel. He testified that this condition of nervousness and sickness at his stomach had occurred with frequency in the period of time shortly before the shooting occurred.

After returning to his motel room, appellant consumed a little less than one-half of a pint of alcoholic beverage, remaining in his room and watching television. He made several attempts to reach his former wife, Irma Pope, and was at last successful.

However, Mrs. Pope refused to speak with him, slamming down the telephone. Appellant stated that the reason that he had attempted to call his former wife was that he felt really sick and was looking for help from someone.

After being rejected over the telephone, appellant described a strange feeling, "like something was spinning around the top of my head, from right to left, right underneath the skin against the skull and when you closed your eyes you could see—could see a streak of light coming around and around. * * *" He described the light as not being mean or anything, but the light said "kill him, kill him, kill him"—just kept repeating it; and finally he said it to himself and as soon as he did he felt very good and was not sick any more. Appellant further stated that after the lights had stopped in his head, he felt very sorry for David Silva because of what was going to happen; he did not think there was anything that he could do to prevent the killing of David Silva, and he knew he was going to do it, but he didn't yet know just how. When appellant finally agreed with the light in his head which told him to kill Silva, the nervousness disappeared, as did his upset stomach.

Appellant's recollection of the events that occurred after he left the motel was hazy and vague. He recalled only being near the parking lot at Anchorage Bedding and Furniture and next seeing the gun in his hand on the door ledge of his automobile. Appellant did not recall shooting the decedent, but only remembered watching the decedent sitting down and then lying backwards on the ground.

Officer Pavlovich was the first law enforcement officer to arrive on the scene. Upon arriving he observed the deceased, a woman at the head of the decedent, and another man, later identified as the appellant, alongside the decedent in either a squatting or kneeling position. Officer Pavlovich went over to the decedent, checked his pulse, and pronounced him dead. He next asked the woman what had happened. The woman, Mrs. Silva, indicated that appellant had shot Mr. Silva. In response to this, Pavlovich stood the appellant up and started to search him for weapons.

At this point in the sequence of events there is a dispute as to the actual occurrences. A Mr. McConnell testified that he observed Officer Pavlovich going over to appellant and questioning him for a minute or two before finally searching him for a weapon. The officer, on the other hand, testified that after he had examined Silva he immediately started to search appellant. Appellant's version of the story is that as he was being frisked by Officer Pavlovich, he was asked if he had a gun, to which he responded yes, that it was in the car. Officer Pavlovich claims that the information about the gun was volunteered by Pope and that no such question had been asked.

Mr. McConnell stated that after eliciting this information, Officer Pavlovich proceeded to appellant's car, with his arm on appellant's arm, to retrieve the weapon, which was located in the middle of the front seat. Officer Pavlovich stated that after Pope had volunteered the information as to the whereabouts of the gun, Pope proceeded to the automobile and Pavolich hurried to beat him to the car in an effort to retrieve the weapon.

On cross-examination Officer Pavlovich described the appellant's appearance as being dazed and testified that his feeling at the time was that appellant was not drunk, but either dazed or at least under the influence of alcohol—but he could not tell which. Officer Pavlovich further testified that although he detected nothing radically wrong with appellant, that is, appellant walked normally and spoke clearly and distinctly, albeit very slowly, he nevertheless seemed to be preoccupied. At another point in his testimony Pavlovich stated that he thought appellant was either under the influence of alcohol or in a state of shock. Furthermore, he was not sure whether appellant was in possession of his faculties at this time.

ether appellant was in possession of his
ulties at this time.

On August 5, 1968, Pope was indicted by the grand jury for first degree murder and arraigned immediately thereafter. Appellant entered a plea of not guilty, and the trial date was set for December 12, 1968, before the Honorable Edward V. Davis, Superior Court Judge. Prior to trial, on November 29, 1968, at the request of the prosecutor, a competency hearing was held. On January 16, 1969, the Superior Court entered an order to the effect that the appellant was competent to stand trial.

Because of continuances, trial did not begin until February 10, 1969. At that time the defendant appeared before the Honorable Ralph E. Moody, Judge of the Superior Court, rather than Edward V. Davis, to whom the case had been assigned originally. Timely objection was made by appellant to the unannounced change. On February 18, 1969, the jury returned a verdict of guilty of murder in the second degree. Notice of appeal was duly filed.

Appellant raises four specifications of error in the trial below. His first specification is that the court committed prejudicial error in reassigning appellant's case from Judge Davis to Judge Moody without giving appellant five days from the date of reassignment to consider and possibly file a peremptory challenge affidavit as provided in AS 22.20.022; his second, that the trial court erred in overruling the appellant's motion to suppress the evidence seized by Officer Pavlovich from the appellant's car prior to a lawful arrest; and his third, that the trial court incorrectly admitted the statements of appellant made prior to his being given the proper *Miranda* warnings and after he had become a suspect in the crime and had been substantially deprived of his freedom of action. Finally, he contends that the trial court should have ruled as a matter of law that the burden of proving sanity is on the state rather than the burden of proving insanity being upon the defendant, when there was some evidence in the record to indicate that sanity was at issue.

I

In his first claim of error, appellant contends that because of the assignment procedure used herein,[1] he did not have sufficient opportunity to determine and if necessary file an affidavit alleging he believed that he could not obtain a fair and impartial trial.

Trial proceeded on February 10, 1969, appellant making timely motion,[2] which motion was denied.

1. There was no advance notice to counsel of the reassignment of this case from Judge Davis to Judge Moody on the day of trial. It should be noted that subsequent to the trial herein this court in the case of Roberts v. State, 458 P.2d 340, 346 (Alaska 1969) pointed out the potential problems of such a practice in suggesting that this method of reassignment of a case should be avoided in the future:
"A method should be devised and utilized to make assignment of cases to judges sufficiently in advance of trial or hearing, with notice of the assignment being given to the parties, so that the parties can be afforded their rights under AS 22.20.022 without interfering with scheduled hearing or trial dates.

2. The motion was as follows:
Mr. Clouse: Your Honor, for the record, at this time, I would like to state an objection to the Court's requiring us to go to trial at this time and not before the—Judge Davis who was previously assigned this case. This deprives the defendant of the opportunity to investigate and exercise any challenge that he may have within the five day period as provided by rule and statute.
The Court: Motion's denied since this is merely a procedural matter and it delays the—delays the carrying on of Court business if we give effect to that for the five days rule. Other than the objection, is defense ready to proceed?
Mr. Clouse: Yes, your Honor.

AS 22.20.022 states in relevant part:

"*Peremptory disqualification of a superior court judge.* (a) If a party or his attorney in a superior court action, civil or criminal, files an affidavit alleging under oath that he believes that he cannot obtain a fair and impartial trial, the presiding judge shall at once, and without requiring proof, assign the action to another judge of that district,

Appellant correctly points out that the granting of the five-day period is to allow a party or his attorney an opportunity to investigate the judge to whom the case is assigned and if necessary file the requisite affidavit for disqualification, thus avoiding the waste of judicial time which would result if an affidavit or disqualification were not filed until the date of trial because this would mean that the case would have to be continued until another judge could be assigned and the disqualified judge would not be ready at that time to start the trial of another action.[3] Appellant further correctly argues that the provisions of this statute have been interpreted by this court to mean that once the affidavit is filed, the judge involved is without power or jurisdiction to take any further action in the proceeding. Channel Flying Inc. v. Bernhardt, 451 P.2d 570 (Alaska 1969).

[1, 2] But appellant has not shown that any harm resulted to him from the denial of his motion. Instead, he invites us to speculate that he suffered some possible prejudice, even though he did not challenge the trial judge because he felt that any challenge he made might have a prejudicial effect on the jury. The gist of appellant's argument appears to be that since any challenge might affect the jury he never seriously considered whether or not he should exercise the challenge because the reassignment made the choice more difficult. Since appellant could have exercised the challenge at any time within five days of reassignment, even during trial, we hold that his failure to do so was a waiver of his right to a peremptory challenge to the trial judge, and it was not error for the court to refuse to grant a continuance of five days to permit appellant to ponder this matter at length.

II

Appellant claims that the trial court committed error in refusing to suppress as evidence (1) appellant's oral statement about the gun, and (2) the gun itself, which the officer seized in appellant's car. The argument is that this evidence is tainted because the required warnings under Miranda v. Arizona, 384 U.S. 436, 86 S.Ct. 1602, 16 L.Ed.2d 694 (1966) were not given by the officer until after the seizure of the gun, that appellant had already become a suspect in the crime, and that he had been substantially deprived of his freedom in a significant way. The test of when warnings must be given under *Miranda* is whether the accused has been "taken into custody or otherwise deprived of his freedom by the authorities in any significant way and is subjected to questioning." 384 U.S. at 478, 86 S.Ct. at 1630, 16 L.Ed.2d at 726.

We need not explore such problems as whether the "in custody" test of *Miranda* displaces the "focus" test of Escobedo v. Illinois, 378 U.S. 478, 84 S.Ct. 1758, 12 L.Ed.2d 977 (1964), or whether the two tests can be regarded as alternatives to some extent.[4] For it is plain to us that this case falls within an important exception stated by the court in its opinion in *Miranda*. After pointing out that it did not intend to hamper the traditional function of police officers in investigating crime, the court said:

> General on-the-scene questioning as to facts surrounding a crime or other general questioning of citizens in the fact-

or if there is none, the chief justice of the supreme court shall assign a judge for the hearing or trial of the action. The affidavit shall contain a statement that it is made in good faith and not for the purpose of delay."

* * * * *

"(e) The affidavit shall be filed within five days after the case is at issue upon a question of fact, or within five days after the issue is assigned to a judge, whichever event occurs later, unless good cause is shown for the failure to file it within that time."

Texas, 394 24, 325, 89 S.Ct. 1095, 1096, 22 L. 311, 314 (1969). The courts must , therefore in each case whether sphere and setting of an interro- re of such coercive effect or indi- significant restraint as to trigger for a *Miranda* warning. There is agreement about the criteria for determination.

[3] But the case at bar is a strong one applying the "on-the-scene question- exception to the *Miranda* warning re- ent. The officer here was present- with a situation of great emergency. of violence had occurred, the vic- was lying on the ground dead. There more than one person present. Both rest his own safety and that of the officer had to elicit information what had happened, and about the which had obviously been used in the For the same reason the officer the right to conduct a strictly search ("frisk") of Pope's person ons under the rule of Terry v. 392 U.S. 1, 88 S.Ct. 1868, 20 L.Ed. 2d 889 (1968), which he did.[5] To hold that, that while a policeman faced with an emergency such as the one which confronted Officer Pavlovich may "frisk" a suspect for weapons he may not simultaneously ask him whether he is armed, would be an unrealistic and unreasonable extension of the *Miranda* rule.

[4] Appellant also contends that, because the revolver was seized from Pope's automobile prior to the time he was placed under arrest, it was inadmissible because it was not the product of a search incident to arrest. The difficulty with this line of argument is that the gun was not the product of a "search" at all; it was lying on the front seat of the car in plain view. As soon as he saw it, Officer Pavlovich seized it and unloaded it, both to preserve it and its cartridges as evidence and to prevent appellant, who was standing beside him, from getting hold of it. His conduct was entirely justified.

> It has long been settled that objects falling in the plain view of an officer who has a right to be in the position to have that view are subject to seizure and may be introduced in evidence.[6]

III

The final point raised by appellant is a challenge to the burden of proof in insanity cases as set forth in the opinion of this court in Chase v. State.[7] A review of the record reveals that the only testimony before this court in reviewing this point is the testimony of Officer Pavlovich, the appellant, Pope, Bill McConnell, and the cross-examination of appellant's ex-wife. Testimony given by Dr. J. Ray Langdon, a psychiatrist, and Marie Doyle, a psychologist, at the trial, as well as the testimony of additional police officers and others at the scene of the crime, was not made a part of the record on appeal.

v. State, 425 P.2d 235, 238 1967).

v. United States, 390 U.S. 234, S.Ct. 992, 993, 19 L.Ed.2d 1067, ; Creighton v. United States, S.App.D.C. 115, 400 F.2d 651 (1968); Klockenbrink v. State, 472 P.2d 958, 961 (Alaska 1970). *See* Stevens v. State, 443 P.2d 600, 602 (Alaska 1968).

7. 369 P.2d 997, 1003 (Alaska 1962).

While proper objections were made at the trial concerning burden of proof in insanity cases, no objection was made to instructions on the test for insanity as given by the trial court, nor was any testimony presented nor instructions requested concerning such an issue.

[5] Since in our opinion the burden of proof as to the defense of insanity and the actual test for insanity are inseparably intertwined,[8] we are placed in the position of attempting to review the entire basis for the present rule on the defense of insanity in Alaska on an inadequate record without complete presentation of these issues to the trial court. This we decline to do.[9]

The importance of the defense of insanity has been underscored recently by a series of excellent opinions in federal courts which have considered, and in many cases adopted, the A.L.I. test for insanity,[10] and a series of equally searching state court opinions which have noted more than one position, but have tended to retain the *M'Naghten* rule.[11] These opinions note that there are presently four separate tests for insanity[12] which have received varying degrees of judicial acceptance. They serve to underscore the difficulty of choosing a proper test for insanity and the corresponding burden of proof without complete presentation on the issue in the trial court and ultimately in this court.[13]

The judgment of the Superior Court is hereby affirmed.

CONNOR, Justice (concurring in part and dissenting in part).

I concur with the majority opinion except the portion dealing with the burden of proof in insanity cases, and allied questions. As to that portion of the majority opinion I must respectfully dissent.

This case went to the jury on instructions concerning the defense of insanity which were patterned on those approved by this court in Chase v. State, 369 P.2d 997 (Alaska 1962). Counsel for appellant objected to these instructions as improperly placing the burden on the accused to establish his insanity by a preponderance of the evidence. He thus raised and preserved for appeal the questions of what is the burden of proof and where it should be placed in

8. Approximately one-half of the states put the burden on the defendant while the other half and the federal courts put the basic burden on the prosecution. See annot. 17 A.L.R.3rd 116 (1968).

ority of my colleagues feel that of proof question and the sub- test of insanity are inter-related. I for that very reason I believe topics logically can, and properly determined by the court.[1]

of an adversary presentation of legal arguments bearing upon the prop- of insanity in criminal cases should an impediment to decision in this instance. Ultimately one must a large body of legal and psychiatric even to become conversant with jects. Appellate briefs are of much here than in the resolution of al questions.[2] Surely this would the first time that this court decided grounds or under a doctrine not presented in the briefs.[3]

is another reason why we should these questions now, not later. In the test currently obtaining un- v. State, supra, is so inherently to dissuade either defendants or counsel from raising the defense of or adducing evidence in support of it is difficult to get the insanity before us on appeal.

anity defense is much like a con- and avoidance. One virtually ad- actual elements of the crime but anity as a special ground of exon- One claiming that he did not com- offense, but who alternatively that he was insane when he did com-

mit it, has little hope of success. While such an approach is procedurally permissible, as a practical matter it is a foolhardy strategy. A person invoking the Alaska rule on insanity, even in a strong case, has almost precluded himself from an acquittal. The current test thus exerts a chilling effect upon one who might seek a change in the law through the appellate process. This is true even though he may have suffered from serious mental illness, of a psychotic type, at the time he committed the act with which he is charged. Because of the *in terrorem* effect of the current Alaska test, I see no reason to postpone corrective measures, especially if we believe that the test can be improved.

I

All discussion of the tests of criminal responsibility inevitably must refer to *M'Naghten's Case*, 10 Cl. & Fin. 200, 8 Eng.Rep. 718 (1843), which is regarded as the English source of the rule followed in most American jurisdictions for over a century. In that case Daniel M'Naghten attempted to assassinate Robert Peel, the Prime Minister. Because Peel, on the fatal day, happened to ride in Queen Victoria's carriage instead of his own, M'Naghten shot into the wrong carriage and killed Drummond, Peel's secretary. From all of the available information it seems quite plain that M'Naghten was suffering from psychotic delusions of persecution. At his trial Lord Chief Justice Tindal virtually directed a verdict in his favor.[4]

(discussed later herein) would be the most suitable.

3. One such case was Grossman v. State, 457 P.2d 226 (Alaska 1969), adopting an objective standard of entrapment, though neither party directly briefed that doctrine. Surely others could be found by searching the briefs and comparing them with the opinions rendered by this court during the last ten years.

4. Guttmacher & Weihofen, Psychiatry and the Law, 403 (1952); Roche, "Criminality and Mental Illness—Two Faces on the Same Coin," 22 U.Chi.L.Rev. 320, 324

THE PRECEDING DOCUMENT(S) MAY NOT FILM LEGIBLY BECAUSE OF POOR QUALITY OF THE ORIGINAL.

At the trial the medical witnesses and the court had been influenced by the writings and theories of such advanced thinkers as Dr. Isaac Ray, the first great forensic psychiatrist in America. It was Dr. Ray's thesis that insanity must be measured by evaluating the entire personality structure of an individual, and not by tests such as merely the ability to know right from wrong.[5] At any rate, M'Naghten was acquitted. Unfortunately for the development of law, the case did not end there.

Despite commitment of the hapless M'Naghten to an insane asylum, Queen Victoria was outraged by the acquittal, probably because there had already been three attempts on her life and one on that of the Prince Consort. In a letter to Sir Robert Peel, the Queen deplored the action of the judges in allowing verdicts of not guilty by reason of insanity in cases of this kind because she was convinced that such malefactors "were perfectly conscious and aware of what they did." She pressed for legislation to require judges "to interpret the law in this and no other sense in their charges to the Juries."[6] The House of Lords was convened, and the fifteen judges of the common law courts were called upon, in an atmosphere of political pressure, to answer five rather vacuous questions about criminal responsibility in English law. Interestingly enough, it was Lord Chief Justice Tindal who responded with a test more rigid than that which he had used when M'Naghten was tried before him. The *M'Naghten* rule in essence is:

> "[T]o establish a defence on the ground of insanity, it must be clearly proved that, at the time of committing of the act, the party accused was labouring under such a defect of reason, from disease of the mind, as not to know the nature and quality of the act he was doing: or, if he did know it, that he did not know he was doing what was wrong." 10 Cl. & Fin., at 210, 8 Eng.Rep., at 722.

Thus, in a case which was no longer a case, in response to hypothetical questions based on notions of phrenology and monomania which were then in vogue, the judges, in a dramatic departure from common law decisional technique, acting more as a governmental committee than a court, pronounced a rule which has been followed unthinkingly by many courts ever since. Of little avail was the restrained observation of Sir James Stephen that "every judgment delivered since the year 1843 has been founded upon an authority which deserves to be described as in many ways doubtful."[7] The test could at least have been limited to cases of paranoia like that suffered by M'Naghten, but instead it was applied by many courts as a rule of universal and implacable validity, appropriate for all types of mental and emotional derangement.

The *M'Naghten* test has been supplemented in many jurisdictions by the "irresistible impulse" test, under which one suffering from a mental disease, of such severity that the freedom of will is destroyed, may be excused from culpability.[8]

In Alaska, before statehood, the right-and-wrong test, supplemented by the irresistible impulse test, was considered the applicable rule.[9] In Chase v. State, 369 P.

(1955); Biggs, The Guilty Mind, 95-97, 102 (1955).

5. Dr. Ray's views have a modern ring. "[T]he insane mind is not entirely deprived of * * * power of moral discernment, but on many subjects is perfectly rational and displays the exercise of a sound and well balanced mind." Ray, Medical Jurisprudence of Insanity 13 (3d ed. 1853).

6. Biggs, supra n. 4, 103.

7. II Stephen, History of the Criminal Law of England 153 (1883).

8. As of 1955, about 14 states, and the federal judiciary, had adopted the irresistible impulse addition to the test. Mod.Penal Code, Tent.Dr. No. 4,101 (1955).

9. Matheson v. United States, 227 U.S. 540, 33 S.Ct. 355, 57 L.Ed. 631 (1913); Davis v. United States, 165 U.S. 373, 17 S.Ct. 360, 41 L.Ed. 750 (1897); Sauer v.

2d 997 (Alaska 1962), however, this court adopted a particular version of what it regarded as the *M'Naghten* rule. The test laid down there was that in order to exculpate the defendant he must be laboring under such mental disease or derangement at the time of the act "as to render him incapable of knowing the nature and quality of his act *and* of distinguishing between right and wrong in relation to the act with which he is charged." 369 P.2d, at 998. (Emphasis supplied.) This results in a formulation more rigid than the *M'Naghten* test, and without the irresistible impulse supplement which had previously obtained in Alaska.[10] In that sense the *Chase* case is a retrograde decision in a time of generally forward legal progress.[11]

The court in *Chase* relied on three cases: Jessner v. State, 202 Wis. 184, 231 N.W. 634, 71 A.L.R. 1005 (1930); Maas v. Territory, 10 Okl. 714, 63 P. 960 (1901); and Montgomery v. State, 68 Tex.Crim. 78, 151 S.W. 813 (1912). As the Note, "Criminal Insanity," UCLA-Alaska L.Rev., 8 Alaska L.J. 152, 153-54 (Aug. 1970), points out, these cases were decided before many of the modern advances in psychiatry had been widely disseminated. Moreover, the instructions given in these cases lacked clarity and therefore were extremely confusing. *Jessner* and *Montgomery* indeed held that the phrases "the nature and quality of the act" and "the difference between right and wrong" were synonymous; if the defendant could not understand the one, he could not distinguish the other. However, as the Note, *supra*, indicates, these phrases are not at all synonymous in ordinary speech.

To torture English into performing such a linguistic cakewalk requires unusual skill. Since juries are composed of but ordinary reasonable laymen, additional complicated instructions would have to be given to insure that the jury does not consider the terms according to their usage in common everyday speech and thereby misapply the law. Such verbal gymnastics should not be employed in jury instructions. The purpose of jury instructions is to instruct and enlighten the jury on the law, not to confuse them.[12]

It also appears that the instructions in *Jessner* focused solely on the defendant's ability to distinguish between right and wrong, ignoring completely his ability to understand the nature and quality of his act.[13] In *Maas*, the actual instruction did follow the disjunctive form of the *M'Nagh-*

United States, 241 F.2d 640 (1957), cert. denied 354 U.S. 940, 77 S.Ct. 1405, 1 L.Ed.2d 1539; Rivers v. United States, 270 F.2d 435 (1959).

10. That the Alaska test is more restrictive than M'Naghten is apparent from the following example. One laboring under a psychotic delusion, such as that he is being persecuted or that God has ordained that he must kill, may well know the nature of the act committed, yet not be able to appreciate its wrongfulness. Under M'Naghten he would not be culpable, but under Chase he could not be acquitted. *Cf.* People v. Schmidt, 216 N.Y. 324, 110 N.E. 945 (1915), per Cardozo, J.

11. Speculation persists in Alaska legal circles that the use of the conjunctive "and" in the instructions which were validated in Chase possibly came about through a typographical error by the secretary to the trial court judge. If this is so, then Chase is no less an historical accident than M'Naghten's Case.

12. "But 'glory' doesn't mean 'a nice knock-down argument,'" Alice objected.
"When *I* use a word," Humpty Dumpty said, in rather a scornful tone, "it means just what I choose it to mean—neither more nor less."
"The question is," said Alice, "whether you *can* make words mean so many different things."
"The question is," said Humpty Dumpty, "which is to be master—that's all."
L. Carroll, Through the Looking Glass, in The Annotated Alice 269 (1960).
This nonsensical repartee brings sharply into focus a problem which has plagued logicians since at least the time of William of Occam. A lack of awareness of this problem has led to much mischief in legal interpretation.

ten test.[14] If anything, this case stands for an adoption of the true *M'Naghten* rule, not the rule of *Chase*. In sum, I do not find any of these cases of sufficient precedential value to warrant an adherence by this court to what is little more than a modified "wild beast" test.[15]

Since the *M'Naghten* case, and even in the eight years since Chase v. State was decided, a great deal of critical evaluation and development has occurred, in an effort to achieve more advanced and just techniques for handling this serious problem.

The torrent of legal writing is so vast that it is nearly impossible for all but a few to read or comprehend everything which has been said on this basic issue of criminal responsibility. Still, certain broad outlines can be stated. There is nearly universal dissatisfaction with the *M'Naghten* rule on the part of scholars, jurists, and psychiatrists who have seriously inquired into the subject. The main difficulty with the *M'Naghten* rule is that it focuses exclusively on the cognitive element in mental life, that is, the knowledge of right and wrong or of the nature of one's act. One of its underlying assumptions is that mental illness is a failure of intellectual function. This reflects an artificial dualism of mind and emotions which ignores the affective aspects of the human personality. While there are many schools of psychiatric thought, there is broad agreement that mental illness can be understood only by looking at man as an integrated, psychobiological whole.[16] Because the *M'Naghten* rule views man within the artificial strictures of cognition, courts and juries are deprived of much of the benefit to be gained from the modern science of psychiatry.[17]

Other criticisms of the *M'Naghten* rule would probably be applicable to any verbal formulation.[18] The difficulty stems from the different functions and purposes of law and psychiatry. The aim of psychiatry is to examine human behavior and mental disease in a scientific manner and to develop therapeutic methods of dealing with the emotional problems of mankind. On the other hand, it is the task of the law to develop normative rules to control human behavior. It has always been recognized that certain persons must be regarded as not the proper subjects of criminal conviction, and that because of their mental aberrations it would be unjust to hold them responsible for their conduct.[19] Ultimately this is an ethical and social judgment and not a medical determination.

Scholars and jurists have expended great effort over the years to achieve a standard reflecting both society's need for criminal accountability and the converse demand for a rule flexible enough to cover the varieties and combinations of serious emotional and mental illness which destroy the capacity to commit a crime, in any just conception of the term.

One great developmental breakthrough occurred with the famous decision in Durham v. United States, 94 U.S.App.D.C. 228,

tly after the *Durham* rule was an-
, the American Law Institute pro-

mulgated a draft rule on this subject. This rule represents the collective efforts of some of the leading thinkers in this field. After nine years of research and consideration, the proposed rule was stated as follows:

"(1) A person is not responsible for criminal conduct if at the time of such conduct as a result of mental disease or defect he lacks substantial capacity either to appreciate the wrongfulness of his conduct or to conform his conduct to the requirements of law.

"(2) The terms 'mental disease or defect' do not include an abnormality manifested only by repeated criminal or otherwise anti-social conduct."

A.L.I. Mod. P. Code § 4.01 (final draft) (1962).

Since then this test, or some variant of it, has met with increasing judicial acceptance, particularly in the federal courts. In a luminous opinion by Judge Kaufman, the Second Circuit adopted the test in United States v. Freeman, 357 F.2d 606 (2nd Cir. 1966). Chief Judge Haynsworth adopted it for the Fourth Circuit in United States v. Chandler, 393 F.2d 920 (4th Cir. 1968) (en banc), and the Ninth Circuit has now embraced it in Wade v. United States, 426 F.2d 64 (9th Cir. 1970) (en banc). The *M'Naghten* test has now been overthrown in all but the First Circuit.[21] These cases contain excellent disquisitions on the *M'Naghten* rule, its deficiencies, and the legal and psychiatric framework underly-

Weihofen, "The Flowering of New ...pshire," 22 U. of Chi.L.Rev. 350, ...(1955).

In addition to the above cited cases, ... United States v. Currens, 290 F.2d ... (3rd Cir. 1961); Blake v. United ... 407 F.2d 908 (5th Cir. 1969) (en ...); United States v. Smith, 404 F.2d ... (6th Cir. 1968); United States v. ... 393 F.2d 680 (7th Cir. 1967) ... banc); Pope v. United States, 372 ... 710 (8th Cir. 1967) (en banc), va... other grounds, 392 U.S. 651, 88 ... 2145, 20 L.Ed.2d 1317 (1968); ... v. United States, 325 F.2d 420 (10th Cir. 1963) (en banc), cert. denied, 377 U.S. 946, 84 S.Ct. 1354, 12 L.Ed.2d 300 (1964). While not all of these cases embrace the A.L.I. test totally, they reject the M'Naghten rule and include a test whereby the effect of mental illness on one's capacity to conform his conduct to law is stressed. Judge (now Chief Justice) Burger, in his separate concurring opinion in Blocker v. United States, 110 U.S.App.D.C. 41, 288 F.2d 853 (1960), laid great emphasis on a test which would focus on the relationship between mental illness and one's *capacity* to refrain from wrongdoing.

THE PRECEDING DOCUMENT(S) MAY NOT FILM LEGIBLY BECAUSE OF POOR QUALITY OF THE ORIGINAL.

ing the A.L.I. test. As Chief Judge Haynsworth said of the A.L.I. test:

> "With appropriate balance between cognition and volition, it demands an unrestricted inquiry into the whole personality of a defendant who surmounts the threshold question of doubt of his responsibility. Its verbiage is understandable by psychiatrists; it imposes no limitation upon their testimony, and yet, to a substantial extent, it avoids a diagnostic approach and leaves the jury free to make its findings in terms of a standard which society prescribes and juries may apply. [Footnotes omitted.]" United States v. Chandler, *supra*, 393 F.2d at 926.

This wide acceptance of the American Law Institute test is significant. I believe that this formulation affords a workable standard, permitting realistic expert testimony about the personality and characteristics of the defendant as a whole man, but leaving to the court and jury the ultimate legal pronouncement. It avoids many of the problems encountered under the *Durham* rule.

No verbal formulation of this standard can achieve perfection as there may always be doubt about the application of general terms to marginal situations. Yet the American Law Institute standard, in the view of many, does represent the best of current thinking on this subject. It is the standard which should be employed in Alaska.[22] I regard it unfortunate that we are not taking this step today.

II

Appellant has raised the question of where the burden of proof should be placed in these cases. In Chase v. State, *supra*, this court adopted the rule that the burden was on the defendant to establish his insanity by a preponderance of the evidence. Approximately one-half of the states follow this rule.[23] But in the rest of the states, and in the federal courts, the accused need only show some evidence of insanity. The prosecution must then prove his sanity beyond a reasonable doubt.[24]

22. The standard need not be frozen entirely within only one rigid form of words. In appropriate cases the testimony might require some amplification of the test in the instructions to the jury. Nor is this an occasion to consider the undue resort to diagnostic labels and conclusionary medical terms which plagued the court under the Durham rule and which the court sought to limit in Washington v. United States, 120 U.S.App.D.C. 20, 300 F.2d 444 (1907). Hopefully, care would be taken to see that experts explain such labels and terms in language understandable to the jury.

tates following the federal rule
onn, State v. Schantz, 98 Ariz.
P.2d 521 (1965); Colorado,
People, 140 Colo. 493, 346 P.2d

Those who place the burden of establishing sanity on the defendant usually argue that this accords with the presumption of sanity. Because there is a presumption, it is said that the prosecution should not be put to proving that which normally is not imposed upon it. But under the federal rule, the presumption of sanity is still employed. It is operative until some evidence is produced which adequately brings into issue the sanity of the defendant. The presumption then disappears and the mental capacity of the defendant to commit the crime becomes an essential element, to be proved beyond a reasonable doubt, like any other.[25]

It has been said that the burden of establishing insanity should be placed on the accused because sanity is not an element of the offense but a quality of the one who commits it. Chase v. State, *supra*, 369 P.2d at 1003. But this overlooks the important consideration that once sanity is in issue it is a fact to be established like any other ultimate fact essential to culpability. The United States Supreme Court made this plain in Davis v. United States, 160 U.S. 469, 16 S.Ct. 353, 40 L.Ed. 499 (1895), when it said:

> "No man should be deprived of his life under the forms of law unless the jurors who try him are able, upon their consciences, to say that the evidence before them, by whomsoever adduced, is sufficient to show *beyond a reasonable doubt* the existence of *every fact necessary* to constitute the crime charged." (Emphasis supplied.) 160 U.S. at 493, 16 S.Ct. at 360.

Realistically speaking, when sanity is an issue, it is not only a major element of the criminal proof, it may be the central factual issue in the case. For that matter, it may be the only issue. Logically, sanity is an essential element of a crime because *mens rea* is a necessary primary factor. If insanity exists at the time of the criminal act, *mens rea* fails, there is no jointure of act and intent, and under the traditional analysis no crime has been committed. As Mr. Justice Frankfurter noted, dissenting in Leland v. Oregon, 343 U.S. 790, 803, 72 S.Ct. 1002, 1009, 96 L.Ed. 1302 (1952):

> "Even though a person be the immediate occasion of another's death, he is not

Esser, 16 Wis.2d 567, 115 N.W.2d 505 (1962); Wyoming, State v. Pressler, 16 Wyo. 214, 92 P. 806 (1907). The District of Columbia also follows this rule: Jones v. United States, 109 U.S.App.D.C. 111, 284 F.2d 245 (1960). See 17 A.L.R.3d 146 (1968).

25. Fitts v. United States, 284 F.2d 108 (10th Cir. 1960). There the court said: "When, however, evidence of insanity is produced, from whatever source, the presumption of sanity disappears, and the mental capacity of the accused to commit the crime becomes an essential element to be proved by competent evidence beyond a reasonable doubt." 284 F.2d at 112.
This is the general rule which is followed in approximately one-half or more of the jurisdictions of the United States.

a deodand to be forfeited like a thing in the medieval law. Behind a muscular contraction resulting in another's death there must be culpability to turn homicide into murder."

Placing the burden on the prosecution has substantial advantages. First, it accords with the presumption of innocence and the thesis that the accused need not undertake to prove anything in a criminal case.[26]

An additional advantage is that the jury is not given the confusing task of juggling two different burdens, each of which carries a different standard. This anomaly is pointed out by Professor McCormick:

"Thus it seems inconsistent to demand as to some elements of guilt, such as an act of killing, that the jury be convinced beyond a reasonable doubt, and as to others, such as duress or capacity to know right from wrong, the jury may convict though they have such doubt. Accordingly, the recent trend both in English and American decisions is to treat these so-called matters of defense as situations wherein the accused will usually have the first burden of producing evidence in order that the issue be raised and submitted to the jury, but at the close of the evidence the jury must be told that if they have a reasonable doubt of the fact on which the justification is based they must acquit." McCormick, Evidence § 321, p. 684 (1954). (Footnote omitted.)

There are also important aspects of constitutional policy to be weighed in the balance. It has been held unconstitutional to shift the burden of persuasion on the defense of alibi to the accused. Stump v. Bennett, 398 F.2d 111 (8th Cir. 1968) (en banc), and cases cited therein. This may or may not represent some future trend. But when it comes to shifting burdens, there is not much difference between proof that a defendant was physically present, and not elsewhere, at the commission of a crime, and that he was "mentally present," in the sense that he was sane.

Lastly, the experience of the federal courts, in their treatment of the burden of persuasion, is of value. The federal courts have worked under the rule of Davis v. United States, *supra*, since 1895, and have not found it a handicap in effecting criminal justice. In my view, when sanity is in issue, the burden of persuasion should be upon the prosecution to establish the sanity of the accused beyond a reasonable doubt.

III

In fairness, to avoid surprise, the prosecution should be entitled to notice that it must adduce evidence of the defendant's sanity. Because the mental status of an accused, in terms of sanity, is usually not in issue in a criminal prosecution, it would be an unfair burden to require the state invariably to guess at whether this issue might be raised at trial, and possibly to prepare on this issue, only to have it not raised at all. Nor is it fair for defendants to wait in ambush until trial to inject the sanity issue as a surprise tactic.

Therefore, if we were to alter our insanity rules, we should also change our procedural rules to require that at the time of plea, or within a certain number of days thereafter, one intending to raise the issue of insanity at his trial must specially plead that he was insane at the time he committed the act charged.

For the reasons given I would reverse and remand for a new trial.

26. As a practical matter the accused often must undertake to adduce proof of insanity if he is to prevail in creating a reasonable doubt on the whole evidence.

HB-350

THE SUPREME COURT OF THE STATE OF ALASKA

ORDER NO. 136

Amending Criminal Rules
6 and 18

In order to carry out the provisions of Chapter 126 SLA 1971, effective September 2, 1971, and the decision of the Supreme Court of Alaska in Alvarado v. State of Alaska, Op. No. 704, July 6, 1971, within the framework of the judicial system's budget for the fiscal year 1971-1972, we hereby promulgate the following temporary order concerning venue of civil and criminal cases, and designating the sites for the convening of grand juries.

IT IS ORDERED:

A. The location where grand juries shall be convened: In order to investigate crimes in the various election districts throughout Alaska, the grand jury shall be convened at the place as set forth herein. The presiding superior court judge of the judicial district which encompasses the appropriate election district shall convene the grand jury in conformity with the applicable statutes and rules of criminal procedure.

In regard to offenses committed in the various election districts (as set forth in official 1965 reapportionment map) grand juries shall be convened at the following locations:

As to offenses committed in election districts 1, 2 or 3, the grand jury shall be convened at Ketchikan or Sitka, Alaska.

As to offenses committed in election districts 4 or 5, the grand jury shall be convened at Juneau, Alaska.

As to offenses committed in election districts 7 and 8, the grand jury shall be convened at Anchorage, Alaska.

As to offenses committed in election districts 6, 9, 10 or 11, the grand jury shall be convened at Kenai or Kodiak, Alaska.

As to offenses committed in election districts 11, 12, or 13, the grand jury shall be convened at Kodiak, Alaska.

As to offenses committed in election districts 14, 15, 17, 18 or 19, the grand jury shall be convened at Nome, Alaska.

As to offenses committed in election district 16, the grand jury shall be convened at Fairbanks, Alaska.

B. Criminal Cases, Place of Trial: The trial of all criminal cases shall take place in the election district where the crime was committed subject to the convenience of the parties and witnesses and the change of venue provisions of AS 22.10.040. The place of the trial shall be the nearest urban center within the appropriate election district of the alleged crime where there are facilities available to house the court and jury.

In order to provide the court with information concerning the appropriate facilities the presiding superior or presiding district court judge of the judicial district shall request the Administrative Director's office to investigate the availability of appropriate facilities and to report in writing. This report shall contain a specific recommendation as to the feasibility of holding trial at the place where the crime was committed, and shall also contain a recommendation as to alternate places of trial. Preference should be given to those urban centers having appropriate facilities which are located nearest the place where the crime was committed.

This report of the Administrative Director's office shall become a permanent part of the record.

C. Civil Cases, Place of Trial: The trial of all civil cases except as hereinafter provided shall take place in the judicial district where the cause of action arose or the district where the defendant was personally served with preference being given to the nearest urban center where the superior court conducts regular sessions of the superior court as set forth in Administrative Rule 29 or where the district court holds regular sessions of the district court as set forth in Administrative Rule 32.

(1) The trial of all actions in ejectment or for recovery of the possession of, quieting title to, for the partition of, or the enforcement of liens upon, real property shall commence in the judicial district in which the real propery, or any part of it affected by the action, is situated.

(2) Failure to make timely objection to improper venue waives the requirements of this rule.

(3) Nothing in this order shall be construed to affect the trial of civil cases within the jurisdiction of the magistrate court.

D. Selection of Grand and Petit Jurors: The jurors selected for service on a grand or petit jury shall have the qualifications set forth by law and shall be drawn and selected in conformity with existing statutes and rules with the following additional provisions:

(1) grand jury - jurors who serve on the grand jury shall be selected from a fifty-mile radius of the designated place of meeting of the grand jury as set forth in Part A of this order.

(2) petit jury - jurors to serve on the petit jury shall be selected from a radius of fifty miles of the urban center designated as the site of the criminal or civil trial as set forth in Parts B and C of this order.

E. This order shall supercede all other rules of the court which may be in conflict with the procedure announced herein.

DATED: August 27, 1971.

CSSB 153 6JR.

Chapter No.

126

AN ACT

Relating to the place of trial; and changing Rule 18, Rules of Criminal Procedure.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 22.10.030 is amended to read:

Sec. 22.10.030. WHERE ACTIONS ARE TO BE BROUGHT. (a) All actions in ejectment or for the recovery of the possession of, quieting title to, for the partition of, or the enforcement of liens upon, real property shall be commenced in the superior court in the judicial district in which the real property, or any part of it affected by the action, is situated.

(b) If, in a civil action other than one specified in (a) of this section, a defendant can be personally served within a judicial district of the state, the action against that defendant shall be commenced in that judicial district or in the judicial district in which the claim arose.

(c) All prosecutions for crimes and offenses shall be commenced in the judicial district in which the crime or offense was committed.

(d) Subject to sec. 40 of this chapter, a trial and any precedent or antecedent hearings in an action shall be conducted in an election district within the judicial district at a location which would best serve the convenience of the parties and witnesses.

(e) Actions in cases not covered by this section may be commenced in any judicial district of the state.

(f) Failure to make timely objection to improper

venue waives the requirements of this section.

* Sec. 2. In sec. 1 of this Act, AS 22.10.030(d) has the effect of changing Rule 18, Rules of Criminal Procedure, by requiring criminal prosecutions to be had not only in the judicial district in which the crime or offense was committed, but in the election district within that judicial district at a location convenient to the parties and witnesses.

* Sec. 3. It is the intent of this Act to make the administration of justice more accessible to the people of rural areas of the state. In conjunction with the amendments in this Act, it is the legislative intent that AS 22.10.140, providing for the temporary assignment of superior court judges anywhere in the state, be fully implemented.

Permitted to become law without signature: June 4, 1971
Actual effective date: September 2, 1971

Gentlemen:

I am enclosing descriptions for the judicial districts and a map showing how they would look. These descriptions have the advantage of simplicity of location and would permit the state the economic benefits which flow from the fact that the judicial districts and transportation routes are aligned.

The court is in favor of such alignment, but wants the description clearly understandable to all. I am asking all presiding superior and district court judges to comment directly to you with a cross-copy to me.

Sincerely yours,

Robert C. Erwin
Associate Justice

FIRST JUDICIAL DISTRICT

The First Judicial District shall include that portion of Alaska east of the official boundary between Alaska and Canada running on a line from the Arctic Ocean to the Gulf of Alaska.

SECOND JUDICIAL DISTRICT

The Second Judicial District shall include that portion of Alaska enclosed by starting from a point commencing at 70° N. Latitude and 164° W. Longitude; thence east along 70° N. Latitude to 70° North Latitude and 156° W. Longitude; thence south along 156° W. Longitude to that point where it meets the Arctic Circle; thence west along the Arctic Circle to 160° W. Longitude; thence south along 160° W. Longitude to 63° N. Latitude; thence west along 63° to the Bering Sea, to include all islands of Alaska offshore from such land mass.

THIRD JUDICIAL DISTRICT

The Third Judicial District shall include that portion of Alaska south of 63° N. Latitude, except for the area set forth in the First Judicial District.

FOURTH JUDICIAL DISTRICT

The Fourth Judicial District shall include that portion of Alaska north of 63° N. Latitude except for the area set forth in the Second Judicial District.

STATE OF ALASKA
THE LEGISLATURE

POUCH Y - STATE CAPITOL
JUNEAU, ALASKA 99801

LEGISLATIVE AFFAIRS AGENCY

January 17, 1972

M E M O R A N D U M

TO : Rep. William J. Moran, Chairman
House Judiciary Committee

FROM : Arthur H. Peterson, Revisor of Statutes

SUBJECT: Reapportionment and redistricting

This is a brief reply to your question, "What can the legislature do about reapportionment and redistricting?" It is based on a quick review of our constitution and statutes but not on extensive research into the case law and analytical commentary of authorities.

As you know, the Alaska Constitution's art. VI deals with this subject (referring to the districts set out in art. XIV) and does not specify a legislative role; nor do the statutes specify a role for the legislature in the redistricting process. Three types of action appear open: (1) amend the statutes, (2) amend the constitution, (3) seek judicial redress. In the comments below, distinction is to be made between action which could be taken with regard to the recent redistricting proclamation of the governor and that which could be taken in anticipat on of the next decennial redistricting.

(1) AS 15 could be amended by adding guidelines for the reapportionment board's activities and recommendations, supplementing basic requirements stated in art. VI, sec. 6 of the Alaska Constitution and by the courts. If there is concern about the recent proclamation's early termination of some Senate terms, a statute prohibiting that would probably be constitutional and appropriate. Legislative control of the budget is, of course, one means of affecting the composition of the reapportionment board. One thing that could not be done is the enactment of a (valid) statute nullifying the recent proclamation; if the proclamation was issued in accordance with the constitution, such a statute would be invalid.

(2) The two statutory possibilities mentioned above could be used in the constitution instead. In addition, the constitution could state differently or more specifically

the composition of the reapportionment board (such as by requiring bipartisan or multi-partisan representation on the board). Or an amendment could change the method of selection of the board, perhaps to require legislative confirmation or legislative naming of certain members or the naming of some members by a person or body other than either the governor or the legislature such as the chief justice or the central committee of each major political party. Or the reapportionment board could be given more than a mere advisory role, which would strengthen the legislative voice if the method of selecting board members is changed. And art. VI could and should be substantially amended to reflect court decisions handed down since our constitution became effective; i.e., the periodic redistricting of the Senate districts should be specified, with appropriate tailoring of various provisions in that article. In making any changes in the constitution, the legislature would, of course, want to avoid assuming too dominant a role because of the inherent conflict of interests involved.

(3) It would seem that the only way to change the recent proclamation would be through court action. Art. VI, sec. 11 of the Alaska Constitution provides for legal action in the superior court "to compel the governor, by mandamus or otherwise, to perform his reapportionment duties or to correct any error in redistricting or reapportionment." This approach is available to "any qualified voter." Possible grounds for such an action would be the composition of the reapportionment board, the particular districts established (if they are felt to be in violation of judicial decisions or the standards set out in the Alaska Constitution), the early termination of some Senate terms (there being some question as to whether the governor can legally terminate constitutionally established terms), the failure to treat all Senate terms alike (with regard to early termination) and all present multi-member districts alike (there being some question as to whether the equal protection guarantees of the Alaska and United States Constitutions have been satisfied). Needless to say, this brief statement of possible grounds for questioning the proclamation should not be interpreted as an assurance of the success of the court action. A challenge on the sole ground of the board's composition at this late date seems likely to fail through application of the doctrine of laches or the art. VI, sec. 11 time limits. At any rate an action to "compel correction of any error in redistricting or reapportionment" must be brought within 30 days following the proclamation, i.e., by January 29 (or rather January 28, since the 29th is a Saturday).

HB-350

THE SUPREME COURT OF THE STATE OF ALASKA

ORDER NO. ___

ESTABLISHING RECORDING DISTRICTS

FOR THE STATE OF ALASKA

Effective Date: _____

PREFACE

(1) Under the provisions of AS 22.05.160 -

> The supreme court is empowered to establish, modify or discontinue recording districts or precincts; to prescribe the records to be maintained and the instruments to be recorded and the accounting for recording fees; to engage and compensate recorders, deputy recorders and clerks, to require district judges to act as recorders where, and to the extent, necessary; to prescribe recording fees and to do all things necessary to maintain the recording system established under the laws of this state.

(2) Pursuant to the above statutory authority, the supreme court established recording districts and places of recording within each district by Order No. 12, dated April 25, 1960. That order was revised on December 1, 1964, and later was amended on June 16, 1967, August 15, 1967, October 16, 1969, and September 11, 1970.

(3) Order No. 12, as revised and amended, contains the geographical descriptions of each recording district. In addition, the supreme court adopted as the official maps describing the boundaries of each recording district the maps in a set entitled: "Alaska Recording District Portfolio, Dated September 1, 1964", as prepared by Tryck, Nyman & Hayes, Consulting Engineers,

Anchorage, Alaska. This set of maps consisting of approximately 153 sheets is available for inspection in the office of each recorder.

(4) Order No. 12, as revised and amended, establishes 36 separate recording districts in Alaska. This Order No. ___ reduces that number to three recording districts for the entire state, with one place of recording and filing in each of the three districts.

(5) This action has been taken, giving consideration -

(a) to the necessity of securing better means and facilities to preserve documents and instruments permitted or required by law to be recorded or filed, from damage, loss, deterioration, or destruction by reason of time, fire and other elements, and other factors;

(b) to the existence of modern technological facilities for microfilming instruments or documents, with provision for immediate retrieval so that copies can be obtained quickly and at modest cost;

(c) to the existence of modern means of transportation and communication;

(d) to the reduction in cost to the public that will result from this action.

(6) Attached to this order is a map of Alaska showing the boundaries of the recording districts established by this order.

THE SUPREME COURT OF THE STATE OF ALASKA

ORDER NO. ___

IT IS ORDERED:

(1) There are established in the state of Alaska 3 recording districts, with places of recording, as follows:

(a) Juneau Recording District.

The Juneau Recording District shall include that portion of Alaska south of the line of 60 degrees north latitude, and west of the meridian of 128 degrees west longitude to the meridian of 140 degrees west longitude.

Place of Recording: Juneau, Alaska.

(b) Anchorage Recording District.

The Anchorage Recording District shall include that portion of Alaska south of the line of 64 degrees north latitude, and west of the meridian of 140 degrees west longitude, and east of the meridian of 172 degrees east longitude.

Place of Recording: Anchorage, Alaska.

(c) Fairbanks Recording District.

The Fairbanks Recording District shall include that portion of Alaska north of the line of 64 degrees north latitude, and west of the meridian of 140 degrees west longitude.

Place of Recording: Fairbanks, Alaska.

(2) All districts adjacent to tidal waters shall extend three nautical miles seaward of mean lower, low water or headlands.

(3) The filing and recording of all documents or instruments required or permitted by law to be filed or recorded within a particular recording district shall be filed or recorded by recorders designated by the supreme court for each recording district. Such filing and recording shall be done in accordance with law, and with instructions of this court or the Administrative Director of Courts.

(4) If there is reasonable uncertainty because of a boundary line separating recording districts whether a filing or recording should take place in one district or another, such filing or recording may be made in more than one recording district.

(5) The degrees and lines of longitude and latitude referred to in this order are as shown on the attached map of Alaska, entitled "Alaska Recording Districts - Boundaries". Copies of the larger editions of this map, which show more detail, may be obtained at a cost of $_____ each from the following places:

(Here name appropriate places, such as the Administrative Director of Courts, the Clerk of the Supreme Court, the offices of the recorders, clerks of other courts, etc.)

(6) This order shall be effective on _____, and shall govern all filings and recordings commencing on that date.

(7) The recording districts established by Supreme Court Order No. 12, as revised and amended, are abolished on the effective date of this order. All records, files and books relating to such original recording districts shall be transferred to the appropriate recording districts established by this order, in accordance with instructions from the Administrative Director of Courts. The effectiveness of filings and recordings made in accordance with Order No. 12 as revised and amended, prior to the effective date of this order, shall not be affected by this order.

160. [Repealed]
170. Impeachment
180. Restrictions
190. Compensation

Sec. 22.10.010. Establishment of superior court. There shall be one superior court for the state. The court shall consist of four districts bounded as follows:

First District: the area within election districts numbered one to six both inclusive, as said districts are described in art. XIV of the state constitution on March 19, 1959;

Second District: the area within election districts numbered 21 to 24, both inclusive, as said districts are described in art. XIV of the state constitution on March 19, 1959;

Third District: the area within election districts numbered seven to 15, both inclusive, as said districts are described in art. XIV of the state constitution on March 19, 1959; and

Fourth District: the area within election districts numbered 16 to 20, both inclusive, as said districts are described in art. XIV of the state constitution on March 19, 1959. (§ 16 ch 50 SLA 1959)

Am. Jur. and C.J.S. references. — 14 Am. Jur., Courts, § 1 et seq. 21 C.J.S. Courts §§ 136, 137, 147 to 163; 48 C.J.S. Judges §§ 12 to 28.

Sec. 22.10.020. Jurisdiction. (a) The superior court is the trial court of general jurisdiction, with original jurisdiction in all civil and criminal matters, including but not limited to probate and guardianship of minors and incompetents. The jurisdiction of the superior court extends over the whole of the state. The superior court and its judges may issue injunctions, writs of review, mandamus, prohibition, habeas corpus and all other writs necessary or proper to the complete exercise of its jurisdiction. A writ of habeas corpus may be made returnable before any judge of the superior court. The superior court has jurisdiction in all matters appealed to it from a subordinate court, or administrative agency when appeal is provided by law. Appeals are a matter of right, but no appeal from a subordinate court may be taken by the defendant in a criminal case after a plea of guilty, except on the ground that the sentence was excessive, as further provided by this section. No appeal may be taken by the state, except to test the sufficiency of an indictment or information. An appeal to the superior court may be taken on the ground that a sentence of imprisonment of 180 days or more was excessive and the superior court in the exercise of this jurisdiction has the power to modify the sentence appealed from upward or downward. The hearings on appeal from a final order or judgment of a subordinate court or administrative agency shall be on the record unless the superior court, in its discretion, grants a trial de novo, in whole or in part.

(b) In case of an actual controversy within the state, the superior court, upon the filing of an appropriate pleading, may declare the rights

Rep. Moran

HB-350

February 9, 1972

M E M O R A N D U M

TO: Chief Justice Boney
Justice Rabinowitz
Justice Connor
Justice Erwin
Justice Boochever

INFO: Robert N. Reeves, Administrative Director
Josephine M. McPhetres, Clerk

FROM: Justice Dimond (Retired)

SUBJECT: Recording Districts

(1) I presume that the recording districts established by Supreme Court Order No. 12 originated from the old recording districts of territorial days established under the authority of section 18-1-1, ACLA 1949.

(2) The territorial recording districts were geared to judicial divisions, and after statehood, to judicial districts. Thus, each judicial district had within its boundaries a number of complete recording districts.

But later changes evolved. The Noatak-Kobuk Recording District, with place of recording at Kotzebue, which is within the Second Judicial District, was consolidated with the Fairbanks Recording District in the Fourth Judicial District. And later the Wade-Hampton Recording District, also located in the Second Judicial District, was consolidated with the Bethel Recording District, which is in the Fourth Judicial District.

(3) Under state law there is no necessary relationship between the location of a judicial district and a recording district. In 1959 four judicial districts were established, and they were described in accordance with the 24 election districts established by article XIV of the state constitution. See AS 22.10.010. For your information I enclose a map of the election districts as they existed at the time of statehood, and from this and AS 22.10.010 you can find the boundaries of the existing judicial districts. This, however, is subject to change

by the legislature. For example, the Governor has had introduced this year Senate Bill No. 295 which would change to some extent the boundaries of the judicial districts. A copy of that bill is enclosed.

The power to establish recording districts is contained in a different section of the law, i.e., AS 22.05.160. This statute, which confers upon the supreme court the power to establish recording districts, says nothing as to the necessity of those districts being related to judicial districts. For that matter, I suppose, the entire state could be made one recording district.

(4) Also, there is no necessary relationship between election districts and recording districts. By the power of reapportionment, the Governor can change the size and area of election districts under article VI, section 6 of the constitution. There is nothing in the constitution relating to recording districts, and as I have noted, the legislature, by AS 22.05.160, has given the authority to the supreme court to establish recording districts.

(5) There are presently 36 recording districts in Alaska. I believe that the public convenience and necessity would be better served by a much lesser number. This may not have been true in the early territorial days before the advent of modern means of communication and transportation. But with technological progress, such as efficient and speedy air travel, computers, and microfilm, it seems to me that the time has come to greatly reduce the number of recording districts.

(6) I believe there is ample justification for this action at this time, or in the near future. The multitude of documents that are required by law to be filed or recorded in designated recording districts are not, in many occasions, secure. (A brief description of many of the documents required to be filed or recorded is contained in the Magistrates' Handbook at pages 280-290.) These documents are subject to damage or loss by fire or other elements, or simply by reason of fading by the passage of time, or by inadequate storage facilities, or by the inefficient keeping of the records by magistrate-recorders. To remedy this in each recording district by the construction of proper, fireproof facilities, and the installation of microfilm facilities or other efficient copying equipment, would involve a prohibitive cost, which would not bear any reasonable relation to the convenience of the public. Furthermore, in some areas it may be impossible to find magistrates to act as recorders who will be able to perform all of the recording functions efficiently and effectively.

(7) I believe this situation can be remedied by establishing three large recording districts with a place of recording for each district in a city which will allow for the installation of adequate, modern facilities, such as microfilm equipment, fireproof storage, training new personnel, etc. In order to give you my present thoughts on this matter, I have prepared the enclosed form of order, where I suggest three recording districts, with places of recording, and of filing, at Juneau, Anchorage and Fairbanks. (As to the necessity of filing instruments, as distinguished from recording them, see the Uniform Commercial Code, AS 45.05.768.)

(8) I thought that perhaps the most simple method of describing the boundaries of these districts would be by degrees of meridians and lines of degrees of latitude, which will appear on any official map of Alaska. This does away with the very complex geographical descriptions contained in Order No. 12, and the 153 maps of existing recording districts in the official recording district portfolio, dated September 1, 1964, as prepared by Tryck, Nyman & Hayes, Consulting Engineers, of Anchorage. These maps, by the way, are cumbersome because of their bulk, and because segments of certain recording districts are contained on a number of different sheets which are not filed in sequence. I think by using the degrees and lines of longitude and latitude, geographical descriptions would be unnecessary.

(9) The areas I have suggested are, of course, tentative. They can be modified, using the same system. For example, the degrees of longitude (or meridians) on the existing official recording district map go by "fours". I presume the degrees in between could be scaled by a cartographer or engineer and placed on a map of Alaska to show the boundaries of the recording districts. Also, there may be alternative methods of describing the boundaries without getting into complex geographical descriptions such as in Order No. 12. Possibly boundaries could be described by lines on the map going from one city or village or obvious landmark to another.

(10) Whatever method is adopted, I would suggest that you enlist the assistance of a trained cartographer or engineer before deciding on the final boundaries, in order to make certain that they are described accurately and represent what you intend to accomplish.

(11) One beneficial effect, among others, that this new arrangement would have, would be to free magistrates and district judges from time consuming recording functions so that they could devote more of their time to their primary function of performing their judicial duties of administering justice in the courts.

(12) Using the longitude-latitude concept, there are a large number of variations that can be made. For example:

(a) A recording center could be established at Nome, if thought desirable, by taking a portion of what I have suggested now be included in the Anchorage and Fairbanks districts and calling it the Nome Recording District.

(b) Similarly, a recording center could be established at Ketchikan by using an appropriate degree-line of latitude dividing Southeast Alaska into a Juneau Recording District and a Ketchikan Recording District.

(c) If it is considered advisable by the legislature, this same method of defining boundaries could be used to define the boundaries of judicial districts, instead of attempting to define those boundaries by election districts - the latter being subject to change by the Governor under the constitution. However, the considerations which might govern the legislature in creating judicial districts may not necessarily be the same as those which would influence the supreme court in creating recording districts. The latter may vary from time to time with shifts in population and air routes, highways, etc. And whether the legislature would wish to align judicial districts with certain recording districts as defined by the supreme court, is a question I cannot answer.

(13) Order No. 12 has been revised and amended so many times, I would suggest that if you choose to adopt this new approach, a new order number be used.

(14) If this suggested approach to the problem is not adopted, and Order No. 12 is retained, then it ought to be revised again (and the maps would have to be revised also) to show the consolidation of the Noatak-Kobuk district with the Fairbanks district, and the Wade-Hampton district with the Bethel district, and other changes that have been made.

(15) For your convenience, I am attaching copies of the existing recording district maps, upon which I have outlined with red ink the boundaries of the recording districts I suggest be created.

(16) If new recording districts are established, I would also suggest that the order be printed on letter size paper, with a title cover, and bound in the manner of binding briefs. Also, there probably should be included with the order, at the end, a map showing the boundaries of the recording districts.

(17) I trust that you will not feel I am intruding in any way in the function committed to the supreme court by the legislature. The reason I have done what I have is that I have been interested in this type of project for quite some time, but did not have the time until now to do anything about it. If I can be of further assistance, I shall be happy to help out in any way I can.

(18) On February 7 I had occasion to call Justice Erwin in Anchorage and I spoke to him about what I was doing. He suggested that I send copies of this memo and the attachments to Senator Ziegler and Representative Moran, which I am doing. If I can be of any assistance to either of these gentlemen and their respective committees, I shall be most happy to do whatever I can to help them. They can reach me by calling me at home: 364-3325, and I can be available at their convenience.

JHD

JUDICIARY COMMITTEE
Pouch V
Juneau, Alaska 99801

January 24, 1972

The Honorable George F. Boney
Chief Justice of the Supreme
Court of Alaska
941 Fourth Avenue
Anchorage, Alaska 99501

Re: HB 350 - Creating Fifth Judicial District

Dear Mr. Chief Justice:

The above-named bill was introduced in the First Session of the Seventh State Legislature by Representatives Hohman and Moore. It would create a fifth judicial district with headquarters in Bethel. While I can understand that the administration of justice in rural Alaska might be facilitated by the enactment of HB 350, or a similar proposal, this committee has had no recommendation for such action from the Judicial Council, nor was such action recommended in your State of the Judiciary message to the Joint Session on January 20. (I noted, of course, that you did comment on the subject of "bush" justice, and made recommendations with respect to both judicial officers and facilities for rural Alaska.)

The House Judiciary Committee is also developing legislation to correct the problem created by the fact that, whereas venue was placed in the several election districts pursuant to Ch. 126, SLA 1971, the geographical limits of some of such districts have been changed pursuant to Governor Egan's Proclamation of Reapportionment and Redistricting, dated December 30, 1971. Not all such changes will make a difference for judicial purposes but the change in the former Election District Eight (Anchorage), if no other, will require legislative action at this session. (Legislation incidentally, which we hope to draw without prejudice to any judicial review of the validity of the proclamation.)

At various times during the last session, and again during this session, mention has been made of problems, administrative and otherwise, which are caused by the fact that air routes and other considerations are not always compatible with the allocation of areas to each of the Second and Fourth Judicial Districts. I understand, also, that the further division of these judicial districts into election districts, while probably serving the political purpose, do not serve equally well the judicial purpose.

The House Judiciary Committee requests that the Judicial Council give consideration to a study of:

1. The present organization of the several judicial districts with respect to the appropriateness of their boundaries; and

2. The appropriateness of the election district as the geographical consideration determining venue within a judicial district.

Section 1, Article IV, of the Alaska Constitution provides that judicial districts shall be established "by law," i.e., by action of the Legislature. If memory serves me, the State act establishing the four judicial districts followed the boundaries of the judicial divisions as they were established in earlier times by act of Congress and as they had become traditional to Alaska. The very significant changes which have since occurred mandate our reviewing the appropriateness of these districts.

Although we may anticipate that reapportionment and redistricting will only follow each decennial census, the fact is, as mentioned, that the delineation of such districts pursuant to the "one man, one vote" rule, or any other rule concerned with insuring reasonably equal representation of our citizens in the legislative process, may not only not serve the judicial purpose, but may tend to defeat that purpose. This committee requests, therefore, that you consider whether it would be more appropriate to provide another method for delineating the local areas for the purpose of establishing venue.

The committee understands that the study requested may not be completed in time for legislative action at this session of the Legislature. The urgency of dealing with the current problem of redistricting, as it affects venue, requires that action not abide the completion of this study. The committee will maintain close contact with your office in formulating the interim solution.

Sincerely yours,

William J. Moran
Chairman

No. 4

HB 451
&
HB 452

January 21, 1972

Richard Wheatley, Esquire
University Bank
Post Office Box 1067
Stillwater, Oklahoma 74074

Re: HB 451 - Uniform Foreign Money - Judgement Recognition Act
HB 452 - Uniform Enforcement of Foreign Judgements Act

Dear Mr. Wheatley:

In the First Session of the Seventh Alaska Legislature (1971), I introduced, and the House passed, the subject bills. They are now in the Senate Judiciary Committee. At the time of their introduction, I knew that both uniform acts had been adopted in Oklahoma. Although Sen. Robert H. Ziegler, Chairman of the Senate Judiciary Committee, has agreed that his committee will consider these bills, you will appreciate that they are not matters about which great interest and enthusiasm are likely to be generated. Of course, I think they would be useful additions to Alaska law.

Because of your association with the National Conference, and because of your experience with such matters in Oklahoma, I am requesting that, in the course of your visit with us later this month, you discuss these two bills with Senator Ziegler and me, and, possibly the Senate Judiciary Committee. I am enclosing copies of both bills as passed in the House.

Please accept my very personal thanks for your assistance.

Sincerely,

William J. Moran

HB 444

January 18, 1972

Mr. John M. Asplund, Chairman
Greater Anchorage Area Borough
3500 Tudor Road
Anchorage, Alaska 99507

Re: SB 174 and HB 444 - Repayment of Profit from Sale of School Bonds

Dear John:

You are certainly familiar with the subject bills for the repayment to the Greator Anchorage Borough of the really unconscionable profits realized by the State on those bonds purchased from the Borough for re-sale. SB 174 was introduced in the Senate by Senators Croft, Josephson, and Thomas; HB 444 was introduced in the House by me with the co-sponsorship of the other members from Anchorage.

I enclose a copy of the form of the Fiscal Note furnished to the Senate Finance Committee, the memorandum attached thereto reflecting that the profit to the state on the sale was $836,263. It is this sum which we seek to pay to the Borough. I am also happy to note that these proposals are finally receiving some attention in Senate Finance.

I am sending a copy of this letter and its enclosure to Joe Montgomery.

I am also herewith sending my personal greetings to both of you.

Sincerely,

William J. Moran

The Legislature of the State of Alaska
FISCAL NOTE
Second Session - Seventh State Legislature

I. REQUEST

Bill Identification: Senate Bill No. 174 and House Bill No. 444
Title: Repayment of profits on bonds purchased by the State.
Requested by: Legislative Finance Date: 1-10-72
Return Date Requested: 1-18-72
Agency: Department of Revenue Program: Fiscal Services

II. FISCAL DETAIL

Budget Request Unit(s) Affected:

A. EXPENDITURES: (Thousands of dollars)

	OBJECT	FY 72	FY 73	FY 74	FY 75	FY 76	FY 77
100	PERSONAL SERVICES						
200	TRAVEL						
300	CONTRACTUAL						
400	COMMODITIES						
500	EQUIPMENT						
600	LAND & STRUCTURES						
700	GRANTS, CLAIMS, ETC.						
	TOTAL	-0-					

B. FUNDING: (Thousands of dollars)

	GENERAL FUND						
	FEDERAL FUNDS						
	OTHER						

C. POSITIONS:

	PERMANENT/TEMPORARY	0 /	/	/	/	/	/
	MAN MONTHS (P./T.)	0 /	/	/	/	/	/

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

See Attached Memorandum indicating details of sales price received state, sum paid by state and excess in amount of $836,263.00 that would be paid to the Greater Anchorage Borough as the issuing political subdivision of bonds purchased by the state and sold subsequently at a profit.

National Fire Protection Association

The National Fire Protection Association (NFPA) is a non-profit technical and educational organization to promote the science and improve the methods of fire protection. Organized in 1896, the Association has a broad-scale standards-making program to aid in its objective to reduce loss of life and destruction of property by fire. The Association publishes the standards developed under its aegis in pamphlet editions (such as this) and in what is known as the National Fire Codes (a ten-volume compilation annually updated, totaling approximately 8,000 pages). For full information about the Association and for a list of its publications, write to the Association's Headquarters.

Recreational Vehicle Institute

The Recreational Vehicle Institute is a national trade association exclusively serving the recreational vehicle industry. Its manufacturing members come from throughout the U.S.A. and produce travel trailers, truck campers, camping trailers and motor homes. The Institute sponsors and directs recreational vehicle trade shows, provides information to the consumer and the trade, issues news releases concerning industry developments and has a Standards Department which assists in the development of such national codes as this Standard. Compliance with this Standard is a mandatory requirement for membership in the RVI for those building recreational vehicles.

Trailer Coach Association

The Trailer Coach Association represents the manufacturers of mobile homes and recreational vehicles, dealers and suppliers in the Western States while drawing its members from all sections of the country. Founded in 1936, the Association sponsors mobile home and recreational vehicle shows in the major western cities and has research programs dedicated to advance the proper use of mobile homes and recreational vehicles. It has a Standards Department which works with the enforcing officials in the various Western States to encourage compliance with the recommendations contained in this standard. The Trailer Coach Association currently has a staff of 18 and a membership of 742.

American National Standards Institute

The American National Standards Institute (ANSI) is the national coordinating institution for voluntary standardization in the U.S.A. through which organizations concerned with standardization may cooperate in recognizing, establishing and improving standards in this country. Approval of a standard by the Institute is based on a consensus of those essentially concerned with its scope and provisions. The Institute has a Member Body Council, a Consumer Council, and a Company Member Council. The Member Body Council is composed of non-profit technical, professional, scientific, trade, or other membership associates, societies, or organizations which are of national scope and recognition. The National Fire Protection Association, the Recreational Vehicle Institute, and the Trailer Coach Association are Member Bodies of the ANSI.

Standard for Recreational Vehicles

(Travel Trailers, Camping Trailers, Truck Campers, Motor Homes)

Installation of Plumbing, Heating and Electrical Systems

Proposed American National Standard A119.2 — 1970

NFPA No. 501C — 1970

This Edition of Standard for Recreational Vehicles

This Standard has been developed by the American National Standards Committee on Mobile Homes and Recreational Vehicles, sponsored jointly by the Mobile Homes Manufacturing Association, the National Fire Protection Association, the Recreational Vehicle Institute and the Trailer Coach Association. Personnel of the Committee are listed on pages 2 through 5.

This edition of the Standard was adopted as an NFPA Standard at the 74th Annual Meeting of the National Fire Protection Association on May 20, 1970, in Toronto, Canada. It has been approved by the Recreational Vehicle Institute and by the Trailer Coach Association. The Standard, in its present form, is being submitted to the American National Standards Institute for their approval. At such time as the Institute has opportunity to act upon this submittal, this Standard will be reissued, assuming such approval, as an American National Standard. Its present designation, as Proposed ANSI A119.2–1970, is to clearly indicate that the intent of this Standard is to replace the existing American Standard for Installations of Plumbing, Heating and Electrical Systems in Travel Trailers (A119.2–1963).

This edition of the Standard for Recreational Vehicles also replaces the coverage of travel trailers previously appearing in the 1964 Edition of the NFPA Standard for Fire Prevention and Fire Protection in Mobile Homes and Travel Trailers (NFPA No. 501B–1964). Attention is invited to the Standard for Mobile Homes (ANSI A119.1–1969; NFPA No. 501B–1968) for those concerned with this type of equipment.

Recreational Vehicles are defined as vehicular type units primarily designed as temporary living quarters for recreational, camping, or travel use which either have their own motive power or are mounted on or drawn by another vehicle. The basic types of recreational vehicles are travel trailers, camping trailers, truck campers, and motor homes. Each of these is defined further herein.

In conformance with the policies of the American National Standards Institute and the four sponsors of this project, the Committee on Mobile Homes and Recreational Vehicles is constituted as a standing Committee with continuing responsibility to maintain and improve this Standard so that it might at all times be a useful and effective document to guide manufacturers and their suppliers concerning the installation of plumbing, heating and electrical systems in recreational vehicles with the basic objective of protecting the safety and health of the owners and occupants of the vehicles. The Standard in its present form does not cover the construction of recreational vehicles or features related to the safety and performance of the vehicles when in use as a vehicle. Federal and state motor vehicle regulations are applicable to these vehicles and should be referred to in connection therewith. The Standards of the Society of Automotive Engineers are cited where appropriate.

The participation of the National Fire Protection Association as a sponsor of this project is administrative and undertaken in the sole interest of safety to life and property from fire and allied hazards. Some portions of this Standard cover areas outside the scope of NFPA's normal sphere of activity but are of interest and concern to the other sponsors and to users of recreational vehicles. The NFPA Board of Directors has authorized the Association's participation with the understanding that its responsibility extends only to those areas within its scope.

In order to aid users of this Standard, an Official Interpretations Procedure has been developed and is detailed herein.

Official Interpretations Procedure
Committee on Mobile Homes and Recreational Vehicles

1. **General.** There is hereby established an Official Interpretations Procedure for the Committee on Mobile Homes and Recreational Vehicles for the purpose of providing official explanations of the meaning or intent of any specific provision or provisions of any standard developed under the jurisdiction of the Committee.

NOTE: This Official Interpretations Procedure does not prevent any Committee Chairman or Member from commenting on the meaning or intent of any provision of any such document, provided that the comment is clearly identified as not being an Official Interpretation of the Committee.

2. **Nature of Official Interpretations.** Two General forms of Official Interpretations shall be recognized:

(a) Those making an Interpretation of the literal text.

(b) Those making an Interpretation of the intent of the Committee when the particular text was adopted.

No judgments will be rendered by the Interpretations Committee regarding compliance with any of the Committee's standards of engineering drawings.

3. **Procedures for Requesting Official Interpretations.** Those desiring an Interpretation shall direct their requests to the Chairman or Secretary of the Committee, c/o National Fire Protection Association, 60 Batterymarch Street, Boston, Massachusetts 02110, supplying five identical copies of a statement in which shall appear specific references to a single problem, identifying article, section or paragraph of the document with which they are concerned. Such a request shall be on the business stationery of the inquirer and shall be duly signed. When applications involve actual field situations they shall so state, and all parties involved shall be named.

4. **Committee Handling of Requests for Official Interpretations.** The Committee shall not be under any obligation to process requests for Official Interpretations in any specified time period nor to issue an Official Interpretation except at its own convenience. The Committee officers may process the request for an Official Interpretation exactly the way it has been submitted, or they may rephrase the question, if desired, to clarify the intent, or they may refuse to consider the request if they find it not to be in proper form or consistent with Paragraph 2. If acceptable for consideration, the request for an Official Interpretation shall be submitted to an Interpretations Subcommittee made up of five or more individuals selected by the Chairman or by the Secretary (with the approval of the Chairman). In selecting those to serve the Chairman or the Secretary will select Members of the appropriate Subcommittee having jurisdiction over the question posed and may also include up to two members of the appropriate Task Group who are not Subcommittee members, but no Member, Alternate, or Task Group representative shall be eligible for such appointment if he is directly involved in the particular case prompting the request for the Interpretation. The Personnel of each Interpretations Subcommittee may be varied with each request.

5. **Voting on Interpretations.** In any case where there is not unanimous agreement in the Interpretations Subcommittee, the request for Interpretation shall be referred to the Subcommittee having primary jurisdiction for a decision. Under these conditions, adoption of an Official Interpretation requires approval by a three-quarters majority vote of that Subcommittee. Where a three-quarters majority vote is not received, the item shall be placed on the docket

for regular processing by the Subcommittee for subsequent possible action. If the Interpretations Subcommittee unanimously agree or a three-quarters affirmative vote is secured from the Subcommittee having primary jurisdiction, the Executive Committee of the Committee on Mobile Homes and Recreational Vehicles shall be informed of the decision reached and shall be requested to ballot on said decision. If unanimous agreement is reached, the applicant shall be informed promptly and as soon as possible the Interpretation shall be published by the sponsors in the publications each distributes to its members and announced in a suitable news release by the Secretary which shall be sent to the American National Standards Institute for their information and guidance. If the Executive Committee does not concur unanimously, the question shall be placed before the full membership of the Committee on Mobile Homes and Recreational Vehicles, where a three-quarters majority vote must be secured to complete the processing of the Interpretation as indicated in the previous sentence.

6. **Action Following Issuance of Official Interpretations.** Following the issuance of an Official Interpretation, the Subcommittee shall be obliged to review the item on which the Interpretation has been issued with a view to determining whether any change may be desired in the standard to clarify or correct the condition which brought about the request for the Official Interpretation. If such a change is indicated, the Subcommittee shall process such a change in conformance with the usual procedures established under the rules of procedure of the Committee as a whole.

7. **Time Limit on Interpretations.** Any Official Interpretation issued shall apply only to the edition of the document for which the Interpretation is made.

Standard for Recreational Vehicles

Installation of Plumbing, Heating, and Electrical Systems

Proposed American National Standard A119.2 — 1970

NFPA No. 501C — 1970

Definitions Common to Parts I, II, and III

Authority Having Jurisdiction: The organization, office or individual responsible for "approving" equipment, an installation, or a procedure.

Camping Trailer: A vehicular portable unit mounted on wheels and constructed with collapsible partial side walls which fold for towing by another vehicle and unfold at the camp site to provide temporary living quarters for recreational, camping, or travel use. (See "Recreational Vehicle")

Motor Home: A vehicular unit built on a self-propelled motor vehicle chassis, primarily designed to provide temporary living quarters for recreational, camping, or travel use. (See "Recreational Vehicle")

Recreational Vehicle: A vehicular type unit primarily designed as temporary living quarters for recreational, camping, or travel use, which either has its own motive power or is mounted on or drawn by another vehicle. The basic entities are: travel trailer, camping trailer, truck camper and motor home.

Shall: Mandatory rules are characterized by the use of the word "shall."

Should: Advisory rules are characterized by the use of the word "should."

Travel Trailer: A vehicular portable unit, mounted on wheels, of such a size or weight as not to require special highway movement permits when drawn by a motorized vehicle; primarily designed and constructed to provide temporary living quarters for recreational, camping, or travel use; and of a body width of no more than eight feet (8′) and a body length of no more than thirty-two feet (32′) when factory equipped for the road. (See "Recreational Vehicle")

Truck Camper: A portable unit, designed to be loaded onto, or affixed to, the bed or chassis of a truck, constructed to provide temporary living quarters for recreational, camping, or travel use. Truck campers are of two basic types as defined below:

a. SLIDE-IN CAMPER: A portable unit designed to be loaded onto and unloaded from the bed of a pickup truck, constructed to provide temporary living quarters for recreational, travel or camping use.

b. CHASSIS-MOUNT CAMPER: A portable unit designed to be affixed to a truck chassis, and constructed to provide temporary living quarters for recreational, travel or camping use.

Part I — Plumbing Systems

1. Introduction

1.1 Those members of the engineering profession and others associated with the design, manufacturing, installation, and inspection of recreational vehicle plumbing systems have been aware of the need for uniform technical standards leading to the safe and sanitary use of this special type of equipment. They have also recognized that because of conditions of transport and use, existing plumbing standards for permanent buildings are not completely applicable to recreational vehicles. It is with these factors in mind that Part I of this Standard has been developed.

1.2 Much of the material in Part I has been taken from, or is based on, nationally recognized standards for plumbing materials, fixtures, fittings, and equipment.

2. Scope

2.1 Part I of this Standard covers the plumbing materials, fixtures, fittings, and equipment installed within or on recreational vehicles.

2.2 This Standard is not intended as a design specification or an instruction manual for untrained persons.

2.3 Wherever other nationally recognized standards for plumbing materials, fixtures, fittings and equipment and this Part differ, the requirements of the latter shall apply.

2.4 The provisions of this Standard are not intended to prevent the use of any material, appliance, installation, device, arrangement, or method of construction not specifically prescribed herein, provided any such alternative has been approved or listed. The enforcement authority shall approve such alternate if the material, appliance, installation, device, arrangement, or method of construction is at least the equivalent of that prescribed by this Part, and may require tests or proof of compliance to substantiate any claims that may be made regarding the use of any such alternate.

3. Definitions

Air Gap: The unobstructed vertical distance through the free atmosphere between the opening from any pipe or faucet supplying

potable water to a tank, plumbing fixture, or other device and the flood-level rim of the receptacle.

Approved: Means acceptable to the authority having jurisdiction.

Backflow: The flow of water or other liquids, mixtures, or substances into the distributing pipes of a potable supply of water from any source or sources other than its intended source.

Backflow Connection: Any arrangement whereby backflow can occur.

Backflow Preventer: A device or means to prevent backflow.

Body Waste: The discharge from any fixture, appliance or appurtenance containing fecal matter or urine.

Branch: Any part of the piping system other than a riser, main or vent stack.

Branch Vent: A vent connecting one or more individual vents with a vent stack.

Center: The midpoint between the right and left side of a recreational vehicle.

Certified: Means "listed" as defined herein.

Combination Compartment: A shower stall or recess that provides for or includes the installation of a toilet and is of such size and proportions that it may not be occupied by more than one person.

Common Vent. A vent connecting at the junction of fixture drains and serving as a vent for more than one fixture.

Continuous Vent: A vertical vent that is a continuation of the drain to which it connects.

Continuous Waste: A drain from two or more fixtures connected to a single trap.

Critical Level: The critical level, C-L or $\frac{C}{L}$ marking, on a backflow prevention device or vacuum breaker is a point established by the testing laboratory (usually stamped on the device by the manufacturer) which determines the minimum elevation above the flood level rim of the fixture or receptacle served on which the device may be installed. When a backflow prevention device does not bear a critical level marking, the bottom of the vacuum breaker, combination valve, or of any such approved or listed device shall constitute the critical level.

Cross Connection: Any physical connection or arrangement between two otherwise separate systems or sources, one of which con-

tains potable water and the other either water, steam, gas or chemical of unknown or questionable safety whereby there may be a flow from one system or source to the other, the direction of flow depending on the pressure differential between the two systems.

Developed Length: That length of pipe measured along the center line of the pipe and fittings.

Diameter: The nominal inside diameter designated commercially.

Drain: A pipe that carries waste, water, or water-borne wastes in a drainage system.

Drain Hose: The hose used for connecting the liquid and/or body waste drain outlet to a sewer inlet connection.

Drain Outlet: The lowest end of a main or secondary drain to which a sewer connection is made.

Drainage System: All piping within or attached to the structure that conveys body waste and/or liquid waste to the drain outlet or outlets.

Fixture Drain: The drain from the trap of a fixture to the junction of that drain with any other drain pipe.

Fixture Supply: The water supply pipe connecting a fixture to a branch water supply pipe or directly to a main water supply pipe.

Flood Level: The level in the receptacle over which water would overflow to the outside of the receptacle.

Flooded: The condition which results when the liquid in a container or receptacle rises to the flood-level.

Flush Tank: That portion of a toilet that is designed to contain sufficient water to adequately flush the fixture.

Flush Valve: A device located at the bottom of a flush tank for flushing a toilet.

Grade: See "Pitch."

Horizontal Branch: A drain pipe extending laterally, which receives the discharge from one or more fixture drains and connects to the main drain.

Horizontal Pipe: Any pipe or fitting that makes an angle of more than 45 degrees with the vertical.

Individual Vent: A pipe installed to vent a fixture drain.

Labeled: Equipment and materials bearing an inspection label, symbol, or other identifying mark of a recognized testing agency.

Length: The overall length of the recreational vehicle.

Liquid Waste: The discharge from any fixture, appliance, area or appurtenance which does not contain body waste.

Listed: Refers to plumbing materials, devices, fixtures, fittings, equipment, appliances, and accessories that are shown in a list published by a recognized agency, maintaining an adequate periodic inspection of current production of listed models, and whose listing states either that the material, device, fixture, fitting, equipment, appliance, or accessory complies with nationally recognized health and safety requirements or has been tested and found safe for use in a specified manner.

Main: The principal artery of the system to which branches may be connected.

Main Drain(s): The lowest piping of a drainage system which receives the liquid and/or body waste discharge from all the fixtures within the recreational vehicle and conducts these wastes to the drain outlet(s).

Pitch (or Grade): The fall (slope) of a pipe in reference to a horizontal plane expressed in inches per foot length.

Plumbing Fixtures: Receptacles, devices or appliances which are supplied with water or which receive liquid or liquid-borne wastes for discharge into the drainage system.

Toilet — Mechanical Seal: A toilet fitted with a water-flushing device and mechanically sealed trap.

Toilet — Recirculating Chemical: A self-contained, recirculating toilet in which the waste is chemically treated.

Toilet — Water Flush: A toilet fitted with a water flushing device and integral non-mechanical trap.

Trap: A fitting or device designed and constructed to provide a liquid seal that will prevent the back passage of air without materially affecting the flow of liquid waste through it.

Trap Arm: That portion of a fixture drain between a trap and its vent.

Trap Seal: The vertical depth of liquid that a trap will retain.

Vacuum Breaker: See "Backflow Preventer."

Vent Stack: A vertical vent pipe installed to provide circulation of air to and from the drainage system.

Vertical Pipe: Any pipe or fitting which makes an angle of 45 degrees or less with the vertical.

Waste Holding Tank: A liquid-tight tank for the temporary retention of body and/or liquid waste.

Water Distribution System: The potable water piping within or permanently attached to the recreational vehicle.

Water Service Connection: The fitting or point of connection of the vehicle water distribution system designed for connection to a potable water supply.

Water Storage Tank: A tank installed in a recreational vehicle for the purpose of storing potable water.

Wet Vent: A vent which also serves as a drain for one or more fixtures.

4. General Requirements

4.1 Minimum Requirements. Any plumbing system installed in a recreational vehicle shall conform, at least, with the provisions of this Standard. Requirements for any size, weight, or quality of material modified by the terms "minimum," "not less than," "at least," and similar expressions are "minimum standard."

4.1.1. Connections to Drainage System. All plumbing fixtures, drains, appurtenances, and appliances designed or used to receive or discharge liquid waste or body waste shall be connected to the recreational vehicle drainage system in a manner provided by this Standard.

4.1.2. Components. Plumbing materials, devices, fixtures, fittings, equipment, appliances, accessories, and appurtenances intended for use in or attached to a recreational vehicle shall be listed or certified by an approved listing agency, or be specifically approved by the enforcement authority when listing by an approved listing agency is not available.

4.1.3. Component Installations. All design, construction, and workmanship shall be in conformance with accepted engineering practices.

4.1.4. Prohibited Fittings and Practices.

4.1.4.1 Drainage or vent piping shall not be drilled and tapped for the purpose of making connections.

4.1.4.2 Except as specifically provided elsewhere in this Standard, vent pipes shall not be used as waste or drain pipes.

4.1.4.3 Fittings, connections, devices, or methods of installation that obstruct or retard the flow of liquid waste, body waste, or air in the drainage or venting systems in an amount greater than the normal frictional resistance to flow shall not be used unless their use is acceptable in this Standard or their use approved as having a desirable and acceptable function and their use of ultimate benefit to the proper and continued functioning of the plumbing systems.

4.1.4.4 Cracks, holes, or other imperfections in materials shall not be concealed by welding, brazing, or soldering or by paint, wax, tar, or other leak-sealing or repairing agents.

4.1.4.5 Piping, fixtures, or equipment shall be located so as not to interfere with the normal use or with the normal operation and use of windows, doors, or other required facilities.

4.1.4.6 Galvanized pipe shall not be bent or welded.

4.1.5 Alignment of Fittings. All valves, pipes, and fittings shall be installed in correct relationship to the direction of flow.

4.2 Protective Requirements.

4.2.1 Road Damage. Pipes, supports, drains, or outlets, or drain hoses shall not extend or protrude in a manner where they could be unduly subjected to road hazard.

4.2.2 Vermin Proofing. All exterior openings around piping shall be sealed to prevent the entrance of rodents.

5. Materials — Quality and Weight

5.1 Minimum Standards. Materials, fixtures, or devices used or entering into the construction of plumbing systems in any recreational vehicle shall be free from defect and shall conform to approved standards or the applicable standards shown in the Appendix to this Part.

5.2 Specific Usage. Each of the following sections indicates specifically the type of material presently permitted for use in the various parts of the plumbing system.

6. Joints and Connections

6.1 Tightness. Joints and connections in the plumbing system shall be gastight and watertight for the pressures required under testing procedures.

6.1.1 Assembling of Pipe. All joints and connections shall be correctly assembled for tightness. Pipe threads shall be fully engaged with the threads of the fittings. Plastic pipe and copper tubing shall be inserted to the full depth of the solder cup or welding sockets of each fitting. Pipe threads and slip joints shall not be wrapped with string, paper, putty or similar fillers.

6.1.2 Threaded Joints. Threads for screw pipe and fittings shall conform to the approved or applicable standard. All burrs shall be removed. Pipe ends shall be reamed out to size of bore, and all chips and cutting oil shall be removed. Pipe joint cement or thread lubricant shall be of approved type and applied to male threads only.

6.1.3 Solder Joints. Solder joints for tubing shall be made with approved or listed sweat solder type fittings. Surfaces to be soldered shall be cleaned bright. The joints shall be properly fluxed with noncorrosive paste type flux and made with approved or listed 50–50 solder or an approved solder having a higher melting temperature.

6.1.4 Plastic Pipe and Fittings. Plastic pipe and fittings shall be joined by installation methods recommended by the manufacturer.

7. Traps and Cleanouts

7.1 Traps.

7.1.1 Traps Required. Each plumbing fixture, except listed toilets and fixtures utilizing detachable waste holding tanks with integral traps, shall be separately trapped by approved water seal "P" traps. All traps shall be effectively vented.

7.1.2 Dual Fixtures. A two compartment sink, two single sinks, two lavatories, or a single sink and a single lavatory, with waste outlets not more than thirty inches (30″) apart and flood level rims at same level may be connected to one "P" trap and may be considered as a single fixture for the purpose of drainage and vent requirements.

7.1.3 Prohibited Traps.

7.1.3.1 A trap which depends for its seal upon concealed interior partitions shall not be used. Full "S" traps, bell traps, drum traps, crown-vented traps, and running traps are prohibited.

Exception: A trap which is an integral part of a detachable waste holding tank.

7.1.3.2 Fixtures shall not be double-trapped.

7.1.4 Material and Design. Each "P" trap shall be approved or listed.

7.1.5 Trap Seal. Each "P" trap shall have a water seal of not less than two inches (2″) and not more than four inches (4″) and shall be set true to its seal.

7.1.6 Size. "P" traps shall be not less than one and one-quarter inches (1¼″) in diameter when connected to a single fixture having no more than a two inch (2″) drain opening. A "P" trap shall not be larger than the waste pipe to which it is connected.

7.1.7 Distance from Trap to Vent. The distance between a "P" trap and its vent or vented waste line shall be in accordance with Table 2.

7.1.8 Length of Tailpiece. The vertical distance from a "P" trap to the fixture outlet shall not exceed twenty-four inches (24″).

7.1.9 Installation.

7.1.9.1 Grade of Trap Arm. The piping between a "P" trap and the fixture tee or the vented waste line shall be graded one-quarter inch (¼″) per foot and in no event shall have a slope greater than its diameter. The vent opening at fixture tees shall not be below the invert of the "P" trap outlet.

7.1.9.2 Trap Arm Offset. The piping between the "P" trap and vent may change direction or be offset horizontally with the equivalent of no more than 180 degrees.

7.1.9.3 Concealed "P" Traps. "P" traps with slip joint connections shall be accessible for repair and inspection.

7.2 Cleanout Openings.

7.2.1 Location of Cleanout Fittings.

7.2.1.1 Cleanouts shall be installed if the drainage system cannot be cleaned through fixtures or vent openings.

7.2.1.2 A full size cleanout shall be installed at the upper end of any section of drain piping which does not have the required minimum slope of a one-quarter inch (¼") per foot grade.

7.2.1.3 A cleaning tool shall not be required to pass through more than 360 degrees of fittings, excluding removable "P" traps, to reach any part of the drainage system.

7.2.2 Access to Cleanouts. Cleanouts shall be accessible through an unobstructed minimum clearance of twelve inches (12") directly in front of the opening. Each cleanout fitting shall open in a direction opposite to the flow or at right angles to the pipe. Concealed cleanouts that are not provided with access covers shall be extended to a point above the floor or outside of the recreational vehicle, with pipe and fittings installed, as required, for drainage piping.

7.2.3 Material. Plugs and caps shall be brass or approved or listed plastic, with screw pipe threads.

7.2.4 Design. Cleanout plugs shall have raised heads except that plugs at floor level shall have counter-sunk slots.

8. Plumbing Fixtures

8.1 General Requirements.

8.1.1 Quality of Fixtures. Plumbing fixtures shall have smooth impervious finishes, be free from defects and concealed fouling surfaces, be capable of resisting road shock and vibration, and shall conform in quality and design to approved or listed standards.

8.1.2 Strainers. The waste outlet of all plumbing fixtures, other than toilets, shall be equipped with a drain fitting that will provide an adequate unobstructed waterway.

8.1.3 Fixture Connections. Fixture tailpieces and continuous wastes in exposed or accessible locations shall be not less than No. 20 Brown and Sharpe gage seamless drawn-brass tubing or other approved pipe or tubing. Inaccessible fixture connections shall be constructed according to the requirements for drainage piping. Each fixture tailpiece, continuous waste, or waste and overflow shall be not less than one and one-quarter inches (1¼″) for a single fixture having a two inch (2″) maximum drain opening.

8.1.4 Concealed Connections. Concealed slip joint connections shall be provided with adequately sized unobstructed access panels and shall be accessible for inspection and repair.

8.2 Fixtures.

8.2.1 Toilets.

8.2.1.1 Each toilet shall be designed and manufactured according to approved or listed standards and shall be equipped with a water flushing device capable of adequately flushing and cleaning the bowl at each operation of the flushing mechanism.

8.2.1.2 Recirculating or mechanical seal toilets may provide for storage of liquid waste and body waste as an integral part of the unit. When a mechanical seal toilet does not contain storage for the retention of liquid waste and body waste, it shall be connected to an approved waste holding tank.

8.2.1.3 Floor or Tank Connections. Toilets, when directly connected to a waste holding tank or drainage system, shall be securely bolted to either the tank or the floor by means of an approved closet flange or other approved fitting. Bolts and screws when used shall be of brass or other noncorrosive material and shall be not less than one-quarter inch (¼″) in diameter. A watertight seal shall be made between the toilet and flange or other approved fittings by the use of a gasket or sealing compound.

8.2.2 Shower Stalls, Receptors and Enclosures.

8.2.2.1 Each shower stall shall be provided with an approved watertight receptor with sides and back extending one inch (1″) above the finished dam or threshold. In no case shall the depth of a shower receptor be less than two inches (2″) or more than nine inches (9″), measured from the top of the finished dam or threshold to the top of the drain.

8.2.2.2 The joint around the drain connection and around the toilet outlet in combination compartments shall be made watertight by a flange, clamping ring, or other approved or listed means.

8.2.2.3 Shower doors and tub and shower enclosures shall be constructed so as to be waterproof and, if glazed, be glazed with materials such as wired-glass, laminated safety glass, plastics, reinforced plastics, or other approved materials. Hinged swinging shower doors shall open outward. Glass used for glazing and classified as safety glass shall conform to ANSI Z97.1 — 1966.

8.2.2.4 Prefabricated shower stalls and receptors shall be approved or listed and shall comply with the requirements relating to plumbing fixtures, shower stalls and receptors for recreational vehicles.

8.3 Installation

8.3.1 Access. Each plumbing fixture shall be located and installed in a manner to provide access for cleaning and repair.

8.3.2 Alignment. Fixtures shall be set level. Where practical, piping from fixtures shall extend to nearest wall.

8.3.3 Brackets. Wall-hung fixtures shall be rigidly attached to walls by brackets or supports without any strain being transmitted to the piping connections. Flush tanks shall be securely fastened to toilets or to the wall with noncorrosive material.

9. Hangers and Supports

9.1 Strain and Stresses. Piping in a plumbing system shall be installed without undue strains and stresses, and provision shall be made for expansion and contraction.

9.2 Drain Piping Supports. Drain piping shall be secured at not more than 4 foot intervals, unless different spacing is recommended by the piping manufacturer, to keep the pipe in alignment and carry the weight of the pipe and contents.

9.3 Hangers and Anchors.

9.3.1 Hangers and anchors shall be of sufficient strength to support their proportional share of the pipe alignments and prevent rattling.

9.3.2 Piping shall be securely attached to the structure by proper hangers, clamps, or brackets which provide protection against damage from motion, vibration, road shock, torque in the chassis, or other unusual conditions.

10. Water Distribution Systems

10.1 Water Supply.

10.1.1 Supply Piping. Piping systems shall be sized to provide an adequate quantity of water to each plumbing fixture at a flow rate sufficient to keep the fixture in a clean and sanitary condition without any danger of backflow or siphonage.

10.1.2 Potable Water Storage Tanks. Potable water storage tanks shall be listed. If tank is installed in such a manner that it is subject to road damage, it shall be protected. Each non-pressure or gravity tank shall be equipped with a vent at the top of the tank to assist in filling and drainage.

10.1.3 The water distribution system shall be installed with a valve, drain plug or cap, located at the lowest point or points to provide for complete drainage of the system and water storage tank.

10.2 Water Outlets and Supply Connections.

10.2.1 Water Service Connection. Each recreational vehicle with a water distribution system sized as required in Table 1, which may be connected to an outside source, shall be equipped with a three-quarter inch (¾″) swivel female hose water service connection. A matching cap or plug shall be provided to close the water inlet when it is not in use and shall be attached in a substantial manner.

10.2.2 Prohibited Connections.

10.2.2.1 The installation of potable water supply piping or fixture or appliance connections shall be made in a manner to preclude the possibility of backflow.

10.2.2.2 No part of the water system shall be connected to any drainage or vent piping.

10.2.3 Rim Outlets. The outlets of faucets, spouts, and similar devices shall be spaced at least one inch (1″) above the flood level of the fixture.

10.2.4 Flushometer Valves or Manually Operated Flush Valves. An approved or listed vacuum breaker shall be installed and maintained in the water supply line on the discharge side of a toilet flushometer valve or manually operated flush valve. Vacuum breakers shall have a minimum clearance of six inches (6″) above the flood level of the fixture to the critical level mark, unless otherwise specified and approved.

10.2.5 Flush Tanks. Toilet flush tanks shall be equipped with an approved anti-siphon ball cock which shall be installed and maintained with its outlet or critical level mark not less than one inch (1″) above the the full opening of the overflow pipe.

10.2.6 Backflow Preventer. When pressure water storage tanks or reservoirs (except water heaters or flush tanks) for storing potable water are connected to the water distribution system of recreational vehicles, which have a water service connection for an outside source of supply, they shall have an approved or listed check valve or other approved or listed type backflow prevention device installed in the water-supply piping adjacent to the water service connection. An approved or listed pressure relief valve shall be required on the outlet side of the check valve.

Exception: Systems utilizing gravity-type tanks or systems not providing means for heating water or creating pressures shall not require a pressure relief valve.

10.3 Safety Devices.

10.3.1 Relief Valves.

10.3.1.1 When a check valve (see 10.2.6) or pressure regulating device is installed between the water service connection and a water heater or closed hot water tank, a listed pressure relief valve or a listed temperature-pressure relief valve, sized equivalent to the Btuh rating of the water heater or larger, shall be installed.

10.3.1.2 Pressure relief valves, when installed, shall be installed in the cold water supply pipe between the pressure regulator or the check valve and any heater or tank, and shall be so located as to be accessible.

10.3.1.3 The relief valve if located inside the recreational vehicle shall be equipped with a full size drain able to withstand 225° Fahrenheit which shall extend outside, with the end directed downward, except that no drain shall be required if the relief valve discharges into an area sealed off from the inside of the vehicle and drained and ventilated to the outside. The discharge end of the drain shall not be equipped with a thread or other means of capping or plugging.

10.3.1.4 Water storage tanks which may be pressurized by air shall be equipped with a listed air pressure relief valve set to open at not more than 125 psig or the tank manufacturer's recommended working pressure, whichever is lower. The pressure relief valve shall be located above the maximum water level of the tank.

10.4 Materials.

10.4.1 Piping Material. Water pipe shall be of standard weight brass, galvanized wrought iron, galvanized steel, Type K or L copper tubing, listed plastic, or other approved or listed material.

10.4.2 Fittings. Appropriate fittings shall be used for all changes in size and where pipes are joined. The material and design of fittings shall conform to the type of piping used.

10.4.2.1 Fittings for screw piping shall be standard weight galvanized iron for galvanized iron and steel pipe, and of brass for brass piping. They shall be installed where required for change in direction, reduction of size, or where pipes are joined together.

10.4.2.2 Fittings for copper tubing shall be cast brass or drawn copper sweat solder pattern or flare type.

10.4.2.3 Fittings for plastic water piping shall be of approved or listed brass or plastic, compatible in design for the type of plastic used.

10.4.3 Prohibited Material.

10.4.3.1 Used piping materials shall not be permitted.

10.4.3.2 Thermoplastic pipe and fittings shall not be used in water systems containing water heating devices unless such pipe and fittings are listed for use in hot water systems.

10.5 Installation of Piping.

10.5.1 Minimum Requirement. All piping equipment, appurtenances, and devices shall be installed in a workmanlike manner and shall conform with the provisions and intent of this Standard.

10.5.2 Screw Pipe. Iron pipe-size brass or galvanized iron or steel pipe and fittings shall be joined with approved or listed standard pipe threads fully engaged in the fittings. Pipe ends shall be reamed to the full bore of the pipe. Pipe-joint compound shall be insoluble in water, shall be nontoxic, and shall be applied to male threads only.

10.5.3 Solder Fittings. Copper tubing shall be joined to sweat solder fittings by means of hot solder and a noncorrosive flux. The surfaces to be soldered shall be thoroughly cleaned. The use of self-cleaning fluxes shall not be permitted.

10.5.4 Flared Fittings. A flaring tool shall be used to shape the ends of flared tubing to match the flare of fittings.

10.5.5 Plastic Pipe and Fittings. Plastic pipe and fittings shall be joined by installation methods recommended by the piping manufacturer.

10.6 Mimimum Size of Water Supply Piping. The size of water supply piping and branch lines shall not be less than sizes shown in Table 1.

10.7 Line Valves. Valves, when installed in the water supply distribution system shall, when fully opened, have a cross-sectional area at least equal to the nominal size of the pipe in which the valve is installed.

Exception: This requirement shall not apply to a valve controlling only one fixture supply.

Table 1

Minimum Size Tubing and Pipe for Water Distribution Systems*

Number of Fixtures	Tubing		Pipe
	Inner Dia. (Inches)	Outer Dia. (Inches)	Iron Pipe Size (Inches)
1	¼**	⅜**	⅜
2	¼**	⅜**	⅜
3	⅜	½	½
4	⅜	½	½
5	½	⅝	½

*Minimum size for toilet water supply line shall not be less than the size recommended by the manufacturer.

**6-foot maximum length.

10.8 Labeling. Each inlet to a potable water tank shall have an affixed label which shall read:

WARNING: POTABLE WATER ONLY. SANITIZE, FLUSH AND DRAIN BEFORE USING. SEE INSTRUCTION MANUAL.

Instructions for proper sanitizing of water distribution systems shall be furnished with each vehicle.

11. Drainage Systems

11.1 Materials.

11.1.1 Pipe. Drainage piping shall be standard weight, galvanized steel, galvanized wrought iron, brass, copper tube DWV, listed plastic, or other approved or listed material.

11.1.2 Fittings. Drainage fittings shall be recessed drainage pattern with smooth interior waterways of the same diameter as the piping and shall be of a material conforming to the type of piping used. Drainage fittings shall be designed to provide for one-quarter inch (¼″) per foot grade in horizontal piping.

11.1.2.1 Fittings for screw pipe shall be cast iron, malleable iron, brass, or approved or listed plastic, with standard pipe threads.

11.1.2.2 Fittings for copper tubing shall be cast brass or wrought copper.

11.1.2.3 Fittings for plastic piping shall be made to approved or applicable standards.

11.1.2.4 Brass adapter or wrought copper fittings shall be used to join copper tubing to threaded pipe.

11.2 Drain Outlets.

11.2.1 Main Drain Outlet. Each recreational vehicle shall have a drain outlet which shall terminate horizontally at any point within twenty-two feet (22′) of the rear, on the left (road) side or at the rear, left of the longitudinal center of the vehicle within eighteen inches (18″) of the outside wall, and shall direct its discharge toward that side or toward the rear within an angle of 90° formed between that side and the rear end of such vehicle. The drain outlet may terminate vertically when it is equipped with a quick disconnect type coupler and a companion elbow hose adapter. If more than eighteen inches (18″) above the ground it may terminate either vertically or horizontally.

Exceptions:

1. A camping trailer not more than seventeen feet (17′) in length, a motor home or a truck camper may have the drain outlet located on either side, provided the electrical and gas connections are located on the same side.

2. A recreational vehicle having a mechanical seal toilet with waste holding tank or a recirculating chemical toilet may have a separate drain which may be located at any location on the perimeter of the vehicle within eighteen inches (18″) of the outside wall and shall be provided with a full-way valve. The drain for the remainder of the plumbing system shall be considered the main drain. A fullway valve shall be provided with a standard three inch (3″) male thread and female threaded cap which is securely fastened to the vehicle and shall not be equipped with extensions or other actuating devices, or be installed in such a manner that discharge may be accomplished while the vehicle is in motion.

11.2.2 Cap.

11.2.2.1 An approved water-tight cap on the drain outlet shall be permanently attached to the vehicle.

11.2.2.2 There shall be permanently affixed near the cap in a visible, exterior location, a weatherproof label with letters of three-sixteenth inch (3/16″) minimum height, reading: "CAP MUST BE SECURELY IN PLACE WHILE THE VEHICLE IS IN MOTION."

11.2.3 Clearance from Drain Outlet. The drainage outlet and couplers shall be provided with a minimum clearance of one and one-half inches (1½″) in any direction from all parts of the vehicle and with adequate unrestricted clearance directly in front of the drainage outlet.

11.2.4 Liquid Waste Drain Outlet. Each recreational vehicle may utilize a separate drain for discharging liquid waste which shall be one and one-half inch (1½″) minimum diameter and shall be equipped with a cap securely fastened to the vehicle.

11.2.4.1 The drain may terminate on the discharge side of the full-way valve on the waste holding tank into an approved three inch (3″) fitting designed for this purpose.

11.2.4.2 A minimum one and one-half inch (1½″) drain may be utilized to drain a separate liquid waste holding tank.

11.2.4.3 If drain outlet is less than eighteen inches (18″) above the ground it shall terminate horizontally. If more than eighteen inches (18″) above the ground it may terminate either vertically or horizontally.

11.2.5 Hose Couplers.

11.2.5.1 Hose couplers for drain outlets shall be a quick disconnect type not requiring any special tools or knowledge to make the connection or remove the drain hose.

11 Fixture Connections. Drainage piping shall be provided with inl fittings for fixture connections, correctly located according to size and type of fixture to be connected.

11.4 Size of Drainage Piping.

11.4.1 Fixture Load. Drain pipe sizes shall be determined by the type of fixture and the total number connected to each drain.

11.4.1.1 One and one-half inch (1½″) minimum diameter piping shall be required for one and not more than three individually vented fixtures.

11.4.1.2 Two inch (2″) minimum diameter piping shall be required for four or more fixtures individually vented.

11.5 Wet-Vented Drainage System.

11.5.1 Horizontal Piping. All parts of a wet-vented drainage system, including the connected fixture drains, shall be horizontal except for the wet-vented vertical riser. Where required by structural design, wet-vented drain piping may be offset vertically when

other vented fixture drains or relief vents are connected to the drain piping below the vertical offsets.

11.5.2 Size. A wet-vented drain pipe shall be at least one pipe size larger than the largest connected trap or fixture drain. Not more than three fixtures may connect to a wet-vented drain system.

11.5.3 Length of Trap Arm. Fixture traps shall be located within the distance given in Table 2. Not more than one trap shall connect to a trap arm.

Table 2

Distance of Fixture Trap from Vent

Size of Trap Arm (Inches)	Distance Trap to Vent
1¼	4 feet 6 inches
1½	4 feet 6 inches
2	5 feet 0 inches
3	6 feet 0 inches

11.6 Side-Vent Drainage System.

11.6.1 A recreational vehicle that has no plumbing fixture(s) connected to the main drain other than a one- or two-compartment sink with drain opening(s) of not more than two inches (2″) in diameter may be connected to a side-vent drainage system.

11.6.2 Drainage and vent systems shall be constructed of approved or listed components with an approved baffle or directional type fixture tee.

11.6.3 A baffle or diverter tee shall be used to connect the trap arm to the side vent system.

11.6.4 "P" traps shall be one and one-fourth inch (1¼″) minimum diameter installed as close to the sink as possible with the center of the outlet not more than six inches (6″) from the bottom of the sink.

11.6.5 The center of the vent offset through the outside wall shall be located as high as the structure will permit but not less than two and one-fourth inches (2¼″) above the bottom of the sink to the center of the elbow.

11.7 Offsets and Branch Fittings.

11.7.1 Changes in Direction. Changes in direction of drainage

piping shall be made by the appropriate use of approved or listed fittings, and shall be of the following angles:

11¼, 22½, 45, 60 or 90 degrees; or other approved or listed fittings, or combination of fittings with equivalent radius or sweep.

11.7.2 Horizontal to Vertical. Horizontal drainage lines, connecting with a vertical pipe, shall enter through 45-degree "Y" branches, 60-degree "Y" branches, long-turn "TY" branches, sanitary "T" branches, or other approved or listed fittings or combination of fittings having equivalent sweep. No fitting having more than one branch at the same level shall be used, unless the fitting is constructed so that the discharge from any one branch cannot readily enter any other branch.

11.7.3 Horizontal to Horizontal and Vertical to Horizontal. Horizontal drainage lines connecting with other horizontal drainage lines or vertical drainage lines connected with horizontal drainage lines shall enter through 45-degree "Y" branches, long-turn "TY" branches, or other approved or listed fittings or combination of fittings having equivalent sweep.

Exception: A short-turn "TY" may be used as a final termination if it is mounted directly to a full-way termination valve on one side and has a quick disconnect on the other.

11.8 Slope of Horizontal Drainage Piping. Horizontal drainage piping shall be run in practical alignment and have a uniform slope of not less than one-quarter inch (¼″) per foot toward the recreational vehicle main drain outlet. Where it is impractical, due to the structural features or arrangement of any recreational vehicle, to obtain a slope of one-quarter inch (¼″) per foot, the pipe or piping may have a slope of not less than one-eighth inch (⅛″) per foot, when a full size cleanout is installed at the upper end.

11.9 Waste Holding Tank. Vehicles equipped with a waste-holding tank and a toilet shall have a mechanical seal or recirculating chemical toilet.

11.9.1 Toilet connections shall be three inch (3″) minimum pipe size and shall extend vertically. The inlet fitting may extend downward into the tank not more than one and one-half inches (1½″). The toilet connection shall be designed to receive or conform in an approved shape to a closet flange of standard dimensions or other approved fitting.

11.9.2 Drain opening shall be a three inch (3″) minimum pipe size outlet located at the lowest point in the tank and shall be fitted with a fullway valve.

11.9.3 Fullway valves referred to in 11.9.2 shall be designed for manual operation from outside the recreational vehicle and have no extension or activating device within the vehicle.

11.9.4 The tank shall be vented at the highest point in the top of the tank by one of the following methods:

a. A one and one-quarter inch (1¼″) minimum diameter individual vent pipe extending undiminished in size through the roof.

b. A continuous vent serving as a drain from one additional fixture provided the drain portion is increased one pipe size larger than the connected trap arm.

c. Two or more vented drains when at least one is wet-vented and each drain is separately connected to the top of the tank.

11.9.5 Waste holding tanks shall be securely installed in such locations as to be removable for service, repair, or replacement without the necessity of removing permanent structural, mechanical, or electrical installations.

11.10 Detachable Waste Holding System. A recreational vehicle having a sink as its only plumbing fixture may have all its liquid waste discharge into a detachable waste holding tank.

11.10.1 The fixture strainer or tailpiece shall be permanently connected by five-eighth inch (⅝″) minimum inside diameter listed drain pipe or listed flexible tubing to an inlet valve.

11.10.2 The fixture drain shall have a trap formed by an extension of the inlet pipe, of the detachable waste holding tank. The trap shall be so designed as to become effective when the tank contains liquid equal to no more than ten per cent (10%) of the capacity of the tank.

11.10.3 The inlet of the detachable waste holding tank shall have an attached cap for use during storage and/or transport of the tank.

11.10.4 Detachable waste holding tanks with an integral trap shall be vented by a minimum opening of three-sixteenth inch (3⁄16″) diameter.

11.10.5 Detachable waste holding tanks with an integral trap shall be so designed as to prevent connection of the inlet valve to the tank unless the integral trap is installed.

11.10.6 Detachable waste holding tanks shall be so designed as to allow emptying only through the inlet or the vent.

12. Vents and Venting

12.1 General. Each plumbing fixture trap shall be protected against siphonage and back pressure, and air circulation shall be ensured throughout all parts of the drainage system by means of vents installed in accordance with the requirements of this Section and/or as otherwise required by this Standard.

12.2 Materials.

12.2.1 Pipe. Vent piping shall be standard weight galvanized steel, galvanized wrought iron, brass, copper tube DWV, listed plastic, or other approved or listed materials in Table 1.

12.2.2 Fittings. Appropriate fittings shall be used for all changes in direction, size or shape, and where pipes are joined. The material and design of fittings shall conform to Table 1.

12.2.2.1 Listed rectangular tubing may be used for venting. Suitable listed transition fittings shall be used.

12.3 Size of Vent Piping.

12.3.1 Individual Vents. A one and one-quarter inch (1¼″) minimum diameter vent pipe shall be required for all individually vented fixtures with one and one-half inch (1½″) or smaller traps. The continuous vent of wet-vented drainage systems shall be one and one-quarter inch (1¼″) minimum diameter.

12.3.2 Common Vent. When two fixture traps located within the distance allowed from their vent have their trap arms connected separately at the same level into an approved double fitting, an individual vent pipe may serve as a common vent without any increase in size.

12.3.3 Intersecting Vents. Where two or more vent pipes are joined together, no increase in size shall be required; however, the largest vent pipe shall extend full size through the roof.

12.4 Grades and Connections.

12.4.1 Horizontal Vents. Each vent shall extend vertically from its fixture "T", or point of connection with the waste piping to a point not less than six inches (6″) above the extreme flood level of the fixture it is venting before offsetting horizontally or being connected with any other vent pipe. Vents for horizontal drains shall connect above the centerline of the drain piping ahead (downstream) of the trap. Where required by structural conditions, vent

piping may offset below the rim of the fixture at the maximum angle or height possible.

12.4.2 Grade. Vents shall be level or so designed to drain back to the drainage system by gravity.

12.5 Vent Terminal.

12.5.1 Roof Extension. Each vent pipe which passes through the roof shall extend through its flashing, except as otherwise permitted in 11.6, and terminate vertically, undiminished in size, not less than two inches (2″) above the roof. Vent openings shall not be less than 3 feet, 0 inch away from any motor-driven air intake that opens into habitable areas.

12.5.2 Flashing. The opening around each vent pipe shall be made watertight by an adequate flashing or flashing material.

13. Tests and Inspection (Plumbing)

13.1 Water Piping System. All pressure water piping in the water distribution system shall be subjected to a pressure test. The test shall be made by subjecting the system to air or water at 100 psi for 10 minutes without leakage or loss of pressure. An adequate and accurate pressure gage shall be used on all tests.

Exception: A recreational vehicle that has no plumbing fixtures other than a single compartment sink with a drain opening of not more than two inches (2″) shall be tested a minimum of 3 minutes.

13.2 Drainage and Vent System and Plumbing Fixtures. The waste and vent system shall be subjected to one of the following tests without evidence of leaks.

13.2.1 Water Test. Before plumbing fixtures are connected, all of the openings into the piping shall be plugged and the entire piping system subjected to a static water test for 15 minutes by filling it with water to the top of the highest vent opening.

13.2.2 Air Test. After all fixtures have been installed, the traps filled with water, and the remaining openings securely plugged, the entire system shall be subjected to a two inch (2″) (manometer) water column air pressure test.

13.2.3 Flood Level Test. The recreational vehicle shall be in a level position; all fixtures shall be connected, and the entire system shall be filled with water to the flood level rim of the toilet bowl. (Tub and shower drains should be plugged.) After all trapped air has been released, the test shall be sustained for not less than 15 minutes. The waste piping above the level of the toilet shall be tested and show no indication of leakage when the high fixtures are filled with water and emptied simultaneously to obtain the maximum possible flow in the drain piping.

13.3 Fixture Test. The plumbing fixtures and connections shall be subjected to a flow test by filling them with water and checking for leaks and retarded flow while they are being emptied.

13.3.1 Shower Stalls. Shower stalls and receptors shall be tested for leaks prior to being covered by finished material. Each pan shall be filled with water to the top of the dam for not less than 15 minutes.

APPENDIX TO PART I

Applicable Standards

Table 3. Standards for Pipe & Fittings

Description	ANSI	ASTM	FS	Other
Nonmetallic Pipe and Fittings				
Threaded Acrylonitrile-Butadiene-Styrene (ABS) Plastic Pipe Fittings, Schedule 80[1]	None	D 2465-68	None	NSF Std. 14

Part II — Heating Systems

1. Introduction

1.1 Those members of the engineering profession and others associated with the design, manufacturing, installation, and inspection of recreational vehicle heating systems have been aware of the need for uniform technical standards leading to the safe use of this special type of equipment and related systems. They have also recognized that, because of conditions of transport and use, existing heating equipment standards for motor vehicles or for buildings are not completely applicable to recreational vehicles. It is with these factors in mind that Part II of this Standard has been developed.

1.2 Much of the material in Part II has been based on nationally recognized standards for heat producing appliances and fuel supply systems, including standards listed in the Appendix of this Part.

2. Scope

2.1 Part II of this Standard covers the heat producing appliances and fuel supply systems within or on recreational vehicles.

2.2 This Standard is not intended as a design specification or an instruction manual for untrained persons.

2.3 Wherever nationally recognized standards for heat producing appliances and fuel supply systems and this Part differ, the requirements of the latter shall apply.

2.4 The provisions of this Standard are not intended to prevent the use of any material, appliance, installation, device, arrangement, or method of construction not specifically prescribed herein, provided any such alternative has been approved or listed. The enforcement authority shall approve such alternate if the material, appliance, installation, device, arrangement, or method of construction is at least the equivalent of that prescribed by this Part, and may require tests or proof of compliance to substantiate any claims that may be made regarding the use of any such alternate.

3. Definitions

Accessible: When applied to a fixture connection, appliance, or equipment shall mean having access thereto, but which may require the removal of an access panel, door or similar obstruction.

Air Duct: Conduits or passageways for conveying air to or from heating, cooling, air conditioning or ventilation equipment, but not including the plenum.

Appliance Branch Piping: Any run of piping or tubing, and fittings, not a part of an appliance, that is used to convey fuel from the main piping manifold to a fuel-burning appliance.

Approved: Means acceptable to the authority having jurisdiction.

Automatic Pump (Oil Lifter): A pump, not an integral part of the oil-burning appliance, that automatically pumps oil from the supply tank and delivers the oil by gravity under a constant head to an oil-burning appliance.

BTU. British Thermal Unit: The quantity of heat required to raise the temperature of one pound of water one degree Fahrenheit.

BTUH. British Thermal Units per Hour.

Burner: A device for the final conveyance of fuel or a mixture of fuel and air to the combustion zone.

Certified: Means "listed" as defined herein.

Clearance: The distance between the appliance, chimney, vent, chimney or vent connector or plenum and the nearest surface.

Connection — Gas Supply: The terminal end or connection to which a gas supply connector is attached.

Connector — Gas Appliance: A listed connector used to convey fuel gas between a gas outlet and a gas appliance.

Connector — Gas Supply: Tubing or pipe connecting the recreational vehicle to the gas supply source.

Control, Primary Safety: The automatic safety control intended to prevent the abnormal discharge of fuel at the burner in case of ignition failure or flame failure.

Fuel System: Any arrangement of pipe, tubing, fittings, connectors, tanks, controls, valves, and devices designed and intended to supply or control the flow of fuel to the appliance(s).

Heat Producing Appliance: All heating and cooking appliances and all fuel-burning appliances.

Heating Appliance: An appliance for comfort heating of a recreational vehicle or for water heating.

Labeled: Equipment or materials to which has been attached a label, symbol, or other identifying mark of a nationally recognized testing laboratory that maintains periodic inspection of production of labeled equipment or materials and by whose labeling is indicated compliance with nationally recognized standards or tests to determine suitable usage in a specified manner.

Liquefied Petroleum Gases: The terms "liquefied petroleum gases," "LPG" and "LP-gas" as used in this Standard shall mean and include any material that is composed predominantly of any of the following hydrocarbons, or mixtures of them: propane, propylene, butanes (normal butane or isobutane), and butylenes.

Listed: Equipment or materials included in a list published by a nationally recognized testing laboratory that maintains periodic inspection of production of listed equipment or materials and whose listing states either that the equipment or material meets nationally recognized standards or has been tested and found suitable for use in a specified manner.

Main Gas Piping Manifold: Gas piping which conveys gas from the gas supply connection to the first appliance branch piping.

Plenum: Air compartment or chamber to which one or more ducts are connected and which forms part of either the supply or return air systems.

Roof Jack: That portion of a venting system, including the cap, insulating means, flashing, and ceiling plate, located in and above the roof.

Safety Shutoff Device: A device that will shut off the gas supply to the controlled burner(s) in the event the source of ignition fails. This device may interrupt the flow of gas to main burner(s) only or to pilot(s) and main burner(s) under its supervision.

4. Fuel Supply Systems

4.1 LP-Gas Containers.

4.1.1 Maximum Capacity. When LP-Gas containers are provided, a recreational vehicle shall have:

a. Not more than two non-permanently mounted containers having maximum individual water capacities of 105 lbs. (approximately 45 lbs. LP-gas capacity), or

b. Not more than two permanently mounted containers having maximum total water capacity of 478 lbs. (approximately 200 lbs. LP-gas capacity).

4.1.2 Construction of Containers. Containers shall be constructed and marked in accordance with the specifications for LP-gas containers of the U.S. Department of Transportation (DOT) or the Rules for Construction of Unfired Pressure Vessels, Section VIII, Division 1, ASME Boiler and Pressure Vessel Code. ASME Containers constructed after December 31, 1967 shall have a design pressure of at least 312.5 psig.

4.1.3 Location of Containers.

4.1.3.1 LP-gas containers shall not be installed, nor shall provisions be made for installing or storing any LP-gas container, even temporarily, inside any recreational vehicle except for listed, completely self-contained hand torches, lanterns, or similar equipment with containers having a maximum water capacity of not more than 2½ pounds.

4.1.3.2 LP-gas containers with their control valves and pressure regulators shall be installed in compliance with one of the following:

a. In a recess or compartment that is vapor-tight to the inside of the recreational vehicle.

b. Mounted on the tongue of a travel or camping trailer as close to the hitch as practicable.

c. Mounted on the chassis of a motor home or chassis-mount camper, provided neither the container nor its support extends below the frame if the container is located ahead of the front axle or behind the rear axle of the recreational vehicle. Containers mounted elsewhere on the frame of a motor home or chassis-mount camper shall be installed in such a manner that the bottom of the tank and any connection thereto shall not be lower than the lowest horizontal axis of the nearest vehicle axle when the vehicle is fully loaded.

4.1.3.3 Container or container carriers shall be secured in place on the recreational vehicle by fastenings designed and constructed with a minimum safety factor of four, to withstand loading in any direction equal to twice the filled weight of the container, providing an overall safety factor of eight.

4.1.4 Container Enclosures.

4.1.4.1 Compartments shall be ventilated at or near the top and at the extreme bottom to facilitate diffusion of vapors. The compartment shall be ventilated with at least two vents having an aggregate free area equal to one square inch for each 7 lbs. of the total LP-gas fuel capacity of the container(s). The vents shall be equally distributed between the floor and ceiling of the compartment. If the lower vent is located in the access door or wall, the bottom edge of the vent shall be flush with the floor level of the compartment. The top vent shall be located in the access door or wall with the bottom of the vent within 12 inches of the ceiling of the compartment. Vents shall have an unrestricted discharge to the outside atmosphere. Access doors or panels of compartments shall not be equipped with locks or require special tools to open.

4.1.4.2 Doors, hoods, domes, housings (or portions of housings), and enclosures required to be removed or opened for replacement of containers shall incorporate means for clamping them firmly in place and to prevent them from working loose during transit.

4.1.5 Container Valves and Accessories.

4.1.5.1 Valves in a two-container assembly system shall be arranged so that replacement of containers can be made without shutting off the flow of gas to the appliance(s).

NOTE: This provision is not to be construed as requiring an automatic changeover device.

4.1.5.2 Container shutoff valves shall be protected as follows:

a. By setting into a recess of the container to prevent possibility of their being struck if container is dropped upon a flat surface, or

b. By a ventilated cap or collar, fastened to the container, capable of withstanding a blow from any direction equivalent to that of a 30-pound weight dropped 4 feet. Construction must be such that the blow will not be transmitted to the valve.

4.1.5.3 Regulators shall be connected directly to the container shutoff valve outlets or mounted securely by means of a support bracket and connected to the container shutoff valve or valves with listed high pressure flexible connections. In the case of permanently mounted containers, listed semi-rigid tubing connections may be used.

4.1.6 Safety Devices.

4.1.6.1 DOT containers shall be provided with safety relief devices as required by the regulations of the U.S. Department of Transportation. ASME containers shall be provided with relief valves in accordance with Basic Rule B.10 of ANSI Standard for the Storage and Handling of Liquefied Petroleum Gases (ANSI Z106.1 — 1969, NFPA No. 58 — 1969). Safety relief valves shall have direct communication with the vapor space of the vessel.

4.1.6.2 The delivery side of the gas pressure regulator shall be equipped with a safety relief device set to discharge at a pressure not less than two times and not more than three times the delivery pressure of the regulator.

4.1.6.3 Systems installed outside of a recreational vehicle shall be so located that discharge from safety relief devices shall be not less than three feet (3′) horizontally away from any opening into the recreational vehicle below the level of such discharge. When a system is located in a recess vaportight to the inside, vent openings in such recess shall be not less than three feet (3′) horizontally away from any opening into the recreational vehicle below the level of these vents.

4.1.7 System Design and Service Line Pressure.

4.1.7.1 Systems shall be of the vapor-withdrawal type.

4.1.7.2 Vapor, at a pressure not over eighteen inches (18″) water column, shall be delivered from the system into the gas supply connection.

4.1.7.3 Container openings for vapor withdrawal shall be located in the vapor space when the container is in service or shall be provided with a suitable internal withdrawal tube which communicates with the vapor space in or near the highest point in the container when it is mounted in service position, with the vehicle on a level surface. Containers shall be permanently and legibly marked in a conspicuous manner on the outside to show the correct mounting position and the position of the service outlet connection. The method of mounting in place shall be such as to minimize the possibility of an incorrect positioning of the container.

4.2 Oil Tanks.

4.2.1 Installation. Oil tanks installed for gravity flow of oil to heating equipment shall be installed so that the top of the tank is no higher than eight feet (8′) above the appliance oil control and the bottom of the tank is no less than eighteen inches (18″) above the appliance oil control. Listed automatic pumps (oil lifter) shall

be mounted no higher than eight feet (8′) above the appliance oil control and not less than eighteen inches (18″) above the appliance oil control.

4.2.2 Oil Supply Tank. Oil supply tanks affixed to a recreational vehicle shall be so located as to require filling and draining on the outside and shall be securely fastened in position in a place readily available for inspection.

4.2.3 Tank Compartment. If the fuel supply tank is located in a compartment of a recreational vehicle, the compartment shall be ventilated at the bottom to permit diffusion of vapors and shall be insulated from the structural members of the body. Tanks so installed shall be provided with an outside fill and vent pipe and an approved liquid level gauge.

4.2.4 Shutoff Valve. A readily accessible, approved manual shutoff valve shall be installed at the outlet of an oil supply tank. The valve shall be installed to close against the supply.

4.2.5 Fuel Oil Filters. All oil tanks, except for integrally mounted tanks, shall be equipped with an approved oil filter or strainer located downstream from the tank shutoff valve. The fuel oil filter or strainer shall contain a sump with a drain for the entrapment of water.

5. Piping Systems

5.1 Gas Piping Systems.

5.1.1 General. The requirements of this section shall govern the installation of all fuel gas piping attached to any recreational vehicle. None of the requirements listed in this Section shall apply to the piping supplied as a part of an appliance.

5.1.2 Materials. Materials used for the installation, extension, alteration, or repair of any gas piping system shall be new and free from defects or internal obstructions. It shall not be permissible to repair defects in gas piping or fittings. Inferior or defective materials shall be removed and replaced with acceptable material. The system shall be made of materials having a melting point of not less than 1,450° Fahrenheit, except as provided in 5.1.5 and 5.1.6, or of materials (used in piping or fittings) listed for the specific use intended. They may consist of one or more of the following materials, or any other material used in listed gas piping or fittings.

5.1.2.1 Gas pipe shall be steel or wrought-iron pipe complying with the American National Standard Wrought-Steel and Wrought-Iron Pipe, B36.10 — 1959. Threaded copper or brass pipe in iron pipe sizes may be used.

5.1.2.2 Fittings for gas piping shall be wrought iron, malleable iron, steel, or brass (containing not more than 75 percent copper).

5.1.2.3 Copper tubing shall be annealed Type K or L, conforming to ASTM B88–66, or shall comply with the Specifications for Seamless Copper Tube for Refrigeration Field Service, ASTM B280–66. When used on systems designed for natural gas, such tubing shall be internally tinned.

5.1.2.4 Seamless brass tubing shall be composed of not more than 75 percent copper (cartridge brass 70 percent) and shall have a minimum thickness of 0.030 inch.

5.1.2.5 Steel tubing shall have a minimum wall thickness of 0.049 inch, conforming to ASTM A539–65, and be externally corrosion protected.

5.1.2.6 Flexible non-metallic tubing shall be part of an assembly which is listed for the use intended.

5.1.3 Piping Design. Each recreational vehicle requiring fuel gas for any purpose shall be equipped with a fuel gas piping system that is designed for LP-gas only or with a natural gas piping system acceptable for LP-gas.

5.1.4 Gas Pipe Sizing. Gas piping systems shall be sized so that the pressure drop to any appliance inlet connection from the gas supply connection or connections, when all appliances are in operation at maximum capacity, is not more than 0.5 inch water column when used with natural gas if the system is designed for both natural and LP-gas, or when used with LP-gas if the system is designed for LP-gas only. Conformance may be determined on the basis of test, or the gas piping system may be sized in accordance with Table 6 or other approved method. The natural gas supply connection shall be not less than three-quarter inch (¾″) nominal pipe size.

5.1.5 Joints for Gas Pipe. Pipe joints in the piping system, unless welded or brazed, shall be screw joints that comply with American National Standard Pipe Threads (except Dryseal) B2.1 — 1960. Right and left nipples or couplings shall not be used. Unions, if used, shall be of the ground joint type. The material used for welding or brazing pipe connections shall have a melting temperature in excess of 1,000° Fahrenheit.

Table 6

Sizing of Low-Pressure Gas Piping Systems

COMBINATION LP-GAS — NATURAL GAS SYSTEM (Based on a Total Pressure Drop of ½ in. H_2O)			LP-GAS-ONLY SYSTEM (Based on a Total Pressure Drop of ½ in. H_2O)		
Main Gas Manifold			**Main Gas Manifold**		
Total Appliance Input Name Plate Rating	**Nominal Pipe Size (Inches)**		**Total Appliance Input Name Plate Rating**	**Nominal Pipe Size (Inches)**	**Tube o.d. (Inches)**
No more than:			No more than:		
7,000 Btu/hr	¼		11,000 Btu/hr	¼	⅜
27,000 Btu/hr	⅜		42,000 Btu/hr	⅜	½
56,000 Btu/hr	½		88,000 Btu/hr	½	⅝
115,000 Btu/hr	¾		183,000 Btu/hr	¾	
220,000 Btu/hr	1		340,000 Btu/hr	1	
Branch Take-Offs			**Branch Take-Offs**		
Individual Appliance Input Name Plate Rating	**Nominal Pipe Size (Inches)**	**Tube o.d. (Inches)**	**Individual Appliance Input Name Plate Rating**	**Nominal Pipe Size (Inches)**	**Tube o.d. (Inches)**
No more than:			No more than:		
25,000 Btu/hr		⅜	2,500 Btu/hr		¼
31,000 Btu/hr	¼		39,000 Btu/hr		⅜
49,000 Btu/hr		½	49,000 Btu/hr	¼	
64,000 Btu/hr	⅜		77,000 Btu/hr		½
95,000 Btu/hr		⅝	100,000 Btu/hr	⅜	
120,000 Btu/hr	½		150,000 Btu/hr		⅝
250,000 Btu/hr	¾		190,000 Btu/hr	½	
			390,000 Btu/hr	¾	

5.1.6 Tubing Joints. Tubing joints shall be made with a double flare of the proper degree or with connections, as recommended by the tubing manufacturer; by means of approved gas tubing fittings; or, joints may be brazed with material having a melting point exceeding 1,000° Fahrenheit. Metallic ball sleeve compression-type tubing fittings shall not be used.

5.1.7 Pipe Joint Compound. Screw joints shall be made up tight with approved pipe joint compound, insoluble in liquefied petroleum gas, and shall be applied to the male threads only.

5.1.8 Concealed Tubing. Tubing shall not be run inside walls, floors, partitions or roofs except that one-quarter inch (¼″) o.d. tubing may be concealed provided it is enclosed with a metallic covering of thickness equivalent to the thickness of the tubing enclosed. Where tubing passes through walls, floors, partitions, roofs, or similar installations, such tubing shall be protected by the use of grommets that shall snugly fit both the tubing and the hole through which the tubing passes.

5.1.9 Concealed Joints. Pipe or tubing joints shall not be located in any floor, wall, partition, or similar concealed construction space.

5.1.10 Location of Gas Supply Connection.

5.1.10.1 For LP-gas only systems the supply connection shall be located at the container location, or within fifteen feet (15′) of the rear, on the left (road) side or at the rear, left of the longitudinal center of the vehicle, within eighteen inches (18″) of the outside wall.

Exception: A camping trailer not more than seventeen feet (17′) in length, a motor home or a truck camper may have the gas supply connection located on either side.

5.1.10.2 For natural gas or combination LP-gas and natural gas systems, the supply connection shall be located within fifteen feet (15′) of the rear, on the left (road) side or at the rear, left of the longitudinal center of the vehicle, within eighteen inches (18″) of the outside wall.

Exception: A camping trailer not more than seventeen feet (17′) in length, a motor home or a truck camper may have the gas supply connection located on either side.

5.1.11 Identification of Gas Supply Connections. Each recreational vehicle shall have permanently affixed to the exterior skin at or near each gas supply connection or the end of the pipe, a tag of 3 inches by 1¾ inches minimum size, made of etched, metal-stamped or embossed brass, stainless steel, anodized or alclad aluminum not less than 0.020 inch thick, or other approved material (e.g., 0.005 inch plastic laminates), which reads (as appropriate) either:

a. THIS GAS PIPING SYSTEM IS DESIGNED FOR USE OF LIQUEFIED PETROLEUM GAS ONLY. DO NOT CONNECT NATURAL GAS TO THIS SYSTEM. Securely cap inlet(s) when not connected for use. After turning on gas, except after normal container replacement, test gas piping and connections to appliances for leakage with soapy water or bubble solution.

b. THIS GAS PIPING SYSTEM IS DESIGNED FOR USE OF EITHER LP-GAS OR NATURAL GAS. BEFORE TURNING ON GAS BE CERTAIN APPLIANCES ARE DESIGNED FOR THE GAS CONNECTED AND ARE EQUIPPED WITH CORRECT ORIFICES. Securely cap this inlet when not connected for use. After turning on gas, except after normal container replacement, test gas piping and connections to appliances for leakage with soapy water or bubble solution.

5.1.12 Warning Relative to Motor Fuel and LP-Gas Refueling — Motor Homes, Truck Campers. Each motor home or truck camper having exterior combustion air inlet(s) at a level below the roof shall have the following additional wording on the tag specified in 5.1.11:

WARNING: ALL PILOT LIGHTS AND APPLIANCES SHALL BE TURNED OFF DURING REFUELING OF MOTOR FUEL TANKS AND/OR PERMANENTLY MOUNTED LP-GAS CONTAINERS.

5.1.13 Gas Supply Connectors.

5.1.13.1 Natural Gas. A listed minimum one-half inch (½″) nominal (ID) gas supply connector, with three-quarter inch (¾″) NPT terminal fittings, six feet in length, shall be supplied by the manufacturer when the fuel gas piping system is designed for the use of natural gas.

5.1.13.2 LP-Gas. A listed LP-gas flexible connector shall be supplied when the fuel gas piping system is designed for the use of LP-Gas and container(s) and regulator(s) are supplied.

5.1.14 Appliance Connections. All gas-burning appliances shall be connected to the fuel piping with materials as provided in 5.1.2 or with listed appliance connectors which do not pass through any wall, floor, ceiling or partition.

5.1.15 Valves. Shutoff valves and appurtenances used in connection with gas piping shall be of a type designed and approved for use on LP-gas.

5.1.16 Gas Inlet Cap. Suitable cap(s), to effectively close the gas inlet(s) when disconnected from the source of supply and not in use, shall be attached to the recreational vehicle.

5.1.17 Electrical Ground. Gas piping shall not be used for a grounding electrode (See Part III, 7.17.6 and 7.18.5).

5.1.18 Couplings. Where it is necessary to join sections of screw piping, right and left nipples and couplings shall not be used. Ground joint unions may be installed at appliance inlet connections.

5.1.19 Hangers and Supports. All gas piping shall be adequately supported by galvanized or equivalently protected metal straps or hangers at intervals of not more than 4 feet, except where adequate support and protection is provided by structural members. Solid-iron-pipe gas supply connection(s) shall be rigidly anchored to a structural member within six inches (6″) of the supply connection(s).

5.1.20 Testing for Leakage

5.1.20.1 Before Appliances Are Connected. Piping systems shall stand a pressure of at least six inches (6″) mercury or three (3) PSI gage for a period of not less than ten (10) minutes without showing any drop in pressure. Pressure shall be measured with a mercury manometer or slope gage, or an equivalent device, calibrated so as to be read in increments of not greater than one-tenth (1/10) PSI. The source of pressure shall be isolated before the pressure tests are made.

NOTE: Before a test is begun, the temperature of the ambient air and of the piping should be approximately the same, and constant air temperature should be maintained throughout the test.

5.1.20.2 After Appliances Are Connected. When appliances are connected to the piping system the entire system shall be pressurized to not less than ten inches (10″) nor more than fourteen inches (14″) water column and the appliance connections tested for leakage with soapy water or bubble solution.

5.2 Oil Piping Systems

5.2.1 General. The requirements of this section shall govern the installation of all liquid fuel piping attached to any recreational vehicle. None of the requirements listed in this Section shall apply to the piping in the appliance(s).

5.2.2 Materials. All materials used for the installation, extension, alteration, or repair of any oil piping system shall be new and free from defects or internal obstructions. The system shall be made of materials having a melting point of not less than 1,450° Fahrenheit except as provided in 5.2.4 and 5.2.5. They may consist of one or more of the following materials:

5.2.2.1 Pipe shall be steel or wrought-iron pipe complying with American National Standard Wrought-Steel or Wrought-Iron Pipe, B36.10 — 1959. Threaded copper or brass pipe in iron pipe sizes may be used.

5.2.2.2 Fittings for oil piping shall be wrought-iron, malleable iron, steel, or brass (containing not more than 75 percent copper).

5.2.2.3 Copper tubing shall be annealed Type K or L conforming to ASTM- B-88–66 or shall comply with the specifications for Seamless Copper Tube for Refrigeration Field Service, ASTM E280 — 1966.

5.2.2.4 Seamless brass tubing shall have a minimum wall thickness of 0.030 inch.

5.2.2.5 Steel tubing shall have a minimum wall thickness of 0.049 inch, conforming to ASTM A539-65, and be externally corrosion protected.

5.2.3 Size of Oil Piping. The minimum size of all fuel oil tank piping connecting outside tanks to the appliance shall be not smaller than three-eighth inch (⅜″) o.d. copper tubing or one-quarter inch (¼″) IPS. In those cases where No. 1 fuel is used with a listed automatic pump (fuel lifter), one-quarter inch (¼″) o.d. copper tubing may be used if specified by the pump manufacturer.

5.2.4 Joints for Oil Pipe. All pipe joints in the piping system, unless welded or brazed, shall be screw joints which comply with American National Standard Pipe Threads (except Dryseal), B2.1 — 1960. The material used for welding or brazing pipe connections shall have a melting temperature in excess of 1,000° Fahrenheit.

5.2.5 Joints for Tubing. Joints on tubing shall be made with double flare of the proper degree, as recommended by the tubing manufacturer, by means of approved tubing fittings. Joints may be brazed with materials having a melting point in excess of 1,000° Fahrenheit.

5.2.6 Pipe Joint Compound. Screw joints shall be made up tight with approved pipe joint compound, or other approved material, which shall be applied to the male threads only.

5.2.7 Couplings. Where it is necessary to join sections of screw piping, right and left nipples and couplings shall not be used. Ground joint unions may be installed at appliance inlet connections.

5.2.8 Grade of Piping. Fuel oil piping installed in conjunction with gravity feed systems to oil heating equipment shall slope in a gradual rise upward from a central location to both the oil tank and the appliance in order to eliminate air locks.

5.2.9 Strap Hangers. All oil piping shall be adequately supported by galvanized or equivalently protected metal straps or hangers at intervals of not more than 4 feet, except where adequate support and protection is provided by structural members. Solid-iron-pipe oil supply connection(s) shall be rigidly anchored

to a structural member within six inches (6″) of the supply connection(s).

5.2.10 Testing for Leakage. Before setting the system in operation, tank installations and piping shall be checked for oil leaks with fuel oil of the same grade that will be burned in the appliance. No other material shall be used for testing fuel oil tanks and piping. Tanks shall be filled to a maximum capacity for the final check for oil leakage.

6. Heat-Producing Appliances

6.1 General. Every heat-producing appliance used in recreational vehicles shall be listed by a nationally recognized testing laboratory for the application for which the appliance is intended. Fuel-burning appliances shall be specifically listed or labelled for installation in recreational vehicles.

6.2 Fuel Conversion. Fuel-burning appliances shall not be converted from one fuel to another unless converted in accordance with the terms of their listings.

6.3 Installations and Instructions.

6.3.1 The installation of each appliance shall conform to the terms of its listing as specified on the appliance and in the manufacturer's instructions. The installer shall provide the manufacturer's instructions in the recreational vehicle. Appliances shall be secured in place to avoid displacement and movement from vibration and road shock.

6.3.2 Operating instructions shall be provided with the appliance.

6.3.3 Fuel-burning heating appliances and refrigerators shall be of the vented-type and vented to the outside. In no case shall the vent of a gas-burning appliance terminate underneath the recreational vehicle.

6.3.4 Fuel-burning heat-producing appliances, except ranges and illuminating appliances, shall be designed or installed to provide for a complete separation of the combustion system from the atmosphere of the recreational vehicle. Combustion air inlets and flue gas outlets shall be listed or certified as components of the appliance.

6.3.5 A fuel-burning refrigerator shall be designed or installed to provide for complete separation of the combustion system from the atmosphere of the recreational vehicle. It shall be installed in accordance with the provisions of its approval and listing.

6.4 Venting.

6.4.1 Vents, roof jacks, and special fittings supplied as component parts of an appliance shall be installed in conformity with the terms of their listing. A single wall metal vent shall not be used unless it is a component part of a listed appliance.

6.4.2 Every joint of any vent or vent connector shall be secure, rigid, tight, and of approved design and workmanship.

6.5 Marking.

6.5.1 Information on clearances, input ratings, lighting and shutdown shall be attached to the appliances with the same permanence as the nameplate, and so located that it is easily readable when the appliance is properly installed.

6.5.2 Each fuel-burning appliance shall bear the appliance manufacturer's permanent marking designating the type(s) of fuel for which it is listed. If listed and installed for use with either LP-gas or natural gas, the appliance manufacturer's permanent instructions regarding conversion from one fuel to the other shall be supplied.

6.6 Accessibility. Every appliance shall be accessible for inspection, service, repair, and replacement without removing permanent construction. Sufficient room shall be available to enable the operator to observe the burner, control, and ignition means while starting the appliance.

6.7 Location. Heat-producing appliances shall be so located that doors, drapes, or other such material cannot be placed or swung closer to the front of the appliance than the clearances specified on the labelled appliances.

6.8 Clearances.

6.8.1 Clearances between heat-producing appliances and adjacent surfaces shall be not less than as specified in the terms of their listing. Clearance spaces shall be framed in or guarded to prevent creation of storage space within the clearance specified.

6.8.2 Ranges. Ranges shall have a vertical clearance between the cooking top and combustible material or metal cabinets, in accordance with Table 7 or the terms of their listings.

Table 7

Type of Protection Provided to Combustible Material or Metal Cabinets above Range	Top Burner Rating (BTUH)	Oven Burner Rating (BTUH)	Vertical Clearance Required above Range Top (inches)
1. No protection provided.	Any combination, number, or input.	Any	30
2. ¼-inch thick minimum asbestos millboard covered with 28 U.S. gauge sheet metal extending 9 inches beyond the sides of the range and covering the entire bottom of the material to be protected extending over the top of range. In lieu of 28 gauge sheet metal, a hood, 28 U.S. gauge sheet metal, may be used. Hood shall be not less than the width of the range and shall be centered over the range and cover the entire bottom of the material to be protected.	Any combination, number, or input.	Any	24
3. Range hood, 28 U.S. gauge, with minimum 2-inch vertical sides and provided with a bead or flange around top of hood to provide a minimum ¼-inch dead air space between hood and protected material. Hood shall be not less than the width of the range and shall be installed centered over range and cover the entire bottom of the material to be protected extending over the top of range.	Not more than four top burners — input not to exceed 6,000 BTUH each.	10,000	19½
	Not more than four top burners — input not to exceed 9,000 BTUH each.	24,000	20¾
	Two rear burners — inputs not to exceed 9,000 BTUH each and two front burners, inputs not to exceed 12,000 BTUH each.	22,000	23½
4. Same as No. 3, except no dead air space clearance provided.	Not more than four burners — input not to exceed 9,000 BTUH each.	22,000	23

6.9 Ventilation.

6.9.1 The area in which any fuel-burning cooking appliance is located shall be ventilated by a gravity vent opening not less than twelve and one-half square inches (12.5 sq. in.) in cross-sectional area, located higher than the appliance, or, by mechanical ventilating equipment that is installed in accordance with the terms of its listing and the manufacturer's instructions. Gravity or mechanical ventilation shall be installed within a horizontal distance of not more than ten feet (10′) from the vertical front of the appliance. Vent hood ducts shall be designed so that the duct outlet is located at such a point as to preclude the trapping of products of combustion. Ducts shall extend through the wall or roof to the outer air.

6.10 Air Ducts.

6.10.1 Material. Supply ducts shall be made of galvanized steel, tin-plated steel, or aluminum, or shall be listed Class I air ducts. A duct system integral with the structure may be acceptable if it is of durable construction that can be demonstrated to be equally resistant to fire and deterioration. Ducts constructed from sheet metal shall be in accordance with Table 8. Portions of return ducts directly above the heating surface of the appliance, or closer than 2 feet horizontally from the outer jacket or casing of the appliance, shall be constructed in accordance with the requirements of Table 8 or shall be listed Class I air ducts.

Table 8

Minimum Metal Thickness for Ducts*

	Diameter or Width	
	14 inches or less	Over 14 inches
Round Exposed	0.013 in.	0.016 in.
Enclosed Rectangular or Round	0.013 in.	0.016 in.
Exposed Rectangular	0.016 in.	0.019 in.

*When "nominal" thicknesses are specified, 0.003 inch shall be added to these "minimum" metal thicknesses.

6.10.2 Sizing of Ducts. Ducts shall be designed so that when a labeled forced-air furnace is installed and operated continually at

its normal input rating in the recreational vehicle, with all registers in full open position, the static pressure measured in the duct plenum shall not exceed that shown on the label of the appliance. When an air-cooling coil is installed in the system, the total static pressure of the coil and the system shall not exceed that shown on the label of the appliance. The minimum dimension of any branch duct shall be at least one and one-half inches (1½″) and of any main duct, two and one-half inches (2½″).

6.10.3 Joints and Seams. Joints and seams of ducts shall be securely fastened and made substantially airtight. Slip joints shall have a lap of at least one inch (1″) and shall be individually fastened. Tape or caulking compound may be used for sealing mechanically secure joints. Where used, tape or caulking compound shall not be subject to deterioration under long exposures to temperatures up to 200° Fahrenheit and to conditions of high humidity, excessive moisture, or mildew.

6.10.4 Airtightness of Supply Duct Systems. A supply duct system shall be considered substantially airtight when the static pressure in the duct system, with all registers sealed and with the furnace air circulator at high speed, is at least 80 percent of the static pressure measured in the furnace casing, with its outlets sealed and the furnace air circulator operating at high speed. Pressures shall be measured with a water manometer or equivalent device calibrated to read in increments not greater than one-tenth inch (1/10″) water column.

6.10.5 Supports. Ducts shall be securely supported.

6.11 Circulating Air.

6.11.1 Return Air Openings. Provisions shall be made to permit the return of circulating air from all rooms and living spaces, except toilet room(s), to the circulating air supply inlet of the furnace.

6.11.2 Return Air Ducts. The cross-sectional area of the return air duct shall not be less than 2 square inches for each 1,000 Btu per hour input rating of the appliance. Dampers shall not be placed in any return air duct, except that a diverting damper may be placed in a combination fresh air intake and return air duct so arranged that the required cross-sectional area will not be reduced at all possible positions of the damper.

6.11.3 Permanent Unclosable Openings. Living areas not served by return air ducts and closed off from the return opening of the furnace by doors, sliding partitions, or other means, shall

be provided with permanent unclosable openings in the doors or separating partitions to allow circulated air to return to the furnace. Such openings may be grilled or louvered. The net free area of each opening shall be not less than one square inch (1 sq. in.) for every five square feet (5 sq. ft.) of total living area closed off from the furnace by the door or partition serviced by that opening. Under-cutting doors connecting the closed-off area may be used as a means of providing return air area. However, in the event that doors are undercut, they shall be undercut a minimum of two inches (2″) and no more than two and one-half inches (2½″) and no more than one-half of the free air area so provided shall be considered as return air area.

APPENDIX TO PART II

Part III — Electrical Systems

1. Introduction

1.1 Electrical engineers associated with the design, manufacturing, installation, and inspection of recreational vehicle electrical systems have been aware of the need for uniform technical standards leading to the safe use of this special type of equipment. They have also recognized that because of conditions of transport and use, existing electrical equipment standards for motor vehicles or for buildings are not completely applicable to recreational vehicles. It is with these factors in mind that Part III of this Standard has been developed.

1.2 Much of the material in Part III has been taken from, or is based on the National Electrical Code (American National Standard C1 — 1968) and standards listed in the Appendix of this Part.

2. Scope

2.1 Part III of this Standard covers the electric conductors and equipment installed within or on recreational vehicles and also the conductors that connect them to a supply of electricity.

2.2 This Standard is not intended as a design specification or an instruction manual for untrained persons.

2.3 The provisions of this Standard are not intended to prevent the use of any material, appliance, installation, device, arrangement, or method of construction not specifically prescribed herein, provided any such alternative has been approved or listed. The enforcement authority shall approve such alternate if the material, appliance, installation, device, arrangement or method of construction is at least the equivalent of that prescribed by this Part, and may require tests or proof of compliance, to substantiate any claims that may be made regarding the use of any such alternate.

3. Definitions

***Accessible (as applied to equipment):** Admitting close approach because not guarded by locked doors, elevation or other effective means. (See **Readily Accessible**.)

*Definition identical to that appearing in the National Electrical Code.

Accessible (as applied to wiring methods): Not permanently closed in by the structure or finish of the recreational vehicle; capable of being removed without disturbing the recreational vehicle structure or finish. (See **Concealed** and **Exposed**.)

Air-Conditioning or Comfort Cooling Equipment: All of that equipment intended or installed for the purpose of processing the treatment of air so as to control simultaneously its temperature, humidity, cleanliness and distribution to meet the requirements of the conditioned space.

***Ampacity:** Current-carrying capacity expressed in amperes.

***Appliance:** Utilization equipment, generally other than industrial, normally built in standardized sizes or types which is installed or connected as a unit to perform one or more functions such as clothes washing, air conditioning, food mixing, deep frying, etc.

***Appliance — Fixed:** An appliance which is fastened or otherwise secured at a specific location.

Appliance — Portable: An appliance that is actually moved or can easily be moved from one place to another in normal use.

NOTE: For the purpose of this Standard the following major appliances are considered portable if cord connected: Refrigerators, clothes washers, dishwashers without booster heaters, or other similar appliances.

***Appliance — Stationary:** An appliance which is not easily moved from one place to another in normal use.

Approved: Means acceptable to the authority having jurisdiction.

***Attachment Plug (Plug Cap) (Cap):** A device that by insertion in a receptacle establishes connection between the conductors of the attached flexible cord and the conductors connected permanently to the receptacle.

***Automatic:** Self-acting, operating by its own mechanism when actuated by some impersonal influence, as for example, a change in current strength, pressure, temperature, or mechanical configuration.

***Bonding Jumper:** A reliable conductor to assure the required electrical conductivity between metal parts required to be electrically connected.

***Bonding Jumper — Circuit:** The connections between portions of a conductor in a circuit to maintain required ampacity of the circuit.

---

*Definition identical to that appearing in the National Electrical Code.

***Branch Circuit:** That portion of a wiring system extending beyond the final overcurrent device protecting the circuit.

NOTE: A device not approved for branch circuit protection such as a thermal cutout or motor overload protective device is not considered as the overcurrent device protecting the circuit.

***Branch Circuit — Appliance:** A circuit supplying energy to one or more outlets to which appliances are to be connected; such circuits to have no permanently connected lighting fixtures not a part of an appliance.

***Branch Circuit — General Purpose:** A branch circuit that supplies a number of outlets for lighting and appliances.

***Branch Circuit — Individual:** A branch circuit that supplies only one utilization equipmet.

***Branch Circuit — Multiwire:** A circuit consisting of two or more ungrounded conductors having a potential difference between them and an identified grounded conductor having equal potential difference between it and each ungrounded conductor of the circuit and which is connected to the neutral conductor of the system.

***Cabinet:** An enclosure designed either for surface or flush mounting, and provided with a frame, mat or trim in which swinging doors are hung.

***Circuit Breaker:** A device designed to open and close a circuit by nonautomatic means, and to open the circuit automatically on a predetermined overload of current, without injury to itself when properly applied within its rating.

Concealed: Rendered inaccessible by the structure or finish of the recreational vehicle. Wires in concealed raceways are considered concealed, even though they may become accessible by withdrawing them.

Conductor:

***Bare:** A conductor having no covering or insulation whatsoever. (See **Conductor, Covered.**)

***Covered:** A conductor having one or more layers of nonconducting materials that are not recognized as insulation under the code. (See **Conductor, Bare.**)

***Insulated:** A conductor covered with material recognized as insulation.

*Definition identical to that appearing in the National Electrical Code.

***Connector, Pressure (Solderless):** A device that establishes the connection between two or more conductors or between one or more conductors and a terminal by means of mechanical pressure and without the use of solder.

Converter: A device which changes electrical energy from one form to another, as from alternating current to direct current.

***Cooking Unit, Counter-Mounted:** An assembly of one or more domestic surface heating elements for cooking purposes designed for flush mounting in, or supported by, a counter, and which assembly is complete with inherent or separately mountable controls and internal wiring. (See **Oven, Wall-Mounted.**)

Dead Front (as applied to switches, circuit-breakers, switchboards, and distribution panelboards): So designed, constructed and installed that no current-carrying parts are normally exposed on the front.

***Demand Factor:** The demand factor of any system, or part of a system, is the ratio of the maximum demand of the system, or part of a system, to the total connected load of the system, or of the part of the system under consideration.

***Device:** A unit of an electrical system that is intended to carry but not utilize electrical energy.

Direct Current (DC): A non-alternating flow of energy within a circuit having an electromotive force or potential (not exceeding 25 volts, for the purposes of this Standard).

Disconnecting Means: The necessary equipment usually consisting of circuit breaker or switch and fuses, and their accessories, located near the point of entrance of supply conductors in a recreational vehicle and intended to constitute the means of cutoff for the supply to that recreational vehicle.

NOTE: Receptacles used as disconnecting means shall be accessible (as applied to wiring methods) and capable of interrupting their rated current without hazard to the operator.

Distribution Panelboard: A single panel or group of panel units designed for assembly in the form of a single panel; including buses, and with or without switches and/or automatic overcurrent protective devices for the control of light, heat or power circuits of small individual as well as aggregate capacity; designed to be placed in a cabinet or cutout box placed in or against a wall or partition and accessible only from the front.

*Definition identical to that appearing in the National Electrical Code.

***Enclosed:** Surrounded by a case that will prevent a person from accidentally contacting live parts.

***Equipment:** A general term, including material, fittings, devices, appliances, fixtures, apparatus, and the like, used as a part of, or in connection with, an electrical installation.

***Exposed (as applied to live parts):** A live part that can be inadvertently touched or approached nearer than a safe distance by a person. It is applied to parts not suitably guarded, isolated, or insulated. (See **Accessible** and **Concealed.**)

***Exposed (as applied to wiring method):** Not concealed.

***Externally Operable (as applied to equipment that is enclosed in a case or cabinet):** Capable of being operated without exposing the operator to contact with live parts.

***Feeder:** A feeder is the circuit conductors between the service equipment, or the generator switchboard of an isolated plant, and the branch circuit overcurrent device.

***Fitting:** An accessory, such as a locknut, bushing, or other part of a wiring system, that is intended primarily to perform a mechanical rather than an electrical function.

***Ground:** A conducting connection, whether intentional or accidental, between an electrical circuit or equipment and earth, or to some conducting body that serves in place of the earth.

***Grounded:** Connected to earth or to some conducting body that serves in place of the earth.

***Grounded Conductor:** A system or circuit conductor which is intentionally grounded.

***Grounding Conductor:** A conductor used to connect equipment or the grounded circuit of a wiring system to a grounding electrode or electrodes.

***Grounding Conductor, Equipment:** A conductor used to connect the equipment being grounded to the service equipment enclosure.

***Isolated:** Not readily accessible to persons unless special means for access are used.

Labeled: Equipment or materials to which has been attached a label, symbol, or other identifying mark of a nationally recognized

---

*Definition identical to that appearing in the National Electrical Code.

testing laboratory that maintains periodic inspection of production of labeled equipment or materials and by whose labeling is indicated compliance with nationally recognized standards or tests to determine suitable usage in a specified manner.

***Lighting Outlet:** An outlet intended for the direct connection of a lampholder, a lighting fixture or a pendant cord terminating in a lampholder.

Listed: Equipment or materials included in a list published by a nationally recognized testing laboratory that maintains periodic inspection of production of listed equipment or materials and whose listing states either that the equipment or material meets nationally recognized standards or has been tested and found suitable for use in a specified manner.

***Nonautomatic:** The implied action requires personal intervention for its control.

***Outlet:** A point on the wiring system at which current is taken to supply utilization equipment.

***Oven, Wall Mounted:** A domestic oven for cooking purposes designed for mounting in or on a wall or other surface.

Power Supply Assembly: The conductors, including the grounding conductors, insulated from one another, the connectors, attachment plug caps, and all other fittings, grommets, or devices installed for the purpose of delivering energy from the source of electrical supply to the distribution panel within the recreational vehicle.

Raceway: Any channel for holding wires, cables, or bus bars that is designed expressly for, and used solely for, this purpose. Raceways may be of metal or insulating material and the term includes rigid metal conduit, flexible metal conduit, electrical metallic tubing, underfloor raceways, cellular metal floor raceways, surface metal raceways, wireways, and busways and rigid nonmetallic conduit.

***Raintight:** So constructed or protected that exposure to a beating rain will not result in the entrance of water.

***Readily Accessible:** Capable of being reached quickly for operation, renewal, or inspection, without requiring those to whom ready access is requisite to climb over or remove obstacles or to resort to portable ladders, chairs, etc. (See **Accessible.**)

***Receptacle Outlet:** An outlet where one or more receptacles are installed.

*Definition identical to that appearing in the National Electrical Code.

***Receptacle (Convenience) Outlet:** A receptacle is a contact device installed at an outlet for the connection of an attachment plug and flexible cord.

Transformer: A device, which when used, will raise or lower the voltage of alternating current of the original source.

***Utilization Equipment:** Equipment that utilizes electric energy for mechanical, chemical, heating, lighting, or similar useful purposes.

***Ventilated:** Provided with a means to permit circulation of air sufficient to remove an excess of heat, fumes or vapors.

Voltage (of a Circuit): The greatest effective difference of potential between any two conductors of the circuit concerned.

***Watertight:** So constructed that moisture will not enter the enclosing case.

***Weatherproof:** So constructed or protected that exposure to the weather will not interfere with successful operation.

Raintight or watertight equipment may fulfill the requirements for "weatherproof". However, weather conditions vary and consideration should be given to conditions resulting from snow, ice, dust, or temperature extremes.

4. Batteries and Direct-Current Power (Twelve Volts Nominal)

4.1 Battery Circuits. Battery circuits furnished and installed by the recreational vehicle manufacturer, other than those related to braking, are subject to this Standard. Circuits supplying lights subject to Federal or State regulations shall be in accordance with applicable government regulations but shall not be lower than provided by this Standard.

4.2 Low-Voltage Wiring Materials.

4.2.1 Copper conductors shall be used for low-voltage circuits.

4.2.2 The insulation of low-voltage conductors used in battery and direct current circuits shall be rated at least 60°C.

4.2.3 Conductors furnished and installed by the recreational vehicle manufacturer shall have a minimum of one thirty-second inch (1/32") of thermoplastic insulation or equal.

*Definition identical to that appearing in the National Electrical Code.

4.2.4 The insulation of outdoor or under-chassis wire shall be moisture and heat resistant, Type THW or equivalent.

4.2.5 Single-wire, low-voltage conductors shall be of the stranded type.

4.3 Low-Voltage Wiring Methods.

4.3.1 Conductors shall be protected against physical damage and shall be adequately supported. Where insulated conductors are clamped to the structure, the conductor insulation shall be supplemented by an additional wrap or layer of equivalent material, except that jacketed cables need not be so protected. Wiring shall be routed away from sharp edges, moving parts or heat sources.

4.3.2 Splices and connections shall be made in accordance with Society of Automotive Engineers (SAE) standards and recommended practices or equivalent.

4.3.3 Battery and direct-current circuits shall be physically separated by at least a one-half inch (½″) gap, or other approved means, from circuits of a different power source. This may be accomplished by clamping, routing, or equivalent means which ensure permanent total separation.

4.4 Battery Installations. Storage batteries subject to the provisions of this Standard shall be securely attached to the vehicle and installed in an area which is ventilated directly to the exterior of the vehicle.

4.5 Overcurrent Protection.

4.5.1 Battery and direct-current circuit wiring shall be protected by overcurrent protective devices rated not in excess of the ampacity of copper conductors, as follows:

Wire Size	Ampacity	Wire Type
18	3	Stranded only
16	9	Stranded only
14	15	Stranded or solid
12	20	Stranded or solid
10	30	Stranded or solid

NOTE: For other allowable conductor ampacities, refer to the National Electrical Code (ANSI C1-1968), Table 310-12.

4.5.2 Circuit breakers or fuses shall be of the listed or approved type, including automotive types conforming to the requirements of Society of Automotive Engineers (SAE) J554 — 1968 or Underwriters' Laboratories, Inc. Standard 275b. Fuseholders shall be clearly marked with maximum fuse size.

4.5.3 Higher current-consuming direct-current appliances such as pumps, compressors, heater blowers and similar motor-driven appliances shall be installed in accordance with the manufacturer's instructions.

4.5.4 The overcurrent protective device shall be installed in an accessible location on the vehicle as close as practical to the point where the power supply connects to the vehicle circuits. If located outside the recreational vehicle, the device shall be protected against weather and physical damage.

5. Combination Electrical Systems

5.1 General. Vehicle wiring suitable for connection to a battery or direct-current supply source may be connected to a 120-volt source provided that the entire wiring system and equipment are rated and installed in full conformity to Section 7 of this Standard covering 120-volt electrical systems. Circuits fed from alternating-current transformers shall not supply direct-current appliances.

5.2 Voltage Converters (120-volt Alternating Current to Low Voltage Direct Current). The 120-volt alternating current side of voltage converters shall be wired in full conformity with the provisions of Section 7 of this Standard for 120-volt electrical systems. Converters supplied as an integral part of a listed appliance are not subject to the above. All converters and transformers shall be listed or approved by a nationally recognized testing laboratory.

5.3 Dual-Voltage Fixtures or Appliances. Fixtures or appliances having both 120-volt and low-voltage connections shall be listed or approved as dual voltage by a nationally recognized testing laboratory.

5.4 Autotransformers. Autotransformers are prohibited.

5.5 Receptacles and Plug Caps. When a recreational vehicle is equipped with separate external connections for a 120-volt alternating-current system and a battery or direct-current system, receptacles and plug caps shall be of different configurations.

5.6 Identification.

5.6.1 When a vehicle equipped with a battery or direct-current system has an external connection for low-voltage power, the receptacle shall have a configuration that will not accept 120-volt power. The vehicle shall have permanently affixed on the outside wall adjacent to the point of entrance of the power supply conductors a tag which reads:

THIS CONNECTION IS FOR LOW-VOLTAGE BATTERY OR DIRECT CURRENT ONLY. DO NOT CONNECT TO 120 OR 240 VOLTS AC.

5.6.2 The tag shall be 3 inches by 1¾ inches minimum size, made of etched, metal-stamped or embossed brass, stainless steel, anodized or alclad aluminum not less than 0.020 inch thick, or other approved material (e.g., 0.005 inch plastic laminates).

6. Generator Installations

6.1 Mounting. Generators shall be mounted in such a manner as to be effectively electrically bonded to the recreational vehicle chassis.

6.2 Generator Protection. Equipment shall be installed to ensure that the generator is disconnected when the vehicle is energized from an outside source and to ensure that the outside source is disconnected when the vehicle is energized by the generator. The generator field shall be protected by appropriately rated equipment which has been listed.

6.3 Installation of Storage Batteries and Generators. Storage batteries and internal-combustion-driven generator units (subject to the provisions of this Standard) shall be secured in place to avoid displacement from vibration and road shock and shall be installed in a compartment which is vapor-tight to the interior of the vehicle.

6.4 Ventilation of Generator Compartments. Compartments accommodating internal-combustion-driven generator units shall be provided with approved ventilation in accordance with instructions provided by the manufacturer of the generator unit.

6.5 Location of Internal-Combustion-Engine Generator Exhaust. Exhaust from generator internal-combustion engines shall not terminate adjacent to the vehicle gasoline tank filler spout inlet.

7. Nominal 120 or 120/240 Volt Systems

7.1 General Requirements. The electrical equipment and material of recreational vehicles indicated for connection to a wiring system nominally rated 120 volts, 2 wire with ground, or a wiring system nominally rated 120/240 volts, 3 wire with ground, shall be approved and installed in accordance with the requirements of the National Electrical Code (ANSI C1 — 1968).

7.2 Materials and Equipment. Electrical materials, devices, appliances, fittings and other equipment installed, intended for use in, or attached to the recreational vehicle shall be listed by a nationally recognized testing laboratory.

7.3 Circuit or Branch Circuits Required.

7.3.1 The circuit or branch circuits required in a recreational vehicle shall conform to 7.14.1 and be determined in accordance with 7.3.1.1, 7.3.1.2 or 7.3.1.3.

7.3.1.1 Recreational vehicles with not more than eight (8) lighting and receptacle outlets combined shall have either:

a. One general purpose circuit, 15 amperes, No. 14 AWG minimum, copper or listed equal, to supply these outlets, provided the total rating of fixed appliances connected to this circuit does not exceed five amperes or 600 watts, *or*

b. One general purpose circuit, 20 amperes, No. 12 AWG minimum, copper or listed equal, to supply these outlets, provided the total rating of fixed appliances connected to this circuit does not exceed nine amperes or 1,000 watts.

Vehicles wired in accordance with a. or b. shall not be equipped with electrical heating or cooking appliances.

7.3.1.2 Recreational vehicles with more than eight (8) lighting and receptacle outlets combined shall have one appliance branch

circuit, 20 amperes, No. 12 AWG minimum, copper or listed equal, *and* either:

a. One branch circuit, 15 amperes, No. 14 AWG minimum, copper or listed equal, to supply these outlets, provided this circuit does not supply receptacles in the cooking and dining area(s) or electrical heating or cooking appliances, and provided the total rating of fixed appliances connected to this circuit does not exceed five amperes or 600 watts, *or*

b. One branch circuit, 20 amperes, No. 12 AWG minimum, copper or listed equal, to supply these outlets, provided this circuit does not supply receptacles in the cooking and dining area(s) or electrical heating or cooking appliances and provided the total rating of fixed appliances connected to this circuit does not exceed nine amperes or 1,000 watts.

7.3.1.3 Calculations for Lighting and Appliance Load. When 7.3.1.2 (relative to recreational vehicles with more than eight (8) lighting and receptacle outlets combined) is not applied, the following method shall be employed in computing the power supply or feeder assembly and distribution panelboard load for the recreational vehicle:

A. *Lighting:* Length times width of vehicle (outside dimensions, exclusive of hitch and cab) times three watts per square foot, e.g.,

Length × width × 3 = _____ lighting watts.

B. *Small Appliance:* Number of circuits times 1,500 watts for each 20 ampere appliance receptacle circuit, e.g.,

Number of Circuits × 1,500 = _____ small appliance watts.

C. *Total:* Lighting watts plus small appliance watts = _____ total watts.

D. First 3,000 total watts at 100 per cent plus remainder at 35 per cent = _____ watts to be divided by voltage to obtain current (amperes) per leg.

	Amperes per Leg	
	A	*B*
Lighting and small appliance current (amperes) per leg (from D above) =		
E. Add name plate amperes for motors and heater loads (exhaust fans, air conditioners,* electric, gas, or oil heating*) =		
F. Add 25 per cent of amperes of largest motor in (E) =		

*Omit smaller of these two except include blower motor if used as air conditioner evaporator motor.

G. Add name plate amperes for:**

Disposal	_____	_____	
Water Heater	_____	_____	
Wall-Mounted Ovens	_____	_____	
Cooking Units	_____	_____	
TOTAL	_____	_____	= _____

H. Add amperes for free-standing range as distinguished from separate ovens and cooking units. Derive from following table by dividing watts by by 230 volts.

Range	Name Plate Rating	Use
(Free standing range as distinguished from separate oven and cooking units)	10,000 w or less	80 per cent of rating
	10,001–12,500 w	8,000 w
	12,501–13,500 w	8,400 w
	13,501–14,500 w	8,800 w
	14,501–15,500 w	9,200 w
	15,501–16,500 w	9,600 w
	16,501–17,500 w	10,000 w

	Amperes per Leg	
	A	*B*
I. If outlets or circuits are provided for other than factory-installed major appliances, the anticipated load shall be added for each.		
TOTAL =		

When the total for Legs A and B are unequal, use the larger to determine the distribution panel and supply cord rating.
(Service amperes shall not exceed supply cord rating. See 7.7.1.5.)

**When number of appliances is four or more use 75 per cent of total.

7.4 Receptacle Outlets Required.

7.4.1 Except in the bath and hall areas, receptacle outlets shall be installed at wall spaces two feet (2′) wide or more, so that no point along the floor line is more than six feet (6′), measured horizontally, from an outlet in that space. Except as explained in the following, receptacle outlets are not required for wall spaces occupied by kitchen cabinets, wardrobe cabinets, built-in furniture, behind

doors which may open fully against a wall surface, or similar facilities. A receptacle outlet shall be installed:

a. Adjacent to counter tops in the kitchen (at least one on each side of the sink if counter tops are on each side and are twelve inches (12″) or over in width).

b. Adjacent to the refrigerator and gas-range space, except when a gas-fired refrigerator or cooking appliance, requiring no external electrical connection, is factory installed.

c. Adjacent to counter top spaces (and built-in vanities) which cannot be reached from a receptacle required in 7.4.1. a by a cord of six feet (6′) without crossing a traffic area, cooking appliance or sink.

7.4.2 When installed adjacent to a bathroom lavatory, the receptacle outlet shall be a minimum of thirty inches (30″) from the floor. The receptacle outlet may be contained in a listed lighting fixture. A receptacle outlet shall not be installed in a tub, shower enclosure, or combination shower compartment.

7.5 Distribution Panelboard.

7.5.1 A listed and appropriately rated distribution panelboard shall be used. The distribution panelboard shall be of the insulated neutral type, with the grounding bar attached to the metal frame of the panelboard or other approved grounding means.

7.5.2 The distribution panelboard shall be installed in a readily accessible location and may be located in a closet.

7.5.3 The distribution panelboard shall be of the dead-front type and shall consist of one or more circuit breakers or shall be Type S plug fuses. A main disconnecting means shall be provided where fuses are used or where more than two circuit breakers are employed.

7.6 Branch Circuit Protection.

7.6.1 The branch-circuit overcurrent devices shall be rated:

a. Not more than the circuit conductors; and

b. Not more than 150 per cent of the rating of a single appliance rated 10-amperes or more; but

c. Not more than the fuse size marked on the air conditioner or other motor-operated appliance.

7.6.2 A 20-ampere fuse or circuit breaker shall be considered adequate protection for fixture leads, cords, or portable appliances,

and No. 14 AWG (American Wire Gage) tap conductors, not over 6 feet long for recessed lighting fixtures.

7.6.3 If more than one outlet or load is on a branch-circuit, a 15-ampere receptacle shall be considered protected by a 20-ampere fuse or circuit breaker.

7.7 Power Supply Assembly.

7.7.1 General.

7.7.1.1 Recreational vehicles wired in accordance with 7.3.1.1.a. shall use a listed 15-ampere, or higher, main power supply assembly. (See 7.8.1, 7.8.1.2.a, and 7.8.2.)

7.7.1.2 Recreational vehicles wired in accordance with 7.3.1.1.b. shall use a listed 20-ampere, or higher, main power supply assembly. (See 7.8.1, 7.8.1.2.b, and 7.8.2.)

7.7.1.3 Recreational vehicles wired in accordance with 7.3.1.2 or 7.3.1.3 shall use a listed 30-ampere, or higher, main power supply assembly. (See 7.8.1, 7.8.1.2.c, and 7.8.2.)

7.7.1.4 In accordance with 7.3.1.3, any recreational vehicle with a rating in excess of 30-amperes, 115 volts, shall use a listed 40-ampere or 50-ampere 120/240 volt power supply assembly (C 73.17 — 1966 configuration). (See 7.8.1, 7.8.1.2.d, and 7.8.2.)

Exception: When the calculated load of the recreational vehicle exceeds 30 amperes, 120 volts, a second power supply cord may be installed when permitted by the authority having jurisdiction. Where a two cord supply system is installed, they shall not be interconnected on either the line side or the load side. The grounding circuits and grounding means shall be electrically interconnected.

7.7.1.5 Dual Supply Source.

a. Where a dual supply system, consisting of a generator and a power supply cord is installed, the feeder from the generator shall be protected by an overcurrent-protective device. Installation shall be in accordance with Sections 6.1 and 6.2.

b. Calculation of loads shall be in accordance with 7.3.1.3

c. The two supply sources need not be of the same capacity.

d. If the generator source exceeds 30-amperes, 115 volts, it may be wired either as a 120 volt system or a 120/240 volt system, providing an overcurrent-protective device of the proper rating is installed in the feeder.

e. The external-power-supply assembly may be less than the calculated load but not less than 30 amperes and shall have overcurrent protection not greater than the capacity of the external power supply assembly.

7.8 Means for Connecting to Power Supply.

7.8.1 Assembly. The power supply assembly or assemblies shall be factory supplied (see 7.8.1.a.) or factory installed when of the permanently connected type as specified in 7.8.1.b.

a. **Separable.** When a separable power supply assembly consisting of a cord with a female connector and molded attachment plug cap is provided, the vehicle shall be equipped with a permanently mounted, listed or approved, male-recessed-type motor base receptacle wired directly to the distribution panel by an approved wiring method. The attachment plug cap shall be of an approved or listed type. (See 7.7.1.1, 7.7.1.2, 7.7.1.3, 7.7.1.4.)

b. **Permanently Connected.** Each power supply assembly shall be connected directly to the terminals of the distribution panel or conductors within an approved junction box and provided with means to prevent strain from being transmitted to the terminals. The conductors between each junction box and the terminals of each distribution panel shall be equal to the ampacity of the power supply cord. The supply end of the assembly shall be equipped with an attachment plug of the type described in 7.8.1.2. Where the cord passes through the walls or floors, it shall be protected by means of conduit and bushings or equivalent.

7.8.1.1 Cord. The cord set shall be listed as suitable for use with recreational vehicles.* The cord shall be not less than 20 feet as measured from the point of entrance to the recreational vehicle or the face of the motor base attachment plug nor more than 26½ feet in length overall to the face of the attachment plug at the supply end.

7.8.1.2 Plug Caps.

a. Recreational vehicles having only one 15-ampere branch circuit as permitted by 7.3.1.1.a. shall have an attachment-plug cap which shall be two-pole, three-wire, grounding type, rated 15-amperes, 125 volts, conforming to American National Standard C73.11 — 1966.

b. Recreational vehicles having only one 20-ampere branch circuit as permitted in 7.3.1.1.b. shall have an attachment-plug cap which shall be two-pole, three-wire, grounding type, rated 20-amperes, 125 volts, conforming to American National Standard C73.12 — 1966.

c. Recreational vehicles wired in accordance with 7.3.1.2 or 7.3.1.3 shall have an attachment-plug cap which shall be two-

*Until such time as cord sets so listed become available, this requirement may be met by cord sets listed as suitable for use with travel trailers.

pole, three-wire, grounding type, rated 30-amperes, 125 volts, conforming to American National Standard C73.13 — 1966, intended for use with units rated at 30-amperes, 125 volts, for 120 volt systems.

d. Recreational vehicles having a power supply assembly rated 40-amperes or 50-amperes as permitted by 7.3.1.3 shall have a 3-pole, 4-wire grounding type attachment-plug cap rated 50-amperes, 125/250 volts, conforming to American National Standard C73.17 — 1966.

7.8.2 Labeling at El .rical Entrance. Each recreational vehicle shall have permanently affixed to the exterior skin at or near the point of entrance of the power supply cord(s) a tag 3 inches by 1¾ inches minimum size, made of etched, metal-stamped or embossed brass, stainless steel, anodized or alclad aluminum not less than .020 inch thick, or other approved material (e.g., 0.005 inch plastic laminates), which reads, as appropriate, either:

a. "This connection is for 110–125 volt AC, 60 Hz (Cycles) service. Do not connect to higher voltage" or

b. "This connection is for 3-wire 120/240 volt AC, 60 Hz (Cycles), _____ ampere service."

7.8.3 Location. The point of entrance of a power supply assembly shall be located within twenty-five feet (25′) of the rear, on the left (road) side or at the rear, left of the longitudinal center of the vehicle, within eighteen inches (18″) of the outside wall.

Exception. A camping trailer not more than seventeen feet (17′) in length, a motor home or a truck camper may have the electrical point of entrance located on either side, provided the drain outlet and gas connections are located on the same side.

7.9 Wiring Methods.

7.9.1. Electrical metallic tubing, flexible metallic conduit, metal-clad cable, and nonmetallic sheathed cable with a grounding conductor, shall terminate by means of fittings, clamps or connectors approved for the purpose. Flexible metal conduit may be used as a grounding means where both the conduit and the fittings are approved for the purpose.

7.9.2 Rigid metal conduit shall be provided with a locknut inside and outside the box, and a conduit bushing shall be used on the inside. Inside ends of the conduit shall be reamed.

7.9.3 Nonmetallic outlet boxes are acceptable only with nonmetallic sheathed cable.

7.9.4 In walls and ceilings constructed of wood or other combustible material, outlet boxes and fittings shall be flush with the finished surface or project therefrom.

7.9.5 Wall and ceiling outlets shall be mounted in accordance with Article 370 of the National Electrical Code (ANSI C1 — 1968).

Exception: Snap-in type boxes or boxes provided with special wall or ceiling brackets that securely fasten boxes in walls or ceilings may be used.

7.9.6 The sheath of nonmetallic cable or the armor of metal-enclosed cable shall be continuous between outlet boxes and other enclosures.

7.9.7 Metal-clad and nonmetallic cables may be passed through the centers of the wide side of 2 inch by 4 inch studs. However, they shall be protected where they pass through 2 inch by 2 inch studs or at other studs or frames where the cable would be less than one and one-half inches (1½″) from the inside or outside surface. Steel plates on each side of the cable, or a steel tube, with not less than No. 16 Manufacturers' Standard Gage wall thickness, are required to protect the cable. These plates or tubes shall be securely held in place. When the thickness of studs or frames make it impractical or impossible to use metal plates or tubes, particular care shall be exercised in the design and production of the recreational vehicles so as to avoid contacting the cables with nails, screws, or other fasteners. Such care in design shall include appropriate routing of the cables through studs or frames at locations where the likelihood of their being contacted by nails, screws, or other fasteners subsequent to production is remote.

7.9.8 No bend shall have a radius of less than five times the cable diameter.

7.9.9 When connected with cable connectors or clamps, cables shall be supported within twelve inches (12″) of outlet boxes, distribution panelboards, and splice boxes on appliances. Supports shall be provided every four and one-half feet (4½′) at other places.

7.9.10 Nonmetallic sheathed cables are to be supported within eight inches (8″) of a nonmetallic outlet box without cable clamps.

7.9.11 Nonmetallic cable, if exposed, shall be protected from physical damage, by covering boards, guard strips or conduit. Cable likely to be damaged by stowage shall be so protected in all cases.

7.9.12 Metallic face plates shall be of ferrous metal not less than 0.030 inch in thickness or of nonferrous metal not less than 0.040 inch in thickness. Nonmetallic face plates shall be of the listed or approved type.

7.9.13 Where metallic face plates are used they shall be effectively grounded.

7.9.14 Outdoor or under-chassis wiring (120 volt) exposed to moisture and physical damage shall be protected by rigid metal conduit, or electrical metallic tubing which may be used when closely routed against frames and equipment enclosures. The conductors shall be suitable for wet location.

7.10 Conductors and Outlet Boxes.

7.10.1 Each wire in an outlet box, including grounding conductors, shall be counted as indicated below. Fixture wires, splicing wires, and conductors that do not leave the box are not counted.

No. 14 AWG — 2 cu. in. per wire

No. 12 AWG — 2.25 cu. in. per wire

No. 10 AWG — 2.50 cu. in. per wire

No. 8 AWG — 3.0 cu. in. per wire

NOTE: Where there is not sufficient space for a deeper box, see the National Electrical Code (ANSI C1-1968), Table 370-6 (a-2).

7.10.2 Outlet boxes of dimensions less than those required in Table 370-6 (a) (1) and Table 370-6 (a)(2) of the National Electrical Code may be used provided the box has been tested and approved for the purpose.

7.10.3 At least four inches (4″) of free conductor shall be left at each outlet box except where conductors are intended to loop without joints.

7.11 Painting of Wiring. During painting or staining of the recreational vehicle, it is acceptable to paint metal raceways (except where grounding continuity would be reduced) or the sheath of the nonmetallic cable. Some arrangement, however, must be made so that no paint is applied to the individual wires, as color coding may be obliterated by the paint.

7.11.1 Polarization.

7.11.1.1 The white conductors shall be employed for grounded circuit conductors only and shall be connected to the white terminal

or lead on receptacle outlets and fixtures. It shall be the unswitched wire in switched circuits.

Exception: A cable containing a white conductor may be used for single-pole, three-way or four-way switch loops where the connections are made so that other than the white conductor is the return conductor from the switch to the outlet. Painting of the terminal end of the wire is not required in such cases.

7.11.1.2 If the white conductor of a cable is used for other than grounded conductors or for other than switch loops, as explained in 7.11.1.1 (for a 230-volt circuit for example), the conductor shall be finished in a color other than white at each outlet where the conductors are visible and accessible.

7.12 Connection of Terminals and Splices.

7.12.1 Connection of conductors to terminal parts shall ensure a thoroughly good connection without damaging the conductors and shall be made by means of pressure connectors (including set screw type), solder lugs, or splices to flexible leads. No. 8 or smaller solid conductors and No. 10 or smaller stranded conductors may be connected by means of clamps or screws with terminal plates having upturned lugs, or by means of approved screwless terminals. Terminals for more than one conductor shall be of a type approved for the purpose.

7.12.2 Conductors shall be spliced or joined with approved splicing devices or by brazing, welding, or soldering with a fusible metal or alloy. Soldered splices shall first be so spliced or joined as to be mechanically and electrically secure without solder and then soldered. All splices, joints and free ends of conductors shall be covered with an insulation equivalent to that on the conductors.

7.12.3 If splices of the grounding wire in nonmetallic sheathed cable are made in outlet boxes, the splices shall be insulated.

7.13 Wall Switches.

7.13.1 Switches shall be rated as follows:

a. For lighting circuits, switches shall be rated not less than 10 amperes, 125 volts and in no case less than the connected load.

b. For motors or other loads, switches shall have ampere or horsepower ratings, or both, adequate for loads controlled. (An "AC general use" snap switch may control a motor 2 horsepower or less with full-load current not over 80 per cent of the switch ampere rating.)

7.14 Receptacles.

7.14.1 All receptacle outlets:

a. Shall be of the grounding type; and

b. Shall be installed in accordance with Sections 210-21 and 210-22 of the National Electrical Code (ANSI C1 — 1968).

7.15 Lighting Fixtures.

7.15.1 General.

7.15.1.1 Any combustible wall or ceiling finish exposed between the edge of a fixture canopy, or pan and the outlet box, shall be covered with noncombustible material of either metal equal to the thickness of the fixture or asbestos of one-sixteenth inch ($\frac{1}{16}$").

7.15.2 Shower Fixtures.

7.15.2.1 If a lighting fixture is provided over a bathtub or in a shower stall, it shall be of the enclosed and gasketed type and listed or approved for the type of installation.

7.15.2.2 The switch for shower lighting fixtures and exhaust fans, located over a tub or in a shower stall, shall be located outside the tub or shower space.

7.15.3 Outdoor Outlets, Fixtures, Air-Cooling Equipment, etc.

7.15.3.1 Outdoor fixtures and other equipment shall be listed or approved for outdoor use.

7.16 Grounding. (See also Section 7.18 on Bonding of Non-current-Carrying Metal Parts)

7.16.1 Service Grounding. The grounding conductor in the supply cord or feeder shall be connected to the grounding bus or other approved grounding means in the distribution panelboard.

7.16.2 Distribution Panelboard. The distribution panelboard shall have a grounding bus with sufficient terminals for all grounding conductors or other approved grounding means.

7.16.3 Insulated Neutral.

7.16.3.1 The grounded circuit conductor (neutral) shall be insulated from the equipment grounding conductors and from equipment enclosures and other grounded parts. The grounded (neutral) circuit terminals in the distribution panelboard and in ranges, clothes dryers, counter-mounted cooking units, and wall-mounted ovens shall be insulated from the equipment enclosure.

Bonding screws, straps or buses in the distribution panelboard or in appliances shall be removed and discarded.

7.16.3.2 Connection of electrical ranges and electrical clothes dryers utilizing a grounded (neutral) conductor, if cord connected, shall be made with 4 conductor cord and 3-pole, 4-wire grounding type plugs and receptacles.

7.17 Interior Equipment Grounding.

7.17.1 In the electrical system, all exposed metal parts, enclosures, frames, lighting fixture canopies, etc., shall be effectively bonded to the grounding terminal or enclosure of the distribution panelboard.

7.17.2 Bare wires, green-colored wires, or green wires with yellow stripe(s) shall be used for equipment grounding conductors only.

7.17.3 Where grounding of electrical equipment is specified, it may be accomplished as follows:

a. Connection by metallic raceway (conduit or electrical metallic tubing) or the sheath of metal-clad cable to metallic outlet boxes.

b. A connection between the one or more grounding conductors and a metallic box by means of a grounding screw, which shall be used for no other purpose, or an approved grounding device.

c. The grounding wire in nonmetallic sheathed cable may be secured under a screw threaded into the fixture canopy other than a mounting screw, cover screw, or to a listed grounding means (plate) in a nonmetallic outlet box for fixture mounting (grounding means may also be used for fixture attachment screws).

7.17.4 A connection between the one or more grounding conductors brought into a nonmetallic outlet box shall be so arranged that a connection can be made to any fitting or device in that box that requires grounding.

7.17.5 Where more than one equipment grounding conductor of a branch circuit enters a box, all such conductors shall be in good electrical contact with each other, and the arrangement shall be such that the disconnection or removal of a receptacle, fixture, or other device fed from the box will not interfere with or interrupt the grounding continuity.

7.17.6 Cord-connected appliances, such as washing machines, clothes dryers, refrigerators, and the electrical system of gas ranges, etc., shall be grounded by means of an approved cord with grounding conductor and grounding type plug.

7.18 Bonding of Noncurrent-Carrying Metal Parts.

7.18.1 All exposed noncurrent-carrying metal parts that may become energized shall be effectively bonded to the grounding terminal or enclosure of the distribution panelboard.

7.18.2 A bonding conductor shall be connected between any distribution panelboard and an accessible terminal on the chassis.

Exception: Any recreational vehicle which employs a unitized metal chassis-frame construction to which the distribution panelboard is securely fastened with a bolt(s) and nut(s) or by welding or riveting is considered to be bonded.

7.18.3 Grounding terminals shall be of the solderless type and listed as pressure terminal connectors recognized for the wire size used. The bonding conductor may be solid or stranded, insulated or bare, and shall be No. 8 AWG copper minimum, or equal.

7.18.4 The metallic roof and exterior covering are considered bonded if:

a. The metal panels overlap one another and are securely attached to the wood or metal frame parts by metallic fasteners, and

b. The lower panel of the metallic exterior covering is secured by metallic fasteners at each cross member of the chassis, or the lower panel is bonded to the chassis by a metal strap.

7.18.5 The gas, water and waste pipes are considered grounded if they are bonded to the chassis. (See Paragraph 7.18.2 for chassis bonding.)

7.18.6 Furnace and metallic circulating air ducts shall be bonded.

7.19 Appliance Accessibility. Every appliance shall be accessible for inspection, service, repair, and replacement without removal of permanent construction.

8. Factory Tests (Electrical)

8.1 Electrical Factory Tests. Each recreational vehicle shall be subjected to the following tests:

8.1.1 Circuits of 120 volts or 120/240 Volts. Each recreational vehicle designed with a 120 volt or 120/240 volt electrical system shall withstand the applied potential without electrical breakdown of a one-minute 900-volt dielectric strength test, or a one-second 1,080-volt dielectric strength test, with all switches closed between current carrying conductors, including neutral, and the recreational vehicle ground. The test transformer shall be adjustable. Starting at zero the applied potential shall be increased gradually in at least four steps until either the test value is reached or breakdown occurs. During the test, all switches and other controls shall be in the "on" position. Listed fixtures and permanently installed appliances shall not be required to withstand this test.

8.1.2. Battery and Low Voltage Circuits. The battery or low-voltage circuit conductors in each recreational vehicle shall withstand the applied potential without electrical breakdown of a one-minute 500-volt or a one-second 600-volt dielectric strength test. The test transformer shall be adjustable. The potential shall be applied between live and grounded conductors.

9. Examination of Equipment for Safety

9.1 The examination or inspection of equipment for safety, according to the recommendations contained in this Standard, should be conducted under uniform conditions and by organizations properly equipped and qualified for experimental testing, inspections of the run of goods at factories, and service-value determinations through field examinations.

Mobile Homes Manufacturers Association

The Mobile Homes Manufacturers Association (MHMA) is a non-profit, trade organization to serve the mobile home industry and promote industry growth by providing better tools for successful operation. It is voluntarily supported by manufacturers, suppliers, and related service organizations. It has a Standards Division with field engineering personnel to visit member plants regularly, inspecting units and assisting when necessary in the correction of any deviations from the standards applicable to mobile homes. MHMA Manufacturers must comply with the provisions of this Standard as a condition of membership.

National Fire Protection Association

The National Fire Protection Association (NFPA) is a non-profit technical and educational organization to promote the science and improve the methods of fire protection. Organized in 1896, the Association has a broad-scale standards-making program to aid in its objective to reduce loss of life and destruction of property by fire. The Association publishes the standards developed under its aegis in pamphlet editions (such as this) and in what is known as the National Fire Codes (a ten-volume compilation annually updated, totaling approximately 7,000 pages). For full information about the Association and for a list of its publications, write to the Association's Headquarters.

Trailer Coach Association

The Trailer Coach Association represents the manufacturers of mobile homes and recreational vehicles, dealers and suppliers in the Western States while drawing its members from all sections of the country. Founded in 1936, the Association sponsors mobile home and recreational vehicle shows in the major western cities and has research programs dedicated to advance the proper use of mobile homes and recreational vehicles. It has a Standards Department which works with the enforcing officials in the various Western States to encourage compliance with the recommendations contained in this standard. The Trailer Coach Association currently has a staff of 18 and a membership of 742.

United States of America Standards Institute

The United States of America Standards Institute (USASI) is the national coordinating institution for voluntary standardization in the U.S.A. through which organizations concerned with standardization may cooperate in recognizing, establishing and improving standards in this country. Approval of a standard by the Institute is based on a consensus of those essentially concerned with its scope and provisions. The Institute has a Member Body Council, a Consumer Council, and a Company Member Council. The Member Body Council is composed of non-profit technical, professional, scientific, trade, or other membership associates, societies, or organizations which are of national scope and recognition. The Mobile Homes Manufacturers Association, the National Fire Protection Association, and the Trailer Coach Association are Member Bodies of the USASI.

Standard for Mobile Homes

Body and Frame Design and Construction Requirements and the Installation of Plumbing, Heating and Electrical Systems

USA Standard A119.1 — 1969

NFPA No. 501B — 1958

This Edition of Standard on Mobile Homes

This Standard has been developed by a USA Standards Committee on Mobile Homes and Travel Trailers sponsored jointly by the Mobile Homes Manufacturers Association, the National Fire Protection Association, and the Trailer Coach Association. Personnel of the Committee are listed on pages A119.1-2 and A119.1-3. It has been approved by all three sponsoring organizations and approved by the United States of America Standards Institute under date of January 27, 1969. Action on behalf of the NFPA took place at the NFPA Annual Meeting, May 20-24, 1968, at Atlanta, Georgia. Tentative Interim Amendment No. 1-1968 has also been processed in accordance with NFPA procedures concerning paragraphs 10.7, 10.10 and 10.11 of Part IV and this Amendment appears on page A119.1-106.

Origin and Development of Standard on Mobile Homes

This Standard replaces the American Standard Installations of Plumbing, Heating, and Electrical Systems in Mobile Homes (A119.1-1963) and the NFPA Standard for Fire Prevention and Fire Protection in Mobile Homes and Travel Trailers (NFPA No. 501B-1964). The formation of this Committee under the aegis of the United States of America Standards Institute (formerly American Standards Association) combined the activities of the former ASA A119.1 Committee and the NFPA Committee on Trailers and Trailer Courts and resulted from action taken by the Boards of Directors of the three sponsoring organizations, with the approval of the ASA, in 1964. The principal changes made in this text as compared with the 1963 edition of A119.1 are indicated by vertical marginal rules opposite the affected paragraphs.

Committee on Mobile Homes and Travel Trailers

Corrected to July 1, 1968

A USA Standards Committee of the United States of America Standards Institute (A119)

L. E. Henry, *Chairman*,
Southern California Gas Company, Box 3249, Terminal Annex,
Los Angeles, Calif. 90054
(rep. American Gas Association)

J. C. Robertson, *Vice-Chairman*,
Maryland State Fire Marshal, 301 West Preston Street,
Baltimore, Maryland 21201
(rep. Fire Marshals Association of North America)

George D. Matthews,† *Secretary*,
Mobile Homes Manufacturers Association, 20 N. Wacker Drive,
Chicago, Illinois 60606

Francis Greenleaf,† *Assistant Secretary*,
Trailer Coach Association, 1340 W. Third St., Los Angeles, Calif. 90017

Walter D. Peck,† *Assistant Secretary*
Standards Dir., Recreational Vehicle Institute, Inc., 2720 Des Plaines Ave.
Des Plaines, Ill. 60018

George H. Tryon, (SFPE)†, *Assistant Secretary*,
National Fire Protection Association, 60 Batterymarch Street,
Boston, Mass. 02110

Leroy V. Abbott, Insurance Co. of North America

Stanley S. Backner, Plumbing Fixture Manufacturers Association

Russell R. Bahr, California Division of Building & Housing Standards

Roy J. Boston, Conference of State Sanitary Engineers

Keith D. Clots, National Association of Plumbing-Heating-Cooling Contractors

David Curley, American Insurance Association

Kendall H. Flint, Gas Vent Institute

F. Stuart Flood, American Society of Sanitary Engineering

Tom S. Gable, National Sanitation Foundation

Hans R. Grigo, National Safety Council

John H. Hast, National Park Service, U. S. Dept. of the Interior

Jordan Heiman, American Society of Heating, Refrigerating and Air-Conditioning Engineers

Walter H. Johnson, National LP-Gas Association

John C. Jureit, American Society of Civil Engineers

Arthur Kretschman, Gas Appliance Manufacturers Association

Norman Latter, International Association of Plumbing and Mechanical Officials

Eugene L. Lehr, Public Health Service, National Center for Urban and Industrial Health

Gordon B. Lemke, American Mutual Insurance Alliance

Don Longworth, Mobile Homes Research Foundation

H. B. Love, National Electrical Code Committee (USA C1)

V. T. Manas, American Society of Mechanical Engineers

D. M. Manson,† Canadian Standards Association Testing Laboratories

John Martin, Mobile Homes Manufacturers Association

W. R. Milby, Electric Light and Power Group

Thomas M. Murphy, New York State Division of Housing and Community Renewal

Edwin A. Olsen, Compressed Gas Association, Inc.

Frank Osborn, Air Conditioning and Refrigeration Institute

J. A. Reade, American Gas Association

Robert G. Reichel, U. S. Dept. of Housing and Urban Development

M. Z. Reuben, Building Officials Conference of America

†Nonvoting.

Myron J. Sasser, Southern Building Code Congress

Standard for Mobile Homes

BODY AND FRAME DESIGN AND CONSTRUCTION REQUIREMENTS AND THE INSTALLATION OF PLUMBING, HEATING AND ELECTRICAL SYSTEMS

USA Standard A119.1 — 1969
NFPA No. 501B — 1968

Foreword

This USA Standard has been developed by the USA Committee on Mobile Homes and Travel Trailers (A119) of the USA Standards Institute. The USA Committee is sponsored jointly by the Mobile Homes Manufacturers Association, 20 North Wacker Drive, Chicago, Illinois 60606; the National Fire Protection Association, 60 Batterymarch Street, Boston, Massachusetts 02110; and the Trailer Coach Association, 1340 West Third Street, Los Angeles, California 90017. A roster of the personnel of the Committee which developed this Standard appears herein. The Committee membership is inclusive of those having a substantial interest in the subject as consistent with the Bylaws of the USA Standards Institute.

Subcommittees handle the detail technical work with one Subcommittee responsible for each of the "Parts" of the Standard. A number of specialists have served on these Subcommittees who are not members of the USA Committee. The sponsors wish to acknowledge with appreciation their cooperation and assistance in the development of this text.

In conformance with USA Standard Institute policy, the USA Committee responsible for this work is a standing committee which will periodically review this Standard in an effort to keep the information up to date. Anyone interested is invited to make recommendations for revisions to the Chairman and Secretary of the Committee.

This USA Standard for Mobile Homes (A119.1-1969) replaces the American Standard Installations of Plumbing, Heating, and Electrical Systems in Mobile Homes (A119.1-1963) and the NFPA Standard for Fire Prevention and Fire Protection in Mobile Homes and Travel Trailers (No. 501B-1964). Currently work is proceeding on the development of a USA Standard for Recreational Vehicles and standards covering mobile home parks and recreational vehicle parks. The American Standard Installations of Plumbing,

Heating and Electrical Systems in Travel Trailers (A119.2-1963) and the NFPA Standard for Fire Protection in Trailer Courts (NFPA No. 501A-1964) may be used as reference material pending the updating of both texts.

The participation of the National Fire Protection Association as a sponsor of this project is administrative and undertaken in the sole interest of safety to life and property from fire and allied hazards. Some portions of this Standard cover areas outside the scope of NFPA's normal sphere of activity but are of interest and concern to the other sponsors and to users of mobile homes. The NFPA Board of Directors has authorized the Association's participation with the understanding that its responsibility extends only to those areas within its scope.

Part I

Body and Frame Design and Construction Requirements

1. Introduction

1.1 Those members of the engineering profession and others associated with the design, manufacturing and quality control of mobile home construction have been aware of the need for standards leading to the providing of healthful and safe housing with complete living facilities arranged and equipped to assure suitable living conditions.

1.2 Much of the material in Part I has been taken from, or is based on, nationally recognized standards for construction including those issued by the Federal Housing Administration, the Building Officials C nference of America, Inc., the Southern Building Code Congress, and the New York State Division of Housing and Community Renewal.

2. Scope

2.1 This standard covers the minimum requirements for materials, products, equipment and workmanship needed to assure that the Mobile Home will provide (a) the structural strength and rigidity, (b) the protection against corrosion, decay, insects and other similar destructive forces, (c) reasonable protection against the hazards of fire and windstorm, (d) resistance to the elements, (e) durability and economy of maintenance as set forth in the provisions of this Standard.

2.2 This standard is not intended as a design specification or an instruction manual for untrained persons.

2.3 Wherever existing standards and this standard differ, the requirements of the latter shall apply.

2.4 This standard has been prepared with the emphasis on performance as opposed to its being a specification standard. The provisions of this standard are not intended to prevent the use of any material, appliance, installation, device, arrangement, or method of construction not specifically prescribed herein, provided any such alternative has been approved or listed. An enforcement agency may approve any such alternative if it finds the proposed design is satisfactory for the purpose intended and if the material, appliance, installation, device, arrangement, and

method of work offered is, for the purpose intended, at least the equivalent of that prescribed in this Standard in quality, strength, effectiveness, durability, safety, and for the protection of life and health. An enforcement authority may require that satisfactory evidence or proof be submitted to substantiate any claims that may be made regarding the use of any such alternative.

3. Basic Principles

3.1 The principles of this standard are given as basic goals in the construction of mobile homes, which will also serve as guide lines for the understanding of this standard. These principles will serve to define the intent of this standard when considerations arise which are not covered in the body of the standard.

Principle No. 1. To provide safe, healthful and comfortable living facilities with adequate storage space and economy of maintenance.

Principle No. 2. To provide adequate natural light and ventilation.

Principle No. 3. To provide structural strength and rigidity sufficient for design loads, both in transit and on site.

Principle No. 4. To provide adequate running gear and hitch for safe transportation of the mobile home.

Principle No. 5. To provide equipment designed and installed for safety of operation, ease of service, and adequate for the intended use.

Principle No. 6. To provide installed materials of adequate specification to resist deterioration.

Principle No. 7. To provide against the entrance of water and winds at all joints, connections, and openings in exterior surfaces.

Principle No. 8. To provide arrangement of habitable spaces for fire and health safety.

4. Definitions

4.1 **Accepted Engineering Practice.** The regulations, specifications and standards listed in Table I (Accepted Engineering Practice Standards) shall be deemed to represent accepted engineering practice in respect to materials, equipment, systems or method of construction.

4.2 Habitable Room. A room or enclosed floor space arranged for living, eating, food preparation and sleeping purposes (not including bathrooms, water closet compartments, laundries, pantries, foyers, hallways, and other accessory floor spaces).

4.3 Loads.

4.3.1 Dead Load. The weight of all permanent construction including walls, floors, roof, partition, and fixed service equipment.

4.3.2 Live Load. The weight superimposed by the use and occupancy of the mobile home, including wind load and snow load, but not including dead load.

4.3.3. Wind Load. The lateral or vertical pressure or uplift on the mobile home due to wind blowing in any direction.

4.4 Hurricane and Windstorm Resistive Mobile Home. A mobile home which meets the added wind design load and anchorage requirements of Section 6.

4.5 Mobile Home. A vehicular, portable structure built on a chassis and designed to be used without a permanent foundation* as a dwelling when connected to indicated utilities.

5. General Requirements

5.1 Minimum Requirements. The design and construction of a mobile home shall conform with the provisions of this standard. Requirements for any size, weight, or quality of material modified by the terms of "minimum," "not less than," "at least," and similar expressions are minimum standards. The manufacturer or installer may exceed these standards provided such deviation does not result in any inferior installation or defeat the purpose and intent of this standard.

5.2 Workmanship. All construction methods and workmanship shall be in conformance with accepted engineering practices to insure durable, livable, and safe housing.

5.3 Structural Analysis. The strength and rigidity of the component parts and/or the integrated structure shall be determined by engineering analysis *or* by suitable load tests to simulate the actual loads and conditions of application that occur both in transit and on site. However, tests for flexural rigidity shall be made of each different design in accordance with Section 6 of this Part.

*The phrase "without a permanent foundation" indicates that the support system is constructed with the intent that the mobile home placed thereon will be moved from time to time at the convenience of the owner.

5.4 Design Approval Procedure. Approval of plans, specifications, and completed mobile homes by the authority having jurisdiction under the provisions of this standard shall be accomplished by a certificate of compliance from a firm or organization acceptable to the authority having jurisdiction, by a registered professional engineer or architect, or by a nationally recognized testing laboratory.

5.5 Hurricane and Windstorm Resistive Design. Only mobile homes which meet the requirements of Section 6 may be designated "Hurricane and Windstorm Resistive". No similar designation which would imply hurricane or windstorm resistance shall be used when the home does not meet these requirements.

5.6 New Materials and Methods. Any new material or method of construction not provided for in this standard and any material or method of questioned suitability, proposed for use in the manufacture of the structure, shall nevertheless conform in performance as outlined in 5.1 of this Part. All test specimens and construction samples shall be representative of the materials, workmanship and details used in actual practice.

5.7 Acceptability of Materials. Compliance with applicable provisions of prescribed Standards (Table I), except as otherwise prescribed in this standard, shall constitute compliance with this standard. Deviations from applicable provisions of prescribed Standards (Table I) when they meet the performance requirements of this standard shall constitute compliance with the standard.

5.8 Structural Requirements. The mobile homes shall be designed and constructed as a completely integrated structure capable of sustaining the design load requirements of this standard and shall be capable of transmitting these loads to properly designed piers or foundation without causing an unsafe deformation or abnormal internal movement of the structure or its structural parts. (See 6.2 of this Part). For in-transit condition, the integrated structure shall be capable of transmitting the loading specified to the wheel assembly, which in turn shall be designed to safely transmit these loads to the ground. (See 10.1 of this Part).

5.9 Allowable Design Stress. The design stresses of all materials shall conform to accepted engineering practice. The use of materials not identified as to strength or stress grade shall be limited to the minimum allowable stresses under accepted engineering practice.

5.10 Alternate Test Procedures. In the absence of listed and prescribed Standards, the manufacturer shall develop or cause to be developed necessary tests to demonstrate the structural properties and the significant characteristics of the method employed. Such tests shall be made by a recognized testing organization or may be made and certified to by the manufacturer. Copies of the test results shall be kept on file by the mobile home manufacturer.

6. On Site Structural Design Requirements

6.1 Design Dead Loads. Design dead loads shall be the actual dead load (see 4.3.1 of this Part) supported by the structural assembly under consideration.

6.2 Design Live Loads. The design live loads shall be as specified in 6.3, 6.4, 6.6, 6.8, and 6.9 of this Part and shall be considered to be uniformly distributed. Pier spacings on which the design is based shall be specified by the manufacturer on the manufacturer's certificate.

6.3 Wind Loads and Snow Loads. When one of the components of the live load is wind or snow load, unit stresses may be increased in accordance with standard engineering practice, but not to exceed the amounts specified herein.

6.3.1 Standard Wind.

Horizontal	15 lb/ft²
Vertical (horizontal projection)	9 lb/ft² uplift
Vertical Downward	See 6.4 Roof Loads

6.3.2 Hurricane Wind. Mobile homes which are designated "Hurricane and Windstorm Resistive" shall be designed for the following wind loads.

Horizontal	25 lb/ft²
Vertical (horizontal projection)	15 lb/ft² uplift
Vertical Downward (See 6.4 Roof Loads)	30 lb/ft²

6.4 Roof Loads. Flat, curved and pitched roofs shall be designed to resist the following live loads, applied downward on the horizontal projection:

NORTH ZONE: 30 lb/ft² (including wind and snow loads) and normal unit stresses may be increased by 15%.
MIDDLE ZONE: 20 lb/ft² (including wind and snow loads) and normal unit stresses may be increased by 25%.

HURRICANE ZONE: 30 lb/ft² (including wind and snow loads) and normal unit stresses may be increased by 33-1/3%.

See Appendix III for Zone Map of U.S.A.

The Manufacturer's Certificate posted in the mobile home (Paragraph 7.5.1 of this Part) shall state which of these structural zones of the U.S.A. the mobile home has been designed for; and the certificate shall show a reproduction of the zone map in Appendix III at no less than half scale.

6.5 Fastening of Structural Systems. Roof framing shall be securely fastened to wall framing, walls to floor structure, and floor structure to frame to secure and maintain continuity between the floor and frame (if provided), so as to resist wind overturning and sliding as imposed by design loads in 6.3.1 of this Part. (Directions for anchorage shall accompany all mobile homes.)

6.5.1 HURRICANE AND WINDSTORM RESISTIVE MOBILE HOMES shall have over-the-roof ties with provisions for distributing the load of these ties, and provisions for the attachment of anchors so as to resist wind overturning and sliding as imposed by the design loads in 6.3.2 of this Part.

6.6 Walls. The walls shall be of sufficient strength to withstand vertically, the maximum roof load requirements as defined in 6.3.1, 6.3.2, and 6.4 of this Part, without exceeding the deflections as specified in 6.9. The connections between bearing walls, floor, and roof framework members shall be fabricated in such a manner as to provide support for the material used to enclose the mobile home and to provide for transfer of all lateral and vertical loads to the floor and frame foundation

6.7 Interior Partition. Whenever an interior partition is designed to serve as a secondary structural member, it shall be constructed with values adequate for the purpose intended.

6.8 Floors. Floor assemblies shall be designed in accordance with accepted good engineering practice to support a uniform live load of 40 lb/sq. ft., plus the dead load of the materials. In addition (but not simultaneously), floor shall be able to support a 200-pound concentrated load on a 2-inch diameter disc at the most critical location with a maximum deflection not to exceed ⅛ inch relative to floor framing.

6.9 Design Load Deflections. When a structural assembly is subjected to total design live and dead loads, the deflections shall not exceed the following:

Floor L/240
Roof and Ceiling ..... L/180 (see Appendix II)
Sidewalls L/180

Where L = the clear span between supports.

6.10 Ultimate Load Tests. Every structural assembly shall be capable of sustaining its dead load plus superimposed live loads equal to 1¾ times the required live loads for a period of 12 hours without failure. Failure shall be considered rupture, fracture, or residual deflections which are greater than the limits set in 6.9 of this Part.

6.11 Basic Structural Integrity. Basic structural integrity shall be determined by the method described in Appendix I. Effective flexural rigidity of the complex mobile home structure is the basis of this requirement.

(a) For forward loading this is expressed mathematically as follows:

$$(\overline{EI})_f = 36\ L_f^3\ (P/y)_f\text{: lb-in}^2 \qquad (1)$$

where:

E = Modulus of elasticity
I = Moment of inertia
$(EI)_f$ = Effective flexural rigidity for forward span
L_f = Forward span length in feet between supports
$(P/y)_f$ = Forward spring rate, lb-in

The minimum values for acceptable performance are given in Figure 1, Appendix I.

(b) For rear loading the following shall apply:

$$\tfrac{1}{2}\ (\overline{EI})_r = \frac{575}{2}\ L_r^3\ (P/y)_r\ [1 + L_f/L_r]\text{: lb-in}^2 \qquad (2)$$

where:

$(\overline{EI})_r$ = Effective flexural rigidity for rear span
L_r = Rear span length, ft.
$(P/y)_r$ = Rear spring rate, lb-in.

The acceptable value for $\frac{1}{2}\ (\overline{EI})_r$ should be within ±30 percent of $(\overline{EI})_f$.

7. Construction

7.1 Weather Resistance. Exterior covering shall be of moisture and weather resistive materials attached with corrosion resistant fasteners to resist wind and rain. Metal coverings shall be of corrosion resistant materials.

7.2 Condensation Resistance. Spaces within outside walls and ceilings shall be ventilated and/or shall be provided with corrosion resistant vapor type barriers on the warm side of the walls and ceilings or other means shall be used to avoid condensation within these structures.

7.3 Interior Surfaces. In all habitable spaces, interior exposed ceiling, wall, and partition surfaces shall be faced with materials whose flame-spread classification shall not exceed Class C as defined in Section 6-2114 of the Code for Safety to Life from Fire in Buildings and Structures, NFPA No. 101-1967, (flame spread at more than 75 but not more than 200) when tested by the Standard Method of Test for Surface Burning Characteristics Building Materials (USAS A2.5-1963, ASTM E84-67, UL 723-1960, NFPA No. 255-1966). All wall and partition surfaces shall be capable of resisting horizontal load of not less than five pounds per square foot.

7.4 Vermin Resistance. Exterior surfaces shall be effectively sealed so as to prevent the entrance of rodents.

7.5 Heat Loss. The total calculated heat loss of the living unit at the outdoor design temperature as certified in 7.5.1 of this Part shall not exceed the following:

a. 50 Btu/hr sq. ft. of the total floor area, or 375 Btu/hr lineal ft. of the perimeter of the space to be heated to 70°F, whichever is the greater.

b. For electrically heated mobile homes 0.184 watts/hr. sq. ft., F (temperature difference), (0.628 Btu/hr, sq. ft., F), and not to exceed 40 Btu/hr, sq. ft. of floor area, whichever is less.

c. The minimum total resistance factors (R) of the wall, ceiling and floor shall never be less than the following:

Type of Fuel Use for Heating	Wall	Ceiling	Floor
Gas or Oil	5.5	8.2	5.5
Electric	6.5	13.0	12.0

The total "R" value is obtained by adding the insulation "R" value together with the "R" value of mobile home construction. Typical mobile home construction "R" values, excluding framing, have been calculated to be: Sidewalls R=2.0; Floor and ceiling R=3.0. These

CERTIFICATE

The manufacturer of this Mobile Home _____
_____, hereby certifies:

1) Model No. _____ Mobile Home is designed to meet the Heat Loss Requirements of USA Standard A119.1 (Section 7.5) which provides that heat loss does no* exceed: (Check one)

a) 50 Btu per sq. ft. of floor area
b) 40 Btu per sq. ft. of floor area if electrically heated
c) 375 Btu per lineal ft. of outside wall

with an indoor average temperature of 70°F at no more than 15 mph wind velocity and the following outdoor design temperatures:

_____°F with storm sash
_____°F without storm sash

2) The _____ Furnace installed
(Make and Model Number)
in this Mobile Home has the capacity of maintaining a 70°F average inside temperature, at wind velocities of no more than 15 mph, with an outdoor temperature of:

_____°F with storm sash
_____°F without storm sash

typical R values are to be calculated using all component materials and spaces as outlined in the latest edition of the ASHRAE Handbook of Fundamentals (see footnote).

7.5.1 The mobile home manufacturer shall permanently affix a certificate (see Figure 2) to an interior surface of the home that is readily visible to the home owner. The certificate shall specify the following:

a. The lowest outdoor design temperature at which the mobile home heat loss complies with Paragraph 7.5.*

(1) With storm sash.
(2) Without storm sash.

b. The lowest outdoor temperature at which the installed furnace will maintain a 70°F. temperature inside the home with or without storm sash.

*Outdoor design temperature may be found in the "Handbook of Fundamentals" of the American Society of Heating, Refrigerating and Air-Conditioning Engineers, 345 East 47th St., New York, N.Y. 10017. (Price: $12.00 Members; $20.00 Non-Members). In the 1967 volume this information may be found in Chapter 22, "Weather Data and Design Conditions".

7.5.2 Wall, floor, and ceiling cavity "R" and "U" factors shall be calculated as outlined in the latest edition of the ASHRAE Handbook of Fundamentals.*

7.5.3 **Framing Heat Loss.** For the purpose of heat loss calculations, the following stud areas shall be assumed:

Wall — 20% of net wall area (less windows)
Ceiling — 5% of total ceiling area
Floor — 10% of net floor area (less duct area)

The following "U" factors shall be used when calculating stud heat loss:

Structure	"U" Factor	"R" Factor
Wall (1⅝ stud)	.32	3.12
Wall (2⅝ stud)	.23	4.35
Wall (3⅝ stud)	.18	5.55
Ceiling	.23	4.35
Floor	.32	3.12

7.5.4 **Ventilation Heat Loss.** The following shall be used to estimate ventilation heat loss:

Outdoor Design Temperature—F	Ventilation Allowance—Btu/hr
40°	3330
30°	4440
20°	5550
10°	6660
0°	7780
−10°	8880
−20°	10000
−30°	11110
−40°	12200

7.5.5 **Duct Heat Loss.** The supply duct heat loss shall be calculated separately using the actual duct surface area and the actual thickness of insulation between the duct and outside of the mobile home. If there is an air space of ½ inch or less, the heat duct shall be assumed in contact with the insulation. If there is an air space of over ½ inch between the duct and the insulation, no

*Available from the American Society of Heating, Refrigerating and Air-Conditioning Engineers, 345 East 47th St., New York, N.Y. 10017. (Price: $12.00 Members; $20 Non-Members.)

special heat loss need be calculated — if the cavity in which the duct is located is assumed to be at 70°F. The average temperature inside the supply duct shall be assumed to be at least 130°F for the purpose of calculation.

8. Design Considerations

8.1 Light and Ventilation. Adequate provisions shall be made for light and ventilation in accordance with the following:

8.1.1 Habitable Rooms. Habitable rooms shall be provided with windows or doors whose total glass area is not less than 10 percent of the floor area. An area equivalent to not less than 5 percent of the floor area shall be available for unobstructed ventilation., In addition, if the ventilation area in the kitchen is less than 3 square feet, a fan with a minimum rated capacity of 100 CFM shall be provided in the kitchen.

8.1.2 Bathroom. The light and ventilation in the bathroom shall comply with Paragraph 8.1.1. In addition, if the ventilation area is less than 1½ square feet, a fan with a minimum rated capacity of 25 CFM shall be provided.

8.2 Ceiling Height. The minimum ceiling height in the main structure of the mobile home shall be not less than 7 feet, 0 inch. Any habitable area of greater than 50 square feet, but considered as a secondary structure shall have a minimum ceiling height of 6 feet, 4 inches.

8.3 Exits. Mobile homes shall have a minimum of two exterior doors located remote from each other. Doors shall be designed for exterior use, and in no case be less than 24 inches wide. Exterior doors shall permit opening from the inside by the simple operation of a single knob or lever.

9. Tests

9.1 General. Unless based on accepted engineering design (see 5.3 of Part I) for the use indicated, all new mobile home materials, equipment, systems or methods of construction not provided for in this standard, shall be subjected to the tests specified in 5.10 of Part I.

9.2 Structural Integrity. Basic structural integrity as defined in 6.11 of Part I shall be determined by tests as described in Appendix I. This may be accomplished by the manufacturer or by a recognized testing organization.

9.3 Heat Loss. Heat loss shall be determined by accepted engineering methods or tests to assure compliance with the requirements of 7.5 of Part I.

10. Structural Design Requirements for In-transit Conditions

10.1 Chassis Assembly. The chassis assembly in conjunction with the mobile home structure shall be designed and constructed so as to be capable of sustaining the dead load plus 3 pounds per square foot floor load and the superimposed dynamic load resulting from over the road movement. (See 6.11 of Part I). The design shall be such as to insure rigidity and structural integrity of the complete mobile home structure and to insure against unsafe deformation or exceeding the allowable stresses of the materials that make up the assembly. All metal surfaces shall be protected against corrosion with an approved paint or other approved protective means.

10.1.1 Hitch Assembly. The hitch assembly which includes the "A" frame and coupling mechanism shall be rigidly constructed and securely fastened to the main structure to assure safe and adequate transfer of the maximum load between the mobile home and the hitch assembly.

10.1.2 Coupling Mechanism. The coupling mechanism which is normally of the socket type shall be securely fastened to the "A" frame in such a manner as to assure safe and adequate transfer of maximum loads including impact loads between the mobile home and hitch assembly and the towing vehicle. Couplings must be equipped with a manually operated mechanism so adapted as to prevent disengagement of the unit while in operation. In addition to this positive locking mechanism the coupling shall be so designed that it can be disconnected regardless of the angle of the mobile home to the towing vehicle. With the mobile home parked on level ground, the center of the socket of the coupler shall not be less than 20 inches nor more than 26 inches from the ground level.

10.2 Running Gear Assembly. The running gear assembly which includes springs, spring hangers, axles, bearings, wheels, brakes, rims and tires with their related hardware shall be designed in accordance with accepted engineering practice to adequately sustain the designed loads, as indicated in Paragraph 10.1, and provide for the mobility of the mobile home. The subject assembly shall transmit the mobile home load to the ground without causing unsafe deformation or internal movement of any of the

mobile home structural parts. The location of the running gear assembly in relation to the over-all length of the mobile home and its total weight including all its contents shall be such as to provide sufficient hitch weight to assure good and safe towing and braking qualities. Hitch weight should not be less than 12 per cent of the total weight of the mobile home nor more than 25 per cent. This hitch loading can normally be obtained by locating the running gear approximately 2/3 of the total chassis length to the rear of the front end.

10.2.1 Spring and Spring Hangers. Spring assemblies and hangers, shackles, bushings, and mounting bolts shall be capable of withstanding all the design loads as outlined in Paragraph 10.1 without exceeding maximum allowable stresses as set forth in the SAE Handbook† published by the Society of Automotive Engineers. Full recognition must be given both to operating stress and to fatigue life in determining the suitability of any spring suspension system. The capacity of the spring system shall be such as to assure that under maximum load conditions sufficient clearance will be maintained between tire and wheel well to provide for unimpeded wheel and tire movement.

10.2.2 Axles. Axles shall be manufactured in accordance with accepted standards to a degree of accuracy that will assure proper fit of bearings and brake mountings. The number of axles used will depend upon the total load to be carried by the undercarriage and the maximum load carrying capacity of the axle as specified by the axle manufacturer.

10.2.3 Hubs and Bearings. Hubs and bearings shall be provided in accordance with design load requirements as described in Paragraph 10.1. Bearings shall be manufactured to specific standards so as to insure interchangeability with replacement parts. Provisions for proper lubrication with properly applied seals shall be provided in accordance with good engineering practice.

10.2.4 Wheels and Rims. Wheels and rims shall be furnished and installed in accordance with the load requirements (Paragraph 10.1), the recommended practices contained in the latest edition of the Yearbook* of The Tire & Rim Association, and the recommendations of the wheel and rim manufacturer.

†Available from the Society of Automotive Engineers, 485 Lexington Ave., New York, N.Y. 10017 (Price $25.00 List).

*Available from the Tire and Rim Association, Inc., Command Building, 34 N. Hawkins Ave., Akron, Ohio 44313 (Price: $3.75).

10.2.5 Tires. Tires installed on mobile homes shall be capable of safely carrying all design loads, due consideration being given to anticipated usage.

10.2.6 Brakes. Brakes used shall be manufactured to accepted and listed standards and installed in accordance with the brake manufacturers recommendations. They shall be of the proper size, type, number and design, with method of actuation to adequately meet the stopping distance performance standards herein prescribed.

10.2.6.1 Acceptance Standards. Brakes on tractor and mobile homes shall be such that the maximum stopping distance from an initial velocity of 20 MPH shall not exceed 40 feet. (U.S. Department of Transportation Regulations)

10.2.7 Low Voltage Wiring. Electrical wiring between mobile home and towing vehicle shall comply with all applicable requirements of the U.S. Department of Transportation Motor Carrier Safety Regulations.

Appendix I

Equipment and Procedures for Determining Effective Flexural Rigidity ($\overline{EI}$)

EQUIPMENT

The following is a description of the equipment required to perform a load-deflection test on a mobile home:

Item	Quantity Required	Description
1	2	Hydraulic jack: 5 ton.
2	2	Rear support: Heavy wall steel pipe with bearing plates welded to ends, 8 in. diameter pipe or equivalent may be used.
3	—	Steel shims: As required to level coach when on rear supports.
4	2	Forward supports: 5 ton adjustable screw jacks.
5	1	Tape measure: 50 foot.
6	2	Dial indicator: (3 in. diameter indicators having an overall range of 1 in. and reading down to 0.001 in. is suggested).
7	2	Apparatus stand with adjustable fittings for dial indicator.
8	500 lbs.	Test weight: Almost any material is suitable, such as steel shot in cloth mail bags, or lead shot is ideal for long term use.

PROCEDURE

The recommended procedure for running a load-deflection test at a manufacturers plant is given as follows. The objective of the test is to determine the spring rate, (P/y), of a mobile home. Once the spring rate is known the effective flexural rigidity, $(\overline{EI})$, can be easily calculated.

Step	Procedure
(1)	Move mobile home to test area. For best results this should be a concrete pad that will provide a firm, non-yielding surface for the forward and rear supports. The area should be selected such that a stable temperature condition can be obtained.
(2)	Jack the running gear clear of the pad and position the rear supports. For two axle systems with an equalizer link, place the support under the equalizer (see Figure 3). For three axle systems position the supports under the forward equalizer link. Spread axle system should be supported at the steel frame midway between the axles. The mobile home should be kept as level as possible.

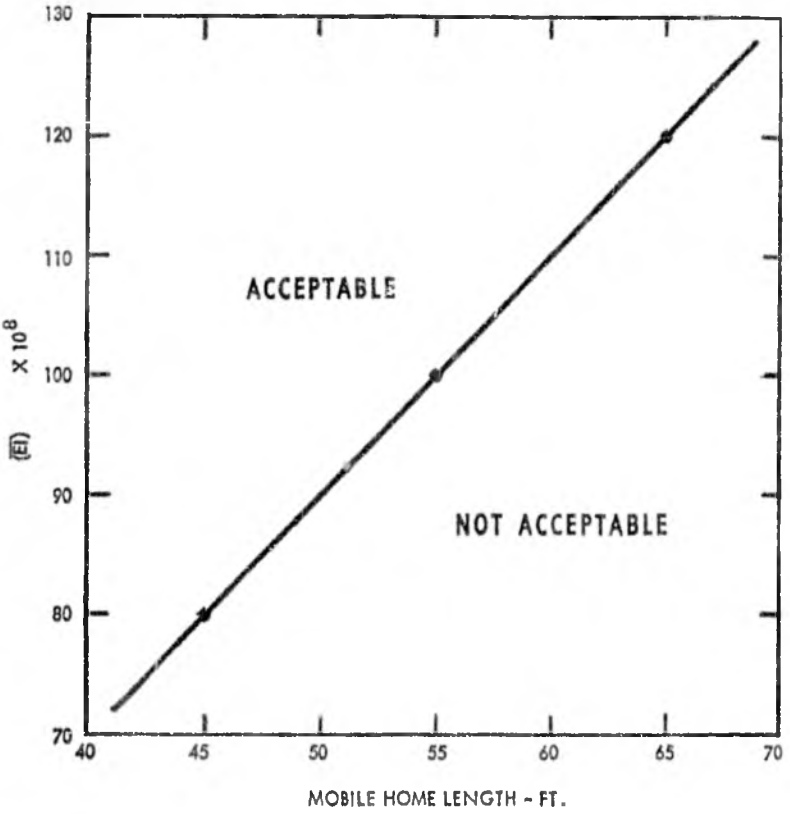

Figure 1

(3) With the mobile home leveled, position the two forward screw jack supports (see Figure 3). These are brought up hand tight against the steel frame. Once in place, the screw jack fitted to the A-frame shall be retracted.

(4) Measure the center-to-center distance between forward and rear supports. This dimension, in feet, is L_f in Equation 1-A (see also 6.11 of Part I).

(5) With L_f known, find the midspan position and scribe a mark on the steel frame on both sides of the mobile home. Also, mark the midspan position inside the mobile home on the floor.

Figure 3

(6) Position the dial indicators at the midspan locations (see Figure 3). Deflections are required at the steel frame *only*. Preload the dial indicators to any random reading so as to insure good contact between the indicator and the frame. Make sure the apparatus stands supporting the dial indicators are on a flat surface and are weighted down to prevent movement.

(7) Note and record the initial dial indicator readings. Then, transfer 250 pounds of test weights into the mobile home and place on the floor at midspan such as shown in Figure 3. Note and record dial indicator readings. Apply another 250 pounds of weight and again take deflection readings.

(8) With above data available plot the load-deflection curves for the mobile home; these should be very close to straight lines. The slope of the load-deflection curve is the spring rate, $(P/y)_f$, for the mobile home in the forward loading mode. Two spring rates will be found, one for each side of the mobile home. The average value should be used to calculate $(\overline{EI})$.

(9) Apply the numerical values for the average forward spring rate, $(P/y)_f$, and span length, L_f, to Equation 1-A to obtain a numerical value for the forward effective flexural rigidity, $(\overline{EI})_f$.
Equation 1-A is as follows:

$$(\overline{EI})_f = 36\ L_f^3 (P/y)_f : \text{lb-in}^2 \qquad (1\text{-A})$$

Where:

E = Modulus of elasticity
I = Moment of inertia
L_f = Forward span length, ft.
$(P/y)_f$ = Forward spring rate, lb-in.

(10) A similar procedure can be carried out for the rear loading mode (see Figure 4). Equation 2-A (adjusted) applies. The limited amount of information available suggests that the numerical value for effective flexural rigidity in the rear mode, $\frac{1}{2}\ (EI)_r$, should be within ±30 percent of $(EI)_f$.
Equation 2-A is as follows:

$$\tfrac{1}{2}\ (\overline{EI})_r = \frac{575}{2}\ L_r^3 (P/y)_r\ [1 + L_f/L_r] : \text{lb-in}^2 \qquad (2\text{-A})$$

where:

L_r = Rear span length, ft.
$(P/y)_r$ = Rear spring rate, lb-in.

Appendix II

Test Procedure for Roof Rafters or Roof Trusses

GENERAL:

Rafters and trusses may be tested in pairs, sheathed and mounted across supports, or singly in a suitable test facility. When tested in pairs, trusses shall be spaced at the design spacing. Trusses will be mounted on 4 inch by 4 inch supports accurately positioned to give the required clear span distance (L) as specified in the design of the truss. The top chord may be sheathed with the specified design sheathing or with 2 by 4 foot sheets ¼ inch plywood. Butting plywood sheets must be separated at least ⅛ inch. Design sheathing shall be attached with specified design fasteners. Plywood sheathing shall be nailed with 4d nails not closer than 8 inch on center along each top chord. The bottom chord shall be cross tied with 1 x 2 inch stripping not closer than 24 inches on center running perpendicular between trusses.

Rafter and truss deflections will be measured relative to a taut wire running over the supports and weighted at the end to insure constant tension. Deflections will be measured at the 2 quarter points and at midspan. Loading shall be applied to the top chord through a suitable hydraulic system, masonry units or weights to simulate a uniformly distributed load. Load units shall be separated so that arch action does not occur.

TEST PROCEDURE:

1. Noting the drawing, measure and record initial elevation of rafter or truss in test position at no load.
2. Apply load units to the sheathing to equal the full dead load of roof and ceiling. Measure and record the deflections.
3. Maintaining the dead load, add live load in approximate 10 lb./ft² increments. Measure the deflections after each 10 lb./ft² increment. Apply incremental loads at a uniform rate such that approximately ½ hour is required to establish the total design load condition. Measure and record the deflections.
   The maximum deflection due to design live load (deflection measured in step 3 minus step 2) shall not exceed L/180, where L is the clear span measured in same units.
4. Continue to load rafter or truss to dead load plus 1.75 times the design live load. Maintain this loading for 12 hours and inspect truss for failure.
5. Remove superimposed live load and truss shall recover to at least the L/180 position within another 12 hours.

Part II

Plumbing Systems

1. Introduction

1.1 Those members of the engineering profession and others associated with the design, manufacturing, installation, and inspection of mobile home plumbing systems have been aware of the need for uniform technical standards leading to the safe and sanitary use of this special type of equipment. They have also recognized that because of unique conditions of transport and use, existing plumbing standards for permanent buildings are not completely applicable to mobile homes. It is with these factors in mind that Part II of this standard has been developed.

1.2 Much of the material in Part II has been taken from, or is based on, the National Plumbing Code, Uniform Plumbing Code, and other nationally recognized standards for plumbing materials, fixtures, fittings, and equipment.

2. Scope

2.1 Part II of this standard covers the plumbing materials, fixtures, fittings, and equipment installed within or on mobile homes.

2.2 This standard is not intended as a design specification or an instruction manual for untrained persons.

2.3 Wherever the American Standard National Plumbing Code, A40.8-1955, Uniform Plumbing Code, and other nationally recognized standards for plumbing materials, fixtures, fittings and equipment and Part II of this standard differ, the requirements of the latter shall apply.

2.4 The provisions of this Standard are not intended to prevent the use of any material, appliance, installation, device, arrangement, or method of construction not specifically prescribed herein, provided any such alternative has been approved or listed. An enforcement agency may approve any such alternative if it finds the proposed design is satisfactory for the purpose intended, and if the material, appliance, installation, device, arrangement, and method or work offered is, for the purpose intended, at least the equivalent performance of that prescribed in this standard considering quality, strength, effectiveness, durability, safety, and protection of life and health. An enforcement authority shall re-

quire that satisfactory evidence or proof be submitted to substantiate any claims that may be made regarding the use of any such alternative.

3. Basic Principles

The principles of this standard are enunciated as basic goals in environmental sanitation, worthy of accomplishment through properly designed, acceptably installed, and adequately maintained plumbing systems. The results desired and necessary to protect the health of the public are the same everywhere. Furthermore, as unforeseen situations arise that are not covered in the body of the standard, the principles may serve to define the intent.

Principle No. 1. Plumbing fixtures devices, and appurtenances shall be supplied with water in sufficient volume and at pressures adequate to enable them to function satisfactorily and without undue noise under all normal conditions of use.

Principle No. 2. Plumbing shall be designed and adjusted to use the minimum quantity of water consistent with proper performance and cleaning.

Principle No. 3. Devices for heating and storing water shall be so designed and installed as to prevent dangers from contamination and explosion through overheating.

Principle No. 4. Plumbing fixtures shall be made of smooth nonabsorbent material, shall be free from concealed fouling surfaces, and shall be located in ventilated enclosures.

Principle No. 5. The piping of the plumbing system shall be of durable material, free from defective workmanship, and so designed and constructed as to give satisfactory service for its reasonable life expectancy.

Principle No. 6. Each fixture directly connected to the drainage system, except for mechanically sealed water closets or recirculating chemical toilets, shall be installed with a water seal trap.

Principle No. 7. The drainage system shall be designed to provide an adequate circulation of air in all piping with no danger of siphonage, aspiration, or forcing of trap seals under conditions of ordinary use.

Principle No. 8. The plumbing system shall be subjected to tests that will effectively disclose all leaks and defects in the work, which must then be repaired.

Principle No. 9. No water closet shall be located in a room or compartment that is not properly lighted and ventilated.

Principle No. 10. All plumbing fixtures shall be so installed with regard to spacing as to be reasonably accessible for their intended use.

4. Definitions

Administrative Authority. The administrative authority is the individual official, board, department, or agency established and authorized by a state, county, city, or other political subdivision created by law to administer and enforce the provisions of this Part as adopted or amended.

Air Gap (Water Distribution System). The unobstructed vertical distance through the free atmosphere between the lowest opening from any pipe or faucet supplying water to a tank, plumbing fixture, water supplied appliance, or other device and the flood level of the receptacle.

Approved. "Approved" means acceptable to the authority having jurisdiction.

Authority having jurisdiction. The "authority having jurisdiction" is the organization, office, or individual responsible for "approving" equipment, an installation, or a procedure.

Backflow. The flow of water or other liquids, mixtures, or substances into the distributing pipes of a potable supply of water from any source or sources other than its intended sources. Back-siphonage is one type of backflow.

Backflow Connection. Any arrangement whereby backflow can occur.

Backflow Preventer. A device or means to prevent backflow.

Branch. Any part of the piping system other than a riser, main or stack.

Branch Vent. A vent connecting one or more individual vents with a vent stack or stack vent.

Center. The midpoint between the right and left side of the mobile home.

Combination Compartment. A shower stall or shower recess that provides for or includes the installation of a water closet and is of such size and proportions that it may not be occupied by more than one person.

Common Vent. A vent connecting at the junction of fixture drains and serving as a vent for more than one fixture.

Continuous Vent. A vertical vent that is a continuation of the drain to which it connects.

Continuous Waste. A drain from two or more fixtures connected to a single trap.

Cross Connection. Any physical connection or arrangement between two otherwise separate systems or sources, one of which contains potable water and the other either water, steam, gas or chemical of unknown or questionable safety whereby there may be a flow from one system or source to the other, the direction of flow depending on the pressure differential between the two systems.

Developed Length. The developed length of a pipe is the length measured along the centerline of the pipe and fittings.

Diameter. The diameter is the nominal diameter designated commercially.

Drain. A drain is a pipe that carries waste, water, or waterborne wastes in a drainage system.

Drain Hose. (See Sewer Connector).

Drain Outlet. The lowest end of the main drain to which the terminal end of the sewer connector is attached.

Drainage System. All the piping within or attached to the structure that conveys sewage or other liquid wastes to the drain outlet but does not include the sewer connector.

Fixture Drain. The drain from the trap of a fixture to the junction of that drain with any other drain pipe.

Fixture Supply. The water supply pipe connecting a fixture to a branch water supply pipe or directly to a main water supply pipe.

Flood-Level. The flood-level is the level in the receptacle over which water would overflow to the outside of the receptacle.

Flooded. The condition which results when the liquid in a container or receptacle rises to the flood-level.

Flush Tank. A water tank that contains sufficient water to adequately flush a water closet.

Flush Valve. A device located at the bottom of a tank for flushing water closets.

Flushometer Valve. A device which discharges a predetermined quantity of water to fixtures for flushing purposes and is closed by direct water pressure.

Grade. (See **Pitch**)

Horizontal Branch Drain. A drain branch pipe extending laterally from a soil or waste stack or building drain with or without vertical sections or branches, which receives the discharge from one or more fixture drains and conducts it to the soil or waste stack or to the building drain.

Horizontal Pipe. Any pipe or fitting which makes an angle of no more than 45 degrees with the horizontal.

Individual Vent. A pipe installed to vent a fixture drain. It connects with the vent system above the fixture served or terminates outside the building into the open air.

Inlet Coupling. Inlet coupling is the terminal end of the water system to which the water service connection is attached. It may be a swivel fitting or threaded pipe end.

Labeled. Equipment bearing an inspection label of a nationally recognized testing agency (see **Listed**).

Length. Length of a mobile home is the distance measured from the tip of the hitch to the part farthest to the rear.

Liquid Waste. The discharge from any fixture, appliance, area or appurtenance, which does not contain fecal matter or urine.

Listed. Refers to plumbing materials, devices, fixtures, fittings, equipment, appliances, and accessories that are shown in a list published by a recognized agency, maintaining an adequate periodic inspection of current production of listed models, and whose listing states either that the material, device, fixture, fitting, equipment, appliance, or accessory complies with nationally recognized health and safety requirements or has been tested and found safe for use in a specified manner.

Main. The principal pipe artery to which branches may be connected.

Main Drain. The principal artery of the drainage system to which drainage may be connected.

Main Vent. The principal artery of the venting system to which vent branches may be connected.

Mobile Home. A vehicular, portable structure built on a chassis and designed to be used without a permanent foundation* as a dwelling when connected to indicated utilities.

Offset. A combination of pipe and/or fittings that brings one section of the pipe out of line but into a line parallel with the other section.

Pitch. The fall (slope) of a pipe in reference to a horizontal plane expressed in inches per foot length.

Plumbing Fixtures. Plumbing fixtures are approved-type installed receptacles, devices, or appliances which (1) are supplied with water or (2) receive liquid or liquid-borne wastes for discharge into the drainage system.

NOTE: For the purpose of this standard, water closet refers to tank-bowl combination, mechanical seal, grinder, recirculating chemical, and flushometer type toilets.

Plumbing System. Includes the water supply and distribution pipes; plumbing fixtures and traps; soil, waste, and vent pipes; and water-treating or water-using equipment.

Relief Vent. An auxiliary vent which permits additional circulation of air in or between drainage and vent systems.

Sewage. Any liquid waste containing animal or vegetable matter in suspension or solution, and may include liquids containing chemicals in solution.

Sewer Connector. Consists of all pipes, fittings, and appurtenances from the drain outlet of the mobile home to the inlet of the corresponding sewer riser pipe of the sewerage system serving the mobile home.

Siphonage is the loss of water seal from fixture traps resulting from partial vacuum in the drainage system and may be of either of the following two types, or a combination of the two:

a. Self-siphonage resulting from vacuum in a fixture drain generated solely by the discharge of the fixture served by that drain, or,

b. Induced siphonage resulting from vacuum in the drainage system generated by the discharge of one or more fixtures other than the one under observation.

*The phrase "without a permanent foundation" indicates that the support system is constructed with the intent that the mobile home placed thereon will be moved from time to time at the convenience of the owner.

Standard. The word "standard" or "this standard" when used alone shall mean these requirements and subsequent amendments which the administrative authority may adopt.

Trap. A fitting or device which, when properly vented, provides a liquid seal to prevent the emission of sewer gases without materially affecting the flow of sewage or waste water through it.

Trap Arm. See Fixture Drain.

Trap Seal Depth. The vertical distance between the crown weir and the top of the dip of the trap.

Vacuum Breaker. See Backflow Preventer.

Vent Stack. A vertical vent pipe installed to provide circulation of air to and from the drainage system and which extends through one or more stories.

Vent System. That part of a piping installation which provides circulation of air within a drainage system.

Vertical Pipe. Any pipe or fitting which makes an angle of 45 degrees or less with the vertical.

Waste Pipe. A pipe receiving discharge from fixtures and conveying it to the main drain or soil pipe.

Waste Holding Tank. An enclosed tank for the temporary retention of water-borne waste.

Water Connector. Consists of all pipes, fittings, and appurtenances from the water riser pipe to the water inlet coupling of the distribution system within the mobile home.

Water Distribution System. All of the water piping within the mobile home.

Water Storage Tank. A tank installed in a mobile home for the purpose of storing potable water.

Wet Vent. A vent which receives the discharge of wastes other than from water closets.

Wet Vented Drainage System. A specially designed system of drain piping that also vents one or more plumbing fixtures by means of a common waste and vent pipe.

5. General Requirements

5.1 Minimum Requirements. Plumbing systems installed in a mobile home shall conform, at least, with the provisions of this standard. Requirements for any size, weight, or quality of material modified by the terms "minimum," "not less than," "at least," and similar expressions are "*minimum standards.*"

5.1.1 Connections to Drainage System. All plumbing, fixtures, drains, appurtenances, and appliances designed or used to receive or discharge liquid waste or sewage shall be connected to the mobile home drainage system in a manner provided by this standard.

5.1.2 Workmanship. All design, construction, and workmanship shall be in conformance with accepted engineering practices and shall be of such character as to secure the results sought to be obtained by this standard.

5.1.3 Components. Plumbing materials, devices, fixtures, fittings, equipment, appliances, and accessories intended for use in or attached to a mobile home shall be listed by a recognized agency, or be specifically approved by the administrative authority enforcing this Standard when listing by a recognized agency is not available or cannot be legally recognized.

5.1.4. Prohibited Fittings and Practices

5.1.4.1 No drainage or vent piping shall be drilled and tapped for the purpose of making connections.

5.1.4.2 Except as provided, no vent pipe shall be used as a waste or drain pipe.

5.1.4.3 No fitting, connection, device, or method of installation that obstructs or retards the flow of water, waste, sewage, or air in the drainage or venting systems in an amount greater than the normal frictional resistance to flow shall be used unless it is indicated as acceptable in this standard or is approved as having a desirable and acceptable function and is of ultimate benefit to the proper and continued functioning of the plumbing system.

5.1.4.4 Cracks, holes, or other imperfections in materials shall not be concealed by welding, brazing, or soldering or by paint, wax, tar, or other leak-sealing or repairing agents.

5.1.4.5 Piping, fixtures or equipment shall be located so as not to interfere with the normal use or with the normal operation and use of windows, doors or other required facilities.

5.1.4.6 Galvanized pipe shall not be bent or welded.

5.1.5 **Alignment of Fittings.** All valves, pipes, and fittings shall be installed in correct relationship to the direction of flow.

5.2 **Protective Requirements**

5.2.1 **Cutting Structural Members.** No structural member shall be unnecessarily or carelessly weakened by cutting or notching.

5.2.2 **Exposed Piping.** All piping, pipe threads, hangers, and supports exposed to the weather, water, mud, and road hazard, and subject to damage therefrom, shall be painted, coated, wrapped, or otherwise protected from deteriorating.

5.2.3 **Road Damage.** No pipe, supports, drain, outlet, or sewer connector shall extend or protrude in a manner where it will be subjected to damage during transit.

5.2.4. **Freezing.** All piping and fixtures subject to freezing temperatures shall be insulated or protected to prevent freezing, under normal occupancy.

5.2.5 **Vermin Proofing.** All exterior openings around piping shall be effectively closed to prevent the entrance of rodents.

6. Materials—Quality and Weight

6.1 **Minimum Standards.** Materials, fixtures, or devices used or entering into the construction of plumbing systems in any mobile home shall be free from defects and shall conform to approved or listed applicable standards.

6.2 **Applicable Standards.** Standards for plumbing system components are shown in Table II.

NOTE: All standards and specifications for materials are subject to change. Designations carrying indication of the year of issue may thus become obsolete. Table II gives the full designations of standards current at the time this standard was printed.

TABLE II
Standards for Plumbing System Components*

Materials	USASI	ASTM	FS	Other Standards
Ferrous Pipe and Fittings				
Cast-Iron Screwed Fittings	B16.4 -1963			
Malleable Iron Screwed Fittings	B16.3 -1963			
Cast-Iron (Screwed) Drainage Fittings				UPC-PS 5-66
Welded Wrought Iron Pipe	B36.2 -1966	A72 -1966		
Wrought-Steel and Wrought-Iron Pipe	B36.10 -1959			
Black and Zinc-Coated (Galvanized) Steel Pipe	B36.20 -1966	A120 -1966		
Welded and Seamless Steel Pipe	B36.1 -1966	A53 -1967		
Pipe Threads	B2.1 -1960			
Nonferrous Pipe and Fittings				
Seamless Copper Pipe, Standard Sizes	H26.1 -1963	B42 -1966		
Seamless Copper and Copper Alloy Pipe	H23.4 -1967	B251 -1967		
Seamless Copper Water Tube	H23.1 -1967	B88 -1966		
Copper Drainage Tube (DWV)	H23.6 -1967	B306 -1966		
Wrought Copper & Bronze Solder-Joint Fittings	B16.22 -1963			
Wrought Copper and Wrought Copper Alloy Solder-Joint Drainage Fittings				UPC-PS 21-65
Cast Brass Solder-Joint Pressure Fittings	B16.18 -1967			
Cast-Bronze Solder-Joint Drainage Fittings	B16.23 -1960			
Brass Fittings for Flared Copper Tubes	B16.26 -1967			
Seamless Red Brass Pipe	H27.1 -1963	B43 -1966		
Cast Bronze Screwed Fittings, 125 and 250 Lb.	B16.15 -1964			

*Dates shown are latest editions at time of printing including the dates of any addenda issued. Other standards on solvent cements, thermoplastic pipes and fittings are also available from ASTM.

Materials	USASI	ASTM	FS	Other Standards
Plastic Pipe and Fittings				
ABS Plastic Drain, Waste, and Vent Pipe and Fittings		D1527 -67	L-P-00322	CS270 -65 NSF-14 1965
PVC Plastic Drain, Waste and Vent Pipe and Fittings		D1785 -67	L-P-00320	CS272 -65 NSF-14 1965
Plastic Sewer, Drain Pipe, Fittings, Styrene Rubber (SRP)			WW-P -00380a	NSF-14 1965
ABS Plastic Pipe (SDR-PR and Class T)		D2282 -66		CS254 -63 NSF-14 1965
Polyethylene (PE) Plastic Pipe (SDR-PR)		D2239 -67		CS255 -63 NSF-14 1965
Polyvinyl Chloride (PVC) Plastic Pipe (SDR-PR and Class T)		D2241 -65		CS256 -63 NSF-14 1965
Miscellaneous				
Pipe Nipples, Threaded			WW-N-351a'60	
Backflow Preventers in Plumbing Systems	A40.6 -1943			
Air Gaps in Plumbing Systems	A40.4 -1942			
Valve, Bronze, Gate 125-150 Lb.			WW-V-54b.'62	
Valve, Cast-Iron Gate, 125 and 250 Lb.			WW-V--58(1)'46	
Plumbing — Fixture-Setting Compound			HH-C--536-a'54	
Cast Brass and Tubing P-Traps				UPC-PS 2-66
Relief Valves and Automatic Gas Shutoff Devices for Hot Water Supply Systems	Z21.22 -1965			
Solvent Cement for ABS Plastic Pipe and Fittings		D2235 -63T		
Diversion Tees and Twin Waste Elbow				UPC-PS 9-66
Flexible Copper Water Connectors				UPC-PS 14-66

Materials	USASI	ASTM	FS	Other Standards
Dishwasher Drain Airgaps				UPC-PS 23-66-T
Backflow Preventers and Relief Valves				TSC 8-66-T
Flexible Metal Mobile Home Gas Connectors				TSC 9-63
Drain Connectors for Independent Mobile Homes				TSC 10-64
Thermoplastic Joining Material				NSF 14
Plumbing Fixtures				
Plumbing Fixtures for Land Use			WW-P 541b(4)'62	
Vitreous China Plumbing Fixtures				CS-20 -63
Enameled Cast-Iron Plumbing Fixtures				CS-77 -62
Porcelain - Enameled (Glass-Lined) Hot Water Tanks				CS-115 -60
Formed Metal Porcelain-Enameled Sanitaryware				CS-144 -47

Mechanical Seal Water Closet				TSC-1 -1959
Waste Holding Tanks				TSC-2 -1960a
Water Storage Tanks				TSC-4 -1960
Drains for Prefabricated and Precast Showers				UPC-PS 4-66
Shower Drainage Fittings				UPC-PS 5-66
Cultured Marble Lavatory				UPC-PS 18-65
Prefabricated Shower Receptors, Prefabricated Stall Showers				TSC 11-64
Self-contained, Electrically Operated Recirculating, Chemically Controlled Toilet				TSC 12-65-T

Notes to Table II

Abbreviations used in Table II refer to standards as identified below and elsewhere in this standard.

AGA: Standards and Tentative Standards published by the *American Gas Association*, 1032 East 62nd Street, Cleveland, Ohio 44103.

ASA: *American Standards Association* — now *United States of America Standards Institute* (USASI), to 10 East 40th Street, New York, N.Y. 10016.

ASME: Standards and Tentative Standards published by the *American Society of Mechanical Engineers*, 345 East 47th Street, New York, N. Y. 10017.

ASTM: Standards and Tentative Standards published by the *American Society for Testing and Materials*, 1916 Race Street, Philadelphia, Pa. 19103.

AWWA: Standards and Tentative Standards published by the *American Water Works Association*, 2 Park Ave., New York, N. Y. 10016.

CS: Commercial Standards representing recorded voluntary recommendations of the trade, issued by the *United States Department of Commerce* and obtainable from the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402.

FS: Federal Specifications published by the *Federal Specifications Board* and obtainable from the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402.

IAPMO: Standards and Tentative Standards designated above as UPC-PS (Uniform Plumbing Code — Product Standard) and TSC (Trailer Standard) available from the *International Association of Plumbing and Mechanical Officials*, 5032 Alhambra Ave., Los Angeles, Calif. 90032 (formerly *Western Plumbing Officials Association* (WPOA).

MSS: Standards published by the *Manufacturers Standardization Society of the Valve and Fittings Industry*, 420 Lexington Avenue, New York, N. Y. 10017.

NSF: Standards and Tentative Standards published by the *National Sanitation Foundation*, Ann Arbor, Michigan 48106.

SPR: Simplified Practice Recommendations representing recorded recommendations of the trade and issued by the *United States Department of Commerce*, Washington, D. C. 20234.

TSC: See IAPMO.

UL: Standards and Tentative Standards published by the *Underwriters' Laboratories, Inc.*, 207 East Ohio Street, Chicago, Illinois 60611.

UPC-PS: See IAPMO.

USAS: *A United States of America Standard* (usually followed by a number and date) as available from or through the United States of America Standards Institute (USASI).

USASI: United States of America Standards Institute, 10 East 40th Street, New York, N. Y. 10016.

6.3 Specific Usage. Each of the following sections indicates specifically the type of material presently permitted for use in the various parts of the plumbing system.

7. Joints and Connections

7.1 Tightness. Joints and connections in the plumbing system shall be gastight and watertight for the pressures required under testing procedures.

7.1.1 Assembling of Pipe. All joints and connections shall be correctly assembled for tightness. Pipe threads shall be fully engaged with the threads of the fitting. Plastic pipe and copper tubing shall be inserted to the full depth of the solder cup or welding sockets of each fitting. Pipe threads and slip joints shall not be wrapped with string, paper, putty, or similar fillers.

7.1.2 Threaded Joints. Threads for screw pipe and fittings shall conform to the approved or listed standard. All burrs shall be removed. Pipe ends shall be reamed out to size of bore, and all chips shall be removed. Pipe joint cement or thread lubricant shall be of approved type and applied to male threads only.

7.1.3 Solder Joints. Solder joints for tubing shall be made with approved or listed sweat solder type fittings. Surfaces to be soldered shall be cleaned bright. The joints shall be properly fluxed with noncorrosive paste type flux and made with approved or listed 50-50 solder or an approved solder having a higher melting temperature.

7.1.4 Plastic Pipe and Fittings. Plastic pipe and fittings shall be joined by installation methods recommended by the manufacturer or by a recognized, approved, or listed standard. They shall not affect the potability of the water.

7.1.5 Union Joints. Metal unions shall have metal-to-metal ground seats.

7.1.6 Flared Joints. Flared joints for soft-copper water tubing shall be made with listed fittings. The tubing shall be expanded with a proper flaring tool.

8. Traps and Cleanouts

8.1 Traps

8.1.1 Traps Required. Each plumbing fixture shall be separately trapped by an approved water seal "P" trap. Water closets,

except mechanical sealed water closets and circulating chemical toilets shall have integral traps.

8.1.2 Dual Fixtures. A two-compartment sink or two single sinks or two lavatories set immediately adjacent to each other in the same room with waste outlets not more than 30 inches apart may be connected to one trap and may be considered as one fixture for the purpose of drainage and vent requirements.

8.1.3 Prohibited Traps. No form of trap which depends for its seal upon concealed interior partitions shall be used. Full "S" traps, bell traps, drum traps, and crown-vented traps are prohibited, and no fixture shall be double-trapped.

8.1.4 Material and Design. Each trap shall be self-cleaning with a smooth and uniform interior waterway. Traps shall be manufactured of cast iron, cast brass, or drawn brass tubing of not less than No. 20 Brown and Sharpe gage, or approved or listed plastic, or other approved or listed material. Union joints for a trap shall be beaded to provide a shoulder for the union nut. Each trap shall have the manufacturer's name stamped or cast in the metal of the trap, and each tubing shall show the gage of the tubing.

8.1.5 Trap Seal. Each trap shall have a water seal of not less than 2 inches and not more than 4 inches and shall be set true to its seal.

8.1.6 Size. Traps shall be not less than 1½ inches in diameter, except that a 1¼-inch diameter trap may be used when connected to a single fixture having no more than a 2-inch drain opening. No trap shall be larger than the waste pipe to which it is connected.

8.1.7 Location. Each trap shall be located as close to its vent and to its fixture outlet as structural conditions will permit.

8.1.8 Distance from Trap to Vent. The distance between a trap and its vent or vented waste line shall be in accordance with Table 3 (see 13.3.5 of this Part).

8.1.9 Length of Tailpiece. The vertical distance from a trap to the fixture outlet shall not exceed 24 inches.

8.1.10 Installation

8.1.10.1 Grade of Fixture Drain. The fixture drain piping between a trap and the fixture tee or the vented waste line shall be graded ¼ inch per foot towards the vent and in no event shall have a slope greater than its diameter. Except for water closet

drains, the vent opening at fixture tees shall not be below the invert of the trap outlet.

8.1.10.2 Fixture Drain Offset. The fixture drain piping between the trap and vent may change direction or be offset horizontally with the equivalent of no more than 180 degrees.

8.1.10.3 Concealed Traps. Traps with slip joint connections shall be readily accessible for repair and inspection.

8.1.10.4 Protection. Traps shall be adequately protected from damage during transit and from freezing, where necessary, during normal occupancy.

8.2 Cleanout Openings

8.2.1 Location of Cleanout Fittings

8.2.1.1 Cleanouts shall be installed if the drainage system cannot be cleaned through fixtures, drains, or vents. Cleanouts shall also be provided when fittings of more than 45 degrees are used to affect an offset except where long turn ells are used which provide sufficient "sweep" for cleaning.

8.2.1.2 A full size cleanout shall be installed at the upper end of any section of drain piping which does not have the required minimum slope of ¼ inch per foot grade.

8.2.1.3 A cleaning tool shall not be required to pass through more than 360 degrees of fittings to reach any part of the drainage system.

8.2.2. Access to Cleanouts. Cleanouts shall be accessible through an unobstructed minimum clearance of 12 inches directly in front of the opening. Each cleanout fitting shall open in a direction opposite to the flow or at right angles to the pipe. Concealed cleanouts that are not provided with access covers shall be extended to a point above the floor or outside of the mobile home, with pipe and fittings installed, as required, for drainage piping.

8.2.3 Material. Plugs and caps shall be brass or approved or listed plastic, with screw pipe threads.

8.2.4 Design. Cleanout plugs shall have raised heads except that plugs at floor level shall have counter-sunk slots.

9. Plumbing Fixtures

9.1 General Requirements

9.1.1 Quality of Fixtures. Plumbing fixtures shall have smooth impervious finishes, be free from defects and concealed fouling surfaces, be capable of resisting road shock and vibration, and shall conform in quality and design to approved or listed standards.

9.1.2 Strainers. The waste outlet of all plumbing fixtures, other than water closets, shall be covered with substantial metal strainers that will provide an adequate unobstructed waterway.

9.1.3 Fixture Connections. Fixture tailpieces and continuous wastes in exposed or accessible locations shall be not less than No. 20 Brown and Sharpe gage seamless drawn-brass tubing or other approved materials. Inaccessible fixture connections shall be constructed according to the requirements for drainage piping. Each fixture tailpiece, continuous waste, or waste and overflow shall be not less than 1½ inches for sinks of two or more compartments, dishwashers, clothes washing machines, laundry tubs, bath tubs, and not less than 1¼ inches for lavatories and single compartment sinks having a 2 inch maximum drain opening.

9.1.4 Concealed Connections. Concealed slip joint connections shall be provided with adequately sized unobstructed access panels and shall be readily accessible for inspection and repair.

9.1.5 Directional Fitting. An approved or listed "Y" or other directional-type branch fitting shall be installed in every tailpiece or continuous waste that receives the discharge from food waste disposal units, dishwashing, or other force-discharge fixture or appliance. Dishwasher drains shall not be connected to a sink tailpiece, continuous waste, or trap on the discharge side of a food-waste disposal unit.

9.2 Fixtures

9.2.1. Water Closet

9.2.1.1 Each water closet shall be designed and manufactured according to approved or listed standards and shall be equipped with a water flushing device capable of adequately flushing and cleaning the bowl at each operation of the flushing mechanism.

9.2.1.2 Water closet flushing devices shall be designed to replace the water seal in the bowl after each operation. Flush valves,

flushometer valves, and ball cocks shall operate automatically to shut off at the end of each flush or when the tank is filled to operating capacity.

9.2.1.3 Flush tanks shall be fitted with an overflow pipe large enough to prevent flooding at the maximum flow rate of the ball cock. Overflow pipes shall discharge into the water closet, through the tank.

9.2.1.4 Water closets that have fouling surfaces that are not thoroughly washed at each discharge shall be prohibited. Any water closet that might permit the contents of the bowl to be siphoned back into the water system shall be prohibited.

9.2.2 Shower Stalls

9.2.2.1 Each shower stall receptor shall be provided with an approved-type watertight receptor with sides and back extending 1 inch above the finished dam or threshold. In no case shall the depth of a shower receptor be less than 2 inches or more than 9 inches measured from the top of the finished threshold to the top of the drain. The wall area in shower compartments shall be constructed of smooth, noncorrosive, and nonabsorbent waterproof materials to a height not less than 6 feet above the floor level. Such walls shall form a watertight joint with each other and with the receptor or shower floor. The floor shall slope uniformly to the drain at not less than one-fourth nor more than one-half inch per foot.

9.2.2.2 The joint around the drain connection and around the water closet outlets in combination compartments shall be made watertight by a flange, clamping ring, or other approved or listed means.

9.2.2.3 Hinged shower doors shall open outward.

9.2.2.4 Prefabricated shower stalls shall be approved or listed and shall comply with all the requirements relating to plumbing fixtures and shower stalls.

9.2.3. **Fixed Shower and Tub Enclosures.** Fixed shower doors and tub and shower enclosures shall be constructed of materials such as wired-glass, laminated safety glass, fiberglass, reinforced plastics, or other listed materials.

9.2.4. Dishwashing Machines

9.2.4.1 No dishwashing machine shall be directly connected to any waste piping, but shall discharge its waste through a fixed

air gap installed above the machine. The drain connection from the air gap may connect to an individual trap, to a directional fitting installed in the sink tailpiece, or to the opening provided on the inlet side of a food waste disposal unit.

9.2.4.2 Drain from a dishwashing machine shall not be connected to a continuous waste line or trap on the discharge side of a food waste disposal unit.

9.2.5 Clothes Washing Machines

9.2.5.1 Clothes washing machines shall drain either into a properly vented trap, into a laundry tub tailpiece with watertight connections, into an open standpipe receptor, or over the rim of a laundry tub.

9.2.5.2 Standpipes shall be 1½ inches, minimum, nominal iron pipe size, or 1½ inches outside diameter nominal brass tubing not less than No. 20 Brown and Sharpe gage. Receptors shall discharge into a vented trap or shall be connected to a laundry tub tailpiece by means of an approved or listed directional fitting. Each standpipe shall extend not less than 18 inches or more than 30 inches above its trap and shall terminate in an accessible location not less than 6 inches above the highest water level of the clothes washing machine.

9.2.5.3 No clothes washing machine drain shall be connected to the tailpiece, continuous waste, or trap of any sink or dishwashing machine.

9.3 Installation

9.3.1 **Access.** Each plumbing fixture shall be located and installed in a manner to provide easy access for cleaning and repair.

9.3.2. **Alignment.** Fixtures shall be set level and in true alignment with adjacent walls. Where practical, piping from fixtures shall extend to nearest wall.

9.3.3 **Brackets.** Wall-hung fixtures shall be rigidly attached to walls by metal brackets or supports without any strain being transmitted to the piping connections. Flush tanks shall be securely fastened to water closets or to the wall with adequate size bolts or screws of brass or other noncorrosive metal.

9.3.4 **Floor Connection.** Water closets shall be rigidly bolted to the closet flange, and when screw holds are provided the bowl shall also be solidly fastened to the floor. Bolts and screws shall be adequate in size and shall be made of solid brass or other

approved or listed noncorrosive metal. An approved or listed gasket or setting compound shall be used to form a watertight seal between the fixture and the drain connection. The exposed joint between the fixture and the floor shall be made watertight, and the floor under the water closet, and to at least 6 inches around the fixture, shall be made impervious to moisture.

10. Hangers and Supports

10.1 Strains and Stresses. Piping in a plumbing system shall be installed without undue strains and stresses, and provision shall be made for expansion, contraction, and structural settlement.

10.2 Piping Supports. Piping shall be secured at sufficiently close intervals to keep the pipe in alignment and carry the weight of the pipe and contents.

10.3 Hangers and Anchors

10.3.1 Hangers and anchors shall be of sufficient strength to support their proportional share of the pipe alignments and prevent rattling.

10.3.2 Piping shall be securely attached to the structure by proper hangers, clamps, or brackets which provide protection against motion, vibration, road shock, torque in the chassis, or other unusual conditions.

11. Water Distribution System

11.1 Water Supply

11.1.1 Potable Water. Water piping shall be sized to provide an adequate quantity of running water to each plumbing fixture at a flow rate sufficient to flush and keep the fixture in a clean and sanitary condition without any danger of backflow or siphonage.

11.1.2 Hot Water Supply. Each mobile home equipped with a kitchen sink, and bathtub and/or shower shall be provided with a hot water supply system including a water heater.

11.2 Water Outlets and Supply Connections

11.2.1 Water Connection. Each mobile home with a water distribution system shall be equipped with a ¾-inch inlet coupling located within the rear third of the length of the mobile home. This connection shall be tagged or marked "Fresh Water Connection" or "Fresh Water Fill." A matching cap or plug shall be provided

to seal the water inlet when it is not in use and shall be attached with a substantial chain. A master cold water shutoff gate valve shall be installed on the main feeder line in an accessible area.

11.2.2 Prohibited Connections

11.2.2.1 The installation of water supply piping or fixture or appliance connections shall be made in manner to preclude the possibility of used, unclean, polluted, or contaminated water, mixtures, or substances entering any part of the water supply system from any tank, receptacle, equipment, or plumbing fixture by reason of siphonage, suction, or any other cause, either during normal use and operation or when any such tank, receptacle, equipment, or plumbing fixture is flooded or subject to pressure in excess of the operating pressure in the water piping system.

11.2.2.2 No part of the water system shall be connected to any drainage or vent piping.

11.2.3 Rim outlets. The outlets of faucets, spouts, and similar devices shall be spaced at least 1 inch above the flood level of the fixture.

11.2.4 Appliance Connections. Water supplies connected to clothes washing or dishwashing machines shall be protected by an approved or listed fixed air gap provided within the appliance by the manufacturer.

11.2.5 Flushometer Valves or Manually Operated Flush Valves. An approved or listed vacuum breaker shall be installed and maintained in the water supply line on the discharge side of a water closet flushometer valve or manually operated flush valve. Vacuum breakers shall have a minimum clearance of 6 inches from the flood level of the fixture to the critical level mark unless otherwise permitted in their approval.

11.2.6 Flush Tanks. Water closet flush tanks shall be equipped with an approved anti-siphon ball cock which shall be installed and maintained with its outlet or critical level mark not less than 1 inch above the full opening of the overflow pipe.

11.2.7 Critical Level. The critical level, C-L or $\frac{C}{L}$ marking on a backflow prevention device or vacuum breaker is a point established by the testing laboratory (usually stamped on the device by the manufacturer) which determines the minimum elevation above the flood level rim of the fixture or receptacle served on which the device may be installed. When a backflow prevention

device does not bear a critical level marking, the bottom of the vacuum breaker, combination valve, or of any such approved or listed device shall constitute the critical level.

11.2.8 Backflow Preventer. When pressure- or gravity-type water supply tanks or reservoirs (except water heaters or flush tanks) for storing potable water are connected to the water distribution system of mobile homes, they shall have an approved or listed spring-loaded check valve or other approved or listed type backflow prevention device installed in the water-supply piping adjacent to the inlet coupling. An approved or listed pressure relief valve shall be required on the outlet side of the check valve.

11.3 Safety Devices

11.3.1 Relief Valves

11.3.1.1 All water heaters shall be installed with approved and listed fully-automatic valve or valves designed to provide temperature and pressure relief.

11.3.1.2 Any temperature relief valve or the combined pressure and temperature relief valve installed for this purpose shall have the temperature sensing element immersed in the hottest water within the upper 6 inches of the tank. It shall be set to start relieving at a pressure not exceeding the rated working pressure of the tank and at or below a water temperature of 210 degrees F.

11.3.1.3 All relief valves shall have connected a drainpipe not smaller than the relief valve drain connection pipe size. Where the relief valve is located within the mobile home, the drain line shall extend outside, with the end directed downward in a location where the outlet end will be protected from dirt, mud and freezing. No part of the drain line shall be trapped.

11.3.2 Water Supply Tanks and Heaters

11.3.2.1 Pressure and gravity cold water storage tanks shall be constructed of sound, nontoxic, durable materials, corrosion resistant, and shall impart no taste or odor to the potable water in the system. Each pressure tank shall be capable of withstanding 200 psi minimum test water pressure.

11.3.2.2 Each storage water heater shall be provided with a three-quarter (¾)-inch pipe tapping for a combined pressure-temperature relief valve within the top 6 inches of the tank. The tapping shall be in a location which will permit easy access for installing, testing and maintenance of the valve.

11.4 Materials

11.4.1 Piping Material. Water pipe shall be of standard weight brass, galvanized wrought iron, galvanized steel, Type L copper tubing, approved or listed plastic, or other approved or listed material (see 11.4.2).

11.4.2 Plastic Piping. Mobile homes that have no provision for hot water piping or hot water faucets, or no space allotted for a water heater, may have cold water piping (only), and fittings may be constructed from approved or listed plastic.

11.4.3 Fittings. Appropriate fittings shall be used for all changes in direction or size and where pipes are joined. The material and design of fittings shall conform to the type of piping used.

11.4.3.1 Fittings for screw piping shall be standard weight galvanized iron for galvanized iron and steel pipe, and of brass for brass piping. They shall be installed where required for change in direction, reduction of size, or where pipes are joined together.

11.4.3.2 Fittings for copper tubing shall be cast brass or drawn copper sweat solder pattern or flare type.

11.4.3.3 Fittings for cold water, plastic water piping shall be of approved or listed brass or plastic.

11.4.4 Prohibited Material. Used piping materials shall not be permitted. Pipe dope, solder flux, oils, solvents, chemicals, or other substances that are toxic, corrosive, or otherwise detrimental to the water system shall not be used.

11.5 Installation of Piping

11.5.1 Minimum Requirement. All piping equipment, appurtenances, and devices shall be installed in workmanlike manner and shall conform with the provisions and intent of this standard.

11.5.2 Screw Pipe. Iron pipe-size brass or galvanized iron or steel pipe and fittings shall be joined with approved or listed standard pipe threads fully engaged in the fittings. Pipe ends shall be reamed to the full bore of the pipe. Pipe-joint compound shall be insoluble in water and shall be nontoxic.

11.5.3 Solder Fittings. Copper tubing shall be joined to sweat solder fittings by means of hot solder and a noncorrosive flux. The surfaces to be soldered shall be thoroughly cleaned. The use of self-cleaning fluxes shall not be permitted.

11.5.4 Flared Fittings. A flaring tool shall be used to shape the ends of flared tubing to match the flare of fittings.

11.5.5 Plastic Pipe and Fittings. Plastic pipe and fittings shall be joined by installation methods recommended by the manufacturer or by a listed standard.

11.6 Size of Water Supply Piping

11.6.1 Minimum Size. The size of water supply piping and branch lines shall not be less than sizes shown in Table 2.

TABLE 2

Minimum Size Tubing and Pipe for Water Distribution Systems

Number of Fixtures	Tubing		Pipe
	Inner Dia. (Inches)	Outer Dia. (Inches)	Iron Pipe Size (Inches)
1	¼*	⅜	½
2	⅜	½	½
3	½	⅝	½
4	½	⅝	½
5 or more	¾	⅞	¾

*6 feet maximum length for ¼ inch id tubing.

Exceptions to Table: ⅜ inch id nominal or ½ inch od minimum size for clothes washing or dishwashing machines, unless larger size is recommended by the fixture manufacturer.

½ inch id nominal or ⅝ inch od minimum size for flushometer or metering type valves unless otherwise specified in their listing.

No galvanized screw piping shall be less than ½ inch iron pipe size.

11.6.2 Sizing Procedure. Both hot and cold water piping systems shall be computed by the following method:

11.6.2.1 Size of Branch. Start at the most remote outlet on any branch of the hot or cold water piping and progressively count towards the water service connection, computing the total number of fixtures supplied along each section of piping. Where branches are joined together, the number of fixtures on each branch shall be totalled so that no fixture is counted twice. Following down the left-hand column of Table 2 a corresponding number of fixtures will be found. The required pipe or tubing size is indicated in the other columns on the same line.

11.6.2.2 A water heater or food waste disposal unit shall not be counted as a water-using fixture when computing pipe sizes.

11.7 **Line Valves.** Valves, when installed in the water supply distribution system (except those immediately controlling one fixture supply) and when fully opened, shall have a cross-sectional area of the smallest orifice or opening, through which the water flows, at least equal to the cross-sectional area of the nominal size of the pipe in which the valve is installed.

12. Drainage Systems

12.1 Materials

12.1.1 Pipe. Drainage piping shall be standard weight steel, wrought iron, brass, copper tube DWV, approved or listed plastic, or other approved or listed material.

12.1.2 Fittings. Drainage fittings shall be recessed drainage pattern with smooth interior waterways of the same diameter as the piping and shall be of a material conforming to the type of piping used. Drainage fittings shall be designed to provide for a ¼ inch per foot grade in horizontal piping.

12.1.2.1 Fittings for screw pipe shall be cast iron, malleable iron, brass, or approved or listed plastic with approved or listed standard pipe threads.

12.1.2.2 Fittings for copper tubing shall be cast brass or drawn copper sweat solder.

12.1.2.3 Fittings for plastic piping shall be made to listed standards.

12.1.2.4 Brass adaptor fittings shall be used to join copper tubing to threaded pipe.

12.2 Drain Outlets

12.2.1 Location of Drain. Each mobile home shall have only one drain outlet which shall terminate in the rear third section on the left (road) side. This outlet shall be tagged or marked "Drain Outlet" or "Sewer Outlet."

12.2.2 Exception. A drain outlet may terminate horizontally when it is equipped with an acceptable fitting(s).

12.2.3 Cap or Plug. A cap or plug on the drain outlet shall be permanently attached to the structure by a chain or cable.

12.2.4 **Clearance from Drain Outlet.** The drainage outlet and couplers shall be provided with a minimum clearance of 3 inches in any direction from all parts of the structure or appurtenances and with not less than 18 inches unrestricted clearance directly in front of the drainage outlet.

12.2.5 **Hose Couplers and Caps**

12.2.5.1 Hose couplers for drain outlets shall be a quick disconnect type not requiring any special tools or knowledge to make the connection or remove the drain hose.

12.2.5.2 Hose couplers and drain hoses shall not be smaller than the piping to which they are connected and shall be equipped with a watertight cap or plug matching the drainage outlet or coupler. The cap or plug shall be permanently attached to the structure by means of a substantial chain.

12.2.5.3 Drain outlet or attached drain hoses for drain piping connected to a mobile home shall be 3 inches minimum inside diameter.

12.3 **Fixture Connections.** Drainage piping shall be provided with approved or listed inlet fittings for fixture connections, correctly located according to the size and type of fixture to be connected.

12.3.1 **Water Closet Connection.** The drain connection for each water closet shall be 3 inches minimum inside diameter and shall be fitted with an iron, brass, or listed plastic floor flange adaptor ring securely screwed, soldered or otherwise permanently attached to the drain piping, in an approved manner and securely fastened to the floor.

12.4 **Size of Drainage Piping**

12.4.1 **Fixture Load.** Drain pipe sizes shall be determined by the type of fixture and the total number connected to each drain.

12.4.1.1 A 1½-inch minimum diameter piping shall be required for one and not more than three individually vented fixtures.

12.4.1.2 A 2-inch minimum diameter piping shall be required for four or more fixtures individually vented.

12.4.1.3 A 3-inch minimum diameter piping shall be required for water closets.

12.5 **Wet-Vented Drainage System.** Plumbing fixture traps may connect into a wet-vented drainage system which shall be designed and installed to accommodate the passage of air and waste in the same pipe.

12.5.1 **Horizontal Piping.** All parts of a wet-vented drainage system, including the connected fixture drains, shall be horizontal except for wet-vented vertical risers which shall terminate with a 1½-inch minimum diameter continuous vent. Where required by structural design, wet-vented drain piping may be offset vertically when other vented fixture drains or relief vents are connected to the drain piping below the vertical offsets.

12.5.2 **Size.** A wet-vented drain pipe shall be 2 inches minimum diameter and at least one pipe size larger than the largest connected trap or fixture drain. Not more than three fixtures may connect to a 2-inch diameter wet-vented drain system.

12.5.3 **Length of Fixture Drain.** Fixture traps shall be located within the distance given in Table 3 (see 13.3.5 of this Part). Not more than one trap shall connect to a trap branch.

12.6 **Offsets and Branch Fittings**

12.6.1 **Changes in Direction.** Changes in direction of drainage piping shall be made by the appropriate use of approved or listed fittings, and shall be of the following angles: 11¼, 22½, 45 or 60 degrees; or other approved or listed fittings or combination of fittings with equivalent radius or sweep.

12.6.2 **Horizontal to Vertical.** Horizontal drainage lines, connecting with a vertical pipe shall enter through 45-degree "Y" branches, 60-degree "Y" branches, long-turn "TY" branches, sanitary "T" branches, or other approved or listed fittings or combination of fittings having equivalent sweep. No fitting having more than one branch at the same level shall be used, unless the fitting is constructed so that the discharge from any one branch cannot readily enter any other branch. However, a double sanitary "T" may be used when the drain line is increased not less than two pipe sizes.

12.6.3 **Horizontal to Horizontal and Vertical to Horizontal.** Horizontal drainage lines connecting with other horizontal drainage lines or vertical drainage lines connected with horizontal drainage lines shall enter through 45-degree "Y" branches, long-turn "TY" branches, or other approved or listed fittings or combination of fittings having equivalent sweep.

12.7 **Slope of Horizonal Drainage Piping.** Horizontal drainage piping shall be run in practical alignment and have a uniform slope of not less than ¼ inch per foot toward the mobile home drain outlet. Where it is impractical, due to the structural features or arrangement of any mobile home, to obtain a slope of ¼ inch per foot, the pipe or piping may have a slope of not less than ⅛ inch per foot, when a full size cleanout is installed at the upper end.

13. Vents and Venting

13.1 **General.** Each plumbing fixture trap shall be protected against siphonage and back pressure, and air circulation shall be ensured throughout all parts of the drainage system by means of vent pipes installed in accordance with the requirements of this section and as otherwise required by this standard.

13.2 Materials

13.2.1 **Pipe.** Vent piping shall be standard weight steel, wrought iron, brass, copper tube DWV, approved or listed plastic, or other approved or listed materials.

13.2.2 **Fittings.** Appropriate fittings shall be used for all changes in direction or size and where pipes are joined. The material and design of vent fittings shall conform to the type of piping used.

13.2.2.1 Fittings for screw pipe shall be cast iron, malleable iron, plastic, or brass, with approved or listed standard pipe threads.

13.2.2.2 Fittings for copper tubing shall be cast brass or drawn copper sweat solder pattern.

13.2.2.3 Fittings for plastic piping shall be made to recognized, approved, or listed standards.

13.2.2.4 Brass adaptor fittings shall be used to join copper tube to threaded pipe.

13.2.2.5 Listed rectangular cross section pipe may be used for vent piping *only* providing it has an open cross section at least equal to the circular vent pipe required. Listed transition fittings shall be used.

13.3 Size of Vent Piping

13.3.1 **Main Vent.** The drain piping for each water closet shall be vented by a 1½-inch minimum diameter vent or rectangular

vent of venting cross section equivalent to or greater than the venting cross section of a 1½-inch diameter vent, connected to the main drain by one of the following methods:

(a) A 1½-inch diameter (min.) individual vent pipe or equivalent directly connected to the water closet drain and extended undiminished in size through the roof.

(b) A 1½-inch diameter (min.) continuous vent or equivalent indirectly connected to the water closet drain piping through a 2-inch wet-vented drain that carries the waste of not more than one fixture, or not more than two fixtures when one is a combination compartment drain.

(c) Two or more vented drains when at least one is wet-vented and each drain is separately connected to the main drain.

13.3.2 Individual Vents. A vent pipe equivalent in area to 1¼-inch tubing required for all individually vented fixtures with a 1½-inch or smaller trap. The main vent, water closet vent and relief vent, and the continuous vent of wet-vented systems shall have an area equivalent to 1½-inch tubing.

Exception: In the case of copper tube, 1¼ inch nominal size may be used for individual vents.

13.3.3 Common Vent. When two fixture traps located within the distance allowed from their vent have their trap arms connected separately at the same level into an approved double fitting, an individual vent pipe may serve as a common vent without any increase in size.

13.3.4 Intersecting Vents. Where two or more vent pipes are joined together, no increase in size shall be required; however, the largest vent pipe shall extend full size through the roof and shall have a minimum area equivalent to a 1½ inch IPS.

13.3.5 Distance of fixture trap from vent shall not exceed the values given in Table 3 (next page).

13.4 Grade and Connections

13.4.1 Horizontal Vents. Each vent shall extend vertically from its fixture "T" or point of connection with the waste piping to a point not less than 6 inches above the extreme flood level of the fixture it is venting before offsetting horizontally or being connected with any other vent pipe. Vents for horizontal drains shall connect above the centerline of the drain piping ahead (down-

TABLE 3

Distance of Fixture Trap from Vent

Size of Fixture Drain (Inches)	Distance Trap to Vent
1¼	4 feet 6 inches
1½	4 feet 6 inches
2	5 feet 0 inches
3	6 feet 0 inches

stream) of the trap. Where required by structural conditions, vent piping may offset below the rim of the fixture at the maximum angle or height possible.

13.4.2 **Grade.** Vents shall grade or drain back to the drainage system by gravity.

13.5 **Vent Terminal**

13.5.1 **Roof Extension.** Each vent pipe shall extend through its flashing and terminate vertically, undiminished in size, not less than 2 inches above the roof. Vent openings shall not be less than 3 feet, 0 inch away from any motor-driven air intake that opens into habitable areas.

13.5.2 **Flashing.** The opening around each vent pipe shall be made watertight by an adequate flashing or flashing material.

14. Test and Inspection

14.1 **Water System.** All water piping in the water distribution system shall be subjected to a pressure test before any portion is covered or concealed. The test shall be made by subjecting the system to air or water at 100 psi for 15 minutes without leakage or loss of pressure. An adequate and accurate pressure gage shall be used on all tests.

14.2 **Drainage and Vent System and Plumbing Fixtures.** The waste and vent system shall be tested by one of the following alternate methods for evidence or indication of leakage.

14.2.1 **Water Test.** Before plumbing fixtures are connected, all of the openings into the piping shall be plugged and the entire piping system subjected to a static water test for 15 minutes by filling it with water to the top of the highest vent opening. The system shall be watertight at all points.

14.2.2 Air Test. After all fixtures have been installed, the traps filled with water, and the remaining openings securely plugged, the entire system shall be subjected to a 2 inch (manometer) water column air pressure test. If the system loses pressure, leaks may be located with smoke pumped into the system, or with soap suds spread on the exterior of the piping (Bubble test).

14.2.3. Flood Level Test. The mobile home shall be in a level position; all fixtures shall be connected, and the entire system shall be filled with water to the rim of the water closet bowl. (Tub and shower drains should be plugged.) After all trapped air has been released, the test shall be sustained for not less than 15 minutes. The waste piping above the level of the water closet shall be tested and show no indication of leakage when the high fixtures are filled with water and emptied simultaneously to obtain the maximum possible flow in the drain piping.

14.2.4 Fixture Test. The plumbing fixtures and connections shall be subjected to a flow test by filling them with water and checking for leaks and retarded flow while they are being emptied.

14.3 Shower Stalls. Nonmetallic shower stall linings shall be tested for leaks prior to being covered by finish material. Each pan shall be filled with water to the top of the dam for not less than 15 minutes.

Part III

Heating Systems

1. Introduction

1.1 Those members of the engineering profession and others associated with the design, manufacturing, installation, and inspection of mobile home heating systems have been aware of the need for uniform technical standards leading to the safe use of this special type of equipment. They have also recognized that, because of unique conditions of transport and use, existing heating equipment standards for motor vehicles or for buildings are not completely applicable to mobile homes. It is with these factors in mind that Part III of this standard has been developed.

1.2 Much of the material in Part III has been taken from, or is based on, nationally recognized standards for heat producing appliances and fuel supply systems including those of the National Fire Protection Association.

2. Scope

2.1 This standard covers the heating systems and equipment installed within or on mobile homes.

2.2 This standard is not intended as a design specification or an instruction manual for untrained persons.

2.3 Wherever nationally recognized standards for heat producing appliances and fuel supply systems and Part III of this standard differ, the requirements of the latter shall apply.

2.4 The provisions of this standard are not intended to prevent the use of any material, appliance, installation, device, arrangement, or method of construction not specifically prescribed herein, provided any such alternative has been approved. An enforcement agency may approve any such alternative if it finds the proposed design is satisfactory for the purpose intended, and if the material, appliance, installation, device, arrangement, and method or work offered is, for the purpose intended, at least the equivalent in performance of that prescribed in this standard considering quality, strength, effectiveness, durability, safety, and protection of life and health. An enforcement authority shall require that satisfactory evidence or proof be submitted to substantiate any claims that may be made regarding the use of any such alternative.

3. Definitions

Accessible. When applied to a fixture, connection, appliance or equipment shall mean having access thereto, but which may require the removal of an access panel, door or similar obstruction.

Air Duct. Conduits or passageways for conveying air to or from heating, cooling, air conditioning or ventilation equipment, but not including the plenum.

Appliance Branch Piping. Any run of piping or tubing, and fittings, not a part of an appliance that is used to convey fuel from the main piping manifold to a heat-producing appliance.

Approved. The word "approved" as used in this standard means acceptable to the authority having jurisdiction.

Automatic Pump (Oil Lifter). A pump, not an integral part of the oil-burning appliance, that automatically pumps oil from the supply tank and delivers the oil by gravity under a constant head to an oil-burning appliance.

BTU. British Thermal Units. The quantity of heat required to raise the temperature of one pound of water one degree Fahrenheit.

BTUH. British thermal units per hour.

Burner. A device for the final conveyance of fuel or a mixture of fuel and air to the combustion zone.

Clearance. The distance between the appliance, chimney, vent, chimney or vent connector or plenum and the nearest surface.

Combustible Material. The term applies to materials adjacent to, or in contact with, heat producing appliances, chimney connectors and vent connectors, steam and hot water pipes, and warm air ducts. Such material is made of, or surfaced with, wood, compressed paper, plant fibers, or other material that will ignite and burn. These materials shall be considered as combustible even though flameproofed, fire-retardant treated, or plastered.

Connector-Gas Appliance. A connector used to convey fuel gas, three feet or less in length (six feet or less for ranges) between a gas outlet and gas appliance in the same room with the outlet.

Fuel Gas Piping System. The arrangement of piping, tubing fittings, connectors, valves and devices designed and intended to supply or control the flow of fuel gas to the appliance(s).

Fuel Oil Piping System. The arrangement of piping, tubing, fittings, connectors, valves and devices designed and intended to

supply or control the flow of fuel oil to the appliance(s).

Gas Supply Connection. The terminal end or connection to which a gas supply connector is attached.

Gas Supply Connector. Tubing or piping connecting the mobile home to the gas supply source.

Heat Producing Appliance. All heating and cooking appliances and all fuel burning appliances.

Heating Appliance. An appliance for comfort heating of a mobile home or for water heating.

Illuminating Appliance—Gas Fired. An appliance designed for illumination and intended for either outdoor or indoor installation and attached to a fuel gas piping system.

Liquefied Petroleum Gases. The terms "Liquefied petroleum gases," "LPG" and "LP-Gas" as used in this standard shall mean and include any material which is composed predominantly of any of the following hydrocarbons, or mixtures of them: propane, propylene, butanes (normal butane or isobutane), and butylenes.

Listed. Equipment or materials included in a list published by a nationally recognized testing laboratory that maintains periodic inspection of production of listed equipment or materials and whose listing states either that the equipment or material meets nationally recognized standards or has been tested and found suitable for use in a specified manner.

Main Gas Piping Manifold. Gas piping which conveys gas from the gas supply connection to the appliance branch piping.

Mobile Home. A vehicular, portable structure built on a chassis and designed to be used without a permanent foundation* as a dwelling when connected to indicated utilities.

Readily Accessible. Having direct access without the necessity of removing any panel, door, or similar obstruction.

Roof Jack. That portion of a mobile home heater flue or vent assembly, including the cap, insulating means, flashing, and ceiling plate, located in and above the roof of a mobile home.

Water Heater. An appliance for supplying hot water for domestic or commercial purposes other than for space heating.

*The phrase "without a permanent foundation" indicates that the support system is constructed with the intent that the mobile home placed thereon will be moved from time to time at the convenience of the owner.

4. Fuel Supply Systems

4.1 LP-Gas Containers

4.1.1 Maximum Capacity. No more than two containers having an individual water capacity of not more than 105 pounds (approximately 45 pounds LP-Gas capacity), shall be installed on or in a compartment of any mobile home.

4.1.2 Construction of Containers. Containers shall be constructed and marked in accordance with the specifications for LP-Gas containers of the U.S. Department of Transportation (DOT) or the Rules for Construction of Unfired Pressure Vessels, Section VIII, ASME Boiler and Pressure Vessel Code. ASME Containers constructed after December 31, 1967 shall be Container Type 250.

4.1.2.1 Container supply systems shall be arranged for vapor withdrawal only.

4.1.3 Location of Containers and Systems

4.1.3.1 No LP-Gas container shall be installed nor provisions made for installing or storing, even temporarily, inside any mobile home except for listed, completely self-contained hand torches, lanterns, or similar equipment with containers having a maximum water capacity of not more than 2½ pounds (approximately one pound LP-Gas capacity).

4.1.3.2 Containers, control valves, and regulating equipment shall be mounted on the chassis of the mobile home as close to the hitch as possible, or shall be installed in a compartment that is vaportight to the inside of the mobile home and accessible only from the outside. The compartment shall be ventilated at top and bottom to facilitate diffusion of vapors. The compartment shall be ventilated with two vents having an aggregate area of not less than two percent of the floor area of the compartment and shall open unrestricted to the outside atmosphere. The required vents shall be equally distributed between the floor and ceiling of the compartment. If the lower vent is located in the access door or wall, the bottom edge of the vent shall be flush with the floor level of the compartment. The top vent shall be located in the access door or wall with the bottom of the vent not more than 12 inches below the ceiling level of the compartment. All vents shall have an unrestricted discharge to the outside atmosphere. Access doors or panels of compartments shall not be equipped with locks or require special tool or knowledge to open.

4.1.3.3. Contain or container carrier shall be secured in place

on the mobile home by fastenings designed and constructed with a minimum safety factor of four, to withstand loading in any direction equal to four times the filled weight of the container.

4.1.4 Container Valves and Accessories

4.1.4.1 Valves in the assembly of a two-cylinder system shall be arranged so that replacement of containers can be made without shutting off the flow of gas to the appliance(s).

NOTE: This provision is not to be construed as requiring an automatic change-over device.

4.1.4.2 Shutoff valves on the containers shall be protected as follows, in transit, in storage, and while being moved into final utilization:

(a) By setting into a recess of the container to prevent possibility of their being struck if container is dropped upon a flat surface.

(b) By ventilated cap or collar, fastened to the container, capable of withstanding a blow from any direction equivalent to that of a 30-pound weight dropped 4 feet. Construction must be such that the blow will not be transmitted to the valve.

4.1.4.3 Regulators shall be connected directly to the cylinder valve outlets or mounted securely by means of a support bracket and connected to the cylinder valve or valves with listed high pressure flexible connections.

4.1.5 Safety Devices

4.1.5.1. DOT containers shall be provided with safety relief devices as required by the regulations of the U.S. Department of Transportation. ASME containers shall be provided with relief valves in accordance with B.10 of USA Standard for the Storage and Handling of Liquefied Petroleum Gases (USAS Z106.1-1967, NFPA No. 58-1967). Safety relief valves shall have direct communication with the vapor space of the vessel.

4.1.5.2 The delivery side of the gas pressure regulator shall be equipped with a safety relief device set to discharge at a pressure not less than two times and not more than three times the delivery pressure of the regulator.

4.1.5.3 Systems mounted on the hitch shall be so located that the discharge from the safety relief devices shall be into the open

air and not less than three feet horizontally from any opening into the mobile home below the level of such discharge. Relief valves located within liquefied petroleum gas container compartments may be less than three feet from openings provided:

(a) The bottom vent of the compartment is at the same level or lower than the bottom of any opening into the vehicle, or,

(b) The compartment is not located on the same wall plane as the opening(s) and is at least two feet horizontally from such openings.

4.1.6 System Enclosure and Mounting

4.1.6.1 Housings and enclosures shall be designed to provide proper ventilation at least equivalent to that specified in 4.1.3.2 of this Part.

4.1.6.2 Doors, hoods, domes, or portions of housings and enclosures required to be removed or opened for replacement of containers shall incorporate means for clamping them firmly in place and preventing them from working loose during transit.

4.1.6.3 Provisions shall be incorporated in the assembly to hold the containers firmly in position and prevent their movement during transit.

4.1.6.4 Containers shall be mounted on a substantial support or a base secured firmly to the vehicle chassis. Neither the container nor its support shall extend below the frame.

4.1.7 System Design and Service Line Pressure

4.1.7.1 Systems shall be of the vapor-withdrawal type.

4.1.7.2 Vapor, at a pressure not over 18 inches water column, shall be delivered from the system into the gas supply connection.

4.1.7.3 Container openings for vapor withdrawal shall be located in the vapor space when the container is in service or shall be provided with a suitable internal withdrawal tube which communicates with the vapor space in or near the highest point in the container when it is mounted in service position, with the vehicle on a level surface. Containers shall be permanently and legibly marked in a conspicuous manner on the outside to show the correct mounting position and the position of the service outlet connection. The method of mounting in place shall be such as to minimize the possibility of an incorrect positioning of the container.

4.2 Oil Tanks

4.2.1 Installation. Oil tanks installed for gravity flow of oil to heating equipment shall be installed so that the top of the tank is no higher than 8 feet above the appliance oil control and the bottom of the tank is not less than 18 inches above the appliance oil control. Listed automatic pumps (oil lifter) shall be mounted no higher than 8 feet above the appliance oil control and not less than 18 inches above the appliance oil control.

4.2.2 Auxiliary Oil Storage Tank. Oil supply tanks affixed to a mobile home shall be so located as to require filling and draining on the outside and shall be securely fastened in position in a place readily available for inspection.

4.2.3 Tank Compartment. If the fuel supply tank is located in a compartment of a mobile home, the compartment shall be ventilated at the bottom to permit diffusion of vapors and shall be insulated from the structural members of the body. Tanks so installed shall be provided with an outside fill and vent pipe and an approved liquid level gage.

4.2.4 Shutoff Valve. A readily accessible, approved manual shutoff valve* shall be installed at the outlet of an oil supply tank. The valve shall be installed to close against the supply.

4.2.5 Fuel Oil Filters. All oil tanks, except for integrally mounted tanks, shall be equipped with an approved oil filter or strainer† located downstream from the tank shutoff valve. The fuel oil filter or strainer shall contain a sump with a drain for the entrapment of water.

5. Piping Systems

5.1 Gas Piping Systems

5.1.1 General. The requirements of this section shall govern the installation of all fuel gas piping attached to any mobile home. None of the requirements listed in this section shall apply to the piping in the appliance(s).

*Such valves are listed in Underwriters' Laboratories Gas and Oil Equipment List under the classification, Valves, Shut-Off Valves, Flammable Liquid Shut-Off Valves.

†Such filters are listed in Underwriters' Laboratories Gas and Oil Equipment List under the classification, Heating and Heating-Cooling Appliance Accessories, Strainers, Oil Burner.

5.1.2 Materials. All materials used for the installation, extension, alteration, or repair of any gas piping system shall be new and free from defects or internal obstructions. It shall not be permissible to repair defects in gas piping or fittings. Inferior or defective materials shall be removed and replaced with acceptable material. The system shall be made of materials having a melting point of not less than 1,450 F, except as provided in 5.1.5 of this Part. They may consist of one or more of the materials described in 5.1.2.1 through 5.1.2.4.

5.1.2.1 Gas pipe shall be steel or wrought-iron pipe complying with USA Standard Wrought-Steel and Wrought-Iron Pipe, B36.10-1959. Threaded copper or brass pipe in iron pipe sizes may be used.

5.1.2.2 Fittings for gas piping shall be wrought iron, malleable iron, steel, or brass (containing not more than 75 percent copper).

5.1.2.3 Copper tubing shall be annealed type, grade K or L, conforming to the Specifications for Seamless Copper Water Tube (ASTM-B88-66), or shall comply with the Specifications for Seamless Copper Tube for Refrigeration Field Service, ASTM B280-66. When used on systems designed for natural gas, such tubing shall be internally tinned.

5.1.2.4 Steel tubing shall be externally corrosion protected and shall have a minimum wall thickness of 0.049 inch.

5.1.3 Piping Design. Each mobile home requiring fuel gas for any purpose shall be equipped with a fuel gas piping system that is designed for LP-Gas only or with a natural gas piping system acceptable for LP-Gas.

5.1.3.1 Where fuel gas piping is to be installed in both portions of an expandable or dual mobile home, the design and construction of the crossover shall be as follows:

(a) There shall be only one point of crossover which shall be located not more than 18 inches from either the front or rear wall and shall be readily accessible from the exterior of the mobile home.

(b) The connector between units shall be an approved type for exterior use, sized in accordance with 5.1.4 of this Part.

(c) The connection shall be made by an approved "quick disconnect" device which shall be designed to provide a positive seal of the supply side of the gas system when such device is separate

(d) The flexible connector and "quick disconnect" device shall be provided with protection from mechanical and impact damage and located to minimize the possibility of tampering.

(e) Suitable protective coverings for the "quick disconnect" device, when separated, shall be permanently attached to the device or flexible connector.

(f) A 3-inch by 1¾-inch etched, stamped, or embossed metal tag not less than 0.020 inch in thickness, of brass, stainless steel, anodized or alclad aluminum shall be permanently attached on the exterior wall adjacent to the access to the "quick disconnect" device. Each tag shall be legibly inscribed with the following information:

Do Not Use Tools to Separate the "Quick-Disconnect" Device.

5.1.4 Gas Pipe Sizing. Gas piping systems shall be sized so that the pressure drop to any appliance inlet connection from the gas supply connection or connections, when all appliances are in operation at maximum capacity, is no more than 0.5 inch water column. Conformance may be determined on the basis of test, or the gas piping system may be sized in accordance with Table 4 (next page). The natural gas supply connection shall be not less than ¾-inch nominal pipe size.

5.1.5 Joints for Gas Piping. All pipe joints in the piping system, unless welded or brazed, shall be screw joints that comply with USA Standard Pipe Threads (Except Dryseal) B2.1-1960. Right and left nipples and couplings shall not be used. Unions, if used, shall be of the ground joint type. The material used for welding or brazing pipe connections shall have a melting temperature in excess of 1,000°F.

5.1.6 Joints for Tubing. Joints on tubing shall be made with either a single or double flare of the proper degree, as recommended by the tubing manufacturer, by means of approved gas tubing fittings, or joints may be brazed with material having a melting point exceeding 1,000°F.

5.1.7 Pipe Joint Compound. Screw joints shall be made up tight with approved pipe joint compound, insoluble in liquefied petroleum gas, and shall be applied to the male threads only.

5.1.8 Concealed Tubing. Tubing shall not be run inside walls, floors, or partitions. Where tubing passes through walls, floors,

TABLE 4

Sizing Gas Piping Systems

or partitions, or similar installations, such tubing shall be protected by the use of grommets that shall snugly fit both the tubing and the hole through which the tubing passes.

5.1.9 Concealed Joints. No piping or tubing joints shall be located in any floor, wall, partition, or similar concealed construction space.

5.1.10 Location of Gas Supply Connection

5.1.10.1 For LP-Gas-only systems the supply connection shall be located at the hitch, container recess, or in the rear third of the total length of the mobile home and within 18 inches from the left (road) side wall.

190,000 Btu/hr	½	
390,000 Btu/hr	¾	

or partitions, or similar installations, such tubing shall be protected by the use of grommets that shall snugly fit both the tubing and the hole through which the tubing passes.

5.1.9 Concealed Joints. No piping or tubing joints shall be located in any floor, wall, partition, or similar concealed construction space.

5.1.10 Location of Gas Supply Connection

5.1.10.1 For LP-Gas-only systems the supply connection shall be located at the hitch, container recess, or in the rear third of the total length of the mobile home and within 18 inches from the left (road) side wall.

5.1.10.2 For combination LP-Gas and natural gas systems, the natural gas supply connection shall be located under the rear third of the total length of the mobile home and within 18 inches from the left (road) side wall. An additional connection may also be located at th hitch. The system shall be sized to provide adequate capacity from either supply connection for natural gas.

5.1.11 **Identification of Gas Supply Connections.** A 3 by 1¾ inch, etched, stamped, or embossed metal tag, not less than 0.020 inch in thickness, of brass, stainless steel, anodized aluminum, or alclad aluminum shall be permanently attached on the outside of the exterior wall of the mobile home, as close as possible to each gas supply connection or to the end of the pipe. Each tag shall be legibly inscribed with the information shown in the box o this page or at the top of the next depending on the gas system used.

LP-Gas System

This gas piping system is designed for use of liquefied petroleum gas only.

DO NOT CONNECT NATURAL GAS TO THIS SYSTEM.

CONTAINER SHUTOFF VALVES SHALL BE CLOSED DURING TRANSIT.

Before turning on gas, make certain all gas connections have been made tight, all appliance valves are turned off, and any unconnected outlets are capped.

After turning on gas, test gas piping and appliance for leakage with soapy water, and light all pilots.

5.1.12 **Gas Supply Connectors**

5.1.12.1 **Natural Gas.** A listed minimum ½ inch nominal (ID) gas supply connector, with ¾ inch NPT terminal fittings, six feet in length, shall be supplied by the manufacturer when the fuel gas piping system is designed for the use of natural gas.

5.1.12.2 **LP-Gas.** A listed LP-Gas flexible connector shall be supplied when the fuel gas piping system is designed for the use of LP-Gas and cylinder(s) and regulator(s) are supplied.

5.1.13 **Appliance Connections.** All gas-burning appliances shall be connected to the fuel piping with materials as provided in 5.1.2

Combination LP-Gas and Natural Gas System

This gas piping system is designed for use of either liquefied petroleum gas or natural gas.

NOTICE: BEFORE TURNING ON GAS BE CERTAIN APPLIANCES ARE DESIGNED FOR THE GAS CONNECTED AND ARE EQUIPPED WITH CORRECT ORIFICES. SECURELY CAP THIS INLET WHEN NOT CONNECTED FOR USE.

Before turning on gas, make certain all gas connections have been made tight, all appliance valves are turned off and any unconnected outlets are capped.

After turning on gas, test gas piping and appliances for leakage with soapy water, and light all pilots.

of this Part or with listed appliance connectors of semirigid tubing. Listed appliance connectors when used shall not run through walls, floors, or partitions. Listed appliance connectors of aluminum shall not be used externally.

5.1.14 Valves. Shutoff valves and appurtenances used in connection with gas piping shall be of a type designed and approved for use on LP-Gas.

5.1.15 Gas Inlet Cap. On gas supply systems provided with more than one connection, a suitable cap to effectively close the gas inlet not in use shall be securely attached to the mobile home.

5.1.16 Electric Ground. Gas piping shall not be used for an electrical ground.

5.1.17 Couplings. Where it is necessary to join sections of screw piping, right and left nipples and couplings shall not be used. Ground joint unions may be installed at appliance inlet connections.

5.1.18 Hangers and Supports. All gas piping shall be adequately supported by galvanized or equivalently protected metal straps or hangers at intervals of not more than 4 feet, except where adequate support and protection is provided by structural members. Solid-iron-pipe gas supply connection(s) shall be rigidly anchored to a structural member within 6 inches of the supply connection(s).

5.1.19 Testing for Leakage.

5.1.19.1 Before Appliances are Connected. Piping systems shall stand a pressure of at least six inches mercury or three pounds gage for a period of not less than ten minutes without showing any drop in pressure. Pressure shall be measured with a mercury manometer or slope gage, or an equivalent device calibrated so as to be read in increments of not greater than one-tenth pound. The source of pressure shall be isolated before the pressure tests are made.

NOTE: Before a test is begun, the temperature of the air and of the piping should be the same, and constant air temperature should be maintained throughout the test.

5.1.19.2 When appliances are connected to the piping system the entire system shall be pressurized to not less than 10 inches nor more than 14 inches water column and the appliance connections tested for leakage with soapy water.

5.2 Oil Piping Systems

5.2.1 General. The requirements of this Section shall govern the installation of all liquid fuel piping attached to any mobile home. None of the requirements listed in this Section shall apply to the piping in the appliance(s).

5.2.2 Materials. All materials used for the installation, extension, alteration, or repair of any oil piping system shall be new and free from defects or internal obstructions. The system shall be made of materials having a melting point of not less than 1,450°F, except as provided in 5.2.4. They may consist of one or more of the following materials:

5.2.2.1 Pipe shall be steel or wrought-iron pipe complying with USA Standard Wrought-Steel or Wrought-Iron Pipe, B36.10-1959. Threaded copper or brass pipe in iron pipe sizes may be used.

5.2.2.2 Fittings for oil piping shall be wrought iron, malleable iron, steel, or brass (containing not more than 75 percent copper).

5.2.2.3 Copper tubing shall be annealed type, grade K or L conforming to the Specifications for Seamless Copper Water Tube (ASTM B88-66), or shall comply with the specifications for Seamless Copper Tube for Refrigeration Field Service, ASTM B280-66.

5.2.2.4 Steel tubing shall be externally corrosion protected and shall have a minimum wall thickness of 0.049 inch.

5.2.3 Size of Oil Piping. The minimum size of all fuel oil tank piping connecting outside tanks to the appliance shall be no smaller than ⅜ inch od copper tubing or ¼ inch IPS. In those cases where No. 1 fuel oil is used with a listed automatic pump (fuel lifter), ¼ inch od copper tubing may be used if specified by the pump manufacturer.

5.2.4 Joints for Oil Piping. All pipe joints in the piping system, unless welded or brazed, shall be screw joints which comply with USA Standard Pipe Threads (Except Dryseal), B2.1-1960. The material used for welding or brazing pipe connections shall have a melting temperature in excess of 1,000°F.

5.2.5 Joints for Tubing. Joints on tubing shall be made with either a single or double flare of the proper degree, as recommended by the tubing manufacturer, by means of approved tubing fittings. Joints may be brazed with materials having a melting point in excess of 1,000°F.

5.2.6 Pipe Joint Compound. Screw joints shall be made up tight with approved pipe joint compound which shall be applied to the male threads only.

5.2.7 Couplings. Where it is necessary to join sections of screw piping, right and left nipples and couplings shall not be used. Ground joint unions may be installed at appliance inlet connections.

5.2.8 Grade of Piping. Fuel oil piping installed in conjunction with gravity feed systems to oil heating equipment shall slope in a gradual rise upward from a central location to both the oil tank and the appliance in order to eliminate air locks.

5.2.9 Strap Hangers. All oil piping shall be adequately supported by galvanized or equivalently protected metal straps or hangers at intervals of not more than 4 feet, except where adequate support and protection is provided by structural members. Solid-iron-pipe oil supply connection(s) shall be rigidly anchored to a structural member within 6 inches of the supply connection(s).

5.2.10 Testing for Leakage. Before setting the system in operation, tank installations and piping shall be checked for oil leaks with fuel oil of the same grade that will be burned in the appliance. No other material shall be used for testing fuel oil tanks and piping. Tanks shall be filled to maximum capacity for the final check for oil leakage.

6. Heat-Producing Appliances

6.1 Every heat producing appliance used in mobile homes shall be listed or certified by an approved testing agency for this application.

6.2 **Fuel Conversion.** No fuel-burning appliance shall be converted from one fuel to another unless converted in accordance with the terms of its listing.

6.3 Venting

6.3.1 Fuel-burning heating appliances, except listed ranges, ovens, and illuminating appliances not required to be vented, shall be of the vented type and vented to the outside. In no case shall the vent of a gas-burning appliance terminate underneath the mobile home.

6.3.2 Fuel-burning heat producing appliances, except ranges and illuminating appliances, shall be designed or installed to provide for a complete separation of the combustion system from the atmosphere of the mobile home. Combustion air inlets and flue gas outlets shall be listed or certified as components of the appliance.

NOTE: For liquefied petroleum gas appliances, see Division VI, Section 6.11 of the Standard for the Storage and Handling of Liquefied Petroleum Gases, USAS Z106.1-1967, NFPA No. 58-1967.

6.3.3 Vents, roof jacks, and special fittings supplied as component parts of an appliance shall be installed in conformity with the terms of their listing. A single wall metal vent shall not be used unless it is a component part of a listed appliance.

6.3.4 Every joint of any vent or vent connector shall be secure, rigid, tight, and of approved design and workmanship.

6.3.5 The area in which cooking appliances are located shall be ventilated by a metal duct which may be single wall, not less than 12.5 square inches in cross sectional area (minimum dimension shall be two inches), located above the appliance(s), or by mechanical ventilating equipment that is installed in accordance with the requirements of the testing agency and the manufacturer's instructions. Gravity or mechanical ventilation shall be installed within a horizontal distance of not more than ten feet from the vertical front of the appliance(s). Metal hoods incorporating ducts shall be designed so that the duct outlet is located at such a point

as to preclude the trapping of products of combustion. All ducts shall extend through the wall or roof to the outer air.

6.4 **Installation.** The installation of each heat-producing appliance shall conform to the terms of its listing as specified on the appliance and in the manufacturer's instructions. The installer shall leave the manufacturer's instructions attached to the appliance. Every appliance shall be secured in place to avoid displacement and movement from vibration and road shock.

6.5 **Instructions.** Operating instructions shall be provided with the appliance.

6.6 **Marking**

6.6.1 Information on clearances, input ratings, lighting and shutdown shall be attached to the appliances with the same permanence as the nameplate, and so located that it is easily readable when the appliance is properly installed.

6.6.2 Each fuel burning appliance shall bear permanent marking designating the type(s) of fuel for which it is listed.

6.7 **Accessibility.** Every appliance shall be accessible for inspection, service, repair, and replacement without removing permanent construction. Sufficient room shall be available to enable the operator to observe the burner, control, and ignition means while starting the appliance.

6.8 **Location.** Heat-producing appliances shall be so located that no doors, drapes, or other such material can be placed or swung closer to the front of the appliance than the clearances specified on the labelled appliances.

6.9 **Clearances.** Clearances between heat-producing appliances and adjacent surfaces shall not be less than specified in the terms of their listing. Clearance spaces shall be framed in or guarded to prevent creation of storage space within the clearance specified.

6.10 Air Ducts

6.10.1 **Material.** Supply ducts shall be made from galvanized steel, tin-plated steel, or aluminum, or shall be listed Class I air ducts. A duct system integral with the structure may be acceptable if it is of durable construction that can be demonstrated to be equally resistent to fire and deterioration. Ducts constructed from sheet metal shall be in accordance with Table 5. Portions of return ducts directly above the heating surface of the appliance, or closer than 2 feet horizontally from the outer jacket or casing of

the appliance, shall be constructed in accordance with the requirements of Table 5 or shall be listed Class I air ducts.

TABLE 5
Minimum Metal Thickness for Ducts*

Duct Type	Diameter 14 inches or less	or	Width over 14 inches
Round	0.013 in.		0.016 in.
Enclosed Rectangular	0.013 in.		0.016 in.
Exposed Rectangular	0.016 in.		0.019 in.

*When 'nominal' thicknesses are specified, 0.003 inch shall be added to these 'minimum' metal thicknesses.

6.10.2 Sizing of Ducts. Ducts shall be designed so that when a labeled forced-air furnace is installed and operated continually at its normal input rating in the mobile home, with all registers in full open position, the static pressure measured in the duct plenum shall not exceed that shown in Table 6 or exceed that shown on the label of the appliance. When an air-cooler coil is installed in the system, the total static pressure of the coil and the system shall not exceed that shown on the label of the appliance. The minimum dimension of any branch duct shall be at least 1½ inches, and of any main duct, 2½ inches.

6.10.3 Joints and Seams. Joints and seams of ducts shall be securely fastened and made substantially airtight. Slip joints shall have a lap of at least 1 inch and shall be individually fastened.

TABLE 6
Maximum Allowable Static Pressures in Supply Duct Systems

Input to Forced Air Furnace, Btu/hr	External Static Pressure, Inches Water Column, Temperature of Outlet Air Determined by Function of Limit Control	
	Above 165°F	165°F or Less
55,000 and under	0.10	0.20
Over 55,000 to 80,000	0.12	0.24
Over 80,000 to 100,000	0.15	0.30

Tape or caulking compound may be used for sealing mechanically secure joints. Where used, tape or caulking compound shall not be subject to deterioration under long exposures to temperatures up to 200°F and to conditions of high humidity, excessive moisture, or mildew.

6.10.4 Airtightness of Supply Duct Systems. A supply duct system shall be considered substantially airtight when the static pressure in the duct system, with all registers sealed and with the furnace air circulator at high speed, is at least 80 percent of the static pressure measured in the furnace casing, with its outlets sealed and the furnace air circulator operating at high speed. For the purpose of this paragraph and 6.10.2, pressures shall be measured with a water manometer or equivalent device calibrated to read in increments not greater than 1/10 inch water column.

6.10.5 Supports. Ducts shall be securely supported.

6.11 Circulating Air

6.11.1 Return Air Openings. Provisions shall be made to permit the return of circulating air from all rooms and living spaces, except toilet room(s), to the circulating air supply inlet of the furnace.

6.11.2 Return Air Ducts. The cross-sectional areas of the return air duct shall not be less than 2 square inches for each 1,000 Btu per hour input rating of the appliance. No damper shall be placed in any return air duct, except that a diverting damper may be placed in a combination fresh air intake and return air duct so arranged that for all possible positions of the damper the required cross-sectional area will not be reduced.

6.11.3 Permanent Unclosable Openings. Living space not served by return air ducts and closed off from the return opening of the furnace by doors, sliding partitions, or other means shall be provided with permanent unclosable openings in the doors or separating partitions to allow circulated air to return to the furnace. Such openings may be grilled or louvered. The net free area of each opening shall be not less than 1 square inch for every 5 square feet of total living space closed off from the furnace by the door or partition serviced by that opening. Undercutting doors connecting the closed-off space may be used as a means of providing return air area. However, in the event that doors are undercut, they shall be undercut a minimum of 2 inches and no more than 2½ inches, and no more than one half of the free air area so provided shall be counted as return air area.

APPENDIX TO PART III

Applicable Standards

Standards for Air Conditioning and Heat-Producing Appliances and Equipment*

Part IV

Electrical Systems

1. Introduction

1.1 Much of the material in Part IV has been taken from, or is based on, the National Electrical Code (USAS C1-1968, NFPA No. 70 — 1968).

2. Scope

2.1 Part IV of this standard covers the electric conductors and equipment installed within or on mobile homes and also the conductors that connect them to a supply of electricity.

2.2 This standard is not intended as a design specification or an instruction manual for untrained persons.

2.3 The National Electrical Code (USAS C1-1968) will prevail except as otherwise permitted or required in Part IV of the Standard.

2.4 The provisions of this Standard are not intended to prevent the use of any material, appliance, installation, device, arrangement, or method of construction not specifically prescribed herein, provided any such alternative has been approved or listed. An enforcement agency may approve any such alternative if it finds the proposed design is satisfactory for the purpose intended, and if the material, appliance, installation, device, arrangement, and method or work offered is, for the purpose intended, at least the equivalent performance of that prescribed in this standard considering quality, strength, effectiveness, durability, safety, and protection of life and health. An enforcement authority shall require that satisfactory evidence or proof be submitted to substantiate any claims that may be made regarding the use of any such alternative.

3. Definitions

Accessible (as Applied to Wiring Methods). Not permanently closed-in by the structure or finish of the mobile home; capable of being removed without disturbing the mobile home structure or finish. (See "Concealed" and "Exposed.")

Accessible (as Applied to Equipment). Admitting close approach because not guarded by locked doors, elevation, or other effective means. (See "Readily Accessible.")

Air Conditioning or Comfort Cooling Equipment. All of that equipment intended or installed for the purpose of processing the treatment of air so as to control simultaneously its temperature, humidity, cleanliness, and distribution to meet the requirements of the conditioned space.

Appliance. Utilization equipment, generally other than industrial, normally built in standardized sizes or types, which is installed or connected as a unit to perform one or more functions, such as clothes washing, air conditioning, food mixing, deep frying, etc.

Appliance, Fixed. An appliance fastened or otherwise secured at a specific location.

Appliance, Portable. An appliance that is actually moved or can easily be moved from one place to another in normal use.

NOTE: For the purpose of this standard, the following major appliances are considered portable: Refrigerators, clothes washers, dishwashers without booster heaters, or other similar appliances.

Appliance, Stationary. An appliance that cannot be easily moved from one place to another in normal use.

Approved. The word "approved" as used in this standard means acceptable to the authority having jurisdiction.

Attachment Plug (Plug Cap) (Cap). A device that, by insertion in a receptacle, establishes connection between the conductors of the attached flexible cord and the conductors connected permanently to the receptacle.

Branch Circuit. That portion of a wiring system extending beyond the final overcurrent device protecting the circuit.

NOTE: A device not approved for branch circuit protection, such as a thermal cutout or motor overload protective device, is not considered as the overcurrent device protecting the circuit.

Branch Circuit—Appliance. A circuit supplying energy to one or more outlets to which appliances are to be connected and which has no permanently connected lighting fixtures not a part of an appliance.

Branch Circuit—General Purpose. A branch circuit that supplies a number of outlets for lighting and appliances.

Branch Circuit—Individual. A branch circuit that supplies only one utilization equipment.

Cabinet. An enclosure designed either for surface or flush mounting, and provided with a frame, mat, or trim in which swinging doors are hung.

Circuit Breaker. A device designed to open and close a circuit by nonautomatic means, and to open the circuit automatically on a predetermined overload of current, without injury to itself when properly applied within its rating.

Concealed. Rendered inaccessible by the structure or finish of the mobile home. Wires in concealed raceways are considered concealed, even though they may become accessible by withdrawing them.

Connector, Pressure (Solderless). A pressure wire connector is a device that establishes the connection between two or more conductors or between one or more conductors and a terminal by means of mechanical pressure and without the use of solder.

Dead Front (As Applied to Switches, Circuit-Breakers, Switchboards, and Distribution Panel). So designed, constructed, and installed that no current-carrying parts are normally exposed on the front.

Demand Factor. The ratio of the maximum demand of the system, or part of a system, to the total connected load of the system or of the part of the system under consideration.

Device. A unit of an electrical system that is intended to carry but not utilize electrical energy.

Disconnecting Means. A device, or group of devices, or other means whereby the conductors of a circuit can be disconnected from their source of supply.

Distribution Panel. A single panel or a group of panel units designed for assembly in the form of a single panel, including buses, and with or without switches or automatic overcurrent protective devices or both, for the control of light, heat, or power circuits of small individual as well as aggregate capacity; designed to be placed in a cabinet placed in or against a wall or partition and accessible only from the front.

Enclosed. Surrounded by a case that will prevent a person from accidentally contacting live parts.

Equipment. A general term, including material, fittings, devices, appliances, fixtures, apparatus, and the like, used as a part of, or in connection with, an electrical installation.

Exposed (as Applied to Live Parts). A live part that can be inadvertently touched or approached nearer than a safe distance. It is applied to parts not suitably guarded, isolated, or insulated. (See "Accessible" and "Concealed.")

Exposed (as Applied to Wiring Method). Not concealed.

Externally Operable (As Applied to Equipment That Is Enclosed in a Case or Cabinet). Capable of being operated without exposing the operator to contact with live parts.

Fitting. An accessory, such as a locknut, bushing, or other part of a wiring system, that is intended primarily to perform a mechanical rather than an electrical function.

Ground. A conducting connection, whether intentional or accidental, between an electrical circuit or equipment and earth, or to some conducting body that serves in place of the earth.

Grounded. Connected to earth or to some conducting body that serves in place of the earth.

Grounded Conductor. A conductor that is intentionally grounded, either solidly or through a current-limiting device.

Grounding Conductor. A conductor used to connect an equipment, device, or wiring system with a grounding electrode.

Guarded. Covered, shielded, fenced, enclosed, or otherwise protected, by means of suitable covers or casings, barriers, rails or screens, mats or platforms, to eliminate the liability of contact or approach of persons or objects to a point of danger.

Identified Ground. The conductor or terminal to which it refers is to be recognized as grounded.

Isolated. Not readily accessible to persons unless special means for access are used.

Labeled. Equipment or materials to which has been attached a label of a nationally recognized testing laboratory that maintains periodic inspection of production of labeled equipment or materials and by whose labeling is indicated compliance with nationally recognized standards or the conduct of tests to determine suitable usage in a specified manner.

Lighting Outlet. An outlet intended for the direct connection of a lamp holder, a lighting fixture, or a pendant cord terminating in a lamp holder.

Listed. Equipment or materials included in a list published by a nationally recognized testing laboratory that maintains periodic inspection of production of listed equipment or materials and whose listing states either that the equipment or material meets nationally recognized standards or has been tested and found suitable for use in a specified manner.

Mobile Home. A vehicular, portable structure built on a chassis and designed to be used without a permanent foundation* as a dwelling when connected to indicated utilities.

Outlet. A point on the wiring system at which current is available to supply utilization equipment.

Power Supply Assembly. The conductors, including the grounding conductors, insulated from one another, the connectors, attachment plug caps, and all other fittings, grommets, or devices installed for the purpose of delivering energy from the service equipment to the distribution panel within the mobile home.

Raceway. Any channel for holding wires, cables, or bus bars that is designed expressly for, and used solely for, this purpose. Raceways may be of metal or insulating material and the term includes rigid metal conduit, flexible metal conduit, electrical metallic tubing, underfloor raceways, cellular metal floor raceways, surface metal raceways, wireways and busways, and rigid nonmetallic conduit.

Raintight. So constructed or protected that exposure to a beating rain will not result in the entrance of water.

Readily Accessible. Capable of being reached quickly for operation, renewal, or inspection, without requiring those to whom ready access is requisite to climb over or remove obstacles or to resort to portable ladders, chairs, etc. (See "Accessible.")

Receptacle (Convenience) Outlet. A receptacle is a contact device installed at an outlet for the connection of an attachment plug and flexible cord.

Service Equipment. The necessary equipment, usually consisting of circuit breaker or switch and fuses and their accessories located near the point of entrance of supply conductors in a mobile home and intended to constitute the main control and means of cutoff for the supply to that mobile home.

*The phrase "without a permanent foundation" indicates that the support system is constructed with the intent that the mobile home placed thereon will be moved from time to time at the convenience of the owner.

Utilization Equipment. Equipment that utilizes electric energy for mechanical, chemical, heating, lighting, or similar useful purposes.

Voltage (of a Circuit). The greatest effective difference of potential between any two conductors of the circuit concerned.

Weatherproof. So constructed or protected that exposure to the weather will not interfere with its successful operation.

4. General Requirements

4.1 The following requirements apply to mobile homes intended for connection to a wiring system nominally rated 115/230 volts, 3-wire, AC with grounded neutral.

4.2 Mobile homes shall be provided with a power supply in accordance with Section 10 of this Part.

4.3 Mobile homes shall be provided with disconnecting means and branch circuit protective equipment installed in accordance with Section 9 of this Part.

4.4 A mobile home not intended as a dwelling unit, as for example, equipped for sleeping purposes only, contractor's on-site offices, construction job dormitories, mobile studio dressing rooms, banks, clinics, mobile stores, or intended for the display or demonstration of merchandise or machinery, shall not be required to meet the provisions of this Article pertaining to the number or capacity of circuits required. It shall, however, meet all other applicable requirements of this Part if provided with an electrical installation intended to be energized from a 115 volt or 115/230 volt AC power supply system.

5. Materials and Equipment

5.1 Electrical materials, devices, appliances, fittings, and other equipment installed, intended for use in, or attached to, the mobile home shall be listed by a nationally recognized testing agency.

6. Receptacle Outlets Required

6.1 Except in the bath and hall areas, receptacle outlets shall be installed at wall spaces 2 feet wide or more, so that no point along the floor line is more than 6 feet, measured horizontally, from an outlet in that space. Except as explained in the following, receptacle outlets are not required for wall spaces occupied by

for other than motor loads or 80 percent of the branch-circuit rating for air conditioning or other motor loads;

(c) The rating of a single portable appliance on a circuit having no other outlets shall not exceed 80 percent of the circuit rating;

(d) The rating of range branch circuit shall be based on the range demand as specified for ranges in Section 8 of this Part.

(e) Where laundry facilities are provided, in a mobile home, a 20 ampere branch circuit shall be provided with a 20 ampere outlet within six feet of the intended location of the appliance.

8. Calculations for Lighting and Appliance Load

8.1 The following method is to be employed in computing the supply cord and distribution panel load for each power supply assembly for each mobile home;

A. Lighting Watts: Length times width of mobile home (outside dimensions, exclusive of hitch) times 3 watts per square foot; e.g., Length × width × 3 = ... lighting watts.

B. Small Appliance Watts: Number of circuits times 1,500 watts for each 20-ampere appliance receptacle circuit (see definition of Appliance, Portable with note); e.g.,
Number of circuits × 1,500 = ... small appliance watts.

C. Total Watts: Lighting watts plus small appliance = ... total watts.

First 3,000 total watts at 100 percent plus remainder at 35 percent = ... watts to be divided by 230 volts to obtain current (amperes) per leg.

D. Total load for determining power supply is the summation of:

(1) Lighting and small appliance load as calculated in and B.

(2) Name plate amperes for motors and heater loads (exhaust fans, air conditioners,* electric, gas, or oil heating).**

(3) Add 25% of current of largest motor in (2).

(4) Total of nameplate amperes for: Disposal, Dishwasher, Water heater, Clothes dryer, Wall-mounted oven, Cooking units.

*Omit smaller of these two, except include blower motor if used as air conditioner evaporator motor.

**When an air conditioner is not installed and a 40-ampere power supply cord is provided, allow 15 amperes per leg for air conditioning.

Where number of these appliances exceeds three use 75% of total.

(5) Derive amperes for free standing range (as distinguished from separate ovens and cooking units) by dividing values below by 230 volts.

Name Plate Rating	Use
10,000 w × or less	80 percent of rating
10,001-12,500 w	8,000 w
12,501-13,500 w	8,400 w
13,501-14,500 w	8,800 w
14,501-15,500 w	9,200 w
15,501-16,500 w	9,600 w
16,501-17,500 w	10,000 w

(6) If outlets or circuits are provided for other than factory installed appliances include the anticipated load.

NOTE: The following example is given to illustrate the application of this Method of Calculation:

Example

A mobile home is 70 × 10 feet and has two portable appliance circuits, a 1000 watt 230 volt heater, a 200 watt 115 volt exhaust fan, a 400 watt 115 volt dishwasher and a 7000 watt electric range.

Lighting and small appliance load

Lighting 70 × 10 × 3 =	2100 watts	
Small appliance 1500 × 2 =	3000 watts	
	5100 watts	
1st 3000 watts at 100%		3000
Remainder (5,100 − 3,000 = 2,100) at 35%		735
		3735

$\frac{3735}{230}$ = 16 amperes per leg

1000 watt (heater) ÷ 230 =	4.4 amp
200 watt (fan) ÷ 115 =	1.7 amp
400 watt (dishwasher) ÷ 115 =	3.5 amp
7000 watt (range) × .8 ÷ 230 =	24. amp

	Amperes per leg	
	A	*B*
Lighting and appliances	16	16
Heater (230 volt)	4	4
Fan (115 volt)	2	—
Dishwasher (115 volt)	—	4
Range	24	24
Totals	46	48

Based on the higher current calculated for either leg, use one 50 ampere supply cord.

9. Disconnecting Means and Branch Circuit Protective Equipment

9.1 Mobile homes shall contain a distribution panel having a main overcurrent protective device rated not in excess of the current carrying capacity of the power supply assembly, installed with supply cord and branch circuits wired at the factory.

9.2 The distribution panel shall be installed in a readily accessible location near the point of entrance of the supply cord.

9.3 The distribution panel may be located with its front just inside a closet door, or it may be located in a closet above any shelf or floor if the location is such that a clear space of 6 inches is maintained in front of the distribution panel. However, working space shall be provided as required by the National Electrical Code (USAS C1-1968, NFPA No. 70-1968).

9.4 An appropriately rated service equipment panel or an enclosed panel board or an enclosed panel base assembly, approved and marked, "SUITABLE FOR USE AS SERVICE EQUIPMENT," shall be used. The distribution panel shall be of the insulated neutral type, with a grounding bar bonded to the metal frame of the panel or other approved grounding means.

9.5 A distribution panel main circuit-breaker shall be rated 50 amperes and employ a 2-pole circuit breaker rated 40 amperes for a 40-ampere supply cord, or 50 amperes for a 50-ampere supply cord. A distribution panel employing a disconnect switch and fuses shall be rated 60 amperes and shall employ a single 2-pole, 60-ampere fuseholder with 40- or 50-ampere main fuses for 40- or 50-ampere supply cords, respectively. The outside of the distribution panel shall be plainly marked with the fuse size. The main circuit breakers or fuses shall be plainly marked "Main."

9.6 Plug fuses and fuseholders shall be tamper-resistant, Type "S," enclosed in dead-front fuse panels.

9.7 The provisions of Article 210, of the National Electrical Code (USAS C1-1968) shall apply to branch circuits supplying lighting or appliance loads or combinations of such loads. Where motors or motor operated appliances are connected to any circuit supplying lighting or other appliance loads, the provisions of both Article 210 and Article 430 of the National Electrical Code shall apply. Article 430 of the National Electrical Code shall apply where branch circuit supplies only motor loads.

for use with a receptacle rated 50 amperes, 125/250 volts. It shall be molded of butyl rubber, neoprene, or other approved materials which have been found suitable for the purpose, and shall be molded to the flexible cord so that it adheres tightly to the cord at the point where the cord enters the attachment-plug cap. If a right-angle cap is used, the configuration shall be so oriented that the grounding member is farthest from the cord.

*10.7 The over-all length of the power-supply assembly, measured from the end of the cord, including bared leads, to the face of the attachment-plug cap shall be no less than 21 feet and shall not exceed 26½ feet. The length of the cord from the face of the attachment-plug cap to the point where the outer jacket of the cord is removed shall be at least 20½ feet.

10.8 The power-supply cord shall bear the following marking on the manufacturer's portion of the combination label: "For use with mobile homes — 40 amperes" or "For use with mobile homes — 50 amperes."

NOTE: The "For use with mobile homes — 40 ampere" power-supply assembly is for mobile homes that are factory-equipped with gas or oil-fired heating and cooking appliances.

10.9 The point of entrance of the power-supply assembly to the mobile home shall be in the exterior wall, floor, or roof, in the rear third section (away from the hitch) of the mobile home.

*10.10 Where a separately metered appliance is installed in the mobile home, or where the calculated load of the mobile home is between 50 amperes and 100 amperes, a second 50-ampere power-supply assembly may be installed, or a service as provided for in 10.1 and 10.11. The point of entrance of this second power-supply assembly shall be located not more than 12 inches away from the point of entrance of the main power-supply assembly. They shall not be interconnected on either the line side or the load side, except that the grounding circuits and grounding means shall be electrically interconnected.

*10.11 Where the calculated load exceeds 100 amperes or where a permanent feeder is used, the supply shall be by means of:

(a) one mast weatherhead installation installed in accordance with the National Electrical Code (USAS C1-1968), and containing four continuous insulated color-coded feeder conductors, one of which shall be a grounding conductor; or,

*See Tentative Interim Amendment No. 1-1968, page A119.1-106.

(b) an approved metal raceway from the disconnecting means to the underside of the mobile home with provisions for the attachment of a suitable junction box or fitting to the raceway on the underside of the mobile home [with or without conductors as in 10.11 (a)].

11. Wiring Methods

11.1 Electrical metallic tubing, flexible metallic conduit, armored cable, and nonmetallic sheathed cable, with grounding conductor shall terminate by means of fittings, clamps, or connectors approved for the purpose.

11.2 Rigid metal conduit shall be provided with a locknut inside and outside the box, and a conduit bushing shall be used on the inside. Inside ends of the conduit shall be reamed.

11.3 Nonmetallic outlet boxes are acceptable only with nonmetallic sheathed cable.

11.4 Outlet boxes shall fit closely to openings in combustible walls and ceilings; and they shall be flush with such surfaces.

11.5 Boxes, fittings and cabinets shall be securely fastened in place.

Exception: Snap-in type boxes or boxes provided with special wall or ceiling brackets that securely fasten boxes in walls or ceilings may be used.

11.6 The sheath or armor shall be continuous between outlet boxes and other enclosures.

11.7 Metal-clad and nonmetallic cables may be passed through the centers of the wide side of 2 by 4 studs. However, they shall be protected where they pass through 2 by 2 studs or at other studs or frames where the cable or armor would be less than 1½ inches from the inside or outside surface. Steel plates on each side of the cable, or a tube, with not less than No. 16 manufacturer's standard gage wall thickness, are required to protect the cable. These plates or tubes shall be securely held in place.

Exception: Wires may be run without steel protectors through notched wall studs when the notch is on the inside (room side) of the stud, and the inside wall material is applied prior to the installation of the wiring. This exception is applicable only if there is sufficient wall stud depth

ducting faceplates (metal faceplates screws may be used with nonconducting faceplates without being grounded), or (b) grounded.

13.2 Metallic faceplates shall be of ferrous metal not less than 0.030 inch in thickness or of nonferrous metal not less than 0.040 inch in thickness.

13.3 Faceplates of insulating material shall be listed by a nationally recognized testing laboratory.

13.4 Where metallic faceplates are used they shall be effectively grounded.

14. Conductors in Outlet Boxes

14.1 Each wire in an outlet box should be spaced as indicated below. Grounding wires, fixtures splicing wires, and conductors that do not leave the box are not counted.

No. 14 AWG — 2 cu in. per wire
No. 12 AWG — 2.25 cu in. per wire
No. 10 AWG — 2.50 cu in. per wire
No. 8 AWG — 3.0 cu in. per wire

NOTE: Where there is not sufficient space for a deeper box, four No. 14 AWG conductors may enter a box with or without cable clamps and containing one or more devices on a single mounting strap.

14.2 Wiring leads in the outlet boxes shall extend at least 4 inches from the wall surface.

15. Painting of Wiring

15.1 During painting or staining of the mobile home, it is acceptable to paint metal raceways (except where grounding continuity would be reduced) or the sheath of the nonmetallic cable. Some arrangement, however, must be made so that no paint is applied to the individual wires, as the color coding may be obliterated by the paint.

16. Polarization

16.1 The identified (white) conductor shall be employed for grounded circuit conductors only and shall be connected to the identified (white) terminal or lead on receptacle outlets and fixtures. It shall be the unswitched wire in switched circuits, except that a cable containing an identified conductor (white) may be used for single-pole three-way or four-way switch loops where

the connections are made so that the *unidentified* conductor is the return conductor from the switch to the outlet. Painting of the terminal end of the wire is not required.

16.2 If the identified (white) conductor of a cable is used for other than grounded conductors or for other than switch loops as explained above (for a 230-volt circuit, for example), the conductor shall be finished in a color other than white at each outlet where the conductors are visible and accessible.

16.3 Green-colored wires or green with yellow stripe shall be used for grounding conductors only.

17. Connection to Terminals and Splices

17.1 Connection of conductors to terminal parts shall ensure a thoroughly good connection without damaging the conductors and shall be made by means of pressure connectors (including set screw type), solder lugs, or splices to flexible leads. No. 8 or smaller solid conductors and No. 10 or smaller stranded conductors may be connected by means of clamps or screws with terminal plates having upturned lugs, or by means of approved screwless terminals. Terminals for more than one conductor shall be of a type approved for the purpose.

17.2 Conductors shall be spliced or joined with splicing devices approved for the use or by brazing, welding or soldering with a fusible metal or alloy. Soldered splices shall first be so spliced or joined as to be mechanically and electrically secure without solder and then soldered. All splices and joints and the free ends of conductors shall be covered with an insulation equivalent to that of the conductors.

17.3 If splices of the grounding wire in nonmetallic sheathed cable are made in outlet boxes, the splice should be insulated to prevent contact with terminals.

18. Wall Switches

18.1 Switche shall be rated as follows:

(a) For lighting circuits, switches shall be rated not less than 10 amperes — 125 volts and in no case less than the connected load.

(b) For motors or other loads, switches shall have ampere or horsepower ratings or both adequate for loads controlled. (An

"ac general use" snap switch may control a motor 2 horsepower or less with full-load current not over 80 percent of the switch ampere rating.)

19. Receptacle Outlets

19.1 Receptacle Outlets. All receptacle outlets:

(a) shall be of grounding type;

(b) shall be installed in accordance with Section 210-7 of the National Electrical Code (USAS C1-1968), and,

(c) except when supplying specific appliances, receptacles shall be parallel blade, 15-ampere, 125-volt, either single or multiple face type.

20. Lighting Fixtures

20.1 General

20.1.1 Any combustible wall or ceiling finish exposed between the edge of a fixture, canopy, or pan and an outlet box shall be covered with noncombustible material.

20.1.2 Listed pendant-type fixtures or pendant cords may be installed in mobile homes.

20.2 Recessed Lighting Fixtures

20.2.1 Conductors having insulation suitable for the temperature encountered shall be used.

20.2.2 Fixtures having branch-circuit terminal connections that operate at temperatures higher than 60 C (140 F) shall have circuit conductors as described in 20.2.3 and 20.2.4.

20.2.3 Branch-circuit conductors having an insulation suitable for the temperature encountered may be run directly to the fixture.

20.2.4 Tap connection conductors having an insulation suitable for the temperature encountered shall be run from the fixture terminal connection to an outlet box placed at least 1 foot from the fixture. Such a tap shall extend for at least 4 feet but not more than 6 feet and shall be in a suitable metal raceway.

20.3 Fluorescent Lighting Fixtures. When fluorescent lamp fixtures require high-temperature wire, the requirements of 20.2 shall apply.

20.4 Shower Fixtures

20.4.1 If a lighting fixture is provided over a bathtub or in a shower stall, it shall be of the approved enclosed and gasketed type.

20.4.2 The switch for shower lighting fixtures and exhaust fans, located over a tub or in a shower stall, shall be located outside the tub or shower space.

21. Wiring of Expandable Units and Dual Units

21.1 Expandable or dual unit mobile homes utilizing permanently installed feeder conductors may use permanent type wiring methods and materials for connecting such units to each other.

21.2 Expandable or dual unit mobile homes not having permanently installed feeder conductors which are to be moved from one location to another, may have disconnecting means with branch circuit protective equipment in each unit when so located that after assembly or joining together of units the requirements of Par. 10.10 will be met.

21.3 Expandable or dual unit mobile homes which are to be moved from one location to another, may be connected together with cord connections using approved raintight power supply connectors or approved power supply connectors installed in protected locations. All cords used shall be approved for extra hard usage in accordance with the National Electrical Code (USAS C1-1968). Cord length shall be kept at a minimum, with outlet boxes on each unit located where circuit conductors terminate; such outlet boxes to be adjacent to each other as near as practical after units are joined together.

22. Outdoor Outlets, Fixtures, Air-Cooling Equipment, Etc.

22.1 Outdoor fixtures and equipments shall be recognized for outdoor use. Outdoor receptacle or convenience outlets shall be of a gasketed-cover type.

22.2 A mobile home provided with a receptacle outlet designed to energize heating and/or air conditioning equipment located outside the mobile home, shall have permanently affixed adjacent to the outlet receptacle, a metal tag which reads:

This Connection is for Air Conditioning Equipment Rated at Not More Than .....Volts A.C., at.....amperes.

The correct voltage and ampere ratings shall be given. The tag shall be not less than 0.020 inch, etched brass, stainless steel, anodized or alclad aluminum. The tag shall not be less than 3 inches by 1¾ inches minimum size.

23. Grounding

23.1 Service Grounding. Service grounding shall be accomplished as follows:

23.1.1 The green-colored grounding wire in the supply cord or permanent feeder wiring shall be connected to the grounding bus in the distribution panel or disconnecting means.

23.1.2 A grounding wire shall be connected between distribution panel grounding terminal and a terminal on the chassis. Grounding terminals shall be of the solderless type and listed as pressure terminal connectors recognized for the wire size employed.

23.1.3 The chassis shall be grounded. The grounding conductor may be solid or stranded, insulated or bare, and shall be an armored grounding conductor or routed in conduit if No. 8 AWG. The conductor, if No. 6 AWG or larger, may be run without metal covering.

23.1.4 The grounding conductor shall be routed so as not to be exposed to damage. Protection can be afforded by the configuration of the chassis.

23.1.5 The distribution panel shall have a grounding bus, or approved grounding means for the various grounding connections.

23.1.6 The grounding bus shall have sufficient terminals for all grounding conductors.

23.2 Insulated Neutral

23.2.1 The grounded circuit conductor (neutral) shall be insulated from the grounding conductors and from equipment enclosures and other grounded parts. The grounded (neutral) circuit terminals in the distribution panel and in ranges, clothes dryers, counter-mounted cooking units, and wall-mounted ovens are to be insulated from the equipment enclosure. Bonding screws, straps, or buses in the distribution panel or in appliances are to be removed and discarded.

23.2.2 Connection of ranges and clothes dryers utilizing a grounded (neutral) conductor shall be made with 4 conductor

vice fed from the box will not interfere with or interrupt the grounding continuity.

23.3.4 Cord-connected appliances, such as washing machines, clothes dryers, refrigerators, and the electrical system of gas ranges, etc., shall be grounded by means of an approved cord with grounding conductor and grounding type plug.

23.4 Grounding of Noncurrent-Carrying Metal Parts

23.4.1 All major exposed metal parts that may become energized, including the water, gas, and waste plumbing, the roof and outer metallic covering, the chassis and metallic circulating air ducts, shall be effectively bonded to the grounding terminal or enclosure of the distribution panel or to the metal chassis. See Paragraph 23.1.2 for bonding of the chassis to the distribution panel grounding terminal.

23.4.2 The metallic roof and exterior covering are considered grounded if:

(a) The metal panels overlap one another and are securely attached to the wood or metal frame parts by metallic fastener, and

(b) The lower panel of the metallic exterior covering is secured by metallic fasteners at each cross member of the chassis, or the lower panel is bonded to the chassis by a metal strap.

23.4.3 The gas, water, and waste pipes are considered grounded if they are bonded to the chassis. If wire is used, grounding clamps, No. 8 AWG, minimum, armored grounding cable, and solderless connectors shall be used. Alternatively, suitable grounding straps may be used.

23.4.4 The furnace and metallic circulating air ducts shall be grounded.

24. Electrical Testing

24.1 Dielectric Strength Test. The wiring of each mobile home shall be subjected to a 1-minute, 900-volt dielectric strength test (with all switches closed) between live parts (including neutrals) and the mobile home ground. Alternatively, the test may be performed at 1,088 volts for 1 second. This test shall be performed after branch circuits are complete and after fixtures or appliances are installed. Listed fixtures and permanently installed appliances shall not be required to withstand the dielectric test.

24.2 Examination of Equipment for Safety. The examination or inspection of equipment for safety, according to the recommendations contained in this standard, should be conducted under uniform conditions and by organizations properly equipped and qualified for experimental testing, inspections of the run of goods at factories, and service-value determinations through field examinations.

25. Electrical Marking

25.1 The main circuit breakers or fuses shall be plainly marked "Main." Marking of branch-circuit breakers or fuses is optional.

25.2 If a fused distribution panel is used, the maximum fuse size for the mains shall be plainly marked as follows, with lettering at least ¼ inch high where visible when fuses are changed: "Maximum Main Fuses 40 (or 50) amp."

25.3 A metal nameplate on the outside adjacent to the supply cord entrance shall read, "This Mobile Home is Wired for 115/230 Volt, 3-Wire, 60 Cycle Supply, Supply Cord 40 (or 50) amp." The voltage marking may read 120/240 Volts instead of 115/230 Volts.

This Mobile Home Is Wired for 115/230
3-Pole, 4-Wire, 60 Cycle Supply.
Supply Cord 40* Amperes

*Or 50.

Tentative Interim Amendment No. 1-1968

Effective Sept. 30, 1968

Standard for Mobile Homes

NFPA No. 501B-1968

USA Standard A119.1-1969

Part IV — Electrical Systems

1. Revise Paragraph 10.7 to insert the 36½-foot *figure for the* 26½-foot *figure to agree with Tentative Interim Amendment No. 148 of the 1968 National Electrical Code, the revised text to read:*

10.7 The overall length of the power-supply assembly, measured from the end of the cord, including bared leads, to the face of the attachment-plug cap shall be no less than 21 feet and shall not exceed 36½ feet. The length of the cord from the face of the attachment-plug cap to the point where the outer jacket of the cord is removed shall be at least 20½ feet.

2. Revise the first and second sentences of Paragraph 10.10 to read:

10.10 Where a separately metered appliance is installed in the mobile home or where the calculated load of the mobile home is between 50 amperes and 150 amperes, up to three 50 ampere power-supply assemblies may be installed or a service as provided for in 10.1 and 10.11. Additional power-supply assemblies shall be located not more than 12 inches away from the point of entrance of the main power-supply assembly.

3. Revise the figure in Paragraph 10.11 (first line) to read "150 amperes" *instead of* "100 amperes."

Judicial Compensation

The problem of obtaining and retaining those who are best qualified for judicial service is inescapably directly affected by the compensation provided for judicial service. Successful lawyers provide the source that must be looked to in obtaining judges. To attract these men to seek judicial office it is necessary to provide an attractive salary and reasonable retirement benefits. Failure to compete in this respect with the marketplace will deprive the judiciary of many whose talents are needed in a time of rapidly increasing complexity of contemporary life and increasing rapidity of social change. Even those states operating under merit plan of judicial selection are hampered in the obtaining of highly qualified judges if the salaries and retirement provisions are inadequate. No matter how inviting the judicial position may otherwise be, failure to provide appropriate and competitive pay demonstrably narrows the class available for judicial office.

The American Judicature Society's biannual publication of Judicial Salaries and Retirement Plans of the fifty states provides an accurate and current source of information, and comparison data on the subject. A careful study of this data indicates that a substantial number of states are not providing adequate salaries and other benefits in the light of present day needs.

The salary and retirement study presented on the following pages does not include direct reference to the substantial increase in cost of living that has occurred and continues to occur. However, all of us are aware of this cost of living increase and what has happened to the value of the dollar. It is generally recognized that salaries that at one time have been considered

attractive may no longer be so thought of in view of the current economics of the marketplace.

The judiciary is one of the three branches of our government. The judges are the judiciary. The cost to the taxpayer of maintaining the judiciary in nearly all, if not in all, of our fifty states is less than three percent of the cost of all three branches of government. The cost of the federal judiciary as noted by Chief Justice Burger in his recent address on the state of the judiciary is less than the cost of one C-5A airplane. Yet the most difficult of our modern day problems as well as extremely heavy and increasing caseloads fall upon the judiciary. In a free society such as ours these social and economic upheavals tend to wind up on the doorstep of the courts. This is not the time to be penurious in an area that can lead to a deterioration of our third branch of government. It is in the public interest to provide judicial compensation and retirement benefits clearly adequate to obtain and retain an outstanding judiciary.

EDITORIAL

Minimum Standards of Judicial Compensation

The American Judicature Society's first comprehensive judicial compensation survey was published in the April, 1945, issue of this Journal, just 25 years ago. Some comparisons between salaries there tabulated and those here listed for 1970 and 1971 are interesting and instructive.

In 1945 salaries of state supreme court justices ranged from $5,000 in Idaho, Kentucky, and Utah to $25,000 in New York. Nine states paid the judges of their highest courts less than $7,000 a year; 21 paid from $7,000 to $9,000; and six paid $9,000 to $10,000; making 36 states paying $10,000 a year, or less.

Trial judges' salaries ranged from as low as $2,000 in some parts of Colorado, and $3,000 in some courts in Kentucky and Ohio, to $25,000 in New York. There were 15 states paying general trial court judges less than $5,000 a year, and a total of 34 paying $7,000 a year or less.

In 1945 federal district judges received $10,000, court of appeals judges $12,000, and United States Supreme Court justices $20,000. The highest judicial salary in the country was the $28,500 paid to the presiding justice of the Appellate Division of the Supreme Court of New York.

These figures are now of only historical interest. In 1945 the Office of Price Administration was fighting wartime inflation and it was considered unpatriotic to raise any price or wage just because others were going up, since that would only add to the inflation spiral. Even then, however, judicial salaries were exempt from OPA controls and it was recognized that the need for quality judicial service justified the massive nationwide program of judicial salary increases detailed in that same issue.

The upward march of prices during the intervening quarter century has necessitated continued pressure to keep judicial salaries in step. There never has been, and never will be, a nation-wide judges' strike like those which from time to time have been staged by automobile, steel, railroad, and other workers. Campaigning for salary increases is embarrassing to judges and inconsistent with judicial dignity, and ought not to be necessary.

In 1961 the American Judicature Society pledged itself to a continuing crusade for adequate judicial compensation of which its regular biennial salary and retirement surveys are a part. The Society's then president, Cecil E. Burney, declared that on the basis of price levels prevailing at that time no judge of a general trial court anywhere in the United States should be paid less than $15,000 a year. Five years later there had been a general increase of 10 per cent in the price index, leading to announcement of a minimum of $16,600 on the same basis. This was upped again to $17,000 in 1968, and now, in 1970, we assert, for the same reasons, that no judge of a general trial court in this country should be paid less than $19,000 a year. We note also that the considerations are not greatly different for the more numerous and very important judges of courts of limited and special jurisdiction.

There have been similar trends with respect to retirement compensation, which was also covered in the 1945 survey and will always be an inseparable part of the judicial compensation picture. We commend these tables to legislatures and fiscal authorities in all states, recalling from the introduction to the 1945 survey the remark that:

> "money has power, and the amount of money spent on judicial salaries does make a difference to the people in the judicial service they get."

JUDICIAL SALARIES AND RETIREMENT PLANS IN THE UNITED STATES

Adequate judicial compensation means both justice for judges and justice for litigants.

Judicial salaries in the United States have traditionally been inadequate. It is only in the past few years that compensation has even approached a level which would attract the best men to the bench without great sacrifice. What follows is our 1970 report of the status of this important area.

APPELLATE COURT SALARIES

Since the American Judicature Society's last judicial salary survey in 1968, 33 states and Puerto Rico have raised the salaries of judges of courts of last resort. These increases have varied from $1,500 in New Mexico to $14,000 ($15,500 for the Chief Justice) in New Jersey. Over 80% of the raises were between $2,000 and $5,000. Besides New Jersey, other significant raises were realized in Louisiana ($10,000) and Delaware ($9,500). This activity has increased the average supreme court salary by 12%, to $27,660, which is more than double the 1952 average. The median supreme court salary has also risen since the last survey to $26,000.

However, salaries of supreme court justices are lagging slightly behind gubernatorial salaries. The median salary for governors is $27,500, and their average salary of $29,596 is nearly $2,000 more than justices receive. As of the last survey, nine states were paying justices less than $20,000 per year. Today there are only two. The present maximums and minimums are as follows:

Highest Salaries	
New Jersey	$45,000
California	42,747
New York	42,000

Lowest Salaries	
Mississippi, Wyoming	19,000
Maine, North Dakota, Utah	20,000

The national average has also been increasing at the intermediate appellate court level. In 1967 it was $27,118, and today the average is $28,625. This however represents only a 5% increase over the 1968 survey whereas that showed a 12% increase over its immediate predecessor. Since the last survey, 12 states have increased intermediate appellate salaries. Eleven of these were in amounts between $1,000 and $5,000. Substantial increases were realized in Louisiana ($11,000) and New Jersey ($15,000). Colorado, Oklahoma, Oregon, and Washington established new intermediate appellate courts with salaries of $22,500, $19,500, $25,000, and $25,000 respectively.

Twenty three states now have intermediate appellate courts. The present maximum and minimum salaries are:

Highest Salaries	
New York (1st and 2nd Departments)	$42,100
New Jersey	42,000
California	40,016

Lowest Salaries	
Oklahoma	19,500
Tennessee	20,000
New Mexico	21,000

TRIAL COURT SALARIES

The same positive trend is evidenced at the general trial court level. Thirty-seven states and Puerto Rico increased the salaries of their trial judges. This has boosted trial court salaries 11.8% to $23,345 since the last survey. In 1952, 32 states paid less than $10,000. Today, no state pays trial judges less than $15,000 and in only 18 states and Puerto Rico can a judge earn less than $20,000. In three jurisdictions, New Jersey and the First and Second Departments of New York, trial judges earn more than $35,000. In eight jurisdictions, Cal-

ifornia, Delaware, Hawaii, Maryland, Massachusetts, South Carolina, and the Third and Fourth Departments of New York, a trial judge earns between $30,000 and $35,000 per year. The national median has also increased by $1,250 to $22,250 since the last survey. The maximums and minimums are as follows:

Highest Salaries	
New York (First and Second Departments)	$39,100
New Jersey	37,000
California	33,396
Lowest Salaries	
Mississippi	16,000
Oklahoma, Utah, Tennessee	17,500
North Dakota	18,000

SALARIES IN OTHER COURTS

While it is beyond the scope of this article to detail salary changes in minor, special, and limited courts, some highlights are worthy of mention. Thirty-one states report salary increases in their courts of limited and special jurisdiction, ranging up to $9,000. Approximately 80% of the raises were between $500 and $4,000.

The most significant raises were realized in Delaware, where judges of the Family and Common Pleas Courts received raises of $6,000 to $27,000, and in Maryland where the People's Court judges of the City of Baltimore received an increase of $6,500, bringing their salary to $25,000. A salary increase of $8,670 brought the District Magistrates of Hawaii to $23,670. County, District, and Juvenile Court judges of New Jersey are now paid $34,000, a raise of $9,000. In Rhode Island, District Court judges are now paid $20,000 ($21,000 for the chief judge) whereas previously they were paid anywhere from $4,797 to $10,933.

The maximums and minimums of some representative minor courts are as follows:

Highest Salaries	
New Jersey	
County District Court	$34,000
California	
Municipal Court	30,724
New York	
County Court	25,000-30,000
Civil and Criminal Courts of New York City	30,000
Lowest Salaries	
Tennessee	
General Sessions Court	1,800-11,800
Arkansas	
Common Pleas Court	3,100-5,900
Utah	
City Court	5,000-10,500
Alabama	
Inferior Courts	6,000-10,000

JUDICIAL RETIREMENT

Since the Society's last biennial survey, 17 states have reported changes in their retirement legislation. Two, Maryland and Nebraska, have provided alternative plans to those now in effect. Maryland has provided a contributory pension plan effective July 1, 1969. Judges appointed after July 1, 1969, must participate, and other judges previously on the bench may join. It provides benefits equal to 1/16 of 60% of the maximum salary for each year of service up to 16 years. It is applicable to all trial and appellate judges.

The new Nebraska plan, designated the future member plan, covers all judges taking office after December 25, 1969, and those judges covered under the original plan who elected to join prior to June 30, 1970. The monthly allowance under this plan is equal to 1/12 of

2½% of the total salary earned by the judge for his judicial duties between the time he started making contributions and his retirement. The judge's contribution under this plan is 6%.

An Arkansas judge may now retire at any age after 20 years service. Maine added a provision for retirement at 65 after 12 years service. Minnesota now permits District Court judges with 25 years service to retire at age 65, and Texas has reduced its eligibility requirement for retirement from 16 to 12 years. Oregon now covers its new Court of Appeals and its Tax Court and has made the plan optional for District Court judges. Washington, Oklahoma, and Colorado have brought their new appellate courts under their retirement plans, and Rhode Island has combined its District Court retirement program with that of its other courts.

Benefits have been increased in Alabama to $9,600 per year for Circuit Court judges while Indiana has increased its ceiling on retirement benefits from $4,800 to $10,000. Ohio has changed its plan so that benefits may be as high as 85% of the judges' final average salary. Oregon, instead of setting a figure, now gives 45% of the average salary for the highest five of the last ten years. Maine now gives the retiring judge ¾ of the currently effective salary of his office.

Judges' contributions to retirement funds have been increased in four states. Illinois judges now contribute 10% of their salary; Mississippi, 4½%; Ohio, to 7.7%; and Wisconsin, 2% of their monthly salary and 4½% on any earnings in excess of the amount specified as subject to social security withholding. North Carolina has accorded the judges of its Superior Court the same disability benefits as its appellate judges.

Changes were made in death benefits in five states. Colorado has reduced from five to three years the service required of a judge for his widow to be eligible for benefits. Maine has followed the modern and preferred practice by changing the widow's benefit from ⅜ of the compensation at the time of her husband's death to ⅜ of the current compensation for the judicial office that he held at the time of his death. Oregon now gives a judge's widow a percentage of a basic amount determined by his length of service. In South Dakota, a judge may now assign ⅓ of his retirement pay to his wife, the annuity commencing upon his retirement or death in office and continuing until her death or remarriage. Washington has reduced the required time that the judge and his widow were married from ten to three years.

MINIMUM STANDARDS

Three minimum standards recommended and commented upon in the American Judicature Society's last survey and included in the Model Judicial Article (June, 1963, JUDICATURE p. 11) provide a partial guide in evaluating current retirement plans.

These standards require that each plan provide a pension of at least 50% of salary for judges who retire after at least 10 years of service in addition to disability and death benefits.

Alabama, Colorado, Delaware, Mississippi, Missouri, Oregon, and Wyoming still have a maximum retirement figure below this recommended minimum. Arkansas, Indiana, Iowa, Michigan, Minnesota, New Hampshire, New Mexico, North Dakota, South Dakota, Texas, and Utah pay the bare minimum of 50%. Two-thirds of salary is allowed by six states: Arizona, Connecticut, Georgia, Nevada, North Carolina, and South Carolina. Fourteen jurisdictions pay as much as 75%; they are Alaska, California, Hawaii, Idaho, Illinois, Maine, Massachusetts, New Jersey, Oklahoma, Rhode

Island, Tennessee, Virginia, Washington, West Virginia, and Puerto Rico. Pennsylvania and Ohio give benefits of up to 85% of salary and the allowance in New York and Wisconsin is determined by actuarial rules. In Florida and Vermont, benefits may reach as high as full salary but only after 30 years service. The same applies in Kentucky and Louisiana with the service requirement being 20 years.

All states except Rhode Island and Wyoming provide disability benefits, but in Georgia and Nevada such benefits are available only through the public employees retirement system. Alabama, Missouri, North Carolina, Oklahoma, Rhode Island and Wyoming allow no widow's benefits, and Georgia has no benefits for widows of appellate judges. In addition, in 15 states the widow's benefits consist either of a refund of contributions or an optional annuity whereby the judge takes a lower pension to provide for his wife.

BENEFITS FOR JUDGES

Hospitalization. All reporting jurisdictions except Kentucky, Montana, Nebraska, North Carolina, and West Virginia have some type of hospital plan, but they vary considerably. In 14 states the judge pays the whole premium, and in 19 states the premium is shared by the state and the judge. In Connecticut the state pays ½ of the coverage for dependents, and Idaho is the only state which fully pays for family coverage.

Holidays. The number of official holidays varies from two in Arkansas and four in Virginia to fourteen in New Jersey and Tennessee and eighteen in Puerto Rico. Holidays in the federal courts generally correspond to those of the jurisdiction where the court is sitting.

Vacation. Seventeen states make the length of vacation subject to the discretion of the individual judge. The maximum vacations in the remaining jurisdictions average one month, or 21 judicial days; this being the vacation time in 20 states. The shortest vacation was two weeks—the estimated vacation time of Oklahoma judges. The longest reported vacations were ten weeks in Massachusetts, nine weeks in Kentucky, and eight weeks in Mississippi. Only Iowa reported a vacation system based on length of service; one week after one year, two after two years, three weeks after ten and four after fifteen years. The federal system has a discretionary policy of vacations up to one month.

Expense Allowances and Travel Reimbursement. Appellate and general trial court judges are generally reimbursed for their actual travel expenses. This is true in 30 states, Puerto Rico, and the federal system, but 10 qualify this "actual expense" reimbursement policy. For example, in Alabama it applies to out of state travel, and in-state travel is limited to $15 per diem. In Rhode Island, expenses are covered only for out-of-state conferences, and in the federal system the expense reimbursement may not exceed $30. Sixteen states report per diems in effect for the judges of some or all of their courts. These figures varied from $13 to $30 with $25 being the most common figure. The average mileage reimbursement was just under 10¢, the minimum being 7¢ and the maximum 12¢. Nine states reported expense allowances of specific amounts for one or more courts. By far the most generous were those provided by New York, where instead of expenses, allowances of from $3,000 to $7,000 are given to judges in some courts.

COMPENSATION OF COURT EMPLOYEES

Court Administrators. In 1955 the American Judicature Society reported that there were 16 such offices. The addition of four states—Florida, Maine, Oklahoma, and Pennsylvania—since the last survey brings the total of jur-

isdictions with full time court administrators to 34 states, the District of Columbia, the federal system, and Puerto Rico. Salaries range from $11,550 in New Mexico to $42,678 in New York with an average of $22,091. Twelve states and the federal system have deputy court administrators.

Court Clerks. The salaries of supreme court clerks in the reporting jurisdictions range from $3,000 in Maine to $29,950 in New York. Seven states—Arkansas, Delaware, Iowa, Maine, Maryland, Oklahoma, and Wyoming—pay their clerks less than $10,000 per year. California, Illinois, Massachusetts, Michigan, New Jersey, New York, Virginia, Washington, West Virginia, and the federal system pay over $20,000.

Law Clerks. Ninety per cent of the supreme courts have law clerks. Those that do not are Maine, Missouri, Nebraska, Vermont, and Wyoming. There is a one-to-one ratio of judges to clerks on 25 state supreme courts. In four states—Indiana, Louisiana, New Jersey, and Oregon—the chief justices have two clerks and the other justices have one each. In California, four law clerks are assigned to each justice and the range in Alaska is three to one. Four states—Arizona, Illinois, New York, and Pennsylvania have a ratio of two to one. Eight states—Delaware, Kansas, Mississippi, Montana, New Hampshire, North Dakota, Ohio, and South Carolina—have less than a one-to-one ratio of law clerks to judges. The salaries range from $5,000 in Mississippi to $26,148 in California for the "principal attorney." Five states—Arkansas, Mississippi, Montana, Rhode Island, and Utah—pay less than $7,000 while eleven states, Puerto Rico, and the federal system pay more than $10,000.

Court Reporters. Salaries of supreme court reporters range from $4,596 in South Carolina to $28,814 in Michigan. Twelve jurisdictions—Alabama, California, Colorado, Georgia, Michigan, Nebraska, New York, North Carolina, Oklahoma, South Dakota, Washington, and Puerto Rico—pay more than $15,000 per year. The five states which pay less than $10,000 are Arkansas, Missouri, Nevada, South Carolina, and Virginia.

Minimum Standards. Despite the major improvements in judicial compensation in recent years, there are still deficiencies. The following requirements should be met in every state:

1. A minimum salary of $19,000 should be paid to all judges.

2. Retirement benefits should equal at least 50% of the current salary of the last office the judge held, and every retirement plan should include widow and disability benefits.

3. A state-wide court administrative staff should be established with a deputy administrator in every metropolitan court system in the nation.

4. Law clerks should be provided for all supreme court judges.

5. Private secretaries should be provided for all supreme court judges, and every judge should have a full or part-time secretary.

6. Every judge should have an allowance for office expenses, and should receive travel expenses for a wide range of state and national professional activities.

7. Hospitalization and medical-surgical insurance should be provided every judge and court employee, with all premiums paid by the state.

8. Every judge should have an annual vacation of at least one month.

(Editor's Note: This compilation could not have been completed without hours of demanding work by Joseph J. Connell, Jr., a research assistant and a senior student at the University of Chicago Law School. Mrs. Clarette Bein edited the draft and prepared the final printed text, and Mrs. Joyce Pope and Miss Tiina Asperk assisted with the manuscript. The final product is the result of their efforts.)

CURRENT PROVISIONS

Following are the summaries of judicial compensation data for the 50 states, the federal system, and Puerto Rico, which have been verified by local authorities and from which the prefatory conclusions and the summary charts in this survey are drawn. Judicial salaries in the courts of each jurisdiction are then listed along with special notations of chief judge increments, local supplements, general bases for formula calculations, effective dates of changes which are not yet applicable, and explanatory notations where reliable figures could not be obtained.

The extent to which fringe benefits—hospitalization and medical-surgical insurance, vacation, holidays, expense allowances and travel reimbursements—are available to appellate and general trial court judges is then reported for each state. Other reported benefits (e.g., life insurance coverage) are noted for a few jurisdictions. The fourth part of the summary data is a description of the retirement plans applicable to judges in each state. These are updated versions of the summaries of Alice Ann Winters in *Judicial Retirement Plans,* Chicago: The American Judicature Society, 1961.

The Society will be pleased to furnish or obtain additional information on any jurisdiction. Readers are invited to supplement the data presented and to report changes as they occur for inclusion in the addenda which will be published in the interim before the Society's next biennial survey. Inquiries or contributions of new information may be sent to the Society's offices at 1155 East 60th Street, Chicago, Illinois 60637.

ALABAMA

HIGHEST COURT
- Supreme Court
  - Chief Justice $22,500*
  - Associates 22,500*

INTERMEDIATE APPELLATE COURTS
- Court of Criminal Appeals 22,000*
- Court of Civil Appeals 22,000*

- Justice of the Peace ..... Fees
- County Courts (Probate Judge) ..... 300 to 600
- Juvenile Courts (Probate Judge) ..... —

BENEFITS

HOSPITALIZATION: Covered under State of Alabama Insurance Program.

VACATION: Court recessed from July to October; however, special sessions are held continuously.

HOLIDAYS: 12.

EXPENSE ALLOWANCE: Not more than $15 per day in state are reimbursed; outside state, actual and necessary expenses plus actual expenses for transportation.

RETIREMENT PROVISIONS

JUDGES COVERED: Supernumerary judgeship plan applies to: A. Supreme Court. B. Courts of Appeal. C. Circuit Courts.

AGE AND SERVICE REQUIREMENTS: A. 65 after 15 years of service, the last 12 of which are continuous. B. 65 after 15 years of continuous service. C. 65 after 15 years of continuous service in a Circuit Court, or 70 after 10 years of continuous service, or any age after 24 years of continuous service, or age 70 after 15 years of service as a judge in any court of record.

CONTRIBUTION: None.

RETIREMENT BENEFITS: A. $7,200. B. $7,200. C. $9,600.

DEATH BENEFITS: No specific provision.

DISABILITY BENEFITS: A. and B. 50 with 15 years continuous service, same benefits as retirement. C. 60 with 15 years continuous service, same benefits as retirement.

SERVICE AFTER RETIREMENT: Can be called to hold court or perform other judicial duties.

RETIREMENT CITATIONS: Supreme Court, 1958 Recompiled Code (Supp.1967) Tit. 13, §§ 31, 33, p. 159. Courts of Appeal: *id.*, Tit. 13, § 105 (2), (3) p. 167 (Supp. 1967).

Circuit Court: *id.* Tit. 13, § 195 (1), (2) p. 234 (Supp. 1967), § 195 (4) (Amend. 1969).

Alabama Constitution, Art. 4 § 98.

ALASKA

HIGHEST COURT
- Supreme Court
  - Chief Justice $30,000
  - Associates 28,000

GENERAL TRIAL COURT
- Superior Court 26,500

LIMITED AND SPECIAL COURTS
- District Court
  - District Judges 19,000
  - Magistrates .....(set by Supreme Court)

COURT ADMINISTRATOR
- Administrative Director of the Courts..... 26,500

BENEFITS

HOSPITALIZATION: Covers Supreme and Superior Court judges; premiums are shared by the state and the judge; authority for group plans given by statute.

VACATION: No set policy.

HOLIDAYS: 11 days.

EXPENSE ALLOWANCE: 12¢ a mile by private car and per diem travel allowance is $21.

RETIREMENT PROVISIONS

JUDGES COVERED: Supreme, Superior, and District Judges.

AGE AND SERVICE REQUIREMENTS: 65 after 5 years of service; retirement may be at any age after 5 years with benefits deferred to age 65 except with 20 years of service actuarially reduced payments may begin at age 60; retirement mandatory at 70.

CONTRIBUTION: None.

RETIREMENT BENEFITS: 5% of salary of office per year of service to a maximum of 75% of the salary of the office.

DEATH BENEFITS: Widow receives ½ of benefits judge would have received until she remarries.

DISABILITY RETIREMENT: Regular retirement benefits paid after 2 years service to justices of the Supreme Court who are retired for incapacity by action of the governor and to other judges retired for incapacity by the Supreme Court. After 5 years of service a judge may request a disability retirement and be granted regular retirement benefits by the governor on recommendation of a three man commission.

JUDICIAL SERVICE AFTER RETIREMENT: Special assignments by court rule.

RETIREMENT CITATION: Alas. Stats., 1962, §§ 22.-25.010 through 22.25.070.

ARIZONA

HIGHEST COURT

BENEFITS

HOSPITALIZATION: Group policy is available to judges of Supreme Court, Court of Appeals, and Superior Court. Premium for individual and family coverage paid by the judge.

VACATION: By custom vacations of up to one month are taken by judges of the Supreme Court, Court of Appeals, and Superior Court.

HOLIDAYS: 12 days.

EXPENSE ALLOWANCE: 10¢ a mile for private car travel on official business and a subsistence allowance of $20 per day in state and $30 per day without the state.

RETIREMENT PLAN

JUDGES COVERED: Judges of Supreme Court, Court of Appeals, and Superior Court.

AGE AND SERVICE REQUIREMENTS: Minimum is 65 after 20 years service; a judge whose service is terminated before the minimum retirement age but after 12 years of service may receive deferred benefits at age 65.

CONTRIBUTION: 5% of salary.

RETIREMENT BENEFITS: ⅔ of salary at time of retirement; proportionate amount of current salary times years of service divided by 20 if years of service are between 12 and 20 to a maximum of ⅔ of current salary.

DEATH BENEFITS: ⅓ of retirement benefits to widow if 62 or married 10 years and if judge served a minimum of 12 years.

DISABILITY BENEFITS: Any age with 10 years service, ⅔ of salary; with 5 years service, ⅓ salary; between 5 and 10 years service a proportionate amount.

SERVICE AFTER RETIREMENT: Subject to call of the Supreme Court any retired judge may assist any of the three courts in all duties prior to final disposition.

CITATION: Ariz. Rev. Stats. 1956, Vol. 1C, Tit. 38, Chapter 5, Art. 3 §§ 801 through 806, pp. 216-219, and 1969 Supp. pp. 60-62.

COURT ADMINISTRATOR
- Executive Secretary of the Judicial Department 18,000

BENEFITS

HOSPITALIZATION: Judges covered by Workman's Compensation Insurance. In addition, many judges carry hospitalization at their own expense.

VACATION: Supreme Court recesses from first Monday in June until the first Monday in September; however, judges are on call during this time. Trial courts take approximately 4 weeks.

HOLIDAYS: Supreme Court has two (Christmas and New Year), trial court holidays set by local rule.

EXPENSE ALLOWANCE: Supreme Court has no specific allowance but the maintenance allowance is used for authorized travel and meetings. Trial judges have the option of actual expenses or an annual allowance of $2,400. Mileage expense is 10¢ per mile.

* County Judge presides over Courts of Common Pleas; figures represent supplements.

** Recent Arkansas Supreme Court decision, *Doty v. Goodwin*, 246 Ark. 147 (1969), held conviction unconstitutional where fee of justice of the peace was dependent on conviction. Recent Arkansas Statute, 12-1731.1 (1969 Supp.), authorized quorum court to fix salaries of justices of the peace. Information on amount and numbers of justices on salary is presently unavailable.

RETIREMENT PLANS

JUDGES COVERED: A. Supreme, Circuit, and Chancery Court. B. Municipal and Police Court.

AGE AND SERVICE REQUIREMENTS: A. 65 after 15 years of service or any age after 20 years of service. B. Any age after 30 years of service or 70 after 10 years of service.

CONTRIBUTION: A. 4% of salary. B. None.

RETIREMENT BENEFITS: 50% of salary.

DEATH BENEFITS: 50% of retirement pay to widow (if she was married to judge at least five years prior to death) until she remarries, or to minor children if there is no widow. If both widow and minor children survive they each get half the death benefit.

DISABILITY RETIREMENT: A. Judge may retire for disability with a pension of ½ his last salary regardless of age or length of service if incapacitating illness occurs during term to which he was elected. B. 50% of last salary if incapacitating illness occurs during term to which he was elected.

SERVICE AFTER RETIREMENT: A. Chief Justice may recall any retired judge except those retired for disability for temporary service with the consent of the judge, who is paid the salary of the office without regard to recalled judges' retirement benefits. B. No specific provision.

CITATION: A. Ark. Stats. Ann. 1947, Tit. 22 §§ 22-901 through 22-909 (1969 Supp.) B. Tit. 22 §§ 22-739, 22-941 through 22-944.

CALIFORNIA

HIGHEST COURT
- Supreme Court
  - Chief Justice $45,418
  - Associates 42,747

INTERMEDIATE APPELLATE COURT
- Court of Appeal 40,076

GENERAL TRIAL COURT
- Superior Court 33,396

LIMITED AND SPECIAL COURTS
- Municipal Court 30,724
- Justice Courts ..... 900 to 21,000

COURT ADMINISTRATOR
- Administrative Director of the Courts 38,510
- Executive Officer, Los Angeles Superior Court 23,676- 29,484

BENEFITS

HOSPITALIZATION: Optional coverage available, premium payments are shared by judge and state. Family coverage available at extra charge to judge.

VACATION: 21 judicial days.

HOLIDAYS: 12 days plus every day in which there is an election in the trial court.

EXPENSE ALLOWANCE: Supreme and Court of Appeal judges allowed travel and per diem expenses when on court business. Superior Court judges allowed travel and per diem when assigned to another court. Reimbursement for travel expenses also provided for Municipal and Justice Court judges.

RETIREMENT PLANS

JUDGES COVERED: Supreme Court, Court of Appeal, Superior Courts, Municipal Courts.

AGE AND SERVICE REQUIREMENTS: 70 after 10 years of service within the preceding 15; 69 with 12, 68 with 14, 67 with 16, 66 with 18, or 65 with 20, all with maximum service interruptions of 4 years; 70 with 20 years service, the last five of which immediately precede retirement, or 60 after 20 years of service. Credit is granted for service in courts not included under the plan provided back contributions are paid and for service in the armed forces during war or national emergency.

CONTRIBUTION: 8% monthly salary deduction.

RETIREMENT BENEFITS: 50% of current salary if over 70; if less than 70, 65% of current salary; or with 20 years service 75%.

DEATH BENEFITS: If judge dies in active service while eligible for retirement or dies retired his widow receives 50% of his retirement allowance. If he dies in office with 10 years service but before he is eligible to retire his widow may receive 1.625% of current salary times years of service to a maximum of 37½% of current salary. This is contingent upon the judge paying $2.00 per month to the retirement fund. If the judge dies before he is retired and is not survived by a widow his heirs may receive an amount up to ½ his salary.

DISABILITY BENEFITS: A judge retired for disability is entitled to the same allowances provided in case of retirement for age and service.

SERVICE AFTER RETIREMENT: May be assigned with his consent to any court equal or higher than that of one from which he retired. He is paid the difference between his retirement allowance and compensation of an active judge.

  - Others 16,500- 17,500
- Municipal Court ..... 500 to 18,000

COURT ADMINISTRATOR
- State Court Administrator 20,000

BENEFITS

HOSPITALIZATION: All judges except Municipal judges may join a state plan which provides both basic and major medical benefits. The state pays $6.75 per month toward the premium, the judge the rest.

VACATION: 30 days with some variation.

HOLIDAYS: 11 days.

EXPENSE ALLOWANCE: All judges except Municipal are reimbursed by state at rate of 10¢ per mile. Supreme and Court of Appeals judges receive actual and necessary expenses. District, Superior, Probate, Juvenile, and County judges receive expenses to a maximum of $20 per day.

RETIREMENT PLANS

JUDGES COVERED: A. Supreme Court justices. B. All courts of record.

AGE AND SERVICE REQUIREMENTS: A. and B. Minimum age is 65 after 10 years of service.

CONTRIBUTION: 6% salary deduction plus $5 fee upon entering the system.

RETIREMENT BENEFITS: A. $5,000 a year at 65 after 10 years of service, $6,000 at 72 after 20 years, and $7,000 at 80 after 30 years. B. 50% of average highest

monthly salary of any 5 years service within the past 10 at age 65 with 16 or more years service or 60 with 20; 40% as above at 65 with 10 to 16 years service.

DEATH BENEFITS: A. $5,000 maximum if widow is 65 and married at least 20 years. B. Optional annuities available to spread benefits to widow or designated heirs; widow of judge who dies in office and who has completed 3 years of service receives an annuity of 25% of average monthly salary for the 3 years immediately preceding his death.

DISABILITY RETIREMENT: A. No specific provision. B. Judges retired for disability may receive an allowance equal to retirement benefits he would have received had he completed his term of office.

SERVICE AFTER RETIREMENT: Chief Justice may assign any retired judge with his consent to perform judicial duties in any court. For each day's service he receives ½ the salary applicable.

CITATION: Courts of Record: Colo. Rev. Stats. 1963, Chap. 111, §§ 111-6-1 through 111-6-13. Supreme Court (other provisions): *id.*, Chap. 37, § 37-2-14, Colo Const. Art. 6 § 31.

CONNECTICUT

HIGHEST COURT	
Supreme Court	
Chief Justice	$33,000
*Associates	29,000
GENERAL TRIAL COURT	
Superior Court	27,500
LIMITED AND SPECIAL COURTS	
Circuit Court	
Chief Judge	23,500
Judges	21,500
Common Pleas Court	22,500
Juvenile Court	20,000
Probate Court	fees up to 33,000

BENEFITS

HOSPITALIZATION: Group hospitalization, medical and surgical insurance is available to judges. State pays judges' premium and ½ of premium of judges' dependents.

VACATION: 1 month.

HOLIDAYS: 11 days.

EXPENSE ALLOWANCE: Judges of Supreme, Superior, Circuit, Common Pleas, and Juvenile Courts receive expenses. Mileage reimbursed at 10¢ per mile.

RETIREMENT PLANS

JUDGES COVERED: Judges of Supreme, Superior, Common Pleas, Circuit, and Juvenile Courts.

AGE AND SERVICE REQUIREMENTS: Minimum is 65 after no minimum length of service or after 25 years of service with no age requirement. Retirement mandatory at 70.

CONTRIBUTION: 5% of salary for judges appointed after May 20, 1967; those appointed earlier make no contribution.

RETIREMENT BENEFITS: ⅔ of salary if judge served 10 years or retired at 70. If retirement occurs between ages 65 and 69 with less than 10 years of service the allowance is computed by dividing a fraction, the numerator of which is the number of years actually served and the denominator of which is the number 10 or the number of years the judge would have served had he not retired until age 70—whichever number is less, into ⅔ of his current salary.

DEATH BENEFITS: Widow receives ⅓ of the current salary of the office the judge held. If the judge is not survived by a widow the pension is payable to his children until they reach age 18.

DISABILITY RETIREMENT: Judges retired for disability receive full benefits.

SERVICE AFTER RETIREMENT: Retired judges of Supreme, Superior, and Common Pleas courts become state referees for life. Chief Justice appoints trial referees from state referees and they may enter judgment in cases referred to them by Superior and Common Pleas Courts. Compensation is $50 per day.

CITATION: Gen. Stats. of Conn. Vol IX, Tit. 51 Chap. 872, §§ 51-49 through 51-51; Conn. Const. Art. 5 § 6.

COURT ADMINISTRATOR
- Executive Director of the Judicial Administrative Commission 15,405

BENEFITS

HOSPITALIZATION: Group policies available with family coverage, premium paid by judge.

VACATION: Discretionary.

HOLIDAYS: 7 days plus those the State Personnel Board may designate.

EXPENSE ALLOWANCE: Supreme and District judges receive per diem of $25, Circuit judges get $20; mileage reimbursement is 10¢ per mile.

RETIREMENT PLANS

JUDGES COVERED: A. Judges of Supreme Court, District Court of Appeals, Circuit Courts, and Escambia County Court of Record. B. Public Employee's Retirement System applies to all other judges.

AGE AND SERVICE REQUIREMENTS: A. 60 after 10 years of service or 55 after 10 with reduced benefits. For judges assuming office after July 1, 1963 it is age 65. B. 60 after 10 or 55 after 10 with reduced benefits. Mandatory retirement at age 70 for all judges of the state except those in office on November 1, 1956.

CONTRIBUTION: A. 8% of salary. B. 6% of salary without social security coverage, 4% with social security.

RETIREMENT BENEFITS: 3⅓% (or 5% for justices in office prior to July 1, 1957) of average salary (best 10 out of last 15 years) times years of service not to exceed final average salary. B. 2% (1½% with social security benefits) of average final compensation for each year of service.

DEATH BENEFITS: A. Judge may accept reduced retirement benefits under one of several plans to provide benefits for designated heirs, any eligible judge is automatically construed to have selected the option which provides the widow with greatest benefits. B. Optional reduced annuities provide pension for surviving spouse.

DISABILITY BENEFITS: A. Any age with 10 years of service the last 5 of which are continuous for voluntary retirement, benefits are not less than 25% of final salary. Judges retired involuntarily receive ⅔ salary at time of retirement if more than 10 years of service or ⅓ salary if less than 10 years service with additional benefit in latter case of 3⅓% for each year of service. B. Any age with 10 years of service last 5 of which are continuous; minimum benefits are 50% of average final compensation, but do not apply if judge is 60 or receives social security disability benefits.

SERVICE AFTER RETIREMENT: Any retired justice or judge may be assigned, with consent, to any court by Chief Justice, compensation equates difference between retirement benefits and salary of the office.

RANK ORDER OF SALARIES IN THE HIGHEST APPELLATE AND TRIAL COURTS, AND OF POPULATION AND PER CAPITA INCOME

GENERAL NOTE. Population and per capita income figures were taken from Department of Commerce publication, *Current Population Reports*, Series P-25, No. 436, and *Survey of Current Business*, August, 1970. Where a range of salaries is paid to trial court judges the average of the range was used to establish rank. In cases where more than one state paid the same salary, each of these states has been assigned the rank number of the last in the alphabetical listing of them.

State	JUDICIAL SALARIES		Per Capita Income Rank	Population Rank
	Highest Appellate Courts	General Trial Courts		
Alabama	42	34	49	21
Alaska	20	15	3	51
Arizona	39	30	29	34

West Virginia	23	32	48	33
Wisconsin	20	19	20	16
Wyoming	51	46	30	50
District of Columbia	3	1	1	40

BENEFITS

HOSPITALIZATION: Blue Cross and Blue Shield policies with optional family coverage available. State pays first $5.00 on judge's monthly premium, judge pays the rest and all family coverage.

VACATION: Discretionary except by practice Cook County Circuit judges have 5 weeks, associates 4 weeks and magistrates 3 weeks.

HOLIDAYS: 11 days.

EXPENSE ALLOWANCE: Actual expenses of court business and official travel are paid to Supreme and Appellate Court judges. Circuit judges, associates, and magistrates are reimbursed for in-circuit travel, hotel, and meals at a per diem of $10 in Cook County and $7.50 elsewhere. Car mileage is reimbursed at 12¢ per mile.

RETIREMENT PLANS

JUDGES COVERED: Open to all judges of courts of record and the court of claims.

AGE AND SERVICE REQUIREMENTS: Minimum age is 60 after 10 years of service.

CONTRIBUTION: 10% of salary annually; married judges contribute 2½% of income to cover widow's pension.

RETIREMENT BENEFITS: 2½% for each year of the first 10 years plus 5% for each year over 10 years to a maximum of 75% of average salary of the last 4 years before retirement. Judges who joined prior to July 1, 1967 can elect to remain under prior 50% or 60% maximum.

DEATH BENEFITS: If judge dies after retirement, widow receives ⅔ of pension. If he served 10 years, widow receives ⅔ pension he would have received or 7½% of salary, whichever is greater. If widow has minor children the benefit is the greater of 75% of pension or 15% of his salary. With minor children benefits are paid no matter what the widow's age, otherwise when she reaches 55.

DISABILITY RETIREMENT: Judge may be retired after 10 years service with full retirement benefits for disability.

SERVICE AFTER RETIREMENT: Retired judges may be assigned with their consent and are paid applicable salary.

CITATION: Smith-Hurd, Ill. Ann. Stats., "Pensions" Chap. 108½, §§ 18-101 to 18-166. Ill. Const. Art. 6 § 18.

RETIREMENT PLANS

JUDGES COVERED: All judges.

JUDICIAL SALARIES IN APPELLATE AND TRIAL COURTS

Notes: Alabama—salaries shown become effective January 19, 1971. California—on September 1, 1970, and every year thereafter, judicial salaries will be increased by the percentage gain in California's consumer price index during the preceding calendar year. Kansas—salaries shown become effective January 1, 1971. South Carolina—salaries shown become effective January 1, 1971. Washington—salaries become effective as justices are re-elected (either 1969 or 1971).

[1]General Note: Salaries are stated in annual amounts and do not reflect additional compensation for chief justices or presiding judges. Where a salary range rather than a single rate is shown on the chart, it reflects variations due to local supplements or other authorized variations. Also, in jurisdictions which have constitutional restrictions on increasing compensation during a judge's term, the figure shown is for newly appointed or elected judges.

[2]In computing the National Average and National Median figures, (i) federal salaries are excluded, (ii) all states have been weighed equally without adjustment for variations in the size of the judiciary, (iii) for courts where a salary range rather than a single rate is shown, the figures used have been the average of the upper and lower limits of this range, (iv) Puerto Rico is included.

BENEFITS

HOSPITALIZATION: Group policies with family coverage available, premiums shared by state and judge.

VACATION: About 7 weeks in major courts, less in some lower courts.

HOLIDAYS: Regular state holidays.

EXPENSE ALLOWANCE: In lieu of expenses judges given allowances of $6,000 in Court of Appeals, $6,500 in Appellate Division in Third and Fourth Departments, $3,000 in Supreme Court, $7,000 to presiding judge of Court of Claims, and $4,500 to Court of Claims judges.

RETIREMENT PLAN

JUDGES COVERED: A. Judges paid by city of New York. B. Judges paid by state.

AGE AND SERVICE REQUIREMENTS: A. Minimum age is 60 or 55 with actuarially higher rate of salary deductions and pension, no minimum service requirement. Retirement mandatory at 70 but service may be extended for additional periods of two years each up to 80. Credit given for service in city agencies or courts. B. Minimum age is 60 or 55 with actuarially higher contributions, or any age after 20 years service in the event of separation without personal fault. Retirement compulsory at 70 unless excepted by law.

CONTRIBUTION: A. and B. Actuarially determined.

RETIREMENT BENEFITS: A. Actuarial equivalent of contributions plus pension of 1/40 of final compensation (average during selected 5 years) for members retiring at 60, 1/120 or 1/100 of final compensation for persons retiring at 55. B. Members retiring at 60 receive annuity paid from accumulated contributions plus pension equal to 1/140 of final average salary times years of membership service plus pension of 1/70 times final average salary times years of prior service. Members retiring at 55 receive annuity as above plus 1/20 final average salary times years of service.

DEATH BENEFITS: A. Non-occupational death, benefits equal accumulated contributions plus amount of salary earned in 6 months prior to death, or if member had more than 10 years service, amount of salary earned in previous 12 months. Occupational death, widow receives pension of ½ member's salary at death. B. Occupational death, pension of ½ average final salary. Non-occupational death after one year of service accumulated contributions plus 1/12 salary at death for each year of service up to 12 years. In addition state provides extra non-occupational benefits on a year-to-year basis consisting of 1/24 of salary at death for each year of service beyond 12 years not to exceed 24 additional years.

DISABILITY BENEFITS: A. Occupational disability, any age no minimum service, allowance of actuarial equivalent of contributions plus pension equal to reserve-for-take-home-pay to which he is entitled plus additional pension of ¾ of final compensation. Non-occupational disability, minimum service is 10 years, allowance is allowance member would have received at minimum retirement age computed on basis of actual length of service, not below ¼ final compensation. B. Occupational disability, same as A. Non-occupational disability, any age, 15 years service, if 60 allowance computed in regular manner, if below 60, allowance is 90% of 1/70 of final average salary times years of service, not below ¼ of that amount. Supplemental allowance provided for judicial officers retired by court on the judiciary payable to end of term or age 70. Such allowance, together with all other benefits, shall total ⅔ of salary at time of retirement.

SERVICE AFTER RETIREMENT: Retired judges may be appointed as retired justices of the Supreme Court for renewable terms of two years each. Compensation is same as Supreme Court judge.

COURT ADMINISTRATOR
Administrative Director 17,500

BENEFITS

HOSPITALIZATION: Covered by group policy.

VACATION: Up to 15 days, with sick leave up to 45 days.

HOLIDAYS: 7 days.

EXPENSE ALLOWANCE: Actual and necessary expenses while outside county of residence, not to exceed 9¢ per mile and per diem of $12 or subsistence allowance of $10 per day in-state and $20 per day out-state.

RETIREMENT PLANS

JUDGES COVEPED: Judges of Supreme Court, Court of Criminal Appeals, Industrial, Intermediate Appellate and District Courts.

AGE AND SERVICE REQUIREMENTS: 60 after 20 years service, 65 after 10, or 70 after 8. Credit given for prior service in courts of record. Retirement mandatory at end of term in which requirements met.

CONTRIBUTION: 4% of 75% of his salary.

RETIREMENT BENEFITS: 4½% of final salary times years of service up to 75% of final salary.

DEATH BENEFITS: Contributions are paid to beneficiaries if judge dies before he retires, no survivor benefits.

DISABILITY BENEFITS: No specific provision.

SERVICE AFTER RETIREMENT: May serve by assignment of Supreme Court.

CITATION: 20 O. S. Supp. 1969 §§ 1101 through 1108.

* In operation January, 1971.

** Trial and Appellate judges serve on them "ex officio" without additional pay.

*** Special courts manned by district judges, who receive only expenses.

**** Compensation set by local ordinance.

OREGON

HIGHEST COURT
Supreme Court $26,000

INTERMEDIATE APPELLATE COURT
Court of Appeals 25,000

GENERAL TRIAL COURT
Circuit Court 24,000

LIMITED AND SPECIAL COURTS
Tax Court 24,000
District Court 18,000
Justice of the Peace ..... up to 8,820
County Court ..... 3,000 to 10,500

COURT ADMINISTRATOR
Administrative Assistant to Chief Justice 15,000

BENEFITS

HOSPITALIZATION: Group policy with family coverage available, premium paid by judge.

VACATION: 2 to 4 weeks.

HOLIDAYS: 7 days.

EXPENSE ALLOWANCE: Actual expenses and travel for duty outside district and to meetings of Judicial Conference. Mileage allowance is 8¢ per mile.

RETIREMENT PLANS

JUDGES COVERED: Judges of Supreme Court, Court of Appeals, Circuit and Tax Court and is optional for District Court judges.

AGE AND SERVICE REQUIREMENTS: 65 after 16 years service or 70 after 12. Retirement compulsory at 75. Any judge who holds office for 16 years and contributes to fund for 16 years will receive benefits at 65 even though he ceases to hold office before 65. No judge has to contribute for more than 16 years.

CONTRIBUTION: 7% of salary.

RETIREMENT BENEFITS: 45% of highest average salary for 5 out of last 10 years.

DEATH BENEFITS: Widow's pension is determined by % of basic amount (22.5% of final average pay of judge) scaled from 100% to 20% depending upon years of service of judge. If, prior to death, they have been married 10 years, no adjustment is made in widow's pension, but if married less than 10 and wife more than 3 years younger, she receives an actuarial amount.

DISABILITY BENEFITS: Involuntarily retired judge receives regular retirement allowance if otherwise fully qualified. Voluntarily retired judge with 6 years service receives regular retirement allowance.

SERVICE AFTER RETIREMENT: Retired justices may be appointed *pro tempore* to Supreme or Circuit Court by the Supreme Court. Retired Circuit judges may be appointed *pro tempore* to Circuit Court by Supreme Court.

CITATION: Oregon Rev. Stats., Vol. 1, Tit. 1, Chap. 1, §§ 1.130 through 1.380 pp. 6-8a (Amend. 1969), Const. Art. 7 (Amended) § 1a.

RETIREMENT PLANS

JUDGES COVERED: Supreme and Circuit Court judges.

* Pursuant to 1966 constitutional amendment the Supreme Court in 1969 divided the state into 19 county court districts with the approval of the Senate replacing 64 county and municipal courts except for 3 municipal courts retained.

JUDICIAL SALARIES IN SELECTED COURTS OF LIMITED JURISDICTION

Notes: Arkansas—common pleas courts are presided over by county judges. Supplements of from $100 to $900 for these duties are included in the salaries shown. Massachusetts—salary given is for full-time judges; part-time judges are paid from $7,600 to $10,000. New Jersey—county district courts have $3,000 limit on negligence actions. North Carolina—county and recorder's court are gradually being replaced by a uniform system of district courts. The transition will be completed in 1971.

  - State Pay 18,500
  - Local Supplement ..... up to 8,500
- Municipal Justice Court ..... set locally

COURT ADMINISTRATOR
- Administrative Director 23,500

BENEFITS

HOSPITALIZATION: Supreme and Circuit Court judges covered by group policies, state pays ½ premium.

VACATION: No set policy.

HOLIDAYS: No set policy.

EXPENSE ALLOWANCE: Judges receive reasonable expenses. Mileage reimbursement at 10 cents a mile for the first 400 miles and 7 cents thereafter.

RETIREMENT PLANS

JUDGES COVERED: Judges of Supreme, Circuit, and County Courts and full time judges of municipal and other courts of record.

AGE AND SERVICE REQUIREMENTS: Minimum age is 55 provided credits are enough to provide an annuity of $10 per month. Compulsory retirement of Supreme and Circuit Court judges is 70.

CONTRIBUTION: 2½% of salary and 4½% in excess of an amount specified as subject to withholding.

RETIREMENT BENEFITS: Actuarially determined.

DEATH BENEFITS: May be paid in the form of beneficiary annuities to judge's widow or minor children if the amount of the benefit is sufficient to provide an annuity of $10 per month, otherwise the heirs are paid lump sum of judge's contribution, not less than $500.

DISABILITY RETIREMENT: Any age with 5 years participation in the retirement program or immediately if disability is occupationally incurred. Annuity will not be less than annuity from additional deposits to the fund he may have made plus the lesser of (a) 50% of his final earnings or (b) 1½% final earnings times years of service including assumed service between disability and age 65. Annuity may be reduced 20% after 7 months if judge is eligible to receive Social Security primary or disability benefits. In event the amount that can be provided by judge's total retirement credits is greater than the above formula the judge may elect the former.

SERVICE AFTER RETIREMENT: Retired Supreme and Circuit judges serve as circuit judges upon assignment by chief justice; compensation is $50 a day and expenses. In addition retired county judges may now serve upon assignment by chief justice at same rate of compensation.

CITATION: West's Wisc. Stats. Ann., Vol. 10, Chap. 66, §§ 90 through 918, pp. 112-98 and 1969 Cum. Pocket Supp.; Vol. 29, Chap. 252, § 075, p. 170; Const. Art. 7 § 24.

BENEFITS

HOSPITALIZATION: Covered by government health programs, premiums are shared.

VACATION: Not to exceed one month.

HOLIDAYS: Generally correspond to those observed in the place where the court sits.

EXPENSE ALLOWANCE: Judge reimbursed for official travel for actual expenses of $30 per day or a per diem of $16. Mileage allowance is 10 cents per mile.

RETIREMENT PLANS

JUDGES COVERED: Any justice or judge of the United States appointed to hold office during good behavior.

AGE AND SERVICE REQUIREMENTS: 65 after 15 years service, or 70 after 10, judges who retire after age 70 with at least 10 years service are eligible for certain retirement benefits.

CONTRIBUTION: None.

RETIREMENT BENEFITS: Salary of the office from which he retired. Territorial judges receive that portion of their salary at retirement that total years of service bears to 16.

DEATH BENEFITS: Widow of a justice receives an annuity of $5,000 per year. Widow of a judge may receive an annuity of up to 37½% of his average final salary. Such annuity depends on the judge having made a 3% of salary contribution to the "judicial survivor's annuity fund."

DISABILITY BENEFITS: Any age with 10 years service full current salary, if less than 10 years service ½ that amount. Judges of territorial courts with 16 years service receive full current salary, if he has served between 10 and 16 years he receives the proportion of his salary which the number of his total years service bears to 16. Such annuity commences at age 65.

SERVICE AFTER RETIREMENT: Judges appointed for life tenure retire only from active service and retain their office and may be assigned to judicial service by the administrative head of the court.

Merit Selection for Indiana; Seven States Achieve Significant Reforms

Judicial reform had a banner year in 1970, as seven states adopted major improvements. The highlights of the November election were the adoption of merit selection in Indiana and a merit-based plan for some Maryland judges.

The details:

Indiana

Indiana voters have overwhelmingly approved a judicial amendment including merit selection for all appellate judges.

The proposition carried the November 3 election with more than 55% of the vote.

Justices of the supreme court and judges of the new court of appeals will be appointed by the governor from a list of three nominees submitted by a seven-member non-partisan commission. The appointee will then run for retention after two years of service and every ten years thereafter.

The nominating commission, which will also serve as the judicial qualifications commission, will consist of three attorneys elected by the bar, three non-attorneys appointed by the governor, and the chief justice of the supreme court. No appointed commissioner shall hold any salaried public office or any office in a political party or organization.

The commission has the duty to seek out individuals with extraordinary legal skills, judicial temperament, and personal integrity. Each person nominated by the commission must either have been admitted to the practice of law for ten or more years or shall have served as a trial judge for five or more years.

Except for justices of the peace, who are no longer constitutional officers, the amendment does not affect the trial courts.

The appellate courts will be reorganized into a supreme court and a multi-district court of appeals, the exact arrangement of which shall be determined by the legislature.

The amendment also provides for the nominating commission to serve as a judicial qualifications commission to retire or remove appellate judges who are unable or unwilling to perform their responsibilities. Trial court judges remain subject to the old law, whereby removal can occur only upon impeachment by the legislature after conviction of corruption or other high crime.

This ratification of Constitutional Amendment No. 2 was a great victory for the Indiana Citizens for Modern Courts of Appeal, which with the American Judicature Society, the League of Women Voters of Indiana, and the Indiana State Bar Association, sponsored the Second Citizens' Conference on Indiana Courts, July 23-24, 1970. (November, 1970, JUDICATURE, p. 169).

Indiana thereby becomes, as of the effective date of the amendments — January 1, 1972 — the 20th state to adopt merit selection.

Maryland

Judicial reform in Maryland, considered dead after its excellent proposed constitution was defeated in May 1968, came back in fine style on November 3, 1970.

The voters adopted new provisions reorganizing the lower courts, adding a merit-based system for selecting district court judges. The machinery for removing unfit judges was also improved.

Part of the impetus for reform came from the Citizens' Conference on Maryland Courts and Justice, which was co-sponsored by the American Judicature Society at Annapolis, September 5-6, 1969. (March, 1970, JUDICATURE, p. 347).

Under the new district court appointment system, the governor appoints judges, subject to confirmation by the state senate. At the end of the term, the governor is required to renominate the same judge, and the senate decides whether to reconfirm.

The merit selection feature was added in July when Governor Marvin Mandel announced at an American Judicature Society breakfast that he had issued executive orders establishing judicial nominating panels, subject to the approval of the amendment.

The appointment panels will consist in equal numbers of law-

yers elected by the bar and laymen appointed by the governor, with a chairman also appointed by the governor.

Maryland has retained the previous appointment system for other judges, whereby the governor appoints the judge, but the appointee must face a contested election for a full term at the next election.

Maryland has had a judicial removal commission since 1966, but judges could be removed only by the general assembly. The legislature will retain this impeachment power, but the Commission on Judicial Disabilities will now report on disabled or unfit judges to the court of appeals, which has the ultimate removal authority.

The third change sets up a uniform district court system to replace the present lower courts.

There were reform actions in these other states in 1970:

Alaska
Alaska adopted two major reforms in the administration of its courts in a referendum on August 25, 1970, by margins of more than 2 to 1.

The office of chief justice of the Supreme Court of Alaska will now be rotated every three years and filled by vote of the members of the court. While a chief justice may serve more than one term, such terms may not be consecutive. The appointment was previously made by the governor for an unlimited term.

The administrative director of the courts will now serve at the pleasure of the entire court, instead of only the chief justice.

Arizona
A modern judicial qualifications commission was established in Arizona as the result of a November 3, 1970, referendum.

The new commission eliminates the cumbersome requirement of recall election and impeachment, the only methods earlier available to remove a judge. It will have nine members—judges, lawyers, and laymen—who will serve without pay. Upon information or complaint, it will investigate charges against allegedly unfit judges and report to the supreme court.

The voters also approved creation of a commission to recommend changes in the rate of pay of elective state officials, including judges.

Arkansas
The proposed new constitution for Arkansas lost at the polls on November 3, 1970, carrying several judicial reforms to defeat.

The new judicial article would have unified the lower courts, created a court of appeals, abolished separate courts of law and equity, granted rule-making power to the supreme court, put judges on a non-partisan ballot, and established a judicial retirement and disability commission.

District of Columbia
A commission on judicial disabilities and tenure, approved by Congress in July, will take effect on February 1, 1971. It will consist of five members and has been given rule-making powers. A decision of the commission will be appealable to a special court of three federal judges.

Florida
A judicial article which would have simplified the Florida court structure, enlarged the powers of the judicial qualifications commission, and provided for adoption of merit selection of judges by legislative action was narrowly defeated on November 3, 1970.

The article was the end result of a 1964 citizens' conference, co-sponsored by the American Judicature Society, and a constitutional revision commission. The recommendations had, however, been so greatly altered in the legislature that the Florida Bar had refused to endorse the final proposal, and the circuit judges association had actively opposed it.

The various interested groups are already working together to prepare a new article for future submission.

Idaho
The voters of Idaho defeated a proposed new constitution, containing important judicial changes, on November 3, 1970.

The judicial article would have provided a federal-type system of judicial appointment for the supreme court and allowed the legislature to adopt a similar system for district courts. It would have created a unified court system supervised by the supreme court, with the chief justice as administrative head, given rule-making powers to the supreme court, and spelled out the limitations of the 1967 act establishing a judicial qualifications commission.

Missouri
In addition to the adoption of

merit selection in St. Louis County (November 1970, JUDICATURE, p. 109), the voters of Missouri adopted a statewide judicial qualifications commission on August 4, 1970.

The six-member commission will consist of two lawyers selected by the Missouri Bar, two nonlawyers appointed by the governor, one appeals judge elected by all appeals judges, and one circuit judge elected by all circuit judges.

The commission can recommend to the supreme court the removal of any judge or magistrate who is unable to perform his duties or who has demonstrated unfitness to hold judicial office. Four members must concur in any such recommendation.

North Dakota

The voters selected 98 delegates to the 1972 constitutional convention in balloting on November 3, 1970.

Committees will be organized on April 7, 1971, and hold hearings until the 30-day regular convention session opens on January 4, 1972.

Nebraska

Three amendments approved on November 3 will remove justices of the peace as constitutional officers and permit establishment of a unified state court system, require redistricting of supreme court districts every 10 years, and permit assignment of retired judges to temporary duty.

Texas

An extension of the judicial qualifications commission, adopted in 1965 and patterned after the California plan, to virtually all the courts of Texas was adopted by a vote of more than 2 to 1 on November 3, 1970.

The amendment makes it possible for the legislature to make further extensions as it sees fit.

Virginia

Virginia adopted a new judicial article as part of a general constitutional referendum by an overwhelming margin on November 3, 1970.

The changes give the general assembly the authority to create a judicial inquiry and review commission with jurisdiction over most state judges, the state corporation commission, and other personnel exercising judicial functions.

Judge Joseph A. Sullivan Elected President of Metropolitan Courts Group

The ninth annual meeting of the National Conference of Metropolitan Courts was held at Miami Beach, October 21-23, 1970.

The Conference was established in 1962 to assist judges in the largest courts in the nation. While there are no formal requirements, attendance is traditionally limited to judges from jurisdictions of over 800,000 persons. The 1970 session was attended by more than 80 persons from 32 courts.

At the close of the session, Judge Joseph A. Sullivan of Detroit was elected president of the Conference, and Justice William B. Groat of Jamaica, New York, was named chairman of the executive committee. Justice Tom C. Clark of Washington, D.C., will continue as honorary chairman.

JUDGE SULLIVAN

JUSTICE GROAT

Other officers are Judge Raymond J. Arata of San Francisco, first vice president; Justice John V. Corrigan of Cleveland, second vice president; and Dean Laurance M. Hyde, Jr., of Reno, Nevada, secretary.

In addition to Mr. Justice Clark, Justice Groat and the immediate past president, Judge William A. Herin of Miami, the executive committee will consist of Judge John S. Boyle of Chicago, Judge William J. Wilkins of Seattle, Justice G. Joseph Tauro of Boston, Judge Lewis Dickson of Houston

and Judge Kenneth N. Chantry of Los Angeles.

Mr. Justice Clark, retired associate justice of the Supreme Court of the United States, opened the conference by reporting on his experiences on the federal trial bench in San Francisco. He blamed crowded dockets on archaic file systems, indifferent and poorly trained courthouse personnel, and on lawyers who file long, dilatory pleadings and who are unprepared to argue the law. He suggested more and better court administrators, greater use of computer technology, and training programs for courtroom clerks.

He also questioned the most common answer to court congestion, saying, "We do not need more judges. We have been 'putting on more men' for years, and we are as far behind as ever. What we need is better management."

The other featured speakers were Judge David W. Dyer of Miami, judge of the United States Court of Appeals for the Fifth Circuit, and United States District Judge Frank J. Murray of Boston.

Judge Dyer discussed the relationship between state and federal courts. He found two problem areas—the lack of independence of state court judges, and conflicting decisions caused by the overlapping jurisdiction of the two systems.

He called for the elimination of politically elected judges by adoption of plans for merit selection and urged judges of both systems to work together to expand the role of the state courts.

Judge Murray talked about the challenges faced by the courts as a "new breed of apostles of unrest" attacks the dignity of the courts. He outlined recommendations for handling possible contempt of court and cautioned his audience to remember that the goal of any trial is "to reach a definitive conclusion of the matter at hand," and not to exact revenge for insults to the court.

The primary topics were court management, automobile insurance plans, and methods to increase the prestige and effectiveness of the trial bar.

Participating as speakers, in addition to Judge Boyle, Dean Hyde, Judge Dickson, and Judge Chantry, were Judge Horace W. Gilmore of Detroit, Edward C. Gallas of New York, Judge Walter J. McLaughlin of Boston, Delmar Karlen of New York, Walter H. Beckham, Jr., of Miami, Ernest C. Friesen, Jr., of Denver, and William B. Eldridge of Washington, D.C.

The next conference will be held during October, 1971, in Detroit.

Michigan Decision Advances Concept of Unified Court

A judicial decision destined to become a landmark in the field of court administration and judicial independence has been handed down by the Supreme Court of Michigan. The court held that a court has the inherent power to bind the state or the county contractually when an expenditure is necessary to exercise its judicial powers.

The case, *Judges for Third Judicial Circuit v. County of Wayne, et al,* 172 N.W. 2d 436 (1969) is an important advance in the concept of the unified court in Michigan and in other states.

The court held that *irrespective of the statute on the subject,* a judicial assistant of the type contemplated by the statute is a practical necessity for the effective continuing operation of a metropolitan circuit court consisting of 27 judges and that the Circuit Court had *inherent* power to hire such staff as it needed.

STATEMENT OF OWNERSHIP, MANAGEMENT AND CIRCULATION
(Act of October 23, 1962; Section 4369, Title 39, United States Code)

1. Date of filing: September 28, 1970.
2. Title of publication: Judicature, The Journal of the American Judicature Society.
3. Frequency of issue: Ten times yearly; monthly except for June-July and August-September.
4. Location of known office of publication: 1155 East 60th Street, Chicago, Illinois 60637.
5. Location of the headquarters or general business offices of the publishers: Same.
6. Names and addresses of publisher, editor, and managing editor: Publisher: American Judicature Society, 1155 East 60th Street, Chicago, Illinois 60637; Editor: Glenn R. Winters, same; Managing Editor: Willis R. Tribler, same.
7. Owner: American Judicature Society, 1155 East 60th Street, Chicago, Illinois 60637.
8. Known bondholders, mortgagees, and other security holders owning or holding one percent or more of total amount of bonds, mortgages or other securities: None.
9. For completion by nonprofit organizations authorized to mail at special rates: The purpose, function and nonprofit status of this organization and the exempt status for Federal income tax purposes have not changed during preceding 12 months.
10. Extent and nature of circulation (first figure in each category is average number of copies of each issue during preceding 12 months; second figure is actual number of copies of single issue published nearest to filing date):
A. Total number of copies printed (net press run): 54,325; 52,600.
B. Paid circulation:
1. Sales through dealers and carriers, street vendors and counter sales: None; none.
2. Mail subscriptions: 46,000; 46,600.
C. Total paid circulation: 46,000; 46,600.
D. Free distribution by mail, carrier, or other means: 4,400; 4,700.
E. Total distribution: 50,400; 51,300.
F. Office use, left over, unaccounted, spoiled after printing: 3,925; 1,300.
G. Total: 54,325; 52,600.
I certify that the statements made by me above are correct and complete.

MOBILE AND MODULAR HOMES FOR COLD REGIONS

DAVID SCHAEFER

The Federal government has estimated that 27 million new homes will be needed in the next 10 years. Presently, the home construction industry is capable of building about 1.8 million homes per year, or 18 million in the next 10 years. If this were the only method of production America could expect a shortage of 9 million homes by 1980, but fortunately the mobile and modular home industries can offer some help. Washington recently forecasted that by 1980 one in every five Americans will be living in a factory-built home.

Alaska is in a more desperate situation than most other states. A significant portion of its population lives in substandard homes and the State's growth rate is higher. Anchorage quadrupled its population between 1950 and 1960, while the Fairbanks population tripled during these same years. Such growth rates are not uncommon for other Alaskan cities and show no signs of decreasing. In some cases they are increasing. During the month of October 1970 there were 1,334 homes under construction in Anchorage. The role of factory-built homes is becoming more important. Anchorage added 750 new mobile home spaces to existing and new mobile home courts in 1970; all these spaces are presently filled.

Instant Housing

What can factory-built housing offer? First and foremost it can fill the gap between housing needs and capabilities. Secondly, it can offer substantial savings in initial cost. And thirdly, it is in effect "instant housing" which is important to Alaskans since they face short construction seasons: A factory works year-round and can ship homes any place on demand.

Factory processes enable a company to assemble a home much faster than a normal contractor could put up a "stick built" one. On an assembly line it is not uncommon for a 12 x 60 mobile home to be built in as few as 200 man-hours. Some large companies in California produce 20 million square feet of building per year, equivalent to 20,000 homes of 1,000 square feet, or enough to give every family in he Fairbanks area a new home in one year.

Mobile and Modular

The zenith of factory-built homes are the modular and mobile homes. This industry is one of the fastest growing in the United States, building homes that require minimal on-site preparation. The mobile home only requires hookup of outside electrical, water and waste systems. The modular home requires these three features plus a foundation. A mobile home can be set up in a matter of hours, while the modular home requires a couple of days.

The mobile is basically a rectangular box space frame. Most manufacturers build these up to 14 feet wide and 68 feet long, generally the maximum allowable size due to transportation restrictions. The double-wide is a third type of finished factory home which might be mentioned here. This is merely two mobile homes bolted together at the home site, affording more living space. It is built to the same specifications as the normal mobile home, usually those of the Mobile Home Manufacturers Association sponsored ASA 119.1.

The modular home is in effect a "stick built" factory home. It must conform to all local building codes, and in some ways is better constructed than a "stick built" since it must stand up during transportation to the home site. Modular units are also popular for apartments, town houses and motels. When used in these capacities they must meet local building and fire codes for multifamily dwellings.

Design Limitations

Housing is one of the few commodities that is not mass produced, but if Alaskans are to receive the adequate housing they need they must rely at least partially on factory-built homes. At the same time they must insist the homes meet the basic requirements for the State's special climatic conditions. The most economical structure is not necessarily the one with the lowest initial cost. The actual cost depends on the initial cost plus the cost of maintaining the structure throughout its useful life.

For a home to function properly in an Arctic or subarctic climate, certain aspects of design must be given greater importance by the builder. For instance, large furnaces capable of keeping the unit comfortable at 50 degrees below zero are necessary, as are roofs capable of withstanding 30 and 40 pounds per square foot snow loads.

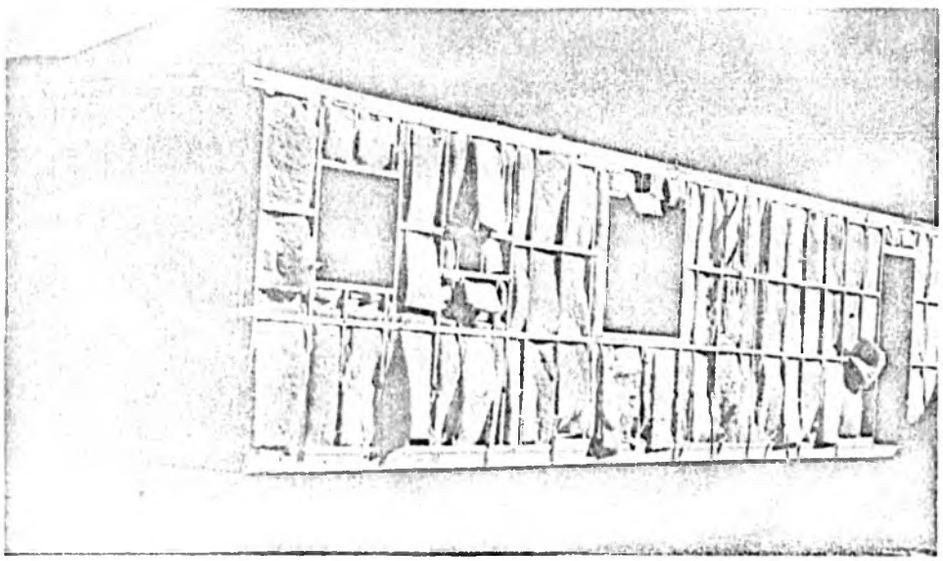
One of the largest problems of factory-built homes rises from the reluctance of manufacturers to design special units for the relatively small market potential of cold regions. There is currently a mobile and modular home factory in Palmer, Alaska. Hopefully this factory will build exclusively for boreal environments.

Construction

Mobile homes generally have 2 x 3 wall construction with 1 to 2½ inches of fiber glass insulation. The interior wall is 3/16 to 1/4 inch prefinished paneling and the exterior is 0.019 inch aluminum sheeting. The maximum insulating quality of such a wall is R=10, with most mobile homes having an R=5 insulating factor. In interior Alaska, however, it is almost mandatory that walls have at least an R=15. Four inches of fiber glass insulation give an R=16 insulating factor. Modular homes generally have a 2 x 4 wall construction with plasterboard and prefinished paneling on the interior, and plywood or siding on the exterior. These homes have 3½ inches of insulation, sufficient for cold regions.

A mobile home generally does not have a vapor barrier on the interior

'71 Spring Issue



Typical mobile home prior to installation of exterior finish. Insulation thickness 1-1/8", no vapor barrier, and insulation is not stapled to studs.

side. In fact many manufacturers put a vapor barrier on the exterior wall. A vapor barrier is to intercept moisture as it passes through the interior wall, for if it is allowed to condense within the insulation ice or frost will form, considerably reducing the insulating quality of the wall and causing other problems when the ice melts. In cold regions the difference in vapor pressure between the interior and exterior of a structure can be nearly 1/2 pound per square inch. Ventilation can help reduce the vapor problem, but ventilation is insufficient when outside temperatures are below -25°F. Modular home manufacturers generally put vapor barriers on the warm side of the structure. They seem to have more flexible assembly line processes that allow modifications for climatic conditions.

Another area of importance to cold regio. home owners is the heating system installed in the units. Here again, modular home builders can furnish almost any kind and size heater. Mobile home manufacturers on the other hand are restricted: only a few companies make heating units especially for mobile homes. It is not uncommon for homes to be shipped to Alaska with insufficient heating capacity. With an outside air temperature of -50°F and an inside temperature of +70°F, an R=10 wall will transmit about 12 BTU/HR/ft². If there are 4 air changes per hour the heating requirement for a home with 3,000 square feet of wall space will be about 110,000 BTU/hr. The largest furnace provided for mobile homes is about 85,000 BTU/hr. Hence, on those days when the temperature is extremely cold the home owner can expect some discomfort. Also, there is increased fire hazard from overworking a furnace. Every effort should be made by dealers and customers to insure that the furnace of the home is of adequate size.

Design criteria for snow and wind loads generally call for 30 pounds per square foot for most of Alaska. There are some areas, notably around Valdez, where snow loads are considerably higher. But the Mobile Home Manufacturers Association sponsored code only recommends roof truss design for 20 pounds per square foot. This inadequate feature has caused some problems in the Fairbanks area this winter. Several new mobile home roofs collapsed due to excessive snow. Others were near collapse, but the owners removed the snow before permanent damage occurred. Modular homes generally call for roof truss design of 40 to 55 pounds per square foot live load.

When constructing a normal "stick built" home the builder normally covers the studs with plasterboard, or some other fire retardant material. Mobile homes, however, do not use this method and hence have a tendency to burn very fast when they happen to catch fire. Exits from mobile homes are often limited also. The manufacturer is required to put in a second door for the fire exit but this is normally a metal clad mobile home door. During the winter months these doors often frost shut, or the home owner covers them to prevent frosting. In any event, during the time of greatest fire hazard there is often only one usable exit from the home. The furnaces are generally in the middle of the home and should a person be caught in a back bedroom when a fire starts he has very little time to get out. Although some manufacturers are using a fire retardant prefinished panel for interior finishing, they are unfortunately in the minority.

These are some examples of the special considerations manufacturers of factory-built homes must take if they are going to supply a product suitable to cold regions. Consumers, as well, must demand their new homes have as many arctic features as possible. They must also consider a mobile or modular home a perma-

Bow truss used in mobile homes. Design calls for only 20 psf snow load.

HB - 358

Re: H.B. 358 - Relating to Hospitals

Dear Allan:

I have your letter of January 12 concerning your wish to be heard, as the representative of Blue Cross Washington-Alaska, on the subject bill. This bill is still in the committee of first referral (Commerce) and will not be in this committee until reported back to the House.

You may wish to request Representative Kerttula that you be heard by Commerce. In any case, I will be happy to have your presentation when, and if, the bill reaches Judiciary.

Sincerely,

William J. Moran

Re: H. B. 358

Dear Bill:

On April 1, 1971, I advised you by letter that I represented Blue Cross Washington Alaska, Inc., and that we had a special interest in H. B. 358, which is in your committee. We would again appreciate the opportunity to appear before your committee prior to any action on the bill. We will be prepared to appear before your committee at your convenience.

Yours very truly,

ALLAN A. ENGSTROM

3/26/71

 UVC NCUTLO 1971 HB-363

Staff Report: Nebraska and New York have laws identical in substance to the proposal. In Nebraska the level is 0.10% and in New York it is 0.15% (reduced to 0.12% in 1971).

11. COMBINED INFLUENCE OF ALCOHOL AND DRUGS

Subcommittee Recommendation: Add a new section to the Code making it unlawful for a person to drive while under the combined influence of alcohol and any drug.

Summary of Deliberations: At the 1968 meeting, the Subcommittee reaffirmed its earlier approval of the proposal in principle. However, certain evidentiary problems, such as the presumption of non-intoxication when the blood alcohol level is under 0.05%, were noted in conjunction with adopting a provision on the combined use of alcohol and drugs. Thus, the proposal was tabled for the purpose of a thorough review by the staff concerning any possible difficulties that must be overcome in enforcing such a law.

At the 1970 meeting, the staff reiterated its opinions on this proposal and amplified its report on state laws. The major difficulty with such a law was determined to be the absence of any accurate testing methods to show the presence of drugs or the effect on a person of the combined use of drugs and alcohol. From that standpoint there would be no more difficulty with the proposal than with the large number of existing laws on driving under the influence of drugs alone. It was noted that the NHTSA is currently studying drug use by drivers and is concerned about the difficulty in obtaining convictions under laws designed to combat the problem of drugs and driving.

A motion to amend the proposal by adding express definitions of what constitutes a drug was defeated. A motion to approve the proposal was passed unanimously.

Amendment that was offered was too indefinite - not so much that it didn't need a definition of drug.

There is ample evidence that the combination of alcohol and certain kinds of drugs such as barbiturates or other central nervous system depressants can seriously impair mental and physical functions even when neither substance, alone, is ingested in sufficient quantity to cause any adverse effects. Obviously, then, such combinations are particularly dangerous from the standpoint of operating a motor vehicle and have been so recognized by the legislatures of five states whose laws have been amended to prohibit driving under the combined influence of alcohol and a drug. These laws provide:

California -- "It is unlawful for any person who is under the influence of intoxicating liquor, or under the combined influence of intoxicating liquor and any drug, to drive a vehicle upon any highway."

Connecticut -- prohibits the operation of a motor vehicle while under the influence of intoxicating liquor or any drug, or both.

Iowa -- prohibits operation of a motor vehicle on the highway while in an intoxicated condition or under influence of narcotic and/or hypnotic drugs or a combination of such drugs and alcohol.

Massachusetts -- prohibits operation of a motor vehicle "while under the influence of intoxicating liquor or narcotic drugs, as defined in section 197, ch. 94, or under the influence of barbiturates, amphetamines, or other hypnotic or somnifacient drugs, or under the influence of the vapors of glue, carbon tetrachloride, acetone, ethylene dichloride, toluene chloroform, xylene or any combination thereof."

Minnesota -- "It shall be unlawful . . . for any of the following persons to drive, operate or be in actual physical control of any vehicle within this State:

(a) A person who is under the influence of an alcoholic beverage or narcotic drug;

(b) A person who is an habitual user of narcotic drugs;

(c) A person who is under the influence of a combination of any two or more of the elements named in subsections (a) and (b)."

Even without the existence of such express statutes, however, several courts have held that a person operating a motor vehicle while under the combined influence of alcohol and a drug is guilty of driving while under the influence of intoxicating liquor if there is evidence showing that his ability to drive, although partially impaired by the use of a drug, is also adversely affected by the consumption of an alcoholic beverage. Several factors should be considered in determining whether to prosecute a person for driving while under the influence of a drug, or both: the nature of the drug involved, the extent of use of the drug and the alcoholic beverage, the wording of the applicable laws, state rules on criminal procedures, interpretative court decisions and applicable constitutional provisions. Some interesting legal questions raised in this connection are:

(1) Can a person charged with driving while under the influence of intoxicating liquor, and found not guilty by reason of being exclusively under the influence of a drug, be re-charged and re-tried for having driven while under the influence of a drug, presuming, of course, that it is unlawful to drive while under the influence of the particular drug used by that person? The answer would depend to a large extent on the interpretation of the law or laws involved and state constitutional provisions on "double jeopardy." The issue would have to be similarly resolved if a person were charged with driving while under the influence of a drug and it was shown during the trial that he was exclusively under the influence of intoxicating liquor.

(2) Can an indictment or complaint allege in one count that the person was driving while under the influence of intoxicating liquor and allege in a second count that the person was driving while under the influence of a drug?

(3) What is the legal effect of a low blood-alcohol ratio under a chemical test law when the person has consumed both liquor and drugs? If the law contains the same chemical test provisions as the Code, for example, a blood alcohol ratio of less than 0.05 percent would give rise to the presumption that the defendant was not under the influence of intoxicating liquor and, therefore, further evidence would have to be introduced to rebut that presumption.

Staff Survey

The staff has contacted enforcement and administrative personnel in each of the states with a comparable law to determine what major difficulties are encountered. The response ranged from enthusiastic (California) to unfavorable (Massachusetts).

In California it was determined that prosecutions for driving while under the combined influence of alcohol and drugs are instituted when preliminary investigation reveals the probability that simple drunk driving charges will not be successful, and, at the same time, evidence as to the use of drugs will not sustain a finding that the defendant was "incapable of driving safely." Officials in that state report a large number of convictions for driving under the combined influence without any special problem for prosecutors to overcome. It should be noted, however, that California does not establish presumptions for blood alcohol since it omits a law comparable to UVC § 11-902(b).

CONSOLIDATION OF ARTICLE 9 OFFENSES

If the National Committee approves the recommendations in the prior two items, two new sections would be added to Article 9 of Chapter 11 -- one dealing with an unlawful alcohol-blood level and a second dealing with alcohol-drug driving.

Because this article already has sections numbered 11-902, 11-902.1 and 11-902.3, merely adding these two sections would create two more sections having a decimal (11-902.4 and 11-902.5). To avoid renumbering problems and to consolidate the four offenses, the staff recommends the following draft:

§ 11-902 -- Drivers with ability impaired by alcohol or drugs

(a) A person shall not drive or be in actual physical control of any vehicle while:

1. There is 0.10% or more by weight of alcohol in his blood;
2. Under the influence of alcohol;
3. Under the influence of any drug to a degree which renders him incapable of safely driving; or

4. Under the combined influence of alcohol and any drug to a degree which renders him incapable of safely driving.

(b) The fact that any person charged with violating this section is or has been legally entitled to use a drug shall not constitute a defense against any charge of violating this section.

(c) Every person convicted of violating this section shall be punished by imprisonment for not less than 10 days nor more than one year, or by fine of not less than $100 nor more than $1,000, or by both such fine and imprisonment. On a second or subsequent conviction he shall be punished by imprisonment for not less than 90 days nor more than one year, and, in the discretion of the court, a fine of not more than $1,000.

The above draft would replace existing §§ 11-902(a), 11-902.1 and 11-902.2 and would incorporate the two new provisions. Section 11-902.2(b) would be deleted because license revocation is and should be covered in UVC Chapter 6. Also deleted are the portions of existing § 11-902.1 dealing with habitual users of narcotic drugs and persons under the influence of narcotic drugs. The latter category of persons is adequately covered by draft § 11-902(a)3. As to driving by habitual users, the staff suggests that draft § 11-902(a)3 should also be adequate and there is no need to continue this prohibition.

The Subcommittee recommendation would additionally require changes in several other Code sections to reflect the changes made in § 11-902. Thus the Code's chemical test provision would be revised and repositioned, and Code §§ 6-205, 6-205.1 and 16-105 would require revision as follows:

§ 11-902.1 -- Chemical tests

(a) Upon the trial of any civil or criminal action or proceeding arising out of acts alleged to have been committed by any person while driving or in actual physical control of a vehicle while ability was impaired by alcohol or drugs, evidence of the amount of alcohol or drug in a person's blood at the alleged time, as determined by a chemical analysis of the person's blood, urine, breath or other bodily substance, shall be admissable. Where such a chemical test is made the following provisions shall apply:

1. [(c)] Chemical analyses of the person's blood, urine, breath, or other bodily substance to be considered valid under the provisions of this section shall have been performed according to methods approved by the State department of health and by an individual possessing a valid permit issued by the State department of health for this purpose. The State department of health is authorized to approve satisfactory techniques or methods, to ascertain the qualifications and competence of individuals to conduct such analyses, and to issue permits which shall be subject to termination or revocation at the discretion of the State department of health.

2. [(d)] When a person shall submit to a blood test at the request of a law enforcement officer under the provisions of § 6-205.1, only a physician or a registered nurse (or other qualified person) may withdraw blood for the purpose of determining the alcoholic content therein. This limitation shall not apply to the taking of breath or urine specimens.

3. [(e)] The person tested may have a physician, or a qualified technician, chemist, registered nurse, or other qualified person of his own choosing administer a chemical test or tests in addition to any administered at the direction of a law enforcement officer. The failure or inability to obtain an additional test by a person shall not preclude the admission of evidence relating to the test or tests taken at the direction of a law enforcement officer.

4. [(f)] Upon the request of the person who shall submit to a chemical test or tests at the request of a law enforcement officer, full information concerning the test or tests shall be made available to him or his attorney.

5. [4.] Percent by weight of alcohol in the blood shall be based upon grams of alcohol per 100 cubic centimeters of blood. (REVISED, 1968.)

(b) Upon the trial of any civil or criminal action or proceeding arising out of acts alleged to have been committed by any person while driving or in actual physical control of a vehicle while under the influence of [intoxicating liquor] the amount of alcohol in the person's blood at the time alleged as shown by chemical analysis of the person's blood, urine, breath, or other bodily substance shall give rise to the following presumptions:

1. If there was at that time 0.05 percent or less by weight of alcohol in the person's blood, it shall be presumed that the person was not under the influence of [intoxicating liquor.]

2. If there was at that time in excess of 0.05 percent but less than 0.10 percent by weight of alcohol in the person's blood, such fact shall not give rise to any presumption that the person was or was not under the influence of [intoxicating liquor,] but such fact may be considered with other competent evidence in determining whether the person was under the influence of [intoxicating liquor.]

[3. If there was at that time 0.10 percent or more by weight of alcohol in the person's blood, it shall be presumed that the person was under the influence of intoxicating liquor.]

(Former subsection (b)4 moved to (a)5 above.)

3. [5.] The foregoing provisions of paragraph (b) shall not be construed as limiting the introduction of any other competent evidence bearing upon the question whether the person was under the influence of [intoxicating liquor.] → alcohol.

Comments: This draft moves the chemical test provisions out of § 11-902. The new section deals solely with chemical tests and is divided into two subsections. Subsection (a) deals with the procedures for performing chemical tests and it would be applicable to chemical tests performed where any of the four offenses under § 11-902 is suspected. The subsection specifically provides that the evidence of the amount of alcohol or drug in the blood as determined by the chemical test would be admissable. Subsection (b) retains the presumptive levels, except the presumption based upon a level of 0.10% which is deleted because it is superfluous in view of new § 11-902(a)1 making it unlawful for a driver to have a blood/alcohol ratio of 0.10% or more.

§ 6-205—Mandatory revocation of license by department

The department shall forthwith revoke the license of any driver upon receiving a record of such driver's conviction of any of the following offenses:

1. Manslaughter (or homicide by vehicle) resulting from the operation of a motor vehicle;

2. Driving or being in actual physical control of a motor vehicle while [under the influence of intoxicating liquor]; → ability is impaired by alcohol or drug as prohibited by § 11-902

[3. Driving a motor vehicle while an habitual user or under the influence of any narcotic drug or while under the influence of any other drug to a degree which renders him incapable of safely driving a motor vehicle;]

3. [4.] Any felony in the commission of which a motor vehicle is used;

4. [5.] Failure to stop, render aid, or identify himself as required by § 10-102 in the event of a motor vehicle accident resulting in the death or personal injury of another;

5. [6.] Perjury or the making of a false affidavit or statement under oath to the department under this act or under any other law relating to the ownership or operation of motor vehicles;

6. [7.] Unauthorized use of a motor vehicle belonging to another which act does not amount to a felony.[13] (SECTION REVISED, 1968.)

§ 6-205.1—Revocation of license in event of refusal to submit to chemical tests [14]

(a) Any person who operates a motor vehicle upon the [public] highways of this State shall be deemed to have given consent, subject to the provisions of § [11-902] to a chemical test or tests of his blood, breath, or urine for the purpose of determining the alcoholic content of his blood if arrested for any offense arising out of acts alleged to have been committed while the person was driving or in actual physical control of a motor vehicle while [under the influence of intoxicating liquor]. The test or tests shall be administered at the direction of a law enforcement officer having reasonable grounds to believe the person to have been driving or in actual physical control of a motor vehicle upon the [pub'] highways of this State while [under the influence of intoxicating liquor]. The law enforcement agency by which such officer is employed shall designate which of the aforesaid tests shall be administered.

(b) Any person who is dead, unconscious or who is otherwise in a condition rendering him incapable of refusal, shall be deemed not to have withdrawn the consent provided by paragraph (a) of this section and the test or tests may be administered, subject to the provisions of § [11-902].

(c) If a person under arrest refuses upon the request of a law enforcement officer to submit to a chemical test designated by the law enforcement agency as provided in paragraph (a) of this section, none shall be given, but the department, upon the receipt of a sworn report of the law enforcement officer that he had reasonable grounds to believe the arrested person had been driving or was in actual physical control of a motor vehicle upon the [public] highways of this State while [under the influence of intoxicating liquor] and that the person had refused to submit to the test upon the request of the law enforcement officer, shall revoke his license subject to review as hereinafter provided.

(d) Upon revoking the license, as hereinbefore in this section directed, the department shall immediately notify the person in writing and upon his request shall afford him an opportunity for a hearing in the same manner and under the same conditions as is provided in § 6-206(c) for notification and hearings in the cases of discretionary suspension of licenses, except that the scope of such a hearing for the purposes of this section shall cover the issues of whether a law enforcement officer had reasonable grounds to believe the person had been driving or was in actual physical control of a motor vehicle upon the [public] highways of this State while [under the influence of intoxicating liquor] whether the person was placed under arrest, and whether he refused to submit to the test upon request of the officer. Whether the person was informed that his privilege to drive would be revoked if he refused to submit to the test shall not be an issue. The department shall order that the revocation either be rescinded or sustained.

(e) If the revocation is sustained after such a hearing, the person whose license has been revoked, under the provisions of this section, shall have the right to file a petition in the appropriate court to review the final order of revocation by the department in the same manner and under the same conditions as is provided in § 6-212 in the cases of discretionary revocations and suspensions. (NEW SECTION, 1962; REVISED, 1968.)

§ 16-105—Arrests for serious offenses

(a) The authority of a police officer to make an arrest is the same as upon an arrest for a felony when such officer has reasonable and probable grounds to believe that the person arrested has committed any of the following offenses:

1. Homicide by vehicle;

2. Driving, or being in actual physical control of, a vehicle while [under the influence of intoxicating liquor] ability is impaired by alcohol or drug as prohibited by § 11-902

[3. Driving a vehicle while under the influence of any narcotic drug, or driving a vehicle while under the influence of any other drug to a degree which renders the person incapable of safely driving a vehicle;]

3. [4.] Failure to stop, or failure to give information, or failure to render reasonable assistance, in the event of an accident resulting in death or personal injuries, as prescribed in §§ 10-102 and 10-104;

4. [5.] Failure to stop, or failure to give information, in the event of an accident resulting in damage to a vehicle or to other property, as prescribed in §§ 10-103 to 10-105 inclusive; (REVISED, 1968.)

5. [6.] Reckless driving;

6. [7.] Racing on the highway; or (NEW, 1968.)

7. [8.] Willfully fleeing from or attempting to elude a police officer. (NEW, 1968.)

Provided, however, that the manner of making arrests under this section shall be as in misdemeanor cases.

(b) Whenever any person is arrested as authorized in this section he shall be taken without unnecessary delay before the proper magistrate as specified in § 16-111, except that in the case of the offenses designated in paragraphs 5, 6, 7 and 8, a police officer shall have the same discretion as is provided in other cases in § 16-107. (REVISED, 1968.)

were approved November 1971

Comments: These revisions to Code §§ 6-205, 6-205.1 and 16-105 are necessary to provide for license revocation, implied consent to testing, and felony arrest powers in the case of the alcohol and drug offenses other than driving while under the influence.

13. TREATMENT FOR DRIVERS WITH ALCOHOL OR DRUG PROBLEM

Subcommittee Recommendation: Amend the penalty for a violation of § 11-902 to allow a commitment or an order to submit to supervised treatment as an alternate to fine or imprisonment.

ice for a total period of five consecutive years, and upon being relieved by the appropriate Secretary from active Federal service, National Guard, or Air National Guard units, shall, insofar as practicable, be returned to their National Guard or Air National Guard status in their respective States, Territories, the District of Columbia, and Puerto Rico, with pertinent records, colors, histories, trophies, and other historical impedimenta. (June 24, 1948, ch. 625, title I, § 21, as added June 30, 1950, ch. 445, § 2, 64 Stat. 318, and amended June 19, 1951, ch. 144, title I, § 1(x), 65 Stat. 87; July 7, 1952, ch. 584, § 1, 66 Stat. 440.)

REFERENCES IN TEXT

Selective Service Act of 1948, as amended, referred to in the first par., was redesignated Universal Military Training and Service Act by the amendment in act June 19, 1951, ch. 144, title I, § 1(a), 65 Stat. 75 to act June 24, 1948, ch. 625, title I, § 1(a), 62 Stat. 604, and was again redesignated Military Selective Service Act of 1967 by the amendment in Pub. L. 90-40, § 1(1), June 30, 1967, 81 Stat. 100. See section 451(a) of this Appendix.

AMENDMENTS

1952—Act July 7, 1952, authorized the President to retain unit organizations and their equipment, exclusive of individual members, for a period of five years.

1951—Act June 19, 1951, substituted "July 1, 1953" for "July 9, 1951", "twenty-four months" for "twenty-one months", and adding last sentence.

EX. ORD. NO. 10271. DELEGATION OF PRESIDENT'S AUTHORITY

Ex. Ord. No. 10271, July 7, 1951, 16 F.R. 6661, provided:

There is hereby delegated to the Secretary of Defense the authority vested in the President by section 21 of the Universal Military Training and Service Act (64 Stat. 318), as amended by the 1951 Amendments to the Universal Military Training and Service Act (65 Stat. 87; Public Law 51, 82d Congress) [this section], to order into the active military or naval service of the United States for a period not to exceed twenty-four months, with or without their consent, any or all members and units of any or all Reserve components of the Armed Forces of the United States and retired personnel of the Regular Armed Forces: *Provided*, that so much of the authority of the President under the said section 21, as amended [this section], as relates to any Reserve component of the United States Coast Guard or to retired personnel of the Regular Coast Guard is hereby delegated to the Secretary of the Treasury.

The Secretary of Defense is hereby authorized to redelegate, subject to such conditions as the Secretary may deem appropriate, to the Secretaries of the Army, Navy, and Air Force such functions under this order as affect their respective services.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 451, 453, 454, 455, 456, 459, 460, 461, 462, 463, 464, 465, 466, 467, 469, 470 of this Appendix.

§ 472. Period of increased service applicable to all personnel.

Wherever in this amendatory Act the period of active service for any category of persons is increased, such increased period of service shall be applicable to all persons in such category serving on active duty in the Armed Forces on the date of the enactment of this amendatory Act [June 19, 1951]. (June 19, 1951, ch. 144, title I, § 4, 65 Stat. 88.)

REFERENCES IN TEXT

Date of the enactment of this amendatory Act, referred to in the text, is act June 19, 1951, ch. 144, 65 Stat. 75, which generally amended this Appendix. See distribution tables for distribution of act.

CODIFICATION

Section was enacted as part of the 1951 Amendments to the Universal Military Training and Service Act, act June 19, 1951, ch. 144, 65 Stat 75, and not as part of the Military Selective Service act of 1967, Act June 24, 1948, ch. 625, 62 Stat. 604. Title I of Act June 24, 1948, ch. 625, as amended, is classified to sections 451, 453, 454, 455, 456, and 458—471 of this Appendix. Title II of the Act was classified to various sections of former Title 10, Army and Air Force. See Tables volume. For location of such sections in revised Title 10, Armed Forces, see disposition table set out at the beginning of Title 10, Armed Forces.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 451, 453, 454, 455, 456, 459, 460, 461, 462, 463, 464, 465, 466, 467, 469, 470 of this Appendix.

§ 473. Regulations governing liquor sales; penalties.

The Secretary of Defense is authorized to make such regulations as he may deem to be appropriate governing the sale, consumption, possession of or traffic in beer, wine, or any other intoxicating liquors to or by members of the Armed Forces or the National Security Training Corps at or near any camp, station, post, or other place primarily occupied by members of the Armed Forces or the National Security Training Corps. Any person, corporation, partnership, or association who knowingly violates the regulations which may be made hereunder shall, unless otherwise punishable under the Uniform Code of Military Justice, be deemed guilty of a misdemeanor and be punished by a fine of not more than $1,000 or imprisonment for not more than twelve months, or both. (June 19, 1951, ch. 144, title I, § 6, 65 Stat. 88.)

REFERENCES IN TEXT

Uniform Code of Military Justice, referred to in the text, is classified to chapter 47 of Title 10, Armed Forces.

CODIFICATION

Section was enacted as a part of the 1951 Amendments to the Universal Military Training and Service Act, act June 19, 1951, ch. 144, 65 Stat. 75, and not as a part of the Military Selective Service Act of 1967, act June 24, 1948, ch. 625, 62 Stat. 604. Title I of Act June 24, 1948, ch. 625, as amended, is classified to sections 451, 453, 454, 455, 456, and 458—471 of this Appendix. Title II of the Act was classified to various sections of former Title 10, Army and Air Force. See Tables volume. SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 451, 453, 454, 455, 456, 459, 460, 461, 462, 463, 464, 465, 466, 467, 469, 470 of this Appendix.

SOLDIERS' AND SAILORS' CIVIL RELIEF ACT OF 1940

ACT OCT. 17, 1940, CH. 888, 54 STAT. 1178

Sec.
501. Short title.

ARTICLE I.—GENERAL PROVISIONS

510. Purpose; suspension of enforcement of civil liabilities.
511. Definitions.
512. Territorial application; jurisdiction of courts; form of procedure.
513. Protection of persons secondarily liable.
514. Extension of benefits to citizens serving with forces of war allies.
515. Notice of benefits to persons in and persons entering military service.

Re HB 379

(Former subsection (b)4 moved to (a)5 above.)

3. [5.] The foregoing provisions of paragraph (b) shall not be construed as limiting the introduction of any other competent evidence bearing upon the question whether the person was under the influence of [intoxicating liquor.] → alcohol.

Comments: This draft moves the chemical test provisions out of § 11-902. The new section deals solely with chemical tests and is divided into two subsections. Subsection (a) deals with the procedures for performing chemical tests and it would be applicable to chemical tests performed where any of the four offenses under § 11-902 is suspected. The subsection specifically provides that the evidence of the amount of alcohol or drug in the blood as determined by the chemical test would be admissable. Subsection (b) retains the presumptive levels, except the presumption based upon a level of 0.10% which is deleted because it is superfluous in view of new § 11-902(a)1 making it unlawful for a driver to have a blood/alcohol ratio of 0.10% or more.

§ 6-205—Mandatory revocation of license by department

The department shall forthwith revoke the license of any driver upon receiving a record of such driver's conviction of any of the following offenses:

1. Manslaughter (or homicide by vehicle) resulting from the operation of a motor vehicle;

2. Driving or being in actual physical control of a motor vehicle while [under the influence of intoxicating liquor];

[3. Driving a motor vehicle while an habitual user or under the influence of any narcotic drug or while under the influence of any other drug to a degree which renders him incapable of safely driving a motor vehicle;]

3. [4.] Any felony in the commission of which a motor vehicle is used;

4. [5.] Failure to stop, render aid, or identify himself as required by § 10-102 in the event of a motor vehicle accident resulting in the death or personal injury of another;

5. [6.] Perjury or the making of a false affidavit or statement under oath to the department under this act or under any other law relating to the ownership or operation of motor vehicles;

6. [7.] Unauthorized use of a motor vehicle belonging to another which act does not amount to a felony.[13] (SECTION REVISED, 1968.)

ability is impaired by alcohol under as prohibited in § 11-902

§ 6-205.1—Revocation of license in event of refusal to submit to chemical tests [14]

(a) Any person who operates a motor vehicle upon the [public] highways of this State shall be deemed to have given consent, subject to the provisions of § [11-902] to a chemical test or tests of his blood, breath, or urine for the purpose of determining the alcoholic content of his blood if arrested for any offense arising out of acts alleged to have been committed while the person was driving or in actual physical control of a motor vehicle while [under the influence of intoxicating liquor]. The test or tests shall be administered at the direction of a law enforcement officer having reasonable grounds to believe the person to have been driving or in actual physical control of a motor vehicle upon the [public] highways of this State while [under the influence of intoxicating liquor]. The law enforcement agency by which such officer is employed shall designate which of the aforesaid tests shall be administered.

(b) Any person who is dead, unconscious or who is otherwise in a condition rendering him incapable of refusal, shall be deemed not to have withdrawn the consent provided by paragraph (a) of this section and the test or tests may be administered, subject to the provisions of § [11-902].

(c) If a person under arrest refuses upon the request of a law enforcement officer to submit to a chemical test designated by the law enforcement agency as provided in paragraph (a) of this section, none shall be given, but the department, upon the receipt of a sworn report of the law enforcement officer that he had reasonable grounds to believe the arrested person had been driving or was in actual physical control of a motor vehicle upon the [public] highways of this State while [under the influence of intoxicating liquor] and that the person had refused to submit to the test upon the request of the law enforcement officer, shall revoke his license subject to review as hereinafter provided.

(d) Upon revoking the license, as hereinbefore in this section directed, the department shall immediately notify the person in writing and upon his request shall afford him an opportunity for a hearing in the same manner and under the same conditions as is provided in § 6-206(c) for notification and hearings in the cases of discretionary suspension of licenses, except that the scope of such a hearing for the purposes of this section shall cover the issues of whether a law enforcement officer had reasonable grounds to believe the person had been driving or was in actual physical control of a motor vehicle upon the [public] highways of this State while [under the influence of intoxicating liquor] whether the person was placed under arrest, and whether he refused to submit to the test upon request of the officer. Whether the person was informed that his privilege to drive would be revoked if he refused to submit to the test shall not be an issue. The department shall order that the revocation either be rescinded or sustained.

(e) If the revocation is sustained after such a hearing, the person whose license has been revoked, under the provisions of this section, shall have the right to file a petition in the appropriate court to review the final order of revocation by the department in the same manner and under the same conditions as is provided in § 6-212 in the cases of discretionary revocations and suspensions. (NEW SECTION, 1962; REVISED, 1968.)

§ 16-105—Arrests for serious offenses

(a) The authority of a police officer to make an arrest is the same as upon an arrest for a felony when such officer has reasonable and probable grounds to believe that the person arrested has committed any of the following offenses:

1. Homicide by vehicle;

2. Driving, or being in actual physical control of, a vehicle while [under the influence of intoxicating liquor;] ability is impaired by alcohol or drug as prohibited by § 11-902

[3. Driving a vehicle while under the influence of any narcotic drug, or driving a vehicle while under the influence of any other drug to a degree which renders the person incapable of safely driving a vehicle;]

3. [4.] Failure to stop, or failure to give information, or failure to render reasonable assistance, in the event of an accident resulting in death or personal injuries, as prescribed in §§ 10-102 and 10-104;

4. [5.] Failure to stop, or failure to give information, in the event of an accident resulting in damage to a vehicle or to other property, as prescribed in §§ 10-103 to 10-105 inclusive; (REVISED, 1968.)

5. [6.] Reckless driving;

6. [7.] Racing on the highway; or (NEW, 1968.)

7. [8.] Willfully fleeing from or attempting to elude a police officer. (NEW, 1968.)

Provided, however, that the manner of making arrests under this section shall be as in misdemeanor cases.

(b) Whenever any person is arrested as authorized in this section he shall be taken without unnecessary delay before the proper magistrate as specified in § 16-111, except that in the case of the offenses designated in paragraphs 5, 6, 7 and 8, a police officer shall have the same discretion as is provided in other cases in § 16-107. (REVISED, 1968.)

Approved November 1971

Comments: These revisions to Code §§ 6-205, 6-205.1 and 16-105 are necessary to provide for license revocation, implied consent to testing, and felony arrest powers in the case of the alcohol and drug offenses other than driving while under the influence.

13. TREATMENT FOR DRIVERS WITH ALCOHOL OR DRUG PROBLEM

Subcommittee Recommendation: Amend the penalty for a violation of § 11-902 to allow a commitment or an order to submit to supervised treatment as an alternate to fine or imprisonment.

ice for a total period of five consecutive years, and upon being relieved by the appropriate Secretary from active Federal service, National Guard, or Air National Guard units, shall, insofar as practicable, be returned to their National Guard or Air National Guard status in their respective States, Territories, the District of Columbia, and Puerto Rico, with pertinent records, colors, histories, trophies, and other historical impediments. (June 24, 1948, ch. 625, title I, § 21, as added June 30, 1950, ch. 445, § 2, 64 Stat. 318, and amended June 19, 1951, ch. 144, title I, § 1(x), 65 Stat. 87; July 7, 1952, ch. 584, § 1, 66 Stat. 449.)

REFERENCES IN TEXT

Selective Service Act of 1948, as amended, referred to in the first par., was redesignated Universal Military Training and Service Act by the amendment in act June 19, 1951, ch. 144, title I, § 1(a), 65 Stat. 75 to act June 24, 1948, ch. 625, title I, § 1(a), 62 Stat. 604, and was again redesignated Military Selective Service Act of 1967 by the amendment in Pub. L. 90-40, § 1(1), June 30, 1967, 81 Stat. 100. See section 451(a) of this Appendix.

AMENDMENTS

1952—Act July 7, 1952, authorized the President to retain unit organizations and their equipment, exclusive of individual members, for a period of five years.

1951—Act June 19, 1951, substituted "July 1, 1953" for "July 9, 1951", "twenty-four months" for "twenty-one months", and adding last sentence.

EX. ORD. NO. 10271. DELEGATION OF PRESIDENT'S AUTHORITY

Ex. Ord. No. 10271, July 7, 1951, 16 F.R. 6661, provided:

There is hereby delegated to the Secretary of Defense the authority vested in the President by section 21 of the Universal Military Training and Service Act (64 Stat. 318), as amended by the 1951 Amendments to the Universal Military Training and Service Act (65 Stat. 87; Public Law 51, 82d Congress) [this section], to order into the active military or naval service of the United States for a period not to exceed twenty-four months, with or without their consent, any or all members and units of any or all Reserve components of the Armed Forces of the United States and retired personnel of the Regular Armed Forces: *Provided*, that so much of the authority of the President under the said section 21, as amended [this section], as relates to any Reserve component of the United States Coast Guard or to retired personnel of the Regular Coast Guard is hereby delegated to the Secretary of the Treasury.

The Secretary of Defense is hereby authorized to redelegate, subject to such conditions as the Secretary may deem appropriate, to the Secretaries of the Army, Navy, and Air Force such functions under this order as affect their respective services.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 451, 453, 454, 455, 456, 459, 460, 461, 462, 463, 464, 465, 466, 467, 469, 470 of this Appendix.

§ 472. Period of increased service applicable to all personnel.

Wherever in this amendatory Act the period of active service for any category of persons is increased, such increased period of service shall be applicable to all persons in such category serving on active duty in the Armed Forces on the date of the enactment of this amendatory Act [June 19, 1951]. (June 19, 1951, ch. 144, title I, § 4, 65 Stat. 88.)

REFERENCES IN TEXT

Date of the enactment of this amendatory Act, referred to in the text, is act June 19, 1951, ch. 144, 65 Stat. 75, which generally amended this Appendix. See distribution tables for distribution of act.

CODIFICATION

Section was enacted as part of the 1951 Amendments to the Universal Military Training and Service Act, act June 19, 1951, ch. 144, 65 Stat 75, and not as part of the Military Selective Service act of 1967, Act June 24, 1948, ch. 625, 62 Stat. 604. Title I of Act June 24, 1948, ch. 625, as amended, is classified to sections 451, 453, 454, 455, 456, and 458—471 of this Appendix. Title II of the Act was classified to various sections of former Title 10, Army and Air Force. See Tables volume. For location of such sections in revised Title 10, Armed Forces, see disposition table set out at the beginning of Title 10, Armed Forces.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 451, 453, 454, 455, 456, 459, 460, 461, 462, 463, 464, 465, 466, 467, 469, 470 of this Appendix.

§ 473. Regulations governing liquor sales; penalties.

The Secretary of Defense is authorized to make such regulations as he may deem to be appropriate governing the sale, consumption, possession of or traffic in beer, wine, or any other intoxicating liquors to or by members of the Armed Forces or the National Security Training Corps at or near any camp, station, post, or other place primarily occupied by members of the Armed Forces or the National Security Training Corps. Any person, corporation, partnership, or association who knowingly violates the regulations which may be made hereunder shall, unless otherwise punishable under the Uniform Code of Military Justice, be deemed guilty of a misdemeanor and be punished by a fine of not more than $1,000 or imprisonment for not more than twelve months, or both. (June 19, 1951, ch. 144, title I, § 6, 65 Stat. 88.)

SOLDIERS' AND SAILORS' CIVIL RELIEF ACT OF 1940

ACT OCT. 17, 1940, CH. 888, 54 STAT. 1178

Sec.
501. Short title.

ARTICLE I.—GENERAL PROVISIONS

510. Purpose; suspension of enforcement of civil liabilities.
511. Definitions.
512. Territorial application; jurisdiction of courts; form of procedure.
513. Protection of persons secondarily liable.
514. Extension of benefits to citizens serving with forces of war allies.
515. Notice of benefits to persons in and persons entering military service.

Re HB 379

Sec.
516. Extension of benefits to persons ordered to report for induction or military service.
517. Effect on rights, remedies, etc., pursuant to written agreements entered after commencement of military service.

ARTICLE II.—GENERAL RELIEF

520. Default judgments; affidavits; bonds; attorneys for persons in service.
521. Stay of proceedings where military service affects conduct thereof.
522. Fines and penalties on contracts, etc.
523. Stay or vacation of execution of judgments, attachments, etc.
524. Duration and term of stays; codefendants not in service.
525. Statutes of limitations as affected by period of service.
526. Maximum rate of interest.
527. Limitations prescribed by internal revenue laws as affected by period of service.

ARTICLE III.—RENT, INSTALLMENT CONTRACTS, MORTGAGES, LIENS, ASSIGNMENTS, LEASES

530. Eviction or distress during military service; stay; penalty for noncompliance; allotment of pay for payment.
531. Installment contracts for purchase of property.
532. Mortgages, trust deeds, etc.
533. Settlement of cases involving stayed proceedings to foreclose mortgage on, resume possession of, or terminate contract for purchase of, personal property.
534. Termination of leases by lessees.
535. Protection of assignor of life insurance policy; enforcement of storage liens; penalties.
536. Extension of benefits to dependents.

ARTICLE IV.—INSURANCE

540. Definitions.
541. Persons entitled to benefits of article; applications; amount of insurance protected.
542. Form of application; reports to Veterans' Administration by insurer; policy deemed modified upon application for protection.
543. Determination of policies entitled to protection; notice to parties; lapse of policies for nonpayment of premiums, etc.
544. Rights and privileges of insured during period of protection.
545. Deduction of unpaid premiums upon settlement of policies maturing during protection.
546. Guaranty of premiums and interest by United States; settlement of amounts due upon expiration of protection; subrogation of United States; crediting debt repayments.
547. Regulations; finality of determinations.
548. Law governing applications for protection prior to October 6, 1942.
549 to 554. Omitted.

ARTICLE V.—TAXES AND PUBLIC LANDS

560. Taxes respecting personalty, money, credits, or realty; sale of property to enforce collection; redemption of property sold; penalty for nonpayment; notice of rights to beneficiaries of section.
561. Rights to public lands not forfeited; grazing lands
562. Homestead entries and settlement claims; service as equivalent to residence and cultivation.
563. Same; death or incapacity during or resulting from service as affecting rights; perfection of rights.
564. Desert-land entries; suspension of requirements.
565. Mining claims; requirements suspended.
566. Mineral permits and leases; suspension of operations and term of permits and leases.
567. Right to take action for perfection, defense, etc., of rights as unaffected; affidavits and proofs.
568. Irrigation rights; residence requirements suspended.
569. Distribution of information concerning benefits of article; forms.
570. Homestead entrymen permitted to leave entries to perform farm labor.
571. Land rights of persons under 21.
572. Extension of benefits to persons serving with war allies of United States.
573. Income taxes; collection deferred; interest; statute of limitations.
574. Residence for tax purposes.

ARTICLE VI.—ADMINISTRATIVE REMEDIES

580. Transfers to take advantage of act.
581. Certificates of service; persons reported missing.
582. Revocation, etc., of interlocutory orders.
583. Separability of provisions.
584. Termination date.
585. Inapplicability of Soldier's and Sailor's Civil Relief Act of 1918.

ARTICLE VII.—FURTHER RELIEF

590. Stay of enforcement of obligations, liabilities, taxes, etc.

EXTENSION OF BENEFITS TO INDUCTEES UNDER UNIVERSAL MILITARY TRAINING AND SERVICE ACT

The benefits of the Soldiers' and Sailors' Civil Relief Act of 1940, sections 501—548 and 560—590 of this Appendix, are extended to inductees under the Universal Military Training and Service Act by section 404 of this Appendix

SOLDIERS' AND SAILORS' CIVIL RELIEF ACT OF 1918

Former provisions on this subject were contained in the Soldiers' and Sailors' Civil Relief Act of 1918, set out as former sect' 101 et seq. of this Appendix.

§ 501. Short title.

This Act [sections 501 to 548 and 560 to 590 of this Appendix] may be cited as the Soldiers' and Sailors' Civil Relief Act of 1940. (Oct. 17, 1940, ch. 888, § 1, 54 Stat. 1178.)

SOLDIERS' AND SAILORS' CIVIL RELIEF ACT AMENDMENTS OF 1942

Act Oct. 6, 1942, ch. 581, § 1, 56 Stat. 769, provided: "That this Act (affecting sections 513—517, 525, 526, 530—535, 540—554, 560—569, 572, 574, and 590 of this Appendix) may be cited as the Soldiers' and Sailors' Civil Relief Act Amendments of 1942."

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 510 to 548 and 560 to 590 of this Appendix.

ARTICLE I.—GENERAL PROVISIONS

§ 510. Purpose; suspension of enforcement of civil liabilities.

In order to provide for, strengthen, and expedite the national defense under the emergent conditions which are threatening the peace and security of the United States and to enable the United States the more successfully to fulfill the requirements of the national defense, provision is made to suspend enforcement of civil liabilities, in certain cases, of persons in the military service of the United States in order to enable such persons to devote their entire energy to the defense needs of the Nation, and to this end the following provisions are made for the temporary suspension of legal proceedings and transactions which may prejudice the civil rights of persons in such service during the period herein specified over which this Act [sections 501 to 548 and 560 to 590 of this Appendix] remains in force. (Oct. 17, 1940, ch. 888, § 100, 54 Stat. 1179.)

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 511 to 548 and 560 to 590 of this Appendix.

§ 511. Definitions.

(1) The term "persons in military service" and the term "persons in the military service of the United States", as used in this Act [sections 501 to 548 and 560 to 590 of this Appendix], shall include the following persons and no other: All members of the Army of the United States, the United States Navy, the Marine Corps, the Coast Guard, and all officers of the Public Health Service detailed by proper authority for duty either with the Army or the Navy. The term "military service", as used in this Act [said sections], shall signify Federal service on active duty with any branch of service heretofore referred to or mentioned as well as training or education under the supervision of the United States preliminary to induction into the military service. The terms "active service" or "active duty" shall include the period during which a person in military service is absent from duty on account of sickness, wounds, leave, or other lawful cause.

(2) The term "period of military service", as used in this Act [sections 501 to 548 and 560 to 590 of this Appendix], shall include the time between the following dates: For persons in active service at the date of approval of this Act [Oct. 17, 1940] it shall begin with the date of approval of this Act [Oct. 17, 1940]; for persons entering active service after the date of this Act [Oct. 17, 1940], with the date of entering active service. It shall terminate with the date of discharge from active service or death while in active service, but in no case later than the date when this Act [said sections] ceases to be in force.

(3) The term "person", when used in this Act [sections 501 to 548 and 560 to 590 of this Appendix], with reference to the holder of any right alleged to exist against a person in military service or against a person secondarily liable under such right, shall include individuals, partnerships, corporations, and any other forms of business association.

(4) The term "court", as used in this Act [sections 501 to 548 and 560 to 590 of this Appendix], shall include any court of competent jurisdiction of the United States or of any State, whether or not a court of record. (Oct. 17, 1940, ch. 888, § 101, 54 Stat. 1179.)

WOMEN'S ARMY CORPS

The members of the Women's Army Auxiliary Corps were included among the "persons in military service" within the meaning of the Soldiers' and Sailors' Civil Relief Act by the amendment to subsec. 1 of this section by act of May 14, 1942, ch. 312, § 10, 56 Stat. 282, which was repealed by act of July 1, 1943, ch. 187, § 5, 57 Stat. 371. The Women's Army Auxiliary Corps established by the act of May 14, 1942, was superseded by the Women's Army Corps in the Army of the United States as established by the act of July 1, 1943, ch. 187, 57 Stat. 371 and repealed by act June 25, 1947, ch. 327, § 2 (a), 61 Stat. 451, eff. July 1, 1948. The effective date of the repeal was postponed until June 12, 1948, by act June 12, 1948, ch. 449, title I, § 110, 62 Stat. 303, section 101 of which established in the Regular Army a Women's Army Corps to be effective June 12, 1948.

The members of the Women's Army Corps, Regular Army, are entitled to the protection of all laws applicable to male commissioned officers, warrant officers, and enlisted men of the Regular Army; to former male commissioned officers, warrant officers and enlisted men of the Regular Army; and to their dependents and beneficiaries, in view of section 107 of act June 12, 1948, ch. 449, title I, 62 Stat. 361, which superseded similar provisions contained in act July 1, 1943, ch. 187, § 2, 57 Stat. 371 [formerly set out as section 1552 of this Appendix].

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510, 512 to 548 and 560 to 590 of this Appendix.

§ 512. Territorial application; jurisdiction of courts; form of procedure.

(1) The provisions of this Act [sections 501 to 548 and 560 to 590 of this Appendix] shall apply to the United States, the several States and Territories, the District of Columbia, and all territory subject to the jurisdiction of the United States, and to proceedings commenced in any court therein, and shall be enforced through the usual forms of procedure obtaining in such courts or under such regulations as may be by them prescribed.

(2) When under this Act [sections 501 to 548 and 560 to 590 of this Appendix], any application is required to be made to a court in which no proceeding has already been commenced with respect to the matter, such application may be made to any court. (Oct. 17, 1940, ch. 888, § 102, 54 Stat. 1179; Proc. No. 2695, July 4, 1946, 11 F.R. 7517, 60 Stat. 1352.)

CODIFICATION

The clause "including the Philippine Islands while under the sovereignty of the United States" following the words "and all territory subject to the jurisdiction of the United States" in subdivision (1) was omitted pursuant to 1946 Proc. No. 2695, which recognized the independence of the Philippine Islands as of July 4, 1946, and is set out as a note under section 1394 of Title 22, Foreign Relations and Intercourse.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510, 511, 513 to 548 and 560 to 590 of this Appendix.

§ 513. Protection of persons secondarily liable.

(1) Whenever pursuant to any of the provisions of this Act [sections 501 to 548 and 560 to 590 of this Appendix] the enforcement of any obligation or liability, the prosecution of any suit or proceeding, the entry or enforcement of any order, writ, judgment, or decree, or the performance of any other act, may be stayed, postponed, or suspended, such stay, postponement, or suspension may, in the discretion of the court, likewise be granted to sureties, guarantors, endorsers, accommodation makers, and others, whether primarily or secondarily subject to the obligation or liability, the performance or enforcement of which is stayed, postponed, or suspended.

(2) When a judgment or decree is vacated or set aside in whole or in part, as provided in this Act [sections 501 to 548 and 560 to 590 of this Appendix], the same may, in the discretion of the court, likewise be set aside and vacated as to any surety, guarantor, endorser, accommodation maker, or other person whether primarily or secondarily liable upon the contract or liability for the enforcement of which the judgment or decree was entered.

(3) Whenever, by reason of the military service of a principal upon a criminal bail bond the sureties upon such bond are prevented from enforcing the attendance of their principal and performing their

obligation the court shall not enforce the provisions of such bond during the military service of the principal thereon and may in accordance with principles of equity and justice either during or after such service discharge such sureties and exonerate the bail.

(4) Nothing contained in this Act [sections 501 to 548 and 560 to 590 of this Appendix], shall prevent a waiver in writing of the benefits afforded by subsections (1) and (2) of this section by any surety, guarantor, endorser, accommodation maker, or other person whether primarily or secondarily liable upon the obligation or liability, except that after the date of enactment of the Soldiers' and Sailors' Civil Relief Act Amendments of 1942 [Oct. 6, 1942] no such waiver shall be valid unless it is executed as an instrument separate from the obligation or liability in respect of which it applies, and no such waiver shall be valid after the beginning of the period of military service if executed by an individual who subsequent to the execution of such waiver becomes a person in military service, or if executed by a dependent of such individual, unless executed by such individual or dependent during the period specified in section 106 [section 516 of this Appendix]. (Oct. 17, 1940, ch. 888, § 103, 54 Stat. 1179; Oct. 6, 1942, ch. 581, §§ 2, 3, 56 Stat. 769.)

REFERENCES IN TEXT

The Soldiers' and Sailors' Civil Relief Act Amendments of 1942, referred to in subsec. (4), amended, among other sections, this section. For other sections affected, see note under section 501 of this Appendix.

AMENDMENTS

1942—Subsec. (1). Act Oct. 6, 1942, § 2(a), substituted "accommodation makers, and others, whether primarily or secondarily" for "and others".

Subsec. (2). Act Oct. 6, 1942, § 2(b), substituted "accommodation maker, or other person whether primarily or secondarily" for "or other person".

Subsecs. (3) and (4). Act Oct. 6, 1942, § 3 added subsecs. (3) and (4).

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 512, 514 to 548 and 560 to 590 of this Appendix.

§ 514. Extension of benefits to citizens serving with forces of war allies.

Persons who serve with the forces of any nation with which the United States may be allied in the prosecution of any war in which the United States engages while this Act [sections 501 to 548 and 560 to 590 of this Appendix] remains in force and who immediately prior to such service were citizens of the United States shall, except in those cases provided for in section 512 [section 572 of this Appendix], be entitled to the relief and benefits afforded by this Act [sections 501 to 548 and 560 to 590 of this Appendix] if such service is similar to military service as defined in this Act [said sections], unless they are dishonorably discharged therefrom, or it appears that they do not intend to resume United States citizenship. (Oct. 17, 1940, ch. 888, § 104, as added Oct. 6, 1942, ch. 581, § 4, 56 Stat. 770.)

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 513, 515 to 548 and 560 to 590 of this Appendix.

§ 515. Notice of benefits to persons in and persons entering military service.

The Secretary of the Army and the Secretary of the Navy shall make provision, in such manner as each may deem appropriate for his respective Department, to insure the giving of notice of the benefits accorded by this Act [sections 501 to 548 and 560 to 590 of this Appendix] to persons in and to persons entering military service. The Director of Selective Service shall cooperate with the Secretary of the Army and the Secretary of the Navy in carrying out the provisions of this section. (Oct. 17, 1940, ch. 888, § 105, as added Oct. 6, 1942, ch. 581, § 4, 56 Stat. 770.)

CODIFICATION

The Department of War was designated the Department of the Army and the title of the Secretary of War was changed to Secretary of the Army by section 205(a) of act July 26, 1947, ch. 343, title II, 61 Stat. 501. Section 205(a) of act July 26, 1947, was repealed by section 53 of act Aug. 10, 1956, ch. 1041, 70A Stat. 641. Section 1 of act Aug. 10, 1956, enacted "Title 10, Armed Forces" which in sections 3011—3013 continued the military Department of the Army under the administrative supervision of a Secretary of the Army.

SECRETARY OF THE AIR FORCE

For transfer of certain functions insofar as they pertain to the Air Force, and to the extent that they were not previously transferred to the Secretary of the Air Force and Department of the Air Force from the Secretary of the Army and Department of the Army, see Secretary of Defense Transfer Order No. 40 [App. A (112)], July 22, 1949.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 514, 516 to 548 and 560 to 590 of this Appendix.

§ 516. Extension of benefits to persons ordered to report for induction or military service.

Any person who has been ordered to report for induction under the Selective Training and Service Act of 1940, as amended, shall be entitled to the relief and benefits accorded persons in military service under articles I, II, and III of this Act [sections 510 to 517, 520 to 527, and 530 to 536 of this Appendix] during the period beginning on the date of receipt of such order and ending on the date upon which such person reports for induction; and any member of the Enlisted Reserve Corps who is ordered to report for military service shall be entitled to such relief and benefits during the period beginning on the date of receipt of such order and ending on the date upon which he reports for such service. (Oct. 17, 1940, ch. 888, § 106, as added Oct. 6, 1942, ch. 581, § 4, 56 Stat. 770.)

REFERENCES IN TEXT

The Selective Training and Service Act of 1940, as amended, referred to in text, was formerly set out as sections 301—303, 304, 305, 306—309, 310, and 311—318 of this Appendix. Similar provisions are now contained in the Universal Military Training and Service Act, set out as sections 451, 453, 454, 455, 456 and 458—471 of this Appendix.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 515, 517 to 548 and 560 to 590 of this Appendix.

§ 517. Effect on rights, remedies, etc., pursuant to written agreements entered after commencement of military service.

Nothing contained in this Act [sections 501 to 548 and 560 to 590 of this Appendix] shall prevent—

(a) the modification, termination, or cancellation of any contract, lease, or bailment or any obligation secured by mortgage, trust deed, lien, or other security in the nature of a mortgage, or

(b) the repossession, retention, foreclosure, sale, forfeiture, or taking possession of property which is security for any obligation or which has been purchased or received under a contract, lease, or bailment,

pursuant to a written agreement of the parties thereto (including the person in military service concerned, or the person to whom section 106 [section 516 of this Appendix] is applicable, whether or not such person is a party to the obligation), or their assignees, executed during or after the period of military service of the person concerned or during the period specified in section 106 [section 516 of this Appendix]. (Oct. 17, 1940, ch. 888, § 107, as added Oct. 6, 1942, ch. 581, § 4, 56 Stat. 770.)

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 516, 518 to 548 and 560 to 590 of this Appendix.

ARTICLE II.—GENERAL RELIEF

§ 520. Default judgments; affidavits; bonds; attorneys for persons in service.

(1) In any action or proceeding commenced in any court, if there shall be a default of any appearance by the defendant, the plaintiff, before entering judgment shall file in the court an affidavit setting forth facts showing that the defendant is not in military service. If unable to file such affidavit plaintiff shall in lieu thereof file an affidavit setting forth either that the defendant is in the military service or that plaintiff is not able to determine whether or not defendant is in such service. If an affidavit is not filed showing that the defendant is not in the military service, no judgment shall be entered without first securing an order of court directing such entry, and no such order shall be made if the defendant is in such service until after the court shall have appointed an attorney to represent defendant and protect his interest, and the court shall on application make such appointment. Unless it appears that the defendant is not in such service the court may require, as a condition before judgment is entered, that the plaintiff file a bond approved by the court conditioned to indemnify the defendant, if in military service, against any loss or damage that he may suffer by reason of any judgment should the judgment be thereafter set aside in whole or in part. And the court may make such other and further order or enter such judgment as in its opinion may be necessary to protect the rights of the defendant under this Act [sections 501 to 548 and 560 to 590 of this Appendix]. Whenever, under the laws applicable with respect to any court, facts may be evidenced, established, or proved by an unsworn statement, declaration, verification, or certificate, in writing, subscribed and certified or declared to be true under penalty of perjury, the filing of such an unsworn statement, declaration, verification, or certificate shall satisfy the requirement of this subsection that facts be established by affidavit.

(2) Any person who shall make or use an affidavit required under this section or a statement, declaration, verification, or certificate certified or declared to be true under penalty of perjury permitted under subsection (1), knowing it to be false, shall be guilty of a misdemeanor and shall be punishable by imprisonment not to exceed one year or by fine not to exceed $1,000, or both.

(3) In any action or proceeding in which a person in military service is a party if such party does not personally appear therein or is not represented by an authorized attorney, the court may appoint an attorney to represent him; and in such case a like bond may be required and an order made to protect the rights of such person. But no attorney appointed under this Act [sections 501 to 548 and 560 to 590 of this Appendix], to protect a person in military service shall have power to waive any right of the person for whom he is appointed or bind him by his acts.

(4) If any judgment shall be rendered in any action or proceeding governed by this section against any person in military service during the period of such service or within thirty days thereafter, and it appears that such person was prejudiced by reason of his military service in making his defense thereto, such judgment may, upon application, made by such person or his legal representative, not later than ninety days after the termination of such service, be opened by the court rendering the same and such defendant or his legal representative let in to defend; provided it is made to appear that the defendant has a meritorious or legal defense to the action or some part thereof. Vacating, setting aside, or reversing any judgment because of any of the provisions of this Act [sections 501 to 548 and 560 to 590 of this Appendix], shall not impair any right or title acquired by any bona fide purchaser for value under such judgment. (Oct. 17, 1940, ch. 888, § 200, 54 Stat. 1180; Sept. 8, 1960, Pub. L. 86-721, §§ 1, 2, 74 Stat. 820.)

AMENDMENTS

1960—Subsec. (1). Pub. L. 86-721, § 1, permitted the establishment of certain facts by a declaration under penalty of perjury in lieu of an affidavit.

Subsec. (2). Pub. L. 86-721, § 2, inserted after "affidavit required under this section," the words "or a statement, declaration, verification, or certificate certified or declared to be true under penalty of perjury permitted under subsection (1),".

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 517, 521 to 548 and 560 to 590 of this Appendix.

§ 521. Stay of proceedings where military service affects conduct thereof.

At any stage thereof any action or proceeding in any court in which a person in military service is involved, either as plaintiff or defendant, during the period of such service or within sixty days thereafter may, in the discretion of the court in which it is pending, on its own motion, and shall, on application to it by such person or some person on his behalf, be stayed as provided in this Act [sections 501 to 548 and 560 to 590 of this Appendix] unless, in the opinion of the court, the ability of plaintiff to prosecute the action or the defendant to conduct his defense is not materially affected by reason of his

military service. (Oct. 17, 1940, ch. 888, § 201, 54 Stat. 1181.)

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 520, 522 to 548 and 560 to 590 of this Appendix.

§ 522. Fines and penalties on contracts, etc.

When an action for compliance with the terms of any contract is stayed pursuant to this Act [sections 501 to 548 and 560 to 590 of this Appendix] no fine or penalty shall accrue by reason of failure to comply with the terms of such contract during the period of such stay, and in any case where a person fails to perform any obligation and a fine or penalty for such nonperformance is incurred a court may, on such terms as may be just, relieve against the enforcement of such fine or penalty if it shall appear that the person who would suffer by such fine or penalty was in the military service when the penalty was incurred and that by reason of such service the ability of such person to pay or perform was thereby materially impaired. (Oct. 17, 1940, ch. 888, § 202, 54 Stat. 1181.)

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 521, 523 to 548 and 560 to 590 of this Appendix.

§ 523. Stay or vacation of execution of judgments, attachments, etc.

In any action or proceeding commenced in any court against a person in military service, before or during the period of such service, or within sixty days thereafter, the court may, in its discretion, on its own motion, or on application to it by such person or some person on his behalf shall, unless in the opinion of the court the ability of the defendant to comply with the judgment or order entered or sought is not materially affected by reason of his military service—

(a) Stay the execution of any judgment or order entered against such person, as provided in this Act [sections 501 to 548 and 560 to 590 of this Appendix]; and

(b) Vacate or stay any attachment or garnishment of property, money, or debts in the hands of another, whether before or after judgment as provided in this Act [said sections]. (Oct. 17, 1940, ch. 888, § 203, 54 Stat. 1181.)

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 522, 524 to 548 and 560 to 590 of this Appendix.

§ 524. Duration and term of stays; codefendants not in service.

Any stay of any action, proceeding, attachment, or execution, ordered by any court under the provisions of this Act [sections 501 to 548 and 560 to 590 of this Appendix] may, except as otherwise provided, be ordered for the period of military service and three months thereafter or any part of such period, and subject to such terms as may be just, whether as to payment in installments of such amounts and at such times as the court may fix or otherwise. Where the person in military service is a codefendant with others the plaintiff may nevertheless by leave of court proceed against the others. (Oct. 17, 1940, ch. 888, § 204, 54 Stat. 1181.)

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 523, 525 to 548 and 560 to 590 of this Appendix.

§ 525. Statutes of limitations as affected by period of service.

The period of military service shall not be included in computing any period now or hereafter to be limited by any law, regulation, or order for the bringing of any action or proceeding in any court, board bureau, commission, department, or other agency of government by or against any person in military service or by or against his heirs, executors, administrators, or assigns, whether such cause of action or the right or privilege to institute such action or proceeding shall have accrued prior to or during the period of such service, nor shall any part of such period which occurs after the date of enactment of the Soldiers' and Sailors' Civil Relief Act Amendments of 1942 [Oct. 6, 1942] be included in computing any period now or hereafter provided by any law for the redemption of real property sold or forfeited to enforce any obligation, tax, or assessment. (Oct. 17, 1940, ch. 888, § 205, 54 Stat. 1181; Oct. 6, 1942, ch. 581, § 5, 56 Stat. 770.)

REFERENCES IN TEXT

The Soldiers' and Sailors' Civil Relief Act Amendments of 1942, referred to in the text, amended, among other sections, this section. For other sections affected, see note under section 501 of this Appendix.

AMENDMENTS

1942—Act Oct. 6, 1942, included proceedings before boards, bureaus, commissions, departments, or other agencies of government, and added provision for omission of service period in computing period for redemption of real property.

CROSS REFERENCES

Application of this section to any period of limitation prescribed by or under internal revenue laws, see section 527 of this Appendix.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 524, 526 to 548 and 560 to 590 of this Appendix.

§ 526. Maximum rate of interest.

No obligation or liability bearing interest at a rate in excess of 6 per centum per annum incurred by a person in military service prior to his entry into such service shall, during any part of the period of military service which occurs after the date of enactment of the Soldiers' and Sailors' Civil Relief Act Amendments of 1942 [Oct. 6, 1942], bear interest at a rate in excess of 6 per centum per annum unless, in the opinion of the court, upon application thereto by the obligee, the ability of such person in military service to pay interest upon such obligation or liability at a rate in excess of 6 per centum per annum is not materially affected by reason of such service, in which case the court may make such order as in its opinion may be just. As used in this section the term "interest" includes service charges, renewal charges, fees, or any other charges (except bona fide insurance) in respect of such obligation or liability. (Oct. 17, 1940, ch. 888, § 206, as added Oct. 6, 1942, ch. 581, § 6, 56 Stat. 771.)

ARTICLE III.—RENT, INSTALLMENT CONTRACTS, MORTGAGES, LIENS, ASSIGNMENTS, LEASES

AMENDMENTS

1942—Article heading was amended by act Oct. 6, 1942, ch. 581, § 7, 56 Stat. 771. Article was formerly entitled "Rent, Installment Contracts, Mortgages".

§ 530. Eviction or distress during military service; stay; penalty for noncompliance; allotment of pay for payment.

(1) No eviction or distress shall be made during the period of military service in respect of any premises for which the agreed rent does not exceed $150 per month, occupied chiefly for dwelling purposes by the wife, children, or other dependents of a person in military service, except upon leave of court granted upon application therefor or granted in an action or proceeding affecting the right of possession.

(2) On any such application or in any such action the court may, in its discretion, on its own motion, and shall, on application, unless in the opinion of the court the ability of the tenant to pay the agreed rent is not materially affected by reason of such military service, stay the proceedings for not longer than three months, as provided in this Act [sections 501 to 548 and 560 to 590 of this Appendix], or it may make such other order as may be just. Where such stay is granted or other order is made by the court, the owner of the premises shall be entitled, upon application therefor, to relief in respect of such premises similar to that granted persons in military service in sections 301, 302, and 500 of this Act [sections 531, 532, and 560 of this Appendix] to such extent and for such period as may appear to the court to be just.

(3) Any person who shall knowingly take part in any eviction or distress otherwise than as provided in subsection (1) hereof, or attempts so to do, shall be guilty of a misdemeanor, and shall be punishable by imprisonment not to exceed one year or by fine not to exceed $1,000, or both.

(4) The Secretary of the Army, the Secretary of the Navy, or the Secretary of the Treasury with respect to the Coast Guard, as the case may be, is empowered, subject to such regulations as he may prescribe, to order an allotment of the pay of a person in military service in reasonable proportion to discharge the rent of premises occupied for dwelling purposes by the wife, children, or other dependents of such person. (Oct. 17, 1940, ch. 888, § 300, 54 Stat. 1181; Oct. 6, 1942, ch. 581, § 8, 56 Stat. 771; Mar. 3, 1966, Pub. L. 89-358, § 10, 80 Stat. 28.)

CODIFICATION

The Department of War was designated the Department of the Army and the title of the Secretary of War was changed to Secretary of the Army by section 205(a) of act July 26, 1947, ch. 343, title II, 61 Stat. 501. Section 205(a) of act July 26, 1947 was repealed by section 53 of act Aug. 10, 1956, ch. 1041, 70A Stat. 641. Section 1 of act Aug. 10, 1956, enacted "Title 10, Armed Forces" which in sections 3011—3013 continued the military Department of the Army under the administrative supervision of a Secretary of the Army.

AMENDMENTS

1966—Subsec. (1). Pub. L. 89-358 increased the limitation of rents from $80 to $150 per month.

1942—Subsec. (2). Act Oct. 6, 1942, § 8(a), added last sentence.

Subsec. (3). Act Oct. 6, 1942, § 8(b), inserted "or attempts so to do,".

SECRETARY OF THE AIR FORCE

For transfer of certain functions relating to finance and fiscal matters, insofar as they pertain to the Air Force, from the Secretary of the Army and Department of the Army to the Secretary of the Air Force and Department of the Air Force, see Secretary of Defense Transfer Order No. 25 [§ 1.111], Oct. 14, 1948.

For transfer of certain real property, and functions relating thereto, insofar as they pertain to the Air Force, from the Secretary of the Army and Department of the Army to the Secretary of the Air Force and Department of the Air Force, see Secretary of Defense Transfer Order Nos. 14, eff. July 1, 1948, and 40 [App. B (140)], July 22, 1949.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 527, 531 to 548 and 560 to 590 of this Appendix.

§ 531. Installment contracts for purchase of property.

(1) No person who has received, or whose assignor has received, under a contract for the purchase of real or personal property, or of lease or bailment with a view to purchase of such property, a deposit or installment of the purchase price, or a deposit or installment under the contract, lease, or bailment, from a person or from the assignor of a person who, after the date of payment of such deposit or installment, has entered military service, shall exercise any right or option under such contract to rescind or terminate the contract or resume possession of the property for nonpayment of any installment thereunder due or for any other breach of the terms thereof occurring prior to or during the period of such military service, except by action in a court of competent jurisdiction.

(2) Any person who shall knowingly resume possession of property which is the subject of this section otherwise than as provided in subsection (1) of this section or in section 107 [section 517 of this Appendix], or attempts so to do, shall be guilty of a misdemeanor and shall be punished by imprisonment not to exceed one year or by fine not to exceed $1,000, or both.

(3) Upon the hearing of such action the court may order the repayment of prior installments or deposits or any part thereof, as a condition of terminating the contract and resuming possession of

the property, or may, in its discretion, on its own motion, and shall, on application to it by such person in military service or some person on his behalf, order a stay of proceedings as provided in this Act [sections 501 to 548 and 560 to 590 of this Appendix] unless, in the opinion of the court, the ability of the defendant to comply with the terms of the contract is not materially affected by reason of such service; or it may make such other disposition of the case as may be equitable to conserve the interests of all parties. (Oct. 17, 1940, ch. 888, § 301, 54 Stat. 1181; Oct. 6, 1942, ch. 581, § 9 (a, c, d), 56 Stat. 771.)

AMENDMENTS

1942—Subsec. (1). Act Oct. 6, 1942, § 9 (a), omitted provision limiting applicability to transactions prior to Oct. 10, 1940, and proviso relating to modification, termination, or cancellation of contracts and repossession or retention of property by mutual written agreement of the parties, inserted provision relating to deposit or installment under contract, lease, or bailment, and included other breaches of terms in addition to nonpayment of installments.

Subsec. (2). Act Oct. 6, 1942, § 9 (d), substituted "of this section or in section 107, or attempts so to do," for "hereof".

Subsec. (3). Act Oct. 6, 1942, § 9 (c), deleted "except as provided in section 303", preceding "on application".

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 530, 532 to 548 and 560 to 590 of this Appendix.

§ 532. Mortgages, trust deeds, etc.

(1) The provisions of this section shall apply only to obligations secured by mortgage, trust deed, or other security in the nature of a mortgage upon real or personal property owned by a person in military service at the commencement of the period of the military service and still so owned by him which obligations originated prior to such person's period of military service.

(2) In any proceeding commenced in any court during the period of military service to enforce such obligation arising out of nonpayment of any sum thereunder due or out of any other breach of the terms thereof occurring prior to or during the period of such service the court may, after hearing, in its discretion, on its own motion, and shall, on application to it by such person in military service or some person on his behalf, unless in the opinion of the court the ability of the defendant to comply with the terms of the obligation is not materially affected by reason of his military service—

(a) stay the proceedings as provided in this Act [sections 501 to 548 and 560 to 590 of this Appendix]; or

(b) make such other disposition of the case as may be equitable to conserve the interests of all parties.

(3) No sale, foreclosure, or seizure of property for nonpayment of any sum due under any such obligation, or for any other breach of the terms thereof, whether under a power of sale, under a judgment entered upon warrant of attorney to confess judgment contained therein, or otherwise, shall be valid if made after the date of enactment of the Soldiers' and Sailors' Civil Relief Act Amendments of 1942 [Oct. 6, 1942] and during the period of military service or within three months thereafter, except pursuant to an agreement as provided in section 107 [section 517 of this Appendix], unless upon an order previously granted by the court and a return thereto made and approved by the court.

(4) Any person who shall knowingly make or cause to be made any sale, foreclosure, or seizure of property, defined as invalid by subsection (3) hereof, or attempts so to do, shall be guilty of a misdemeanor and shall be punished by imprisonment not to exceed one year or by fine not to exceed $1,000, or both. (Oct. 17, 1940, ch. 888, § 302, 54 Stat. 1182; Oct. 6, 1942, ch. 581, §§ 9 (b, c), 10, 56 Stat. 771, 772; June 23, 1952, ch. 450, 66 Stat. 151.)

REFERENCES IN TEXT

The Soldiers' and Sailors' Civil Relief Act Amendments of 1942, referred to in subsec. (3), amended, among other sections, this section. For other sections affected, see note under section 501 of this Appendix.

AMENDMENTS

1952—Subsec. (4). Act June 23, 1952, prohibited the making of sales, foreclosures, or seizures defined as invalid by subsec. (3) of this section.

1942—Subsec. (1). Act Oct. 6, 1942, § 9 (b), deleted "originating prior to the date of approval of this Act and" following "obligations" and inserted matter at end of subsection following "him".

Subsec. (2). Act Oct. 6, 1942, § 9 (c), deleted "except as provided in section 303," preceding "on application".

Subsec. (3). Act Oct. 6, 1942, § 10, amended subsec. (3) generally.

Subsec. (4). Act. Oct. 6, 1942, § 10, added subsec. (4).

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 531, 533 to 548 and 560 to 590 of this Appendix and title 12 sections 1710, 1739, 1750c.

§ 533. Settlement of cases involving stayed proceedings to foreclose mortgage on, resume possession of, or terminate contract for purchase of, personal property.

Where a proceeding to foreclose a mortgage upon or to resume possession of personal property, or to rescind or terminate a contract for the purchase thereof, has been stayed as provided in this Act [sections 501 to 548 and 560 to 590 of this Appendix], the court may, unless in its opinion an undue hardship would result to the dependents of the person in military service, appoint three disinterested parties to appraise the property and, based upon the report of the appraisers, order such sum, if any, as may be just, paid to the person in military service or his dependent, as the case may be, as a condition of foreclosing the mortgage, resuming possession of the property, or rescinding or terminating the contract. (Oct. 17, 1940, ch. 888, § 303, as added Oct. 6, 1942, ch. 581, § 12, 56 Stat. 772.)

REPEALS

Former section 533, from act Oct. 17, 1940, ch. 888, § 303, 54 Stat. 1183, related to stay of action to resume possession of motor vehicle, tractor, or their accessories, encumbered by purchase money mortgage, conditional sales contract, etc., and was repealed by act Oct. 6, 1942, ch. 581, § 11, 56 Stat. 772.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 532, 534 to 548 and 560 to 590 of this Appendix.

§ 534. Termination of leases by lessees.

(1) The provisions of this section shall apply to any lease covering premises occupied for dwelling, professional, business, agricultural, or similar pur-

poses in any case in which (a) such lease was executed by or on the behalf of a person who, after the execution of such lease, entered military service, and (b) the premises so leased have been occupied for such purposes, or for a combination of such purposes, by such person or by him and his dependents.

(2) Any such lease may be terminated by notice in writing delivered to the lessor (or his grantee) or to the lessor's (or his grantee's) agent by the lessee at any time following the date of the beginning of his period of military service. Delivery of such notice may be accomplished by placing it in an envelope properly stamped and duly addressed to the lessor (or his grantee) or to the lessor's (or his grantee's) agent and depositing the notice in the United States mails. Termination of any such lease providing for monthly payment of rent shall not be effective until thirty days after the first date on which the next rental payment is due and payable subsequent to the date when such notice is delivered or mailed. In the case of all other leases, termination shall be effected on the last day of the month following the month in which such notice is delivered or mailed and in such case any unpaid rental for a period preceding termination shall be proratably computed and any rental paid in advance for a period succeeding termination shall be refunded by the lessor (or his assignee). Upon application by the lessor to the appropriate court prior to the termination period provided for in the notice, any relief granted in this subsection shall be subject to such modifications or restrictions as in the opinion of the court justice and equity may in the circumstances require.

(3) Any person who shall knowingly seize, hold, or detain the personal effects, clothing, furniture, or other property of any person who has lawfully terminated a lease covered by this section, or in any manner interfere with the removal of such property from the premises covered by such lease, for the purpose of subjecting or attempting to subject any of such property to a claim for rent accruing subsequent to the date of termination of such lease, or attempts so to do, shall be guilty of a misdemeanor and shall be punished by imprisonment not to exceed one year or by fine not to exceed $1,000, or both. (Oct. 17, 1940, ch. 888, § 304, as added Oct. 6, 1942, ch. 581, § 12, 56 Stat. 772.)

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 533, 536 to 548 and 560 to 590 of this Appendix.

§ 535. Protection of assignor of life insurance policy; enforcement of storage liens; penalties.

(1) Where any life insurance policy on the life of a person in military service has been assigned prior to such person's period of military service to secure the payment of any obligation of such person, no assignee of such policy (except the insurer in connection with a policy loan) shall, during the period of military service of the insured or within one year thereafter, except upon the consent in writing of the insured made during such period or when the premiums thereon are due and unpaid or upon the death of the insured, exercise any right or option by virtue of such assignment unless upon leave of court granted upon an application made therefor by such assignee. The court may thereupon refuse to grant such leave unless in the opinion of the court the ability of the obligor to comply with the terms of the obligation is not materially affected by reason of his military service. For the purpose of this subsection premiums which are guaranteed under the provisions of article IV of this Act [sections 540 to 548 of this Appendix] shall not be deemed to be due and unpaid.

(2) No person shall exercise any right to foreclose or enforce any lien for storage of household goods, furniture, or personal effects of a person in military service during such person's period of military service and for three months thereafter except upon an order previously granted by a court upon application therefor and a return thereto made and approved by the court. In such proceeding the court may, after hearing, in its discretion, on its own motion, and shall, on application to it by such person in military service or some person on his behalf, unless in the opinion of the court the ability of the defendant to pay the storage charges due is not materially affected by reason of his military service—

(a) stay the proceedings as provided in this Act [sections 501 to 548 and 560 to 590 of this Appendix]; or

(b) make such other disposition of the case as may be equitable to conserve the interest of all parties.

The enactment of the provisions of this subsection shall not be construed in any way as affecting or as limiting the scope of section 302 of this Act [section 532 of this Appendix].

(3) Any person who shall knowingly take any action contrary to the provisions of this section, or attempts so to do, shall be guilty of a misdemeanor and shall be punished by imprisonment not to exceed one year or by fine not to exceed $1,000, or both. (Oct. 17, 1940, ch. 888, § 305, as added Oct. 6, 1942, ch. 581, § 12, 56 Stat. 773.)

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 534, 536 to 548 and 560 to 590 of this Appendix.

§ 536. Extension of benefits to dependents.

Dependents of a person in military service shall be entitled to the benefits accorded to persons in military service under the provisions of this article [sections 530 to 536 of this Appendix] upon application to a court therefor, unless in the opinion of the court the ability of such dependents to comply with the terms of the obligation, contract, lease, or bailment has not been materially impaired by reason of the military service of the person upon whom the applicants are dependent. (Oct. 17, 1940, ch. 888, § 306, as added Oct. 6, 1942, ch. 581, § 12, 56 Stat. 773.)

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 535, 540 to 548 and 560 to 590 of this Appendix and title 12 sections 1710, 1739, 1750c.

ARTICLE IV.—INSURANCE

PRIOR PROVISIONS

The provisions of "Article IV—Insurance" of act Oct. 17, 1940, ch. 888, 54 Stat. 1183, were amended by act Oct. 6, 1942, ch. 581, § 13, 56 Stat. 773, to read as incorporated in sections 540—548 of this Appendix.

Prior to act Oct. 6, 1942, constituting the Soldiers' and Sailors' Civil Relief Act Amendments of 1942, "Article IV—Insurance" consisted of sections 400—414 of act Oct. 17, 1940, which were incorporated in sections 540—554 of this Appendix. For text of sections 400—414 of act Oct. 17, 1940, as originally enacted, see notes to sections 540—554 of this Appendix.

§ 540. Definitions.

As used in this article [sections 540 to 548 of this Appendix]—

(a) The term "policy" shall include any contract of life insurance or policy on a life, endowment, or term plan, including any benefit in the nature of life insurance arising out of membership in any fraternal or beneficial association, which does not provide for the payment of any sum less than the face value thereof or for the payment of an additional amount as premiums if the insured engages in the military service of the United States as defined in section 101 of article I of this Act [section 511 of this Appendix] or which does not contain any limitation or restriction upon coverage relating to engagement in or pursuit of certain types of activities which a person might be required to engage in by virtue of his being in such military service, and (1) which is in force on a premium-paying basis at the time of application for benefits hereunder, and (2) which was made and a premium paid thereon before the date of enactment of the Soldiers' and Sailors' Civil Relief Act Amendments of 1942 [Oct. 6, 1942 or not less than one hundred and eighty days before the date the insured entered into the military service. The provisions of this Act [sections 501 to 548 and 560 to 590 of this Appendix] shall not be applicable to policies or contracts of life insurance issued under the War Risk Insurance Act, as amended, the World War Veterans Act, as amended, or the National Service Life Insurance Act of 1940, as amended.

(b) The term "premium" shall include the amount specified in the policy as the stipend to be paid by the insured at regular intervals during the period therein stated.

(c) The term "insured" shall include any person in the military service of the United States as defined in section 101, article I, of this Act [section 511 of this Appendix], whose life is insured under and who is the owner and holder of and has an interest in a policy as above defined.

(d) The term "insurer" shall include any firm, corporation, partnership, or association chartered or authorized to engage in the insurance business and to issue a policy as above defined by the laws of a State of the United States or the United States. (Oct. 17, 1940, ch. 888, § 400, 54 Stat. 1183; Oct. 6, 1942, ch. 581, § 13, 56 Stat. 773; July 11, 1956, ch. 570, § 1, 70 Stat. 528.)

References in Text

The Soldiers' and Sailors' Civil Relief Act Amendments of 1942, referred to in subsec. (a), amended, among other sections, this section. For other sections affected, see note under section 501, of this Appendix.

The War Risk Insurance Act, as amended, referred to in subsec. (a), was act Oct. 6, 1917, ch. 105, 40 Stat. 398, as amended, which was repealed by Pub. L. 85-56, Title XXII, 2202(96), June 17, 1957, 71 Stat. 166.

The World War Veteran's Act as amended, referred to in subsec. (a), was act June 27, 1924, ch. 320, title I, 43 Stat. 607, as amended, which was repealed by Pub. L. 85-857, § 14(51), Sept. 2, 1958, 72 Stat. 1271, and subject matter of which is now generally covered by subchapter II of chapter 19 of Title 38, Veterans' Benefits.

The National Service Life Insurance Act of 1940, as amended, referred to in subsec. (a) was act Oct. 8, 1940, ch. 757, title VI, pt. 1, 54 Stat. 1008, as amended, which was repealed by Pub. L. 85-857, § 14(75), Sept. 2, 1958, 72 Stat. 1272, and is now generally covered by chapter 19 of Title 38, Veterans' Benefits.

Amendments

1956—Subsec. (a). Act July 11, 1956, substituted "one hundred and eighty" for "thirty" preceding the words "days before the date the insured entered into the military service".

Effective Date of 1956 Amendment

Section 2 of act July 11, 1956, provided that the amendment to subsec. (a) should take effect with respect to applications for benefits made after July 11, 1956.

Prior Provisions

Section 400 of act Oct. 17, 1940, as originally enacted, which, by the provisions of section 408 of act Oct. 17, 1940 as amended and incorporated in section 548 of this Appendix, is continued in force as to applications for protection executed prior to Oct. 6, 1942, read: "In this article the term 'policy' shall include any contract of life insurance on the level premium or legal reserve plan. It shall also include any benefit in the nature of life insurance arising out of membership in any fraternal or beneficial association; the term 'premium' shall include membership dues or assessments in such association, and the date of issuance of policy as herein limited shall refer to the date of admission to membership in such association; the term 'insured' shall include any person who is the holder of a policy as defined in this article; the term 'insurer' shall include any corporation, partnership, or other form of association which secures or provides insurance under any policy as defined in this article."

Veterans' Life Insurance Refunds

Pub. L. 85-586, Aug. 1, 1958, 72 Stat. 487, authorized the Administrator of Veterans' Affairs to make refunds, without interest, which are due on account of amounts collected by the United States Government by offset or otherwise from persons who made valid application for and were legally entitled to the protection of article IV of the Soldiers' and Sailors' Civil Relief Act of 1940, former sections 540-554 of this Appendix, as it existed prior to the amendments of October 6, 1942, application to be made to the Veterans' Administration, within two years after Aug. 1, 1958 and authorized appropriation of additional sums for such purposes.

Section Referred to in Other Sections

This section is referred to in sections 501, 510 to 536, 541 to 548 and 560 to 590 of this Appendix.

§ 541. Persons entitled to benefits of article; applications; amount of insurance protected.

The benefits and privileges of this article [sections 540 to 548 of this Appendix] shall apply to any insured, when such insured, or a person designated by him, or, in case the insured is outside the continental United States (excluding Alaska and the Panama Canal Zone), a beneficiary, shall make written application for protection under this article [said sections], unless the Administrator of Veterans' Affairs in passing upon such application as provided in this article [said sections] shall find that the policy is not entitled to protection hereunder. The Veterans' Administration shall give notice to the military and naval authorities of the provisions of this article [said sections], and shall include in such notice an explanation of such provisions for the information of those desiring to make application for the benefits thereof. The original of such application shall be sent by the insured to the insurer, and a copy thereof to the Veterans' Administration. The total

amount of insurance on the life of one insured under policies protected by the provisions of this article [said sections] shall not exceed $10,000. If an insured makes application for protection of policies on his life totaling insurance in excess of $10,000, the Administrator is authorized to have the amount of insurance divided into two or more policies so that the protection of this article [said sections] may be extended to include policies for a total amount of insurance not to exceed $10,000, and a policy which affords the best security to the Government shall be given preference. (Oct. 17, 1940, ch. 888, § 401, 54 Stat. 1183; Oct. 6, 1942, ch. 581, § 13, 56 Stat. 774.)

PRIOR PROVISIONS

Section 401 of act Oct. 17, 1940, as originally enacted, which, by the provisions of section 408 of act Oct. 17, 1940 as amended and incorporated in section 548 of this Appendix, is continued in force as to applications for protection executed prior to Oct. 6, 1942, read:

"(1) The benefits of this article shall apply to any person in military service who is the holder of a policy of life insurance, when such holder shall apply for such benefits on a form prepared in accordance with regulations which shall be prescribed by the Administrator of Veterans' Affairs. Such form shall set forth particularly that the application therein made is a consent to such modification of the terms of the original contract of insurance as are made necessary by the provisions of this article and by receiving and filing the same the insurer shall be deemed to have assented thereto, to the extent, if any, to which the policy on which the application is made is within the provisions of this article. The original of such application shall be sent by the insured to the insurer, and a copy thereof to the Veterans' Administration.

"(2) The Veterans' Administration shall issue through suitable military and naval channels a notice for distribution by appropriate military and naval authorities to persons in the military service explaining the provisions of this article and shall furnish forms to be distributed to those desiring to make application for its benefits."

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 540, 548 to 548 and 560 to 590 of this Appendix.

§ 542. Form of application; reports to Veterans' Administration by insurer; policy deemed modified upon application for protection.

Any writing signed by the insured and identifying the policy and the insurer, and agreeing that his rights under the policy are subject to and modified by the provisions of this article [sections 540 to 548 of this Appendix], shall be sufficient as an application for the benefits of this article [said sections], but the Veterans' Administration may require the insured and insurer to execute such other forms as may be deemed advisable. Upon receipt of the application of the insured the insurer shall furnish such report to the Veterans' Administration concerning the policy as shall be prescribed by regulations. The insured who has made application for protection under this article [said sections] and the insurer shall be deemed to have agreed to such modification of the policy as may be required to give this article [said sections] full force and effect with respect to such policy. (Oct. 17, 1940, ch. 888, § 402, 54 Stat. 1183; Oct. 6, 1942, ch. 581, § 13, 56 Stat. 774.)

PRIOR PROVISIONS

Section 402 of act Oct. 17, 1940, as originally enacted, which, by the provisions of section 408 of act Oct. 17, 1940 as amended and incorporated in section 548 of this Appendix, is continued in force as to applications for protection executed prior to Oct. 6, 1942, read:

"The benefits of this act shall be available to any person in military service in respect of contracts of insurance in force under their terms up to but not exceeding a face value of $5,000, irrespective of the number of policies held by such person whether in one or more companies, when such contracts were made and a premium was paid thereon before the date of approval of this act or not less than thirty days before entry into the military service; but in no event shall the provisions of this article apply to any policy on which premiums are due and unpaid for a period of more than one year at the time when application for the benefits of this article is made or in respect of any policy on which there is outstanding a policy loan or other indebtedness equal to or greater than 50 per centum of the cash surrender value of the policy."

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 541, 543 to 548 and 560 to 590 of this Appendix.

§ 543. Determination of policies entitled to protection; notice to parties; lapse of policies for nonpayment of premiums, etc.

The Administrator of Veterans' Affairs shall find whether the policy is entitled to protection under this article [sections 540 to 548 of this Appendix] and shall notify the insured and the insurer of such finding. Any policy found by the Administrator of Veterans' Affairs to be entitled to protection under this article [said sections] shall not, subsequent to date of application, and during the period of military service of the insured or during two years after the expiration of such service, lapse or otherwise terminate or be forfeited for the nonpayment of a premium becoming due and payable, or the nonpayment of any indebtedness or interest. (Oct. 17, 1940, ch. 888, § 403, 54 Stat. 1184; Oct. 6, 1942, ch. 581, § 13, 56 Stat. 775.)

PRIOR PROVISIONS

Section 403 of act Oct. 17, 1940, as originally enacted, which, by the provisions of section 408 of act Oct. 17, 1940 as amended and incorporated in section 548 of this Appendix, is continued in force as to applications for protection executed prior to Oct. 6, 1942, read:

"The Veterans' Administration shall, subject to regulations, which shall be prescribed by the Administrator of Veterans' Affairs, compile and maintain a list of such persons in military service as have made application for the benefits of this article, and shall (1) reject any application for such benefits made by persons who are not persons in military service; (2) reject any applications for such benefits in excess of the amount permitted by section 402 [section 542 of this Appendix]; and (3) reject any applications in respect of contracts of insurance otherwise not entitled to the benefits of this article. Said Administration shall immediately notify the insurer and the insured in writing of every rejection or approval."

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 542, 544 to 548 and 560 to 590 of this Appendix.

§ 544. Rights and privileges of insured during period of protection.

No dividend or other monetary benefit under a policy shall be paid to an insured or used to purchase dividend additions while a policy is protected by the provisions of this article [sections 540 to 548 of this Appendix] except with the consent and approval of the Veterans' Administration. If such consent is not procured, such dividends or benefits shall be added to the value of the policy to be used as a credit when final settlement is made with

the insurer. No cash value, loan value, or withdrawal of dividend accumulation, or unearned premium, or other value of similar character shall be available to the insured while the policy is protected under this article [said sections] except upon approval by the Veterans' Administration. The insured's right to change a beneficiary designation or select an optional settlement for a beneficiary shall not be affected by the provisions of this article [said sections]. (Oct. 17, 1940, ch. 888, § 404, 54 Stat. 1184; Oct. 6, 1942, ch. 581, § 13, 56 Stat. 775.)

PRIOR PROVISIONS

Section 404 of act Oct. 17, 1940, as originally enacted, which, by the provisions of section 408 of act Oct. 17, 1940, as amended and incorporated in section 548 of this Appendix, is continued in force as to applications for protection executed prior to Oct. 6, 1942, read:

"When one or more applications are made under this article by any one person in military service in respect of insurance exceeding a total face value of $5,000, whether on one or more policies or in one or more companies, and the insured shall not in his application indicate an order of preference, the Veterans' Administration shall reject such policies as have the inferior cash surrender value, so as to reduce the total benefits conferred within the face value of $5,000, and where necessary for this purpose shall direct the insurer to divide any policy into two separate policies. The said Administration shall immediately notify the insurer and the insured in writing of such selection."

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 543, 545 to 548 and 560 to 590 of this Appendix.

§ 545. Deduction of unpaid premiums upon settlement of policies maturing during protection.

In the event of maturity of a policy as a death claim or otherwise before the expiration of the period of protection under the provisions of this article [sections 540 to 548 of this Appendix], the insurer in making settlement will deduct from the amount of insurance the premiums guaranteed under this article [said sections], together with interest thereon at the rate fixed in the policy for policy loans. If no rate of interest is specifically fixed in the policy, the rate shall be the rate fixed for policy loans in other policies issued by the insurer at the time the policy brought under the Act [sections 501 to 548 and 560 to 590 of this Appendix] was issued. The amount deducted by reason of the protection afforded by this article [sections 540 to 548 of this Appendix] shall be reported by the insurer to the Administrator of Veterans' Affairs. (Oct. 17, 1940, ch. 888, § 405, 54 Stat. 1184; Oct. 6, 1942, ch. 581, § 13, 56 Stat. 775.)

PRIOR PROVISIONS

Section 405 of act Oct. 17, 1940, as originally enacted, which, by the provisions of section 408 of act Oct. 17, 1940 as amended and incorporated in section 548 of this Appendix, is continued in force as to applications for protection executed prior to Oct. 6, 1942, read:

"No policy which has not lapsed for the nonpayment of premium before the commencement of the period of military service of the insured, and which has been brought within the benefits of this article, shall lapse or be forfeited for the nonpayment of premium during the period of such service or during one year after the expiration of such period: Provided, That in no case shall this prohibition extend for more than one year after the date when this Act ceases to be in force."

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 544, 546 to 548 and 560 to 590 of this Appendix.

§ 546. Guaranty of premiums and interest by United States; settlement of amounts due upon expiration of protection; subrogation of United States; crediting debt repayments.

Payment of premiums and interest thereon at the rate specified in section 405 hereof [section 545 of this Appendix] becoming due on a policy while protected under the provisions of this article [sections 540 to 548 of this Appendix] is guaranteed by the United States, and if the amount so guaranteed is not paid to the insurer prior to the expiration of the period of insurance protection under this article [said sections], the amount then due shall be treated by the insurer as a policy loan on such policy, but if at the expiration of said period the cash surrender value is less than the amount then due, the policy shall then cease and terminate and the United States shall pay the insurer the difference between such amount and the cash surrender value. The amount paid by the United States to an insurer on account of applications approved under the provisions of this article, as amended [said sections], shall become a debt due to the United States by the insured on whose account payment was made and, notwithstanding any other Act, such amount may be collected either by deduction from any amount due said insured by the United States or as otherwise authorized by law. Any moneys received as repayment of debts incurred under this article, as originally enacted and as amended [said sections], shall be credited to the appropriation for the payment of claims under this article [said sections]. (Oct. 17, 1940, ch. 888, § 406, 54 Stat. 1184; Oct. 6, 1942, ch. 581, § 13, 56 Stat. 775; Apr. 3, 1948, ch. 170, § 6, 62 Stat. 160.)

AMENDMENTS

1948—Act Apr. 3, 1948, added last sentence to section.

PRIOR PROVISIONS

Section 406 of act Oct. 17, 1940, as originally enacted, which, by the provisions of section 408 of act Oct. 17, 1940 as amended and incorporated in section 548 of this Appendix, is continued in force as to applications for protection executed prior to Oct. 6, 1942, read:

"Within the first fifteen days of each calendar month after the date of approval of this Act until the expiration of one year after the date when this Act ceases to be in force every insurance corporation or association to which application has been made as herein provided, for the benefits of this article, shall render to the Veterans' Administration a report, duly verified, setting forth the following facts:

"First. The names of the persons who have applied for such benefits, and the face value of the policies in respect of which such benefits have been applied for by such persons during the preceding calendar month.

"Second. A list as far as practicable of the premiums in respect of policies entitled to the benefits of this article, which remain unpaid on the last day of the preceding calendar month, which day is at least thirty-one days after the due date of the premiums, provided such premiums have not previously been so reported as in default.

"Third. A list of premiums which, having been previously reported as in default, have been paid by the policyholder or someone on his behalf in whole or in part during the preceding calendar month.

"Fourth. A computation of the difference between the total amount of defaulted premiums therein reported and the total amount of premiums paid as therein reported, after having been previously reported as in default. From this sum shall be deducted the total sum of any premiums previously reported as in default, upon policies in respect of which the Veterans' Administration

has, since the date of such report, rejected an application for the benefits of this article. The final sum so arrived at shall be denominated the monthly difference."

CROSS REFERENCES

Termination of war for purposes of sections 540—548 of this Appendix, see note to section 584 of this Appendix.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 545, 547, 548 and 560 to 590 of this Appendix.

§ 547. Regulations; finality of determinations.

The Administrator of Veterans' Affairs is authorized and directed to provide by regulations for such rules of procedure and forms as he may deem advisable in carrying out the provisions of this article [sections 540 to 548 of this Appendix]. The findings of fact and conclusions of law made by the Administrator of Veterans' Affairs in administering the provisions of this article [said sections] shall be final, and shall not be subject to review by any other official or agency of the Government. (Oct. 17, 1940, ch. 888, § 407, 54 Stat. 1185; Oct. 6, 1942, ch. 581, § 13, 56 Stat. 775; Sept. 2, 1958, Pub. L. 85–857, § 14(76), 72 Stat. 1272.)

PRIOR PROVISIONS

Section 407 of act Oct. 17, 1940, as originally enacted, which, by the provisions of section 408 of act Oct. 17, 1940, as amended and incorporated in section 548 of this Appendix, is continued in force as to applications for protection executed prior to Oct. 6, 1942, read:

"The Administrator of Veterans' Affairs shall verify the computation of monthly difference reported by each insurer and shall, within ten days thereafter, deliver each month to the proper officer of such insurer, a certificate in the amount of the monthly difference certified in respect of each insurer. Such certificate shall be signed by said Administrator in the name of the United States, shall be in such form as the Administrator shall determine, shall be payable to the insurer within sixty days after the approval of the statement of account, as provided in section 411 hereof [section 551 of this Appendix], and shall bear interest at a rate to be prescribed by the Secretary of the Treasury, payable with the principal. Such certificate shall not be transferred except with the approval of said Administrator and shall remain with the insurer until settlement is made in accordance with this article."

AMENDMENTS

1958—Pub. L. 85–857 eliminated provisions which required the Administrator of Veterans' Affairs to report annually to the Congress on the administration of sections 540—548 of this Appendix. See section 214 of Title 38, Veterans' Benefits.

EFFECTIVE DATE OF 1958 AMENDMENT

Amendment of section by Pub. L. 85–857 effective Jan. 1, 1959, see section 2 of Pub. L. 85–857, set out as a note preceding Part I of Title 38, Veterans' Benefits.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 546, 548 and 560 to 590 of this Appendix.

§ 548. Law governing applications for protection prior to October 6, 1942.

(1) The provisions of this article [sections 540—548 of this Appendix] in force immediately prior to the enactment of the Soldiers' and Sailors' Civil Relief Act amendments of 1942 [Act Oct. 6, 1942, which, among other things, amended this article generally] (hereinafter in this section called "such provisions") shall remain in full force and effect with respect to all valid applications for protection executed prior to the date of enactment of the Soldiers' and Sailors' Civil Relief Act amendments of 1942 [Oct. 6, 1942] and all policies to which such applications pertain shall continue to be entitled to the protection granted thereby.

(2) Any insurer under a policy accepted under such provisions shall, subject to the approval of the Administrator of Veterans' Affairs and upon complete surrender by it to the United States, within ninety days after the date of enactment of the Soldiers' and Sailors' Civil Relief Act amendments of 1942 [Oct. 6, 1942], of all certificates issued in accordance with such provisions together with all right to payment thereunder, be entitled to the guarantee of unpaid premiums and interest thereon and the mode of settlement for such policies as provided by this article, as amended [sections 540 to 548 of this Appendix]. The privileges and benefits granted by the foregoing sentence shall be in lieu of the method of settlement, and the requirement for accounts and reports prescribed by such provisions. In the event any such insurer fails to surrender within the said ninety days all such certificates and rights to payment, the accounts, reports, and settlements required to be made by such insurer under such provisions shall continue to be made as required and shall be governed by such provisions. (Oct. 17, 1940, ch. 888, § 408, 54 Stat. 1185; Oct. 6, 1942, ch. 581, § 13, 56 Stat. 776.)

REFERENCES IN TEXT

The provisions of this article in force immediately prior to the enactment of the Soldiers' and Sailors' Civil Relief Act amendments of 1942, referred to in text, are set out in notes under sections 540—548 and 549—554 of this Appendix.

The Soldiers' and Sailors' Civil Relief Act Amendments of 1942, referred to in the text, amended, among other sections, this section. For other sections affected, see note under section 501 of this Appendix.

PRIOR PROVISIONS

Section 408 of act Oct. 17, 1940, as originally enacted, continued in force by this section as amended by act Oct. 6, 1942, read: "The certificate so delivered shall be held by the respective insurers as security for the payment of the defaulted premiums with interest. To indemnify it against loss the United States shall have a first lien upon any policy receiving the benefits of this article, subject only to any lien existing at the time the policy became subject to this Act, and no loan or settlement or payment of dividend shall be made by the insurer on such policy which may prejudice the security of such lien. Before any dividend is paid or any loan or settlement is made the written consent of the Veterans' Administration must be obtained."

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 547 and 560 to 590 of this Appendix.

§§ 549 to 554. Omitted.

CODIFICATION

Sections 549—554 of this Appendix were omitted from "Article IV—Insurance" in the general amendment thereof by act Oct. 6, 1942, ch. 581, § 13, 56 Stat. 773. They were from sections 409—414, respectively, of act Oct. 17, 1940, ch. 888, 54 Stat. 1185, 1186, and read:

"§ 549. *Deduction of unpaid premiums from proceeds of policies.* In the event that the military service of any person being the holder of a policy receiving the benefits of this article shall be terminated by death, the amount of any unpaid premiums, with interest at the rate provided for in the policy for policy loans, shall be deducted from the proceeds of the policy and shall be included in the next monthly report of the insurer as premiums paid. Oct. 17, 1940, ch. 888 § 409, 54 Stat. 1185.

"§ 550. *Lapsing of policy for failure to pay past due premiums upon termination of service.* If the insured

does not within one year after the termination of his period of military service pay to the insurer all past due premiums with interest thereon from their several due dates at the rate provided in the policy for policy loans, the policy shall at the end of such year immediately lapse and become void, and the insurer shall thereupon become liable to pay the cash surrender value thereof, if any: *Provided*, That if the insured is in the military service when this Act ceases to be in force, such lapse shall occur and surrender value be payable at the expiration of one year after the date when this Act ceases to be in force Oct. 17, 1940, ch. 888, § 410, 54 Stat. 1185.

"§ 551. *Accounts stated between insurers and United States.* At the expiration of one year after the date when this Act ceases to be in force there shall be an account stated between each insurer and the United States, in which there shall be credited to the insurer the total amount of the certificates held as security under this article, together with accrued interest to the date of the account, and in which there shall be credited to the United States the amount of the cash surrender value of each policy lapsed or forfeited as provided in section 410 [section 550 of this Appendix], but not in any case a greater amount on any policy than the total of the unpaid premiums with interest thereon at the rate provided for in the policy for policy loans. Oct. 17, 1940, ch. 888, § 411, 54 Stat. 1185.

"§ 552. *Payment of balances due insurers by Secretary of Treasury.* The balance in favor of the insurer in each case shall be certified by the Administrator of Veterans' Affairs to the Secretary of the Treasury, who shall pay to the insurer the amount thereof, which is hereby authorized to be appropriated, out of any moneys in the Treasury not otherwise appropriated, upon the surrender by the insurer of the certificates delivered to it from time to time by the Administrator of Veterans' Affairs under the provisions of this article. Oct. 17, 1940, ch. 888, § 412, 54 Stat. 1185.

"§ 553. *Policies excepted from application of article.* This article shall not apply to any policy which is void or which may at the option of the insured be voidable, if the insured is in military service, either in this country or abroad, nor to any policy which as a result of being in military service, either in this country or abroad, provides for the payment of any sum less than the face thereof or for the payment of an additional amount as premium. Oct. 17, 1940, ch. 888, § 413, 54 Stat. 1186.

"§ 554. *Insurers within application of article.* This article shall apply only to insurance companies or associations which are required, by the law under which they are organized or doing business to maintain a reserve, or, which if not so required, have made or shall make provision for the collection from all those insured in such insurer of a premium to cover the special war risk of those insured persons who are in military service. Oct. 17, 1940, ch. 888, § 414, 54 Stat. 1186."

ARTICLE V.—TAXES AND PUBLIC LANDS

§ 560. Taxes respecting personalty, money, credits, or realty; sale of property to enforce collection; redemption of property sold; penalty for nonpayment; notice of rights to beneficiaries of section.

(1) The provisions of this section shall apply when any taxes or assessments, whether general or special (other than taxes on income), whether falling due prior to or during the period of military service, in respect of personal property, money, or credits, or real property owned and occupied for dwelling, professional, business, or agricultural purposes by a person in military service or his dependents at the commencent of his period of military service and still so occupied by his dependents or employees are not paid.

(2) No sale of such property shall be made to enforce the collection of such tax or assessment, or any proceeding or action for such purpose commenced, except upon leave of court granted upon application made therefor by the collector of taxes or other officer whose duty it is to enforce the collection of taxes or assessments. The court thereupon, unless in its opinion the ability of the person in military service to pay such taxes or assessments is not materially affected by reason of such service, may stay such proceedings or such sale, as provided in this Act [sections 501 to 548 and 560 to 590 of this Appendix], for a period extending not more than six months after the termination of the period of military service of such person.

(3) When by law such property may be sold or forfeited to enforce the collection of such tax or assessment, such person in military service shall have the right to redeem or commence an action to redeem such property, at any time not later than six months after the termination of such service, but in no case later than six months after the date when this Act [said sections] ceases to be in force; but this shall not be taken to shorten any period, now or hereafter provided by the laws of any State or Territory for such redemption.

(4) Whenever any tax or assessment shall not be paid when due, such tax or assessment due and unpaid shall bear interest until paid at the rate of 6 per centum per annum, and no other penalty or interest shall be incurred by reason of such nonpayment. Any lien for such unpaid taxes or assessment shall also include such interest thereon. (Oct. 17, 1940, ch. 888, § 500, 54 Stat. 1186; Oct. 6, 1942, ch. 581, § 14, 56 Stat. 776.)

Amendments

1942—Subsec. (1). Act Oct. 6, 1942, inserted parenthetical clause excepting income taxes, included taxes and assessments falling due prior to period of military service, and extended benefits to cover personal property, money, or credits, and real property owned and occupied for professional purposes.

Subsec. (2). Act Oct. 6, 1942, § 14(a), amended section generally.

Subsec. (5). Act Oct. 6, 1942, § 14(b), repealed subsec. (5), which required the Secretaries of War, Navy, and Treasury to give notice of the benefits of this section to persons in the military service.

Section Referred to in Other Sections

This section is referred to in sections 501, 510 to 548 and 561 to 590 of this Appendix.

§ 561. Rights to public lands not forfeited; grazing lands.

(1) No right to any lands owned or controlled by the United States initiated or acquired under any laws of the United States, including the mining and mineral leasing laws, by any person prior to entering military service shall during the period of such service be forfeited or prejudiced by reason of his absence from the land or his failure to perform any work or make any improvements thereon or his failure to do any other act required by or under such laws.

(2) If a permittee or licensee under the Act of June 28, 1934 (48 Stat. 1269) [sections 315 to 315g, 315h to 315m, 315n, 315o-1 and 1171 of Title 43] enters military service, he may elect to suspend his permit or license for the period of his military service and six months thereafter, and the Secretary of the Interior by regulations shall provide for such suspension of permits and licenses and for the remission, reduction, or refund of grazing fees during such suspension.

(3) This section shall not be construed to control specific requirements contained in this article [sections 560 to 574 of this Appendix]. (Oct. 17, 1940, ch. 888, § 501, 54 Stat. 1187.)

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 548, 560 and 562 to 590 of this Appendix.

§ 562. Homestead entries and settlement claims; service as equivalent to residence and cultivation.

If any person whose application for a homestead entry has been allowed or who has made application for homestead entry which may thereafter be allowed, after such entry or application enters military service, or if any person who has a valid settlement claim enters military service, the Department of the Interior shall construe his military service to be equivalent to residence and cultivation upon the tract entered or settled upon for the period of such service. From the effective date of this Act [Oct. 17, 1940] no contest shall be initiated on the ground of abandonment and no allegation of abandonment shall be sustained against any such person, unless it shall be alleged in the preliminary affidavit or affidavits of contest and proved at the hearing in cases initiated subsequent to the effective date of this Act [Oct. 17, 1940] that the alleged absence from the land was not due to such military service. If such person is discharged on account of wounds received or disability incurred in the line of duty, the term of his enlistment and any period of hospitalization due to such wounds or disability shall be deducted from the required length of residence, without reference to the time of actual service. No patent shall issue to any such person who has not resided upon, improved, and cultivated his homestead for a period of at least one year. (Oct. 17, 1940, ch. 888, § 502, 54 Stat. 1187.)

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 548, 560, 561 and 563 to 590 of this Appendix.

§ 563. Same; death or incapacity during or resulting from service as affecting rights; perfection of rights.

(1) If any person whose application for a homestead entry has been allowed or who has made application for homestead entry which may thereafter be allowed or who has a valid settlement claim dies while in military service or as a result of such service, his widow, if unmarried, or in the case of her death or marriage, his minor children, or his or their legal representatives, may proceed forthwith to make final proof upon such entry or upon an application which is allowed after the applicant's death, or upon a homestead application thereafter allowed based on a valid settlement claim, and shall be entitled to receive a patent for such land. The death of such person while in military service or as a result of such service shall be construed to be equivalent to a performance of all requirements as to residence and cultivation upon such homestead or claim, notwithstanding the provisions of section 502 of this Act [section 562 of this Appendix].

(2) If such person is honorably discharged and because of physical incapacities due to such service is unable to return to the land, he may make final proof without further residence, improvement, or cultivation, at such time and place as the Secretary of the Interior may authorize, and receive a patent to the land entered.

(3) The Act of July 28, 1917 (40 Stat. 248) [sections 241 and 242 of Title 43], is repealed. (Oct. 17, 1940, ch. 888, § 503, 54 Stat. 1187.)

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 548, 560 to 562 and 564 to 590 of this Appendix.

§ 564. Desert-land entries; suspension of requirements.

(1) No desert-land entry made or held under the desert-land laws prior to the entrance of the entryman or his successor in interest into military service shall be subject to contest or cancelation for failure to make or expend the sum of $1 per acre per year in improvements upon the claim or to effect the reclamation of the claim during the period the entryman or his successor in interest is engaged in military service or during a period of six months thereafter or during any period of hospitalization because of wounds or disability incurred in the line of duty. The time within which such entryman or claimant is required to make such expenditures and effect reclamation of the land shall be exclusive of his period of service and the six-months' period and any such period of hospitalization.

(2) If such entryman or claimant is honorably discharged and because of physical incapacities due to such service is unable to accomplish reclamation of, and payment for, the land, he may make proof without further reclamation or payments under such rules as the Secretary of the Interior may prescribe and receive patent for the land entered or claimed.

(3) In order to obtain the benefits of this section, such entryman or claimant shall, within six months after the effective date of this Act [Oct. 17, 1940] or within six months after his entrance into military service, file or cause to be filed in the land office of the district in which his claim is situated a notice that he has entered military service and that he desires to hold the desert claim under this section. (Oct. 17, 1940, ch. 888, § 504, 54 Stat. 1187.)

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 548, 560 to 563 and 565 to 590 of this Appendix.

§ 565. Mining claims; requirements suspended.

(1) The provisions of section 2324 of the Revised Statutes of the United States [section 28 of Title 30], which require that on each mining claim located after May 10, 1872, and until patent has been issued therefor not less than $100 worth of labor shall be performed or improvements made during each year, shall not apply during the period of his service, or until six months after the termination of such service, or during any period of hospitalization because of wounds or disability incurred in line of duty, to claims or interests in claims which are owned by a person in military service and which have been regularly located and recorded. No mining claim or any interest in a claim which is owned by such a person and which has been regularly located and recorded shall be subject to forfeiture by nonperformance of the annual assessments during the period

of such military service, or until six months after the termination of such service or of such hospitalization.

(2) In order to obtain the benefits of this section, the claimant of any mining location shall, before the expiration of the assessment year during which he enters military service, file or cause to be filed in the office where the location notice or certificate is recorded a notice that he has entered such service and that he desires to hold his mining claim under this section. (Oct. 17, 1940, ch. [illegible] § 505, 54 Stat. 1188.)

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 548, 560 to 564 and 566 to 590 of this Appendix.

§ 566. Mineral permits and leases; suspension of operations and term of permits and leases.

(1) Any person holding a permit or lease on the public domain under the Federal mineral leasing laws who enters military service may, at his election, suspend all operations under his permit or lease for a period of time equivalent to the period of his military service and six months thereafter. The term of the permit or lease shall not run during such period of suspension nor shall any rentals or royalties be charged against the permit or lease during the period of suspension.

(2) In order to obtain the benefit of this section, such permittee or lessee shall, within six months after the effective date of this Act [Oct. 17, 1940], or six months after his entrance into military service, notify the Bureau of Land Management by registered mail of his entrance into such service and of his desire to avail himself of the benefits of this section.

(3) This section shall not be construed to supersede the terms of any contract for operation of a permit or lease. (Oct. 17, 1940, ch. 888, § 506, 54 Stat. 1188; 1946 Reorg. Plan No. 3, § 403, eff. July 16, 1946, 11 F. R. 7876, 60 Stat. 1100.)

TRANSFER OF FUNCTIONS

"Bureau of Land Management" was substituted for "General Land Office" on authority of 1946 Reorg. Plan No. 3, set out as a note under section 1 of Title 43, Public Lands.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 548, 560 to 565 and 567 to 590 of this Appendix.

§ 567. Right to take action for perfection, defense, etc., of rights as unaffected; affidavits and proofs.

Nothing in this article [sections 560 to 574 of this Appendix] shall be construed to limit or affect the right of a person in military service to take any action during his period of service which may be authorized by law or the regulations of the Department of the Interior for the perfection, defense, or further assertion of rights initiated or acquired prior to the date of entering military service. It shall be lawful for any person while in such service to make any affidavit or submit any proof which may be required by law or the practice or regulations of the Bureau of Land Management in connection with the entry, perfection, defense, or further assertion of any rights initiated or acquired prior to entering such service, before the officer in immediate command and holding a commission in the branch of the service in which the person is engaged. Such affidavits shall be as binding in law and with like penalties as if taken before an officer designated by the Secretary of the Interior of a United States land office. The Secretary of the Interior may issue rules and regulations to effectuate the purposes of sections 501 to 512, inclusive [sections 561—572 of this Appendix]. (Oct. 17, 1940, ch. 888, § 507, 54 Stat. 1188; 1946 Reorg. Plan No. 3, § 403, eff. July 16, 1946, 11 F. R. 7876, 60 Stat. 1100.)

TRANSFER OF FUNCTIONS

"Bureau of Land Management" was substituted for "General Land Office" and "an officer designated by the Secretary of the Interior" for "a register" on authority of 1946 Reorg. Plan No. 3, set out as a note under section 1 of Title 43, Public Lands.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 548, 560 to 565 and 568 to 590 of this Appendix.

§ 568. Irrigation rights; residence requirements suspended.

The Secretary of the Interior is authorized, in his discretion, to suspend as to persons in military service during the period while this Act [sections 501 to 548 and 560 to 590 of this Appendix] remains in force and for a period of six months thereafter or during any period of hospitalization because of wounds or disability incurred in line of duty that provision of the act known as the "Reclamation Act" requiring residence upon lands in private ownership or within the neighborhood for securing water for the irrigation of the same [section 431 of Title 43], and he is authorized to permit the use of available water thereon upon such terms and conditions as he may deem proper. (Oct. 17, 1940, ch. 888, § 508, 54 Stat. 1189.)

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 548, 560 to 567 and 569 to 590 of this Appendix.

§ 569. Distribution of information concerning benefits of article; forms.

The Secretary of the Interior shall issue through appropriate military and naval channels a notice for distribution by appropriate military and naval authorities to persons in the military service explaining the provisions of this article [sections 560 to 574 of this Appendix] except as to sections 500, 513, and 514 hereof [sections 560, 573 and 574 of this Appendix] and shall furnish forms to be distributed in like manner to those desiring to make application for its benefits, except as to said sections. (Oct. 17, 1940, ch. 888, § 509, 54 Stat. 1189; Oct. 6, 1942, ch. 581, § 15, 56 Stat. 776.)

AMENDMENTS

1942—Act Oct. 6, 1942, substituted "sections 500, 513, and 514" for "section 500" and "sections" for "section" at end of section.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 548, 560 to 568 and 570 to 590 of this Appendix.

§ 570. Homestead entrymen permitted to leave entries to perform farm labor.

(1) During the pendency of any war in which the United States may be engaged while this Act [sections 501 to 548 and 560 to 590 of this Appendix] remains in force any homestead entryman shall be entitled to a leave of absence from his entry for the

purpose of performing farm labor. The time actually spent in farm labor shall be counted as constructive residence, if within fifteen days after leaving his entry to engage in such labor the entryman files a notice of absence in the land office of the district in which his entry is situated, and if at the expiration of the calendar year the entryman files in that office a written statement under oath and corroborated by two witnesses giving the date or dates when he left his entry, the date or dates of his return, and the place where and person for whom he was engaged in farm labor during such period or periods of absence.

(3) Nothing in this section shall excuse any homestead entryman from making improvements or performing the cultivation upon his entry required by law. The provisions of this section shall apply only to persons whose applications have been allowed or filed prior to the effective date of this Act [Oct. 17, 1940]. (Oct. 17, 1940, ch. 888, § 510, 54 Stat. 1189.)

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 548, 560 to 569 and 571 to 590 of this Appendix.

§ 571. Land rights of persons under 21.

Any person under the age of twenty-one who serves in the military service while this Act [sections 501 to 548 and 560 to 590 of this Appendix] remains in force shall be entitled to the same rights under the laws relating to lands owned or controlled by the United States, including the mining and mineral leasing laws, as those over twenty-one now possess under such laws. Any requirements as to establishment of residence within a limited time shall be suspended as to entry by such person until six months after his discharge from military service. Applications for entry may be verified before any officer in the United States or any foreign country authorized to administer oaths by the laws of the State or Territory in which the land may be situated. (Oct. 17, 1940, ch. 888, § 511, 54 Stat. 1189.)

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 548, 560 to 570 and 572 to 590 of this Appendix.

§ 572. Extension of benefits to persons serving with war allies of United States.

Citizens of the United States who serve with the forces of any nation with which the United States may be allied in the prosecution of any war in which the United States engages while this Act [sections 501 to 548 and 560 to 590 of this Appendix] remains in force shall be entitled to the relief and benefits afforded by sections 501 to 511, inclusive [sections 561 to 571 of this Appendix], if such service is similar to military service as defined in this Act [sections 501 to 548 and 560 to 590 of this Appendix], and if they are honorably discharged and resume United States citizenship or die in the service of the allied forces or as a result of such service. (Oct. 17, 1940, ch. 888, § 512, 54 Stat. 1190; Oct. 6, 1942, ch. 581, § 16, 56 Stat. 776.)

AMENDMENTS

1942—Act Oct. 6, 1942, substituted "sections 501 to 511, inclusive" for "this article."

REPEAL OF PRIOR ACTS CONTINUING SECTION

Section 6 of Joint Res. July 3, 1952, repealed Joint Res. Apr. 14, 1952, ch. 204, 66 Stat. 54 as amended by Joint Res. May 28, 1952, ch. 339, 66 Stat. 96; Joint Res. June 14, 1952, ch. 437, 66 Stat. 137; Joint Res. June 30, 1952, ch. 526, 66 Stat. 296, which continued provisions until July 3, 1952. This repeal shall take effect as of June 16, 1952, by section 7 of Joint Res. July 3, 1952.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 548, 560 to 571 and 574 to 590 of this Appendix.

§ 573. Income taxes; collection deferred; interest; statute of limitations.

The collection from any person in the military service of any tax on the income of such person, whether falling due prior to or during his period of military service, shall be deferred for a period extending not more than six months after the termination of his period of military service if such person's ability to pay such tax is materially impaired by reason of such service. No interest on any amount of tax, collection of which is deferred for any period under this section, and no penalty for nonpayment of such amount during such period, shall accrue for such period of deferment by reason of such nonpayment. The running of any statute of limitations against the collection of such tax by distraint or otherwise shall be suspended for the period of military service of any individual the collection of whose tax is deferred under this section, and for an additional period of nine months beginning with the day following the period of military service. The provisions of this section shall not apply to the income tax on employees imposed by section 1400 of the Federal Insurance Contributions Act. (Oct. 17, 1940, ch. 888, § 513, 54 Stat. 1190.)

REFERENCES IN TEXT

Section 1400 of the Federal Insurance Contributions Act, referred to in the text, is a reference to section 1400 of Title 26, I.R.C. 1939, which was repealed by section 7851 of Title 26, I.R.C. 1954, and is now covered by section 3101 of Title 26, I.R.C. 1954. For provision deeming a reference in other laws to a provision of I.R.C. 1939, also as a reference to corresponding provision of I.R.C. 1954, see section 7852(b) of Title 26, I.R.C. 1954.

FORMER PROVISIONS FOR ABATEMENT OF TAX

Internal Revenue Code, § 421, as added by act June 9, 1943, 7 p. m., E. W. T., ch. 120, § 8, 57 Stat. 149, and amended by acts Aug. 5, 1947, ch. 496, § 1, 61 Stat. 778; Aug. 8, 1947, ch. 515, § 9, 61 Stat. 918 (section 421 of Title 26, I.R.C. 1939), provided for abatement of income tax for members of armed forces dying on or after December 7, 1941, while in active service and prior to January 1, 1948. These provisions were omitted in the general amendment of that section by act Sept. 23, 1950, 3:15 p.m., E.D.T., ch. 994, title III, part I, § 301, 64 Stat. 947.

EXTENSION OF DUE DATE UNDER OTHER LAWS

Section 507 (b) (2) (A) of the Revenue Act of 1942, act Oct. 21, 1942, 4:30 p. m., E. W. T., ch. 619, title V, 56 Stat. 964, provided: "The amendments made by this section [adding sections 3804 and 3805 of Title 26, I.R.C. 1939, and adding section 527 of this Appendix] shall not be construed to shorten any period fixed under the provisions of section 513 of the Soldiers' and Sailors' Civil Relief Act of 1940 [this section] within which any act may be done, except that any action or proceeding authorized under section 3804(d)(1) of the Internal Revenue Code [Title 26, I.R.C. 1939], as well as any other action or proceeding authorized by law in connection therewith, may be taken, begun, or prosecuted without regard to the period so fixed."

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 548, 560 to 572 and 574 to 590 of this Appendix.

§ 574. Residence for tax purposes.

(1) For the purposes of taxation in respect of any person, or of his personal property, income, or gross income, by any State, Territory, possession, or political subdivision of any of the foregoing, or by the District of Columbia, such person shall not be deemed to have lost a residence or domicile in any State, Territory, possession, or political subdivision of any of the foregoing, or in the District of Columbia solely by reason of being absent therefrom in compliance with military or naval orders, or to have acquired a residence or domicile in, or to have become resident in or a resident of, any other State, Territory, possession, or political subdivision of any of the foregoing, or the District of Columbia, while, and solely by reason of being, so absent. For the purposes of taxation in respect of the personal property, income, or gross income of any such person by any State, Territory, possession, or political subdivision of any of the foregoing, or the District of Columbia, of which such person is not a resident or in which he is not domiciled, compensation for military or naval service shall not be deemed income for services performed within, or from sources within, such State, Territory, possession, political subdivision, or District, and personal property shall not be deemed to be located or present in or to have a situs for taxation in such State, Territory, possession, or political subdivision, or district. Where the owner of personal property is absent from his residence or domicile solely by reason of compliance with military or naval orders, this section applies with respect to personal property, or the use thereof, within any tax jurisdiction other than such place of residence or domicile, regardless of where the owner may be serving in compliance with such orders: *Provided*, That nothing contained in this section shall prevent taxation by any State, Territory, possession, or political subdivision of any of the foregoing, or the District of Columbia in respect of personal property used in or arising from a trade or business, if it otherwise has jurisdiction. This section shall be effective as of September 8, 1939, except that it shall not require the crediting or refunding of any tax paid prior to October 6, 1942.

(2) When used in this section, (a) the term "personal property" shall include tangible and intangible property (including motor vehicles), and (b) the term "taxation" shall include but not be limited to licenses, fees, or excises imposed in respect to motor vehicles or the use thereof: *Provided*, That the license, fee, or excise required by the State, Territory, possession, or District of Columbia of which the person is a resident or in which he is domiciled has been paid. (Oct. 17, 1940, ch. 888, § 514, as added Oct. 6, 1942, ch. 581, § 17, 56 Stat. 777, and amended July 3, 1944, ch. 397, § 1, 58 Stat. 722; Oct. 9, 1962, Pub. L. 87-771, 76 Stat. 768.)

AMENDMENTS

1962—Pub. L. 87-771 inserted sentence in par. (1) making this section applicable with respect to personal property, or the use thereof, within any tax jurisdiction other than the place of residence or domicile, regardless of where the owner may be serving in compliance with military or naval orders where the owner of personal property is absent from his residence or domicile solely by reason of compliance with such orders.

1944—Act July 3, 1944, added "personal" preceding "property" in first sentence, "personal property", preceding "income or gross income", "and personal property shall * * * other has jurisdiction" following "or District" in second sentence, and substituted "October 6, 1942" for "the date of the enactment of the Soldiers' and Sailors' Civil Relief Act amendments of 1942" in the third sentence.

CREDITING OR REFUNDING TANGIBLE PERSONAL PROPERTY TAX

Section 2 of act July 3, 1944, provided: "Nothing contained in this Act [this section] shall be construed to require the crediting or refunding of any tax in respect of tangible personal property (including licenses, fees, or excise imposed in respect of motor vehicles or the use thereof) paid prior to the date of its enactment. [July 3, 1944]."

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 548, 560 to 573 and 580 to 590 of this Appendix.

ARTICLE VI.—ADMINISTRATIVE REMEDIES

§ 580. Transfers to take advantage of act.

Where in any proceeding to enforce a civil right in any court it is made to appear to the satisfaction of the court that any interest, property, or contract has since the date of the approval of this Act [Oct. 17, 1940] been transferred or acquired with intent to delay the just enforcement of such right by taking advantage of this Act [sections 501 to 548 and 560 to 590 of this Appendix], the court shall enter such judgment or make such order as might lawfully be entered or made, the provisions of this Act [said sections] to the contrary notwithstanding. (Oct. 17, 1940, ch. 888, § 600, 54 Stat. 1190.)

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 548, 560 to 574 and 581 to 590 of this title.

§ 581. Certificates of service; persons reported missing.

(1) In any proceedng under this Act [sections 501 to 548 and 560 to 590 of this Appendix] a certificate signed by The Adjutant General of the Army as to persons in the Army or in any branch of the United States service while serving pursuant to law with the Army of the United States, signed by the Chief of Naval Personnel as to persons in the United States Navy or in any other branch of the United States service while serving pursuant to law with the United States Navy, and signed by the Commandant, United States Marine Corps, as to persons in the Marine Corps, or in any other branch of the United States service while serving pursuant to law with the Marine Corps, or signed by an officer designated by any of them, respectively, for the purpose, shall when produced be prima facie evidence as to any of the following facts stated in such certificate:

That a person named has not been, or is, or has been in military service; the time when and the place where such person entered military service, his residence at that time, and the rank, branch, and unit of such service that he entered, the dates within which he was in military service, the monthly pay received by such person at the date of issuing the certificate, the time when and the place where such person died in or was discharged from such service.

(2) It shall be the duty of the foregoing officers to furnish such certificate on application, and any such certificate when purporting to be signed by any one of such officers or by any person purporting upon the face of the certificates to have been so authorized shall be prima facie evidence of its contents and of the authority of the signer to issue the same.

(3) Where a person in military service has been reported missing he shall be presumed to continue in the service until accounted for, and no period herein limited which begins or ends with the death of such person shall begin or end until the death of such person is in fact reported to or found by the Department of the Army or Navy, or any court or board thereof, or until such death is found by a court of competent jurisdiction: *Provided*, That no period herein limited which begins or ends with the death of such person shall be extended beyond a period of six months after the time when this Act [said sections] ceases to be in force. (Oct. 17, 1940, ch. 888, § 601, 54 Stat. 1190; Jan. 20, 1942, ch. 10, § 1, 56 Stat. 10; May 13, 1942, ch. 303, § 1, 56 Stat. 276.)

REFERENCES IN TEXT

The time when this Act ceases to be in force, referred to in subdivision (2), is defined in section 584 of this title.

CODIFICATION

The Department of War was designated the Department of the Army and the title of the Secretary of War was changed to Secretary of the Army by section 205(a) of act July 26, 1947, ch. 343, title II, 61 Stat. 501. Section 205(a) of act July 26, 1947, was repealed by section 53 of act Aug. 10, 1956, ch. 1041, 70A Stat. 641. Section 1 of act Aug. 10, 1956, enacted "Title 10, Armed Forces" which in sections 3011—3013 continued the military Department of the Army under the administrative supervision of a Secretary of the Army.

CHANGE OF NAME

"Chief of the Bureau of Navigation of the Navy Department" was changed to "Chief of Naval Personnel" under authority of act May 13, 1942.

Act Jan. 20, 1942, redesignated "Major General Commandant of the Marine Corps" to be "Commandant of the Marine Corps".

AIR FORCE

For transfer of certain functions relating to military records, insofar as they pertain to military personnel of the Department of the Air Force, from the Secretary of the Army and Department of the Army to the Secretary of the Air Force and Department of the Air Force, see Secretary of Defense Transfer Order No. 20 [§ 1e], Aug. 12, 1948.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 548, 560 to 580 and 582 to 590 of this title.

§ 582. Revocation, etc., of interlocutory orders.

Any interlocutory order made by any court under the provisions of this Act [sections 501 to 548 and 560 to 590 of this Appendix] may, upon the court's own motion or otherwise, be revoked, modified, or extended by it upon such notice to the parties affected as it may require. (Oct. 17, 1940, ch. 888, § 602, 54 Stat. 1191.)

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 548, 560 to 581 and 583 to 590 of this title.

§ 583. Separability of provisions.

If any provision of this Act [sections 501 to 548 and 560 to 590 of this Appendix], or the application thereof to any person or circumstances, is held invalid, the remainder of the Act [said sections], and the application of such provision to other persons or circumstances, shall not be affected thereby. (Oct. 17, 1940, ch. 888, § 603, 54 Stat. 1191.)

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 548, 560 to 582 and 584 to 590 of this title.

§ 584. Termination date.

This Act [sections 501 to 548 and 560 to 590 of this Appendix] shall remain in force until May 15, 1945: *Provided*, That should the United States be then engaged in a war, this Act [said sections] shall remain in force until such war is terminated by a treaty of peace proclaimed by the President and for six months thereafter: *Provided further*, That wherever under any section or provision of this Act [said sections] a proceeding, remedy, privilege, stay, limitation, accounting, or other transaction has been authorized or provided with respect to military service performed prior to the date herein fixed for the termination of this Act [said sections], such section or provision shall be deemed to continue in full force and effect so long as may be necessary to the exercise or enjoyment of such proceeding, remedy, privilege, stay, limitation, accounting, or other transaction. (Oct. 17, 1940, ch. 888, § 604, 54 Stat. 1191.)

EXTENSION OF ACT

Notwithstanding the provisions of Joint Res. July 25, 1947, set out in a note under this section, this entire act, sections 501—548 and 560—590 of this Appendix, are in force and effect and shall so remain until a subsequent Act of Congress terminates them, under the provisions of section 464 of this Appendix.

TERMINATION OF WAR

Joint Res. July 25, 1947, ch. 327, § 4, 61 Stat. 454, provided: "For the purposes of article IV of the Act of October 17, 1940 (54 Stat. 1183—1186), as amended [sections 540—548 of this Appendix], the present war shall be deemed to have terminated within the meaning of section 604 (54 Stat. 1191) of the said Act [this section], as of the effective date of this joint resolution [July 25, 1947]".

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 548, 560 to 583 and 585 to 590 of this title.

§ 585. Inapplicability of Soldiers' and Sailors' Civil Relief Act of 1918.

CODIFICATION

Section, act Oct. 17, 1940, ch. 888, § 605, 54 Stat. 1191, related to the inapplicability of the Soldiers' and Sailors' Relief Act of 1918, former section 101 et seq. of this Appendix, to military service performed after Oct. 17, 1940.

ARTICLE VII.—FURTHER RELIEF

§ 590. Stay of enforcement of obligations, liabilities, taxes, etc.

(1) A person may, at any time during his period of military service or within six months thereafter, apply to a court for relief in respect of any obligation or liability incurred by such person prior to his period of military service or in respect of any tax or assessment whether falling due prior to or during his period of military service. The court, after appropriate notice and hearing, unless in its opinion the ability of the applicant to comply with the terms of such obligation or liability or to pay such tax or assessment has not been materially affected

by reason of his military service, may grant the following relief:

(a) In the case of an obligation payable under its terms in installments under a contract for the purchase of real estate, or secured by a mortgage or other instrument in the nature of a mortgage upon real estate, a stay of the enforcement of such obligation during the applicant's period of military service and, from the date of termination of such period of military service or from the date of application if made after such service, for a period equal to the period of the remaining life of the installment contract or other instrument plus a period of time equal to the period of military service of the applicant, or any part of such combined period, subject to payment of the balance of principal and accumulated interest due and unpaid at the date of termination of the period of military service or from the date of application, as the case may be, in equal installments during such combined period at such rate of interest on the unpaid balance as is prescribed in such contract, or other instrument evidencing the obligation, for installments paid when due, and subject to such other terms as may be just.

(b) In the case of any other obligation, liability, tax, or assessment, a stay of the enforcement thereof during the applicant's period of military service and, from the date of termination of such period of military service or from the date of application if made after such service, for a period of time equal to the period of military service of the applicant or any part of such period, subject to payment of the balance of principal and accumulated interest due and unpaid at the date of termination of such period of military service or the date of application, as the case may be, in equal periodic installments during such extended period at such rate of interest as may be prescribed for such obligation, liability, tax, or assessment, if paid when due, and subject to such other terms as may be just.

(2) When any court has granted a stay as provided in this section no fine or penalty shall accrue during the period the terms and conditions of such stay are complied with by reason of failure to comply with the terms or conditions of the obligation, liability, tax, or assessment in respect of which such stay was granted. (Oct. 17, 1940, ch. 888, § 700, as added Oct. 6, 1942, ch. 581, § 18, 56 Stat. 777.)

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 501, 510 to 548 and 560 to 585 of this title.

FIRST WAR POWERS ACT, 1941

ACT DEC. 18, 1941, CH. 593, 55 STAT. 838

TITLE I.—COORDINATION OF EXECUTIVE BUREAUS IN THE INTEREST OF THE MORE EFFICIENT CONCENTRATION OF THE GOVERNMENT

§§ 601 to 605. Repealed. Pub. L. 89-554, § 8(a), Sept. 6, 1966, 80 Stat. 651.

Sections, act Dec. 18, 1941, ch. 593, title I, §§ 1-5, 55 Stat. 838, 839, related to coordination of executive bureaus, offices, etc., in the interest of more efficient concentration of the Government, consolidation of offices, expenditure of appropriations for bureaus, offices, etc., Presidential recommendation to Congress for elimination of certain bureaus, offices, etc., and to suspension of conflicting laws.

TITLE II.—CONTRACTS

§ 611. Repealed. Pub. L. 89-554, § 8(a), Sept. 6, 1966, 80 Stat. 651.

Section, acts Dec. 18, 1941, ch. 593, title II, § 201, 55 Stat. 839; Jan. 12, 1951, ch. 1230, § 1, 64 Stat. 1257, related to exemption of war contracts from certain restrictions.

TITLE III.—TRADING WITH THE ENEMY

§ 616. Amendment of section 5 of this Appendix and section 95a of Title 12.

CODIFICATION

Section, act Dec. 18, 1941, ch. 593, title III, § 301, 55 Stat. 839, has been omitted as executed.

§ 617. Repealed. Pub. L. 89-554, 8(a), Sept. 6, 1966, 80 Stat. 651.

Section, act Dec. 18, 1941, ch. 593, title III, § 302, 55 Stat. 840, confirmed certain acts, etc., made under the Trading with the Enemy Act.

§ 618. Repealed. July 5, 1947, ch. 327, § 1, 61 Stat. 449.

Section, act Dec. 18, 1941, ch. 593, title III, § 303, 55 Stat. 840, related to censorship of communications during World War II and penalties and forfeitures for violations thereof.

§§ 619, 620. Omitted.

CODIFICATION

Section 619, act Dec. 18, 1941, ch. 593, title III, § 304, as added Mar. 8, 1946, ch. 83, § 1, 60 Stat. 50, was omitted as its provisions are incorporated in section 32 of this Appendix.

Section 620, act Dec. 18, 1941, ch. 593, title III, § 305, as added Aug. 8, 1946, ch. 878, § 1, 60 Stat. 925, was omitted as its provisions are incorporated in sections 33—37 of this Appendix.

TITLE IV.—TIME LIMIT AND SHORT TITLE

§§ 621, 622. Repealed. Pub. L. 89-554, § 8(a), Sept. 6, 1966, 80 Stat. 651.

Sections, act Dec. 18, 1941, ch. 593, title IV, §§ 401, 402, 55 Stat. 841, provided for the termination of sections 601-605 of this Appendix and contained the short title for former sections 601-605, 611, and 616-622 of this Appendix, the "First War Powers Act, 1941," respectively.

SECOND WAR POWERS ACT, 1942

ACT MAR. 27, 1942, CH. 199, 56 STAT. 176

TITLE I.—EMERGENCY POWERS OF THE INTERSTATE COMMERCE COMMISSION OVER MOTOR AND WATER CARRIERS

Sec.
631 to 631b. Omitted.

TITLE II.—ACQUISITION AND DISPOSITION OF PROPERTY

632, 632a. Omitted.

TITLE III.—PRIORITIES POWERS

633. Amendment of section 1152 of this Appendix.

TITLE IV.—PURCHASE BY FEDERAL RESERVE BANKS OF GOVERNMENT OBLIGATIONS

634. Federal Reserve Act amendment.

TITLE V.—WAIVER OF NAVIGATION AND INSPECTION LAWS

635. Authorization of waiver by responsible department or agency head.

TITLE VI.—POWER TO REQUISITION

636, 636a. Omitted.

TITLE VII.—POLITICAL ACTIVITY

637. Amendment of section 1181 of Title 5.

HB-432

GREATER ANCHORAGE AREA BOROUGH

3500 TUDOR ROAD, POUCH 6-650
ANCHORAGE, ALASKA 99502

April 30, 1971

GLENN M. McKEE
ASSESSOR
279-8686

Representative William J. Moran
State House
State Capitol
Juneau, Alaska 99801

Dear Representative Moran:

Re: House Bill No. 432.

I have been following House Bill 432 for some time. I do have one question: The Senior Citizens' Bill purpose and intent is to keep the senior citizens in Alaska where, as I read it, they can continue to make their immeasurable contributions to the younger generations.

The one problem I see with this bill is that it is for the abode of the senior citizen on Real Property only. There are numerous senior citizens who do not choose to live in a home, but would prefer to live in a trailer. Why then are we discriminating against those persons who prefer to live in a trailer and in a trailer court? It is their home, just as a person living on real property is living in his home.

I feel that if this bill is to pass that it should be amended to grant exemption from taxes on the home from those senior citizens who live in trailers, even though the trailer is not on their own property. We in the Anchorage Borough, as do most all of the other boroughs and cities in the state, classify a trailer as Personal Property. Therefore, those persons who live in trailers would not be considered under the bill as it presently exists.

Very truly yours,

Glenn M. McKee, Director
Property Assessment & Management Department

STATE OF ALASKA

WILLIAM A. EGAN, GOVERNOR

DEPARTMENT OF NATURAL RESOURCES

OFFICE OF THE COMMISSIONER / POUCH M — JUNEAU 99801

April 13, 1972

Re
CSHB 480

Honorable William J. Moran
Chairman, House Judiciary Committee
Alaska State Legislature
Juneau, Alaska 99801

Bill

Dear Representative Moran:

Attached is a copy of a letter dated April 11, 1972 from Homer L. Burrell, Director of the Division of Oil and Gas, in which he comments on CSHB 480, which is before your Committee for consideration.

Work of the Oil and Gas Conservation Committee, which is in the Division of Oil and Gas, is highly technical. By necessity, the Committee frequently relies on information that is held confidential by law and, in some cases, on information that is furnished with the understanding that it will be held confidential.

Very truly yours,

Charles F. Herbert
Commissioner

STATE
of ALASKA

MEMORANDUM

DEPARTMENT OF NATURAL RESOURCES
DIVISION OF OIL AND GAS

TO: Charles F. Herbert
Commissioner

DATE : April 11, 1972

FROM: Homer L. Burrell
Director

SUBJECT: CSHB No. 480

Although a member of the Alaska Bar Association Administrative Law Committee, I was not present when Committee approval of the captioned bill was voted.

From the standpoint of the Oil and Gas Conservation Committee, I object to: (a) being under the Administrative Procedure Act, as we have our own hearing and appeal procedures in AS 31 with which both the Administrative Procedure Act and the proposed bill conflict; and (b) the fact that the captioned bill requires all state agencies, regardless of their individual governing statutes, to use hearing officers on the staff of the Office of Administrative Adjudication, and opens up our confidential files to the hearing officers.

I therefore recommend:

(1) AS 44.62.330(a)(18) be repealed; and

(2) AS 44.62.353 and 354 (in the captioned bill) be amended to provide that hearing officers may be assigned only to those agencies and functions subject to the Administrative Procedure Act.

The specialized and technical nature of oil and gas conservation hearings is such that a hearing officer without substantial oil and gas experience would be a burden upon this agency.

JUNEAU, ALASKA

Prepare bill for Moran

HB-451 + HB-452

UNIFORM FOREIGN MONEY-JUDGMENTS RECOGNITION ACT

The Hague Conference on Private International Law has been requested by the Council of Europe to prepare a general convention on recognition and enforcement of foreign judgments. The six nations of the European Economic Community have started work on a convention of their own. The United Kingdom has concluded new treaties and the Commissioners on Uniformity of Legislation in Canada have decided to re-examine their own Uniform Act. A concerted drive is under way to secure greater uniformity in the law. From all of these efforts improvement may come to a field well known for its unsatisfactory condition.

In most states of the Union, the law on recognition of judgments from foreign countries is not codified. In a large number of civil law countries, grant of conclusive effect to money-judgments from foreign courts is made dependent upon reciprocity. Judgments rendered in the United States have in many instances been refused enforcement abroad because of the difficulty of proving existence of reciprocity to the satisfaction of the foreign court. Wide agreement exists in state law on the rules to govern recognition of such judgments. The uniform codification of the law greatly enhances the prospects of recognition for judgments from American courts.

Uniform Foreign Money-Judgments Recognition Act

(Be it enacted, etc.)

SECTION 1. [Definitions.] As used in this act:

(1) "foreign state" means any governmental unit other than the United States, or any state, district, commonwealth, territory, insular possession thereof, or the Panama Canal Zone, the Trust Territory of the Pacific Islands, or the Ryukyu Islands;

(2) "foreign judgment" means any judgment of a foreign state granting or denying recovery of a sum of money, other than a judgment for taxes, a fine or other penalty, or a judgment for support in matrimonial or family matters.

SECTION 2. [Applicability.] This act applies to any foreign judgment that is final and conclusive and enforceable where rendered even though an appeal therefrom is pending or it is subject to appeal.

SECTION 3. [Recognition and Enforcement.] Except as provided in Section 4, a foreign judgment meeting the requirements of Section 2 is conclusive between the parties to the extent that it grants or denies recovery of a sum of money. The foreign judgment is enforceable in the same manner as the judgment of a sister state which is entitled to full faith and credit.

SECTION 4. [Grounds for Non-recognition.]

(a) A foreign judgment is not conclusive if

(1) the judgment was rendered under a system which does not provide impartial tribunals or procedures compatible with the requirements of due process of law;

(2) the foreign court did not have personal jurisdiction over the defendant; or

(3) the foreign court did not have jurisdiction over the subject matter.

(b) A foreign judgment need not be recognized if

(1) the defendant in the proceedings in the foreign court did not receive notice of the proceedings in sufficient time to enable him to defend;

(2) the judgment was obtained by fraud;

(3) the [cause of action] [claim for relief] on which the judgment is based is repugnant to the public policy of this state;

(4) the judgment conflicts with another final and conclusive judgment;

(5) the proceeding in the foreign court was contrary to an agreement between the parties under which the dispute in question was to be settled otherwise than by proceedings in that court; or

(6) in the case of jurisdiction based only on personal service the foreign court was a seriously inconvenient forum for the trial of the action.

SECTION 5. [Personal Jurisdiction.]

(a) The foreign judgment shall not be refused recognition for lack of personal jurisdiction if

(1) the defendant was served personally in the foreign state;

(2) the defendant voluntarily appeared in the proceedings other than for the purpose of protecting property seized or threatened with seizure in the proceedings or of contesting the jurisdiction of the court over him;

(3) the defendant prior to the commencement of the proceedings had agreed to submit to the jurisdiction of the foreign court with respect to the subject matter involved;

(4) the defendant was domiciled in the foreign state when the proceedings were instituted, or, being a body corporate had its principal place of business was incorporated, or had otherwise its principal corporate seat in the foreign state;

(5) the defendant had a business office in the foreign state and the proceedings in the foreign court involved a [cause of action] [claim for relief] arising out of business done by the defendant through that office in the foreign state; or

(6) the defendant operated a motor vehicle or airplane in the foreign state and the proceedings involved a [cause of action] [claim for relief] arising out of such operation.

(b) The courts of this state may recognize other bases of jurisdiction.

SECTION 6. [Stay in Case of Appeal.] If the defendant satisfies the court either that an appeal is pending or that he is entitled and intends to appeal from the foreign judgment, the court may stay the proceedings until the appeal has been determined or until the expiration of a period of time sufficient to enable the defendant to prosecute the appeal.

SECTION 7. [Saving Clause.] This act does not prevent the recognition of a foreign judgment in situations not covered by this act.

SECTION 8. [Uniformity of Interpretation.] This act shall be so construed as to effectuate its general purpose to make uniform the law of those states which enact it.

SECTION 9. [Short Title.] This act may be cited as the Uniform Foreign Money-Judgments Recognition Act.

SECTION 10. [Repeal.] [The following acts are repealed:

(1) ;

(2) ;

(3) .]

SECTION 11. [Time of Taking Effect.] This act shall take effect [ ]

UNIFORM INTERSTATE AND INTERNATIONAL PROCEDURE ACT

Civil litigation with interstate and international aspects is becoming an increasingly important element of judicial business. In many cases it is necessary to perform a procedural act, either with or without assistance from local officials, in a sister state or a foreign country. Conversely, domestic courts are being requested with greater frequency to render assistance to out-of-state tribunals and litigants. Unfortunately, existing law is frequently difficult to ascertain, inadequate, and ill-adjusted to conditions prevailing outside the forum state. The American Bar Association, recognizing the need for reform, recommended shortly after the second World War that the President establish a Commission to investigate, and suggest measures for the improvement of existing procedures. In 1952, the President approved this recommendation, and in 1958, the United States Congress enacted legislation to establish a Commission and Advisory Committee on International Rules of Judicial Procedure (Act of September 2, 1958, 72 Stat. 1743). This Commission and its Advisory Committee, in cooperation with the Columbia Law School Project on International Procedure, has drafted several amendments to the Federal Rules of Civil and Criminal Procedure and Titles 18, 22 and 28 of the United States Code that are presently being considered for adoption.

The Uniform Interstate and International Procedure Act presents for adoption by the states a comprehensive code for use in state litigation with interstate or international incidence. It is designed to clarify, consolidate, and improve existing law, and supplants the Uniform Foreign Depositions Act, the Uniform Judicial Notice of Foreign Law Act, and the Uniform Proof of Statutes Act.

Article I, a modified version of the uniform Extra-Territorial Process Act, which was before the Conference at its 1961 meeting, specifies authorized bases of personal jurisdiction over persons and entities that are not within the state at the time the action is commenced. Article II provides several alternative methods by which service may be effected outside the state. Article III is designed to facilitate the taking of depositions to obtain testimony, documents, and other tangible evidence outside the state for use in domestic litigation. Both Article II and Article III contain provisions for rendering assistance to tribunals and litigants outside the enacting state. Article IV resolves problems attendant upon the determination of the law of a governmental unit outside the forum state. Article V concerns proof of official records kept outside the state.

Uniform Interstate and International Procedure Act

(Be it enacted, etc.)

Article I. Bases of Personal Jurisdiction Over Persons Outside This State

REVISED UNIFORM ENFORCEMENT OF FOREIGN JUDGMENTS ACT

The mobility, today, of both persons and property is such that existing procedure for the enforcement of judgments in those cases where the judgment debtor has removed himself and his property from the state in which the judgment was rendered, is inadequate. By this act, procedure is made available under which the judgment creditor can effectively obtain relief and at the same time adequate protection is given the judgment debtor to present any defense that can now be interposed to an action on such judgment. The revision simplifies procedures by providing for a shorter registration or filing procedure rather than the summary judgment procedure prescribed by the original act.

Revised Uniform Enforcement of Foreign Judgments Act

09.30.160

Section 1. [Definition.] In this act "foreign judgment" means any judgment, decree, or order of a court of the United States or of any other court which is entitled to full faith and credit in this state.

09.30.170

Section 2. [Filing and Status of Foreign Judgments.] A copy of ~~any~~ foreign judgment authenticated in accordance with the act of Congress or the ~~statutes~~ laws of this state may be filed in the office of the clerk of ~~any~~ [District Court of any city or county] of this state. The clerk shall treat the foreign judgment in the same manner as a judgment of the [District Court of any city or county] of this state. A judgment so filed has the same effect and is subject to the same procedures, defenses, and proceedings for reopening, vacating, or staying as a judgment of a [District Court of any city or county] of this state and may be enforced or satisfied in like manner.

09.30.180

Section 3. [Notice of Filing.]

(a) At the time of the filing of the foreign judgment, the judgment creditor or his lawyer shall make and file with the Clerk of Court an affidavit setting forth the name and last known post office address of the judgment debtor, and the judgment creditor.

(b) Promptly upon the filing of the foreign judgment and the affidavit, the clerk shall mail notice of the filing of the foreign judgment to the judgment debtor at the address given and shall make a note of the mailing in the docket. The notice shall include the name and post office address of the judgment creditor and the judgment creditor's lawyer, if any, in this state. In addition, the judgment creditor may mail notice of the filing of the judgment to the judgment debtor and may file proof of mailing with the clerk. Lack of mailing notice of filing by the clerk shall not affect the enforcement of a foreign judgment except as to the costs of the proof of mailing by the judgment creditor.

(c) No execution or other process for enforcement of a foreign judgment filed hereunder shall issue until [20] days after the date of filing the judgment for enforcement, and if the judgment debtor shows the [District Court of any city or county] that an appeal from the foreign judgment is pending or will be taken, or that a stay of execution has been granted, the court shall stay enforcement of the foreign judgment until the appeal is concluded, the time for appeal expires, or the stay of execution expires or is vacated, upon proof that the judgment debtor has furnished the security for the satisfaction of the judgment required by the state in which it was rendered.

09.30.110

Section 4. [Stay.]

(a) If the judgment debtor shows the [District Court of any city or county] that an appeal from the foreign judgment is pending or will be taken, or that a stay of execution has been granted, the court shall stay enforcement of the foreign judgment until the appeal is concluded, the time for appeal expires, or the stay of execution expires or is vacated, upon proof that the judgment debtor has furnished the security for the satisfaction of the judgment required by the state in which it was rendered.

(b) If the judgment debtor shows the [District Court of any city or county] any ground upon which enforcement of a judgment of any [District Court of any city or county] of this state would be stayed, the court shall stay enforcement of the foreign judgment for an appropriate period, upon requiring the same security for satisfaction of the judgment which is required in this state.

09.30.120

Section 5. [Fees.] Any person filing a foreign judgment shall pay to the Clerk of Court [ ] dollars. Fees for docketing, transcription or other enforcement proceedings shall be as provided for judgments of the [District Court of any city or county of this state].

09.30.130

Section 6. [Optional Procedure.] The right of a judgment creditor to bring an action to enforce his judgment instead of proceeding under this act remains unimpaired.

09.30.140

Section 7. [Uniformity of Interpretation.] This act shall be so interpreted and construed as to effectuate its general purpose to make uniform the law of those states which enact it.

09.30.150

Section 8. [Short Title.] This act may be cited as the Uniform Enforcement of Foreign Judgments Act.

Section 9. [Repeal.] The following acts and parts of acts are repealed:

(1) ;

(2) ;

(3) .

Section 10. [Taking Effect.] This act takes effect [ ].

REPORT ON HOUSE BILL NO. 480

BY THE
ADMINISTRATIVE LAW COMMITTEE,
ALASKA BAR ASSOCIATION

Sec. 44.62.351

The Committee has contacted the Alaska Court System, and has been informed by Chief Justice Boney that they have not had an opportunity to review the Bill. However, your subcommittee chairman has talked to one of the Associate Justices of the Supreme Court, and he informs me that he would oppose having the Office of Administrative Adjudication attached to the court system, although he did make it clear that the courts do not oppose, and in fact, favor, the concept of independent hearing examiners. The courts' main concern is that by adding more people to the system, its staff manpower and budget would be further diluted, since they are already underfunded, and in addition, since a hearing examiner decision might ultimately be appealed to the courts, there would be the question of a possible conflict of interest.

The Committee would not object to the hearing examiner being placed under, for example, the Department of Administration, provided that department's authority were limited to budget authority only. The Committee believes that the Bill should stress the independence of the hearing examiners.

Sec. 44.62.352

We would recommend adding a subsection (c) providing for a term of six years and allowing removal only for good cause.

Sec. 44.62.353(b)

We would recommend that this subsection be amended by adding the words "who is otherwise qualified by reason of background and experience, and meets the qualifications established by the Department of Administration."

> COMMENT: This change is to correlate this section with Sec. 352(b) which provides that the presiding officer must have the same qualifications as a hearing officer, and it is thought initially that the Department of Administration (or the Court System) should set these qualifications.

Sec. 44.62.353(c)

We would re-write the first sentence of this subsection to read as follows: "The presiding officer shall assign a hearing officer for any administrative adjudicatory proceeding arising under state law."

> COMMENT: This makes it clear that the Bill will apply to all agencies. While there is no objection by the Committee to having commissions or agencies, such as Public Utilities Commission or Alaska Transportation Commission, sit on cases, the Committee does believe that a hearing officer should sit with the agency. One Committee member felt that in appropriate cases, where there was an otherwise qualified lawyer member of the agency, he could be appointed as hearing examiner.

Sec. 44.62.353(d)

We would add a subsection (d) to provide that the Office of Administrative Adjudication may contract for a hearing examiner where their staff does not otherwise have a qualified person available.

COMMENT: This suggestion was made by some members of the House Local Affairs Committee, and the Committee believes it is a sound one.

Sec. 44.62.354

Add a sentence at the end that the office will compile and publish significant Court and Administrative decisions.

COMMENT: We think the Office of Administrative Adjudication should be required to publish significant administrative law decisions, just as the Court publishes its opinions. The Commission also might wish to consider making the publication a monthly or bi-monthly affair, in which proposed regulations could also be published. This would be the equivalent of the Federal Register as used by the federal government.

Sec. 44.62.410

We would change the first sentence to read: "The agency shall consult the office and all parties in interest, and, subject to the availability of the office's staff, shall determine the time and place of hearing."

COMMENT: Many hearings have a statewide interest and effect--i.e., utility, oil and gas, and transportation matters--and the agency should try to set it for the convenience of all parties.

Sec. 44.62.500(c)

The second sentence of this subsection should have the following language added: "and a final decision, including findings of fact and conclusions of law, separately stated. Findings of fact, if set forth in statutory language, shall be accompanied by a concise and explicit statement of the underlying facts supporting the findings."

COMMENT: This language is taken from Sec. 12 of the Model State Administrative Procedures Act. If this amendment is adopted it will prevent agencies from arbitrarily reversing a hearing examiner decision by reference to statutory language or formulas. Further, this language, we think, is indicative of the present trend of Administrative Law requirements for making explicit findings of fact and conclusions of law. We do not think that this will infringe upon the permanent authority of the agencies to make the final decision but rather, it requires them to have good reason to reverse a hearing examiner decision.

Sec. 44.62.515 (a)

Add: "or the submission of briefs or memoranda, whichever occurs later". We would also recommend a provision similar to that required of judges--i.e., that a hearing examiner submit an affidavit that he has no cases pending beyong the 90-day limit provided above or forfeit his pay

Sec. 44.62.515(b)

Strike the word "rendering" and substitute "receipt".

COMMENT: The amendment to subsection (a), we believe, is a realistic one, since in the more complex cases it often will take 60 to 70 days just to submit briefs. A hearing examiner should have the full 90 days to make the decision. Subsection (b) makes it clear that the agency or commission would have 30 days from the receipt of the decision. Delay in the mails is often encountered and the agency should have the full 30 days to render its decision.

We would add a Sec. 11 to the Bill, making it clear that the sections referred to in House Bill No. 480 apply to all agencies of the state and not just the agencies referred to in AS 44.62.330.

We wish to make it clear that we would not recommend a general revision of the Administrative Procedure Act, §44.62.330, et seq., to make it applicable to all agencies. Certain state agencies have adopted their own rules of practice pursuant to law, and at this point in time we do not think any effort should be made to generalize the Administrative Procedure Act provisions to all agencies. What we do wish to make clear, however, is that the provisions recommended for House Bill No. 480 should be applicable to all agencies.

The Administrative Law Committee has long favored independent hearing examiners. However, more importantly, we favor the concept that there will be adequate hearing officer personnel available to all agencies of the state. The present impossible situation at the Alaska Transportation Commission and the lack of effective hearing procedures for many of the regulatory boards, such as medical examiners, dental examiners, etc., is clearly not in the public interest.

Shirle A. Debenham, Chairman
Administrative Law Committee

Andrew E. Hoge, Subcommittee Chairman
Administrative Law Committee

A NEW REGULATORY FRAMEWORK

Report On Selected Independent Regulatory Agencies

The President's Advisory Council On Executive Organization

January 1971

Findings and Recommendations

Major and fundamental change pervades each of the areas of economic enterprise under regulation by the independent regulatory commissions.

- In transportation, increasing interaction between the various modes reflects a persistent striving for greater efficiency in the movement of goods and people;
- In trade, new and probably enduring levels of public and producer attention are being given to the quality of goods and services, and to the operation of the marketplace;
- In securities, even as the structure of the industry itself and the relationship between Government and industry are experiencing major changes, a well-established trend toward institutional investment and new methods of financing are significantly altering the characteristics of securities trading;
- In power, where industry structure is also undergoing change, supplies of electrical energy and natural gas have not consistently kept pace with increasing demands in certain areas, and new technologies have yet to take up the slack;
- In communications, burgeoning technology has created new avenues for service and new products which together complicate the task of regulation and blur distinctions between the various forms of communications.

The independent regulatory commissions play a critical role in balancing the changing demands of the Nation for the goods and services of regulated industries and the related need for financially sound and effectively managed industries in the regulated sectors of our economy. Unfortunately, obsolete organizational forms limit the effectiveness of these commissions in responding to economic, technological, structural, and social change. Inappropriate regulatory structures and cumbersome procedures impose burdens that impede good public service, sound financial and operational planning, and adjustment to changes in growing industries—contrary to the purposes of regulation.

Our proposals for change in the organizational forms of several independent regulatory commissions are directed at improving agency effectiveness, while assuring fairness to those involved in or affected by the regulatory process.

FINDINGS

The regulatory commissions are not sufficiently accountable for their actions to either the Congress or the President because of the degree of their independence and remoteness in practice from those constitutional branches of government. Regulatory activities, therefore, are not adequately supported and are not effectively coordinated with national policy goals.

Inherent deficiencies in the commission form of organization prevent the commissions from responding effectively to changes in industry structure, technology, economic trends, and public needs.

Deficiencies in the performance of the regulatory commissions are partly due to the difficulty of attracting highly qualified commissioners and retaining executive staff. Even able administrators have difficulty in serving as coequals on collegial commissions.

- While there are notable exceptions, it is difficult to attract to regulatory positions men of skill in administration and breadth of perspective largely because of the procedures and traditions associated with appointment to the regulatory commissions.
- Given these traditions and the shared responsibility of the collegial form, it is not likely that commission positions will generate greater interest in the future.

Certain judicial activities of the commissions conflict with their policy-making responsibilities and generate an organizational environment inimical to regulatory efficiency and constructive response to industry and the public.

- Many commissions engage excessively in case-by-case adjudication as a basis for policy formulation rather than using less formal procedures such as exchanges of written or oral information, informal regulatory guidance, or rulemaking.
- The judicial cast of agency review proceedings places too great an emphasis on legal perspectives to the detriment of economic, financial, technical, and social perspectives. One result is a high level of legal skill among agency professionals and commissioners, but generally insufficient capability in other disciplines.
- The judicial cast of agency review proceedings delays final administrative determinations and invites dilatory appeals.
- Overjudicialization encumbers the time and energies of commissioners and staff, causes undue case backlogs, imposes high costs upon litigants, prevents anticipatory action through rulemaking, deters informal settlements, and precludes coordination of agency policy and priorities with those of the executive branch.

Certain functional responsibilities are inappropriately distributed among the various commissions.

- Responsibility for regulation of transportation is distributed among the ICC, CAB, and FMC, impeding formulation of broader regulatory policy covering the several transportation modes and coordination with the Department of Transportation, and thus forestalling consistency in national transportation policy.
- Responsibility for promotion of transportation, vested in some regulatory commissions, conflicts with the regulatory activity of those agencies.
- Combination of antitrust enforcement and consumer protection in the FTC deprives that agency of a central purpose, fostering an uncertainty of emphasis as between its functions, inordinate delay, and preoccupation with routine matters.
- Regulation of public utility holding companies by the SEC is no longer best performed by that agency. Regulatory expertise regarding public utility holding companies rests with the FPC.

RECOMMENDATIONS

To assure coordination of regulatory matters with national policy goals, to improve the management efficiency of regulatory functions, to improve accountability to the Congress and the executive branch, and to increase the probability of superior leadership for regulatory activities, the transportation, power, securities, and consumer protection regulatory functions should be administered by single administrators, appointed by

the President. These functions should be performed by agencies respectively designated: Transportation Regulatory Agency, Federal Power Agency, Securities and Exchange Agency, and Federal Trade Practices Agency.

- The authority and responsibility attending the single administrator form should enable the agencies to attract and retain the most highly qualified administrators and executive staffs.
- Unambiguous placement of authority for agency policy and operations in a single administrator should increase accountability to both the Congress and the President.
- Agency work should be expedited by utilizing more effective administrative techniques made possible by one-man management of agency activities.

The communications regulatory function and the antitrust enforcement function should, as now, be carried out by multimember bodies for reasons supervening the advantages of a single administrator. The FCC should be reduced in size from seven to five members, to serve 5-year terms.

To prevent the overjudicialization of agency procedures and attitudes and to assure comprehensive and anticipatory policymaking, internal agency review of proceedings should be limited in time and focused primarily on the consistency of the decision with agency policy. Appeals from final agency decisions should be heard by an Administrative Court of the United States.

- A 30-day period should be allowed after a hearing examiner's decision for review by the single administrator. The administrator should have the power to modify or remand an examiner's decisions. The limited time and scope of policy review by agency administrators should help make initial decisions of agency examiners, in many cases, final determinations of the agency.
- The Administrative Court should review appeals by an aggrieved party from final agency determinations of the transportation, securities and power agencies. Decisions of the antitrust, trade practices, and communications agencies would be reviewed in the Federal courts as they are today.
- The court should consist of as many as 15 judges, appointed by the President and confirmed by the Senate for terms sufficiently long as to attract men of quality. We suggest 15-year staggered terms, with judges sitting in three-man panels for each case reviewed by the court.

Certain functional responsibilities of the agencies should be realigned.

- To reflect the increasing interdependence of the structure, economics, and technology of the transportation modes, regulatory responsibilities of the ICC, CAB, and the FMC should be combined within a new Transportation Regulatory Agency.
- To correct the conflict inherent in performing regulatory and promotional functions in the same agency, the promotional subsidy-granting activities of the CAB should be transferred to the Department of Transportation.
- To assure that each of its missions is more effectively performed, the FTC's consumer protection responsibilities should be vested in a new Federal Trade Practices Agency and its antitrust enforcement responsibilities should be vested in a new Federal Antitrust Board. The Board should consist of a chairman and two economist members, each appointed by the President with the consent of the Senate.
- To provide an organizational placement which better reflects current realities, the regulatory responsibilities of the SEC under the Public Utility Holding Company Act should be transferred to the Federal Power Agency.

DISSENTING STATEMENT OF FREDERICK R. KAPPEL

The Council made its recommendations to the President in a brief and to the point preliminary report on July 10, 1970. It included a dissent on my part consistent with the content of that report.

This more complete report contains the same specific recommendations and my dissent concerning them is unchanged and quoted herein.

This report elaborates considerably on the earlier report in its reasoning and in its references, quotes, and documentation. It does this by the inclusion of views and writings from numerous sources. These include legal, academic, government committee views, and writings from individuals involved as regulators past and present. There were over 200 interviews made by staff as noted in the report.

In connection with the references, interviews and other material researched I must point out that there are almost no references or views from the regulated entities. To this extent I believe any one who accepts this report on its face value must recognize that it is almost totally lacking in this very important respect. If constructive action results from this report and the efforts behind it (and I sincerely hope that it will), it will require, in my opinion, that this added point of view be sought and considered in a major way. Any useful progress will require it.

Since this report is hopefully the beginning of an effort to bring to bear all qualified viewpoints toward better regulatory results, it must be the aim that such regulation meet the test of not only good, safe, ample

goods and services fairly priced to the public, but the organizational structure and the level of competence of the regulators themselves must be such that they will soundly recognize the problems of the regulated entities and work with the realization that the producers and businesses involved must be allowed freedom to manage and have ample leeway in operations and rate of returns to produce the high quality and ample service results that are vital to the whole country. This is a serious deficiency in past performance.

The ensuing developments should include careful examination of the recommendations of this Council, agency by agency, before adopting these structural recommendations as I note in the following quoted dissent previously referred to:

"I do not share the judgments of my associates in recommending a single administrator and a separate administrative court. These proposals reflect their belief that they will bring about a greater capability of administration and improved decision processes. There is no certainty that these proposals will lead to more effective administration. The economic and technological aspects of transportation and power regulation, for example, are more complex than other nonservice industries studied. The problems raised in the regulation of these industries cannot be resolved entirely in the atmosphere of either a hearing officer or an administrative court. I fear that this will be the result of the changes proposed by my colleagues.

"I agree, however, along with my colleagues that we should emphasize the need to encourage men of exceptional ability to seek and accept appointments to these vital administrative posts as a prime objective of our recommendations. But, I would suggest that more careful attention to the selection of commissioners and other key personnel is as likely to improve the administrative process as is the single administrator and the administrative court.

"In my opinion, it would be more appropriate to implement these proposals in one administrative agency. The FTC would be my selection. These innovations may then be studied carefully before any further attempt is made to implement them elsewhere."

Overview

The independent regulatory commissions, now mature institutions of the Federal Government, are characterized by rigidity in their process and in their patterns of relationship with Congress and the executive branch, the regulated industries, and the public. They lack the adaptive force which might regenerate or redefine their roles in helping shape the American economy. Both rigidity and lack of adaptability impede regulatory effectiveness at the very time when persistent trends and new directions in the economy demand flexibility and imagination to carry out regulatory objectives and to formulate action in the interest of the public, including the regulated segments of the private sector.

REGULATION AND GOVERNMENTAL STRUCTURE

The ICC, CAB, FMC, FTC, SEC, FPC, and FCC, established by Congress in the years since 1887, have long been considered an anomaly in government structure.[1] They are institutions housed in the executive branch, carrying out legislative functions, and behaving like courts. In the past quarter century, the growth of the regulated industries and the pace of the national economy have largely outdistanced the ability of the commissions to cope constructively with regulatory problems.

To have practical meaning, the commissions' charge to regulate in the interest of the public must include regard for economic, technological, and social developments, as well as the capability of the regulated industries to provide good public service.

Inadequacies in regulatory structure have adversely affected the implementation of Congressional mandates, the management of executive

branch functions, the interests of the public generally, and the ability of the regulated industries to operate their businesses profitably or to plan future actions with reasonable assurance of what regulatory policy will be.

The history of the regulatory commissions reflects an attempt to respond practically to national needs with institutions outside the three constitutional branches of government. Congress initially undertook to perform some regulatory responsibilities, but later conferred these responsibilities on independent commissions, a form that it believed would provide fairness and expertise, without delay or partisan influence. The commissions, however, soon became part of a highly specialized, independent "fourth branch" of the Federal Government. Today, they are not sufficiently accountable to either Congress or the executive branch. Perhaps because of this, they have become less effective in balancing the needs of the public with those of the industries they regulate consistent with Congressional intent and executive policy.

REGULATORY ACCOUNTABILITY

More than 30 years ago, the President's Committee on Administrative Management highlighted the lack of accountability of independent regulatory commissions:

> They constitute a headless "fourth branch" of the Government, a haphazard deposit of irresponsible agencies and uncoordinated powers * * * . The Congress has found no effective way of supervising them, they cannot be controlled by the President, and they are answerable to the courts only in respect to the legality of their activities.[2]

The point has been made many times since, but the scope of the problem has changed little, if at all, over the years. The independent commissions persist more from inertia than from an analysis of how regulatory bodies should properly function within the context of a comprehensive political and economic system.

Congress has conceived of these commissions as independent of executive branch control, but in fact the commissions are almost as independent of Congress itself. Apart from appropriations approval, periodic program review, and the intermittent interest of one or several of its members, Congress does not exercise the degree of oversight with respect to regulatory commissions that it does for executive departments and other agencies of the executive branch. Congress has sought to preserve the independence of the regulatory commissions, even as their activities increasingly affect the implementation of national policy. The executive branch, responsible for carrying out national policy, has been reluctant to support reforms needed to integrate regulatory activities with executive programs

because the President does not have sufficient responsibility for commission direction.

Yet congressional and executive attention to regulatory needs is required more today than ever in the past because of the increasing interdependence of national economic policies which emerge from budget and fiscal action, economic regulation, and industry promotion by government. Proponents of the commission form tend to ignore that interdependence.[3] In doing so they perpetuate processes and relationships which may frustrate national policy and sound economic growth.

Independence, and the resulting absence of regulatory accountability, has transferred to a generally shielded arena those questions which should be settled in a more open forum. The public—the intended beneficiary of regulation—has found it difficult to understand the issues and lacks a practical mechanism through which to communicate its views.

All this, together with significant impediments to regulatory performance inherent in the commission form itself, has led the commissions to become less responsive to economic and social trends and changes in industry structure.

Most studies and commentary relating to reform of the regulatory commissions over the years emphasize their separateness from an integrated governmental structure.[4] These studies, and subsequent attempts to implement proposals stemming from them, have concentrated on reordering personnel, procedures, or functions to improve commission performance. Such efforts are commendable, but internal revision and redefinition are not enough. The regulatory apparatus requires a fundamental restructuring to enhance overall effectiveness and responsibility.

Accountability to Congress

Congress' powers under article II of the Constitution to regulate interstate and foreign commerce is the primary basis for regulatory controls. Through legislation, Congress has vested in regulatory commissions the powers necessary to carry out broad statutory mandates. But congressional statements of policy are understandably general, leaving to the commissions the task of making specific policy to implement those objectives. One result is that the commissions, in the course of time, have developed policies affecting the economy without sufficient guidance or check by Congress.[5] This condition is aggravated in the view of some commentators by the commission form of organization which makes it hard to pinpoint those within the regulatory agencies responsible for setting policy.[6]

With greater coordination between the agencies and the executive branch and an organization structured to focus responsibility, Congress

would be better able to oversee agency policy and, in concert with the President, improve regulation.

Accountability to the Executive Branch

The President is responsible under article I of the Constitution to "take care that the laws be faithfully executed." That duty extends to the activities of the regulatory agencies to assure that the laws enacted by Congress are carried out effectively and fairly. The American public—to whom the President is directly answerable—looks to the President for leadership in pursuing national policy goals, including those affected by the regulatory process. The success of many Congressional and executive programs ultimately depends on a coordinated regulatory response.

Several recent Presidents have recommended changes in the regulatory process.[7] Although many proposed reforms have fallen short of enactment, these Presidents presumably felt that such recommendations were part of their responsibility to oversee faithful execution of the laws. Congress has repeatedly recognized the President's role in the regulatory scheme by authorizing him to make organizational changes in all agencies of the executive branch without distinction between executive agencies within the Departments and independent regulatory commissions.[8]

If regulation is to be more responsive to the public interest and coordinated with national programs, it must first be brought within the ambit of elective government, with accountability to those officials to whom the public and the regulated industries alike look for fair constructive application of national policy.

REGULATION BY INDEPENDENT COMMISSIONS

Historically, at least four premises have been offered to support regulation by independent commission.

The first is that Congress delegated unique legislative authority to carry out certain critical regulatory functions and created a unique form of organization, the independent commission, for that purpose. Yet, most executive departments also possess delegated regulatory powers. For both, Congress enacts skeletal legislation setting forth principles, mandates, and limitations within which the traditional executive departments and agencies develop rules, standards, and regulations to give substance to a legislative program.[9] It is difficult today to discern the distinction which justifies wide differences in the structure and processes of the Federal Trade Commission on the one hand and the Food and Drug Administration or Federal Aviation Administration (both headed by single administrators) on the other. The most recent agency to be vested with

regulatory functions, the Environmental Protection Agency,[10] incorporates the concept of unitary leadership in place of the commission form.

Second, it is argued that to deal with complex and technical regulatory problems, special expertise is required of decisionmakers and that the commission form alone best develops that expertise. The commissions have not, however, demonstrated consistent mastery of the subjects within their jurisdictions.[11] Nor does their technical capability visibly surpass that of regulatory counterparts within executive departments.

Third, it is urged that the application of regulatory statutes, rules, and regulations requires a bipartisan, multimember body that can act without regard to the partisan considerations which affect Congress or the executive branch. Political pressure coming from Congress or the executive branch unquestionably impinges on the impartiality of commission proceedings. But the procedural requirements of adequate notice and fair hearing, as well as the availability of judicial review, help to assure, as much as anything, a just result in particular proceedings. In the opinion of several observers of the regulatory process, the fairness of regulatory decisions results more from the mechanics of internal decisionmaking and breadth of perspective of the regulators than from the fact of bipartisan representation on the commissions.[12]

A fourth premise often asserted in support of the commission form is that commissions can better serve the public interest in regulatory matters because their independence makes them immune from control by the industries they regulate. The assumption which lies behind these assertions is that the interest of the industries and of the public are in fundamental conflict. But today, those interests are closely related, for the success of an industry will have a marked impact on the extent, quality, and price of available goods and services. Nevertheless, undue or unbalanced influence upon the commissions by the industries regulated is undesirable. While the adversary nature of commission proceedings decreases the likelihood of such influence, when it occurs, it is an outgrowth of the dependence of the regulator on the regulated--a relationship which may occur regardless of form.[13] To the extent the form of organization is responsible at all, the very anonymity of the commission structure which heightens unaccountability tends to prevent public exposure of relationships which may be improper.

The foregoing does not set forth all the premises underlying the commission form for use in economic regulation.[14] Other arguments for the establishment of the commissions range from the discomfort of many courts with complex economic and technological problems to the need for expeditious procedures in regulating commerce.

At the very least, these reasons for regulation by independent commis-

sion, if ever valid, are today of questionable validity. In practice, the commission form has proven most of them to be invalid.

REGULATION AND INDUSTRY EXPANSION

The form of the regulatory commissions, compatible with another era, prevents them from responding effectively to economic trends and changes in technology, industry structure, and public needs.

The Interstate Commerce Commission, first among the Federal regulatory commissions, was established in 1887 to achieve rate stability, prevent discrimination in favor of large shippers and certain geographical areas, and protect farmers from undue charges by railroads. Today, some of the surface transportation industries suffer major economic hardship partly caused by the regulatory processes themselves.

Given the likely impact of such developments as containerization, jet freight carriage, and the interstate highway system, as well as the needs of a growing and concentrated population, modes of transportation within ICC jurisdiction must be viewed together with other modes as an integral part of a unified transportation network. Other carriers not regulated by the ICC affect and are affected by ICC decisions. Urban mass transit is a concern of the ICC, CAB, and the Department of Transportation. The ICC and the CAB exercise jurisdiction over inland segments of overseas shipments while the FMC and CAB exercise jurisdiction over the ocean segment of such shipments, even though containerization has made possible a continuous flow of commerce from the interior of the United States to the interior of other continents. Fragmented regulation of the transportation industry is inconsistent with efforts to develop a coordinated transportation system. It frustrates the development of management and financial capability in the industries involved, and impedes the rate at which new technology can be utilized.

The Federal Trade Commission was created in 1914 to prevent unfair methods of competition by businesses in interstate commerce. Originally intended to augment antitrust enforcement, the FTC has become a repository for many bits and pieces of legislation that did not seem to fit neatly into any other agency of government. Consequently, FTC jurisdiction now ranges from the complexities of large corporate mergers to the comparatively simple task of accurate labeling of fabrics and furs.

The Federal Power Commission originated in 1920 with the relatively tidy mandate of licensing construction and operation of hydroelectric power plants on bodies of water within the jurisdiction of the Federal Government. It now also regulates transmission and wholesale marketing of electric energy in interstate commerce, including rates, accounting procedures, mergers, consolidations, interconnections, and

coordination of interstate electric energy systems. The FPC similarly regulates transmission and wholesale marketing of natural gas in interstate commerce. An increasingly complex interstate energy system affecting the well-being of every citizen makes these regulatory tasks monumental.

The Federal Communications Commission was set up in 1934 to bring order to radio spectrum allocation and to regulate the existing telephone systems as a monopoly service under legislation that authorized exclusive operation in the public interest. To these has been added regulatory responsibility for standard television broadcasting, cable and subscription television, satellite communications, and computer utilities.

The Securities and Exchange Commission, also a product of regulatory legislation in the 1930's, was established to promote public confidence, through government oversight, in the issuance and trading of securities. But today, the SEC must deal with related problems of public ownership of brokerage firms, the operations of securities exchanges, the effects of computerization and new financing techniques, and the advent of major institutional investors.

The Civil Aeronautics Board, created in 1938, dramatically illustrates the way in which technology has challenged the ability of regulatory commissions to respond to change. The CAB initially concentrated on safety regulations and awards of mail routes. Today, the Board oversees an industry experiencing recurring economic problems and faced with crowded airways, jumbo jets, inadequate terminal facilities, and problems yet to be generated by the SST. These factors materially affect the ability of the industry to provide good service and at the same time impinge on the economy, our physical environment, and transportation modes not regulated by the CAB.

The Federal Maritime Commission, which in 1961 replaced the Federal Maritime Board established under the Shipping Act of 1916, today is involved in tasks of international importance. The FMC must deal with the effects of containerization and other technological innovations in ocean shipping. The Commission must also resolve problems relating to joint through rates and single bills of lading, its impact on modes (including foreign carriers) it does not regulate, and pricing through international shipping conferences.

The end result of this period of unparalleled technological change, industry expansion, economic growth, and environmental and social concern is that new responsibilities and workloads generated by routine matters have outdistanced the commissions' ability to respond. As the volume of proceedings has increased with each new responsibility, internal commission structure and process has become more complex. While some attempts have been made to remedy these problems through inter-

nal reforms, little thought has been given to restructuring the entire regulatory apparatus.

But it is not the mounting ineffectiveness of the regulatory framework alone which compels change. The world is in an era of transition that challenges government and private sectors alike to deal constructively and cooperatively with the economic issues, current, prospective, and unforeseen. The independent regulatory commission's inflexible institutions attuned to a simpler day, cannot be expected to deal constructively with economic issues yet to be generated if they are unable to deal with current ones. More than ever, a new framework is needed for improved regulation and as a necessary first step to reconsidering the statutes which authorize economic regulation.

A NEW CONCEPTUAL FRAMEWORK

The failure of regulatory commissions to respond to current demands and the unlikelihood of their responding to new ones is principally attributable to collegial organization, the judicial cast of agency activities, and the misalignment of certain functional responsibilities.

The collegial form is today inappropriate for regulating highly complex, everchanging areas of the economy. What is needed is a regulatory structure which is more adaptable to changing conditions and better able than a collegial body to articulate policy. Plural-headed administration is usually characterized by shared powers, shared responsibility, and, for that reason, shared indecision and unaccountability.

In addition, overjudicialization, resulting from full commission review of initial agency decisions as a matter of course, has upset commission priorities and obscured the formulation of comprehensive, timely, and anticipatory agency policy. Moreover, the admixture of certain judicial functions with policymaking and prosecutory responsibilities has created a condition of apparent bias in certain proceedings, subjecting agency determinations to criticism on that ground and generally undermining confidence in the regulatory process.

Finally, certain regulatory activities are improperly divided among, or unwisely combined in existing commissions.

Agency Administration

We have considered several alternatives and have concluded that the best approach to solving the problems created by the commission form is to replace commissions—for transportation, power, securities, and trade practices regulation—with single administrators. These officials should be appointed by the President, upon the advice and consent of the Senate, to serve at the pleasure of the President.

agencies, where these vital requirements for program direction are now often weak. This form of organization would also strengthen program coordination where two or more agencies need to work together to achieve a common goal.

Specifically, as described in detail in chapter 1, the single administrator would:

- Enable an agency to attract and retain highly qualified executives and staff because of better-defined, singular authority and responsibility;
- Encourage formulation of policy through informal procedures and rulemaking rather than case-by-case adjudication;
- Foster improved policy coordination among the agencies and with executive departments;
- Facilitate more immediate response to the needs of the public and to structural, economic, and technological changes in the regulated industries; and
- Promote more efficient allocations of agency resources by encouraging the use of modern management methods, including greater delegation of authority and more direct staff accountability.

Unitary leadership will not solve all regulatory problems. An agency so led may flounder for lack of the right kind of leadership or suffer from misguided efforts. But fault for that lies in the quality of the appointment not the form of organization. In such a case, responsibility lies with the President who has power to make the necessary change.

We suggest retention of plural leadership in the communications and antitrust areas because of overriding considerations which in our view supervene the benefits of the single administrator form. These considerations are discussed in chapters 4 and 7.

Review of Agency Decisions

The regulatory commissions have tended over the years to overjudicialize agency process by adopting a case-by-case approach. Excessive judicialization has fostered the development of ad hoc policies often limited to the particular fact situation at hand and therefore without general applicability or future effect.

Such judicial preoccupation, seen most readily in the course of systematic full commission review of decisions by agency hearing examiners, generally has precluded early, comprehensive statements of policy through rulemaking proceedings and other informal policymaking procedures. It has prevented the application of current agency policy by examiners while implicitly encouraging appeals to the full commission for a de

perspectives of staff and commissioners. The judicial attitudes and procedures of the commission have unduly prolonged proceedings and nurtured high case backlogs leading to ineffective uses of agency resources.

To rectify this situation, we propose that, instead of reviewing each initial decision as a matter of course, the single administrator of the restructured transportation, securities, and power regulatory agencies, and the new trade practices agency, review selected cases primarily for consistency with agency policy. Action by the administrator to overturn, modify, or remand an examiner's decision should be taken within 30 days and should set forth the reasons underlying such action.

Final agency action would be subject to review in the Federal courts. Whereas judicial review is presently exercised by the U.S. Courts of Appeals, we propose that, except for trade practice proceedings, review be transferred to a new Administrative Court of the United States. That court would be expert as to both the substantive issues involved in transportation, securities, and power legislation and the procedural intricacies of the Administrative Procedure Act which governs agency and review process. Moreover, the court's familiarity with problems of regulatory administration and the need for expedited procedures can be expected to aid in displacing the court-like posture of the agencies while maintaining regulatory fairness. We anticipate that removing judicial review of agency process from the Courts of Appeals will reduce somewhat the load on those courts and eliminate much of the agency preoccupation with judicial procedures which derives from review by common law courts.

The Administrative Court should consist of as many as 15 judges, appointed by the President, upon the advice and consent of the Senate, to serve staggered terms. We suggest terms up to 15 years. Appointments should be made initially on a bipartisan basis, with no more than a bare majority from one political party. Subsequent appointments or reappointments, just as those to other Federal courts, should be made without regard to political affiliation. The length of judicial terms should be long enough to insure continuity of expertise and at the same time short enough to permit revitalization of the judicial process compatible with an expanding economy, new technology, and changes in industry structure. A Chief Judge designated by the President should assign judges to cases on a rotating basis rather than to specialized panels. This would allow judges to maintain an open perspective and avoid identification of particular judges with specific types of proceedings.

The Restructured Agencies

The single administrator form, limited internal review, and the Administrative Court create a structure within which several regulatory functions can be realigned to reflect a more rational and potentially more effective placement of responsibilities.

Transportation

Three agencies presently regulate transportation: the ICC (railroads, trucks, buses, freight forwarders, barge lines, and pipelines), the CAB (air carriers), and the FMC (maritime shipping). While the reasons for dividing responsibility among three agencies may have been compelling as transportation regulation evolved, we found no persuasive reasons to justify the continuation of these divisions. To the contrary, grouping these responsibilities within a single Transportation Regulatory Agency has many advantages. These are set forth at length in chapter 3.

Today, there is a singularly vital need for a regulatory facility which is consonant with the increasing interdependence of transportation modes, competition among the modes, and integration of transportation into effective networks. The proposed Transportation Regulatory Agency would be charged with weighing the interests of each transportation mode in terms of the public interest. Rules and procedures for uniform classifications and for coordinated rates, routes, and industry practices would be possible when now such action is virtually impossible.

Promotional as distinct from regulatory functions of the existing transportation agencies—such as the subsidy-granting activity of the CAB—should be consolidated in the Department of Transportation which has primary concern for industry promotion. This would eliminate conflicting responsibilities for promotion and regulation within a single agency.

Trade

While transportation regulation is in our view better administered by one agency, regulation of antitrust enforcement and consumer protection is ill-combined in the FTC.

Although both activities aim at assuring fair business practices and preserving competition in American industry, methods of investigation, negotiation, and enforcement of their respective statutory mandates differ widely. Each requires different expertise and procedures. Consumer protection relies primarily on the promulgation of rules and regulations together with field investigations. Antitrust enforcement entails intensive study of the industry and of the economic impact of industry practices.

As detailed in chapter 4, to fulfill these separable responsibilities the FTC should be abolished and in its place created a new Federal Trade

Practices Agency for protecting consumers and a new Federal Antitrust Board for antitrust enforcement.

The Federal Trade Practices Agency would establish trade practice policies, both on its own initiative and in response to public initiatives. It would also investigate actual instances of alleged violations of fair trade practices. Since many such complaints are of limited financial consequence and are amenable to prompt resolution, hearing examiners situated in regional offices of the agency could most expeditiously deal with them. In fact, today many such situations are resolved quickly through the most informal discussion betwen the FTC and alleged offenders. In those cases where substantial issues are involved, examiners' decisions should be subject to appeal in appropriate Courts of Appeals after opportunity for policy review by the agency administrator.

The Federal Antitrust Board, consisting of a chairman and two economist administrators, would continue dual antitrust enforcement with the Department of Justice. The chairman would be responsible for all executive and administrative duties, and would articulate agency policy. The multimember Board would permit comprehensive micro- and macroeconomic analysis by drawing upon the special expertise and perspectives of its members. Actions brought by the Board should be heard in the Federal district courts.

Securities

A new Securities and Exchange Agency should supplant the SEC. Internal review of certain judicial proceedings presently commenced before hearing examiners should be limited to 30 days and directed principally to assuring that decisions correctly reflect agency policy. Appeals from agency decisions should be to the Administrative Court. Original actions taken by the SEC in the Federal district courts should continue as they do today. For reasons stated in chapter 5, application of these structural changes would enable the agency to adapt readily to present and future needs of the securities industry and the investing public.

Regulatory responsibilities of the SEC under the Public Utility Holding Company Act of 1935 should be vested in the proposed power regulatory agency, since problems relating to the structure of public utility holding companies are properly within the competence of that agency. For many years, in fact, the SEC has drawn upon FPC expertise in administering the act. This proposal has long had substantial support from both the SEC and FPC.

Power

A new Federal Power Agency should replace the FPC. As with the proposed transportation and securities agencies, as well as for reasons

discussed in chapter 6, the power administrator would be able to respond more effectively than a multimember commission to the needs of the electric power and natural gas industries, their customers, and the public generally. Appeals from final agency decisions would be to the Administrative Court. As noted, the power agency should assume regulatory responsibilities under the Public Utility Holding Company Act.

Communications

The FCC regulates, among other things, radio and television broadcasting, both important sources of public information. To an extent not present in other agencies, regulation in this area involves personal value judgments as to the type, quality, and substance of programing—the product of the industry which the FCC oversees. Clearly, the public has come to rely on the broadcast media for much of its information. The mere appearance of possible undue influence over program content might undermine public confidence in the sources of its information. Thus, we believe it would be inadvisable to place in the hands of a single administrator the power to exercise control over industry members through licensing and programing decisions.

Moreover, because broadcast regulation is uniquely subjective in character, we believe that decisions in this area should reflect the personal values of more than a single individual. This is especially important in view of the fact that even though the damage to society from control of information sources may be substantial, there is no satisfactory remedy for undoing the harm. Accordingly, it is imperative, in the first instance, to build in added safeguards for assuring an uncontrolled flow of ideas and information.

For these reasons, more fully explained in chapter 7, the FCC should be retained as a multimember commission. To offset some of the disadvantages of plural administration, the number of FCC commissioners should be reduced from seven to five, to serve 5-year terms.

CONCLUSION

Most deficiencies and problems of the regulatory agencies stem from an inapposite wedding of form and function. The present commissions combine the passive, judicial characteristics of a court with the active policymaking responsibilities of an administrator, to the detriment of both.

Substantial changes are advisable in the present structure of regulation by collegial bodies. The transportation, power, securities, and trade practices agencies are in need of the vigorous reform which a single administrator is most likely to bring about.

We have not recommended single administrators for all the regulatory agencies because organizational theory should give way when other factors bear greater weight. Although we emphasize organizational principles, we think exceptions should be made where, on balance, supervening considerations apply or greater effectiveness is likely by retaining collegial bodies. Hence, we believe that the overriding needs for a mixture of views in the communications area and for extensive economic judgment at the point of decision in the antitrust field justify plural-headed organizations in these areas.

There has been no attempt to catalog all the flaws of the regulatory structure nor to set forth solutions to all problems. But we have identified the major problems; and we have suggested a constructive plan for refashioning the regulatory structure so that the agencies can perform more effectively and at the same time more fairly.

We do see, moreover, that in our complex and growing society economic regulation must be consistent in its purpose, constructive in its policies, and objective in its decisions. Regulators have the difficult task of balancing the interests of industries and of the public to insure that the latter is well served and that the former remain vigorously able to provide that service. Such is the goal of the proposals we have made.

NOTES

1. "It [the committee] is not persuaded of the soundness of the view sometimes asserted that, to the traditional threefold classification, there must be added a fourth power, conveniently called 'administrative,' which somehow involves the exercise of functions which are neither executive, legislative, nor judicial and thus escapes the necessity for safeguards which centuries of experience have built around the exercise of such functions." Report of the Special Committee on Administrative Law, before the 57th Annual Meeting of the American Bar Association, Milwaukee, Aug. 28–31, 1934, in "Separation of Powers and the Independent Agencies: Cases and Selected Readings," Committee on the Judiciary, S. Doc. No. 91–49, at 216 (1970).

February 7, 1972

The Honorable William J. Moran
Chairman
House Judiciary Committee
Pouch V
Juneau, Alaska 99801

Dear Bill:

In accordance with our telephone conversation of this date, I am enclosing the City of Anchorage, Municipal Division of the District Court, budget for 1972. Also enclosed is an extract of the Fines and Forfeitures section of the budget.

Sincerely yours,

Bob

Robert E. Sharp
City Manager

Problem

Lack of space to conduct Arraignments, & Jury and Court Trials. Failure to provide timely trials will result in dismissals. RE: Criminal Rule 45, as amended by Alaska State Supreme Court Order No. 131 Section (b). Trials presently being set into 6th month after defendent is arraigned. 639 Trials pending as of August 25th, 1971. Rental Cost to City for extra court room from Sept. 28 thru July 31 - 6,607.20.

Goal-1

(A) Implement efficient procedures to accomodate increased load resulting from requirement of Jury trials plus normal increase in number of cases filed.
(B) Departments current program will not contribute to timely trials without wholesale dismissal of cases.
(C) Greatly needed is additional court room space and assignment of another full time Judge or Magistrate.

Objective

(A) Existing facilities will have to be divided creating a second court room - this can be accomplished at an approximate cost of $23,500.00.
(B) One court room will conduct Jury Trials, one court room will conduct Non-Jury trials five days per week beginning at 8:00AM each day. Scheduling of trials for each court will govern time of day court will close. Arraignments will be held in the late afternoon and early evenings.
(C) Provide court space & additional court personnel (if necessary) to handle in timely & efficient manner the business of Municipal Division of District Court within one facility or area.

Progress Evaluation

(A) Case flow in timely manner; elimination of confusion in procedure; elimination of unreasonable continuances of cases. Results would be reflected in less backlog in number of cases & show increase in revenue as well as timely dispensation of justice.
(B) Cases scheduled from April 2 thru August 4, 1971 - 1426. Cases actually held - 206. Cases Dismissed -368. Cases granted continuances - 305. Changes of Pleas, Bail Forfeitures and Bench Warrants - 558.
(C) Cases that could have been tried during period April 2 thru Aug. 4 (Providing adequate space and personnel available) -673.

HB-563

RECOMMENDATIONS ADOPTED BY THE ADVISORY COMMISSION ON INTERGOVERNMENTAL RELATIONS AT ITS SEPTEMBER 11, 1970 and JANUARY 22, 1971 MEETINGS DEALING WITH STATE-LOCAL RELATIONS IN THE CRIMINAL JUSTICE SYSTEM

A. COURTS

Recommendation 1. Organization and Administration

The Commission recommends that each State establish a simplified and unified court system, consisting of a supreme court, an intermediate court of appeals if necessary, a general trial court and special subdivisions of the general trial court performing the duties of courts of limited jurisdiction. The Commission also recommends that the States abolish justice of the peace courts, or overhaul them by placing them under State supervision, direction and administration; by compensating justices by salary rather than by fees; and by requiring them to be licensed to practice law in the State or pass an appropriate qualifying examination. The Commission further recommends that all courts be subject to administrative supervision and direction by the supreme court or the chief justice; to uniform rules of practice and procedure promulgated by the supreme court subject to change by the legislature; and to the flexible assignment by the supreme court or chief justice of judges from court to court within and between levels.

Recommendation 2. State Court Administrative Office

The Commission recommends that all States provide an administrative office of the State courts, headed by a professional administrator, to assist in the administrative supervision and direction of the State court system.

Recommendation 3. Trial Court Administrative Offices

The Commission recommends that States authorize and encourage establishment of administrative offices for the general trial courts of large urban areas. The Commission further recommends that such offices be headed by professional administrators and be under the general supervision of the State court administrator where one exists.

Recommendation 4. Methods of Selecting Judges--The "Merit Plan"

The Commission recommends that State and local governments, where needed, adopt the "Merit Plan" of selecting judges, whereby commissions consisting of representatives of the bar, the judiciary, and the public screen and nominate qualified candidates for appointment by the chief executive. The Commission further recommends that judges so appointed be required to submit themselves to voter approval or disapproval at an election at the end of each term.

Recommendation 5. Judicial Discipline and Removal: The California-Type Commission on Judicial Qualifications.

The Commission recommends that, where lacking, States establish machinery for the discipline and removal of incapacitated or unfit judges, patterned after California's Commission on Judicial Qualifications.

Recommendation 6. Judicial Qualifications

The Commission recommends that States require all judges to be licensed to practice law in the State.

Recommendation 7. Mandatory Retirement

The Commission recommends that, where lacking, State laws require mandatory retirement of State and local judges upon reaching age seventy.

Recommendation 8. Full-Time Judges

The Commission recommends that States require all judges to devote full-time to their judicial duties.

Recommendation 9. State-Local Sharing of Court Financing: Full State Assumption of Costs

The Commission recommends that States assume full responsibility for financing State and local courts.

Recommendation 10. Improved Federal-State Court Relations

The Commission urges State and Federal district judges, judicial officers and Bar Associations to initiate and support the development of State-Federal Judicial Councils composed of chief judges of State and appropriate Federal district courts to cooperatively explore problems of joint concern, including procedures for review of past conviction petitions.

B. PROSECUTION

Recommendation 11. Increased State Responsibility for Prosecution

The Commission recommends that States strengthen State responsibility for prosecution by enhancing the attorney general's authority to oversee the work of local prosecutors; by establishing a State council of prosecutors composed of all local district attorneys and under the leadership of the attorney general; and by giving the attorney general the power to consult with and advise local prosecutors in matters relating to the duties of their office; and when, in his judgement, the interest of the people of the State requires it, to attend the trial of any party accused of a crime and assist in the prosecution and intervene in any investigation, criminal action, or proceedings instituted by prosecuting attorneys in certain specified instances. The Commission further recommends that States empower the supreme court to remove a prosecuting attorney pursuant to prescribed procedures and safeguards.

Recommendation 12. Consolidation of Local Prosecution Functions in Certain Areas

To achieve more efficient use of manpower and a higher level of prosecution, the Commission recommends that States, where necessary, centralize the local prosecution function in a single office, responsible for all criminal prosecutions.

Recommendation 13. Prosecutorial Districts and the Part-Time Prosecutor

The Commission recommends that States require prosecuting attorneys to be full-time officials and that their jurisdictions be redrawn so that each is large enough to require the full-time attention of such an official and to provide the financial resources to support his office.

Recommendation 14. Financing Prosecution

The Commission recommends that States pay at least 50 percent of the costs of local prosecuting attorneys' offices.

Recommendation 15. Flexible Grand Jury Procedures

The Commission recommends that, where necessary, States enact legislation authorizing prosecutors to bring indictments through either grand jury or information procedures. The Commission further recommends that prosecutors utilize grand juries primarily in cases of alleged official corruption or extraordinary public concern. When used, grand juries should be empaneled on a frequent enough basis to prevent unnecessary court delay. The Commission stresses that nothing in this recommendation is intended to modify the traditional investigative powers of grand juries.

C. DEFENSE COUNSEL FOR THE INDIGENT

Recommendation 16. State-Local Responsibility for Providing Defense Counsel for the Indigent--Direct Administration by the State

The Commission recommends that each State establish and finance a statewide system for defense of the indigent, making either a public defender or coordinated assigned counsel service readily available to every area of the State.

D. POLICE

Recommendation 17. Provision of Basic Police Services (Patrol and Preliminary Investigation) in all Metropolitan Localities

The Commission recommends that all local governments in metropolitan areas assure the provision of full-time patrol and preliminary investigative services to their residents. Metropolitan localities should provide these services either directly, or through intergovernmental cooperation with States, counties, or other local governments, or some combination thereof. The Commission also recommends that overlying county governments should be empowered to assume the police function in any metropolitan locality which fails to provide patrol and preliminary investigative services, charging the cost of such assumed police service to the affected local government. The Commission further recommends that in cases where the county does not assume these police services, State legislation should mandate the consolidation of police services in metropolitan jurisdictions which do not provide basic police services directly or through interlocal agreements.*

*Governor Reagan dissented.

Recommendation 18. Provision of Supportive (Staff and Auxiliary) Police Services in Metropolitan Areas

The Commission recommends that counties be empowered and encouraged to perform specialized, supportive (staff and auxiliary) police services for constituent localities in single county metropolitan areas. These services should include communications, records, crime laboratory, and other related functions. The Commission further recommends that in multicounty or interstate metropolitan areas, States authorize and encourage appropriate areawide instrumentalities such as regional criminal justice planning agencies, councils of government, or multifunctional, multicounty agencies to perform these supportive police services.

Recommendation 19. Special Police Task Forces in Multicounty Metropolitan Areas

The Commission recommends that States authorize or encourage the creation of specialized police task forces, under State or interlocal direction, to operate throughout multicounty and interstate metropolitan areas in order to deal with extra-local and organized crime. The Commission further recommends that under the interlocal option, any areawide agency performing two or more operating functions be given responsibility for the task force; if no such areawide agency exists, the force should be established by interlocal agreement among the participating local governments.

Recommendation 20. Extraterritorial Police Powers

The Commission recommends that, where necessary, States enact legislation and enter into interstate compacts giving localities carefully circumscribed extraterritorial police powers relating to "close pursuit" of felonious criminal offenders and to geographically extended powers of criminal arrest. The Commission further recommends that States clarify governmental responsibility for liability insurance for police officers engaged in lawful extraterritorial police activity.

Recommendation 21. Financing County Police Services in Unincorporated Portions of Urban Areas.

The Commission recommends that where counties provide police services to unincorporated portions of metropolitan areas, States should require the costs of such services to be borne entirely by such unincorporated areas.

Recommendation 25. Independent County Police Forces and Modernized Sheriffs' Departments

The Commission recommends that States give metropolitan counties the option of assigning basic responsibility for countywide police services to an "independent" county police force under the control of the county chief executive or county board of commissioners. The Commission further recommends that States enact legislation which requires county law enforcement agency personnel to be compensated solely on a salary basis, covered by civil service tenure provisions, and provided with adequate retirement benefits. Where counties choose not to exercise the option of creating an independent county police force, States should authorize the assignment of responsibility for countywide police service to the sheriff's department, the reassignment of the sheriffs' court and jail* duties to appropriate court and correctional agencies, and the enactment of legislation which removes tenure limitations on the sheriff's office.

*The term "jail" refers to a short-term correctional institution other than a local holding facility.

Recommendation 26: Abolition of the Office of Constable

The Commission recommends that States abolish the office of constable and transfer its duties to appropriate lower court systems.

Recommendation 27. Abolition of the Coroner's Office

The Commission recommends that States abolish the office of coroner. The Commission also recommends that States enact legislation requiring that the medical functions of the coroner be exercised by an appointed local medical examiner and the judicial functions of the coroner position be exercised by the local prosecuting attorney. The Commission further recommends that such legislation should stipulate that official records regarding certification of death be a matter of public record, and a grand jury or specified number of citizens, by petition, may call for an inquest.

Recommendation 28. Improving Police Selection, Training, and Education.

The Commission recommends that, where needed, States create Councils on Police Standards, composed of appropriate State, local and public members, to develop and recommend minimum standards for police selection and basic training. The Commission further recommends that States enact legislation promulgating mandatory minimum standards in these areas and assigning the administration of these standards to such Councils. States should meet 100 percent of the cost of local training programs meeting mandatory State standards. The Commission further recommends that States encourage private and public institutions of higher education to offer appropriate programs for police training and that local governments establish incentive pay plans or other fiscal aids designed to help local policemen in furthering their professional training by participating in such programs.

Recommendation 29. State Criminal Code Revision.

The Commission recommends that State legislatures revise their criminal code to better define the scope of discretionary police activities. More specifically, State criminal codes should stipulate the bounds of legitimate police activity in the exercise of arrest powers, search procedures, and interrogation practices. The Commission further recommends that, where lacking, States enact comprehensive governmental tort liability statutes to protect State and local police employees from tort actions arising out of legitimate use of discretionary police powers.

Recommendation 30. Modifying Personnel Practices.

The Commission recommends modification of State laws which restrict local chief executives from appointing local police chiefs from the ranks of any qualified applicants and which restrict local police chiefs from appointing division heads and assistants reporting directly to them. The Commission further recommends that where necessary States modify veterans' preference and other State civil service regulations which serve to limit unduly or otherwise restrict the selection, appointment, and promotion of qualified local policemen.

E. CORRECTIONS

Recommendation 31. Reordering Priorities

The Commission concludes that since corrections is the step-child of the criminal justice system, it is essential that greater public attention, funds, and policy focus be directed to this field and that basic reforms be undertaken. The Commission recommends, as a matter of general public policy, that State and local officials give a high priority to upgrading correctional institutions and rehabilitation services in order to help reduce crime rates.

Recommendation 32. Strengthening Community-Based Treatment

The Commission concludes that adequately financed, staffed, and supervised community-based treatment programs including probation, work release, youth service bureaus, half-way houses, parole, and aftercare--can be more effective than institutional custody in rehabilitating most offenders and in facilitating their readjustment to society.

Recommendation 33. Refocusing State-Local Correctional Responsibilities

The Commission concludes that while State governments have an overriding responsibility to ensure the provision of certain correctional services on a statewide basis, including responsibility for assignment and transfer of convicted prisoners, other correctional activities can be more appropriately handled by local governments. Hence--

The Commission recommends that the States assume full financial, administrative, and operational responsibility for juvenile and long-term adult correctional institutions, parole, juvenile aftercare, and adult probation. The Commission further recommends that local governments retain operational and a share of the fiscal responsibility for short-term adult institutions and jails, adult and juvenile detention, and misdemeanant and juvenile probation, and that the States establish and monitor minimum standards of service, furnish planning and technical assistance, and provide a reasonable share of the costs of such activities.*

*Governor Hearnes dissented.

Recommendation 34: Consolidating State Administrative Responsibilities

The Commission recommends that the State's responsibility for correctional activities, excluding the adjudicatory functions of granting paroles or pardons, be vested in one State department or agency directly accountable to the Governor.

Recommendation 35: Upgrading the Detention Function

To ease the critical problem of comingling untried persons with convicted offenders, and to expedite the trial of such persons, the Commission recommends that States and local governments jointly plan and develop adequate adult and juvenile detention services and facilities which relate to the processes of the court system.

Recommendation 36: Programs and Facilities for Work Release

The Commission recommends that State and local governments enact legislation, where necessary, authorizing work-release programs and establishing administrative and fiscal procedures to enable the State correctional agency to utilize approved regional or community institutions and jails for the placement of those prisoners who might benefit from such programs.

Recommendation 37: Expanding Vocational Training

The Commission concludes that the educational and vocational programs of most State and local institutions have failed to equip adequately offenders with the skills and experience necessary for successful reintegration into society, and that this, in turn, has contributed to the high rate of recidivism.

The Commission, therefore, recommends that State and local governments initiate or revamp their academic and vocational training offerings for inmates of juvenile and adult institutions.

Recommendation 38: Promoting Regional Correctional Facilities

The Commission recommends that States authorize and encourage local governments through financial incentives and

technical assistance to contract with larger local units for the custody of their prisoners, or enter into agreements with other local units for the joint establishment and operation of regional jails and local institutions to handle such offenders.

Recommendation 39: Management of Short-Term Penal Institutions

The Commission recommends that short-term penal institutions be administered by appropriately trained correctional personnel.

Recommendation 40: Quantity and Quality of Personnel

The Commission concludes that many State and local correctional agencies have insufficient and inadequate professional staff due to low pay, long hours, a custodial rather than rehabilitative orientation, lack of exposure to research and development advances, and other impediments to job satisfaction. Hence --

The Commission recommends that State and appropriate local governments improve recruitment, compensation, training, and promotion practices to attract sufficient numbers of high quality personnel to the corrections system. The Commission further recommends that States establish minimum qualifications standards for correctional personnel.

Recommendation 41: Use of Paraprofessional and Volunteer Aides

The Commission recommends that, where necessary, State and local legislative bodies, personnel agencies and/or correctional agencies take action to create new personnel classification positions so that paraprofessionals and other qualified workers, including ex-offenders other than former police officers, can be used in correctional programs. The Commission further recommends that States and localities make available training and educational opportunities to such personnel to enable them to meet appropriate standards.

F. THE PUBLIC'S ROLE IN LAW ENFORCEMENT

Recommendation 42: Police-Community Relations

The Commission concludes that a workable partnership between police and community residents is necessary to effectively prevent crime. Hence,

The Commission recommends that local governments substantially increase their efforts to involve citizens in the law enforcement and criminal justice process through the establishment of police-community relations machinery and programs.

G. INTERFUNCTIONAL COOPERATION

Recommendation 43: Establishment of Local Criminal Justice Coordinating Councils

The Commission recommends that local criminal justice coordinating councils under the leadership of local chief executives be established in jurisdictions having substantial administrative responsibility for at least two of the major components of the criminal justice system. The Commission further recommends that LEAA require regional criminal justice planning agencies to coordinate their work with these local councils where they exist.

Recommendation 44: Improving Interfunctional Linkages in the State-Local Criminal Justice System

The Commission recommends that State and regional criminal justice planning agencies and local criminal justice coordinating councils take primary responsibility for improving interfunctional cooperation in the State-local criminal justice system. These agencies should encourage, among other things, the development of such coordinating mechanisms as seminars on sentencing practices for judicial and correctional personnel, police legal advisors, and a comprehensive criminal justice data system. They should also encourage the coordinating efforts of the existing professional law enforcement organizations. The Commission further recommends that State legislatures establish a joint standing committee or take other appropriate means to provide for continuing study and review of the progress in achieving a better coordinated State-local criminal justice system.

HB-563

THE COUNCIL OF STATE GOVERNMENTS

WASHINGTON OFFICE — (202) 737-9717
1735 DeSALES STREET, N.W. • WASHINGTON, D.C. 20036

April 16, 1971

INFORMATION LETTER

CRIMINAL LAW REVISION: FEDERAL AND STATE EFFORTS

Latest Developments:

State efforts in criminal law codification will be the subject of hearings before the Senate Judiciary Subcommittee on Criminal Laws and Procedures in late May. State experiences in criminal law revision will be discussed at additional hearings in June.

The Congress is beginning a major effort, expected to last for two or three years, to reform and codify the Federal criminal laws. According to the Senate Subcommittee Counsel, State experiences in code revision will benefit the federal effort. The Congress wants to learn from State government drafting techniques, substantive law provisions, and code organization and style. Operating experience under new codes adopted by States will guide the federal law reform program.

Background:

Congressional action in federal criminal law reform comes in response to the final report of the National Commission on Reform of Federal Criminal Laws filed January 7, 1971. The National Commission was created by Congress in 1966 by Public Law 89-801. Commission Chairman, appointed by President Johnson, is former Governor Edmund G. Brown, of California. Vice-Chairman is Congressman Richard H. Poff, of Virginia.

The Department of Justice, acting upon the direction of President Nixon, is developing a criminal code revision which will become the Administration's version for submission to the Congress. A special legal task force has been formed within the Department to draft the code. It is monitored by a four-man policy committee composed of high Department officials.

The National Commission was careful to present the Congress with a basic working draft upon which legislative decisions could still be made. The Draft is a complete reform of the present Title 18, the criminal law section of the U. S. Code. It brings together all federal felonies, some of which are presently outside Title 18; it codifies common defenses, which are now left to common law court decisions; and establishes standard principles of criminal liability. The Draft Code restructures the system for imposing sentences. The Commission, with certain strong dissent from a minority of its members, recommended the abolition of capital punishment.

Federal-State Jurisdictional Issues:

Major provisions of the Draft Code substantially increase federal criminal jurisdiction at the expense of State jurisdiction. Section 201(b) of the Code allows the federal government to prosecute for normally state offenses wherever there is a related federal criminal code violation. This would permit federal prosecution for all crimes of violence such as murder, arson, assault in any instance where there is a related federal code offense, no matter how minor. This so-called "piggyback" provision significantly curbs state responsibility for the punishment of crimes of violence.

The basic issues of cooperative federalism are not considered at all in the Draft Code. The practical problems of federal-state relations are further complicated by the Code's jurisdictional provisions concerning federal enclaves. Over the last century and a half, the movement of the law has been toward increased assimilation of the rights of enclave residents to the

rights of state residents. This reached the point where, in the case of Evans v. Cornman (90 S. Ct. 1752 (1970)), the Supreme Court ruled that residents of federal enclaves may vote in state elections. The Code, however, makes federal criminal law specifically applicable to enclaves, and reduces the Assimilative Crimes Act to its narrowest possible dimensions. The effect of these provisions is to make enclaves practical sanctuaries from state laws, thus undermining the state's enforcement of its criminal laws in surrounding areas. In 1956 the two volume "Report of the Interdepartmental Committee to Study Problems of Jurisdiction Relating to Federal Enclaves", the most comprehensive study of the problem, recommended the almost complete retrocession of exclusive jurisdiction over federal enclaves to state governments.

The Draft Code further extends federal criminal jurisdiction to cases involving offenses affecting federal public servants engaged in performance of their official duties, whether or not the offense is specifically directed by the offender against the federal official qua federal official. Similar provisions in the Draft Code provide for federal prosecution of property crimes directed against property being manufactured, constructed or stored for the United States whether or not the criminal was aware that the property was so situated. Federal jurisdiction over crimes involving the most minimal affect upon interstate commerce, such as using a telephone, is extended. The Draft Code extends federal jurisdiction to cases where either offenders or victims use interstate travel, even though the travel itself may not be directly related to the substance of the crime.

Finally, plenary federal jurisdiction is asserted in the general statement in Section 201 of the Brown Commission Code. The language states, "When no base is specified for an offense, federal jurisdiction exists if the offense is committed anywhere within the United States, or within the special maritime and territorial jurisdiction of the United States."

State Criminal Law Revision Efforts:

State criminal law revision efforts and experience will be used by the Congress to guide its own federal criminal law reforms.

The following states have enacted new criminal codes: Connecticut (1971); Georgia (1969); Illinois (1962); Kansas (1970); Louisiana (1942); Minnesota (1963); New Mexico (1963); New York (1967); and Wisconsin (1956).

The following states have completed drafts of new criminal codes which are now before their legislatures: Alaska, Colorado, Delaware, Hawaii, Idaho, Maryland, Michigan, Montana, New Hampshire, Oregon, Pennsylvania, and Texas.

Code revision efforts are now underway in: California, Kentucky, Massachusetts, New Jersey, Ohio, Rhode Island, Missouri, and preliminary work has begun in Alabama, Nebraska, and North Carolina. The legislatures in Arizona and North Dakota have just recently authorized efforts to draft criminal code revisions.

INFORMATION LETTER

SPECIAL REVENUE SHARING FOR LAW ENFORCEMENT

Latest Developments

President Nixon sent to Congress his special revenue sharing message on Law Enforcement--the first of six such messages to cover the broad areas of law enforcement, rural development, urban development, education, manpower and transportation.

The President proposes to amend the present Omnibus Crime Control and Safe Streets Act, administered by the Law Enforcement Assistance Administration, by granting to States substantially more flexibility in the use of funds, and relieving States of much administrative burden.

Background

The major elements proposed in the President's message are:

--Funds would be allocated to the States on a population formula, from an initial authorization request of $425 million. An additional $75 million would be granted from the LEAA discretionary fund, as now authorized in existing law.

--The requirement for a state criminal justice plan would remain in the basic Act, but the approval of the state plan by the LEAA would no longer be necessary prior to the allocation of the special revenue sharing funds to the States. The plan would be filed with the LEAA for its use as a post-audit tool. The plan would continue to have to be approved by the Governor and the state criminal justice agency supervisory board.

--The requirement for matching funds, to be furnished by recipients of grants, would be eliminated. Federal funds would be used for 100 percent of project costs.

--The present requirement that grantees maintain the existing level of their own direct expenditures, and that federal funds not be used to supplant state or local funding, is eliminated. The "maintenance of effort" requirement will no longer be a condition for receiving a grant.

--LEAA would still be authorized to provide technical assistance and counseling to the States in the preparation of their statewide plans.

--Minorities' protection from discrimination under Title VI of the Civil Rights Act of 1964 would apply to the law enforcement revenue sharing program. The present act exempts States and localities from the Title VI provisions.

--The new proposals preserve the flexible pass-through formula (contained in the 1970 amendments) requiring States to make available to localities a portion of the shared revenue equal to the ratio of state-local expenditures for all criminal justice activities.

--Additional fiscal control requirements would be placed on the States. More detailed post-audit reports will be required.

--The 1970 amendments to the basic Act providing for Part E-Corrections funding will be continued in the present form.

--The 25 percent "buy-in" requirement, adopted in the 1970 amendments, whereby States will be required in fiscal year 1973 to furnish 25 percent of a sub-grantees matching funds would be eliminated.

--LEAA programs for law enforcement research, academic assistance and statistics and technical assistance will remain as they are.

Initial reaction from state officials has been favorable. Some have expressed concern that elimination of all matching and maintenance of effort requirements may result in a net loss of federal, state and local funds coming into the criminal justice system; and that localities, no longer having to put up their match for grants, might become careless with the "free" money.

Copies of the message and legislation will be sent upon request.

SPECIAL LETTER

JUVENILE DELINQUENCY LEGISLATION

Latest Developments

Congress is moving on pending juvenile delinquency legislation. The June 30, 1971 expiration of the Juvenile Delinquency Prevention and Control Act has prompted the General Subcommittee on Education of the House Education and Labor Committee, chaired by Rep. Roman Pucinski (Ill) and the Senate Judiciary's Subcommittee on Juvenile Delinquency, chaired by Sen. Birch Bayh (Ind) to begin hearings on pending legislation. Both subcommittees have heard Administration witnesses. Hearings will continue into May.

The Administration's proposal is not yet in bill form. Developed by HEW's Youth Development and Delinquency Prevention Administration, under Robert Gemignani, the proposal calls for a "national strategy" to develop model systems for preventing delinquency in inner city, suburb, rural setting, and the college campus. Final Administration approval has not been given to the HEW bill due to objections from the Justice Department.

Background

The Juvenile Delinquency Prevention and Control Act of 1968 (P.L. 90-445) was designed to be a companion program to block grant Omnibus Crime Control and Safe Streets Act. It provides for grants to States and cities for planning and action programs to prevent, control. and rehabilitate juvenile delinquents. Complex language of the Act prevented States from receiving action funds if they opted to do comprehensive planning. States seeking funds to coordinate juvenile delinquency projects with Omnibus Crime Control programs were frustrated by restrictive guidelines and bureaucratic mismanagement of program. Underfunding of Act (FY 69: $5 million; FY 70: $10 million; FY 71: $15 million)in spite of authorizations of $25 million, $50 million and $75 million, respectively, indicate low priority of program in HEW.

Alternative Proposals to be Considered:

I. The Administration requests $10 million to develop a "national strategy" to test new approaches, techniques and model systems, seeking new knowledge about delinquent behavior, and transferring such findings into programs being funded by federal grant programs. Model systems for prevention and rehabilitation will be established for inner cities, suburbs, rural areas, and college campuses. The goals of HEW proposal are coordination of federal programs relating directly to delinquency, and promotion of joint funding. At present eight federal departments are involved directly in programs for delinquent youths. An additional eight agencies conduct a total of 75 programs for youth generally. Five HEW task forces will plan model delinquency-prevention projects; gather data; recommend projects for funding; assist applicants in program development; formulate evaluation systems; provide program consultation; and disseminate results.

II. Rep. Tom Railsback (Ill) and 50 other House members propose, in H.R. 45, creation of the "Institute for Continuing Studies of Juvenile Justice." The Institute will collect data on the treatment and control of juvenile offenders; serve as an information bank; and function as a graduate training center. No specific funds are authorized.

III. Rep. Claude Pepper (Fla), chairman of the House Select Committee on Crime, plans to introduce the "Juvenile Research Institute and Training Center Act." The bill would create a Coordinating Committee for Juvenile Justice composed of heads of federal agencies dealing with juvenile programs: Office of Education, Children's Bureau, Youth Development and Delinquency Prevention Administration, National Institute of Mental Health (all HEW); Law Enforcement Assistance Administration, Bureau of Prisons (Justice); Office of Manpower Training, U. S. Employment Service (Labor); Model Cities Program (HUD); and Legal Services Division (OEO). The committee would evaluate federal programs dealing with juveniles and recommend improvements. The Institute would collect information on juvenile justice; provide technical assistance to State, localities, and private agencies, training for professionals, and grants for action programs. The authorization request is $8 million over 3 years.

IV. Rep. Roman Pucinski (Ill), Chairman of the General Subcommittee on Education of House Education and Labor Committee has introduced H.R. 6247 to extend the present Juvenile Delinquency Prevention and Control Act for five years, and increase the funding authorization.

V. The National Governors' Conference policy position, adopted in August, 1970, recommend transfer of planning and action program section (Title I) of the 1968 Juvenile Delinquency Act to Law Enforcement Assistance Administration. State dissatisfaction with HEW, and their satisfaction with the block grant mechanism administered by LEAA prompted this decision. During debate on policy position, many Governors expressed view that there must be a dual effort toward solving the juvenile problem. Improvements in juvenile justice system and law enforcement are essential; but there must also be efforts to divert youth from the justice system by preventive and youth development programs. Several Governors emphasized need for a comprehensive approach to problems of youth offenders. They pointed out that delinquent youths should not be set apart from government's total youth development effort. This approach is frustrated by multiplication of youth aid programs among diverse federal agencies. Governors have urged a "block grant for youth."

To date, approximately $38 million in LEAA block grant funds have gone for prevention and control of juvenile delinquency in FY 69 and 70 while the Youth Development Administration allocated a mere $13,713,000. In FY 1971, LEAA state plans call for over $60 million for delinquency prevention and control while the YDDPA (HEW) will be granting $14 million.

Action Needed

Hearings in both Senate and House will continue. State officials wishing to testify should contact this office, or the Chairman of the Senate Subcommittee on Juvenile Delinquency, or Chairman of the House General Subcommittee on Education. Views on proposed federal legislation are requested by this office. Copies of specific bills will be sent upon request.

HB-563

United States of America

Congressional Record

PROCEEDINGS AND DEBATES OF THE 92d CONGRESS, FIRST SESSION

Vol. 117 WASHINGTON, FRIDAY, FEBRUARY 5, 1971 No. 12

ECONOMIC DEVELOPMENT—FIELD HEARINGS TO EXAMINE THE PROPER DIRECTION AND FORM OF AN EFFECTIVE PROGRAM

Mr. MONTOYA. Mr. President, I rise to apprise the Senate of field hearings which will be held during the course of the next few weeks with respect to Appalachia and the other regional commissions.

The concept of creative federalism enunciated by Lyndon Johnson early in his Presidency, and the statement of awareness that we must "help State and local governments develop greater capacity to plan and manage their own affairs" which was contained in the state of the Union address by President Nixon, are both clear characterizations of the direction that government must take. If we start from the premise that the responsibility of government is to serve the people, then I believe it is our duty to achieve the best level of understanding of the kinds of public services that the people of the United States need to maintain proper growth and development.

The lasting effect of the great depression of the 1930's was not the catastrophic economic losses suffered, as terrible as they were, rather, it was the loss of the initiative and ability to render services to the public suffered by local and State governments. We now fully appreciate the result of the continuous movement of power to the National Government.

In and of itself, this centralization was not bad. It enabled us to frame the recovery from the depression, to mobilize for and conduct our national defense during World War II and to make the changeover from a wartime economy to an economy directed toward peaceful pursuits. The centralization of power served its purpose and like all other political responses, it has run its course.

We are now faced with a new set of imperatives, a new set of needs, a new set of national directions. In order to carry them forward we must decentralize government activities and the responsibilities for decisionmaking. This is not to say that there is no longer a need for a strong, active, and concerned Federal Government. What it means is that along with that kind of Federal Government, we must reestablish strong, active, and committed State and local governments. We have all been engaged in politics—the art of government—long enough to realize that there is no single answer, that the art of government is the art of change without violent upset. We must be in a position to evaluate and reevaluate what will work and under what circumstances it will work best.

The President, in his state of the Union message, put great emphasis on revenue sharing. Whether his recommendations will be enacted and whether they will work are questions which we will consider during the 92d Congress. But revenue sharing alone is not the answer. Our experiences over the past 25 years with a series of different approaches to long-term unemployment problems, short-term economic responses, natural catastrophe mechanisms, and the need for intelligent, well-reasoned assessments of priorities has given us a fund of experience and knowledge on which to draw.

As a result of President Johnson's concept of creative federalism, the Congress in 1965 enacted the Appalachian Regional Development Act and the Public Works and Economic Development Act. These programs, which have been in operation for 6 years, provide us with an excellent base from which to examine and recommend legislation in response to the broad range of the problems of the decade of the 1970's.

As we at the Federal level have been working with the programs to which I have referred, a number of States have developed responses of their own. During the months of February, March, and April, we shall inquire in depth as to how these programs have worked, what has been learned from them and how the lessons can be used to shape a new program of State-Federal action to achieve the goal of economic prosperity in a framework of healthy social, cultural, and environmental development.

In the literature of political science and economics, and in the recommendations of Government agencies are a number of worthy proposals. At this time we are not in a position to choose a particular approach to pursue. What the Subcommittee on Economic Development intends to do during these next 3 months is examine many of those ideas in a general framework. We are looking to the creation of legislation to establish a national economic development program, a public works and public facilities investment plan to determine how priorities for public works should be established, to create an inventory of what is needed, and to equip State and local governments to assume the major role in these determinations.

We will concern ourselves with such questions as what constitutes proper development, how to determine the development goals and objectives of State and local governments, and how the Federal Government should be structured to assist the State and local governments in meeting these responsibilities.

As I have said, there are many suggestions. There have been many experiments, the most notable of which are the Appalachian regional development program and the approaches of the Public Works and Economic Development Act.

On February 8, 9, and 10, the Subcommittee on Economic Development will consider S. 575, a bill to extend and revise the Appalachian Act introduced by Senator RANDOLPH, the chairman of the Committee on Public Works, and Senator JOHN SHERMAN COOPER, the ranking minority member. Through these hearings, we will determine what has worked and why it has worked.

As Senator RANDOLPH said in his introductory remarks in this Chamber on February 3:

> I am proud that the Appalachian Development Program has been a leader and an innovator in the areas of government organization and revenue sharing. The Committee on Public Works recognizes the significance of the bold new steps that have been taken in Appalachia, and we are studying the Appalachian program as a possible pattern for economic development and other programs elsewhere.

I concur in his observation and agree with his further statement:

> Based on what we have learned in the past six years and what we expect to learn this year, I am sure that the Appalachian program will be modified and refined. We will, however, want to preserve the momentum and the spirit of cooperation and Federal-State partnership generated under the Appalachian program.

Senator RANDOLPH and Senator COOPER have done much to bring to the attention of the Senate, the Congress, and the Nation, the need for this Appalachian program and the important purposes which it serves. Following these hearings, the subcommittee will begin a series of field hearings which will take us to Raleigh, N.C., February 18, 19, and 20; Memphis, Tenn., March 5 and 6; Los Angeles, Calif., April 1, 2, and 3; Albuquerque and Santa Fe, N. Mex., April 5 and 6; Seattle, Wash., April 14 and 15; Anchorage and Fairbanks, Alaska, April 16, 17, and 18. The sites of these hearings

were chosen because in each place we expect to examine a different aspect of the major problems associated with economic development.

Raleigh, N.C., because of the knowledge and experience of the Governors, other members of State governments, local officials, and private citizens in that area of the South in working with the Appalachian program and the regional economic development program under title V of the Public Works and Economic Development Act.

Memphis, Tenn., because of the strong desire of the leaders of the States of the Midsouth to create a regional economic development program and because of the depth of experience with economic development districts established under title III of the Public Works and Economic Development Act which has been gained in that area.

We will hold hearings in Los Angeles to examine in some detail the long-term development problems of a major metropolitan area which has large minority populations not benefiting from the general prosperity of the area. The current technological unemployment in Los Angeles also should provide us with some interesting testimony.

In New Mexico we can concentrate on the alternatives of the regional commission and State development approach. We will be able to examine the issue with Governors, other State officials, and private individuals who have been working within the regional concept for the last 5 years. During these hearings we can also discuss the specific needs of Indians for separate treatment in order to help them defeat their long-term depression situation.

In Seattle, we will be able to discuss with the Governors of the Northwest their great concern for a regional development commission and to look into the question of pervasive unemployment which that general area has experienced.

In Alaska, we will be able to take full advantage of the knowledge gained by that State in its efforts to achieve economic revitalization following the disastrous earthquake in 1964. In Alaska we will be able to test the one-State approach as compared with the multistate approach.

It is our intention wherever we go to also raise the question of how best to describe the form of the Federal response to those situations where plant closings, loss of vital natural resources, and elimination of Government facilities create economic catastrophes. In this regard, I will join with Senator RANDOLPH and other Members of the Senate in the introduction of a bill to revitalize the accelerated public works program. We shall use this legislation which will be introduced next week as a vehicle for discussion on how best to do this job.

All of the witnesses will be asked to testify on the following outline of questions. We hope that they will respond to as many of the areas as they believe their experience and professional capability allow them.

First. What are the objectives of economic development?

In terms of these goals, what specifically has been the impact of the following on the economic development of your area:

Titles I, II, III, and IV of the Public Works and Development Act as administered by the Economic Development Administration: Its impact on immediate economic development and its impact on continuing economic development.

The regional commissions as created by title V of the Public Works and Economic Development Act.

Any other private, local, State, or Federal programs and agencies which you believe have the task of fostering economic development.

Would you comment on the following proposed local-State-Federal structure for implementing these economic development goals or, if you have other suggestions, please present them to the committee:

Should the entire State be divided into multicounty development areas, and if so—

Who would authorize and designate the districts: The State, Federal legislation, the local communities or some combination of these?

What criteria would be used to delineate these districts?

Should these districts be limited to areas of economic distress or would they be organized around areas of potential economic growth—for example, growth centers?

Would these districts focus in nonmetropolitan areas or should they include metropolitan areas?

What would be the authority and responsibilities of the districts?

What would be the relation of these districts to the State? To Federal agencies? To local governmental authorities? To other multicounty districts which might already operate in the area?

Should the State establish a State-level economic development agency within the office of the Governor? If so—

What responsibilities and authority should this agency need to be effective?

What would be the relation of the agency to local governmental units and locally initiated plans and projects? Local development districts?

What would be the relation of this State-level agency to other State line agencies?

What would be the relation of this State agency to Federal Departments?

Would such an agency and a State development plan be a prerequisite to further Federal assistance?

Should the Federal Government be organized on a multistate regional basis or should we proceed on a State-by-State basis?

What would be the advantage of multistate regional commissions, such as the Appalachia Regional Commission and the title V commissions?

What criteria would be used to designate these regional groupings?

What responsibilities and authority should these regional commissions have to be effective?

Would the commissions include the entire State or only that area meeting the designation criteria? Why?

Should the regional commissions be represented at the Federal level as part of the Department of Commerce or within the executive offices by a Federal coordinator for economic development for example? What would be the role of the Federal side of the regional commission?

What would be the advantage of proceeding on a State-by-State basis?

Would the States be represented at the Federal level through a line agency or within the executive office by a Federal coordinator for economic development for example?

What would be the function of the Federal coordinator?

What would be the relation of the Federal coordinator to local development districts? The States? To other Federal Departments?

Should there be a regional counterpart in the Federal administrative regions to assist the Federal coordinator and the States?

What would be the relation of the private sector to such a structure?

What programs and devices do you recommend to accomplish these goals of economic development? For example, the use of supplemental grants and development corporations.

Second. What should be the role of the Federal and State governments in short-term economic readjustments in rural and urban areas which suffer abrupt and severe unemployment and loss of income due to setbacks in economic activity?

What programs and devices would be necessary to carry out such assistance?

What structure could best accomplish this assistance effort? For example, the use of a Federal coordinating field committee.

Following these hearings and an examination of the record, we shall draft legislation. We shall then hold hearings in Washington, D.C., with a wide range of witnesses who can give us their critical comments and their best suggestions on how to develop a workable procedure to achieve our goals.

Preparation for this program evaluation has been proceeding for some weeks. Members of the subcommittee have indicated their intense interest in the subject. I look to their support and participation in this undertaking. I know that we can develop a good bill in the tradition of the Committee on Public Works. I look forward to working with Senator HOWARD BAKER, the ranking minority member of the subcommittee, and all of his colleagues together with my Democratic colleagues. In this spirit of cooperation, we can approach this large and difficult task with reasonable hope for success to the benefit of the people of this country.

HB-563

STATE OF ALASKA

WILLIAM A. EGAN, GOVERNOR

DEPARTMENT OF LAW

OFFICE OF THE ATTORNEY GENERAL / POUCH K — STATE CAPITOL
JUNEAU 99801

April 24, 1972 .

The Honorable William J. Moran
Chairman
House Judiciary Committee
Alaska State Legislature
Juneau, Alaska 99801

Dear Chairman Moran:

I am sending you a proposed draft to substitute for House Bill 563 submitted by the Governor to insure security and privacy of criminal justice information systems. I am also sending you a copy of my letter to the Senate Judiciary Committee on Senate Bill 387 which is identical to House Bill 753 referred to your committee.

The proposed substitute would specifically require the appplication of the Administrative Procedure Act in relation to the adoption of regulations pursuant to this proposed chapter. Although such a specific reference may not be necessary for the purposes of the Administrative Procedure Act, the reference makes it absolutely clear that it does apply.

Sec. 12.62.020 of the proposed bill has been altered so that the commission is required to adopt regulations concerning the collection and storage of information. Therefore, information may not be placed in such systems, or if already there, it may not remain in such systems, unless the commission specifically permits it by regulation. In addition, a long list of information is specifically excluded from the systems by the provisions of subsection (b) of this section. These exclusions include, among others, professional license information, revenue and taxation information, information relating to state welfare programs, and state personnel information.

The provisions relating to confidential information have been eliminated, and an individual may see all information referring to himself in a criminal justice information system.

The provisions relating to interstate systems for House Bill 753 have been incorporated into this proposed bill.

Also, most of the more detailed provisions relating to the right of individual access, inspection, and challenge from House Bill 753 have been incorporated into this proposed bill.

The reference to "potential criminal offenders" in the definition of "criminal justice information" has been removed.

Finally, the effective date for this proposed bill would be October 1, 1972 to allow the Governor's Commission on the Administration of Justice time to establish the needed regulations.

Very truly yours,

JOHN E. HAVELOCK
ATTORNEY GENERAL

cc: The Honorable William A. Egan
Governor

JEH:gb

STATE OF ALASKA

WILLIAM A. EGAN, GOVERNOR

DEPARTMENT OF LAW

OFFICE OF THE ATTORNEY GENERAL / POUCH K — STATE CAPITOL
JUNEAU 99801

April 10, 1972

The Honorable Robert H. Ziegler
Chairman
Senate Judiciary Committee
Alaska State Legislature
Juneau, Alaska

Re: SB 387

Dear Chairman Ziegler:

In reviewing SB 387, "An Act protecting the constitutional right of privacy of those individuals concerning whom records are maintained by governmental agencies," several possible problems have come to our attention. I believe your committee should be made aware of these problems.

I. PROBLEMS RELATED TO THE SECTION ON INDIVIDUAL RECORDS.

1. The proposed new section AS 09.25.125, which would set up a regulating scheme governing the collection and exchange of information collected by all state government agencies, would regulate these activities far beyond the needs for protecting the privacy of the individual or the security of the information. The notice provisions would, in many cases, create an unnecessary administrative burden on agencies presently collecting needed information. The requirement of permission or notice, when information is disclosed, would create a like unnecessary administrative burden in many situations; in other situations it would inhibit or prevent legitimate exchange or disclosure of information by government agencies.

2. The term "record" as used in Section 09.25.125 is never defined. Consequently, under a very broad definition of this term it is possible that any employees of a state agency would have to meet the permission and notice provisions of this section whenever he released any kind of information about another individual. This could possibly prevent public officials of the state from making all kinds of public statements and would thus lead to an extremely undesirable result.

3. In Section 09.25.125(d)(1) the time period "reasonably necessary" is pc ibly too vague and might lead to unnecessary litigati .

4. It is not clear what Section 09.25.125(d)(2) really means.

5. It would be inappropriate in Section 09.25.125 (e) to require the governor to report on records and/or investigatory files which might be maintained by the legislative and judicial branches of government.

II. PROBLEMS RELATED TO THE SECTIONS ON CRIMINAL JUSTICE INFORMATION SYSTEMS.

1. Definition of Criminal Justice Information System. Nowhere in Secs. 12.62.010 through 12.62.120 is the term "criminal justice information system" defined. Without knowing just what these Sections purport to regulate, it is impossible to discuss intelligently what effects these proposed Sections will or will not have on the collections and dissemination of information by criminal justice agencies within the state.

Section 12.62.030 states that only "criminal record information" may be collected and stored in criminal justice information systems. The Section goes on to give a list of examples of the kinds of information which may be put in the system and then it states, "[t]his information is restricted to that recorded as the result of the initiation of criminal proceedings or of consequent proceedings related to the criminal proceedings." This language evidently serves to define "criminal record information," the only kind of information which may be stored in criminal justice information systems. Without a definition of just what a criminal justice information system is, however, it is not exactly clear what this Section does.

If a "criminal justice information system" comprises all the information collected by a criminal justice agency, then it would prevent the compilation of investigative reports by any police or other agency. Further, it would prevent the Department of Public Safety from compiling its file of drivers licenses, fishing licenses and so forth.

If "criminal justice information system" means any data bank compiled by a criminal justice agency so that information from it can be recovered by an electronic computer it will preclude the inclusion in one system or the establishment of separate systems fo drivers license information, fishing license information and so forth. Further, it would prohibit the establishment of a computer management information system by any of these agencies.

For the purposes of this bill, one further possible interpretation of "criminal justice information system" would simply be to allow the criminal justice agencies themselves to designate that portion of their total records which comprise their "criminal justice information system". They would then be required to keep this information in a separate manual or electronic file, but this portion of the act would not regulate the collection, dissemination, and storage of other information if it were kept separately from the so-called "criminal justice information system."

Without some definition of "criminal justice information system," it is impossible for us to tell what the legal effect of this bill would be.

2. Restriction on the Scope of Criminal Justice Information Systems. Even though the exact extent of the regulation of records collected by criminal justice agencies which would be imposed by this bill is completely unclear, it is quite clear that only information recorded as the result of the initiation of criminal proceedings can be collected and stored in criminal justice information systems, whatever they may be. If the bill were interpreted to allow the Department of Public Safety to continue to keep a drivers license file and a fishing license file, under the provisions of 12.62.030, these files could not be combined with so-called criminal offender record information and included in the criminal justice information system. Likewise, a management information system could not be included in a criminal justice information system.

It is true that putting too much information in one file system poses a potential threat to privacy and freedom even if all the information collected is a matter of public record. Likewise, it is, of course, more efficient not to have to maintain too many separate filing systems. Privacy and freedom should not be sacrificed at the expense of efficiency. However, in this instance we do not see how the inclusion of this information poses a threat to privacy and freedom. The added expense of having to maintain two or three separate electronic filing systems is unjustified.

I would like to emphasize, however, that the basic notion that adequate safeguards be established to keep information out of any electronic file system used by criminal justice agencies which would pose a threat to privacy and freedom is sound. However, the restrictions imposed by this bill go beyond what is needed for adequate protection, and they impose unneeded inefficiencies.

The restrictions to which we are objecting here are imposed both by Section 12.62.020 and Section 12.62.090.

3. Provision Relating to Legislative Review of Regulations. Section 12.62.020 provides that regulations adopted pursuant to this proposed chapter between now and the first day of the next legislature will be in effect until March 15, 1973. If they have not been acted upon by the legislature by that date, "the regulations are of no effect." Regulations adopted after the first day of the next legislature are apparently of no effect until they have been acted upon by the legislature.

First, these proposed provisions for legislative review could possibly leave us with a totally unregulated system if no action is taken by March 15, 1973. The provision would not suspend the operation of criminal justice information systems on March 15, 1973; it would simply suspend the regulation of them.

Second, the provision is somewhat unclear as to when regulations adopted after the first day of the next legislature would take effect. Since they are subject to "approval, rejection, or amendment," I presume they would not take effect until the legislature acted upon them. This would leave the commission almost no flexibility in regulating criminal justice information systems. While this might possibly prevent changes in regulations which would pose a threat to privacy in the eyes of the legislature, it would also prevent the commission from taking immediate action where protection might be needed.

Third, this Section does not follow the procedure set out in Section 44.62.320 which is the usual method of legislative review of administrative regulation. We believe that the procedure set out in Section 44.62.320 is the procedure which should be established here for possible legislative action on administrative regulations adopted pursuant to this chapter.

4. Warrant Provisions of Section 12.62.030(f). This Section provides that information can be retrieved from the system by asking certain kinds of questions of the system only after a warrant has first been obtained from a judicial officer. The judicial officer must determine that

> probable cause has been shown that (1) access is imperative for purposes of the criminal justice agency's investigational or other responsibilities, and (2) the information sought to be obtained is not reasonably available from any other source or through any other method.

Generally, the standard of "probable cause" is not applied to these particular kinds of findings. Certainly there are some " probable cause" findings which might well be required before such a warrant were issued, but I do not believe this standard makes very much sense when it is applied to the two required

findings set out in this section. I realize that this provision of the bill was taken directly from the bill prepared for the Project SEARCH (System for Electronic Analysis and Retrieval of Criminal Histories) Committee on Security and Privacy; however, I still believe it is an incorrect use of this standard.

5. Dedication Requirements of Section 12.62.070(a). This requires that all components of the system be dedicated to the criminal justice information system and that no components be used for any other purpose. This is unnecessary because adequate and equivalent safeguards can be provided without requiring the total dedication.

6. Purging Provisions of Section 12.62.090. Although it is evident that the legislature may wish to require the purging of information relating to an individual from the system where there has been no conviction, there are two matters relating to this section which I hope will be carefully considered. First, no purging is required of information for persons who have one or more convictions; the purging requirement applies only to persons with no record at all. Second, it is not clear whether or not a purging is required if a person is convicted of some different or lesser charge and not on the basis of the original charge filed.

7. Penalties. The criminal penalties section would impose a penalty on anyone who communicates or seeks to communicate criminal offender record information except in accordance with the provisions of this proposed chapter. In the legislative findings and purpose section it is stated that the purposes of the chapter are, among others, to control and coordinate criminal offender record keeping within the state. The chapter purports to do this by regulating the flow of "criminal offender record information," a term which is never exactly defined, in and through "criminal justice information systems," a term which is not defined at all. Does this mean that the only way "criminal offender record information" can be communicated is via "criminal justice information systems"? Without some better definitions it is impossible to know. Further, it would seem highly undesirable to impose a severe criminal penalty for the wrongful handling of this information when the information to which this penalty applies is nowhere carefully defined.

The problems outlined in this letter are not exhaustive of those we have found in the bill. I would like to once again suggest that House Bill 563 represents a much more well thought out approach to the problems which this bill seeks to address.

Very truly yours,

JOHN E. HAVELOCK
ATTORNEY GENERAL

JEH:gb

HB-563

IN REPLY PLEASE REFER TO

UNITED STATES DEPARTMENT OF JUSTICE
LAW ENFORCEMENT ASSISTANCE ADMINISTRATION
WASHINGTON, D.C. 20530

SPECIAL CONDITIONS

Grantee (Name of SPA): Criminal Justice Planning Agency (Alaska)

Grant Number: 71A-202

In addition to the General Conditions and Conditions Applicable to Fiscal Administration to which this grant is subject, it is also conditioned upon and subject to compliance with the following special condition(s):

1. Approval of this plan does not constitute approval of planned fund allocation required for major cities and counties nor of action fund levels for areas of high crime incidence and high law enforcement activity. The statutory amendment to P.L. 90-351 set out in § 203(c) and 303 require determination by the Law Enforcement Assistance Administration in respect to these new requirements. Such determinations will be made upon submission of a Plan Supplement Document which is to be submitted by May 1, 1971. In addition, Section 301(c) of the amendments set forth new minimum State matching contribution ratios of 25% State funds to 75% Federal except for Part C - Construction programs which remain at a ratio of 50% State to 50% Federal. Matching contribution may be made at the amended level.

2. In respect to action program No. 4B of the 1971 State plan entitled Development of Criminal Justice Information System, and relevant Multi-year programs, the grantee agrees to: (a) insure that adequate provisions are made for system security, the protection of individual privacy and the insurance of the integrity and accuracy of data collection and; (b) in view of the commitment of funds to this program, will coordinate development of the program with any compatible multi-State effort to secure the benefits of exchange of data and use of standard reporting formats and definitions, to enhance the benefits and potential of its information system facilities and needed interface with National Criminal Justice Information Systems.

3. Within 30 days of receipt of grant award, grantee shall provide a complete discussion of the needs and problems of its two largest cities, Anchorage and Fairbanks, consistent with the requirements of the SPA Guide, page 48.

4. Within 60 days of receipt of grant award, grantee will submit to LEAA a schedule of implementation of the program funded for $45,900 in 1970, and which is intended to serve as the basis for 1971's organized crime program. The schedule should contain a time sequence in quarterly phases, and an approximate range of personnel, equipment, supplies or services to be acquired.

5. The level of funding for programs related to civil disorders, organized crime and juvenile delinquency, coupled with modest program support in the prior fiscal years (1969 and 1970) raises questions concerning responsiveness to the statutory requirement that plans and programs be comprehensive in scope and provide for the improvement and coordination of all aspects of law enforcement. Accordingly, plan approval is based upon the understanding that the State will (i) allocate a reasonable portion of future block grant funds for such programs out of fiscal year 1972 action funds to be made available on the basis of this approved 1971 plan and (ii) structure the multi-year component of the next submission (due December 31, 1971) to reflect a continuing reasonable allocation to these program areas, consistent with a proper analysis of the State's needs, problems and priorities.

6. In its fiscal year 1972 and future State plan submissions, the grantee will provide a detailed analysis of the State's potential in regard to the area of riots and civil disorders.

7. Special Conditions numbers 1, 2, 3 and 4 attached to Alaska'a 1971 planning grant application were concerned with the SPA staff and board composition. Until these Special Conditions have been satisfied 1971 action funds will not be released to Alaska for funding of action programs contained in this 1971 plan.

8. No funds provided under this grant may be used to pay for the establishment or operation of any agency or center unless that agency or center is established in the executive branch of the government, is under the direct supervision of the Governor and performs only those functions directly related to the development and implementation of the approved State Comprehensive Plan.

HB-563

L. Parker

MINUTES

GOVERNOR'S COMMISSION ON THE ADMINISTRATION OF JUSTICE

April 25, 1972

The sixth meeting of the Governor's Commission on the Administration of Justice was called to order by Vice Chairman John Huber on April 25, 1972 at 2 p.m. in the Governor's Conference Room, Capitol Building, Juneau, Alaska.

Commission members in attendance were:

John Havelock, Attorney General, Dept. of Law, Chairman
John Huber, State Representative, Fairbanks, Vice Chairman
John Rader, State Senator, Anchorage
Thomas Strickland, Anchorage Police Department, retired
Wallis Droz, City Manager, Fairbanks
George Charles, Bethel
Frederick P. McGinnis, Commissioner, Health & Social Services
Herbert D. Soll, Public Defender Agency, Anchorage
George Boney, Chief Justice, Alaska Supreme Court
Pat Wellington, Deputy Commissioner, Dept. of Public Safety
Gordon E. Evans, Attorney, Juneau

Also attending were:

Lt. Brad Moerlins, Planner, Anchorage Police Department
Off. Jerry Prater, Planner, Fairbanks Police Department
Charles Smith, Planner, Juneau, Dept. of Public Safety
Paula Easley, Conference Secretary
Will Condon, Dept. of Law

Criminal Justice Planning Agency staff present were:

Lauris S. Parker, Executive Director
Dennis W. Lund, Corrections Specialist
Terry P. Hanson, Law Enforcement Specialist

Mr. Parker introduced others in attendance: Florence Campbell of the Dept. of Public Safety, Messrs. Broad, Crobell and Coffer of Arther Young & Company and government interns Charles Dickie, Jr., Jim Moore, Joan Hendrie and Cathy See. Gordon E. Evans, newly appointed member to the Commission, was also introduced.

APPROVAL OF MINUTES

Mr. Huber turned the chair to Mr. Havelock who asked if all members had received and read the Minutes of the February 24 meeting and if there were corrections or additions. As there were none, Mr. Droz MOVED that the Minutes be approved, and they were adopted as written. ACTION

Mr. Boney then MOVED that the Alaska Justice Information System application be approved and that AJIS not be implemented until adequate security be provided, either by legislative action or by administrative approval of this body. The motion carried. ACTION

Following passage of the motion, Mr. Wellington reminded members that the Commission could withhold funds until the security provisions were in effect. Mr. Parker added that federal funds were disbursed on a monthly drawdown basis for all projects, and that if a subgrantee failed to abide by any special provisions or restrictions to a grant award, the funds could be cancelled.

Discussion and several motions made and withdrawn referred to the desirability of a legislative statement of policy with regard to the security, information limitations and access to the system. Result of the discussion was agreement that award of the AJIS grant, subject to strict security provisions imposed by the Commission, the Committee on Security and Privacy and the Department of Public Safety, would keep administrative authority within the scope of these bodies rather than with the 60-member legislature. Mr. Moerlins reminded the Commission that the special conditions made a part of grant awards in effect became law with regard to administration of grant funds, and Mr. Parker added that all grants were administered by the planning agency in strict accordance with the Commission's directives.

DEPARTMENT OF LAW INTERN PROJECT REQUEST

The application, being considered prior to the first Commission funding session due to the time element, requested federal funds of $5,962 to cover salaries and employee benefits of three legal interns for a two and a half month period this summer. Mr. Wellington MOVED for approval of the project, and motion carried. ACTION

APPLICATION FOR DISTRICT ATTORNEY SEMINAR

Mr. Parker said the seminar was planned for May 23 and 24, 1972 and requested $3,705 from the CJPA training fund. Since funds were not available from that source, $2,400 could be transferred from 1971 excess funds from Department of Law projects if the Commission wished. Mr. Boney MOVED for approval of the project in the amount of available funds and that the money be transferred from the Department of Law's closed projects. The motion carried. ACTION

HB-611

Summary Of Proposed Recodification Of Federal Credit Union Act

As Approved by The CUNA International Executive Committee
On Recommendation of the Legal and Legislative Committee

I. Corporate Powers And Activities

SUBJECT	PRESENT PROVISION	PROPOSAL	COMMENTS
Purpose of Credit Union	The Act (Sec. 1752) defines a "Federal Credit Union" as a cooperative association organized in accordance with the provisions of the Act for the purpose of promoting thrift among its members and creating a source of credit for provident or productive purposes.	To incorporate the definition of a credit union of CUNA Model Credit Union Act (Sec. 1): "A credit union is a cooperative non-profit association incorporated in accordance with the provisions of this Act for the purpose of encouraging thrift among its members, creating a source of credit at a fair and reasonable rate of interest, and providing an opportunity for its members to use and control their own money in order to improve their economic and social condition."	This is a broader definition of a credit union in keeping with changes in the economy and the present and future needs of the people.
Organization Certificates	The Act (Sec. 1753) provides that any seven or more natural persons who desire to form a federal credit union shall subscribe before some officer competent to administer oaths an organization certificate in duplicate which shall specifically set forth certain information.	To allow the Organization Certificate to be signed before a witness or the signatures to be acknowledged by some official competent to acknowledge.	To simplify the procedures for organizing a federal credit union by making it more convenient for the persons signing the Organization Certificate to have their signatures authenticated.
Borrowing Power of Credit Union	The Act (Sec. 1757-8(10)) empowers credit union to borrow, in accordance with such rules and regulations as may be prescribed by the Director of Bureau, from any source, in any aggregate amount not exceeding 50% of its paid-in and unimpaired capital and surplus.	That all language be removed from the Act (or regulations) that imposes borrowing limitations on the credit union.	To better enable credit unions to meet the financial needs of members.
Discounting of Notes	The Act (Sec. 1757 (10)) authorizes federal credit unions to discount eligible paper with Federal Intermediate Credit Banks.	That the provisions limiting discounting of paper to Federal Intermediate Credit Bank be deleted from the law and an unrestricted discounting privilege be substituted.	To provide essential flexibility to credit union operations. Restricting discounting to Federal Intermediate Credit Banks is too narrow a privilege, according to Bureau.
Purchase of Assets	The Act (Sec. 1766) gives the Director of the Bureau authority to prescribe rules and regulations concerning merger, consolidation, and dissolution of federal credit unions. Federal Credit Union Rules and Regulations, August 1969, Par. 308, sets forth merger procedures.	To authorize a credit union to sell all or any part of its assets to another credit union or to purchase all or any part of the assets of another credit union; and to further provide that the purchasing credit union may assume any or all of the liabilities of the selling credit union or of the members whether or not they are members of the purchasing credit union; and requiring that the agreement between the selling and purchasing credit unions must be approved by the Administrator.	To facilitate the timely dissolution of a credit union, while conserving its assets and protecting the interests of members.
Liquidation Procedures	The Act (Sec. 1766) gives the Director of Bureau authority to prescribe rules and regulations concerning merger, consolidation, and dissolution of credit unions, and specifies certain policies and responsibilities in connection with voluntary and involuntary liquidation. Federal Credit Union Rules and Regulations, August 1969, (part 310) establishes the policy for liquidation of credit unions.	To incorporate the provisions on liquidation found in the CUNA Model Credit Union Act (Sec. 33(b) (c)), which requires approval of dissolution by majority of members at meeting or in writing, and notification of supervisory department of intent to liquidate. Further prescribes suspension procedure to be followed by department, providing for hearing before issuance of involuntary liquidation notice and appointment of liquidating agent, and right of credit union to request stay of execution by appealing to courts.	To provide a more systematic procedure on dissolution, setting forth rights and responsibilities of all parties thereto.
Donations by Credit Unions	The Act is silent, and the Bureau has ruled donations are not within incidental powers if credit union does not anticipate an immediate, direct and current pecuniary gain or donation does not forward credit union's purpose.	That the board of directors be permitted to authorize donations by the credit union to community, charitable and civic organizations.	To permit credit unions to be better integrated in civic and community affairs.
Incidental Powers	The Act (Sec. 1757) states Federal Credit Union shall have power "to exercise such incidental powers as shall be necessary or requisite to enable it to carry out effectively the business for which it is incorporated."	To authorize a federal credit union to exercise such incidental powers as shall be necessary or requisite to enable it to carry out efficiently the business for which it is organized, including such incidental powers as are generally granted to corporations.	Federal credit unions should be considered as any other corporation with respect to inherent powers.
Overseas Checking Accounts	The Act is silent.	To authorize federal credit unions operating overseas branches to open checking accounts in foreign banks which are correspondents for U. S. banks.	Authority is presently lacking for federal credit unions with overseas branches to open checking accounts in foreign banks, according to the Bureau. This would be particularly helpful to military credit unions.

SUBJECT	PRESENT PROVISION	PROPOSAL	COMMENTS
Membership Officers	The Act (Sec. 1761b) provides for the appointment of only one membership officer.	To permit the appointment of more than one membership officer at the option of the board of directors.	Some credit unions believe they could operate more efficiently with two or more membership officers.
Credit Committee — Appointment of	The Act (1761c) requires a credit committee of not less than three members be elected at the annual meeting.	That the board of directors be empowered to appoint the credit committee, with the option that the committee may be eliminated entirely and its responsibilities to approve or disapprove loans assigned to a loan officer(s).	Would assure essential flexibility. In some credit unions the credit committee is neither practical nor efficient.
Approval of Loans by	The Act (Sec. 1761c) states that no loan shall be made unless it is approved by a majority of the entire committee and by all members of the committee who are present at a meeting at which the application is considered.	That approval of loans by the credit committee be by a simple majority vote.	Present approval requirement is cumbersome and difficult to fulfill in some credit unions.
Loan Officers — Appointment of	The Act (Sec. 1761c) states: The credit committee may, by majority vote of its members, appoint one or more loan officers.	To authorize the board of directors to appoint loan officer(s) and prescribe rules under which they may perform.	To be consistent with proposed optional appointment of the credit committee.
Reports by	The Act (Sec. 1761c) states: Each loan officer shall furnish to the credit committee a record of each transaction approved or not approved by him within seven days of the date of the filing of the application or request.	To repeal the requirement that loan officers must report to the credit committee at least every seven days. Frequency of reports to be governed by rules of the directors.	Frequency of reports by loan officers should be governed by situation in individual credit union.
Insurance for Officials	The Act. (Sec. 1761a) provides compensation of officials as indicated above. The Bureau has ruled that a credit union can obtain group accident insurance to protect directors and committeemen while on official business. With this exception they may not purchase accident, health, life, or other insurance for officials because to do so would constitute compensation.	To exclude a credit union's purchase of life, accident, and health insurance for its officers, directors and committeemen from being deemed compensation within the meaning of the Act.	Allowing insurance to be provided officials on a full time basis would preclude injustice to survivors because of difficulty in interpreting "on credit union business."

IV. Savings And Deposits

Shares, Par Value	The Act (Sec. 1753) states: The par value of shares shall be $5 each.	To give the board of directors authority to establish the par value of shares in $5 multiples, not less than $5, and not more than $25.	To oblige small shareholders to adopt thrift habits consistent with current financial conditions and allow board to deal with small, inactive accounts.
Checking Accounts	The Act is silent.	To authorize credit unions to establish for members checking accounts, with reserves for such accounts to be set by the Administrator with the consent of the National Credit Union Board.	To permit a fuller range of service to members.
Deposit Accounts— Establishment of	The Act is silent.	To permit credit unions to operate deposit accounts, limited to members and treated as capital. These accounts to be subject to conditions established by the board of directors.	Would provide fuller range of service to members.
Interest Rate On	Present Act makes no provision for deposits.	That legislation be drawn to allow variable interest rates on deposits.	A variable rate of return will enable unions to provide different types of deposit accounts.
Variable Dividend Rates	The Act (Sec. 1763) states that dividends shall be paid on all paid up shares outstanding at the end of the dividend period.	To authorize variable dividend rates on shares.	To allow flexibility in classification of shares, consistent with a flexible deposit program.
Dividend Frequency	The Act (Sec. 1763) authorizes the board of directors to declare a dividend annually, semi-annually, or quarterly, as the bylaws may provide.	That the frequency for payment of dividends be removed from the Act so as to be completely at the discretion of the board of directors.	To allow credit unions to pay dividends according to custom of other institutions in its locality, and to give members greater flexibility.
Multiple Party Accounts	The Act (Sec. 1759) states: Shares may be issued in joint tenancy with right of survivorship with any persons designated by the credit union member.	To add a new multiple party account provision enabling credit unions to offer members (1) a multiple party share account with survivorship; (2) a share-deposit account of trustee for beneficiary; (3) a multiple party share-deposit account without survivorship; (4) a multiple party share-deposit account which includes one or more non-member parties.	Permits persons who have no will or who wish to avoid probate to enjoy the advantages of an account during their lifetime and to name one or more beneficiaries to receive money in account after their death. Also a member with other parties to his account need not lose control of his money since he can restrict withdrawals.

V. Loans

Interest Rates — Incidental Charges	The Act provides (Sec. 1757)(5) rates of interest not exceeding 1 percentum per month on unpaid balances, inclusive of all charges incidental to making the loan.	To remove from the Act the requirement that the interest rate be inclusive of all charges incidental to making the loan.	It is economically unsound for the credit union to make certain types of loans, such as real estate, and pay the incidental costs.
Maximum	As above.	That the interest rate shall not exceed 1% per month, unless otherwise approved by the Administrator.	A higher return on loans may be necessary, due to increased costs of operation and acquisition of capital, if credit union is to maintain full-range of services to members.
Interest Refunds — Frequency of, Rate of	The Act (Sec. 1761(b)(14)) empowers board of directors, subject to Bureau regulations, to authorize an interest refund to members of record at the close of business on the last day of any dividend period in proportion to the interest paid by them during the dividend period.	To permit the interest refund period to be other than the dividend period and to provide for variable interest refund rates.	To offer greater flexibility as to period for which interest refund is paid and to permit selectivity with respect to loans which will receive refund.

VII. Investments

SUBJECT	PRESENT PROVISION	PROPOSAL	COMMENTS
Investment in Other Credit Unions	The Act (Sec. 1757(8)(G) provides that a federal credit union shall have the power to invest its funds in shares or deposits of any central credit union in which such investments are specifically authorized by the board of directors of the federal credit union making the investment.	To authorize credit unions to deposit or purchase shares in other credit unions without limitations -- further that anything in the Act in conflict with this proposal be eliminated.	Provide greater liquidity within the credit union movement and to allow credit unions to invest fully in other credit unions.
Loans to Other Credit Unions	The Act (Sec. 1757(8) provides that loans may be made up to 25% of the unimpaired capital and surplus of the lending credit union.	To delete from the Act the limitation that loans to other credit unions in the aggregate may not exceed 25% of the lending credit union's paid-in and unimpaired capital and surplus.	Provide greater liquidity within the credit union movement.
Investment in Service Corporations	The Act (Sec. 1757(8) provides for investment in government securities, in insured financial institutions, and in central credit unions.	In addition to existing privileges, to permit funds not used in loans to members to be invested in capital shares, obligations, or preferred stock issues of any agency or association organized either as a stock company, mutual association or membership corporation, provided the membership or stockholdings, as the case may be, of such agency or association are confined or restricted to credit unions or organizations of credit unions and provided the purposes for which such agency or association is organized are designed to service or otherwise assist credit union operations.	To provide necessary financing for organization furnishing essential services to credit unions and/or credit union members, such as a data processing facility, mutual fund etc.
Investment in Cooperative Societies	The Act is silent	To empower federal credit unions to invest in cooperative societies, as provided in the CUNA Model Credit Union Act: "Funds not used in loans to members may be invested in shares of a cooperative society organized under local or national cooperative laws in the total amount not exceeding 10% of the shares, deposits, and surplus of the credit union." (Sec. 23(4))	To allow investment in mutual self-help organizations which may be of benefit to credit union members.
Loans to Credit Union Associations	The Act is silent Bylaws (Art. XII) — Loans may be made only to members (individuals) or to a member other than a natural person in amounts not in excess of shareholdings in the credit union extending the loan.	To authorize credit unions to make loans, in aggregate not exceeding 1 percent of the capital of the credit union to any credit union association of which the credit union is a member. Such loans may be made on secured or unsecured basis with interest and with such maturity, deeds and conditions as the board of directors shall authorize.	To strengthen the ability of credit union associations to finance programs and activities of benefit to credit unions and their members.
Investment in Corporate Securities	The Act (Sec. 1757) does not include authority for investment in corporate securities.	To authorize credit unions to invest up to 5% of their shares in any corporate stock or bond which appears on a list approved by the Administrator annually or quarterly. The Administrator should prepare and maintain a list of not less than 30 corporations.	To permit diversification of credit unions investment portfolio similar to practice of other financial institutions, with necessary supervisory safeguards.

VIII. Reserves And Liquidity

Reserves	The Act (Sec. 1782) provides for transfer of 20% of net earnings to regular reserves until 10% of total shares attained.	That the regular reserve be based on risk assets and that the formula for transfer to the reserve be at the rate of 10% of gross income until such time as the reserve fund reaches 5% of risk assets; that it then be decreased to 7% of gross income until such time as the reserve fund reaches 6% of risk assets and then be decreased to 5% of gross income until the reserve fund attains a maximum of 7% of risk assets. Subsequent transfers required only to maintain 7% maximum.	Reserves should be related to basic risk assets such as loans outstanding, according to independent studies by the Bureau of Federal Credit Unions and CUNA International. A transfer to reserves based on gross income would accelerate reserve accumulation in high-expense credit unions which often have greater need for reserves. A declining formula for transfer to reserves would give relief to the older and better established credit unions with ample reserves already accumulated.
Central Bank System for Credit Unions	The Act is silent.	That the staff report on a Central Bank System for credit unions be forwarded to the CUNA Districts without recommendation, but with a memorandum setting forth the pros and cons of the proposals.	The Recodification Committee did not have sufficient time before the CUNA District Meetings to fully and adequately evaluate the tentative proposal on a Central Bank System.
Authority for Federal Centrals	The Act is silent.	To authorize federal centrals to operate with the same powers as are accorded state-chartered central credit unions.	No special authority exists in the Act for the operation of federal central credit unions, according to the Bureau. It would strengthen the dual chartering system if federal centrals were empowered to operate in the same way that state-chartered centrals operate.

PERMANENT CRIMINAL RECORDS

A bill to expunge certain criminal records has failed to pass the Maryland assembly by a relatively narrow margin. Its detractors claimed that it would allow those with a criminal past to lie to prospective employers. The short answer to this is that employers should not be asking such questions in the first place. Proper employment information would still be available from previous employers or other references and such information is far more pertinent than data pertaining to an arrest or a chance encounter with the law.

In cases of arrests that are made solely on the initiative of individual police officers, where no grand-jury indictment or preliminary hearing has produced a dispassionate determination of probable guilt, all records of the arrest should be destroyed immediately upon the acquittal of the defendant or upon the failure of evidence against him. In other cases, the records should be expunged completely after an appropriate passage of time. Permanent records of this sort handicap people for the rest of their lives.

I, for one, hope the Maryland bill will be reintroduced before a more enlightened assembly and that this time it will be enacted.

Frank Matthews
Bladensburg, Maryland

THE COST OF ONE ARREST

The following excerpts from a *Washington Post* editorial have my complete endorsement:

> Judge Gerhard A. Gesell struck a blow for humanism as well as for simple justice when he ruled recently that the FBI must put an end to its indiscriminate dissemination of individual arrest records. These may still be made available to agencies of the Federal Government and for genuine law-enforcement purposes outside the Federal Government. But the past practice of letting banks, private employers and others have easy access to them must be discontinued, the judge said, in the interest of fairness and decency. Careless use of these records, he said, "may easily inhibit freedom to speak, to work and to move about in this land." . . .
>
> If a man is arrested and subsequently adjudged wholly innocent of the offense for which the arrest was made, surely his record ought to be as free from blemish as if he had never been accused at all. We wish that such information could be wholly expunged from the record. And even when his past guilt or innocence has been left unresolved, it would be preferable to let him have the benefit of the doubt. Oblivion has its virtues no less than recollection. We share Judge Gesell's humane feeling that, with the development of computerization, there is "a pressing need to preserve and redefine aspects of the right of privacy to insure the basic freedoms guaranteed by this democracy."

There is much more reform needed in this area. I have seen my son's one indiscretion of high school days rise up repeatedly and destroy social and employment opportunities, nullifying years of expensive higher education. When a person hasn't committed any new offense, why shouldn't his arrest record be destroyed entirely after a certain period of time?

Washington, D. C.

LET THE VICTIMS SPEAK

I recently saw some 1970 issues of PLAYBOY and was very stirred by the debate about electro-convulsive therapy in several installments of *The Playboy Forum*. Having been through this torture myself, I agree with the ex-patients who denounced it and I completely distrust the psychiatrists who defended it; however, I am glad that you published both sides. In almost all official investigations, the victim is never allowed to talk. No ordinary woman was allowed to say anything during the Senate hearings on the oral contraceptive and when one tried to speak, she was ruled out of order; the only female testimony came from female M. D.'s, who spoke for their profession—the profession that was being investigated. Similarly, the poor never get a chance to comment on poverty programs and educational conferences do not invite dropouts to come and explain why they found the schools intolerable. And, of course, any inquiry into our mental hospitals develops into psychiatrists investigating psychiatrists and state officials checking other state officials; what the patients have to ... irrelevant and immaterial.

The only way to learn the truth ... any social problem is to let the vi... speak in reply to their exploiters.

Dear Bill:

This is a followup to my letter of February 29th regarding the proposed Bill to protect underground utilities. Upon reviewing my file, I was concerned that I might have sent you an incomplete draft of the Bill. Enclosed please find the final draft of the proposed Bill. I would appreciate it if you would insure that the Bill that is introduced includes "natural gas" under the list of definitions under the subsection "Utility operator". Also, the Bill should include a second section which makes the Act effective immediately upon its passage and approval.

Paul Robison is in Juneau this week and can assist you if you have any questions regarding the legislation. In addition, I would appreciate it if you could telephone me later this week and advise me whether you anticipate this Bill can be passed during this session of the Legislature.

Very truly yours,

Leroy J. Barker

HB-787

February 16, 1972

Representative William J Moran
Pouch V State Capitol
JUNEAU, Alaska 99801

Dear Bill:

Paul suggested that I forward the enclosed copy of a proposed statute which we anticipate asking you to submit to the legislature next week.

We had a meeting this week of representatives of all the underground utilities here in the Anchorage area. The proposed ordinance was presented for comment and consideration. As soon as the utilities involved have had an opportunity to review the statute and make appropriate comment, we will be submitting it to you with a request that it be introduced in the legislature with the hope that it will be passed this year.

Yours very truly,

ROBISON, McCASKEY, STRACHAN
& HOGE

PROPOSED STATUTE

Section 1. Purpose.

The purpose of this Act is to protect workmen and others in the immediate vicinity from death or injury which may result from the destruction of, or damage to, underground utility lines. It is also the purpose of this Act to provide for the well being of the community by preventing the interruption of essential services resulting from the destruction of, or damage to, underground utility lines.

Section 2. Strict Liability for Damage to Underground Utilities by Excavation. (a) Any person, who while excavating, damages any underground utility line is liable, without regard to negligence, for three times the actual damages to the utility operator of the utility line, unless the person has requested a locate by the utility operator and the locate has not been provided by the utility operator within four normal business hours after it received the request, or where the locate by the utility operator is inaccurate and that inaccuracy is the proximate cause of the damage.

(b) In addition to the damages provided for above, a person who damages any underground line is liable, without regard to negligence, for a civil penalty in the sum of $500.00 for each incident. The sums so recovered are payable to the State of Alaska unless the utility operator is a Borough established under Title Seven or a Municipal Corporation as established under Title Twenty-nine. In the latter event the civil penalties shall be payable to the utility operator.

(c) Any action brought under section (a) may include a claim for the civil penalty even though the party bringing the action is not a Borough or a Municipal Corporation.

Section 3. Actions to be brought in two years.

No actions may be brought under any of the provisions of this Act unless commenced within two years after the date the damage to the line occurs.

Section 4. Remedies not exclusive.

Remedies provided for under this Act are not exclusive and utility operators shall retain any remedies otherwise allowed by statute or common law.

Section 5. Definitions.

As used in this Act

"excavate" means the movement or removal of earth or blasting, and includes augering, back-filling, digging, ditching, drilling, grading, plowing-in, pulling-in, ripping, scraping, trenching, and tunnelling;

"person" includes a corporation, company, partnership, firm, association, organization, business trust, society, a Borough established under Title Seven, a Municipal Corporation as established under Title Twenty-nine, and a natural person;

"utility line" means any conduit or related facilities, including pipe or cable by which a utility operator furnishes service; and

"utility operator" means a person who furnishes any of the following services by means of a utility line:

(1) petroleum product,

(2) electricity,

(3) sewer,

(4) communications, or

(5) water.

Mr. William J. Moran
Pouch V
State Capitol
Juneau, Alaska 99801

Dear Mr. Moran:

In the past month several meetings were held by representatives of the various utilities in the Anchorage area to discuss a possible solution to "dig-ins" of buried facilities. During the course of these meetings, the possible use of legislation as a means of control was discussed.

As a result of these meetings, a proposed legislative bill was formulated and set to paper by the Anchorage City Attorney. I understand that there will be a letter forthcoming requesting that you introduce such bill. A copy of the aforementioned is enclosed for your review and comments.

In addition to the bill, an "Agreement" among the various utilities was also discussed. Enclosed is a copy of this proposed agreement. Your timely comments on this would also be appreciated.

Very truly yours,

James D. Bumgardner

AGREEMENT

THIS AGREEMENT, made and entered into by and between the CITY OF ANCHORAGE, a municipal corporation, the GREATER ANCHORAGE AREA BOROUGH, a municipal corporation, CHUGACH ELECTRIC ASSOCIATION, CENTRAL ALASKA UTILITIES, INC., and ALASKA INTERSTATE, d/b/a ANCHORAGE NATURAL GAS:

WHEREAS the parties to this contract experience a common hardship as a result of destruction of facilities by construction contractors; and

WHEREAS the interruption of service as a result of facility damage creates hazardous conditions, causes public inconvenience and requires the utilities to employ crews on repair work that could otherwise be utilized for installations or other work designed to provide benefits to residents requiring service, and,

WHEREAS it appears that the primary causes for the damage to facilities is economic in that money is saved by tearing out buried facilities rather than waiting for a locate service or utilizing small equipment to expose the facilities; and,

WHEREAS the parties contemplate a reciprocal agreement providing for withholding of contract payments sufficient to cover all costs of facility damages to another utility will provide an incentive to request locate service and to avoid damage,

NOW, THEREFORE, in consideration of the mutual covenants, stipulations and agreements herein contained, the parties agree as follows:

1. Each party to this agreement will include, in each and

ANCHORAGE
CITY ATTORNEY
BOX 400
ANCHORAGE, ALASKA
272-8522 EXT. 325

every contract calling for the construction or installation of utility facilities or other excavation the following clause:

> Upon receipt of written notification from any of the public utilities listed in this paragraph that Contractor has caused damage to any facility, equipment or installation of that utility and that Contractor failed to request a locate service at least four (4) business hours prior to the damage, or if the locate service was properly requested, that the damage was not proximately caused by an error in the locate service, *_____
>
> will withhold from forthcoming contract payments, including advances, an amount sufficient to cover the damage. The amount sufficient to cover the damage shall be designated by the utility providing notification of damage and shall include the total cost of repair, including overhead and a minimum of three hundred dollars ($300) to cover costs and attorney's fees. The public utilities that may provide notice of utility damage under this paragraph are:
>
> Anchorage Natural Gas
> Anchorage Telephone Utility
> Anchorage Water Utility
> Central Alaska Utilities
> Chugach Electric Association
> Greater Anchorage Area Borough Sewer Utility
> Municipal Light and Power Utility
>
> Upon receipt of a release of claim by the notifying utility or the judgment of a court having jurisdiction establishing that Contractor is liable for a lesser amount or is not liable for the damage, *_____
>
> _____

ANCHORAGE
CITY ATTORNEY
BOX 400
ANCHORAGE, ALASKA
272-5522 EXT. 325

will release the excess funds to Contractor. Funds withheld pursuant to this provision shall not bear interest.

Upon receipt of satisfactory evidence establishing that the utility giving notice of damage failed to commence an action against the Contractor in a court of competent jurisdiction within ninety (90) days after discovery of the damage, *_____

_____

shall release the funds withheld pursuant to this provision.

2. The parties agree that a utility giving notice of damage and requesting that funds be withheld under this agreement will indemnify, hold and save the withholding utility or utilities harmless from liability of any nature or kind, including costs and expenses, for or on account of any suits or damages resulting from withholding funds pursuant to this contract.

3. This contract shall remain in full force and effect for a period of one (1) year from the date of execution. Any party may terminate his rights and liabilities under this agreement by serving notice on all other parties, at least ten (10) days prior to the effective date of termination. Termination by a party shall not extinguish any accrued liability.

4. Notices under this agreement shall be addressed to the utility manager, or, in the case of the City of Anchorage, Department of Public Works, to the Director of Public Works, at the appropriate business address.

IN WITNESS WHEREOF, the parties have executed this

A BILL

For an Act entitled: "An Act relating to liability for damage to underground utilities."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 18.60 is amended by adding new sections to read:

ARTICLE VII. DAMAGE TO UNDERGROUND FACILITIES OF A UTILITY

Sec. 18.60.700 PURPOSE. This Act is intended to protect workmen and others from death or injury which may result from damage to underground utility facilities, and to provide for the safety and well being of the general public by deterring the interruption of essential services resulting from damage to the facilities.

Sec. 18.60.710 STRICT LIABILITY FOR DAMAGE TO UNDERGROUND UTILITIES. (a) A person who, while excavating, damages an underground utility facility is liable to the utility operator for three times the actual damages unless the person has requested the utility operator to locate its facilities in a designated area and the locate has not been provided as pursuant to secs. 710-750 of this chapter or the locate provided is inaccurate and that inaccuracy is the proximate cause of the damage. Damages provided by

this section shall be awarded without regard to negligence.

(b) A utility operator shall, within four regular business hours after receipt of a request for locate service, commence to locate the utilities in the designated area and shall complete the service within a reasonable time. If the request for locate service encompasses excavation work in an area which will require more than one day to complete, the person requesting the locate shall provide the utility with a schedule of the excavating work for which location service is to be provided.

Sec. 18.60.720 CIVIL PENALTY A person who damages an underground facility under conditions creating liability for treble damages under sec. 710 of this chapter shall, in addition, be liable to the State of Alaska for a civil penalty in the sum of $500 for each incident. An action for the civil penalty may be commenced by the Attorney General, or the penalty may be awarded to the State in an action commenced under sec. 710, even though the State is unrepresented in the proceeding.

Sec. 18.60.730 ACTIONS TO BE BROUGHT IN TWO YEARS No action may be brought under secs. 710 or 720 of this chapter unless commenced within two years after the date of damage to the utility facility.

Sec. 18.60.740 REMEDIES NOT EXCLUSIVE. The provisions of secs. 710-750 of this chapter shall not be construed as abolishing or diminishing any other claim or remedy otherwise available to a utility operator, except that an award of treble damages under sec. 710 shall extinguish a claim for damages based on negligence.

Sec. 18.60.750 DEFINITIONS As used in secs. 700-750 of this chapter

(1) "excavate" means the movement or removal of earth and includes, but is not limited to, blasting, augering, back-filling, digging, ditching, drilling, staking, grading, plowing-in, pulling-in, ripping, scraping, trenching, and tunnelling;

(2) "inaccurate" means a locate that is not within 24 inches horizontally, or, when required, 12 inches vertically, of the centerline of the facility provided by the utility;

(3) "locate" means a field marking on the surface by paint, dye, stakes or any other marking clearly visible at the time of placement which designates the horizontal course or location of a utility facility. When pipes, cables or tiles are being located, the locate shall signify the centerline of the pipe or tile and the utility shall specify the dimensions of the facility. When the excavation is for the

purpose of street or highway improvement that requires a change in grade in excess of 12 inches, the locate shall include a designation of the vertical depth of the facility, which may be shown by plans, exposure of facilities, or other suitable means.

(4) "person" means a corporation, company, partnership, firm, association, organization, business trust, society, borough, municipal corporation or natural person;

(5) "utility operator" means a person who furnishes any of the following services to a customer or customers by means of a conduit, pipe, tile, wire, cable or line:

(a) petroleum products

(b) electricity

(c) sewer

(d) communications

(e) water

One-House Legislature Advocated by Unruh

by Jess Unruh*

THE heavy double doors are locked and barred. A burly sergeant-at-arms gently, but with authority, refuses entrance to everyone. Even senators and assemblymen cannot pass. Occasionally the doors will be opened by the sergeant and through the cigar smoke a quick look will reveal six men. Shirtsleeved, ties loosened, they reflect the same harmless goodwill you can see four nights a week in any of a dozen rooms in the Senator Hotel when a poker or blackjack game is in progress.

But there is nothing harmless about the meeting going on behind the barred doors. And the stakes are far higher than the crisp hundred dollar bills that change hands between lobbyist and legislator in friendly poker games.

Before the six men come out of the walnut-panelled room they will have passed judgment on life and death matters for many of California's 20 million residents and will have spent nearly 7 billion tax dollars collected from the citizenry.

There are no rules—except those decided on by the conferees. No reporter is inside the room to report the proceedings. There is no requirement that the report on their deliberations be rendered by a certain time. And there will in all likelihood be very little time for other legislators or the public to do more than skim the document which will finally be produced.

All of the work laboriously put into a budget bill for nine months by thousands of civil servants, administrators and legislators means absolutely nothing if it does not meet the approval of the six tribunes in that room.

This is a free conference of the California legislature. Scary, you say? Should be changed and cleaned up? The press ought to be allowed in? Perhaps. But, before condemning the six legislators and the institutions they represent, let's take another look.

The three senators and three assemblymen who will spend over a billion dollars each are doing what comes naturally in today's legislature. They are reconciling the differences between the decisions made in each of the two houses. It is a process which has been going on for decades in 49 states and will continue as long as the two-house or bicameral legislature exists.

State legislatures under the bicameral system are costly and inefficient

* Jess Unruh is former speaker of the California Assembly.

anachronisms which thwart the popular will, cater to private interests, and hobble responsible decision making, until they are no longer responsive to the needs of the people they are supposed to serve.

This lack of accountability to the people is not a problem unique to our state legislatures, but is permeating every level of our government. We see it at work in our monolithic bureaucratic agencies which have almost become governments unto themselves; we see it in our costly and iniquitous system of justice; we see it in the wasted education of our youth. And we feel it in the growing hostility and frustration of a large number of our citizens. Indeed, it may be that this frustration is the only thing that will "bring us together."

If we look at the militant student protesting the Vietnam war or irrelevance in his classroom, and at the middle-income suburbanite venting his ire on local school bond requests, we see they have at least one thing in common: They are both enraged at the inability of government to deal effectively with what they see as the principal problems that confront them.

In response to these growing complaints, some attempts are being made at governmental reform. President Nixon and others are now talking seriously about reforming the federal executive and bringing the states into parity with the federal government through revenue sharing and block grants.

I predict that their efforts will have little effect on improving the quality and responsiveness of state government unless state institutions themselves are drastically revised. And basic to that restructuring is the overhauling of that institution which will have to pass upon the revision of every other state agency—the state legislature.

The most far-reaching reform, the most drastic step we could take toward making our state governments more responsive, more honest, more efficient and more economical is the introduction of the unicameral or one-house legislature.

No matter how much we concern ourselves with upgrading the legislative process, we will fail unless unicameralism is made central to the present efforts to reform and modernize state legislatures. I believe in increased salaries, better facilities and professional staff. But they are not enough. These reforms in themselves only make a more efficient horse and buggy. The bicameral legislature still remains almost hopelessly outmoded, only perpetuated by tradition and special interests.

Even the original rationale for the two-house legislature, to guarantee some representation of people as well as of property, has been removed by recent Supreme Court decisions guaranteeing equal representation. Under the one man, one vote rulings first enunciated in *Baker* v. *Carr*, representa-

tion of people has finally become paramount over the representation of geographic areas.

I suggest that, from now on, honest, accurate reapportionment will invariably make the houses carbon copies of each other insofar as their constituent makeups are concerned. The degree to which the houses actually do differ will become a measure by which reapportionment has been unfair or dishonest.

If efficiency and representativeness stand to gain under unicameralism, the special interest groups which now dominate our bicameral legislative process stand to lose a great deal.

Consider just one special interest—the liquor industry. In California the wholesale liquor distributors have succeeded in building into our laws protective measures such as state-guaranteed collection of accounts from retailers. To kill any reform legislation dealing with the liquor industry and preserve this economic sanctuary, all the liquor lobbyists have to do is woo and win a majority of *one* committee in *either* house of the state legislature. This may mean only three men. Elimination of bicameralism would increase the possibility of repealing this grossly unfair legislation.

Almost every state has its privileged industries or groups which thrive under the protection that unwieldy, unresponsive legislatures afford them. The power of these groups over the government should be curbed, but cannot be as long as the many obstacles to reform are compounded by a bicameral legislature. It is clear that basic reform cannot happen in state legislatures which were designed to afford maximum protection to those who need it least.

If the clandestine "poker game" of the free conference and the "legislative black jack" of special interests now witnessed under our bicameral system do not offer reason enough to consider unicameralism, let us look at the problems from a point of reference we can all understand—in terms of money and economy.

Today there is a renewed interest in making legislatures equal partners in the governmental process. And, as we have indicated, there is probably no more important step to be taken in making our federal system work better. To upgrade legislatures is, however, an expensive proposition. For many years legislative budgets have been neglected. Most legislatures are still woefully underpaid, understaffed and lacking in such basic necessities as office space, clerical help and even telephone allowance. Some legislatures will have to build expensive new buildings to house a significantly enlarged staff. Taxpayers are not likely to look with favor on the drastic increases in spending that will be necessary to achieve these reforms under the present, inefficient bicameral system.

But most legislatures, particularly those in the larger states, could give themselves the tools necessary for proper decision making *without* significant budgetary increase by eliminating one house. Not only would this greatly decrease the number of legislators, offices, telephones and secretaries that must be paid for directly, it would also permit a reduction in staff and spending by those public and private agencies which must deal with the legislature.

To illustrate, let's use again the annual state budget and follow its tortuous course through the California legislature, a body universally conceded to be the best in the nation. The budget is introduced in the same form in *both* houses. It is then sent to the finance committee of each house. There it consumes most of the time of 25 to 30 percent of the members of each house for from four to five months, sometimes more. It also consumes the bulk of the time of the highest-paid Assembly and Senate staff employees.

But, this is only the visible and expected part of the iceberg. It also draws the major part of the staff time of the top people in the governor's Department of Finance—scurrying back and forth between the Assembly Ways and Means Committee and the Senate Finance Committee. Each executive department whose budget is being scrutinized also sends representatives to these two committees and their many subcommittees. Lobbyists and interested citizens' groups also have to cover both houses. All of these people will be paid either directly by the taxpayers or indirectly by the tax write-off.

But all this is really shadowboxing because, as we have seen, the budget is finally written by three senators and three assemblymen in a free conference committee, and the product of their labors and decisions may bear little relationship to the budget passed by either house.

The days (sometimes weeks) of labor that these six members contribute again require the attendance of top staff people of the Legislative Analyst's office and the Department of Finance.

It is just as bad with other legislation. A school finance bill must be sent first to the education committee of the house in which it was introduced, then to its finance committee, then to the floor and then, if the bill passes, the whole maddening process is repeated again in the other house. This requires representatives of executive agencies, legislative staff and affected interests to appear at every repetitive step of the way. And, again, the final bill may well be written in a so-called free conference committee of six members to resolve the disputes between the houses, or to do *whatever else* comes into their minds.

Or there can be yet another level of committee operation in this mess—the joint committee, which is almost beyond anyone's control and often costs much more than it's worth in productive output. The joint committee has

the added advantage—to everyone but the people—of allowing legislators to avoid politically difficult problems by banishing them to the limbo of a powerless joint committee. The need for these committees would be *totally eliminated* if there were a one-house legislature.

In those states, such as California, which have already done much to modernize their procedures and abilities, unicameralism should bring no less than a 40 percent reduction in the costs of the legislature and of those groups which must work directly with it. In California, about $20 million could be saved annually. The savings would be far more, if you consider future capital construction costs connected with increased staffing and legislative upgrading under the bicameral system.

But I do not suggest merely a penny-pinching approach to federalism. What I am really concerned with is responsible decision-making power at the state level. Two-house legislatures neutralize the force of the legislature in state government. Governors can, and do, arrange alignments of one house against the other over pieces of legislation and programs. This kind of whipsaw technique can ensure the defeat of legislation even though it may be supported by the majority of legislators. Also, most of the more vicious logrolling and logjamming in the legislative process comes about between the two houses.

The California State Senate Finance Committee for years has had a practice of holding all Assembly bills until the last few days of the session to keep a bargaining lever over members of the lower house. Without that excuse, the chairman of a one-house finance committee would be hard put to hold all appropriation measures until the last 10 days.

In my opinion, the committee system provides opportunity enough for governors and special interest groups to exert pressure on legislatures. When one house is pitted against the other, a serious power vacuum is created—a vacuum that outsiders are all too eager to fill. With only one house, however, the legislature would more nearly match the unified structure of the executive branch and, therefore, be a more worthy competitor.

When a smart governor plays one house against the other the public can rarely identify where the responsibility for defeat of legislation lies. The public can rarely detect the real culprit.

Let me say parenthetically that the press might do a much better and more thorough job covering the legislative process, and pinpointing responsibility, if there were, for example, only one-third as many committees functioning.

Specifically, what legislators desperately need today is visibility. Visibility promotes competence in, and attracts talent to, the legislative arena. It is also the best deterrent to corruption.

What the public needs is to be able to fix responsibility. I do not believe that we can expect the public to support state government until it can be seen who is responsible for what is happening or not happening in state government.

But consider the citizen's problem. He currently has a representative or an assemblyman and a state senator. They may well be in direct disagreement about a measure the voter is interested in. Whose word does he take as to what has happened to his interests? And who is really "representing" his point of view? Under bicameralism the assemblyman can say, "Well, we passed that bill but the Senate defeated it," or vice versa. Under unicameralism, responsibility to one's constituency cannot be so lightly evaded.

Unicameralism may also offer the best hope for our tripartite system to survive as a democratic form of government. If state legislatures are to play a significant role in twentieth-century American government, such basic kinds of reforms must be implemented, and within the very near future. If this does not occur, I doubt rather seriously that legislatures or state governments in general will be an effective instrument of the people's will. The states (and certainly state legislatures) will simply be bypassed in favor of a federal government which is no more responsive.

But, single-house legislatures will only happen if people understand how wasteful and unresponsive the two-house legislature has become.

When your legislature is in session take a close look at its operations. How much time is spent on interhouse squabbles that should be spent on policy deliberations? Are committees in one house passing out bad bills so that the other house will have to take the heat for killing them? Is the Senate stalling bills from the other house as leverage to get its own bills through? Are they creating unwieldy joint committees in an attempt to get around the problems of two houses and begetting Frankenstein's monsters as a result?

Ask yourself these questions about your legislature. Is there interhouse bill highjacking and name calling? Who speaks with authority on questions involving major legislation? Where would testimony on such legislation get the fairest hearing? Can you identify *exactly* who killed the legislation you felt to be important? Are the lobbyists playing off one house against the other so that legislation on which both houses basically agree goes down the tubes? Is the governor doing the same?

By now you can ask the rest of the questions yourself. The answers should leave you with a clearer understanding of why a lot of people in this nation have concluded that the system cannot produce answers anymore. These people are proposing solutions of their own: burn the whole country down and start over; abolish the states; drop out.

If the states are the critical link in the federal system, state government should have solutions too. If the federal system is worth saving, people at the state level are going to have to give it a lot of help. In every state constitution I have ever seen the legislative article precedes the executive. I take this to mean that the drafters believed in the importance of a strong and responsive legislature. If the constitution has to be amended to make the legislature unicameral, then the people will have to carry the ball. Few politicians can be expected to abolish their own jobs.

We are constantly told, today, that government should be more business-like in its conduct. Legislatures can be likened in the governmental structure to boards of directors in a corporate structure. No business has two boards of directors with equal power; under such a structure there could be no direct accountability to the stockholders. We should be able to expect at least as good an organization from the public corporations which spend $70 billion of our money every year. It's time we got down to business with one board of directors for our state governments.

Or we could abolish it all and let the six men in the free conference committee run the whole thing. That would at least be more efficient—and more honest—than what we have today.

One-House Legislature

Editorial Comment

The Better Way

IT IS typically "American" to make and run things better and better —with the possible single exception of the state legislature.

The state legislature is something at which to scoff. There is no less respected institution, more's the pity.

In industry, science, business and other fields of human endeavor the traditional way of doing things is not sacrosanct. The mere fact that a method is old usually makes it suspect.

It is time, and long past time, for some of the leadership that has won progress in other fields to take a hard look at state legislatures and do something about them. Our lawmaking bodies should be of a kind that will deserve respect and will attract public-spirited men and women to their service.

The evidence is overwhelming that a one-house legislature is better than the traditional two-house body.[1] The weaknesses and worse of the bicameral system are common knowledge and have been so for as long as anyone can remember. It was away back in 1915, for example, that a joint legislative committee in Nebraska commented in its report:

"1. Representative government by the people should be direct and responsible. One body can more directly represent the public will of a democratic people than two or more.

"2. Cities all over the civilized world having a larger population and more diverse interests than Nebraska are governed by one body and the tendency is to make that body smaller with more direct responsibility upon each member than hitherto.

"3. The arguments for a two-house legislature may be summarized under three heads:

"a. The need of proper representation for different orders or classes of citizens in respect to wealth, education or social position. The answer to this is that the spirit of American institutions is to abolish class distinctions in government and to diffuse education and wealth letting social position take care of itself.

"b. Another argument is that two houses are required in order that they may be a check upon each other and prevent the enactment of unwise legislation. In practice it has been found that the so-called 'check' between the two houses results in trades and absence of the real responsibility

One House for 20 Years

Nebraska's extensive experience with nonpartisan unicameral legislature indicates it's here to stay.

By JACK W. RODGERS*

NEBRASKA has completed two decades of experience with its nonpartisan unicameral legislature, an experience which includes ten regular and six special sessions. The eleventh regular session convened January 1, 1957, adjourning in June. During these twenty years nonpartisan unicameral law-making has been put to a severe test. The legislature has faced knotty problems growing out of economic recession, war, postwar adjustments and drought. It has been asked to expand services and cut taxes, oftentimes simultaneously. This is the stuff out of which the new system could have been shown to be inadequate.

What is the situation? Has the nonpartisan unicameral legislature met these challenges head-on? Has it passed "hasty and ill-considered" legislation? Are the people satisfied that it has done a commendable job? Have any attempts been made to return to the former partisan bicameral legislature?

The events of the past twenty years would appear to justify the following summary statement: The people of the state have accepted the formulation of public policy by a nonpartisan one-house legislature. While there is some opinion in favor of a return to a partisan legislature, there is little feeling that the state should revert to bicameralism. Many people, however, including members of the legislature, would like to see certain changes made within the framework of the basic system now in use.

Vigorous opponents[1] to the adoption of the 1934 constitutional amendment providing for the nonpartisan unicameral legislature called the proposal "dangerous" and "un-American." The press was almost unanimously opposed to it. Yet, since its adoption, the legislature has not been a principal issue of contention in state affairs and attempts to alter it to fit the earlier pattern have not only failed but have met with little or no popular enthusiasm.

Those who have served in the unicameral legislature, including a number who had also served in the former bicameral legislature, have been among its stoutest supporters. For example, only two bills have been introduced since 1937 proposing constitutional amendments to make the unicameral legislature partisan, one in 1951 and one in 1957. Both bills were killed in committee and aroused little discussion. No

bills have been introduced proposing amendments to return to bicameralism. Also, when a petition campaign was inaugurated in 1953 to re-establish a partisan bicameral legislature, members and former members almost to the man came to the defense of the existing system.

Since 1941 eight bills have been introduced containing five proposals to increase the term of office to four years, eight proposals to raise the salaries of the members, three to provide for annual sessions and two to enlarge the size of the single chamber. The only one to get on the ballot was a 1949 proposal to permit the legislature to fix its own salary, to extend the term to four years and to allow annual sessions to be provided by law. It was soundly defeated at the 1950 general election.

No Stand by Parties

What has been the attitude of the political parties in Nebraska toward the legislature? Surprisingly enough, especially in view of the nonpartisan feature, neither political party took a stand on the impending referendum in its 1934 platform. In its 1952, 1954 and 1956 state platforms the Republican party urged that members be elected on a partisan ballot but nothing was said about re-establishing bicameralism. The Democratic party has mentioned neither issue in any of its platforms since 1934, although its 1956 platform contained a reference to the need for "organized political responsibility" in state government. This platform also stated, however, that "the Democratic party of Nebraska recognizes in our unicameral legislature a bold and striking reform that has provided simplicity and economy in our legislative structure."

It is against this background that we turn briefly to the 1953-54 movement to return to bicameralism and partisan elections. Immediately after the adjournment of the 1953 session the state chairmen of the two parties announced formation of a bipartisan committee to sponsor a movement to re-create a partisan legislature and to consider the desirability of going back to a bicameral body. Petitions were to be circulated to put the proposition on the ballot at the 1954 general election.

The committee, in announcing its plans, said there was widespread dissatisfaction with the 1953 session, primarily because of its length, cost, number of bills introduced, total appropriations made and the number of lobbyists registered.[2] It is interesting to note that similar charges made against the 1933 session of the old bicameral legislature were part of the argument supporting adoption of the unicameral system.

An immediate rebuttal was issued by a number of persons, including several state legislators. Labeling the committee's charges as "unfair" and "ill-considered," they voiced their enthusiastic satisfaction with the present system. The announcement did serve to arouse considerable comment over the state and many persons registered approval of enlarging the present chamber. A lesser number argued for a return to partisan elections but few expressed

[2] Omaha *World-Herald*, June 19, 1953.

any interest in reestablishing bicameralism.

The bipartisan committee moved ahead slowly with its plans but finally announced it would circulate petitions to place a constitutional amendment on the 1954 ballot for establishment of a partisan bicameral legislature. By the time the petitions were ready for circulation, however, the group had only eight months in which to get 59,572 signatures so distributed as to include 5 per cent of the electors in each of two-fifths of the counties.

The Republican State Central Committee gave its "wholehearted endorsement" to the proposal but, when the campaign for signatures began to lag, reversed its action and said it would favor a petition campaign to reestablish partisanship only. The Democratic State Central Committee never came out with a definite endorsement. The bipartisan committee then decided to back this more limited proposal and again submitted petitions. This campaign fared no better. It was difficult to get people to carry the petitions, few signatures were gotten and the movement soon collapsed.

Several conclusions were obvious: First, there was no "widespread dissatisfaction" with the unicameral system itself, no popular demand for its change. The committee mistook criticism of the legislature's actions or inactions for criticism of the basic structure itself. The proponents of the petition campaign were also unable to pinpoint any particular governmental problems and show that they were the direct result of the unicameral legislature or nonpartisan elections. It was furthermore apparent that few persons outside the four Republican and four Democratic leaders who made up the committee, including other party officials and leaders, were actually behind the movement. There was no other impetus.

In May 1956, it was announced that another petition campaign would be launched, this time under the auspices of several state labor organizations. The plan was to seek to increase the size of the unicameral legislature to 85 and to raise the pay of its members. The issue was to be placed on the ballot at the 1956 election. It was reported that the sponsors felt their interests would be better represented in a larger, better salaried legislature. Nothing further was heard of this movement, however.

Procedural Changes

For several sessions feeling had been growing among many members that certain procedural changes would help cut the length of sessions and give more time for adequate discussion of the more important bills. The 1955 legislature passed a resolution directing a committee of the Legislative Council to make a study of the legislative process with these goals in mind. As a result of this study[3] several recommendations for rule changes were made to the 1957 legislature.

Included were recommendations to speed up the hearing process,

[3] Nebraska Legislative Council, *Report of the Committee on Legislative Processes*, September 1956.

change the Committee on Order and Arrangement into a true steering committee, provide a method whereby the budget bill could be given a thorough airing on the floor, purchase recording machines to reproduce committee testimony and general file debate, screen resolutions calling for Legislative Council studies and bring about a realignment of the standing committees.

The 1957 legislature proceeded immediately to adopt three of these proposed rule changes. First, it adopted the proposed committee realignment which added one new committee and reduced the size of the other committees. The result was one additional committee to hear bills, five additional committee meetings each week and the fact that no longer would the membership of the agriculture, education and public works committees have to be the same.

The study committee's recommendation that standing committees begin their hearings at 1:30 in the afternoon rather than 2:00 was also adopted, thus giving more time to hear bills and to hold the important executive sessions. These rule changes were recognition of the fact that much of the lost motion in the legislative machinery occurred at the committee stage. Since all bills are given public hearings with five days notice it is necessary to speed the process as much as possible and to budget hearing time carefully.

Concrete results are already in evidence. The legislature does not begin all-day sessions until the hearing process has been largely completed, and this year these sessions began on May 3, nearly a month earlier than in 1955. This gave the legislature more time to discuss more bills more fully on the floor than formerly.

The third rule change adopted was to provide that resolutions calling for Legislative Council studies be referred to the executive board of the council for a report prior to being acted upon by the legislature. The result of this change has been to reduce materially the number of studies assigned for report by the Legislative Council.

Summary

We return briefly to the original conclusion that the people of Nebraska have accepted completely the nonpartisan one-house legislature. The abortive attempts to alter it by petition, the favor with which it is viewed by those who have served in it, and the lack of popular criticism of the system itself all bear out this statement.

Perhaps part of this approval is based solely on a passive acceptance of prevailing political institutions, but there are other and more positive reasons.

The basic purpose of a legislative body is to reflect the prevailing political, social and economic views of the people it represents. If it does this, and if its machinery and processes are constituted in such a way as to allow these resultant decisions to be expeditiously enacted into law, then it makes little difference whether the members are called Republicans and Democrats or senators from districts 1 and 43. The Ne-

braska legislature has performed this function, even though early opponents were concerned lest the lack of party responsibility and a second chamber to check impulsive actions would lead to a distortion of public opinion.

For example, the people have long insisted on a narrow tax base and limited government spending. In 1937 and 1938 the state was advertised in *Time* magazine as "America's White Spot," undarkened with income, sales or other "extra" taxes.[4] The Nebraska Federation of County Taxpayers Leagues said that the outstanding accomplishment of the first session of the unicameral legislature was the fact that no bills were introduced providing for major new forms of taxation except the one to levy a cigarette tax which was defeated.[5]

Low Tax Burden

Succeeding sessions of the unicameral legislature have continued to reflect this conservatism in tax matters. While a cigarette tax was imposed in 1947 and a severance tax in 1955, repeated attempts to enact sales and income taxes have met with failure. Two such bills were defeated by the 1957 session. Today Nebraska is the only state in the Union which continues to rely on the general property tax for an appreciable percentage of its state revenue (about 30 per cent in 1956), and it has the lowest per capita state tax burden of all the states save one and no long-term debt.

Yet the legislature has provided those services over the years which a majority of the people have demanded. It has supported an excellent State University, has carried on an accelerated highway program and has maintained since 1935 a fairly liberal public assistance program, the latter in response to a population whose percentage of persons over 65 is greater than the national average.

The legislature since 1937 has also mirrored the disapproval of the largely rural population of a compulsory school redistricting law and the state now has more school districts than any other state. It has consistently refused to accede, furthermore, to the persistent urging of educational groups for a program of state aid to schools, believing that the greater number of people would object to the wider tax base which such a program would require.

The people of the state, in addition, favor the openness with which the legislative process is conducted. Hundreds come to Lincoln each session to attend the public hearings held on all bills and to watch proceedings in the chamber. It is an easy matter, moreover, to locate the status of any bill at any one time and to follow its course. And the people know who is responsible in cases where actions are taken of which they disapprove.

And there are checks within this unicameral system. It has already

been seen that public opinion itself is an important one.[6] The governor's veto is available but the restricted use of this check buttresses the conclusion that the legislature keeps closely attuned to public opinion. The initiative and referendum are available and have been used to correct what the people believe are errors of commission or omission on the part of the legislature.[7]

Close observers today feel there are three changes which should be given careful consideration in the near future. An enlargement of the present chamber (under the present constitutional provision it could be increased from 43 to 50) would not only widen its representativeness but would also relieve part of the heavy committee burden now shouldered by each member. The legislators' salaries ($872 per year) need to be raised too, and districts should be redrawn to reflect the population shifts which have occurred since the 1930 census (the basis for the original and present apportionment).

It is certain, however, that the unicameral principle is here to stay in Nebraska. As one who was long associated with the legislature put it, "the unicameral legislature has not fulfilled either the most optimistic hopes of its friends or the most pessimistic fears of its opponents. On the whole, however, it has given a good account of itself."[8]

---

[6] For example, a leading veteran senator was defeated for reelection in 1956 largely because he took a view on redistricting and educational problems not shared by a majority of his rural constituents.

[7] The 1949 action of the legislature in increasing the gas tax was reversed by a referendum in 1950. Also, because recent legislatures had refused to levy a ton-mile tax on heavy trucks, groups in favor of such a tax placed such a law before the people by initiative petition in 1956. It was voted down by the electorate.

Highest Score Sheet

Unicameral system lacks old abuses of railroading, last minute peak load, buck passing, trickery, patronage.

By RICHARD C. SPENCER*

ONE occasionally hears whispers that the Nebraska unicameral legislature is not all that it should be and that many Nebraskans are dissatisfied with it. Of course, no political structure is all that it should be, but the whispers seem to have originated outside Nebraska for the benefit of non-Nebraskans. It might be well to take a look at the score sheet of the Nebraska legislature compared with that of other states, especially now that the legislature has completed its eleventh regular session, 1937-1957.

Although the picture is not far different from that reported in this REVIEW in February 1950,[1] the fact is that the "unicameral"—"unicam," as Nebraskans familiarly designate it—has come to be something of a show piece for visitors from other states and from foreign, particularly Latin American, countries. Several features distinguish it from other American state legislatures, features that no one who has carefully observed or studied it can possibly deny.

The legislature obviously grapples with the vital problems of the day and does so rather promptly—though it may not deal with them as some people would like. The peak of the load in number of bills passed or rejected continues to come just after the middle of the session.

No irresponsible introduction of bills takes place late in the session through blind compliance with requests for unanimous consent. In 1955, for instance, only 25 bills were introduced after the twentieth day deadline. Six were requested by the governor and nineteen were committee bills. Railroading a late-introduced bill through has been tried and failed. This alone should put most state legislatures to shame. Proportionately, a larger number of bills per member are introduced but there is no rush at the end of the session. The simple and direct procedures are devised for, and do produce, full deliberation, including repetition of steps for review when necessary. Bills are better drafted to begin with than in most states and they end up in better technical form when passed because of the regular procedures for technical review. There is little chance for and little resort to trickery or surprise actions. The procedure is too simple and direct for that.

All bills are considered in some way and the full legislature takes complete responsibility for the dis-

position of every bill, either to pass it or to postpone it indefinitely, without leaving it to the mercy of a committee or burying it on the calendar. If a standing committee holds a bill too long, a discharge rule that actually works is occasionally used to bring it to the floor.

There is no sifting committee to draw its mesh too tight nor any other procedural device of selection that can be exploited to prevent the representative body as a whole from debating a measure. A bill is taken up in its order of report out of committee, as listed on the daily "Work Sheet," or—a fairly recent development—it is lifted from its regular order by grant of unanimous consent. This latter practice seems somewhat untidy—perhaps could be used for surprise purposes—but it does not endanger the prospects of consideration of other measures on the calendar. It merely makes an exception to the regular order.

Suggest Steering Committee

A procedural study group has suggested the creation of a so-called "sifting" (also called "steering") committee to coordinate reference of bills to committee and their return, hearings schedules and debate calendar sequences. There is no suggestion, however, that this committee, if created, would be in position to act as executioner of unwanted measures. The whole legislature does its own sifting—sometimes awkwardly but effectively. As a result sessions have grown somewhat longer, that of 1957 being the longest, 115 days; but it disposed of 615 bills, passing 404 of them.

Bills get more complete consideration by the whole legislature in Nebraska than elsewhere. Nearly all committee work was done by April first in the 1957 session. That was scarcely after the middle of the session and the full legislature began holding afternoon (but no night) sittings as well as the regular morning sittings to consider the bills that committees had already reported and which were waiting their turn on the calendar.

Minor changes in procedure, primarily with a view to shortening the session, were considered in 1955 and 1957 but of those recommended by the Legislative Council's study committee only one was adopted. It increased from eleven to twelve the number of bill-policy committees in order to spread the work of bill consideration by cutting down on the size of most other committees. One proposal, to have departmental bills introduced by committees only, was apparently inadequately presented and therefore misunderstood. It was rejected, some members thinking it would limit their right to introduce bills of their own that might affect departments, but one observer felt that if the matter were presented again it would be adopted. It could reduce the total number of bills introduced by individual members and save some sessional time by consolidating the bill demands of various departments.

The unicameral continues to operate without any end-of-session confusion, uncertainty or rush. The end is clearly predicted fully a week in advance, with only a few bills left for disposal in the last few days. Only one bill is passed on the last day—the budget bill. Thus the gov-

ernor is not overloaded and is not, as often happens in other states, the target of dissatisfied lobbyists who hope to take advantage of his discomfiture to influence him, perhaps through his executive assistants, to veto a measure they oppose. This puts the governor's legislative work out in the open. For most bills the governor may wish to veto the legislature is still in session to reconsider them.

Simply because work is done so much in the open no devious lobby influence is effective, although lobbies are there in full force and resort to some practices, like offering free meals, that raise eyebrows. The newspapers and consequently the public can follow the operations of the unicam without difficulty. There is only one relatively small body of legislators to be watched.

Members themselves may not easily abuse their offices because they can be easily watched both from within the membership and from without. In most state legislatures members have to ignore or tolerate questionable practices on the part of some of their colleagues because it is hard for them to do anything about it. Not so in Nebraska. One Nebraska legislator apparently attempted to use his position in an unseemly manner in 1955 but his fellow legislators got suspicious. In a legislature of only one house members cannot dodge responsibility for their fellows. Unethical conduct by one, if condoned, reflects on all others. An investigation of "improper practices" was ordered and a forthright report was adopted almost unanimously. The offending member was, in full session, roundly "censured, reprimanded and condemned for improper and unethical conduct." It was a good lesson for all members and, no doubt, for the pressure interests that may have been involved.

There is no sessional legislative patronage available to individual members in the usual American pattern. Instead, the approximately 60 sessional employees are appointed by the full-time, year-in-and-year-out clerk of the legislature, himself a former senator under the earlier bicameral setup. He accepts applications transmitted by members, without the members having to favor some and disappoint others, and merely appoints those of proper qualifications.

Legislative Council's Duties

One outstanding feature is that the Legislative Council and its permanent research staff are trusted with serious investigations and difficult tasks—probably much more so than is possible in a bicameral legislature. It is trusted to do the interim work of investigation, research and bill recommendation that in many state legislatures is parcelled out in a hit-and-miss fashion among various specially appointed interim committees. Since all members of the small Nebraska legislature are now members of the Legislative Council and may be asked to serve on council committees for particular assignments as arranged by its executive committee, there is little reason for members being suspicious of the council's reports and recommendations. This permits all members of the legislature, potentially, to be active throughout the biennium but in a

well coordinated and responsible manner. The permanent research director of the council and his staff serve on all the projects.

There are no conference committees as in other legislatures to iron out the differences, serious or petty, in bills already passed by two houses. This source of obscure, irresponsible and sometimes corrupt legislative action is entirely lacking, of course, merely because there is only one house. Likewise, one house or its committees cannot wait to see what the other house and its committees will do with particular bills or parts of a "program" before taking some action itself. In the one house, it does no good to wait and thus congest the calendar. There is no "passing the buck." This is the principal reason that the unicameral legislature can complete all its work without a rush at the end of the session. It is just that simple.

Reapportionment Question

Nebraska got an equitable reapportionment for representation when the unicameral districts were laid out. Although out of line now, the disproportion between the larger cities and "out-state" is not as yet serious enough to be disturbing. No provision was made in the constitution to assure prompt and fair reapportionment. Left in the hands of the legislature itself, the job may not be done because of the strength of the over-represented "out-state" sections, unless, of course, citizens resort to a constitutional amendment by initiative petition for this purpose.

The adoption and continuance of the unicameral legislature has little or nothing to do with political views or loyalties, liberal or conservative, Democratic or Republican. The people of Nebraska are essentially conservative. Their legislature is essentially conservative. Some unicameral legislators have been identified as "status quo" members who get their principal support outside the legislature from the railroad lobby, some of the Omaha interests and the economy-minded tax groups. Others have been labelled "progressive" and are aligned with such matters as educational and welfare improvement. Others are not definitely tagged, but the "status quo" group generally is comfortably in the saddle. In this respect they are about like Americans in general, so why should they try to upset an effective unicameralism to which they have become accustomed?

Dependence is placed on the property tax. Income and sales taxes have been avoided. Appropriations have not been high, although the 1957 session, as something of an exception and only after long debate and some reversals in decisions, found it necessary to recognize the rise in the cost of state government and appropriated amounts reaching a new high, especially for the University of Nebraska. Thus far, the legislators have not been able to get the voters to increase legislative salaries, which under present constitutional limits are admittedly very low —$872 a year.

Nebraskans are interested in their legislature. They vote for its members in approximately the same numbers that they vote for members of Congress—in both primary and gen-

eral election. They write "letters to the editor" about it, usually exhibiting more feeling of personal contact with the legislature than comparable letters in other states, but the comments or complaints deal with the same subjects as elsewhere. Some are satisfied and some dissatisfied with legislative results.
