"The question is," said Humpty Dumpty, "which is to be master--that's all."

L. CARROLL, Through the Looking Glass, in THE ANNOTATED ALICE 269 (1960).

This nonsensical repartee brings sharply into focus a problem which has plagued logicians since at least the time of William of Occam. A lack of awareness of this problem has led to much mischief in legal interpretation.

evaluation and development has occurred, in an effort to achieve more advanced and just techniques for handling this serious problem.

The torrent of legal writing is so vast that it is nearly impossible for all but a few to read or comprehend everything which has been said on this basic issue of criminal responsibility. Still, certain broad outlines can be stated. There is nearly universal dissatisfaction with the M'Naghten rule on the part of scholars, jurists, and psychiatrists who have seriously inquired into the subject. The main difficulty with the M'Naghten rule is that it focuses exclusively on the cognitive element in mental life, that is, the knowledge of right and wrong or of the nature of one's act. One of its underlying assumptions is that mental illness is a failure of intellectual function. This reflects an artificial dualism of mind and emotions which ignores the affective aspects of the human personality. While there are many schools of psychiatric thought, there is broad agreement that mental illness can be understood only by looking at man as an integrated, psychobiological whole.[16/] Because the M'Naghten

16/ "Psychiatry may be defined as that branch of medicine which deals with the genesis, dynamics, manifestations and treatment of such disordered and undesirable functionings of the personality as disturb either the subjective life of the individual or his relations with other persons or with society.... Viewed a little differently, psychiatry may be regarded as the science which deals with the psychopathological aspect of human biology. The latter considers man not only as a living organism but also as a thinking, feeling and striving one." Noyes & Kolb, Modern Clinical Psychiatry (5th Ed. 1958), 1.

rule views man within the artificial strictures of cognition, courts and juries are deprived of much of the benefit to be gained from the modern science of psychiatry.[17/]

Other criticisms of the M'Naghten rule would probably be applicable to any verbal formulation.[18/] The difficulty stems from the different functions and purposes of law and psyciatry. The aim of psychiatry is to examine human behavior and mental disease in a scientific manner and to develop therapeutic methods of dealing with the emotional problems of mankind. On the other hand, it is the task of the law to develop normative rules to control human behavior. It has always been recognized that certain persons must be regarded as not the proper subjects of criminal conviction, and that because of their mental aberrations it would be unjust to hold them responsible for their conduct.[19/] Ultimately this is an ethical and social judgment and not a medical determination.

Scholars and jurists have expended great effort over the years to achieve a standard reflecting both society's need for criminal accountability and the converse demand for a rule flexible enough to cover the varieties and combinations of serious emotional and mental illness which destroy the capacity to commit a crime, in any just conception of the term.

18/ F. Allen, The Borderland of Criminal Justice (1964), 111.

19/ A. Platt & B. Diamond, "The Origins of the 'Right and Wrong' Test of Criminal Responsibility and Its Subsequent Development in the United States: An Historical Survey," 54 Calif. L. Rev. 1227 (1966). In early law the "insane" were considered homologous to children.

One great developmental breakthrough occurred with the famous decision in Durham v. United States, 214 F.2d 862 (D.C. Cir. 1954). There Judge Bazelon laid down a test under which a defendant was to be held not responsible "if his unlawful act was the product of mental disease or mental defect." 214 F.2d at 874. This was an adaptation of a rule which had previously existed solely in New Hampshire, and which had developed under the influential work of Dr. Ray. State v. Pike, 49 N.H. 399 (1870). While Durham represents a courageous attempt to state a modern standard of responsibility, certain deficiencies were encountered in its administration. For example, the use of the term "product" created difficult problems of causation.[20/] And as Judge (now Chief Justice) Burger complained, concurring in Blocker v. United States, 288 F.2d 853, 860 (D.C. Cir. 1960), the test in many cases put the legal determination in the hands of psychiatric witnesses rather than judge and jury. Finally, in Washington v. United States, 390 F.2d 444 (D.C. Cir. 1967), Judge Bazelon noted certain shortcomings of the Durham test, in that it allowed the psychiatrist to make too many legal and moral judgments which should be within the province of the jury. In substance, he appears to have acceded at least partially to the view of Judge Burger that psychiatrists should no longer be permitted to render an opinion on whether the act was a "product" of mental disease. A lengthy form of instruction was adopted to clarify the respective functions of expert

20/ Weihofen, "The Flowering of New Hampshire," 22 U. of Chi. L. Rev. 356, 360 (1955).

witness and jury.

Shortly after the Durham rule was announced, the American Law Institute promulgated a draft rule on this subject. This rule represents the collective efforts of some of the leading thinkers in this field. After nine years of research and consideration, the proposed rule was stated as follows:

> "(1) A person is not responsible for criminal conduct if at the time of such conduct as a result of mental disease or defect he lacks substantial capacity either to appreciate the wrongfulness of his conduct or to conform his conduct to the requirements of law.
>
> "(2) The terms 'mental disease or defect' do not include an abnormality manifested only by repeated criminal or otherwise anti-social conduct."
>
> A.L.I. Mod. P. Code §4.01 (final draft) (1962).

Since then this test, or some variant of it, has met with increasing judicial acceptance, particularly in the federal courts. In a luminous opinion by Judge Kaufman, the Second Circuit adopted the test in United States v. Freeman, 357 F.2d 606 (2nd Cir. 1966). Chief Judge Haynsworth adopted it for the Fourth Circuit in United States v. Chandler, 393 F.2d 920 (4th Cir. 1968) (en banc), and the Ninth Circuit has now embraced it in Wade v. United States, 426 F.2d 64 (9th Cir. March, 1970)(en banc). The M'Naghten test has now been overthrown in all but the First Circuit.[21/] These

---

21/ In addition to the above cited cases, see United States v. Currens, 290 F.2d 751 (3rd Cir. 1961); Blake v. United States, 407 F.2d 908 (5th Cir. 1969) (en banc); United States v. Smith, 404 F.2d 720 (6th Cir. 1968); United States v. Shapiro, 393 F.2d 680 (7th Cir. 1967) (en banc); Pope v. United States, 372 F.2d 710 (8th Cir. 1967) (en banc), vacated on other grounds, 392 U.S. 651 (1968); Wion v. United States, 325 F.2d 420 (10th Cir. 1963) (en banc), cert. denied, 377 U.S. 946 (1964). While not all of these cases embrace the A.L.I. test totally, they reject the

cases contain excellent disquisitions on the M'Naghten rule, its deficiencies, and the legal and psychiatric framework underlying the A.L.I. test. As Chief Judge Haynsworth said of the A.L.I. test:

> "With appropriate balance between cognition and volition, it demands an unrestricted inquiry into the whole personality of a defendant who surmounts the threshold question of doubt of his responsibility. Its verbiage is understandable by psychiatrists; it imposes no limitation upon their testimony, and yet, to a substantial extent, it avoids a diagnostic approach and leaves the jury free to make its findings in terms of a standard which society prescribes and juries may apply. [Footnotes omitted.]" United States v. Chandler, supra, at 926.

This wide acceptance of the American Law Institute test is significant. I believe that this formulation affords a workable standard, permitting realistic expert testimony about the personality and characteristics of the defendant as a whole man, but leaving to the court and jury the ultimate legal pronouncement. It avoids many of the problems encountered under the Durham rule.

No verbal formulation of this standard can achieve perfection, as there may always be doubt about the application of general terms to marginal situations. Yet the American Law Institute standard, in the view of many, does represent the best in current thinking on this subject. It is the standard

---

21/ [cont'd] M'Naghten rule and include a test whereby the effect of mental illness on one's capacity to conform his conduct to law is stressed. Judge (now Chief Justice) Burger, in his separate concurring opinion in Blocker v. United States, 288 F.2d 853 (D.C. Cir. 1960), laid great emphasis on a test which would focus on the relationship between mental illness and one's capacity to refrain from wrongdoing.

which should be employed in Alaska.[22] I regard it unfortunate that we are not taking this step today.

II

Appellant has raised the question of where the burden of proof should be placed in these cases. In Chase v. State, supra, this court adopted the rule that the burden was on the defendant to establish his insanity by a preponderance of the evidence. Approximately one-half of the states follow this rule.[23] But in the rest of the states, and in the federal

---

22/ The standard need not be frozen entirely within only one rigid form of words. In appropriate cases the testimony might require some amplification of the test in the instructions to the jury. Nor is this an occasion to consider the undue resort to diagnostic labels and conclusionary medical terms which plagued the court under the Durham rule and which the court sought to limit in Washington v. United States, 390 F.2d 444 (D.C. Cir. 1967). Hopefully, care would be taken to see that experts explain such labels and terms in language understandable to the jury.

Commonwealth, 117 S.E.2d 72 (Va. 1960); Washington, State v. Mays, 395 P.2d 758 (Wash. 1965); West Virginia, State v. McCauley, 43 S.E.2d 454 (W. Va. 1947). See 17 A.L.R.3d 146 (1968).

courts, the accused need only show some evidence of insanity. The prosecution must then prove his sanity beyond a reasonable doubt.[24/]

Those who place the burden of establishing sanity on the defendant usually argue that this accords with the presumption of sanity. Because there is a presumption, it is said that the prosecution should not be put to proving that which normally is not imposed upon it. But under the federal rule, the presumption of sanity is still employed. It is operative until some evidence is produced which adequately brings into issue the sanity of the defendant. The presumption then disappears and the mental capacity of the defendant to commit the crime becomes an essential element, to be proved beyond a reasonable

---

24/ Those states following the federal rule are: Arizona, State v. Schantz, 403 P.2d 521 (Ariz. 1965); Colorado, Castro v. People, 346 P.2d 1020 (Colo. 1959); Connecticut, State v. Joseph, 115 A. 85 (Conn. 1921); Florida, Farrell v. State, 101 So.2d 130 (Fla. 1958); Hawaii, State v. Moeller, 433 P.2d 1[illegible] (Hawaii 1967); Idaho, State v. Clokey, 364 P.2d 159 (Idaho 1961); Illinois, People v. Robinson, 174 N.E.2d 820 (Ill. 1961); Indiana, Whitaker v. State, 168 N.E.2d 212 (Ind. 1960); Kansas, State v. Penry, 368 P.2d 60 (Kan. 1962); Maryland, Jenkins v. State, 209 P.2d 616 (Md. 1965); Massachusetts, Commonwealth v. McHoul, 226 N.E.2d 556 (Mass. 1967); Michigan, People v. Eggleston, 152 N.W. 944 (Mich. 1915); Mississippi, McGarrh v. State, 148 So.2d 494 (Miss. 1963); Nebraska, Thompson v. State, 68 N.W.2d 267 (Nebr. 1955); North Dakota, State v. Barry, 92 N.W. 809 (N.D. 1902); New Hampshire, State v. Bartlett, 43 N.H. 224 (N.H. 1861); New Mexico, State v. Roy, 60 P.2d 646 (N.M. 1936); New York, People v. Kelley, 99 N.E. 2d 552 (N.Y. 1951); Oklahoma, Whisenhunt v. State, 279 P.2d 366 (Okla. 1954); South Dakota, State v. Waugh, 127 N.W.2d 429 (S.D. 1964); Tennessee, Jordan v. State, 135 S.W. 327 (Tenn. 1911); Utah, State v. Green, 40 P.2d 961 (Utah 1935); Wisconsin, State v. Esser, 115 N.W.2d 505 (Wis. 1962); Wyoming, State v. Pressler, 92 P. 806 (Wyo. 1907). The District of Columbia also follows this rule: Jones v. United States, 284 F.2d 245 (D.C. Cir. 1960). See 17 A.L.R.3d 146 (1968).

doubt, like any other.[25/]

It has been said that the burden of establishing insanity should be placed on the accused because sanity is not an element of the offense but a quality of the one who commits it. Chase v. State, supra, at 1003. But this overlooks the important consideration that once sanity is in issue it is a fact to be established like any other ultimate fact essential to culpability. The United States Supreme Court made this plain in Davis v. United States, 160 U.S. 469 (1895), when it said:

> "No man should be deprived of his life under the forms of law unless the jurors who try him are able, upon their consciences, to say that the evidence before them, by whomsoever adduced, is sufficient to show beyond a reasonable doubt the existence of every fact necessary to constitute the crime charged." (Emphasis supplied.) 160 U.S. at 493.

Realistically speaking, when sanity is an issue, it is not only a major element of the criminal proof, it may be the central factual issue in the case. For that matter, it may be the only issue. Logically, sanity is an essential element of a crime because mens rea is a necessary primary factor. If insanity exists at the time of the criminal act, mens rea fails, there is

---

25/ Fitts v. United States, 284 F.2d 108 (10th Cir. 1960). There the court said:

> "When, however, evidence of insanity is produced, from whatever source, the presumption of sanity disappears, and the mental capacity of the accused to commit the crime becomes an essential element to be proved by competent evidence beyond a reasonable doubt." 284 F.2d at 112.

This is the general rule which is followed in approximately one-half or more of the jurisdictions of the United States.

no jointure of act and intent, and under the traditional analysis no crime has been committed. As Mr. Justice Frankfurter noted, dissenting in Leland v. Oregon, 343 U.S. 790, 803 (1952):

> "Even though a person be the immediate occasion of another's death, he is not a deodand to be forfeited like a thing in the medieval law. Behind a muscular contraction resulting in another's death there must be culpability to turn homicide into murder."

Placing the burden on the prosecution has substantial advantages. First, it accords with the presumption of innocence and the thesis that the accused need not undertake to prove anything in a criminal case.[26/]

An additional advantage is that the jury is not given the confusing task of juggling two different burdens, each of which carries a different standard. This anomaly is pointed out by Professor McCormick:

> "Thus it seems inconsistent to demand as to some elements of guilt, such as an act of killing, that the jury be convinced beyond a reasonable doubt, and as to others, such as duress or capacity to know right from wrong, the jury may convict though they have such doubt. Accordingly, the recent trend both in English and American decisions is to treat these so-called matters of defense as situations wherein the accused will usually have the first burden of producing evidence in order that the issue be raised and submitted to the jury, but at the close of the evidence the jury must be told that if they have a reasonable doubt of the fact on which the justification is based they must acquit." McCormick, Evidence § 321, p. 684 (1954). (Footnote omitted.)

26/ As a practical matter the accused often must undertake to adduce proof of insanity if he is to prevail in creating a reasonable doubt on the whole evidence.

There are also important aspects of constitutional policy to be weighed in the balance. It has been held unconstitutional to shift the burden of persuasion on the defense of alibi to the accused. Stump v. Bennett, 398 F.2d 111 (8th Cir. 1968) (en banc), and cases cited therein. This may or may not represent some future trend. But when it comes to shifting burdens, there is not much difference between proof that a defendant was physically present, and not elsewhere, at the commission of a crime, and that he was "mentally present," in the sense that he was sane.

Lastly, the experience of the federal courts, in their treatment of the burden of persuasion, is of value. The federal courts have worked under the rule of Davis v. United States, supra, since 1895, and have not found it a handicap in effecting criminal justice. In my view, when sanity is in issue, the burden of persuasion should be upon the prosecution to establish the sanity of the accused beyond a reasonable doubt.

III

In fairness, to avoid surprise, the prosecution should be entitled to notice that it must adduce evidence of the defendant's sanity. Because the mental status of an accused, in terms of sanity, is usually not in issue in a criminal prosecution, it would be an unfair burden to require the state invariably to guess at whether this issue might be raised at trial, and possibly to prepare on this issue, only to have it not raised at all. Nor is it fair for defendants to wait in

ambush until trial to inject the sanity issue as a surprise tactic.

Therefore, if we were to alter our insanity rules, we should also change our procedural rules to require that at the time of plea, or within a certain number of days thereafter, one intending to raise the issue of insanity at his trial must specially plead that he was insane at the time he committed the act charged.

For the reasons given I would reverse and remand for a new trial.

STATEMENT OF COMMISSIONER FREDERICK McGINNIS
DEPARTMENT OF HEALTH AND WELFARE, STATE OF ALASKA

DEPARTMENT OF INTERIOR HEARING, 2/24/71
ON THE
TRANS-ALASKA PIPELINE

MY NAME IS FREDERICK McGINNIS. I AM THE COMMISSIONER OF THE ALASKA DEPARTMENT OF HEALTH AND WELFARE, AN ALASKAN DEPARTMENT WITH BROAD POWERS, DUTIES AND RESPONSIBILITIES FOR THE PROTECTION OF ALASKA'S ENVIRONMENT. AT THE SAME TIME, OUR DEPARTMENT IS MOST DEEPLY INVOLVED IN RESPONSIBILITIES IN HEALTH AND WELFARE NEEDS OF OUR PEOPLE.

THIS DEPARTMENT HAS REVIEWED IN CONSIDERABLE DEPTH THE ENVIRONMENTAL IMPACT STATEMENT AND CONSIDERS IT TO BE A REASONABLE EVALUATION OF PROBABLE EFFECTS OF THE PIPELINE ON THE RELATED ENVIRONMENT. THE STIPULATIONS WHICH ACCOMPANY THE IMPACT STATEMENT HAVE BEEN DEVELOPED WITH THE ACTIVE PARTICIPATION OF MEMBERS OF OUR STAFF.

I BELIEVE THAT THEY PROVIDE ADEQUATELY FOR MAXIMUM CONTROL OF POSSIBLE ENVIRONMENTAL INSULTS, BOTH DURING CONSTRUCTION AND IN OPERATION OF THE PIPELINE. THE ALASKA STATUTES AND THE ALASKA ADMINISTRATIVE CODE SPELL OUT THE AUTHORITY OF THE DEPARTMENT OF HEALTH AND WELFARE IN ENVIRONMENTAL MATTERS. COMPLIANCE WITH ALL STATE LAWS AND REGULATIONS IS REQUIRED BY GENERAL STIPULATION #9 ON PAGE 15 OF THE STIPULATIONS DOCUMENT. IT SHOULD BE UNDERSTOOD THAT THE DEPARTMENT WILL ENFORCE OUR LAWS AND REGULATIONS, NOT ONLY ON THE 120 MILES OF THE PIPELINE WHICH CROSS STATE CONTROLLED LAND BUT, THROUGHOUT THE LENGTH OF THE PROJECT.

THE RESPONSIBILITY AND RIGHT OF THE STATE OF ALASKA TO ABATE AND TO PREVENT WATER POLLUTION IS SET FORTH IN THE FEDERAL WATER POLLUTION CONTROL ACT OF 1956. ALTHOUGH THIS STATUTE HAS BEEN AMENDED MANY TIMES

SINCE ITS ORIGINAL PASSAGE, THE LEGISLATION DEFINES IN CLEAR TERMS CONGRESSIONAL INTENT TO MAKE THIS ACTIVITY A STATE RESPONSIBILITY.

OUR SERIOUS CONCERN FOR PROTECTING THE VALUABLE FISHERY IN THE VALDEZ ARM HAS RESULTED IN ONE OF THE MOST STRINGENT OIL REMOVAL REQUIREMENTS IN THE WORLD. ALTHOUGH OUR WATER QUALITY STANDARDS IMPLY A MAXIMUM OF ABOUT 15 PARTS PER MILLION OF OIL (A VISIBLE SHEEN OCCURS AT ABOUT THIS LEVEL) OUR ENGINEERS HAVE REQUIRED THE ALYESKA PIPELINE SYSTEM STAFF TO DEVELOP EQUIPMENT TO REDUCE OIL IN THE EFFLUENT FROM THE BALLAST WATER TREATMENT PLANT TO A MAXIMUM OF 10 PARTS PER MILLION. SINCE THE 1970 LEGISLATURE HAS ENACTED A LAW TO PROVIDE THAT TANKERS BRING ALL BALLAST ASHORE FOR TREATMENT, THE ALYESKA VALDEZ TERMINAL TREATMENT PLANT WILL ACTUALLY BE PROTECTING NOT ONLY THE VALDEZ ARM, BUT AREAS OFF

PRINCE WILLIAM SOUND WHERE TANKERS MIGHT HAVE BEEN EXPECTED TO DISCHARGE SURPLUS BALLAST PRIOR TO COMING INTO PORT.

THE STATE OF ALASKA IS PREPARED BY PRESENT AND PROPOSED ARRANGEMENTS TO MONITOR A PROJECT OF THIS MAGNITUDE. BOTH FROM THE STANDPOINT OF ADEQUATE LAWS AND REGULATIONS AND FROM THE STANDPOINT OF COOPERATIVE EFFORT WITH OTHER STATE AND FEDERAL AGENCIES WE HAVE DEVELOPED A STRONG PROGRAM WHICH EXHIBITS OUR COMMON CONCERN FOR ENVIRONMENTAL PROTECTION.

THROUGH A PROGRAM OF PLAN REVIEW AND PERMIT ISSUANCE, THE DEPARTMENT EXERCISES JURISDICTION OVER ALL NEW INDUSTRIAL AND MUNICIPAL SOURCES OF POLLUTION. PRELIMINARY PLANS USUALLY ARE DISCUSSED WITH OUR STAFF ENGINEERS, FINAL PLANS AND SPECIFICATIONS ARE REVIEWED FOR COMPLIANCE WITH OUR STATUTE AND CODES, AND THE COMPLETED

PROJECT IS MONITORED FOR ADHERENCE TO REQUIREMENTS SET FORTH IN A WASTE DISCHARGE PERMIT.

PRIOR TO THE GREATLY ENHANCED FEDERAL OIL POLLUTION LEGISLATION OF 1970, THE ALASKA OIL POLLUTION TASK FORCE, CONSISTING OF REPRESENTATIVES OF STATE AND FEDERAL GOVERNMENTS AS WELL AS OF INDUSTRY, PROVIDED A MECHANISM FOR DEVELOPMENT OF A CONTINGENCY PLAN, A COMMUNICATIONS NETWORK, AND FOR EVALUATION OF PLANS FOR PREVENTING AND CONTROLLING OIL POLLUTION. PARTICULAR STRESS WAS PLACED ON THE NEED FOR ALL EMPLOYEES ON DRILL RIGS AND PIPELINES TO UNDERSTAND THE ABSOLUTE NECESSITY FOR PREVENTING THE LOSS OF OIL FROM ANY SYSTEM.

AS SPILLS ARE REPORTED ANYWHERE IN ALASKA TODAY, STATE AND FEDERAL ENGINEERS AND BIOLOGISTS INVESTIGATE PROMPTLY TO ASSURE ABSOLUTE MINIMUM RESIDUAL EFFECT ON THE ENVIRONMENT. THE INDUSTRY OR AGENCY RESPONSIBLE IS

ADVISED REGARDING CLEAN-UP, AND THE INVESTIGATING OFFICER MAY ASSIST IN LOCATING ADSORBENTS AND EQUIPMENT FOR CLEAN-UP. THE ALYESKA PIPELINE CORPORATION WILL BE REQUIRED TO SHOW IN ITS PLAN SUBMITTED FOR DEPARTMENT APPROVAL THAT ADEQUATE STOCKPILES OF CLEAN-UP MATERIALS WILL BE PROVIDED ALONG THE PIPELINE AND THAT ITS EMPLOYEES HAVE BEEN TRAINED TO MAKE USE OF THESE MATERIALS AS NEEDED.

AN IMPORTANT PART OF THE DEPARTMENT EDUCATIONAL AND CONTROL PROGRAM HAS BEEN DIRECTED BY A SENIOR STAFF ENGINEER LOCATED IN FAIRBANKS. HERE, A PROGRAM IS DIRECTED TO ACQUAINT ALL OPERATORS ON THE NORTH SLOPE WITH STATUTORY AND REGULATORY REQUIREMENTS DEALING WITH WATER SUPPLY, SEWAGE DISPOSAL, FOOD SERVICE, HOUSING HYGIENE, OCCUPATIONAL HEALTH, SOLID WASTE MANAGEMENT, PEST CONTROL, AND AIR POLLUTION CONTROL. SUCCINCT PORTIONS OF

THE ADMINISTRATIVE CODE HAVE BEEN CONDENSED TO A BROCHURE OF REQUIREMENTS ENTITLED "COLD REGION ENVIRONMENTAL HEALTH PRACTICES" WHICH HAS BEEN DISTRIBUTED WIDELY. A COPY OF THIS DOCUMENT HAS BEEN SUBMITTED PREVIOUSLY FOR YOUR HEARING RECORD.

CONSIDERABLE DISCUSSION HAS ARISEN FROM OUR REQUIREMENT PROHIBITING THE BURIAL OF ORGANIC REFUSE IN PERMAFROST AREAS IN SUCH A WAY AS TO ASSURE PRESERVATION RATHER THAN BIO-DEGRADATION. SAFE DISPOSAL OF SOLID WASTES MEANS SAFETY FOR OUR CITIZENS OF 1995 WHO MIGHT BE AFFECTED BY DISEASE ORGANISMS BURIED IN 1970, AS WELL AS SAFETY FOR OUR CITIZENS OF TODAY.

THE ALASKA DEPARTMENT OF HEALTH AND WELFARE HAS LONG HAD A PROGRAM FOR CONTROLLING ENVIRONMENTAL IMPACT OF ALL ACTIVITIES, OF WHICH THE TRANS-ALASKA PIPELINE IS SIMPLY ONE EXAMPLE. THE TABLE OF CONTENTS PAGE OF

THE SANITATION AND ENGINEERING CHAPTER OF THE ALASKA ADMINISTRATIVE CODE CLOSELY RESEMBLES THE TABLE OF CONTENTS PAGE OF THE STIPULATIONS FOR THE PROPOSED TRANS-ALASKA PIPELINE. OUR ENVIRONMENTAL ENGINEERING PERSONNEL, HAVING BEEN FULLY INVOLVED IN THE DEVELOPMENT OF THE STIPULATIONS FROM THE START, ARE PREPARED TO PROVIDE THE KIND OF ENFORCEMENT OF FEDERAL AND STATE STATUTES AND REGULATIONS WHICH ALASKANS AND THE CITIZENS OF THE OTHER STATES WANT IN THIS DEVELOPMENT IN OUR STATE.

FURTHER EMPHASIS OF THE COMPREHENSIVE ENVIRONMENTAL PROGRAM I HAVE CITED HERE IS EXPECTED TO BE PROVIDED BY GOVERNOR WILLIAM EGAN'S PROPOSAL FOR A NEW DEPARTMENT OF ENVIRONMENTAL CONSERVATION. THIS NEW AND EVEN STRONGER ENFORCEMENT AGENCY WILL DEAL WITH ANY PROBLEMS RELATED TO ALASKA'S CLEAN AIR, WATER AND LAND ENVIRONMENT AT THE CABINET LEVEL WHERE FULL VISIBILITY AND

RESPONSIBILITY FOR ENVIRONMENTAL MONITORING WILL BE FIRMLY ESTABLISHED. WE IN ALASKA HAVE EVERY EXPECTATION OF CONTINUING THE TEAM APPROACH AS WE WORK TO BUILD A SELF SUFFICIENT ECONOMY WHERE INDUSTRY AND CONSERVATION ARE COMPATIBLE AND FULLY COMPLEMENTARY.

STATEMENTS BY SEVERAL SPEAKERS IN WASHINGTON, D.C. LAST WEEK INDICATED THAT A NEED FOR THE PIPELINE PROJECT HAD NOT BEEN DEMONSTRATED.

WITHOUT ATTEMPTING TO CONSIDER THE ACTUAL UNITED STATES AND WORLD NEED FOR OIL, I SHOULD LIKE TO POINT OUT SOME OF THE PUBLIC HEALTH AND SOCIO-ECONOMIC NEEDS OF THE PEOPLE OF ALASKA. WHILE THE STATE WILL NEED PIPELINE REVENUES TO HELP MEET THESE HUMAN NEEDS, I HASTEN TO REMIND YOU THAT ADEQUATE PRECAUTIONS HAVE BEEN, AND ARE BEING, TAKEN TO REVIEW PLANS FOR ENVIRONMENTAL PROTECTION AND TO MONITOR PIPELINE CONSTRUCTION AND

OPERATION. THE IMPLICATION BY SOME INDIVIDUALS THAT ALASKA IS RUSHING PELL-MELL INTO ENVIRONMENTAL DESTRUCTION IN ENCOURAGING THE PIPELINE IS NOT CONSISTENT WITH THE VAST AMOUNT OF ENVIRONMENTAL ENGINEERING PRESENTLY BEING CARRIED OUT BY THE DEPARTMENT OF HEALTH AND WELFARE WITH THE ASSISTANCE OF ENGINEERS AND SCIENTISTS OF OTHER STATE AND FEDERAL AGENCIES. OUR OWN STAFF IN THE DEPARTMENT PROBABLY HAS MORE MAN-YEARS OF ARCTIC AND SUB-ARCTIC EXPERIENCE IN THE ENVIRONMENTAL FIELD THAN ANY COMPARABLE GROUP IN THE WORLD.

THE EFFECTS OF THE PIPELINE DEVELOPMENT ON THE HEALTH NEEDS OF THE PEOPLE OF ALASKA ARE TREMENDOUS. MANY ARE DISPOSSESSED ECONOMICALLY, SOCIALLY AND HEALTHWISE. LARGE SEGMENTS OF ALASKANS REQUIRE PROTECTIVE HEALTH SERVICES AND TREATMENT SERVICES WITHOUT PRACTICAL POSSIBILITIES OF SECURING SUCH HEALTH CARE DUE TO TREMENDOUS

GAPS THAT EXIST BETWEEN HEALTH NEEDS AND HEALTH RESOURCES. HISTORICALLY, THE STATES HAVE MET HUMAN NEEDS LARGELY THROUGH RESOURCE DEVELOPMENT. ALASKA HAS NO VIABLE ALTERNATIVE TO UTILIZATION OF ITS RESOURCES TO COPE WITH ITS GREAT HUMAN NEEDS.

THE FEDERAL BUDGET FOR THE ALASKA AREA NATIVE HEALTH SERVICE, WHICH HAS INCHED AHEAD NUMERICALLY IN RECENT YEARS, HAS ACTUALLY DROPPED BEHIND DUE TO THE INCREASED COSTS OF HEALTH CARE. THIS HEALTH BUDGET HAS NOT BEEN ABLE TO KEEP PACE WITH THESE RISING COSTS. THE RESULT IS OUR PEOPLE, NATIVES AND NON-NATIVES ALIKE, ARE SUFFERING FROM DEPRIVATION INCLUDING INSUFFICIENT HOSPITAL CARE, MEDICAL CARE, DENTAL CARE, CONTROL OF COMMUNICABLE DISEASES AND PRENATAL CARE. OUR INFANTS DIE AT FAR AND AWAY A HIGHER RATE THAN COMPARABLE POPULATION GROUPS IN THE LOWER 48. THESE SHORTAGES IN CARE REPRESENT HUMAN NEEDS

AND HUMAN SUFFERING.

AT PRESENT FUNDING LEVELS, PUBLIC HEALTH AND MENTAL HEALTH PROGRAMS CANNOT CATCH UP WITH THE DEMAND FOR MORE MEDICAL CARE THAT ENABLES FAMILIES TO REMAIN TOGETHER, CHILDREN TO GROW AND LEARN NORMALLY, HEARING LOSS TO BE DISCOVERED EARLY AND DEAFNESS IN CHILDREN TO BE PREVENTED. AT PRESENT, ALASKA SUFFERS THE HIGHEST INCIDENCE OF HEARING LOSS OF ANY STATE IN THE NATION. ESTIMATED HEALTH FACILITY NEEDS ALONE, AS REPRESENTED BY HOSPITALS, NURSING HOMES AND THE LIKE, ARE RUNNING $66,000,000 SHORT. OUR PLANS TO CATCH UP WITH NEEDED HEALTH FACILITIES, PUBLIC HEALTH NURSES, HEALTH CENTERS, MENTAL HEALTH CENTERS, CONTROL OF CONTAGIOUS DISEASES AND OTHER EQUALLY SERIOUS HEALTH PROBLEMS ARE AWAITING THE AVAILABILITY OF FURTHER INCOME AND REVENUES. WITHOUT THE AVAILABILITY OF THE FINANCIAL RESOURCES MADE POSSIBLE

BY THE CONSTRUCTION OF THE PIPELINE, THE PEOPLE OF THIS STATE WILL CONTINUE TO SUFFER ILL HEALTH AND SHOW THE HIGHEST INCIDENCE OF DISEASES LONG SINCE CONTROLLED IN OTHER STATES.

THE AIM OF OUR PUBLIC WELFARE DIVISION IS TO STRENGTHEN AND MAINTAIN FAMILY LIFE. IF BY THE END OF 1975 MONEY IS NOT AVAILABLE TO FUND ADEQUATELY THE WELFARE PROGRAMS, A WHOLE VARIETY OF NEW PROBLEMS WILL DEVELOP OR THE DEGREE OF EXISTING PROBLEMS WILL BE MAGNIFIED. THE IMMEDIATE RESULT WOULD BE A SEVERE DECREASE IN THE ABILITY OF THE RECIPIENT TO OBTAIN SHELTER AND FOOD. ACCOMPANYING THESE VARIOUS NEEDS WOULD BE A DETERIORATION IN HEALTH. COUPLED WITH THE LACK OF ADEQUATE FUNDS AND THE DECREASED HEALTH, THE WHOLE PROBLEM OF DEVELOPING ANOTHER GENERATION OF DEPRIVED CHILDREN FACES THE STATE.

THE PROGRAMS AS CURRENTLY FUNDED ARE BARELY MORE .

ADEQUATE THAN THEY WERE BY 1969-1970 STANDARDS. HOWEVER, IF FUNDS NEEDED ARE NOT RECEIVED THIS YEAR IT WILL BE DISASTROUS FOR 25,000 OF OUR POPULATION WHO ARE BASICALLY UNEMPLOYED, UNEMPLOYABLE BECAUSE OF AGE, BLINDNESS, MENTAL INCAPACITIES, OR AS CHILDREN DEPRIVED OF PRENATAL SUPPORT.

THE DEPARTMENT IS NOW MEETING ONLY A PORTION OF THE POVERTY PICTURE. IN VAST AREAS POVERTY IS CONSIDERABLY GREATER THAN THAT OF OTHER STATES. IF FUNDS ARE CURTAILED, THE POVERTY PICTURE IN ALASKA WILL BE EVEN MORE DISMAL. THERE IS SUCH A DOWN-TURN IN THE ECONOMICS OF THE STATE ALREADY THAT WE HAVE BEEN FORCED TO ASK FOR AN INCREASE IN RELIEF PROGRAMS FOR THE CURRENT YEAR (FROM $14,000,000 TO $20,000,000). FOR NEXT YEAR THE INCREASE IN NEED IS FROM $20,000,000 TO $31,900,000. THE COST OF LIVING CONTINUES TO RISE, AND THE REDUCED AVAILABLE DOLLARS TO CLIENTS WOULD

PERMIT THEM TO PURCHASE EVEN LESS THAN THE SAME DOLLAR WOULD PURCHASE FOR 69-70. POVERTY IS A PRINCIPAL CAUSE OF FAMILY BREAK-DOWN. AS THE ECONOMIC SITUATION BECOMES WORSE, THE NUMBER OF RECIPIENTS IN ALL OUR PROGRAMS INCREASES MORE RAPIDLY THAN NORMAL. IF THE MONEY IS NOT FORTHCOMING, EVEN TO KEEP THE PROGRAMS AT CURRENT LEVELS, WE CAN ANTICIPATE SERIOUS ADDITIONAL SOCIAL PROBLEMS THROUGHOUT THE ENTIRE STATE.

ALASKA FINDS ITSELF IN THE UNTENABLE POSITION OF BEING CAUGHT BETWEEN FEDERAL MANDATES TO INCREASE WELFARE WITH NO EQUIVALENT INCREASE IN FEDERAL PARTICIPATION IN FUNDING. THE CONSTRUCTION OF THE PIPELINE AND THE REVENUE THEREFROM WOULD PRODUCE THE REVENUE NECESSARY TO CONTINUE PROGRAMS OF HUMAN RESOURCE DEVELOPMENT. IF THE FEDERAL GOVERNMENT DOES NOT APPROVE THE PIPELINE CONSTRUCTION ON A TIMELY BASIS WITH APPROPRIATE SAFEGUARDS,

IT WILL CONTRIBUTE DIRECTLY TO THE HUMAN SUFFERING WHICH WILL RESULT.

IT IS PARADOXICAL TO NOTE THAT IN 1969-70 WHEN OUR TOTAL WELFARE BUDGET WAS $14,710,000, 41% OF THE BUDGET WAS FEDERALLY REIMBURSED WHEREAS IN THIS TIME OF DIRECT FEDERAL CONTROL OF THE PIPELINE DECISION, THE 1971-72 BUDGET NEEDS OF $31,904,900 WILL BE ONLY 26% FEDERALLY REIMBURSED. THE FEDERAL RESPONSIBILITIES IN THE ENVIRONMENTAL CONCERNS AND DECISIONS COMES AT A TIME OF CONTINUING DECREASE IN FEDERAL PARTICIPATION TO MEET THE SOCIAL CONCERNS.

IF COSTS AND CASE LOADS CONTINUE TO INCREASE AT THE PRESENT RATE TO 1976, THE WELFARE BUDGET WILL TOTAL 75 MILLION DOLLARS. IF, BECAUSE OF LACK OF STATE INCOME, WE HOLD AT THE 1969-70 BASE, OUR ASSISTANCE GRANTS WOULD HAVE TO BE REDUCED BY 5/6. FOR EXAMPLE, A PRESENT FAMILY

OF FOUR ON THE AID TO FAMILIES WITH DEPENDENT CHILDREN CATEGORY WOULD BE REDUCED FROM $350 PER MONTH TO APPROXIMATELY $60 PER MONTH. OUR OLD AGE ASSISTANCE CASES WOULD HAVE TO BE REDUCED FROM THE PRESENT MAXIMUM OF $250 PER MONTH TO APPROXIMATELY $41 PER MONTH. OUR GENERAL RELIEF AND GENERAL RELIEF MEDICAL PROGRAMS HAVE GONE UP AT EVEN A HIGHER RATE THAN GRANTS AND CASE LOADS. IT WOULD BE IMPOSSIBLE IN 1976 TO PAY 1/10 OF THE COSTS OF MEDICAL AND HOSPITAL CARE THAT ARE CURRENTLY PAID.

AS COMMISSIONER OF THE DEPARTMENT OF HEALTH AND WELFARE I AM DEDICATED TO AND CHARGED WITH THE PROTECTION OF ALASKA'S ENVIRONMENT THROUGH THE DEVELOPMENT AND ENFORCEMENT OF SOUND CONSTRUCTION PROCEDURES. AT THE SAME TIME, IT IS MY EQUAL DUTY TO BRING TO YOUR ATTENTION THE EXAMPLES OF HUMAN PROBLEMS OUTLINED ABOVE AND THE

EFFECT OF ANY UNREASONABLE DELAY IN ALASKA'S ABILITY TO DEVELOP ITS RESOURCES BOTH NATURAL AND HUMAN.

REP. HELEN FISCHER
HOUSE OF REPRESENTATIVES
STATE OF ALASKA

SUBJECT: TRANS-ALASKA PIPELINE

DEAR HELEN:

WHILE I'VE BEEN FOLLOWING THE PIPE LINE TESTIMONY HEARINGS AS MUCH AS POSSIBLE AND HAVE READ AS MUCH AS HAS COME TO HAND, THERE REMAINS ANOTHER THOUGHT THAT I HAVE NOT HEARD EXPRESSED TO DATE, THAT I FEEL SHOULD BE PRESENTED TO OUR BIOLOGISTS, ENGINEERS, ET AL FOR FEASABILITY AND CONSIDERATION.

MY THEORY IS AS FOLLOWS: CONSTRUCT A BUILDING/S OVER THE PIPELINE, USING THE PIPE AS A CENTER LINE. THE BUILDING/S TO BE 100 FEET OR SO WIDE AND AS LONG AS REQUIRED. BUILDINGS OF THIS TYPE WOULD BE HEATED BY THE 180 DEGREE OIL AND WOULD BE USED AS GREEN HOUSES, DAIRY FARMS, POULTRY FARMS AND PERHAPS HAY COULD BE RAISED IN THIS MANNER. DWELLINGS FOR HUNDREDS OF PEOPLE AND RAISING SOME OF THEIR FOOD COULD BE ACCOMPLISHED IN THIS MANNER. COULD NOT A NATURAL GAS LINE PARALLEL THE OIL LINE FOR FUEL AND CONVERSION TO ELECTRIC POWER WHERE NEEDED?

I FEEL THE GROWTH OF WILLOWS AND OTHER LEAFY PLANTS, EITHER NATURAL OR PLANTED, WOULD GROW ALONG THE ROUTE IN RECORD TIME, ENHANCED BY THE HEAT FROM THE LINE. ONE ONLY NEED TO LOOK TO THE HILLS BEHIND FT. RICHARDSON TO SEE THE BELTS OF HEAVY GROWTH WHICH APPEARS TO BE 15 TO 20 FEET HIGH MEANDERING OVER THE HILL-SIDES. THESE BELTS OF HEAVY UNDERGROWTH WERE CAUSED BY BULLDOZERS CLEARING FIRE BREAKS AROUND A MUSKEG FIRE IN THE EARLY AND MID 50's WHEN WE HAD SEVERAL FIRES TO FIGHT. NO CONSIDERATION WAS GIVEN AT THAT TIME FOR PROPER DRAINAGE, EROSION CONTROL OR ANY OTHER CONSIDERATION FOR THAT MATTER, EXCEPT TO SURROUND THE FIRE. IT WAS CULTIVATION IN A VERY CRUDE FORM. BUT IT STANDS AS AN EXAMPLE TO POINT OUT THE NEED FOR THE CULTIVATION OF OUR ENVIRONMENT IN SOME AREAS TO PROMOTE THE GROWTH OF PLANT LIFE WHICH IS A NECESSARY REQUIREMENT FOR THE SUSTENANCE AND INCREASE IN NUMBERS OF MANY SPECIES OF ANIMAL LIFE. WHAT IS WRONG WITH AN 800 MILE GREEN-BELT, -GAME REFUGE & ROADSIDE PARKS?

[illegible] VIRGIN [illegible] BIG LIES. [illegible]

WITH PROPER HANDLING OF THE [illegible], MOOSE [illegible] SHEEP AND BEAR BEGAN TO MULTIPLY AND NOW WE'RE IN BIG DIFFICULTIES.

IT THEREFORE SEEMS [illegible] THE SAME THING COULD occur ALONG THE PIPE LINE, CREATING A GAME BELT AS A HAVEN FOR WILDLIFE AND WOULD THEY NOT STAY CLOSE TO THE LINE [illegible] FOR [illegible]?

WE NEED ANSWERS FROM OUR BIOLOGISTS AND ENGINEERS TO THESE IDEAS AND QUESTIONS.

[illegible] A SECURITY STATION IS BEING THAT PLACE EVERY ALONG THE LINE AT INTERVALS [illegible] A SMALL TOWN.

I CALL UPON THE [illegible], AND OUR LEGISLATURE, TO REVIEW THIS NEGATIVE THINKING TRIED BY THE "EXPERTS" FROM OUTSIDE. LET US ALASKA HAS ALWAYS BEEN "DOING THE BEST YOU CAN WITH WHAT IS AVAILABLE AND TURNING ADVERSITY INTO SUCCESS BY WORK WELL AND THE [illegible] WAS TO BE SO THROUGH POSITIVE THINKING AND ACTION"! WE AS ALASKANS, HAVE HAD IT UP TO HERE, WITH HIGH BLOWN EXPERTS FROM OUTSIDE. THEY HAVE THIS THING BACKWARDS. SO FAR, EVERYONE IS TELLING US HOW MANY REASONS THERE ARE THAT IT WON'T WORK. ALL WE WANT ARE IDEAS HOW IT WILL WORK. IT IS UP TO THE GOVERNOR AND YOU AS OUR LEGISLATORS AND WE THE PEOPLE BACKING YOU TO THE HILT TO LET IT BE KNOWN TO ALL, THAT WE WILL DO THE TELLING AND THE ONLY THING WE WANT OUT OF THE EXPERTS, IS TO FIGURE OUT HOW BEST TO DO IT. IF THEY CAN'T DO IT, WE WILL GET SOMEONE WHO CAN.

WITH JUST REGARDS TO YOU ALL,

Omer Wade

OMER WADE

P.S. A RESOLUTION OF APPRECIATION MIGHT BE IN ORDER TO " MOTHER NATURE" FOR GETTING THE YUKON RIVER IN, BEFORE THE "EXPERTS FROM OUTSIDE" GOT WIND OF IT. CAN'T YOU JUST HEAR THE HOWL THEY WOULD SET UP AND POINT WITH OUTRAGE, AT THE GREAT SPRAWLING SCAR ACROSS THE FACE OF THE LAND, THE

UNTOLD NUMBERS OF BIRDS AND DELICATE MARINE MAMMALS THAT WILL ALL DIE NOW, BECAUSE THE OCEAN WILL BECOME MUCKY WATER, AND SO ALL THE FISH WILL DIE, AND WHEN ALL THE FISH DIE, ETC. ETC. AD INFINITUM!! HOSH.

HELEN, TELL THE LEGISLATORS THAT FROM ALL THOSE WHOM I HAVE TALKED TO, REGARDLESS OF PUBLICITY, I HAVE YET TO FIND AN ALASKAN THAT DOES NOT AGREE WITH THESE VIEWS. WE MUST BE IN THE MAJORITY. WE BACK YOU AND YOUR FELLOW LEGISLATORS 100% REGARDLESS OF PARTY IN THIS MATTER. GIVE 'EM HELL!!!!!!

Bert Cole

TRANS ALASKA PIPELINE HEARINGS

Anchorage, Alaska

LIST OF WITNESSES

in relative order of appearance

Witnesses should be seated in the witness reserved section. Witnesses are registered for 10 minutes testimony unless otherwise noted.

Name	Organization
Hon. William A. Egan (et al)	Governor of State of Alaska (Two hours)
Hon. Ted Stevens	United States Senate (15 minutes)
(Hon. Walter Hickel)	Former Secretary of the Interior (testify on Thursday a.m.)
Hon. Keith H. Miller	Former Governor of State of Alaska
(Hon. Marty Farrell)	Alaska State House Chairman, House Resources Committee. (testify on Thursday a.m.)
Hon. Ed Merdes	Alaska State Senate
Hon. Lowell Thomas	Alaska State Senate
Hon. C. R. Lewis	Alaska State Senate (testify Wed p.m.)
Hon. Andy Warwick	Alaska State House
Hon. Bob Dittman	Alaska State House
Hon. Jess Harris	Alaska State House
Hon. John Hubert	Alaska State House
Hon. Leslie Swanson	Alaska State House
Hon. Helen Fischer	Alaska State House
Hon. Tom Fink	Alaska State House
Hon. Dick Randolf	Alaska State House

	Name	Organization
1.	Mr. E. J. Patton	Alyeska Pipeline Service Company
2.	Representative	Anchorage Chamber of Commerce (20 min)
3.	Mr. John Kelsey	Alaska State Chamber of Commerce (40 min)
4.	Mr. Jack Werner	Seward Chamber of Commerce
5.	Mr. Byron T. "Bud" Brown	Bud Brown Enterprises
6.	Sam Johnson	Individual
7.	Representative	Citizens Committee
8.	Miss Celia M. Hunter	Individual
9.	Steve Talbot	Individual
10.	Representative	Alaska Native Student Organization
11.	Harold E. Pomeroy	Individual
12.	George Scrima	Publisher "Alaska Construction & Oil Rpt"
13.	Dr. Edward Wayburn	Sierra Club
14.	David Hickok	Individual
15.	Dr. Earl H. Beistline	Individual
16.	Representative	Fairbanks Chamber of Commerce
17.	Calvin Fair	Individual
18.	Representative	Alaska Chapter, Associated General Contractors of America, Inc.
19.	Jack Hesson	Individual
20.	Ivan Brudie	Individual
21.	H. Vern Flett	Individual
22.	Representative	Captain Cook Jaycees
23.	Marvin Parker	Anchorage Jaycees
24.	Joe Seale	Individual
25.	Steward Rothman	Arctic Oil Journal

March 10, 1971

The Honorable William J. Moran
Alaska State House of Representatives
Pouch "V" State Capitol Bldg.
Juneau, AK 99801

Dear Bill:

During the past two years Angus Gavin, who has spent nearly 45 years in the Arctic as an ecologist, has been studying the various forms of wildlife and their habitat in the Prudhoe Bay area of northern Alaska. His report, part of a series of environmental studies undertaken by Atlantic Richfield Company and covering work performed during the past two years, has recently been published by the company for public distribution.

Mr. Gavin writes about his subject with great insight, and we hope that you will find the enclosed copy of his report both interesting reading and informative on many of the wildlife questions of northern Alaska.

If you would like to have additional copies of Mr. Gavin's report, please let me know.

Sincerely,

J. H. FitzGerald

Enclosure

Ecological Survey of Alaska's North Slope
Summer 1969 and 1970

AtlanticRichfieldCompany

The author, Angus Gavin is ecologist for the Alaskan operations of the Atlantic Richfield Company. Since 1969, he has been studying the effects of oil development on Alaska's North Slope and making recommendations to insure maximum protection of the wildlife and the Arctic environment.

Emigrating to Canada from Scotland, Mr. Gavin has spent over 40 years studying the wildlife and its environment in the northernmost reaches of the western hemisphere. Formerly senior vice-president of Ducks Unlimited (Canada), he is regarded as one of the foremost ecological naturalists with particular expertise in the arctic and subarctic areas of North America.

This report contains the results of ecological studies conducted by Mr. Gavin for Atlantic Richfield Company during 1969 and 1970.

Ecological Survey of Alaska's North Slope
Summer 1969 and 1970

Over the past two years we have had the opportunity to study and evaluate the effects of petroleum development and other related activities on the North Slope on the wildlife of the area and its environment.

Our sphere of operations has included that part of the North Slope lying between the Canning and Colville Rivers and between the Brooks Range and the Beaufort Sea. Within this area oil development activity is taking place, although most activity is confined to a relatively small zone between the Kuparuk and the Sagavanirktok Rivers and covers an area of approximately 30 square miles of coastal plain. While our studies have been primarily slanted toward collecting data on caribou, waterfowl and fish, all other animals and birds observed were recorded and as much information as possible collected. A constant check has also been kept on oil field activities and their relation to the total environment.

Our headquarters has been the Atlantic Richfield operations center at Prudhoe Bay and we have used a Bell Jet Ranger helicopter as transportation.

Description of the Study Area

The portion of the Alaskan North Slope under study consists of approximately 16,000 square miles of Coastal Plain. The major part of this is comparatively smooth, rising imperceptibly from the Arctic Ocean to a maximum altitude of 500 to 600 feet. Pingos break the flat monotony and produce an undulating skyline. Generally, the shore is quite flat—broken only by sand dunes near some of the river deltas—and much of it is only a few feet above the ocean level.

The whole area is very poorly drained and consequently quite marshy. Much of this part of the coastal plain is covered by elongated thaw lakes ranging in size from only a few yards to over a mile in length. All are quite shallow, varying from a foot to a maximum of ten feet in depth. The entire area is underlain by permafrost which reaches a depth of over 1000 feet. Ice wedge polygons cover the entire plains. Several rivers and streams intersect our study area, the major ones being the Colville, Canning and Sagavanirktok. All are heavily braided and contain large quantities of gravel.

Surface vegetation throughout the coastal plains is typical tundra type, with mosses, lichens, grasses and sedges being the most dominant. Throughout the numerous valleys and river courses intensive stands of willow and dwarf birch prevail. Since the entire area is poorly drained, sedge grass marshes are numerous. Vegetative components of these marshes vary greatly, but the dominant plants are various species of carex and grass interspersed with sedge-spagnum moss and bog type plants.

Weather throughout the summer of 1970 was quite good. Temperatures ranged from a low of +20°F on May 20 to a high of +65°F on August 27, dropping to freezing temperatures again by September when +20°F was recorded. Many of the smaller lakes and ponds froze over at this time, and some snow flurries were encountered. Thawing temperatures hit the area again on September 9 when a high of +45°F was reached. Most of the lakes and ponds thawed out, and there was a feeling of Indian Summer in the air. This, however, did not last too long as freeze-up took over the week of September 20.

General Outline of Wildlife in Study Area

Within our study area there are many species of wildlife, all of which play an important part in the overall make-up of the ecological and biological systems. Mammals include barren ground grizzly bears, moose, caribou, wolves, wolverines, foxes, ground squirrels, lemming and Arctic shrew. Bird life is plentiful with several different varieties of geese, many species of ducks, numerous different shorebirds, whistling swan, loons, gulls, terns, jaegers, hawks, eagles, snowy owls, plovers, ptarmigan and a variety of tundra-nesting small birds.

As noted, streams within the area are heavily braided and generally quite swift, with rocky gravel or silt bottoms and relatively few really deep pools. These streams can become quite turbid in a short period from rains or melting snow in the Brooks Range where all the major ones have their headwaters. Most rivers carry char, grayling and whitefish on spawning runs, and some of the deeper ones may serve as a wintering area for Arctic char. Headwater lakes and tributaries are the major spawning areas.

Caribou—Rangifer Arcticus Arcticus

The area north of the Brooks Range commonly called the North Slope is inhabited by what is generally accepted as two distinct herds of caribou, the Westerly or Arctic, and the Easterly or Porcupine, herd. Estimates on the populations of these herds vary; however, the most recent figures, according to data and maps issued by the State Department of Fish and Game, place the population of the Arctic herd at 300,000 animals and of the Porcupine herd at around 140,000.

Summer range

The summer ranges of these animals extend over a wide area of the North Slope and, from survey data collected over the past two years, there are indications of some overlapping, particularly during the calving season. Generally, the summer range of the Arctic herd extends from Cape Lisbourne on the west to the Colville River on the east, with some animals occasionally reaching as far north as Point Barrow. Calving grounds for the main part of the Arctic herd lie along the upper reaches of the Colville and Utukok Rivers. The summer range of the Porcupine herd extends from the upper Porcupine River north to the Arctic Ocean and west to the Canning River. Their main calving grounds extend from Camden Bay southeastward to the foothills of the Romanzof and British Mountains. Although geographically there is a wide gap between the summer ranges of these two herds, our observations indicate that, while the major portions of the herds are widely separated, offshoots of both intermingle in that portion of the range lying east of the Sagavanirktok River and west of the Canning River. During the spring of 1970, a herd of approximately 20,000 animals used the Atigun and Sagavanirktok Valleys in migration, breaking to the northeast south of Sagwon and spreading out over the plains near the coast on both sides of the Canning River. Whether this herd came from the Porcupine herd or the Arctic herd is problematical—more than likely the Arctic herd. From this migration it is evident that in some years the Sagavanirktok Valley plays host to a fairly large movement of animals.

Although patterns and migrations may vary with the weather during the fall, spring movements to the calving grounds are on a fairly tight schedule. Generally, the movement of animals from the Brooks Range and the Porcupine Valley to the North Slope begins around the first of May and reaches a peak during the latter part of May and first few days of June. Peak of the calving period is reached by about June 6. Bulls are considerably later in reaching the Slope in any numbers. They stay in the foothills area until after calving season, then gradually move north until they join up with the cows a few weeks before the start of their slow migration back to the wintering grounds. General summer movements within the slope area under study are from east to west, although there are offshoots from this pattern (see Figure 1). For the first three or four weeks after the calving period there is no particular pattern evident, but by the first week of July there is a gradual slow movement to the west and south, with a gathering of cows and calves together into small scattered bunches. By the beginning of August, small herds have developed, and a scattering of bulls begin to appear with them.

Of the two herds which use the North Slope as their summer range, a maximum of 30,000 animals frequent the area between the Colville and Canning Rivers. These are the animals which form the base for our study, since their movements and habits are tied in very closely with the oil field development. This area of the slope had not been studied before the commencement of oil exploration and development work, so we have no way of knowing the pattern and movement of these animals within the study zone in earlier times.

Our 1969 studies began just after the calving season and continued on through the fall migration period. Studies in 1970 started on April 30 with the first movement of caribou out of the Brooks Range onto the Slope. On this date, in company with Brian Sage, biologist for British Petroleum, we intercepted a herd of several thousand animals at the five thousand foot level heading north on a pass just east of Anaktuvuk. These were part of the Arctic herd moving toward their calving grounds along the upper reaches of the Colville River. From May 1 until the fall our base of operations was Prudhoe Bay. From this point close observation of caribou movements within the study area have been kept, with particular emphasis on patterns and behavior within the oil activity zone.

While few caribou drop their calves within the major oil field area, their movements during the summer bring them well within the field and, during much of the summer and fall caribou can usually be seen from the ARCO-Humble operations base. On August 19,1969 a fall movement of some 6,000 animals, including cows, calves, yearlings and bulls, passed through the field in close proximity to the main base and for several days grazed within normal camera range of many of the rigs. On July 13 of this year a herd of 1,500-2,000 animals passed through the middle of the base camps and had to be herded off the main runway in order to allow planes to land.

Although air traffic in and around the field is comparatively heavy at times, this does not seem to interfere with the normal day-to-day movement of these animals. In fact, they seem rather blasé about the whole proceedings. Much of the time, they pay little attention to aircraft movements and only become disturbed if an attempt is made to harass them.

The composition of caribou populations within the study zone has not varied greatly during the past two years. Total populations have been slightly higher in 1970, partly due to a greater movement of animals up the Sagavanirktok Valley. Calving success has been quite high, roughly 60 percent during 1969 and 70 percent during 1970. Wolf predation has been extremely light, few kills having been noted. Since only an occasional wolf has been seen during the entire summer and fall after few sightings in early spring, the wolf population seems to be at a very low level.

While there are few ground obstructions such as pipelines or fences within the oil development area at present, there are sufficient obstacles to give us some indication of caribou behavior in response to foreign materials. In some areas fairly large waterlines have been laid on top of gravel pads and some temporary feeder lines installed above ground. Observations show that caribou encountering such obstacles in their path have no hesitation in stepping over them.

Fall migrations during 1970 have been slow and leisurely with no heavy movement at any one time. Small herds moved steadily west and south throughout August, leaving few animals along the coastal zone by the beginning of September. Routes followed were identical to those of 1969—the major population using the coastal route west toward the Colville River, with a minor movement south along the Sagavanirktok River (see Figure 1).

A survey flight east toward the Canning River on September 6 located a few small groups of about 200 animals moving southwest toward the Sag Valley. On September 7 a survey of the area west of Prudhoe Bay to the Colville River showed the majority of those animals left had migrated to the vicinity of Ugnu and were moving steadily southwest toward the foothills and eventually through the Brooks Range to their wintering grounds.

Waterfowl

The part of the North Slope comprising our study area has four distinct types of habitat. In the delta areas are wide alluvial flats and many gravel and silt islands covered with a sparse growth of stunted willow; a sedge grass, marsh type habitat is dominant along the coastal plains; the Tundra-Lacustrine water edge habitat exists in the low lying coastal areas; and the Tussock-Heath type of habitat is found in areas with better drained soils.

Observations of waterfowl and other birds began on May 10 when Canada geese were the first spring arrivals. From that date on through the nesting, brood season, and fall migration period close observations were made and records kept.

Counts of the waterfowl population within the study area were made from a helicopter, using total coverage for counts of the deltas and coast for approximately ten miles inland. For the remainder of the survey area, the strip method was used. Coverage began on June 9 and was completed on June 14.

Although the average of 2.8 pairs per square mile for the total area is not exceptionally high, there are pockets of comparatively high density on some of the deltas and Tundra-Lacustrine types of habitat in the low lying coastal regions. Areas such as the region from the Colville River to Ugnu, just south of Oliktok Point, averaged 5.8 pairs per square mile, and the area in the vicinity of the Kuparuk River averaged 5.6 pairs per square mile. Further to the east, populations around the Sag River delta, although lighter than those in the former two areas, still averaged 4.9 pairs per square mile (see Figure 2).

Composition of the species comprising these counts in the various survey areas are shown in Table 1.

Weather during the first two days of the survey was good, with temperatures during the day reaching 40°F. On June 8, however, conditions changed considerably, as temperatures dropped to 24°F with snow flurries. During the remainder of the survey, temperatures stayed quite low, with the maximum being reached on June 12, when the thermometer managed to climb to 32°F.

Considerable nesting activity was underway before our surveys started. The first nest was found on May 28— a whitefronted goose with 5 eggs. On May 29, a whistling swan was sighted sitting on a nest in the Mikkelson Bay area. While some birds started nesting activity soon after arriving, there were others that apparently held off until better weather arrived, as indicated by the considerable number of late broods seen during our fall caribou survey which commenced on August 17.

Brood count surveys were started on July 23 and were completed by August 1. Initially, these surveys showed a rather poor hatch, particularly among the whistling swans, loons, scaup and black brant. From a total of 37 pairs of swan within the survey area, only 18 were successful, and many of these had only one cygnet. Greater scaup were completely unsuccessful, as no broods were seen during the survey period. Loons, both Arctic and red throated, showed very poor results, although some late hatches were seen during the middle of August. Black brant, which showed a good overall percentage of breeding pairs during the spring count, had only a 22 percent successful hatch. Whitefronted geese, eiders, oldsquaw and pintails did considerably better and brought the overall hatching success figure up to 34 percent. Late broods which were evident during our fall caribou counts would add a percentage or two to this figure, but not enough to make significant difference. The reason for the poor hatching success of some of these birds is not known. However, it seems logical that since many, particularly the swans and some of the geese, were nesting during the latter part of May when temperatures went as low as 20°F., the eggs may have been touched by frost, unless the birds were incubating at the time. This is by no means an uncommon occurrence in the Arctic.

Since we were using a helicopter on skis for our survey work, we were unable to visit many of the offshore islands which are favorite nesting areas for eiders and oldsquaws. On August 6, however, an opportunity to visit one of the main islands arose when we accompanied Jim King and Jim Bartonek of the U. S. Fish and Wildlife Service and Dr. William Sladen of Johns Hopkins University in their float-equipped Beaver to Cross Island. This island is one of the chain lying approximately fifteen miles north of Prudhoe Bay. Its total length is about four miles, the width varying up to three-quarters of a mile. Situated on the highest point of this island, which is only about 15 feet above sea level, is an old broken-down cabin measuring about 8 foot square. In all probability, it was used during the time when the DEW line was being constructed, since there is a broken metal tower lying nearby. A survey of this island produced 97 eider nests, all of which appeared to have hatched successfully. One of the most interesting aspects of this survey was that inside the old cabin seven eiders had nested, and immediately around it some 25 others had built their nests. The majority of the remaining nests which we found were in the shelter of old drift logs or among very sparse vegetation. Terns and sabines gulls were also using this island as nesting sites. Several young sabines were seen in the water along the shore edge. Flocks of oldsquaws were in the shelter of the island, and it is assumed that they were using it as a moulting area.

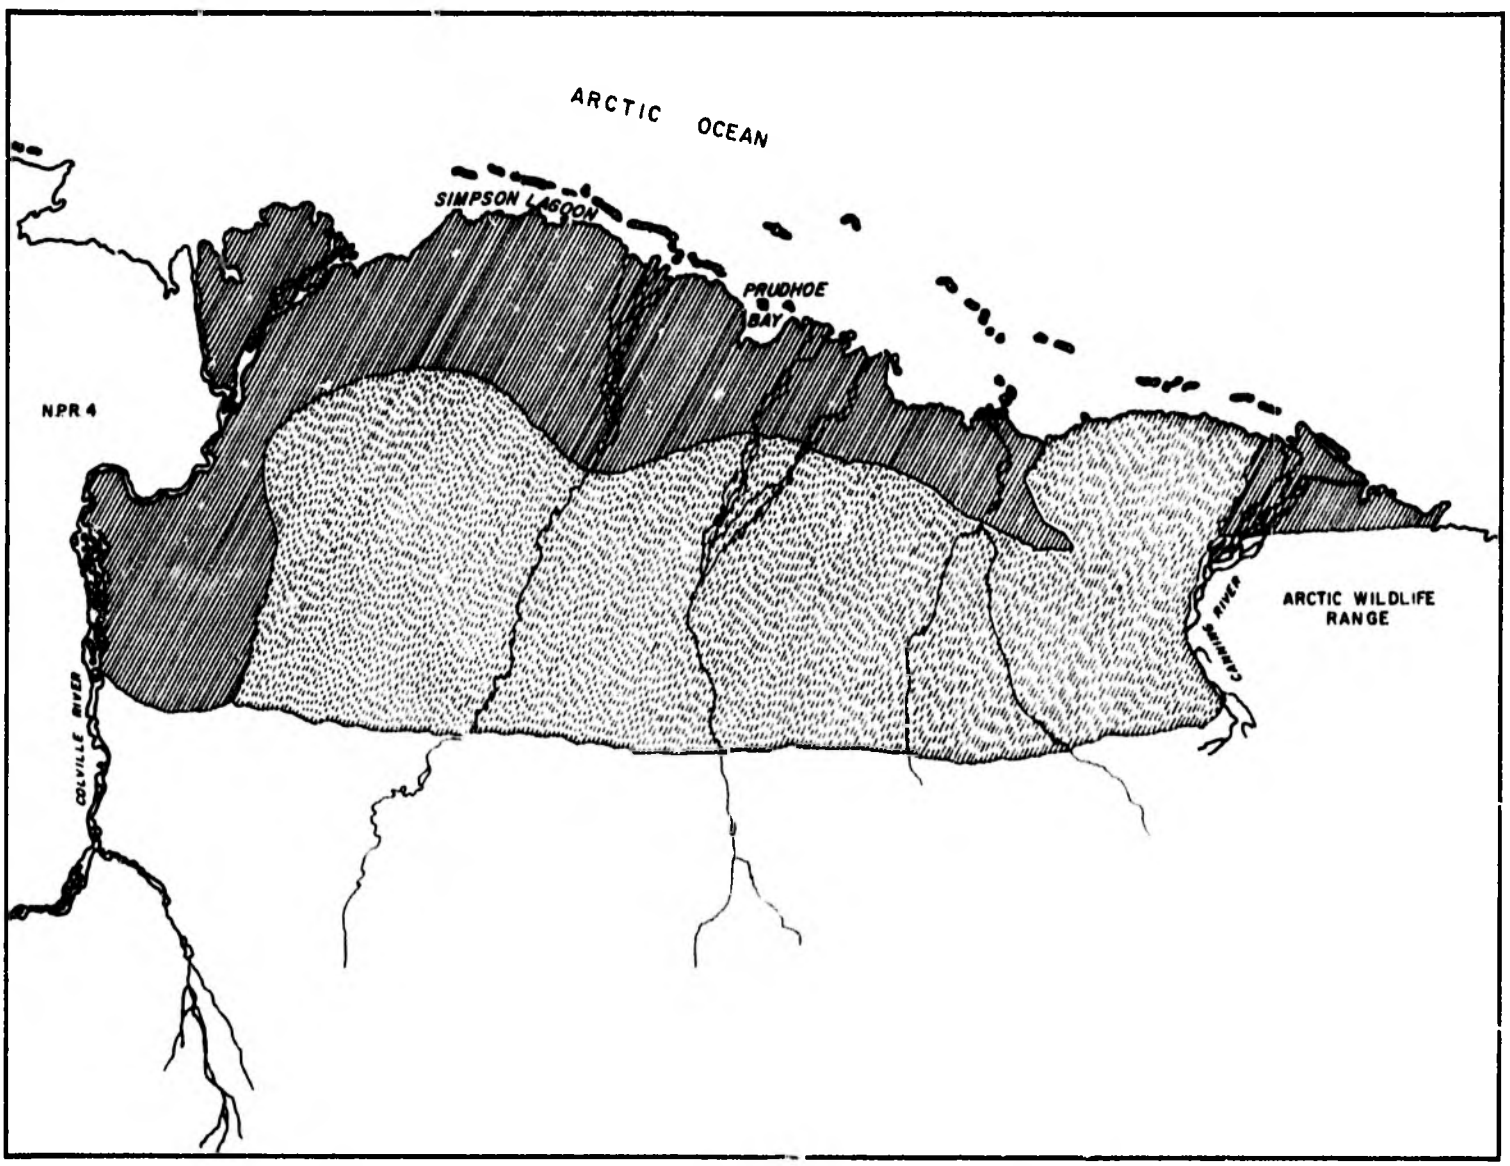
Figure 2



Water Fowl Use Map

Breeding pair per square mile 2.5 to 5.8

Breeding pair per square mile 0 to 2.0

Area average 2.8 pairs per sq. mi.

First noticeable fall movement of birds into the study area was on August 21, when several large flocks of white-fronted geese and brant geese and some small flocks of snow geese were seen moving on to the delta flats at the mouth of the Sagavanirktok River. The build-up of birds during the next week to ten days was quite heavy. Large flocks of geese could be seen grazing on the river deltas and other marshy flat areas. While many birds were moving into the Prudhoe Bay area, there was also a fairly steady outward movement, and by the first few days of September a large part of the population had gone. Some pintails, oldsquaws, eiders and geese were still in the area on September 6, although temperatures had dropped to 22°F and many of the small ponds were frozen over. A survey of the area by helicopter on September 7 showed most of the small lakes frozen and many of the larger ones ringed with ice. Some Arctic and red throated loons with young were trying to keep holes open, but without a good long spell of warm weather, the majority of these young birds would undoubtedly perish. Three pairs of swans with a total of six young were also seen, but they were in larger waters which might stay open long enough for the young to get on the wing. Some scattered flocks of brant, whitefronted geese, oldsquaws and eiders were still in the area, but essentially the waterfowl season on the Slope was over for 1970.

(See Appendix A for an annotated list of birds.)

Fish

During the summer of 1970 test netting was carried out on the Sagavanirktok River in an effort to determine the status and type of fish using this stream and to evaluate the ecological impact oil development may have on its fish use. Large quantities of gravel from the alluvial flats on this river are being used for the building of roads, ramps and runways, and an assessment of the effects of this gravel removal on fish runs in the river was necessary. While complete data on age, growth and sexual maturity of fish caught this summer will not be available until laboratory test results are completed, we do have some information on time and potential volume of fish runs in the river.

The spring breakup occurred on May 28 this year. Immediately after breakup, there is a run of small Arctic char, averaging about three pounds in size. This is not a particularly heavy run, but it lasts until around the middle of June when it tapers off. Starting about the second week of July, potential spawning fish start moving up the river, and these continue well into August. These fish are of good size, reaching ten pounds and over although no exceptionally large ones were caught in our nets. After about August 15 there is a comparative lull for a short period, following which a heavy run of small two-to-three pound fish enter the river. This latter run of fish are on what is known as a cleaning run and will only stay in the river for a short period before going back out to sea. While all the data on fish caught this summer are not yet available, there is some very useful information on hand, which was gathered by the Alaska Fish and Game Department during the summer of 1969. This is contained in a report on testing done on the Sagavanirktok River and some of its tributaries. Figure 3 shows the types of fish found in the rivers on the North Slope.

The Sagavanirktok River is an important one from a fisheries standpoint and many of the tributaries and headwater lakes which feed this river are vital spawning areas that should not be disturbed by the extraction of gravel, should oil activities come within this vicinity.

While large amounts of gravel are still being removed from river beds near the coast where fish do not spawn—and more will be used during the next year or so—this has not affected the capabilities of these streams to handle fish runs.

Barren Ground Grizzly

Although no concerted effort was made to inventory and catalogue all grizzly bear on this area of the North Slope, a record was kept of all those seen during our various other surveys. These were plotted on our maps, giving numbers seen, location and date observed (see Figure 4). Since these animals hibernate in the Brooks Range during the winter, the Slope area is primarily their summer range, with few being seen at this latitude before the end of May. Generally, the first ones seen in the spring are in the valleys along the foothills, with a gradual movement northward along the river and valley bottoms with the peak number being reached on the Slope during July and August.

During 1969, a total of ten bears, including four cubs, were seen in this area. In 1970, thirty-one bears, including three cubs, were recorded. While there is no doubt that some of the bears seen were recorded on more than one occasion, it is quite evident that the grizzly bear population on this part of the Slope is in a good healthy condition. The oil development activities are probably attracting some of these bears. Having a tremendous sense of smell, they can be attracted from a long way off. Once they discover the availability of food, they are difficult to discourage and can be extremely dangerous if disturbed while eating; however, there is no indication that the oil activity is in any way endangering their livelihood or normal movements.

Wolves

The population of wolves in this area of the Slope is extremely low. Whether it is a natural condition for this part of the country or whether the population has been reduced through over-harvest is difficult to determine. While caribou populations are not as abundant as in some other parts of the Arctic Plains, there are sufficient animals to support several packs of wolves, each keeping within its own hunting territory. In all our surveys during 1969 only two wolves were sighted. In 1970 only two small packs were seen—one pack on May 5 in the Beechy Point area composed of two blacks and four grays, and the other pack on May 9 in the Kavik area consisting of three animals, one black and two grays. A female at a den site on a pingo northwest of Home-Bush and one at Franklin Bluffs were the only other wolves seen. The one at Franklin Bluffs was spotted on several different occasions and, although no den was located, presumably one was nearby.

Lemming

During 1969, these little mouse-like animals were extremely plentiful during the summer and early fall. When these small rodents reach the peak of their cycle, however, and food becomes scarce, they take off on what has often been referred to as a suicide march. While this is more fantasy than fact, they do migrate out of an area en masse, often moving long distances before they find another suitable location on the Arctic tundra and scatter out to begin the cycle once more. Many undoubtedly die during their forced marches, and thousands of others are eaten by foxes and wolves, but we doubt that they purposely commit suicide in order to reduce their population.

Foxes

From a very high population in 1969, the number of foxes in this area has dropped off to practically nothing. This, of course, is entirely due to the absence of lemming. During 1969, dens of the Arctic white fox could be seen on practically every pingo and suitable river bank. Few have been seen during our 1970 surveys and it is very unlikely that any large numbers will be seen around the camps as they were in 1969. More than likely, it will be several years before the population again reaches a high peak.

Moose

Although the coastal area of this part of the Slope is not inhabited by moose, the rivers and valleys leading toward the coastal plain hold quite a large population. These areas have a heavy growth of woody plants, primarily willow and stunted birch, which provides good food and cover. During the summer, they are frequently seen some distance away from these areas feeding on carex and other grass bordering the lakes. While these animals appear to be in excellent condition and reach the normal size for the moose family, we have yet to see any large sized spreads on any of the bulls, the largest being in the neighborhood of 50 inches, and the majority not much over forty inches.

Appendix A

Annotated List of Birds

The following is a list of birds observed and recorded during our surveys over a two year period (1969-1970). Nests or broods of all species were not found, therefore some of those listed may be migrants through the Prudhoe Bay area. The majority, however, are known to nest within the district.

Olor Columbianus. (Whistling Swan)

Distribution: Widely scattered over much of the area. Generally frequenting the larger inland lakes. Thirty-seven pairs within the study area in 1970.

Migration: Among the first to arrive in the spring and waste little time in getting down to the business of nesting. The first nest in 1970 was recorded May 28 near Mikkelson Bay. Generally, among the last to leave in the fall. Often the young birds are barely able to fly when freeze-up occurs.

Branta Canadensis Taverneri. (Lesser Canada Goose)

Distribution: General over much of the area and, although the population appears quite high, the actual breeding population is limited. Many non-breeders summer on the Slope area. Nests were found and broods seen on the coastal plain and also inland near the foothills.

Migration: The first geese to arrive in the spring in the Prudhoe Bay area. They are also the first to leave in the fall.

Anser Albifrons. (Whitefronted Goose)

Distribution: Widely scattered from the foothills to the coastal plains. Many nests found and broods seen during surveys in both 1969 and 1970. Moulting flocks plentiful in the Ugnu area and along the Colville River.

Migration: Arrives in the Prudhoe Bay area early, often in company with Lesser Canada Geese. Starts nesting on arrival even though snow is still on the ground. Stays late in the fall and can be found in large flocks grazing on the river bottom flats and out on the tundra.

Branta Nigricans. (Black Brant)

Distribution: Widely scattered along the coast. Deltas and wide flats are their favorite nesting areas. Moulting flocks along with their young can be found on river deltas during the latter part of July.

Migration: While considerable numbers of Brant nest in the Prudhoe Bay area, there is also a migration of considerable magnitude which passes through along the coast during spring, heading east. Fall migrations into the Prudhoe Bay area are light, although fairly large numbers pass through without stopping.

Chen Hyperborea. (Snow Goose)

Distribution: Migrates through the area in good numbers in the spring and fall. Few nesting within the area.

Gavia Arctica. (Arctic Loon)

Distribution: Abundant nester in the Prudhoe Bay area. Carex and grass edged ponds and sloughs are their favorite nesting areas.

Migration: Arrives in the area in late May and first week of June. Migrates late in the fall, often being caught with their young unable to fly at freeze-up.

Gavia Stellata. (Red Throated Loon)

Distribution: Fairly abundant nester throughout the area. Prefers the same type of habitat as the Arctic Loon.

Migration: Arrives in late May and early June. Migrates late in fall often after small lakes and ponds are frozen over.

Gavia Adamsh. (Yellow-Billed Loon)

Distribution: Only a few pairs seen in the area during 1969 and 1970. Most were in the Ugnu area near the Colville River. No nests or broods seen.

Migration: Arrives early June. Fall migration unknown.

Anas Acuta. (Pintail)

Distribution: Fairly abundant nesting species along the coastal plain and around river deltas. The most prominent of the game ducks in this area.

Migration: One of the first to arrive in the spring and among the first to migrate in the fall.

Anas Platyrhynchos. (Mallard)

Distribution: A scarce bird in the Prudhoe Bay area. Only a few pairs having been recorded both in 1969 and 1970. One brood seen in 1970 near the company base camp.

Migration: Arrives first week of June and moves out early in the fall.

Anas Carolinensis. (Green Winged Teal)

Distribution: A few pairs seen in the area in both 1969 and 1970 but no nests or broods seen.

Aythya Marila (Greater Scaup)

Distribution: Widely scattered on both coastal and inland ponds, but not particularly heavy anywhere.

Migration: Fairly late arrival in spring and early migrant in the fall.

Mareca Americana. (American Widgeon)

Distribution: Very widely scattered light population. Most birds seen were in the Colville River vicinity.

Migration: Arrives around first week of June and moves out early in fall.

Somateria Mollisaima. (Common Eidor)

Distribution: One of the most common ducks in the area. Nests along coast and on islands lying off shore.

Migration: Arrives early in spring and stays quite late in fall.

Somateria Spectabilis. (King Elder)

Distribution: Fairly common along coastal areas. Not as plentiful as the common elder.

Migration: Arrives early in spring and stays fairly late in fall.

Lampronetta Fischeri. (Spectacled Elder)

Distribution: Found in fair numbers on coastal plain area.

Migration: Arrives quite early and leaves well before freeze-up in fall.

Polysticta Stelleri. (Stellers Elder)

Distribution: Widely scattered along coastal plain area but nowhere is the population heavy.

Migration: Arrives early in spring. Migrates quite early in fall.

Melanitta Deglandi. (White Winged Scoter)

Distribution: Widely scattered along coastal plain but nowhere is the population very heavy.

Migration. Late arrival in spring and fairly late migrant in fall.

Melanitta Perspicillata. (Surf Scoter)

Distribution: Very light population and widely scattered along coast.

Migration: Habits unknown.

Histrionicus Histrionicus (Harlequin Duck)

Distribution: One pair and a single male were seen on several different occasions on Sagavanirktok River.

Migration: Unknown.

Clangula Hyemalis. (Old Squaw)

Distribution: The most abundant duck in the Prudhoe Bay area. Nests on coastal ponds and on islands lying offshore.

Migration: Arrives early in the spring and is one of the last birds to leave in the fall.

Falco Peregrinus. (Peregrine Falcon)

Distribution: Widely scattered throughout the study area. Several pairs seen along the Colville River and south along the Sagavanirktok River. One nest located on Franklin Bluffs.

Buteo Lac Opus. (Rough-Legged Hawk)

Distribution: Fairly common and widely scattered throughout our study area.

Falco Rusticolus. (Gyrfalcon)

Distribution: Only pair seen was on the Colville River on July 27, 1970.

Aquila Chrysaetos. (Golden Eagle)

Distribution: Several seen in the upper reaches of the Sagavanirktok River. An immature one on the Colville River July 27, 1970 and one near Mikkelson Bay July 30, 1970, also an immature.

Lacopus Lacopus Alascensis. (Willow Ptarmigan)

Distribution: Widely distributed and very plentiful at times. Some flocks seen in the spring of 1970 were literally in the thousands.

Lacopus Mutus Nelsoni. (Rock Ptarmigan)

Distribution: Few Rock Ptarmigan were noted in the Prudhoe Bay area, but some flocks were seen farther south in the foothills.

Grus Canadensis. (Sandhill Crane)

Distribution: Several pairs seen along the Colville River. One on a nest about 30 miles north of Umiat.

Pluvialis Dominica. (American Golden Plover)

Distribution: Observed at widely scattered points throughout the study area. Nowhere very plentiful.

Squatarola Squatarola. (Black Bellied Plover)

Distribution: Observed at widely scattered points throughout the study area, but not plentiful.

Charadrius Semipalmatus. (Semipalmated Plover)

Distribution: Very common in area. The most abundant of the Plover family.

Arenaria Interpres. (Ruddy Turnstone)

Distribution: Widely scattered, but not plentiful in area.

Erolia Melantos. (Pectoral Sandpiper)

Distribution: Widely scattered and quite common throughout the area.

Erolia Bairdii. (Bairds Sandpiper)

Distribution: Very few seen on coastal area. More plentiful on upper reaches of Sagavanirktok River.

Erolia Minutilla. (Least Sandpiper)

Distribution: Only one seen in the Prudhoe Bay area during 1969 and 1970.

Ereunetes Pusillus. (Semipalmated Sandpiper)

Distribution: Seen on one or two occasions during spring migration. Not recorded during summer nesting season.

Numenius Phaeopus. (Whimbrel)
Distribution: Seen on migrations only along the Sagavanirktok River.

Erolia Alpina. (Dunlin)
Distribution: Widely distributed but nowhere very plentiful. One nest with three eggs found near Kuparuk River.

Phalaropus Fulicarius. (Red Phalarope)
Distribution: One of the most plentiful of the shorebirds seen in the area. Every little pond seems to contain a pair in the spring.

Lobipes Lobatus. (Northern Phalarope)
Distribution: Plentiful in the Prudhoe Bay area but not as abundant as the Red Phalarope.

Stercorarius Longicaudus. (Long Tailed Jaeger)
Distribution: Widely scattered and quite plentiful. Can be seen any day flying over tundra or sitting on small mounds on the tundra.

Stercorarius Pomarinus. (Pomarine Jaeger)
Distribution: Widely scattered but not as plentiful as the Long Tailed or Parasitic. Can be seen in flight and sitting on small mounds on the tundra.

Stercorarius Parasiticus. (Parasitic Jaeger)
Distribution: Fairly widely scattered throughout the study area. Seen in same areas as the Long Tailed and Pomarine.

Larus Hyperboreus Barrovianus. (Glaucous Gull)
Distribution: Widely scattered and quite plentiful in the area. Nests on islands and sandbars of braided streams.

Xema Sabini. (Sabines Gull)
Distribution: Widely scattered but not plentiful. Nests mostly on the offshore islands.

Sterna Paradisaea. (Arctic Tern)
Distribution: Fairly common along the coastal areas and on the offshore islands.

Nyctea Scandiaca (Snowy Owl)
Distribution: Very plentiful during 1969. Very scarce in 1970. Fluctuates with the lemming population which was high in 1969.

Asio Flammeus. (Short Eared Owl)
Distribution: Two recorded in 1970. These were seen flying over the tundra south of Franklin Bluffs.

Corvus Corax (Common Raven)
Distribution: Seen at widely scattered points. Mostly along rivers and on wolf or grizzly bear kills. Not particularly abundant.

Lanius Excubitor (Northern Shrike)
Distribution: One recorded on the Ivishak River on June 5, 1970.

Acanthis Hornemanni. (Redpoll)
Distribution: Recorded on several different occasions on the Colville River and on the upper reaches of the Sagavanirktok River. Not seen on the coastal areas.

Passerculus Sandwichensis Anthinus. (Savannah Sparrow)
Distribution: Recorded at several different points during 1969 and 1970 but nowhere did we find them in any numbers.

Calcarius Lapponicus. (Lapland Longspur)
Distribution: Very common throughout the region. Can be found practically everywhere on the tundra.

Plectrophenax Nivalis. (Snow Bunting)
Distribution: Common throughout the region. One of the first birds to arrive in the spring and lingers on in the fall well after freeze-up.

HCR #21

Dear Bill:

I wrote to you on March 18 concerning HCR21 furnishing you with what information I had on the subject.

The response which I received from the legislature as a whole was most gratifying. I hoped that the ill-advised resolution would not survive nor gain publicity to feed upon , which the proponents of illicit drug usage so much desire and is the most necessary component of the big lie technique being used to secure legalization .

I did not in my last letter nor do I now impugn the motives of the sponsors. I did not make any press release,and no circulation of the letter which I wrote to you was made or authorized. I wish to add that no such action will now be considered by the undersigned. My sole reason for this letter is to bring you more information without publicity.

I am enclosing a copy of a newspaper article provided me by a member of our Senate. Primarily I ask that you read the enclosed letter from Sarkis Atamian ,Head of the Department of Phychology and Sociology of the University of Alaska. Professor Atamian is a recognized authority on the subject and writes in response to SSHCR21 at my request and much more knowledgeably than I ever could.

In closing I would offer to the sponsors of SSHCR21 or any other member of this Legislature , the enclosed draft resolution covering a serious need for action in this session if our drug education efforts are to be continued. I assure you that the story which I heard one sponsor of the resolution in collecting vote pledges; that I was only looking for publicity is not so and I ask that you judge me and my motives on acts rather than words, facts not fictions . I understand that SSHCR21 will now be on the House Calendar Friday April 2, 1971 I ask for your vote AGAINST this resolution.

Bill,may I count your vote on this important issue ? .

Sincerely,

John Huber

John Huber

COLLEGE OF BEHAVIORAL SCIENCES AND EDUCATION

UNIVERSITY OF ALASKA
COLLEGE, ALASKA 99701

March 29, 1971

Honorable John H. Huber
House of Representatives
Pouch B
Juneau, Alaska 99801

Dear John,

It would seem to me that one point only should be refuted in HCR 21 (since a point by point refutation would require a draft ten times longer than the resolution) and that is the "council's" role in all this. Feel free to use whatever you can of the following.

HCR 21 admits that the marijuana issue is enveloped in "violent controversy." It then proposes that a legislative council study the "scientific evidence" and, accordingly, propose legislation aimed mainly at ameliorating existing legislation which penalizes too harshly violators who are in possession or engaged in sale, or possessing for sale. It also intends to solve the taxonomic issue of whether marijuana is a stimulant, an hallucinogen, and what have you.

As the resolution admits, there is great scientific controversy regarding these issues. It then arrogates to itself the incredible decision that a legislative council of elected public servants has the expertise to solve some vital scientific issues which, admittedly, are already controversial. Having arrogantly reached armchair conclusions based on their "research" of scientific data, the council will now propose legislation, the biased, prejudiced, and unilateral nature of which is not only implied in the bill, but explicitly stated for how can this conclusion be avoided when the proposal indicates how unfair present legislation is on the subject? The best way the proposal could have prevented such a credibility gap would have been to explicitly state that it would delegate the "research" of complex scientific data to a sub-committee of established experts, to wit, scientists in the field representing both si 'es of the controversy. Only then could committee have a legitimate basis for legislation based on understanding. But on this vital issue, the proposal creates a judge, jury, and executioner, all in the same body. While legislators will not hesitate to appropriate vast sums of money to hire expert teams of specialists for "feasibility studies" of all sorts, here there is no mention of competent assistance in an area which one way or another involves the lives of youth, the fortunes of the tax payer, and the continuity or collapse of society.

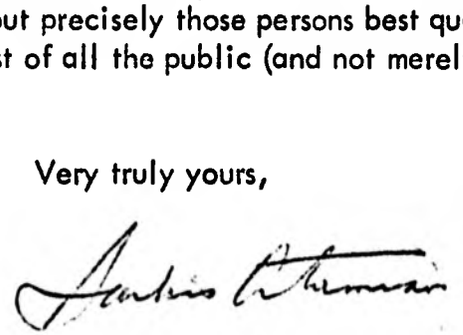
The proposal is guilty of the self-fulfilling prophecy. Many of its arguments, as in similar cases, rest on assumptions, which were clearly erroneous in the past; but which elicited responses as though the assumptions were true, and now there is a reality which need not have occurred except on the original error. For instance: ten years ago, marijuana abuse or use was not a middle class problem because it was not used extensively by the middle class. Radical ideology aimed against the so-called establishment argued, without any scientific basis that "pot" was not harmful or dangerous.

Its use increased and the original lie or undemonstrated thesis fed back into the system increasing rates of use until it did become a middle class phenomenon. Now the contention is that it is problematical, the laws are unenforceable and too many people want its legalization -- all of which could have been predicted in advance given the erroneous premises of the original arguments lacking in scientific integrity. Some of the very political interests who wanted to create political havoc ten years ago precisely in order to use it as a pretext for current legalistic maneuvers for the coup de grace, are predictably at it now. Only note the insidiousness: a lay committee of non-experts will collect scientific data, interpret it, resolve the controversies, and propose ameliorative legislation. That such a legislative council is not only not qualified to resolve differences, but is, in fact, not qualified to recognize differences can be quickly demonstrated.

Since the proposal speaks in the name of scientific evidence, can any of its members define the methodological differences between empirical evidence and statistical correlation? Can they distinguish between independent and controlled variables in scientific method? Can they relate testable hypothesis to untestable theory? Do they know how many laboratory controlled experiments there are since 1969 which is the date of the first such experimental finding? Did they know the fact referred to in the previous question?

As the house resolution points out, this area is so complex and controversial that if any integrity is intended, then the fact finding and analysis and recommendations must be made by qualified people whose thinking can only then constitute the basis for intelligent legislation. Every political representative of the legislative council would undoubtedly be the first to object if a microbiologist dared, on the basis of his expertise, to tell the body politic what is right or wrong about the legislative process and goodness or badness of democratic theory. And there is the rub. The current proposal is undemocratic because it leaves out precisely those persons best qualified to participate in the ground work on which the best interest of all the public (and not merely ranting pressure groups) rests.

Very truly yours,



SARKIS ATAMIAN, Head
Department of Psychology
and Sociology

Pro-Marijuana Campaign Dangerously Misleading; Researchers Are Baring Perils Of Use Of Pot

The World, Coos Bay, Ore., Saturday, Aug. 29, 1970

WASHINGTON — One of the cruelest campaigns ever conducted in this country has been directed at convincing Americans marijuana is no serious danger — "no worse than alcohol."

The idea that marijuana smoking tends to lead users on to even worse drugs has been denied as fantastic and without evidence.

The words of prominent medical men have been twisted out of context and their denials ignored.

As a matter of truth, a series of not-yet-published research studies sponsored by the U.S. National Institute of Mental Health give the most horrifying picture of what marijuana may do to chronic smokers.

When these NIMH reports are made public, probably within the next few weeks, they most certainly will startle thinking people.

Listed below are some glimpses of what that research shows:

● There are indications, in some cases, that marijuana-caused alterations in behavior "would be conducive to acts of violence." There is apparently a strong suggestion in some research that continued heavy use of marijuana may cause serious damage to the unborn children of users.

Behavioral Changes

● Dr. Constandinos Miras, visiting professor at UCLA working under NIMH support, used radioactive marijuana to track the drug through the human body on subjects who smoked at least two cigarettes daily for two years or more. His tests revealed "abnormal brain wave readings patterned to behavioral changes." In some cases, with long-time users, Miras noted chronic lethargy and loss of inhibitions for two years after their last usage, indicating, he felt, significant and lasting organic brain change.

● Dr. William McGlothlin, a research psychologist, and Dr. Jolyon West, of the Department of Psychiatry at Oklahoma University, working under a NIMH grant, found that present day marijuana use plays "a role in initiation to other potent drugs, particularly LSD."

● Regular use of marijuana, they also report, contributes to characteristic personality changes — "apathy, loss of effectiveness and diminished capacity or willingness to carry out complex long-term plans, endure frustration, concentrate for long periods, following routines or successfully master new material. Verbal facility is often impaired, both in speaking and writing." Some individuals show "a strong tendency toward regressive, childlike magical thinking . . ."

Washington News Scene

● Drs. Harris Isbell, D. J. Jasinski and C. W. Gorodetsky of NIMH, with associates in Germany, report that sufficiently high dosages of a substance extracted from the marijuana plant "can cause psychotic reactions in almost any individual."

Some NIMH studies center on marijuana from the standpoint of chromosomal breakage patterns. The objective is to determine the potential danger to future children of chronic smokers. The results of these studies (if there are any results thus far) are not known to this reporter. But the work of Dr. William F. Geber, associate professor of pharmacology at Georgia University, certainly suggests the possibility of serious harm to the unborn.

Damages The Unborn

Dr. Geber has injected pregnant rabbits and hamsters with large doses of resin from marijuana plants. The resultant fetuses contained malformed limbs, spines, livers and brains. They often suffered from edema, or excessive fluid, on the brain and spinal region.

There are also a considerable number of other independent studies (non-NIMH-supported) which bear out the extreme dangers inherent in smoking marijuana.

Dr. Herbert A. Raskin, psychiatrist at Wayne State University, reports cases "in which marijuana high comes on again spontaneously, weeks after the person has had a high . . . We've also had some young people with acute psychoses brought on by marijuana."

Drs. Martin H. J. Keeler, Clifford Reifler and Myron Liptzin, of the University of North Carolina School of Medicine's Department of Psychiatry, report that experience with marijuana users at the university's medical center suggests that this spontaneous recurrence of marijuana's effects may be relatively common and that it may often be accompanied by a degree of anxiety sufficient to constitute a psychiatric emergency.

Dr. James C. Munch, in his paper, "The Toxicity of Cannabis Sativa," states that (some) "humans smoking marijuana cigarettes . . . have developed . . . progressive brain damage and death from cardiac failure."

One of the most curious aspects of this whole miserable situation is that some who are most active in the fight against pollution and the use of some agricultural chemicals because of the potential harm to our bodies, are most strongly against restraints on the use of marijuana, where the danger is infinitely greater, at least for those who use this drug.

Proponents of marijuana continually harp that more proof of harm is needed.

Of course, continued research is necessary. But how much evidence do we need to stir us up to act more vigorously to find a solution before it is too late?

The
ALASKA OPTOMETRIC ASSOCIATION

AFFILIATED WITH
AMERICAN OPTOMETRIC ASSOCIATION

HB 34

March 23, 1971

The Honorable Eugene V. Miller
Majority Leader
House of Representatives
Juneau, Alaska 99801

Dear Mr. Miller:

This will be a letter confirming our conversation on March 22, 1971 concerning the committee substitute for House bill 34. My profession is in the unhappy position of having to oppose this legislation for several reasons. I would first like to state that the optometrists of Alaska are not opposed to the idea of a physician having an assistant aiding him in his private practice. The Alaska Optometric Association is also not opposed to the training and use of health aids in the bush areas to provide various forms of rudimentary health care when no specialized person is available to provide this care. It is indeed unfortunate that a health aid needs to be trained in the bush areas of Alaska where the Public Health Service is vested with the responsibility for caring for these people and expends vast amounts of money each year supposedly to provide this care and yet in fact does not provide reasonable health care in Alaska.

The optometrists of Alaska are opposed to House Bill 34 for several reasons. The first being that a physician is basically not qualified to supervise an assistant in the vision care field. My researches of 61 medical school catalogues show that the average training a physician has in the eye or in eye care amounts to approximately two semester hours over his entire training period. Ten of the 61 catalogues that I had access to showed no eye or vision care training for the physicians these particular schools graduated. I am sure this same situation is true in the fields of dentistry, pharmacy and other health care professions that are not licensed under the Medical Practice Act. If we were to turn this situation around and offered the same amendment to the optometry law allowing an optometrist to have an assistant to assist him in any field of the practice of medicine the comparisons are much the same and I am sure the physician would be just as alarmed as the optometrist is now. The Alaska Optometric Association offered the enclosed amendment to House bill 34 and this amendment was not included by either the Health Education & Welfare Committee nor by the House Finance Committee, because it was felt this amendment would interfere with the operation of the health aid who will provide his services in the bush areas. I was unable to attend sessions held by these two committees concerning this legislation, because I just happened to be out of town both times when the bill was considered. Probably the main opposer to the optometry amendment was William De'ak, M.D., Project Director for the Yukon-Kuskokwim Health Corporation. I am enclosing a copy of a letter I wrote to him on March 12, 1971 stating

The
ALASKA OPTOMETRIC ASSOCIATION

AFFILIATED WITH
AMERICAN OPTOMETRIC ASSOCIATION

that the Alaska Optometric Association and the Alaska Board of Examiners In Optometry had no intention of interfering with his program and certainly recognized the need, and in fact offered the assistance of the optometrists in Alaska to help train these people. You will also find a March 18, 1971 letter from Dr. De'ak to me adamantly stating his position, but with no explanation concerning how a physician could be qualified to supervise assistance in areas of health care where he has no training himself. The absolute lack of vision care in the bush areas of Alaska has been of concern to me and I have a small stack of correspondence I would happily display with the Department of Health & Welfare and with the Public Health Service concerning this very problem. I have received no response from the Public Health Service and very little encouragement from the Federal Department of Health & Welfare and practically no encouragement from The State of Alaska Department of Health & Welfare. I have had some help from our delegation in Washington and have recently learned that there is an optometrist scheduled in the Public Health Service budget for the next fiscal year and have written to our delegation in Washinton urging their support of this position, and hopefully it will be funded.

I would be most happy to sit down with Representative Kerttula and Dr. De'ak and Representative Hohman or any other legislators or people in the health care field and help formulate legislation that would allow the physician to train and use assistants in his practice and also allow the Yukon-Kuskokwim Health Corporation or any other health corporation in the bush area to utilize village health aids where specialized care is not available. It is my opinion that the best way to solve this problem would be to convince Mr. Kerttula to withdraw his bill and start over in the House of Representatives. There would be several advantages in this procedure, because the Health & Welfare Committee has already held deliberations concerning this type of legislation and have some of the ramifications of it already in mind. He would also have the advantage of starting out with all parties in basic agreement and have a much better chance of passage through the entire legislative system without having to go back to a conference committee for additional study and expended time. I'll make every attempt to meet with anyone interested in this type of legislation and do what ever I can to help formulate the proper type of legislation to utilize physicians assistants to the best possible advantage for the health care consuming public. House Bill 34 does not begin to meet this criteria and in fact would allow a physician to call anyone he desired an assistant and give this assistant a free reign in any area of the health care field regardless of his qualifications. House Bill 34 as it is written now would also allow any physician to have an assistant in an office outside of his own office and even outside of his own community.

Thank you for your assistance in this extremely important matter and I stand ready to aid however, I can.

Yours truly,

Dr. Roy A. Box, President
Alaska Optometric Association

ALASKA OPTOMETRIC ASSOCIATION'S

PROPOSED AMENDMENT TO CS FOR HB 34

Line 14: After the word "chapter." add the following new language:

"No medical services may be performed under this section in any of the following areas:

(a) The measurement of the powers or range of human vision, or the determination of the accommodation and refractive states of the human eye or the scope of its functions in general, or the fitting or adaptation of lenses or frames for the aid thereof.

(b) The prescribing or directing the use of, or using any optical device in connection with ocular exercises, visual training, vision training or orthoptics.

(c) The prescribing of contact lenses for, or the fitting or adaptation of contact lenses to, the human eye."

THE PRECEDING DOCUMENT(S) MAY NOT FILM LEGIBLY BECAUSE OF POOR QUALITY OF THE ORIGINAL.

HB 52

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE
PUBLIC HEALTH SERVICE
HEALTH SERVICES AND MENTAL HEALTH ADMINISTRATION

March 25, 1971

The Honorable
Tom Fink
House of Representatives
Pouch V
Juneau, Alaska 99801

Sir.

It has come to my attention that you voted HB 52 authorizing state subsidy for Alaska Methodist University back into Committee.

While it is important to develop budget expenditures frugally, it would seem that $365,000 is a small amount for a large purpose especially in view of other proposals issuing from Juneau, i.e., the marine highway improvements.

In Alaska there is one overwhelming deficiency that permeates the modus vivendi in this "Great Land" and that is small thinking. From the style of journalism in local newspapers to the vituperative tenor in the recent elections, the note is a sour discordant one of ignorance; nowhere are universities of higher learning, especially private institutions free from political stress, more crucial to future development than in Alaska.

It is time that the sourdough image of the Alaskan be dissolved and the youth in this state be encouraged to grow brains instead of beards. It is time that the Seattle braintrust be dissolved and capable Alaskans run their own affairs.

"North to the Future" is not through the ignorance of today but the knowledge of tomorrow.

Sincerely,

J. David Williams, M.D.

Sir:

As a citizen with great respect for higher education I appeal to you to exert every possible effort to bring HB 52 out of Committee and assist in its passage.

The contribution of Alaska Methodist University has been significant and should be supported. As other states are finding the responsibility to support private institutions, I feel we can also meet this obligation in this case.

Sincerely,

David D. Beal

HB 158

NIGHTLETTER
MARCH 1, 1971

Charge to City of Anchorage - 272-5522

HONORABLE MIKE MILLER
HOUSE OF REPRESENTATIVES
ALASKA LEGISLATURE

JUNEAU, ALASKA

THIS IS IN RESPONSE TO YOUR INQUIRY CONCERNING HB NO. 158. THE CITY OF ANCHORAGE IS OPPOSED TO THIS BILL.

IN OUR VIEW THE ALASKA TRANSPORTATION COMMISSION IS NOT THE PROPER REGULATORY AGENCY TO CONTROL GARBAGE COLLECTION AND DISPOSAL. WE FEEL THE REGULATION OF THIS SERVICE SHOULD BE VESTED IN THE APPLICABLE LOCAL GOVERNMENT UNIT. CERTAINLY IF THE STATE IS TO REGULATE IN THIS FIELD, THE ALASKA PUBLIC UTILITY COMMISSION WOULD BE THE MORE APPROPRIATE REGULATORY AGENCY.

IF THE CITY AND/OR BOROUGH IN THIS AREA DID NOT OPERATE SANITARY LAND FILLS AND ALLOW USE BY SUCH PRIVATE GARBAGE COLLECTION FIRMS, I DOUBT VERY SERIOUSLY ANY OF THESE FIRMS WOULD BE IN BUSINESS.

THE CITY OF ANCHORAGE RECOGNIZES THAT WHERE A PRIVATE FIRM HAS A ROUTE IN A NEWLY ANNEXED AREA THAT A CITY SHOULD, BEFORE SERVING THE AREA, ACQUIRE THE EQUIPMENT AND FACILITIES EMPLOYED BY THE PRIVATE FIRM IN SERVING THE AREA. HOWEVER, WE FEEL STRONGLY THAT CITIES SHOULD NOT BE PROHIBITED FROM PROVIDING GARBAGE COLLECTION AND DISPOSAL SERVICE TO ANY OF ITS RESIDENTS.

I PLAN TO BE IN JUNEAU LATER THIS WEEK AND HOPE WE MAY FURTHER DISCUSS THIS BILL THEN.

ROBERT E. SHARP
CITY MANAGER
CITY OF ANCHORAGE

Direct Selling Association
1730 M Street, N.W.
Washington, D.C. 20036
(202) 293-5760

1971 Membership Roster

Statement of Principles

Members of the Direct Selling Association subscribe to and support this statement of principles.

1. Salespersons, by creating demands for goods, help provide the American people with employment and the world's highest standard of living, and those who devote their lives to selling are making important contributions to the welfare of our nation.

2. Salespersons in all fields must observe the highest standards of integrity, frankness and responsibility in dealing with consumers and in all selling:

   (a) Descriptions of products must be truthful and terms of sale clearly stated;

   (b) Honesty is required in the approach to sale, and

   (c) Courtesy to a prospective customer, and consideration of his needs, are prime essentials of all selling.

3. The Direct Selling Association endorses and commends the efforts of all national, state and local organizations which promote the establishment and maintenance of high standards of practices and of truth in all selling of merchandise.

HOW TO USE THIS ROSTER

To give you a useful reference, this roster of the membership of the Direct Selling Association is divided into the following parts:

	Page
Part I Active Members	3
Part II Commodity Classifications– Active Members	10
Part III Associate Members	17
Part IV Commodity Classifications– Associate Members	23
Part V Geographical Listing	29

Parts I and III are alphabetical listings of active and associate member companies. The full address and telephone number of the main office is given for each, as well as the name of the company executive who is the representative to the association.

Parts II and IV show under alphabetically listed product categories the companies which manufacture or distribute that product.

Part V gives by state the names of both active and associate member companies *headquartered* in that state. Many members have branch offices. You should check your local telephone directory to see if a member company has an office or is represented in your community.

ACTIVE MEMBERS

According to the bylaws of the Direct Selling Association, those eligible for active membership are persons or firms manufacturing or dealing in merchandise intended ultimately to reach the consumer through an in-person sales contact, as distinguished from sales contacts made by mail or in stores of the seller. A member must also have a business location in the United States.

of the sale which shall be stated in clear and unambiguous language and in readable type comparable in size with all other type thereon.

Recruiting Advertisements

11. An industry member may not use any advertisement which is false, misleading, or deceptive concerning:

a. the salary, commission, income, earnings, profits, or other remuneration which sales-contact personnel receive or may expect to receive; or

b. the chances or opportunities for such remuneration.

Any reference to the amount of compensation should be based on actual, typical earnings.

Illustrations

12. Illustrations of advertised merchandise shall conform without exaggeration or essential difference to the appearance of the merchandise actually on sale, or being offered for sale. Any featured price used in proximity to an illustration shall be the price of the illustrated unit.

Chain Referral Selling

13. No industry member shall use an illegal chain referral sales plan or other scheme for the distribution of prizes, premiums, or gifts by illegal lottery.

Multi-Level Sales Plans

14. All multi-level sales plans shall conform to existing laws and avoid exaggerated earnings possibilities.

Cancellation of Contracts

15. Upon receipt of evidence of fraud, misrepresentation, or undue influence, members of the industry shall cancel contracts and refund deposits.

Deceptive Offers

16. No member of the industry shall make misleading or deceptive statements to induce a purchase by representing that the prospect receives "something for nothing"; that a survey or quiz is being conducted; that, because of the standing of the prospect in the community, the person is to receive special gifts or price considerations; that the prospect was unknowingly entered in a contest and won a prize; or that the prospect will receive benefits in price, quantity, quality, gifts, service, or guarantee without disclosing and clearly explaining full details.

The National Association of Direct Selling Companies, together with its individual members, pledge to seek full compliance with these ethical standards by all engaged in direct selling.

The National Better Business Bureau pledges continuing review of advertising and selling practices in the direct selling industry to the end that conformity to these standards may be perfected throughout the entire industry. The National Better Business Bureau pledges its full facilities to implement these standards through a continuing program of review and eliminating through persuasion and cooperation all violations of this code.

The distribution of this booklet should not be considered an endorsement by the National Better Business Bureau of any security, product, service, or concern. This information, which is believed to be accurate and impartial, is for the benefit of consumers and is not to be used for sales or promotional purposes.

THE RIGHT THING TO DO

A Credo of Business Responsibility

NATIONAL BETTER BUSINESS BUREAU, INC.
230 Park Avenue
New York, N.Y. 10017

NATIONAL ASSOCIATION OF DIRECT SELLING COMPANIES
1730 "M" Street, N.W.
Washington, D.C. 20036

Voluntary adherence to high ethical standards preserves integrity and fairness in the direct selling industry, its manufacturers, distributors and salesmen. Faithful compliance with these standards will increase public confidence in the direct selling industry and thereby help to protect the consumer and legitimate business from unfair and deceptive practices.

Direct sellers include all persons, firms, corporations and organizations engaged in the sale or offering for sale of any kind of product by direct personal contact with consumer-purchasers, or prospective consumer-purchasers, at their home or other places not on the premises of the suppliers or sellers. It excludes those retail establishments that distribute primarily through stores, but also employ in-home selling techniques.

The National Association of Direct Selling Companies and the National Better Business Bureau jointly endorse this program of standards and urge others engaged in direct selling to adhere to them.

Scope

These standards apply to oral representations made for the purpose of selling or including the sale of commodities or services marketed by the direct selling process. They also apply to advertisements and advertising promotion in any form.

Accuracy

1. All statements, written or oral, by industry members, shall be accurate, free of the capacity to mislead or deceive the consumer and shall reveal material facts, the concealment of which might cause customers to be misled.

Competition

2. All statements, whether written or oral, by industry members, shall offer merchandise or service on its merits and refrain from attacking competitors or disparaging their products, services or method of doing business.

Guarantees

3. Guarantees and warranties offered by industry members shall be in writing and adequately and completely disclose their exact scope, limitations, and conditions and shall make clear who is responsible for their fulfillment. Guarantees shall not exceed in time the useful life expectancy of a product. Lifetime guarantees shall be avoided. All sales or promotional references to guarantees shall state in immediate conjunction therewith all material conditions and limitations and the name of the guarantor.

Sales Pricing

4. Any price saving claims, whether oral or in writing, shall make clear whether the saving is from:

a. The seller's usual and customary price for the article in the recent regular course of business; or

b. The current going price of the same articles in the market area; or

c. The current going price of comparable articles in the market area.

No product shall be "pre-ticketed" with any price figure which exceeds the price at which it is regularly and usually sold. The use of "list" prices, which are not the usual and customary retail prices, shall be avoided.

Free Offers

5. If the word "free" is used to describe an item available to the public with the purchase of some other article during a limited time period, the purchased article must be sold at its usual and customary price in exactly the same form as to size, quality and quantity. An item or service which is regularly and continuously sold in combination with another item for a stated price shall not be represented as "free."

Bona Fide Offers

6. All offers shall be bona fide and the merchandise offered must be available promptly in reasonably adequate quantities, freely shown and sold without disparagement at the featured price to any customer responding to the offer.

Superlative Factual Claims

7. Members of the industry shall avoid the use of superlative claims, such as "world's smallest unit" or "rated number one," unless based on fact, and sellers must be prepared to substantiate with facts their use of such claims.

Contracts in Blank

8. No member of the industry shall induce a buyer to sign an order form or contract in blank regardless of the reason given for so doing. A completed copy of the contract should always be provided to the buyer.

Negotiable Instruments

9. Members of the industry should state, if such be the fact, that a contract or a negotiable instrument signed by the customer in connection therewith, may be sold or assigned to a financial institution.

Written Orders

10. All members of the industry must deliver to the customer at the time of sale a written order or receipt setting forth the name and address of the seller and all of the terms and conditions

HB 174

DIRECT SELLING ASSOCIATION

1730 M STREET, N.W., SUITE 610 • WASHINGTON, D.C. 20036 • (202)293-5760

February 23, 1971

The Honorable William J. Moran
Chairman
Judiciary Committee
House of Representatives
State Capitol
Juneau, Alaska 99801

Dear Representative Moran:

Please send me the date, time and place of any public hearings scheduled for House Bill 174. Thank you.

the RIGHT of FREE MEN to ENGAGE in LEGITIMATE BUSINESS

Published by National Better Business Bureau, Inc.
230 Park Avenue, New York, N. Y. 10017

the RIGHT of FREE MEN to ENGAGE in LEGITIMATE BUSINESS

THE right of free men to engage in legitimate business is exemplified by the door-to-door salesperson who is so familiar a part of the contemporary American scene. He can trace his ancestry to the very birth of our traditional system of free trade and enterprise. In the beginning, the "Yankee peddler" was one of the few means for the distribution of goods and he played a vital part in the early widening of our frontiers. On foot, on horseback and then in wagons, as roads supplanted Indian trails, he traveled from settlement to settlement and farm to farm bringing the inhabitants the manufactures of the towns and cities. With his stocks of tinware, brass, clocks, jewelry and silverware, hats, shawls and laces, drugs and chemicals, pottery, books, brooms, knives and woodenware, cotton and silk goods, the ancestor of today's direct sellers made an indispensable contribution to the early growth of industrial America. He opened markets for the products of struggling manufacturers and modern house-to-house salesmen often perform much the same function.

PIONEERING SMALL BUSINESSMEN

These venturesome small businessmen pioneered in establishing the right of free men to engage in legitimate business. Their markets expanded with the establishment of roads, canals, the railroad and the automobile. At the same time, these improved means of transportation reduced the number of people who were originally almost entirely dependent on these salesmen to obtain manufactured goods. It became easier for people to supply their wants from retail stores or mail order houses which, with direct selling, constitute our three principal forms of merchandising. That the "Yankee peddler" has survived and greatly multiplied himself in the form of the contemporary direct-to-the-home salesperson would in itself indicate that direct selling makes contributions of definite value to our way of life.

These contributions are not always readily apparent or fully appreciated. Even in Colonial days, house-to-house vendors were the victims of prohibitive or punitive legislation. The history of this country is replete with examples of the folly of building barriers against legitimate trade, and laws designed to accomplish this purpose are invariably repealed or fall into disuse. Nevertheless, and despite all the lessons of experience, there are those who would persist in denying to direct sellers the right of free men to engage in legitimate business.

Copyright 1965, National Better Business Bureau, Inc.

sewing machines, washers and other home appliances; brushes, mops, cleansers and kindred household necessities; animal feeds; children's wear, dresses, foundation garments, hosiery, knitwear, lingerie, raincoats, shirts, shoes, men's and women's suits and coats, uniforms and work garments; cooking ware and tableware; nursery stock; oils, paints and varnishes; fire extinguishers, blankets and household furnishings and specialities of all kinds; plastic housewares; greeting cards, magazines, encyclopedias and other books, not the least of which is The Bible. All these and many other goods or the immediate means of obtaining them, are brought to your door by approximately 2,000,000 direct salespeople.

WHO ARE THE DIRECT SELLERS?

The great majority of these men and women are your neighbors. The original "Yankee peddler" who carried his pack from settlement to settlement has his descendants in the itinerant salesmen of today and these transient vendors are among the best customers of such local business firms as hotels and motels, garages and service stations, laundries, dry cleaners, restaurants and many others. And the money they spend in these establishments has a way of filtering into other business channels in the community.

Nowadays, however, the itinerant is the exception rather than the rule in house-to-house selling. Actually, 88% of all direct salespersons live in the communities in which they carry on their work. The dollars they earn are returned to the community to purchase food, shelter and clothing for themselves and their families. Their savings are entrusted to the safekeeping of local banks. They vote, participate in local activities, go to church, and send their children to school in the community in which they gain their livelihood. Many of them are members of Rotary, Kiwanis, Chambers of Commerce, Parent-Teacher Associations and other organizations through which they make further contributions to community welfare.

Is it fair to single out these direct sellers by subjecting them to restrictive ordinances?

AMERICA'S SMALLEST BUSINESSMEN

According to a nation-wide survey, the average age of the direct salesperson who calls at your door is between 30 and 45, and he will have been engaged in sales work for approximately five years. He is probably married (87%) and has children (79%). Eighty-nine percent of these men and women own cars. Seventy-one percent own their own homes and have the same problems of fuel and repairs and taxes that other home owners do. In fact, 88% pay local taxes in the communities in which they do their selling.

America's smallest businessman, the direct salesperson occupies an established place in the business and social structure of his community. Do you favor legislation that would deny him his right to engage in legitimate business?

DIRECT SELLING IS LOCAL BUSINESS

Aside from these independent salesmen, a surprising number of established local business firms of an average community use direct selling methods. They include:

- Automobile dealers
- Bakeries
- Bottled gas dealers
- Dairymen
- Department stores
- Electric light and power company
- Electric appliance dealers
- Frozen food dealers
- Fuel oil dealers
- Gas company
- Insurance agents and agencies
- Laundries
- Newspapers
- Oil burner dealers
- Plastic houseware dealers
- Real estate agencies
- Refrigerator dealers
- Roofing, siding and insulation dealers
- Storm window dealers
- Sewing machine agencies
- Truck gardeners
- Vacuum cleaner dealers
- Venetian blind dealers

Local business firms like these use direct selling to obtain new customers, to introduce a new product or service and for other purposes which account for a major portion of their business.

Clubs and fraternal organizations, the Girl Scouts with their cookies, the most respected groups in the community frequently use direct selling as a means of raising funds for useful civic and charitable purposes.

DIRECT SELLING AND RELIGION

The churches of the community often make effective use of direct selling methods. For example, most religious newspapers and periodicals obtain their circulation through house-to-house canvassing. Referring to the Green River Ordinance, the reverend director of the nation's largest Catholic magazine has stated:

> "Ordinances of this type, even if not strictly enforced, would be disastrous to us and have great harm for the cause of religion, since it would be impossible to keep employees if they were constantly living under the threat of being harried by the police in various communities."

Other clergymen have declared that the ordinance would interfere with the sale of Bibles and Bible-reading materials to people in their homes. "It violates the very commission and injunction given by Jesus Christ to evangelize the whole world with His gospel," said the executive secretary of the Board of Home Missions of the Baptist General Conference.

DIRECT SELLING AND EDUCATION

The Bible is the greatest, but only one of the great books, which require direct selling methods for their distribution. It is a fact that every great reference work and encyclopedia is dependent for its existence on sales direct to the home. Only in this way can the educational value and general usefulness of these books be adequately explained by a trained representative. The success of modern educational methods depends upon the widespread availability of this kind of reference material, and direct selling is the only way that has been found to market these books successfully without prohibitive cost to the buyer.

Direct selling is a major factor in the great circulations of the magazines of America. And a big share of the circulations of most of our daily newspapers is from orders placed with carrier boys.

Direct selling contributes to the educational opportunities which are so largely responsible for the greatness of our nation in still another way—through the effective use of college students who must earn their education. It gives remunerative vacation time employment to thousands of students, and thousands more augment their income by door-to-door sales on college campuses and their environs during the school year.

AIDING THE HANDICAPPED

Others who must limit themselves to part time activity find direct selling peculiarly adapted to their needs because the direct salesperson is his own boss. As an independent businessman, he can tailor his working hours to fit his individual circumstances, recognizing that his earnings will be in direct ratio to his own efforts and his own ability.

Widowed mothers may find a career in direct selling the only means by which they can support their families and, at the same time, perform their household duties. Persons living on inadequate pensions and others who need more income often turn to direct selling to increase their earning capacity. Housewives welcome the opportunity for part time work that direct selling offers.

INTRODUCING NEW PRODUCTS

A list of the products, now in everyday use but originally introduced by direct sellers, would read like an inventory of the average, comfortable American household. There are certain kinds of products which seem to demand the direct demonstration method of selling to introduce them when they are first placed on the market. Apparently it is not enough to **tell** people how they can benefit from the possession of these goods; they must be **shown** in their own homes. The vacuum cleaner, the washing machine, the sewing machine and many others were introduced to the American public in this way and continue to be sold economically and effectively by the same methods. Direct selling is largely responsible for the modernization of American home equipment, comforts and labor saving features.

The safety razor and many small articles selling at a low price have been equally dependent on the pioneering efforts of the direct salesperson to introduce them to the public. Can you imagine a modern kitchen without a can-opener? The inventor and original manufacturer of one of the finest can-openers on the market tried in vain to obtain a market through the channels of jobber and retailer. Imminent bankruptcy practically forced him to turn to solicitors to distribute his invention. Through their efforts it rapidly gained such a good reputation that, three or four years later, the inventor was able to resume selling through stores. He did so with great success because the public demand had now been created by direct selling.

CREATING CONTINUING DEMAND

Thus, the door-to-door salesman is a creative, educational force in our economy. He does not take a market away from the local merchant so often as he creates a new market where none existed before. In the long run, the retail merchant benefits from the creative selling and personal demonstrations of the direct seller. He is the pioneer who introduces the new product. He is the educator who makes the consumer aware of his need for the merchandise. He creates the buying desires which develop into an expanding market. The result is that every sale made by the direct seller is multiplied over and over again and these sales, for the most part, go to the local merchant.

DIRECT SELLING AN EMPLOYER AND BUYER

The fifteen hundred companies engaged in direct selling employ more than a million workers to manufacture their merchandise and distribute it to the 2,000,000 direct salespersons. This is in addition to the indirect employment given to thousands of other employees of railroads, trucking companies and local warehouses utilized in the process.

The suppliers of direct selling companies are located in cities and town all over the United States. Mining towns, paper towns, lumbering towns, manufacturing towns, railroad towns—all are part of the web of industry furnishing the raw materials, the tools, the parts, the finished products and the services that go into the manufacture and merchandising of the goods that are brought to your home by the door-to-door salesman. For example, there are thirty-two different parts, produced by as many companies, which must be purchased for the manufacture of a single home-sold vacuum cleaner.

fteen different kinds of tools and equipment must be purchased from other manufacturers to build the cleaner. Dozens of other auxiliary services and materials are utilized by this direct selling manufacturer. The suppliers and distributors to direct selling are a diversified cross-section of industrial America. A survey of a single major city, Chicago, disclosed over 1600 companies involved in supplying basic merchandise and material to the direct selling industry.

DIRECT SELLING AND LABOR

The arbitrary abolition of direct selling through widespread adoption of restrictive ordinances would have a crippling effect on industrial production that would be felt throughout the length and breadth of the land. Unemployment figures and relief rolls would soar because American business could not fail to be grievously injured by the mortal wounding of one of its integral parts. This threat to employment has evoked from labor leaders widespread condemnation of such ordinances.

ABUSES IN DIRECT SELLING

It has been argued that prohibitive or restrictive legislation is needed to protect the citizens of a community from being defrauded or abused by villainous salesmen. There is a small minority of fraudulent direct sellers just as there is a small minority of dishonest retailers and mail order firms. Yet, out of 515,662 complaints received by the nation's Better Business Bureaus in a given year, only one and one-half percent involved direct selling generally.

Honest direct sellers carry credentials to identify themselves as the bona fide representatives of honest companies. They do not demand payment in full until merchandise is delivered nor do they accept money without issuing a receipt. They leave a copy of any contract that has been signed.

The direct selling industry as a whole has pledged its members to a course of fair dealing with its customers. Witness the following Statement of Principles adopted by the National Association of Direct Selling Companies and its member firms on September 17, 1954:

We believe:

1. That salespersons, by creating demands for goods, help provide the American people with employment and the world's highest standard of living and that those who devote their lives to selling are making important contributions to the welfare of our nation.
2. That salespersons in all fields must observe the highest standards of integrity, frankness and responsibility in dealing with consumers, and that, in all selling:
   (a) Descriptions of products must be truthful, and terms of sale clearly stated;
   (b) Honesty is required in the approach to a sale; and
   (c) Courtesy to a prospective customer, and consideration of his needs, are prime essentials of all selling.
3. That the National Association of Direct Selling Companies endorses the efforts of national, state and local organizations, such as the National Better Business Bureau, the Chamber of Commerce of the United States, and local Better Business Bureaus, Chambers of Commerce and Commercial Clubs to establish and maintain high standards of truth and fair practices in the sale of all merchandise.

The overwhelming majority of direct sellers are honest vendors of honest merchandise. To demolish a multi-billion dollar industry in the hopes of catching a few thieves on its fringe is like burning down a barn to roast a pig. It violates a cardinal rule of American justice—deeply rooted in the fundamentals of fair play—that it is better for some who are guilty to escape than for the innocent to suffer.

SHALL THE INNOCENT SUFFER?

Curiously, while the prohibitive or restrictive type of ordinance would effectively bar from business the great majority of law abiding direct sellers, it offers no guarantee of protection against the swindler. Laws can be devised to **punish** fraud but no laws have ever been found which would **prevent** the perpetration of fraud by those who have no respect for the law.

Those householders who prefer to have no dealings with direct sellers have a simple remedy. They can post their premises, secure in the knowledge that legitimate salespersons will not trespass upon their privacy. Any irresponsible or dishonest vendors who do so should be reported to the police. There is every reason to believe, however, that the majority of people welcome the special services the direct seller brings to their door and would resent a law that dictates against their buying as they choose. In city after city where prohibitive ordinances have been submitted to popular vote they have been roundly defeated.

Every community has laws, or should have laws, to punish the minority of direct sellers and other business renegades who are guilty of fraud, misrepresentation or deceit. Enforcement of these laws would seem to be the practical solution to the problem where it exists. It can be done without denying to free men the right to engage in legitimate business serving the needs and convenience of the community and contributing to the economic strength of the nation.

RESTRICTIVE ORDINANCES

More than thirty years ago, the little town of Green River, Wyoming, passed an ordinance, which made it a nuisance, punishable as a misdemeanor, for a person to go in and upon a private residence for the purpose of selling merchandise unless the salesman had been requested or invited to do so by the occupant of the premises. Laws similar to this Green River Ordinance have since been adopted by a number of, for the most part, small communities.

For all practical purposes, the effect of these ordinances, if enforced, is to destroy direct selling as a lawful means of conducting business. In fact, as the late Chief Justice Vinson of the United States Supreme Court stated in a notable decision:

"In my view, the ordinance is a flat prohibition of solicitation."

Naturally, the constitutionality of any law that denies to free men and women the right to engage in legitimate business has been and will be vigorously challenged. Even though the Supreme Court of the United States ruled in 1951 that the Green River Ordinance does not violate **Federal** constitutional law the ruling in no sense legalized the ordinance in communities where it has been held to violate **State** constitutional law. It did not take away from the states the right to determine the validity of the ordinance for themselves under the provisions and limitations of their basic laws. In the 19 states where the Green River Ordinance has been challenged, the highest courts of 12 states have ruled that this type of ordinance is unconstitutional in those states.

Some communities have passed other types of ordinances which are also, in effect, prohibitive of direct selling. Some have adopted registration requirements with long waiting periods before the direct seller can legally go to work. Others have levied fees that, in the aggregate, impose an intolerable toll on legitimate direct selling firms and the people selling their merchandise. Some ordinances require that these sales people submit themselves to fingerprinting and photographing, like criminals; others require health certificates. Regardless of how well intentioned, these and similar restrictive ordinances are in effect prohibitive of direct selling because the survival of honest direct selling is jeopardized by such discriminatory restrictions.

Any governmental unit has, of course, the right validly to exercise its tax and police powers. One may ask, however, whether these powers should be exercised in a prohibitive manner, singling out direct selling—from all other forms of selling—for regulation, taxation and other discriminatory measures? The National Better Business Bureau believes that such legislation violates the spirit of fair play that has made American business great.

Quite apart from legal considerations, thoughtful citizens of every community where prohibitive or restrictive ordinances are proposed should ask themselves whether the prohibition of door-to-door selling will serve their interests, the interests of their community, and the broader interests of the nation.

WHAT IS DIRECT SELLING?

Direct selling is one means of getting goods out of the hands of the producer and into the hands of the consumer. Like the retailer and the mail order house, the door-to-door salesman is a cog in the machinery of distribution. The selling job is just as important as packing, transportation, warehousing or any other part of the distributive process. A manufacturer can produce an abundance of goods and transport them to every corner of the country but, unless the goods are sold, he will have to go out of business. This is not only bad for him and his employees but also has broad social implications. For every consumer is dependent, directly or indirectly, on production for his income.

Direct selling has a great deal in common with advertising. In fact, the one often complements the other. Both sell by the process of "making known." By showing how a product is desirable, how it can make life easier, simpler, or happier, they both create a want but, at the same time, explain how one may gratify that want. Both bring these want-satisfying goods to public attention. Advertising also tells how and where one may buy them and the house-to-house salesman carries the process one step further by bringing the actual goods to the customer or acting as his agent in their procural.

The primary reason for the existence of direct selling is that many manufacturers have found that, for producer and consumer alike, it is one of the quickest, cheapest and most effective means of selling that has been devised, particularly for the introduction of new products. With respect to certain kinds of goods, no other truly effective means of selling has yet been discovered. Furthermore, housewives welcome the comfort, convenience, service and personal demonstrations which the direct seller brings them. Business operates under the stern injunction of economic necessity to please its customers. If they did not like this method of selling, it would have passed out of the picture long ago.

SCOPE OF DIRECT SELLING

Because direct selling fills a vacuum which might otherwise exist in the distributive process, it contributes significantly to our democratic economy. It has increased in scope and stature until today there are in the United States approximately 1500 big and little companies and manufacturing concerns. They do an annual multi-billion dollar business—no one knows the exact amount—part of which is shared by almost every community. The wisdom of abolishing an industry of such magnitude, giving employment to hundreds of thousands of people, may be seriously questioned.

These direct selling companies manufacture and distribute countless necessities and luxuries which have come to be regarded as necessities under the American standard of living. The list includes food products, toilet articles, medicinal preparations and insecticides; vacuum cleaners,

TO ALL LEGISLATORS

The Uniform Consumer Credit Code was recently introduced in the House as HB #174. The Alaska Retail Association strongly supports this measure as the most equitable legislation available in the area of consumer credit. We feel the code would solve the vast majority of problems usually associated with this portion of our economy -- both from the standpoint of the credit industry and the consumer.

We are pleased to enclose a "Question and Answer" booklet which, we believe, will provide you with complete, concise information on UCCC. It covers all the basic provisions of the code and includes much valuable information on the background of its development.

We expect that hearings will be held on UCCC sometime within the next 30 days, depending of course on the legislative work load. Meanwhile, we hope you will take the time to go over the enclosed literature.

We welcome any comments or questions you may have on this important legislation. The undersigned can be contacted either at Room 432, Baranof Hotel, Juneau or at the above captioned address.

Respectfully Yours:

Dean Ehrich

THE UNIFORM CONSUMER CREDIT CODE

Questions and Answers

Q. What is the Uniform Consumer Credit Code?

A. The Uniform Consumer Credit Code is a balanced consumer protection law considered by most authorities to be the finest consumer protection legislation ever written.

Q. Who prepared the UCCC?

A. The Code was prepared by the National Conference of Commissioners on Uniform State Laws.

Q. What is the National conference?

A. The Conference is an organization made up of Commissioners of the 50 states whose function it is to draft uniform legislation to be offered to states for enactment.

Q. How many Commissioners are there in the National Conference?

A. The average number of Commissioners from each state is three making a total of 150 for the Conference as a whole. Provisions for appointment of Commissioners is made by statute with appointments customarily made by the Governor.

Q. What are the qualifications of Commissioners?

A. Commissioners must be either practicing lawyers, judges or law school professors.

Q. Are Commissioners paid for their services?

A. The Commissioners serve without compensation but are reimbursed for most out-of-pocket expenses.

Q. What other laws have been written by the National Conference?

A. The organization which has been in existence since 1892 has drafted several other uniform state laws. Examples of such laws which have been widely enacted include: The Uniform Sales Act, the Uniform Stock Transfer Act, more recently, the Uniform Commercial Code.

Q. What is the relationship of the Commissioners to their respective states?

A. Commissioners are officials of the respective states which they represent and, as such, are public servants with all of the responsibilities and duties incident to public service.

Q. Just how does the role of public servants influence the work of the Commissioners?

A. Commissioners accept their responsibility as public servants with the highest ethics. Every action of the National Conference is determined fully by the public responsibility felt by its members.

Q. How does the Conference draft uniform legislation?

A. The Conference works thoroughly and slowly. Work on the Uniform Commercial Code continued for 12 years before it was finally offered to the states for enactment. The Uniform Consumer Credit Code required more than 4 years in its preparation.

In drafting uniform legislation the Commissioners build solidly on existing law and practice but where they find that by reason of historical accident or some like cause existing laws or practices in their judgment are unsound, archaic or sometimes silly they do not hesitate to provide for their repeal.

Q. Why did the Conference draft Consumer Credit legislation?

A. The major underlying reason for drafting Uniform Credit legislation is the phenomenal growth of consumer credit during the 20th century. The Conference notes that by the latest Federal Reserve figures there is close to 100 billion dollars of installment consumer credit outstanding at any one time in the Unites States, and if household mortgage credit is added to this figure the aggregate total is in the neighborhood of 330 billion dollars. The Conference felt that the extension and growth of such credit are not only matters of social and economic concern, but, also, are matters of major consequence to which the law must adjust.

Q. What is meant by the term "adjust"?

A. As consumer credit developed it became apparent that credit of this type could not live within low rate ceilings. Therefore, a steady series of legal principles or special legislation evolved to circumvent and avoid low rates. This resulted in a proliferation of legislation throughout the nation and despite such proliferation there were still widespread consumer abuses. In 1957, recognizing the need of uniform legislation, the Council of State Governments requested the National Conference to draft such a Credit Code. The Code project got underway in 1964. By that time the Conference was convinced that the need for extensive study and a major drafting effort was clear.

Q. What trend did the Conference follow in developing the Code?

A. The Conference decided to deal with the entire subject of Consumer Credit comprehensively and on fundamental lines, to review all laws relating to Consumer Credit in depth, to consider the background and reasons for Consumer Credit and economic and social aspects of it, and to draft legislation that would treat the entire subject of Consumer Credit on scientific lines rather than a continuance of historical acts.

Q. In defining the Code, the term "balanced" Consumer Protection law has been used. What does this mean?

A. The UCCC restructures all laws imposing maximum charges on the cost of money or credit, regulates consumer credit generally and brings substantially all consumer credit transactions under one comprehensive code. It imposes a single and standard set of maximum charges on almost all types of consumer credit, and except in the case of extortionate charges frees substantially all types of business credit from any maximum charge or rate ceiling. The Code puts all creditors extending consumer credit on virtually an even or balance footing so far as maximum charges and control of balances are concerned. It stimulates competition by eliminating artificial barriers to entry into the credit granting business and be requiring disclosure of the cost of credit both in terms of dollar amounts and in terms of an annual percentage rate. It is a balanced code, fair to all creditors operating in the consumer credit field and fair to consumers.

Q. Should consumer legislation be drafted and enacted at the federal or state level?

A. The National Conference felt that the Code should be enacted at the state level. The Commissioners stated that between a particular buyer and a seller, or a particular borrower and lender both located in the same state it is quite difficult to think of a much more local type of transaction than consumer credit. They, also, pointed out that consumer credit is usually a transaction of small size, ranging from a less than $5.00 sale as a part of a store revolving account or a shopper's credit card operation to purchase of automobiles on time or borrowing from the installment credit department of banks ranging in most cases from $100 to $3,000. The Conference, also, felt that if the Federal government took control of Consumer Credit entirely this would constitute a very large shift in control from the state to the federal government of an important aspect of American life.

Q. What does the federal government think about federal-state control of Consumer Credit?

A. The Banking & Currency Committees of the Senate and House of Representatives in considering the recently enacted Federal Truth-in-Lending Act expressed an awareness of the federal-state problem and were reluctant and hesitant to pre-empt from the states the field of consumer credit. As a result, the recently enacted federal bill included a provision that the Board of Governors of the Federal Reserve system "shall exempt from the requirements of the Act any class of credit transaction which the Board determines is subject to state law which requires disclosure substantially similar to the federal requirements and contains adequate provisions for enforcement." Thus, it follows that the federal government definitely provided a way and a means by which consumer credit may remain a state controlled field.

Q. Will adoption of the Uniform Consumer Credit Code exempt Alaska from supervision of consumer credit by the federal government?

A. Yes, According to all current information available the UCCC meets the Rederal Reserve test and would divest the state of federal supervision. As far as the Turth-in-Lending Act supervises disclosure and related provisions, the Code does likewise and authorities say is even more stringent than the federal law. In addition, the UCCC goes further in that it sets maximum ceilings and correction of virtually all known consumer abuses.

Q. We have been told by some that if the Legislature copies the Federal Truth-in-Lending Act into Alaska law the federal government will divest itself of control of credit in the state. Is this true?

A. Not necessarily. There is a wide field of interpretation regarding Federal Reserve acceptance of supervisory staffing, regulations, transaction requirements etc.

Q. Does the Code contain the regulations pursuant to the Federal Truth-in-Lending law?

A. The UCCC bill, as introduced in the Alaska Legislature, includes all regulations pursuant to the federal act.

Q. What confusion could arise out of copying the federal law into state law rather than passing the UCCC?

A. (1) There is a question as to whether the state would be divested of Federal supervision.
(2) Such action may lead to conditions in which creditors would be required to make double disclosures.
(3) The law would be a "bits and pieces" type of legislation which usually creates confusion in the marketplace
(4) Such action is completely unnecessary since the federal act went into effect on July 1, 1969, thus negating any need for a small "Federal Act."

Q. Is exemption from Federal supervision a strong argument for the passage of the UCCC?

A. Yes. Most Alaskans desire to retain jurisdiction over consumer credit and creditors in the consumer credit field of Alaska certainly do not want to operate under two sets of laws. This fact is one of the major reasons why the enactment of the Code is advisable.

Q. Were attempts made to influence the preparation of the Code in order to preserve segmented consumer credit?

A. Yes. Strong pressures were brought to bear upon the National Conference by opponents of consumer protection legislation to produce more of the same confusion which already exists throughout the nation in the consumer credit field. The status quo is referred to as segmented with segmentation being based to a considerable extent on types of creditors, that is, small loan companies, retail merchants, commercial banks, credit unions etc. The Conference was urged to preserve all this segmentation, some or all of the variations in maximum rate ceilings on finance charges, and some or all of the varying methods for starting ceiling rates. In fact, the Conference was pressured to do nothing more than compound the existing confusion.

Q. How did the Conference react to this pressure?

A. The National Conference took the position that a policy of preserving and attempting to improve one or more existing types of legislation would do nothing more than preserve and stratify types of classifications that are now causing confusion and have partially broken down. The Conference felt it could make no contribution unless a comprehensive approach was adopted.

Q. How much of the installment credit outstanding in the United States do the various segments of the credit industry possess?

A. As of December 31, 1967, the percentage share of different segments of the consumer credit industry in installment consumer credit was as follows:

Commercial banks	43.6%
Sales finance companies	21.6%
Credit unions	11.8%
Consumer finance (small loan) companies	8.1
Other financial institutions insurance companies, savings & loan associations, etc.)	2.5%
Retail outlets	12.4%
Total	100.00%

Q. What limits did the Conference feel were needed in the Code's coverage?

A. The Code covers consumer credit as opposed to business credit.

Q. Why is not the purpose test a part of the Code?

A. There are difficulties in applying a pure purpose test. Actually, purpose is nothing more than the mental intent of an individual. The Code made the distinction between consumer credit and business credit on the basis of whether the debtor is a natural person or whether the debtor is an organization. Organization as defined includes corporations, business trusts, partnerships, associations or governmental entities or bodies.

Q. Are the Code's provisions fair and equitable to both consumers and the credit industry?

A. Yes. The provisions are workable and provide a greatly superior base for handling consumer credit than the mass of legislation presently on statute books throughout the nation. Although some provisions may appear to favor industry and others favor consumers, in actual fact the provisions will be beneficial to both sides of the economic spectrum.

Q. How does the Code affect usury provisions?

A. The Code provides for the outright termination of all usury provisions and rate ceilings in the case of most business credit. The reasoning which supports this principle is that the operation of the money market and the economic rules of supply and demand are better control factors for interest charges in business credit than any legislation. It, also, notes that business debtors can bargain satisfactorily without the need of legislative assistance. The operation of existing general usury statutes has become so much an empty shell and so generally absurd in its unreasonable and haphazard application that they should be repealed outright as to substantially all business credit, according to most authorities.

Q. In the case of consumer credit, are rate ceilings preserved?

A. Rate ceilings are preserved but are evenly distributed across-the-board to all types of consumer credit.

Q. What is consumer credit as defined by the Code?

A. Consumer credit is credit extended to natural persons for personal, family, household or in some instances agricultural use.

Q. Is there a dollar limitation in regard to the jurisdiction established in the Code?

A. Yes. Consumer credit is credit extended up to a dollar jurisdictional amount of $25,000 except in the case of consumer credit secured by real estate where there is no jurisdictional limit.

Q. What are the rate ceiling found in the Code?

A. The rate ceiling prescribed is on a graduated basis with a maximum of 36% per annum on the first $300, 21% per annum on balances of $300 to $1,000 and 15% per annum on balances above $1,000 with the composite rate resulting from these graduated ceilings leveling off at a base ceiling of 18% per annum on balances from $2,500 to $2,900 and above. A major exception from these standard rate ceilings is in sales credit revolving account where the ceilings are 24% per annum or 2% per month on the unpaid balance on the first $500 of balance, and 18% per annum or 1½% per month on the unpaid balance in excess of $500.

Q. How does the Conferenod justify the standard recommended rate ceilings?

A. First, the Conference emphasizes the basic principle that legislation should not attempt to fix rates in the sense that public utility commissions orescribe rates that may be charged by public utilities. Rather, the Conference says the legislation should do nothing more than fix maximum ceilings which may not be exceeded but should be at a level to permit the extension of almost any type of consumer credit through legitimate channels.

Q. Upon what does the Code rely to fix effective rates?

A. The Code places reliance upon the operation of competition to keep actual rates charged below the legislative ceiling prescribed.

Q. How does the Code provide ways to see that the competition will keep lower than established ceiling rates?

A. The Code notes competition, in order to keep rates low, should be permitted to operate to a maximum extent and provides for "easy" entry into the lending field to make it as competitive as the retail field. This means that as far as is possible all extenders of credit must compete on equal terms with all other extenders of credit. It, also, means that a consumer must be able to intelligntly shop for credit.

Q. The Code, to encourage competition, provides "easy" entry into the lending field. What does this mean?

A. "Easy" entry refers to the provision of the Code which makes it possible for individuals or businesses to enter the cash loan fields without being restricted b artificial barriers.

Q. Are "easy" entry lenders regulated?

A. Yes. The Administrator will establish regulations governing such lenders and the Code, itself, provides that –

(1) Such lenders must secure a license from the Administrator.
(2) They cannot loan money for more than 18% per annum.
(3) They cannot accept deposits.
(4) They must pay the same fee to the Administrator's office on credit outstanding during the year as all other lenders.
(5) They must adhere to all disclosure requirements.
(6) They must abide by all consumer protection provisions of the Code.

Q. Why do banks have regulations applicable to lending money not placed on "easy" entry lenders?

A. Banks use depositors' money for lending purposes and the various governments provide regulations to protect the depositor. "Easy" entry lenders cannot accept deposits and they will be lending their own personal money.

Q. Can "easy" entry licenses be revoked?

A. Yes. Any irregular practice is sufficient cause for revocation of license.

Q. Are these basic principles of the Code?

A. The Code, as a whole, is framed on these principles.

Q. Does this establish a new principle in American thinking?

A. No. These principles involve no novelty in basic American thinking. In most areas of economic life in America price-fixing by governmental fiat has been avoided rigorously. Price fixing is inherent in general usury statutes and actually constitutes an exception to the traditional American economic view.

Q. Opponents to the Code say that the rate ceilings as applied to the total consumer credit market will cause an increase in finance charges to the consumer. Is this true?

A. This is not true. Studies made by the National Conference point out that competition does in fact keep interest and finance charges down as much in the case of extension credit as in other types of transactions. Examples include interest rates charged to corporations which under existing law in 30 states do not have full benefit of usury statutes. In these states interest rates have been no higher than in states where usury statutes exist. In Massachusetts and New Hampshire there have been no general usury statutes for many years but the general level of interest

rates and finance charges in these states are not significantly different from those in other states. In automobile financing, rates actually charged are in most cases materially lower than ceilings prescribed in the motor vehicle retail installment sales act.

Q. What fact did the Conference recognize as primary in setting the rate ceilings in the Code?

A The Conference recognized that rates must be sufficient to cover the cost of money, the cost of administering the credit extended, and the risk of nonpayment.

Q. What other factors operate in the cost of granting credit?

A. The Commissioners stated that the cost of money varies in relation to general money market conditions and that the cost of money today is higher than for many years, perhaps, as far back as the stock market crash in 1929. The Conference, also, pointed out that in consumer credit the cost of administering the credit is a most important factor. Commissioners noted one study which showed the average operating expenses other than bad debt reserves of many major national finance companies to be $10.40 on the first $100 of each loan.

Q. Does this explain the higher rate ceilings prescribed for the first $300 of any transaction?

A. Yes, the high cost of setting up any credit transaction on the books of a credit extender explains the high ceiling rate prescribed for the first $300. Actually, the rates prescribed fall at about the midpoint of existing rate limitations in the small loan area and are somewhat above present rates in the area over $3,000.

Q. What did money market studies reveal to the National Conference?

A. Money market studies and economic advice given to the National Conference consistently indicated that the principal effect of fixing maximum rates at a higher or lower level is to permit larger or smaller numbers of consumers into the credit market. High maximums permit more persons to obtain credit from legitimate sources. In contrast, low maximums decrease the number of persons who may obtain credit and drive the borrower and/or buyer to illegal loan sharks.

Q. Is competition the primary factor in establishing effective rates favorable to consumers?

A. Yes. The Code's provisions for improved operation of competition in credit are calculated to keep the rates actually charged well below the maximum ceilings stated.

Q. What are the disclosure requirements in the Code?

A. The Code requires the seller to set forth:
(1) What is being sold.
(2) The cash price.
(3) The down payment.
(4) The balance owing.
(5) Amount payable for registration or certificate of title fees not included in the cash price.
(6) The amount of official fees and taxes.
(7) A description of any insurance provided and if a separate charge is made the amount of the charge.
(8) In the case of a sale of land the amount and a description of the closing costs.
(9) The total amount financed.
(10) The dollar amount of the credit service charge.
(11) The total unpaid balance.
(12) The annual rate of the credit service charge.
(13) The payment schedule
(14) The charges to be made in the event of default.
(15) A description of any security interest taken.

Q. Will the disclosure requirements of the Code enhance competition as a basic principle set forth in the Code?

A. Yes, such disclosure requirements complement quite closely the maximum rate provisions of the Code. They do so by developing a single set of measuring standards by which consumers may shop for credit. Thus, they enhance competition which is relied upon by the Code to keep rates reasonably low.

Q. Does the Code place limitation on creditors' remedies?

A. Yes. The Code contains a number of limitations on creditors' remedies. This is the true reason that there is opposition to the adoption of the Code since these remedies are pure consumer protection.

Q. Does the Code prohibit the use of multiple agreements?

A. Yes. Sellers are prohibited from using multiple agreements for the purpose of obtaining a higher finance charge than would be otherwise permitted.

Q. Are sellers and lessors prohibited from taking negotiable promissory notes to evidence consumer obligation?

A. Yes. The promissory note use has been one of the major consumer abuses where instead of selling the actual installment contract a promissory note has been utilized as a negotiable instrument. Producers of the notes have been held not responsible in any way for claims and defenses of the buyer against the seller.

Q. Does the Code provide that assignees shall be subject to claims and defenses of the buyer against the seller?

A. Yes. The Code provides that an assignee is equally responsible for the quality of goods and services as the original seller. This is an issue of long standing and it is admitted in the consumer credit field. Sellers and banks and finance companies buying sellers' papers argue that assignees shall not be subject to claims and defenses of the buyer against the seller. Consumers, on the other hand, argue with equal strength that a great portion of consumer abuses are traceable to a bank or finance company which is free from claims and defenses of the buyer against the seller.

Q. What is the opinion of merchants regarding this issue?

A. The legitimate merchant does not fear this situation nor should any bank of finance company which does business with legitimate merchants since it has been historically true in Alaska that legitimate stores make restitution for defective goods and services.

Q. Does the Code place controls upon ballon payments?

A. yes. If any scheduled payment is more than twice as large as the average of earlier scheduled payments, the buyer has a right to refinance the amount of that payment at the time it is due without penalty. The terms of the refinancing must be as favorable to the buyer as the terms of the original sale.

Q. Does the Code place limitations on the amount and type of security that may be taken in sales transactions?

A. Yes. A seller may take a security interest
(1) in the property sold;
(2) in goods upon which services are performed;
(3) in property in which goods sold are installed; or
(4) in land to which the goods are affixed or which is maintained, repaired or improved as a result of the sale of the goods or the services, if, in the case of a security interest in land, the debt secured is $1,000 or more or in the case of a security interest in goods the debt secured is $300 or more.

Q. Does the Code make any provisions regarding the assignment of earnings?

A. Yes. A seller or lessor may not take an assignment of earnings of the buyer or lessee for payment or as a security for payment of a debt arising out of a consumer credit sale or a consumer lease.

Q. What does the Code do in respect to referral sales?

A. Referral sale contracts cannot be entered into by sellers and buyers. Any inducement to enter into such a contract is in violation of the Code and the buyer of lessee at his option may rescind the agreement or retain the goods delivered and the benefit of any service performed without any obligation to pay for them.

Q. May terms by changed in the case of revolving charge accounts?

A. Yes. If a change is made in the terms of a revolving charge account the merchant must give the buyer written notice at least 3 times with the first notice issued at least six months before the effective date of the change.

Q. Are there any exceptions to this requirement?

A. Yes. The notice specified is not required if:

(1) The buyer after receiving notice of the change agrees in writing to the change;

(2) The buyer elects to pay an amount designated on a billing statement as including a new charge for the benefit offered to the buyer when the benefit and charge constitute a change in terms and when the billing statement also states the amount payable if the new charge is excluded;

(3) The change involves no significant cost to the buyer;

(4) The buyer has previously consented in writing to the kind of change made and notice of the change is given to the buyer in two billings cycles prior to the effective date of the change; and

(5) The change applies only to purchases made or obligations incurred after a date specified in a notice of the change given in two billing cycles peior to the effective date of the change.

Q. What constitutes notice in regard to changes in revolving credit account?

A. The notice is given to the buyer when mailed to him at the address used by the seller for sending periodic billing statements.

Q. Does the Code provide for a cancelling provision in home solicitation sales?

A. Yes. A buyer has the right to cancel a home solicitation sale until

midnight of the third business day after the day on which he signs the agreement or offer to purchase.

Q. What are the technical procedures in regard to cancellation?

A. Cancellation occurs when the buyer gives written notice of cancellation to the seller.

Q. Where does the Code require that such notice be sent?

A. The notice must be sent to the address listed in the agreement or offer to purchase.

Q. What other provisions for cancellation does the Code provide?

A. The notice of cancellation if by mail is given when the notice is properly addressed with postage prepaid and deposited in a mail box.

Q. Does the notice of cancellation have to take a particular form?

A. No. Notice of cancellation is sufficent if it indicates by any form of written expression the intention of the buyer to cancel the home solicitation sale.

Q. Are there any circumstances under which the buyer may not cancel a home solicitation sale?

A. Yes. The buyer may not cancel a home solicitation sale if he has requested the seller to provide goods or services without delay because of an emergency and the seller in good faith has made a substantial beginning of performance. The buyer also may not cancel a home solicitation sale if the goods cannot be returned to the seller in substantially as good condition as when received by the buyer.

Q. Does the Code provide for the return of goods given as collateral or the down payment by the seller in cancelled home solicitation sales?

A. Yes. Within 10 days after a home solicitation sale has been cancelled the seller must return any payments made by the buyer and any note or other evidence of indebtedness. If the down payment included goods traded the goods must be returned in substantially as good condition as when received by the seller.

Q. Is there a provision made whereby the seller may retain a cancellation fee?

Yes. The seller may retain a cancellation fee amounting to 5% of the cash price but not exceeding the amount of the cash down payment. However, if the seller fails to comply with any obligation imposed by the Code, or if the buyer voids the sale on

any ground independent of his right to cancel provided by the provision of the Code, the seller is not entitled to retain a cancellation fee.

Q. What does the Code provide in regard to the duty of the buyer to the seller of the home solicitation sale?

A. Upon demand, the buyer must give to the seller any goods delivered by the seller pursuant to the sale, but he is is not obligated to deliver the goods to any place other than his residence. If the seller fails to demand possession of the goods within a reasonable time after cancellation or revocation, the goods become the property of the buyer without obligation to pay for them. The Code states that 40 days is a reasonable time. The buyer is required to take reasonable care of the goods in his possession both before cancellation or revocation and for a reasonable time afterwards during which time that goods are otherwise at the seller's risk.

Q. Does the Code provide limitations on garnishment?

A. Yes. The maximum part of the aggregate disposable earnings of an individual for any workweek which is subject to garnishment to enforce payment of a judgment arising from a consumer credit sale, consumer lease or consumer loan may not exceed the lesser of:

(1) 25% of the disposable earnings for that week; or

(2) The amount of which his disposable earnings for that week exceed 40 times the Federal Minimum Hourly Wage. Since the Federal Minimum Hourly Wage at this time is $1.60, this means $64.00.

Disposable earnings as defined by the Code means that part of the earnings of an individual remaining after the deductions of those earnings of amounts required by law to be withheld.

Q. What does the Code provide regarding discharging employees for garnishment?

A. The Code states emphatically that no employer shall discharge an employee because his wages have been subject to garnishment.

Q. What does the Code say in regard to repossession of goods and suit for balance due?

A. The Code, as introduced, provides that the seller may repossess goods with a cash price under $1,000 where the debt is not being repaid or may sue for the balance due but the seller may not do both. He must make a choice between the two actions. Deficiency judgments are forbidden.

Q. We note that the Code contains language in regard to unconscionable agreements and conduct. Just what does this section do?

A. The Conference gave a great deal of study to the fact that the greatest majority of consumer abuse is traceable to a relatively small proportion of fringe operators who do not hesitate to over-reach whenever they can whether inside or outside the law. The question arose as to how a statute can provide protection against this kind of conduct. The Commissioners felt that realistic legislation is of limited value unless it has some language pointed toward this problem and believe there is no escape from having that language flexible enough to adjust to the great variety of schemes and practices that an ingenious type of individual may conceive. Therefore, the Code provided "Unconscionability" to meet this situation. The Code contains language with respect to unconscionable agreements and conduct. This has been done for the simple reason that the Commissioners could see no escape from this provision if the provision was to be flexible enough to adjust to the maneuvers of fringe operators.

Q. Is unconscionability a new concept?

A. Unconscionability is not a new concept. There have been decisions providing relief from unconscionable conduct running back over 100 years. It is, also, a part of the Uniform Commercial Code and there is equal or more reason to use it in the Consumer Credit Code.

Q. Are there any limitations on the action of unconscionability?

A. Yes. Considerable care is used to keep the concept within strict boundaries. Debtors for example cannot determine that conduct of a creditor is unconscionable. The Administrator cannot make such a determination, only courts can make this determination, and in courts only the judge and not the jury. The Code provides that the Administrator may bring a civil action to restrain a creditor from engaging in a course of unconscionable conduct either in effecting consumer credit transactions or in collection of debts arising from these transactions. In every case, however, it is only a court that can make a determination of unconscionability.

Q. How will the Code be administered?

A. The Code provides for administration by the State Banking Commissioner, and it prescribes his powers and functions. In the Code he is referred to as the "Administrator."

Q. What are his powers?

A. (1) He will administer the consumer credit market;

(2) He may bring action on behalf of an individual or a class of debtors to recover excess charges made by a creditor;
(3) He may bring actions to restrain a creditor from engaging in unconscionable conduct;
(4) He may issue orders and subject to appropriate administrative review he may order a creditor or others to cease and desist from engaging in violations of the Code;
(5) The Administrator is given substantial investigatory powers with respect to consumer credit extended by merchants or finance companies; and
(6) He is expected to cooperate with officials having supervisory power over banking institutions to obtain compliance with Code provisions.

In addition, the Administrator

(1) has power to issue regulations with respect to specified subjects;
(2) he may foster and aid programs for education of consumers; and
(3) encourage establishment of non-profit consumer credit counseling agencies.

Q. Does the Code provide for advisors to the Administrators?

A. Yes. The Code recognizes the considerable power of the Administrator and to aid and assist him in the effective performance of his duties the Code provides for a Council of Advisors on Consumer Credit. These are to be drawn in relatively equal proportions from consumers or the public, on the one hand, and from members of the consumer industry on the other.

Q. How is the office of the Administrator financed?

A. All persons or businesses doing credit business must so notify the Administrator and must pay to the Administrator $10 for every $100,000 outstanding credit during a fiscal year. This money will be used to carry on the work and meet the expenses of the office of the Administrator.

Q. Do merchants of Alaska support the adoption of the Uniform Consumer Credit Code?

A. Yes, even though the Code will require merchants to pay a substantial fee for its administration which heretofore has not been required of retailers.

Q. Why is the retail industry favorable to its adoption?

A. (1) It is the finest consumer protection Code ever prepared.

(2) The public policy demands its passage.
(3) The Code will do away with the "Bits and Pieces" type of credit legislation.
(4) The UCCC will give the state as near total consumer protection as is legislatively possible.
(5) The Code solves present and future credit problems in a way that will not require future legislative action.
(6) Creditors can live with the Code, and though there are some provisions which retailing does not like, the Code is a document, which taken as a whole, retailing can support and under which retailing can operate. This is the "on balance" concept which is basic to the Code.
(7) The Code attempts to satisfy the interests of the diverse groups represented in the credit field.
(8) The code is favored by the Alaska Retail Association, The Alaska State Chamber of Commerce and most other chambers throughout the state because they recognize it as one of the most fair documents ever devised in th area of consumer credit. Alaskan retailers acknowledge the fact that problems do exist in the consumer credit field and are proud to support UCCC as the best existing answer to those problems — from the standpoint of both consumer and creditor.

HB-174

Statement by the AFL-CIO Executive Council

on

The Uniform Consumer Credit Code

Bal Harbour, Florida
February 17, 1969

We have carefully examined the Uniform Consumer Credit Code, a "model state law" which has been prepared for introduction in the 47 state legislatures meeting in 1969.

UCCC would repeal and replace virtually all existing state laws relating to consumer credit. Sponsored by the National Conference of Commissioners on Uniform State Laws, it is offered for adoption as a "package," without amendment. The sponsors urge immediate enactment, despite the fact that the Code is a lengthy, complex, and sweeping legislative proposal. The public has had little opportunity to evaluate either its general impact or its specific provisions.

The Code is not essentially a "consumer statute" but seeks to compromise consumer and creditor interests. While it would make a number of desirable reforms in behalf of the consumer, which should be supported, it also contains serious drawbacks from a consumer point of view.

For this reason we cannot endorse the Code in its present form for enactment as a uniform law throughout the United States.

Our principal objections are as follows:

(1) We are shocked by the extraordinarily high finance charge ceilings authorized by the Code, ranging from 18 to 36 percent per year for installment loans and credit, and believe that they would inevitably result in exhorbitantly high credit costs for borrowers and credit buyers.

(2) We cannot concur in the excessive rate of 10 percent per year, which would be permitted on first mortgages.

(3) We are dissatisfied with the provisions on wage garnishment which could, if care is not taken, result in reduction of existing protections for wage earners in a number of states. We cannot in any case endorse a "take" by creditors as high as 25 percent of a person's wages.

(4) We are alarmed at the general repeal contemplated by the Code of present state consumer credit legislation regardless of whether it is superior to Code provisions or covers subjects not covered in the Code.

- more -

The possible impact of Code enactment would vary in each of the 50 states. Each state will need to make a careful assessment of its existing legislation in comparison with Code provisions.

In states with a large body of existing legislation, state AFL-CIO central bodies will probably find it best to reject the Code and instead seek improvements in their present laws, borrowing good features from the Code where appropriate.

In states with little or very deficient legislation, state central bodies may find it advisable to start with the Code as a working basis, but should seek amendment of its worst features.

In any case, precipitous enactment of the Code on an "as is" package basis should be rejected, as well as deviant forms, containing even worse features, which are likely to be introduced in some of the legislatures.

At the national level, the AFL-CIO staff will render whatever assistance it can to state bodies in connection with UCCC. We will also pursue abatement of consumer credit evils through federal legislation, wherever it is possible and appropriate. The door should not be shut on consumer credit reform through federal action. Enactment of federal minimum standards in the consumer credit field may in fact be necessary to reach the states in which reform is most needed and where creditor lobbies are most likely to succeed in blocking it.

BACKGROUND STATEMENT
ON
UNIFORM CONSUMER CREDIT CODE

The Uniform Consumer Credit Code (UCCC) is a type of "model state law" developed by the National Conference of Commissioners on Uniform State Laws. It was officially promulgated by the Conference on July 30, 1968, and subsequently endorsed, on August 7, 1968, by the American Bar Association. The Code has been in process since 1964, although much of the final text was prepared in 1968 to take account of the Federal Consumer Credit Protection Act, which was signed by the President on May 29, 1968.

Since the original text was released, the Code has undergone additional revisions. The current version of the Code is the "Revised Final Draft, November 1968." published in December 1968.

UCCC is designed as a replacement for virtually all existing state laws relating to consumer credit. Present laws on such provisions as maximum finance charge rates, (including usury rates), disclosure, licensing, administration and enforcement would be repealed. The one major exception to general repeal would be in the case of "supervised financial institutions" -- such as banks, savings and loan associations, and credit unions -- which receive deposits as well as make loans, although the new rate structure would apply to them as well as to other creditors.

Because the Code is designed as a uniform law, to be enacted in the same form in every state, it is offered as a "package" for adoption in its entirety, without amendment. Code sponsors are seeking blanket endorsement of the Code, regardless of any deficiencies and drawbacks.

The Code was not developed as a "consumer statute," as such, but rather seeks a "balance" of consumer and creditor interests. The principal "trade-off" appears to be in the form of high finance charges for creditors in exchange for restrictions on some of the more bloodthirsty techniques by which creditors can enforce repayment of debts plus more comprehensive enforcement procedures than now apply under many types of credit statutes.

Present indications are that the compromise is unlikely to be satisfactory to all groups. The Code has drawn support from various segments of the credit industry, but coldness from others (notably the American Bankers Association). No known support has come from consumer groups. The major exception in the consumer community was an endorsement by the Special Assistant to the President for Consumer Affairs and the President's Committee on Consumer Interests. But the Code has come under heavy fire from the Consumer Federation of America, representing 136 consumer-oriented organizations. To date it has been opposed by at least three important state consumer organizations -- the Association of California Consumers, the Consumers League of New Jersey, and the Pennsylvania League for Consumer Protection -- as well as by the Massachusetts Consumers' Council, an official consumer representation body.

Although Code sponsors have sought immediate, wholesale endorsements of their work, and immediate enactment in the 47 state legislatures meeting in 1969, the general public has had little time to gain an understanding of the

-more-

Code or to develop knowledgeable criticism. The possible impacts would, of course, vary in each of the separate 50 states. Study and criticism will be a continuing process, and common sense dictates a rejection of precipitous enactment.

For states which already have a large body of consumer credit legislation, covering both cash loans and retail sales credit, enactment of UCCC may represent little if any gain in consumer protections and in fact is more likely to result in a net loss. Such states should be extremely critical of UCCC and probably will find it best to reject the Code altogether in favor of continuing improvements in their existing statutes.

On the other hand, states with little or very deficient consumer credit legislation could find that UCCC represents a net gain, in the sense that almost anything would be better than what they have. Even in such situations, a cautious approach is advisable. As indicated in the more detailed comments that follow, finance charge ceilings authorized under UCCC are extraordinarily high for types of credit other than for small loans, and the Code has other drawbacks.

Clearly, an important motivation for urging speedy enactment is the hope of forestalling further federal action in the field of consumer credit. An immediate and announced goal of the Conference is to gain exemptions of state credit laws from applicable provisions of the newly enacted federal Consumer Credit Protection Act. Under the federal law, state laws with "substantially similar" provisions may be exempted from federal requirements for disclosure of the cost of consumer credit and from federal requirements limiting the amount of wages that may be garnished. Further possibilities of federal entry into the consumer credit field could come out of the prospective study by the newly authorized National Commission on Consumer Finance which was set up by the Consumer Credit Protection Act with instructions to make a study and recommendations by January 1, 1971. Also specific federal bills may be expected in the field of credit insurance and in door-to-door credit sales, at a minimum.

MAJOR POINTS ABOUT THE UNIFORM CONSUMER CREDIT CODE

Maximum Charges

1. The Code repeals all existing laws setting maximum rates on consumer loans from banks, credit unions, small loan companies and repeals general usury rate statutes (important primarily in mortgage lending). Maximum rates for retail sales are also repealed including finance charge ceilings set for automobiles, for general retail sales, home repair services and for revolving credit. Existing finance charge ceilings for most creditors would be replaced by uniform ceilings patterned on existing rates for small loan companies, the highest-rate legal lenders in the credit market. In effect, the small loan company rates would become an "umbrella" for all creditors, both for cash loans and for sales credit. The new ceilings would thus raise the legally permitted rates of charge for most creditors in most states.

-more-

For most types of consumer credit, except first mortgages, the effective ceilings would be 36% on the first $300, 21% on the next $700 and 15% on the remainder over $1,000. Ceilings on store revolving credit are set at 24% on the first $500 and 18 percent on the remainder. (See Attachment I for more detailed outline.)

2. Over and above the maximum rate ceilings, the Code permits additional charges for official fees and taxes, and for insurance -- property, liability, credit life, and credit accident and disability. These provisions follow the lines of the Federal Consumer Credit Protection Act, which defines "finance charge" in such a way as to permit their exclusion from the finance charge for disclosure purposes. A number of current small loan laws require the lender to include most of these charges in the finance charge, although extra charges for credit life insurance are now generally permitted. The "additional charge" system provides an additional source of revenue to creditors, since the "extras" can be included in the amount of the loan or credit and a finance charge computed on top of them.

3. In addition to charges for official fees, taxes, and insurance, the Code allows "extras" for "other benefits." This provision, although presented as being in conformity with the federal act, actually opens up what could be a dangerous loophole for "tie-in" charges and purchases to be required by the creditor as a condition of extending credit. The Code nowhere makes a flat prohibition of "tie-in" sales, except for limitations on compulsory purchase of various types of insurance.

4. The Code properly requires that a rebate of finance charges be made to the credit buyer or borrower who pays off the credit balance in advance. The rebate is calculated according to the "Rule of 78". Unfortunately, where graduated rate ceilings are used, as under the Uniform Consumer Credit Code, the Rule of 78 provides the creditor with a windfall of unearned credit charges and a corresponding shortfall to the consumer. The "Revised Final Draft" attempts to deal with the problem, not by eliminating the windfall, but by authorizing alternative calculation of the finance charges in such a way as to "legitimize" the windfall. This point will require more analysis and explanation, but some idea of the problem can be obtained by the summary comparisons shown in Attachment II, based on tables appearing in the explanatory text ("Official Comment") of the Code.

Insurance

UCCC insurance provisions are written within the framework of the Model Credit Insurance Act developed by the National Association of Insurance Commissioners and now in effect in a number of states. Although some of the more disreputable creditor practices in the sale of credit insurance are prohibited, UCCC does nothing to deal with fundamental problems of overcharges for credit, life, accident and health policies documented by the Senate Antitrust and Monopoly Subcommittee in its 1967 investigative hearings. These hearings disclosed widespread profiteering by creditors on the sale of high-priced insurance, paid for in its entirety by borrowers.

-more-

Kickbacks, commissions, and rebates from insurance companies and creditor-owned insurance subsidiaries have built a system of "reverse competition" encouraging the sale of insurance at highest possible rates. UCCC forbids charges beyond the legal maximums permitted by the Commissioner of Insurance but does nothing to reduce them further. Lenders' profits on insurance are specifically protected.

Disclosure Provisions

The sections on disclosure are largely a duplicate of the provisions of the Federal law which contains extensive requirements relating to items of cost of the credit provided, including a statement of the annual percentage rate. Both credit contracts and credit advertising are covered. The principal problem about the disclosure provisions is that since all existing state legislation on disclosure is repealed, any disclosure requirements other than the ones copied from the federal law would disappear. Disclosure statutes may, for example, require disclosure of a buyer's rights under the law, make detailed specifications as to contract forms, or other matters. In effect the federal specifications would substitute for existing requirements rather than add to them. In addition, the disclosure provisions could be rendered ineffective by the fact that specific administrative authority for issuing regulations to interpret the disclosure requirements in the Code is not provided. In particular, the decision as to what is "conspicuous" is left to the courts for determination, on a case by case basis.

Restrictions on Contract Provisions

1. Credit Sales

The UCCC makes a commendable attempt to prohibit or restrain certain types of contracts and contract provisions which are notoriously unfair to credit buyers, but it does not go "all the way."

a. Holder in Due Course

The Code knocks a hole in the onerous "holder-in-due course" doctrine under which a finance company which has bought a credit contract from a retailer is held free of all responsibility to the original buyer and is legally entitled to collect monthly payments from the debtor, regardless of fraud in the original contract, overcharges, defects in the product or other failure in the seller's duties.

The Code would prohibit sellers from taking a "negotiable instrument" in connection with consumer credit contracts. A subsequent buyer of the paper (the "holder") would not qualify for "holder in due course" status if he had notice of the seller's violation. However, no provision is made for labeling consumer paper as such and no penalties attach to the "holder" even he does take paper illegally procured by the seller.

-more-

The Code also invalidates agreements whereby the borrower waives his legal defenses against a subsequent holder ("assignee") of a credit contract. Two Alternatives are provided. Alternative A, which subjects assignees to buyer's defenses, is definitely superior to Alternative B, which requires notice by buyer to assignee of defenses within three months. Even under Alternative A, certain limitations are placed on the liability of the assignee.

b. Balloon Contracts

The Code discourages the writing of "balloon contracts," but does not prohibit them. It merely specifies that the buyer shall have the right to refinance a balloon payment "without penalty" in any case where the balloon is more than twice the average of earlier scheduled payments. Current state laws that deal with balloon payments usually prohibit them.

c. Security for Contract

The Code makes certain restrictions on the security that may be taken in a credit sale. In general the seller may not take a security interest in property of the debtor other than in the goods which are the subject of sale. Exceptions are allowed to permit a security interest in goods on which services are performed or in which goods sold are installed. Also a security interest in land may be taken if goods are affixed to it or improvement services performed on it. The debt must be at least $300 in the case of security interest in goods and at least $1,000 in the case of a security interest in land. These provisions are definitely a step in the right direction, but the $300 and $1,000 limits have been criticized as too low.

d. Add-on Sales

The Code reforms but does not eliminate "add-on" sales whereby a buyer's current purchases are permitted to be taken as security for earlier purchases on which payments have not yet been completed, and vice-versa (earlier purchases become security for later purchases). Situations have occurred in which default on the most recent purchase have occasioned loss to the buyer of the entire set of purchases. The Code provides that a buyer's payments must be allocated to the goods in the order which they were bought and the security interest terminated in each item as the debt on each is paid off.

A question remains as to whether "add-on" sales should be prohibited in their entirety. A consideration against such prohibition in the Code as presently written is that multiple separate sales could result in multiple high-charge contracts under the graduated rate structure.

e. Wage Assignments

UCCC prohibits wage assignments, as do a number of existing state laws. This is a desirable reform. A wage assignment is an agreement which provides that the creditor can take part of a worker's wages directly from his employer if the debt is not repaid when due. Under UCCC an assignment of earnings may not be taken unless the employee is free to revoke his authorization of the assignment.

f. Referral Sales

Referral sales are prohibited. A desirable reform. Referral selling is a racket whereby the buyer is persuaded to sign a contract by a promise that he can recoup the purchase price in whole or in part by supplying other customers to the seller.

g. Attorney's Fees

Two alternatives are provided: (A) prohibits agreements providing for payment of attorney's fees by the borrower and (B) limits attorney's fees to 15 percent of the unpaid balance. Alternative (A) is clearly superior, particularly since "reasonable expenses" are allowed to the creditor in realizing on his security interest in case of the borrower's default.

h. Confession of Judgment

This is prohibited. A desirable and important reform. A debtor who "confesses judgment" signs away his legal rights to challenge the validity of the debt.

i. Blank Spaces and Contract Accelerations

Two notable omissions in the Code are (1) the failure to prohibit blank spaces in contracts (a common requirement under existing state legislation) a source of easy fraud on the debtor (2) the failure to curb the creditor's unrestricted right to require immediate payment of the unpaid balance of the debt thereby precipitating a debtor's default. Unilateral acceleration by the creditor should be restricted to cases in which substantial default has actually occurred.

2. Loans

Restrictions on loan agreements are less extensive than those for sales. Provisions on balloon payments, wage assignments, attorney's fees, and confessions of judgment are the same. But no restraints are put upon the rights of holders in due course or on rights of assignees. "Supervised lenders" (licensed lenders and supervised financial institutions) may not

-more-

take a security interest in land unless the debt is over $1,000 but other lenders may do so. Again, the $1,000 cut-off has been criticized as too low.

Restrictions on Creditor Collection Practices

1. Deficiency Judgments

The UCCC makes a limited attack on deficiency judgments. It provides that a seller who repossesses or takes back goods that were the subject of sale (or other security for the debt) may not also obtain payment for the "deficiency" between what the goods sell for and the unpaid balance of the debt. However, this provision applies only where the cash price of the sale was $1,000 or less, thus being of no effect for larger purchases such as new cars. No restraint on deficiency judgments applies in the case of cash lenders.

2. Wage Garnishment

UCCC would restrict garnishment along the lines of the Federal Consumer Credit Protection Act which limits garnishment to 25% of disposable earnings or the excess over $48 per week (30 times the federal minimum hourly wage) whichever is less. In UCCC the minimum exemption is improved to $64 (40 times the minimum wage), but the 25% figure remains unchanged.

In addition UCCC would prohibit garnishment before judgment and would prohibit employers from firing workers on account of garnishment. Federal law forbids firing on account of garnishment for "any one indebtedness" and makes no special provision for garnishment before judgment.

The principal immediate problem presented by UCCC is whether its 25% limit and basic exemption amount would replace more favorable provisions under a number of existing state laws, for example, laws which provide a 10% limit or which do not permit garnishment at all. A "savings clause" is included in the Federal statute for such situations, but not in the text of the Code.

In the most recent published edition of the Code (Revised Final Draft, November 1968) the "Official Comment" has been rewritten to disclaim any intent to undercut existing laws which provide additional protections to wage-earners. However, the fact remains that the statutory language does not in itself accomplish this result.

A further technical difficulty presented by the Code is that its garnishment provisions cover only situations in which the garnishment has arisen out of a transaction covered by the Code (generally, debt characterized either by installment repayments or by the imposition of a finance charge). Garnishment arising out of debt not covered by the Code, such as service credit (doctor bills and utility bills), would not be affected.

-more-

Even assuming the most favorable interpretations of the Code, only modest improvement is made over the Federal provisions which will go into effect July 1, 1970. More comprehensive action on garnishment is needed, either to abolish garnishment altogether, or to severely restrict its application.

Contract Cancellation Rights

UCCC includes a section on "home solicitation sales" giving buyers a three day period in which to cancel a credit contract for goods or services bought from a door-to-door salesman.

The objective of this provision is obviously desirable, but specific points will need to be examined for possible improvements. The provision for a 5% cancellation fee has been particularly criticized.

An additional section, relating to buyer's cancellation rights in the case of a credit sale or loan secured by the buyer's home, is incorporated from the Federal Consumer Credit Protection Act.

Administration and Enforcement

Administration and enforcement is centered in a single Administrator who is given fairly impressive powers in the form of authority to issue "cease and desist" orders, to obtain injunctions and temporary injunctions from the courts, to bring suit for civil penalties, and to recover overcharges in behalf of debtors. Debtors are also given certain rights of bringing private suits.

Licensing requirements are included for all "supervised lenders" and their assignees (i.e., lenders who charge more than 18 percent per year on loans). These provisions would cover lenders presently licensed under state small loan laws and could have the effect of requiring licensing of at least some high rate lenders in the second mortgage market. Licensing provisions are considerably less stringent than those usually applicable to small loan licensees under much existing legislation. No license would be required for lenders charging less than 18 percent per year.

No licensing is required in the credit sales field, either for retailers or for sales finance companies which buy their paper. They are subject only to registration requirements. A number of states currently have licensing requirements for sales finance companies, and in some states retail dealers (especially automobile dealers) must be licensed for credit operations. These laws would be repealed by UCCC. Licensing requirements involve important powers to suspend or revoke the license of an enterprise to continue in business and can provide an important protection against shady operators in the credit field, as well as in securing general compliance with the law.

-more-

Apparently the main weapon in the Code against shady operators in the credit sales field would be recourse by the Administrator to the courts for an injunction against "unconscionable" conduct.

Another notable omission is rule-making power for the Administrator. He is prohibited from issuing regulations except where specifically authorized by the Code to do so. (These relatively few authorizations are nowhere summed up in a list.) It is evidently intended that the Administrator may issue regulations to correspond to those which will be issued by the Federal Reserve Board, assuming the state were to be exempted from the operation of the federal statute with respect to disclosure requirements. However, rule-making powers in the section of the Code dealing with disclosure do not appear sufficient to accomplish this result.

AFL-CIO Department of Research/Draper

ATTACHMENT I

FINANCE CHARGE CEILINGS UNDER UNIFORM CONSUMER CREDIT CODE

1. For retail sellers

   Installment credit: *
   36% on first $300
   21% on next $700
   15% on excess over $1,000

   Revolving credit:
   2% per month on first $500 (24% per year)
   1½% per month on excess over $500 (18% per year)

2. For licensed lenders and supervised financial institutions
   (small loan companies, finance companies, commercial and industrial loan banks, credit unions)

   Loans and revolving loan accounts*

   36% on first $300
   21% on next $700
   15% on excess over $1,000

3. Other lenders

   a. 18% per year

   b. Mortgage loans are exempt from certain key provisions of the Code if finance charge is 10% or less. This is intended to result in an effective ceiling of 10% on first mortgages.

*Alternatively, a rate of 18% is authorized if the yield would be larger.

Note: The Code further provides for an escalation of effective ceilings in accordance with rises in the Consumer Price Index. This is done through increasing the sizes of the loan to which the higher rates apply. For example, if the CPI increased by 10%, the $300 to which the 36% rate applies would go to $330 and the 21% rate would apply up to $1,100 instead of $1,000.

Attachment II

CREDITOR'S EARNED INTEREST CHARGES ON LOAN
OF $1500

Month No.	Normal Computation 1/	Rule of 78 2/	Alternative Permitted in Revised Final Draft 3/
1	$ 27.50	$ 32.66	$ 31.38
2	26.06	29.85	29.05
3	24.60	27.14	26.67
4	23.13	24.43	24.25
5	21.63	21.72	21.77
6	19.67	18.99	19.24
7	17.52	16.28	16.66
8	15.33	13.57	14.03
9	13.10	10.86	11.34
10	10.83	8.15	8.59
11	8.19	5.42	5.79
12	4.12	2.71	2.91
Total	$ 211.68	$ 211.68	$ 211.68

Rebate due if loan is paid off after 5 months (the addition of charges for months 6-12):

(1) Normal computation:	$ 88.76
(2) Rule of 78:	75.98
(3) Alternative under Revised Draft:	78.56

1/ Based on month by month application of 36% per year on first $300, 21% on next $700, and 15% on balance over $1,000

2/ Based on distribution of total finance charge according to Rule of 78

3/ Based on recasting of charges at flat annual rate of 25.10 percent, corresponding to 36% on first $300, 21% on next $700, and 15% on balance over $1,000

FORM SA-1B

HB 183

MEMORANDUM State of Alaska

TO: Honorable Marty Farrell, Chairman
House Resources Committee
Alaska State Legislature
Juneau, Alaska

DATE : February 26, 1971

FROM: R. D. Stevenson
Deputy Commissioner
Department of Revenue

SUBJECT: House Bill 183
Litter Control

Certain portions of House Bill 183 effect the Department of Revenue and the Treasury of the State. Attached is a copy of a memo from L. P. Carroll, Chief, Miscellaneous Tax Section, concerning the provisions of House Bill 183 that concern the Department of Revenue.

In addition there is a fiscal note on costs of administration.

For your information Mr. Carroll administers the Business License Tax. In the event that you should desire clarification on any of the material submitted, kindly advise and Mr. Carroll will be available to your Committee.

cc: Honorable William J. Moran, Chairman
House Judiciary Committee

FORM SA-1B

MEMORANDUM State of Alaska

TO: R. D. Stevenson
Deputy Commissioner

DATE : February 25, 1971

FROM: L. P. Carroll, Chief
Miscellaneous Tax Section

SUBJECT: House Bill 183 - Senate Bill 130--
Litter Control

Effect on Treasury: This legislation imposes a gross receipts tax of 1/20 of 1% on all manufacturers, wholesalers, and retailers to the extent of the gross derived from the manufacture or sale of any commodity which is packaged in a disposable container including newspapers and magazines, household paper, and paper products. To estimate the potential revenue to the State we have made the following assumptions to arrive at a basis of gross receipts subject to the tax.

	* 1969 Actual Gross Manufacturing	* 1969 Actual Gross Wholesale	* 1969 Actual Gross Retail
	$71,299,737	$213,007,177	$712,535,399
Less portion believed not subject to the tax	35,649,868 - 50%	53,251,794 - 25%	285,014,159 - 40%
Balance subject to tax	$35,649,869	$159,755,383	$427,521,240
Add in value of liquor, beer, wine	ø	$ 27,455,674	$ 28,553,900
Total 1969	$35,649,869	$187,211,057	$456,075,140

* See attached

Thus, it may be shown that for calendar year 1969 a total of $678,936,066 gross receipts could have conceivably been subject to the tax at 1/20 of 1%.

Assuming further an accumulated growth factor of 10% to arrive at a figure for 1971 we find the following:

1969 gross subject to tax	$678,936,066
Add 10% growth factor	67,893,606
1971 estimated gross subject to tax	746,829,672
Estimated tax at 1/20 of 1%	$ 373,415

Problems of administration:

Basically we could administer this tax in the same manner as the present gross business license tax. The major problem we can foresee is the difficulty in making an accurate determination of just what portion of the manufacturers', wholesalers', and retailers' gross is attributable to product sales as set forth in Sec. 41.20.580 (b) (1) - (12). To require each business subject to the tax to keep separate records on these particular sales will create a considerable bookkeeping problem. The problem multiplies when you consider staff required to enforce and equitably administer the tax through an audit program.

We urge that the effective date be established on 1/1/72 to allow adequate time for staffing, promulgation of procedures, rules, and regulations, and design of a tax reporting form.

I have attached herewith an estimate of administrative cost which the Department may expect to accrue should this proposed legislation become law.

Greater Anchorage Area Community Action Agency

P.O. BOX 1886 ANCHORAGE, ALASKA 99501

RESOLUTION NO. 98

RESOLUTION ENDORSING HOUSE BILL NO. 224 AND OTHER SIMILAR BILLS AS RESPONSIVE TO THE NEEDS OF THE POOR

HB 224

WHEREAS, one of the most serious problems affecting the lives of poor families in the Greater Anchorage Area is the inadequate planning, coordination, and distribution of the necessary social services that affect the poor; and

WHEREAS, the Trustees and staff of the Agency feel that it is of critical importance to the meaningful provision of social services that the affected poor people themselves have a powerful voice in those programs (social service and otherwise) that affect their lives; and

WHEREAS, House Bill No. 224 in the present legislature of the State of Alaska embodies the above expressed principles of meaningfulindigenous community participation in the planning, coordination, and administration of comprehensive social service programs that effect their well-being;

NOW, THEREFORE, BE IT RESOLVED that the Board of Trustees of the Greater Anchorage Area Community Action Agency endorse House Bill No. 224 as responsive to the problems and needs of the poor, and call upon all state legislators to support the concept as exemplified in House Bill 224 and other similar bills.

PASSED this 18th day of March, 1971, at Anchorage, Alaska

HB-239

MAYNARD & WIRUM
ARCHITECTS
746 Fst anchorage alaska
99501 tel 907 272 3225

April 15, 1971

The Honorable Jalmar M. Kerttula
Chairman, Commerce Committee
State House of Representatives, State Capitol
Juneau, Alaska 99801

Subject: SSHB-239 — File

Dear Mr. Kerttula:

I have been waiting anxiously to read of House Bill 239 being brought to the floor for action, but so far I have been disappointed.

The architects and engineers in the state had planned on submitting this for consideration in 1970 but, because of the anticipated pressure from the oil lease sales, it was decided to delay submittal for one year. This action does not infer lack of urgency but rather a desire that the bill be given due consideration.

There are a number of people practicing architecture in the state illegally and, although charges have been filed, the District Attorney's load is such that it receives low priority. It is imperative then that the State Board be given injunctive powers.

I have heard rumor that there is a petition signed by people in the housing industry opposing passage of this bill. Section 08.48.041(8) specifically excludes control of persons designing one and two-family homes. Once we get into multi-family housing the state, community and building owner have responsibilities to the people occupying these buildings to safeguard their life, health and property as the General Provisions provide. A lot of those persons presently practicing illegally go beyond the housing field and are designing public buildings. This is a dangerous situation. If the practitioner is in fact qualified he can become licensed and thereby responsible for his actions. At present these people carry no insurance and are under no legal obligation to anyone. This is a deplorable situation.

I would respectfully request that this bill be processed THIS YEAR in the interest of all citizens of the state.

Very truly yours,

Kenneth D. Maynard

KENNETH MAYNARD, AIA

HB-239

12 April 1971

Honorable William Moran
Chairman, Judiciary Committee
Alaska House of Representatives
Juneau, Alaska 99801

Dear Mr. Moran:

I would like to direct your attention to a legislative matter of prime importance. I have become increasingly aware of the inadequacies of House Bill 239, through correspondence with the National Engineers Legal Fund.

I am concerned over a portion of HB 239 which may be an open invitation to legal actions (Enclosure 1). The objectional portion is that of the wording of "practice of engineering", page 19 of HB 239, Section 08.48.301/7 (Enclosure 2). It appears that this section is attempting to exclude engineers from becoming prime design consultants of buildings.

In a joint Architect-Engineer Registration Act such as HB 239 there should be a clear cross exemption clause included, designed to permit the architect or engineer to contract for all design services.

I would recommend amending HB 239 to read as suggested by the National Council of Engineering Examiners Model Law (Enclosure 3). The Model Law has been endorsed by the National Society of Professional Engineers and several other national engineering groups. I am confident that this amendment will clear up most objections to this bill.

I hope you can give this important matter your attention.

Sincerely yours,

James C. Harle

JAMES C. HARLE, P.E.

SAMPLE CASE ENCLOSURE 1

(Printed and Distributed by: NATIONAL ENGINEERS LEGAL FUND)

IN THE DISTRICT COURT OF APPEAL OF THE STATE OF FLORIDA
FOURTH DISTRICT JULY TERM 1970

ALEX VERICH, EDWARD J. DeBARTOLO d/b/a EDWARD J. DeBARTOLO & ASSOCIATES and EDWARD J. DeBARTOLO CORP.,

Appellants,

v.

THE FLORIDA STATE BOARD OF ARCHITECTURE, an agency of the State of Florida,

Appellee.

CASE NO. 69-40.

Opinion filed July 29, 1970

Appeal from the Circuit Court for Palm Beach County; R.O. Morrow, Judge.

Madison F. Pacetti of Caldwell, Pacetti, Barrow & Salisbury, Palm Beach for appellant.

Selig I. Goldin of Goldin, Jones, Gainesville and Marks, Gray, Yates, Conroy & Gibbs, Jacksonville for appellee.

OWEN, J.

On complaint filed by the Florida State Board of Architecture appellant Alex Verich, a registered professional engineer, was found to be practicing architecture and enjoined from further practice thereof. We reverse that judgment in what we believe to be a case of first impression in this jurisdiction.

Mr. Verich was registered as a professional engineer in the State of Florida as provided under Chapter 471, F.S. He prepared or had prepared under his supervision, plans for a shopping center in West Palm Beach, Florida known as the Palm Beach Mall. Thses plans involved both architecture and engineering. At no time did Mr. Verich hold himself out to be an architect in any manner whatsoever nor did he enter into any

contracts to perform architectural services, as he prepared the plans for the Edward J. DeBartolo Corporation for whom he was a fulltime engineer employee. The Palm Beach Mall is owned by Palm Beach Mall, Inc., a corporation wholly owned by the Edward J. DeBartolo Corporation.

Not unexpectedly, the plaintiff called as witnesses three architects all of whom testified that in their opinion the drawings, plans and specifications for the Palm Beach Mall constituted the work product of the practice of an architect. The defendant called as witnesses several registered professional engineers who expressed the opinion that the preparation of the plans for the Palm Beach Mall constituted the practice of engineering. The engineers testified that in their opinion the engineering services in preparing the necessary drawings and plans constituted approximately 75% of the work and that architecture was approximately 25% of the work. Both the engineers and architects agreed that the Palm Beach Mall was a building and that the plans for the same required the use or knowledge of mathematics and the practice of engineering, while we mention the foregoing conflicts in the testimony, our decision does not turn on a factual basis.

That there is an overlapping between the two professions appears to be readily recognized by the language of Section 467.09(1)(a), F.S. which provides in substance that registered professional engineers are not prohibited from performing architectural services which are purely incidental to their engineering practice, and that registered architects are not prohibited from performing engineering services which are purely incidental to their architectural practice. The overlapping nature of the two professions is well recognized. See 82 ALR2d 1026; 5 Am.Jur.2d, Architects, §3; 6 C.J.S., Architects, §1.

Section 467.09(1)(a), F.S. defines the practice of architecture in a somewhat negative manner. After first providing for certain exemptions, the statute then defines the practice of architecture in the following terms:

> "Otherwise, any person who shall be engaged in the planning or design for the erection, enlargement or alteration of buildings for others or furnishing architectural supervision of the construction thereof shall be deemed to be practicing architecture and be required to secure a certificate and all annual renewals thereof required by the laws of this state as a condition precedent to his so doing."

Stated in rather broad and general terms, the planning or design for the erection of buildings for others is the practice of architecture. The same statute expressly provides that no professional engineer shall practice architecture or use the designation "architect" or any term derived therefrom, but at the same time also expressly provides that nothing in the state law shall be held to prevent a registered professional engineer (or their employees or subordinates under their responsible supervising control) from performing architectural services which are purely incidental to their engineering practice. Standing alone, the statute appears to contain some contradictions in and of itself.

Chapter 471, F.S. pertains to profession engineers and by definition (Section 471.02(5)) the term "professional engineering" includes, among other things, any professional service requiring use of knowledge of mathematics and the principles of engineering rendered or offered to be rendered for public or private buildings and any consultation, investigation, plan, design, or responsible supervision of construction in any public or private buildings. Thus, it can be seen that the preparation of plans and design for and responsible supervision of the construction of buildings is by statute defined as the practice of professional engineering.

If the planning and design of a building and the furnishing of supervision of its construction are functions which are encompassed solely within the practice of architecture, then professional engineers are prohibited from engaging in such functions unless incidental to their engineering practice. But paradoxically, the practice of professional

engineering expressly includes the planning and design of buildings and the supervision of their construction. Thus, the apparent conflict can only be resolved by concluding that the statutes mean a registered architect can plan and design and supervise construction of a building as the practice of architecture and a registered professional engineer can plan and design and supervise construction of a building as a professional engineer. Of course, the professional engineer cannot represent himself as being an architect nor can the architect represent himself as being a professional engineer.

Appellee contends that the statutory definition of "professional engineering" by necessary implication has reference to "buildings" of an industrial nature designed primarily to house machinery and equipment rather than designed primarily for habitation or occupancy by humans. Admittedly, such a qualification as to the type of buildings upon which professional engineers were authorized to plan and supervise construction would help preserve a line of demarcation between the two professions consistent with generally accepted concepts. We feel however that had it been the legislative intent to thus limit or restrict to industrial buildings the type of buildings which professional engineers were authorized to design and supervise construction upon, such qualifications or restrictions would have been explicitedly contained in the statute. We are concerned here with statutory construction and not historical differences of these two professions.

The final judgment is reversed and the cause remanded for entry of a judgment favorable to appellant.

THE MODEL LAW

CHAPTER I. REGISTRATION OF ENGINEERS

AN ACT

To Regulate the Practice of Engineering; Provide for the Registration of Qualified Persons as Engineers and the Certification of Engineers-in-Training; Define the Terms "Engineer", "Professional Engineer", "Engineer-in-Training", and "Practice of Engineering"; Create a State Board of Registration for Professional Engineers and Provide for the Appointment and Compensation of its Members; Fix the Term of Members of the Board and Define its Powers and Duties; Set Forth the Minimum Qualifications and Other Requirements for Registration as an Engineer and Certification as an Engineer-in-Training; Establish Registration Fees with Expiration and Renewal Requirements; Impose Certain Duties upon the State and Political Subdivisions thereof in Connection with Public Work, and Provide for the Enforcement of this Act and Penalties for its Violation.

Be it enacted by the General Assembly of the State of . . . . . as follows:

SECTION 1. GENERAL PROVISIONS

In order to safeguard life, health, and property, and to promote the public welfare, the practice of engineering in this state is hereby declared to be subject to regulation in the public interest. It shall be unlawful for any person to practice, or to offer to practice, engineering in this state, as defined in the provisions of this Act, or to use in connection with his name or otherwise assume, or advertise any title or description tending to convey the impression that he is an engineer, unless such person has been duly registered or exempted under the provisions of this Act. The right to engage in the practice of engineering shall be deemed a personal right, based on the qualifications of the individual as evidenced by his certificate of registration, which shall not be transferable.

SECTION 2. DEFINITIONS

(a) Engineer—The term, "engineer", within the intent of this Act shall mean a person who, by reason of his special knowledge and use of the mathematical, physical and engineering sciences and the principles and methods of engineering analysis and design, acquired by engineering education and engineering experience, is qualified to practice engineering.

(b) Professional Engineer—The term, "professional engineer", as used in this Act, shall mean a person who has been duly registered and licensed by the State Board of Registration for Professional Engineers.

(c) Engineer-in-Training—The term, "engineer-in-training", as used in this Act, shall mean a person who complies with the requirements for education, experience and character, and has passed an examination in the fundamental engineering subjects, as provided in Sections 12 and 14 of this Act.

(d) Practice of Engineering—The term, "practice of engineering", within the intent of this Act, shall mean any service or creative work, the adequate performance of which requires engineering education, training, and experience in the application of special knowledge of the mathematical, physical, and engineering sciences to such services or creative work as consultation, investigation, evaluation, planning and design of engineering works and systems, planning the use of land and waters, engineering teaching of advanced engineering subjects or courses related thereto, engineering surveys, and the inspection of construction for the purpose of assuring compliance with drawings and specifications; any of which embraces such service or work either public or private, in connection with any utilities, structures, buildings, machines, equipment, processes, work systems, or projects and including such architectural work as is incidental to the practice of engineering.

RECOMMENDED AMENDMENT

A person shall be construed to practice or offer to practice engineering, within the meaning and intent of this Act, who practices any branch of the profession of engineering; or who, by verbal claim, sign, advertisement, letterhead, card, or in any ohter way represents himself to be an engineer, or through the use

of some other title implies that he is an engineer or that he is registered under this Act; or who holds himself out as able to perform, or who does perform any engineering service or work or any other service designated by the practitioner which is recognized as engineering.

(e) Board—The term, "Board", as used in this Act shall mean the State Board of Registration for Professional Engineers, hereinafter provided by this Act.

(f) Responsible Charge—This term means direct control and personal supervision of engineering work.

SECTION 3. BOARD—APPOINTMENTS—TERMS

A State Board of Registration for Professional Engineers is hereby created whose duty it shall be to administer the provisions of this Act. The Board shall consist of . . . . . engineers, who shall be appointed by the Governor, preferably from a list of nominees submitted by the representative engineering societies of the State, and shall have the qualifications required by Section 4. Each member of the Board shall receive a certificate of his appointment from the Governor and shall file with the Secretary of State his written oath or affirmation for the faithful discharge of his official duty. Appointments to the Board shall be in such manner and for such period of time that the term of each member shall expire at a different time. On the expiration of the term of any member, the Governor shall in the manner hereinbefore provided appoint for a term of . . . . . years a registered engineer having the qualifications required in Section 4. A member may be reappointed to succeed himself. Each member shall hold office until the expiration of the term for which appointed or until a successor has been duly appointed and has qualified. In the event of a vacancy on the Board for any reason and the Governor failing to appoint a successor within three months after the vacancy occurs, the Board is empowered to fill that vacancy until the Governor makes an appointment.

SECTION 4. BOARD—QUALIFICATIONS

Each member of the Board shall be a professional engineer, who is a citizen and resident of this State and is registered in this State and who shall have been engaged in the lawful practice of engineering for at least twelve years, and who shall have been in responsible charge of important engineering work for at least five years.

SECTION 5. BOARD—COMPENSATION AND EXPENSES

Each member of the Board shall receive the sum of . . . . . Dollars ($ . . . . .) per diem when attending to the work of the Board or any of its committees and for the time spent in necessary travel; and, in addition thereto, shall be reimbursed for all actual traveling, incidental, and clerical expenses necessarily incurred in carrying out the provisions of this Act.

SECTION 6. BOARD—REMOVAL OF MEMBERS—VACANCIES

The Governor may remove any member of the Board for misconduct, incompetency, neglect of duty, or any sufficient cause, in the manner prescribed by law for removal of state officials. Vacancies in the membership of the Board shall be filled for the unexpired term by appointment by the Governor as provided in Section 3.

SECTION 7. BOARD—ORGANIZATION AND MEETINGS

The Board shall hold at least . . . . . regular meetings each year. Special meetings may be held as the by-laws of the Board provide. The Board shall elect or appoint annually the following officers: A chairman, a vice-chairman, and a secretary. A quorum of the Board shall consist of not lesst than . . . . . members.

SECTION 8. BOARD—POWERS

(a) The Board shall have the power to adopt and amend all by-laws and rules of procedure, not inconsistent with the constitution and laws of this state or this Act, including the adoption and promulgation of a Code of Ethics and/or Rules

Re: HB 241

Dear Mr. Moran:

As HB 241 - "An Act relating to damages for oil pollution", introduced by Mike Miller has been referred to the Judiciary Committee, I would very much appreciate it if you would give your support to this bill.

Thank you for your assistance in this matter.

Very truly yours

Warren C. Christianson

HB 275

Rep. William Moran
Pouch V
Juneau, Ak. 99801

Dear Mr. Moran;

The adult class at Turnagain United Methodist Church in Anchorage was very appreciative of the senators and legislators who took time from their busy schedule to meet with us last Fall. We are even more appreciative of the time that you have put in in Juneau since the first of the year.

When we met with legislators in November, we shared our thinking about several matters that we thought had moral implications. One of those was the matter of drinking and driving. We note that HB 275 sets up a point system for motor vehicle violations which would revoke the licenses of chronic violators who imperil the safety of others. From the sound of the resume, this is a bill that we heartily endorse, and we would urge your support of it.

Sincerely,

HB #358

Representative Tom Fink
Alaska State House of Representatives
Juneau, Alaska 99801

Dear Representative Fink

I have received a copy of House Bill #358 which was introduced by you on March 26, 1971. I and the other members of the Alaska State Hospital Association have had an opportunity to make an initial review of the proposed Bill and feel that the proposed legislation may not be workable. For instance, many of the Alaska State Hospital Association institutions currently have expense reimbursement contracts existing with the U.S. Public Health Service for periods ranging up to twenty years which apparently would not meet the specifications of your proposal. We would also question whether the Federal Medicare Reimbursement System would be allowable under proposed House Bill #358.

The Alaska State Hospital Association therefore urges that no positive action be taken on this proposal until such time as the Association and other interested parties have an opportunity to give a more complete review to the proposal. I would also appreciate receiving your comments as to the intent of the legislation.

Thank you for your cooperation.

Sincerely

Patrick R. Mahoney

HB-388

STATE OF ALASKA
THE LEGISLATURE

POUCH Y · STATE CAPITOL
JUNEAU, ALASKA 99801

LEGISLATIVE AFFAIRS AGENCY

March 27, 1971

M E M O R A N D U M

TO: Rep. William J. Moran, Chairman
House Judiciary Committee

FROM: Arthur H. Peterson
Revisor of Statutes

SUBJECT: Administration of small estates

The committee's bill on the administration of small estates, as recommended by the director of the court system and by Probate Master Keifer Gray, is attached. Two things about the recommendation are unclear to me: (1) Why was the appropriate change in AS 13.30.006 (which I have included in sec. 4 of the bill) not mentioned? (2) Is the recommended change in sec. 2 of the bill necessary in light of AS 13.30.006? Or perhaps AS 13.30.006 could be amended in this respect too.

SB 92

ALASKA STATE MEDICAL ASSOCIATION

[illegible] WEST EIGHTH AVENUE ANCHORAGE, ALASKA 99501 TELEPHONE 277-6891

March 1, 1971

The Honorable John Rader
Alaska State Senate
Pouch V
Juneau, Alaska 99801

Dear Senator Rader:

On behalf of the Legislative Committee of the Alaska State Medical Association, I wish to make known our position on SB 92, "An act relating to disciplinary procedures of the State Medical Board; and providing for an effective date."

We generally concur with and support Sections 08.64.390 through 08.64.590. We are cognizant, as I am sure you are, of some negative opinions; namely that the procedures outlined are unnecessarily complex, cumbersome, and potentially expensive. We do not share these views. We believe your proposal provides a reasonably clear delineation of powers, procedures, and responsibilities, while still providing maximal protection for both the charged physician and the public interest.

As you probably know, we especially favor Section 08.64.580. These provisions appear well written and should satisfy our needs and those of the State Medical Board. We feel that this immunity from civil liability is the keystone for effective enforcement of disciplinary provisions of the State Medical Practice Act.

With respect to Section 08.64.570, Counsel and Staff, we would suggest a re-draft specifically providing for a full-time executive secretary for the State Medical Board. Such an individual is requested by Dr. Henry Akiyama of the Board, as a means of making their functions more effective. We endorse this view.

We must express our strong disapproval of the proposed amendment of AS 08.64.315(6) which would treble biennial license renewal fees. You were perhaps not aware that a major increase in these fees went into effect only this year. We are unaware of any justification or necessity for a further major increase at this time. Since such expenses are indirectly passed on to the patient in terms of higher medical fees, we feel this would be simply an added factor in the spiralling cost of medical care.

Thank you for introducing this needed legislation. We will be pleased to provide you with any additional clarification of our position, and offer our full assistance in securing passage of the major portions we favor.

Sincerely,

John A. Pennington

SB 124

Enclosed is the testimony I gave in Juneau before the joint House and Senate Health, Welfare and Education Committees. Under consideration were the nursery school regulations now being pushed by Health and Welfare social workers in Anchorage and the State. We believe that their misinterpretation of current vague regulations and lack of educational expertise has caused a great deal of unnecessary trouble for established and satisfactorily functioning private nursery schools. The present furor appears unlikely to lead to improvements; rather it may result in overpricing or closure of such private facilities. For this and other reasons, elaborated in this testimony, we recommend placement of these nursery schools under the Department of Education.

We therefore urge your endorsement of Senate Bill No. 124, with the changes in (8) as shown. The (ages 3-5) were inserted by me; the other changes were put in by Dr. Hartmann of the Dept. of Education. He felt that the words "in cooperation with the Department of Health and Welfare" were unnecessary, since Health and Welfare always cooperates in the running of schools anyway (inspecting the schools for cleanliness, space, etc.), and that the inclusion of these words might just add confusion as to which Department would have jurisdiction over the nursery schools.

BY THE H'ALTH, WELFARE AND EDUCATION CO MITTEE

CS FOR SENATE BILL NO. 124

IN THE LEGISLATURE OF THE STATE OF ALASKA

SEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to jurisdiction over prekindergarten schools."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 47.35.030(4) is amended to read:

(4) "nursery" means an establishment providing care and services for any part of the 24-hour day for a child not related by blood or marriage to the owner or operator, but does not include any establishment whose primary purpose is educational.

* Sec. 2. AS 14.07.020 is amended by adding a new paragraph to read:

(8) ~~in cooperation with the Department of Health and Welfare~~ exercise general supervision over public and private preelementary schools (ages 3-5) whose primary function is educational ~~and over the educational component of nurseries as defined~~ in AS 47.35.030(4).

HB 124

Marianne von Hippel, M.D.
Testimony regarding Anchorage private nursery schools

I am representing five private nursery schools in Anchorage; Safehaven, Mrs. Pointer's, Mrs. Hanshew's at the First Presbyterian Church, Central Lutheran Church and St. Mary's Episcopal Church. The first is a cooperative owned and operated by the mothers; the second is owned by Mrs. Pointer, the teacher; the latter three are run by their respective church boards. All are non-sectarian. Tuition is paid by the parents; none of these schools receive State or Federal aid.

What is the problem? These schools have been running successfully for a few to twenty-three years (Safehaven). Last fall, Mrs. Wolfe, a social worker from the Borough, and Mrs. Johnson, a social worker from the State, have informed all these schools that the regulations state that all day care centers must have one adult for each ten children, or close beginning with the 1971-72 school year. All these schools have been classified as day care centers, since the regulation defines a day care center as one which has more than five children, under the age of five, for any part of the day, in a dwelling other than the home. If the regulation was strictly applied all Sunday Schools would come under this classification, and thus be accountable to representatives of the Department of Health and Welfare. Of the five nursery schools I am representing, all but Mrs. Pointer's have approximately fifteen children to one adult. Mrs. Pointer, who has gradually switched from kindergarten to nursery school, is operating strictly nursery school this year for the first time, and has complied with the Borough Ordinance. However, I have included her school with the other four because her school is similar, and because she is in favor of offering the mothers a choice. (These schools all have other adults in the building present at all times; in case an emergency should arise, someone would be available to help.)

Our feeling is that nursery schools are entirely different from day care centers, and so should come under a different classification.

How are they different? All of the five schools mentioned take children three and four years old only; none of them take infants and toddlers. Central Lutheran, Mrs. Pointer's and Mrs. Hanshew's take four-year-olds only; Savehaven and St. Mary's take three and four-year-olds, having different classes for the two different age groups. All the schools follow the school district age deadline; thus, a four-year-old is a child who will be five after November 1.

All of the five schools have children for only two and a half hours a day. Mrs. Hanshew has children three days a week; St. Mary's has the four-year-olds three days a week and the three-year-olds two days a week; Mrs. Pointer has three different programs - two days, three days and five days; Central Lutheran and Safehaven both have five day weeks. Thus, the children spend anywhere from five to twelve and a half hours a week at the school.

What goes on at the school? While each of the five schools differs in the program it offers, each is similar in that it has an organized curriculum. Most combine free play, during which time the children gain valuable experience in learning to get along with each other, and specific learning situations, such as painting, numbers, learning about their environment, etc. None of these schools teach things that will be taught by the public schools, such as reading, as it is felt that these could be better learned at a later stage of development. The school I am most familiar with, Safehaven, includes poetry for all the children, plus a little Spanish, number concepts and geography for the four-year-olds. Our teachers are selected on the ability to teach and to relate to children of this age, not on the basis of certificates. As a result many of these teachers are not fully certified.

It is obvious from the above that these schools cannot be used as baby sitting services. The children are there for too short a period. They are too old for diapers, bottles, or continuous watching for such dangerous habits as sticking fingers in electric outlets, etc. No meals are served and there are no naps. The children are there for educational and social reasons, not for mothering or baby sitting. The primary purpose is to serve the children, not the mothers. In brief, these are pre-schools, not day-care centers, and are much more like the public school kindergarten, where the ratio is about 1/25.

What would be the problem in reducing the child/adult ratio? First of all, we see no reason that this would be of any benefit to the children. Secondly, the tuition would have to be raised to support more teachers and teacher-aides, which would make nursery schools prohibitive to many families and force the closing of many of the schools. At the present time the cost is as follows:

St. Mary's - $16/month for the three-year-olds
$20/month for the four-year-olds
Mrs. Hanshew's - $25/month
Central Lutheran - $30/month
Safehaven - $30/month
Mrs. Pointer's - $20/month two day program
$30/month three day program
$45/month five day program (As Mrs. Pointer's school has the ten/one ratio, she must charge more.)

Other suggestions made to reduce the ratio are to have mothers help; and to have college students who are Education Majors help. The first suggestion has been discarded by all the schools because most mothers are not interested in this sort of thing (those that are can send their children to cooperative schools where mothers do help), and many teachers are afraid the child of the helping mother would be a behavior problem. The second suggestion (college students helping) is impractical since an adult is defined as a person over twenty-one, and there are not that many college students over twenty-one who have the interest and time to help on a daily basis.**

No school is ideal for everyone. We believe that a large variety of schools is ideal as it offers mothers a chance to select the learning experience most suited for their child.

What children do our schools serve? Generally they serve middle-class children from two-parent homes. Most of the mothers do not work. The one exception to this is Central Lutheran; half of their children come from poverty homes, and these students have their tuition donated by members of the congregation.

As a Board-Certified Pediatrician I have had considerable experience with nursery schools. I often refer a child to a nursery school when I think it would benefit him. When I arrived in Anchorage nearly six years ago there were few schools and they had long waiting lists. I would not like to see this situation return because our present good schools are forced to close; I would not like parents to be unable to send their children to nursery schools because of rising costs. I feel these five schools are excellent and offer valuable experience for pre-schoolers. I can see that some regulations are required for day-care centers so that children of working mothers are not crowded together and given inadequate care; but I see little resemblance between a day care center and our nursery schools.

As a mother of four children who have attended nursery school over a period of six years, I have seen my children gain much, both educationally and socially, and they have had a lot of fun in the process. I am one of the few mothers who do work, but I have never used the nursery school as a baby sitting service, as I have always had a baby sitter in my home when I am at the office.

In our community we have programs for poverty children; we have programs for children with serious emotional difficulties; we have programs for children with physical and mental disabilities, such as cerebral palsy and deafness. Many of these programs are partly or wholly State supported. This is as it should be.

Our nursery schools are privately supported institutions run primarily for normal, middle-class children. These children have rights too.

These schools have proven effective over many years. We hope they will not be destroyed by the present bureaucratic misinterpretation of regulations designed to protect other children under entirely different circumstances.

**It should be pointed out that many teachers do not want to work with another adult, even if this could be done. Mrs. Hanshew, an excellent teacher of many years experience, has told me that she wants to have all her attention on the children, rather than having to concern herself with the other adult and how the children are relating to her. Some teachers work well with another teacher; some don't. Some children can relate well to several adults at one time; some relate best when only one adult is present.

April 12, 1971

SB-124

Dear Rep. Moran,

Enclosed is an article which appeared in the November 1970 issue of Parents magazine, discussing the urgent need for expanded day care services for preschool children. It should be of great interest to you since there have been several bills introduced in the Alaska Legislature this session on the subject.

In the past, many uninformed people have dismissed the topic of day care as one of minor importance, a frivolity. But of late, there has been the realization that money spent on early childhood development, not to be confused with mere custodial care, is the best investment our country can make. President Nixon has allotted $386 million for comprehensive day care services as part of his new welfare program. The major recommendation of the 1970 White House Conference on Children was for "comprehensive family oriented child development programs, including health services, day care and early childhood education."

In Alaska, we have a high proportion of working mothers due to the higher cost of living and the large number of military families. To meet the child care needs of these women in the Anchorage area we have 14 day care centers which can accommodate a total of 300 children, a drop in the bucket when compared to the thousands of women one sees daily in the offices and business establishments of our city. The picture throughout the state is equally dismal.

Funds are desperately needed to provide low cost, quality day care to the mothers whose income is necessary to help provide their families with the essentials of a decent life; for those women who need and want to work but can't because of a lack of child care services; for those women, who in increasing numbers, make a substantial contribution to the Alaskan economy.

Of acute concern to us are the proposed cuts of Operation Upgrade funds. This money, $50,000 (coupled with $150,000 federal funds) operates 10 day care centers from Ketchikan to Nome and without it these centers will doubtlessly close. We would like to see the originally requested $100,000 (which will be matched with $300,000 federal money) approved so that we can expand these vitally needed programs.

In addition, we urge you to give your full support to House Bill 224, entitled Comprehensive Community Services Program, a measure which would provide for locally planned and operated day care services. If passed, multiple funding from various federal and state sources would be made available.

In conclusion, we feel that this area of developing human resources is as deserving of your attention, and as vital to the growth of Alaska, as development of the physical attributes of the state.

Sincerely,

Mrs. Rosaire Kennedy

New Developments in Day Care

A well-known pediatrician discusses the urgent need for expanded day care services for preschoolers.

by Morris A. Wessel, M.D.

Associate Clinical Professor of Pediatrics, Yale University School of Medicine

Barbara Anton, an attractive young woman whose two children I've cared for since their birth, sat in a chair in my office. "Susan's three-and-a half now, you know," she said, "and Bobby's past two. They're both pretty independent and they get along very well when I leave them with a neighbor. What I wanted to ask you was," she continued a little hesitantly, "do you think it would be all right if I left them in a day care center for a few hours every day? I'm thinking of taking some college courses. I can get my degree in a year that way and then I'll be able to teach. I'll want to start working in a couple of years anyway, and I've always thought I'd like to teach. I've been thinking more and more about doing this since Brian was killed."

Barbara's husband was a casualty of the war in Vietnam, killed when their second child, who was born in his absence, was only a few months old. In spite of her grief and shock, Barbara had managed to submerge her sorrow in the day-to-day job of looking after her two babies. Somehow she had even been able to give them a sense of ease and security, and Susan and Bobby were two of the healthiest, nicest youngsters I knew.

Now Barbara was trying to pick up the pieces of her own life as well, and I was delighted that she was thinking ahead and making plans for the future. I assured her that her idea was an excellent one and, moreover, I knew of a fine day care center near the State Teachers College she would be attending. When Barbara left my office she looked happier than I had seen her in a long time, and she called me a few days later to tell me she had been able to schedule all her classes in the mornings so she could pick up the children after lunch and take them home in time for their afternoon naps. I was confident that the arrangement would work out fine for all of them. And it has.

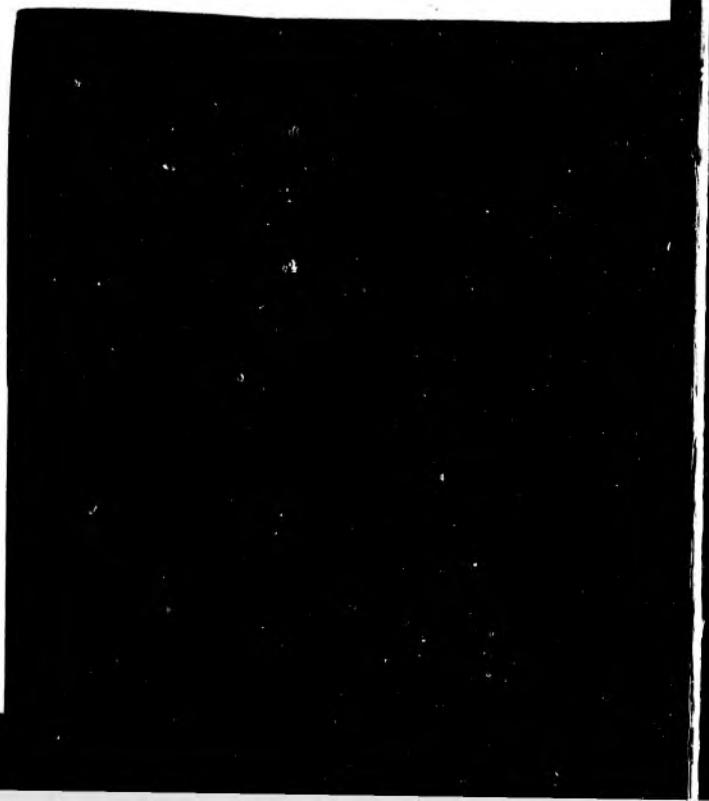
Barbara's youngsters, Susan and Bobby, are two of several million children who are presently being cared for away from home while their mothers work or go to school. Unfortunately, not all the mothers who seek day care services for their youngsters find centers as good as the one Barbara found. Day care centers are too few in this country, and good ones are even fewer. Less than 10 per cent of the children are being cared for in licensed centers, and even some of these licensed services are overcrowded and understaffed, and lack adequate physical and educational facilities.

According to government statistics, mothers of some four million children under the age of six work outside their homes. Often these working mothers have to rely on makeshift arrangements in order to be able to keep a job they badly need. Sometimes women need to work simply can't because there's no one with whom they feel they can safely leave their children.

Increasingly, throughout the country, community councils, hospitals, churches, and government agencies are supporting child care centers, and a number of companies and labor unions have also set up day care centers for the children of their employees or members. Recently, too, there has been a new development in the form of joint sponsorship of a day care center by parents, a government agency, and an industrial company. An example of this is the KLH Child Development Center in Cambridge, Massachusetts, which cares for 60 preschoolers, most of them children of employees of KLH, a manufacturer of stereophonic sound equipment. This center is organized on a cooperative basis. Parents become members of the corporation that owns and operates it, and the center is supported financially by the company, the United States Children's Bureau, private contributions, and fees paid by parents according to their income.

The majority of mothers who work do so because their income is needed to help provide their families with the essentials of a decent life. Some three million of the mothers who work in this country live with their children in homes where there is no father and the mother is the major support of the family.

There are also many families on welfare who are struggling to become self-supporting and could do so if the mother were able to leave her children in a day care center on weekdays. Part of the new welfare program proposed to Congress (*Continued on page* 116)



DAY CARE

(Continued from page 77)

by President Nixon included a request for funds to increase day care facilities for the children of welfare mothers so that these mothers could take jobs. Our country is far behind many others in offering this kind of help to its citizens. Denmark, Sweden, Germany, England, Russia, France, and Israel have had government-supported day care centers for a long time.

Then, of course, a sizable number of women work not to provide the essentials of life, but the highly desirable extra good things. And some women work because it's important to them as people to pursue a particular business or profession, or engage in a creative activity that means a lot to them.

Whatever their reasons for working, mothers of young children need more than just babysitting services. Day care centers should foster—and good ones do—psychological, physical, emotional, and social development of the youngsters who attend them. A good day care center is not a second-best arrangement. In fact, the Child Welfare League of America believes that good centers should be freely available for all preschoolers, whether or not their mothers work, and that all parents should have the option of sending their youngsters to such a center.

What then do good day care programs provide? Where should the center be located? What kind of space, equipment, program, and staffing should it have?

First, of course, the center should be subject to licensing and supervision by a community health agency. In New York City all preschool programs, public and private, involving more than a few children are required to be licensed by the New York City Health Department's Division of Day Care, which insists that certain standards be maintained with regard to food, heat, ventilation, safety and sanitary facilities. The Division also limits the number of children a center is allowed to accommodate, depending on its space, and requires a certain number of properly trained teachers, depending on the number and age of the youngsters enrolled.

For the convenience of both parents and youngsters, it's best if the center is either close to where the family lives or near where the mother works. This means that a big city should have centers located near the heart of all large residential and commercial areas. Smaller communities, of course, will need fewer centers. The center should have plenty of space, both indoors and out, and plenty of sturdy play equipment so that the children can jump, run, climb, and play freely.

Even more important than the plant and equipment is the staff. Young children develop best when they are cared for mainly by one person. This is often difficult to arrange in a day care center, but every effort should be made to provide a primary teacher for each child—one person, that is, with whom the child can form a very special attachment, a closer bond than he forms with other members of the staff.

Clearly, the more the staff members know in advance about a youngster, the easier it is for them to understand and respond to his needs. For this reason, when a mother is preparing to enroll her child in a day care center, she's usually asked about any special habits her child may have. I remember sitting in on one such conference when a mother was telling a staff worker, somewhat apologetically, that her 18-month-old son still took his bottle when he lay down for his nap. "I guess he's a little old for a bottle," she said, "but it seems to comfort him and help him go to sleep." The center worker put the mother at ease by saying, "If he's accustomed to taking a bottle at home when it's naptime, then of course we'll give it to him here."

The people who staff good day care centers know that what may be an ideal provision for one child may be far less suitable for another. Staff members should be able to interpret each child's behavior according to his unique experiences and capacities. I am reminded of Andrew, a little boy of 18 months. His father called me in desperation one night to tell me that he had just learned that his wife had tuberculosis and would need to be in the hospital for several months. The Smiths were new in the community; there were no relatives they could call on for help. Day care seemed to be the only possible solution while the father was at work. Fortunately, a new day care center had just been opened in their neighborhood. The director, Mrs. Summer, had spent several years in England working with Anna Freud in the Hampstead Nursery School. She was particularly sensitive to the individual needs of each child, and organized her staff so that each youngster would have one staff member as his special substitute mother. Andrew did react as might be expected. At first he was often disconsolate, withdrawn, and depressed. Sometimes he would erupt in explosive temper tantrums crying and kicking. It took many weeks for Andrew to realize he could trust his teacher and that she would always look after him. But gradually he began to relax and eventually he became quite sociable, happy, and outgoing again.

What is the daily program in a day care center? In most centers, the first half hour is generally spent just settling the children in. After that, there's usually some kind of organized play—singing, dancing to an accompaniment of rhythm instruments, or playing games. Of course not every youngster may be ready or willing to take part in a group activity. When a child prefers to play in the sandbox by himself or push a truck around, the wise leader leaves him alone to do so. She'll invite him to join the others, but she won't insist, knowing that it's best to let youngsters wait until they're ready to cope with the complexities of getting on with other children.

When youngsters are able to enjoy group play, it can be very valuable to them, teaching them to share toys and to understand and come to like others, and themselves. Among the things children learn more easily through group play in a center than they may at home are that there are better and happier ways to get something than by fighting over it, and that they can count on being treated fairly if they act fairly, too.

Having their children attend a day care center regularly is also a valuable educational experience for parents. Mothers often learn new ways of working with their children by observing the ways the staff members handle the youngsters. A trained day care or nursery teacher helps the children develop verbal skills, for example, by listening attentively to them when they talk and by answering their questions fully and kindly.

A feeling of mutual trust often develops between parents and the director or teachers at a day care center. Many mothers and fathers have no one with whom they can discuss family problems, practical and emotional. Once they become comfortable in a day care setting, they often find it helpful to talk over their concerns with a member of the school staff. Since many centers work closely with a family case work agency or a child guidance clinic, it's usually easy to obtain professional services when problems come up which need specialized counseling.

Day care centers are realizing more and more the full potential of the services they can offer. Health care, for example, is an important service which is being expanded in many centers. Formerly, health care at a center consisted only of a relatively superficial physical examination of the child on his admission, a record of immunizations and, following an illness, the requirement that a physician should state that the child is well enough to return to the center. Increasingly, however, child care centers now have a physician or a trained nurse as a regular, part-time member of their staff. He can spot children who may be suffering from anemia, allergies, malnutrition, visual and hearing deficiencies, learning disabilities—conditions which can often be treated with great success if they're recognized early.

Although the President's request for funds to increase the day care services available to mothers on welfare is a step in the right direction, it's not nearly a big enough one, and has been criticized by many day care specialists as having been made for the wrong reason. Funds should be provided, they say, not simply to enable mothers on welfare to go to work, but because money spent on early childhood development is the best investment our country can make.

At the present time there are youngsters on center waiting lists in almost every city in the nation. Because the need for day care service is so great, some businessmen have recently begun to organize brand-name "chain" day care centers, operated for profit, and are selling franchises to operate these "packaged" centers. Although such centers may be well equipped and well run, educators and welfare specialists are greatly concerned about this trend, fearing that the urge to make a profit may take precedence over the needs of the families who subscribe to the service. Instead of relying on such commercial enterprises to meet the need for expanded day care services, specialists in early childhood education recommend strongly that parents write their Congressmen to ask for more publicly supported day care centers for the increasing number of American families who need and want them. ■

SB 124

February 12, 1971

Mr. Bill Moran,
Juneau, Alaska

Dear Representative Moran:

We feel that the education of three and four year olds should fall under the jurisdiction of the State Dept. of Education rather than Health and Welfare. The Nebraska State Supreme Court ruled (Sept. 1970) in favor of Montessori as a school rather than a business. I quote two other rulings:

"Dec. 1969 - Ray Page, Sup't. of Public Education, State of Ill.: "There is no question that Montessori preschools are truly 'Schools' as distinguished from 'Centers' where the main purpose is child care. I hope this interprets for you the position of the Supt. of Public Instruction."

"Jan. 1970, N. Eugene Shoemaker, Chief, Div. of Private Academic Schools, Dept. of Public Instruction, Commonwealth of Penn.: "The State Board of Private Academic Schools has recognized Montessori as a method of instruction in the preschool area and primary grades in Pennsylvania for the private licensed school area."

Cognitive psychologists and educators are well aware that the child's intelligence grows as much during his first four years of life as it will grow in the next thirteen years. During this period of extra-rapid growth, the environment exerts its most powerful effect.

Tom Thumb Montessori Schools have worked with three and four year olds, as well as kindergarten and grade school under the Alaska State Dept. of Education for the past fifteen years.

The Dept. of Education has the knowledge, resources and personnel to better work with these young children who are in need of a cognitive learning program. Will you please consider voting for the nursery school children ages 3 and 4 to come under the jurisdiction of the State Dept. of Education? This would also be an advantage to the small bush schools who would then be enabled to run their pre-school program in conjunction with the local public school, perhaps sharing building facilities, teachers aides, lunch program and the ordering of supplies.

For the past two years I have been an Instructor for the University of Alaska, Anchorage Branch, as well as Directress for the six Montessori Schools. In these classes we have done a great deal of fact finding as to what is currently being done in the Pre-school area. I will be in Juneau Feb. 24, 25, 26 and 27th. May I have an opportunity to talk with you concerning the needs of young children?

Sincerely,
Margaret Green

Juneau, Alaska

Dear Representative Moran,

I had written to you last month concerning Tom Thumb Montessori Schools desiring to continue operating under the Dept. of Education rather than Health and Welfare. We feel that the enclosed Senate Bill No. 124 covers the needed legislation with the amendment of wording "whose major function is educational" as suggested by Dr. Cliff Hartman, Commissioner of Education. We also feel ages 3 through 5 should be inserted as this is the preelementary age referred to.

Sincerely,
Margaret Green
Margaret Green,
School Directress

MONTESSORI - SCHOOL OR BUSINESS?

After almost a year of litigation stemming from a suit charging violation of zoning laws brought against Mrs. LaVerne Flambeck, Montessori Educational Center, Omaha, in which the plaintiffs alleged a business, rather than a school was being operated, the Nebraska State Supreme Court ruled (Sept. 1970) in favor of the school, in this opinion:

> "The evidence before the trial court shows that the Montessori Educational Center school 'is a school program that is aimed primarily to introduce a child to a lifetime of creative learning. It aims to develop in them the tools for learning, such as curiosity, extended powers of concentration, a positive attitude toward learning itself, and the habits of attending, of initiating and completing tasks. Perhaps the central idea is to surround the child with an appropriate curriculum of learning materials and tasks that enable the child to acquire the conviction that he can learn on his own, and build up within him a positive attitude toward learning and self-confidence in himself as a learner.'"

Other rulings on this subject:

> Dec. 1969, Ray Page, Sup't. of Public Education, State of Ill.: "there is no question that the Montessori preschools are truly 'schools' as distinguished from 'Centers' where the main purpose is child care. I hope this interprets for you the position of the Office of the Superintendent of Public Instruction."

Jan., 1970, N. Eugene Shoemaker, Chief, Div. of Private Academic Schools, Dep't. of Public Instruction, Commonwealth of Penn.: "The State Board of Private Academic Schools has recognized Montessori as a method of instruction in the preschool area and primary grades in Pennsylvania for the private licensed school area."

TOM THUMB MONTESSORI SCHOOLS

#124

March 4, 1971

Representative Wm. J. Moran
Capitol Bldg.,
Juneau, Alaska

Dear Representative,

For the past fifteen years our Tom Thumb Private School has operated under the jurisdiction of the Dept. of Education. We have children from the ages of three through eleven. Senator Thomas's Bill No. 32 would place education of th ee and four year olds in public schools under the jurisdiction of the State Dept. of Education but doesn't mention private schools. We feel very strongly that this should also include private schools such as ours, who have an educational program for three and four year olds and hire certificated teachers.

Enclosed is a direct quotation from American Montessori Society News 1970 stating that Nebraska, Illinois and Pennsylvania consider Montessori Schools as schools rather than day care centers.

Will you please support any forthcoming legislation for three and four year olds of private schools to be placed under the jurisdiction of the State Dept. of Education rather than Health and Welfare.

Dr. Cliff Hartman is in agreement with our educational program for three and fours remaining under his jurisdiction along with our grade school. As ours is an ungraded open concept school, threes and fours cannot be entirely separated from Kindergarten through sixth grade, and we cannot conceivably work under two separate departments.

Any comments you may have after talking with Dr. Hartman will be greatly appreciated.

Sincerely,
Margaret Green
Margaret Green,
School Directress

FORM SA-1B

MEMORANDUM State of Alaska

TO: Members of the Alaska State Senate and House of Representatives

DATE : April 29, 1971

FROM: Frederick McGinnis F.McG.
Commissioner
Department of Health and Welfare

SUBJECT: Alaska State White House Conference on Aging

The month of May, 1971 has been proclaimed by the President of the United States and the Governor of Alaska as Senior Citizen Month. The theme for this month will be "Towards a National Policy on Aging." Alaska, like forty-seven other states, has scheduled its State White House Conference on Aging during this month. The Alaska State White House Conference is to be held in the City of Anchorage on May 20, 21, and 22. The Anchorage Travelodge has been selected as the Conference Headquarters.

The purpose of the Conference is to participate in the development of a National Policy on Aging. The results of the State Conference will be the drafting of Policy Recommendations, which will become a part of the State of Alaska's report to the National White House Conference. The National White House Conference on Aging is to be held in Washington, D.C. the week of November 28, 1971.

Delegates attending the White House Conference will represent geographical areas of Alaska, the various ethnic groups of people residing in the State, the consumers of service, as well as governmental and non-governmental agencies who are providing services or who have special interests in the older Alaskan.

We would like to take this opportunity to extend an invitation to you to attend and participate in the State White House Conference on Aging and to join with other Alaskans in their efforts to "Make Loads a Little Lighter and Life a Little Brighter for All Older Alaskans."

Magistrates' salaries

Alaska Court System

State of Alaska

MAGISTRATE SUPERVISOR
JIM I. MARTIN

OFFICE OF ADMINISTRATIVE DIRECTOR

941 FOURTH AVENUE
ANCHORAGE, ALASKA
99501

April 22, 1971

JIM/104

The Honorable William J. Moran
Alaska State House of Representatives
Pouch V State Capitol Building
Juneau, Alaska 99801

Dear Representative Moran:

I am aware that the General Fund Bill is now before the House. The Alaska Court System's budget allocation presently submitted by the House Finance Committee is about $6,800,000. The original budget request by the Alaska Court System was $9,706,000.

A part of the original budget request was a projected increase in magistrates' salaries which would total $81,000. The General Fund Bill presently limiting the budgetary allocation to the Alaska Court System to about $6,800,000 is a drastic budget cut from the original request. This would indicate that the Alaska Court System would have difficulty allowing the projected increases for all magistrates in the amount that would total $81,000.

I feel that it is most urgent that the court system be allowed a sufficient budget to ensure the projected magistrates' salary increases. The justification for the proposed magistrates' salary increases substantiates the ever-increasing workload placed on all magistrates throughout the state. Many of our magistrates are presently working at salaries unjustly proportionate to their actual workload. These magistrates are continuing to work in hopes that their salaries will be substantially increased to justly compensate them.

The following are examples of magistrates' salaries presently earned with projected monthly salary increases. Please be aware that all magistrates have a minimum base salary of $3,500 per year and any additional pay is computed at how many man months per year the magistrate has to work. Also be aware that the magistrates are having ever-increasing workloads. The magistrate at Skagway presently earns a monthly salary of $293.83. Her projected monthly salary increase should be $400 to justly compensate her

for present work done. The magistrate at Kotzebue presently earns $585 per month. His projected monthly income should be $716.67 to justly compensate him for present work done. The magistrate at Dillingham presently earns $646.17. His projected monthly income should be $900 per month to justly compensate him for present work done. The magistrate at McGrath presently earns $223.08. His projected monthly income should be $341.66 to justly compensate him for present work done.

Please be aware that the above examples are only a sampling of the four judicial districts. Also please be aware that the projected increase for salaries is substantially more per month than the magistrate presently receives and that they are definitely not compensated for their present workload. The examples given above are typical of all the magistrates in Alaska.

If, in the final analysis, the Alaska Court System is limited to a budget of $6,800,000, major priority programs for the 1971-72 fiscal year may have to be cut. It would appear that a just salary increase for magistrates would be doubtful.

I have read in the Anchorage Times that a bill may be proposed to the House to raise state employees' salaries by five percent. Magistrates as judicial officers will not be eligible to participate in that salary increase unless they were specifically mentioned in that bill. If the magistrates are mentioned in the bill, a five percent salary increase would nowhere meet their present need to compensate them for work done. This is readily apparent by the proposed salary increases I have given above.

I solicit your support to properly evaluate the Alaska Court System's fiscal budget and consider making a substantial increase in that budget so that the magistrates may be ensured of a salary increase. I feel that it is imperative that a judicial officer be properly compensated for the amount of work he does in order to ensure his complete effort in adjudicating matters brought before his court. I feel that your consideration in this regard is most urgent to ensure justifiable salary increases for all the magistrates in Alaska.

Very truly yours,

Jim I. Martin
Magistrate Supervisor

STATE OF ALASKA

WILLIAM A. EGAN, GOVERNOR

DEPARTMENT OF PUBLIC SAFETY

OFFICE OF THE COMMISSIONER / POUCH N — STATE CAPITOL
JUNEAU 99801

April 23, 1971

The Honorable William J. Moran
Chairman
House Judiciary Committee
Alaska State Legislature
Pouch V, Capitol Building
Juneau, Alaska 99801

Dear Representative Moran:

Attached is a copy of our Section 115.020, Administrative Inquiry, as it existed at the time the Judiciary Committee made its recommendations. Also attached is a copy of our Section 115.020 entitled Investigative Inquiry, which is a revision of the previous regulation that was made and distributed on June 1, 1970.

Whereas this matter had not been given a great deal of thought by me previously, a close reading of the revision appears to me to remove the objections that the Judiciary Committee seemed to have.

It is my view that any manual of regulations, its intents and ultimate uses is pretty much dependent upon those persons administering it, and I assure you that it is my policy to see that these matters are carried out, when they arise, in as proper a manner as possible.

I trust this answers your question satisfactorily. Please do not hesitate to call upon me if further discussion is desired.

Very truly yours,

Emery W. Chapple, Jr.
Commissioner

Encs.

CHAPTER 115

REVIEW, HEARINGS AND APPEALS

Sec. 115.010 PROCEDURES (Re: Rule 12 01.0, State Personnel Rules)

A. Any member in the classified service may seek intra-departmental review of any grievance as follows:

1. The member shall present his grievance in writing to, and discuss it with, his immediate supervisor.

2. If not satisfied, he may proceed to the next superior.

3. If still not settled to member's satisfaction, he may, within 10 days, submit grievance in writing and through chain of command, to the Commissioner. The Commissioner shall, within 15 days after receipt of the written grievance, provide the member with his written decision concerning the matter.

Sec. 115.020 INVESTIGATIVE INQUIRY

A. The Commissioner may direct that an investigative inquiry be made into the circumstances and facts of the charges made against any member which are or may be considered grounds for disciplinary action. The inquiry may be made prior to any disciplinary action or after summary disciplinary action.

An investigative inquiry is not an accusatory nor a decision making body. It is, as the title implies, an investigative body charged with the responsibility for impartially obtaining facts and circumstances surrounding an allegation, and presenting the findings to the Commissioner for consideration during the discharge of his executive responsibilities as the appointing Authority and administrative head of the department.

B. Inquiry members shall consist of the Commissioner or his designee and other personnel designated by him, provided at least one (1) member is of equal rank with the member charged.

C. The Commissioner may, but need not, request the presence of the accused in writing. Oral

notice to attend given by any superior is sufficient.

D. An accused member ordered to appear shall do so or be cited for additional disciplinary action or such other action directed by the Commissioner.

E. The substance of testimony shall be mechanically or visually recorded and in addition reported on Department forms as prescribed in Chapter 113, Section 020. The recommendations of the individual members conducting the inquiry and the basis for the recommendation shall accompany the report. Such reports shall be forwarded to the Commissioner within five (5) days following the inquiry and the Commissioner shall notify the accused of his final decision within ten (10) days after the inquiry. The notice to the accused shall be as prescribed in Chapter 114.050.

F. The accused may, but need not, be suspended during inquiry.

Sec. 115.030 APPEAL

A. If a member is not satisfied with intradepartmental review as outlined in Sections 115.010 - 020, he may request Inter-departmental Review as provided in State Personnel Rules, Section 12 01.14 through 12 01.17, wherein he is allowed legal counsel.

Sec. 115.040 EXEMPTIONS

A. No temporary, provisional or probationary member shall have the right to review, hearing or appeal concerning dismissal, unless same is due to racial, religious or political reasons.

CHAPTER 115

REVIEW, HEARINGS AND APPEALS

Sec. 115.010 PROCEDURES (Re: Rule 12 01.0, State Personnel Rules)

A. Any member in the classified service may seek intra-departmental review of any grievance as follows:

1. The member shall present his grievance in writing to, and discuss it with, his immediate supervisor.

2. If not satisfied, he may proceed to the next supervisor.

3. If still not settled to member's satisfaction, he may, within 10 days, submit grievance in writing and through chain of command, to the Commissioner. The Commissioner shall, within 15 days after receipt of the written grievance, provide the member with his written decision concerning the matter. (In order to arrive at his decision, the Commissioner may, but need not, ask for an Administrative Inquiry.) (Re: Section 115.020)

Sec. 115.020 ADMINISTRATIVE INQUIRY

A. Inquiry members shall consist of the Commissioner or his designee and other personnel designated by him, provided at least one (1) member is of equal rank with the member charged.

B. The Commissioner may, but need not, request the presence of the accused in writing. Oral notice to attend given by any superior is sufficient.

C. An accused member ordered to appear shall do so or be cited for additional disciplinary action or such other action directed by the Commissioner.

legal?

D. An accused does not have the right of legal counsel at an inquiry; however, he may remain silent.

E. The substance of testimony shall be recorded and reported on Department forms as prescribed in Chapter 113, Section 020, as will the finding and recommendations of the members conducting the inquiry. Such reports shall be forwarded to the Commissioner.

F. The Commissioner shall notify the accused as

prescribed in Sec. 115.010, paragraph 3.

G. The accused may, but need not, be suspended during inquiry.

Sec. 115.030 APPEAL

A. If a member is not satisfied with intra-departmental review as outlined in Sections 115.010 - 020, he may request Inter-departmental Review as provided in State Personnel Rules, Section 12 01.14 through 12 01.17, wherein he is allowed legal counsel.

Sec. 115.040 EXEMPTIONS

HOUSE JOURNAL

1970 Hse. Journal Supp. #19

Judiciary Committee Report

on

DEPT. OF PUBLIC SAFETY ADMINISTRATIVE INQUIRIES

The disciplinary procedures of the Department of Public Safety have recently come to the attention of the Judiciary Committee. Of particular concern to the committee is Sec. 115.020D of the department's "Regulations and Operations Manual", relating to "Administrative Inquiries", which provides that "An accused does not have the right of legal counsel at an inquiry; however, he may remain silent." Testimony before the committee stated that in at least one instance a trooper subject to disciplinary action was advised that at his administrative inquiry he could have legal counsel, but when he appeared at the inquiry without legal counsel he was not allowed to speak in his own defense or to cross-examine opposing witnesses. As a result of the inquiry he was dismissed from service in the department.

The committee is not concerned with the merits of the personnel action, which has been appealed under the personnel rules.

The committee believes that, although this administrative inquiry is not required by statute or the constitution since a hearing under the state personnel rules is available, when the inquiry is held, due process requires that the accused be allowed to have legal counsel and that whether or not the accused has legal counsel present he be allowed to testify on his own behalf, cross-examine witnesses and present evidence. The committee believes that Sec. 115.020D may be invalid despite the right to a subsequent "due process" hearing before the personnel board and in any event is very bad state policy and that the department's procedure in the case considered by the committee was improper in not allowing the accused trooper to defend himself and to cross-examine witnesses. The committee also believes that it was improper for the administrative inquiry to be filmed (video-taped) for use as an instructional aid at the training school for state troopers. (There was testimony that the film would be used for this purpose, and the committee has been told that the film has come from Sitka, the site of the training school, in response to the committee's request to see it.)

By way of comparison, the committee notes that Art. 135 of the Uniform Code of Military Justice (10 U.S.C., sec. 935) provides that in court-of-inquiry proceedings a person who is designated a "party" to the proceedings shall be given due notice of the inquiry and he has a right to be present, to be represented by counsel, to cross-examine witnesses, and to introduce evidence. In addition, sec. 0304(d) of the Coast Guard Supplement to the Manual for Courts Martial, United States, provides that for all three levels of investigation (informal, formal, and courts of inquiry) in that branch of the armed forces a party to an inquiry or investigation has the following rights: (1) to be given due notice of his designation as a "party"; (2) to be present during proceedings; (3) to be represented by counsel; (4) to challenge members of a court of inquiry but only for cause stated to the court (this obviously applies only to the third type of investigation); (5) to cross-examine witnesses; (6) to introduce evidence; (7) to testify as a witness, but he must first be advised of his rights under Art. 31 of the

U.C.M.J. (Miranda warnings, etc.); (8) to make a voluntary statement; (9) to make concluding argument. These investigations and inquiries are not "courts martial" nor are they non-judicial disciplinary proceedings under Art. 15 of the U.C.M.J. (10 U.S.C., sec. 815); they are investigatory proceedings apart from judicial or other final action, and they thus appear to be analogous to the Department of Public Safety's "administrative inquiries".

The Judiciary Committee requests that the Department of Public Safety, with the assistance and advice of the Department of Law, review its regulations pertaining to disciplinary matters and administrative inquiries, compare them with relevant provisions in the Uniform Code of Military Justice and the Coast Guard Supplement to the Manual for Courts Martial, and revise the regulations in order to assure due process of law and basic procedural fairness.

Barry W. Jackson
Chairman
House Judiciary Committee

CHAPTER 101

PROFESSIONAL CONDUCT

Sec. 101.010 BASIC OBJECTIVES

A. To cause all members to constantly strive to increase the respect and honor of the profession in the public mind, and to strengthen public confidence in law enforecment.

B. To encourage members to fully appreciate and value the responsibilities of their office.

C. To regard the work of the Department as an honorable profession and to consider in it an opportunity to render a valuable service to society.

D. To continually develop and maintain complete support and cooperation of the public.

E. To increase and advance the effectiveness of the service by encouraging complete cooperation of all members for their mutual benefit.

F. To develop complete coordination of effort in all official relationships with other governmental agencies.

Sec. 101.020 GENERAL RULES OF OFFICIAL CONDUCT

All members of the Department shall:

A. Be habitually courteous; they shall dutifully accept their responsibilities as public servants and shall be attentive to citizens seeking assistance or information or who desire to register complaints or give evidence.

B. Regard punctuality in all their engagements and the diligent performance of their duties as a prime responsibility to the public.

C. At all times be cognizant of their primary obligation to render impartial, efficient, and effective services to the public in the discharge of their duties and to always regard their office as a public trust.

D. Administer their duties in a courteous, fair, just, impartial and reasonable manner, according no one more reasonable treatment than others. They shall recognize the limitations of their authority and at no time use the power or influence of their office or position for their own personal advantage.

E. Accept the responsibility for the proper care of state property and recognize the fact that any misuse or waste of such property is equally as reprehensible as the misuse of funds from the state treasury.

F. Cooperate with all Federal, State, City and local officials to further insure the safety and general welfare of the public. They shall not permit personal differences or jealousies to influence their cooperation with other agencies.

G. Add to their further development and effectiveness by adequate study and dedicated attention to self improvement, always keeping in mind that the professional must keep fit not only in body, but particularly in character, education and ideals of service.

They shall welcome the opportunity to make available to everyone any and all useful information concerning matters of public safety and welfare.

H. Conduct their public and private life in such a manner that the public will regard them as examples of fidelity, stability and morality.

I. Bear faithful allegiance to their government, and be loyal to their profession. They shall accept as a sacred obligation their responsibilities as citizens to support the Constitution of the United States, and as public officials they shall consider the privilege of defending the principles of liberty as defined in our Constitution and Laws the greatest honor that may be bestowed upon any man.

Sec. 101.030 ORIGIN OF CODES

It is the philosophy of the Department that the reputation that this governmental organization bears with the public is influenced,

to a very great degree, by the reaction of the public to the impact of the personalities of its members. Personalities that are characterized by such traits as loyalty, determination, alertness, intelligence, unselfishness, honesty and moral ascendency are instantly appealing and respected. Each and every member is expected to make a dedicated effort to so conduct both his official and private life that he will inspire the confidence and trust of the public.

The Department considers law enforcement as an honored profession and recognizes the value and importance of developing and maintaining public confidence in the many and various endeavors and has accordingly enacted exacting rules of official conduct for all members.

To further emphasize the ideals and professional conduct which the Department has always sought to uphold, the Code and Canons of Ethics of the International Association of Chiefs of Police are adopted for the benefit of all Department of Public Safety members and especially for the guidance of all commissioned personnel.

Throughout the history of this Department, other reliable and necessary rules for conduct and performance of duty have been developed and are herein promulgated in their latest form.

Sec. 101.040 APPLICATION OF CODES AND RULES

All of the ethical standards and rules expressed herein are inclusive and together constitute the standards of conduct by which all members of the Department of Public Safety are to be governed. It shall be the duty of each member to study and become familiar with the rules and regulations governing the organization and operation of the Department, as well as the rules governing control and discipline.

CHAPTER 102

CANONS OF POLICE ETHICS

Article 1. Primary Responsibility of Job

The primary responsibility of the police service, and of the individual officer, is the protection of the people of the United States through the upholding of their laws, chief among these is the Constitution of the United States and its amendments. The law enforcement officer always represents the whole of the community and its legally expressed will and is never the arm of any political party or clique.

Article 2. Limitations of Authority

The first duty of a law enforcement officer, as upholder of the law, is to know its bounds upon him in enforcing it. Because he represents the legal will of the community, be it local, state or federal, he must be aware of the limitations and prescriptions which the people, through law have placed upon him. He must recognize the genius of the American system of government which gives to no man, groups of men, or institution, absolute power, and he must insure that he, as a prime defender of that system, does not pervert its character.

Article 3. Duty to be Familiar with the Law and with Responsibilities of Self and other Public Officials

The law enforcement officer shall assiduously apply himself to the study of the principles of the laws which he is sworn to uphold. He will make certain of his responsibilities in the particulars of their enforcement, seeking aid from his superiors in matters of technicality or principle when these are not clear to him; he will make special effort to fully understand his relationship to other public officials, including other law enforcement agencies, particularly on matters of jurisdiction, both geographically and substantively.

Article 4. Utilization of Proper Means to Gain Proper Ends

The law enforcement officer shall be mindful of his responsibility to pay strict heed to the selection of means in discharging the duties of his office. Violations of law or disregard for public safety and property on the part of an officer are intrinsically wrong; they are self-defeating in that they instill in the public mind a like disposition. The employment of illegal means, no matter how worthy the end, is certain to encourage disrespect for the law and its officers. If the law is to be honored, it must first be honored by those who enforce it.

Article 5. Cooperation with Public Officials in the Discharge of Their Authorized Duties

The law enforcement officer shall cooperate fully with other public officials in the discharge of authorized duties, regardless of party affiliation or personal prejudice. He shall be meticulous, however, in assuring himself of the propriety, under the law, of such actions and shall guard against the use of his office or person, whether knowingly or unknowingly, in any improper or illegal action. In any situation open to question, he shall seek authority from his superior officer, giving him a full report of the proposed service or action.

Article 6. Private Conduct

The law enforcement officer shall be mindful of his special identification by the public as an upholder of the law. Laxity of conduct or manner in private life, expressing either disrespect for the law or seeking to gain special privilege, cannot but reflect upon the police officer and the police service. The community and the service require that the law enforcement officer lead the life of a decent and honorable man. Following the career of a policeman gives no man special prerequisites. It does give the satisfaction and pride of following and furthering an unbroken tradition of safeguarding the American republic. The officer who reflects upon this tradition will not degrade it. Rather, he will so conduct his private life that the public will regard him as an example of stability, fidelity and morality.

Article 7. Conduct toward the Public

The law enforcement officer, mindful of his responsibility to the whole community, shall deal with individuals of the community in a manner calculated to instill respect for its laws and its police service. The law enforcement officer shall conduct his official life in a manner such as will inspire confidence and trust. Thus, he will be neither overbearing nor subservient, as no individual citizen has an obligation to stand in awe of him nor a right to command him. The officer will give service where he can, and require compliance with the law. He will do neither from personal preference or prejudice, but rather as a duly appointed officer of the law discharging his sworn obligation.

Article 8. Conduct in Arresting and Dealing with Law Violators

The law enforcement officer shall use his powers of arrest strictly in accordance with the law and with due regard to the rights of the citizen concerned. His office gives him no right to prosecute the violator nor to mete out punishment for the offense. He shall, at all times, have a clear appreciation of his responsibilities and limitations regarding detention of the violator; he shall conduct himself in such a manner as will minimize the possibility of having to use force. To this end he shall cultivate a dedication to the service of the people and the equitable upholding of their laws whether in the handling of law violators or in dealing with the law-abiding.

Article 9. Gifts and Favors

The law enforcement officer, representing government, bears the heavy responsibility of maintaining, in his own conduct, the honor and integrity of all government institutions. He shall, therefore, guard against placing himself in a position in which any person can expect special consideration or in which the public can reasonably assume that special consideration is being given. Thus,he should be firm in refusing gifts, favors, or gratuities, large or small, which can, in the public mind, be interpreted as capable of influencing his judgment in the discharge of his duties.

Article 10. Presentation of Evidence

The law enforcement officer shall be concerned equally in the prosecution of the wrong-doer and the defense of the innocent. He shall ascertain what constitutes evidence and shall present such evidence impartially and without malice. In so doing, he will ignore social, political, and all other distinctions among the persons involved, strengthening the tradition of the reliability and integrity of an officer's word.

The law enforcement officer shall take special pains to increase his perception and skill of observation, mindful that in many situations his is the sole impartial testimony to the facts of the case.

Article 11. Attitude Toward Profession

The law enforcement officer shall regard the discharge of his duties as a public trust and recognize his responsibility as a public servant. By diligent study and sincere attention to self-improvement he shall strive to make the best possible application of science to the solution of crime and, in the field of human relationships, strive for effective leadership and public influence in matters affecting public safety. He shall appreciate the importance and responsibility of his office, and hold police work to be an honorable profession rendering valuable service to his community and his country.

CHAPTER 115

REVIEW, HEARINGS AND APPEALS

Sec. 115.010 PROCEDURES (Re: Rule 12 01.0, State Personnel Rules)

A. Any member in the classified service may seek intra-departmental review of any grievance as follows:

1. The member shall present his grievance in writing to, and discuss it with, his immediate supervisor.

2. If not satisfied, he may proceed to the next supervisor.

3. If still not settled to member's satisfaction, he may, within 10 days, submit grievance in writing and through chain of command, to the Commissioner. The Commissioner shall, within 15 days after receipt of the written grievance, provide the member with his written decision concerning the matter. In order to arrive at his decision, the Commissioner may, but need not, ask for an Administrative Inquiry. (Re: Section 115.020)

Sec. 115.020 ADMINISTRATIVE INQUIRY

A. Inquiry members shall consist of the Commissioner or his designee and other personnel designated by him, provided at least one (1) member is of equal rank with the member charged.

B. The Commissioner may, but need not, request the presence of the accused in writing. Oral notice to attend given by any superior is sufficient.

C. An accused member ordered to appear shall do so or be cited for additional disciplinary action or such other action directed by the Commissioner.

D. An accused does not have the right of legal counsel at an inquiry; however, he may remain silent.

E. The substance of testimony shall be recorded and reported on Department forms as prescribed in Chapter 113, Section 020, as will the finding and recommendations of the members conducting the inquiry. Such reports shall be forwarded to the Commissioner.

F. The Commissioner shall notify the accused as

described in Sec. 115.010, paragraph 3.

C. The accused may, but need not, be suspended during inquiry.

Sec. 115.030 APPEAL

A. If a member is not satisfied with intra-departmental review as outlined in Sections 115.020 - 115.029, he may request Inter-departmental Review as provided in State Personnel Rules, Section 12 01.14 through 12 01.17, wherein he is allowed legal counsel.

Sec. 115.040 EXEMPTIONS

A. No temporary, provisional or probationary member shall have the right of review, hearing or appeal concerning dismissal, unless same is for racial, religious or political reasons.

TO: William J. Moran, Chairman
House Judiciary Committee

FROM: Arthur H. Peterson
Revisor of Statutes

SUBJECT: Department of Public Safety's "administrative inquiries"

You will find attached a copy of the Judiciary Committee's May 31, 1970 report on this subject, appearing in Supp. No. 19 of the 1970 House Journal. In the last paragraph, the committee requested the Department of Public Safety, with the assistance and advice of the Department of Law, to "review its regulations pertaining to disciplinary matters and administrative inquiries, compare them with relevant provisions in the Uniform Code of Military Justice and the Coast Guard Supplement to the Manual for Courts Martial, and revise the regulations in order to assure due process of law and basic procedural fairness." The review and revision may have been completed, but I am not aware of it, nor do I know of a report on the matter by either the Department of Public Safety or the Department of Law in response to the committee's request.

AHP:ic

5/31/70

HOUSE JOURNAL

Judiciary Committee Report

on

DEPT. OF PUBLIC SAFETY ADMINISTRATIVE INQUIRIES

The disciplinary procedures of the Department of Public Safety have recently come to the attention of the Judiciary Committee. Of particular concern to the committee is Sec. 115.020D of the department's "Regulations and Operations Manual", relating to "Administrative Inquiries", which provides that "An accused does not have the right of legal counsel at an inquiry; however, he may remain silent." Testimony before the committee stated that in at least one instance a trooper subject to disciplinary action was advised that at his administrative inquiry he could have legal counsel, but when he appeared at the inquiry without legal counsel he was not allowed to speak in his own defense or to cross-examine opposing witnesses. As a result of the inquiry he was dismissed from service in the department.

The committee is not concerned with the merits of the personnel action, which has been appealed under the personnel rules.

The committee believes that, although this administrative inquiry is not required by statute or the constitution since a hearing under the state personnel rules is available, when the inquiry is held, due process requires that the accused be allowed to have legal counsel and that whether or not the accused has legal counsel present he be allowed to testify on his own behalf, cross-examine witnesses and present evidence. The committee believes that Sec. 115.020D may be invalid despite the right to a subsequent "due process" hearing before the personnel board and in any event is very bad state policy and that the department's procedure in the case considered by the committee was improper in not allowing the accused trooper to defend himself and to cross-examine witnesses. The committee also believes that it was improper for the administrative inquiry to be filmed (video-taped) for use as an instructional aid at the training school for state troopers. (There was testimony that the film would be used for this purpose, and the committee has been told that the film has come from Sitka, the site of the training school, in response to the committee's request to see it.)

By way of comparison, the committee notes that Art. 135 of the Uniform Code of Military Justice (10 U.S.C., sec. 935) provides that in court-of-inquiry proceedings a person who is designated a "party" to the proceedings shall be given due notice of the inquiry and he has a right to be present, to be represented by counsel, to cross-examine witnesses, and to introduce evidence. In addition, sec. 0304(d) of the Coast Guard Supplement to the Manual for Courts Martial, United States, provides that for all three levels of investigation (informal, formal, and courts of inquiry) in that branch of the armed forces a party to an inquiry or investigation has the following rights: (1) to be given due notice of his designation as a "party"; (2) to be present during proceedings; (3) to be represented by counsel; (4) to challenge members of a court of inquiry but only for cause stated to the court (this obviously applies only to the third type of investigation); (5) to cross-examine witnesses; (6) to introduce evidence; (7) to testify as a witness, but he must first be advised of his rights under Art. 31 of the

U.C.M.J. (Miranda warnings, etc.); (8) to make a voluntary statement; (9) to make concluding argument. These investigations and inquiries are not "courts martial" nor are they non-judicial disciplinary proceedings under Art. 15 of the U.C.M.J. (10 U.S.C., sec. 815); they are investigatory proceedings apart from judicial or other final action, and they thus appear to be analogous to the Department of Public Safety's "administrative inquiries".

The Judiciary Committee requests that the Department of Public Safety, with the assistance and advice of the Department of Law, review its regulations pertaining to disciplinary matters and administrative inquiries, compare them with relevant provisions in the Uniform Code of Military Justice and the Coast Guard Supplement to the Manual for Courts Martial, and revise the regulations in order to assure due process of law and basic procedural fairness.

HB 174

HB 174

Statement by the AFL-CIO Executive Council

on

The Uniform Consumer Credit Code

Bal Harbour, Florida
February 17, 1969

We have carefully examined the Uniform Consumer Credit Code, a "model state law" which has been prepared for introduction in the 47 state legislatures meeting in 1969.

UCCC would repeal and replace virtually all existing state laws relating to consumer credit. Sponsored by the National Conference of Commissioners on Uniform State Laws, it is offered for adoption as a "package," without amendment. The sponsors urge immediate enactment, despite the fact that the Code is a lengthy, complex, and sweeping legislative proposal. The public has had little opportunity to evaluate either its general impact or its specific provisions.

The Code is not essentially a "consumer statute" but seeks to compromise consumer and creditor interests. While it would make a number of desirable reforms in behalf of the consumer, which should be supported, it also contains serious drawbacks from a consumer point of view.

For this reason we cannot endorse the Code in its present form for enactment as a uniform law throughout the United States.

Our principal objections are as follows:

(1) We are shocked by the extraordinarily high finance charge ceilings authorized by the Code, ranging from 18 to 36 percent per year for installment loans and credit, and believe that they would inevitably result in exhorbitantly high credit costs for borrowers and credit buyers.

(2) We cannot concur in the excessive rate of 10 percent per year, which would be permitted on first mortgages.

(3) We are dissatisfied with the provisions on wage garnishment which could, if care is not taken, result in reduction of existing protections for wage earners in a number of states. We cannot in any case endorse a "take" by creditors as high as 25 percent of a person's wages.

(4) We are alarmed at the general repeal contemplated by the Code of present state consumer credit legislation regardless of whether it is superior to Code provisions or covers subjects not covered in the Code.

- more -

The possible impact of Code enactment would vary in each of the 50 states. Each state will need to make a careful assessment of its existing legislation in comparison with Code provisions.

In states with a large body of existing legislation, state AFL-CIO central bodies will probably find it best to reject the Code and instead seek improvements in their present laws, borrowing good features from the Code where appropriate.

In states with little or very deficient legislation, state central bodies may find it advisable to start with the Code as a working basis, but should seek amendment of its worst features.

In any case, precipitous enactment of the Code on an "as is" package basis should be rejected, as well as deviant forms, containing even worse features, which are likely to be introduced in some of the legislatures.

At the national level, the AFL-CIO staff will render whatever assistance it can to state bodies in connection with UCCC. We will also pursue abatement of consumer credit evils through federal legislation, wherever it is possible and appropriate. The door should not be shut on consumer credit reform through federal action. Enactment of federal minimum standards in the consumer credit field may in fact be necessary to reach the states in which reform is most needed and where creditor lobbies are most likely to succeed in blocking it.

BACKGROUND STATEMENT
ON
UNIFORM CONSUMER CREDIT CODE

The Uniform Consumer Credit Code (UCCC) is a type of "model state law" developed by the National Conference of Commissioners on Uniform State Laws. It was officially promulgated by the Conference on July 30, 1968, and subsequently endorsed, on August 7, 1968, by the American Bar Association. The Code has been in process since 1964, although much of the final text was prepared in 1968 to take account of the Federal Consumer Credit Protection Act, which was signed by the President on May 29, 1968.

Since the original text was released, the Code has undergone additional revisions. The current version of the Code is the "Revised Final Draft, November 1968," published in December 1968.

UCCC is designed as a replacement for virtually all existing state laws relating to consumer credit. Present laws on such provisions as maximum finance charge rates, (including usury rates), disclosure, licensing, administration and enforcement would be repealed. The one major exception to general repeal would be in the case of "supervised financial institutions" -- such as banks, savings and loan associations, and credit unions -- which receive deposits as well as make loans, although the new rate structure would apply to them as well as to other creditors.

Because the Code is designed as a uniform law, to be enacted in the same form in every state, it is offered as a "package" for adoption in its entirety, without amendment. Code sponsors are seeking blanket endorsement of the Code, regardless of any deficiencies and drawbacks.

The Code was not developed as a "consumer statute," as such, but rather seeks a "balance" of consumer and creditor interests. The principal "trade-off" appears to be in the form of high finance charges for creditors in exchange for restrictions on some of the more bloodthirsty techniques by which creditors can enforce repayment of debts plus more comprehensive enforcement procedures than now apply under many types of credit statutes.

Present indications are that the compromise is unlikely to be satisfactory to all groups. The Code has drawn support from various segments of the credit industry, but coldness from others (notably the American Bankers Association). No known support has come from consumer groups. The major exception in the consumer community was an endorsement by the Special Assistant to the President for Consumer Affairs and the President's Committee on Consumer Interests. But the Code has come under heavy fire from the Consumer Federation of America, representing 136 consumer-oriented organizations. To date it has been opposed by at least three important state consumer organizations -- the Association of California Consumers, the Consumers League of New Jersey, and the Pennsylvania League for Consumer Protection -- as well as by the Massachusetts Consumers' Council, an official consumer representation body.

Although Code sponsors have sought immediate, wholesale endorsements of their work, and immediate enactment in the 47 state legislatures meeting in 1969, the general public has had little time to gain an understanding of the

-more-

Code or to develop knowledgeable criticism. The possible impacts would, of course, vary in each of the separate 50 states. Study and criticism will be a continuing process, and common sense dictates a rejection of precipitous enactment.

For states which already have a large body of consumer credit legislation, covering both cash loans and retail sales credit, enactment of UCCC may represent little if any gain in consumer protections and in fact is more likely to result in a net loss. Such states should be extremely critical of UCCC and probably will find it best to reject the Code altogether in favor of continuing improvements in their existing statutes.

On the other hand, states with little or very deficient consumer credit legislation could find that UCCC represents a net gain, in the sense that almost anything would be better than what they have. Even in such situations, a cautious approach is advisable. As indicated in the more detailed comments that follow, finance charge ceilings authorized under UCCC are extraordinarily high for types of credit other than for small loans, and the Code has other drawbacks.

Clearly, an important motivation for urging speedy enactment is the hope of forestalling further federal action in the field of consumer credit. An immediate and announced goal of the Conference is to gain exemptions of state credit laws from applicable provisions of the newly enacted federal Consumer Credit Protection Act. Under the federal law, state laws with "substantially similar" provisions may be exempted from federal requirements for disclosure of the cost of consumer credit and from federal requirements limiting the amount of wages that may be garnished. Further possibilities of federal entry into the consumer credit field could come out of the prospective study by the newly authorized National Commission on Consumer Finance which was set up by the Consumer Credit Protection Act with instructions to make a study and recommendations by January 1, 1971. Also specific federal bills may be expected in the field of credit insurance and in door-to-door credit sales, at a minimum.

MAJOR POINTS ABOUT THE UNIFORM CONSUMER CREDIT CODE

Maximum Charges

1. The Code repeals all existing laws setting maximum rates on consumer loans from banks, credit unions, small loan companies and repeals general usury rate statutes (important primarily in mortgage lending). Maximum rates for retail sales are also repealed including finance charge ceilings set for automobiles, for general retail sales, home repair services and for revolving credit. Existing finance charge ceilings for most creditors would be replaced by uniform ceilings patterned on existing rates for small loan companies, the highest-rate legal lenders in the credit market. In effect, the small loan company rates would become an "umbrella" for all creditors, both for cash loans and for sales credit. The new ceilings would thus raise the legally permitted rates of charge for most creditors in most states.

-more-

For most types of consumer credit, except first mortgages, the effective ceilings would be 36% on the first $300, 21% on the next $700 and 15% on the remainder over $1,000. Ceilings on store revolving credit are set at 24% on the first $500 and 18 percent on the remainder. (See Attachment I for more detailed outline.)

2. Over and above the maximum rate ceilings, the Code permits additional charges for official fees and taxes, and for insurance -- property, liability, credit life, and credit accident and disability. These provisions follow the lines of the Federal Consumer Credit Protection Act, which defines "finance charge" in such a way as to permit their exclusion from the finance charge for disclosure purposes. A number of current small loan laws require the lender to include most of these charges in the finance charge, although extra charges for credit life insurance are now generally permitted. The "additional charge" system provides an additional source of revenue to creditors, since the "extras" can be included in the amount of the loan or credit and a finance charge computed on top of them.

3. In addition to charges for official fees, taxes, and insurance, the Code allows "extras" for "other benefits." This provision, although presented as being in conformity with the federal act, actually opens up what could be a dangerous loophole for "tie-in" charges and purchases to be required by the creditor as a condition of extending credit. The Code nowhere makes a flat prohibition of "tie-in" sales, except for limitations on compulsory purchase of various types of insurance.

4. The Code properly requires that a rebate of finance charges be made to the credit buyer or borrower who pays off the credit balance in advance. The rebate is calculated according to the "Rule of 78". Unfortunately, where graduated rate ceilings are used, as under the Uniform Consumer Credit Code, the Rule of 78 provides the creditor with a windfall of unearned credit charges and a corresponding shortfall to the consumer. The "Revised Final Draft" attempts to deal with the problem, not by eliminating the windfall, but by authorizing alternative calculation of the finance charges in such a way as to "legitimize" the windfall. This point will require more analysis and explanation, but some idea of the problem can be obtained by the summary comparisons shown in Attachment II, based on tables appearing in the explanatory text ("Official Comment") of the Code.

Insurance

UCCC insurance provisions are written within the framework of the Model Credit Insurance Act developed by the National Association of Insurance Commissioners and now in effect in a number of states. Although some of the more disreputable creditor practices in the sale of credit insurance are prohibited, UCCC does nothing to deal with fundamental problems of overcharges for credit, life, accident and health policies documented by the Senate Antitrust and Monopoly Subcommittee in its 1967 investigative hearings. These hearings disclosed widespread profiteering by creditors on the sale of high-priced insurance, paid for in its entirety by borrowers.

-more-

Kickbacks, commissions, and rebates from insurance companies and creditor-owned insurance subsidiaries have built a system of "reverse competition" encouraging the sale of insurance at highest possible rates. UCCC forbids charges beyond the legal maximums permitted by the Commissioner of Insurance but does nothing to reduce them further. Lenders' profits on insurance are specifically protected.

Disclosure Provisions

The sections on disclosure are largely a duplicate of the provisions of the Federal law which contains extensive requirements relating to items of cost of the credit provided, including a statement of the annual percentage rate. Both credit contracts and credit advertising are covered. The principal problem about the disclosure provisions is that since all existing state legislation on disclosure is repealed, any disclosure requirements other than the ones copied from the federal law would disappear. Disclosure statutes may, for example, require disclosure of a buyer's rights under the law, make detailed specifications as to contract forms, or other matters. In effect the federal specifications would substitute for existing requirements rather than add to them. In addition, the disclosure provisions could be rendered ineffective by the fact that specific administrative authority for issuing regulations to interpret the disclosure requirements in the Code is not provided. In particular, the decision as to what is "conspicuous" is left to the courts for determination, on a case by case basis.

Restrictions on Contract Provisions

1. Credit Sales

The UCCC makes a commendable attempt to prohibit or restrain certain types of contracts and contract provisions which are notoriously unfair to credit buyers, but it does not go "all the way."

a. Holder in Due Course

The Code knocks a hole in the onerous "holder-in-due course" doctrine under which a finance company which has bought a credit contract from a retailer is held free of all responsibility to the original buyer and is legally entitled to collect monthly payments from the debtor, regardless of fraud in the original contract, overcharges, defects in the product or other failure in the seller's duties.

The Code would prohibit sellers from taking a "negotiable instrument" in connection with consumer credit contracts. A subsequent buyer of the paper (the "holder") would not qualify for "holder in due course" status if he had notice of the seller's violation. However, no provision is made for labeling consumer paper as such and no penalties attach to the "holder" even he does take paper illegally procured by the seller.

-more-

The Code also invalidates agreements whereby the borrower waives his legal defenses against a subsequent holder ("assignee") of a credit contract. Two Alternatives are provided. Alternative A, which subjects assignees to buyer's defenses, is definitely superior to Alternative B, which requires notice by buyer to assignee of defenses within three months. Even under Alternative A, certain limitations are placed on the liability of the assignee.

b. Balloon Contracts

The Code discourages the writing of "balloon contracts," but does not prohibit them. It merely specifies that the buyer shall have the right to refinance a balloon payment "without penalty" in any case where the balloon is more than twice the average of earlier scheduled payments. Current state laws that deal with balloon payments usually prohibit them.

c. Security for Contract

The Code makes certain restrictions on the security that may be taken in a credit sale. In general the seller may not take a security interest in property of the debtor other than in the goods which are the subject of sale. Exceptions are allowed to permit a security interest in goods on which services are performed or in which goods sold are installed. Also a security interest in land may be taken if goods are affixed to it or improvement services performed on it. The debt must be at least $300 in the case of security interest in goods and at least $1,000 in the case of a security interest in land. These provisions are definitely a step in the right direction, but the $300 and $1,000 limits have been criticized as too low.

d. Add-on Sales

The Code reforms but does not eliminate "add-on" sales whereby a buyer's current purchases are permitted to be taken as security for earlier purchases on which payments have not yet been completed, and vice-versa (earlier purchases become security for later purchases). Situations have occurred in which default on the most recent purchase have occasioned loss to the buyer of the entire set of purchases. The Code provides that a buyer's payments must be allocated to the goods in the order which they were bought and the security interest terminated in each item as the debt on each is paid off.

A question remains as to whether "add-on" sales should be prohibited in their entirety. A consideration against such prohibition in the Code as presently written is that multiple separate sales could result in multiple high-charge contracts under the graduated rate structure.

-more-

e. Wage Assignments

UCCC prohibits wage assignments, as do a number of existing state laws. This is a desirable reform. A wage assignment is an agreement which provides that the creditor can take part of a worker's wages directly from his employer if the debt is not repaid when due. Under UCCC an assignment of earnings may not be taken unless the employee is free to revoke his authorization of the assignment.

f. Referral Sales

Referral sales are prohibited. A desirable reform. Referral selling is a racket whereby the buyer is persuaded to sign a contract by a promise that he can recoup the purchase price in whole or in part by supplying other customers to the seller.

g. Attorney's Fees

Two alternatives are provided: (A) prohibits agreements providing for payment of attorney's fees by the borrower and (B) limits attorney's fees to 15 percent of the unpaid balance. Alternative (A) is clearly superior, particularly since "reasonable expenses" are allowed to the creditor in realizing on his security interest in case of the borrower's default.

h. Confession of Judgment

This is prohibited. A desirable and important reform. A debtor who "confesses judgment" signs away his legal rights to challenge the validity of the debt.

i. Blank Spaces and Contract Accelerations

Two notable omissions in the Code are (1) the failure to prohibit blank spaces in contracts (a common requirement under existing state legislation) a source of easy fraud on the debtor (2) the failure to curb the creditor's unrestricted right to require immediate payment of the unpaid balance of the debt thereby precipitating a debtor's default. Unilateral acceleration by the creditor should be restricted to cases in which substantial default has actually occurred.

2. Loans

Restrictions on loan agreements are less extensive than those for sales. Provisions on balloon payments, wage assignments, attorney's fees, and confessions of judgment are the same. But no restraints are put upon the rights of holders in due course or on rights of assignees. "Supervised lenders" (licensed lenders and supervised financial institutions) may not

-more-

take a security interest in land unless the debt is over $1,000 but other lenders may do so. Again, the $1,000 cut-off has been criticized as too low.

Restrictions on Creditor Collection Practices

1. Deficiency Judgments

The UCCC makes a limited attack on deficiency judgments. It provides that a seller who repossesses or takes back goods that were the subject of sale (or other security for the debt) may not also obtain payment for the "deficiency" between what the goods sell for and the unpaid balance of the debt. However, this provision applies only where the cash price of the sale was $1,000 or less, thus being of no effect for larger purchases such as new cars. No restraint on deficiency judgments applies in the case of cash lenders.

2. Wage Garnishment

UCCC would restrict garnishment along the lines of the Federal Consumer Credit Protection Act which limits garnishment to 25% of disposable earnings or the excess over $48 per week (30 times the federal minimum hourly wage) whichever is less. In UCCC the minimum exemption is improved to $64 (40 times the minimum wage), but the 25% figure remains unchanged.

In addition UCCC would prohibit garnishment before judgment and would prohibit employers from firing workers on account of garnishment. Federal law forbids firing on account of garnishment for "any one indebtedness" and makes no special provision for garnishment before judgment.

The principal immediate problem presented by UCCC is whether its 25% limit and basic exemption amount would replace more favorable provisions under a number of existing state laws, for example, laws which provide a 10% limit or which do not permit garnishment at all. A "savings clause" is included in the Federal statute for such situations, but not in the text of the Code.

In the most recent published edition of the Code (Revised Final Draft, November 1968) the "Official Comment" has been rewritten to disclaim any intent to undercut existing laws which provide additional protections to wage-earners. However, the fact remains that the statutory language does not in itself accomplish this result.

A further technical difficulty presented by the Code is that its garnishment provisions cover only situations in which the garnishment has arisen out of a transaction covered by the Code (generally, debt characterized either by installment repayments or by the imposition of a finance charge). Garnishment arising out of debt not covered by the Code, such as service credit (doctor bills and utility bills), would not be affected.

-more-

Even assuming the most favorable interpretations of the Code, only modest improvement is made over the Federal provisions which will go into effect July 1, 1970. More comprehensive action on garnishment is needed, either to abolish garnishment altogether, or to severely restrict its application.

Contract Cancellation Rights

UCCC includes a section on 'home solicitation sales" giving buyers a three day period in which to cancel a credit contract for goods or services bought from a door-to-door salesman.

The objective of this provision is obviously desirable, but specific points will need to be examined for possible improvements. The provision for a 5% cancellation fee has been particularly criticized.

An additional section, relating to buyer's cancellation rights in the case of a credit sale or loan secured by the buyer's home, is incorporated from the Federal Consumer Credit Protection Act.

Administration and Enforcement

Administration and enforcement is centered in a single Administrator who is given fairly impressive powers in the form of authority to issue "cease and desist" orders, to obtain injunctions and temporary injunctions from the courts, to bring suit for civil penalties, and to recover overcharges in behalf of debtors. Debtors are also given certain rights of bringing private suits.

Licensing requirements are included for all "supervised lenders" and their assignees (i.e., lenders who charge more than 18 percent per year on loans). These provisions would cover lenders presently licensed under state small loan laws and could have the effect of requiring licensing of at least some high rate lenders in the second mortgage market. Licensing provisions are considerably less stringent than those usually applicable to small loan licensees under much existing legislation. No license would be required for lenders charging less than 18 percent per year.

No licensing is required in the credit sales field, either for retailers or for sales finance companies which buy their paper. They are subject only to registration requirements. A number of states currently have licensing requirements for sales finance companies, and in some states retail dealers (especially automobile dealers) must be licensed for credit operations. These laws would be repealed by UCCC. Licensing requirements involve important powers to suspend or revoke the license of an enterprise to continue in business and can provide an important protection against shady operators in the credit field, as well as in securing general compliance with the law.

-more-

Apparently the main weapon in the Code against shady operators in the credit sales field would be recourse by the Administrator to the courts for an injunction against "unconscionable" conduct.

Another notable omission is rule-making power for the Administrator. He is prohibited from issuing regulations except where specifically authorized by the Code to do so. (These relatively few authorizations are nowhere summed up in a list.) It is evidently intended that the Administrator may issue regulations to correspond to those which will be issued by the Federal Reserve Board, assuming the state were to be exempted from the operation of the federal statute with respect to disclosure requirements. However, rule-making powers in the section of the Code dealing with disclosure do not appear sufficient to accomplish this result.

February 7, 1969
AFL-CIO Department of Research/Draper

ATTACHMENT I

FINANCE CHARGE CEILINGS UNDER UNIFORM CONSUMER CREDIT CODE

1. For retail sellers

Installment credit: *
36% on first $300
21% on next $700
15% on excess over $1,000

Revolving credit:
2% per month on first $500 (24% per year)
1½% per month on excess over $500 (18% per year)

2. For licensed lenders and supervised financial institutions
(small loan companies, finance companies, commercial and industrial loan banks, credit unions)

Loans and revolving loan accounts*

36% on first $300
21% on next $700
15% on excess over $1,000

3. Other lenders

a. 18% per year

b. Mortgage loans are exempt from certain key provisions of the Code if finance charge is 10% or less. This is intended to result in an effective ceiling of 10% on first mortgages.

*Alternatively, a rate of 18% is authorized if the yield would be larger.

Note: The Code further provides for an escalation of effective ceilings in accordance with rises in the Consumer Price Index. This is done through increasing the sizes of the loan to which the higher rates apply. For example, if the CPI increased by 10%, the $300 to which the 36% rate applies would go to $330 and the 21% rate would apply up to $1,100 instead of $1,000.

Attachment II

CREDITOR'S EARNED INTEREST CHARGES ON LOAN
OF $1500

Month No.	Normal Computation 1/	Rule of 78 2/	Alternative Permitted in Revised Final Draft 3/
1	$ 27.50	$ 32.66	$ 31.38
2	26.06	29.85	29.05
3	24.60	27.14	26.67
4	23.13	24.43	24.25
5	21.63	21.72	21.77
6	19.67	18.99	19.24
7	17.52	16.28	16.66
8	15.33	13.57	14.03
9	13.10	10.86	11.34
10	10.83	8.15	8.59
11	8.19	5.42	5.79
12	4.12	2.71	2.91
Total	$ 211.68	$ 211.68	$ 211.68

Rebate due if loan is paid off after 5 months (the addition of charges for months 6-12):

(1) Normal computation: $ 88.76
(2) Rule of 78: 75.98
(3) Alternative under Revised Draft: 78.56

1/ Based on month by month application of 36% per year on first $300, 21% on next $700, and 15% on balance over $1,000

2/ Based on distribution of total finance charge according to Rule of 78

3/ Based on recasting of charges at flat annual rate of 25.10 percent, corresponding to 36% on first $300, 21% on next $700, and 15% on balance over $1,000

A SUMMARY

OF THE

UNIFORM CONSUMER CREDIT CODE

PREPARED BY
NATHANIEL E. BUTLER
Educational Director

NATIONAL CONFERENCE OF COMMISSIONERS
ON UNIFORM STATE LAWS
1155 East 60th Street
Chicago, Illinois 60637

The National Conference of Commissioners on Uniform State Laws is an organization of state appointed officials who are practicing lawyers, judges and law school professors. Customarily the governor of each state appoints three men to serve as Commissioners. The Commissioners serve without compensation. The expenses of the Conference are paid from appropriations made by the states, and when special projects are undertaken, foundations and interested groups often make contributions. The function of the Conference is to draft legislation in areas of the law where uniformity among the states is particularly desirable and offer it to the states for enactment.

THE PROBLEM

Consumer credit is treated under a variety of laws in each state today. Historically, a type of statute that has dominated the growth of consumer credit has been the simple general usury statute. These statutes, originating in this country as early as 1664, set flat 6% and 8% per annum ceilings on the rate of interest that may be charged for loans of money. In the twentieth century these ceiling rates have been unevenly increased in some states so that today the ceiling rates range from 6% to 12% per annum with one state having a 16% ceiling, one state a 21% ceiling and two states none at all. The 6% to 12% rates are below those at which legitimate creditors can extend many kinds of consumer credit. As a result, many exceptions and exemptions from usury laws have been created by courts and legislatures. In most states today general usury statutes cover only a small portion of consumer credit transactions, and this coverage is highly erratic and generally unreasoned.

Exceptions to usury statutes have come from both the courts and the legislatures. The so-called "Time Price" doctrine developed by the courts exempts from general usury statutes all sales credit purchases. This doctrine creates an enormous exception to usury statutes and is recognized in all but two of the states.

State legislatures have recognized the distinction between credit sales and direct loans and have enacted many laws regulating credit sales. Often there is one law regulating credit sales of motor vehicles, and another regulating credit sales of goods other than motor vehicles. Sometimes there are additional laws governing home improvement sales, revolving store charge accounts, and insurance premium financing. Generally these laws are limited to consumer transactions, but occasionally they have broader application. Not infrequently these laws provide different ceilings on rates that can be charged, and express the rate ceilings differently (add-on, discount, U.S. Rule, per cent per month, etc.). Often these laws treat substantially similar aspects of different credit transactions differently where no reason for the difference in treatment exists.

In addition to the exemption from usury laws for sales credit, state legislatures have enacted a number of laws permitting loans to be made at rates in excess of the usury rate. Most common are the Small Loan Laws which require the lender to be licensed and limit both the amount and length of the loan. In addition to the Small Loan Laws, many states have enacted so-called Installment Loan Laws, Industrial Loan Laws and other laws exempting from general usury statutes certain classes of lenders such as commercial banks, credit unions and savings and loan associations or a certain class of transactions such as revolving loan accounts. These laws also frequently set different rules for what are very similar aspects of the various transactions.

Finally, some states have enacted laws dealing with specific aspects of consumer credit transactions such as door-to-door sales cancellation acts, rate disclosure (truth-in-lending) acts and so forth.

Compounding the problem of the numerous laws governing the consumer credit market is the new Federal Truth-in-Lending Act which is effective July 1, 1969. It requires full disclosure of the terms of substantially all consumer credit transactions including, among other things, the rate of the credit service or loan finance charge stated in terms of an annual percentage. This law provides that if a state passes a law which requires substantially similar disclosure, the state law will apply and the control will move back from the federal to the state government.

THE UNIFORM CONSUMER CREDIT CODE — GENERALLY

The Uniform Consumer Credit Code is a balanced consumer protection law. It restructures all laws imposing maximum charges on the cost of money or credit, regulates consumer credit generally and brings substantially all consumer credit transactions under one comprehensive code. In the area of maximum charges and rate ceilings it imposes a single and standard set of maximum charges on substantially all types of consumer credit and, except in the case of extortionate charges, frees substantially all types of business credit from any maximum charge or rate ceiling. It puts all creditors extending consumer credit on substantially an equal footing so far as maximum charges and control of practices are concerned. It stimulates competition by eliminating artificial barriers to entry into the credit granting business and by requiring disclosure of the cost of the credit, both in terms of the dollar amount and in terms of an annual percentage rate. While the Uniform Consumer Credit Code sets *maximum ceilings* on rates which may be charged in consumer transactions, it relies on competition to *fix actual effective rates*. It restricts certain practices of creditors which have been shown to be particularly subject to abuse and has broad provisions to eliminate unconscionable conduct.

It is designed to secure for any state enacting it exemption from the Federal Truth-in-Lending Act.

COVERAGE

Generally, the Code applies to consumer credit transactions and excludes business transactions. The basic test is the kind of debtor involved. If the debtor is an individual, some or all of the provisions of the Code apply. If the debtor is an organization, (a corporation, partnership, trust, governmental body or the like), with one minor exception regulatory and maximum rate provisions of the Code do not apply. The non-application of the Code to organizations eliminates the major portion of all business credit from regulatory coverage.

If an individual debtor (sometimes called a sole proprietor) seeks not in excess of $25,000 of credit for a business purpose, the transaction will be covered only by the provisions of the Code relating to maximum rates and charges which can be made. In other words, the sole proprietor of a corner grocery is given maximum rate protection under the Code in transactions up to $25,000 but otherwise the transaction is unregulated.

The major concern of the Code is with consumer credit and except for the provisions on rates and maximum charges having limited applicability to non-consumer transactions, all of the Code's provisions apply only to consumer credit. Consumer credit includes and is limited to credit extended for the personal, family, household or agricultural purpose of the person to whom credit is extended.

Credit extended for agricultural purposes is included in consumer credit, but it is excluded from a number of the substantive provisions found to be unsuited to the particular characteristics of farm financing. Of course, if the debtor is not an individual, regulatory provisions of the Code do not apply.

Credit sales of homes and home mortgages entered into for a consumer purpose are covered by the maximum rate and charge limitations as well as the disclosure requirements of the Code. Transactions in which the rate of credit service or loan finance charge exceeds 10%, calculated as prescribed in the Code, are subject to all of the substantive provisions of the Code.

REGULATION OF PRACTICES

The Code takes three basic approaches to the problem of better enabling the consumer to deal with the professional creditor. First, it requires full disclosure of the cost of credit to the consumer prior to or at the time the transaction is entered into. Second, it makes illegal or severely limits certain specific practices of creditors which have been shown to be subject to abuse. Finally, it has broad provisions for attacking and eliminating unconscionable conduct.

The first approach is the requirement of complete disclosure of the terms of the credit transaction including disclosure of the cost to the debtor both in dollar amounts and in terms of an annual percentage rate. The disclosure provisions are more fully discussed below.

The second approach is to prohibit or greatly limit certain kinds of agreements and practices. In deciding what practices to prohibit or limit, the Commissioners recognized that unless there were very real and corresponding benefits to the consumer, restrictions on rights of creditors could, in fact, hurt consumers because the restrictions might result in higher costs and consequently higher rates throughout the consumer credit market. With this process of evaluating and balancing in mind, the Commissioners sought only to restrict rights and practices in which evidence of serious abuse of consumers was strong.

Among the specific restrictions the Code imposes is the prohibition of negotiable promissory notes in sales credit transactions. Closely related to this is the treatment of the buyer's waiving as to an assignee of the consumer's contract any defenses he might have against the seller. The Code offers alternative sections, either of which might be enacted. The first alternative prohibits and renders non-effective the buyer's waiving his defenses. The second alternative requires the buyer promptly to inform the assignee of any defenses which arise within three months of the sale and if he fails to do so, the assignee is freed from defenses arising during the three month period. Under the present law of most states, once the contract is assigned, the buyer must pay the finance company and try to seek his remedy from the seller. The theory of the Code's provision is that the financing institution is in a better position to guard against the seller pushing shoddy and sub-standard goods or services than the buyer who very likely has only a single isolated transaction with the seller.

Another practice the Code prohibits in sales credit transactions is the seeking of a deficiency judgment after goods have been repossessed if the original cash price of the goods was less than $1,000. In effect, where the cash price is less than $1,000, the Code provides that the creditor must either elect to sue on the contract or repossess the goods; he may not do both. The theory of this section is that in transactions in which the cash price is under $1,000, the right to seek a deficiency after repossession is worth little to the legitimate creditor, but it can be used abusively by the unscrupulous creditor.

The Code eliminates in sales credit the practice of the seller's taking a security interest in a houseful of furniture to secure the payment of the price of a single refrigerator or television set. Although the Code does permit taking a security interest in more than the goods sold when debts arising out of other sales are consolidated, it requires payments to be allocated so that the goods are freed from the security interest on a first in first out basis.

The Code restricts balloon payments which often have been used to push a debtor into extending and refinancing the debt. It also prohibits irrevocable assignments of earnings, garnishment proceedings prior to judgment, and confessions of judgment. It sets limits on charges which can be made on default, attorney's fees which can be collected from debtors, and the amount of a debtor's earnings subject to garnishment. It limits small loans to 25 months or 37 months when the annual rate of loan finance charge exceeds 10%. It gives buyers three days to cancel home solicitation sales and prohibits referral sales. It includes provisions on credit life insurance and credit accident and health insurance like those now in force in states which effectively regulate such insurance.

The third approach of the Code toward eliminating harmful practices

and enabling consumers to deal more effectively with creditors is contained in provisions which permit courts in proceedings commenced by the Administrator to declare any agreement or part of an agreement unconscionable and unenforceable as a whole or in part. The court is empowered to order the enforcement of the agreement in such a way as to avoid any unconscionable result. Debtors themselves and also the Administrator may bring proceedings to recover excess charges, the Administrator may himself order creditors to cease violating the Code and the Administrator may bring court proceedings to obtain injunctions against violations of the Code and against unconscionable conduct. Varying special civil and criminal penalties are provided for different kinds of violations. Studies have shown that the major part of overreaching and abuse stems from a relatively small percentage of creditors. In total effect the Code sets standards of conduct for all creditors participating in consumer credit and provides strong and effective remedies against creditors committing serious abuses without impairing the rights of legitimate creditors and without seriously raising the general cost of credit to consumers.

DISCLOSURE

The disclosure requirements of the Code are in most cases the same as those in the Federal Truth-in-Lending Act. Where they differ, the Code's provisions are more stringent.

Basically, in a credit sale the seller is required to set forth: 1) what is being sold; 2) the cash price; 3) the down payment; 4) the balance owing; 5) amount payable for registration or certificate of title fees not included in the cash price; 6) the amount of official fees and taxes; 7) a brief description of any insurance provided and, if a separate charge is made, the amount of the charge; 8) in the case of a sale of land the amount and a description of the closing costs; 9) the total amount financed; 10) the dollar amount of the credit service charge; 11) the total unpaid balance; 12) the annual rate of the credit service charge; 13) the payment schedule; 14) the charges to be made in the event of default; and 15) a description of any security interest taken.

The dollar amount of the credit service charge is not required in a land transaction if the rate of credit service charge is under 10%.

Similar disclosure is required in the case of loans, and under somewhat different mechanical requirements, in the case of revolving sale and loan accounts, and in refinancings, consolidations, and deferrals.

The percentage rate which is disclosed must be computed according to what is known as the U.S. Rule. This is the method traditionally employed in first mortgage real estate financing where payments are applied first to accrued interest and then to the reduction of principal.

The kinds of charges which may be excluded from the calculation of the rate to be disclosed are limited. Except for certain closing costs in real estate transactions involving a credit service or loan finance

charge not exceeding 10% per year, all extra charges must be included in the credit service or loan finance charge except a defined category called "additional charges". "Additional charges" are official fees and taxes, liability and casualty insurance if the buyer is told that he can choose the insurer, and life, health and accident insurance if such insurance is not a factor in the granting of the credit and the buyer is so told. If insurance charges do not meet these tests, they must be included in the credit service charge or loan finance charge. Other charges of benefit to the debtor apart from the granting of credit may be excluded from the finance charge if the Administrator has approved them.

These exceptions from the credit service and loan finance charge are the same as those in the Federal Truth-in-Lending Act. All other extra charges must be included in the credit service or loan finance charge in calculating the rate.

The theory of the disclosure requirements is that the buyer or borrower will be able to shop for credit just as he shops for other commodities. The dollar cost of having goods or money immediately rather than waiting will be clear to him. The requirements that all creditors state a rate in the same manner (in terms of an annual percentage) will permit the consumer to make meaningful comparisons and choose between alternative sources of credit and get the best deal. Looking at the dollar cost and the rate, the consumer might decide to use savings rather than to incur debt at all.

RATES

The rates in the Code are based on the underlying principle that legislation should *not* attempt to fix rates in the sense that public utility commissions fix rates for public utilities, but rather that the economic forces of free enterprise and supply and demand should set rates through improved competition within maximum ceilings prescribed in the consumer credit area. In consumer credit, ceilings are imposed in part because they have been imposed frequently in the past and in part because consumers are generally considered not to have equal bargaining power with creditors. On the other hand, with two narrow exceptions, no ceilings are imposed for business credit and any residual ceilings still applicable to business credit under general usury statutes are removed.

In deciding what the rate maximums should be, the Commissioners took into account that raising and lowering maximum rates have the inevitable effect of increasing or decreasing the size of the consumer credit market. High maximums permit more persons to obtain credit from legitimate sources; low maximums decrease the number of persons who may obtain credit. The maximum ceilings provided in the Code are designed to permit most credit-worthy consumers to have access to the consumer credit market.

The basic maximum rate in the Code is 18%. There are higher graduated rates where the amount of the credit is small. 36% per annum is permitted on the amount of the unpaid balance up to $300, 21% on the amount from $300 to $1,000 and 15% on the amount over $1,000, with the composite actual rate under these graduated rates levelling off at 18%. In order to charge rates in excess of 18%, a lender (but not a seller) must either be licensed or a supervised financial organization, e.g., a bank, credit union or the like.

On revolving charge accounts in sales credit, the maximum permitted rate is 2% per month (24% per year) on the amount outstanding up to $500, and 1½% per month (18% per year) on the amount in excess of $500.

LICENSING, FEES AND ADMINISTRATION

Each creditor who is regularly engaged in the business of granting consumer credit is required to notify the Administrator that he is so engaged. In addition, he is required to pay an annual fee based upon the amount of the consumer credit obligations owed to him. This fee is designed to defray all or part of the cost of administering the Act.

In order to make loans at rates in excess of 18%, a lender must first obtain a license from the Administrator. The Administrator is directed to investigate the applicant and grant the license only if he finds that the financial responsibility, character and fitness of the applicant are such as to warrant belief that the business will be conducted fairly.

Banks and other institutions which are supervised by other governmental agencies are not subject to the licensing requirement.

The Administrator has broad powers to investigate, issue orders and go to court to obtain compliance by creditors with the act. His actions, however, are subject to notice, fair hearing and other due process requirements.

Among his other powers, the Administrator is authorized to seek an injunction against unconscionable agreements or conduct.

EFFECT OF CODE ON POWERS OF ORGANIZATIONS

The Code prescribes maximum charges for all creditors extending consumer credit and displaces existing limitations on the powers of creditors based on maximum charges.

In the case of sellers of goods or services, small loan companies, licensed lenders, consumer and sales finance companies, industrial banks and loan companies, and commercial banks and trust companies, the Code displaces existing limitations on their powers based solely on amount or duration of credit.

Except as to maximum charges, the Code does not displace limitations on powers of credit unions, savings banks, savings and loan associations, or other thrift institutions.

The basic maximum rate in the Code is 18%. There are higher graduated rates where the amount of the credit is small. 36% per annum is permitted on the amount of the unpaid balance up to $300, 21% on the amount from $300 to $1,000 and 15% on the amount over $1,000, with the composite actual rate under these graduated rates levelling off at 18%. In order to charge rates in excess of 18%, a lender (but not a seller) must either be licensed or a supervised financial organization, e.g., a bank, credit union or the like.

On revolving charge accounts in sales credit, the maximum permitted rate is 2% per month (24% per year) on the amount outstanding up to $500, and 1½% per month (18% per year) on the amount in excess of $500.

LICENSING, FEES AND ADMINISTRATION

Each creditor who is regularly engaged in the business of granting consumer credit is required to notify the Administrator that he is so engaged. In addition, he is required to pay an annual fee based upon the amount of the consumer credit obligations owed to him. This fee is designed to defray all or part of the cost of administering the Act.

In order to make loans at rates in excess of 18%, a lender must first obtain a license from the Administrator. The Administrator is directed to investigate the applicant and grant the license only if he finds that the financial responsibility, character and fitness of the applicant are such as to warrant belief that the business will be conducted fairly.

Banks and other institutions which are supervised by other governmental agencies are not subject to the licensing requirement.

The Administrator has broad powers to investigate, issue orders and go to court to obtain compliance by creditors with the act. His actions, however, are subject to notice, fair hearing and other due process requirements.

Among his other powers, the Administrator is authorized to seek an injunction against unconscionable agreements or conduct.

EFFECT OF CODE ON POWERS OF ORGANIZATIONS

The Code prescribes maximum charges for all creditors extending consumer credit and displaces existing limitations on the powers of creditors based on maximum charges.

In the case of sellers of goods or services, small loan companies, licensed lenders, consumer and sales finance companies, industrial banks and loan companies, and commercial banks and trust companies, the Code displaces existing limitations on their powers based solely on amount or duration of credit.

Except as to maximum charges, the Code does not displace limitations on powers of credit unions, savings banks, savings and loan associations, or other thrift institutions.

THE UNIFORM CONSUMER CREDIT CODE

Questions and Answers

Q. What is the Uniform Consumer Credit Code?

A. The Uniform Consumer Credit Code is a balanced consumer protection law considered by most authorities to be the finest consumer protection legislation ever written.

Q. Who prepared the UCCC?

A. The Code was prepared by the National Conference of Commissioners on Uniform State Laws.

Q. What is the National conference?

A. The Conference is an organization made up of Commissioners of the 50 states whose function it is to draft uniform legislation to be offered to states for enactment.

Q. How many Commissioners are there in the National Conference?

A. The average number of Commissioners from each state is three making a total of 150 for the Conference as a whole. Provisions for appointment of Commissioners is made by statute with appointments customarily made by the Governor.

Q. What are the qualifications of Commissioners?

A. Commissioners must be either practicing lawyers, judges or law school professors.

Q. Are Commissioners paid for their services?

A. The Commissioners serve without compensation but are reimbursed for most out-of-pocket expenses.

Q. What other laws have been written by the National Conference?

A. The organization which has been in existence since 1892 has drafted several other uniform state laws. Examples of such laws which have been widely enacted include: The Uniform Sales Act, the Uniform Stock Transfer Act, more recently, the Uniform Commercial Code.

Q. What is the relationship of the Commissioners to their respective states?

A. Commissioners are officials of the respective states which they represent and, as such, are public servants with all of the responsibilities and duties incident to public service.

Q. Just how does the role of public servants influence the work of the Commissioners?

A. Commissioners accept their responsibility as public servants with the highest ethics. Every action of the National Conference is determined fully by the public responsibility felt by its members.

Q. How does the Conference draft uniform legislation?

A. The Conference works thoroughly and slowly. Work on the Uniform Commercial Code continued for 12 years before it was finally offered to the states for enactment. The Uniform Consumer Credit Code required more than 4 years in its preparation.

In drafting uniform legislation the Commissioners build solidly on existing law and practice but where they find that by reason of historical accident or some like cause existing laws or practices in their judgment are unsound, archaic or sometimes silly they do not hesitate to provide for their repeal.

Q. Why did the Conference draft Consumer Credit legislation?

A. The major underlying reason for drafting Uniform Credit legislation is the phenomenal growth of consumer credit during the 20th century. The Conference notes that by the latest Federal Reserve figures there is close to 100 billion dollars of installment consumer credit outstanding at any one time in the Unites States, and if household mortgage credit is added to this figure the aggregate total is in the neighborhood of 330 billion dollars. The Conference felt that the extension and growth of such credit are not only matters of social and economic concern, but, also, are matters of major consequence to which the law must adjust.

Q. What is meant by the term "adjust"?

A. As consumer credit developed it became apparent that credit of this type could not live within low rate ceilings. Therefore, a steady series of legal principles or special legislation evolved to circumvent and avoid low rates. This resulted in a proliferation of legislation throughout the nation and despite such proliferation there were still widespread consumer abuses. In 1957, recognizing the need of uniform legislation, the Council of State Governments requested the National Conference to draft such a Credit Code. The Code project got underway in 1964. By that time the Conference was convinced that the need for extensive study and a major drafting effort was clear.

Q. What trend did the Conference follow in developing the Code?

A. The Conference decided to deal with the entire subject of Consumer Credit comprehensively and on fundamental lines, to review all laws relating to Consumer Credit in depth, to consider the background and reasons for Consumer Credit and economic and social aspects of it, and to draft legislation that would treat the entire subject of Consumer Credit on scientific lines rather than a continuance of historical acts.

Q. In defining the Code, the term "balanced" Consumer Protection law has been used. What does this mean?

A. The UCCC restructures all laws imposing maximum charges on the cost of money or credit, regulates consumer credit generally and brings substantially all consumer credit transactions under one comprehensive code. It imposes a single and standard set of maximum charges on almost all types of consumer credit, and except in the case of extortionate charges frees substantially all types of business credit from any maximum charge or rate ceiling. The Code puts all creditors extending consumer credit on virtually an even or balance footing so far as maximum charges and control of balances are concerned. It stimulates competition by eliminating artificial barriers to entry into the credit granting business and be requiring disclosure of the cost of credit both in terms of dollar amounts and in terms of an annual percentage rate. It is a balanced code, fair to all creditors operating in the consumer credit field and fair to consumers.

Q. Should consumer legislation be drafted and enacted at the federal or state level?

A. The National Conference felt that the Code should be enacted at the state level. The Commissioners stated that between a particular buyer and a seller, or a particular borrower and lender both located in the same state it is quite difficult to think of a much more local type of transaction than consumer credit. They, also, pointed out that consumer credit is usually a transaction of small size, ranging from a less than $5.00 sale as a part of a store revolving account or a shopper's credit card operation to purchase of automobiles on time or borrowing from the installment credit department of banks ranging in most cases from $100 to $3,000. The Conference, also, felt that if the Federal Government took control of Consumer Credit entirely this would constitute a very large shift in control from the state to the federal government of an important aspect of American life.

Q. What does the federal government think about federal-state control of Consumer Credit?

A. The Banking & Currency Committees of the Senate and House of Representatives in considering the recently enacted Federal Truth-in-Lending Act expressed an awareness of the federal-state problem and were reluctant and hesitant to pre-empt from the states the field of consumer credit. As a result, the recently enacted federal bill included a provision that the Board of Governors of the Federal Reserve system "shall exempt from the requirements of the Act any class of credit transaction which the Board determines is subject to state law which requires disclosure substantially similar to the federal requirements and contains adequate provisions for enforcement." Thus, it follows that the federal government definitely provided a way and a means by which consumer credit may remain a state controlled field.

Q. Will adoption of the Uniform Consumer Credit Code exempt Alaska from supervision of consumer credit by the federal government?

A. Yes, According to all current information available the UCCC meets the Rederal Reserve test and would divest the state of federal supervision. As far as the Turth-in-Lending Act supervises disclosure and related provisions, the Code does likewise and authorities say is even more stringent than the federal law. In addition, the UCCC goes further in that it sets maximum ceilings and correction of virtually all known consumer abuses.

Q. We have been told by some that if the Legislature copies the Federal Truth-in-Lending Act into Alaska law the federal government will divest itself of control of credit in the state. Is this true?

A. Not necessarily. There is a wide field of interpretation regarding Federal Reserve acceptance of supervisory staffing, regulations, transaction requirements etc.

Q. Does the Code contain the regulations pursuant to the Federal Truth-in-Lending law?

A. The UCCC bill, as introduced in the Alaska Legislature, includes all regulations pursuant to the federal act.

Q. What confusion could arise out of copying the federal law into state law rather than passing the UCCC?

A. (1) There is a question as to whether the state would be divested of Federal supervision.

(2) Such action may lead to conditions in which creditors would be required to make double disclosures.

(3) The law would be a "bits and pieces" type of legislation which usually creates confusion in the marketplace.

(4) Such action is completely unnecessary since the federal act went into effect on July 1, 1969, thus negating any need for a small "Federal Act."

Q. Is exemption from Federal supervision a strong argument for the passage of the UCCC?

A. Yes. Most Alaskans desire to retain jurisdiction over consumer credit and creditors in the consumer credit field of Alaska certainly do not want to operate under two sets of laws. This fact is one of the major reasons why the enactment of the Code is advisable.

Q. Were attempts made to influence the preparation of the Code in order to preserve segmented consumer credit?

A. Yes. Strong pressures were brought to bear upon the National Conference by opponents of consumer protection legislation to produce more of the same confusion which already exists throughout the nation in the consumer credit field. The status quo is referred to as segmented with segmentation being based to a considerable extent on types of creditors, that is, small loan companies, retail merchants, commercial banks, credit unions etc. The Conference was urged to preserve all this segmentation, some or all of the variations in maximum rate ceilings on finance charges, and some or all of the varying methods for starting ceiling rates. In fact, the Conference was pressured to do nothing more than compound the existing confusion.

Q. How did the Conference react to this pressure?

A. The National Conference took the position that a policy of preserving and attempting to improve one or more existing types of legislation would do nothing more than preserve and stratify types of classifications that are now causing confusion and have partially broken down. The Conference felt it could make no contribution unless a comprehensive approach was adopted.

Q. How much of the installment credit outstanding in the United States do the various segments of the credit industry possess?

A. As of December 31, 1967, the percentage share of different segments of the consumer credit industry in installment consumer credit was as follows:

Commercial banks	43.6%
Sales finance companies	21.6%
Credit unions	11.8%
Consumer finance (small loan) companies	8.1
Other financial institutions insurance companies, savings & loan associations, etc.)	2.5%
Retail outlets	12.4%
Total	100.00%

Q. What limits did the Conference feel were needed in the Code's coverage?

A. The Code covers consumer credit as opposed to business credit.

Q. Why is not the purpose test a part of the Code?

A. There are difficulties in applying a pure purpose test. Actually, purpose is nothing more than the mental intent of an individual. The Code made the distinction between consumer credit and business credit on the basis of whether the debtor is a natural person or whether the debtor is an organization. Organization as defined includes corporations, business trusts, partnerships, associations or governmental entities or bodies.

Q. Are the Code's provisions fair and equitable to both consumers and the credit industry?

A. Yes. The provisions are workable and provide a greatly superior base for handling consumer credit than the mass of legislation presently on statute books throughout the nation. Although some provisions may appear to favor industry and others favor consumers, in actual fact the provisions will be beneficial to both sides of the economic spectrum.

Q. How does the Code affect usury provisions?

A. The Code provides for the outright termination of all usury provisions and rate ceilings in the case of most business credit. The reasoning which supports this principle is that the operation of the money market and the economic rules of supply and demand are better control factors for interest charges in business credit than any legislation. It, also, notes that business debtors can bargain satisfactorily without the need of legislative assistance. The operation of existing general usury statutes has become so much an empty shell and so generally absurd in its unreasonable and haphazard application that they should be repealed outright as to substantially all business credit, according to most authorities.

Q. In the case of consumer credit, are rate ceilings preserved?

A. Rate ceilings are preserved but are evenly distributed across-the-board to all types of consumer credit.

Q. What is consumer credit as defined by the Code?

A. Consumer credit is credit extended to natural persons for personal, family, household or in some instances agricultural use.

Q. Is there a dollar limitation in regard to the jurisdiction established in the Code?

A. Yes. Consumer credit is credit extended up to a dollar jurisdictional amount of $25,000 except in the case of consumer credit secured by real estate where there is no jurisdictional limit.

Q. What are the rate ceiling found in the Code?

A. The rate ceiling prescribed is on a graduated basis with a maximum of 36% per annum on the first $300, 21% per annum on balances of $300 to $1,000 and 15% per annum on balances above $1,000 with the composite rate resulting from these graduated ceilings leveling off at a base ceiling of 18% per annum on balances from $2,500 to $2,900 and above. A major exception from these standard rate ceilings is in sales credit revolving account where the ceilings are 24% per annum or 2% per month on the unpaid balance on the first $500 of balance, and 18% per annum or 1½% per month on the unpaid balance in excess of $500.

Q. How does the Conferencd justify the standard recommended rate ceilings?

A. First, the Conference emphasizes the basic principle that legislation should not attempt to fix rates in the sense that public utility commissions prescribe rates that may be charged by public utilities. Rather, the Conference says the legislation should do nothing more than fix maximum ceilings which may not be exceeded but should be at a level to permit the extension of almost any type of consumer credit through legitimate channels.

Q. Upon what does the Code rely to fix effective rates?

A. The Code places reliance upon the operation of competition to keep actual rates charged below the legislative ceiling prescribed.

Q. How does the Code provide ways to see that the competition will keep lower than established ceiling rates?

A. The Code notes competition, in order to keep rates low, should be permitted to operate to a maximum extent and provides for "easy" entry into the lending field to make it as competitive as the retail field. This means that as far as is possible all extenders of credit must compete on equal terms with all other extenders of credit. It, also, means that a consumer must be able to intelligntly shop for credit.

Q. The Code, to encourage competition, provides "easy" entry into the lending field. What does this mean?

A. "Easy" entry refers to the provision of the Code which makes it possible for individuals or businesses to enter the cash loan fields without being restricted by artificial barriers.

Q. Are "easy" entry lenders regulated?

A. Yes. The Administrator will establish regulations governing such lenders and the Code, itself, provides that –

(1) Such lenders must secure a license from the Administrator.
(2) They cannot loan money for more than 18% per annum.
(3) They cannot accept deposits.
(4) They must pay the same fee to the Administrator's office on credit outstanding during the year as all other lenders.
(5) They must adhere to all disclosure requirements.
(6) They must abide by all consumer protection provisions of the Code.

Q. Why do banks have regulations applicable to lendin money not placed on "easy" entry lenders?

A. Banks use depositors' money for lending purposes and the various governments provide regulations to protect the depositor. "Easy" entry lenders cannot accept deposits and they will be lending their own personal money.

Q. Can "easy" entry licenses be revoked?

A. Yes. Any irregular practice is sufficient cause for revocation of license.

Q. Are these basic principles of the Code?

A. The Code, as a whole, is framed on these principles.

Q. Does this establish a new principle in American thinking?

A. No. These principles involve no novelty in basic American thinking. In most areas of economic life in America price-fixing by governmental fiat has been avoided rigorously. Price fixing is inherent in general usury statutes and actually constitutes an exception to the traditional American economic view.

Q. Opponents to the Code say that the rate ceilings as applied to the total consumer credit market will cause an increase in finance charges to the consumer. Is this true?

A. This is not true. Studies made by the National Conference point out that competition does in fact keep interest and finance charges down as much in the case of extension credit as in other types of transactions. Examples include interest rates charged to corporations which under existing law in 30 states do not have full benefit of usury statutes. In these states interest rates have been no higher than in states where usury statutes exist. In Massachusetts and New Hampshire there have been no general usury statutes for many years but the general level of interest

rates and finance charges in these states are not significantly different from those in other states. In automobile financing, rates actually charged are in most cases materially lower than ceilings prescribed in the motor vehicle retail installment sales act.

Q. What fact did the Conference recognize as primary in setting the rate ceilings in the Code?

A. The Conference recognized that rates must be sufficient to cover the cost of money, the cost of administering the credit extended, and the risk of nonpayment.

Q. What other factors operate in the cost of granting credit?

A. The Commissioners stated that the cost of money varies in relation to general money market conditions and that the cost of money today is higher than for many years, perhaps, as far back as the stock market crash in 1929. The Conference, also, pointed out that in consumer credit the cost of administering the credit is a most important factor. Commissioners noted one study which showed the average operating expenses other than bad debt reserves of many major national finance companies to be $10.40 on the first $100 of each loan.

Q. Does this explain the higher rate ceilings prescribed for the first $300 of any transaction?

A. Yes, the high cost of setting up any credit transaction on the books of a credit extender explains the high ceiling rate prescribed for the first $300. Actually, the rates prescribed fall at about the midpoint of existing rate limitations in the small loan area and are somewhat above present rates in the area over $3,000.

Q. What did money market studies reveal to the National Conference?

A. Money market studies and economic advice given to the National Conference consistently indicated that the principal effect of fixing maximum rates at a higher or lower level is to permit larger or smaller numbers of consumers into the credit market. High maximums permit more persons to obtain credit from legitimate sources. In contrast, low maximums decrease the number of persons who may obtain credit and drive the borrower and/or buyer to illegal loan sharks.

Q. Is competition the primary factor in establishing effective rates favorable to consumers?

A. Yes. The Code's provisions for improved operation of competition in credit are calculated to keep the rates actually charged well below the maximum ceilings stated.

Q. What are the disclosure requirements in the Code?

A. The Code requires the seller to set forth:

(1) What is being sold.
(2) The cash price.
(3) The down payment.
(4) The balance owing.
(5) Amount payable for registration or certificate of title fees not included in the cash price.
(6) The amount of official fees and taxes.
(7) A description of any insurance provided and if a separate charge is made the amount of the charge.
(8) In the case of a sale of land the amount and a description of the closing costs.
(9) The total amount financed.
(10) The dollar amount of the credit service charge.
(11) The total unpaid balance.
(12) The annual rate of the credit service charge.
(13) The payment schedule
(14) The charges to be made in the event of default.
(15) A description of any security interest taken.

Q. Will the disclosure requirements of the Code enhance competition as a basic principle set forth in the Code?

A. Yes, such disclosure requirements complement quite closely the maximum rate provisions of the Code. They do so by developing a single set of measuring standards by which consumers may shop for credit. Thus, they enhance competition which is relied upon by the Code to keep rates reasonably low.

Q. Does the Code place limitation on creditors' remedies?

A. Yes. The Code contains a number of limitations on creditors' remedies. This is the true reason that there is opposition to the adoption of the Code since these remedies are pure consumer protection.

Q. Does the Code prohibit the use of multiple agreements?

A. Yes. Sellers are prohibited from using multiple agreements for the purpose of obtaining a higher finance charge than would be otherwise permitted.

Q. Are sellers and lessors prohibited from taking negotiable promissory notes to evidence consumer obligation?

A. Yes. The promissory note use has been one of the major consumer abuses where instead of selling the actual installment contract a promissory note has been utilized as a negotiable instrument. Producers of the notes have been held not responsible in any way for claims and defenses of the buyer against the seller.

Q. Does the Code provide that assignees shall be subject to claims and defenses of the buyer against the seller?

A. Yes. The Code provides that an assignee is equally responsible for the quality of goods and services as the original seller. This is an issue of long standing and it is admitted in the consumer credit field. Sellers and banks and finance companies buying sellers' papers argue that assignees shall not be subject to claims and defenses of the buyer against the seller. Consumers, on the other hand, argue with equal strength that a great portion of consumer abuses are traceable to a bank or finance company which is free from claims and defenses of the buyer against the seller.

Q. What is the opinion of merchants regarding this issue?

A. The legitimate merchant does not fear this situation nor should any bank of finance company which does business with legitimate merchants since it has been historically true in Alaska that legitimate stores make restitution for defective goods and services.

Q. Does the Code place controls upon ballon payments?

A. yes. If any scheduled payment is more than twice as large as the average of earlier scheduled payments, the buyer has a right to refinance the amount of that payment at the time it is due without penalty. The terms of the refinancing must be as favorable to the buyer as the terms of the original sale.

Q. Does the Code place limitations on the amount and type of security that may be taken in sales transactions?

A. Yes. A seller may take a security interest
(1) in the property sold;
(2) in goods upon which services are performed;
(3) in property in which goods sold are installed; or
(4) in land to which the goods are affixed or which is maintained, repaired or improved as a result of the sale of the goods or the services, if, in the case of a security interest in land, the debt secured is $1,000 or more or in the case of a security interest in goods the debt secured is $300 or more.

Q. Does the Code make any provisions regarding the assignment of earnings?

A. Yes. A seller or lessor may not take an assignment of earnings of the buyer or lessee for payment or as a security for payment of a debt arising out of a consumer credit sale or a consumer lease.

Q. What does the Code do in respect to referral sales?

A. Referral sale contracts cannot be entered into by sellers and buyers. Any inducement to enter into such a contract is in violation of the Code and the buyer of lessee at his option may rescind the agreement or retain the goods delivered and the benefit of any service performed without any obligation to pay for them.

Q. May terms by changed in the case of revolving charge accounts?

A. Yes. If a change is made in the terms of a revolving charge account the merchant must give the buyer written notice at least 3 times with the first notice issued at least six months before the effective date of the change.

Q. Are there any exceptions to this requirement?

A. Yes. The notice specified is not required if:

(1) The buyer after receiving notice of the change agrees in writing to the change;

(2) The buyer elects to pay an amount designated on a billing statement as including a new charge for the benefit offered to the buyer when the benefit and charge constitute a change in terms and when the billing statement also states the amount payable if the new charge is excluded;

(3) The change involves no significant cost to the buyer;

(4) The buyer has previously consented in writing to the kind of change made and notice of the change is given to the buyer in two billings cycles prior to the effective date of the change; and

(5) The change applies only to purchases made or obligations incurred after a date specified in a notice of the change given in two billing cycles peior to the effective date of the change.

Q. What constitutes notice in regard to changes in revolving credit account?

A. The notice is given to the buyer when mailed to him at the address used by the seller for sending periodic billing statements.

Q. Does the Code provide for a cancelling provision in home solicitation sales?

A. Yes. A buyer has the right to cancel a home solicitation sale until

midnight of the third business day after the day on which he signs the agreement or offer to purchase.

Q. What are the technical procedures in regard to cancellation?

A. Cancellation occurs when the buyer gives written notice of cancellation to the seller.

Q. Where does the Code require that such notice be sent?

A. The notice must be sent to the address listed in the agreement or offer to purchase.

Q. What other provisions for cancellation does the Code provide?

A. The notice of cancellation if by mail is given when the notice is properly addressed with postage prepaid and deposited in a mail box.

Q. Does the notice of cancellation have to take a particular form?

A. No. Notice of cancellation is sufficent if it indicates by any form of written expression the intention of the buyer to cancel the home solicitation sale.

Q. Are there any circumstances under which the buyer may not cancel a home solicitation sale?

A. Yes. The buyer may not cancel a home solicitation sale if he has requested the seller to provide goods or services without delay because of an emergency and the seller in good faith has made a substantial beginning of performance. The buyer also may not cancel a home solicitation sale if the goods cannot be returned to the seller in substantially as good condition as when received by the buyer.

Q. Does the Code provide for the return of goods given as collateral or the down payment by the seller in cancelled home solicitation sales?

A. Yes. Within 10 days after a home solicitation sale has been cancelled the seller must return any payments made by the buyer and any note or other evidence of indebtedness. If the down payment included goods traded the goods must be returned in substantially as good condition as when received by the seller.

Q. Is there a provision made whereby the seller may retain a cancellation fee?

A. Yes. The seller may retain a cancellation fee amounting to 5% of the cash price but not exceeding the amount of the cash down payment. However, if the seller fails to comply with any obligation imposed by the Code, or if the buyer voids the sale on

any ground independent of his right to cancel provided by the provision of the Code, the seller is not entitled to retain a cancellation fee.

Q. What does the Code provide in regard to the duty of the buyer to the seller of the home solicitation sale?

A. Upon demand, the buyer must give to the seller any goods delivered by the seller pursuant to the sale, but he is is not obligated to deliver the goods to any place other than his residence. If the seller fails to demand possession of the goods within a reasonable time after cancellation or revocation, the goods become the property of the buyer without obligation to pay for them. The Code states that 40 days is a reasonable time. The buyer is required to take reasonable care of the goods in his possession both before cancellation or revocation and for a reasonable time afterwards during which time that goods are otherwise at the seller's risk.

Q. Does the Code provide limitations on garnishment?

A. Yes. The maximum part of the aggregate disposable earnings of an individual for any workweek which is subject to garnishment to enforce payment of a judgment arising from a consumer credit sale, consumer lease or consumer loan may not exceed the lesser of:

(1) 25% of the disposable earnings for that week; or

(2) The amount of which his disposable earnings for that week exceed 40 times the Federal Minimum Hourly Wage. Since the Federal Minimum Hourly Wage at this time is $1.60, this means $64.00.

Disposable earnings as defined by the Code means that part of the earnings of an individual remaining after the deductions of those earnings of amounts required by law to be withheld.

Q. What does the Code provide regarding discharging employees for garnishment?

A. The Code states emphatically that no employer shall discharge an employee because his wages have been subject to garnishment.

Q. What does the Code say in regard to repossession of goods and suit for balance due?

A. The Code, as introduced, provides that the seller may repossess goods with a cash price under $1,000 where the debt is not being repaid or may sue for the balance due but the seller may not do both. He must make a choice between the two actions. Deficiency judgments are forbidden.

Q. We note that the Code contains language in regard to unconscionable agreements and conduct. Just what does this section do?

A. The Conference gave a great deal of study to the fact that the greatest majority of consumer abuse is traceable to a relatively small proportion of fringe operators who do not hesitate to over-reach whenever they can whether inside or outside the law. The question arose as to how a statute can provide protection against this kind of conduct. The Commissioners felt that realistic legislation is of limited value unless it has some language pointed toward this problem and believe there is no escape from having that language flexible enough to adjust to the great variety of schemes and practices that an ingenious type of individual may conceive. Therefore, the Code provided "Unconscionability" to meet this situation. The Code contains language with respect to unconscionable agreements and conduct. This has been done for the simple reason that the Commissioners could see no escape from this provision if the provision was to be flexible enough to adjust to the maneuvers of fringe operators.

Q. Is unconscionability a new concept?

A. Unconscionability is not a new concept. There have been decisions providing relief from unconscionable conduct running back over 100 years. It is, also, a part of the Uniform Commercial Code and there is equal or more reason to use it in the Consumer Credit Code.

Q. Are there any limitations on the action of unconscionability?

A. Yes. Considerable care is used to keep the concept within strict boundaries. Debtors for example cannot determine that conduct of a creditor is unconscionable. The Administrator cannot make such a determination, only courts can make this determination, and in courts only the judge and not the jury. The Code provides that the Administrator may bring a civil action to restrain a creditor from engaging in a course of unconscionable conduct either in effecting consumer credit transactions or in collection of debts arising from these transactions. In every case, however, it is only a court that can make a determination of unconscionability.

Q. How will the Code be administered?

A. The Code provides for administration by the State Banking Commissioner, and it prescribes his powers and functions. In the Code he is referred to as the "Administrator."

Q. What are his powers?

A. (1) He will administer the consumer credit market;

(2) He may bring action on behalf of an individual or a class of debtors to recover excess charges made by a creditor;
(3) He may bring actions to restrain a creditor from engaging in unconscionable conduct;
(4) He may issue orders and subject to appropriate administrative review he may order a creditor or others to cease and desist from engaging in violations of the Code;
(5) The Administrator is given substantial investigatory powers with respect to consumer credit extended by merchants or finance companies; and
(6) He is expected to cooperate with officials having supervisory power over banking institutions to obtain compliance with Code provisions.

In addition, the Administrator

(1) has power to issue regulations with respect to specified subjects;
(2) he may foster and aid programs for education of consumers; and
(3) encourage establishment of non-profit consumer credit counseling agencies.

Q. Does the Code provide for advisors to the Administrators?

A. Yes. The Code recognizes the considerable power of the Administrator and to aid and assist him in the effective performance of his duties the Code provides for a Council of Advisors on Consumer Credit. These are to be drawn in relatively equal proportions from consumers or the public, on the one hand, and from members of the consumer industry on the other.

Q. How is the office of the Administrator financed?

A. All persons or businesses doing credit business must so notify the Administrator and must pay to the Administrator $10 for every $100,000 outstanding credit during a fiscal year. This money will be used to carry on the work and meet the expenses of the office of the Administrator.

Q. Do merchants of Alaska support the adoption of the Uniform Consumer Credit Code?

A. Yes, even though the Code will require merchants to pay a substantial fee for its administration which heretofore has not been required of retailers.

Q. Why is the retail industry favorable to its adoption?

A. (1) It is the finest consumer protection Code ever prepared.

(2) The public policy demands its passage.
(3) The Code will do away with the "Bits and Pieces" type of credit legislation.
(4) The UCCC will give the state as near total consumer protection as is legislatively possible.
(5) The Code solves present and future credit problems in a way that will not require future legislative action.
(6) Creditors can live with the Code, and though there are some provisions which retailing does not like, the Code is a document, which taken as a whole, retailing can support and under which retailing can operate. This is the "on balance" concept which is basic to the Code.
(7) The Code attempts to satisfy the interests of the diverse groups represented in the credit field.
(8) The code is favored by the Alaska Retail Association, The Alaska State Chamber of Commerce and most other chambers throughout the state because they recognize it as one of the most fair documents ever devised in th area of consumer credit. Alaskan retailers acknowledge the fact that problems do exist in the consumer credit field and are proud to suoport UCCC as the best existing answer to those problems – from the standpoint of both consumer and creditor.

NEW YORK CHICAGO WASHINGTON

About This Code

The Uniform Consumer Credit Code, having been formulated with the concept that "credit transactions" is but one subject of the law, is intended to replace various laws regulating consumer and other credit transactions.

Application . . . The UCCC is generally applicable to:

(1) consumer credit sales of goods or services for $25,000 or less, consumer leases, and consumer credit sales of an interest in land for any amount;

(2) consumer loans of $25,000 or less, except that loans secured by an interest in land are covered for any amount; and

(3) insurance provided in relation to the consumer credit sale, consumer loan or consumer lease.

Purchases made and debts incurred must be primarily for personal, family, household or agricultural purpose.

Facets . . . The Code provides maximum credit service charges and is intended to replace general usury laws, consumer credit regulatory acts imposing maximum charges, and other acts providing maximum charges for loans or extensions of credit. Provisions cover the enforcement of rights, and other provisions govern administrative regulation. Advertising, referral sales, license for supervised loans, assignment of earnings, unconscionability, revolving charges, cross-collateral, adjustment of dollar amounts, prohibition of certain negotiable instruments, garnishment, and home solicitation are just a few of the many facets covered by this Code.

Exemptions . . . The Code exempts:

(1) credit extended to governments or their agencies;

(2) sale of insurance by an insurer, except for the sale of credit insurance;

(3) public utility or common carrier rates under state or federal regulation; and

(4) licensed pawnbroker transactions.

Consumer credit sale exemptions include 30-day charge accounts and services furnished on short-term credit for which no finance charge is made. Consumer loan exemptions include loans secured by business collateral. Except for disclosure and remedies, sales or loans involving an interest in land are exempt if the finance or service charge is 10% or less per year.

Federal . . . The UCCC conforms to the requirements of the Federal Consumer Credit Protection Act (INSTALMENT CREDIT GUIDE, No. 177, Extra Edition, May 22, 1968, and No. 177, Second Extra Edition, May 24, 1968) so that a UCCC state is exempt from the federal requirements.

Final Draft . . . This Final Draft of the UCCC was approved by the National Conference of Commissioners on Uniform State Laws on July 30, 1968, and by the American Bar Association on August 7, 1968.

Consultant on Credit and Related Insurance

Marion M. Buerger, 1525 Marine Trust Building, Buffalo, New York 14203
Secretary to the Special Committee

Prefatory Note

This, the Final Draft of the Uniform Consumer Credit Code, has been approved by the National Conference of Commissioners on Uniform State Laws on July 30, 1968 and by the American Bar Association on August 7, 1968. It is, however, subject to style changes and to changes to conform it to the requirements and Regulations of the Board of Governors of the Federal Reserve System pursuant to the Federal Consumer Credit Protection Act. Moreover, this Prefatory Note and the Comments are subject to additions and corrections.

The second previous draft, the Tentative Final Draft—Working Draft No. 8, was prepared prior to action by the Congress on a final version of S. 5 (the Proxmire "Truth-in-Lending Act") or H. R. 11601 (the Sullivan "Consumer Credit Protection Act"), but after the passage of those bills by the Senate and the House, respectively. Wide distribution of that draft was made so that the Special Committee might have the advantage of further comments before the 1968 Annual Meeting of the National Conference.

The last previous draft, the Revised Tentative Final Draft—Working Draft No. 9, was prepared in the light of the enactment by the Congress and the approval by the President of S. 5, the Consumer Credit Protection Act (Public Law 90-321, 82 Stat. 146) and, specifically, of § 123 of that Act as follows:

> "§ 123. Exemption for State-regulated transactions
>
> The Board [of Governors of the Federal Reserve System] shall by regulation exempt from the requirements of this chapter [i.e., Chapter 2 of Title I of the Consumer Credit Protection Act, relating to disclosure in consumer credit transactions], any class of credit transactions within any State if it determines that under the law of that State that class of transactions is subject to requirements substantially similar to those imposed under this chapter, and that there is adequate provision for enforcement."

and in the beliefs that:

1. The Board of Governors of the Federal Reserve System will exempt by regulation from the disclosure requirements of Chapter 2 of the Consumer Credit Protection Act the classes of consumer credit transactions governed by the Uniform Consumer Credit Code within any State which enacts the Code, and

2. The provisions of the Uniform Consumer Credit Code relating to consumer credit advertising will conform to the requirements of Chapter 3 of Title I of the Consumer Credit Protection Act, relating to Credit Advertising, and to any implementing regulation prescribed by the Board of Governors of the Federal Reserve System pursuant to § 105 of the Consumer Credit Protection Act as follows:

> "§ 105. Regulations
>
> The Board shall prescribe regulations to carry out the purposes of this title [i.e., Title I including Chapter 1, General Provisions, Chapter 2, Credit Transactions, and Chapter 3, Credit Advertising]. These regulations may contain such classifications, differentiations, or other provisions, and may provide for such adjustments and exceptions for any class of transactions, as in the judgment of the Board are necessary or proper to effectuate the purposes of this title, to prevent circumvention or evasion thereof, or to facilitate compliance therewith."

Time has not permitted the Special Committee to ascertain the views of the Board of Governors of the Federal Reserve System with respect to these matters. Consequently, the Special Committee has requested and received from the National Conference authority, subject to the approval of the Executive Committee of the National Conference, and with the understanding that the changes will be submitted to the National Conference at its 1969 Annual Meeting for ratification, to make changes in this Final Draft to conform it to the requirements and regulations of the Board of Governors of the Federal Reserve System.

Research

Prior to the creation of the Special Committee, the American Bar Foundation, at the request of the Conference and of the Committee's predecessor, the Special Committee on a Uniform Retail Instalment Sales Act, undertook a thorough survey of consumer credit laws of all the States. In 1965, the American Bar Foundation published its "Trends in Consumer Credit Legislation" prepared by Miss Barbara A. Curran of the Foundation's research staff. The book has proved invaluable to the Committee.

Since the creation of the Committee, its members and staff have prepared papers on various legal, economic and sociological aspects of consumer credit. These papers have provided bases for the Committee's discussions with its staff and Advisory Committee and Panels of Advisors on specific subjects, as well as for its policy decisions.

Basic Assumptions

This draft, like those which preceded it, is predicated on various basic assumptions, including:

First, the successful American way of permitting competition to determine prices of non-monopoly commodities and services should also be allowed to apply to the pricing of money and credit;

Second, usury laws imposing inflexible price ceilings on money and credit are historical vestiges of the erroneous supposition that emperors, kings and governments could effectively fix all prices; the need to escape the rigidity of usury laws has led to special laws, which only the expert can find or understand, for most types of credit transactions requiring a charge higher than the usury rate;

Third, consumer credit legislation should be contained in one law so that any attorney can quickly and effectively advise his consumer client;

Fourth, for competition effectively to determine the pricing of money and credit requires:

a. for credit grantors, relatively easy entry into the market to avoid monopoly;

b. for knowledgeable and sophisticated credit recipients, eliminating or at least minimizing controls;

c. for the protection of less knowledgeable and less sophisticated credit recipients:

1. uniform disclosure of the costs and terms of credit to permit informed judgments as to whether or not to use credit, to facilitate

"shopping for credit," and to enable the forces of competition to work freely;

2. ceilings on the price of credit, restrictions on creditors' rights and remedies, and enhancements of debtors' rights and remedies sufficient to prevent overreaching by creditors without unduly limiting the availability of credit;

3. administrative powers and self-executing judicial remedies ample to assure compliance with statutory requirements;

4. enough financial resources available to the Administrator to enable him effectively to exercise the powers of his office; and

5. a broad-gauged Advisory Council to advise the Administrator in the exercise of his powers in the interests of our entire society and economy.

In preparing this draft on these assumptions, the Special Committee has recognized that:

a. a combination of too low ceiling rates, too substantial restrictions on creditors' rights and remedies, or too great enhancements of debtors' rights or remedies, might deprive the less credit-worthy of lawful sources of credit and drive them to "loan sharks" and other illegal credit grantors in whose hands they will enjoy no legal protections; it was to remedy the "loan shark" evil that the Russell Sage Foundation proposed its Uniform Small Loan Laws; and

b. the provisions governing ease of entry into the market, uniform disclosure of costs and terms, rate ceilings, restriction of creditors' rights and remedies, enlargement of debtors' rights and remedies, and powers granted to the Administrator are so inextricably interrelated that any substantial change in one area requires a major review of the balance struck in all other areas.

In order to permit the organization of panels of advisors on the subjects of consumer credit counseling agencies and wage earner receiverships before completing its consideration of those subjects, the Committee has made no attempt to complete the drafting of provisions relating to them, but has reserved for them Articles 7 and 8 of the Code in case, after 1968, the Committee recommends and the National Conference approves the inclusion in the Code of provisions relating to those subjects.

Uniform Legislation Desirable

The Special Committee believes that consumer credit legislation should be uniform among the States. Uniform laws on the subject will benefit both the consumer and the consumer credit industry.

Consumer understanding of credit transactions and of alternative sources of consumer credit is a primary essential for the effective operation of both consumer credit laws and of the forces of competition in consumer credit extensions. The mobility of our people makes uniformity of State consumer credit laws a prerequisite for maximum consumer understanding.

The extent to which segments of the consumer credit industry operate across the State lines makes uniformity of consumer credit laws desirable to facilitate and to reduce the costs of their interstate operations, and thus to promote competition and so ultimately to reduce the costs to the consumer of credit extensions.

Prior Drafts

The First Tentative Draft (Working Draft No. 1) was submitted for consideration to the National Conference at its 1966 Annual Meeting. Comments on that draft by the Committee's advisors and others at that meeting led the Committee to the conclusion that loan transactions and sales transactions should be treated separately.

In reaching that conclusion, the Committee was and is aware that, sociologically and economically, sales credit and loan credit are alike and that their separate treatment results in much duplication in drafting. Nevertheless, we are mindful of the weight given to Uniform Acts by Courts of States which have not enacted them. Thus, long before the Uniform Commercial Code was enacted or even introduced in New York, the New York Court of Appeals relied in part on a provision of the Uniform Commercial Code in overruling the Court's prior decisions on privity of contract and determining who may recover upon a breach of warranty in a sale of goods. The Committee believes that any encouragement to the courts of a State which has not enacted the Uniform Consumer Credit Code to rely on the Code's provisions to reject the time sale price doctrine would have most unfortunate social and economic consequences for both consumers and credit grantors.

A Second Tentative Draft (Working Draft No. 4) was prepared for consideration by the National Conference at its 1967 Annual Meeting. In order to obtain a maximum of comments, suggestions, and criticisms, more than 4,000 copies of the draft and invitations to attend a public discussion of it were distributed. Section F of the National Conference and the Committee accordingly held a public hearing on Working Draft No. 4 in June 1967.

The Second Tentative Draft (Working Draft No. 4) together with an Addendum to it predicated on the written and oral comments received before, during and after the June, 1967, hearing, were submitted to the National Conference at its 1967 Annual Meeting.

The discussions at the 1967 Annual Meeting and further consideration of the comments, compiled section-by-section, on Working Draft No. 4 led to Working Draft No. 5, not publicly distributed but considered by the Committee and its staff in preparing Working Draft No. 6. About 4,000 copies of that draft were distributed. It was considered at length at a public hearing conducted by the Committee in January, 1968. It was further discussed at joint meetings of the Committee and its Advisory Committee and Panels of Advisors on Special Subjects. These discussions and the comments on Working Draft No. 6, compiled section-by-section, led to Working Draft No. 7. That draft was not publicly distributed but provided the basis for the Tentative Final Draft (Working Draft No. 8) which, as noted above, was widely distributed with requests for comments.

Federal Disclosure Legislation

The Congress has passed and the President has approved the Consumer Credit Protection Act (Public Law 90-321; 82 Stat. 146), including as Title I—Consumer Credit Cost Disclosure, the "Truth-in-Lending Act." The Federal Act (§ 123) requires that the Board of Governors of the Federal Reserve System exempt from Federal disclosure requirements "any class of credit transactions within any State

if it [the Board] determines that under the law of that State that class of transactions is subject to requirements substantially similar to those imposed under this chapter [i.e., Chapter 2—Credit Transactions], and that there is adequate provision for enforcement."

The Consumer Credit Protection Act consequently presents an unusual opportunity for the early enactment by the States of the Final Draft of the Uniform Consumer Credit Code. The Federal Act requires a complete review, expansion and revision of most States' consumer credit laws. In the view of the Committee it will be far better for the various States to enact a comprehensive Uniform Consumer Credit Code than to tinker with the hodgepodge of existing State consumer credit legislation.

If the Board of Governors of the Federal Reserve System is to exempt from the requirements of the Federal Act the Uniform Consumer Credit Code as enacted by any State, the Code must require at least the disclosures provided for in the Federal Act. This Final Draft attempts to do so.

Plans for Continuation of Consumer Credit Project

Under the rules of the National Conference this Special Committee will be continued for at least two years for, among others, the following purposes.

1. Assisting in enactment of the Uniform Consumer Credit Code by State Legislatures;

2. Considering insertion in the Code of provisions concerning
   (a) consumer credit counseling agencies,
   (b) wage earner receiverships; and
   (c) other appropriate subjects.

3. Receiving suggestions for modification of the Code and, in its judgment, transmitting those suggestions to the National Conference for consideration.

4. Assisting in educational programs regarding consumer credit.

After the discharge of this Special Committee, the National Conference has under consideration the advisability of creating a Permanent Review Board to receive and consider recommended changes in the Consumer Credit Code.

Liaison with the American Bar Association

In accordance with the standard procedures of the National Conference and the American Bar Association, the Committee has consulted with appropriate sections of the American Bar Association, including the Corporation, Banking and Business Law Section and the Section on Administrative Law, as well as with legal organizations affiliated with the American Bar Association, such as the National Legal Aid and Defender Association.

The Advisory Committee and the Panels of Advisors

In conformity to usual National Conference procedures, the Committee has appointed an Advisory Committee representative of affected segments of the public and of the consumer credit industry.

Whatever the Committee's other accomplishments, it has established, perhaps for the first time, a close personal working relationship, a feeling of mutual respect and a rapport between representatives of the two groups.

It is the hope of the Committee that the Council of Advisors to the Administrator proposed in this and prior drafts will continue to expand communication and relationships between representatives of groups having apparently diverse but actually identical interests—the improvement of our society and economy.

The Committee takes this opportunity of expressing its appreciation to its Advisors for their invaluable help and for the almost unlimited time and effort they have devoted to the Committee's project.

The names and addresses of the members of the Advisory Committee and of the various Panels of Advisors follow. [NOTE: The names and addresses are not reproduced.—CCH.]

Uniform Consumer Credit Code

An Act

Relating to certain consumer and other credit transactions and constituting the uniform consumer credit code; consolidating and revising certain aspects of the law relating to consumer and other loans, consumer and other sales of goods, services and interests in land, and consumer leases; revising the law relating to usury; regulating certain practices relating to insurance in consumer credit transactions; providing for administrative regulations of certain consumer credit transactions; making uniform the law with respect thereto; and repealing inconsistent legislation.

COMMENT

The long title of the Code should be adapted to the constitutional and statutory requirements and practices of the enacting State.

The concept of the Code is that "credit transactions" is a single subject of the law, notwithstanding its many facets.

Article 1—General Provisions and Definitions

PART 1—SHORT TITLE, CONSTRUCTION, GENERAL PROVISIONS

[¶ 800] [Short Title]

Sec. 1.101. This Act shall be known and may be cited as Uniform Consumer Credit Code.

[¶ 801] Purposes; Rules of Construction

Sec. 1.102. (1) This Act shall be liberally construed and applied to promote its underlying purposes and policies.

(2) The underlying purposes and policies of this Act are:

(a) to simplify, clarify and modernize the law governing retail instalment sales, consumer credit, small loans and usury;

(b) to provide rate ceilings to assure an adequate supply of credit to consumers;

(c) to further consumer understanding of the terms of credit transactions and to foster competition among suppliers of consumer credit so that consumers may obtain credit at reasonable cost;

(d) to protect consumer buyers, lessees, and borrowers against unfair practices by some suppliers of consumer credit, having due regard for the interests of legitimate and scrupulous creditors;

(e) to permit and encourage the development of fair and economically sound consumer credit practices;

(f) to conform the regulation of consumer credit transactions to the policies of the Federal Consumer Credit Protection Act; and

(g) to make uniform the law including administrative rules among the various jurisdictions.

[¶ 802] Supplementary General Principles of Law Applicable

Sec. 1.103. Unless displaced by the particular provisions of this Act, the Uniform Commercial Code and the principles of law and equity, including the law relative to capacity to contract, principal and agent, estoppel, fraud, misrepresentation, duress, coercion, mistake, bankruptcy, or other validating or invalidating cause shall supplement its provisions.

[¶ 803] Construction Against Implicit Repeal

Sec. 1.104. This Act being a general act intended as a unified coverage of its subject matter, no part of it shall be deemed to be impliedly repealed by subsequent legislation if such construction can reasonably be avoided.

[¶ 804] Severability

Sec. 1.105. If any provision of this Act or the application thereof to any person or circumstances is held invalid, the invalidity shall not affect other provisions or applications of this Act which can be given effect without the invalid provision or application, and to this end the provisions of this Act are severable.

[¶ 805] Adjustment of Dollar Amounts

Sec. 1.106. (1) From time to time the dollar amounts in this Act designated as subject to change shall change, as provided in this section, in accordance with and to the extent of changes in the Consumer Price Index for Urban Wage Earners and Clerical Workers: U. S. City Average, All Items, 1957-59 = 100, compiled by the Bureau of Labor Statistics, United States Department of Labor, and hereafter referred to as the Index. The Index for December, 1967, is the Reference Base Index.

(2) The designated dollar amounts shall change on July 1 of each even-numbered year if the percentage of change, calculated to the nearest whole percentage point, between the Index at the end of the preceding year and the Reference Base Index is 10 per cent or more, except that

(a) the portion of the percentage change in the Index in excess of a multiple of 10 per cent shall be disregarded and the dollar amounts shall change only in multiples of 10 per cent of the amounts appearing in this Act on the date of enactment;

(b) the dollar amounts shall not change if the amounts required by this section are those currently in effect pursuant to this Act as a result of earlier application of this section; and

(c) in no event shall the dollar amounts be reduced below the amounts appearing in this Act on the date of enactment.

(3) If the Index is revised after December, 1967, the percentage of change pursuant to this section shall be calculated on the basis of the revised Index. If the revision of the Index changes the Reference Base Index, a revised Reference Base Index shall be determined by multiplying the Reference Base Index then applicable by the ratio of the revised Index to the current Index, as each was for the first month in which the revised Index is available. If the Index is superseded, the Index referred to in this section shall be the one represented by the Bureau of Labor Statistics as reflecting most accurately changes in the purchasing power of the dollar for consumers.

(4) The Administrator shall issue a rule announcing

(a) on or before April 30 of each year in which dollar amounts are to change, the changes in dollar amounts required by subsection (2); and

(b) promptly after the changes occur, changes in the Index required by subsection (3) including, when applicable, the numerical equivalent of the Reference Base Index under a revised Reference Base Index and the designation or title of any index superseding the Index.

(5) No person violates this Act if with respect to a transaction otherwise complying with this Act he relies on dollar amounts either determined in accordance with subsection (2) or appearing in the last rule of the Administrator announcing the then current dollar amounts.

(6) If the percentage of change between the Index at the end of the odd-numbered year preceding the effective date of this Act and the Reference Base Index would require change in the designated dollar amounts pursuant to subsection (2), the designated dollar amounts shall change upon the effective date of this Act and, on or before that date, the Administrator shall issue a rule announcing the changes required by this subsection. Subsection (5) also applies if the transaction is based on dollar amounts appearing in the Act and the Administrator has issued no rule as required by this subsection.

COMMENT

Under this section the dollar amounts designated as subject to change will automatically change on July 1 of each even-numbered year if the change in the Consumer Price Index is great enough. The Act will be enacted in all jurisdictions with the dollar amounts now appearing in it without regard to when enactment occurs. December, 1967, has been selected as the reference base period. Examples of how the section operates follow. Assume in each case that the Index for December, 1967, (the Reference Base Index) is 100. The $300 figure appearing in Section 2.201(2)(a) will be used as an illustrative dollar amount.

Case 1: The Index for December, 1969, is 107. The change from the Reference Base Index of 100 is an increase of 7%. Since the change is less than 10%, no change in dollar amounts occurs.

Case 2: The Index for December, 1971, is 112. The change from the Reference Base Index of 100 is an increase of 12%. Since this is more than 10%, a change occurs. The portion of the 12% in excess of 10% is disregarded; hence, an increase of 10% is indicated. 10% of $300 is $30. The dollar amount is $330, effective July 1, 1972.

Case 3: The Index for December, 1973, is 118. The change from the Reference Base Index of 100 is an increase of 18%. The portion of 18% in excess of 10% is disregarded; hence, an increase of 10% is indicated. However, the $300 amount changed to $330 in 1972 (see Case 2). Since the amount currently in effect ($330) is still the correct amount under this section, no change occurs.

Case 4: The Index for December, 1975, is 122. The change from the Reference Base Index of 100 is an increase of 22%. The portion of 22% in excess of a multiple of 10% (here 20%) is disregarded and a 20% increase is indicated. 20% of $300 is $60. The dollar amount is $360, effective July 1, 1976.

Case 5: The Index for December, 1977, is 117. The change from the Reference Base Index of 100 is an increase of 17%. The portion of 17% in excess of 10% is disregarded and a 10% increase is indicated. 10% of $300 is $30. The dollar amount is $330, effective July 1, 1978, a decrease from the $360 amount in effect since 1976 (see Case 4).

Case 6: State X adopts this Act on July 22, 1980, to become effective on January 1, 1981. The Index for December, 1979, is 135. A comparison of the Reference Base Index (100) with the Index for December, 1979 (135) indicates an increase of the $300 amount by 30% or $90, effective January 1, 1981. On July 1, 1982, the dollar amounts again change if subsection (2) requires.

Case 7: In 1983 BLS revises the Index, changing coverage components, and selecting a new base period. If only the coverage or components were changed, the revised Index should be used for subsequent calculations. However, if a new base period is selected (1981-82=100), an equivalent on the scale of the revised Index must be assigned to the Reference Base Index (December, 1967). Assume that the revised Index is first available for July, 1983. For that month the old Index is 200 and the new Index (1981-2=100) has gone up to 104. The revised Reference Base Index (that is, the Index for December, 1967, on the revised scale) may be found by this calculation:

$$\frac{\text{(old Index)}}{\text{(new Index)}} = \frac{200}{104} = \frac{100}{X} \quad \text{(old Reference Base Index)}$$

$$X = \frac{100 \times 104}{200}$$

X = 52 (revised Reference Base Index)

A comparison of the revised Index for December, 1983 (108) with the revised Reference Base Index (52) shows that the change from the revised Reference Base Index is an increase of 107.7%.

$$\frac{108.0 - 52.0}{52.0} = 1.077 = 107.7\%$$

Under subsection (2), 107.7% becomes 108%. The portion of 108% in excess of a multiple of 10% (here 100%) is disregarded, and a 100% increase is indicated. The dollar amount is $600, effective July 1, 1984.

[¶ 806] Waiver; Agreement to Forego Rights; Settlement of Claims

Sec. 1.107. (1) Except as otherwise provided in this Act, a buyer, lessee, or debtor may not waive or agree to forego rights or benefits under this Act.

(2) A claim by a buyer, lessee, or debtor against a creditor for an excess charge, other violation of this Act, or civil penalty, or a claim against a buyer, lessee, or debtor for default or breach of a duty imposed by this Act, if disputed in good faith, may be settled by agreement.

(3) A claim, whether or not disputed, against a buyer, lessee or debtor may be settled for less value than the amount claimed.

(4) A settlement in which the buyer, lessee, or debtor waives or agrees to forego rights or benefits under this Act is invalid if the court as a matter of law finds the settlement to have been unconscionable at the time it was made. The competence of the buyer, lessee, or debtor, any deception or coercion practiced upon him, the nature and extent of the legal advice received by him, and the value of the consideration are relevant to the issue of unconscionability.

[¶ 807] Effect of Act on Powers of Organizations

Sec. 1.108. (1) This Act prescribes maximum charges for all creditors extending consumer credit, except lessors and those excluded (Section 1.202), and displaces existing limitations on the powers of those creditors based on maximum charges.

(2) With respect to sellers of goods or services, small loan companies, licensed lenders, consumer and sales finance companies, industrial banks and loan companies, and commercial banks and trust companies, this Act displaces existing limitations on their powers based solely on amount or duration of credit.

(3) Except as provided in subsection (1) [and in the Article on Effective Date and Repealer (Article 9)], this Act does not displace limitations on powers of credit unions, savings banks, savings and loan associations, or other thrift institutions whether organized for the profit of shareholders or as mutual organizations.

(4) Except as provided in subsections (1) and (2) [and in the Article on Effective Date and Repealer (Article 9)], this Act does not displace

(a) limitations on powers of supervised financial organizations (subsection (16) of Section 1.301) with respect to the amount of a loan to a single borrower, the ratio of a loan to the value of collateral, the duration of a loan secured by an interest in land, or other similar restrictions designed to protect deposits, or

(b) limitations on powers an organization is authorized to exercise under the laws of this State or the United States.

COMMENT

The bracketed language in subsections (3) and (4) should be included and the brackets omitted if the enacting State adds to the Article on Effective Date and Repealer (Article 9) provisions displacing limitations on powers of the kinds of organizations enumerated in subsections (3) and (4).

PART 2—SCOPE AND JURISDICTION

[¶ 808] Territorial Application

Sec. 1.201. (1) Except as otherwise provided in this section, this Act applies to sales, leases, and loans made in this State and to modifications, including refinancings, consolidations, and deferrals, made in this State, of sales, leases, and loans, wherever made. For purposes of this Act

(a) a sale or modification of a sale agreement is made in this State if the buyer's agreement or offer to purchase or to modify is received by the seller in this State;

(b) a lease or modification of a lease agreement is made in this State if the lessee's agreement or offer to lease or to modify is received by the lessor in this State; and

(c) a loan or modification of a loan agreement is made in this State if a writing signed by the debtor and evidencing the debt is received by the lender in this State.

(2) With respect to sales made pursuant to a revolving charge account (Section 2.108), this Act applies if the buyer's communication or indication of his intention to establish the account is received by the seller in this State. If no communication or indication of intention is given by the buyer before the first sale, this Act applies if the seller's communication notifying the buyer of the privilege of using the account is mailed or personally delivered in this State.

(3) With respect to loans made pursuant to a lender credit card or similar arrangement (subsection (8) of Section 1.301), this Act applies if the debtor's communication or indication of his intention to establish the arrangement with the lender is received by the lender in this State. If no communication or indication of intention is given by the debtor before the first loan, this Act applies if the lender's communication notifying the debtor of the privilege of using the arrangement is mailed or personally delivered in this State.

(4) The Part on Limitations on Creditors' Remedies (Part 1) of the Article on Remedies and Penalties (Article 5) applies to actions or other proceedings brought in this State to enforce rights arising out of a consumer credit sale, consumer lease, or consumer loan, or modification thereof, wherever made.

(5) If a consumer credit sale, consumer lease, or consumer loan, or modification thereof, is made in another state to a person who is a resident of this State when the sale, lease, loan, or modification is made, the following provisions apply as though the transaction occurred in this State:

(a) a seller, lessor, lender, or assignee of his rights, may not collect charges through actions or other proceedings in excess of those permitted by the Article on Credit Sales (Article 2) or by the Article on Loans (Article 3); and

(b) a seller, lessor, lender, or assignee of his rights, may not enforce rights against the buyer, lessee, or debtor, with respect to the provisions of agreements which violate the provisions on Limitations on Agreements and Practices (Part 4) of the Article on Credit Sales (Article 2) or of the Article on Loans (Article 3).

(6) Except as provided in subsection (4), a sale, lease, loan, or modification thereof, made in another state to a person who was not a resident of this State at the time the sale, lease, loan, or modification was made is valid and

enforceable in this State according to its terms to the extent that it is valid and enforceable under the laws of the state applicable to the transaction.

(7) For the purposes of this Act, the residence of a buyer, lessee, or debtor, is the address given by him as his residence in any writing signed by him in connection with a credit transaction. Until he notifies the creditor of a new or different address, his address is presumed to be unchanged.

(8) Notwithstanding other provisions of this section

(a) except as provided in subsection (4), this Act does not apply if the buyer, lessee, or debtor is not a resident of this State at the time of a credit transaction and the parties then agree that the law of his residence applies; and

(b) this Act applies if the buyer, lessee, or debtor is a resident of this State at the time of a credit transaction and the parties then agree that the law of this State applies.

(9) Except as provided in subsection (8), the following agreements by a buyer, lessee, or debtor are invalid with respect to consumer credit sales, consumer leases, consumer loans, or modifications thereof, to which this Act applies:

(a) that the law of another state shall apply;

(b) that the buyer, lessee, or debtor consents to the jurisdiction of another state; and

(c) that fixes venue.

(10) The following provisions of this Act specify the applicable law governing certain cases:

(a) applicability (Section 6.102) of the Part on Powers and Functions of Administrator (Part 1) of the Article on Administration (Article 6); and

(b) applicability (Section 6.201) of the Part on Notification and Fees (Part 2) of the Article on Administration (Article 6).

[¶ 809] Exclusions

Sec. 1.202. This Act does not apply to

(1) extensions of credit to government or governmental agencies or instrumentalities;

(2) the sale of insurance by an insurer, except as otherwise provided in the Article on Insurance (Article 4);

(3) transactions under public utility or common carrier tariffs if a subdivision or agency of this State or of the United States regulates the charges for the services involved, the charges for delayed payment, and any discount allowed for early payment; or

(4) the rates and charges and the disclosure of rates and charges of a licensed pawnbroker established in accordance with a statute or ordinance concerning these matters.

COMMENT

The Federal Consumer Credit Protection Act is referred to in the Comments as CCPA. Subsection (1) is derived from CCPA Section 104(1). Subsection (3) is derived from CCPA Section 104(4). Unless excluded by regulations, pawnbrokers will be subject to the CCPA. Rather than attempt to study the pawnbroker business

at this time to determine the appropriateness of applying this Code to pawnbroker transactions, the Committee suggests that the exclusion of this type of transaction from the Code be continued.

[¶ 810] [Jurisdiction and Service of Process]

[Sec. 1.203. (1) The [ ] court of this State may exercise jurisdiction over any creditor with respect to any conduct in this State governed by this Act or with respect to any claim arising from a transaction subject to this Act. In addition to any other method provided by [rule or by] statute, personal jurisdiction over a creditor may be acquired in a civil action or proceeding instituted in the [ ] court by the service of process in the manner provided by this section.

(2) If a creditor is not a resident of this State or is a corporation not authorized to do business in this State and engages in any conduct in this State governed by this Act, or engages in a transaction subject to this Act, he may designate an agent upon whom service of process may be made in this State. The agent shall be a resident of this State or a corporation authorized to do business in this State. The designation shall be in a writing and filed with the Secretary of State. If no designation is made and filed or if process cannot be served in this State upon the designated agent, process may be served upon the Secretary of State, but service upon him is not effective unless the plaintiff or petitioner forthwith mails a copy of the process and pleading by registered or certified mail to the defendant or respondent at his last reasonably ascertainable address. An affidavit of compliance with this section shall be filed with the clerk of the court on or before the return day of the process, if any, or within any further time the court allows.]

PART 3—DEFINITIONS

[¶ 811] General Definitions

Sec. 1.301. In addition to definitions appearing in subsequent Articles, in this Act

(1) "Administrator" means the Administrator designated in the Article (Article 6) on Administration (Section 6.103).

(2) "Agreement" means the bargain of the parties in fact as found in their language or by implication from other circumstances including course of dealing or usage of trade or course of performance.

(3) "Agricultural purpose" means a purpose related to the production, harvest, exhibition, marketing, transportation, processing, or manufacture of agricultural products by a natural person who cultivates, plants, propagates, or nurtures the agricultural products. "Agricultural products" includes agricultural, horticultural, viticultural, and dairy products, livestock, wildlife, poultry, bees, forest products, fish and shellfish, and any products thereof, including processed and manufactured products, and any and all products raised or produced on farms and any processed or manufactured products thereof.

COMMENT

This definition of "agricultural products" is derived from the Agricultural Marketing Act of 1946, 7 U. S. C. Section 1626.

(4) "Closing costs" with respect to a debt secured by an interest in land includes:

(a) fees or premiums for title examination, title insurance, or similar purposes including surveys,

(b) fees for preparation of a deed, settlement statement, or other documents,

(c) escrows for future payments of taxes and insurance,

(d) fees for notarizing deeds and other documents,

(e) appraisal fees, and

(f) credit reports.

COMMENT

Except for "including surveys" in subsection(4)(a), this definition is derived from CCPA Section 106(e).

(5) "Conspicuous": A term or clause is conspicuous when it is so written that a reasonable person against whom it is to operate ought to have noticed it. Whether a term or clause is conspicuous or not is for decision by the court.

COMMENT

This definition is derived in part from UCC Section 1-201(10).

(6) "Credit" means the right granted by a creditor to a debtor to defer payment of debt or to incure debt and defer its payment.

(7) "Earnings" means compensation paid or payable to an individual or for his account for personal services rendered or to be rendered by him, whether denominated as wages, salary, commission, bonus, or otherwise, and includes periodic payments pursuant to a pension, retirement, or disability program.

COMMENT

This definition is derived in part from CCPA Section 302(a).

(8) "Lender credit card or similar arrangement" means an arrangement or loan agreement, other than a seller credit card, pursuant to which a lender gives a debtor the privilege of using a credit card, letter of credit, or other credit confirmation or identification in transactions out of which debt arises

(a) by the lender's honoring a draft or similar order for the payment of money drawn or accepted by the debtor;

(b) by the lender's payment or agreement to pay the debtor's obligations; or

(c) by the lender's purchase from the obligee of the debtor's obligations.

(9) "Official fees" means

(a) fees and charges prescribed by law which actually are or will be paid to public officials for determining the existence of or for perfecting, releasing, or satisfying a security interest related to a consumer credit sale, consumer lease, or consumer loan; or

(b) premiums payable for insurance in lieu of perfecting a security interest otherwise required by the creditor in connection with the sale,

lease, or loan, if the premium does not exceed the fees and charges described in paragraph (a) which would otherwise be payable.

COMMENT

This subsection is derived from CCPA Section 106(d).

(10) "Organization" means a corporation, government or governmental subdivision or agency, trust, estate, partnership, cooperative, or association.

(11) "Payable in instalments" means that payment is required or permitted by agreement to be made in (a) two or more periodic payments, excluding a down payment, with respect to a debt arising from a consumer credit sale pursuant to which a credit service charge is made, (b) four or more periodic payments, excluding a down payment, with respect to a debt arising from a consumer credit sale pursuant to which no credit service charge is made, or (c) two or more periodic payments with respect to a debt arising from a consumer loan. If any periodic payment other than the down payment under an agreement requiring or permitting two or more periodic payments is more than twice the amount of any other periodic payment, excluding the down payment, the consumer credit sale, consumer lease, or consumer loan is "payable in instalments."

COMMENT

A consumer credit sale in which the buyer has the options of paying the cash price in full in 90 days without a credit service charge or of paying in instalments the amount financed, including a credit service charge, is "payable in instalments".

(12) "Person" includes a natural person or an individual, and an organization.

(13) "Person related to" with respect to an individual means (a) the spouse of the individual, (b) a brother, brother-in-law, sister, sister-in-law of the individual, (c) an ancestor or lineal descendant of the individual or his spouse, and (d) any other relative, by blood or marriage, of the individual or his spouse who shares the same home with the individual. "Person related to" with respect to an organization means (a) a person directly or indirectly controlling, controlled by or under common control with the organization, (b) an officer or director of the organization or a person performing similar functions with respect to the organization or to a person related to the organization, (c) the spouse of a person related to the organization, and (d) a relative by blood or marriage of a person related to the organization who shares the same home with him.

(14) "Presumed" or "presumption" means that the trier of fact must find the existence of the fact presumed unless and until evidence is introduced which would support a finding of its non-existence.

(15) "Seller credit card" means an arrangement pursuant to which a person gives to a buyer or lessee the privilege of using a credit card, letter of credit, or other credit confirmation or identification primarily for the purpose of purchasing or leasing goods or services from that person, a person related to that person, or others licensed or franchised to do business under his business or trade name or designation.

(16) "Supervised financial organization" means a person, other than an insurance company or other organization primarily engaged in an insurance business,

(a) organized, chartered, or holding an authorization certificate under the laws of this State or of the United States which authorize the

person to make loans and to receive deposits, including a savings, share, certificate or deposit account, and

(b) subject to supervision by an official or agency of this State or of the United States.

(17) "United States rule" means the actuarial method of allocating payments made on a debt between principal or amount financed and loan finance charge or credit service charge, pursuant to which a payment is applied first to the accumulated loan finance charge or credit service charge and the balance is applied to the unpaid principal or amount financed.

COMMENT

For a discussion of the operation of the United States rule, see Comment to Section 2.304.

[¶ 812] Definition: "Federal Consumer Credit Protection Act"

Sec. 1.302. In this Act "Federal Consumer Credit Protection Act" means the Consumer Credit Protection Act (Public Law 90-321; 82 Stat. 146), as amended, and includes regulations issued pursuant to that Act.

Article 2—Credit Sales

PART 1—GENERAL PROVISIONS

[¶ 814] Short Title

Sec. 2.101. This Article shall be known and may be cited as Uniform Consumer Credit Code—Credit Sales.

[¶ 815] Scope

Sec. 2.102. This Article applies to consumer credit sales, including home solicitation sales, and consumer leases; in addition Part 6 applies to consumer related sales.

[¶ 816] Definitions in Article

Sec. 2.103. The following definitions apply to this Act and appear in this Article as follows:

"Amount financed"	Section 2.111
"Annual percentage rate"	Section 2.304(2)
"Cash price"	Section 2.110
"Consumer credit sale"	Section 2.104
"Consumer lease"	Section 2.106
"Consumer related sale"	Section 2.602
"Corresponding nominal annual percentage rate"	Section 2.304(3)
"Credit service charge"	Section 2.109
"Goods"	Section 2.105(1)
"Home solicitation sale"	Section 2.501
"Merchandise certificate"	Section 2.105(2)
"Precomputed"	Section 2.105(7)
"Revolving charge account"	Section 2.108
"Sale of goods"	Section 2.105(4)
"Sale of an interest in land"	Section 2.105(6)
"Sale of services"	Section 2.105(5)
"Seller"	Section 2.107
"Services"	Section 2.105(3)

[¶ 817] Definition: "Consumer Credit Sale"

Sec. 2.104. (1) Except as provided in subsection (2), "consumer credit sale" is a sale of goods, services, or an interest in land in which

(a) credit is granted by a seller who regularly engages as a seller in credit transactions of the same kind,

(b) the buyer is a person other than an organization,

(c) the goods, services, or interest in land are purchased primarily for a personal, family, household, or agricultural purpose,

(d) either the debt is payable in instalments or a credit service charge is made, and

(e) with respect to a sale of goods or services, the amount financed does not exceed $25,000.

(2) Unless the sale is made subject to this Act by agreement (Section 2.601), "consumer credit sale" does not include

(a) a sale in which the seller allows the buyer to purchase goods or services pursuant to a lender credit card or similar arrangement, or

(b) except as provided with respect to disclosure (Section 2.301) and debtors' remedies (Section 5.201), a sale of an interest in land if the credit service charge does not exceed 10 per cent per year calculated according to the United States rule on the unpaid balances of the amount financed on the assumption that the debt will be paid according to the agreed terms and will not be paid before the end of the agreed term.

(3) The amount of $25,000 in subsection (1) is subject to change pursuant to the provisions on adjustment of dollar amounts (Section 1.106).

COMMENT

Subsection (1)(d) excludes from the Code two familiar credit transactions: (1) services furnished on short-term credit with neither a credit service charge nor instalment payments; professional men usually furnish their services on this basis as do many electricians, plumbers, and the like; and (2) the typical 30-day retail charge account. The credit clothing merchant or credit jeweler who does not separately state a credit service charge is covered by this section if his contracts are payable in instalments. Subsection (1)(e) excludes sales of goods or services of over $25,000, but does not do so for sale of real property.

[¶ 818] Definitions: "Goods"; "Merchandise Certificate"; "Services"; "Sale of Goods"; "Sale of Services"; "Sale of an Interest in Land"; "Precomputed"

Sec. 2.105. (1) "Goods" includes goods not in existence at the time the transaction is entered into and merchandise certificates, but excludes money, chattel paper, documents of title, and instruments.

(2) "Merchandise certificate" means a writing issued by a seller not redeemable in cash and usable in its face amount in lieu of cash in exchange for goods or services.

(3) "Services" includes (a) work, labor, and other personal services, (b) privileges with respect to transportation, hotel and restaurant accommodations, education, entertainment, recreation, physical culture, hospital accommodations, funerals, cemetery accommodations, and the like, and (c) insurance provided by a person other than the insurer.

(4) "Sale of goods" includes any agreement in the form of a bailment or lease of goods if the bailee or lessee agrees to pay as compensation for use a sum substantially equivalent to or in excess of the aggregate value of the goods involved and it is agreed that the bailee or lessee will become, or for no other or a nominal consideration has the option to become, the owner of the goods upon full compliance with his obligations under the agreement.

COMMENT

This subsection is derived from CCPA Section 103(g).

(5) "Sale of services" means furnishing or agreeing to furnish services and includes making arrangements to have services furnished by another.

(6) "Sale of an interest in land" includes a lease in which the lessee has an option to purchase the interest and all or a substantial part of the rental or other payments previously made by him are applied to the purchase price.

(7) A sale, refinancing, or consolidation is "precomputed" if the debt is expressed as a sum comprising the amount financed and the amount of the credit service charge computed in advance.

[¶ 819] Definition: "Consumer Lease"

Sec. 2.106. (1) "Consumer lease" means a lease of goods

(a) which a lessor regularly engaged in the business of leasing makes to a person, other than an organization, who takes under the lease primarily for a personal, family, household, or agricultural purpose,

(b) in which the amount payable under the lease does not exceed $25,000, and

(c) which is for a term exceeding four months.

(2) "Consumer lease" does not include a lease made pursuant to a lender credit card or similar arrangement.

(3) The amount of $25,000 in subsection (1) is subject to change pursuant to the provisions on adjustment of dollar amounts (Section 1.106).

[¶ 820] Definition: "Seller"

Sec. 2.107. Except as otherwise provided, "seller" includes an assignee of the seller's right to payment but use of the term does not in itself impose on an assignee any obligation of the seller with respect to events occurring before the assignment.

COMMENT

Compare Section 3.107(1) defining lender to include an assignee. This section is intended to confer on the assignee all the rights of the seller. Unless the assignee undertakes direct collection of payments or enforcement of rights arising from the sale, he is not subject to penalties under Section 5.202.

[¶ 821] Definition: "Revolving Charge Account"

Sec. 2.108. "Revolving charge account" means an arrangement between a seller and a buyer pursuant to which (1) the seller may permit the buyer purchase goods or services on credit either from the seller or pursuant to a seller credit card, (2) the unpaid balances of amounts financed arising from purchases and the credit service and other appropriate charges are debited to an account, (3) a credit service charge if made is not precomputed but is computed on the outstanding unpaid balances of the buyer's account from time to time, and (4) the buyer has the privilege of paying the balances in instalments.

[¶ 822] Definition: "Credit Service Charge"

Sec. 2.109. "Credit service charge" means the sum of (1) all charges payable directly or indirectly by the buyer and imposed directly or indirectly by the seller as an incident to the extension of credit, including any of the following types of charges which are applicable: time price differential, service, carrying or other charge, however denominated, premium or other charge for any guarantee or insurance protecting the seller against the buyer's default or other credit loss; and (2) charges incurred for investigating the collateral or credit-worthiness of the buyer or for commissions or brokerage for obtaining the credit, irrespective of the person to whom the charges are paid or payable, unless the seller had no notice of the charges when the credit was granted. The term does not include charges as a result of default, additional charges (Section 2.202), delinquency charges (Section 2.203), or deferral charges (Section 2.204).

COMMENT

The first part of the definition is derived from CCPA Section 106(a), with changes made to relate the definition to sales. The second part broadens the definition to include charges with respect to commissions and brokerage within the credit service charge whether or not the creditor imposed them so long as he knew of the charges.

[¶ 823] Definition: "Cash Price"

Sec. 2.110. The "cash price" of goods, services, or an interest in land means the price at which the goods, services, or interest in land are offered for sale by the seller to cash buyers in the ordinary course of business, and may include (1) applicable sales, use, and excise and documentary stamp taxes, (2) the cash price of accessories or related services such as delivery, installation, servicing, repairs, alterations, and improvements, and (3) amounts actually paid or to be paid by the seller for registration, certificate of title, or license fees. The cash price stated by the seller to the buyer pursuant to the provisions on disclosure (Part 3) of this Article is presumed to be the cash price.

[¶ 824] Definition: "Amount Financed"

Sec. 2.111. "Amount financed" means the total of the following items to the extent that payment is deferred:

(1) the cash price of the goods, services, or interest in land, less the amount of any down payment whether made in cash or in property traded in,

(2) the amount actually paid or to be paid by the seller pursuant to an agreement with the buyer to discharge a security interest in or a lien on property traded in, and

(3) if not included in the cash price

(a) any applicable sales, use, or excise and documentary stamp taxes,

(b) amounts actually paid or to be paid by the seller for registration, certificate of title, or license fees, and

(c) additional charges permitted by this Article (Section 2.202).

PART 2—MAXIMUM CHARGES

[¶ 825] Credit Service Charge for Consumer Credit Sales other than Revolving Charge Accounts

Sec. 2.201. (1) With respect to a consumer credit sale, other than a sale pursuant to a revolving charge account, a seller may contract for and receive a credit service charge not exceeding that permitted by this section.

(2) The credit service charge, calculated according to the United States rule, may not exceed the equivalent of the greater of either of the following:

(a) the total of

(i) 36 per cent per year on that part of the unpaid balances of the amount financed which is $300 or less;

(ii) 21 per cent per year on that part of the unpaid balances of the amount financed which is more than $300 but does not exceed $1,000; and

(iii) 15 per cent per year on that part of the unpaid balances of the amount financed which is more than $1,000; or

(b) 18 per cent per year on the unpaid balances of the amount financed.

(3) This section does not limit or restrict the manner of contracting for the credit service charge, whether by way of add-on, discount, or otherwise, so long as the rate of the credit service charge does not exceed that permitted by this section. If the sale is precomputed,

(a) the credit service charge may be calculated on the assumption that all scheduled payments will be made when due, and

(b) the effect of prepayment is governed by the provisions on rebate upon prepayment (Section 2.210).

(4) For the purposes of this section, the term of a sale agreement commences with the date the credit is granted or, if goods are delivered or services performed 10 days or more after that date, with the date of commencement of delivery or performance. Differences in the lengths of months are disregarded and a day may be counted as 1/30th of a month. Subject to classifications and differentiations the seller may reasonably establish, a part of a month in excess of 15 days may be treated as a full month if periods of 15 days or less are disregarded and that procedure is not consistently used to obtain a greater yield than would otherwise be permitted.

(5) Subject to classifications and differentiations the seller may reasonably establish, he may make the same credit service charge on all amounts financed within a specified range. A credit service charge so made does not violate subsection (2) if

(a) when applied to the median amount within each range, it does not exceed the maximum permitted by subsection (2), and

(b) when applied to the lowest amount within each range, it does not produce a rate of credit service charge exceeding the rate calculated according to paragraph (a) by more than 8 per cent of the rate calculated according to paragraph (a).

(6) Notwithstanding subsection (2), the seller may contract for and receive a credit service charge of not more than $5 when the amount financed does not exceed $75 or not more than $7.50 when the amount financed exceeds $75.

(7) The amounts of $300 and $1,000 in subsection (2) are subject to change pursuant to the provisions on adjustment of dollar amounts (Section 1.106).

COMMENT

1. *Purpose of rate ceilings provisions.* The purpose of this section and Section 3.508 (Loan Finance Charge for Supervised Loans) is to set ceilings and not to fix rates. Even under present statutes, considerable rate competition exists. The intent of this Act is to provide even more effective competition. Therefore, while this section sets rate ceilings, several other sections are designed to generate sufficient competition to set rates. In addition, other provisions have been omitted by design, because they would have tended to restrict competition. Other provisions related to this section include:

(1) Provisions for disclosure of the credit service charge and loan finance charge both in dollar amounts and as annual percentages (Article 2, Part 3; Article 3, Part 3) are designed to facilitate comparative shopping. This is the most effective means of limiting prices. For most goods and services offered for sale in competitive markets, disclosure of the price has been deemed sufficient to regulate prices.

(2) The absence of special rate ceilings according to the type of credit grantors, type of item financed, or the form of credit extension is by design. Segmentation of the market for credit by differentiated rate ceilings tends to reduce competition and introduce rigidities into the market that benefit a few suppliers at the expense of others and work to the disadvantage of consumers.

(3) Greater freedom of entry to the credit field is fostered by several provisions, as well as by several deliberate omissions. Re-

volving credit may be offered both in connection with credit sales, loans, and supervised loans. No type of credit grantor is limited by this Act in the amount of credit that may be extended. By design the license required to make supervised loans is made readily accessible to those showing financial responsibility, character, and fitness. Provisions for minimum financial assets and for a showing of convenience and advantage have been deliberately omitted, since their inclusion would tend to restrict competition and require establishment of rates, rather than ceilings.

Because of the different cost structures that will be developed as a result of this Act, comparison of these rate ceilings cannot be made to existing rate ceilings. In this respect, the rate ceilings in this section are intimately related to other parts of the Act which provide for limitations on agreements and practices (Article 2, Parts 4 and 5; Article 3, Part 4) and for limitations on creditors' remedies (Article 5, Part 1). Provisions such as holding the assignee subject to defenses (Section 2.404), buyer's right to cancel (2.502), no assignment of earnings (2.410; 3.403), and restrictions on deficiency judgments in consumer credit sales (5.103) will tend to raise operating costs of credit grantors above current levels. Other things being equal, these provisions would require higher rate ceilings than now exist. If they were not provided, the least credit-worthy consumers now in the market would be relegated to the illegal market.

The rate ceiling declines with the amount of credit granted by design. There are substantial fixed costs in granting consumer instalment credit. Up to a point the relative amount of fixed costs decline as the amount of credit granted increases. The present rate structure is designed not to restrict the amount of credit granted in any size category. Consequently, any changes in the rate ceilings provided would require a complete re-evaluation of the gradation in the structure, as well as of the other above-mentioned sections of this Act which are closely related in an economic sense to this rate ceiling.

2. *Explanation of operation of rate ceilings.* This explanation of maximum rates applies equally to credit service charges made under Section 2.201 and to loan finance charges made under Section 3.508.

It should be made clear that the graduated rates permitted are calculated on the periodic declining unpaid balances. The provisions for graduated rates should not be construed as requiring simultaneous liquidation of different portions of the original unpaid balance. Thus, the 21% annual rate permitted on unpaid balances exceeding $300, but not exceeding $1,000, does not apply to the initial unpaid balance in that range for the scheduled maturity of the loan, but only to the extent that periodic declining unpaid balances fall within the range from $300.01 to $1,000.

The operation of this principle with respect to a $1,500 principal amount of advance for twelve months is illustrated in Table A below. The table shows the total dollar charge, the monthly payments and the charge earned each month when the rates stated in Sections 2.201 and 3.508 are computed on the unpaid balance as of each scheduled payment date and each payment is applied first to the earned charge and then to principal. It also shows the unpaid balances which result from applying the rates stated in Sections 2.201 and 3.508 and the parts of each unpaid balance to which each rate applies each month. The total dollar charge so computed is $211.71, but 3¢ is waived rather than increase the final payment.

TABLE A

Amortization Schedule for $1,500 Paid In Twelve Equal And Consecutive Monthly Installments of Principal And Charge Combined With The Charge Computed At Maximum Graduated Rates Authorized by Sections 2.201 and 3.508—36% Per Year on That Part Of The Unpaid Balances Not Exceeding $300, Plus 21% Per Year On That Part Of The Unpaid Balances Exceeding $300 But Not Exceeding $1,000, Plus 15% Per Year On That Part Of The Unpaid Balances Exceeding $1,000, Yields $211.68.

Mo.	Unpaid Principal Balances Outstanding During Month @ 36%	@ 21%	@ 15%	Total	Application of $142.64 Monthly Payments Charges	Principal
1	$300.00	$700.00	$500.00	$1,500.00	$ 27.50	$ 115.14
2	300.00	700.00	384.86	1,384.86	26.06	116.58
3	300.00	700.00	268.28	1,268.28	24.60	118.04

Mo.	Unpaid Principal Balances Outstanding During Month @ 36%	@ 21%	@ 15%	Total	Application of $142.64 Monthly Payments Charges	Principal
4	300.00	700.00	150.24	1,150.24	23.13	119.51
5	300.00	700.00	30.73	1,030.73	21.63	121.01
6	300.00	609.72	....	909.72	19.67	122.97
7	300.00	486.75	....	786.75	17.52	125.12
8	300.00	361.63	....	661.63	15.33	127.31
9	300.00	234.32	....	534.32	13.10	129.54
10	300.00	104.78	....	404.78	10.83	131.81
11	272.97	....	....	272.97	8.19	134.45
12	138.52	....	....	138.52	4.12*	138.52
TOTALS					$211.68	$1,500.00

Note: Interest rates are applied to parts of unpaid principal balances scheduled to be outstanding. For example, the interest on $1,030.73 is computed as follows:

36% on	$ 300.00 =	$ 9.00
21% on	700.00 =	12.25
15% on	30.73 =	.38
	$1,030.73	$21.63

* The charge earned the last month is $4.15, but 3¢ is waived and applied to principal to make the final payment equal to the others.

For purposes of disclosure under Section 2.304(2) and 3.304(2) the credit grantor must determine the single annual percentage rate which, when applied according to the U. S. rule, earns the same dollar amount of charge that is produced by the graduated rates. Table B shows that an annual rate of 25.10% applied monthly to the periodic declining unpaid balances produces the same total dollar charge of $211.68 calculated by application of graduated rates in Table A.

TABLE B

Amortization Schedule for $1,500 Paid in Twelve Equal And Consecutive Monthly Installments Of Principal and Charge Combined Showing That The Flat Annual Percentage Rate of 25.10% Computed By The U. S. Rule Yields $211.68.

Mo.	Unpaid Principal Balances	Application of $142.64 Monthly Payments Charges	Principal
1	$1,500.00	$ 31.38	$ 111.26
2	1,388.74	29.05	113.59
3	1,275.15	26.67	115.97
4	1,159.18	24.25	118.39
5	1,040.79	21.77	120.87
6	919.92	19.24	123.40
7	796.52	16.66	125.98
8	670.54	14.03	128.61
9	541.93	11.34	131.30
10	410.63	8.59	134.05
11	276.58	5.79	136.85
12	139.73	2.91*	139.73
		$211.68	$1,500.00

* The charge earned the last month is $2.92, but 1¢ is waived and applied to principal to make the final payment equal to the others.

The Code is intended to give the creditors the following choices in making their charges under Section 2.201 and Section 3.508:

(1) The contract may be precomputed to include the dollar finance charge for payment according to schedule. In the example shown, the dollar finance charge of $211.68 would be added to the original unpaid principal, making a total of $1,711.68 to be repaid in twelve monthly instalments of $142.64.

A precomputed contract is subject to rebate for prepayment in full and to default and deferment charges in the case of delinquency or deferral. In such cases the creditor has the option (a) to rebate according to Section 2.210 or 3.210 and to make default or deferment charges according to Sections 2.203 and 2.204 or 3.203 and 3.204, *or* (b) to recompute charges at the flat annual percentage rate which yields the precomputed charge when computed according to the U. S. rule. (In the example shown that rate is 25.10%.) Under this second option, the flat annual percentage rate would be computed on the actual unpaid balances of the original principal amount (excluding precomputed charge) for the actual time outstanding and the total charge so computed would be in lieu of the precomputed charge and default and deferment charges. In the case of a precomputed loan (but not sale), if two or more instalments are delinquent ten days, the lender may convert to the flat annual percentage rate (or graduated rates) as of the due date of the first delinquent instalment rather than recompute from the beginning. See Section 3.203(4). The conversion is by rebating the precomputed charge as of the due date of the first delinquent instalment. Charges at the flat annual percentage rate on unpaid balances after conversion are in lieu of the rebate and subsequent default and deferment charges.

(2) The agreement may call for the maximum flat annual rate of charge (or lesser annual flat rate) computed on actual unpaid balances for the actual time outstanding. The flat annual percentage is the rate which yields the charge for payment according to schedule when the rate is computed according to the U. S. rule. In the example, the rate is 25.10%. In this case there is no rebate for prepayment in full because the charges are collected only as earned, and there are no separate charges for default or deferment.

(3) The agreement may call for the computation of the graduated rates on parts of the actual unpaid balance for the time actually outstanding when each payment is made. In this case there is no rebate for prepayment in full because charges are collected only as earned, and there are no separate charges for default or deferment.

(4) In the case of a credit service charge for revolving charge accounts, the charge for each period must be computed on the parts of the unpaid balance from time to time as defined in Section 2.207(2). In the case of a revolving loan account, the charge for each period must be computed on the parts of the unpaid balance from time to time as defined in Section 3.201(4).

3. *Explanation of subsection (5).* With respect to Section 2.201(5), the variation permitted is limited to 8 per cent of the *rate* of the finance charge and does not permit an 8 *percentage point* variation. For example, if a credit grantor were to levy an annual add-on finance charge of $10 per $100 of initial unpaid balance, under the provisions of this section he could establish the following maximum range for one-year contracts:

Amount Financed	Credit Service Charge
$92.40-$107.60	$10.00

The median amount financed is $100.00; that is, this amount is $7.60 from both the upper and lower limits of the specified range. Alternatively, it is just halfway between $92.40 and $107.60.

The specified range is limited by the 8 per cent requirement. On one-year contracts the add-on finance charge results in an actuarial rate of 17.972 per cent. Subparagraph (b) specifies that the yield on the lowest amount within the range may not be more than 8 per cent higher than the yield provided on the median amount. Thus the yield on the lowest amount may not exceed 19.410 per cent ($.08 \times 17.972 + 17.972 = 19.410$). It follows that the lower amount must be such that the $10 credit service charge produces an annual rate not in excess of 19.410 per cent. Interpolation from annuity tables shows that the lower amount must be about $92.40. Since the median is halfway between the upper and lower limits, the upper amount must be $107.60. These are close approximations; in actual practice very precise limits can be determined.

To gain the convenience of using a single dollar amount of credit service charge for a specified range of amounts financed the credit grantor must undercharge for amounts financed above the median. Thus the $10 credit service charge is $0.76 less than the $10.76 credit service charge that could have

been received by precise application of an add-on rate of $10 per $100 per annum on the initial unpaid balance. These results are summarized below for one-year monthly instalment contracts.

(A) Amount financed	(B) Actual finance charge	(C) Accurate finance charge	(D) Dollar difference (C) — (B)	(E) Annual percentage
$107.60	$10.00	$10.76	—$0.76	16.73%
$100.00	$10.00	$10.00	0.00	17.97%
$ 92.40	$10.00	$ 9.24	+$0.76	19.41%

4. *Explanation of subsection (6).* Subsection (6) of this section permits minimum charges equal to those for which the CCPA requires no annual percentage rate disclosure. The CCPA does not set limits on the amounts of minimum charges, but does require annual percentage rate disclosure when the minimum charges exceed those permitted by subsection (6). Subsection (6) also sets limits on the amounts of minimum charges.

[¶ 826] Additional Charges

Sec. 2.202. (1) In addition to the credit service charge permitted by this Part, a seller may contract for and receive the following additional charges in connection with a consumer credit sale:

(a) official fees and taxes;

(b) charges for insurance as described in subsection (2); and

(c) charges for other benefits, including insurance, conferred on the buyer, if the benefits are of value to him apart from the granting of the credit, the charges are reasonable in relation to the benefits, and the Administrator has by rule determined that the charges are permissible additional charges.

(2) An additional charge may be made for insurance written in connection with the sale, other than insurance protecting the seller against the buyer's default or other credit loss,

(a) with respect to insurance against loss of or damage to property, or against liability, if the seller furnishes a clear and specific statement in writing to the buyer, setting forth the cost of the insurance if obtained from or through the seller, and stating that the buyer may choose the person through which the insurance is to be obtained; and

(b) with respect to consumer credit insurance providing life, accident or health coverage, if the insurance coverage is not a factor in the approval by the seller of the extension of credit and this fact is clearly disclosed in writing to the buyer, and if, in order to obtain the insurance in connection with the extension of credit, the buyer gives specific affirmative written indication of his desire to do so after written disclosure to him of the cost thereof.

(3) For the purposes of the Part on Disclosure and Advertising (Part 3), if the credit service charge with respect to a sale of an interest in land does not exceed 10 per cent per year (paragraph (b) of subsection (2) of Section 2.104), reasonable closing costs even though not within subsection (1) may be treated as additional charges.

COMMENT

Paragraph (c) of subsection (1), above, sets standards to be observed by the Administrator in determining whether charges are permissible additional charges pursuant to paragraph (c). These standards conform to the legislative history of CCPA Section 106 (d)(4) as indicated in the "Statement of Managers" on page 25 of the Conference Report on the CCPA under the heading "Other Charges." Section 6.104(2) of this

Code directs the Administrator to take into account federal regulations on the subject before adopting his rules.

CCPA Section 106(b) requires that charges or premiums for insurance be included in the "finance charge" for the purposes of disclosing the annual percentage rate or corresponding nominal annual percentage rate unless the insurance meets the tests specified in paragraph (a) or paragraph (b) of subsection (2). The effect of subsection (2) is to require that charges or premiums for insurance be included in the credit service charge for ceilings purposes as well unless the insurance meets the tests specified in paragraph (a) or paragraph (b) of subsection (2).

[¶ 827] Delinquency Charges

Sec. 2.203. (1) With respect to a precomputed consumer credit sale, refinancing, or consolidation, the parties may contract for a delinquency charge on any instalment not paid in full within 10 days after its scheduled due date in an amount not exceeding the greater of

(a) an amount, not exceeding $5, which is 5 per cent of the unpaid amount of the instalment, or

(b) the deferral charge (subsection (1) of Section 2.204) that would be permitted to defer the unpaid amount of the instalment for the period that it is delinquent.

(2) A delinquency charge under paragraph (a) of subsection (1) may be collected only once on an instalment however long it remains in default. No delinquency charge may be collected if the instalment has been deferred and a deferral charge (Section 2.204) has been paid or incurred. A delinquency charge may be collected at the time it accrues or at any time thereafter.

(3) No delinquency charge may be collected on an instalment which is paid in full within 10 days after its scheduled instalment due date even though an earlier maturing instalment or a delinquency charge on an earlier instalment may not have been paid in full. For purposes of this subsection payments are applied first to current instalments and then to delinquent instalments.

(4) The amount of $5 in subsection (1) is subject to change pursuant to the provisions on adjustment of dollar amounts (Section 1.106).

COMMENT

It should be noted that this section and later sections providing for deferral charges (Section 2.204), credit service charge upon refinancing (2.205), and rebate upon prepayment (2.210) apply only to precomputed sales. When a credit service charge is precomputed, the calculations are based on the assumption that all scheduled payments will be made when due (2.201(3)). If a buyer is late in making a payment on a precomputed sale, the seller would receive no income for the period of the delay unless a separate delinquency charge were permitted. The alternative of not permitting delinquency charges is rejected, because the result would be to enforce a lower effective ceiling on credit service charge rates for delinquent buyers than for buyers who paid promptly. The same line of reasoning that calls for a delinquency charge also supports rebates of appropriate portions of the credit service charge upon prepayment (2.210). Instead of paying behind schedule, the buyer is paying ahead of schedule. Consequently, he is entitled to a rebate of a portion of the prescheduled credit service charge.

The adjustments to the precomputed credit service charge permitted in these sections are not needed for revolving charge accounts. In general, the credit service charge accumulates in direct relation to the size of the unpaid balance and the period for which it has been outstanding. If the buyer is late in making a payment the credit service charge continues to accumulate, so that the seller is compensated for his forbearance. Similarly, the buyer may prepay the sale at any time and is obligated to pay only the credit service charge that has accumulated to the date of prepayment.

[¶ 828] Deferral Charges

Sec. 2.204. (1) With respect to a precomputed consumer credit sale, refinancing or consolidation, the parties before or after default may agree in writing to defer payment of all or part of one or more unpaid instalments, and the seller may make and collect a charge not exceeding the rate previously stated to the buyer pursuant to the provisions on disclosure (Part 3) applied to the amount or amounts deferred for the period of deferral calculated without regard to differences in lengths of months, but proportionally for a part of a month, counting each day as 1/30 of a month. A deferral charge may be collected at the time it is assessed or at any time thereafter.

(2) The seller may, in addition to the deferral charge, make appropriate additional charges (Section 2.202), and the amount of these charges which is not paid in cash may be added to the amount deferred for the purpose of calculating the deferral charge.

(3) The parties may agree in writing at the time of a precomputed consumer credit sale, refinancing, or consolidation that if an instalment is not paid within 10 days after its due date, the seller may unilaterally grant a deferral and make charges as provided in this section. No deferral charge may be made for a period after the date that the seller elects to accelerate the maturity of the agreement.

(4) A delinquency charge made by the seller on an instalment may not be retained if a deferral charge is made pursuant to this section with respect to the period of delinquency.

[¶ 829] Credit Service Charge on Refinancing

Sec. 2.205. With respect to a consumer credit sale, refinancing, or consolidation, the seller may by agreement with the buyer refinance the unpaid balance and may contract for and receive a credit service charge based on the amount financed resulting from the refinancing at a rate not exceeding that permitted by the provisions on credit service charge for consumer credit sales (Section 2.201). For the purpose of determining the credit service charge permitted, the amount financed resulting from the refinancing comprises the following:

(1) if the transaction was not precomputed, the total of the unpaid balance and accrued charges on the date of refinancing, or, if the transaction was precomputed, the amount which the buyer would have been required to pay upon prepayment pursuant to the provisions on rebate upon prepayment (Section 2.210) on the date of refinancing, except that for the purpose of computing this amount no minimum credit service charge (subsection (6) of Section 2.201) shall be allowed; and

(2) appropriate additional charges (Section 2.202), payment of which is deferred.

[¶ 830] Credit Service Charge on Consolidation

Sec. 2.206. If a buyer owes an unpaid balance to a seller with respect to a consumer credit sale, refinancing, or consolidation, and becomes obligated on another consumer credit sale, refinancing, or consolidation, with the same seller, the parties may agree to a consolidation resulting in a single schedule of payments pursuant to either of the following subsections:

(1) The parties may agree to refinance the unpaid balance with respect to the previous sale pursuant to the provisions on refinancing (Section 2.205)

and to consolidate the amount financed resulting from the refinancing by adding it to the amount financed with respect to the subsequent sale. The seller may contract for and receive a credit service charge based on the aggregate amount financed resulting from the consolidation at a rate not exceeding that permitted by the provisions on credit service charge for consumer credit sales (Section 2.201).

(2) The parties may agree to consolidate by adding together the unpaid balances with respect to the two sales.

COMMENT

Refinancing under Section 2.205 means that the balance owing is treated as though it is prepaid, with the buyer being credited with all refunds; a credit service charge is then calculated on the basis of the balance owing less refunds. Consolidation, which is covered in 2.206, refers to the process of adding together amounts owing with respect to more than one sale. There are two ways of consolidating and both are described in 2.206. Subsection (1) involves the familiar rewrite; the old balance is refinanced and added to the amount financed under the new sale. The credit service charge is based on the aggregate amounts financed. Under subsection (2) no refinancing is involved. The *balances owing* are simply added together and made payable on one schedule of payments. This usually means that the maturity of the first sale will be extended.

[¶ 831] Credit Service Charge for Revolving Charge Accounts

Sec. 2.207. (1) With respect to a consumer credit sale made pursuant to a revolving charge account, the parties to the sale may contract for the payment by the buyer of a credit service charge not exceeding that permitted in this section.

(2) A charge may be made in each billing cycle which is a percentage of an amount no greater than

(a) the average daily balance of the account,

(b) the unpaid balance of the account on the same day of the billing cycle, or

(c) the median amount within a specified range within which the average daily balance of the account or the unpaid balance of the account on the same day of the billing cycle is included. A charge may be made pursuant to this paragraph only if the seller, subject to classifications and differentiations he may reasonably establish, makes the same charge on all balances within the specified range and if the percentage when applied to the median amount within the range does not produce a charge exceeding the charge resulting from applying that percentage to the lowest amount within the range by more than 8 per cent of the charge on the median amount.

(3) If the billing cycle is monthly, the charge may not exceed 2 per cent of that part of the amount pursuant to subsection (2) which is $500 or less and 1½ per cent on that part of this amount which is more than $500. If the billing cycle is not monthly, the maximum charge is that percentage which bears the same relation to the applicable monthly percentage as the number of days in the billing cycle bears to 30. For the purposes of this section, a variation of not more than 4 days from month to month is "the same day of the billing cycle."

(4) Notwithstanding subsection (3), if there is an unpaid balance on the date as of which the credit service charge is applied, the seller may contract for and receive a charge not exceeding 50¢, if the billing cycle is monthly or longer, or the pro rata part of 50¢ which bears the same relation to 50¢ as the number of days in the billing cycle bears to 30, if the billing cycle is shorter than monthly.

(5) The amounts of $500 in subsection (3) are subject to change pursuant to the provisions on adjustment of dollar amounts (Section 1.106).

COMMENT

CCPA Section 127(b)(6) requires the disclosure of the finance charge on open end credit plans in terms of an annual percentage rate if "the total finance charge exceeds 50¢ for a monthly or longer billing cycle, or the pro rata part of 50¢ for a billing cycle shorter than monthly." It would for all practical purposes be impossible to express a minimum charge in terms of an annual percentage rate. Consequently, subsection (4) prescribes as the minimum the amount of the charge for which the CCPA requires no annual percentage rate disclosure. It also prescribes the method of calculating the pro rata part of the permitted minimum charge when the billing cycle is less than one month.

[¶ 832] Advances to Perform Covenants of Buyer

Sec. 2.208. (1) If the agreement with respect to a consumer credit sale, refinancing, or consolidation contains covenants by the buyer to perform certain duties pertaining to insuring or preserving collateral and the seller pursuant to the agreement pays for performance of the duties on behalf of the buyer, he may add the amounts paid to the debt. Within a reasonable time after advancing any sums, he shall state to the buyer in writing the amount of the sums advanced, any charges with respect to this amount, and any revised payment schedule and, if the duties of the buyer performed by the seller pertain to insurance, a brief description of the insurance paid for by the seller including the type and amount of coverages. No further information need be given.

(2) A credit service charge may be made for sums advanced pursuant to subsection (1) at a rate not exceeding the rate stated to the buyer pursuant to the provisions on disclosure (Part 3) with respect to the sale, refinancing, or consolidation, except that with respect to a revolving charge account the amount of the advance may be added to the unpaid balance of the account and the seller may make a credit service charge not exceeding that permitted by the provisions on credit service charge for revolving charge accounts (Section 2.207).

[¶ 833] Right to Prepay

Sec. 2.209. Subject to the provisions on rebate upon prepayment (Section 2.210), the buyer may prepay in full the unpaid balance of a consumer credit sale, refinancing, or consolidation at any time without penalty.

[¶ 834] Rebate Upon Prepayment

Sec. 2.210. (1) Except as provided in subsection (2), upon prepayment in full of the unpaid balance of a precomputed consumer credit sale, refinancing, or consolidation, an amount not less than the unearned portion of the credit service charge calculated according to this section shall be rebated to the buyer. If the rebate otherwise required is less than $1, no rebate need be made.

(2) Upon prepayment in full of a consumer credit sale, refinancing, or consolidation, other than one pursuant to a revolving charge account, if the credit service charge then earned is less than any permitted minimum credit service charge (subsection (6) of Section 2.201) contracted for, whether or not the sale, refinancing, or consolidation is precomputed, the seller may collect or retain the minimum charge, as if earned, not exceeding the credit service charge contracted for.

(3) Except as otherwise provided in this subsection with respect to a sale of an interest in land or a consumer credit sale secured by an interest in land, the unearned portion of the credit service charge is a fraction of the credit service charge of which the numerator is the sum of the periodic balances scheduled to follow the computational period in which prepayment occurs, and the denominator is the sum of all periodic balances under either the sale agreement or, if the balance owing resulted from a refinancing (Section 2.205) or a consolidation (Section 2.206), under the refinancing agreement or consolidation agreement. In the case of a sale of an interest in land or a consumer credit sale secured by an interest in land, reasonable sums actually paid or payable to persons not related to the seller for customary closing costs included in the credit service charge are deducted from the credit service charge before the calculation prescribed by this subsection is made.

COMMENT

Subsection (3), together with paragraph (a) of subsection (4), states the "Rule of 78" with respect to a sale, refinancing or consolidation payable in equal instalments at equal intervals from the date of the sale, refinancing or consolidation to the final scheduled payment date. In the case of such a sale, refinancing or consolidation, "computational period" may read as "scheduled payment period", and the provisions relating to irregular payment schedules, viz., paragraphs (b), (c) and (d) of subsection (4) and subsection (5) in its entirety, may be disregarded.

(4) In this section

(a) "periodic balance" means the amount scheduled to be outstanding on the last day of a computational period before deducting the payment, if any, scheduled to be made on that day;

(b) "computational period" means one month if one-half or more of the intervals between scheduled payments under the agreement is one month or more, and otherwise means one week;

(c) the "interval" to the due date of the first scheduled instalment or the final scheduled payment date is measured from the date of a sale, refinancing, or consolidation, or any later date prescribed for calculating maximum credit service charges (subsection (4) of Section 2.201), and includes either the first or last day of the interval;

(d) if the interval to the due date of the first scheduled instalment does not exceed one month by more than 15 days when the computational period is one month, or 11 days when the computational period is one week, the interval shall be considered as one computational period.

(5) This subsection applies only if the schedule of payments is not regular (subsection (6) of Section 2.304).

(a) If the computational period is one month and

(i) if the number of days in the interval to the due date of the first scheduled instalment is less than one month by more than 5 days, or more than one month by more than 5 but not more than

15 days, the unearned credit service charge shall be increased by an adjustment for each day by which the interval is less than one month and, at the option of the seller, may be reduced by an adjustment for each day by which the interval is more than one month; the adjustment for each day shall be 1/30th of that part of the credit service charge earned in the computational period prior to the due date of the first scheduled instalment assuming that period to be one month; and

(ii) if the interval to the final scheduled payment date is a number of computational periods plus an additional number of days less than a full month, the additional number of days shall be considered a computational period only if 16 days or more. This subparagraph applies whether or not subparagraph (i) applies.

(b) Notwithstanding paragraph (a), if the computational period is one month, the number of days in the interval to the due date of the first instalment exceeds one month by not more than 15 days, and the schedule of payments is otherwise regular, the seller may, at his option, exclude the extra days and the charge for the extra days in computing the unearned credit service charge; but if he does so and a rebate is required before the due date of the first scheduled instalment, he shall compute the earned charge for each elapsed day as 1/30th of the amount the earned charge would have been if the first interval had been one month.

(c) If the computational period is one week and

(i) if the number of days in the interval to the due date of the first scheduled instalment is less than 5 days, or more than 9 days but not more than 11 days, the unearned credit service charge shall be increased by an adjustment for each day by which the interval is less than 7 days and, at the option of the seller, may be reduced by an adjustment for each day by which the interval is more than 7 days; the adjustment for each day shall be 1/7th of that part of the credit service charge earned in the computational period prior to the due date of the first scheduled instalment assuming that period to be one week; and

(ii) if the interval to the final scheduled payment date is a number of computational periods plus an additional number of days less than a full week, the additional number of days shall be considered a computational period only if 4 days or more. This subparagraph applies whether or not subparagraph (i) applies.

(6) If a deferral (Section 2.204) has been agreed to, the unearned portion of the credit service charge shall be computed without regard to the deferral. The amount of deferral charge earned at the date of prepayment shall also be calculated. If the deferral charge earned is less than the deferral charge paid, the difference shall be added to the unearned portion of the credit service charge. If any part of a deferral charge has been earned but has not been paid, that part shall be subtracted from the unearned portion of the credit service charge, or shall be added to the unpaid balance.

(7) This section does not preclude the collection or retention by the seller of delinquency charges (Section 2.203).

(8) If the maturity is accelerated for any reason and judgment is obtained, the buyer is entitled to the same rebate as if payment had been made on the date judgment is entered.

(9) Upon prepayment in full of a consumer credit sale by the proceeds of consumer credit insurance (Section 4.103), the buyer or his estate is entitled to the same rebate as though the buyer had prepaid the agreement on the date the proceeds of the insurance are paid to the seller, but no later than 10 business days after satisfactory proof of loss is furnished to the seller.

COMMENT

Subsection (9) applies only in the case of consumer credit insurance as defined in Section 4.103, *i.e.*, insurance over which the creditor has partial control, and resolves a question under prior law. When a consumer credit sale is prepaid in full by proceeds of insurance other than consumer credit insurance, the prior provisions of Section 2.210 apply. Examples of the application of Section 2.210 follow:

Example 1:

Time sale contract executed July 1, 1968, and goods delivered the same day. Payable in 12 equal monthly payments beginning August 1, 1968.

1. Sale price is $1,000.00, credit service charge is $71.24, and the monthiy payment is $89.27. Debtor prepays in full on October 1, 1968.

a. The "computational period" is one month (subsection (4)(b)). The "interval to the due date of the first instalment" starts July 1 (subsection (4)(c) and subsection (4) of Section 2.201) and, being one month, constitutes one computational period. No part of subsection (5) is applicable.

The denominator of the fraction called for by subsection (3) is therefore the sum of the 12 scheduled unpaid balances as of the last days of the months of July, 1968, through June, 1969, *before* deducting the payments scheduled for those days (subsection (4)(a)).

Sum of 12 balances (1,071.24; 981.97; 892.70 . . . 89.27) = 6,963.06.

b. The computational periods in the numerator of the fraction called for by subsection (3) begin with the one starting on October 2, 1968, so the numerator is the sum of the nine scheduled unpaid balances as of the first days of the months of November, 1968, through July, 1969, *before* deducting the payments scheduled for those days (subsection (4)(a)).

Sum of nine balances (803.43; 714.16; 624.89 . . . 89.27) = 4,017.15.

c. Refund is $\frac{4{,}017.15}{6{,}963.06} \times 71.24 = \$41.10$

Example 2:

Time sale contract executed July 1, 1968, and goods delivered same day. Payable in 26 equal weekly payments beginning July 8. Sale price is $400.00, credit service charge is $31.60, and the weekly payment is $16.60. Debtor prepays in full on July 29, 1968.

a. The "computational period" is one week (subsection (4)(b)). The "interval to the due date of the first instalment" starts July 1 (subsection (4)(c) and subsection (4) of Section 2.201) and, being one week, constitutes one computational period. No part of subsection (5) is applicable.

The denominator of the fraction called for by subsection (3) therefor is the sum of the 26 scheduled unpaid balances as of July 8, 15, 22, 29 and so on, *before* deducting the payments scheduled for those days (subsection (4)(a)).

Sum of 26 balances (431.60, 415.00, 398.40, . . ., 16.60) = 5,826.60.

b. The computational periods in the numerator of the fraction called for by subsection (3) begin with the one starting on July 30, so the numerator is the sum of the 22 scheduled unpaid balances beginning August 5, 1968, *before* deducting the payments scheduled for those days (subsection (4)(a)).

Sum of 22 balances (365.20, 348.60 . . . 16.60) = 4,199.80.

c. Refund is $\frac{4{,}199.80}{5{,}826.60} \times 3.160 = \$22.78$

Example 3:

Time sale executed June 26, 1968, and goods delivered July 9, 1968. Payable in 12 equal monthly payments beginning August 15. Sale price is $1,000.00, credit service charge is $71.24, and the monthly payment is $89.27. Debtor prepays in full on November 10, 1968.

a. The "computational period" is one month (subsection (4)(b)). The "interval to the due date of the first instalment" starts July 9 (subsection (4)(c) and subsection (4) of Section 2.201) and constitutes one computational period (subsection (4)(d)). Since the interval is 37 days, the seller has the option of reducing the rebate by an adjustment for seven days (subsection (5)(a)(i)). Subsection (5)(a)(ii) does not apply.

The denominator of the fraction called for by subsection (3) therefore is the sum of the 12 scheduled unpaid balances as of the 15th days of the months of August through July *before* deducting the payment scheduled for those days (subsection (4)(a)).

Sum of 12 balances (1,071.24; 981.97; 892.70 . . . 89.27) = 6,963.06.

The adjustment is found by taking 7/30 of the credit service charge earned in the computational period to the first scheduled due date or:

$$\frac{7}{30} \times \frac{\text{Beginning balance}}{\text{Denominator as determined above}} \times \text{Credit Service Charge.}$$

$$\frac{7}{30} \times \frac{1{,}071.24}{6{,}963.06} \times 71.24 = \$2.56.$$

b. The computational periods in the numerator of the fraction called for by subsection (3) begin with the one starting on November 16 (subsection (3)) so the numerator is the sum of the eight scheduled balances as of the 15th of the months of December, 1968, through July, 1969, *before* deducting the payment scheduled for that day.

Sum of eight balances (714.16; 624.89; 535.62 . . . 89.27) = 3,213.72.

c. Refund is $\frac{3{,}213.72}{6{,}963.06} \times 71.24 = \$32.88.$

$32.88 minus adjustment of $2.56 = $30.32.

Example 4:

Time sale executed June 28, 1968, and goods delivered July 3, 1968. Payable in 26 weekly payments beginning July 8. Sale price is $400.00, credit service charge is $31.60, and the weekly payment is $16.60. Debtor prepays in full on July 23, 1968.

a. The "computational period" is one week (subsection (4)(b)). The "interval to the due date of the first instalment" starts June 28 (subsection (4)(c) and subsection (4) of Section 2.201) and constitutes one computational period (subsection (4)(d)). Since the interval is ten days, the seller has the option of reducing the rebate by an adjustment for three days (subsection (5)(b)(i)). Subsection (5)(b)(ii) does not apply.

The denominator of the fraction called for by subsection (3) therefore is the sum of the 26 scheduled unpaid balances as of July 8, 15, 22 and 29 and so on, *before* deducting the payments scheduled for those days (subsection (4)(a)).

Sum of 26 balances (431.60; 415.00; 398.40 . . . 16.60) = 5,826.60.

The adjustment is found by taking 3/7 of the credit service charge earned in the computational period to the first scheduled due date or:

$$\frac{3}{7} \times \frac{\text{Beginning balance}}{\text{Denominator as determined above}} \times \text{Credit service charge.}$$

$$\frac{3}{7} \times \frac{431.60}{5{,}826.60} \times 31.60 = \$1.00.$$

b. The computational periods in the numerator of the fraction called for by subsection (7) begin with the one starting July 30, so the numerator is the sum of the 22 scheduled unpaid balances beginning August 5, 1968, *before* deducting the payments scheduled for those days (subsection (1)(a)).

Sum of 22 balances (365.20; 348.60 . . . 16.60) = 4,199.80.

c. Refund is $\frac{4{,}199.80}{5{,}826.60} \times 31.60 = 22.78.$

$22.78 minus adjustment of $1.00 = $21.78.

Example 5:

Time sale executed July 9, 1968, and the goods delivered July 12, 1968. Payments scheduled on November 15, 1968 and November 15, 1969. Sale price is $1,000.00, credit service charge is $104.36, and each of the two payments is $552.18. Debtor prepays on January 10, 1969.

a. The "computational period" is one month (subsection (4)(b)). The "interval to the due date of the first instalment" starts on July 9, 1968 (subsection (4) of Section 2.201) and is more than 45 days, so the special rule of subsection (4)(d) and the adjustment of subsection (5)(a)(i) do not apply. The interval to the final scheduled payment date is 16 months and six days. The additional days, being less than 16, are disregarded (subsection (5)(a)(ii)).

The denominator of the fraction called for by subsection (3) therefore is the sum of the 16 scheduled unpaid balances as of the 8th days of the months of August, 1968, through November, 1969 (subsection (4)(a)).

Balance of $1,104.36 for four computational periods	= $ 4,417.44
Balance of $552.18 for 12 computational periods	= 6,626.16
Total denominator	$11,043.60

b. The computational periods in the numerator of the fraction called for by subsection (3) begin with the one starting on February 9, 1969, so the numerator is the sum of the nine scheduled unpaid balances as of the 8th days of the months of March through November, 1969.

Balance of $552.18 for nine computational periods $4,969.62.

c. Refund is $\frac{\$\ 4,969.62}{\$11,043.60} \times 104.36 = \$46.96$

Example 6:

Same facts as in Example 5, except the debtor did not pay the installment due 11/15/68 in full, but paid $184.18 (approximately 1/3 of the installment) and was permitted to defer the rest ($368.00) until March 15 (four months). A deferral charge of $17.00 was assessed, so the amount coming due March 15 is $385.00. Debtor prepays in full on 10 January 1969.

a. Compute the rebate of credit service charge as though the extension had not occurred (subsection (6)) and as though the balances had been reduced as *scheduled* (subsection (4)(a)). The computations are the same as in Example 5 and the rebate of credit service charge is $46.96 as in Example 5.

b. Compute also the rebate of unearned deferral charge. Of the 120 days of the extension period 64 remained at the time of the prepayment so the rebate of deferral charge is:

$$\frac{64}{120} \times 17 = \$9.07$$

PART 3—DISCLOSURE AND ADVERTISING

[¶ 835] Applicability; Information Required

Sec. 2.301. (1) For purposes of this Part, consumer credit sale includes the sale of an interest in land without regard to the rate of the credit service charge if the sale is otherwise a consumer credit sale (Section 2.104).

(2) The seller shall disclose to the buyer to whom credit is extended with respect to a consumer credit sale the information required by either

(a) this Part, or

(b) except with respect to a consumer credit sale of an interest in land or secured by an interest in land, the Federal Consumer Credit Protection Act.

(3) For the purposes of paragraph (b) of subsection (2), information which would otherwise be required pursuant to the Federal Consumer Credit Protection Act is sufficient even though the transaction is one of a class of credit transactions exempted from that Act pursuant to a determination by the Board of Governors of the Federal Reserve System that the class of transactions is subject under the law of this State to requirements substantially similar to those imposed under that Act.

(4) The lessor shall disclose to the lessee to whom credit is extended with respect to a consumer lease the information required by this Part.

[¶ 836] General Disclosure Requirements and Provisions

Sec. 2.302. (1) The disclosure by this Part

(a) shall be made clearly and conspicuously;

(b) shall be in writing, a copy of which shall be delivered to the buyer or lessee, but need not be contained in a single writing nor made in the order set forth in this Part;

(c) may use terminology different from that employed in this Part if it conveys substantially the same meaning;

(d) may be supplemented by additional information or explanations supplied by the seller or lessor;

(e) need be made only to the extent applicable and only as to those items for which the seller or lessor makes a separate charge to the buyer or lessee;

(f) shall be made on the assumption that all scheduled instalments are paid when due; and

(g) comply with this Part although rendered inaccurate by any act, occurrence, or agreement subsequent to the required disclosure.

(2) Except with respect to sales made by telephone or mail (Section 2.305) and consolidations (Section 2.308),

(a) the disclosures required by this Part shall be made before credit is extended, but may be made in the sale, refinancing, or consolidation agreement, lease, or other evidence of indebtedness to be signed by the buyer or lessee if set forth conspicuously therein, and need be made only to one buyer or lessee if there are more than one, and

(b) if an evidence of indebtedness is signed by the buyer or lessee, the seller or lessor shall give him a copy when the writing is signed.

(3) Except as provided with respect to rescission by a buyer (Section 5.204) and civil liability for violations of disclosure provisions (subsection (4) of Section 5.203), written acknowledgment of receipt by a buyer or lessee to whom a statement is required to be given pursuant to this Part

(a) in an action or proceeding by or against the original seller or lessor, creates a presumption that the statement was given, and

(b) in an action or proceeding by or against an assignee without knowledge to the contrary when he acquires the obligation, is conclusive proof of the delivery of the statement and, unless the violation is apparent on the face of the statement, of compliance with this Part.

[¶ 837] Overstatement

Sec. 2.303. The disclosure of an amount or percentage which is greater than the amount or percentage required to be disclosed under this Part does not in itself constitute a violation of this Part if the overstatement is not materially misleading and is not used to avoid meaningful disclosure.

COMMENT

This section is derived from CCPA Sections 103(1) and 107(b).

[¶ 838] Calculation of Rate to Be Disclosed

Sec. 2.304. (1) Except as otherwise specifically provided, if a seller is required to give to a buyer a statement of the rate of the credit service charge he shall state the rate in terms of an annual percentage rate as defined in subsection (2) or in terms of a corresponding nominal annual percentage rate as defined in subsection (3), whichever is appropriate.

(2) "Annual percentage rate"

(a) with respect to a consumer credit sale other than one made pursuant to a revolving charge account, is either

(i) that nominal annual percentage rate which, when applied to the unpaid balances of the amount financed calculated according to the United States rule, will yield a sum equal to the amount of the credit service charge, or

(ii) that rate determined by any method prescribed by the Administrator as a method which materially simplifies computation while retaining reasonable accuracy as compared with the rate determined pursuant to subparagraph (i);

(b) with respect to a consumer credit sale made pursuant to a revolving charge account, is the quotient expressed as a percentage of the total credit service charge for the period to which it relates divided by the amount upon which the credit service charge for that period is based, multiplied by the number of these periods in a year; if the period is one day, the number of periods in a year is deemed to be 360.

(3) "Corresponding nominal annual percentage rate" is the percentage or percentages used to calculate the credit service charge for one billing cycle or other period pursuant to a revolving charge account multiplied by the number of billing cycles or periods in a year; if the period is one day, the number of periods in a year is deemed to be 360.

(4) If a seller is permitted to make the same credit service charge for all amounts financed within a specified range (subsection (5) of Section 2.201) or for all balances within a specified range (subsection (2) of Section 2.207), he shall state the annual percentage rate or corresponding nominal annual percentage rate, whichever is appropriate, as applied to the median amount of the range within which the actual amount financed or balance is included.

(5) If a debt is payable on a schedule of instalment payments which is regular except for one or more of the following irregularities:

(a) the amount of one instalment payment is not substantially equal to the amount of each of the other instalment payments;

(b) the interval between the date the credit is granted and the first instalment payment is not equal to the interval between instalment payments; or

(c) in one or more payment periods no instalment payment is due, not exceeding one-fourth of the payment periods in any year if the length of the term of the agreement is a year or more, or one-fourth of the payment periods if the length of the term of the agreement is less than a year, the seller may, at his option, calculate the rate to be disclosed as if the debt were payable under an agreement having the same amount financed, the same length of term to the nearest full scheduled payment period, and a regular schedule of payments having the same interval between payments as the interval between the majority of instalments as scheduled in the sale agreement.

(6) A schedule of payments is regular if (a) the instalment payments other than the down payment are substantially equal in amount, (b) the interval between instalment payments is one month, or the intervals between instalment payments are equal and less than one month, and (c) the interval between the date the credit is granted and the first instalment payment is equal to the interval between instalment payments.

(7) If the credit service charge does not begin to accrue until after the date the credit is granted, the seller may, at his option, calculate the rate to be disclosed on the basis of the period between the date when the credit service

charge begins to accrue and the date of the final payment under the agreement, and, if he does so, he shall inform the buyer of the date when the credit service charge begins to accrue.

(8) A statement of rate complies with this Part if it does not vary from the accurately computed rate by more than the following tolerances:

(a) the annual percentage rate may be rounded to the nearest quarter of 1 per cent for consumer credit sales payable in substantially equal instalments when a seller determines the total credit service charge on the basis of a single add-on, discount, periodic, or other rate, and the rate is converted into an annual percentage rate under procedures prescribed by the Administrator;

(b) the Administrator may authorize the use of rate tables or charts which may provide for the disclosure of annual percentage rates which vary from the rate determined in accordance with paragraph (a) by not more than the tolerances the Administrator may allow; the Administrator may not allow a tolerance greater than 8 per cent of that rate except to simplify compliance where irregular payments are involved; and

(c) in case a seller determines the annual percentage rate in a manner other than as described in paragraph (a) or (b), the Administrator may authorize other reasonable tolerances.

COMMENT

1. Definition of "annual percentage rate" is derived from CCPA Section 107(a). The definition "corresponding nominal annual percentage rate" is derived from CCPA Section 127(a)(4) and (b)(5). Subsections (5) - (7) are intended to deal with irregular contracts and are subject to approval by the Board. Subsection (8) is derived from CCPA Section 107(c) - (e).

2. The assumption underlying the United States rule is that a periodic payment is applied first to the unpaid credit service charge. If the payment exceeds the unpaid credit service charge, the remainder of the payment is applied to reduce the unpaid balance of the amount financed. This procedure is based upon *Story v. Livingston*, 38 U. S. 359 (1839).

To illustrate the application of this rule assume that the amount financed on a four-month contract is $500, and that the credit service charge is $12.56. Four monthly payments of $128.14 are contemplated. Thus the amount financed ($500) plus the credit service charge ($12.56) equals the original unpaid balance ($512.56), which is divided into four equal monthly payments, the first payment being one month from date of contract. The application of the United States rule is demonstrated below:

(A)		(B)		(C)		(D)		(E)
				Application of payment				
Unpaid balance of amount financed		Monthly rate		Credit service charge		Amount financed		Total monthly payment (C) + (D)
500.00	×	1%	=	5.00		123.14		128.14
376.86	×	1%	=	3.77		124.37		128.14
252.49	×	1%	=	2.52		125.62		128.14
126.87	×	1%	=	1.27		126.87		128.14
				12.56	+	500.00	=	512.56

Rate disclosure involves finding that rate which will generate the stated credit service charge when applied to the unpaid balances of the amount financed according to the United States rule. A monthly rate of 1% produces a credit service charge of $12.56, the difference between the sum of the monthly payments and the amount financed. The annual percentage rate would be twelve times the monthly rate, or 12%. In mathematical literature this is generally referred to as the nominal annual rate.

Note the application of the U. S. rule. In the first month the first $5 (1% × $500) of the monthly payment of $128.14 is applied to the credit service charge, leaving a balance of $123.14. This remainder is then applied to reduce the unpaid balance of the amount financed from $500 to $376.86. The same process is repeated in subsequent months.

[¶ 839] Sales Made by Telephone or Mail

Sec. 2.305. (1) With respect to a consumer credit sale, other than a sale made pursuant to a revolving charge account, if the seller receives a purchase order or offer by mail or telephone without personal solicitation, the seller complies with this Part if (a) he makes the disclosures at the time and in the manner provided in the general disclosure requirements and provisions (subsection (2) of Section 2.302), or (b) the seller's catalog or other printed material distributed to the public sets forth the cash price, the method of determining the deferred payment price, and the terms of financing, including the annual percentage rate, and before the first payment is due on the sale, he gives the information required by this Part including the notice prescribed in subsection (2).

(2) The notice shall be in writing and conspicuous and shall provide that if the buyer does not wish to make the purchase on credit, he may, within 15 days of receipt of the notice, prepay the obligation as to that purchase for an amount stated or identified in the notice and avoid the payment of any credit service charge as to that purchase. A prepayment under this Section is subject to the provisions of this Act on prepayment, except that no credit service charge shall be made if prepayment in full is made within the period specified in the notice. Payment by mail is effective when posted.

COMMENT

This section is derived in part from CCPA Section 128(c).

[¶ 840] Consumer Credit Sales Not Pursuant to Revolving Charge Account

Sec. 2.306. (1) This section applies to a consumer credit sale not made pursuant to a revolving charge account (Section 2.310).

(2) The seller shall give to the buyer the following information:

(a) brief description or identification of the goods, services, or interest in land;

(b) cash price of the goods, services, or interest in land, and any applicable sales, use, excise, transfer, or documentary stamp taxes not included in the cash price; if property and related services are sold as part of one transaction, the price of the property and services may be separately stated or combined;

(c) amount of the down payment and a statement of the portion paid in money and the portion paid by an allowance for property traded in; if there is a security interest in the property traded in which the seller agrees to discharge, the seller shall also state the amount which the seller agrees to pay to discharge the security interest and this amount may be deducted from the allowance for property traded in;

(d) difference between the amount of cash price (paragraph (b)) and the amount of down payment (paragraph (c));

(e) amount paid or payable for registration, certificate of title or license fees, if not included in the cash price, and a description or identification of the fees;

(f) amount of official fees and taxes if not included in the cash price and a description or identification of them;

(g) brief description of insurance to be provided or paid for by the seller including the type and amount of the coverages, and if a separate charge is made, the amount of the charge;

(h) amount of other additional charges (Section 2.202), and a brief description or identification of them;

(i) amount financed (sum of amounts stated in paragraphs (d), (e), (f), (g), and (h));

(j) except in the case of a sale of a dwelling when the credit service charge does not exceed 10 per cent per year (Section 2.104), the amount of the credit service charge and the amount of the unpaid balance (amount financed plus credit service charge);

(k) rate of the credit service charge as applied to the amount financed in accordance with the provisions on calculation of rate (Section 2.304), except in the case of a credit service charge which does not exceed $5 when the amount financed does not exceed $75 or $7.50 when the amount financed exceeds $75;

(l) number of payments, amount of each payment, due date of first payment, and the due date of subsequent payments or interval between payments;

(m) default, delinquency, or similar charges payable in the event of late payments; and

(n) description of any security interest held or to be retained or acquired by the seller in connection with the extension of credit, and a clear identification of the property to which the security interest relates.

COMMENT

This section is derived in part from CCPA Section 128.

[¶ 841] Refinancing

Sec. 2.307. If the seller refinances the balance owing with respect to a consumer credit sale, refinancing, or consolidation pursuant to the provisions on refinancing (Section 2.205), he shall state to the buyer the following:

(1) unpaid balance before refinancing;

(2) amount and brief itemization of rebates to which buyer would have been entitled if the debt had been prepaid pursuant to the provisions on rebate upon prepayment (Section 2.210) on the date of refinancing, except that for the purpose of computing this amount no minimum credit service charge (subsection (6) of Section 2.201) shall be allowed;

(3) amount and brief itemization of additional charges in connection with the refinancing and a brief indication of any change in the type or terms of insurance;

(4) amount financed resulting from the refinancing;

(5) amount of credit service charge;

(6) amount of unpaid balance;

(7) number of payments, amount of each payment, due date f first payment, and the due date of subsequent payments or interval between payments; and

(8) rate of the credit service charge as applied to the amount financed in accordance with the provisions on calculation of rate (Section 2.304), except in the case of a credit service charge which does not exceed $5 when the amount financed does not exceed $75 or $7.50 when the amount financed exceeds $75.

[¶ 842] Consolidation

Sec. 2.308. (1) Except as provided in subsection (2), if the parties agree to consolidate an existing unpaid balance from a previous consumer credit sale, refinancing, or consolidation, with the amount financed from a subsequent consumer credit sale, refinancing, or consolidation, the seller shall state:

(a) with respect to the refinanced unpaid balance, the information required by the provisions on refinancing (subsections (1) through (4) of Section 2.307);

(b) with respect to the subsequent sale, the information required by the provisions on consumer credit sales other than revolving charge accounts (paragraphs (a) through (j) of subsection (2) of Section 2.306);

(c) the aggregate amount financed, the amount of the credit service charge, the amount of the unpaid balance, the number of payments, the amount of each payment, the due date of the first payment, and the due dates of subsequent payments or the interval between payments; and

(d) the rate of the credit service charge as applied to the aggregate amount financed in accordance with the provisions on calculation of rate (Section 2.304), except in the case of a credit service charge which does not exceed $5 when the aggregate amount financed does not exceed $75 or $7.50 when the amount financed exceeds $75.

(2) If a consumer credit sale is made pursuant to an agreement providing for the addition of the unpaid balance resulting from a subsequent sale to an existing unpaid balance resulting from a previous sale, and the buyer has approved in writing both the annual percentage rate or rates and the method of computing the credit service charge or charges,

(a) the information required to be given with respect to the subsequent sale (Section 2.306) may be given on or before the due date of the first instalment under the consolidated schedule of payments; and

(b) with respect to the consolidation, the seller, on or before the due date of the first instalment under the consolidated schedule of payments, shall state to the buyer the amount of the consolidated unpaid balance, the number of payments, amount of each payment, the due date of the first payment, and the due dates of subsequent payments or the interval between payments.

COMMENT

Subsection (2) is derived from CCPA Section 128(d). The security problem raised in that section of the CCPA is covered in Section 2.409.

[¶ 843] **Deferral**

Sec. 2.309. If the seller makes a deferral pursuant to the provisions on deferral charges (Section 2.204), he shall state to the buyer, at the time of or promptly after the deferral:

(1) amount deferred;

(2) any appropriate additional charges (Section 2.202);

(3) aggregate amount deferred, which is the sum of the amount in (1) and any unpaid amount included in (2);

(4) time to which payment is deferred; and

(5) amount and annual percentage rate of the deferral charge and when it is payable.

[¶ 844] **Revolving Charge Accounts**

Sec. 2.310. (1) Before making a consumer credit sale pursuant to a revolving charge account, the seller shall give to the buyer the following information:

(a) conditions under which a credit service charge may be made, including the time period, if any, within which any credit extended may be repaid without incurring a credit service charge;

(b) method of determining the balance upon which a credit service charge will be computed;

(c) method of determining the amount of the credit service charge, including the periodic percentage or percentages used to calculate the credit service charge and the amount of any minimum credit service charge;

(d) corresponding nominal annual percentage rate (subsection (3) of Section 2.304); if more than one corresponding nominal annual percentage rate may be used, the amount of a balance to which each corresponding nominal annual percentage rate applies shall also be stated;

(e) if the seller elects he may also state either

(i) the average effective annual percentage rate of return received from revolving charge accounts for a representative period of time; or

(ii) if circumstances are such that the computation of a rate under subparagraph (i) would not be feasible or practical, or would be misleading or meaningless, a projected rate of return to be received from revolving charge accounts; the Administrator shall prescribe rules, consistent with commonly accepted standards for accounting or statistical procedures, to carry out the purposes of this paragraph (e);

(f) conditions under which additional charges may be made and the method by which they will be determined; and

(g) conditions under which the seller may retain or acquire a security interest in property to secure the balances resulting from sales made pursuant to the revolving charge account, and a description of the interest or interests which may be retained or acquired.

(2) If there is an outstanding balance owing at the end of the billing cycle or if a credit service charge is made with respect to the billing cycle, the seller shall give to the buyer the following information within a reasonable time after the end of the billing cycle:

(a) outstanding balance at the beginning of the billing cycle;

(b) cash price and date of each sale during the billing cycle and, unless previously furnished, a brief description or identification of the goods or services sold;

(c) amount credited to the account during the billing cycle;

(d) amount of credit service charge and additional charges debited during the billing cycle, with an itemization or explanation to show the total amount of credit service charge, if any, due to the application of one or more periodic percentages and the amount, if any, imposed as a minimum charge;

(e) the periodic percentage used to calculate the credit service charge; if more than one periodic percentage is used, each percentage and the amount of the balance to which each applies;

(f) the balance on which the credit service charge is computed and a statement of how the balance is determined; if the balance is determined without first deducting all amounts credited during the period, that fact and the amounts credited shall also be stated;

(g) if the credit service charge for the billing cycle exceeds 50¢ for a monthly or longer billing cycle, or the pro rata part of 50¢ for a billing cycle shorter than monthly, the credit service charge expressed as an annual percentage rate (paragraph (b) of subsection (2) of Section 2.304); if more than one periodic percentage is used to calculate the credit service charge, the seller may, in lieu of stating a single annual percentage rate, state more than one annual percentage rate and the amount of the balance to which each annual percentage rate applies;

(h) if the credit service charge for the billing cycle does not exceed 50¢ for a monthly or longer billing cycle, or the pro rata part of 50¢ for a billing cycle shorter than monthly, the corresponding nominal annual percentage rate (subsection (3) of Section 2.304);

(i) if the seller elects, the average effective annual percentage rate of return or the projected rate as prescribed in paragraph (e) of subsection (1);

(j) outstanding balance at the end of the billing cycle; and

(k) date by which or period within which payment must be made to avoid additional credit service charges.

COMMENT

1. This section is derived in part from CCPA Section 127.

2. If the balance on which the charge is calculated is $750 and the creditor's monthly percentages are 1½% on the first $500 and 1% on the remainder, he would state the corresponding nominal annual percentage rates as 18% on the first $500 and 12% on the remaining $250.

[¶ 845] Consumer Leases

Sec. 2.311. With respect to a consumer lease the lessor shall give to the lessee the following information:

(1) brief description or identification of the goods;

(2) amount of any payment required at the inception of the lease;

(3) amount paid or payable for official fees, registration, certificate of title, or license fees or taxes;

(4) amount of other charges not included in the periodic payments and a brief description of the charges;

(5) brief description of insurance to be provided or paid for by the lessor, including the types and amounts of the coverages;

(6) number of periodic payments, the amount of each payment, the due date of the first payment, the due dates of subsequent payments or interval between payments, and the total amount payable by the lessee;

(7) statement of the conditions under which the lessee may terminate the lease prior to the end of the term; and

(8) statement of the liabilities the lease imposes upon the lessee at the end of the term.

[¶ 846] Content of Periodic Statements

Sec. 2.312. The Administrator may by rule require a creditor who transmits periodic statements in connection with any consumer credit sale, not made pursuant to a revolving charge account, to set forth in each statement each of the following items:

(1) the annual percentage rate of the credit service charge with respect to each consumer credit sale to which the statement relates;

(2) the date by which or the period, if any, within which payment must be made in order to avoid further credit service charges or other charges; and

(3) the other items set forth in the provisions on disclosure with respect to revolving charge accounts (subsection (2) of Section 2.310) appropriate to the terms and conditions under which the consumer credit sale is made.

COMMENT

Since this section, derived from CCPA Section 126, may not be in the best interests of consumers, it becomes operative only upon a ruling by the Administrator.

[¶ 847] Advertising

Sec. 2.313. (1) No seller or lessor shall engage in this State in false or misleading advertising concerning the terms or conditions of credit with respect to a consumer credit sale or consumer lease.

(2) Without limiting the generality of subsection (1) and without requiring a statement of rate of credit service charge if the credit service charge is not more than $5 when the amount financed does not exceed $75 or more than $7.50 when the amount financed exceeds $75, an advertisement with respect to a consumer credit sale made by the posting of a public sign, or by catalog, magazine, newspaper, radio, television, or similar mass media, is misleading if

(a) it states the rate of credit service charge and the rate is not stated in the form required by the provisions on calculation of rate to be disclosed (Section 2.304), or

(b) it states the dollar amounts of the credit service charge or instalment payments, and does not also state the rate of any credit service charge and the number and amount of the instalment payments.

(3) In this section a catalog or other multiple-page advertisement is considered a single advertisement if it clearly and conspicuously displays a credit terms table setting forth the information required by this section.

(4) This section imposes no liability on the owner or personnel, as such, of any medium in which an advertisement appears or through which it is disseminated.

(5) Advertising which complies with the Federal Consumer Credit Protection Act does not violate subsection (2).

PART 4.—LIMITATIONS ON AGREEMENTS AND PRACTICES

[¶ 848] Scope

Sec. 2.401. This Part applies to consumer credit sales and consumer leases.

[¶ 849] Use of Multiple Agreements

Sec. 2.402. A seller may not use multiple agreements with intent to obtain a higher credit service charge than would otherwise be permitted by this Article or to avoid disclosure of an annual percentage rate pursuant to the provisions on disclosure and advertising (Part 3). The excess amount of credit service charge provided for in agreements in violation of this section is an excess charge for the purposes of the provisions on the effect of violations on rights of parties (Section 5.202) and the provisions on civil actions by Administrator (Section 6.113).

[¶ 850] Certain Negotiable Instruments Prohibited

Sec. 2.403. In a consumer credit sale or consumer lease, other than a sale or lease primarily for an agricultural purpose, the seller or lessor may not take a negotiable instrument other than a check as evidence of the obligation of the buyer or lessee. A holder is not in good faith if he takes a negotiable instrument with notice that it is issued in violation of this section. A holder in due course is not subject to the liabilities set forth in the provisions on the effect of violations on rights of parties (Section 5.202) and the provisions on civil actions by Administrator (Section 6.113)

COMMENT

Since the prohibition against negotiable notes in consumer financing will be well known in the financial community after enactment of this Act, professional financers buying consumer paper will normally not qualify as holders in due course with respect to notes taken by dealers in violation of this section and negotiated to them. However, it is possible that in rare cases second or third takers may not know of an instrument's consumer origin; in this unusual situation the policy favoring negotiability is upheld in order not to cast a cloud over negotiable instruments generally. A person who takes a negotiable note in violation of this section is subject to Sections 5.202 and 6.113.

[¶ 851] Assignee Subject to Defenses

Sec. 2.404. *Alternative A:* With respect to a consumer credit sale or consumer lease, other than a sale or lease primarily for an agricultural purpose, an assignee of the rights of the seller or lessor is subject to all claims and defenses of the buyer or lessee against the seller or lessor arising out of the sale or lease notwithstanding an agreement to the contrary, but the assignee's liability under this section may not exceed the amount owing to the assignee at the time the claim or defense is asserted against the assignee. Rights of the buyer or lessee under this section can only be asserted as a matter of defense to or set-off against a claim by the assignee.

[¶ 852] When Assignee Not Subject to Defenses

Sec. 2.404. *Alternative B:* (1) With respect to a consumer credit sale or consumer lease, other than a sale or lease primarily for an agricultural purpose, an agreement by the buyer or lessee not to assert against an assignee a claim or defense arising out of the sale or lease is enforceable only by an assignee not related to the seller or lessor who acquires the buyer's or lessee's contract in good faith and for value, who gives the buyer or lessee notice of the assignment as provided in this section and who, within 3 months after the mailing of the notice of assignment, receives no written notice of the facts giving rise to the buyer's or lessee's claim or defense. This agreement is enforceable only with respect to claims or defenses which have arisen before the end of the 3-month period after notice was mailed. The notice of assignment shall be in writing and addressed to the buyer or lessee at his address as stated in the contract, identify the contract, describe the goods or services, state the names of the seller or lessor and buyer or lessee, the name and address of the assignee, the amount payable by the buyer or lessee and the number, amounts and due dates of the instalments, and contain a conspicuous notice to the buyer or lessee that he has 3 months within which to notify the assignee in writing of any complaints, claims or defenses he may have against the seller or lessor and that if written notification of the complaints, claims or defenses is not received by the assignee within the 3-month period, the assignee will have the right to enforce the contract free of any claims or defenses the buyer or lessee may have against the seller or lessor which have arisen before the end of the 3-month period after notice was mailed.

(2) An assignee does not acquire a buyer's or lessee's contract in good faith within the meaning of subsection (1) if the assignee has knowledge or, from his course of dealing with the seller or lessor or his records, notice of substantial complaints by other buyers or lessees of the seller's or lessor's failure or refusal to perform his contracts with them and of the seller's or lessor's failure to remedy his defaults within a reasonable time after the assignee notifies him of the complaints.

(3) To the extent that under this section an assignee is subject to claims or defenses of the buyer or lessee against the seller or lessor, the assignee's liability under this section may not exceed the amount owing to the assignee at the time the claim or defense is asserted against the assignee and rights of the buyer or lessee under this section can only be asserted as a matter of defense to or set-off against a claim by the assignee.

[¶ 853] Balloon Payments

Sec. 2.405. With respect to a consumer credit sale, other than one primarily for an agricultural purpose or one pursuant to a revolving charge account, if any scheduled payment is more than twice as large as the average of earlier scheduled payments, the buyer has the right to refinance the amount of that payment at the time it is due without penalty. The terms of the refinancing shall be no less favorable to the buyer than the terms of the original sale. These provisions do not apply to the extent that the payment schedule is adjusted to the seasonal or irregular income of the buyer.

[¶ 854] Restriction on Liability in Consumer Lease

Sec. 2.406. The obligation of a lessee upon expiration of a consumer lease, other than one primarily for an agricultural purpose, may not exceed twice the average payment allocable to a monthly period under the lease. This

limitation does not apply to charges for damages to the leased property or for other default.

[¶ 855] Security in Sales or Leases

Sec. 2.407. (1) With respect to a consumer credit sale, a seller may take a security interest in the property sold. In addition, a seller may take a security interest in goods upon which services are performed or in which goods sold are installed or to which they are annexed, or in land to which the goods are affixed or which is maintained, repaired or improved as a result of the sale of the goods or services, if in the case of a security interest in land the debt secured is $1,000 or more, or, in the case of a security interest in goods the debt secured is $300 or more. The seller may also take a security interest in any property of the buyer to secure the debt arising from a consumer credit sale primarily for an agricultural purpose. Except as provided with respect to cross-collateral (Section 2.408), a seller may not otherwise take a security interest in property of the buyer to secure the debt arising from a consumer credit sale.

(2) With respect to a consumer lease other than a lease primarily for an agricultural purpose, a lessor may not take a security interest in property of the lessee to secure the debt arising from the lease.

(3) A security interest taken in violation of this section is void.

(4) The amounts of $1,000 and $300 in subsection (1) are subject to change pursuant to the provisions on adjustment of dollar amounts (Section 1.106).

[¶ 856] Cross-Collateral

Sec. 2.408. (1) In addition to contracting for a security interest pursuant to the provisions on security in sales or leases (Section 2.407), a seller in a consumer credit sale may secure the debt arising from the sale by contracting for a security interest in other property if as a result of a prior sale the seller has an existing security interest in the other property. The seller may also contract for a security interest in the property sold in the subsequent sale as security for the previous debt.

(2) If the seller contracts for a security interest in other property pursuant to this section, the rate of credit service charge thereafter on the aggregate unpaid balances so secured may not exceed that permitted if the balances so secured were consolidated pursuant to the provisions on consolidation involving a refinancing (subsection (1) of Section 2.206). The seller has a reasonable time after so contracting to make any adjustments required by this section. "Seller" in this section does not include an assignee not related to the original seller.

[¶ 857] Debt Secured by Cross-Collateral

Sec. 2.409. (1) If debts arising from two or more consumer credit sales, other than sales primarily for an agricultural purpose or pursuant to a revolving charge account, are secured by cross-collateral (Section 2.408) or consolidated into one debt payable on a single schedule of payments, and the debt is secured by security interests taken with respect to one or more of the sales, payments received by the seller after the taking of the cross-collateral or the consolidation are deemed, for the purpose of determining the amount of the debt secured by the various security interests, to have been first applied to the

payment of the debts arising from the sales first made. To the extent debts are paid according to this section, security interests in items of property terminate as the debts originally incurred with respect to each item is paid.

(2) Payments received by the seller upon a revolving charge account are deemed, for the purpose of determining the amount of the debt secured by the various security interests, to have been applied first to the payment of credit service charges in the order of their entry to the account and then to the payment of debts in the order in which the entries to the account showing the debts were made.

(3) If the debts consolidated arose from two or more sales made on the same day, payments received by the seller are deemed, for the purpose of determining the amount of the debt secured by the various security interests, to have been applied first to the payment of the smallest debt.

COMMENT

Subsection (1) states the first-in-first-out rule for consolidations and subsection (2) applies the same principle to revolving charge accounts. Subsection (3) covers the case in which the buyer purchases a $750 TV in one department at 9:30 a. m. and a $150 typewriter in another department at 10:00 a. m. Subsequently the debts are consolidated. This subsection relieves the seller of having to keep records of the exact hour a sale is made. It is derived from Consumer Credit Protection Act Section 128(d).

[¶ 858] No Assignment of Earnings

Sec. 2.410. A seller or lessor may not take an assignment of earnings of the buyer or lessee for payment or as security for payment of a debt arising out of a consumer credit sale or a consumer lease. An assignment of earnings in violation of this section is unenforceable by the assignee of the earnings and revocable by the buyer or lessee. This section does not prohibit an employee from authorizing deductions from his earnings if the authorization is revocable.

[¶ 859] Referral Sales

Sec. 2.411. With respect to a consumer credit sale or consumer lease the seller or lessor may not give or offer to give a rebate or discount or otherwise pay or offer to pay value to the buyer or lessee as an inducement for a sale or lease in consideration of his giving to the seller or lessor the names of prospective purchasers or lessees, or otherwise aiding the seller or lessor in making a sale or lease to another person, if the earning of the rebate, discount or other value is contingent upon the occurrence of an event subsequent to the time the buyer or lessee agrees to buy or lease. If a buyer or lessee is induced by a violation of this section to enter into a consumer credit sale or consumer lease, the agreement is unenforceable by the seller or lessor and the buyer or lessee, at his option, may rescind the agreement or retain the goods delivered and the benefit of any services performed, without any obligation to pay for them.

[¶ 860] Notice of Assignment

Sec. 2.412. The buyer or lessee is authorized to pay the original seller or lessor until the buyer or lessee receives notification of assignment of the rights to payment pursuant to a consumer credit sale or consumer lease and that payment is to be made to the assignee. A notification which does not reasonably identify the rights assigned is ineffective. If requested by the buyer or

lessee, the assignee must seasonably furnish reasonable proof that the assignment has been made and unless he does so the buyer or lessee may pay the seller or lessor.

COMMENT

This section is derived from UCC Section 9-318(3).

[¶ 861] Attorney's Fees

Alternative A:

Sec. 2.413. With respect to a consumer sale or consumer lease the agreement may not provide for the payment by the buyer or lessee of attorney's fees. A provision in violation of this section is unenforceable.

[¶ 862] Attorney's Fees

Alternative B:

Sec. 2.413. With respect to a consumer credit sale or consumer lease the agreement may provide for the payment by the buyer or lessee of reasonable attorney's fees not in excess of 15 per cent of the unpaid debt after default and referral to an attorney not a salaried employee of the seller, or of the lessor or his assignee. A provision in violation of this section is unenforceable.

[¶ 863] Limitation on Default Charges

Sec. 2.414. Except for reasonable expenses incurred in realizing on a security interest, the agreement with respect to a consumer credit sale may not provide for any charges as a result of default by the buyer other than those authorized by this Act. A provision in violation of this section is unenforceable.

[¶ 864] Authorization to Confess Judgment Prohibited

Sec. 2.415. A buyer or lessee may not authorize any person to confess judgment on a claim arising out of a consumer credit sale or consumer lease. An authorization in violation of this section is void.

[¶ 865] Change in Terms of Revolving Charge Accounts

Sec. 2.416. (1) If a seller makes a change in the terms of a revolving charge account without complying with this section any additional cost or charge to the buyer resulting from the change is an excess charge and subject to the remedies available to debtors (Section 5.202) and to the Administrator (Section 6.113).

(2) A seller may change the terms of a revolving charge account whether or not the change is authorized by prior agreement. Except as provided in subsection (3), the seller shall give to the buyer written notice of any change at least three times, with the first notice at least six months before the effective date of the change.

(3) The notice specified in subsection (2) is not required if

(a) the buyer after receiving notice of the change agrees in writing to the change;

(b) the buyer elects to pay an amount designated on a billing statement (subsection (2) of Section 2.310) as including a new charge for a

benefit offered to the buyer when the benefit and charge constitute the charge in terms and when the billing statement also states the amount payable if the new charge is excluded;

(c) the change involves no significant cost to the buyer;

(d) the buyer has previously consented in writing to the kind of change made and notice of the change is given to the buyer in two billing cycles prior to the effective date of the change; or

(e) the change applies only to purchases made or obligations incurred after a date specified in a notice of the change given in two billing cycles prior to the effective date of the change.

(4) The notice provided for in this section is given to the buyer when mailed to him at the address used by the seller for sending periodic billing statements.

PART 5—HOME SOLICITATION SALES

[¶ 866] Definition: "Home Solicitation Sale"

Sec. 2.501. "Home solicitation sale" means a consumer credit sale of goods, other than farm equipment, or services in which the seller or a person acting for him engages in a personal solicitation of the sale at a residence of the buyer and the buyer's agreement or offer to purchase is there given to the seller or a person acting for him. It does not include a sale made pursuant to a preexisting revolving charge account, or a sale made pursuant to prior negotiations between the parties at a business establishment at a fixed location where goods or services are offered or exhibited for sale.

[¶ 867] Buyer's Right to Cancel

Sec. 2.502. (1) Except as provided in subsection (5), in addition to any right otherwise to revoke an offer, the buyer has the right to cancel a home solicitation sale until midnight of the third business day after the day on which the buyer signs an agreement or offer to purchase which complies with this Part.

(2) Cancellation occurs when the buyer gives written notice of cancellation to the seller at the address stated in the agreement or offer to purchase.

(3) Notice of cancellation, if given by mail, is given when it is deposited in a mailbox properly addressed and postage prepaid.

(4) Notice of cancellation given by the buyer need not take a particular form and is sufficient if it indicates by any form of written expression the intention of the buyer not to be bound by the home solicitation sale.

(5) The buyer may not cancel a home solicitation sale if the buyer requests the seller to provide goods or services without delay because of an emergency, and

(a) the seller in good faith makes a substantial beginning of performance of the contract before the buyer gives notice of cancellation, and

(b) in the case of goods, the goods cannot be returned to the seller in substantially as good condition as when received by the buyer.

(6) If a home solicitation sale is also subject to the provisions on debtors' right to rescind certain transactions (Section 5.204), the buyer may proceed either under those provisions or under this Part.

[¶ 868] Form of Agreement or Offer; Statement of Buyer's Rights

Sec. 2.503. (1) In a home solicitation sale, unless the buyer requests the seller to provide goods or services without delay in an emergency, the seller must present to the buyer and obtain his signature to a written agreement or offer to purchase which designates as the date of the transaction the date on which the buyer actually signs and contains a statement of the buyer's rights which complies with subsection (2).

(2) The statement must

(a) appear under the conspicuous caption: "BUYER'S RIGHT TO CANCEL", and

(b) read as follows: "If this agreement was solicited at your residence and you do not want the goods or services, you may cancel this agreement by mailing a notice to the seller. The notice must say that you do not want the goods or services and must be mailed before midnight on the third business day after you sign this agreement. The notice must be mailed to: ———————————————. If you cancel,
(insert name and mailing address of seller)
the seller may keep all or part of your cash down payment."

(3) Until the seller has complied with this section the buyer may cancel the home solicitation sale by notifying the seller in any manner and by any means of his intention to cancel.

[¶ 869] Restoration of Down Payment; Retention of Cancellation Fee

Sec. 2.504. (1) Except as provided in this section, within 10 days after a home solicitation sale has been cancelled or an offer to purchase revoked the seller must tender to the buyer any payments made by the buyer and any note or other evidence of indebtedness.

(2) If the down payment includes goods traded in, the goods must be tendered in substantially as good condition as when received by the seller. If the seller fails to tender the goods as provided by this section, the buyer may elect to recover an amount equal to the trade-in allowance stated in the agreement.

(3) The seller may retain as a cancellation fee 5 per cent of the cash price but not exceeding the amount of the cash down payment. If the seller fails to comply with an obligation imposed by this section, or if the buyer avoids the sale on any ground independent of his right to cancel provided by the provisions on the buyer's right to cancel (subsection (1) of Section 2.502) or revokes his offer to purchase, the seller is not entitled to retain a cancellation fee.

(4) Until the seller has complied with the obligations imposed by this section the buyer may retain possession of goods delivered to him by the seller and has a lien on the goods in his possession or control for any recovery to which he is entitled.

[¶ 870] Duty of Buyer; No Compensation for Services Prior to Cancellation

Sec. 2.505. (1) Except as provided by the provisions on retention of goods by the buyer (subsection (4) of Section 2.504), within a reasonable time after a home solicitation sale has been cancelled or an offer to purchase

revoked, the buyer upon demand must tender to the seller any goods delivered by the seller pursuant to the sale but he is not obligated to tender at any place other than his residence. If the seller fails to demand possession of goods within a reasonable time after cancellation or revocation, the goods become the property of the buyer without obligation to pay for them. For the purpose of this section, 40 days is presumed to be a reasonable time.

(2) The buyer has a duty to take reasonable care of the goods in his possession both before cancellation or revocation and for a reasonable time thereafter, during which time the goods are otherwise at the seller's risk.

(3) If the seller has performed any services pursuant to a home solicitation sale prior to its cancellation, the seller is entitled to no compensation except the cancellation fee provided in this Part.

PART 6—SALES OTHER THAN CONSUMER CREDIT SALES

[¶ 871] Sales Subject to Act by Agreement of Parties

Sec. 2.601. The parties to a sale other than a consumer credit sale may agree in a writing signed by the parties that the sale is subject to the provisions of this Act applying to consumer credit sales. If the parties so agree the sale is a consumer credit sale for the purposes of this Act.

[¶ 872] Definition: "Consumer Related Sale"; Rate of Credit Service Charge

Sec. 2.602. (1) A "consumer related sale" is a sale of goods, services, or an interest in land which is not subject to the provisions of this Act applying to consumer credit sales and in which the amount financed does not exceed $25,000 if

(a) the buyer is a person other than an organization; or

(b) the debt is secured primarily by a security interest in a one or two family dwelling occupied by a person related to the debtor.

(2) With respect to a consumer related sale not made pursuant to a revolving charge account, the parties may contract for the payment by the buyer of an amount comprising the amount financed and a credit service charge not in excess of 18 per cent per year calculated according to the United States rule on the unpaid balances of the amount financed.

(3) With respect to a consumer related sale made pursuant to a revolving charge account, the parties may contract for the payment of a credit service charge not in excess of that permitted by the provisions on credit service charge for revolving charge accounts (Section 2.207).

(4) The amount of $25,000 in subsection (1) is subject to change pursuant to the provisions on adjustment of dollar amounts (Section 1.106).

COMMENT

This section imposes a rate ceiling on certain sales not subject to the rate ceilings for consumer credit sales. The principal cases covered are (1) credit sales by a seller not regularly engaged in similar credit transactions, (2) credit sales to persons for a business purpose, and (3) sales of one or two family dwellings to an organization where the dwelling is occupied by an individual related to the organization. The ceiling does not apply if the amount financed exceeds $25,000 or, except in the dwelling case, if the debtor is an organization.

[¶ 873] Applicability of Other Provisions to Consumer Related Sales

Sec. 2.603. Except for the rate of the credit service charge and the rights to prepay and to rebate upon prepayment, the provisions of Part 2 of this Article apply to a consumer related sale.

[¶ 874] Limitation on Default Charges in Consumer Related Sales

Sec. 2.604. (1) The agreement with respect to a consumer related sale may provide for only the following charges as a result of the buyer's default:

(a) reasonable attorney's fees and reasonable expenses incurred in realizing on a security interest;

(b) deferral charges not in excess of 18 per cent per year of the amount deferred for the period of deferral; and

(c) other charges that could have been made had the sale been a consumer credit sale.

(2) A provision in violation of this section is unenforceable.

[¶ 875] Credit Service Charge for Other Sales

Sec. 2.605. With respect to a sale other than a consumer credit sale or a consumer related sale, the parties may contract for the payment by the buyer of any credit service charge.

COMMENT

See Section 5.107—Extortionate Extensions of Credit.

Article 3—Loans

PART 1—GENERAL PROVISIONS

[¶ 876] Short Title

Sec. 3.101. This Article shall be known and may be cited as Uniform Consumer Credit Code—Loans.

[¶ 877] Scope

Sec. 3.102. This Article applies to consumer loans, including regulated and supervised loans; in addition Part 6 applies to consumer related loans.

[¶ 878] Definitions in Article

Sec. 3.103. The following definitions apply to this Act and appear in this Article as follows:

"Annual percentage rate"	Section 3.304(2)
"Business collateral"	Section 3.105
"Consumer loan"	Section 3.104
"Consumer related loan"	Section 3.602(1)
"Corresponding nominal annual percentage rate"	Section 3.304(3)
"Lender"	Section 3.107(1)
"Loan"	Section 3.106
"Loan finance charge"	Section 3.109
"Precomputed"	Section 3.107(2)
"Principal"	Section 3.107(3)
"Regulated lender"	Section 3.501(2)
"Regulated loan"	Section 3.501(1)
"Revolving loan account"	Section 3.108
"Supervised lender"	Section 3.501(4)
"Supervised loan"	Section 3.501(3)

[¶ 879] Definition: "Consumer Loan"

Sec. 3.104. (1) Except as provided in subsection (2), "consumer loan" is a loan made by a person regularly engaged in the business of making loans in which

(a) the debtor is a person other than an organization;

(b) the debt is incurred primarily for a personal, family, household, or agricultural purpose;

(c) either the debt is payable in instalments or a loan finance charge is made; and

(d) either the principal does not exceed $25,000 or the debt is secured by an interest in land.

(2) Unless the loan is made subject to this Act by agreement (Section 3.601), "consumer loan" does not include a loan which is secured primarily by

(a) business collateral, if at the time the loan is made the value of this collateral is substantial in relation to the amount of the loan, or,

(b) except as provided with respect to disclosure (Section 3.301) and debtors' remedies (Section 5.201), an interest in land, if at the time the loan is made the value of this collateral is substantial in relation to the amount of the loan, and the loan finance charge does not exceed 10 per cent per year calculated according to the United States rule on the unpaid balances of the principal on the assumption that the debt will be paid according to the agreed terms and will not be paid before the end of the agreed term.

(3) The amount of $25,000 in subsection (1) is subject to change pursuant to the provisions on adjustment of dollar amount (Section 1.106).

COMMENT

The purpose of subsection (2)(b) is to exclude the ordinary home mortgage from all provisions of this Act except the rate provisions; however, the Act is intended to include as a consumer loan the high rate loans which are characteristic of the second mortgage small loan business. Because the ordinary home mortgage invariably has a loan finance charge below 10 per cent, the exclusion has been based on the amount of the loan finance charge.

[¶ 880] Definition: "Business Collateral"

Sec. 3.105. "Business collateral" means an interest in land used primarily for other than a personal, family, household, or agricultural purpose, or accounts or contract rights other than earnings, business equipment, chattel paper, documents of title, instruments, inventory, or business general intangibles. Business equipment does not include farm equipment.

[¶ 881] Definition: "Loan"

Sec. 3.106. "Loan" includes

(1) the creation of debt by the lender's payment of or agreement to pay money to the debtor or to a third party for the account of the debtor;

(2) the creation of debt by a credit to an account with the lender upon which the debtor is entitled to draw immediately;

(3) the creation of debt pursuant to a lender credit card or similar arrangement; and

(4) the forbearance of debt arising from a loan.

[¶ 882] Definitions: "Lender"; "Precomputed"; "Principal"

Sec. 3.107. (1) Except as otherwise provided, "lender" includes an assignee of the lender's right to payment but use of the term does not in itself impose on an assignee any obligation of the lender with respect to events occurring before the assignment.

(2) A loan, refinancing, or consolidation is "precomputed" if the debt is expressed as a sum comprising the principal and the amount of the loan finance charge computed in advance.

(3) "Principal" of a loan means the total of

(a) the net amount paid to, receivable by, or paid or payable for the account of the debtor,

(b) the amount of any discount excluded from the loan finance charge (subsection (2) of Section 3.109), and,

(c) to the extent that payment is deferred,

(i) amounts actually paid or to be paid by the lender for registration, certificate of title, or license fees if not included in (a), and

(ii) additional charges permitted by this Article (Section 3.202).

[¶ 883] Definition: "Revolving Loan Account"

Sec. 3.108. "Revolving loan account" means an arrangement between a lender and a debtor pursuant to which (1) the lender may permit the debtor to obtain loans from time to time, (2) the unpaid balances of principal and the loan finance and other appropriate charges are debited to an account, (3) a loan finance charge if made is not precomputed but is computed on the outstanding unpaid balances of the debtor's account from time to time, and (4) the debtor has the privilege of paying the balances in instalments.

COMMENT

The usual use of the revolving loan account in consumer transactions is in connection with lender credit cards or check credit plans.

[¶ 884] Definition: "Loan Finance Charge"

Sec. 3.109. (1) "Loan finance charge" means the sum of (a) all charges payable directly or indirectly by the debtor and imposed directly or indirectly by the lender as an incident to the extension of credit, including any of the following types of charges which are applicable: interest or any amount payable under a point, discount, or other system of charges, however denominated, premium or other charge for any guarantee or insurance protecting the lender against the debtor's default or other credit loss; and (b) charges incurred for investigating the collateral or credit-worthiness of the debtor or for commissions or brokerage for obtaining the credit, irrespective of the person to whom the charges are paid or payable unless the lender had no notice of the charges when the loan was made. The term does not include charges as a result of default, additional charges (Section 3.202), delinquency charges (Section 3.203), or deferral charges (Section 3.204).

(2) If a lender makes a loan to a debtor by purchasing or satisfying obligations of the debtor pursuant to a lender credit card or similar arrangement, and the purchase or satisfaction is made at less than the face amount of the obligation, the discount is not part of the loan finance charge.

PART 2—MAXIMUM CHARGES

[¶ 885] Loan Finance Charge for Consumer Loans other than Supervised Loans

Sec. 3.201. (1) With respect to a consumer loan other than a supervised loan (Section 3.501), a lender may contract for and receive a loan finance charge, calculated according to the United States rule, not exceeding 18 per cent per year on the unpaid balances of the principal.

(2) This section does not limit or restrict the manner of contracting for the loan finance charge, whether by way of add-on, discount, or otherwise,

so long as the rate of the loan finance charge does not exceed that permitted by this section. If the loan is precomputed,

(a) the loan finance charge may be calculated on the assumption that all scheduled payments will be made when due, and

(b) the effect of prepayment is governed by the provisions on rebate upon prepayment (Section 3.210).

(3) For the purposes of this section, the term of a loan commences with the date the loan is made. Differences in the lengths of months are disregarded and a day may be counted as 1/30th of a month. Subject to classifications and differentiations the lender may reasonably establish, a part of a month in excess of 15 days may be treated as a full month if periods of 15 days or less are disregarded and if that procedure is not consistently used to obtain a greater yield than would otherwise be permitted.

(4) With respect to a consumer loan made pursuant to a revolving loan account

(a) the loan finance charge shall be deemed not to exceed 18 per cent per year if the loan finance charge contracted for and received does not exceed a charge in each monthly billing cycle which is 1½ per cent of an amount no greater than

(i) the average daily balance of the debt,

(ii) the unpaid balance of the debt on the same day of the billing cycle, or

(iii) the median amount within a specified range within which the average daily balance or the unpaid balance of the debt, on the same day of the billing cycle, is included; a charge may be made pursuant to this subparagraph only if the lender, subject to the classifications and differentiations he may reasonably establish, makes the same charge on all balances within a specified range and if the percentage when applied to the median amount within the range does not produce a charge exceeding the charge resulting from applying that percentage to the lowest amount within the range by more than 8 per cent of the charge on the median amount; for the purposes of this subparagraph and subparagraph (ii), a variation of not more than 4 days from month to month is "the same day of the billing cycle";

(b) if the billing cycle is not monthly, the loan finance charge shall be deemed not to exceed 18 per cent per year if the loan finance charge contracted for and received does not exceed a percentage which bears the same relation to 1½ per cent as the number of days in the billing cycle bears to 30; and

(c) notwithstanding subsection (1), if there is an unpaid balance on the date as of which the loan finance charge is applied, a charge not exceeding 50¢ may be made if the billing cycle is monthly or longer, or the pro rata part of 50¢ which bears the same relation to 50¢ as the number of days in the billing cycle bears to 30, if the billing cycle is shorter than monthly, but no charge may be made pursuant to this paragraph if the lender has made an annual charge for the same period as permitted by the provisions on additional charges (paragraph (c) of subsection (1) of Section 3.202) .

[¶ 886] Additional Charges

Sec. 3.202. (1) In addition to the loan finance charge permitted by this Part, a lender may contract for and receive the following additional charges in connection with a consumer loan:

(a) official fees and taxes;

(b) charges for insurance as described in subsection (2);

(c) annual charges, payable in advance, for the privilege of using a lender credit card or similar arrangement which entitles the user to purchase goods or services from at least 100 persons not related to the issuer of the lender credit card or similar arrangement, under an arrangement pursuant to which the debts resulting from the purchases are payable to the issuer; and

(d) charges for other benefits, including insurance, conferred on the debtor, if the benefits are of value to him apart from the granting of the credit, the charges are reasonable in relation to the benefits, and the Administrator has by rule determined that the charges are permissible additional charges.

(2) An additional charge may be made for insurance written in connection with the loan, other than insurance protecting the lender against the debtor's default or other credit loss,

(a) with respect to insurance against loss of or damage to property, or against liability, if the lender furnishes a clear and specific statement in writing to the debtor, setting forth the cost of the insurance if obtained from or through the lender, and stating that the debtor may choose the person through which the insurance is to be obtained; and,

(b) with respect to consumer credit insurance providing life, accident, or health coverage, if the insurance coverage is not a factor in the approval by the lender of the extension of credit, and this fact is clearly disclosed in writing to the debtor, and if in order to obtain the insurance in connection with the extension of credit, the debtor gives specific affirmative written indication of his desire to do so after written disclosure to him of the cost thereof.

(3) For the purposes of the Part on Disclosure and Advertising (Part 3), if the loan finance charge with respect to a loan primarily secured by an interest in land does not exceed 10 per cent per year (paragraph (b) of subsection (2) of Section 3.104), reasonable closing costs even though not within subsection (1) may be treated as additional charges.

COMMENT

See Comment to Section 2.202.

[¶ 887] Delinquency Charges

Sec. 3.203. (1) With respect to a precomputed consumer loan, refinancing, or consolidation, the parties may contract for a delinquency charge on any instalment not paid in full within 10 days after its scheduled due date in an amount not exceeding the greater of

(a) an amount, not exceeding $5, which is 5 per cent of the unpaid amount of the instalment, or

(b) the deferral charge (subsection (1) of Section 3.204) that would be permitted to defer the unpaid amount of the instalment for the period that it is delinquent.

(2) A delinquency charge under paragraph (a) of subsection (1) may be collected only once on an instalment however long it remains in default. No delinquency charge may be collected if the instalment has been deferred and a deferral charge (Section 3.204) has been paid or incurred. A delinquency charge may be collected at the time it accrues or at any time thereafter.

(3) No delinquency charge may be collected on an instalment which is paid in full within 10 days after its scheduled instalment due date even though an earlier maturing instalment or a delinquency charge on an earlier instalment may not have been paid in full. For purposes of this subsection payments are applied first to current instalments and then to delinquent instalments.

(4) If two instalments or parts thereof of a precomputed loan are in default for 10 days or more, the lender may elect to convert the loan from a precomputed loan to one in which the loan finance charge is based on unpaid balances. In this event he shall make a rebate pursuant to the provisions on rebate upon prepayment (Section 3.210) as of the maturity date of the first delinquent instalment, and thereafter may make a loan finance charge as authorized by the provisions on loan finance charge for consumer loans (Section 3.201) or the provisions on loan finance charge for supervised loans (Section 3.508), whichever is appropriate. The amount of the rebate shall not be reduced by the amount of any permitted minimum charge (Section 3.210). If the lender proceeds under this subsection, any delinquency or deferral charges made with respect to instalments due at or after the maturity date of the first delinquent instalment shall be rebated, and no further delinquency or deferral charges shall be made.

(5) The amount of $5 in subsection (1) is subject to change pursuant to the provisions on adjustment of dollar amounts (Section 1.106).

COMMENT

See Comment to Section 2.203.

[¶ 886] Deferral Charges

Sec. 3.204. (1) With respect to a precomputed consumer loan, refinancing, or consolidation, the parties before or after default may agree in writing to a deferral of all or part of one or more unpaid instalments, and the lender may make and collect a charge not exceeding the rate previously stated to the debtor pursuant to the provisions on disclosure (Part 3) applied to the amount or amounts deferred for the period of deferral calculated without regard to difference in the lengths of months, but proportionally for a part of a month, counting each day as 1/30 of a month. A deferral charge may be collected at the time it is assessed or at any time thereafter.

(2) The lender may, in addition to the deferral charge, make appropriate additional charges (Section 3.202), and the amount of these charges which is not paid in cash may be added to the amount deferred for the purpose of calculating the deferral charge.

(3) The parties may agree in writing at the time of a precomputed consumer loan, refinancing, or consolidation that if an instalment is not paid within 10 days after its due date, the lender may unilaterally grant a deferral and

make charges as provided in this section. No deferral charge may be made for a period after the date that the lender elects to accelerate the maturity of the agreement.

(4) A delinquency charge made by the lender on an instalment may not be retained if a deferral charge is made pursuant to this section with respect to the period of delinquency.

[¶ 889] Loan Finance Charge on Refinancing

Sec. 3.205. With respect to a consumer loan, refinancing, or consolidation, the lender may by agreement with the debtor refinance the unpaid balance and may contract for and receive a loan finance charge based on the principal resulting from the refinancing at a rate not exceeding that permitted by the provisions on loan finance charge for consumer loans (Section 3.201) or the provisions on loan finance charge for supervised loans (Section 3.508), whichever is appropriate. For the purpose of determining the loan finance charge permitted, the principal resulting from the refinancing comprises the following:

(1) if the transaction was not precomputed, the total of the unpaid balance and the accrued charges on the date of the refinancing, or, if the transaction was precomputed, the amount which the debtor would have been required to pay upon prepayment pursuant to the provisions on rebate upon prepayment (Section 3.210) on the date of refinancing, except that for the purpose of computing this amount no minimum charge (Section 3.210) shall be allowed; and

(2) appropriate additional charges (Section 3.202), payment of which is deferred.

[¶ 890] Loan Finance Charge on Consolidation

Sec. 3.206. (1) If a debtor owes an unpaid balance to a lender with respect to a consumer loan, refinancing, or consolidation, and becomes obligated on another consumer loan, refinancing, or consolidation with the same lender, the parties may agree to a consolidation resulting in a single schedule of payments. If the previous consumer loan, refinancing, or consolidation was not precomputed, the parties may agree to add the unpaid amount of principal and accrued charges on the date of consolidation to the principal with respect to the subsequent loan. If the previous consumer loan, refinancing, or consolidation was precomputed, the parties may agree to refinance the unpaid balance pursuant to the provisions on refinancing (Section 3.205) and to consolidate the principal resulting from the refinancing by adding it to the principal with respect to the subsequent loan. In either case the lender may contract for and receive a loan finance charge based on the aggregate principal resulting from the consolidation at a rate not in excess of that permitted by the provisions on loan finance charge for consumer loans (Section 3.201) or the provisions on loan finance charge for supervised loans (Section 3.508), whichever is appropriate.

(2) The parties may agree to consolidate the unpaid balance of a consumer loan with the unpaid balance of a consumer credit sale. The parties may agree to refinance the previous unpaid balance pursuant to the provisions on refinancing sales (Section 2.205) or the provisions on refinancing loans (Section 3.205), whichever is appropriate, and to consolidate the amount

financed resulting from the refinancing or the principal resulting from the refinancing by adding it to the amount financed or principal with respect to the subsequent sale or loan. The aggregate amount resulting from the consolidation shall be deemed principal, and the creditor may contract for and receive a loan finance charge based on the principal at a rate not in excess of that permitted by the provisions on loan finance charge for consumer loans (Section 3.201) or the provisions on loan finance charge for supervised loans (Section 3.508), whichever is appropriate.

[¶ 891] Conversion to Revolving Loan Account

Sec. 3.207. The parties may agree to add to a revolving loan account the unpaid balance of a consumer loan, not made pursuant to a revolving loan account, or a refinancing, or consolidation thereof, or the unpaid balance of a consumer credit sale, refinancing or consolidation. For the purpose of this section

(1) the unpaid balance of a consumer loan, refinancing, or consolidation is an amount equal to the principal determined according to the provisions on refinancing (Section 3.205); and

(2) the unpaid balance of a consumer credit sale, refinancing, or consolidation is an amount equal to the amount financed determined according to the provisions on refinancing (Section 2.205).

[¶ 892] Advances to Perform Covenants of Debtor

Sec. 3.208. (1) If the agreement with respect to a consumer loan, refinancing, or consolidation contains covenants by the debtor to perform certain duties pertaining to insuring or preserving collateral and if the lender pursuant to the agreement pays for performance of the duties on behalf of the debtor he may add the amounts paid to the debt. Within a reasonable time after advancing any sums, he shall state to the debtor in writing the amount of the sums advanced, any charges with respect to this amount, and any revised payment schedule, and, if the duties of the debtor performed by the lender pertain to insurance, a brief description of the insurance paid for by the lender including the type and amount of coverages. No further information need be given.

(2) A loan finance charge may be made for sums advanced pursuant to subsection (1) at a rate not exceeding the rate stated to the debtor pursuant to the provisions on disclosure (Part 3) with respect to the loan, refinancing, or consolidation, except that with respect to a revolving loan account the amount of the advance may be added to the unpaid balance of the debt and the lender may make a loan finance charge not exceeding that permitted by the provisions on loan finance charge for consumer loans (Section 3.201) or for supervised loans (Section 3.508), whichever is appropriate.

[¶ 893] Right to Prepay

Sec. 3.209. Subject to the provisions on rebate upon prepayment (Section 3.210), the debtor may prepay in full the unpaid balance of a consumer loan, refinancing, or consolidation at any time without penalty.

[¶ 894] Rebate upon Prepayment

Sec. 3.210. (1) Except as provided in subsection (2), upon prepayment in full of the unpaid balance of a precomputed consumer loan, refinancing, or

consolidation, an amount not less than the unearned portion of the loan finance charge calculated according to this section shall be rebated to the debtor. If the rebate otherwise required is less than $1, no rebate need be made.

(2) Upon prepayment in full of a consumer loan, other than one pursuant to a revolving loan account, a refinancing or consolidation, whether or not precomputed, the lender may collect or retain a minimum charge within the limits stated in this subsection if the loan finance charge earned at the time of prepayment is less than any minimum charge contracted for. The minimum charge may not exceed the amount of loan finance charge contracted for, or $5 in a transaction which had a principal of $75 or less, or $7.50 in a transaction which had a principal of more than $75.

(3) Except as otherwise provided in this subsection with respect to a loan primarily secured by an interest in land, the unearned portion of the loan finance charge is a fraction of the loan finance charge of which the numerator is the sum of the periodic balances scheduled to follow the computational period in which prepayment occurs, and the denominator is the sum of all periodic balances under either the loan agreement or, if the balance owing resulted from a refinancing (Section 3.205) or a consolidation (Section 3.206), under the refinancing agreement or consolidation agreement. In the case of a loan primarily secured by an interest in land, reasonable sums actually paid or payable to persons not related to the lender for customary closing costs included in the loan finance charge are deducted from the loan finance charge before the calculation prescribed by this subsection is made.

COMMENT

Subsection (3), together with paragraph (a) of subsection (4), states the "Rule of 78" with respect to a loan, refinancing or consolidation payable in equal instalments at equal intervals from the date of the loan, refinancing or consolidation to the final scheduled payment date. In the case of such a loan, refinancing or consolidation, "computational period" may be read as "scheduled payment period", and the provisions relating to irregular payment schedules, viz., paragraphs (b), (c) and (d) of subsection (4) and subsection (5), in its entirety, may be disregarded.

(4) In this section

(a) "periodic balance" means the amount scheduled to be outstanding on the last day of a computational period before deducting the payment, if any, scheduled to be made on that day;

(b) "computational period" means one month if one-half or more of the intervals between scheduled payments under the agreement is one month or more, and otherwise means one week;

(c) the "interval" to the due date of the first scheduled instalment or the final scheduled payment date is measured from the date of a loan, refinancing, or consolidation, and includes either the first or last day of the interval;

(d) if the interval to the due date of the first scheduled instalment does not exceed one month by more than 15 days when the computational period is one month, or 11 days when the computational period is one week, the interval shall be considered as one computational period.

(5) This subsection applies only if the schedule of payments is not regular (subsection (6) of Section 3.304).

(a) If the computational period is one month and

(i) if the number of days in the interval to the due date of the first scheduled instalment is less than one month by more than 5 days, or more than one month by more than 5 but not more than 15 days, the unearned loan finance charge shall be increased by an adjustment for each day by which the interval is less than one month and, at the option of the lender, may be reduced by an adjustment for each day by which the interval is more than one month; the adjustment for each day shall be 1/30th of that part of the loan finance charge earned in the computational period prior to the due date of the first scheduled instalment assuming that period to be one month; and

(ii) if the interval to the final scheduled payment date is a number of computational periods plus an additional number of days less than a full month, the additional number of days shall be considered a computational period only if 16 days or more. This subparagraph applies whether or not subparagraph (i) applies.

(b) Notwithstanding paragraph (a), if the computational period is one month, the number of days in the interval to the due date of the first instalment exceeds one month by not more than 15 days, and the schedule of payments is otherwise regular, the lender may, at his option, exclude the extra days and the charge for the extra days in computing the unearned loan finance charge; but if he does so and a rebate is required before the due date of the first scheduled instalment, he shall compute the earned charge for each elapsed day as 1/30th of the amount the earned charge would have been if the first interval had been one month.

(c) If the computational period is one week and

(i) if the number of days in the interval to the due date of the first scheduled instalment is less than 5 days, or more than 9 days but not more than 11 days, the unearned loan finance charge shall be increased by an adjustment for each day by which the interval is less than 7 days and, at the option of the lender, may be reduced by an adjustment for each day by which the interval is more than 7 days; the adjustment for each day shall be 1/7th of that part of the loan finance charge earned in the computational period prior to the due date of the first scheduled instalment assuming that period to be one week; and

(ii) if the interval to the final scheduled payment date is a number of computational periods plus an additional number of days less than a full week, the additional number of days shall be considered a computational period only if 4 days or more. This subparagraph applies whether or not subparagraph (i) applies.

(6) If a deferral (Section 3.204) has been agreed to, the unearned portion of the loan finance charge shall be computed without regard to the deferral. The amount of deferral charge earned at the date of prepayment shall also be calculated. If the deferral charge earned is less than the deferral charge paid, the difference shall be added to the unearned portion of the loan finance charge. If any part of a deferral charge has been earned but has not been paid, that part shall be subtracted from the unearned portion of the loan finance charge, or shall be added to the unpaid balance.

(7) This section does not preclude the collection or retention by the lender of delinquency charges (Section 3.203).

(8) If the maturity is accelerated for any reason and judgment is obtained, the debtor is entitled to the same rebate as if the payment had been made on the date judgment is entered.

(9) Upon prepayment in full of a consumer loan by the proceeds of consumer credit insurance (Section 4.103), the debtor or his estate is entitled to the same rebate as though the debtor had prepaid the agreement on the date the proceeds of the insurance are paid to the lender, but no later than 10 business days after satisfactory proof of loss is furnished to the lender.

COMMENT

For examples of the application of this section, see Comment to Section 2.210.

PART 3—DISCLOSURE AND ADVERTISING

[¶ 895] Applicability; Information Required

Sec. 3.301. (1) For purposes of this Part, consumer loan includes a loan secured primarily by an interest in land without regard to the rate of the loan finance charge if the loan is otherwise a consumer loan (Section 3.104).

(2) The lender shall disclose to the debtor to whom credit is extended with respect to a consumer loan the information required by either

(a) this Part, or

(b) except with respect to a loan secured primarily by an interest in land, the Federal Consumer Credit Protection Act.

(3) For the purposes of paragraph (b) of subsection (2), information which would otherwise be required pursuant to the Federal Consumer Credit Protection Act is sufficient even though the transaction is one of a class of credit transactions exempted from that Act pursuant to a determination by the Board of Governors of the Federal Reserve System that the class of transactions is subject under the law of this State to requirements substantially similar to those imposed under that Act.

[¶ 896] General Disclosure Requirements and Provisions

Sec. 3.302. (1) The disclosures required by this Part

(a) shall be made clearly and conspicuously;

(b) shall be in writing, a copy of which shall be delivered to the debtor, but need not be contained in a single writing nor made in the order set forth in this Part;

(c) may use terminology different from that employed in this Part if it conveys substantially the same meaning;

(d) may be supplemented by additional information or explanations supplied by the lender;

(e) need be made only to the extent applicable and only as to those items for which the lender makes a separate charge to the debtor;

(f) shall be made on the assumption that all scheduled instalments are paid when due; and

(g) comply with this Part although rendered inaccurate by any act, occurrence, or agreement subsequent to the required disclosure.

(2) Except with respect to loans made by telephone or mail (Section 3.305), loans made pursuant to a binding commitment (subsection (3) of Section 3.306), and loans made pursuant to a lender credit card (Section 3.310),

(a) the disclosures required by this Part shall be made before credit is extended, but may be made in the loan, refinancing, or consolidation agreement, or other evidence of indebtedness to be signed by the debtor if set forth conspicuously therein, and need be made only to one debtor if there are more than one, and

(b) if an evidence of indebtedness is signed by the debtor, the lender shall give him a copy when the writing is signed.

(3) Except as provided with respect to rescission by a debtor (Section 5.204) and civil liability for violations of disclosure provisions (subsecton (4) of Section 5.203), written acknowledgment of receipt by a debtor to whom a statement is required to be given pursuant to this art

(a) in an action or proceeding by or against the original lender, creates a presumption that the statement was given, and

(b) in an action or proceeding by or against an assignee without knowledge to the contrary when he acquires the obligation, is conclusive proof of the delivery of the statement and, unless the violation is apparent on the face of the statement, of compliance with this Part.

[¶ 897] Overstatement

Sec. 3.303. The disclosure of an amount or percentage which is greater than the amount or percentage required to be disclosed under this Part does not in itself constitute a violation of this Part if the overstatement is not materially misleading and is not used to avoid meaningful disclosure.

[¶ 898] Calculation of Rate to Be Disclosed

Sec. 3.304. (1) Except as otherwise specifically provided, if a lender is required to give to a debtor a statement of the rate of the loan finance charge he shall state the rate in terms of an annual percentage rate as defined in subsection (2) or in terms of a corresponding nominal annual percentage rate as defined in subsection (3), whichever is appropriate.

(2) "Annual percentage rate"

(a) with respect to a consumer loan other than one made pursuant to a resolving loan account, is either

(i) that nominal annual percentage rate which, when applied to the unpaid balances of the principal calculated according to the United States rule, will yield a sum equal to the amount of the loan finance charge, or

(ii) that rate determined by any method prescribed by the Administrator as a method which materially simplifies computation while retaining reasonable accuracy as compared with the rate determined pursuant to subparagraph (i);

(b) with respect to a consumer loan made pursuant to a revolving loan account, is the quotient expressed as a percentage of the total loan finance charge for the period to which it relates divided by the amount upon which the loan finance charge for that period is based, multiplied by the number of these periods in a year; if the period is one day, the number of periods in a year is deemed to be 360.

(3) "Corresponding nominal annual percentage rate" is the percentage or percentages used to calculate the loan finance charge for one billing cycle or other period pursuant to a revolving loan account multiplied by the number of billing cycles or periods in a year; if the period is one day, the number of periods in a year is deemed to be 360.

(4) If a lender is permitted to make the same loan finance charge for all principal amounts within a specified range (subsection (4) of Section 3.201) or for all balances within a specified range (subsection (5) of Section 3.508), he shall state the annual percentage rate or corresponding nominal annual percentage rate, whichever is appropriate, as applied to the median amount of the range within which the actual principal amount or balance is included.

(5) If a debt is payable on a schedule of instalment payments which is regular except for one or more of the following irregularities:

(a) the amount of one instalment payment is not substantially equal to the amount of each of the other instalment payments;

(b) the interval between the date the credit is granted and the first instalment payment is not equal to the interval between instalment payments; or

(c) in one or more payment periods no instalment payment is due, not exceeding one-fourth of the payment periods in any year if the length of the term of the agreement is a year or more, or one-fourth of the payment periods if the length of the term of the agreement is less than a year,

the lender may, at his option, calculate the rate to be disclosed as if the debt were payable under an agreement having the same principal, the same length of term to the nearest scheduled payment period, and a regular schedule of payments having the same interval between payments as the interval between the majority of instalments as scheduled in the loan agreement.

(6) A schedule of payments is regular if (a) the instalment payments are substantially equal in amount, (b) the interval between instalment payments is one month, or the intervals between instalment payments are equal and less than one month, and (c) the interval between the date the credit is granted and the first instalment payment is equal to the interval between instalment payments.

(7) A statement of rate complies with this Part if it does not vary from the accurately computed rate by more than the following tolerances:

(a) the annual percenage rate may be rounded to the nearest quarter of 1 per cent for consumer loans payable in substantially equal instalments when a lender determines the total loan finance charge on the basis of a single add-on, discount, periodic, or other rate, and the rate is converted into an annual percentage rate under procedures prescribed by the Administrator;

(b) the Administrator may authorize the use of rate tables or charts which may provide for the disclosure of annual percentage rates which vary from the rate determined in accordance with paragraph (a) by not more than the tolerances the Administrator may allow; the Administrator may not allow a tolerance greater than 8 per cent of that rate except to simplify compliance where irregular payments are involved; and

(c) in case a lender determines the annual percentage rate in a manner other than as described in paragraph (a) or (b), the Administrator may authorize other reasonable tolerances.

COMMENT

See Comment to Section 2.304.

[¶ 899] Loans Made by Telephone or Mail

Sec. 3.305. With respect to a consumer loan, other than a loan made pursuant to a revolving loan account, if the lender receives a request for an extension of credit by mail or telephone without personal solicitation, the lender complies with this Part if the lender's printed material distributed to the public or the loan agreement or other printed material delivered to the debtor sets forth the terms of financing, including the annual percentage rate for representative amounts of credit, and if he gives the information required by this Part on or before the date the first payment is due on the loan.

[¶ 900] Consumer Loans Not Pursuant to Revolving Loan Account

Sec. 3.306. (1) This section applies to a consumer loan not made pursuant to a revolving loan account (Section 3.309).

(2) The lender shall give to the debtor the following information:

(a) net amount paid to, receivable by, or paid or payable for the account of the debtor or in the case of a loan resulting from a refinancing, the amount prescribed by the provisions on loan finance charge on refinancing (subsection (1) of Section 3.205); if any amount is paid or payable to a third person, a brief itemization, which may be contained in a separate writing or writings, shall also be given;

(b) amount paid or payable for registration, certificate of title or license fees, if not included in (a), and a description or identification of the fees;

(c) amount of official fees and taxes and a description or identification of them;

(d) brief description of insurance to be provided or paid for by the lender including the type and the amount of the coverages, and if a separate charge is made, the amount of the charge;

(e) amount of other additional charges (Section 3.202), and a brief description or identification of them;

(f) amount of principal (sum of amounts stated in paragraphs (a), (b), (c), (d), and (e));

(g) except in the case of a loan secured by a first lien on a dwelling, made to finance the purchase of that dwelling, and in which the loan finance charge does not exceed 10 per cent per year (Section 3.104), the

amount of the loan finance charge and the amount of the unpaid balance (principal plus loan finance charge);

(h) rate of the loan finance charge as applied to the principal in accordance with the provisions on calculation of rate (Section 3.304), except in the case of a loan finance charge which does not exceed $5 when the principal does not exceed $75 or $7.50 when the principal exceeds $75;

(i) number of payments, amount of each payment, due date of first payment, and the due date of subsequent payments or interval between payments;

(j) default, delinquency, or similar charges payable in the event of late payments; and

(k) description of any security interest held or to be retained or acquired by the lender in connection with the extension of credit, and a clear identification of the property to which the security interest relates.

(3) If a lender makes a binding commitment to make a consumer loan by allowing the debtor to draw on the lender and at the time the commitment is made the amount of the loan has not been determined, the lender shall then give to the debtor a statement of the terms under which the loan will be made, including the rate of the loan finance charge calculated in accordance with the provisions on calculation of rate (Section 3.304). If the rate of the loan finance charge varies according to the amount of the loan, the lender shall state the minimum and maximum annual percentage rates which would be applicable to the amounts which could be drawn pursuant to the commitment. If additional charges (Section 3.202) may be made, the lender shall also state the conditions under which the charges may be made, the amount or method of computing the charges, and a brief description or identification of the charges. Within a reasonable time after the loan is made, and in any event on or before the due date of the first instalment, the lender shall give the information required by this section.

[¶ 901] Consolidation

Sec. 3.307. If the parties to a consumer loan or consumer credit sale agree to a consolidation (Section 3.206), the creditor shall give to the debtor the information required with respect to consumer loans not pursuant to a revolving loan account (Section 3.306). To comply with those provisions (paragraph (a) of subsection (2) of Section 3.306), the amount with respect to the previous loan or sale to be consolidated shall be separately stated and shall be added to the net amount paid to, receivable by, or paid or payable for the account of the debtor in connection with the subsequent loan or sale.

[¶ 902] Deferral

Sec. 3.308. If the lender makes a deferral pursuant to the provisions on deferral charges (Section 3.204), he shall state to the debtor, at the time of or promptly after the deferral:

(1) amount deferred;

(2) any appropriate additional charges (Section 3.202);

(3) aggregate amount deferred, which is the sum of the amount in (1) and any unpaid amount included in (2);

(4) time to which payment is deferred; and

(5) amount and annual percentage rate of the deferral charge and when it is payable.

[¶ 903] Revolving Loan Acounts

Sec. 3.309. (1) Before making a consumer loan pursuant to a revolving loan account, the lender shall give to the debtor the following information:

(a) conditions under which a loan finance charge may be made, including the time period, if any, within which any credit extended may be repaid without incurring a loan finance charge;

(b) method of determining the balance upon which a loan finance charge will be computed;

(c) method of determining the amount of the loan finance charge, including the periodic percentage or percentages used to calculate the loan finance charge and the amount of any minimum loan finance charge;

(d) corresponding nominal annual percentage rate (subsection (3) of Section 3.304); if more than one corresponding nominal annual percentage rate may be used, the amount of a balance to which each corresponding nominal annual percentage rate applies shall also be stated;

(e) if the lender elects he may also state either

(i) the average effective annual percentage rate of return received from revolving loan accounts for a representative period of time; or

(ii) if circumstances are such that the computation of a rate under subparagraph (i) would not be feasible or practical, or would be misleading or meaningless, a projected rate of return to be received from revolving loan accounts; the Administrator shall prescribe rules, consistent with commonly accepted standards for accounting or statistical procedures, to carry out the purposes of this paragraph (e);

(f) conditions under which additional charges may be made and the method by which they will be determined; and

(g) conditions under which the lender may retain or acquire a security interest in property to secure the balances resulting from loans made pursuant to the revolving loan account, and a description of the interest or interests which may be retained or acquired.

(2) If there is an outstanding balance owing at the end of the billing cycle or if a loan finance charge is made with respect to the billing cycle, the lender shall give to the debtor the following information within a reasonable time after the end of the billing cycle:

(a) outstanding balance at the beginning of the billing cycle;

(b) brief description or identification of loans made during the billing cycle in a statement or in accompanying cancelled checks, memoranda or the like;

(c) amount credited to the account during the billing cycle;

(d) amount of loan finance charge and additional charges debited during the billing cycle, with an itemization or explanation to show the total amount of loan finance charge, if any, due to the application of one or more periodic percentages and the amount, if any, imposed as a minimum charge;

(e) the periodic percentage used to calculate the loan finance charge; if more than one periodic percentage is used, each percentage and the amount of the balance to which each applies;

(f) the balance on which the loan finance charge is computed and a statement of how the balance is determined; if the balance is determined without first deducting all amounts credited during the period, that fact and the amounts credited shall also be stated;

(g) if the loan finance charge for the billing cycle exceeds 50¢ for a monthly or longer billing cycle, or the pro rata part of 50¢ for a billing cycle shorter than monthly, the loan finance charge expressed as an annual percentage rate (paragraph (b) of subsection (2) of Section 3.304); if more than one periodic percentage is used to calculate the loan finance charge, the lender may, in lieu of stating a single annual percentage rate, state more than one annual percentage rate and the amount of the balance to which each annual percentage rate applies;

(h) if the loan finance charge for the billing cycle does not exceed 50¢ for a monthly or longer billing cycle, or the pro rata part of 50¢ for a billing cycle shorter than monthly, the corresponding nominal annual percentage rate (subsection (3) of Section 3.304);

(i) if the lender elects, the average effective annual percentage rate of return or the projected rate as prescribed in paragraph (e) of subsection (1);

(j) outstanding balance at the end of the billing cycle; and

(k) date by which or period within which payment must be made to avoid additional loan finance charges.

COMMENT

See Comment to Section 2.310.

[¶ 904] Loan Pursuant to Lender Credit Card or Similar Arrangement

Sec. 3.310. Before a consumer loan, other than one made pursuant to a revolving loan account, is first made pursuant to a lender credit card or similar arrangement, the lender shall give to the debtor a statement of the annual percentage rate or rates at which loans will be made to the debtor and a brief description or identification of the additional charges that may be made. The lender shall give to the debtor the information required by this Part with respect to consumer loans other than revolving loan accounts (Section 3.306) within a reasonable time after a loan is made and in any event before the due date of the first instalment.

[¶ 905] Content of Periodic Statements

Sec. 3.311. The Administrator may by rule require a creditor who transmits periodic statements in connection with any consumer loan not made pursuant to a revolving loan account to set forth in each statement each of the following items:

(1) the annual percentage rate of the loan finance charge with respect to each consumer loan to which the statement relates;

(2) the date by which or the period, if any, within which payment must be made in order to avoid further loan finance charges or other charges; and

(3) the other items set forth in the provisions on disclosure with respect to revolving loan accounts (subsection (2) of Section 3.309) appropriate to the terms and conditions under which the consumer loan is made.

COMMENT

See Comment to Section 2.312.

[¶ 906] Advertising

Sec. 3.312. (1) No lender shall engage in this State in false or misleading advertising concerning the terms or conditions of credit with respect to a consumer loan.

(2) Without limiting the generality of subsection (1), and without requiring a statement of rate of loan finance charge if the loan finance charge is not more than $5 when the principal does not exceed $75 or more than $7.50 when the principal exceeds $75, and advertisement with respect to a consumer credit loan made by the posting of a public sign, or by catalog, magazine, newspaper, radio, television, or similar mass media, is misleading if

(a) it states the rate of the loan finance charge and the rate is not stated in the form required by the provisions on calculation of rate (Section 3.304) or

(b) it states the dollar amounts of the loan finance charge or instalment payments, and does not also state the rate of any loan finance charge and the number and amount of the instalment payments.

(3) In this section a catalog or other multiple-page advertisement is considered a single advertisement if it clearly and conspicuously displays a credit terms table setting forth the information required by this section.

(4) This section imposes no liability on the owner or personnel, as such, of any medium in which an advertisement appears or through which it is disseminated.

(5) Advertising which complies with the Federal Consumer Credit Protection Act does not violate subsection (2).

PART 4.—LIMITATIONS ON AGREEMENTS AND PRACTICES

[¶ 907] Scope

Sec. 3.401. This Part applies to consumer loans.

[¶ 908] Balloon Payments

Sec. 3.402. With respect to a consumer loan, other than one primarily for an agricultural purpose or one pursuant to a revolving loan account, if any scheduled payment is more than twice as large as the average of earlier scheduled payments, the debtor has the right to refinance the amount of that payment at the time it is due without penalty. The terms of the refinancing shall be no less favorable to the debtor than the terms of the original loan. These provisions do not apply to the extent that the payment schedule is adjusted to the seasonal or irregular income of the debtor.

[¶ 909] No Assignment of Earnings

Sec. 3.403. (1) A lender may not take an assignment of earnings of the debtor for payment or as security for payment of a debt arising out of a consumer loan. An assignment of earnings in violation of this section is unenforceable by the assignee of the earnings and revocable by the debtor. This section does not prohibit an employee from authorizing deductions from his earnings if the authorization is revocable.

(2) A sale of unpaid earnings made in consideration of the payment of money to or for the account of the seller of the earnings is deemed to be a loan to him secured by an assignment of earnings.

[¶ 910] Attorney's Fees

Alternative A:

Sec. 3.404. With respect to a consumer loan the agreement may not provide for the payment by the debtor of attorney's fees. A provision in violation of this section is unenforceable.

[¶ 911] Attorney's Fees

Alternative B:

Sec. 3.404. Except as provided by the limitations on attorney's fees in certain supervised loans (Section 3.511), with respect to a consumer loan the agreement may provide for the payment by the debtor of reasonable attorney's fees not in excess of 15 per cent of the unpaid debt after default and referral to an attorney not a salaried employee of the lender. A provision in violation of this section is unenforceable.

[¶ 912] Limitation on Default Charges

Sec. 3.405. Except for reasonable expenses incurred in realizing on a security interest, the agreement with respect to a consumer loan may not provide for charges as a result of default by the debtor other than those authorized by this Act. A provision in violation of this section is unenforceable.

[¶ 913] Notice of Assignment

Sec. 3.406. The debtor is authorized to pay the original lender until he receives notification of assignment of rights to payment pursuant to a consumer loan and that payment is to be made to the assignee. A notification which does not reasonably identify the rights assigned is ineffective. If requested by the debtor, the assignee must seasonably furnish reasonable proof that the assignment has been made and unless he does so the debtor may pay the original lender.

COMMENT

This section is derived from UCC Section 9-318(3).

[¶ 914] Authorization to Confess Judgment Prohibited

Sec. 3.407. A debtor may not authorize any person to confess judgment on a claim arising out of a consumer loan. An authorization in violation of this section is void.

[¶ 915] Change in Terms of Revolving Loan Accounts

Sec. 3.408. (1) If a lender makes a change in the terms of a revolving loan account without complying with this section any additional cost or charge to the debtor resulting from the change is an excess charge and subject to the remedies available to debtors (Section 5.202) and to the Administrator (Section 6.113).

(2) A lender may change the terms of a revolving loan account whether or not the change is authorized by prior agreement. Except as provided in subsection (3), the lender shall give to the debtor written notice of any change at least three times, with the first notice at least six months before the effective date of the change.

(3) The notice specified in subsection (2) is not required if

(a) the debtor after receiving notice of the change agrees in writing to the change;

(b) the debtor elects to pay an amount designated on a billing statement (subsection (2) of Section 3.309) as including a new charge for a benefit offered to the debtor when the benefit and charge constitute the change in terms and when the billing statement also states the amount payable if the new charge is excluded;

(c) the change involves no significant cost to the debtor;

(d) the debtor has previously consented in writing to the kind of change made and notice of the change is given to the debtor in two billing cycles prior to the effective date of the change; or

(e) the change applies only to debts incurred after a date specified in a notice of the change given in two billing cycles prior to the effective date of the change.

(4) The notice provided for in this section is given to the debtor when mailed to him at the address used by the lender for sending periodic billing statements.

PART 5.—REGULATED AND SUPERVISED LOANS

[¶ 916] Definitions: "Regulated Loan"; "Regulated Lender"; "Supervised Loan"; "Supervised Lender"

Sec. 3.501. (1) "Regulated loan" means a consumer loan, including a loan made pursuant to a revolving loan account, in which the rate of the loan finance charge is in excess of 10 per cent per year calculated on the unpaid balances of the principal according to the United States rule.

(2) "Regulated lender" means a person engaged in the business of making regulated loans.

(3) "Supervised loan" means a regulated loan in which the rate of the loan finance charge exceeds 18 per cent per year as determined according to the provisions on loan finance charge for consumer loans (Section 3.201).

(4) "Supervised lender" means a person authorized to make or take assignments of supervised loans.

[¶ 917] Authority to Make Supervised Loans

Sec. 3.502. Unless a person is a supervised financial organization or has first obtained a license from the Administrator authorizing him to make supervised loans, he shall not engage in the business of

(1) making supervised loans, or

(2) taking assignments of and undertaking direct collection of payments from or enforcement of rights against debtors arising from supervised loans,

but he may collect and enforce for three months without a license if he promptly applies for a license and his application has not been denied.

COMMENT

Unlike some statutes, this section contemplates that a supervised lender needs to obtain only one license to operate one or more offices in a State. While the single license permits the supervised lender to locate offices wherever he deems them to be economically justified, he must annually notify the Administrator of the location of each office (Section 6.202). Although license fees have been viewed as a source of income for the regulatory agency, licensing of supervised lenders is not to be regarded as a source of income. Instead, income for the operations of the Administrator is to be derived from general appropriations. Annual fees are required of all persons required to file notification (Section 6.203).

Moreover, this Section does not contemplate the annual renewal of licenses; such a requirement would merely increase the administrative burdens of the Administrator and the licensee.

In this Section "person" implies no limitation on the residence of the applicant. He need not be a resident of the State in which he seeks to be licensed as a supervised lender. Even though he is not physically within the State, the licensee is bound by the laws of the State in which he makes supervised loans.

If an unlicensed assignee not in the business of making collections or enforcing rights under the paper assigned to him finds that he must undertake collection or enforcement, subsection (2) gives him a 3-month grace period during which he can operate before he obtains a license.

[¶ 918] License to Make Supervised Loans

Sec. 3.503. (1) The Administrator shall receive and act on all applications for licenses to make supervised loans under this Act. Applications shall be filed in the manner prescribed by the Administrator and shall contain such information as the Administrator may require to make an evaluation of the financial responsibility, character and fitness of the applicant.

(2) No license shall be issued unless the Administrator, upon investigation, finds that the financial responsibility, character and fitness of the applicant, and of the members thereof (if the applicant is a co-partnership or association) and of the officers and directors thereof (if the applicant is a corporation), are such as to warrant belief that the business will be operated honestly and fairly within the purposes of this Act.

(3) Upon written request, the applicant is entitled to a hearing on the question of his qualifications for a license if (a) the Administrator has notified the applicant in writing that his application has been denied, or (b) the Administrator has not issued a license within 60 days after the application for the license was filed. A request for a hearing may not be made more than 15 days after the Administrator has mailed a writing to the applicant notifying him that the application has been denied and stating in substance the Administrator's findings supporting denial of the application.

COMMENT

This section is intimately related to disclosure (Part 3 of Article 2 and Part 3 of Article 3) and to maximum charges (Part 2 of Article 2 and Part 2 of Article 3). The purpose is to facilitate entry into the cash loan field so that the resultant rate competition fostered by disclosure will generally force rates below the permitted maximum charges. Competition is further encouraged by the absence of any licensing requirements in credit sales (Article 2).

A secondary purpose is to reduce the likelihood of establishing localized monopolies in the granting of cash credit. Such monopolies tend to push rates charged to the maximum permitted levels and to establish conditions under which some share of the anticipated monopoly profits are devoted to direct or indirect pressures to obtain the license.

Since this section does not apply to supervised financial organizations, the safety of depositors' funds is not directly endangered by the competition fostered by the freedom of entry. To the extent, if any, that the increased competition causes the development of undesirable credit practices, these are directly controlled by powers to revoke or suspend a license (Section 3.504), prohibition on multiple agreements (Section 3.509), restrictions on real property security (Section 3.510), and by the provisions on remedies and penalties provided (Article 5) and the powers and functions of the Administrator (Article 6).

[¶ 919] Revocation or Suspension of License

Sec. 3.504. (1) The Administrator may issue to a person licensed to make supervised loans an order to show cause why his license should not be revoked or suspended for a period not in excess of 6 months. The order shall state the place for a hearing and set a time for the hearing that is no less than 10 days from the date of the order. After the hearing the Administrator shall revoke or suspend the license if he finds that:

(a) the licensee has repeatedly and willfully violated this Act or any rule or order lawfully made pursuant to this Act; or

(b) facts or conditions exist which would clearly have justified the Administrator in refusing to grant a license had these facts or conditions been known to exist at the time the application for the license was made.

(2) No revocation or suspension of a license is lawful unless prior to institution of proceedings by the Administrator notice is given to the licensee of the facts or conduct which warrant the intended action, and the licensee is given an opportunity to show compliance with all lawful requirements for retention of the license.

(3) If the Administrator finds that probable cause for revocation of a license exists and that enforcement of this Act requires immediate suspension of the license pending investigation, he may, after a hearing upon 5 days' written notice, enter an order suspending the license for not more than 30 days.

(4) Whenever the Administrator revokes or suspends a license, he shall enter an order to that effect and forthwith notify the licensee of the revocation or suspension. Within five days after the entry of the order he shall deliver to the licensee a copy of the order and the findings supporting the order.

(5) Any person holding a license to make supervised loans may relinquish the license by notifying the Administrator in writing of its relinquishment, but this relinquishment shall not affect his liability for acts previously committed.

(6) No revocation, suspension, or relinquishment of a license shall impair or affect the obligation of any preexisting lawful contract between the licensee and any debtor.

(7) The Administrator may reinstate a license, terminate a suspension, or grant a new license to a person whose license has been revoked or suspended if no fact or condition then exists which clearly would have justified the Administrator in refusing to grant a license.

[¶ 920] Records; Annual Reports

Sec. 3.505. (1) Every licensee shall maintain records in conformity with generally accepted accounting principles and practices in a manner that will enable the Administrator to determine whether the licensee is complying with the provisions of this Act. The record keeping system of a licensee shall be sufficient if he makes the required information reasonably available. The records need not be kept in the place of business where supervised loans are made, if the Administrator is given free access to the records wherever located. The records pertaining to any loan need not be preserved for more than two years after making the final entry relating to the loan, but in the case of a revolving loan account the two years is measured from the date of each entry.

(2) On or before April 15 each year every licensee shall file with the Administrator a composite annual report in the form prescribed by the Administrator relating to all supervised loans made by him. The Administrator shall consult with comparable officials in other states for the purpose of making the kinds of information required in annual reports uniform among the states. Information contained in annual reports shall be confidential and may be published only in composite form.

[¶ 921] Examinations and Investigations

Sec. 3.506. (1) The Administrator shall periodically examine at such intervals as he deems appropriate the loans, business, and records of every licensee. In addition, for the purpose of discovering violations of this Act or securing information lawfully required, the Administrator or the official or agency to whose supervision the organization is subject (Section 6.105) may at any time investigate the loans, business, and records of any regulated lender. For these purposes he shall have free and reasonable access to the offices, places of business, and records of the lender.

(2) If the lender's records are located outside this State, the lender shall, at his option, either make them available to the Administrator at a convenient location within this State, or pay the reasonable and necessary expenses for the Administrator or his representative to examine them at the place where they are maintained. The Administrator may designate representatives, including comparable officials of the State in which the records are located, to inspect them on his behalf.

(3) For the purposes of this section, the Administrator may administer oaths or affirmations, and upon his own motion or upon request of any party may subpoena witnesses, compel their attendance, adduce evidence, and require the production of any matter which is relevant to the investigation, including the existence, description, nature, custody, condition, and location of any books, documents, or other tangible things and the identity and location of persons having knowledge of relevant facts, or any other matter reasonably calculated to lead to the discovery of admissible evidence.

(4) Upon failure without lawful excuse to obey a subpoena or to give testimony and upon reasonable notice to all persons affected thereby, the Administrator may apply to [ ] court for an order compelling compliance.

[¶ 922] Application of [Administrative Procedure Act] [Part on Administrative Procedure and Judicial Review] to Part

Sec. 3.507. Except as otherwise provided, the [State administrative procedure act] [Part on Administrative Procedure and Judicial Review (Part 4 of the Article on Administration (Article 6))] applies to and governs all administrative action taken by the Administrator pursuant to this Part.

[¶ 923] Loan Finance Charge for Supervised Loans

Sec. 3.508. (1) With respect to a supervised loan, including a loan pursuant to a revolving loan account, a supervised lender may contract for and receive a loan finance charge not exceeding that permitted by this section.

(2) The loan finance charge, calculated according to the United States rule, may not exceed the equivalent of the greater of either of the following:

(a) the total of

(i) 36 per cent per year on that part of the unpaid balances of the principal which is $300 or less;

(ii) 21 per cent per year on that part of the unpaid balances of the principal which is more than $300 but does not exceed $1,000; and

(iii) 15 per cent per year on that part of the unpaid balances of the principal which is more than $1,000; or

(b) 18 per cent per year on the unpaid balances of the principal.

(3) This section does not limit or restrict the manner of contracting for the loan finance charge, whether by way of add-on, discount, or otherwise, so long as the rate of the loan finance charge does not exceed that permitted by this section. If the loan is precomputed,

(a) the loan finance charge may be calculated on the assumption that all scheduled payments will be made when due, and

(b) the effect of prepayment is governed by the provisions on rebate upon prepayment (Section 3.210).

(4) The term of a loan for the purposes of this section commences on the date the loan is made. Differences in the lengths of months are disregarded and a day may be counted as 1/30th of a month. Subject to classifications and differentiations the lender may reasonably establish, a part of a month in excess of 15 days may be treated as a full month if periods of 15 days or less are disregarded and if that procedure is not consistently used to obtain a greater yield than would otherwise be permitted.

(5) Subject to classifications and differentiations the lender may reasonably establish, he may make the same loan finance charge on all principal amounts within a specified range. A loan finance charge so made does not violate subsection (2) if

(a) when applied to the median amount within each range, it does not exceed the maximum permitted in subsection (2), and

(b) when applied to the lowest amount within each range, it does not produce a rate of loan finance charge exceeding the rate calculated according to paragraph (a) by more than 8 per cent of the rate calculated according to paragraph (a).

(6) The amounts of $300 and $1,000 in subsection (2) are subject to change pursuant to the provisions on adjustment of dollar amounts (Section 1.106).

COMMENT

See Comment to Section 2.201. Since there is no basic economic difference between loans pursuant to a revolving loan account and precomputed instalments loans, which may be, and often are, refinanced or deferred, the same rate ceiling is provided for all supervised loans. Lenders are not required to use a graduated rate, but may find it more economical to use a flat monthly rate of charge, provided that it does not exceed the rate ceiling specified. Lenders offering revolving loan accounts may not levy delinquency charges (3.203), and deferral charges (3.204), or a loan finance charge on refinancing (3.205). At the same time a debtor is not entitled to rebates upon prepayment (3.210), since at the time of his prepayment there will be no prepaid, but unearned, finance charges on his revolving loan account.

[¶ 924] Use of Multiple Agreements

Sec. 3.509. With respect to a supervised loan, no lender may permit any person, or husband and wife, to become obligated in any way under more than one loan agreement with the lender or with a person related to the lender, with intent to obtain a higher rate of loan finance charge than would otherwise be permitted by the provisions on loan finance charge for supervised loans (Section 3.508) or to avoid disclosure of an annual percentage rate pursuant to the provisions on disclosure and advertising (Part 3). The excess amount of loan finance charge provided for in agreements in violation of this section are excess charges for the purposes of the provisions on effect of violations on rights of parties (Section 5.202) and the provisions on civil actions by Administrator (Section 6.113).

[¶ 925] Restrictions on Interest in Land as Security

Sec. 3.510. (1) With respect to a supervised loan in which the principal is $1,000 or less, a lender may not contract for an interest in land as security. A security interest taken in violation of this section is void.

(2) The amount of $1,000 in subsection (1) is subject to change pursuant to the provisions on adjustment of dollar amounts (Section 1.106).

[¶ 926] [Limitation on Attorney's Fees]

[**Sec. 3.511.** (1) With respect to a supervised loan in which the principal is $1,000 or less, the agreement may not provide for the payment by the debtor of attorney's fees. A provision in violation of this section is unenforceable.

(2) The amount of $1,000 in subsection (1) is subject to change pursuant to the provisions on adjustment of dollar amounts (Section 1.106).]

COMMENT

If Alternative A of Section 3.404 is enacted, Section 3.511 should be omitted.

[¶ 927] Regular Schedule of Payments; Maximum Loan Term

Sec. 3.512. (1) Regulated loans payable in instalments, other than loans pursuant to a revolving loan account, in which the principal is $1,000 or less shall be repayable in substantially equal instalments which shall be payable at equal periodic intervals except to the extent that the schedule of payments is adjusted to the seasonal or irregular income of the debtor. Regulated loans payable in instalments, other than loans pursuant to a revolving loan account, in which the principal is $300 or less shall be scheduled to be payable over a period of not more than 25 months, and regulated loans in which the principal is more than $300 but does not exceed $1,000 shall be scheduled to be payable over a period of not more than 37 months.

(2) The amounts of $300 and $1,000 in subsection (1) are subject to change pursuant to the provisions on adjustment of dollar amounts (Section 1.106).

[¶ 928] Conduct of Business Other than Making Loans

Sec. 3.513. A licensee may carry on other business at a location where he makes supervised loans unless he carries on other business for the purpose of evasion or violation of this Act.

COMMENT

A seller who makes loans must comply with Article 3 with respect to his loan operations.

[¶ 929] Application of Other Provisions

Sec. 3.514. Except as otherwise provided, all provisions of this Act applying to consumer loans apply to regulated loans.

PART 6—LOANS OTHER THAN CONSUMER LOANS

[¶ 930] Loans Subject to Act by Agreement of Parties

Sec. 3.601. The parties to a loan other than a consumer loan may agree in a writing signed by the parties that the loan is subject to the provisions of this Act applying to consumer loans. If the parties so agree, the loan is a consumer loan for the purposes of this Act.

[¶ 931] Definition: "Consumer Related Loan"; Rate of Loan Finance Charge

Sec. 3.602. (1) A "consumer related loan" is a loan which is not subject to the provisions of this Act applying to consumer loans and in which the principal does not exceed $25,000, if

(a) the debtor is a person other than an organization, or

(b) the debt is secured primarily by a security interest in a one or two family dwelling occupied by a person related to the debtor.

(2) With respect to a consumer related loan, including one made pursuant to a revolving loan account, the parties may contract for the payment

of a loan finance charge not in excess of that permitted by the provisions on loan finance charge for consumer loans other than supervised loans (Section 3.201).

(3) The amount of $25,000 in subsection (1) is subject to change pursuant to the provisions on adjustment of dollar amounts (Section 1.106).

COMMENT

See Comment to Section 2.602.

[¶ 932] Applicability of Other Provisions to Consumer Related Loans

Sec. 3.603. Except for the rate of the loan finance charge and the rights to prepay and to rebate upon prepayment, the provisions of Part 2 of this Article apply to a consumer related loan.

[¶ 933] Limitation on Default Charges in Consumer Related Loans

Sec. 3.604. (1) The agreement with respect to a consumer related loan may provide for only the following charges as a result of the debtor's default:

(a) reasonable attorney's fees and reasonable expenses incurred in realizing on a security interest;

(b) deferral charges not in excess of 18 per cent per year of the amount deferred for the period of deferral; and

(c) other charges that could have been made had the loan been a consumer loan.

(2) A provision in violation of this section is unenforceable.

[¶ 934] Loan Finance Charge for Other Loans

Sec. 3.605. With respect to a loan other than a consumer loan or a consumer related loan, the parties may contract for the payment by the debtor of any loan finance charge.

COMMENT

See Section 5.107—Extortionate Extensions of Credit.

Article 4—Insurance

PART 1—INSURANCE IN GENERAL

[¶ 935] Short Title

Sec. 4.101. This Article shall be known and may be cited as Uniform Consumer Credit Code—Insurance.

[¶ 936] Scope [; Relation to Credit Insurance Act; Applicability to Parties]

Sec. 4.102. (1) Except as provided in subsection (2), this Article applies to insurance provided or to be provided in relation to a consumer credit sale (Section 2.104), a consumer lease (Section 2.106), or a consumer loan (Section 3.104).

(2) The provision on cancellation by a creditor (Section 4.304) applies to loans the primary purpose of which is the financing of insurance. No other provision of this Article applies to insurance so financed.

[(3) This Article supplements and does not repeal the Credit Insurance Act. The provisions of this Act concerning administrative controls, liabilities, and penalties do not apply to persons acting as insurers, and the similar provisions of the Credit Insurance Act do not apply to creditors and debtors.]

COMMENT

If the enacting State has not already enacted the NAIC Model Act for the regulation of credit life insurance and credit accident and health insurance, or similar legislation, material in brackets should be omitted.

By subsection (2) a single provision of this Article is made applicable to lenders engaged in insurance premium financing. (The borrower should be forewarned of cancellation of his insurance by the lender: Section 4.304.) Nothing else in this Article affects the practices of a lender in that business.

The Special Committee is aware that premium financing is regulated under special statutes in a number of states. It has considered the alternative courses of (1) exempting premium loans from this Act, and (2) proposing distinctive rules for premium loans as opposed to consumer loans generally. The Special Committee has concluded, after deliberation, that the provisions of this Act may appropriately be applied to insurance premium loans.

[¶ 937] Definition[s]: "Consumer Credit Insurance" [; "Credit Insurance Act"]

Sec. 4.103. In this Act [(1)] "Consumer credit insurance" means insurance, other than insurance on property, by which the satisfaction of debt in whole or in part is a benefit provided, but does not include

(a) insurance provided in relation to a credit transaction in which a payment is scheduled more than 10 years after the extension of credit;

(b) insurance issued as an isolated transaction on the part of the insurer not related to an agreement or plan for insuring debtors of the creditor; or

(c) insurance indemnifying the creditor against loss due to the debtor's default.

[(2) "Credit Insurance Act" means [NAIC Model Act, or any similar statute].]

COMMENT

If the enacting State has not already enacted the NAIC Model Act for the regulation of credit life insurance and credit accident and health insurance, or similar legislation, material in brackets should be omitted.

[¶ 938] Creditor's Provision of and Charge for Insurance; Excess Amount of Charge

Sec. 4.104. (1) Except as otherwise provided in this Article and subject to the provisions on additional charges (Section 2.202 and Section 3.202) and maximum charges (Part 2 of Article 2 and Article 3), a creditor may agree to provide insurance, and may contract for and receive a charge for insurance separate from and in addition to other charges. A creditor need not make a separate charge for insurance provided or required by him. This Act does not authorize the issuance of any insurance prohibited under any statute, or rule thereunder, governing the business of insurance.

(2) The excess amount of a charge for insurance provided for in agreements in violation of this Article is an excess charge for the purposes of the provisions of the Article on Remedies and Penalties (Article 5) as to effect of violations on rights of parties (Section 5.202) and of the provisions of the Article on Administration (Article 6) as to civil actions by the Administrator (Section 6.113).

COMMENT

Consideration has been given to the desirability of defining a "separate charge" for consumer credit insurance when the seller or lender establishes different rates of charge for sale or loan transactions predicated on whether or not consumer credit insurance is provided. The question has recently been raised by supervisory authorities in New York, where the creditors affected resolved the problem by increasing the rate of charge on transactions as to which consumer credit insurance was previously not provided to the higher rate of charge which had previously applied only to transactions as to which consumer credit insurance was provided.

It has been concluded that:

1. A definition of "separate charge" for insurance in the light of variations in credit service or loan finance charge rates depending on whether or not consumer credit insurance is provided would be futile.

2. The required disclosure of credit service charge or loan finance charge in terms of an annual percentage rate coupled with permission for exclusion from the credit service or loan finance charge and separate dollar disclosure of the charge for consumer credit insurance will encourage creditors to reduce to a minimum the disclosed rate of credit service or loan finance charge and to disclose the charge for consumer credit insurance as a separate charge not included in the credit service or loan finance charge.

[¶ 939] Conditions Applying to Insurance to Be Provided by Creditor

Sec. 4.105. If a creditor agrees with a debtor to provide insurance

(1) the insurance shall be evidenced by an individual policy or certificate of insurance delivered to the debtor, or sent to him at his address as stated by him, within 30 days after the term of the insurance commences under the agreement between the creditor and debtor; or

(2) the creditor shall promptly notify the debtor of any failure or delay in providing the insurance.

[¶ 940] Unconscionability

Sec. 4.106. (1) In applying the provisions of the Act on unconscionability (Sections 5.108 and 6.111) to a separate charge for insurance, consideration shall be given, among other factors, to

(a) potential benefits to the debtor including the satisfaction of his obligations;

(b) the creditor's need for the protection provided by the insurance; and

(c) the relation between the amount and terms of credit granted and the insurance benefits provided.

(2) If consumer credit insurance otherwise complies with this Article and other applicable law, neither the amount nor the term of the insurance nor the amount of a charge therefor is in itself unconscionable.

[¶ 941] Maximum Charge by Creditor for Insurance

Sec. 4.107. (1) Except as provided in subsection (2), if a creditor contracts for or receives a separate charge for insurance, the amount charged to the debtor for the insurance may not exceed the premium to be charged by the insurer, as computed at the time the charge to the debtor is determined, conforming to any rate filings required by law and made by the insurer with the [Commissioner] of Insurance.

(2) A creditor who provides consumer credit insurance in relation to a revolving charge account (Section 2.108) or revolving loan account (Section 3.108) may calculate the charge to the debtor in each billing cycle by applying the current premium rate to

(a) the average daily unpaid balance of the debt in the cycle;

(b) the unpaid balance of the debt or a median amount within a specified range of unpaid balances of debt on approximately the same day of the cycle. The day of the cycle need not be the day used in calculating the credit service charge (Section 2.207) or loan finance charge (Section 3.201 and Section 3.508), but the specified range shall be the range used for that purpose; or

(c) the unpaid balances of principal calculated according to the United States rule.

[¶ 942] Refund or Credit Required; Amount

Sec. 4.108. (1) Upon prepayment in full of a consumer credit sale or consumer loan by the proceeds of consumer credit insurance, the debtor or his estate is entitled to a refund of any portion of a separate charge for insurance which by reason of prepayment is retained by the creditor or returned to him by the insurer unless the charge was computed from time to time on the basis of the balances of the debtor's account.

(2) This Article does not require a creditor to grant a refund or credit to the debtor if all refunds and credits due to the debtor under this Article amount is less than $1, and except as provided in subsection (1) does not require the creditor to account to the debtor for any portion of a separate charge for insurance because

(a) the insurance is terminated by performance of the insurer's obligation;

(b) the creditor pays or accounts for premiums to the insurer in amounts and at times determined by the agreement between them; or

(c) the creditor receives directly or indirectly under any policy of insurance a gain or advantage not prohibited by law.

(3) Except as provided in subsection (2), the creditor shall promptly make or cause to be made an appropriate refund or credit to the debtor with respect to any separate charge made to him for insurance if

(a) insurance is not provided or is provided for a shorter term than that for which the charge to the debtor for insurance was computed; or

(b) the insurance terminates prior to the end of the term for which it was written because of prepayment in full or otherwise.

(4) A refund or credit required by subsection (3) is appropriate as to amount if it is computed according to a method prescribed or approved by the [Commissioner] of Insurance or a formula filed by the insurer with the [Commissioner] of Insurance at least 30 days before the debtor's right to a refund or credit becomes determinable, unless the method or formula is employed after the [Commissioner] of Insurance notifies the insurer that he disapproves it.

COMMENT

Subsection (2)(c) of Section 4.108 permits a creditor to derive from consumer credit insurance gains and advantages such as dividends and refunds resulting from favorable mortality or morbidity experience with respect to insured debtors.

The provisions of Article 4 relating to consumer credit insurance are predicated on the Special Committee's conclusions that:

1. Although the gains and advantages may be large to the creditor, they are relatively insignificant to each insured debtor and the calculating, clerical and mailing costs of returning them to insured debtors would be unreasonably disproportionate to the amounts involved.

2. The requirements of Article 4 that premiums for consumer credit insurance be reasonable in relation to benefits, if properly enforced by the State insurance commissioner or superintendent, will preclude the possibility of the use of consumer credit insurance as a device by creditors for concealing hidden charges from debtors.

[¶ 943] Existing Insurance; Choice of Insurer

Sec. 4.109. If a creditor requires insurance, upon notice to the creditor the debtor shall have the option of providing the required insurance through an existing policy of insurance owned or controlled by the debtor, or through a policy to be obtained and paid for by the debtor, but the creditor may for reasonable cause decline the insurance provided by the debtor.

[¶ 944] Charge for Insurance in Connection with a Deferral, Refinancing, or Consolidation; Duplicate Charges

Sec. 4.110. (1) A creditor may not contract for or receive a separate charge for insurance in connection with a deferral (Section 2.204 or Section 3.204), a refinancing (Section 2.205 or Section 3.205), or a consolidation (Section 2.206 or Section 3.206), unless

(a) the debtor agrees at or before the time of the deferral, refinancing, or consolidation that the charge may be made;

(b) the debtor is or is to be provided with insurance for an amount or a term, or insurance of a kind, in addition to that to which he would have been entitled had there been no deferral, refinancing, or consolidation;

(c) the debtor receives a refund or credit on account of any unexpired term of existing insurance in the amount that would be required if the insurance were terminated (Section 4.108); and

(d) the charge does not exceed the amount permitted by this Article (Section 4.107).

(2) A creditor may not contract for or receive a separate charge for insurance which duplicates insurance with respect to which the creditor has previously contracted for or received a separate charge.

[¶ 945] Cooperation Between Administrator and [Commissioner] of Insurance

Sec. 4.111. The Administrator and the [Commissioner] of Insurance are authorized and directed to consult and assist one another in maintaining compliance with this Article. They may jointly pursue investigations, prosecute suits, and take other official action, as may seem to them appropriate, if either of them is otherwise empowered to take the action. If the Administrator is informed of a violation or suspected violation by an insurer of this Article, or of the insurance laws, rules, and regulations of this State, he shall advise the [Commissioner] of Insurance of the circumstances.

[¶ 946] [Administrative Action of [Commissioner] of Insurance]

[**Sec. 4.112.** (1) To the extent that his responsibility under this Article requires, the [Commissioner] of Insurance shall issue rules with respect to insurers, and with respect to refunds (Section 4.108), forms, schedules of premium rates and charges (Section 4.203), and his approval or disapproval thereof and, in case of violation, may make an order for compliance.

(2) [The State administrative procedure act] [Each provision of the Part on Administrative Procedures and Judicial Review (Part 4) of the Article on Administration (Article 6) which applies to and governs administrative action taken by the Administrator also] applies to and governs all administrative action taken by the [Commissioner] of Insurance pursuant to this section.]

COMMENT

This section may be omitted in an enacting State in which the NAIC Model Act or any similar statute and adequate statutes applying to and governing administrative action taken by the [Commissioner] of Insurance are in force.

PART 2—CONSUMER CREDIT INSURANCE

[¶ 947] Term of Insurance

Sec. 4.201. (1) Consumer credit insurance provided by a creditor may be subject to the furnishing of evidence of insurability satisfactory to the insurer. Whether or not such evidence is required, the term of the insurance shall commence

no later than when the debtor becomes obligated to the creditor or when the debtor applies for the insurance, whichever is later, except as follows:

(a) if any required evidence of insurability is not furnished until more than 30 days after the term would otherwise commence, the term may commence on the date when the insurer determines the evidence to be satisfactory; or

(b) if the creditor provides insurance not previously provided covering debts previously created, the term may commence on the effective date of the policy.

(2) The originally scheduled term of the insurance shall extend at least until the due date of the last scheduled payment of the debt except as follows:

(a) if the insurance relates to a revolving charge account or revolving loan account, the term need extend only until the payment of the debt under the account and may be sooner terminated after at least 30 days' notice to the debtor; or

(b) if the debtor is advised in writing that the insurance will be written for a specified shorter time, the term need extend only until the end of the specified time.

(3) The term of the insurance shall not extend more than 15 days after the originally scheduled due date of the last scheduled payment of the debt unless it is extended without additional cost to the debtor or as an incident to a deferral, refinancing, or consolidation.

[¶ 948] Amount of Insurance

Sec. 4.202. (1) Except as provided in subsection (2),

(a) in the case of consumer credit insurance providing life coverage, the amount of insurance may not initially exceed the debt and, if the debt is payable in instalments, may not at any time exceed the greater of the scheduled or actual amount of the debt; or

(b) in the case of any other consumer credit insurance, the total amount of periodic benefits payable may not exceed the total of scheduled unpaid instalments of the debt, and the amount of any periodic benefit may not exceed the original amount of debt divided by the number of periodic instalments in which it is payable.

(2) If consumer credit insurance is provided in connection with a revolving charge account or revolving loan account, the amounts payable as insurance benefits may be reasonably commensurate with the amount of debt as it exists from time to time. If consumer credit insurance is provided in connection with a commitment to grant credit in the future, the amounts payable as insurance benefits may be reasonably commensurate with the total from time to time of the amount of debt and the amount of the commitment. If the debt or the commitment is primarily for an agricultural purpose, and there is no regular schedule of payments, the amounts payable as insurance benefits may equal the total of the initial amount of debt and the amount of the commitment.

[¶ 949] Filing and Approval of Rates and Forms

Sec. 4.203. (1) A creditor may not use a form, or a schedule of premium rates or charges, the filing of which is required by this section, if the [Com-

missioner] of Insurance has disapproved the form or schedule and has notified the insurer of his disapproval. A creditor may not use a form or schedule unless

(a) the form or schedule has been on file with the [Commissioner] of Insurance for 30 days, or has earlier been approved by him; and

(b) the insurer has complied with this section with respect to the insurance.

(2) Except as provided in subsection (3), all policies, certificates of insurance, notices of proposed insurance, applications for insurance, endorsements and riders relating to consumer credit insurance delivered or issued for delivery in this State, and the schedules of premium rates or charges pertaining thereto, shall be filed by the insurer with the [Commissioner] of Insurance. He shall, within 30 days after the filing of any form or schedule, disapprove it if the premium rates or charges are unreasonable in relation to the benefits provided under the form, or if the form contains provisions which are unjust, unfair, inequitable, or deceptive or encourage misrepresentation of the coverage or are contrary to any provision of the [Insurance Code] or of any rule or regulation promulgated thereunder.

(3) If a group policy has been delivered in another state, the forms to be filed by the insurer with the [Commissioner] of Insurance are the group certificates and notices of proposed insurance. He shall approve them if

(a) they provide the information that would be required if the group policy were delivered in this State; and

(b) the applicable premium rates or charges do not exceed those established by his rules or regulations.

COMMENT

Subsection (2) follows the formulation of New York Insurance Law Section 154.7, which has been upheld by the New York Court of Appeals as directing the New York Superintendent of Insurance not to approve premium rates for consumer credit insurance if they are "unreasonable in relation to the benefits provided" under the related form of policy or certificate. Some doubt has been expressed as to whether the Commissioner of Insurance has the same power under the provisions of paragraph B of Section 7 of the NAIC Model Act, which require the Commissioner to "disapprove any . . . form if the benefits provided therein are not reasonable in relation to the premium charge."

PART 3—PROPERTY AND LIABILITY INSURANCE

[¶ 950] Property Insurance

Sec. 4.301. (1) A creditor may not contract for or receive a separate charge for insurance against loss of or damage to property unless

(a) the insurance covers a substantial risk of loss of or damage to property related to the credit transaction;

(b) the amount, terms, and conditions of the insurance are reasonable in relation to the character and value of the property insured or to be insured; and

(c) the term of the insurance is reasonable in relation to the terms of credit.

(2) The term of the insurance is reasonable if it is customary and does not extend substantially beyond a scheduled maturity.

(3) A creditor may not contract for or receive a separate charge for insurance against loss of or damage to property unless the amount financed or principal exclusive of charges for the insurance is $300 or more, and the value of the property is $300 or more.

(4) The amounts of $300 in subsection (3) are subject to change pursuant to the provisions on adjustment of dollar amounts (Section 1.106).

[¶ 951] Insurance on Creditor's Interest Only

Sec. 4.302. If a creditor contracts for or receives a separate charge for insurance against loss of or damage to property, the risk of loss or damage not willfully caused by the debtor is on the debtor only to the extent of any deficiency in the effective coverage of the insurance, even though the insurance covers only the interest of the creditor.

COMMENT

The allocation of loss under this section is not to be upset by subrogation.

[¶ 952] Liability Insurance

Sec. 4.303. A creditor may not contract for or receive a separate charge for insurance against liability unless the insurance covers a substantial risk of liability arising out of the ownership or use of property related to the credit transaction.

[¶ 953] Cancellation by Creditor

Sec. 4.304. A creditor shall not request cancellation of a policy of property or liability insurance except after the debtor's default or in accordance with a written authorization by the debtor, and in either case the cancellation does not take effect until written notice is delivered to the debtor or mailed to him at his address as stated by him. The notice shall state that the policy may be cancelled on a date not less than 10 days after the notice is delivered, or, if the notice is mailed, not less than 13 days after it is mailed.

Article 5—Remedies and Penalties

PART 1—LIMITATIONS ON CREDITORS' REMEDIES

[¶ 954] Short Title

Sec. 5.101. This Article shall be known and may be cited as Uniform Consumer Credit Code—Remedies and Penalties.

[¶ 955] Scope

Sec. 5.102. This Part applies to actions or other proceedings to enforce rights arising from consumer credit sales, consumer leases and consumer loans; and, in addition, to extortionate extensions of credit (Section 5.107).

COMMENT

Section 1.201 states the territorial applicability of this Act. Sections 2.601 and 3.601 provide for the applicability of this Act by written agreement.

[¶ 956] Restrictions on Deficiency Judgments in Consumer Credit Sales

Sec. 5.103. (1) This section applies to a consumer credit sale of goods or services.

(2) If the seller repossesses or voluntarily accepts surrender of goods which were the subject of the sale and in which he has a security interest and the cash price of the goods repossessed or surrendered was $1000 or less, the buyer is not personally liable to the seller for the unpaid balance of the debt arising from the sale of the goods, and the seller is not obligated to resell the collateral.

(3) If the seller repossesses or voluntarily accepts surrender of goods which were not the subject of the sale but in which he has a security interest to secure a debt arising from a sale of goods or services or a combined sale of goods and services and the cash price of the sale was $1000 or less, the buyer is not personally liable to the seller for the unpaid balance of the debt arising from the sale.

(4) For the purpose of determining the unpaid balance of consolidated debts or debts pursuant to revolving charge accounts, the allocation of payments to a debt shall be determined in the same manner as provided for determining the amount of debt secured by various security interests (Section 2.409).

(5) The buyer may be liable in damages to the seller if the buyer has wrongfully damaged the collateral or if, after default and demand, the buyer has wrongfully failed to make the collateral available to the seller.

(6) If the seller elects to bring an action against the buyer for a debt arising from a consumer credit sale of goods or services, when under this section he would not be entitled to a deficiency judgment if he repossessed the collateral, and obtains judgment

(a) he may not repossess the collateral, and

(b) the collateral is not subject to levy or sale on execution or similar proceedings pursuant to the judgment.

(7) The amounts of $1000 in subsection (2) and (3) are subject to change pursuant to the provisions on adjustment of dollar amounts (Section 1.106).

[¶ 957] No Garnishment Before Judgment

Sec. 5.104. Prior to entry of judgment in an action against the debtor for debt arising from a consumer credit sale, a consumer lease, or a consumer loan, the creditor may not attach unpaid earnings of the debtor by garnishment or like proceedings.

[¶ 958] Limitation on Garnishment

Sec. 5.105. (1) For the purposes of this Part

(a) "disposable earnings" means that part of the earnings of an individual remaining after the deduction from those earnings of amounts required by law to be withheld; and

(b) "garnishment" means any legal or equitable procedure through which the earnings of an individual are required to be withheld for payment of a debt.

(2) The maximum part of the aggregate disposable earnings of an individual for any workweek which is subjected to garnishment to enforce payment of a judgment arising from a consumer credit sale, consumer lease, or consumer loan may not exceed the lesser of

(a) 25 per cent of his disposable earnings for that week, or

(b) the amount by which his disposable earnings for that week exceed forty times the Federal minimum hourly wage prescribed by Section 6 (a)(1) of the Fair Labor Standards Act of 1938, U. S. C. tit. 29, § 206(a)(1), in effect at the time the earnings are payable.

(c) In the case of earnings for a pay period other than a week, the Administrator shall by rule prescribe a multiple of the Federal minimum hourly wage equivalent in effect to that set forth in paragraph (b).

(3) No court may make, execute, or enforce an order or process in violation of this section.

COMMENT

This section is derived from CCPA Sections 302 and 303. The exemption has been increased from thirty times the minimum hourly wage to forty in the belief that the higher figure was justified in consumer transactions.

[¶ 959] No Discharge From Employment for Garnishment

Sec. 5.106. No employer shall discharge an employee for the reason that a creditor of the employee has subjected or attempted to subject unpaid earnings of the employee to garnishment or like proceedings directed to the employer for the purpose of paying a judgment arising from a consumer credit sale, consumer lease, or consumer loan.

COMMENT

The penalty for violation of this section is found in Section 5.202(6).

This Section is derived from CCPA § 304. However, it prohibits an employer from discharging an employee by reason of any garnishment (whether one or more) under a judgment arising from a consumer credit sale, consumer lease, or consumer loan.

[¶ 960] Extortionate Extensions of Credit

Sec. 5.107. (1) If it is the understanding of the creditor and the debtor at the time an extension of credit is made that delay in making repayment or failure to make repayment could result in the use of violence or other criminal means to cause harm to the person, reputation, or property of any person, the repayment of the extension of credit is unenforceable through civil judicial processes against the debtor.

(2) If it is shown that an extension of credit was made at an annual rate exceeding 45 per cent calculated according to the United States rule and that the creditor then had a reputation for the use or threat of use of violence or other criminal means to cause harm to the person, reputation, or property of any person to collect extensions of credit or to punish the nonrepayment thereof, there is prima facie evidence that the extension of credit was unenforceable under subsection (1).

COMMENT

This section is derived from CCPA Section 892.

[¶ 961] Unconscionability

Sec. 5.108. (1) With respect to a consumer credit sale, consumer lease, or consumer loan, if the court as a matter of law finds the agreement or any clause of the agreement to have been unconscionable at the time it was made the court may refuse to enforce the agreement, or it may enforce the remainder of the agreement without the unconscionable clause, or it may so limit the application of any unconscionable clause as to avoid any unconscionable result.

(2) If it is claimed or appears to the court that the agreement or any clause thereof may be unconscionable the parties shall be afforded a reasonable opportunity to present evidence as to its setting, purpose, and effect to aid the court in making the determination.

(3) For the purpose of this section, a charge or practice expressly permitted by this Act is not in itself unconscionable.

COMMENT

Subsections (1) and (2) are derived from UCC Section 2-302.

PART 2—DEBTORS' REMEDIES

[¶ 962] Interests in Land

Sec. 5.201. For purposes of the provisions of this Part on civil liability for violation of disclosure provisions (Section 5.203) and on debtor's right to rescind certain transactions (Section 5.204)

(1) consumer credit sale includes a sale of an interest in land without regard to the rate of the credit service charge if the sale is otherwise a consumer credit sale (Section 2.104); and

(2) consumer loan includes a loan primarily secured by an interest in land without regard to the rate of the loan finance charge if the loan is otherwise a consumer loan (Section 3.104).

COMMENT

Sections 5.203 and 5.204 apply to transactions secured by interests in land even though the credit service charge or loan finance charge does not exceed 10%.

[¶ 963] Effect of Violations on Rights of Parties

Sec. 5.202. (1) If a creditor has violated the provisions of this Act applying to certain negotiable instruments (Section 2.403), or limitations on the schedule of payments or loan term for regulated loans (Section 3.512), the debtor is not obligated to pay the credit service charge or loan finance charge, and has a right to recover from the person violating this Act or from an assignee of that person's rights who undertakes direct collection of payments or enforcement of rights arising from the debt a penalty in an amount determined by the court not in excess of three times the amount of the credit service charge or loan finance charge. No action pursuant to this subsection may be brought more than one year after the due date of the last scheduled payment of the agreement with respect to which the violation occurred.

(2) If a creditor has violated the provisions of this Act applying to authority to make supervised loans (Section 3.502), the loan is void and the debtor is not obligated to pay either the principal or loan finance charge. If he has paid any part of the principal or of the loan finance charge, he has a right to recover the payment from the person violating this Act or from an assignee of that person's rights who undertakes direct collection of payments or enforcement of rights arising from the debt. With respect to violations arising from loans made pursuant to revolving loan accounts, no action pursuant to this subsection may be brought more than two years after the violation occurred. With respect to violations arising from other loans, no action pursuant to this subsection may be brought more than one year after the due date of the last scheduled payment of the agreement pursuant to which the charge was paid.

(3) A debtor is not obligated to pay a charge in excess of that allowed by this Act, and if he has paid an excess charge he has a right to a refund. A refund may be made by reducing the debtor's obligation by the amount of the excess charge. If the debtor has paid an amount in excess of the lawful obligation under the agreement, the debtor may recover the excess amount from the person who made the excess charge or from an assignee of that person's rights who undertakes direct collection of payments from or enforcement of rights against debtors arising from the debt.

(4) If a debtor is entitled to a refund and a person liable to the debtor refuses to make a refund within a reasonable time after demand, the debtor may recover from that person a penalty in an amount determined by a court not exceeding the greater of either the amount of the credit service or loan finance charge or ten times the amount of the excess charge. If the creditor has made an excess charge in deliberate violation of or in reckless disregard for this Act, the penalty may be recovered even though the creditor has refunded the excess charge. No penalty pursuant to this subsection may be recovered if a court has ordered a similar penalty assessed against the same person in a civil action by the Administrator (Section 6.113). With respect to excess charges arising from sales made pursuant to revolving charge accounts or from loans made pursuant to revolving loan accounts, no action pursuant to this subsection may be brought more than two years after the time the

excess charge was made. With respect to excess charges arising from other consumer credit sales or consumer loans, no action pursuant to this subsection may be brought more than one year after the due date of the last scheduled payment of the agreement pursuant to which the charge was made.

(5) Except as otherwise provided, no violation of this Act impairs rights on a debt.

(6) If an employer discharges an employee in violation of the provisions prohibiting discharge (Section 5.106), the employee may within [ ] days bring a civil action for recovery of wages lost as a result of the violation and for an order requiring the reinstatement of the employee. Damages recoverable shall not exceed lost wages for six weeks.

(7) If the creditor establishes by a preponderance of evidence that a violation is unintentional or the result of a bona fide error no liability is imposed under subsections (1), (2), and (4) and the validity of the transaction is not affected.

(8) In any case in which it is found that a creditor has violated this Act, the court may award reasonable attorney's fees incurred by the debtor.

[¶ 964] Civil Liability for Violation of Disclosure Provisions

Sec. 5.203. (1) Except as otherwise provided in this section, a creditor who, in violation of the provisions on disclosure (Part 3), other than the provisions on advertising (Sections 2.313 and 3.312), of the Article on Credit Sales (Article 2) and the Article on Loans (Article 3), fails to disclose information to a person entitled to the information under this Act is liable to that person in an amount equal to the sum of

(a) twice the amount of the credit service or loan finance charge in connection with the transaction, but the liability pursuant to this paragraph shall be not less than $100 nor more than $1000; and

(b) in the case of a successful action to enforce the liability under paragraph (a), the costs of the action together with reasonable attorney's fees as determined by the court.

(2) A creditor has no liability under this section if within 15 days after discovering an error, and prior to the institution of an action under this section or the receipt of written notice of the error, the creditor notifies the person concerned of the error and makes whatever adjustments in the appropriate account are necessary to insure that the person will not be required to pay a credit service charge or loan finance charge in excess of the amount or percentage rate actually disclosed.

(3) A creditor may not be held liable in any action brought under this section for a violation of this Act if the creditor shows by a preponderance of evidence that the violation was not intentional and resulted from a bona fide error notwithstanding the maintenance of procedures reasonably adapted to avoid the error.

(4) Any action which may be brought under this section against the original creditor in any credit transaction involving a security interest in land may be maintained against any subsequent assignee of the original creditor where the assignee, its subsidiaries, or affiliates were in a continuing business relationship with the original creditor either at the time the credit

was extended or at the time of the assignment, unless the assignment was involuntary, or the assignee shows by a preponderance of evidence that it did not have reasonable grounds to believe that the original creditor was engaged in violations of this Act and that it maintained procedures reasonably adapted to apprise it of the existence of the violations.

(5) No action pursuant to this section may be brought more than one year after the date of the occurrence of the violation.

COMMENT

This section is derived from Section 130 of the CCPA.

[¶ 965] Debtor's Right to Rescind Certain Transactions

Sec. 5.204. (1) Except as otherwise provided in this section, in the case of a consumer credit sale or consumer loan with respect to which a security interest is retained or acquired in an interest in land which is used or expected to be used as the residence of the person to whom credit is extended, the debtor shall have the right to rescind the transaction until midnight of the third business day following the consummation of the transaction or the delivery of the disclosures required under this section and all other material disclosures required by this Act, whichever is later, by notifying the creditor, in accordance with rules of the Administrator, of his intention to do so. The creditor shall clearly and conspicuously disclose, in accordance with rules of the Administrator, to the debtor in a transaction subject to this section the rights of the debtor under this section. The creditor shall also provide, in accordance with rules of the Administrator, an adequate opportunity to the obligor to exercise his right to rescind any transaction subject to this section.

(2) When a debtor exercises his right to rescind under subsection (1), he is not liable for any credit service charge, loan finance charge, or other charge, and any security interest given by the debtor becomes void upon the rescission. Within 10 days after receipt of a notice of rescission, the creditor shall return to the debtor the money or property given as earnest money, down payment, or otherwise, and shall take any action necessary or appropriate to reflect the termination of any security interest created under the transaction. If the creditor has delivered property to the debtor, the debtor may retain possession of it. Upon the performance of the creditor's obligations under this section, the debtor shall tender the property to the creditor, except that if return of the property in kind would be impractical or inequitable, the debtor shall tender its reasonable value. Tender shall be made at the location of the property or at the residence of the debtor, at the option of the debtor. If the creditor does not take possession of the property within 10 days after tender by the debtor, ownership of the property vests in the debtor without obligation on his part to pay for it.

(3) Notwithstanding any rule of evidence, written acknowledgment of receipt of any disclosure required under this Act by a person to whom a statement is required to be given pursuant to this section does no more than create a rebuttable presumption of delivery thereof.

(4) The Administrator may, if he finds that the action is necessary in order to permit homeowners to meet bona fide personal financial emergencies, prescribe rules authorizing the modification or waiver of any rights created under this section to the extent and under the circumstances set forth in those rules.

(5) This section does not apply to the creation or retention of a first lien against a dwelling to finance the acquisition of that dwelling.

COMMENT

This section is derived from CCPA Section 125.

[¶ 966] Refunds and Penalties as Set-Off to Obligation

Sec. 5.205. Refunds or penalties to which the debtor is entitled pursuant to this Part may be set off against the debtor's obligation, and may be raised as a defense to a suit on the obligation without regard to the time limitations prescribed by this Part.

PART 3—CRIMINAL PENALTIES

[¶ 967] Willful Violations

Sec. 5.301. (1) A supervised lender who willfully makes charges in excess of those permitted by the provisions of the Article on Loans (Article 3) applying to supervised loans (Part 5) is guilty of a misdemeanor and upon conviction may be [sentenced to pay a fine not exceeding $[ ], or to imprisonment not exceeding one year, or both].

(2) A person, other than a supervised financial organization, who willfully engages in the business of making supervised loans without a license in violation of the provisions of this Act applying to authority to make supervised loans (Section 3.502) is guilty of a misdemeanor and upon conviction may be [sentenced to pay a fine not exceeding $[ ], or to imprisonment not exceeding one year, or both].

(3) A person who willfully engages in the business of making consumer credit sales, consumer leases, or consumer loans, or of taking assignments of rights against debtors arising therefrom and undertakes direct collection of payments or enforcement of these rights, without complying with the provisions of this Act concerning notification (Section 6.202) or payment of fees (Section 6.203), is guilty of a misdemeanor and upon conviction may be [sentenced to pay a fine not exceeding $100].

[¶ 968] Disclosure Violations

Sec. 5.302. A person who knowingly and willfully violates the provisions on disclosure (Part 3) of the Article on Credit Sales (Article 2) or of the Article on Loans (Article 3) is guilty of a [misdemeanor] and upon conviction may be sentenced to pay a fine not exceeding $5000, or to imprisonment not exceeding one year, or both.

Article 6—Administration

PART 1—POWERS AND FUNCTIONS OF ADMINISTRATOR

[¶ 969] Short Title

Sec. 6.101. This Article shall be known and may be cited as Uniform Consumer Credit Code—Administration.

[¶ 970] Applicability

Sec. 6.102. This Part applies to persons who in this State

(1) make or solicit consumer credit sales, consumer leases, consumer loans, consumer related sales (Section 2.602) and consumer related loans (Section 3.602); or

(2) directly collect payments from or enforce rights against debtors arising from sales, leases, or loans specified in subsection (1), wherever they are made.

[¶ 971] Administrator

Sec. 6.103. "Administrator" means [ ].

COMMENT

In order to obtain the administration that is so vital to the effectiveness of the Uniform Consumer Credit Code, the National Conference recommends centralizing all powers of administration in a single official or agency. In recognition of the fact that in some States a single official or agency either is not constitutionally possible or may not be politically feasible, the Act does not attempt to identify the Administrator. The Administrator may be a single State official or department, two or more State officials or departments, or a Commission. For example in a State in which a single official (*e.g.*, Superintendent or Commissioner of Banks, Banking or Financial Institutions) or a single department (*e.g.*, Banking Department, Commerce Department or Department of Financial Institutions) presently supervises both banks and other financial institutions such as consumer finance companies and sales finance companies, it may be desirable to designate that official or department as the single Administrator. If two or more State officials or departments are to share the powers of the Administrator, the National Conference recommends that a Commission including those officials or departments be designated as Administrator, and that, unless a statutory division of areas of power and authority is provided for, the Commission be given power to prescribe the areas in which the officials or departments who are members of the Commission shall exercise the power and authority of the Administrator.

[¶ 972] Powers of Administrator; Harmony with Federal Regulations; Reliance on Rules; Duty to Report

Sec. 6.104. (1) In addition to other powers granted by this Act, the Administrator may within the limitations provided by law

(a) receive and act on complaints, take action designed to obtain voluntary compliance with this Act, or commence proceedings on his own initiative;

(b) counsel persons and groups on their rights and duties under this Act;

(c) establish programs for the education of consumers with respect to credit practices and problems;

(d) make studies appropriate to effectuate the purposes and policies of this Act and make the results available to the public; [and]

(e) adopt, amend, and repeal substantive rules when specifically authorized by this Act, and adopt, amend, and repeal procedural rules to carry out the provisions of this Act [;

(f) maintain offices within this State; and]

[(g) appoint any necessary attorneys, hearing examiners, clerks, and other employees and agents and fix their compensation, and authorize attorneys appointed under this section to appear for and represent the Administrator in court].

(2) To keep the Administrator's rules in harmony with the Federal Consumer Credit Protection Act and the regulations prescribed from time to time pursuant to that Act by the Board of Governors of the Federal Reserve System and with the rules of administrators in other jurisdictions which enact the Uniform Consumer Credit Code, the Administrator, so far as is consistent with the purposes, policies and provisions of this Act, shall

(a) before adopting, amending, and repealing rules, advise and consult with administrators in other jurisdictions which enact the Uniform Consumer Credit Code; and

(b) in adopting, amending, and repealing rules, take into consideration:

(i) the regulations so prescribed by the Board of Governors of the Federal Reserve System; and

(ii) the rules of administrators in other jurisdictions which enact the Uniform Consumer Credit Code.

(3) Except for refund of an excess charge, no liability is imposed under this Act for an act done or omitted in conformity with a rule of the Administrator notwithstanding that after the act or omission the rule may be amended or repealed or be determined by judicial or other authority to be invalid for any reason.

(4) The Administrator shall report [annually on or before January 1] to the [Governor and Legislature] on the operation of his office, on the use of consumer credit in the State, and on the problems of persons of small means obtaining credit from persons regularly engaged in extending sales or loan credit. For the purpose of making the report, the Administrator is authorized to conduct research and make appropriate studies. The report shall include a description of the examination and investigation procedures and policies of his office, a statement of policies followed in deciding whether to investigate or examine the offices of credit suppliers subject to this Act, a statement of the number and percentages of offices which are periodically investigated or examined, a statement of the types of consumer credit problems of both creditors and debtors which have come to his attention through his examinations and investigations and the disposition of them under existing law, a statement of the extent to which the rules of the Administrator pursuant to this Act are not in harmony with the regulations prescribed by the Board of Governors of the Federal Reserve System pursuant to the Federal Consumer Credit Protection Act or the rules of administrators in other jurisdictions which enact the Uniform Consumer Credit Code and the reasons for such variations, and a general

statement of the activities of his office and of others to promote the purposes of this Act. The report shall not identify the creditors against whom action is taken by the Administrator.

COMMENT

The direction to the Administrator in subsection (2) to keep his rules in harmony with the federal regulations issued pursuant to the CCPA and with the rules of administrators in other jurisdictions which enact the Uniform Consumer Credit Code is derived from the Uniform Narcotic Drug Act Section 1(14)(Alt.).

[¶ 973] Administrative Powers with Respect to Supervised Financial Organizations

Sec. 6.105. (1) With respect to supervised financial organizations, the powers of examination and investigation (Sections 3.506 and 6.106) and administrative enforcement (Section 6.108) shall be exercised by the official or agency to whose supervision the organization is subject. All other powers of the Administrator under this Act may be exercised by him with respect to a supervised financial organization.

(2) If the Administrator receives a complaint or other information concerning non-compliance with this Act by a supervised financial organization, he shall inform the official or agency having supervisory authority over the organization concerned. The Administrator may request information about supervised financial organizations from the officials or agencies supervising them.

(3) The Administrator and any official or agency of this State having supervisory authority over a supervised financial organization are authorized and directed to consult and assist one another in maintaining compliance with this Act. They may jointly pursue investigations, prosecute suits, and take other official action, as they deem appropriate, if either of them is otherwise empowered to take the action.

[¶ 974] Investigatory Powers

Sec. 6.106. (1) If the Administrator has probable cause to believe that a person has engaged in an act which is subject to action by the Administrator, he may make an investigation to determine whether the act has been committed, and, to the extent necessary for this purpose, may administer oaths or affirmations, and upon his own motion or upon request of any party may subpoena witnesses, compel their attendance, adduce evidence, and require the production of any matter which is relevant to the investigation, including the existence, description, nature, custody, condition, and location of any books, documents, or other tangible things and the identity and location of persons having knowledge of relevant facts, or any other matter reasonably calculated to lead to the discovery of admissible evidence.

(2) If the person's records are located outside this State, the person shall, at his option, either make them available to the Administrator at a convenient location within this State, or pay the reasonable and necessary expenses for the Administrator or his representative to examine them at the place where they are maintained. The Administrator may designate representatives, including comparable officials of the State in which the records are located, to inspect them on his behalf.

(3) Upon failure without lawful excuse to obey a subpoena or to give testimony and upon reasonable notice to all persons affected thereby, the Administrator may apply to [ ] court for an order compelling compliance.

(4) The Administrator shall not make public the name or identity of a person whose acts or conduct he investigates pursuant to this section or the facts disclosed in the investigation, but this subsection does not apply to disclosures in actions or enforcement proceedings pursuant to this Act.

COMMENT

Administrator under this section includes the official or agency referred to in Section 6.105(1).

A course of conduct is an act subject to action by the Administrator under subsection (1).

[¶ 975] Application of [Administrative Procedure Act] [Part on Administrative Procedure and Judicial Review]

Sec. 6.107. Except as otherwise provided, the [State administrative procedure act] [Part on Administrative Procedure and Judicial Review (Part 4) of this Article] applies to and governs all administrative action taken by the Administrator pursuant to this Article or the Part on Regulated and Supervised Loans (Part 5) of the Article on Loans (Article 3).

COMMENT

This section subjects actions of the Administrator to the State administrative procedure act, regarding, *inter alia*, adoption of rules, notice and hearing, contested cases, and judicial review. If the State does not have an adequate administrative procedure act providing equivalent procedural and judicial review protections, Part 4 of this Article should be enacted; otherwise, it may be omitted.

[¶ 976] Administrative Enforcement Orders

Sec. 6.108. (1) After notice and hearing the Administrator may order a creditor or a person acting in his behalf to cease and desist from engaging in violations of this Act. A respondent aggrieved by an order of the Administrator may obtain judicial review of the order and the Administrator may obtain an order of the court for enforcement of its order in the [ ] court. The proceeding for review or enforcement is initiated by filing a petition in the court. Copies of the petition shall be served upon all parties of record.

(2) Within 30 days after service of the petition for review upon the Administrator, or within any further time the court may allow, the Administrator shall transmit to the court the original or a certified copy of the entire record upon which the order is based, including any transcript of testimony, which need not be printed. By stipulation of all parties to the review proceeding, the record may be shortened. After hearing, the court may (a) reverse or modify the order if the findings of fact of the Administrator are clearly erroneous in view of the reliable, probative, and substantial evidence on the whole record, (b) grant any temporary relief or restraining order it deems just, and (c) enter an order enforcing, modifying, and enforcing as modified, or setting aside in whole or in part the order of the Administrator, or remanding the case to the Administrator for further proceedings.

(3) An objection not urged at the hearing shall not be considered by the court unless the failure to urge the objection is excused for good cause shown.

A party may move the court to remand the case to the Administrator in the interest of justice for the purpose of adducing additional specified and material evidence and seeking findings thereon upon good cause shown for the failure to adduce this evidence before the Administrator.

(4) The jurisdiction of the court shall be exclusive and its final judgment or decree shall be subject to review by the [ ] court in the same manner and form and with the same effect as in appeals from a final judgment or decree in a [special proceeding]. The Administrator's copy of the testimony shall be available at reasonable times to all parties for examination without cost.

(5) A proceeding for review under this section must be initiated within 30 days after a copy of the order of the Administrator is received. If no proceeding is so initiated, the Administrator may obtain a decree of the [ ] court for enforcement of its order upon a showing that the order was issued in compliance with this section, that no proceeding for review was initiated within 30 days after copy of the order was received, and that the respondent is subject to the jurisdiction of the court.

(6) With respect to unconscionable agreements or fraudulent or unconscionable conduct by the respondent, the Administrator may not issue an order pursuant to this section but may bring a civil action for an injunction (Section 6.111).

COMMENT

If the respondent does not seek review of the Administrator's cease and desist order, this section makes that order final and allows the Administrator to obtain enforcement of it without having to support its findings with substantial evidence.

[¶ 977] Assurance of Discontinuance

Sec. 6.109. If it is claimed that a person has engaged in conduct subject to an order by the Administrator (Section 6.108) or by a court (Sections 6.110 through 6.112), the Administrator may accept an assurance in writing that the person will not engage in the conduct in the future. If a person giving an assurance of discontinuance fails to comply with its terms, the assurance is evidence that prior to the assurance he engaged in the conduct described in the assurance.

[¶ 978] Injunctions Against Violations of Act

Sec. 6.110. The Administrator may bring a civil action to restrain a person from violating this Act and for other appropriate relief.

[¶ 979] Injunctions Against Unconscionable Agreements and Fraudulent or Unconscionable Conduct

Sec. 6.111. (1) The Administrator may bring a civil action to restrain a creditor or a person acting in his behalf from engaging in a course of

(a) making or enforcing unconscionable terms or provisions of consumer credit sales, consumer leases, or consumer loans;

(b) fraudulent or unconscionable conduct in inducing debtors to enter into consumer credit sales, consumer leases, or consumer loans; or

(c) fraudulent or unconscionable conduct in the collection of debts arising from consumer credit sales, consumer leases, or consumer loans.

(2) In an action brought pursuant to this section the court may grant relief only if it finds

(a) that the respondent has made unconscionable agreements or has engaged or is likely to engage in a course of fraudulent or unconscionable conduct;

(b) that the agreements or conduct of the respondent has caused or is likely to cause injury to consumers; and

(c) that the respondent has been able to cause or will be able to cause the injury primarily because the transactions involved are credit transactions.

(3) In applying this section, consideration shall be given to each of the following factors, among others:

(a) belief by the creditor at the time consumer credit sales, consumer leases, or consumer loans are made that there was no reasonable probability of payment in full of the obligation by the debtor;

(b) in the case of consumer credit sales or consumer leases, knowledge by the seller or lessor at the time of the sale or lease of the inability of the buyer or lessee to receive substantial benefits from the property or services sold or leased;

(c) in the case of consumer credit sales or consumer leases, gross disparity between the price of the property or services sold or leased and the value of the property or services measured by the price at which similar property or services are readily obtainable in credit transactions by like buyers or lessees;

(d) the fact that the creditor contracted for or received separate charges for insurance with respect to consumer credit sales or consumer loans with the effect of making the sales or loans, considered as a whole, unconscionable; and

(e) the fact that the respondent has knowingly taken advantage of the inability of the debtor reasonably to protect his interests by reason of physical or mental infirmities, ignorance, illiteracy or inability to understand the language of the agreement, or similar factors.

(4) In an action brought pursuant to this section, a charge or practice expressly permitted by this Act is not in itself unconscionable.

COMMENT

One purpose of this section is to afford the Administrator a means of dealing with new patterns of fraudulent or unconscionable conduct unforeseen and, perhaps, unforeseeable at the writing of this Act. Another is to give him a more flexible remedy for halting reprehensible creditor practices that have been specifically and somewhat rigidly treated in previous consumer credit legislation. For instance, this Act has no specific prohibition against the creditor's allowing the debtor to sign a credit agreement containing blanks. In some situations there may be legitimate reasons for a contract to contain blanks at the time of signing. However, if the creditor deliberately leaves blanks to be filled in after the debtor's signature and without his consent, the Administrator may seek to restrain the practice as fraudulent or unconscionable conduct under this section.

[¶ 980] **Temporary Relief**

Sec. 6.112. With respect to an action brought to enjoin violations of the Act (Section 6.110) or unconscionable agreements or fraudulent or uncon-

sciensable conduct (Section 6.111), the Administrator may apply to the court for appropriate temporary relief against a respondent, pending final determination of proceedings. If the court finds after a hearing held upon notice to the respondent that there is reasonable cause to believe that the respondent is engaging in or is likely to engage in conduct sought to be restrained, it may grant any temporary relief or restraining order it deems appropriate.

[¶ 981] Civil Actions by Administrator

Sec. 6.113. (1) After demand, the Administrator may bring a civil action against a creditor for making or collecting charges in excess of those permitted by this Act. An action may relate to transactions with more than one debtor. If it is found that an excess charge has been made, the court shall order the respondent to refund to the debtor or debtors the amount of the excess charge. If a creditor has made an excess charge in deliberate violation of or in reckless disregard for this Act, or if a creditor has refused to refund an excess charge within a reasonable time after demand by the debtor or the Administrator, the court may also order the respondent to pay to the debtor or debtors a civil penalty in an amount determined by the court not in excess of the greater of either the amount of the credit service or loan finance charge or ten times the amount of the excess charge. Refunds and penalties to which the debtor is entitled pursuant to this subsection may be set off against the debtor's obligation. If a debtor brings an action against a creditor to recover an excess charge or civil penalty, an action by the Administrator to recover for the same excess charge or civil penalty shall be stayed while the debtor's action is pending and shall be dismissed if the debtor's action is dismissed with prejudice or results in a final judgment granting or denying the debtor's claim. With respect to excess charges arising from sales made pursuant to revolving charge accounts or from loans made pursuant to revolving loan accounts, no action pursuant to this subsection may be brought more than two years after the time the excess charge was made. With respect to excess charges arising from other consumer credit sales or consumer loans, no action pursuant to this subsection may be brought more than one year after the due date of the last scheduled payment of the agreement pursuant to which the charge was made. If the creditor establishes by a preponderance of evidence that a violation is unintentional or the result of a bona fide error, no liability to pay a penalty shall be imposed under this subsection.

(2) The Administrator may bring a civil action against a creditor or a person acting in his behalf to recover a civil penalty for willfully violating this Act, and if the court finds that the defendant has engaged in a course of repeated and willful violations of this Act, it may assess a civil penalty of no more than $5,000. No civil penalty pursuant to this subsection may be imposed for violations of this Act occurring more than two years before the action is brought or for making unconscionable agreements or engaging in a course of fraudulent or unconscionable conduct.

[¶ 982] Jury Trial

Sec. 6.114. In an action brought by the Administrator under this Act, he has no right to trial by jury.

[¶ 983] Debtors' Remedies Not Affected

Sec. 6.115. The grant of powers to the Administrator in this Article does not affect remedies available to debtors under this Act or under other principles of law or equity.

[¶ 984] [Venue]

[**Sec. 6.116.** The Administrator may bring actions or proceedings in a court in a county in which an act on which the action or proceeding is based occurred or in a county in which respondent resides or transacts business.]

COMMENT

This section is bracketed because it may be unnecessary in some States because of adequate venue rules in those states.

PART 2—NOTIFICATION AND FEES

[¶ 985] Applicability

Sec. 6.201. This Part applies to a person making in this State consumer credit sales, consumer leases, or consumer loans and to a person having an office or place of business in this State who takes assignments of and undertakes direct collection of payments from or enforcement of rights against debtors arising from these sales, leases, or loans.

[¶ 986] Notification

Sec. 6.202. (1) Persons subject to this Part shall file notification with the Administrator within 30 days after commencing business in this State, and, thereafter, on or before January 31 of each year. The notification shall state:

(a) name of the person;

(b) name in which business is transacted if different from (1);

(c) address of principal office, which may be outside this State;

(d) address of all offices or retail stores, if any, in this State at which consumer credit sales, consumer leases, or consumer loans are made, or in the case of a person taking assignments of obligations, the offices or places of business within this State at which business is transacted;

(e) if consumer credit sales, consumer leases, or consumer loans are made otherwise than at an office or retail store in this State, a brief description of the manner in which they are made;

(f) address of designated agent upon whom service of process may be made in this State (Section 1.203); and

(g) whether regulated or supervised loans or both are made.

(2) If information in a notification becomes inaccurate after filing, no further notification is required until the following January 31.

[¶ 987] **Fees**

Sec. 6.203. (1) A person required to file notification shall on or before January 31 of each year pay to the [Administrator] an annual fee of $10 for that year.

(2) Persons required to file notification who are sellers, lessors, or lenders shall pay an additional fee at the time and in the manner stated in subsection (1) of $10 for each $100,000, or part thereof, in excess of $100,000, of the original unpaid balances arising from consumer credit sales, consumer leases, and consumer loans made in this State within the preceding calendar year and held either by the seller, lessor, or lender for more than 30 days after the inception of the sale, lease, or loan giving rise to the obligations, or by an assignee who has not filed notification. A refinancing of a sale, lease, or loan resulting in an increase in the amount of an obligation is considered a new sale, lease, or loan to the extent of the amount of the increase.

(3) Persons required to file notification who are assignees shall pay an additional fee at the time and in the manner stated in subsection (1) of $10 for each $100,000, or part thereof, of the unpaid balances at the time of the assignment of obligations arising from consumer credit sales, consumer leases, and consumer loans made in this State taken by assignment during the preceding calendar year, but an assignee need not pay a fee with respect to an obligation on which the assignor or other person has already paid a fee.

PART 3—COUNCIL OF ADVISORS ON CONSUMER CREDIT

[¶ 988] **Council of Advisors on Consumer Credit**

Sec. 6.301. (1) There is hereby created the Council of Advisors on Consumer Credit consisting of [16] members, who shall be appointed by the Governor. One of the Advisors shall be designated by the Governor as Chairman. In appointing members of the Council, the Governor shall seek to achieve a fair representation from the various segments of the consumer credit industry and the public.

(2) The term of office of each member of the Council is [4] years. Of those members first appointed, [four] shall be appointed for a term of [1] year, [four] for a term of [2] years, [four] for a term of [3] years, and [four] for a term of [4] years. A member chosen to fill a vacancy arising otherwise than by expiration of term shall be appointed for the unexpired term of the member whom he is to succeed. A member of the Council is eligible for reappointment.

(3) Members of the Council shall serve without compensation but are entitled to reimbursement of expenses incurred in the performance of their duties.

[¶ 989] **Function of Council; Conflict of Interest**

Sec. 6.302. The Council shall advise and consult with the Administrator concerning the exercise of his powers under this Act and may make recommendations to him. Members of the Council may assist the Administrator in obtaining compliance with this Act. Since it is an objective of this Part to obtain competent representatives of creditors and the public to serve on the Council and to assist and cooperate with the Administrator in achieving the objectives of this Act, service on the Council shall not in itself constitute a conflict of interest regardless of the occupations or associations of the members.

[¶ 990] **Meetings**

Sec. 6.303. The Council and the Administrator shall meet together at a time and place designated by the Chairman at least twice each year. The Council may hold additional meetings when called by the Chairman.

[PART 4—ADMINISTRATIVE PROCEDURE AND JUDICIAL REVIEW]

[¶ 991] **[Applicability and Scope]**

[Sec. 6.401. This Part applies to the Administrator, prescribes the procedures to be observed by him in exercising his powers under this Act, and supplements the provisions of the Part on Powers and Functions of Administrator (Part 1) of this Article and of the Part on Regulated and Supervised Loans (Part 5) of the Article on Loans (Article 3).]

[¶ 992] **[Definitions in Part]**

[Sec. 6.402. In this Part (1) "Contested case" means a proceeding, including but not restricted to one pursuant to the provisions on administrative enforcement orders (subsection (1) of Section 6.108) and licensing, in which the legal rights, duties, or privileges of a party are required by law to be determined by the Administrator after an opportunity for hearing.

(2) "License" means a license authorizing a person to make supervised loans pursuant to the provisions on authority to make supervised loans (Section 3.502).

(3) "Licensing" includes the Administrator's process respecting the grant, denial, revocation, suspension, annulment, withdrawal, or amendment of a license.

(4) "Party" means the Administrator and each person named or admitted as a party, or who is aggrieved by action taken and seeks to be admitted as a party.

(5) "Rule" means each rule specifically authorized by this Act that applies generally and implements, interprets or prescribes law or policy, or each statement by the Administrator that applies generally and describes the Administrator's procedure or practice requirements or the organization of his office. The term includes the amendment or repeal of a prior rule but does not include

(a) statements concerning only the internal management of the Administrator's office and not affecting private rights or procedures available to the public;

(b) declaratory rulings issued pursuant to the provisions on declaratory rulings by Administrator (Section 6.409); or

(c) intra-office memoranda.]

COMMENT

These definitions are derived from Section 1 of the Uniform Law Commissioners' Revised Model State Administrative Procedure Act (hereinafter referred to as the "Revised Model Act").

[¶ 993] [Public Information; Adoption of Rules; Availability of Rules and Orders]

[Sec. 6.403. (1) In addition to other rule-making requirements imposed by law, the Administrator shall:

(a) adopt as a rule a description of the organization of his office, stating the general course and method of the operations of his office and the methods whereby the public may obtain information or make submissions or requests;

(b) adopt rules of practice setting forth the nature and requirements of all formal and informal procedures available, including a description of all forms and instructions used by the Administrator or his office;

(c) make available for public inspection all rules and all other written statements of policy or interpretations formulated, adopted, or used by the Administrator in the discharge of his functions:

(d) make available for public inspection all final orders, decisions, and opinions.

(2) No rule, order, or decision of the Administrator is valid or effective against any person or party, nor may it be invoked by the Administrator for any purpose, until it has been made available for public inspection as herein required. This provision is not applicable in favor of any person or party who has actual knowledge thereof.]

COMMENT

This Section is derived from Section 2 of the Revised Model Act.

[¶ 994] [Procedure for Adoption of Rules]

[Sec. 6.404. (1) Prior to the adoption, amendment, or repeal of any rule, the Administrator shall

(a) give at least 20 days' notice of his intended action. The notice shall include a statement of either the terms or substance of the intended action or a description of the subjects and issues involved, and the time when, the place where, and the manner in which interested persons may present their views thereon. The notice shall be mailed to all persons who have made timely request of the Administrator for advance notice of his rule-making proceedings and shall be published in [here insert the medium of publication appropriate for the adopting State],

(b) afford all interested persons reasonable opportunity to submit data, views, or arguments, orally or in writing. In case of substantive rules, opportunity for oral hearing must be granted if requested by 25 persons, by a governmental subdivision or agency, or by an association having not less than 25 members. The Administrator shall consider fully all written and oral submissions respecting the proposed rule. Upon adoption of a rule the Administrator, if requested to do so by an interested person either prior to adoption or within 30 days thereafter, shall issue a concise statement of the principal reasons for and against its adoption, incorporating therein his reasons for overruling the considerations urged against its adoption.

(2) No rule is valid unless adopted in substantial compliance with this section. A proceeding to contest any rule on the ground of non-compliance with the procedural requirements of this section must be commenced within 2 years from the effective date of the rule.]

COMMENT

This Section is derived from Section 3 of the Revised Model Act.

[¶ 995] [Filing and Taking Effect of Rules]

[Sec. 6.405. (1) The Administrator shall file in the office of the [Secretary of State] a certified copy of each rule adopted by him. The [Secretary of State] shall keep a permanent register of the rules open to public inspection.

(2) Each rule hereafter adopted is effective 20 days after filing, except that, if a later date is specified in the rule, the later date is the effective date.]

COMMENT

This Section is derived from Section 4 of the Revised Model Act.

[¶ 996] [Publication of Rules]

[Sec. 6.406. (1) The [Secretary of State] shall compile, index, and publish all effective rules adopted by the Administrator. Compilations shall be supplemented or revised as often as necessary.

(2) Compilations shall be made available upon request to [agencies and officials of this State] free of charge and to other persons at prices fixed by the [Secretary of State] to cover mailing and publication costs.]

COMMENT

This Section is derived from Section 5 of the Revised Model Act.

[¶ 997] [Petition for Adoption of Rules]

[Sec. 6.407. An interested person may petition the Administrator requesting the promulgation amendment, or repeal of a rule. The Administrator shall prescribe by rule the form for petitions and the procedure for their submission, consideration, and disposition. Within 30 days after submission of a petition, the Administrator either shall deny the petition in writing (stating his reasons for the denials) or shall initiate rule-making proceedings in accordance with the provisions on procedure for adoption of rules (Section 6.404).]

COMMENT

This Section is derived from Section 6 of the Revised Model Act.

[¶ 998] [Declaratory Judgment on Validity or Applicability of Rules]

[Sec. 6.408. The validity or applicability of a rule may be determined in an action for declaratory judgment in the [. . . court], if it is alleged

that the rule, or its threatened application, interferes with or impairs, or threatens to interfere with or impair, the legal rights or privileges of the plaintiff. The Administrator shall be made a party to the action. A declaratory judgment may be rendered whether or not the plaintiff has requested the Administrator to pass upon the validity or applicability of the rule in question.]

COMMENT

This Section is derived from Section 7 of the Revised Model Act.

[¶ 999] [Declaratory Rulings by Administrator]

[**Sec. 6.409.** The Administrator shall provide by rule for the filing and prompt disposition of petitions or declaratory rulings as to the applicability of any statutory provision or of any rule of the Administrator. Rulings disposing of petitions have the same status as decisions or orders in contested cases.]

COMMENT

This Section is derived from Section 8 of the Revised Model Act.

[¶ 1000] [Contested Cases; Notice; Hearing; Records]

[**Sec. 6.410.** (1) In a contested case, all parties shall be afforded an opportunity for hearing after reasonable notice.

(2) The notice shall include:

(a) a statement of the time, place, and nature of the hearing;

(b) a statement of the legal authority and jurisdiction under which the hearing is to be held;

(c) a reference to the particular provisions of the statutes and rules involved;

(d) a short and plain statement of the matters asserted. If the Administrator or other party is unable to state the matters in detail at the time the notice is served, the initial notice may be limited to a statement of the issues involved. Thereafter upon application a more definite and detailed statement shall be furnished.

(3) Opportunity shall be afforded all parties to respond and present evidence and argument on all issues involved.

(4) Unless precluded by law, informal disposition may be made of any contested case by stipulation, agreed settlement, consent order, or default.

(5) The record in a contested case shall include:

(a) all pleadings, motions, intermediate rulings;

(b) evidence received or considered;

(c) a statement of matters officially noticed;

(d) questions and offers of proof, objections, and rulings thereon;

(e) proposed findings and exceptions;

(f) any decision, opinion, or report by the officer presiding at the hearing;

(g) all staff memoranda or data submitted to the hearing officer or members of the office of the Administrator in connection with their consideration of the case.

(6) Oral proceedings or any part thereof shall be transcribed on request of any party [, but at his expense].

(7) Findings of fact shall be based exclusively on the evidence and on matters officially noticed.]

COMMENT

This Section is derived from Section 9 of the Revised Model Act.

[¶ 1001] [Rules of Evidence; Official Notice]

[**Sec. 6.411.** In contested cases:

(1) irrelevant, immaterial, or unduly repetitious evidence shall be excluded. The rules of evidence as applied in [non-jury] civil cases in the [. . . court of this State] shall be followed. When necessary to ascertain facts not reasonably susceptible of proof under those rules, evidence not admissible thereunder may be admitted (except where precluded by statute) if it is of a type commonly relied upon by reasonably prudent men in the conduct of their affairs. The Administrator shall give effect to the rules of privilege recognized by law. Objections to evidentiary offers may be made and shall be noted in the record. Subject to these requirements, when a hearing will be expedited and the interests of the parties will not be prejudiced substantially, any part of the evidence may be received in written form;

[(2) documentary evidence may be received in the form of copies or excerpts, if the original is not readily available. Upon request, parties shall be given an opportunity to compare the copy with the original;]

(3) a party may conduct cross-examinations required for a full and true disclosure of the facts;

(4) notice may be taken of judicially cognizable facts. In addition, notice may be taken of generally recognized technical or scientific facts within the Administrator's specialized knowledge. Parties shall be notified either before or during the hearing, or by reference in preliminary reports or otherwise, of the material noticed, including any staff memoranda or data, and they shall be afforded an opportunity to contest the material so noticed. The Administrator's experience, technical competence, and specialized knowledge may be utilized in the evaluation of the evidence.]

COMMENT

This Section is derived from Section 10 of the Revised Model Act.

[¶ 1002] [Decisions and Orders]

[**Sec. 6.412.** A final decision or order adverse to a party in a contested case shall be in writing or stated in the record. A final decision shall include findings of fact and conclusions of law, separately stated. Findings of fact, if set forth in statutory language, shall be accompanied by a concise and explicit statement of the underlying facts supporting the findings. If, in accordance with rules of the Administrator, a party submitted proposed findings of

fact, the decision shall include a ruling upon each proposed findings. Parties shall be notified either personally or by mail of any decision or order. Upon request a copy of the decision or order shall be delivered or mailed forthwith to each party and to his attorney of record.]

COMMENT

This Section is derived from Section 12 of the Revised Model Act.

[¶ 1003] [Licenses]

[Sec. 6.413. (1) When the grant or denial of a license is required to be preceded by notice and opportunity for hearing, the provisions of this Part concerning contested cases apply.

(2) No revocation, suspension, annulment, or withdrawal of a license is lawful unless, prior to the institution of proceedings by the Administrator, he gave notice by mail to the licensee of facts or conduct which warrant the intended action, and the licensee was given an opportunity to show compliance with all lawful requirements for the retention of the license.]

COMMENT

This Section is derived from Section 14 of the Revised Model Act.

[¶ 1004] [Judicial Review of Contested Cases]

[Sec. 6.414. (1) A person who has exhausted all administrative remedies available before the Administrator and who is aggrieved by a final decision in a contested case is entitled to judicial review under this Part. This section does not limit utilization of or the scope of judicial review available under other means of review, redress, relief, or trial de novo provided by law. A preliminary, procedural, or intermediate action or ruling of the Administrator is immediately reviewable if review of the final decision of the Administrator would not provide an adequate remedy.

(2) Proceedings for review are instituted by filing a petition in the [. . . court] within [30] days after [mailing notice of] the final decision of the Administrator or, if a rehearing is requested, within [30] days after the decision thereon. Copies of the petition shall be served upon the Administrator and all parties of record.

(3) The filing of the petition does not itself stay enforcement of the decision of the Administrator. The Administrator may grant, or the reviewing court may order, a stay upon appropriate terms.

(4) Within [30] days after the service of the petition, or within further time allowed by the court, the Administrator shall transmit to the reviewing court the original or a certified copy of the entire record of the proceeding under review. By stipulation of all parties to the review proceedings, the record may be shortened. A party unreasonably refusing to stipulate to limit the record may be taxed by the court for the additional costs. The court may require or permit subsequent corrections or additions to the record.

(5) If, before the date set for hearing, application is made to the court for leave to present additional evidence, and it is shown to the satisfaction of

the court that the additional evidence is material and that there were good reasons for failure to present it in the proceeding before the Administrator, the court may order that the additional evidence be taken before the Administrator upon conditions determined by the court. The Administrator may modify his findings and decision by reason of the additional evidence and shall file that evidence and any modifications, new findings, or decisions with the reviewing court.

(6) The review shall be conducted by the court without a jury and shall be confined to the record. In cases of alleged irregularities in procedure before the Administrator, not shown in the record, proof thereon may be taken in the court. The court, upon request, shall hear oral argument and receive written briefs.

(7) The court shall not substitute its judgment for that of the Administrator as to the weight of the evidence on questions of fact. The court may affirm the decision of the Administrator or remand the case for further proceedings. The court may reverse or modify the decision if substantial rights of the appellant have been prejudiced because the administrative findings, inferences, conclusions, or decisions are:

(a) in violation of constitutional or statutory provisions;

(b) in excess of the statutory authority of the Administrator;

(c) made upon unlawful procedure;

(d) affected by other error of law;

(e) clearly erroneous in view of the reliable, probative, and substantial evidence on the whole record; or

(f) arbitrary or capricious or characterized by abuse of discretion or clearly unwarranted exercise of discretion.]

COMMENT

This Section is derived from Section 15 of the Revised Model Act.

[¶ 1005] [Appeals]

[**Sec. 6.415.** An aggrieved party may obtain a review of any final judgment of the [. . . court] under this Part by appeal to the [. . . court]. The appeal shall be taken as in other civil cases.]

Article 7.—Reserved for Future Use

Note: Provisions concerning consumer credit counseling agencies are being considered by the Special Committee and, if approved by the National Conference after 1968, will be proposed as Article 7 of the Uniform Consumer Credit Code.

Article 8.—Reserved for Future Use

Note: Provisions concerning wage earner receiverships are being considered by the Special Committee and, if approved by the National Conference after 1968, will be proposed as Article 8 of the Uniform Consumer Credit Code.

Article 9.—Effective Date and Repealer

[¶ 1006] Time of Taking Effect; Provisions for Transition

Sec. 9.101. (1) Except as otherwise provided in this section, this Act takes effect at 12:01 a. m. on [ ].

(2) To the extent appropriate to permit the Administrator to prepare for operation of this Act when it takes effect and to act on applications for licenses to make supervised loans under this Act (subsection (1) of Section 3.503), the Part on Regulated and Supervised Loans (Part 5) of the Article on Loans (Article 3) and the Article on Administration (Article 6) takes effect [ ].

Note: Insert in lieu of brackets at the end of subsection (2) either "immediately" or the earliest time possible under the constitutional or statutory requirements of the enacting State.

(3) Transactions entered into before this Act takes effect and the rights, duties, and interests flowing from them thereafter may be terminated, completed, consummated, or enforced as required or permitted by any statute, rule of law, or other law amended, repealed, or modified by this Act as though the repeal, amendment, or modification had not occurred, but this Act applies to

(a) refinancings, consolidations, and deferrals made after this Act takes effect of sales, leases, and loans whenever made;

(b) sales or loans made after this Act takes effect pursuant to revolving charge accounts (Section 2.108) and revolving loan accounts (Section 3.108) entered into, arranged, or contracted for before this Act takes effect; and

(c) all credit transactions made before this Act takes effect insofar as the article on remedies and penalties (Article 5) limits the remedies of creditors.

(4) With respect to revolving charge accounts (Section 2.108) and revolving loan accounts (Section 3.108) entered into, arranged, or contracted for before this Act takes effect, disclosure pursuant to the provisions on disclosure (Section 2.310 and Section 3.309), shall be made not later than 30 days after this Act takes effect.

COMMENT

The 30-day period in subsection (4) is derived from CCPA Section 127(c).

[¶ 1007] Continuation of Licensing

Sec. 9.102. All persons licensed or otherwise authorized under the provisions of [list statutes] on the effective date of this Act are licensed to make supervised loans under this Act pursuant to the Part on Regulated and Supervised Loans (Part 5) of the Article on Loans (Article 3), and all provisions of that Part apply to the persons so previously licensed or authorized. The Administrator may, but is not required to, deliver evidence of licensing to the persons so previously licensed or authorized.

COMMENT

This section provides automatic licensing under Article 3, Part 5, for all lenders previously licensed under the State's licensed lender statutes prior to the effective date.

No application or administrative action is required and the formal license under the prior statute, which will be repealed, will be a license under Part 5 of Article 3. The Administrator may, at such time as his new duties under the Code permit him an opportunity, substitute new licenses for those in the lenders' possession, but this is entirely a ministerial act.

[¶ 1008] Specific Repealer and Amendments

Sec. 9.103. (1) The following acts and parts of acts are repealed:

(a)

(b)

(c) [and so on]

(2) The following acts and parts of acts are amended:

(a)

(b)

(c) [and so on]

Note re Repealer and Amendatory Provisions

This Act is a comprehensive statute designed to regulate most aspects of consumer credit, maximum charges that may be made for consumer credit and rates of interest generally. Consumer credit covered includes sales credit related to the sale to consumers of goods or services, consumer loan credit, some credit related to the sale or financing of homes and some agricultural credit. All States have one or more acts regulating consumer credit and rates of interest and in many States additional provisions performing the same function appear in various other acts. To accommodate existing law to this Act, each State enacting this Act will need to repeal one or more existing acts or particular provisions in acts and may have to amend one or more other acts. The purpose of this Note is to suggest to the statutory revisor or other person preparing this Act for introduction into a particular State Legislature the acts which should be repealed or amended. To produce the uniformity which the Commissioners believe desirable, acts should be repealed or amended as recommended in this Note.

Acts to Be Totally or Substantially Repealed

Subject to other specific suggestions of this Note, certain existing acts devoted primarily to regulating consumer credit should be repealed in their entirety. The revisor or draftsman should insert in this section the appropriate statutes or provisions to be repealed. To help guide the search for these acts or provisions, a list of some of the common popular names of these acts follow, although there may be others in any particular jurisdiction:

Small loan acts, personal loan acts, consumer loan acts and acts licensing personal loan lenders, sales finance companies and consumer finance companies.

Instalment loan laws.

Retail instalment sales acts, motor vehicle instalment sales acts, all goods acts.

Revolving sales credit acts, revolving loan acts.

Truth-in-lending acts.

Home solicitation sales acts.

Home improvement sales and loan acts.

Insurance premium financing acts.

Acts Imposing Maximum Charges for Credit and General Usury Acts

Repeal of the above listed consumer credit regulatory acts will automatically repeal provisions in these acts imposing maximum charges for the types of credit dealt with in the acts. In addition, all general usury statutes and all other provisions in acts imposing maximum charges for loans, forbearance or the extension of credit should be repealed, excepting only provisions, if any, for maximum charges to be made by pawnbrokers.

Statutes providing for a "legal rate" of interest, that is, the rate to be applied for judgments, notes and other cases where

there is no agreed rate or no agreement is possible (as in a judgment) should not be repealed. If these statutes are so intertwined with maximum contract rates, *e.g.*, usury provisions, that it is difficult to separate the two types of provisions, total repeal of the usury and legal rate statute plus the addition of the following provision in this Act or elsewhere in the State statutes may be in order:

"If there is no agreement or provision of law for a different rate, the interest of money shall be at the rate of six percent per annum."

Provisions of Existing Statutes Affecting Powers of Organizations

In some States provisions relating to rates of interest are intertwined with provisions relating to powers of particular types of organizations, *e.g.*, small loan and sales finance companies, commercial banks and thrift institutions. In these cases provisions should be repealed, preserved or amended to comply with Section 1.108 of this Act. As indicated in Section 1.108, provisions relating to maximum charges should be repealed in all cases (subsection (1) of Section 1.108), provisions prescribing maximum amount or duration of any consumer credit sale or consumer loan should be repealed in statutes applicable to sellers, small loan companies consumer and sales finance companies, commercial banks and trust companies (subsection (2) of Section 1.108), and other provisions granting or limiting powers of organizations should be preserved (subsections (3) and (4) of Section 1.108).

Industrial Banks, Morris Plan Banks and the Like

As a result of evolutionary development industrial banks and Morris Plan banks made small loans at effective rates and in a manner similar to small loan companies but they also have power to receive deposits. In statutes providing for banks of this type, only those provisions prescribing maximum rates and regulations of the kind applied to small loan companies should be repealed. Provisions authorizing the organization of these banks and the receipt of deposits by them should be preserved.

CHAPTER I

INTRODUCTION

Purpose of the Study

This research was designed to determine the economic impacts of Initiative 245. The Initiative was passed by a vote of the people of the State of Washington in the general election of November 5, 1968. Its principal provision limited the interest rate (or "service charge") which could be assessed legally on various kinds of consumer credit to 12 per cent per year computed monthly at a rate of 1 per cent per month. It related to installment plans, revolving credit plans and credit cards whether these devices were used by retailers or financial institutions. The state has a basic usury law, limiting interest to 12 per cent annually, which had been amended earlier to permit a charge of 18 per cent per year (1 1/2 per cent per month) on retail credit contracts.[1] Bank credit cards were classified in an opinion by the Washington Attorney General as "retail contracts," making them eligible for the 18 per cent charge.[2] Initiative 245 reduced the maximum rate on retail credit from 18 to 12 per cent.

The Initiative did not affect the rates charged by small loan companies. They still may charge 3 per cent per month (36 per cent per year) on loans under $300, 1 1/2 per cent per month (18 per cent per year) on loans between $300 and $500, and 1 per cent per month (12 per cent per year) on loans over $500. Further, since state usury laws already limited banks to 12 per cent per year--except for credit cards which have a legal status similar to other forms of retail credit--the effect on banks was the removal of the retail credit exception to the usury laws.

Study Objectives

The study set out to determine:

1. What changes in credit policies, due to management decisions, have occurred as a result of the passage of the law.
2. What price changes, if any, are related to the new law.
3. What changes stemming from the new law have occurred in retail sales patterns (such as total retail sales and cash/credit sales relationships).
4. What effects on consumers can be inferred from the information obtained.

Procedure

There were five principal elements of the study. These were (1) a survey of the literature, (2) a field survey of retailers, banks and small-loan companies utilizing personal interviews, (3) a series of price-comparison studies in which identical items were priced in Seattle and Los Angeles to determine the extent of price movements during the second quarter of 1969 with the objective of relating price changes to the law, (4) a number of surveys of aggregative data sources as a check against questionnaire responses and intra-firm data of several kinds, and (5) certain special studies to see to what extent data on topics such as credit insurance, auto dealer pricing and gross margins, auto and appliance financing methods and sales contract registrations with county auditors could provide by way of evidence of the impact of the law.

Survey of the Literature. The literature was examined for both theoretical and empirical content.

Field Survey (personal interviews) of Retailers, Banks and Small Loan Companies. This was carried out during the third quarter of 1969. The questionnaires which were used are shown in the Appendix.

The business firms surveyed were as follows: (in some cases a complete census approach was used)

1. Census of banks.
2. Census of department stores.

3. Census of chain small loan institutions and a sample of smaller ones.
4. The largest furniture and appliance stores and a sample of smaller ones.
5. Sample of new auto dealers.
6. Sample of used auto dealers.

Responses to the questionnaires were obtained through personal interviews. The specific respondents selected, by institution, were:

1. Banks: Vice President (or other title designating chief officer) for consumer credit division
2. Department Stores: Credit Manager
3. Small Loan Companies: President or Manager
4. Large Furniture and Appliance Stores: Credit Manager
5. Small Furniture and Appliance Stores: Owner or Manager
6. Large Auto Dealers: Credit Manager
7. Small Auto Dealers: Owner or Manager

When data had been gathered from these questionnaires, they were tabulated and analyzed.

Pricing Studies of Credit Sensitive Items. Working from a list of brands (by specific model numbers) prices were recorded from price books and/or sales tags on refrigerators, washing machines, dryers, cooking ranges, and colored television sets in stores in Seattle and Los Angeles. The list was made up by the comparison shopping bureau of a large retailer. The list included descriptions, brand names, model numbers, pictures and additional identification materials. Items were "shopped" in conventional department stores, Sears Roebuck and J. C. Penney department stores, discount houses and appliance stores. This procedure, which was used in the first two price surveys (April 1969 and August 1969) was found to have the weakness that too few of specific model numbers appeared in both markets. Hence in the third price survey (January 1970) a new list of specific model numbers was prepared through field work in Seattle and which permitted the identification of 30 or more models of particular appliances in both Los Angeles and Seattle markets.

Survey of Aggregative Data Sources. To determine the extent to which published and unpublished data from secondary sources verified the survey results, data were collected, tabulated and analyzed. Relevant data were obtained from the following sources:

1. Federal Agencies. In addition to a variety of publications additional information was obtained through calls on the offices of the Federal Reserve Board and the Federal Deposit Insurance Corporation.
2. State Agencies. These included all of the agencies dealing with financial institutions, retailing institutions, insurance institutions, motor vehicles and general economic information. Existing publications of the agencies were supplemented with special tabulations available from computer storage but not yet published.
3. Relevant trade associations.

The kinds of data were quite varied and in addition to the verification purpose mentioned above, were used to determine changes in local economic conditions and, for purposes of comparison, the state economy with the national economy.

Special Studies. In addition to data from the State Insurance Commissioner and insurance trade associations, data were obtained from private insurance companies involved in credit insurance. We were thus provided with data on all of the credit insurance business done in the state for 1968 and 1969.

Since two large automobile dealers were willing to open their records, a detailed study of auto dealer sales contracts was made for the periods 1968 and 1969 to determine changes that had occurred in types of credit employed, credit criteria and the credit roles of the firms involved.

One large national manufacturer of automobiles provided complete records for the state necessary to determine dealer pricing and gross margin changes. It also provided similar information on the State of Oregon which does not have a credit limitation law.

A complete tabulation of installment sale registrations was made from the records of the King County (which includes Seattle) Auditor's records. The

periods covered were the twelve months prior to December 5, 1968 (before the law took effect) and the twelve months following. These data showed the types of financial institutions involved and the firms from which purchases were made This was followed by a re-survey of the institutions making the registrations to determine the extent to which management policies were responsible for observable trends.

Economic Environment of the Study

Ideally, for purposes of investigating the impacts of Initiative 245, the study would have been conducted in an environment in which all other economic factors would have remained somewhat equal. Unfortunately, this was not the case. Attempts to verify the statements of businessmen obtained in field interviews through analyzing external or aggregative data were made difficult by the changes in the economy other than the Initiative and its effects. The impacts which might have been expected from the change in the law were in the same direction as impacts which might be expected from the tightness and cost of money, economic recession in the area, and inflation. The first two (interest rates and recession) were strongly influenced by federal monetary policy, and the third--inflation--seemed beyond the reach of federal monetary policy during the period of the study. Hence, it is important at this point to describe the economic environment pertaining at the time of the research for this report.

There is ample evidence available on the behavior of the Washington state and the United States economies since January of 1968 to suggest that a number of highly adverse economic influences have prevailed. That is, from the point of view of the businesses in the state all costs of doing business have continued to spiral on the supply side and the growth of revenues has noticeably slackened in most sectors on the demand side.

The behavior of these elements in the economy is affected by many economic variables which add to the results from the reduction of business revenues with the imposition of a 12 per cent interest rate ceiling. Needless to say, it is difficult to sort out, quantify, and measure the pure effects of rate ceiling change when other economic factors introduce high degrees of variability.

It is the purpose of this section then to point out the behavior of several of the more indicative and influential macro-economic factors at work in the environment during the period in which this study analyzed the impacts from Initiative 245.

On the supply side the wholesale price index nationally for durables continued to climb. In January 1968 it was 103.0 for furniture and household durables and by January of 1969 it had risen to 105.3, up 2.3 points. As of June 1970, it was 108.6, up 5.6 from the beginning of the time period under study.

By the same token, the lowest possible cost of money to business (the prime rate) rose from 6.0 per cent in November 1967 to 7.0 per cent by January 1969, and to the high of 8.5 per cent on June 19, 1969. (See Table I-1.)

TABLE I-1

THE PRIME RATE

Date	Prime Rate
November 20, 1967	6.00%
April 19, 1968	6.50
September 25, 1968	6.00-6.25

March 25, 1970	8.00
September 25, 1970*	7.50

*Prediction as of September 23, 1970.

Source: Manufactures Hanover Trust Special Report, June 1970.

This represents an increase of at least 2.5 per cent in the cost to businesses of financing inventories, trade credit and consumer credit during the study period.

On the demand side the economic indicators are as equally bleak. Tables I-2, I-3 and I-4 clearly indicate a substantial decline in buying power both at the state and national level with above average increases in the unemployment rate occurring at the state level. While the unemployment rate increased through 1969 at the state level it remained quite stable through 1969 at the national level. When both 1968-1969 and 1969-1970 changes are compared for Washington state it is found that while the unemployment rate in 1969 was only 4.09 in January of 1968, it was 4.65 in 1969 and continued to rise to 5.29 in January of 1970.

There is evidence that unemployment rates might be worse if businessmen reacted more strongly to their problems. The Seattle-First National Bank Newsletter in mid-1970 stated:

> Everyone talks about higher costs (labor) and the squeeze on profits; inventories are being closely controlled and staff has been reduced here and there; quite a number of retail establishments have absorbed cost increases; the consumer is getting a break.[1]

Since the beginning of the study the state unemployment rate has always been higher and climbing at a faster rate than that of the national average. Hence, the impact on demand of goods and services could conceivably be quite large.

The Consumer Price Index (Tables I-5, I-6 and I-7) reflect the behavior of prices in the Seattle area when compared with the U.S. average. Traditionally, Seattle indices are higher than national averages. As demand slackens it is to be expected that the state and national indices will more nearly equate and that occurred in early 1970 (see Table I-5). Throughout the period of the study the Seattle consumer price index for all goods has declined relative to U.S. averages to reflect the depressed demand situation that faces state businesses.

Table I-8, which lists a variety of indicators, further supports the decline in demand proposition and in a number of instances where the U.S. rates are up substantially the state rate is significantly declining. A case in point is demand deposits where in March of 1969 deposits had increased 2.3 per cent in Washington and 7.2 per cent for the U.S. In December of 1969 demand deposits had declined to 1.4 per cent below that of 1968 and the national figure remained 3.8 per cent above demand deposit levels in 1968.

A basic problem in utilizing financial data such as appear on Table I-8 is that some of the adjustments which have been made by businessmen have been in the form of what might be called "credit portfolio adjustments." That is, businessmen in many cases changed internally the relative proportions of various types of credit business (such as open book, installment credit, revolving credit, and credit card sales). Such changes may not be visible in general economic data. For example, the recorded figures for volumes of business done by banks and/or consumer finance companies might show little change in total, even though relatively drastic measures affecting consumers might have been taken by the financial institutions. Financial institutions have tightened up on credit-granting procedures, which has taken certain consumers out of the market for some intended purchases. At the same time, the efforts of retailers to decrease their credit costs might have shifted more credit business to the financial institutions, thus keeping up the volume of loans made by financial institutions. These counter-balancing actions on the part of the two groups of businessmen might result in a fairly stable aggregative figure for loans from financial institutions even though there may have been some serious effects on consumers who happened to be marginal credit risks. By the same token, an increase or a decline in aggregative volume would not necessarily warrant conclusions that any such changes resulted from Initiative 245, because:

1. The portfolio adjustments might be invisible,
2. The portfolio adjustments and other responses might have been in reaction to money supply or interest rate increases, or
3. The portfolio adjustments (which in the current period would tend to diminish volumes of loans by financial institutions)

might be counterbalanced by shifting of the credit burden from retailers to financial institutions or--to some extent--by the shifting of the credit burden from one financial institution to another (e.g., from banks to consumer finance companies).

Table I-8 points out many other such declines that are indicators of the behavior of the marketplace which directly or indirectly affect the ability of businessmen to perform in their economic environment. Further, the impacts of these economic changes are bound to be felt throughout the state economy.

In summary, the general economic environment has contributed many complexities and introduced a number of barriers to the drawing of firm conclusions from available external economic data concerning Initiative 245. Whereas, the nation moved into a recession during the period of the study, full-blown depression struck at the state of Washington. The anomaly of a depression at a time of inflation and high interest rates wiped out the neat condition of "all other things being equal" which economists like to see when studying specific issues.

Hypotheses

Based on the theoretical knowledge of the researchers, supplemented with a consideration for theoretical and empirical research into credit limitation laws, the following hypotheses were developed for the original study. As a result of the credit limitation law it was hypothesized that:

Prices of merchandise frequently sold on a credit basis have gone up.

Leasing of similar merchandise has increased.

Banks and merchants are doing less business on a credit basis.

Lenders are diverting business to the most profitable types of loans or credit arrangements.

Small-loan companies are doing more business.

Credit losses have decreased.

Different products and businesses have been affected in different ways by the new laws.

More poor people have been affected by the new law than middle or upper income people.

Marginal credit standing has been redefined to exclude some higher risks.

Some people have not been able to buy such products as used cars because of the law (sales have been adversely affected).

Financing charges other than interest rates have increased.

Businessmen have become more strict in the application of rules on delinquent accounts.

Organization of the Report

The balance of this report is divided into four chapters. Chapter II is a summary of the findings. Chapter III presents the relevant prior research. Chapter IV deals with the credit implications of the law and Chapter V covers the product related impact of the law. Following a brief concluding chapter, the Appendix includes a definition of terms and the questionnaires used in the field interviewing program.

CHAPTER II

SUMMARY OF FINDINGS

Scope of This Summary

This summary reports on findings from the survey of retailers, financial institutions and secondary sources of information.

The retail survey included the sixty-five retailers in the State which do the vast majority of business in credit-sensitive ("big-ticket") merchandise. The survey also covered all of the chain banking units in the state, banks in cities of 10,000 or more population, a sample of single-unit banks in smaller towns, all chain consumer finance companies and a sample of smaller firms, a sample of other financial institutions, a sample of auto dealers selling both new and used cars, and a sample of auto dealers selling only used cars. The managements of these institutions were interviewed as to the actions that they had taken in response to Initiative 245.

The implications for consumers are drawn from the changes businessmen made. The feasibility of surveying consumers was tested, but the results indicated that useful information could not be readily or easily obtained from this source. An opportunity existed to determine the accuracy of the consumer responses that were obtained and it was found that these responses were grossly undependable.

In addition to the survey of businessmen, the research involved the study of secondary sources of information in an attempt to verify or negate the kinds of conclusions which might be drawn from the survey. Data were gathered from federal, state and local governments, national finance and merchandise firms operating in the state, individual firms which volunteered to provide information, and previous studies. The government data of course covered all units (for example, all commercial banks, all savings institutions, all credit unions, all consumer finance companies and all retailers including auto dealers).

Based on the field interview results, the verification studies, and the analysis of the information available from all sources, certain conclusions

seem warranted. For purposes of exposition, the brief statements of this summary are organized under the following headings:

Availability of credit

Price of credit

Price of products and services

The conclusions take the form of series of statements concerning impacts and changes occurring after the passage of Initiative 245 followed by selections from the research data which support the statements.

Availability of Credit

Since Initiative 245 reduced the income retailing and financial institutions could achieve from credit charges, they could be expected to make up their loss of income by either reducing costs related to retail credit transactions or by developing new sources of income to compensate for the loss--or some combination of these actions. A prime potential for reducing a retailer's costs is to reduce risk through restricting his own credit granting, by switching consumers from more expensive (for the retailer) to less costly types of credit, and by sending consumers to some other source of credit. There is evidence of all three forms of risk and cost reduction and the net effect of these actions appears to have been a reduction in the availability of retail credit.

Consumers considered "marginal" or "slow pay" credit risks are increasingly being rejected when they apply for retail credit financing

Sixty-six per cent of the sample of retailers report that they now must reject applicants whom they would have accepted prior to Initiative 245.

Credit application rejection rates of retailers increased by an average of 9 per cent in 1969 as compared with 1968.

The increase in rejection rates for bank credit card applicants was 4.1 per cent for 1969, but the increase was much higher in the last half of the year, averaging 8.6 per cent and reaching 13 per cent in December.

Forty-two per cent of the auto dealers reported an increase of 14 per cent in the rejection rate (on both new and used cars) of credit applications in 1969 over 1968.

New customers for bank credit cards are given lower credit lines than those granted prior to Initiative 245.

Credit lines represent lower percentages of consumers' incomes. Acceptance criteria (such as length of time on the job, or in the city) have also been strengthened.

Many customers, who might have obtained "open book" (or free) credit prior to Initiative 245 now are unable to get such credit and must use revolving or instalment forms of credit instead.

Of 47 retailers offering open book credit prior to Initiative 245, 17 per cent have eliminated this form of credit.

An additional 13 per cent have cut 60- and 90-day open-book accounts to 30 days, after which maximum interest is ch ed.

Of the total 65 retailers, 43 per cent have encouraged consumers to switch from one type of credit to another. Over 50 per cent of furniture and appliance dealers have encouraged consumers to switch from using their credit to cash sales.

Consumers are often being asked by retailers to get outside financing for their purchases of durables.

Financing from outside sources become cash sales for retailers. The sources to which consumers are turning include credit unions, banks, and small loan companies.

Among auto dealers, 13 per cent report advising consumers to arrange their own financing. They reported an increase in the practice of "mousing" (consumers putting together multiple small loans either to make a downpayment or pay in full to the dealers).

Retailers in the sample show an average decrease of 3.8 per cent in the ratio of credit to total sales in 1969 as compared with 1968 (first quarter). Changes in the ratio of credit to total sales were reported by 26.2 per cent of the retail merchants in the sample. Of these 7.7 per cent reported an average increase in the ratio of 6.8 per cent, with a range of +1 to +20 per cent increase. However, 18.5 per cent reported an average decline of 13.4 per cent, with a range of -1 to -30 per cent decline.

Some marginal credit risk consumers, formerly able to get credit, now must forego making purchases of products that require loans.

These consumers have been taken out of the market because of an inability to borrow from any source on terms that would permit them to handle repayments out of future income.

The Price of Credit

Some of the ways in which retailers can reduce their risks or recover the credit income losses incurred with the passage of Initiative 245 can involve higher costs to consumers. The switch from open book to revolving credit can mean a consumer pays interest charges which he did not pay before. If a consumer must go to a small loan company, he will pay as high as 36 per cent annual interest, as opposed to the 12 per cent he would pay if he received retail or bank credit, or the 18 per cent he might have paid for revolving credit prior to Initiative 245. If a consumer must pay a higher downpayment, and/or if loan maturities are shortened, he may be forced to forego purchases he otherwise could afford. If fees other than interest charges are raised, and if consumers must pay charges (such as filing fees and insurance premiums) not required prior to Initiative 245, the finance-related costs to him may increase despite the attempt of the law to reduce interest charges.

Some low risk consumers are paying more for purchases made on credit.

By means of switching customers from open book to revolving credit plans retailers have passed on higher credit costs to low-risk customers who were previously being subsidized by cash customers and users of other credit plans (instalment and revolving).

Consumers now pay an increased minimum service fee on revolving accounts.

In some cases consumers are charged the minimum revolving credit fee of one dollar on a purchase if their balances are less than $50 and greater than $2.

In a number of cases, retailers and banks have instituted minimum service fees or increased existing fees since passage of Initiative 245. (The law allows a service charge of $10 as an alternative to computing the 1 per cent per month on balances.)

Some creditworthy consumers who bought on credit before and after the passage of the Initiative may have benefited from the law.

To the extent that price adjustments on merchandise usually bought on credit may not have been large enough to balance the consumers' savings in interest payments due to the reduction from 18 per cent to 12 per cent per year in the cost of credit, credit customers may have gained.

Price adjustments which were made were not necessarily made on the specific merchandise sold on credit. In fact, the majority of

respondents to the interview survey reported that they raised prices on all merchandise. By this means they could recover losses in credit income without raising prices just on those items frequently sold on a credit basis. This could provide creditworthy customers a net reduction in total cost (including interest costs) for goods bought on credit.

To the extent that retailers may have become more efficient in response to credit income losses, consumers in general may have benefited.

The reduction in gross profit margins due to the reduction in interest rates has also probably worked to the advantage of consumers by encouraging businessmen to strive for greater efficiency in their operations.

Businessmen have to some extent improved procedures and reduced waste in order to achieve cost reductions and thereby re-establish the gross profit margins in effect prior to the passage of the law.

Cash customers of stores selling credit items are in all likelihood paying somewhat higher prices but receiving no benefits.

The actions of retailers to raise prices, to institute new or higher charges for ancillary services, and to increase gross margins through adjustments in merchandise offerings will increase net costs to cash customers. Those persons who were on open book accounts prior to the passage of the law and who are still in the same category have been effected in essentially the same manner as have cash customers.

Consumers considered to be marginal credit risks may now pay more for money that they borrow.

Banks and merchants will no longer grant credit or, in effect, lend to them at the new lower rates, hence they may have to obtain funds from small loan companies (at rates up to 36 per cent) or from illegal lenders (at unlimited rates).

Retailers have moved to shorten maturities to reduce risks and the costs of selling sales contracts.

In selling paper, retailers have had their situation change from 2 per cent participation to 2 per cent discount per year on the average. They shorten maturities to lessen discount costs.

Among auto dealers, 18 per cent reported shortening maturities by an average of six months.

Consumers are having to pay higher downpayments on durable goods purchases.

Sixty per cent of auto dealers reported an average increase of downpayments on new cars of 11 per cent and 15 per cent for marginal credit risk buyers.

Sixty-nine per cent of the used car dealers surveyed increased downpayments an average of 21 per cent, but downpayments for marginal risk buyers were raised 31 per cent.

More consumers who make instalment contracts are being asked to purchase credit life and credit health and accident insurance.

There was an increase of 20 per cent in the number of retailers requiring credit insurance.

Retailers and banks not only reduce their risk with credit insurance, but they derive revenue from premiums amounting to 40 per cent of the premium as well.

Thirty-five per cent of the auto dealers state they have been "pushing credit insurance harder" since Initiative 245 became law.

Price of Products

The most direct means for retailers to recover the credit earnings lost due to Initiative 245 is to raise prices on the products usually bought on credit. If the market permits, this approach probably also is easiest of the various alternatives open to them. Another approach is to raise the prices on all merchandise in a store. The effective net price of the product to the consumer may also be raised by raising the price for ancillary services, or instituting charges for services which formerly were free. A third method of raising the net price to the consumer is to lower the discounts given for trade-ins in businesses where trade-ins are appropriate. Evidence of all of these approaches to increasing revenue were found in the study.

In one form or another consumers are paying higher prices for merchandise as a result of Initiative 245.

The majority (56 per cent) of retailers said that they raised prices on all merchandise on the average of 5 per cent in response to the passage of Initiative 245.

Sixty-four per cent of furniture and appliance dealers said that they raised prices on "credit-sensitive" items. Thirty-one per cent of department stores said that they did the same.

Several retailers stated that they were adjusting their merchandise offerings to obtain higher ave age mark-ups than existed prior to Initiative 245.

Forty-three per cent of auto dealers reported raising prices (net realized price) on new cars. Those that reported the magnitude had increases averaging 5.3 per cent.

Forty-one per cent of used car dealers reported raising prices. The average increase of those reporting the magnitude of increase was 11 per cent. Checking auction prices showed that wholesale prices of one-year old cars increased by 5 per cent in 1969 compared with 1968 in both Seattle and Denver. Six-year-old cars, however, are significantly lower priced in Seattle than in 1968--and are significantly lower than prices in Denver. This suggests that dealer margins increased percentage-wise on older used cars.

A special compilation of dealer margins covering 15 per cent of used cars sold in Washington in 1968 and 1969 (entire years) showed an increase of dealer gross margins of 13 per cent in 1969 over margins received in 1968.

Some retailers have instituted fees for services which were given to the consumers free of charge prior to Initiative 245.

The product-related fees for services formerly furnished free of charge have been assessed on check cashing, wrapping and packaging, lay-away, parking (in some cases parking fees were simply increased), delivery and product installation.

Tentative Conclusions

On the basis of the evidence that we have gathered, a number of conclusions appear warranted.

The low-income people who are marginal credit risks seem to have suffered the most so far from the enactment of Initiative 245. Since prices have been raised, customers who pay cash have suffered. At the time of the surveys (summer, 1969), the burden of supplying a service (credit), the cost of which may exceed the price that can be charged for it, seemed to have fallen on the merchants and possibly the banks. The merchants and banks had taken some steps to maximize their revenue, given the constraints under which they must work,

but they did not have a great deal of leeway. They also appeared to have made efforts to reduce their costs, but once again there appear to be significant limits to what can be done along these lines. The merchants and banks seem to be placing their main hope in raising the rate that they can charge. If this does not materialize, it seems to us that the banks and merchants will have to take what might be called drastic actions and these actions would, in all likelihood, have an adverse affect on a significant number of borrowers and cash buyers. We anticipate that these drastic steps would involve price rises, tighter restrictions and decisions not to do business on a credit basis for small sums (i.e., something less than $200, $300 or $500 per transaction or per year). Buyers in this category would be encouraged to borrow directly from personal finance companies, credit unions or other financial institutions. In fact, merchants might very well decide to get into the small-loan business, since it can be handled profitably.

It seems unlikely that merchants will be able to institute dramatic price increases in order to make up for the revenues lost as a result of the imposition of the 12 per cent rate ceiling. If they were to do this, they would put themselves at a disadvantage on readily comparable merchandise vis-a-vis those merchants who stress cash sales, which, of course, could be consumated at lower prices. Rather, it is likely that merchants will opt for a combination of moves including some price raises, adjustment of credit portfolios and merchandise assortments, tightening credit-granting criteria and raising charges or instituting new charges on ancillary services.

It seems to come down to this: the resolution of the banks and merchants' dilemma calls for drastic action on their part in the face of the very substantial decline in the interest rates (service charges) that they are allowed to charge their customers. Banks and merchants have taken many of the small steps that can be taken but their basic problem is still unresolved because its solution requires more than that. Some consumers (notably, the credit-worthy) may be benefiting as a result of the inertia that banks and merchants have displayed since Initiative 245 became law. One of two things has to happen. The rate ceiling will have to be raised or banks and merchants will have to reduce costs and/or increase revenues from other sources.

CHAPTER III

RELEVANT PRIOR RESEARCH

The General Importance of Interest Rates

Economists always have favored a free market for money or credit as well as for products and services. As Milton Friedman has said: (commenting on the writings of Jeremy Bentham in 1787 in which Bentham opposed interest limitation laws)

> I know of no economist of any standing from that time to this who has favored a legal limit on the rate of interest that borrowers could pay or lenders receive--though there must have been some. I know of no country that does not limit by law the rates of interest--and I doubt that there are any.[1]

This quotation highlights a problem that is basic to this study. Economists regard interest rates as a regulating mechanism in a free market economy and think they should be free to respond to market forces; government bodies, on the other hand (even those which strive for free market prices in general), tend to set legal limits on the price (interest rate) which may be paid or received on money or credit. These limits are set for political and generally non-economic reasons although justification of such acts are usually couched in economic terms.

The theoretical essence of the economic issue involved in legal limitations on interest is rather simple and straightforward. It is that regulating the price of one key component in a market economy inevitably causes dislocations in the system and results in misallocations of resources.

The importance of the role of interest rates in an economy can be seen in macro economics (i.e., economics of the total economy) where there is general agreement that interest rates affect not only the monetary system, but the rest

---

[1]Milton Friedman, "On Defense of Usury," *Newsweek*, April 6, 1970, p. 79.

of the economy as well. The usual measure of the status of a total economy is the Gross National Product for the nation. On the expenditure side, it includes consumption (which usually accounts for nearly two-thirds of GNP), business investment (plant and equipment plus net change in inventories--called "Gross Private Domestic Investment"), government expenditures (federal, state and local) and net exports (exports minus imports). The first "general theory" to describe the total economic system was that of J. M. Keynes. Although arguments have raged concerning Keynesian economics, if certain additional factors (such as stocks of money and real assets and varying employment levels) are added to the Keynesian system, it is quite compatible with classical economics. In simplified form, Keynes related key factors in an economy as follows:

With the supply of money given:

> Money Supply is equal to the Demand for Money (Liquidity Preference) applied to the Interest Rate and Income. (Money Supply and Demand for Money in relation to each other determine the Interest Rate.)
>
> Consumption is a function of Income and the Interest Rate.
>
> Investment is a function of the Interest Rate and Consumption.
>
> Consumption plus Investment equals Income.

In practical terms, this means that consumption expenditures can be increased by decreases in the rate of interest or decreased by increases in the rate of interest that consumers must pay, all other things being equal. Since the total economy really revolves around consumption expenditures, and business investment is derived from consumption spending (i.e., businessmen raise or lower investment according to their perceptions as to whether the markets for their goods and services are going up or down), it is clear that interest rates can affect the total economy through inducing gains or declines in consumer buying activity. Likewise, in a free market, declines in expenditures induced through high interest rates tend toward reducing interest rates. The lower interest rates then induce higher expenditures. Thus, interest rates can play an adjustment, or equilibrating, role in the economy.

In practical terms, low interest rates also induce business investment. A businessman who has determined that there is an additional market for his products will evaluate the desirability of additional investment to handle this market. He will try to estimate the "marginal efficiency of capital," or the return on investment, and if there is a chance that the estimated return will be negated or seriously reduced by the cost of the money necessary for making the investment, the investment will not be made.

The Purpose of Interest Limitation Laws

Each law or regulation on interest strives to favor one side of, or one party to, a financial transaction. For example, the typical usury law is intended to benefit the borrower (or, in the case of consumer credit, the purchaser of goods and services). Since such a law usually takes the form of setting a fixed interest percentage rate, or fixed scale of rates, it necessarily disregards the overall supply of, and demand for, money or credit. Further, it disregards the cost of money to the lenders and the non-interest costs (such as higher prices and extra charges) to borrowers. A usury law in one state cannot control rates in other states and, even more important, it does not control prices of goods and services. Since money is mobile, it can move to other states at the expense of businesses and consumers in the state with the usury law in question. And since prices of goods and services are, in general, not controlled, they can be adjusted to make up for the costs or losses due to limitations on interest on credit--again at the expense of businesses and consumers in the state with particular laws.

As in the case of laws, limits on interest which are set by regulation have similar weaknesses. The current Federal Reserve regulation which limits the interest commercial banks can pay for deposits to 4½ per cent for small savers and 7 per cent for $100,000 depositors disregards supply, demand and costs (although the higher rate for large deposits presumably is based on economies of scale). Such limits may tend to favor banks by restraining competition for funds, but a bank which needs funds and can afford to pay depositors higher rates is unable to do so. In a market where potential bank depositors can earn much more through other forms of employment of their funds, the Federal Reserve regulations may impair the banks' supply of money. Further,

the interest limitation on savings is at the expense of the depositor, particularly the small saver who does not have feasible alternatives for earning a better return on his funds, and contributes to inflation by discouraging saving. One economist has commented on this problem as follows:

> Controls on rates payable by financial agencies ignores the welfare of savers who invest through these agencies. Such savers perform a vital function in the economy. Rate controls deny many low income savers the right to a competitive loanable funds market. High income savers can bypass the controlled market by investing in equities, etc., but if rate controls cause them to divert funds or to lose interest income, their contribution to economic product is reduced.[1]

The Effectiveness of Interest Limitation

But the most serious limitation of the powers of interest limitation laws or regulations is that none of them, nor all of them together, really can control the price of money or credit. Taken individually, they control only a portion of particular transactions: the portion which formally states an interest rate. But in any such transaction, the true price of money or credit can exceed the legal limit one way or another. For example, in a mortgage transaction, the lender can capture a higher rate than specified by government regulation by means of "discounting" the loan. In a commercial loan, the bank can insist on a "reserve" (or compensating balance) on a loan which effectively raises the rate on the money actually received by the borrower. On a consumer credit purchase, the seller can raise the price of goods or services, he can increase the charges for peripheral services and/or add new charges, he can reduce the allowance on trade-ins where trade-ins are accepted, he can change his assortments of goods to increase his average gross margin, and he can insist on life and/or disability insurance which raises the cost of credit to the consumer and increases the "credit" earnings of the seller. If the interest limitation causes the seller to refuse any longer to deal in credit, or to refuse credit to increased proportions of "marginal credit risks,"

consumers may be sent by suggestion or necessity to a financial institution to negotiate a direct loan. Since some of these institutions, for example, can legally charge up to 36 per cent annual interest, the consumer protection motive of the interest limitation law is thwarted and the consumer may end up paying higher interest than he paid prior to the interest limitation law or regulation.

Paul A. Samuelson has pointed out that in setting ceilings too low on small loan interest rates, funds for the poor may even become unavailable or are supplied by loan sharks at very high interest rates:

> The concern for the consumer and for the less affluent is well taken. But often it has been expressed in a form that has done the consumer more harm than good. For fifty years the Russel Sage Foundation and others have demonstrated that setting too low ceilings on small loan interest rates will result in drying up legitimate funds to the poor who need it most and will send them into the hands of the illegal loan sharks. History is replete with cases where loan sharks have lobbied in legislatures for unrealistic minimum rates, knowing that such meaningless ceilings would permit them to charge much higher rates.[1]

Since questions might be raised concerning the setting of a relatively high rate ceiling as would be the case under the Uniform Consumer Credit Code, or allowing the market to set its own rate, it is significant that a study of actual rates charged by two large finance companies operating in several states suggested that the high ceiling would not necessarily cause rates all to move to that ceiling. Robert Johnson reported that:

> In states where the ceiling rates were $6 per $100 of unpaid balance per year, almost 18 per cent of the contracts were at the ceiling. In contrast, where the ceiling was $9 per $100 per year, less than 2/10ths of one per cent of the contracts were at the ceiling.[2]

Blitz and Long point out that historically there have been three objectives of usury legislation: " . . . protecting the small borrower

---

[1]Paul A. Samuelson, statement in *Major Statements in Support of the Uniform Credit Code Filed with the Massachusetts Committee on the Judiciary, January 29, 1969* (Boston: National Conference of Commissioners on Uniform State Laws, Chicago, Illinois, 1969), p. 32.

[2]Robert W. Johnson, "Why Rate Ceilings in the U.C.C.C.?" *Industrial Banker*, March, 1969, p. 18.

. . . curbing the monopoly power of the creditor . . . and regulating the allocation of resources. . ."[1] They conclude that on the first issue ". . . it is not possible to determine a priori which group of borrowers will be the main beneficiaries. . ." On the second, they argue that usury legislation is "not particularly effective" in control of a credit monpolist "when the monopolist is free to discriminate in a nonhomogeneous market."[2] On the allocation of resources issue, they feel that capital markets are affected by interest regulation in a manner that is "mostly other than intended and frequently adverse." On the question of resource allocation they point out:

> A well-functioning capital market is likely to promote change, while a capital market encumbered by an enforced interest rate of zero is more in keeping with stagnation. In the latter system there is no interest-rate differential to attract capital to the more dynamic sectors of the economy. . . Recognizing that usury legislation may be aimed toward other goals, we would still point out that, in periods of rapid change, restraints on the price system, such as a ceiling interest rate, are likely to be a barrier to the efficient allocation of resources and to growth.[3]

The nature of the inefficiency is brought out by Clifton B. Luttrell in this quotation from an article in the *Review* of the Federal Reserve Bank of St. Louis:

> All ceilings which alter normal flows of funds retard economic growth. Low usury ceilings prohibit the higher rates necessary to offset the higher risks of business and individual innovators. Credit tends to be channeled into well-established, low-risk functions. Low ceilings on rates payable by financial agencies tend to restrict the flow of funds through usual credit channels. Loan funds supplies are thereby reduced, affecting borrowers adversely. . .[4]

Michael Kawaja, in an analytical essay on the economics of statutory ceilings on consumer credit, dealt with fixed rates (which set the exact rate

[2]*Ibid.*

[3]*Ibid.*, p. 619.

[4]Luttrell, *op. cit.*

to be charged) and ceilings (which are set as outer limits to rates). He suggested that the usual goals of usury legislation can be better achieved by less direct methods:

> The main findings of this analysis follow. First, there are no demands or cost-entry conditions inherent in the consumer industry that would justify rate fixing. Second, rate ceilings may serve worthwhile purposes in those segments of the credit market in which there are entry restrictions, but even in these cases they have serious drawbacks. Third, the disadvantages of ceilings on finance rates in competitive credit markets outweigh their advantages. And, fourth, the goal of rate ceilings in competitive credit markets is ill-defined and does not provide a basis for selecting the level of the rate ceiling or judging its efficacy. These conclusions point to the possibility and desirability of making the consumer credit industry more competitive and substituting the market mechanism for price ceilings. Therefore, all regulatory efforts should now be focused upon bringing about the conditions requisite to the development of effective competition in the industry.[1]

Thus, the general conclusions from the literature on effectiveness of interest limitation are that it has certain noble purposes, that these purposes are not achieved, and that undesirable effects may be incurred by individual consumers and by society in general.

The Effects of Interest Limitations on Buyers and Sellers

To some extent the effects of interest limitation laws on buyers and sellers can be anticipated on a priori grounds. For example R. W. Johnson has pointed out the differences between cash credit and vendor credit:

> If legislation is properly drawn, the cash lender has no place to conceal his finance charge and no source of additional income for his credit services. In contrast, the vendor offering both a time price and a cash price may juggle these prices any way he chooses.[2]

---

[2]Robert W. Johnson, "Regulation of Finance Charges on Consumer Installment Credit," *The Michigan Law Review*, Vol. 66, No. 81 (November 1967), p. 98.

In a footnote to this comment, he explains some of the implications of this relationship as follows:

> This adjustment, however, is not made without cost either to the retailer or his customers. The demand for credit is derived from the demand for goods and services financed. Since the finance charge is a relatively small portion of the total time price and monthly payment, consumers are probably not as sensitive to changes in the price of credit as they are to changes in the cash price of goods or services financed. In economic terminology, the demand for credit is probably less elastic than is the demand for the good or service.
>
> Assume that without rate ceilings a retailer has achieved his optimum market strategy by allocation of the total time price between the cash price and finance charge. An imposition of rate ceilings forces him to redistribute a portion of the finance charge to the cash price. Because the demand for the good is more elastic than the demand for credit, this shift will reduce the number of cash sales by an amount greater than any resultant increase in credit sales. Thus, not only are total sales likely to be less, but also the credit sales gained are more costly to service than the cash sales lost. The resultant reduction in profits will force some marginal retailers out of the market.[1]

Although the majority of the authors in the field of credit limitations favor either a free market for interest rates or a ceiling much above the market rates, proponents of credit limitation such as William Warren, point out that this relative insensitivity to credit costs poses a hazard for the consumer:

> The danger of ceding to the dealer the choice of financing agency lies in the fact that a dealer, in exercising his choice, is likely to be more influenced by the size of the finance-charge rebate accruing to him than by the reasonableness of the charge which the buyer will have to pay.[2]

Maurice B. Goudzwaard, in an article on the impact of rate ceilings on the availability of credit, provides empirical evidence that in states having the highest small loan rates, credit loss rates are higher than in states with intermediate or low small loan rates. He concludes as follows:

---

[1] *Ibid.*, pp. 98-99.

[2] William D. Warren, "Regulation of Finance Charges in Retail Installment Sales," *The Yale Law Journal*, Vol. 68, No. 5 (April, 1959), p. 846.

> Lenders appear more willing to accept higher credit losses and more marginal credit risks if their rate is sufficient to compensate for bad debt, investigation, and collection expenses. In effect, higher rate ceilings enlarge credit availability to poorer risks and allow lenders to adjust credit standards to accommodate rate ceilings. Since lenders have no control over price, low ceilings force them to reduce costs and restrict lending to the better risk classes, thereby discriminating against the less creditworthy and significantly reducing their credit opportunities. . . But the analysis does demonstrate that any rate ceiling will very likely affect consumer credit allocation and that price controls have important economic and credit rationing effects on credit availability at consumer finance companies.[1]

Since a knowledge of theory and a minimum of observation would suggest a hypothesis that the incidence of impact from credit limitation laws would vary between classes of consumer borrowers, it is logical to anticipate differences based on the relative creditworthiness of consumers. It would seem reasonable to expect that a credit rate limitation set below the charges in existence before a law took effect would have a marked effect on persons at the margin of acceptable creditworthiness. The effect on the marginal credit risk would, of course, be negative. At the same time, it might be reasonable to expect that the initial effects of such a law on the fully creditworthy consumer would be positive--that, until the full impact of the law struck home with businessmen, and they adjusted to it, the creditworthy person would benefit from a reduced interest cost.

There are of course many facets of the question over and above the mere interest rate which can create benefit or injury to all classes of consumers. F. Thomas Juster presented the argument that consumers are not "economic men" in their use of credit, which leads to the inference that less creditworthy consumers may use monthly payments as the principal criterion regardless of interest rates. If such consumers do look principally to the monthly payment amount, then it follows that they could incur an unreasonably high rate of interest. On the other hand, the people who could obtain the credit they want could afford to select sources of credit on the basis of interest rates. Juster concludes that:

---

[1]Maurice B. Goudzwaard, "Price Ceilings and Credit Rationing," *Journal of Finance*, March, 1968, pp. 183-185.

> Thus the model predicts that the minimum available monthly payment is a highly relevant proxy for the "real" cost of credit in an economy where all consumers are rationed [able to borrow less than they would prefer] in the sense just described. But in an economy where all consumers are unrationed [actual and preferred borrowings equal], monthly payments are irrelevant and finance rate is the relevant price. Thus the marginal borrowing cost model predicts that consumer response to finance rates will depend on the relative importance of unrationed consumers in the population.[1]

Although questions have been raised concerning the nature of Professor Juster's research, the concept of differing attitudes toward interest by different classes ("rationed" and "unrationed") of consumers is important because of its implications which are outlined in the following quotation:

> These results suggest the necessity for qualification of the widely held view that consumers are unresponsive to changes in the finance rates on installment credit contracts. Most consumers are in fact unresponsive, but only because they are constrained to accept shorter contract maturities than they would prefer. . . consumers appear to be unresponsive to finance rates because they do not have access to anything like a perfectly competitive capital market. The closer capital markets come to this analytical ideal, the more sensitive will consumers be to the cost of funds.[2]

On the business side, Paul Douglas points out that the apparent behavior of finance company lenders is such that raising and lowering finance rates may not bring about increases or declines in their profit:

> Higher or lower rate ceilings do not raise or lower finance company profits but rather, determine credit availability. The higher the ceiling, the more marginal risk borrowers can be accommodated. This is confirmed by data showing a high positive correlation between the rate ceiling and bad debt charge-offs. The higher the ceiling, the riskier the loans and the higher the incidence of bad debts.[3]

Douglas, statement in *Major Statements in Support of the Uniform Consumer Credit Code Filed with the Massachusetts Committee on the Judiciary January 29, 1969* (Boston: National Conference of Commissioners on Uniform State Laws, Chicago, Illinois, 1969), p. 11. Douglas footnotes this comment

The real question to any business is the relationship between costs, revenues and volumes, so that for consumer credit institutions costs of money must be related to allowable interest rates. If the ceilings are relatively low, or the costs of money relatively high, consumer finance companies and others can adjust their profits by changing credit granting criteria. Profits could literally be increased as long as there is a margin between costs and revenues by making credit less available to people most likely to cause losses. Thus it is possible for finance companies to increase profits in the face of low interest rate ceilings and tight money.

Several other empirical studies have concluded that credit rate limitations create real problems for grantors of consumer credit and that these problems are passed along to the consumers.

Jan Robert Williams who studied the Arkansas situation found that the Arkansas constitutional 10 per cent limitation on credit charges has caused serious problems for both businessmen and consumers. From an examination of cost-revenue relationships of retailers, Williams concluded:

> Credit costs are greater than credit revenues generated by maximum legal service charges. This condition has a profound influence on the general store operations of retailers and the customers purchasing merchandise both on credit and for cash.[1]

Williams reports that retailers limited their credit business, even though they saw credit as a device to increase sales. One form of limiting credit business was to set rigid standards for credit granting which made it impossible for many marginal credit applicants to obtain credit. In this regard, he points out that:

> These would-be purchasers either are unable to purchase or they must seek borrowed funds under conditions which may allow lenders to take advantage of the borrower's situation.[2]

with a reference to Robert P. Shay, "State Regulation and the Provision of Small Loans," in John M. Chapman and Robert P. Shay (eds.), *Consumer Finance Industry* (New York: Columbia University Press, 1967), p. 100.

[1]Jan Robert Williams, *An Analysis of Retail Credit Costs of Selected Retail Stores in Arkansas* (Unpublished Doctoral Dissertation, University of Arkansas, 1970), p. 125.

[2]*Ibid.*, p. 126.

The merchants were hurt by having to "receive undesirable terms in the financing of installment accounts with banks and other financial institutions. These terms included high rates of discount, large compensating balances, and full recourse arrangements."[1]

One of the worst effects of the Arkansas rate limitation was the "credit subsidy," described by Williams as follows:

> The credit subsidy is perhaps the greatest inequity caused by the 10 per cent limit on service charges in the State. Simply stated, the cash price of goods must be increased in order to cover losses on credit operations which result when credit costs exceed credit revenues. . . The credit subsidy, which is equal to the increase in the cash price to cover credit losses, is paid by the cash buyer and received by the credit customer.[2]

Williams also concludes that the credit limitation law had restrained economic development in the state, particularly in border areas. Firms were discouraged from entering business in Arkansas and the law also "hurt the further expansion of stores already located in Arkansas."

Gene C. Lynch also studied the Arkansas case and had similar conclusions relative to the retailers' costs of credit. He also discussed the problems of financial institutions and provided evidence that credit availability was restricted in Arkansas. In addition, he did a survey of prices on major appliances in Little Rock, Arkansas, and cities in states in the "Arkansas Region" (including Texarkana, Texas, Monroe, Louisiana, Greenville, Mississippi, Memphis, Springfield, Missouri, Tulsa and Denver). He found that if Little Rock were given an index of $100, the indexes of the other cities ranged from about $93 to $97.[3] Lynch suggests that these and other price data show the retailers' response to credit rate limitation:

> The only factor that can logically account for the higher cash prices in Arkansas is the ten per cent usury limitation. The cause of higher prices is not higher absolute costs, but

> lower revenues from credit sales. The legal finance charge differential between Arkansas and surrounding states is too great not to have an effect on store pricing policies.[1]

In the Lynch study, prices were found to be higher in the state (Arkansas) with the lowest limit on credit charges in the region, although questions might be raised as to whether a causal relationship between the interest rate limitation and product prices had been established.

A number of studies have been made of the credit cost-revenue relationships for retailers and financial institutions. The basic conclusion is that consumer credit is not a very profitable business even in the absence of low rate ceilings on credit charges. The Federal Reserve Bank studies show that there are economies of scale in loans and that breakeven loan sizes decrease with the length of maturity and increase as interest rates decline. It is rather obvious that as the cost of money rises the break-even size of loans increases considerably at any given rate of interest charged. When this situation is capped by a credit limitation law at a relatively low figure (12 per cent per year) as is true in Washington there is a cost-price squeeze on the credit-granting institutions.

The best-known study of retail credit costs and revenues is that sponsored by the National Retail Merchants Association, a department store trade group. In 1963 and again in 1968, the accounting firm of Touche, Ross, Bailey and Smart gathered credit operating data from department stores, and in the 1968 study an economic analysis of the data was provided by Robert W. Johnson.[2] The study showed that the stores lost money on all three forms of credit (30-day charge account, revolving credit and installment accounts). Conclusions included:

> Study findings indicate that providing credit in the department store field was a costly undertaking. . . It is clear, therefore, that credit must be justified economically by the department store

---

[1] *Ibid.*, p. 26.

[2] Robert W. Johnson, "Economic Analysis of Credit Revenues and Costs in Department Stores," in Touche, Ross, Bailey and Smart, *Economic Characteristics of Department Store Credit* (New York: National Retail Merchants Association, 1969).

> as a selling tool--not as a separate business venture. . . The small stores had greater deficiencies of revenue over costs.[1]

An unpublished study by Touche, Ross, Bailey and Smart on costs in stores in the state of Washington for the fiscal year ending January 31, 1966 also found that there were losses in all forms of credit.[2]

The importance of credit to furniture and home appliance retailers was stressed in an empirical study which included the city of Spokane, Washington. The study, which covered Boise, Idaho as well, was published in 1963 and reported the following:

> All of the furniture and appliance retailers in the two cities granted credit to their customers. All of the retailers sold merchandise under conditional sales contracts. All but two retailers gave credit on open account. In approximately one-third of the establishments the credit business was a major enterprise both from the volume of credit and the income from the credit business, which was treated as a separate department in a few instances. An analysis of opinions expressed by retailers indicates that essentially all of the retailers realize that credit operations are very important to their overall operations and may be important even as a separate enterprise.[3]

The study was made at a time when the most common rates charged by the banks for short-term borrowings by retailers was 6 per cent and the range was from 5 to 8 per cent per annum. On paper carried by financial institutions, the rates charged by banks averaged 14.5 per cent and that carried by consumer finance companies averaged 22.3 per cent. Bank rates ranged from 8 to 23 per cent and finance company rates ranged from 11 to 40 per cent and "there were isolated cases beyond these limits."[4] If the average bank rate of 14.5 per cent, or 8½ per cent above the "most common" short-term rate to retailers, was

---

[3] Norman Nyhroten, Ralph H. Farmer, Russel L. Chrysler and Paul O. Groke, *Credit Practices of Retailers and Financers of Furniture and Home Appliances in Two Northwest Cities* (Moscow, Idaho: University of Idaho, May, 1963), p. 75.

[4] *Ibid.*, p. 82.

based on reasonable net earnings for the banks, then reasonable net earnings for banks in 1970 would require an average rate of at least 18 per cent or more. Hence, it is logical to assume that the rate ceiling of 12 per cent per year imposed by Initiative 245 provides additional evidence that it is unlikely that credit grantors in general can provide consumer credit without incurring operating losses.

Summary

In summarizing the concepts from extant literature, it should be kept in mind that the issue of rate ceilings, or any particular form of ceiling, is controversial. It seems to the researchers in this study, however, that the weight of opinion favors certain key concepts:

1. The objectives of credit rate limitation by law or regulation usually are to protect the small borrower (assumed to lack power and/or knowledge to handle his own financial affairs), to limit the monopoly power of creditors and lenders (assumed to have a bargaining advantage in dealing with borrowers), and to foster a more rational and equitable allocation of resources than would occur without regulation. The majority opinion seems to be that legal rate limitations fail in all three objectives.
2. Economists generally see the interest rate as an equilibrating mechanism which should function in a manner resembling the free markets preferred for goods and services. They consider restrictions on the free money market as a source of maladjustment and misallocation of economic resources.
3. Rate restrictions tend toward restrictions on the availability of credit, particularly for small, less creditworthy borrowers and also tend to lead to increases in rates for small borrowers when their only alternatives are consumer finance companies (with higher legal rates) or illegal lenders (who can charge what the traffic will bear).
4. Low rate ceilings cause creditors and lenders to try to make up for loss of interest income through other means. For example,

the retailer who is faced with rates too low to cover his costs (or with a decline in interest income whatever his cost) tends to recoup his losses by raising prices on merchandise, raising charges on ancillary services, or by shifting the consumer to outside sources of credit.

5. Where interest ceilings are to be used, economists favor setting the ceilings distinctly higher than ordinary market rates of interest, so that a relatively free market can operate without reaching the ceilings.

Empirically, it has been shown that retailers probably lose money (in terms of cost/revenue relationships) on all forms of credit, even where the rate charged is higher than 12 per cent per year. It is evident, moreover, that financial institutions suffer from a cost-price squeeze, particularly in this period of high interest rates and tight money. The break-even size of loans for banks is much above the amount needed for purchases of virtually any durables except housing and automobiles.

The cash customer may be forced to provide a subsidy for credit customers through paying higher prices on goods and services.

Creditworthy consumers who bought on credit before and after the passage of the Initiative may have benefited through a net reduction in interest costs. The benefits could derive from the possibility that the stores from which they made purchases may not have adjusted completely to the Initiative, or from the possibility that the stores may have been trying to recover credit income losses through a combination of reducing costs (including credit granting costs) or by raising prices on all items, or on items not ordinarily bought on credit. The raising of prices on all items, or on items not ordinarily bought on credit, would tend to subsidize the credit customers at the expense of cash customers by giving them a net reduction in total cost (including interest) on goods purchased.

CHAPTER IV

CREDIT RELATED EFFECTS

Credit Related Hypotheses

The credit related hypotheses established at the outset of this study were as follows:

Banks and merchants are doing less business on a credit basis.

Lenders are diverting business to the most profitable types of loans or credit arrangements.

Small loan companies are doing more business.

Credit losses have decreased.

More poor people have been affected by the new law than middle- or upper-income people and marginal standing from a credit standpoint has been redefined to exclude some individuals classified as higher risks.

Financing charges other than interest rates have increased.

Businessmen have become more strict in the application of rules on delinquent accounts.

The passage of Initiative 245 resulted in a number of changes in the manner in which a large number of firms do business on a credit basis with their customers. These effects were felt primarily in three major areas:

1. The volume of sales done on a credit basis by retailers and financial institutions.

2. The charges imposed by retailers and financial institutions as well as the costs of providing credit services for customers.

3. The credit-related effects of the new law on consumers generally.

Each of these three major headings will be discussed in this chapter.

The Volume of Business

The 12 per cent interest ceiling which became effective with the enactment of Initiative 245 does not apply to direct consumer loans obtained from consumer finance, or "small loan" companies, as they are sometimes called. Automobile finance companies such as GMAC are restricted to the 12 per cent interest limit. The latter organization and its counterparts in the auto and appliance fields are also sometimes called "captive" or sales finance companies.

The volume of business that banks and consumer finance companies are doing in indirect loans to consumers that originate with retail merchants has, as might be expected, declined. Sixteen out of 23 retailers made changes tending to diminish indirect loans and Table 4 shows an overall decline in indirect loans. This decline is attributable primarily to a falling off in the volume of business done between financial institutions and furniture and home appliance retailers. A sample representing a substantial proportion of the total indirect dealer paper purchased by the state and national banks in Washington revealed a 41 per cent decline in the number of appliance and home furnishings contracts purchased in 1969 when compared to 1968. The total dollar volume decline amounted to 33 per cent. Indirect dealer paper in automobiles declined 10 per cent in the number of contracts and 5 per cent in dollar volume. Indirect marine (boat and motor) paper declined 6 per cent in number of contracts, but increased 25 per cent in dollar volume. In all three categories, the number of contracts declined by 15.5 per cent and the dollar volume by 5.8 per cent and the average size of contract increased. That these events can probably be attributed to Initiative 245 also seems to be indicated by the fact that the experience of the banks and finance companies in Washington State apparently runs counter to the experience of similar institutions in the rest of the country. The extent of this divergence is shown below in Tables 1, 2 and 3. A survey representing approximately 60 per cent of bank consumer loans in the State of Washington in 1968 and 1969 is summarized in Tables 4 and 5.

There was also a decline of 15 per cent in filings of retail installment contracts in King county in 1969 compared to 1968. Table 6 shows in the last six months of 1969 an even sharper 25 per cent decline in filings by retailers and 33 per cent by banks. Small loan companies, however, showed a decline of only 12 per cent, which was less than the total or average decline. This

combination of percentages suggests a relative shift of installment credit business from banks and retailers to small loan companies.

The decline in the total of installment credit financing, and particularly the greater decline in bank and retailer business in this field, appear related to Initiative 245. Since state records do not show a decline in retail sales for the 1969 period covered in Table IV-6, and since a resurvey of firms which filed contracts revealed no change in policy regarding filings in 1969 versus 1968, it is obvious that many purchases which might have been financed through installment credit in 1968 were financed by other means in 1969. Of the twenty-eight retailers who said that they encouraged consumers to switch from one form of credit to another, eleven reported that they now ask the customer to arrange his own financing. Another stopped granting extended credit and required his customers to pay cash in thirty days. In all twelve of these cases, some customers were undoubtedly getting direct loans from credit unions and small loan companies which had no connection with the merchandise purchases, and were using the loan proceeds to make "cash" purchases at the retail stores. In other cases, even where there was no effort to suggest alternative forms of credit, people considered marginal credit risks were turned down for credit by banks and retailers and had to obtain the funds for "cash" purchases from small loan companies. Further, although the interviews with retailers did not turn up a trend toward switching people from installment credit to bank credit cards, later research suggested that many retailers did shift other forms of credit to bank credit cards.

Further, the price that the banks and finance companies charge the dealers with whom they do business is not controlled by law and it has gone up, reflecting the rising cost of money to these financial institutions. (See Table IV-7.) Instead of paying dealers "participation," a practice which involved having the bank share the interest proceeds received from the consumer loan with the merchant, the financial institutions began instead to discount dealer paper. In the case of auto dealers, for example, 19 out of the 24 dealers who responded to a question on participation stated that at the time of the survey (summer, 1969) they had lost an average of two per cent in revenues on indirect paper. In other words, if they had been receiving one per cent participation (or "commission") on the business they took to banks and finance companies, by the

summer of 1969 they were paying a 1 per cent discount on this indirect paper. Both the participation prior to Initiative 245 and the discounts charged after the Act took effect tended to vary between dealers. At the time of the survey, small used-car dealers reported paying discounts as high as 5 per cent.

The principal reason for this shift in policy on the part of the financial institutions was that the paper generated as a result of credit transactions between consumers and retail dealers now carried an interest rate of only 12 per cent. Prior to the enactment of Initiative 245 on December 5, 1968, retail credit contracts could have been written with up to 18 per cent per annum. Thus the dealers were being forced to assume the burden of the mandatory reduction through the discounting of the contracts. Understandably the net result has been a decline in the volume and number of new indirect loans through the consumer and sales finance companies and commercial banks.

In addition to the reluctance of retail merchants to pay so much for money that they suffer losses on credit, some of them have also been affected by changes in the lending policies of the banks with whom they do business. These modifications are not uniform throughout the banking system but, for example, many banks will no longer handle indirect loans for older model automobiles, particularly those five years of age and older. When older model cars are still financed on an indirect basis, it is because the automobile dealers involved are especially important customers of the bank. A small number of banks no longer make indirect loans for amounts of less than $500 average loan size. This particular policy change affects furniture and appliance dealers primarily. One large bank with several branches is no longer handling any indirect paper from any household goods dealer in the state and another bank no longer handles consumer paper emanating from any appliance dealer. A third bank has cut out indirect paper originating with the hospitals in its community. Still another will handle only indirect paper when it originates with an individual who is also a depositor of the banks as well as a customer of the merchants.

The foregoing observations imply that the volume of business that banks do, both directly and indirectly, with consumers has been adversely affected except perhaps for credit cards. As mentioned earlier, indirect loans primarily for furniture and home appliances declined significantly (40.9 per cent for appliances) even though such loans have risen substantially on the national

level. The total volume of automobile loans in 1969 handled by Washington banks through automobile dealers declined 10 per cent in number and 5 per cent in volume below the level that it was prior to the enactment of Initiative 245. At the national level, however, indirect bank auto loans outstanding rose by 5.6 per cent in volume. (See Table IV-1.)

Direct consumer loans made by major Washington banks declined in 1969 relative to 1968. Direct auto loans declined 11.8 per cent in number of contracts and 8.6 per cent in dollar volume. Personal loans declined 25 per cent in number and 12.9 per cent in dollar volume. The total of direct bank consumer loans declined 20.2 per cent in number of loans and 10.5 per cent in dollar volume in 1969 relative to 1968. There were similar, though less pronounced, declines in the amount of consumer loans outstanding in 1969 relative to 1968. The total outstanding consumer loans declined 12.4 per cent in number and 6.3 per cent in dollar volume. In all of the above categories of loans, there was an increase in the average loan size. Although the average size of auto loans increased only 3.5 per cent, the average size of personal loans increased 16.2 per cent due largely to the setting of higher minimum loan sizes and a shift toward more affluent customers.

The dollar volume of new indirect consumer loans made by commercial banks, consumer finance companies and sales finance companies combined in 1969 was 5.7 per cent less than in 1968. There was a slight increase in indirect loans by consumer finance companies, but not enough to materially affect the above figure.

Information obtained about the first quarter of 1969 from interviews with automobile dealers throughout the state during the third quarter of 1969 led us to believe that there had been a significant movement toward the financing of automobiles through consumer finance companies, especially in the case of older used cars because of the difficulty encountered in financing these automobiles through banks. Some corroborating evidence was uncovered when it was observed that a number of automobile dealers said that they had experienced an increase in the number of cars sold for cash. It would appear reasonable to assume that in those instances where this was observed or encouraged by the dealers, direct loans from small loan companies were the most probable source of funds, although credit unions and banks may have been involved.

Source: National Consumer Finance Association, April 6, 1970, p. 49.

On the other hand, an examination of the operating results of small loan companies in the state for the entire year did not reveal any appreciable growth in the dollar total of loans made during the year. This was a somewhat surprising finding. There is, of course, evidence of a relative shift in available consumer credit business toward consumer finance companies as compared with retailer and bank financing. The installment contract filings referred to earlier in the chapter showed that total installment filings declined, but that the decline in consumer finance filings was less than the average decline and that the decline in retailer and bank filings were much above average. In the face of an increased opportunity it was expected there would be an increase in the volume of business that these small loan companies would transact. Instead, the small loan companies appear to have taken advantage of the opportunity to improve the risk quality of their loan portfolios. Net earnings before interest on borrowed funds was up by more than 10 times the average increase during the previous three years and the change in the number and amount of loans charged off was up by about 11 per cent and 14 per cent respectively. A five year summary of the small loan company operating results in Washington in shown in Table IV-9.

Charges and Costs

The retail businessmen and financial institutions have, as expected, tried to reduce the costs associated with credit transactions and loans and to the extent possible to maximize the potential revenue obtainable under the law. Since these affected businessmen have been unable to do much on the revenue producing side, they have understandably enough devoted their primary efforts to cost reduction, at least as far as the strictly financial side of the matter is concerned. The major emphasis in trying to achieve an upward revision of revenues has taken place in the area of product price adjustments. This activity is discussed in the following chapter.

One of the ways in which commercial banks have made an effort to reduce costs is in the handling of loans for small amounts, i.e. under $500. Such loans have been made on their credit card systems whenever possible. The main reason for this development appears to be the lower cost of handling loan transactions of that size in this manner. Service charges and other fees such

as those for late payment have also b en either raised or instituted wherever they are allowed and have not heretofore been in effect.

Banks have also attempted to lower their costs of doing business by making qualitative changes in their consumer loan portfolio. Virtually all financial institutions and retailers have tightened their lending policies in one or more of the following areas:

1. Down payment requirements have been increased.
2. Maturities on loans have been shortened.
3. The discretion of local lending officers to waive requirements on consumer loans such as minimum uncommitted monthly income, minimum residence, and minimum length of time on the job has been substantially curtailed.

The impact of these policy changes has been reflected in operating results. One bank reported that their bad debt losses, for example, had been reduced by one-third.

Additional evidence concerning the efforts of businessmen to increase the monetary size of credit transactions is also furnished from a review of the installment sales contracts filed in King County. The average size of these contracts increased from $589 in 1968 to $670 in 1969. These data may also be an indication of the success that banks have had in switching consumers to bank cards which, as we pointed out before, appear to be a form of credit which is less expensive administratively from the lending institutions point of view.

Retailers as well as financial institutions appear to have made a serious attempt to reduce the time period over which they are willing to do business on a credit basis. Eight auto dealers reduced maturities by six months, and one reduced maturities for marginal buyers from a possible 36 months to spans of 2-6 months. By doing so they are able to reduce the dollar amount of the discount on the paper that they sell to financial institutions.

In addition to the reduction in the amount of interest permitted, retailers have also had to contend with a reduced service charge ceiling on consumer loans. The amount allowed prior to the enactment of the law was $15; this was reduced to $10 or 1 per cent per month on the unpaid balance. On the other hand, according to our survey, many banks and retailers have apparently

instituted such charges for the first time in their efforts to generate additional revenues. In this connection it may also be noted that some retailers have raised their interest charges to 12 per cent in those cases where they had been charging consumers less.

Most large-scale retailers have not found it feasible to eliminate the free credit granted to a significant portion of their retail customers as a result of a tradition of open-book accounts. What has happened, however, is that the time period granted to customers on open-book accounts has been reduced. Merchants who were offering 90-day open book accounts say they have cut this to 60 days and the 60-day accounts have been cut to 30. Regular accounts as well as slow pay accounts have been encouraged to switch to sales contracts, revolving accounts or bank cards.

Retailers, and particularly the automobile dealers, have also compensated for their decline in income on credit transactions by selling more of their customers credit life and credit health and accident insurance policies. Around one-third of the auto dealers reported that they were pushing much harder to sell credit insurance, and in some cases began to require customers to purchase the insurance after the passage of the Initiative. The consumer who purchases either a health and accident and/or life insurance contract incurs an additional cost to himself that is determined by the amount of the loan that he has negotiated and the applicable rate for the coverage involved. The maximum legal rate established for credit life insurance in Washington is 60 cents per $100 per year. The rate for health and accident insurance coverage on credit transactions varies with the benefits offered in the particular policy.

In addition to a desire to increase their revenues (through receiving 40 per cent of the premiums), there are other reasons why retailers have emphasized the sale of these types of insurance. First of all in the event of sickness or disability on the part of the consumer his payments are made by the insurance company. Second, the contract between the merchant and the consumer is also more salable if credit insurance is associated with it. Many finance companies will either reject the paper or discount it an additional point if the purchaser is not insured.

About one-third of the automobile dealers interviewed reported that they increased their emphasis on credit insurance in connection with the sale of automobiles. Secondary sources of information representing about 90 per cent of the auto credit insurance transactions in the state also substantiate these dealer responses. The evidence is even more convincing when Washington and the neighboring border states of Oregon and Idaho are compared. As may be seen from an examination of Table IV-10 the amount of life and health insurance premiums on automobile sales in Washington increased by 23 per cent in 1969 while there was only a negligible increase in both Oregon and Idaho. Table IV-11 shows the changes between 1968 and 1969 in total credit insurance. Table IV-12 provides data on northwest states and the United States for credit life insurance in force in the years 1958 through 1969.

Source: Life Insurance Factbook 1969-1958 (New York: Institute of Life Insurance).

At the time of the interviewing program, there was little indication of changes in other credit-related fees and charges.

One concluding remark on the behavior of the businessmen with reference to the issue of cost and revenue adjustments seems warranted. The evidence at hand suggests that their reaction to the passage of Initiative 245 did not necessarily take place immediately after the law went into effect, although there was a great deal of talk about it at the time. The adjustments which have taken place appear to have gone on throughout the year and it is quite possible that some adjustments still remain to be made. This seems to be due in part to the fact that many businessmen, particularly in the smaller firms, were unable to ascertain the precise effect of the law on their operations while others were unable to reach a decision about what to do in the face of the effect of the law on their operations. The survival of all of the firms studied however may well require an adjustment to the changed environment.

In spite of the imposition of fees and charges and the potential cost savings involved in the processing of loan transactions, personal loans for small amounts, no matter how small the risk associated with them, are not very profitable for banks in the face of current high money costs. The maximum rates the banks are allowed to charge under existing state laws is 12 per cent simple interest. The usury law has prevented banks from raising their interest rates above 12 per cent on direct merchandise loans and Initiative 245 holds bank credit cards to 12 per cent in the face of a rapid and substantial increase in their cost of money. Whether the banks actually would raise their rates if they had the opportunity to do so is a question. The evidence at hand strongly suggests that they would have raised their rates if they had been able to do so. If the present high cost of money persists and the 12 per cent revenue ceiling remains in effect, it is quite possible that some banks might drop bank credit cards if net income from this source of business is not forthcoming. One possibility for additional bank revenue would involve a direct annual charge to the consumer for the privilege of using the bank credit card services.

Credit cards are still in use because of the very substantial investment that the sponsoring banks have made in them, because of hopes that either the price of money will come down and/or the interest ceiling will be revised

upward and because of a feeling among bankers that credit cards are going to grow in importance in the future. In the long-run, however, banks may be unwilling to bear the burden of supplying a service the costs of which equal or almost equal and, which may ultimately exceed, the price that can be charged for it.

It is also reasonably apparent that the retail merchants are either not making money or actually losing money on that part of their business that they do on a credit rather than on a cash basis. However, it seems even less likely that the affected retailers will be able to dispense with loan arrangements between themselves and their customers, even in the face of this lack of profitability or outright loss. The merchants have by now done many of the things they can do to maximize their credit revenue and reduce their credit costs. Additional adjustments will have to be made in the area of product price increases or product cost and service reductions. The sale of automobiles and, to a slightly lesser extent, household furnishings and major appliances, depend heavily on purchasers who must borrow in order to buy. Borrowing money for a good reason is now a socially accepted practice in the United States; it is an absolute necessity for the survival for some types of businesses. It is no exaggeration to suggest that the whole American economy would be seriously shaken and many of the largest firms in the automotive, furniture, and appliance industries forced into bankruptcy along with thousands of retailers if no loans were available to consumers for the purpose of purchasing these items. The cost of credit sales will simply have to be absorbed in one way or another by the ultimate consumer. This is not to suggest that it is a matter of indifference how this burden is borne nor is it meant to suggest that it will be borne equally by all consumers.

Effects on Consumers

Positive effects. The primary effect of Initiative 245 insofar as individual consumers are concerned is that the cost of direct or indirect merchandise loans, the use of bank credit cards and interest charged by merchants has been either held at or reduced to 12 per cent per annum. In view of the rapid and substantial increase in the cost of money (the prime rate increased from 6.25 per cent in December, 1968 to 8.50 per cent in June, 1969) and the costs of

operating a credit card service and a credit department, it seems quite likely that the banks would have increased their charges above 12 per cent on direct merchandise loans and stayed at--or raised to--a charge of 18 per cent on bank credit cards. Further, most retail merchants would have kept finance charges at or raised them to 18 per cent. The evidence for this statement is, of course, largely circumstantial but it appears quite convincing.

The reduction in gross profit margins due to the reduction in interest rates has also probably worked to the advantage of consumers by encouraging businessmen to strive for greater efficiency in their operations in order to achieve cost reductions and thereby re-establish the gross profit margins in effect prior to the passage of Initiative 245. On the other hand, there is no assurance that if businessmen could achieve greater profitability through efficiencies that they would pass on the benefits to their customers.

Negative effects. The effect of the law is, however, uneven and there appear to be groups of consumers who have suffered adversely from the effects of the law. Cash customers, for example, have received no benefits and, on the other hand, they are in all likelihood paying somewhat higher prices. Those persons who were on open book accounts prior to the passage of the law and who are still in the same category have been affected in essentially the same manner a have cash customers although they are still being subsidized by cash customers to some extent.

There are those who must now pay more for the money that they borrow because banks and merchants will no longer lend to them at the new lower rates. Also included in the category of persons adversely affected are those who were on open book accounts prior to the passage of the law and who are now on revolving credit accounts or some other basis which requires them to pay 12 per cent interest.

Finally, there are those who must forego making purchases of products that require loans because of an inability to borrow from any source on terms that would permit the buyer to handle repayment of a loan out of future income.

Credit eligibility problems. After the passage of Initiative 245, retailers and financial institutions tightened up on the granting of credit to reduce potential losses in the form of bad debts and credit and collection expenses. First, there were some retailers who went out of the business of financing

their own customers. Eleven of the 63 general merchandise, furniture and appliance retailers who responded to the question stated that they changed to a policy of making the customer arrange his own financing. This meant essentially that none of their previous credit customers were eligible for credit. Similarly, of 37 retailers who offered 90-day open book credit prior to the initiative, 5 cancelled the plan entirely, 6 more reduced the time period from 90 to 30 days, and two others reduced the time period to 60 days.

Of the 30 auto dealers who sold new cars, 22 reported tightening the eligibility rules for credit, and of the 46 dealers handling used cars (including dealers selling both new and used) 36 tightened up on eligibility rules. For seven of the dealers this meant cancelling out whole categories of people who might have received credit prior to the Initiative. Two-thirds of the other retailers reported that they were rejecting applicants whom they would have accepted prior to the passage of the law. This was also borne out by the fact that all of the merchants interviewed showed a 9 per cent increase in credit application rejection rates during the second quarter of 1969. New and used auto dealers reported even higher rejection rates. Whether a credit eligibility criterion was income, length of residence, time on a job or repayment history, it was likely to be made tougher after passage of Initiative 245.

There are also indications that bank credit cards are being issued in a more discriminating manner. Based on a survey representing 95 per cent of the bank credit card business in the state, Table IV-13 shows that rejection rates on new applications for major bank cards were up sharply in the last six months of 1969. The rejection rate was significantly higher in each of these months over that of the same month in 1968. The increase in 1969 over 1968 was 2.2 per cent in July, 11.4 per cent in August, 8.4 per cent in September, 10.7 per cent in October, 6.1 per cent in November and 13.0 per cent in December. Although the rejection rates were lower in 1969 than 1968 for each of the first six months, the total rejection rate for the year was 4.1 per cent higher in 1969.

Shortened maturities. The specific effects of all of the policy changes that have been made by banks, retailers and finance companies in connection with indirect loans can be inferred from the nature of the changes that have been instituted. The effect of the shortening of the loan repayment time

December	6464	2325	36.0	14135	6933	49.0

period, for example, has been to increase the size of the consumer's monthly payment. This means that most consumers are able to borrow less than they were able to prior to the enactment of the law. The reported increase in downpayment requirements also serves to inhibit the sale of products sold on credit in much the same way--by shortening maturities.

The question of the size of the consumer's monthly payment is important because it is one of the credit related variables that the consumer frequently determines by choice. As pointed out before, this choice is constrained by the consumer's ability to repay the loan. The size of the monthly payment on a given purchase has been shown to be the key decision variable considered by some classes of consumers. Juster and Shay point out that financial institutions establish normative maturity limitations and the tendency is for some consumers to seek the longest contract maturities.

Notwithstanding the desire for long maturities on the part of many consumers and the opportunity that it represents to increase borrowing power, the desire of the merchants to minimize their costs of doing business on a credit basis and the income constraint both work to the disadvantage of lower income members of the community.

A consumer faced with purchasing a product requiring higher monthly payments and if these monthly payments are more than he can manage, can seek an adjustment in product quality level that may effectively reduce the total price of the merchandise and loan with the objective of reducing his monthly payments.

Increased down payments. There are several forces at work expanding downpayment requirements. First, retailers have made a conscious attempt to shorten maturities in order to reduce the amount of the discount that they must contend with on indirect paper sold to financial institutions and to improve their credit turnover. Second, higher downpayments serve to minimize high risk customer transactions. While customers who can afford large downpayments are not always better credit risks than those who can afford only a small downpayment, merchants believe, with some justification, that by following this procedure their risks are minimized. Twenty five per cent of the non-automotive retailers indicated that they had increased their downpayment requirements on credit purchases by an average of 15 per cent subsequent to the enactment of Initiative 245. Many retailers no longer offer "no downpayment" credit

arrangements. A number of retailers indicated that they required an additional 15 to 20 per cent down from those buyers whom they regarded as marginal risks. It also seems inevitable under these circumstances that at least some consumers would try to meet the retailer's downpayment requirements as well as the financing of the balance from small loan companies at rates higher than those offered by the retail merchants prior to the enactment of the law.

"Mousing." An illustration of the manner in which these changes in lending policies affect low income consumers is the practice of "mousing." If the consumer does not have enough money to meet the downpayment requirements for an automobile, for example, he may be obliged to borrow from one or more consumer finance companies using such items as his furniture as collateral for the loan. Then, if he is unable to obtain financing from a bank directly or indirectly for the balance of the purchase price, he may go to a finance company and use the auto for collateral to obtain a loan to cover the balance. Since these small loan companies are not limited by the 12 per cent restriction, and since the rate of interest they charge the consumer is inversely related to the size of the loan, the buyer who has to go through this practice of mousing ends up paying a larger sum of interest than he would if he obtained the loan in a single transaction from the dealer, a bank or through a sales finance company.

Several automobile dealers in the field survey indicated that "mousing" was more frequent after the passage of Initiative 245 than it was before. The records of one of the dealers surveyed showed that in his case at least increased downpayment requirements had apparently led to an increase in mousing. While the proportion of automobile buyers in this category is still small, i.e. less than 5 per cent, the proportion of automobile purchasers utilizing small loan companies for at least a part of their loan requirements exceeded 50 per cent in the case of this particular dealer.

The following quotation suggests that this is not an isolated example. "The squeeze is especially apparent in used cars . . . auto dealers have to guarantee repayment of the loans they submit to lending agencies . . . dealers are now telling purchasers of older used cars that the customer must finance the cars through small loan companies."[1]

---

[1]*Seattle Times*, December 18, 1969.

Role of banks. There has been, for a number of reasons, a definite reluctance on the part of banks to take over auto dealer paper in 1969 as compared with 1968. Banks typically had a policy of full recourse prior to the passage of Initiative 245, with some exceptions for "quality" paper. The banks might insist that dealers had to repurchase cars which were repossessed by banks. The losses to the bank were recovered from the dealers reserve account. Repurchase agreements are limited as to time (90 days, for example) so that if a bank fails to repossess within the time limit, the dealer is no longer obligated. Six dealers reported a tightening on recourse, usually by extending the time limit on repurchase agreements from 90 to 120 days. This, in turn has encouraged auto dealers to screen their credit sales customers more carefully. Naturally, some credit customers will suffer from this selective procedure. Although the volume of auto dealer paper decreased in 1969, the average value of each loan increased by about $100.

In comparing 1969 with 1968, it is seen that new direct bank auto loans decreased 11.8 per cent in number and 8.6 per cent in volume. Yet the average loan size increased by 3.5 per cent. New indirect bank auto loans declined 10 per cent in number and 5 per cent in volume. Average loan size increased 5.1 per cent. Personal secured and unsecured direct bank loans declined 25 per cent in number and 12.9 per cent in volume. Direct personal loans increased 16.2 per cent in average size. New indirect bank loans for appliance, home equipment and home furnishings purchases declined 40.9 per cent in number and 33 per cent in volume. The average size increased by 13.3 per cent. New indirect loans for marine boats and motors declined 6 per cent in number and increased 25 per cent in volume. The average size of bank loan for this purpose increased 33.1 per cent. This suggests that the decrease in the number of loans was not across the board but the cutoff was made at the lower tail of the distribution of loans by size resulting in a fewer number of loans but loans with a larger average size. This phenomenon is even more apparent in the case of direct loans.

Direct loans from banks to consumers for the purpose of an automobile purchase also decreased in number in 1969 when compared with 1968 while the average size of a loan in 1969 increased by almost $200. This indicates that banks have become even more selective in screening borrowers who come to them directly.

The rising cost of money to the lending institutions has undoubtedly intensified the effect of restricting the price that these same institutions can charge for the money that the lend.

In general, it is obvious that a low ceiling on the amount that can be charged for loans has encouraged lenders to reduce their risks by discriminating against those borrowers who are viewed as less creditworthy.

Summary

In sum it appears that people who are new in the community and are new on their jobs with relatively limited incomes and who wish to buy major appliances or older automobiles are being hit hardest by the law. In spite of what appear to be reasonable expectations to the contrary these people have also experienced difficulty borrowing money, at least in the short run, from relatively higher cost, higher risk-bearing financial institutions such as small loan companies.

The first hypothesis relative to credit was, "Banks and merchants are doing less business on a credit basis." All evidence is that credit declined both absolutely and relatively. Direct consumer loans declined and indirect consumer loans through banks and finance companies have declined because the financial institutions are less willing to loan at the new price ceiling. Increases in the lenders' cost of doing business, particularly in the cost of money, has intensified the problem. The net result has struck with special severity at furniture, appliance and used auto retailers.

The second hypothesis was, "Lenders are diverting business to the most profitable types of loans or credit arrangements." Banks have switched more credit to their bank credit cards, which are considered more profitable than instalment or direct merchandise loans, and have raised the minimum size of loan they will grant. Retailers have switched customers from instalment to revolving credit, they have shortened their open-book time periods and/or have divested themselves of some or all of their credit business by switching customers to bank credit cards or to other forms of outside credit.

The third hypothesis was "Small loan companies are doing more business." This does not appear to hold in absolute terms, since total volume has declined. In relative terms, however, there appears to be a shift toward

small-loan companies since in a totally declining market they declined less than the average whereas bank and retailer credit declined much more than the average. It is possible that they too became more selective in granting credit, because they showed a sharp increase in profitability in 1969 relative to any recent year.

The fourth hypothesis was, "Credit losses have decreased." Because businessmen's records on costs tend to be sketchy and because they often were reluctant to reveal what they regard as proprietary information about their operations, it was difficult to ascertain the extent to which lenders have been able to reduce their costs of transacting business on a credit basis. There were some cases of substantial reductions in costs, but their number was insufficient to warrant conclusions. The evidence gathered suggests that there are limits on the extent to which businessmen can seek relief from the loss in credit revenues by means of cost reductions. Most credit grantors, particularly large retailers and financial institutions, appear to have embarked on cost-cutting programs and have engaged in efforts to maximize credit income to the extent permitted by law.

A fifth hypothesis was, "More poor people have been affected by the new law than middle or upper-income people, and marginal standing from a credit standpoint has been redefined to exclude some individuals classified as higher risks." It is possible that creditworthy consumers have benefited from a decrease in allowable interest charges from 18 to 12 per cent per annum on consumer credit. The actions taken by financial institutions and retailers, however, tend to be at the expense of the lower income people, particularly those considered marginal credit risks. The tightening of credit granting criteria, the raising of the minimum amount eligible for credit, the increasing of downpayment requirements and the shortening of maturities all strike hardest at poor people. Those most affected are the people who were literally excluded from markets and those who were shunted off to small loan companies by retailers. The legal interest schedules of small loan companies, as high as 36 per cent per year, worked a hardship on consumers formerly able to get regular retail or bank credit.

The sixth hypothesis was, "Financing charges other than interest rates have increased." Although the new law reduced the basic service charge from

$15 to $10 or 1 per cent per month, some firms have instituted minimum service charges where before there were none. The charge for overdraft plans on credit cards has increased--in one case it was doubled. The increased requirement that consumers take out credit insurance has raised the effective costs of borrowing well above the 12 per cent prescribed by law. Retailers now pay a discount on indirect paper (cases were reported of discounts as high as 5 per cent) where before they received a commission ("participation"). Such costs must eventually be paid by the consumer in some way.

The final hypothesis was, "Businessmen have become more strict in the application of rules on delinquent accounts." Whereas these rules were often not utilized prior to the passage of the Initiative, they were brought to bear as a cost-cutting measure after the law took effect. Some consumers receiving credit, or eligible for credit, prior to the law were dropped. These effects were part of the result of the general tightening of credit availability in response to the law but the increases in levels of wholesale interest rates also contributed.

In sum, credit has become less available, it may cost less in terms of interest on revolving and instalment credit for creditworthy consumers, it costs more for creditworthy customers whose open-book privileges have been cancelled or reduced, it costs more for many low-income marginal-risk consumers, it has been denied to some poor people who formerly were eligible for credit and in retail stores it was being subsidized by cash customers at the time of the field work for this study.

CHAPTER V

PRODUCT RELATED IMPACTS

Product Related Hypotheses

The product-related hypotheses established at the outset of this study were as follows:

Prices of merchandise frequently sold on credit have gone up.

Different products and different businesses have been affected in different ways by the new law.

Leasing of merchandise frequently sold on credit has increased.

The passage of Initiative 245 imposed direct limitations upon the credit related policies of retailers. Secondary and somewhat indirect effects were also imposed upon the product related decisions of retailers. That is, the credit related policy restrictions were, in effect, imposed on the retailer by law, and he therefore adjusted his business operations to the new situation using the balance of his marketing options--his product related policies. For example, changes were made in pricing and service policies to compensate for changes in the credit area.

The imposition of a price ceiling on all credit customers had two important effects on retailers. First, it represented a potential 33 1/3 per cent decrease in finance income in some transactions. In many cases this represented a substantial portion of the firm's total gross and net profits. Second, with such a decrease in income it became imperative for the retailers to attempt to reduce costs, increase total revenues, or both.

Product Related Decisions: Prices

Essentially a retailer places a price on his service, product and credit terms. Each represents a revenue-generating and cost-incurring activity. When the contribution of one component is restricted, the burden of adjustment rests

on the other components. When credit income is significantly reduced by legislation the businessman's response can be expected to be in the form of cost reductions and an attempt to increase the revenue-generating capacity of the other activities in his business. Hence, prices may be increased on products and services. Within the context of such adjustments, attempts may also be made to reduce costs as well. In the matter of product price, per se, prices may be raised on items usually sold on a credit basis, on all items, or on some selection of credit-sensitive and/or non-credit-sensitive items.

In this study, retailers are divided into two major groups: auto dealers and others. The "others" include general merchandise retailers (department stores), and furniture and appliance retailers. The "other" retailers are covered first in this report.

The majority (56 per cent) of retailers (other than auto dealers) included in the sample of Washington retailers indicated that they raised prices on all merchandise on the average of 5 per cent in response to the passage of Initiative 245. A somewhat larger majority (64 per cent) of furniture and appliance dealers stated that they raised prices on items usually sold on credit. Thirty-one per cent of the department stores also raised prices for products usually sold on credit.

In a response which was less direct, but which had the net effect of raising prices to consumers, retailers stated that they were adjusting their merchandise offerings to obtain higher average mark-ups than existed prior to Initiative 245. Such adjustments can be brought about by changing to suppliers whose suggested retail prices include a higher percentage of gross margin for retailers, by obtaining suppliers whose wholesale prices permit a higher gross margin at accepted local retail price lines, or by replacing stocks with items whose unit prices are higher than those of prior offerings. This last approach will increase the gross margin per unit in dollars without raising the percentage of gross margin realized. Gross margins, of course, are affected by both cost and revenue factors. For example, increased efficiency in buying brought about by tighter controls, better inventory information, or more accurate selection can increase realized gross margin with no change in initial price mark-on rates. The greater efficiency in buying reduces losses from

markdowns in price that are made necessary by slow rates of turnover such as occur from overbuying or from errors in the selection of merchandise.

In general, it appears that there was no single pattern of response among retailers but price increases came mostly in the form of general price increases rather than singling out specific products. A retail sale may now require a trade-in whereas prior to Initiative 245 no trade-in was required. Or, in the case of pricing trade-ins, the retailer may now offer less for the used item. A few of the price increases noted above were in the form of changes in such product related charges.

Some retailers instituted charges for services which were provided for consumers free of charge prior to Initiative 245. Product-related charges for services formerly furnished free of charge have been assessed on check cashing, wrapping and packaging, lay-away, delivery, product installation, product service contracts and parking. In some cases, where charges had existed on such services, the charges were increased. In parking, for example, some stores ceased validating parking tickets so that the consumer had to pay the regular parking charge rather than obtaining it free through validation. In other cases, the charges for parking which was under the control of retailers were increased. Some stores placed substantial charges on product installation, where this service had been free. The new charges may not actually have covered the installation costs to the store, but they represented net price increases to consumers.

Implications for the Consumer. If price increases in product and product related services just compensate for the revenue cost by reducing the interest ceiling on credit extension then the typical credit customer has not been affected appreciably. However, those who pay cash for their products and services may now pay more.

The consumer who trades in a used appliance may well expect to receive less for it because of a change in trade-in policies by retailers. As mentioned above some consumers can now expect to pay for services that were provided by the retailer without charge prior to Initiative 245. Quite probably all consumers are paying totally a higher price for products and services as the passage of the Initiative appears to have encouraged price increases.

These price changes were also very probably facilitated by the then recent growth in the state's economy and the generally high level of employment prevailing at the time the law was enacted.

Product Price Decision Verification: Appliances

In an attempt to gather concrete evidence on whether or not retailers were raising prices as they said they were in response to Initiative 245, three surveys of prices on major appliances were conducted. They took place in April and August 1969, and January, 1970. Stores in Seattle, Spokane, Portland and Los Angeles were included in the first two surveys, but the January survey covered only Los Angeles and Seattle. Seattle was considered sufficiently representative of the state of Washington that it was deemed unnecessary to include Spokane. Portland, Oregon was included initially on the theory that its location in another state and at some distance (around 170 miles) from Seattle would provide an independent market for comparison purposes. Executives of chain retailing organizations were of the opinion, however, that Portland prices were strongly influenced by Seattle prices and that they might tend to follow Seattle trends regardless of the reason for the Seattle price trends.

The surveys were made in eight to ten large department and appliance stores in each of the cities visited, and the same stores were used in all surveys. The purpose of the surveys was to obtain the prices on six types of major appliances in order to compare the trends of these prices during the 9-month period in question. Working from a list of model numbers and descriptions provided by the comparison shopping bureaus of large stores, the prices were obtained by inspecting price books of major appliance departments and checking price tags on the merchandise or, in the few cases where price books were not made available, by inspecting the price tags alone. This method was modified for the third survey as described below.

Important difficulties were encountered because of several uncontrollable variables facing the price shoppers which made the task of locating identical models difficult. One major difference in the Seattle and Los Angeles markets was the dominance of electric appliances in some categories (cooking ranges and clothes dryers) in the former, and gas appliances in the latter. Another major

problem was that of model changes. Some appliances that were priced in April, for instance, did not exist in August, or if they did exist, they were placed on sale because of newer models in the market. This limited the usefulness of price comparisons from quarter to quarter, and reduced the number of identical models to a point where no statistical tests for price changes could be applied.

The initial survey in April used the comparison shopping list as a guide in the selection of appliance models. In August, an attempt was made to duplicate exactly the April survey by visiting the same stores and pricing the same models. However, because of the obstacles mentioned above, this met with only partial success. In an attempt to overcome this weakness in January, as many appliance models as possible were obtained in both Seattle and Los Angeles. This "shotgun" approach proved much bett r than the use of the comparison shopping list with respect to the number of comparable models in both cities. In the last survey, the number of identical models for most appliances was increased significantly. However, since most of the January models were different from the two earlier surveys, no statistically significant price trend analysis of particular appliances is possible with the available data.

In analyzing the available prices of identical models that could be found during each survey, the average price of each type of appliance is shown for Los Angeles and Seattle in Table V-1.

The models recorded in each appliance category for Los Angeles and Seattle were exactly the same for the first two surveys. Unfortunately, although in the January survey it was possible to obt in a much larger number of identical models in the two cities, these models were not the same as thos obtained during the April and August surveys. This hampers comparing price trends for the 9-month period.

Since the trends of retail sales volumes might be expected to influence price trends, retail sales data are provided here as economic background. In a declining market, price competition might be expected to lower prices, and vice versa. The retail furniture and appliance sales trends from 1968 to 1969 in the state of Washington and the United States are shown in Table V-2. Table V-3 presents a month-by-month comparison of department store sales in selected western cities.

Source: U.S. Department of Commerce: Current Business Reports--Monthly Retail Trade
(1968 and 1969—monthly issue)

As a general rule, price levels in the Seattle area seem to be somewhat higher than the Los Angeles area. This holds fairly consistently for all three periods, but it would be difficult to conclude increases have been more pronounced in Seattle during the 9-month period than in Los Angeles. One exception to this is dryers. There was about 1.5 per cent increase in August from April in Seattle, while the price remained unchanged in Los Angeles. Another exception is that dryers are the only appliance that showed a lower price level in the Seattle area during April and August. However, with only two identical models to compare, very little can be said about this difference. The January, 1970 survey conveys a greater confidence in the average price levels because of the larger number of identical appliances. Here, the price level still shows a trend similar to the two earlier surveys for all appliances.

Since our interest is in the general price level, a second approach to the collected data was the use of some kind of an aggregate price index of all appliances for the two cities. In combining all appliances, we obtained the following:

TABLE V-4

AGGREGATE PRICES OF MAJOR APPLIANCES
LOS ANGELES AND SEATTLE

	April		August		January	
	L.A.	Seattle	L.A.	Seattle	L.A.	Seattle
Total Price	$5166	$5274	$5172	$5314	$32785	$34062

Average price per model	$ 273	$ 277	$ 273	$ 280	$ 285	$ 296
Seattle price as a percentage using L.A. as a base, each period	100	101	100	102.5	100	104
Percentage price change, using both cities as base	0%	0%	0%	1%	4%	7%
CPI--all items, nationally		126.4		128.7		131.3
CPI for household furnishings, nationally		116.9		118.5		120.0

Source: Field surveys.

The table above shows that prices in the Seattle area for appliances in general have increased at a somewhat higher rate than Los Angeles and the national average. This may be a matter of speculation, but there is no economic reason that would suggest a higher rate. In fact, economic conditions in Seattle should force an opposite trend since there was substantial unemployment in the Puget Sound area in January 1970. But with this type of limited information, we cannot conclude that Initiative 245 has been the cause of the price increase in the Seattle area. The difference is not significantly large enough for drawing such a conclusion. On the other hand, the relatively higher prices for appliances in Seattle does tend to corroborate the survey responses of the appliance retailers.

Auto Retailer Pricing

Since there are some characteristics of auto retailing which differ from those of other types of retailing, and because auto purchases are usually the second-largest single purchase items for consumers (purchase of a house is larger, of course, and for non-home-owners rent payments are normally higher than car payments), auto prices are considered separately. Further, it was possible to obtain certain kinds of data on autos not available for other forms of merchandise.

Tables V-5 and V-6 summarize the findings relative to auto price changes by dealers interviewed in our sample. These reflect changes that were said to have taken place during the first three months of 1969.

TABLE V-5

NEW CAR PRICE CHANGES
WASHINGTON STATE, FIRST QUARTER 1969

Type of Dealer	Amount Given	Average Increase of 5.3%	Average Increase of $56.-	Total Dealers	Per Cent
New car dealers				30	100%
Increased price	3	6	4	13	43
No price increase				17	57

TABLE V-6

USED CAR PRICE CHANGES
WASHINGTON STATE, FIRST QUARTER 1969

Type of Dealer	No Specific Amount Given	Average Increase of 11%	Average Increase of $64.0	Total Dealers	Per Cent
Used car dealers				46	100%
Increased price	5	9	5	19	41
No price change				27	59

Note: A new-and-used car dealer's response is recorded in Table V-5 with respect to his new cars, and in Table V-6 with respect to his used cars.

Almost one-half of the dealers in each category indicated price increases on the autos that were sold. The dealers apparently did not attempt to increase their revenue by means of increasing prices on other products or services. Only 4 out of 39 respondents indicated that they had done so. Three new-car dealers increased delivery charges by an average of $30 and one dealer increased his service contract charge by $2. For used cars, the change was primarily a price increase in the car purchased because some of the services offered to new car buyers are not usually offered to used car buyers. Four used car dealers (10 per cent) did reduce their warranty liability on service contracts by shortening their commitment time period or by changing service terms. However, an indirect price increase for both categories was levied by means of offering the prospective buyer a lower trade-in allowance for his old car. This practice was expressly mentioned by 4 or 5 dealers in our sample.

A more comprehensive investigation of price changes was made using secondary source data. Data were recorded for all the Chevrolet, Ford, and Plymouth models that were sold at the Seattle Auction during the periods January through August of 1968 and 1969. For purposes of comparison the same kind of data were secured from Denver, Colorado, where the 12 per cent interest restriction does not exist. These are wholesale prices which the dealers pay

for the cars they buy at the auction. The results are shown in Table V-7 which follows.

TABLE V-7

WHOLESALE AUCTION AVERAGE AUTO PRICES
SEATTLE AND DENVER
1968 and 1969

		Seattle		Denver	
Age	Model	Number Sold	Price	Number Sold	Price
1969					
0	69	543	$2554	198	$2570
1	68	1741	2179	503	1963
2	67	759	1493	842	1551
3	66	345	1140	453	1170
4	65	243	932	371	942
5	64	158	707	228	675
6	63	100	475	180	471
1968					
0	68	262	2497	69	2653
1	67	931	2164	384	1974
2	66	862	1506	547	1557
3	65	656	1193	393	1216
4	64	385	981	181	937
5	63	284	707	164	691
6	62	137	544	132	483

There seemed to be slightly lower wholesale prices in Seattle for older used cars in 1969 when compared to Denver. Although this sample covers a sufficiently large number of automobiles, no conclusions can be made about the behavior of these prices except that, in general, used car prices at the wholesale level are lower in 1969 than they were in 1968 in both cities. However, it will be recalled that 41 per cent of the Washington used car dealers interviewed stated that their prices increased at the retail level. When dealers pay less for their purchases, they might be expected to keep retail prices unchanged, or even to lower them and pass some of the benefit on to the consumer. Initiative 245 forced upon the dealer a loss of revenue from interest

income. Viewed in this light, his behavior may be more understandable. A price increase at the retail level, or even no price change for that matter, is one possible way of recouping interest income losses.

Although no average retail prices on these autos were available, this higher retail margin on used cars was substantiated from another sample that covered about 15 per cent of all used cars sold in the state of Washington. These unpublished statistics become more impressive when they are compared with similar retail prices in Oregon which does not have the 12 per cent interest limitation. The data show the dealers in Washington were making an average of $18 more on each used car sold in 1969 than in 1968. This represents a 13 per cent increase in 1969 over 1968. Dealers in Oregon were only making an average of $13 more, or 9 per cent. On new cars, dealers in Washington were making only $11 more (2.7 per cent), compared to Oregon's $23 (7.9 per cent). The reader will recall that of those dealers interviewed (Tables V-5 and V-6) 43 per cent of the new car dealers stated that they had raised prices by 5.3 per cent, whereas 41 per cent of the used car dealers raised prices by 11 per cent. These two samples are not strictly comparable since the interview survey covered the first quarter changes, whereas the second sample covered the whole of 1968 and 1969; however, the evidence in both takes the same direction.

This is not surprising. This phenomenon will be discussed more fully under the section on "Credit Availability." A brief explanation is that banks in 1969 were still willing to finance new or newer cars at 12 per cent. However, pressure was building on used-car financing. The results of this pressure in terms of the losses in finance income reported in our survey appear in Table V-8 below.

TABLE V-8

FINANCE INCOME FROM AUTOS

	% Increase or Decrease in 1969 from 1968	
	Used Cars	New Cars
Seattle	-41.7%	- 7.0%
Washington	-51.1	-13.7
Oregon	- 2.9	- 1.0

Several dealers expressed the opinion that this lack of financing availability was the cause of depressed prices at the wholesale level, especially, for older used cars. On the basis of such remarks, Table V-9 was revised in the following fashion:

TABLE V-9

AVERAGE WHOLESALE AUTO PRICES
SEATTLE AND DENVER, 1968 AND 1969

	1969		1968	
	Number of Cars	Average Price	Number of Cars	Average Price
Late model used cars (0,1,2,3 yr. olds)	3388 (1996)	$1980 ($1669)	2711 (1393)	$1752 ($1630)
Old model used cars (4,5,6 yrs. olds)	501 (779)	$ 770 ($ 755)	806 (479)	$ 810 ($ 724)

Note: Prices and number of cars enclosed in brackets are for Denver, Colorado.

The implications here seem fairly obvious. The older model car which a consumer purchases in Seattle costs him a relatively higher price than if he were to buy a later-model used car. One can safely assume that the majority of buyers of older used cars belong to lower income groups than those who can purchase newer model cars. If this is correct, the impact of Initiative 245 does not seem equally distributed, and its adverse effects are being borne by the lower-income consumer to a greater extent than by more affluent consumers.

Auto Sales Volumes

Published data that directly relates to the behavior of auto sales in Washington for purposes of a scientific analysis are scarce, and what is available leaves something to be desired for purposes of comparison with other state and national figures. Nevertheless, an attempt was made to assemble available information that is of some benefit in the presentation of an overall automobile market picture.

Few dealers in the survey volunteered information on their sales volumes. Of those few, five reported no change in the sale of new cars and nine reported that sales of used cars dropped by about 8 per cent in the first quarter of 1969 when compared with the same period in 1968, but no inferences can be drawn from figures obtained from such a limited response for purposes of analysis. The data obtained from the Department of Revenue for the State of Washington shows only a slight gain of 0.2 per cent in auto dealers' sales (unadjusted) for the year of 1969 over 1968 while the United States automotive retail sales grew 2.5 per cent.

TABLE V-10

AUTOMOTIVE RETAIL SALES[a]
WASHINGTON vs. UNITED STATES
(in millions of dollars)

United States	$ 58,273	$ 65,261	+12.0%	$ 66,922	+2.5%

[a]Seasonally unadjusted sales include new and used car dealers plus tire, battery and accessory dealers.

Source: Washington: State Department of Revenue. United States: Automobile Manufacturers Association, "Annual Automobile Facts and Figures."

Table V-10 shows a substantial sales decline in the third and fourth quarters of 1969 that virtually wiped out any annual sales growth in Washington.

Numerically, the number of used cars reportedly sold in Spokane in the first quarter of 1969 was 12 per cent less than the same period in 1968, which

in magnitude agrees with published figures of 10.5 per cent decrease found for the three Spokane dealers included in this survey. However, Seattle showed a 5.5 per cent increase in the number of used cars sold at the auction for the first half of 1969 over the same period in 1968. Overall, this may suggest a slight depression of used auto sales in Washington. However, any depression may just as easily be in response to general economic conditions nationally. For instance, according to "Automotive News" sales of used cars in 1969 dropped 100,000 units below the 1968 total, but new car registrations were about 43,000 units above the 1968 level. It is not possible, therefore, statistically to isolate the effects of the passage of 245 from other economic variables when potentially the degree of change is this small, when subscribing to the assumption that the trend of auto sales in Washington should more or less follow the national trend.

Dealership Terminations

Information gathered from dealers during last summer's survey shows that in an effort to cut costs and to survive, one new and used car dealer mentioned that he had to release eight salesmen. Another used-car dealer reported that both cash and credit sales were down, and the only way he was able to stay in business was by terminating the services of one full-time and two part-time salesmen. A third new and used auto dealer advertised close-out sales and mentioned specifically in his advertisements that one of the main reasons for going out of business was Initiative 245. A manager of a new and used car dealership said that his former used car business had to be terminated, and that now he was working on a salary for another dealer. He also mentioned the names of five dealerships that had gone out of business. These and a few others were brought to our attention during interviews with automobile dealers. A fifth used car dealer confided that he expected to be forced out of business in a few months because of Initiative 245. Since the interview period in the summer of 1969 some other dealerships were terminated.

Opinions expressed in the press by businessmen blamed Initiative 245 for auto industry problems. For example, during a panel discussion in a statewide press conference, Mr. Jenkins, Chairman of the Board of Seattle-First National Bank stated, "Washington State's Initiative 245 has made credit card business

unprofitable, is forcing auto dealers out of business, is damaging the real-estate industry, and must result in higher prices."[1] There was disagreement with the above contentions from another source. Joe Davis, President of the Washington State Labor Council responded by listing several factors that have influenced business, "Boeing has reduced its work force by almost 17,000; the national administration has deliberately set out to increase unemployment as an anti-inflationary weapon; construction starts have declined some 30 per cent, and inflation has cut into the wage gains received by the working men and women of the state."[2]

The president of the Seattle Automobile Dealers Association, Pat Goodfellow, has indicated several possible reasons for the closure of three or four major dealerships in the Seattle area in the past year, the reorganization or regrouping of seven or eight more and the failure of "countless" used-car dealers: high inventories; a cost of financing those inventories that "is out of sight"; increasing overhead; growing size of dealerships; a sluggish response to rapidly changing economic conditions; the credit squeeze created by rising interest rates charged dealers while Initiative 245 limits dealer interest charges to buyers to 12 per cent per year; the area's economic slowdown. "Initiative 245 would have been more tolerable under the interest rates we had three or four years ago," Goodfellow said.[3]

In reviewing the records of the Department of Motor Vehicles in Olympia during the months of June through December (no records were available for earlier months in 1968), it was learned that there were 171 new dealership applications in 1968 and 174 in 1969. In looking at the number of cancellations of dealer licenses for the same period, there were only 119 terminations in 1968 compared to 201 in 1969. (These data appear below in Table V-11.) One would suppose that the bulk of these are used car dealers. Usually, a business that deals with new cars has stronger financial backing.

TABLE V-11

NEW LICENSES AND TERMINATIONS OF AUTO DEALERSHIPS
JUNE TO DECEMBER, 1968 AND 1969

	1968	1969	Total
New Applications	171	174	345
Terminations	119	201	320

As far as the consumer is concerned, this may be a healthy sign if these businesses are terminated because of inefficiencies and high operating costs. But if Initiative 245 is the cause of such an adverse impact in this area, the consumer, in the long run, will have fewer alternatives and choices. His bargaining power may be reduced, and he may become "captive" to fewer competitors. The passage of time will be required to determine whether this decrease in competition injures consumers.

A Chi-square test was run on this data to determine whether there was a significant difference in the proportion of terminations between 1968 and 1969. The results give us a value of Chi-square equal to 11.03. This is significant at the 0.01 level.

The reader is cautioned that no claim is made that this significant increase in dealership terminations is due to Initiative 245 alone. Economic conditions in Seattle, high interest rates, and the general auto market can also be considered as contributing factors.

The reporting of dealership cancellations and new applications in Olympia is made on a monthly basis. As mentioned earlier, only the last seven months of 1968 were available, but all twelve months of 1969 could be obtained. These were as follows in Table V-12.

These monthly data present an interesting phenomenon. We suggest that a market which is in equilibrium, or which is in a reasonable position profitwise, will show a positive reaction manifested by new entries in response to exits out of the market. If the industry is in equilibrium, we should theoretically expect the number of new entries to correspond to the number of terminations

TABLE V-12

and, in fact, in a profitable market, new entries should even exceed exits until an equilibrium is reached. This suggested the application of a rank correlation test between the number of cancellations and the number of entries. After consideration of several alternatives, it was found that using a one-month lag in new applications for both 1968 and 1969 gave the best fit. This can be justified in terms of the real world situation. We cannot realistically expect new applications to respond to terminations spontaneously. Some such

cases may exist, but the majority of new entries would reasonably lag behind terminations. Not only does the process involve search and investigation on the part of the new applicant, but also the administrative procedures of licensing consume some time. On the basis of a one-month lag, the correlation coefficient for the last seven months of 1968 was a positive 0.56, and for the twelve months of 1969 was a negative 0.62.

The correlation coefficient for 1968 is not significant at the 0.05 level (it would have become significant if its value was 0.67, or if we had all 12 months of 1968), but it should not be completely disregarded. Actually it is the sign of the coefficient rather than the magnitude which is of most interest. The positive value in 1968 suggests that a high number of cancellations was associated with a similar number of new applications. And when cancellations were low, new applications were likewise. Such response is likely to happen in an equilibrium market.

Turning to the negative correlation coefficient in 1969, we find it significant at the 0.05 level. The negative sign can have two possible explanations with respect to the magnitude of exits and new entries. If low exits are accompanied by high new entries, the market would have to be highly profitable for such behavior to manifest itself. But the lack of increase in new applications in 1969 over 1968 (for the last 7 months of both years where a comparison can be made) does not support such an assumption. On the other hand, the negative sign can also mean that high cancellations are accompanied by low new entries, an indication of a depressed market. Such an assumption would have more support when we recall that for the last seven months of 1968 terminations amounted to 119, and in 1969 for the same period they were 201.

Again, no implication can be made that the depressed market is solely due to the effect of Initiative 245. It is necessary to remain aware of other economic factors in 1969 both on the national and local levels.

The standard deviation from regression shows a value of about 0.24. If the residuals from the true regression line are normally distributed, then b is normally distributed also with mean B and standard deviation equal to 0.24

To test the hypothesis that $B = B_o$, i.e. to see if the value of the coefficient is significant and makes a contribution in explaining new applications, we can use the t ratio:

$$t = \frac{b - B_o}{s_b} \qquad \text{with } n - 2 = 10 \text{ degrees of freedom}$$

$$t = \frac{0.58 - 0}{0.24} = 2.41$$

This value of t is significant at the 0.05 level. ($t_{.05(n-2)} = 2.23$) The coefficient of determination (R^2) is only 0.36. In other words we can attribute only 36 per cent of the variation in applications to cancellations. This value suggests the presence of other variables such as disposable income, employment, . . . etc. that may help explain the remainder of this behavior. It is proposed, therefore, that if further work is done in this area, a more comprehensive analysis of other economic variables may shed further light on this situation.

Leasing. At the time of the field interviewing program, it was not possible to discern any significant shift toward leasing programs in response to Initiative 245. There were only four automobile dealers who indicated that they were attempting to promote leasing, and two additional dealers expressed plans to promote leasing in the future. It seems logical that more dealers might move to leasing programs since the law does not regulate this activity. Of the dealers interested in leasing, however, several mentioned that they were interested in leasing for "its own sake" and not because of Initiative 245.

Data from a number of banks which finance dealer leasing of automobiles (Table V-13) show that in 1969 the number of leases financed increased by about one-sixth, and the dollar volume of lease financing increased by one-third over 1968. The average dollar size of the leasing finance contracts increased by about one-sixth.

In early 1970, there was an increase in the number of auto dealer advertisements which stressed leasing. Several of these presented two options: a long-term lease at a relatively low rate with no mileage charge, and a lease-purchase plan with higher rates and a mileage charge and specific purchase prices consumers would pay on conversion of the lease to a purchase. At this juncture, the lease plans appear more as positive sales devices than as defensive responses to financing problems created by the interest limitation law.

TABLE V-13

AUTOMOBILE LEASING
A SAMPLE OF BANKS FINANCING LEASING PLANS
STATE OF WASHINGTON
(thousands of dollars)

	1968		1969		Percentage Change	
	Number	Dollar Volume	Number	Dollar Volume	Number	Dollar
New	3503	13,093	4040	17,439	+15.3%	+33.2%
Outstanding	7310	19,698	8571	24,727	+17.2%	+25.5%

Average Dollar Size of Contracts

New:	1968	$3738	Percentage Change = +15.5%
	1969	$4317	
Outstanding:	1968	$2732	Percentage Change = +5.6%
	1969	$2885	

For consumers, the main attraction of the leasing plans appears to be the opportunity to start driving a new car without a downpayment. The long-term lease plans have the additional advantage that the rental costs are as low as, or lower than, normal monthly payments on outright purchase. Perhaps the most significant change observable is that leasing formerly seemed aimed at business and professional customers, whereas the current advertising is aimed at consumers. With available evidence, it is not possible to attribute increases in leasing to Initiative 245.

Summary

In this chapter on product related responses of retailers, it has been pointed out that retailers who have suffered losses in credit income or who have seen credit revenues turn into credit losses can be expected to make up these

losses in other ways. Some of the ways relate directly and indirectly to the handling of credit itself and are discussed elsewhere. This chapter concerns itself with product related policies and decisions such as pricing, pricing of ancillary services, adjusting assortments, changing gross margin rates and/or generally improving merchandising efficiency.

The first product-related hypothesis posited in this study was, "Prices of merchandise frequently sold on credit have gone up." The majority of retailers responded that they had raised prices on all merchandise to make up for their losses on Initiative 245. Others raised prices on specific items usually sold on credit. In either case, the price rises negated the proposed benefits of the law, which were to lower the cost of credit and provide a net saving to consumers. Where prices were raised only on credit-sensitive items, the credit customer paid more for the goods. Where all prices were increased, the credit customer had to pay more for everything he bought in the store, whether he in fact charged everything he bought. The cash customer, of course, subsidized the credit customer by paying all of the price increases and receiving none of the benefits of interest limitation.

In addition to direct price changes, retailers sought to lower costs and increase revenues by instituting charges, or raising the level of charges, on ancillary services such as check cashing, wrapping and packaging, delivery, product installation, product service contracts, lay-away and parking.

In auto retailing, it was possible to get some external verification of the respondents assertions that prices had gone up on both new and used cars, but that they had gone up relatively more on older used cars. Even where prices may have remained stable, auto dealers were able to raise their gross margins on these older cars because their wholesale prices had declined. Further, higher gross margins were achieved by allowing relatively low trade-in allowances.

The second hypothesis was: "Different products and different businesses have been affected in different ways by the new laws." It can be seen in this chapter that items usually or frequently bought on credit, particularly autos, furniture and appliances, have been affected differently than items normally purchased for cash. Considerable adjustments were in evidence in the sale and financing of "credit-sensitive" items. In many cases, the actions of

respondents to raise prices to make up for lost interest revenue fell equally on all products in retail stores; i.e., the majority of the respondents raised prices on all merchandise. Other businesses raised prices on the credit types of items themselves. Still other merchants felt that the nature of competition on items such as major appliances prevented raising prices on these items. They were concerned that consumers could compare prices too readily, and that sales would be lost. In the auto retailing industry, there were differences between dealers and between products. Prices were raised proportionately more on used cars than on new cars, and gross margins were increased more on the used cars. In the sections of this report on financing, it is pointed out that banks quit financing cars older than a specified number of years, and this created special problems for businesses and consumers. The incidence of retailer mortality fell most heavily on used car dealers, and there were cases of new car dealers blaming Initiative 245 as one cause of going out of business. There were no cases reported of retailers other than auto dealers who failed in business as a result of Initiative 245, although there may have been some.

A third hypothesis was, "Leasing of merchandise frequently sold on credit has increased." The provision of leasing options by new car dealers appeared to increase, but it was not possible to attribute this to Initiative 245. There was no apparent increase in leasing of other consumer products.

The auto data supports conclusions in other parts of this study that the impacts of the Initiative fall more heavily on the lower income consumers. Other portions of the study show that credit became less available to lower income people and that they were likely to pay a much higher interest rate if they were able to get credit at all. The analysis of auto pricing demonstrated that prices on older autos have increased proportionately more than prices on newer autos. Since it is logical to assume that older autos are bought principally by lower income, less creditworthy consumers, the consumers at the bottom of the scale suffer on both the price of autos and on their costs of credit.

The increase in dealer mortality and the apparent decline in new business formations to replace failing businesses may not seem of immediate concern to consumers. Yet, for whatever effect this has on consumer welfare, the trend definitely represents a diminution of competition in auto retailing.

CHAPTER VI

GENERAL CONCLUSIONS

The conclusions are summarized in the Summary of Findings at the beginning of this report (Chapter II). In general, it can be stated that the impacts of Initiative 245 reached consumers primarily through the medium of business responses to the law. Businesses which dealt in consumer credit tended to lose revenues and profits because of the 12 per cent per year limit on the charge they could make for credit. The defensive measures taken by businesses involved increasing costs for some or all consumers and making credit more difficult for some to obtain. The law provided a rationale for raising prices, tightening upon credit, and other practices detrimental to consumers. Those who expected benefits from the Initiative probably did not foresee such effects on consumers.

Poor people were hurt most by the effects of the law. Some of them formerly able to obtain credit from certain sources were shut off from these sources. Some were unable to make purchases because their credit applications were refused. Some auto customers probably were shut out of the market because they could not make the increased downpayments or the monthly payments on shortened maturities. Some who obtained credit paid more for it than they would have paid for it before the law was passed.

Some cash customers were forced to subsidize credit customers through paying relatively higher prices for goods purchased. Some creditworthy customers pay more interest than before the law because their free credit time periods have been reduced. Some creditworthy customers of stores which, on the goods these customers bought did not raise prices enough to counterbalance losses in credit revenue, may have received a net reduction in the total cost of buying on credit. Those who benefited most were those who could buy merchandise on credit at less of a price increase than the drop in credit revenues and who did not buy anything in credit-granting stores for cash.

There were, of course, significant changes occurring in other economic factors during the period of the study. Many of the actions taken by retailers and financial institutions might have been influenced to some extent by tight

money, the increasing prime rate of interest, deteriorating economic conditions and inflation. The fact that a recession was developing in the state of Washington affected the external data used to verify the impacts of Initiative 245. The unemployment rate which was rising, particularly in the Seattle area, and the consequent weakening in incomes and demand, undoubtedly induced some measures quite the opposite of initial responses to the Initiative--and some measures which took the directions to be expected in response to the Initiative.

Additional research which might provide useful information would be to follow up on price movements over extended periods of time. Toward the end of this study it was found that certain sources of price information might be available for periods of several years. The same sources could provide data on downpayments and maturities. Further, although tests involving consumer interviews proved a failure in this study because of the inaccuracy of consumer answers, some means might be devised to derive meaningful information from consumer interviews.

If additional time and resources were available, relevant information might be obtained from a more detailed study of automobile data. For example, studies of the legal ownership of autos might show changes in financing patterns. Consumer interviews of persons whose cars were recorded as purchased through consumer finance companies might provide data on the practice of "mooring" (the use of multiple personal loans not formally connected with the auto purchase to put together auto downpayments).

Finally, if the law is changed again to allow higher interest or service charges on consumer credit, a follow-up study could more fully determine the relationships between rate limitation and its impacts.

APPENDIX

EXPLANATION OF TERMS*

Consumer finance company (or "small loan company"). Consumer finance companies are firms set up under special legislation to make it easier for people with relatively poor credit standings to borrow money. In the state of Washington, these firms are permitted to charge three per cent per month (36 per cent annual interest) on loans up to $300, one and one-half per cent (18 per cent annual) on loans between $300 and $500, and one per cent per month (12 per cent annual interest) on loans over $500. Loans may be made directly to consumers or may be made indirectly through retailers.

Sales finance companies. Sales finance companies (also called "captive finance companies") are set up by manufacturers to provide indirect financing for retailers of their products, although they may finance the sale of products other than their own. Examples include General Motors Acceptance Corporation and General Electric Credit Corporation.

Direct loan. The terms "direct loan," "personal loan" and "consumer loan" are generally used interchangeably in this report to apply to a loan having the following characteristics:

1. it is made to a consumer;
2. it is made by a specialized financial institution, such as a bank or small loan company;
3. it is made for a designated purpose;
4. the maximum amount is limited by the policy of the lender and, in most states, by statute; and
5. it is to be repaid in installments.

For a more detailed explanation of terms, see: Robert H. Cole, *Consumer and Commercial Credit Management*, Third edition (Homewood, Illinois: Richard D. Irwin, 1968); Elvin F. Donaldson and John K. Pfahl, *Personal Finance*, Fourth edition (New York: The Ronald Press, 1965); and Richard P. Ettinger and David E. Golieb, *Credits and Collections*, Fifth edition (Englewood Cliffs, New Jersey: Prentice Hall, 1962).

Indirect loan. "Indirect loans" are loans made by financial institutions to finance merchants' sales of durable goods--such as automobiles and household appliances--on the installment plan. The operation is, in effect, "indirect lending" by the financing agency to the consumer.

In "indirect" financing of installment sales, the prospective customer makes application for credit to the dealer or merchant, not the financing agency. The dealer interviews the customer and collects the basic credit information. He then clears the application with the financing agency, which usually makes a credit investigation, although the dealer may himself perform this task.

The customer has no contact with the financing agency until after the sale is made--the merchant handles all the details of the transaction in much the same way that an installment sale is made in a department store. The customer usually makes a downpayment, and agrees to pay the balance of the sale price, plus credit costs, in equal installments. He signs a promissory note and a conditional sales contract, chattel mortgage,* or bailment lease.*

The indirect lending activities of small loan companies are generally referred to as the purchase of conditional sales contracts, while indirect lending activities of banks are generally designated as indirect loans.

Recourse plans. Sales finance companies and banks finance retail instalment sales under several different "recourse" plans.

(a) No-recourse or non-recourse plans place all the risk on the financing institution. If the customer (debtor) defaults, the agency repossesses the goods and stands any loss. Dealers operating under no-recourse plans are generally inclined to submit to their financing agency the credit applications of all prospective customers except obviously impossible risks. Consequently, financing agencies generally limit no-recourse plans to dealers and retail customers with

---

*When one purchases goods and executes a chattel mortgage as security for the purchase price, title to the goods passes from the seller to the buyer as a consequence of the sale and back to the seller by virtue of the chattel mortgage. The seller thus holds legal title until final payment is made. In the bailment lease, title to the goods remains with the seller until the final payment has been made and then it is purchased for a nominal sum which is usually waived by the seller. When the conditional sales agreement is used, title to the goods remains with the seller until the last payment has been made.

good credit ratings. (As a general rule, finance companies handle retail instalment sales under this plan.)

(b) Limited recourse plans divide the credit risk between the retail dealer and the financing agency.

(c) Full recourse plans place all the credit risk on the retail dealer. If the customer (debtor) defaults, the financing agency reassigns the contract to the dealer, who bears whatever losses are involved. (As a general rule, banks finance retail installment sales under this arrangement.)

Credit life insurance. While there are several variations of credit life insurance, the basic objective is always the same--it is meant to assure full payment of a loan in the event of the death of the buyer. Health and/or accident provisions are sometimes included in the policies or else in separate insurance policies.

Participation. The term "participation" refers to the practice whereby a financial institution shares the interest proceeds from an indirect loan or a conditional sales contract with the retail dealer. Thus, on an indirect loan of $100, the dealer receives from the financial institution $100 plus a certain percentage, generally called "participation rate," of the interest on the loan.

Discount. The term "discount" refers to the practice whereby a financial institution charges the dealer a certain rate per annum for making an indirect loan or purchasing a conditional sales contract. Thus if a small loan company buys a $100 conditional sales contract, it will pay the dealer not the face amount of the contract, but rather $100 less whatever annual rate of discount it is charging at that particular time. (If a 3 per cent annual discount is charged, the dealer will receive $97, assuming the contract has a one year maturity. If the contract has a two year maturity, the dealer will receive $94.)

Flipping. The term "flipping" refers to the practice among loan companies of converting a conditional sales contract to a direct loan. While a maximum simple interest rate of 1 per cent per month can be charged on a conditional sales contract as a result of Initiative 245, a simple interest rate of 3 per cent per month can be charged on direct loans of amounts less than $300, 1½ per cent per month on amounts between $300 and $500, and 1 per cent per month on amounts over $500.

Mousing. The term "mousing" is used in the retail auto industry to denote the practice of dealing with consumers who are unable to make downpayments. The consumers are sent to two or more consumer finance companies to obtain a series of small personal loans. These loans are not connected formally with the auto purchase, and the auto is used as collateral only on the balance remaining after the downpayment is made. In the state of Washington, the remaining balance--as a retail purchase--incurs a maximum interest rate of 12 per cent per year, but the series of personal loans used to put together the downpayment may cost the consumer as much as 36 per cent annual interest.

Questionnaires

ECONOMIC IMPACT OF INITIATIVE 245 - SURVEY

AUTO DEALERS

1. Type of Dealer: Please check category which best describes your operation.

ECONOMIC IMPACT OF INITIATIVE 245

QUESTIONNAIRE FOR AUTO DEALERS

This group of questions will deal with changes you may have made in direct response to Initiative 245 (either the passage of the initiative or its taking affect on 12/5/68) when dealing with consumers.

Circle Response

1. Have you increased the average selling prices on

   a) new vehicles — Yes No

   b) used vehicles — Yes No

   If yes, by how much?* _____
   (*trade-in price change?)

2. Have you increased prices on other items in response to Initiative 245 (i.e., parts, service, TBA)? Yes No

   If yes, identify _____

   _____

3. With respect to the following product related charges, do you charge for

	No Change	Prior to Initiative 245 (before 12/5/68)		Amount	In Response to Initiative 245 (since 12/5/68)		Amount
a) product delivery	_____	Yes	No	$_____	Yes	No	$_____
b) service contracts	_____	Yes	No	$_____	Yes	No	$_____
c) product guarantees (warranties)	_____	Yes	No	$_____	Yes	No	$_____

   d) other product related services

   Identify _____
   (handling, check cashing, make ready, etc.)

   Comment:

4. With respect to the following credit related fees and policies, do you require

	No Change	Prior to Initiative 245 (before 12/5/68)			In Response to Initiative 245 (since 12/5/68)		
				Amount			Amount
a) a service fee (minimum)	_____	Yes	No	$_____	Yes	No	$_____
b) a loan fee	_____	Yes	No	$_____	Yes	No	$_____
c) an investigation and credit report fee	_____	Yes	No	$_____	Yes	No	$_____
d) credit insurance	_____	Yes	No	$_____	Yes	No	$_____
e) cash/credit differential	_____	Yes	No	$_____	Yes	No	$_____
f) late payment fee	_____	Yes	No	$_____	Yes	No	$_____

g) other? Identify _____

_____

Comment:

5. In response to Initiative 245 do you now promote auto leasing instead of purchasing?

Circle Response

Yes No

Comment:

6. Do you intend to promote more auto leasing in response to Initiative 245?

Yes No

If yes, why?

7. What is your policy with respect to recourse on credit paper.

Before passage of Initiative 245:

If yes, to what extent _____

In response to Initiative 245:

If yes, to what extent _____
(repurchase agreements)

8. When selling paper to banks, what was the participation rate or discount rate

   Prior to Initiative 245? _____

   In response to Initiative 245? _____

   Comment:

9. Have you changed the credit eligibility rules for consumers in order to reduce expected losses in response to Initiative 245?

   Yes No

   Specify rules changed: New: _____

   Used: _____

10. Do you now reject applicants for credit whom you would have accepted before Initiative 245 took affect?

	Prior to Initiative 245 (before 12/5/68)	In Response to Initiative 245 (since 12/5/68)
Yes____ No____ Rejection rate:	_____	_____

   If yes, why?

11. Do you now advertise or promote the availability of credit (same____ more____ less____) in response to Initiative 245?

   What have you done?

12. As far as you can determine, what has been the impact of Initiative 245 upon consumers?

13. For border cities

   a) To your knowledge, have local customers increased their purchases from out of state

      in response to Initiative 245: Yes____ No____

      in response to Initiative 245: Yes____ No____

14. Would you please give us a sample of the type of consumers you rejected as marginal credit risks? (names)

   Prior to Initiative 245

   In Response to Initiative 245

15. What is the minimum downpayment as a percent of price you require from credit buyers in the following situations?

		Prior to Initiative 245	In Response to Initiative 245
superior credit risk:	new vehicles	_____%	_____%
	used vehicles	_____%	_____%
average credit risk:	new vehicles	_____%	_____%
	used vehicles	_____%	_____%
below average credit risk:	new vehicles	_____%	_____%
	used vehicles	_____%	_____%

16. Capacity to pay at time of application: What were the monthly payments as a percentage of monthly take-home pay which best describe your marginal consumer credit applicant?

Prior to Initiative 245

In Response to Initiative 245

17. What per cent of your consumer auto financing is done by:

	Prior to Initiative 245		In Response to Initiative 245	
	New	Used	New	Used
Your firm	____	____	____	____
Banks	____	____	____	____
Finance Companies	____	____	____	____

18. What is your average credit turnover?

	1st Qtr. 1968	1st Qtr. 1969
Credit sales	_____	_____
Accounts Receivable	_____	_____

Comment:

19. Number of Loan Payments: What was the percentage of loans with the following maturities?

	Prior to Initiative 245		In Response to Initiative 245	
	New	Used	New	Used
Single payment	____	____	____	____
6 months	____	____	____	____
12 months	____	____	____	____
24 months	____	____	____	____
36 months	____	____	____	____
More than 36 months	____	____	____	____

20. What dollar volume of your business was done:

	1st Qtr. 1968		1st Qtr. 1969	
	New	Used	New	Used
on cash basis	____	____	____	____
on leave basis	____	____	____	____
on credit basis	____	____	____	____
total sales	____	____	____	____

21. Has your finance income changed?

	1st Qtr. 1968	1st Qtr. 1969
a) Gross finance income	____	____
b) Bank or finance company discounts (costs)	____	____
c) Net finance income	____	____

ECONOMIC IMPACT OF INITIATIVE 245 - SURVEY

CONSUMERS

(Note: This questionnaire was used experimentally but was found to be unproductive.)

Hello. I am _____. I am a Research Assistant in the Graduate School of Business Administration at the University of Washington. We are conducting a study to determine what the impact of Initiative 245 has been upon the consumers in our state. You may recall that this Initiative reduced the maximum allowable interest rate charged for consumer credit from 18 per cent (1½ per cent per month) to 12 per cent (1 per cent per month). We are interviewing consumers like yourself and we need your help in answering a few questions to see how this new law is working out.

ECONOMIC IMPACT OF INITIATIVE 245 - SURVEY

CONSUMERS

Since the passage of Initiative 245 in December 1968:

Circle Response

1. Have you attempted to purchase an appliance, furniture, or car? Yes No

2. Did you finally purchase the item? Yes No

   a) If no, was it because you could not obtain financing? Yes No
   Please explain. _____

   _____
   (fine out avenues he attempted)

   b) If yes, what was the item(s)? _____ new____
   used ____

   (1) If used, did you first intend to purchase a new item? Yes No

   (2) Explain (could obtain lesser financing) _____

   _____

3. How did you pay for the item?

   a) cash_____ If cash, savings_____ cash on hand_____

   b) why cash?

   c) credit_____ Who financed it? _____
   (retailer?)

   d) If not financed by retailer, was it your first choice? Yes No

   e) If no, explain _____

   _____

4. Do you have a revolving charge account? Yes____ No____

   If no, have you recently applied for one? Yes____ No____

   Comment:

5. Have you had any credit privileges denied? Yes____ No____

   By retailer? _____

   Bank _____

   Finance company _____

   Were you given a reason? Yes____ No____

   What was the reason?

6. Have retailers encouraged you to lease the item rather than purchase it?

   Yes____ No____

7. If a retailer refused you credit, were you encouraged to obtain the whole _____ or part _____ of the amount from another source? Yes____ No____

   If yes, who? Bank____ Finance Company____ Other____

8. This time last year, was it easier for you to get credit before passage of Initiative 245? Yes____ No____

JUNEAU ALASKA

January 26, 1972

Honorable Robert H. Ziegler, Sr.
Senate Judiciary Chairman
Pouch V - Capitol Building
Juneau, Alaska 99801

Re: HB 174 - Uniform Consumer Credit Code
HB 453 - Relating to Consumer Credit

Dear Senator Ziegler:

The House Commerce and Judiciary Committees are sponsoring a joint public hearing on House Bill 174 (Uniform Consumer Credit Code) and House Bill 453 (Relating to Consumer Credit). As the title of House Bill 174 suggests, it is the draft prepared by the National Conference of Commissioners on Uniform Laws. I have been informed that House Bill 453 was drafted at the Boston College Law Center pursuant to a grant from the Office of Economic Opportunity.

The hearings will be held in the House Conference Room, beginning at 1:30 p.m. on Friday, January 28, and will continue over into Saturday as need may require.

The National Conference has made available Neil Butler, Esquire, of Denver, Colorado, and Richard Wheatley, Esquire, of Stillwater, Oklahoma. I understand that these members of the bar are particularly qualified to discuss House Bill 174.

Norm Banfield will be leaving for Europe this weekend. As a courtesy to him, Jay Kerttula and I have agreed to convene our respective committees immediately upon adjournment of the House on Thursday, January 27. It is my understanding that Mr. Banfield wishes to testify in favor of House Bill 174 and in opposition to House Bill 453. We hope to have Mr. Banfield's testimony taken also in the House Conference Room.

On the assumption that the Senate Commerce and Judiciary Committees will have some bill under consideration pursuant to House action, Mr. Kerttula and I invite the attendance and participation of your committee members at the above session. We also request that you make the fact of such hearings known to other members of the Senate by announcement on the Floor.

In the interest of time, I am designating a copy of this letter for Senator Rettig. I hope he will not be offended that I have not written to him separately.

Sincerely,

William J. Moran
Chairman

Dear Representative:

We are once again recommending the passage of the Uniform Consumer Credit Code which has been introduced in the House as HB 174.

This proposal, which was drafted by the National Conference of Commissioners on Uniform State Laws, would serve to eliminate the vast majority of problems extant in the area of consumer credit law. It provides for concise regulation of the consumer credit industry, has consumer protection provisions which go well beyond those available under present Federal or State law and would provide for healthy competition among credit grantors. This increased competition will serve to insure an adequate supply of credit to all segments of our society.

We would appreciate you taking a few minutes from your very busy schedule to read the enclosed booklet, entitled "Questions & Answers on UNIFORM CONSUMER CREDIT CODE". We are certain you will find that UCCC answers many of the problems related to consumer credit.

Sincerely,

Dean Ehrich
Legislative Agent

Honorable Robert H. Ziegler, Sr.
Senate Judiciary Chairman
Pouch V - Capitol Building
Juneau, Alaska 99801

Re: HB 174 - Uniform Consumer Credit Code
HB 453 - Relating to Consumer Credit

Dear Senator Ziegler:

The House Commerce and Judiciary Committees are sponsoring a joint public hearing on House Bill 174 (Uniform Consumer Credit Code) and House Bill 453 (Relating to Consumer Credit). As the title of House Bill 174 suggests, it is the draft prepared by the National Conference of Commissioners on Uniform Laws. I have been informed that House Bill 453 was drafted at the Boston College Law Center pursuant to a grant from the Office of Economic Opportunity.

The hearings will be held in the House Conference Room, beginning at 1:30 p.m. on Friday, January 28, and will continue over into Saturday as need may require.

The National Conference has made available Neil Butler, Esquire, of Denver, Colorado, and Richard Wheatley, Esquire, of Stillwater, Oklahoma. I understand that these members of the bar are particularly qualified to discuss House Bill 174.

Norm Banfield will be leaving for Europe this weekend. As a courtesy to him, Jay Kerttula and I have agreed to convene our respective committees immediately upon adjournment of the House on Thursday, January 27. It is my understanding that Mr. Banfield wishes to testify in favor of House Bill 174 and in opposition to House Bill 453. We hope to have Mr. Banfield's testimony taken also in the House Conference Room.

On the assumption that the Senate Commerce and Judiciary Committees will have some bill under consideration pursuant to House action, Mr. Kerttula and I invite the attendance and participation of your committee members at the above session. We also request that you make the fact of such hearings known to other members of the Senate by announcement on the Floor.

In the interest of time, I am designating a copy of this letter for Senator Rettig. I hope he will not be offended that I have not written to him separately.

Sincerely,

William J. Moran
Chairman

cc: Honorable Ron Rettig

Re: HB 174 - Uniform Consumer Credit Code
HB 453 - Relating to Consumer Transactions

Dear Mr. Wheatley:

This letter will confirm our telegraphic invitation and request of this date for your appearance before a joint meeting of the House Commerce and Judiciary Committees of the Alaska Legislature on January 28 and 29 to testify and otherwise participate in the consideration of the above-named bills, now before the House Commerce Committee. Both bills have a second referral to the House Judiciary Committee. HB 174 is the Uniform Consumer Credit Code as prepared by the National Conference of Commissioners on Uniform State Laws; HB 453 is a proposal in the same area of legislative concern which was prepared at the Boston College Law Center pursuant, as we understand, to a grant from the Office of Economic Opportunity. Copies of both bills are enclosed.

The joint meeting will convene at 1:30 p.m. on January 28 in the House Conference Room, Second Floor, Capitol Building, and will continue into the following day as may be required. Because of the interest in the subject, as well as its complicated nature, a second day of testimony will undoubtedly be necessary. (Norman C. Banfield, Esquire, of the Juneau Bar, will appear on January 27 to permit him to meet a commitment elsewhere; a sponsor of HB 453 has requested that witnesses for his bill also be heard approximately one week later.) All members of the Legislature will be invited to attend and to participate in the hearings. The Senate Commerce and Judiciary Committees will undoubtedly be present.

We are grateful to you for your willingness to participate in these important hearings and to give us the benefit of your expertise; we are grateful to the National Conference for their support of your attendance; and, we are grateful to Frederick O. Eastaugh, Esquire, Alaska's Commissioner to the Conference, for his, as always, generous assistance.

Please let us know if we can be of help with respect to your accommodations or other amenities while you are in Juneau. Our addresses are as above; we can be reached telephonically at (AC 907) 586-5288 (Chief Clerk); 586-6614 (Commerce); or 586-6795 (Judiciary). Please note that Juneau is on Pacific Standard Time, that is, Oklahoma is two hours earlier.

Please again accept our thanks for your kind assistance.

Sincerely,

William J. Moran
Chairman, Judiciary Committee

Re: SB 42 - Amending Retail Installment Sales Act
SB 242 - Interest on Loans
SB 174 - Uniform Consumer Credit Code
SB 353 - Consumer Transactions

Dear Norm:

Confirming our conversation today concerning your letter to me of January 10, it is my intention to delay further action on SB 242 and SB 42 pending consideration of SB 174 and SB 353. The latter two bills are scheduled for joint public hearing before the House Commerce and Judiciary Committees on January 26, at 1:30 p.m., in the House Conference Room. It is expected that these hearings may continue into January 27. I know also that Representative Farrell, co-sponsor of SB 353, may request that additional hearings be held the following week, probably on February 4.

Mr. Karttula is scheduled to testify on SB 174 and SB 353 a bit earlier to accommodate your departure from Alaska. Since our present plan is not to have a calendar on Thursday, a meeting with you immediately on adjournment on January 27 seems the most practical. I should think that you could conclude your presentation by noon that day. Please let me know.

Sincerely,

William J. Moran

Re: HB 42 - Amending Retail Installment Sales Act
HB 242- Interest on Loans
HB 174 - Uniform Consumer Credit Code
HB 453- Consumer Transactions

Dear Bill:

Thanks for your letter of January 18, 1972, regarding the above bills. I will be ready after the House adjourns on January 27th and will give you a summary of the contents and purposes of HB 174. It is possible that more qualified persons may appear later but I will give you a resume of the bill which will help you to understand a more detailed analysis which may be made by others as you will have a picture of the scheme developed by the Code.

At the present time I have inquired as to whether Household Finance Corporation can have one or more persons present who have followed the development of the Code much more closely than I have. I will let you know if they can be present for the hearings on January 28th and 29th.

Yours very truly,

N. C. Banfield

HB453

SB239

HB-453

ALASKA RETAIL ASSOCIATION, INC.
P.O. BOX 1727
ANCHORAGE, ALASKA

POSITION STATEMENT - NATIONAL CONSUMER ACT, H.B. 453

The Alaska Consumer Act, (H.B. 453 and S.B. 239) is modeled after the National Consumer Act (NCA). The NCA was promulgated by the National Consumer Law Center located at the Boston College Law School in Brighten, Massachusetts. The NCA is reputed to be the consumer movement "answer" to the Uniform Consumer Credit Code (UCCC), a statute drafted by the National Conference on Uniform State Laws and under consideration by this same committee as H.B. 174. The UCCC has been adopted in six states and has been introduced in several other states, including Hawaii and, of course, Alaska. The NCA has not been adopted by any state.

The Alaska Retail Association has already testified in support of the UCCC (H.B. 174). We are here today to register our opposition to the NCA (H.B. 453). Basically, we support the UCCC because we feel that it is a balanced piece of legislation which gives due consideration to the interests of consumers and to the need for regulation which will not substantially impede the operations of legitimate businesses. Furthermore, the remedies contained in the UCCC would add significant consumer protection not found in existing Alaska law. We oppose the NCA (H.B. 453) because, in our view, it fails to strike such a healthy balance and in fact, is extremely unrealistic in some of its proposals to correct alleged abuses.

The NCA (H.B. 453) would set up an elaborate administrative machinery with unprecedented powers to interfere in consumer transactions of every conceivable nature regardless of their significance. The NCA purports to cure every imaginable abuse against consumers and totally ignores the needs of legitimate business interests. The Alaska Retail Association certainly agrees that consumer abuses should be stopped and that those responsible should pay the penalty. However, the proposed Act simply would have a regressive effect upon Alaska's economy by overburdening and stifling legitimate business in this State. Moreover, considering only its credit features, we believe that rather than encouraging fair and economically sound consumer credit practices, the NCA (H.B. 453) could well result in limiting the availability of legitimate consumer credit in the State of Alaska.

At the outset, we think it is important to recognize that the UCCC (H.B. 174) and the NCA (H.B. 453) are considerably different in their scope. Unlike the UCCC, which deals only with consumer credit transactions, the NCA goes considerably beyond credit transactions and would also regulate many other types of consumer transactions, including cash sales. If enacted, the National Consumer Act, would also bring about substantial changes in many existing laws and, in fact, would substantially revise several Alaska laws just enacted after consideration in great detail by the 1970 Alaska Legislature. We believe that the UCCC is a more reasonable and well-balanced approach to consumer credit transactions. Presently existing federal and Alaskan laws more effectively and realistically cover the other areas which the NCA (H.B. 453) would seek to change.

This statement does not attempt to comment on each and every section of the NCA (H.B. 453). There are, however, a few sections of the Act on which we believe comment is appropriate to emphasize its short-sightedness and unfair aspects.

CONTRACT CANCELLATION:

The Act distinguishes between "inside" and "outside" consumer approval transactions. An "inside" consumer approval transaction means a sale made at the merchant's place of business for which the price is over $50, whether the sale is for cash or for credit. An "outside" consumer approval transaction is a sale in any amount, whether by cash or by credit, consummated outside of a merchant's place of business.

In both the "inside" and "outside" transaction, the sale is not final until certain conditions are satisfied. If it is an "outside" transaction, the consumer must send a notice, the notice to be provided by the merchant, within three days after receipt of the notice, stating that he is affirming the transaction. If the transaction is "inside," the consumer has three days to send a notice to the seller cancelling the transaction.

These provisions, we feel, are not in the best interests of either the consumer or the merchant. We question, for example, whether consumers want to have a duty imposed on them of sending an affirmation notice on every "outside" transaction, especially in cases where the sale is for cash. This does not mean that we are opposed to a three-day "cooling off" period when the sale occurs in the consumer's home, on the contrary, we support the provisions

of the UCCC which permit the consumer to send a cancellation notice to the seller within three days of the purchase as good protection to the consumer.

Under the provisions of the NCA (H.B. 453), there would no doubt be many instances in which the consumer has no desire to cancel the contract, but through simple oversight forgets to send the affirmation notice to the seller. The seller, thinking the consumer has cancelled the sale, sends someone to the consumer's home to pick up the goods. The consumer says it is all a mistake, that he forgot to send the notice and that he really wants the goods. But can the seller accept this explanation? Under other provisions of the Act, the consumer cannot waive his rights. Thus, even though he wants to affirm the contract, he cannot waive his right to get back his money and return the purchased property. No doubt the matter could be resolved by entering into a new contract, but this seems to be a burden that is neither satisfactory to the seller nor to the consumer. Surely it is not asking too much to require a consumer to send a cancellation notice if he desires to cancel the transaction. In this way consumers are protected and the many problems that would result from the provisions of the Act would be avoided.

Even more questionable is the right of the consumer to cancel "inside" transactions. In this regard, one glaring defect of the Act as it is presently drafted is the lack of any section dealing with what happens when the consumer cancels an "inside" transaction.

There is a section which provides that if the "outside" transaction is not affirmed, the seller must return the money received from the consumer at his home and pick up the purchased property. There is no similar provision dealing with the "inside" cancellation, unless the Act is to be interpreted in such a way that the same provision applies to both "inside" and "outside" transactions. If this is true, it would, we feel, impose a most unfair burden on the seller. It would mean that even though the transaction resulted from the consumer voluntarily going into the seller's place of business, the seller, upon cancellation, has a duty to seek out the consumer at his residence, return his money, and pick up the merchandise.

Perhaps even more important is the concept of allowing a person to cancel an "inside" transaction. Why, for example, should a person be able to buy an expensive dress at the seller's store, use it for one day, and then cancel the sale? The fact that the dress has been used would not seem to make any difference, since there are no provisions that the property must be returned in an unused or even satisfactory condition. Moreover, the seller will not be able to sell the dress as a new item again since the Act (and the existing Alaska Consumer Protection Act) also has provisions that make it unlawful to represent an item as new when it is used or secondhand.

It is well known that most reputable merchants will accept returned merchandise where it has not been used or damaged in any way by the customer. But, this Act would require the merchant to accept any returned merchandise if the transaction is cancelled

within three days, even if the merchandise has been used or damaged by the consumer.

The UCCC recognizes that the consumer currently has a need for a period of time within which to reflect and off-set the high pressure tactics of door to door salesmen. However, the NCA's method of dealing with the problem is a classic illustration of its many "overhill" features for the purported benefit of consumers. It is submitted that their method would substantially nullify the certainty of business transactions in the State of Alaska.

CREDITOR'S REMEDIES:

Another major area in which the Act is unrealistic and unfair to the merchant is that of creditor's remedies. The Act provides that a consumer is not in default until he misses three successive monthly payments. Moreover, if the seller has a security interest in the property, the consumer may surrender the property to the seller in full satisfaction of the obligation without regard to the condition or current value of the property in relation to the balance due. The seller is not entitled to any deficiency judgment if the unpaid balance is under $2,000. The seller may not repossess the property until after the three months have lapsed, and then only through a lengthy and costly court procedure.

The net effect of these provisions is that a person could buy a colored television set, not make any payments for three months, and then simply surrender the set to the seller in full satisfaction of his obligation. The seller could not take any steps during that

three months to obtain the property and must accept the property at the end of the three months, regardless of its condition. Moreover, the seller would be stuck with a used television set, which as previously indicated, could not be sold as a new item. Thus, the merchant has lost both his profit from the sale and the set from his inventory, while the consumer has had the use of the set for three months free of charge. How much must the retailer raise his prices to others to give the freeloader his color television? It is hard to know, but certainly some considerable amount.

MISCELLANEOUS PROVISIONS:

The above sections are by no means exhaustive of the unfair measures of this proposal. There are other provisions in the Act which if enacted would greatly disrupt modern consumer transactions.

The Act, for example, places a maximum rate on consumer credit transactions at 18% per annum. This rate while in conformity with the present rate on retail installment revolving accounts, would also be applicable to the small loan business. In setting this rate, the Act completely ignores the specific needs of the small loan industry and the rates that are required in order to allow the less credit worthy a legitimate source of money.

Another problem with the Act is its failure to seek exemption from Federal Truth in Lending as provided in Section 123 of the Federal Consumer Credit Protection Act. This means that all consumer credit transactions in Alaska would be subject to both Federal and State regulations, a situation that is obviously more confusing and complicated than if consumer credit transactions were regulated solely by local law.

It should also be pointed out that the Act goes well beyond existing Alaska law regarding unfair and deceptive trade practices. The 1970 Alaska Legislature devoted much time and effort to drafting and enacting a law that effectively and justly governs unfair trade practices. The Act would now displace this law with broader and vaguer terms that by their very lack of precision can accomplish little but to create problems of interpretation and, thus, of compliance for the honest merchant. In short, Alaska already has effective legislation dealing with deceptive and unfair trade practices and this law should not be replaced with the provisions in this Act.

A similar objection to the Act is the fact that it provides as a remedy for violation of the unfair and deceptive trade practices section, as well as for other violations of the Act, the unlimited private class action. Again, we would point out that the private class action as a consumer remedy is one which was carefully considered by the 1970 Alaska Legislature. Recognizing that such actions are often used to harass legitimate retailers without accomplishing much toward eliminating the unconscionable practices of a small percentage of businesses responsible for consumer abuses, the 1970 legislature wisely imposed reasonable restrictions on such actions.

The Act would also substantially revise the present law under the Uniform Commercial Code in the area of warranties and representations. It is our feeling that the UCC, a statute that has been adopted by all but one of the 50 states, is an adequate statute as to the substance of consumer warranties. To the extent disclosure and minimum standards might be thougnt necessary, the NCA (H.B. 453)

offers little help. The Federal Congress, after several years of study appears on the verge of passing some such consumer warranty bill. It should be a good deal better, and probably would pre-empt some or all of any state effort.

Finally, we are also corcerned with the provisions of the Act which relate to credit reporting agencies. The Act goes well beyond the requirements of the Federal Fair Credit Reporting Act, which was implemented on April 25, 1971. A major difference is that the Act would require that derogatory information be deleted as obsolete after three years, while the Federal law sets the deletion period at seven years. This means that Alaska reporting agencies would be completely out of phase with the rest of the country. Consumer reporting agencies, by their very nature, are involved in interstate commerce and their contacts with agencies in other states are quite important. Should this Act be enacted, it would place Alaska consumer reporting agencies in the untenable position of reporting substandard information. This would affect the Alaska consumers' ability to obtain credit from national firms such as major oil companies and national credit card companies.

In summary, the NCA (H.B. 453) is not the type of legislation that is either necessary or proper for regulating consumer credit and consumer protection. The philosophy underlying the Act seems to be that all merchants are out to take advantage of the consumer, while consumers are always honest and always pay their bills. In fact, as we all know, neither side has a monopoly upon virtue. There are admittedly some unscrupulous merchants, but it is equally

true that there are a number of consumers who are not always honest and forthright in their commercial dealings. A law which purports to govern the area of consumer credit and protection must recognize the needs and problems of both the consumer and the merchant. The NCA (H.B. 453) certainly does not recognize the needs of the merchant, and it is questionnable whether in the long run it recognizes the needs of the average consumer since many of its provisions can only result in increasing the cost of goods to the consumer.

ALASKA RETAIL ASSOCIATION
P.O. BOX 1727
ANCHORAGE, ALASKA 99501

January 26, 1972

Honorable William Moran
Chairman
House Judiciary Committee
Alaska State House of Representatives
Juneau, Alaska 99801

Dear Mr. Moran:

Two acknowledged experts on the Uniform Consumer Credit Code have agreed to testify before the joint hearing which has been scheduled for Friday, January 28th. They are Mr. Richard Wheatley, former administrator of the Code in Oklahoma, and Mr. Neil Butler, Education Director of the National Conference of Commissioners on Uniform State Laws. Mr. Butler is also the former acting administrator of the Code in Colorado. We know that these gentlemen will be able to supply your committees with a great deal of valuable information on this comprehensive measure.

Subject to your approval, the Alaska Retail Association's portion of the testimony will be ordered in the following manner. Dean Ehrich -- To make a very brief introductory statement; Fred Eastaugh, who is a commissioner from Alaska -- To introduce Mr. Wheatley and Mr. Butler who will provide the bulk of our testimony and who will be available for specific questions by yourself and members of your committee.

We wish to thank you for this opportunity to comment on what we feel to be the best proposal ever drafted in the area of consumer credit. Passage would be of great benefit to all Alaskans.

Sincerely,

ALASKA RETAIL ASSOCIATION

Dean Ehrich
Legislative Agent

Juneau, Alaska 99801

January 26, 1972

Honorable Robert H. Ziegler, Sr.
Senate Judiciary Chairman
Pouch V - Capitol Building
Juneau, Alaska 99801

Re: HB 174 - Uniform Consumer Credit Code
HB 453 - Relating to Consumer Credit

Dear Senator Ziegler:

The House Commerce and Judiciary Committees are sponsoring a joint public hearing on House Bill 174 (Uniform Consumer Credit Code) and House Bill 453 (Relating to Consumer Credit). As the title of House Bill 174 suggests, it is the draft prepared by the National Conference of Commissioners on Uniform Laws. I have been informed that House Bill 453 was drafted at the Boston College Law Center pursuant to a grant from the Office of Economic Opportunity.

The hearings will be held in the House Conference Room, beginning at 1:30 p.m. on Friday, January 28, and will continue over into Saturday as need may require.

The National Conference has made available Neil Butler, Esquire, of Denver, Colorado, and Richard Wheatley, Esquire, of Stillwater, Oklahoma. I understand that those members of the bar are particularly qualified to discuss House Bill 174.

Norm Banfield will be leaving for Europe this weekend. As a courtesy to him, Jay Kerttula and I have agreed to convene our respective committees immediately upon adjournment of the House on Thursday, January 27. It is my understanding that Mr. Banfield wishes to testify in favor of House Bill 174 and in opposition to House Bill 453. We hope to have Mr. Banfield's testimony taken also in the House Conference Room.

On the assumption that the Senate Commerce and Judiciary Committees will have some bill under consideration pursuant to House action, Mr. Kerttula and I invite the attendance and participation of your committee members at the above session. We also request that you make the fact of such hearings known to other members of the Senate by announcement on the floor.

In the interest of time, I am designating a copy of this letter for Senator Rattig. I hope he will not be offended that I have not written to him separately.

Sincerely,

William J. Moran
Chairman

Re: HB 174 - Uniform Consumer Credit Code
HB 453 - Relating to Consumer Transactions

Dear Mr. Wheatley:

This letter will confirm our telegraphic invitation and request of this date for your appearance before a joint meeting of the House Commerce and Judiciary Committees of the Alaska Legislature on January 28 and 29 to testify and otherwise participate in the consideration of the above-named bills, now before the House Commerce Committee. Both bills have a second referral to the House Judiciary Committee. HB 174 is the Uniform Consumer Credit Code as prepared by the National Conference of Commissioners on Uniform State Laws; HB 453 is a proposal in the same area of legislative concern which was prepared at the Boston College Law Center pursuant, as we understand, to a grant from the Office of Economic Opportunity. Copies of both bills are enclosed.

The joint meeting will convene at 1:30 p.m. on January 28 in the House Conference Room, Second Floor, Capitol Building, and will continue into the following day as may be required. Because of the interest in the subject, as well as its complicated nature, a second day of testimony will undoubtedly be necessary. (Norman C. Banfield, Esquire, of the Juneau Bar, will appear on January 27 to permit him to meet a commitment elsewhere; a sponsor of HB 453 has requested that witnesses for his bill also be heard approximately one week later.) All members of the Legislature will be invited to attend and to participate in the hearings. The Senate Commerce and Judiciary Committees will undoubtedly be present.

We are grateful to you for your willingness to participate in these important hearings and to give us the benefit of your expertise; we are grateful to the National Conference for their support of your attendance; and, we are grateful to Frederick O. Bestaugh, Esquire, Alaska's Commissioner to the Conference, for his, as always, generous assistance.

Please let us know if we can be of help with respect to your accommodations or other amenities while you are in Juneau. Our addresses are as above; we can be reached telephonically at (AC 907) 586-5260 (Chief Clerk); 586-6814 (Commerce); or 586-6795 (Judiciary). Please note that Juneau is on Pacific Standard Time, that is, Oklahoma is two hours earlier.

Please again accept our thanks for your kind assistance.

Sincerely,

William J. Moran
Chairman, Judiciary Committee

Jalmar M. Kerttula

Re: SB 42 - Amending Retail Installment Sales Act
SB 242 - Interest on Loans
HB 174 - Uniform Consumer Credit Code
HB 453 - Consumer Transactions

Dear Norm:

Confirming our conversation today concerning your letter to me of January 10, it is my intention to delay further action on SB 242 and SB 42 pending consideration of HB 174 and HB 453. The latter two bills are scheduled for joint public hearing before the House Commerce and Judiciary Committees on January 28, at 1:30 p.m., in the House Conference Room. It is expected that these hearings may continue into January 29. I know also that Representative Farrell, co-sponsor of HB 453, may request that additional hearings be held the following week, probably on February 4.

Mr. Kerttula is agreeable to hearing you on HB 174 and HB 453 a bit earlier to accommodate your departure from Alaska. Since the present plan is not to have a calendar on Thursdays, a meeting with you immediately on adjournment on January 27 seems the most promising. I should think that you could conclude your presentation by noon that day. Please let me know.

Sincerely,

William J. Moran

MARRIAGE

[The excerpt from an article on Judicial Consent to Marry appearing below was taken from the December 1969 issue of the Family Law Quarterly, a law periodical published by the American Bar Association.]

Judicial Consent to Marry— Its Complex Demands†

WARREN W. WEISS*
Supervising Conciliation Counselor

HENRY B. COLLADA**
Conciliation Counselor

The Conciliation Court of the Superior Court of Santa Clara County, California

As early as 1926, social scientists were concluding that the risk of failure in marriages involving parties under age twenty was appreciably higher than those involving more mature partners.[1]

In 1953, Professor William G. Monahan of the University of Iowa published the results of an extensive investigation into the 52,722 marriages and the 3,040 divorces occurring in Iowa between 1945 and 1947.[2] His study revealed that 8.4% of the marriages under consideration involved males below age twenty and 33.3% involved females below twenty. In comparison, however, 15.1% of the divorces involved husbands under twenty and 50.9% of the divorces involved wives under twenty. Furthermore, Monahan found that where both parties

** A.B. 1958, New York Univ.; M.S.U. 1966, Univ. of Calif. at Berkeley.

† The authors are indebted to Mr. David S. Murray, B.S.C. 1965, J.D. 1969, University of Santa Clara, for research assistance in the preparation of this paper.

1. Hart and Shields, *Happiness In Relation to Age at Marriage*, 12 J. Soc. Hygiene 403 (1926), reported that "Marriage in which either party is 19 or younger are from 10 to 100 times risky as are marriages at the ideal (24 to 29) ages."

2. Monahan, *Does Age at Marriage Matter in Divorce?* 32 Social Forces 18 (1953).

were sixteen years or under the divorce rate rose to four times that experienced by partners wed at the mean age, that is where the groom was twenty-five and the bride twenty-two. These statistics dramatically illustrate the disproportionate representation of youthful marriage in divorce actions.

More recent studies corroborate the earlier findings. In the first half of the present decade, the highest divorce rate involves parties married between the ages of fifteen and nineteen. The incidence of divorce appears two to three times higher among couples married in their teens than among those married at later ages.[3]

If we accept the seemingly inescapable premise that youthful marriages are particularly susceptible to divorce we must conclude that the state's interest in fostering the stability and permanence of a marriage is more than casually threatened by the youthful marriage.

This being the case, it is not surprising that many states have exercised their regulatory power over marriage with more proclivity in situations where minors are involved. Most states condition the issuance of a marriage license to minors on the written consent of their parents. If the minor is more than two years below majority, many states require that a member of the local judiciary give his approval to the proposed marriage. The latter procedure is normally referred to as requiring "judicial consent" to the marriage.

In considering the complex factors that must be dealt with in trying to determine whether a proposed marriage has the attributes of success or failure, it becomes apparent that a judge, sitting alone, is not equipped to do a complete and effective job. If state legislatures are sincerely concerned about stemming the ill-fated tide of the youthful marriage, they should seriously consider the Rhode Island plan which provides that a petitioner seeking judicial consent must make his application to

3. J. Landis and M. Landis, Personal Adjustment, Marriage and Family Living 151 (4th ed. 1966); *see also*, Health, Education and Welfare Indicators, Trends in Divorce and Family Disruption (Aug. 1963).

the Juvenile Court. The court is then required by statute[4] to request from the Social Welfare Department a complete investigation of and a report upon the advisability of the marriage. Subsequently, a hearing is held at which time the report and other evidence is heard. Upon a consideration of all the evidence, the judge will determine whether to grant or deny consent. A well-rounded staff of social workers and family counselors is placed at the judge's disposal. The court is thereby transformed from a rather ineffective team of one, forced to grant or deny consent on the basis of a highly subjective reaction, into a highly skilled decision making mechanism fully equipped to do a professional job.

Although Rhode Island is the only state that has codified such procedures, some states have enacted enabling statutes whereby their individual county courts can develop similar programs utilizing county social agencies if they desire. California, for example, has given its counties such power and one county in particular, Santa Clara County, has developed a very practical and effective plan to aid the judge in his decision to grant or deny consent.

The Santa Clara County Plan

Because no criteria are set forth under California law, presumably if one judge refused to give his consent to an underage marriage, another and more liberal judge could be sought by the couple. In 1966 the nineteen judges of the Superior Court of Santa Clara County established one department as a Family Court in 1966. By creating a Family Court, the policy making for consent was allocated to the Family Court Judge. This eliminated the *ex parte* applications to any judge. While this was an improvement, the Family Court Judge felt that he was not competent to alone determine the future success of such marriages. Knowing that most teen-age marriages fail and that those which take place when the girl is pregnant often are more

4. *See*, Laws of R.I. § 15-2-11 (1956).

ill-fated than any others, the Judge felt the need for appropriate professional help. Many states which allow and encourage judicial consent on the basis of pregnancy[5] fail to consider the effects of such a marriage. Merely giving the child a name may solve one problem, but socially and emotionally it gives rise to many others, not the least of which is the misery of marital failure with multiple children, the need for public assistance and the emotional destruction generated and perpetuated by the parties on all concerned.

Note: Underscoring added.

MEMORANDUM

TO: Senator Robert H. Ziegler, Sr.
Chairman, Senate Judiciary Committee
Representative William J. Moran
Chairman, House Judiciary Committee
All Legislators
Chief Justice of Alaska Supreme Court
Administrative Director of Courts
Judges of the Superior Court

Date: February 3, 1971

Subject: Recommended Changes in Alaska Marriage Code

FROM: Harold J. Butcher
Superior Court Judge
Family Court Division

Enclosed with this memorandum is a draft of a proposed change in the Alaska Marriage Code, Title 25, Alaska Statutes.

Our purpose in recommending the change was formed from the alarming incidence of divorce occurring amongst teenage couples who enter into marriages.

Divorce amongst couples who marry while teenagers (under 21 years of age) occurs with far greater frequency than those amongst couples who marry between 21 and 25. There is an even greater increase in divorce amongst couples who marry under 18 years of age, and where the marriage occurred at 16 or under, the failures are four times greater than in cases where the couples were between 21 and 25.

Many states have provided judicial consent to marry, especially where premarital counseling by professional marriage counselors in court settings, or welfare agency investigation is available, and where recommendations as to the advisability of consenting to teenage marriages may be made to and considered by the court prior to judicial consent.

It has been the personal experience of this writer, after three years on the bench of the Family Court, that marriages contracted by high school students invariably fail. The parties appear in the divorce court for dissolution of marriages contracted while in high school, and unfortunately, in many cases, the children born to such marriages, and the mothers, end up on welfare rolls at a cost of several hundred dollars per month per family.

We have caused to be copied, for the benefit of your committee and other legislators, some excerpts from an article published in the Family Law Quarterly, a law periodical published by the American Bar Association, furnishing statistical data as to the frequency of divorce in the age groups mentioned and containing also other persuasive material supporting judicial consent to teenage marriage, which I hope will be read by all persons, and particularly the legislators who are concerned with the increase in divorce. It is not only the failure of the marriage that is

a cause of public concern, but it is the children born to such marriages who end up on welfare, that causes even greater concern. When teenage marriages occur, there is rarely present the financial responsibility essential to a successful marriage. Married teenagers have not had an opportunity to complete educational goals looking toward future financial responsibility, and such young couples, in appreciable numbers, handicapped by unsurmountable marriage problems and children, never attain either future financial responsibility or worthwhile career goals. The possibilities of a marriage surviving without a solid financial base and a high degree of responsibility is indeed remote.

Our marriage code, as it presently stands, permits males under 21 and over 18, and females under 18 and over 16, to marry with parental consent, however, if one or both such persons seek to marry and have no parents or other person capable of consent, the decision as to whether to waive consent and permit the marriage is left to the discretion of a marriage clerk in the Vital Statistics section who, in our opinion, has not the competency or special training to make far-reaching decisions as to whether or not a proposed marriage would be in the best interest of the teenage applicants, or of society. The present statute permits males under 18 and over 16 and females under 16 to marry if they have parental consent, but only if the female is pregnant and a certificate of a competent physician is presented to the licensing officer certifying to such pregnancy.

In our opinion, this particular provision of the law, i.e. that the female under 16 must be pregnant, is often an invitation to parents and the couples, themselves, to arrange marriages where pregnancy occurs, when the fact of pregnancy is, perhaps the least reason why a girl under 16 should marry, considering our rather broad and liberal statutes with respect to legitimacy.

Where the pregnancy prompted marriage occurs for the sake of the child's legitimacy, the couples may stay together for a few years, and nature being what it is, additional children may be born, adding substantially to the problem. Such marriages seem doomed from the beginning.

The article from the Family Law Quarterly attached hereto will show that pregnancy as a reason for marriage generally increases the hazards and does not contribute to a life-long union.

The present pregnancy requirement has other basic defects. As it now stands, for instance, if the pregnant condition is deemed a ground for marriage, it fails to provide for the girl who, while not pregnant at the time of the application, has just been pregnant and has recently given birth to a child whom the other applicant has fathered. The marriage

in the last case would seem as justifiable, if any marriage of that kind is justifiable, as in the case of a present pregnancy.

The proposals made in the attached draft will eliminate altogether the pregnancy feature of the law as a reason to marry, and put teenage marriage, i.e. males under 18 years of age and females under 16, under the authority of the Superior Court where either through a Court attached marriage counselor or a family counselor from the Welfare Division there could be a premarital study made with, perhaps, recommendations to the Court as to the chances for marriage success if a teenage marriage is to be permitted. In the absence of such premarital counseling, the Court, upon a proper showing, could make a far more intelligent decision as to whether a marriage should or should not occur, than the procedure now in effect.

Since dictating the foregoing, I had occasion to talk by long distance telephone with Warren W. Weiss, co-author of the Family Law Quarterly article, and he advised me that a majority of the states have statutes providing for judicial consent to marriages where the male is under 18 and the female under 16. He further advised me that the California Legislature, in 1970, amended the California judicial consent law to cover all teenage marriages where the applicants were under the age of 18 years. This amendment was prompted by the simple proposition that teenage persons, male and female, are not equipped from the point of view of maturity or economics to make the adjustments necessary to a permanent and harmonious marriage.

I had used the California Statute, as it stood prior to 1970, as a model for the proposed amendment to the Alaska Marriage Code, thus in the amendment we propose, judicial consent is required for the male under 18 and the female under 16, patterned after the <u>former</u> California law, and it now appears, as a result of the California experience with marriage and divorce in that age group, that that State has seen fit to provide judicial consent for all marriages where the parties are under 18 years. <u>The Alaska Legislature might, therefore, consider changing the Alaska law to correspond with the 1970 California amendment covering the age group under 18 years and not make a differentiation, age-wise, between male and female</u>.

Family Court Division

HJB

Enclosed with this memorandum is a draft of a proposed change in the Alaska Marriage Code, Title 25, Alaska Statutes.

Our purpose in recommending the change was formed from the alarming incidence of divorce occurring amongst teenage couples who enter into marriages.

Divorce amongst couples who marry while teenagers (under 21 years of age) occurs with far greater frequency than those amongst couples who marry between 21 and 25. There is an even greater increase in divorce amongst couples who marry under 18 years of age, and where the marriage occurred at 16 or under, the failures are four times greater than in cases where the couples were between 21 and 25.

Many states have provided judicial consent to marry, especially where premarital counseling by professional marriage counselors in court settings, or welfare agency investigation is available, and where recommendations as to the advisability of consenting to teenage marriages may be made to and considered by the court prior to judicial consent.

It has been the personal experience of this writer, after three years on the bench of the Family Court, that marriages contracted by high school students invariably fail. The parties appear in the divorce court for dissolution of marriages contracted while in high school, and unfortunately, in many cases, the children born to such marriages, and the mothers, end up on welfare rolls at a cost of several hundred dollars per month per family.

see Josephson file for copy of article

We have caused to be copied, for the benefit of your committee and other legislators, some excerpts from an article published in the Family Law Quarterly, a law periodical published by the American Bar Association, furnishing statistical data as to the frequency of divorce in the age groups mentioned and containing also other persuasive material supporting judicial consent to teenage marriage, which I hope will be read by all persons, and particularly the legislators who are concerned with the increase in divorce. It is not only the failure of the marriage that is

a cause of public concern, but it in the children born to such marriages who end up on welfare, that causes even greater concern. When teenage marriages occur, there is rarely present the financial responsibility essential to a successful marriage. Married teenagers have not had an opportunity to complete educational goals looking toward future financial responsibility, and such young couples, in appreciable numbers, handicapped by unsurmountable marriage problems and children, never attain either future financial responsibility or worthwhile career goals. The possibilities of a marriage surviving without a solid financial base and a high degree of responsibility is indeed remote.

Our marriage code, as it presently stands, per its males under 21 and over 18, and females under 18 and over 16, to marry with parental consent, however, if one or both such persons seek to marry and have no parents or other person capable of consent, the decision as to whether to waive consent and permit the marriage is left to the discretion of a marriage clerk in the Vital Statistics section who, in our opinion, has not the competency or special training to make far-reaching decisions as to whether or not a proposed marriage would be in the best interest of the teenage applicants, or of society. The present statute permits males under 13 and over 16 and females under 16 to marry if they have parental consent, but only if the female is pregnant and a certificate of a competent physician is presented to the licensing officer certifying to such pregnancy.

In our opinion, this particular provision of the law, i.e. that the female under 16 must be pregnant, is often an invitation to parents and the couples, themselves, to arrange marriages where pregnancy occurs, when the fact of pregnancy is, perhaps the least reason why a girl under 16 should marry, considering our rather broad and liberal statutes with respect to legitimacy.

Where the pregnancy prompted marriage occurs for the sake of the child's legitimacy, the couples may stay together for a few years, and nature being what it is, additional children may be born, adding substantially to the problem. Such marriages seem doomed from the beginning.

The article from the Family Law Quarterly attached hereto will show that pregnancy as a reason for marriage generally increases the hazards and does not contribute to a life-long union.

The present pregnancy requirement has other basic defects. As it now stands, for instance, if the pregnant condition is deemed a ground for marriage, it fails to provide for the girl who, while not pregnant at the time of the application, has just been pregnant and has recently given birth to a child whom the other applicant has fathered. The marriage

in the last case would seem as justifiable, if any marriage of that kind is justifiable, as in the case of a present pregnancy.

The proposals made in the attached draft will eliminate altogether the pregnancy feature of the law as a reason to marry, and put teenage marriage, i.e. males under 18 years of age and females under 16, under the authority of the Superior Court where either through a Court attached marriage counselor or a family counselor from the Welfare Division there could be a premarital study made with, perhaps, recommendations to the Court as to the chances for marriage success if a teenage marriage is to be permitted. In the absence of such premarital counseling, the Court, upon a proper showing, could make a far more intelligent decision as to whether a marriage should or should not occur, than the procedure now in effect.

Since dictating the foregoing, I had occasion to talk by long distance telephone with Warren W. Weiss, co-author of the Family Law Quarterly article, and he advised me that a majority of the states have statutes providing for judicial consent to marriages where the male is under 18 and the female under 16. He further advised me that the California Legislature, in 1970, amended the California judicial consent law to cover all teenage marriages where the applicants were under the age of 18 years. This amendment was prompted by the simple proposition that teenage persons, male and female, are not equipped from the point of view of maturity or economics to make the adjustments necessary to a permanent and harmonious marriage.

I had used the California Statute, as it stood prior to 1970, as a model for the proposed amendment to the Alaska Marriage Code, thus in the amendment we propose, judicial consent is required for the male under 18 and the female under 16, patterned after the former California law, and it now appears, as a result of the California experience with marriage and divorce in that age group, that that State has seen fit to provide judicial consent for all marriages where the parties are under 18 years. The Alaska Legislature might, therefore, consider changing the Alaska law to correspond with the 1970 California amendment covering the age group under 18 years and not make a differentiation, age-wise, between male and female.

MOTORCYCLE REGS

STATE OF ALASKA
THE LEGISLATURE
LEGISLATIVE AFFAIRS AGENCY

POUCH Y - STATE CAPITOL
JUNEAU, ALASKA 99801

April 23, 1971

M E M O R A N D U M

TO : William J. Moran, Chairman, House Judiciary Committee

FROM : Arthur H. Peterson, Revisor of Statutes

SUBJECT: Motorcycle regulations

During the 1970 legislative session, the House Judiciary Committee heard a good bit of testimony concerning the then recently adopted motorcycle regulations of the Department of Public Safety. Rather than introduce a bill or resolution on the subject, the committee sent a letter (dated May 29, 1970) to the commissioner of public safety, requesting him to "hold hearings and consider revision or repeal" of specified regulations (13 AAC 04.280, 285(b), 290, 295 and 300). One of the main problems was that these regulations were defended by the department on the basis of the requirements of the federal Highway Safety Program Standards (23 C.F.R., Part 204 -- specifically Standard 3), yet they contained provisions that went considerably beyond the federal requirements. The committee was not convinced of the necessity of some of the provisions, and was concerned about the type of enforcement they would receive.

A copy of the letter is attached; however, the only copy I could locate has three corrections noted on it, and I'm sure that these corrections were made before the letter was sent. The hearings, review and revision may have taken place, but I'm not aware of any of these actions being taken in response to the committee's request. It would probably be a good idea to follow up on this.

FORM NO. 02-18

MEMORANDUM State of Alaska

TO: Emery W. Chapple, Jr., Commissioner
Department of Public Safety

DATE : April 30, 1971

FROM: Lieutenant H. J. Sydnam, Director
Alaska Traffic Safety Bureau

SUBJECT: Motorcycle Regulations 13 AAC
File 362.7

The question of "holding hearings and consider revision or repeal" is addressed to the sections concerning 2 rear view mirrors, windshield-goggles-face shield, protective helmet, rental to unhelmeted person, maximum height for handlebars, and helmet-goggles-face shield standards.

The regulations were drawn up in consideration of the Uniform Vehicle Code, the National Highway Traffic Safety Administration Standards, adaptation of other state laws and with the active assistance of the Department of Law and the Legislative Affairs Agency. Publication of notice of hearings were made on October 13, 1969 in Anchorage; October 17, 1969 in Juneau; October 10, 1969 in Fairbanks. A notice of change was mailed to each legislator on October 7, 1969. The hearing was held in Juneau on November 17, 1969, as announced.

Former Commissioner Personett discussed Rep. Jackson's letter of June 1, 1970, with the Attorney General. It was their decision that as the letter constituted an opinion of request and not an order and concerned an issue that had become effective under compliance of law, that no further action be taken. Subsequently, and prior to the effective date of these sections, a suit was brought against Personett by a man in Anchorage which challenged these same points. The Commissioner and the Attorney General then felt that it would be much better to be guided by the judicial decision rather than another public hearing. The case in question has not yet been decided and I would suggest that we await that decision before iniating any administrative action.

To comment upon the regulations themselves, you will find from the attachments that the equipment regulations do follow NHSB (now NHTSA) recommendations, except for the second rear view mirror. We have no real objection to only one mirror, however the contention that any mirror is useless at speeds over "..." mph is no excuse for not requiring at least one. Where the mirror sees its greatest need and use is in urban driving where at reasonable speeds it permits knowledge of other traffic without turning the head.

As to the issue of constitutionality, I include the Wisconsin case of Bisenius vs Karns (1969). This case was appealed and the U.S. Supreme Court dismissed appeal attacking the constitutionality of the Wisconsin Statute "for want of a substantial Federal question." Local courts have ruled on the constitutional issue, but to date the U.S. Supreme Court has not questioned that helmet laws are legal measures. There will be a "split of judicial opinion" on any law and magistrates, judges and lawyers delight in issuing pronouncements of constitutionality which preempt the right of due process.

It is my understanding that the Deputy Commissioner and Assistant Attorney General Robert Mahoney are moving on the #2 mirror question at present.

Windshields and mirrors on trail bikes are not required - so long as they are operated off-highway.

Handlebar height is specified for the purpose of eliminating the need to quibble over what is and what is not "safe control."

The regulations are based upon valid safety measures and are not designed as "a means of harassing a particular segment of the population," unless such "harassment" could be construed as to mean trying to reduce injury to the bike rider and his loss of control which most likely to involve other motorists who, although they are (or should be) properly protected by weight of steel, safety glazing and occupant restraints, still have some right to assume the bike rider is qualified and equipped to operate his machine. That he will not ram them because a bee got in his eye, or his arm had to reach too high in gripping the bars to steer. That because the bike struck the car and the reason they have a manslaughter charge and civil suit was because the rider's bare head was not up to ASA Z 90.1.

Mel J. Personett, Commissioner
Department of Public Safety
Pouch N
Juneau, Alaska 99801

Dear Commissioner Personett:

After hearing testimony on both sides of the matter, and after reviewing the material you submitted, the House Judiciary Committee requests that the Department hold hearings and consider revision or repeal of the following regulations pertaining to motorcycles: 13 AAC 04.280, 285(b), 290, 295, and 300.

While not taking a position on the constitutionality of any of these regulations, the committee is aware that there is a split of judicial opinion and that in some states the helmet requirement has been held invalid as an invasion of the right to privacy. Moreover, during the recent hearings held on these regulations by this committee, no evidence was presented which conclusively established that these requirements promoted either individual safety or the public safety. To the contrary, although examples were given of situations in which a helmet or face shield might be helpful, other examples were given of when they would be a definite hazard; also, windshields and mirrors on "two-wheel bikes" appear to be hazards rather than safety features. There was testimony that a mirror on a motorcycle was of little utility because of vibration; and you agreed that the requirement of two mirrors in 13 AAC 04.280(a) (1) is unnecessary.

The regulation on the height of "handlebars or grips" (13 AAC 04.290) is ambiguous as well as being subject to ~~interpretation~~ as an undue restriction on design variation. If there is a certainty that a design variation will result in motorcycles with a steering arrangement that poses a clear threat to the public safety, a regulation something like the following would be more appropriate: "No person may operate a motorcycle or motor scooter on which the handlegrips are at a height which does not reasonably allow for safe control of the vehicle." When the present language is read in conjunction with the regulation on windshields (13 AAC 04.295) some ludicrous results can occur.

With regard to 13 AAC 04.300, the committee believes it is a good idea, and a proper action for the benefit of the public, to specify standards

for the construction of protective headgear, goggles, etc. When a person decides that he wants to wear a helmet, for example, he should be able to rely on the safety of those offered for sale or rent. Since this section refers to the requirement that these items be worn at all times and in all circumstances, this section should be re-written. Also, the reference to sec. 280(a) (3) in 13 AAC 04.285(a) should be deleted.

The committee notes that the federal safety standard on motorcycles (1) does not require a windshield, face shield or goggles--just "eye protection"; (2) does not specify handlebar height or windshield height; and (3) does not require two mirrors.

The committee is concerned about the fact that these regulations, of at least questionable validity, of questionable benefit to the safety of the public and even to the individual, may be selectively enforced to provide a means of harassing a particular segment of the population. We do not believe that this is sound state policy. We expect that the revised regulations will be clearly valid and protective of the public safety, and that to the extent they are designed to protect the individual, due consideration has been given to the right to privacy and the policy which underlies that constitutional right.

Yours truly,

Barry W. Jackson, Chairman
Judiciary Committee
Alaska House of Representatives

Dear Commissioner Personett:

After hearing testimony on both sides of the matter, and after reviewing the material you submitted, the House Judiciary Committee requests that the department hold hearings and consider revision or repeal of the following regulations pertaining to motorcycles: 13 AAC 04.280, 285(b), 290, 295, and 300.

While not taking a position on the constitutionality of any of these regulations, the committee is aware that there is a split of judicial opinion and that in some states the helmet requirement has been held invalid as an invasion of the right to privacy. Moreover, during the recent hearings held on these regulations by this committee, no evidence was presented which conclusively established that these requirements promoted either individual safety or the public safety. To the contrary, although examples were given of situations in which a helmet or face shield might be helpful, other examples were given of when they would be a definite hazard; also, windshields and mirrors on "trail bikes" appear to be hazards rather than safety features. There was testimony that a mirror on a motorcycle was of little utility because of vibration; and you agreed that the requirement of two mirrors in 13 AAC 04.280(a) (1) is unnecessary.

The regulation on the height of "handlebars or grips" (13 AAC 04.290) is ambiguous as well as being subject to criticism as an undue restriction on design variation. If there is a certainty that a design variation will result in motorcycles with a steering arrangement that poses a clear threat to the public safety, a regulation something like the following would be more appropriate: "No person may operate a motorcycle or motor scooter on which the handlegrips are at a height which does not reasonably allow for safe control of the vehicle." When the present language is read in conjunction with the regulation on windshields (13 AAC 04.295) some ludicrous results can occur.

With regard to 13 AAC 04.300, the committee believes it is a good idea, and a proper action for the benefit of the public, to specify standards

for the construction of protective headgear, goggles, etc. When a person decides that he wants to wear a helmet, for example, he should be able to rely on the safety of those offered for sale or rent. Since this section refers to the requirement that these items be worn at all times and in all circumstances, this section should be re-written. Also, the reference to sec. 280(a) (3) in 13 AAC 04.285(a) should be deleted.

The committee notes that the federal safety standard on motorcycles (1) does not require a windshield, face shield or goggles--just "eye protection"; (2) does not specify handlebar height or windshield height; and (3) does not require two mirrors.

The committee is concerned about the fact that these regulations, of at least questionable validity, of questionable benefit to the safety of the public and even to the individual, may be selectively enforced to provide a means of harassing a particular segment of the population. We do not believe that this is sound state policy. We expect that the revised regulations will be clearly valid and protective of the public safety, and that to the extent they are designed to protect the individual, due consideration has been given to the right to privacy and the policy which underlies that constitutional right.

SUBJECT: Repeal of Motorcycle Safety Helmet Laws

This will supplement our memorandum of September 17, 1969, concerning the Repeal of Motorcycle Safety Helmet Laws. Attached is a copy of an article that appeared in the October 1969 issue of Cycle Magazine. Cycle has a circulation of about 250,000. This article serves well as an advance warning of the vigorous attacks on helmet laws that we can anticipate in the coming legislative session.

BUY U.S. SAVINGS BONDS REGULARLY ON THE PAYROLL SAVINGS PLAN

WE CAN OWN THE WORLD!

What's a government but silly putty? It can be pushed any direction and spreads out where there's no resistance. Bike power advocates in Illinois proved that it can be done: here's their 3-step formula for helmet law repeal.

BY FRANK CONNER

KEVIN CALLAHAN

o Government is like Silly Putty: push against it hard enough at one point, and it will recede from that point, flabbing out someplace else where there is less resistance. A blueprint for the successful, lawful combat of motorcyclists against government can be drawn from the activities of Illinois riders to repeal the Mandatory Helmet law.

Illinois riders were less than enchanted with the helmet ruling. Several groups had been formed to work against restrictive legislation, and had done much valuable spadework to stir up the riders, so the climate was right for revolution, but nobody had been successful at focusing rider-discontent against the forces of government in Illinois. Then eight riders casually decided to get together to see what they could do to get the helmet law overturned. They called themselves the "Committee on Legislation," and they decided that if they wanted to succeed, they should run their campaign like a business. First they needed a product: organized enraged motorcyclists. Then they needed to get their product to the market, which was the Illinois Legislature. Finally, they needed a good sales-feature for their product. Since legislators need to get reelected periodically, the votes of the riders made the best-possible selling-feature.

How good was their product? Well, there were 110,000 registered motorcycles in Illinois, which meant that about 250,000 people (including friends, wives, or parents) were predisposed to like motorcycles and could possibly be enlisted into the fight. Potentially, the committee had a very strong product; even a tiny fraction of 250,000 votes is something that most state politicians regard with great care. How to get the product to the market? The committee didn't have enough money to contact all 110,000 riders in the state, so they decided to work through groups.

The eight members of the committee listed the various groups whose names and addresses were readily available. The committee then wrote to these groups and asked for the names of any groups or dealers who weren't as yet on the list. In such manner, the committee collected the names of about 600 dealers, AMA-affiliated clubs, outlaw clubs, dealer-associations, etc. Now the committee had enough contacts to reach a large percentage of the riders in Illinois.

As a next step, the committee put together a map of the state, showing each of the political districts, and listing the names and addresses of the three state representatives and the one state senator from each district. Thus, any rider receiving a copy of the map would know whom to write.

The committee sent quantities of these maps to each of the 600 groups, along with a request to distribute the maps to the riders in that area. Along with the map went a letter asking the rider to write to each of the three representatives and the senator from his district, requesting repeal of the helmet law. The letter to the riders suggested some reasons why the law was unsatisfactory, but the committee felt that the campaign would be successful only if the riders wrote their own letters, stating their own beliefs. In addition, the committee got as many of the 600 groups as possible to send two members each to visit all of the legislators from their respective districts. This would give the legislators an unmistakable indication as to the amount of voting power that Illinois riders could swing.

Having gotten this far, the Committee on Legislation found that they had all sorts of access to news media. At first, they began to make use of the media. But then they decided that they should leave it strictly alone, because they would be hurting—not helping—their enterprise by attracting the attention of the public to their cause. The general public either doesn't care about motorcycling, or is opposed to it; the committee decided to let sleeping dogs lie.

As the next step, the committee needed to get somebody in the legislature to introduce a bill to repeal the helmet law. Who better than the man who had originated the helmet law? That particular legislator happened to live in the same town as one of the eight committee members, so the committee went to work there right away, getting the local motorcycling groups to begin visiting and writing to their legislator to inform him of their displeasure (Continued on page 59)

World Continued from page 43

with his law. He saw the light of day and introduced a new bill to repeal his helmet law.

The committee than sent to each state legislator a rational list of reasons why the helmet law was unsatisfactory. The committee said, in effect: "We don't have our hands out for anything; all we want is not to be discriminated against. Repeal of the helmet law will have no adverse effect upon the state. We feel so strongly about this issue that if you disregard us, you will not like what happens at the next election."

Then the letters from riders began to pour in. Some of the riders who wrote to their legislators made no attempt to mince words in expressing their dissatisfaction with the helmet law. The committee was not at all unhappy with that state of affairs; it gave the legislators a much better understanding of the riders' and voters' unhappiness. Then began the personal confrontations between riders and legislators. The committee felt that the outlaw groups were particularly effective in getting their message across. The legislators were amazed and appalled; they hadn't even been aware of the existence of motorcyclists before, except as scapegoats who could be put down with impunity. Now the scapegoats were threatening to bite them. Taking a leaf from the SDS handbook, various motorcycle groups were murmuring about putting 50,000 motorcyclists into Springfield during the summer if the helmet law were not repealed. It was not—apparently—an empty threat.

The repeal bill went first to the Illinois Senate. Forty-three voted "aye;" 11 voted "nay." In the House of Representatives, only eight of approximately 160 legislators voted against the bill.

The repeal bill was ready to be signed into law. Then, the state judiciary found in favor of Donald Freeze, who had brought suit previously to test the constitutionality of the helmet law, and the offending law was declared unconstitutional in Illinois.

However, courts in other states have upheld the helmet law, and some valuable lessons can be learned from the activities of the Committee on Legislation. Politicians respect organized voting-power (lots of loud voices). Reed Ehrlich, one of the eight members of the committee, has this to say about getting the repeal bill into and through the legislature: "It was so easy to do. It can be done anywhere else just as easily. All you have to do is organize carefully at the beginning. If we—the riders—are ever threatened seriously with restrictive national legislation, all we have to do is organize nationally the way the Illinois riders did regionally. We can own the United States."

That would be a change.

CIRCLE NO. 45 ON READER SERVICE PAGE

On Regulations

1 New driving rules went into effect Jan. 1 throughout Alaska. Motorists were informed by the Alaska Department of Public Safety several hours before the rules became law.

2 But copies of the regulations are not available and won't be for several months.

3 In the meantime, we have not noticed any decrease in the number of hitchhikers along Water Street and Tongass Avenue in Ketchikan. The hitchhikers usually are high school kids bound to or from studies or activities up on The Hill.

4 The new road rules say that hitchhiking is illegal. Also declared illegal is Ketchikan Rotary Club's method of operating the Salvation Army Christmas kettle. It is illegal to ask any passing motorist for a donation.

5 Another habit we note Ketchikan motorists have has been declared illegal. That is driving with parking lights on. If lights are required at all headlights must be included.

6 Of interest to local motorists, too, is the requirement that parking lights be on at any time a vehicle is parked within six feet of the roadway. Along North and South Tongass there are few places a vehicle can get more than six feet from the roadway.

7 We can presume that the state troopers will be issuing warnings in the next few months instead of making arrests for violations of a code not yet generally available.

8 There are some good points in the new rules. There are some of doubtful value. There are some about which the public may have an opinion.

9 We believe the department failed the public in not advertising the proposed regulations before they went into effect. It is possible that a public hearing on the rules would have revealed better solutions to the problems.

10 We also believe it is possible that the validity of the department's rules may be questioned because of the procedure used to put them into effect. For example, members of the Alaska Legislative Council, a portion of the state's official lawmakers, were uninformed on the contents of the new driving regulations. Failure to properly advise the lawmakers of new rules is not good sense, even if it is legal.

11 This incident, together with the problems attending the emergency announcements of the fish and game department during the summer, leads us to believe that regulations should have a rider that they are not effective until some many days or hours after publication by a newspaper of general circulation in the area. This is a standard clause in a lot of city ordinances.

LMW, Jr.

THE FOLLOWING DOCUMENT(S) MAY NOT FILM LEGIBLY BECAUSE OF POOR QUALITY OF THE ORIGINAL.

TO: Captain Richard L. Burton

DATE : January 9, 1970

FROM: Captain James H. Dailey

SUBJECT: News Media - File 0052

This is in answer to your inquiry concerning the editorial which appeared in the January 6, 1970, edition of the Kaysville Daily News. The journalist could have checked each and every allegation by merely asking.

To acquaint you with the problem of answering the inquiries from the public which this editorial has generated, the following facts are documented:

Paragraph 1 - The enclosed copy of a news release issued to the AP on or about December 22, 1969, set out every regulation which was new. Few papers were interested enough to print any of the material, and those who did, printed minor excerpts.

Paragraph 2 - Copies of the regulations were mailed to law enforcement agencies, attorneys and courts and a limited number of copies are available to those who have a real need.

The Drivers' Manual, which is a summarization of the motor vehicle laws is currently being printed. The contract calls for a March 1, 1970, delivery date. This is the publication which is distributed to the public and which is written in non-legal terms.

Paragraph 3 - The hitchhiking law has been in effect since before 1959, and there is no reason to believe any great change is going to occur.

Paragraph 4 - This has also been a law since before 1959.

Paragraph 5 - This is a new provision and was promulgated in order that parking lights alone, means a parked vehicle to approaching drivers.

Paragraph 6 - This regulation is not new, but was revised to be less restrictive and more realistic than the previous wording. The six foot requirement is applicable only on highways outside cities or suburban districts.

Paragraph 7 - This assumption may be wrong depending on the violation and the circumstances. There are really only 14 new regulations.

Paragraph 8 - Profound statement!

Paragraph 9 - The regulations were published in newspapers in Juneau, Anchorage and Fairbanks. The law requires publication in only one paper.

Publication was made on October 13, 1969, in Anchorage; October 17, 1969, in Juneau; October 20, 1969, in Fairbanks, and public hearing was held on November 17, 1969, at Juneau, as was announced in the notice. Hearing was 30 days after the latest publication date, as is required by law.

Written comment was also solicited in the notice.

Paragraph 10 - Every legislator received a copy of the notice as is required by law. These were mailed on October 7, 1969.

The Legislative Affairs Agency, which is the executive branch of the Legislative Council, reviewed and re-reviewed the regulations and assisted with the drafting. This procedure began during July of 1969.

During the 1969 session of the legislature, numerous legislators were advised of the revisions taking place.

Paragraph 12 - A "filler" as he calls it is not necessary in view of the fact that the law does not become effective until 30 days after filing with the Secretary of State, and they cannot be filed until 30 days after publication.

So, if a regulation could go through the procedure without any delay, the minimum amount of time from publication to effective date is 60 days.

These regulations required 73 days from latest publication date.

It might be well to emphasize the fact that the new regulations are, in the large part, merely revision of regulations which have been in effect since 1953. The revisions, in fact, made many existing regulations less restrictive than they previously were. There are in fact only 37 new regulations out of a total number of 165. Of these 37, nine do not become effective until 1971; eight concern snow vehicles; ten maintain the actions of the police and other government agencies; four control the sale of equipment to the public. This leaves six which are new regulations directed at the individual driver. To these, of course, can be added those concerning snow vehicles which makes a total of 14.

Copies to each Reg. mailed on Aug 7, 1969

NOTICE OF PROPOSED CHANGES IN THE REGULATIONS OF THE DEPARTMENT OF PUBLIC SAFETY

Notice is hereby given that the Department of Public Safety, under authority vested by AS 28.05.030-050; 28.20.020; and 28.15.130, proposes to adopt, amend and repeal regulations in Title 13 of the Alaska Administrative Code as follows:

GENERAL: A complete revision of the regulations governing rules of the road; equipping of vehicles; inspection of vehicles; safety responsibility; definitions of words and phrases used in the traffic regulations; and adoption of a complete set of regulations governing the issuance or denial of school bus driver permits, is being made. Revisions include the deletion of various existing provisions, the addition of new provisions and the technical amendment of wording throughout the regulations. Adoption of these regulations will repeal 13 AAC 01.101; 103; 104; 105; and 106 and will adopt 13 AAC 02 (Rules of the road); 13 AAC 04 (Vehicle lighting, brakes and other equipment); 13 AAC 06 (Inspection of vehicles); 13 AAC 08 (Driver licensing and safety responsibility) and 13 AAC 10 (Definitions - traffic regulations). The provisions of these regulations concern the following:

A. RULES OF THE ROAD:

(1) Traffic signs, signals and markings;
(2) Use of the roadway;
(3) Right-of-way;
(4) Pedestrian rights and duties;
(5) Turning, starting and signals on stopping or turning;
(6) Special stops required;
(7) Speed restrictions;
(8) Stopping, standing or parking;
(9) Bicycles;
(10) Snow vehicles (equipment, restrictions on use, etc.);
(11) Miscellaneous provisions - governing leaving vehicles unattended, backing, riding on cycles and scooters, obstructing driver's view, opening and closing doors, livestock on roadway, riding in trailers, coasting, following emergency vehicles, crossing fire hose, littering, carrying or towing persons on outside of vehicle, embracing while driving, drinking while driving and leaving child in vehicle;

(12) General provisions - governing application of traffic regulations, obedience to police officer, riding animals or animal-drawn vehicles, fireman's private vehicle and emergency vehicles.

B. VEHICLE LIGHTING, BRAKES AND OTHER EQUIPMENT:

(1) Scope and effect of regulations;
(2) Lamps and other lighting equipment;
(3) Brakes;
(4) Other equipment - including horns, muffler, mirrors, windshield, tires, safety glazing material, flares and warning devices, air conditioning equipment, television viewers, anti-spray devices, seatbelts, safety chains, motorcycle and scooter requirements concerning goggles; face shields; helmets; handlebars, and standards for same, and required equipping of vehicles for sale, lease or rental.

C. INSPECTION OF VEHICLES:

(1) Vehicle equipment condition;
(2) Inspection by officer;
(3) Owner or driver to comply with inspection requirements;
(4) Roadside inspections;
(5) Inspection stickers;
(6) Prohibited practices - (repairs, etc.);
(7) Notice and approval of repair or adjustment.

D. DRIVER LICENSING AND SAFETY RESPONSIBILITY:

(1) School bus driver permits - (Article 1);

(a) Application of regulations;
(b) Denial of permit - (grounds)
(c) Application and examination requirements - (scores, composition and frequency);
(d) Medical standards;
(e) Permit to be carried;
(f) Restricted permit;
(g) Cancellation of permit - (grounds);
(h) Suspension or revocation of permit - (grounds and duration);
(j) Re-examination - (grounds).

(2) Safety Responsibility - (Article 2);

(a) Application of regulations;
(b) Reports required - (time limits);
(c) Security deposit - (form and beneficiary);
(d) Release from liability - (notarization required);
(e) Agreement for payment of damages - (Notarization required);
(f) Form of notice - (delivery and time limit).

E. DEFINITIONS - TRAFFIC REGULATIONS:

This chapter defines various words and phrases used in the traffic regulations and in certain sections of AS 28.

Since the regulations are so extensive as to preclude inclusion in this notice, interested persons may inspect them at a regional headquarters office of the Alaska State Troopers, Anchorage or Fairbanks, or obtain a reasonable number of copies by a written request addressed to the Department of Public Safety, Pouch N, Juneau, Alaska

Notice is also given that any person interested may present oral or written statements or arguments relevant to the action proposed at a hearing to be held at Room 423, Capitol Building, Juneau, Alaska, at 9:00 o'clock a.m. on November 17, 1969.

The Department of Public Safety, upon its own motion or at the instance of any interested person, may at the hearing or after it adopt the above proposals substantially as above set out without further notice.

DATE October 10, 1969

Commissioner
Department of Public Safety

THE FOLLOWING PAGES WERE TREATED AS
A UNIT IN THE ORIGINAL FILE.

(4) Motorcycle license renewal.

States should consider the following suggestions in the establishment of procedures for motorcycle license renewal:

(a) Renewal should be required at least once every four years.

(b) A motorcycle license reexamination, consisting of a vision screening and a knowledge test, should be part of the renewal.

(c) No renewal license should be granted unless the applicant has at some time passed a suitable motorcycle license examination.

4. MOTORCYCLE OPERATION

a. Introduction.

There are certain actions which should be instituted by the State to promote safe motorcycle operation and eliminate unsafe practices of motorcycle operators.

b. Unsafe practices.

There are several unsafe practices currently in widespread use by motorcycle operators, including:

(1) Carrying passengers or materials in front of the operator which interfere with operator control.

(2) Sidesaddle riding by passengers.

(3) Riding between lanes of moving traffic.

(4) Riding between the traffic lane and parked cars.

(5) Passing other vehicles in the same lane.

(6) Use of same traffic lane by more than two motorcycles abreast.

(7) Carrying more passengers than the motorcycle's capacity.

(8) Passing other motor vehicles on the right where prohibited.

See page 9-10-11-2-13

c. Implementation.

The following action should be considered by the State to encourage safer motorcycle operation:

(1) Enforce laws controlling unsafe practices.

(2) Educate operators and the public in proper vehicle operation procedures through training courses, public education, and community action programs.

(3) Emphasize proper operation of motorcycles in motorcycle license examinations.

(4) Ensure that highway warning signs are sufficient to cover the needs of motorcyclists, especially signs designating areas that may be particularly hazardous to motorcyclists.

(5) Permit renting of motorcycles by licensed operators only.

(6) Establish performance standards, such as minimum speed limits, for motorcycle operation on limited access highways.

5. MOTORCYCLE PERSONAL PROTECTIVE EQUIPMENT

a. Requirements.

Because of the high probability of injury resulting from motorcycle crashes the following requirements have been developed:

(1) Each motorcycle operator and passenger shall wear an approved safety helmet securely fastened on his head.

(2) Motorcycle operators shall wear approved eye protection devices.

b. Recommendations.

The Department of Transportation has not set performance specifications for safety helmets and eye protection devices. In the absence of Federal specifications, the State should set its own.

(1) Safety helmets.

(a) Safety helmet specifications.

The following specifications are recommended for consideration as a basis for State safety helmet performance specifications:

1 U. S. A. Standards Institute, Specification for Protective Headgear for Vehicle Users (Z90.1-1966).

2 The Z90.1-1966 specification modified to require only one impact per test site.

3 Motorcycle, Scooter and Allied Trades Association (MS&ATA), Specifications for Motorcycle Safety Helmets.

(b) Identification of approved helmets.

Helmets approved by the State should be labeled for identification by purchasers and enforcement officers. This label, indicating the helmet manufacturer's name or brand name and the model name or number, should be placed in a permanent manner at the outside lower rear of each helmet in letters of not less than one-quarter inch in height.

(c) Reflectorization.

While not required currently under the Motorcycle Safety Standard, it is recommended that each helmet have a reflectorized surface or have reflectorized material securely affixed on the left side, right side, and rear. This reflectorization should cover an area of at least 10 square inches at each of the specified sites and should preferably cover the entire helmet.

(2) Eye protection devices.

A satisfactory eye protection device can be goggles, a face shield, or safety glasses (excluding contact lenses).* Windshields are highly recommended as an additional measure. These eye protection devices should meet performance specifications established by the State.

(a) Eye protection approval.

1 State standard for motorcycle windshields should comply with the requirements of Federal Motor Vehicle Safety Standard 205:

* Whenever the motorcyclist wears corrective lenses, even though other eye protection devices may be worn, the use of safety glass or plastic lenses is recommended.

Glazing Materials - Passenger Cars, Multipurpose Passenger Vehicles, Motorcycles, Trucks, and Buses.*

2 Two standards developed under the auspices of the U. S. A. Standards Institute may be consulted for the development of performance specifications for other eye protection devices. These standards are:

a Standard Z26.1-1966: Safety Glazing Materials for Glazing Motor Vehicles Operated on Land Highways.

b Standard Z2.1-1959: Head, Eye and Respiratory Protection.

(b) Night use of eye protection.

Eye protection used at night should not be tinted.

(3) Other personal protective equipment.

Safety helmets and eye protection devices are the only personal protection equipment specified under the initial Motorcycle Safety Standard. Additional items, including protective footwear, gloves, jackets, and trousers should be encouraged in motorcycle operator education courses and public information programs.

6. MOTORCYCLE VEHICLE EQUIPMENT

a. Rearview mirror.

The State program should ensure that each motorcycle is equipped with at least one rearview mirror which provides the operator with an adequate field of vision at least 200 feet to the rear.

b. Passenger seat and footrests.

The State program should ensure that a passenger is carried only on a motorcycle designed to carry a passenger and that the motorcycle is equipped with a seat and footrests designed and located for use by the passenger.

* Excerpts from this Safety Standard, 23 C.F.R. 255.21, are reproduced as Appendix G of this volume.

c. Lamps and reflective devices.

State standards for lamps, reflective devices, and associated equipment should comply with the requirements of Federal Motor Vehicle Safety Standard 108: Lamps, Reflective Devices, and Associated Equipment -- Passenger Cars, Multipurpose Passenger Vehicles, Trucks, Buses, Trailers, and Motorcycles.*

d. Other.

Each motorcycle should be equipped with such other equipment as may be required by the State.

7. MOTORCYCLE VEHICLE INSPECTION

a. Introduction.

(1) Each motorcycle should successfully pass a safety inspection at the time the motorcycle is initially registered and at least annually thereafter, or at such other time as may be designated under an approved experimental, pilot, or demonstration program implemented by the State.

(2) Recommendations for implementing motorcycle vehicle inspection set forth in this volume are intended to supplement, not supersede, recommendations set forth in Volume 1, of this Manual, Periodic Motor Vehicle Inspection.

b. Implementation.

(1) General.

(a) U. S. A. Standards Institute, American Standard Inspection Requirements for Motor Vehicles, Trailers, and Semitrailers Operated on Public Highways (D7.1-1963) indicates inspection procedures which should be used as a guide whenever practical.

(b) Training given to motor vehicle inspectors should include training on motorcycle inspection procedures.

(c) The motorcycle inspector should have passed an examination demonstrating his knowledge of motorcycle inspection procedures.

* Excerpts from this Safety Standard, 23 C.F.R. 255.21, applicable to motorcycles manufactured after December 31, 1968, are presented as Appendix F of this volume.

(d) A licensed motorcycle operator should perform all motorcycle operations that may be required as part of the inspection.

(2) ~~Recommended inspection~~.

The items inspected in the State motorcycle inspection should include, but not be limited to, those listed below. It is not intended that this list require removal of wheels or disassembly of major components.

(a) Steering and wheel alinement.

1 Frame and front fork should not be bent or damaged.

2 Wheels should not be out of line.

3 Components should not be broken, loose, excessively worn, or missing.

4 Steering head bearing should not be loose, broken, or defective.

5 No portion of the handlebars may extend more than 15 inches higher than the level of the seat.

6 Handlebars should not be loose, bent, broken, or damaged.

(b) Suspension.

1 Motorcycle should not have broken, excessively worn, missing, defective, disconnected, or malfunctioning shock absorbers or other suspension components.

2 Motorcycle should not have broken or sagging springs.

(c) Tires, wheels, and rims.

1 Tires should not have less than 2/32 of an inch of the tread design remaining, or any part of the ply or cord exposed.

2 There should not be any tread cut or snag on the outside of the tire deep enough to expose the body cords.

3 Sidewalls should not be scuffed, cut, or snagged to the extent that body cords are damaged.

TRANSPORT

Published in the interest of greater traffic safety by the Ontario Department of Transport, Hon. Irwin Haskett, Minister

New Laws Will Affect Snowmobilers this Winter

From the time that first snowflake falls, and doesn't melt, thousands of Ontario residents start getting ready for the snowmobiling season.

If you're a snowmobiling enthusiast, there are some new laws you should brush up on before heading out this winter.

The scope of the laws regarding snowmobiling are outlined in a comprehensive new pamphlet now available from Department of Transport. "Motorized Snow Vehicles in Ontario" is a compact guide to the operation of your machine. The Motorized Snow Vehicles Act is also free upon request from the Highway Safety Branch, Ontario Department of Transport, Ferguson Block, Queen's Park, Toronto 182.

Here are some of the new laws you should know about in brief:

- Snowmobilers must now report any collisions on or off the highway which involve personal injury or damage exceeding $200 to property other than that of the owner or driver.
- The driver of a snowmobile must hold a driver's licence to take his machine on highways where snowmobile operation is permitted.
- The owner of a snowmobile is to be held responsible for any infractions committed by persons using his machine . . . . this owner responsibility is in addition to that of the operator.

Try to avoid driving your snowmobile on roads where the snow is hard-packed, icy, or where the roadway is dry and handling is difficult. Fully 78 percent of the 185 collisions which were reported on Ontario highways last year happened under these conditions. Drivers who mixed alcohol and snowmobiling accounted for 21 percent of the 185 collisions.

Forty percent of collisions occurred during the weekend in hours of darkness.

Don't venture out on ice-covered lakes until well into the winter months. Even then, currents from streams flowing in or out of the lake will make the ice thinner in some places. Another hazard for snowmobilers is barbed wire . . . . several cases were reported last year of snowmobilers who didn't see farmer's fences until it was too late.

New licence plates for motorized snow vehicles went on sale October 1st across Ontario. The new, chrome yellow and blue plates are good for two years and the registration fee is $4.00. •

Traffic Deaths Still Down From '69

The number of deaths due to traffic collisions took a sharp drop in Ontario during the first six months of 1970, showing a decrease of 14.7 percent over the previous year.

But at the end of August, the figures backslided a bit, with the over-all decrease for the eight months at 11.6 percent.

Ontario Traffic Safety asks motorists to take special care during the early winter months, a time of increased driving hazards. Help us beat the numbers. •

Motorcycle Deaths Down Since Helmet Law Passed

In Ontario, all motorcyclists have been required to wear crash helmets since September 1 of 1968.

Since that ruling went into effect, there's been a substantial reduction in the number of motorcyclists killed or injured in collisions.

There were 76 deaths in the 12 months before the law was passed. Those injured while drivers or passengers on motorcycles totalled 3,302.

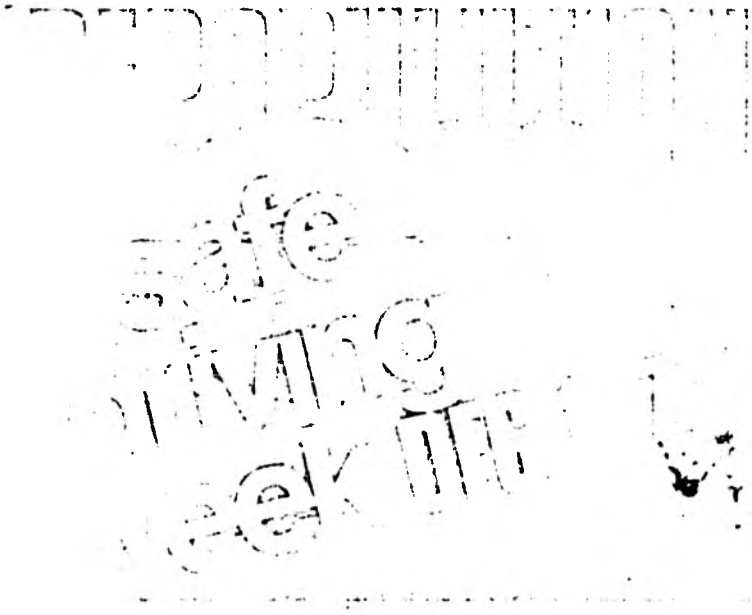
In the 12 months following the introduction of the new law, deaths decreased by 35.5 percent. There were 2,714 persons injured in motorcycle collisions — a reduction of 17.8 percent.

Figures for the following 12 months show that from September, 1969 to August 1970, deaths decreased by yet another 8.2 percent.

In comparison, the state of Michigan rescinded the law which required all motorcyclists to wear crash helmets in 1965 and deaths jumped 165 percent that year in comparison to the year 1967 when the helmet law was in force.

* * *

Ontario Traffic Safety reminds motorcyclists to look for the CSA sticker next time they're buying a helmet. Canadian Standards Association helmets are regulation helmets for Ontario motorcyclists. There's only one exception — helmets which conform to the requirements of the Snell Memorial Foundation or British Standards Institute are permitted, but only until December 31, 1971.



Safety experts say that if everyone spent a few seconds thinking about driving before starting up his car, we'd have a lot fewer traffic deaths.

That's exactly what the Canada Safety Council hopes you'll do during Safe Driving Week, December 1-7, and in the following weeks and months. Safe Driving Week represents a major attack on traffic collisions, the main cause of accidental death in Canada.

The work for Safe Driving Week begins now, involving hundreds of groups and individuals working for greater driving safety across Canada. They're counting on your support.

Mel J. Personett
Commissioner
Department of Public Safety
P.O. Box 2719
Juneau, Alaska 99801

Dear Mr. Personett:

The 1967 Wisconsin Legislature passed a law requiring motorcycle operators to wear helmets. This law was recently challenged.

You will notice from the enclosed decision that our Circuit Court in Dane County upheld the law. We thought you might be interested in this information.

Should it be appealed to the Supreme Court in Wisconsin, we will also forward the results of that action.

Sincerely,

DEAN VAN GORDEN

STATE OF WISCONSIN | CIRCUIT COURT | DANE COUNTY

JAMES BISHIUS, Plaintiff, + 124423

v. +

JAMES L. HARRIS, Commissioner of Motor Vehicles, Defendant. +

Before: Hon. W. L. Jackman, Circuit Judge

Hearing May 13, 1968
Appearances: Plaintiff in person and by S. A. Schapiro
Defendant by Albert Harriman, Assistant Attorney General.

- - -

The plaintiff in this case challenges the validity of Section 64, Chapter 292, Laws 1967 which enacted, among other things, Sections 347.485, Stats. 1967. The challenge extends to subsections (1),(2) of Sec. 347.485 relating to requiring protective headgear and eye protection, and to Sec. 347.486 requiring handlebars to be not over 15 inches above the seat. Attack is also leveled against Section 45, Chapter 292, Laws 1967 enacting Sec. 346.595 (5) requiring motorcycles to have lights while being operated.

These statutes are attacked as violating the due process and equal protection clauses, presumably of both United States and state constitutions.

It is obvious that the purpose of requiring helmets is to protect against head injuries. It is likewise obvious that the reason eye protection is not only to protect the face from damage but to prevent foreign objects from getting in the eyes to affect eyesight and ability to control the motorcycle. The purpose of the handlebar requirement is not so obvious. It is a well known fact that a vehicle with its lights on is easier to see, even in the daytime.

I. Due Process - Protective devices - helmets and eye guards.

The purpose of the helmets and eyeguards being primarily to protect the motorcycle rider, is attacked as an unreasonable interference with the personal liberty of the individual to endanger himself. Motorcycles may be driven at high speeds, they afford no protection to the rider if he loses control or if he collides with another vehicle or object. We recognize that some cases do hold that helmets and similar safety devices designed to protect the individual against himself. Everhardt v. New Orleans, 203 So. 2d 423 (La.App.); People v. Carmichael, 278 N.Y.S. 2d 272; People v. Smallwood, 277 N.Y.S. 2d 272. These cases seem to proceed on the theory that everyone has a constitutional right to take any risks he wishes with his person and that self-destruction is not a matter of public concern.

In our modern day the state has a concern for the health and well being of each individual. The plaintiff argues that the regulation of personal conduct by use of the police power to be valid must affect the interests of the public at large, and the means used must be reasonably necessary to accomplish that purpose and not be unduly oppressive.

The inquiries to be solved in testing an enactment purporting to be for promotion of public health are these: Does a danger exist? Is it of sufficient magnitude? Does it concern the public? Does the proposed measure tend to remove it? Is the restraint or requirement in proportion to the danger? Is it possible to secure the object sought without impairing essential rights and principles? State v. Redmon, 134 Wis 89, 112.

There can be no question that as to the riders of motorcycles a danger does exist. We need go no further than to refer to the literature incorporated into the stipulation of the parties which is part of the record and which includes the conclusions of the U. S. Department of Health, Education and Welfare, Public Health Service. The recognition of the existence of the problem of head and face injuries to motorcyclists and of its magnitude is recognized by every authority that has made inquiry into the subject.

The incidence of vehicle accidents and the resulting injuries and the severity of such injuries does affect the public. It affects insurance rates, the requirements of public hospital service, lost manhours of employment with resulting loss of income tax revenues, public services to the disabled, and the widows and orphans of the deceased victims, and, since so many motorcyclists are young men, disability to serve in the armed forces. 16 Am Jur 605. The recognition of public interest in traffic accidents is manifest in Sec. 1, Chapter 292, Laws 1967. The plaintiff says that the interest of the public in the social consequences of injury to any one person or class is so indirect that the interest is not a true public interest. We do not consider the position of the plaintiff to be well taken. The consequences of head injuries to individuals do directly affect the public interest. The health and safety of individuals or groups of individuals are proper concerns of the legislature. Boden v. Milwaukee, 8 Wis 2d 318.

The provisions of Sec. 347.485 are calculated to, and, from the literature appended to the parties' stipulation, does tend to minimize the danger of head and face injuries, and in case of the eye protection in addition does tend to prevent interference with lookout due to dust, insects and debris being blown into the eyes. This is particularly true at the speeds motorcycles may be driven. The helmet is recognized by athletes, soldiers, and workmen in trades where the danger of head injuries from falling objects are a hazard, such as welders and operators of grinders, when safety glasses are required. We are of the opinion that the requirements of head and face protection are not disproportionate to the hazards to be guarded against. It is true that one of the hazards of motorcycling accidents

in the incidence of severe injuries to the limbs, especially the lower limbs. But the legislature in its wisdom need not provide a complete solution to every problem in order to make a partial solution to some of the problems valid legislation. Forest Home Dodge v. Kemp, 29 Wis 2d 78.

Just how one can protect himself against head and face injuries without some protective gear is not clear. On a motorcycle the rider has no protection whatever such as an automobile or truckdriver has from the construction of the vehicle. We do not see how protection can be furnished without either enclosing the vehicle or the driver and the helmet and face protection does exactly that.

The operation of vehicles on the highway is not an unlimited constitutional right. It is a privilege subject to reasonable regulations under the police power and the privilege may be withheld unless the driver complies with reasonable regulations. State v. Stehlek, 262 Wis 642; State v. Seraphine, 266 Wis 118. We see nothing unreasonable about the requirements of head and face protection required of motorcyclists.

But the plaintiff claims that since the requirements are solely for the protection of the rider and the rider has an inherent right to take any risks he wishes. While the protection afforded is for the rider, we do not accept this as for his benefit alone. As we have pointed out ante, the riders' welfare affects others. But accepting the contention at face value, the argument that the law must affect the public at large to be valid is not sound. The same may be said of every regulation to protect employees in the trades. The state has an interest in the health and welfare of each of its citizens, no matter how reckless he may be and has the power to enact legislation to protect the reckless citizen against himself, especially if he is a member of a substantial class of persons subjected to a similar hazard. Holden v. Hardy, 169 U.S. 366, 391-392; 42 L. Ed. 780; see also N.Y.C. RR Co. v. White, 243 U.S. 188, 61 L. Ed. 667. We see no difference in substance between requiring the use of protective devices by a class of persons, motorcyclists, and the requirement that certain tradesmen use protective devices. The persons affected are single individuals, but there is a large number of them; enough to constitute a substantial class of the persons who make up the public.

In conclusion we need only quote 16 Am Jur 605: "Protection of the safety of persons being one of the principal uses of the police power of the states, measures designed to protect and further safety of the individual are proper exercises of the power."

We find no justification for the plaintiff's complaint that the requirements of Sec. 347.485 are unreasonable or deny due process or unduly interfere with the freedom of the individual.

II. Equal Protection as Applied to Sec. 347.485.

The plaintiff attacks Sec. 347.485 as discriminating against motorcyclists, while not applying the same standards to bicycles and automobiles. The power-driven cycle is a unique machine. It is capable of maneuvre to high speeds by motor vehicle standards, with the hazards inherent in speeds at which the vehicle is driven. A bicycle is limited in its speed by the nature of the power which propels it. An automobile differs from a motorcycle in providing a shell surrounding the motorist. Both bicycles and automobiles can be dangerous to the riders, but the hazards of speed on the one hand and lack of an enclosure for the driver on the other hand do distinguish the motorcycle from both the bicycle and the automobile and make the hazard of operation distinguishable from both the bicycle and the automobile. Just because both the bicyclist and the motorist are subjected to hazards of head and face injuries does not mean that in order to make Sec. 347.485 valid it must apply to bicyclists and motorists. The degrees of hazard differ and therein lies the distinction. A classification is not unreasonable because it does not affect everyone who has any exposure to an evil. Forest Home Dodge v. Karns, 29 Wis 2d 78.

The rules governing classification are: It must be based on substantial distinctions which make real differences; it must be germane to the purposes of the law; it must not be limited to existing conditions only; and must apply equally to each member of the class. Borgnis v. Falk Co. 147 Wis 327, 354. "The question is not whether there may be some on one side of the line whose situation is practically the same as that on the other side, but whether there is a 'distinction between the classes as classes, whether there are characteristics which, in a greater degree, persist through the one class than in the other which justify legal discrimination between them.'" Borgnis v. Falk Co. 147 Wis 327, 356. State ex rel Boen v. Milwaukee, 33 Wis 2d 624. We are satisfied that the tests of what is proper discrimination between the classes suggested by the plaintiff is met in this case and that there is no unlawful discrimination in Sec. 347.485.

III. Vagueness of Section 347.485.

There is no vagueness of the statute. True the statute does not specify exactly what helmets or face guards are required, but delegates this duty to the Motor Vehicle Department. No complaint is raised by plaintiff's brief on this issue. The proposed regulations of the Motor Vehicle Department submitted with the parties' stipulation indicates that the requirements will be definite and certain with standards based upon tests to be made of the various headgear. The delegation of the making of such regulations has so long been considered proper as to afford no need for citation or argument. Verbeten v. Huettl, 253 Wis 510. We see nothing vague or indefinite about the statute. The regulations which will supplement the statute are not before us, but as proposed they are not vague or indefinite. We see no evidence presented that compliance with the statute will of necessity increase the hazard of motorcycle operation.

IV. Validity of Handlebar Statute - Section 347.486(1)

What we have previously said as to discrimination is applicable to Section 347.486 (1). There is no invalid classification.

The question of reasonableness of the statute does, however, raise a doubt. The burden is upon the plaintiff to demonstrate in what respect the law is unreasonable or arbitrary. We find no reference to this subject in plaintiff's brief. The complaint suggests that the matter of height of handlebars is not a proper subject of regulation and creates a hazard.

It is obvious that proper steering apparatus is essential equipment for any motor vehicle. 7 Am Jur 2d 706. Just what is proper equipment may be debatable and if it is it is for the legislature to make the choice in the absence of a showing that the choice is unreasonable or arbitrary.

The statute was enacted to prohibit the use of the high handlebars that are sometimes seen and which appear to be clumsy and to some extent obstruct peripheral vision when used by persons of ordinary height operating motorcycles. Just because in the case of riders of unusual height the high handlebar may not be inappropriate does not make the regulation invalid, especially in the absence of a showing that the extremely tall person cannot be accomodated in some other way as by longer handlebars. The objection voiced in the complaint is not to the law as it applies to one extraordinary person, but to all motorcyclists.

We are of the opinion that the plaintiff has not demonstrated that the regulation of the height of handlebars is arbitrary or unreasonable, nor is it discriminatory.

V. Headlights - Section 346.595 (5)

The statute requiring headlights of motorcycles to be lit at all times when the machine is in operation is attacked by the plaintiff "because it is arbitrary and invalid by imposing such restrictions on operators of motorcycles but not on operators of bicycles or automobiles."

Lighted headlamps do more than show the way at night. They are warnings at night and by day of the approach of a vehicle. It might very well be required of automobiles to have headlights lit in the daytime. However, by virtue of the size of automobiles alone, their presence should be obvious. A motorcycle is a small machine covered to a large degree by the rider and it is easy for the machine and rider to blend into the background and not be seen by other travelers. The statute is designed to prevent this. Anyone who has had experience in the trial of accident cases involving motorcycles with automobiles has heard the motorist in almost every case complain that he did not see the motorcycle. This is such a common complaint, even in the dayti

that it is almost universal. Here again, the bicycle is different in that it is slow-moving and hence more easily controlled by the cyclist. The automobile differs in size. So the classification is not unreasonable nor is the regulation one without a sound basis in experience, as well as reason.

VI. Conclusion

The court concludes that Sections 347.385, 347.486(1) and 346.595(5) are all valid enactments.

Therefore, it is

ORDERED: That the Attorney General will prepare the necessary findings of fact, conclusions of law and judgment declaring that Sections 347.485 (1)(2), 347.486, and 346.595 (5) are valid and enforceable and dismissing the complaint, and after submitting the same to opposing counsel for approval as to form, present them to the court for entry.

Dated May 14, 1968.

BY THE COURT:

W. L. JACKMAN

Judge

Committee on Medical Aspects of Automotive Safety

Medical Aspects of Motorcycle Safety

In recent years physicians have seen more and more injuries and deaths as a result of the increase in motorcycling. Physicians with patients who drive motorcycles or who have children who drive, or plan to drive, have an unusual opportunity to practice preventive medicine by giving counsel concerning the safe operation of such vehicles. This guide has been compiled by the American Medical Association's Committee on Medical Aspects of Automotive Safety to give physicians general background information and suggestions which should be of help in cutting down the tragic and increasing toll of injury and death.

In the decade following 1956, the number of motorcycles registered in the United States has more than quadrupled, and the trend shows every indication that it will continue to rise. In 1956 there were 400,000 registered motorcycles, but by 1967, the figure reached 2 million. If the trend continues, by 1970 there will be more than 5 million such vehicles in use. The word "motorcycle" as used in this guide means all two-wheeled motor-powered vehicles. A number of three-wheeled (sidecar) motorcycles are used primarily by police departments and package-delivery firms, and the suggestions in this guide apply to these as well.

The rapid increase in motorcycle popularity can be traced to the introduction of the small, lightweight vehicle. The cost of these smaller vehicles has placed them within reach of hundreds of thousands of young adults. Motorcycling may seem to those not familiar with accident records to be merely a harmless sport and an efficient means of transportation, but statistics prove that it can be hazardous and that lives and limbs are being sacrificed at an increasing rate.

The Committee on Medical Aspects of Automotive Safety: H. A. Fenner, Jr., MD, *Chairman*, Hobbs, NM; Richard C. Dillihunt, MD, Portland, Me; Arthur H. Keeney, MD, Philadelphia; William K. Keller, MD, Louisville; Abraham J. Mirkin, MD, Cumberland, Md; Paul L. Weygandt, MD, Akron, Ohio; and Lee N. Hames, *Secretary*, Chicago.

Reprint requests to Secretary, Committee on Medical Aspects of Automotive Safety, 535 N Dearborn St, Chicago 60610.

Safety authorities are deeply concerned over the more than 2,000 persons who were killed in motorcycle crashes in 1966[1] and even more so by the predictions that about 5,000 will be killed yearly by 1970 if the present trend continues. In addition, the National Safety Council estimates that approximately 250,000 motorcyclists were injured in 1966. As with the fatalities, the number of injuries also undoubtedly will continue to increase. The medical profession is concerned not only with the number of injuries, but with the type of injury that often results. Severe head injury, with permanent brain damage, is all too common, and fractured extremities, while not ordinarily critical, often do result in permanent disability.

Although automobile crashes are of concern to all, the "packaged" automobile occupant has a much greater chance of not being injured or killed. Death rates from motorcycle crashes per 100,000 registered vehicles are more than double those for automobile crashes, and when in a crash, the motorcyclist is injured 80% to 90% of the time, often very seriously. This is due largely to the fact that when he loses control of his vehicle, he almost always is thrown onto the road or into surrounding solid objects, and when he collides with another vehicle, there is even a greater danger of serious injury or death. Although many collisions undoubtedly are the fault of an automobile driver, it is the cyclist who bears the brunt of the crash because he has very little protection.

During recent years there has been a growing interest in finding ways to reduce these deaths and injuries. The motorcycle problem is attacked in the highway and traffic safety legislation now being implemented. Many states are cooperating in searching for ways to reduce the unnecessary toll. The American Medical Association and many of the state and large county medical associations are devoting efforts to this problem. The motorcycle industry itself is concerned about safety in cycling.

To help reduce the alarming toll and to help

make motorcycling a safe means of transportation, as well as a safe and pleasurable sport, the following suggestions are given:

Concerning the Health of the Driver

1. The physical and mental condition of the motorcyclist must be at least as good as that of the automobile driver: regular medical examinations are advisable.
2. Known handicaps, such as those connected with vision, must be compensated. Patients with cardiac problems must be evaluated most carefully if they intend to drive a motorcycle.
3. A proper mental attitude must be developed by the driver: every effort must be made to avoid carelessness, recklessness, irresponsibility, and anger.
4. Drugs and narcotics must not be used before or while driving, unless under medical prescription, in which case, the physician should be informed that his patient intends to drive while using these prescriptions.
5. The use of alcohol adds tremendously to the normal hazards of motorcycling and should not be used if the individual intends to drive. If the driver does drink, a one-hour wait before driving for every drink consumed will help to keep the driver from becoming intoxicated.

Concerning the Vehicle

1. The driver should learn all he can about the motorcycle he intends to purchase.
2. Instructions in its operation should be obtained from a qualified instructor.
3. Different sizes and types have different handling qualities, and the driver should not switch to other machines without learning about their characteristics.
4. The importance of upkeep cannot be overemphasized: it can easily be difference between life and death.

Concerning Vehicle Operation

1. All state and community motor vehicle laws, both as to licensing and operation, should be learned and observed.
2. New drivers have the most crashes. The operation of a motorcycle requires special skills, which are learned only through adequate instruction and extensive experience.
3. Public roads should not be used until the driver is completely familiar with the operation of his vehicle.
4. Night driving is extremely dangerous, even for the experienced driver, and alertness is especially necessary at dusk. Special care must be taken, also, when unfavorable road or weather conditions exist.
5. A safe distance must be kept between the motorcycle and any vehicle in front—at least twice the one-vehicle length for each 10 miles per hour, which is recommended for automobiles.
6. Since the automobile driver may not give the motorcycle adequate space, or may not even see it, the motorcyclist must always be alert.
7. Passengers should not be carried unless the motorcycle is equipped to do so, and never more than one.
8. Driving abreast should be avoided. Not only is it usually illegal, but it cuts down on the "safe maneuvering" area.
9. A "tailgating" vehicle should be encouraged to pass at the first safe opportunity.
10. Motorcyclists should be meticulous in signaling for slowing, stopping, or turning.
11. Brakes should be used before entering a curve—not after the vehicle is in it.
12. The motorcycle should *never* be driven between traffic lanes, or on the "shoulder," since a suddenly swerving automobile may be difficult or impossible to avoid.
13. Objects which prevent both hands from being on the handlebars at all times should not be carried.
14. Motorcyclists should slow down and be especially alert if dogs and other animals are in the vicinity. The same applies to pedestrians, especially children and older persons, who often do the unexpected.
15. Defensive driving can be successful in reducing the number of automobile crashes: it probably can be just as successful as far as motorcycle crashes are concerned. (The National Safety Council, Chicago, sponsors a national defensive-driving course.)

Concerning Clothing and Equipment

1. Approved protective headgear should always be worn by driver and passenger. (Helmets should meet the specifications [Z90.1-1966] set by the USA Standards Institute, New York.)
2. Eye protection should be used at all times.
3. Clothing should be heavy enough to protect—preferably of a highly visible color. Bare arms and legs are an invitation to unnecessary injury.

Concerning Courtesy

1. Noise should be kept to a minimum. The motor should never be revved up unnecessarily and original muffler equipment should not be removed or altered.
2. Special care should be taken in residential areas, especially at night.

Concerning Emergency Care.—Even if the above suggestions are followed, the motorcyclist may still become involved in a crash. Severity of the injuries may be minimized and lives may be saved by summoning emergency medical care immediately. However, when the victim is in obvious need of *immediate* care, as in the case of heavy bleeding, first-aid care should be provided on the spot. Injured persons should be kept warm and made as comfortable as possible, but should not be moved unless necessary for their safety.

Child Without Crash Helmet Dies of Motorcycle Injuries

A novice motorcycle rider from Unalakleet died of her injuries here Saturday night after doctors fought unsuccessfully to save her life.

The victim was Gloria Millie Kayourkluk, 13, daughter of Mr. and Mrs. Lawrence Kayourkluk of Unalakleet.

Trooper Chuck Miller of the Nome post of the Alaska State Troopers, said the child was not wearing protective head gear and added that she had learned to ride the motorbike only the day before. The vehicle was the property of one of her brothers.

Riding tandem with Gloria at the time of the accident was a friend, Della Katchatag, who received minor injuries.

Della told Trooper Miller that just before the accident occurred at 9 o'clock in the evening she cried out to Gloria, asking her to slow the machine. The Trooper estimated the speed at 40-45 miles an hour at the time the vehicle left the road. It crashed into two upright four by four pieces of lumber used to mark the location of a utilador.

Trooper Miller said the girl apparently turned the throttle the wrong way when her passenger pleaded to slow down.

They had ridden past the school and were headed for the Federal Aviation Agency housing area when the fatal accident occurred.

The body was returned to Unalakleet today.

Man Dies When Hit On Cycle

ADT 11-2-70

An Anchorage man was killed about 2:30 a.m. Sunday when the motorcycle he was riding was struck from the rear as he was stopped for a red light.

Ronald Peter LaFramboise, 18, of 2603 29th Ave., received massive internal injuries, a brain concussion and hemmoraging of the brain in the accident. He died a few hours after the accident in Providence Hospital.

City police meanwhile arrested Larry Allen Austermual, 29, of Kasilof. He was charged with driving while intoxicated and with failure to remain and render assistance, a felony.

Police Sgt Ron Otte said LaFramboise was stopped for a red light at Spenard Road headed west on Northern Lights Boulevard when the incident occurred. The Austermual vehicle continued through the intersection after the impact.

Otte said witnesses followed the vehicle to the Minnesota Bypass, where it turned right. Austermual was apprehended at 36th Avenue and the bypass, Otte said.

The injured man was taken to Providence Hospital for treatment. He died a few hours later, Otte said. There was no indication that the motorcycle rider was wearing a safety helmet.

Austermual was lodged in state jail pending arraignment on the charges.

LaFramboise had attended West High School and was employed with a local car wash. He was born in Anchorage.

He is survived by his father, Philip J. LaFramboise, Anchorage; his mother, Mrs. Philomene Evans, Anchorage; five brothers, Anthony, Larry and Marcel, all of Anchorage, Philip J. Jr., Fairbanks, and Gregory, in the U.S. Marines in Australia, and nine sisters, Mrs. Shirle Schmidt, Mrs. Beverly Babbitt, Mrs. Linda Estabrook, Mrs. Diann Martin, Mrs. Charlotte Kendrick, Miss Therise LaFramboise, Miss Janice LaFramboise and Miss Patricia LaFramboise, all of Anchorage, and Mrs. Carol Williams, Amboy, Wash.

Funeral arrangements are pending at Green Funeral Chapel.

The death brought to 83 the number of motor vehicle deaths in Alaska this year, compared with 53 at this time in 1969.

It brought the number of traffic deaths in Anchorage to 10 this year.

DEPT. OF PUBLIC
SAFETY

Mr. Mel J. Personett
Commissioner, Department of
Public Safety
Pouch N
Juneau, Alaska 99801

Dear Mr. Personett:

We are aware that State motorcycle protective headgear requirements, enacted to implement the Department of Transportation's Safety Program Standard No. 3 entitled Motorcycle Safety, are being challenged in many jurisdictions. In May of last year I provided the Governor of your State with a memorandum prepared by the legal staff of the Federal Highway Administration supporting the constitutionality of headgear legislation.

Subsequently the U.S. Supreme Court in Bisenius v. Karns, 89 S. Ct. 2033 (1969) dismissed an appeal attacking the constitutionality of the Wisconsin statute "for want of a substantial federal question." This is highly significant because such a disposition means that the Supreme Court viewed the Wisconsin court decision upholding constitutionality to be correct.

I enclose for your information a revision of the legal memorandum provided your Governor which has been updated to include Bisenius and other cases which have come to our attention in the interim.

In addition to court challenges, many States will be facing increased attempts to create legislative opposition to their helmet requirements. As mentioned in my letter of May 16 to your Governor, there is substantial evidence that strongly supports these requirements and hence argues against repeal actions. If opposition to the statutory requirement is developing in your State, you might want to make available to legislators or legislative committees the

enclosed memorandum along with other material, such as the information we sent you last year showing a reduction in motorcycle fatalities of 30% in those States adopting the helmet requirement. Pertinent materials are enclosed for your use. We would be glad to help you in this regard, including making more copies available to you.

If I can be of any further assistance, please do not hesitate to call me.

Sincerely,

R Brenner

IN REPLY REFER TO:

42-13

January 13, 1971

AIRMAIL

Mr. Robert J. Mahoney
Assistant Attorney General
State of Alaska
360 K Street
Anchorage, Alaska 99501

Attention: Sanford Gibbs

Dear Mr. Mahoney:

Lt. H. J. Sydnam, Director of the Alaska Traffic Safety Bureau asked that I send you the enclosed staff memorandum on motorcycle helmet law constitutionality. The enclosed document dated January 1970 is the complete staff memo. The document dated November 1970 is the material needed to update the January 1970 memorandum. We are in the process of having the revised memorandum printed, but it won't be available for several weeks.

If the National Highway Traffic Safety Administration can be of further assistance, please let us know.

Sincerely,

Lewis S. Buchanan
Motorcycle Safety Specialist

STAFF MEMORANDUM

ON THE

CONSTITUTIONAL QUESTION PRESENTED BY

STATE MOTORCYCLE HEADGEAR REQUIREMENTS

JANUARY 1970

U.S. DEPARTMENT OF TRANSPORTATION
FEDERAL HIGHWAY ADMINISTRATION
NATIONAL HIGHWAY SAFETY BUREAU

QUESTION PRESENTED

Whether a State requirement that any person riding upon or operating a motorcycle on the streets or highways of the State shall wear upon his head a protective head device of a type approved by the State is unconstitutional under the Fourteenth Amendment.

BACKGROUND

Twenty-three U.S.C. § 402(a) (P. L. 89-564, the Highway Safety Act of 1966) requires each State to have a highway safety program approved by the Secretary of Transportation and in accordance with uniform standards promulgated by him.

Highway Safety Program Standard 4.4.3 released by the Secretary on June 26, 1967, and entitled Motorcycle Safety, (23 C.F.R. Part 204) requires each State to have a motorcycle safety program providing as a minimum, inter alia, that when a motorcycle is being operated on streets and highways, each motorcycle operator and passenger shall wear an approved safety helmet. Latest available information [1/] indicates that as of September 1, 1969, 41 states had enacted motorcycle protective headgear statutes ("headgear legislation" hereafter) of this type providing criminal penalties upon violation. Additionally an unknown number of cities may have enacted similar municipal ordinances.

As of January 1, 1970, there have been decisions in response to 43 known separate court challenges of State and municipal headgear legislation. In 31 instances legislation has been upheld, and in 12 it has been declared unconstitutional. [2/] Headgear legislation has been upheld by 11 State Supreme Courts (Vermont, Missouri, Florida, Washington, Oregon, North Carolina, Rhode Island, Massachusetts, Louisiana, North Dakota, and Wisconsin), 12 appellate courts (three in New York, two in New Jersey, and one each in Hawaii, Pennsylvania, Texas, Maryland, Ohio, Washington, and Connecticut), and 8 trial courts (two each in Pennsylvania, Kansas and New York, one each in South Dakota and Minnesota). Headgear legislation has been declared unconstitutional by 1 State Supreme Court (Illinois), 3 appellate courts (one each in Idaho, Arizona and Michigan), and 8 trial courts (two in New York, and one each in Ohio, Florida, Missouri, Kentucky, Colorado, and Michigan).

1/ Insurance Institute of Highway Safety, Legislative Review 1970, p. 20.

2/ This figure is computed on the basis of the last known decision in each case. Such decision, of course, may represent an appellate reversal, or be subject to reversal on appeal.

Additionally, it is the opinion of the Attorney General of Oklahoma that the State's headgear legislation is unconstitutional and the opinion of the Attorney General of New Mexico that a proposed city ordinance would be invalid if applied to citizens over 18 years of age.

The Supreme Court has never agreed to review one of these cases on the merits. However, in June 1969 the Court in Bisenius v. Karns dismissed an appeal (89 S. Ct. 2033 (1969)) attacking the constitutionality of the Wisconsin statute "for want of a substantial federal question". Such a disposition means that the Court viewed the decision below, upholding constitutionality, to be correct.

I

THE UNITED STATES SUPREME COURT VIEWS A STATE SUPREME COURT DECISION UPHOLDING CONSTITUTIONALITY OF HEADGEAR LEGISLATION TO BE CORRECT

During its 1968-69 term, the United States Supreme Court denied two petitions for certiorari in cases upholding headgear legislation 1/ and dismissed an appeal in a third case "for want of a substantial federal question", Bisenius v. Karns, 165 N.W. 2d 377 (S. Ct. Wisc. 1969), appeal dismissed, 89 S. Ct. 2033 (1969). The appellant had attacked Wisconsin's headgear legislation (§ 347.485(1)(a) Stats.) as a restriction upon individual liberty and as exceeding the police power of the state, alleging that both violated the due process clause of the Fourteenth Amendment.

The Supreme Court's dismissal of appeal "for want of substantial federal question" means that the Court views the decision below to be correct, and that no substantial question on the merits was raised. 2/

The issues raised in Bisenius are essentially the same as those raised in other suits challenging the constitutionality of headgear legislation.

1/ Everhardt v. City of New Orleans, 217 So. 2d 400 (S. Ct. La. 1968) reversing 208 So. 2d 423 (La. App. 1968), cert. denied 89 S Ct. 1775 (1969); Mass. v. Howie, 238 N.E. 2d 373 (S. Jud. Ct. Mass. 1968), cert. denied 89 S. Ct. 485 (1968).

2/ Stern and Gressman, Supreme Court Practice 195 (3rd ed. 1962)

II

THE PRESUMPTION IN FAVOR OF THE CONSTITUTIONALITY OF A STATUTE IS ESPECIALLY APPOSITE WHEN A STATE STATUTE IMPLEMENTS THE EXPRESS COMMAND OF THE CONGRESS OF THE UNITED STATES.

There is a "long established presumption in favor of the constitutionality of a statute", Brandeis J., Ashwander v. Tennessee Valley Authority, 297 U.S. 288 at 354, (1936). This presumption has been recognized by the Supreme Court since the earliest days of the United States. Calder v. Bull, 3 Dall. 386, 399, (1798). In the words of Mr. Chief Justice Waite: "Every possible presumption is in favor of the validity of a statute, and this continues until the contrary is shown beyond a rational doubt." Sinking-Fund Cases, 99 U.S. 700, 718, (1879). Accord: Marshall C.J., Dartmouth College v. Woodward, 4 Wheat. 518, 625 (1818); Washington, J., Ogden v. Saunders, 12 Wheat. 213, 270 (1827).

This presumption applies to an Act of a State legislature as well as an Act of Congress, and "all reasonable doubts will be resolved in favor of the lawful exercise of their powers by the representatives of the people." State of North Carolina v. Anderson, 164 S.E. 2d 48 (1968) upholding that State's helmet legislation. The presumption extends to a city ordinance as well. Everhardt v. City of New Orleans 217 So. 2d 400 (S. Ct. La. 1968), reversing 203 2d 423 (La. App. 1968) cert. denied 89 S. Ct. 1775 (1969).

The presumption of constitutionality seems especially apposite when a State enacts legislation as a complement to an Act of Congress. The Highway Safety Act of 1966 (P. L. 89-564) was enacted "To provide for a coordinated national highway safety program through financial assistance to the States to accelerate highway traffic safety programs . . . ." It requires that "Each State shall have a highway safety program . . . designed to reduce traffic accidents and deaths . . . ." These programs "shall be in accordance with uniform standards promulgated by the Secretary." 23 U.S.C. § 402(a)

Pursuant to the authority granted him by the Act the Secretary released Highway Safety Program Standard 4.4.3 (23 C.F.R. Part 204, Highway Safety Program Standard No. 3) title "Motorcycle Safety." The purpose of the Standard was

> "To assure that motorcycles, motorcycle operators, and their passengers meet standards which contribute to safe operation and protection against injuries."

The background of the Standard shows the imperative need for such a Standard:

> "Deaths and injuries from motorcycle accidents doubled between 1963 and 1965. This fact is particularly alarming when it is understood that most of those killed and injured were young people under the age of 25. Motorcycle registrations have jumped from 574,080 in 1960 to 1,914,700 in 1966. By 1970 the annual increase is expected to reach 1 million per year. Motorcycle safety takes on grave dimensions in view of the fact that since 1960 the rate of motorcycle fatalities has increased at about the same rate as the number of motorcycles."

The Standard requires that "Each State shall have a motorcycle safety program to insure . . . that protective safety equipment for driver and passengers will be worn," specifically, "as a minimum," that

> "B. Each motorcycle operator wears an approved safety helmet and eye protection when he is operating his vehicle on streets and highways.
>
> "C. Each motorcycle passenger wears an approved safety helmet . . . ."

This, then, is the Federal Standard that the State legislation was enacted to implement at the express command of the Congress.

III

THE POLICE POWER OF A STATE INCLUDES THE POWER TO REQUIRE A MOTORCYCLIST TO WEAR PROTECTIVE HEADGEAR.

Headgear legislation stems from the police power of a State. The police power includes the power to enact laws within constitutional limits to promote the public safety and health, but from its nature it is incapable of exact definition. See e.g. Berman v. Parker 348 U.S. 26 (1954). It is one of the least limitable of governmental powers, and a proper exercise thereof may involve limitation of the use and enjoyment of private property without violation of the due process clause of the Constitution. See e.g. Queenside Hills Realty Co. v. Saxl, 328 U.S. 80 (1945).

The public streets, roads, and highways of a State are the property of all the people of a State, and a State has plenary power over the regulation of the use of such for the safety and best interests of the public. The Supreme Court has recognized and given sanction to the State exercise of its police power over use of the public way for more than 40 years:

> "Motor vehicles are dangerous machines, and, even when skillfully and carefully operated, their use is attended by serious dangers to persons and property. In the public interest the state may make and enforce regulations reasonably calculated to promote care on the part of all . . . who use its highways."
> Hess v. Pawloski, 274 U.S. 352, at 356 (1927).

Protection of a motorcyclist and his passenger while on the public roads then is within the legitimate concern of the State and not an area reserved to the individual. Legislation requiring the use of protective headgear by both cyclist and passenger is reasonably related to the end envisioned of reducing deaths and injuries to cyclists and passengers upon the public roads. Therefore State headgear legislation is a valid exercise of the police power by a State. See Massachusetts v. Howie, 238 N.E. 2d 373 (S. Jud. Ct. Mass., 1968); 89 S. Ct. 485 cert. denied 1968); State v. Edwards, Case No. 583370, Mun. Ct. Hennepin Cty. Minn. (1968).

IV

A STATE STATUTE REQUIRING A MOTORCYCLIST AND PASSENGER TO WEAR PROTECTIVE HEADGEAR DOES NOT VIOLATE THE FOURTEENTH AMENDMENT.

A. EVEN IF THE PRIMARY OBJECT OF HEADGEAR LEGISLATION IS TO PROTECT AN INDIVIDUAL FROM HIMSELF, SUFFICIENT PUBLIC INTEREST EXISTS TO JUSTIFY THIS STATUTE AND THERE IS NO VIOLATION OF THE DUE PROCESS CLAUSE.

If headgear legislation bears no relationship to the general welfare but has the sole effect of requiring an individual to protect himself from himself, it will establish a restriction upon personal liberty such as to constitute a denial of due process.

But such legislation is based upon sufficient public interest to constitute a valid exercise of the State police power.

The unprotected motorist presents a potential traffic hazard to the public at large. Unlike the operator of an enclosed motor vehicle a cyclist without a helmet is unprotected against falling objects such as tree branches. He is also unprotected against flying stones or gravel from the wheels of other moving vehicles. If struck in the head an unprotected cyclist could be so affected as to lose control of the vehicle and be the cause of death or injury to himself and other users of the highway. Everhardt v. City of New Orleans, supra; State ex rel. Colvin v. Lombardi, 241 A. 2d 625 (S. Ct. R. I. 1968).

Further, once a cyclist, passenger, or other person is injured because of the action of an unprotected cyclist, there is a tangible effect upon the public. There is an effect upon insurance rates, public hospital services, income tax revenues because of lost manhours of employment, public services to the disabled, and national defense since many motorcyclists are young men.

Severe injuries may result in an individual becoming a public charge; his death may call into force the State's welfare responsibility for his widow and children. State v Lombardi, supra; People v. Newhouse, 287 N.Y.S. 2d 713 (1968).

The interdependence of the acts of an individual and the interest of the State has long been recognized. "The whole is no greater than the sum of all the parts, and when the individual health, safety, and welfare are sacrificed or neglected, the State must suffer." New York Central R. Co. v. White, 243 U.S. 188 at 206-07 (1916). Accordingly States have legislated in many situations where there is a demonstrable risk to an individual which can be substantially reduced by requiring himto take certain protective measures. State laws prohibiting self-maiming and attempted self-destruction are well known. Additionally many States require safety devices to be worn by window cleaners, eye protection for welders, hard hats for those involved in demolition work, life preservers to be worn while water skiing, and nets protecting aerial performers from the effects of accidental falls. Headgear legislation belongs to this class of legislation.

B. HEADGEAR LEGISLATION DOES NOT VIOLATE THE EQUAL PROTECTION CLAUSE SINCE THE DISTINCTION BETWEEN MOTORCYCLES AND OTHER VEHICLES IS BASED UPON SUBSTANTIAL DIFFERENCES AND THEREFORE REASONABLE IN LIGHT OF ITS PURPOSE.

Headgear legislation restricts the liberty of only one class of users of the public highway: motorcyclists and their passengers. There is no similar restriction upon the liberty of operators and passengers of other motor vehicles.

But headgear legislation does not violate the equal protection clause because the distinction between motorcycles and other vehicles such as bicycles and automobiles is based upon substantial differences and is reasonable in light of its purpose:

> "The power-driver cycle is a unique machine. It is capable of moderate to high speeds by motor vehicle standards, with the hazards inherent in speeds at which the vehicle is driven. A bicycle is limited in its speed by the nature of the power which propels it. An automobile differs from a motorcycle in

providing a shell surrounding the motorists. Both bicycles and automobiles can be dangerous to the riders, but the hazards of speed on the one hand and lack of an enclosure on the other hand do distinguish the motorcycle from both the bicycle and the automobile and make the hazard of operation distinguishable from both the bicycle and the automobile. Just because both the bicyclist and the motorist are subjected to hazards of head and face injuries does not mean that in order to make Sec. 347.485 valid it must apply to bicyclists and motorists. The degrees of hazards differ and therein lies the distinction. A classification is not unreasonable because it does not affect everyone who has any exposure to an evil." Bisenius v. Karns, Case No. 124423(Cty. Ct. Wisc. 1968).

C. HEADGEAR LEGISLATION DOES NOT VIOLATE THE DUE PROCESS CLAUSE SINCE IT IS CLEAR AND DEFINITE ENOUGH TO GIVE UNEQUIVOCAL WARNING OF THE RULE TO BE OBEYED.

Even though headgear legislation may require the wearing of a helmet of a type approved by a designated State official, such a statute is sufficiently definite, clear, and positive to give unequivocal warning to citizens of the rule which is to be obeyed.

A statute does not have to specify precise helmet performance requirements in order to be clear and definite, since the use and nature of protective helmets in industry, athletics, and the military service is known generally to the public. People v. Schmidt, 54 Misc. 2d 702, 283 NYS 2d 290 (1967). It is sufficient that the regulations, or proposed regulations of the designated State official "indicates that the requirements will be definite and certain with standards based upon tests to be made of the various headgear." Bisenius v. Karns, Case No. 124423 (Cty. Ct. Wisc. 1968).

D. HEADGEAR LEGISLATION DOES NOT VIOLATE THE DUE PROCESS CLAUSE SINCE IT LAWFULLY DELEGATES POLICE POWER TO AN ADMINISTRATIVE OFFICIAL.

The established rule is that the legislature may delegate to a subordinate body the discretionary power to execute and administer a law, provided a reasonably clear standard is formulated to govern the exercise of discretion by the subordinate body. The test is the completeness of the statute so that no part of the legislative function is left to the judgment of a delegate. People v. Carmichael, 288 NYS 2d 931 (1968) rev. 279 NYS 2d 272 (1967). Even though a standard by its nature is a general one it is valid if it is capable of reasonable application under the circumstances. Headgear legislation constitutes a lawful delegation of the police power since it describes the job to be done, who must do it, and the scope of his authority. Bowles v. Willingham, 321 U.S. 502, 575 (1944).

Numerous examples of legislative delegation of powers pertaining to vehicle and traffic standards can be found in State laws. In New York, for example, the Commissioner of Motor Vehicles may make rules and regulations prescribing standards of brake efficiency, brake linings, hydraulic brake fluid, commercial vehicle lighting, emergency equipment, school bus equipment, splash guards, safety belts and shoulder harnesses, and traffic hazard warning devices. 3/

3/ Subject to sec. 103(d) of P.L. 89-563 (The National Traffic and Motor Vehicle Safety Act of 1966).

APPENDIX
I

MOTORCYCLE PROTECTIVE HEADGEAR STATUTES

A typical statute requiring use of protective headgear by motorcycle operators and/or passengers might read:

> No person shall ride upon or operate a motorcycle on the streets or highways of this State (city) without wearing upon his head a protective head device (crash helmet, safety headgear, protective helmet) of a type approved by the Director of Public Safety (Commissioner, City Council Department of Health).[1]

The following 40 States have enacted statutes of this type:

Alabama	Kentucky	North Dakota
Arizona	Louisiana	Ohio
Arkansas	Maine	Oklahoma
Colorado	Maryland	Oregon
Connecticut	Massachusetts	Pennsylvania
Delaware	Minnesota	Rhode Island
Florida	Missouri	South Carolina
Georgia	Nebraska	South Dakota

---

[1] The legislature of Michigan, in response to a decision of the Court of Appeals on April 30, 1968, holding its protective headgear statute unconstitutional, enacted a new statute on June 12, 1968, which reads:

> A motorcycle or a motor driven cycle shall be equipped with, and carry when it is being operated, a number of crash helmets equal to the number of drivers and passengers carried during operation. Helmets shall be approved by the department of State police. The department shall promulgate rules for the implementation of this section in accordance with the provisions of [here follows appropriate citation]

Hawaii	New Hampshire	Tennessee
Idaho	New Jersey	Texas Utah
Illinois	New Mexico (under 18)	Vermont
Indiana	New York	Washington
Kansa	North Carolina	Wisconsin

The factual situations in the cases are virtually identical: the operator of a motorcycle was apprehended while operating a motorcycle upon the public streets without wearing on his head a protective head device as required by law.

APPENDIX

II

Courts and Cases

The following is a listing and citation of motorcycle protective headgear legislation opinions known as of January 1, 1970

I. United States Supreme Court

1. Krafft v. New York, 90 S. Ct. 198 (1969), certiorari denied.

2. Bisenius v. Karns, 89 S. Ct. 2033 (1969), appeal dismissed "for want of a substantial federal question."

3. Everhardt v. City of New Orleans, 89 S. Ct. 1775 (1969), certiorari denied.

4. Massachusetts v. Howie, 89 S. Ct. 485 (1968), certiorari denied.

II. State

A. Supreme or Highest Courts

1. State v. Solomon, _____ A. 2d _____ (S. Ct. Vt. 1969) upholding 23 V.S.A. § 1256.

2. State v. Darrah, _____ S.W. 2d _____ (S. Ct. Mo. 1969) upholding § 301.010 R.S. Mo. and reversing 1968 decision of Sedalia Mun. Ct.

3. State v. Eitel, 227 So. 2d 489 (S. Ct. Fla. 1969), reversing Small Claims - Magistrate Cts., Palm Beach Cases Nos. 68M-7013/14, 68M-7234 (1968) and upholding F. S. 317.981.

4. State v. Laitinen, 459 P. 2d 789 (S. Ct. Wash. 1969) holding constitutional RCW 46.37.530(3).

5. State v. Fetterly 456 P. 2d 996 (S. Ct. Oreg. 1969), holding constitutional ORS 483.443(1).

6. People v. Fries, 250 NE. 2d 149 (S. Ct. Ill., 1969) Docket No. 41624, holding unconstitutional Ill. Rev. Stat. 1967, ch. 971/2 Par. 189c(a).

7. State v. Anderson, 166 S.E. 2d 49 (S. Ct. N.C. 1969), affirming 164 S.E. 2d 48 (1968) reversing decision of Superior Ct., Guilford Cty., and upholding G.S. 20-140.2(b).

8. Bisenius v. Karns 165 N.W. 2d 377 (S. Ct. Wisc., 1969) upholding § 347.485 (1) and (2), Stats., 1967. Appeal dismissed, 89 S. Ct. 2033 (1969).

9. State v. Odegaard 165 N.W. 2d 677 (S. Ct., N.D., 1969), upholding N.D. C.C. § 39-21-48.

10. Everhardt v. City of New Orleans 217 So. 2d 400 (S. Ct. La. 1968), reversing 208 So. 2d 423 (La. App. 1968), upholds city ordinance which is similar to state statute, R.S. 32:190. Cert. denied 89 S. Ct. 1775 (1969).

11. Massachusetts v. Howie, 238 N.E. 2d 373 (S. Jud. Ct. Mass., 1968), Memorandum decision upholding Massachusetts statute. Cert. denied 39 S. Ct. 485 (1968).

12. State ex rel Colvin v. Lombardi 241 A. 2d 625 (S. Ct. R. I., 1968), upholding G. L. 1956, § 31-10.

B. Appellate Courts

1. Commonwealth v. Arnold, (Pa. Super. Ct. 1969) upholding P. L. 58, section 629.1 as amended, and reversing Clearfield Cty. Ct. (1969) decision.

2. State v. Betts (Warren Cty. Ct., Ohio, 1969) holding unconstitutional § 4511.53 Revised Code.

3. People v. Krafft (Onondaga Cty. Ct. 1969) upholding subdivision 6, section 381 of Vehicle and Traffic Law; cert. denied, 90 S. Ct. 198 (1969).

4. People v. Thoreson, (Maricopa Cty. Ct. 1969), holding Arizona law unconstitutional.

5. State v. _____ (Seneca Cty. Ct., Ohio, 1969) upholding § 4511.53 Revised Code (See Cycle News East, Nov. 4, 1967, p. 30).

6. People v. Albertson, Dist. Ct. (1969) holding Idaho statute unconstitutional, reversing Cty. Ct.

7. State v. Krammes, 252 A.2d 223 (1969) upholding N.J. S.A. 39: 3-76.7.

**** 8. Ex Parte Smith, 441 S.W. 2d 544 (1969) upholding Art. 6701c-3 V.A.C.S., Texas.

9. State v. Myers, (Balto. Cty. Ct. 1969), affirming 1968 decision of Magistrate Ct. upholding Md. headgear and goggle legislation.

10. State v. Burayeki, 37 Law Week 2448, Conn. Cir. Ct. App. Div. (1969) File No. MV 10-63528 AP upholding Conn. Gen Stat. § 14 [illegible](c), petition for appeal to S. Ct. Conn. denied, 252 A2d 812 (1969).

**** This case should be listed under Section A. Supreme or Highest Courts. The Texas Appellate Court serves as the Supreme Court in criminal matters.

11. State v. Male, 247 A. 2d 176 (1968) upholding N.J.S.A. 39: 3-76.7.

12. American Motorcycle Association and Farnum v. Davids and State Police, 158 N.W. 2d 72 (Mich. Ct. of Appeals, 1968), reversing 1967 decision of Circuit Ct., Ingham Cty., and holding unconstitutional PA 1949, No. 300, § 6581(d) as added by PA 1966, No. 207 (CL 1948 § 257, 658[d].

13. People v. Carmichael, 288 N.Y.S. 2d 931 (1968) reversing 279 N.Y.S. 2d 272 (1967) and upholding subdivision 6, section 381, of Vehicle and Traffic Law.

14. State v. Zektzer, Sup. Ct. King Cty. No. 47101 (Wash. 1967) upholding Ch. 232, Sec. 4 Sub 3, Laws of 1967, and reversing City of Seattle v. Zektzer, Seattle Mun. Ct. (1967).

15. People v. Schmidt, 283 N.Y.S. 2d 290 (Cty. Ct., Erie Cty. 1967) upholding subdivision 6, section 381 of Vehicle and Traffic Law. Appeal dismissed 295 N.Y.S. 2d 936 (1968).

C. Trial Courts

1. Sheneman v. Commonwealth (Dauphin Cty. Ct. Pa. 1969) upholding P. L. 58, section 625.1 as amended.

2. Commonwealth v. Molter, (Delaware Cty. Ct. Pa. 1969) No. S.A. #7, upholding P. L. 58, Section 625.1 as amended.

3. Colo. Motorcycle Ass'n v. Love, Hogan, (Denver Cty. Ct. 1969) holding Colo. law unconstitutional.

4. Commonwealth v. Coffman (Jefferson Cty. Ct., Ky. 1969) holding unconstitutional KRS 189.285.

5. City of Wichita v. White, Cases No. MC 150-151, (D. Ct. Sedgwick Cty. 1969) upholding city ordinance; on appeal Kansas Supr. Ct. (Case No. 45676).

6. S.D. Motorcycle Dealers Ass'n and Haight v. Parker, (S. D. Cir. Ct. 1968) upholding Section 4 of Chapter 215 of the 1967 Session Laws.

7. State v. Babbs, (Martin Cty. Ct., Fla. 1968) holding unconstitutional F.S. 317.981.

8. State v. Edwards, Case No. 582370 (Mun. Ct. Hennepin Cty., 1968) upholding Minn. Stat. 169.974, subd. (4)a.

9. People v. Newhouse, 287 N.Y.S. 2d 713 (City Ct. of Ithaca, N.Y. 1968) upholding subdivision 6, section 381 of Vehicle and Traffic Law.

10. People v. Daugherty, (West Plains Mun. Ct. 1968) holding Missouri Law unconstitutional.

11. People v. Wattle, (Buffalo City Ct. 1967) holding unconstitutional subdivision 6, section 381 of Vehicle and Traffic Law.

12. City of Hutchinson v. Silvey, Case No. CR 8081 (D. Ct. Reno City., Kansas 1967) upholding city ordinance.

13. People v. Bielmeyer 282 N.Y.S. 2d 797 (Buffalo City Ct. 1967) upholding subdivision 6, section 381 of Vehicle and Traffic Law.

14. State v. Duncan, No. 44835 (Wayne Cty. 1967) holding Michigan statute unconstitutional.

15. People v. Smallwood, 277 NYS. 2d 429 (Ct. Spec. Sess., Irondequoit, Monroe Cty. 1967), holding unconstitutional subdivision 6, section 381 of Vehicle and Traffic Law.

III. Opinions of States Attorneys - General

1. Opinion of Attorney - General of New Mexico, No. 69-14 Feb. 25, 1969. In response to an Attorney for the New Mexico legislative Counsel, the opinion notes cases contra position taken in No. 66-15 but states "we are unwilling to completely abandon our past position."

2. Opinion of Attorney - General of Oklahoma No. 68-267, December 31, 1968, that 470. S. Supp. 1967, § 40-105(b), is unconstitutional.

3. Opinion of Attorney - General of New Mexico, No. 66-15, Feb. 1, 1966. Proposed city ordinance unconstitutional as to citizens over 18.

IV. Law Review Notes and Articles

1. Constitutional Law - Validity of Safety Helmet Requirements, 71 W.Va. L. Rev. 191 (1969).

2. Constitutional Law - Police Power - Motorcycle Crash Helmet Laws' Relation to Public Welfare, 1969 Wisc. L. Rev. 320 (1969).

3. Constitutionality of Mandatory Motorcycle Helmet Legislation, 73 Dick. L. Rev. 100 (1968).

4. Constitutional Law - Due Process - Statute Requiring Motorcyclist to Wear Crash Helmet is Unconstitutional, (American Motorcycle Ass'n. v. Davids), 82 Harv. L. Rev. 469 (1968).

Mr. Buchanan

STAFF MEMORANDUM

ON THE

CONSTITUTIONAL QUESTION PRESENTED BY

STATE MOTORCYCLE HEADGEAR REQUIREMENTS

NOVEMBER 1970

U.S. DEPARTMENT OF TRANSPORTATION
NATIONAL HIGHWAY SAFETY BUREAU

QUESTION PRESENTED

Whether a State requirement that any person riding upon or operating a motorcycle on the streets or highways of the State shall wear upon his head a protective head device of a type approved by the State is unconstitutional under the Fourteenth Amendment.

BACKGROUND

Twenty-three U.S.C. § 402(a) (P.L. 89-564, the Highway Safety Act of 1966) requires each State to have a highway safety program approved by the Secretary of Transportation and in accordance with uniform standards promulgated by him.

Highway Safety Program Standard 4.4.3 released by the Secretary on June 26, 1967, and entitled Motorcycle Safety, (23 C.F.R. Part 204) requires each State to have a motorcycle safety program providing as a minimum, inter alia, that when a motorcycle is being operated on streets and highways, each motorcycle operator and passenger shall wear an approved safety helmet. Latest available information indicates that as of November 1, 1970, 42 States and the District of Columbia had enacted motorcycle protective headgear statutes ("headgear legislation" hereafter) of this type providing criminal penalties upon violation. Additionally an unknown number of cities may have enacted similar municipal ordinances.

As of November 1, 1970, there have been decisions in response to 48 known separate court challenges of State and municipal headgear legislation. In 38 instances legislation has been upheld, and in 10 it has been declared unconstitutional. 1/ Headgear legislation has been upheld 20 times by Supreme or highest Courts 2/ in 19 States (Arkansas, Minnesota, Idaho, Kentucky, Oklahoma, Hawaii, Colorado, Vermont, Missouri (twice), Florida, Texas, Washington, Oregon, North Carolina, Rhode Island, Massachusetts, Louisiana, North Dakota, and Wisconsin), 12 appellate courts (three in New York, two in New Jersey, and one each in Utah, Pennsylvania, Texas, Maryland, Ohio, Washington, and Connecticut), and 7 trial courts (two each in Pennsylvania, Kansas and New York, and one in South Dakota). Headgear legislation has been declared unconstitutional by 1 State Supreme Court (Illinois), 2 appellate courts (Arizona and Michigan), and 7 trial courts (two each in New York and Ohio, and one each in Florida, Missouri, and Michigan).

1/ This figure is computed on the basis of the last known decision in each case. Such decision, of course, may represent an appellate reversal, or be subject to reversal on appeal.

2/ In addition, the Supreme Court of Ohio has refused to consider an appeal from a decision upholding constitutionally of State legislation.

APPENDIX

I

MOTORCYCLE PROTECTIVE HEADGEAR STATUTES

A typical statute requiring use of protective headgear by motorcycle operators and/or passengers might read:

> No person shall ride upon or operate a motorcycle on the streets or highways of this State (city) without wearing upon his head a protective head device (crash helmet, safety headgear, protective helmet) of a type approved by the Director of Public Safety (Commissioner, City Council Department of Health). 1/

The following 42 States and the District of Columbia have enacted statutes of this type:

Alabama	Louisiana	Ohio
Alaska	Maine	Oklahoma
Arkansas	Maryland	Oregon
Colorado	Massachusetts	Pennsylvania
Connecticut	Minnesota	Rhode Island
Delaware	Missouri	South Carolina
Florida	Nebraska	South Dakota
Georgia	North Dakota	
Kentucky		

1/ The legislature of Michigan, in response to a decision of the Court of Appeals on April 30, 1968, holding its protective headgear statute unconstitutional, enacted a new statute of June 12, 1968, which reads:

> A motorcycle and a motor driven cycle shall be equipped with, and carry when it is being operated, a number of crash helmets equal to the number of drivers and passengers carried during operation. Helmets shall be approved by the department of State police. The department shall promulgate rules for the implementation of this section in accordance with the provisions of [here follows a lengthy citation]

Hawaii	New Hampshire	Tennessee
Idaho	New Jersey	Texas
Illinois	New Mexico (under 18)	Utah 2/
Indiana	New York	Vermont
Kansas	North Carolina	Virginia
		Washington
		Wisconsin

The factual situations in the cases are virtually identical: the operator of a motorcycle was apprehended while operating a motorcycle upon the public streets without wearing on his head a protective head device as required by law.

2/ The Utah statute, however, does not require cycle riders to wear protective headgear while traveling on streets zoned below 35 miles per hour.

APPENDIX

II

Courts and Cases

The following is a listing and citation of motorcycle protective headgear legislation opinions known as of November 1, 1970.

I. United States Supreme Court

1. Krafft v. New York, 90 S. Ct. 198 (1969), certiorari denied.

2. Bisenius v. Karns, 89 S. Ct. 2033 (1969), appeal dismissed "for want of a substantial federal question."

3. Everhardt v. City of New Orleans, 89 S. Ct. 1775 (1969), certiorari denied.

4. Massachusetts v. Howie, 89 S. Ct. 485 (1968), certiorari denied.

II. State

A. Supreme or Highest Courts

1. Penney v. City of North Little Rock, 455 S.W. 2d 132 (S. Ct. Ark. 1970), upholding Ark. Stat. Ann. § 75-1703 [Supp. 1969].

2. State v. Edwards, 177 N.W. 2d 40 (S. Ct. Minn. 1970), upholding Minn. Stat. 169-974, subd. (4)a.

3. State v. Cushman, 451 S.W. 2d 17 (S. Ct. Mo. 1970), upholding § 301-010 R.S. Mo.

4. State v. Albertson, 470 P. 2d 300 (S. Ct. Idaho 1970), upholding I.C. § 49-761A and reversing Dist. Ct. which had reversed Cty. Ct.

5. Commonwealth v. Coffman, 453 S.W. 2d 759 (Ky. Ct. of Appeals, 1[illegible]), upholding KRS 189.285 and reversing Jefferson Cty. Ct.

6. Elliott v. Oklahoma City, 471 P. 2d 944 (Ct. of Crim. Appeals 1970), upholding Okla. City Ord. 12,071.

7. State v. Lee, 465 P. 2d 573 (S. Ct. Hawaii 1970), upholding HRS § 286-81(1)(A).

8. People v. Ball, ____ P. 2d ____ (S. Ct. Colo. 1970), upholding CRS 1963, 13-5-159 and reversing Colorado Motorcycle Ass'n. v. Love, Horan (Denver Cty. Ct. 1969).

9. State v. Solomon, 260 A. 2d 377 (S. Ct. Vt. 1969), upholding 23 V.S.A. § 1256.

10. State v. Darrah, 446 S.W. 2d 745 (S. Ct. Mo. 1969), upholding § 301.010 R.S. Mo. and reversing 1968 decision of Sedalia Mun. Ct.

11. State v. Hitel, 227 So. 2d 489 (S. Ct. Fla. 1969), reversing Small Claims - Magistrate Cts., Palm Beach Cases Nos. 68M-7013/14, 68M-7234 (1968) and upholding F. S. 317.981.

12. State v. Laitinen, 459 P. 2d 789 (S. Ct. Wash. 1969), holding constitutional RCW 46.37.530(3).

13. State v. Fetterly, 456 P. 2d 996 (S. Ct. Oreg. 1969), holding constitutional O.R.S. 483.443(1).

14. People v. Fries, 250 N.E. 2d 149 (S. Ct. Ill., 1969), holding unconstitutional Ill. Rev. Stat. 1967, ch. 971/2 Par. 189c(a).

15. State v. Anderson, 166 S.E. 2d 49 (S. Ct. N.C. 1969), affirming 164 S.E. 2d 48 (1968) reversing decision of Superior Ct., Guilford Cty., and upholding G.S. 20-140.2(b).

16. Disenius v. Kerns, 165 N.W. 2d 377 (S. Ct. Misc., 1969), upholding § 347.485 (1) and (2), Stats., 1967. Appeal dismissed, 89 S. Ct. 2033 (1969).

17. State v. Odegaard, 165 N.W. 2d 677 (S. Ct., N.D., 1969), upholding N.D.C.C. § 39-21-48.

18. Ex. Parte Smith, 411 S.W. 2d 544 (1969), upholding Art. 6701c-3 V.A.C.S., Texas.

19. Everhardt v. City of New Orleans, 217 So. 2d 400 (S. Ct. La. 1968), reversing 208 So. 2d 403 (La. App. 1968), upholding city ordinance which is similar to state statute, R.S. 32:190. Cert. denied 89 S. Ct. 1775 (1969).

20. Massachusetts v. Howie, 238 N.E. 2d 373 (S. Jud. Ct. Mass., 1968), Memmorandum decision upholding Massachusetts statute. Cert. denied 89 S. Ct. 485 (1968).

21. State ex rel Colvin v. Lombardi, 241 A. 2d 625 (S. Ct. R. I., 1968), upholding G. L. 1956, § 31-10.

B. Appellate Courts

1. State v. Acker (Utah D. Ct. 1970), upholding Utah stat.

2. Commonwealth v. Arnold, (Pa. Super. Ct. 1969), upholding P.L. 58, section 625.1 as amended, and reversing Clearfield Cty. Ct. (1969) decision.

3. People v. Krafft, (Onondage Cty. Ct. 1969), upholding subdivision 6, section 381 of Vehicle and Traffic Law; cert. denied, 90 S. Ct. 198 (1969).

4. People v. Thoreson, (Maricopa Cty. Ct. 1969), holding Arizona law unconstitutional.

5. State v. Craig, (Ct. of Appeals, Seneca Cty., Ohio, 1969), upholding § 4511.53 Revised Code. S. Ct. of Ohio dismissed motion to certify record (1969).

6. State v. Krammes, 252 A. 2d 223 (1969), upholding N.J.S.A. 39:3-76.7.

7. State v. Myers, (Balto. Cty. Ct. 1969), affirming 1968 decis. of Magistrate Ct. upholding Md. headgear and goggle legislation.

8. State v. Burzycki, 37 Law Week 2448, Conn. Cir. Ct. App. Div. (1969) File No. MV 10-63528 AP upholding Conn. Gen. Stat. § 14 289(c), petition for appeal to S. Ct. Conn. denied, 252 A. 2d 812 (1969).

9. State v. Mele, 247 A. 2d 176 (1968), upholding N.J.S.A. 39:3-76.7.

10. American Motorcycle Association and Farnum v. Davids and State Police, 158 N.W. 2d 72 (Mich. Ct. of Appeals, 1968), reversing 1967 decision of Circuit Ct., Ingham Cty., and holding unconstitutional PA 1949, No. 300, § 6581(d) as added by PA 1966, No. 207 (CL 1948 § 257, 658[d]).

11. People v. Carmichael, 288 N.Y.S. 2d 931 (1968), reversing 279 N.Y.S. 2d 272 (1967) and upholding subdivision 6, section 381, of Vehicle and Traffic Law.

12. State v. Zektzer, Sup. Ct. King Cty. No. 47101 (Wash. 1967) upholding Ch. 232, Sec. 4 Subd. 3, Laws of 1967, and reversi City of Seattle v. Zektzer, Seattle Mun. Ct. (1967).

13. People v. Schmidt, 283 N.Y.S. 2d 290 (Cty. Ct., Erie Cty. 1967), upholding subdivision 6, section 381 of Vehicle and Traffic Law. Appeal dismissed 295 N.Y.S. 2d 936 (1968).

C. Trial Courts

1. State v. Schlegel, (Mun. Ct. City of Toledo, Ohio 1970), holding unconstitutional § 4511.53 Revised Code.

2. State v. Betts (Mun. Ct. City of Franklin, Ohio, 1969), holding unconstitutional § 4511.53 Revised Code.

3. Shenenan v. Commonwealth, (Dauphin Cty. Ct. Pa. 1969), upholding P.L. 58, section 625.1 as amended.

4. Commonwealth v. Molter, (Delaware Cty. Ct. Pa. 1969), No. S.A. #7, upholding P.L. 58, Section 625.1 as amended.

5. City of Wichita v. White, Cases Nos. MC 150-151, (D. Ct. Sedgwick Cty. 1969), upholding city ordinance; on appeal Kansas Supreme Ct. (Case No. 45676).

6. S.D. Motorcycle Dealers Ass'n and Haight v. Parker, (S.D. Cir. Ct. 1968), upholding Section 4 of Chapter 215 of the 1967 Session Laws.

7. State v. Babbs, (Martin Cty. Ct., Fla. 1968), holding unconstitutional F.S. 317.931.

8. People v. Newhouse, 287 N.Y.S. 2d 713 (City Ct. of Ithaca, N.Y. 1968), upholding subdivision 6, section 381 of Vehicle and Traffic Law.

9. People v. Daugherty, (West Plains Mun. Ct. 1968) holding Missouri Law unconstitutional.

10. People v. Wattle, (Buffalo City Ct. 1967), holding unconstitutional subdivision 6, section 381 of Vehicle and Traffic Law.

11. City of Hutchinson v. Silvey, Case No. CR 8081 (D. Ct. Reno Cty., Kansas 1967), upholding city ordinance.

12. People v. Bielmeyer 282 N.Y.S. 2d 797 (Buffalo City Ct. 1967) upholding subdivision 6, section 381 of Vehicle and Traffic Law.

13. State v. Duncan, No. 44835 (Wayne Cty. 1967) holding Michigan statute unconstitutional.

14. People v. Smallwood, 277 N.Y.S. 2d 429 (Ct. Spec. Sess., Irondequoit, Monroe Cty. 1967), holding unconstitutional subdivision 6, section 381 of Vehicle and Traffic Law.

III. Opinions of States Attorneys - General

1. Opinion of Attorney - General of New Mexico, No. 69-14 Feb. 25, 1969. In response to an Attorney for the New Mexico legislative Counsel, the opinion notes cases contra position taken in No. 66-15 but states "we are unwilling to completely abandon our past position."

2. Opinion of Attorney - General of Oklahoma No. 68-267, December 31, 1968, that 470. S. Supp. 1967, §.40-105(b), is unconstitutional.

3. Opinion of Attorney - General of New Mexico, No. 66-15, Feb. 1, 1966. Proposed city ordinance unconstitutional as to citizens over 18.

IV. Law Review Notes and Articles

1. Constitutional Law - Validity of Safety Helmet Requirements, 71 W.Va. L. Rev. 191 (1969).

2. Constitutional Law - Police Power - Motorcycle Crash Helmet Laws' Relation to Public Welfare, 1969 Wisc. L. Rev. 320 (1969).

3. Note, 37 U. Mo. K.C. L. Rev. 385 (1969).
