Introduced: 4/7/77
Referred: Community &
Regional Affairs and Finance

IN THE HOUSE BY ANDERSON

HOUSE BILL NO. 451

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the regionalization of the Department of Community and Regional Affairs; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 44.39 is amended by adding a new section to read:

Sec. 44.39.015. DEPARTMENTAL ORGANIZATION. (a) The commissioner shall establish administrative regions in the state as described in (b) of this section. The functions of the department within each administrative region shall be performed, to the maximum extent feasible, through a regional office located in the following cities: (1) Barrow; (2) Kotzebue; (3) Nome; (4) Fairbanks; (5) Bethel; (6) Naknek; (7) Sand Point; (8) Kodiak; (9) Anchorage; (10) Juneau and (11) Ketchikan. Each regional office shall be directed by a regional community and regional affairs director appointed by the commissioner.

(b) The administrative regions of the department shall be established in the following election districts:

(1) Arctic Slope Region -- that part of election districts 16 and 17 that are within the boundaries of the North Slope Borough;

(2) Kotzebue Region -- that part of election district 17 that is outside the boundaries of the North Slope Borough;

(3) Bering Straits Region -- election district 18;

(4) Bethel Region -- election districts 14 and 19, and that part of election district 15 south of 62° north latitude;

(5) Bristol Bay Region -- election district 13;

(6) Aleutians Region -- election district 12;

(7) Kodiak Region -- election district 11

(8) Fairbanks Region -- that part of election district 15 north of 62° north latitude and that part of election district 16 that is outside the boundaries of the North Slope Borough;

(9) Southcentral Region -- election districts 6 - 10;

(10) Northern Panhandle Region -- election districts 3 - 5;

(11) Southern Panhandle Region -- election districts 1 and 2.

(c) The election districts used in (b) of this section are those designated by the Proclamation of Reapportionment and Redistricting of December 7, 1961, and retained for the house of representatives by proclamation of the governor, September 3, 1965.

prob. w/ changing boundaries ?

* Sec. 2. This Act takes effect July 1, 1978.

Bristol Bay Borough

BOX 189 • NAKNEK, ALASKA 99633

April 22, 1977

Representative Lisa Rudd
Pouch V
Juneau, Alaska 99811

Dear Representative Rudd;

The Bristol Bay Borough strongly supports the follwoing House Bills.

a. H.B. 450 establishing administrative regional offices for the Department of Health and Social Services.

b. H.B. 451 establishing administrative regional offices for the Department of Community, and Regional Affairs.

c. H. B. 452 establishing administrative regional offices for the Department of Fish & Game.

Locating regional offices in Naknek will provide a central location for these state activities and result in faster and more adequate services to residents of Bristol Bay, Alaska Peninsula and the Iliamna Lake Clark Areas.

Your support of these three Bills will be greatly appreciated.

Sincerely,

Stuart H. Bowdoin
Borough Manager

HB 483
Revisions To Title 29

February 17, 1977

The Honorable Hugh Malone, Speaker
House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Hugh:

Attached to this letter is a proposed sponsor or committee substitute to HB 110 of draft legislation which would correct or otherwise clarify certain portions of Title 29 from a basically technical viewpoint. In preparing this draft legislation it was our intent not to, in any way, deal with issues involving policy or subjects that might be controversial in nature. I believe that as you read the draft legislation, most proposed changes will be self-explanatory; therefore, I will not attempt to go into detailed explanation as to the background for each of the changes.

By way of general background, Commissioner McAnerney had earlier requested that the Division assume responsibility for reviewing all of Title 29 and to make an attempt to correct those obvious errors or omissions which were apparent in the 1972 legislation or which have been caused by subsequent amendments to the original 1972 version of Title 29. In July, the Department sent a letter to all municipalities requesting their input or suggested amendments to Title 29. Additionally, four attorneys were invited to a meeting which included Billy Barrier and Greg Machyowski (of Legislative Affairs Agency), Jim Nordale (attorney for the Fairbanks North Star Borough), and Karl Walter (formerly city attorney for the City of Anchorage and now a private practitioner). The language of the attached draft legislation (with the exception of sections 1, 7, & 15) is the result of that all-day meeting between the Division of Local Government Assistance and the four attorneys who primarily drafted the 1972 version of Title 29.

Section 1 of the proposed draft may not be technically considered "clean-up" legislation but provides what we in this Division feel would permit a "streamlined" mechanism to allow earlier home-rule charter adoption of a municipality upon incorporation.

On November 15, 1976, the Division received a letter from Wes Howe, borough manager of the Matanuska-Susitna Borough, calling to our attention some technical

deficiencies in AS 29.23.310. Therefore, section 7 of the attached draft is the language proposed by the borough attorney from the Matanuska-Susitna Borough to correct that one problem area. Section 9 of the proposed draft achieves the same purpose as your HB 110.

Section 15 of the proposed draft re-enacts identical language passed by the legislature last year. However, the AG's office has ruled that this enactment would be held invalid since it was contained in a bill which amended Title 43 (thus violating the two subject rule). Ketchikan Gateway Borough administration reminded us of the need to have this provision re-enacted into Title 29. The AG's office has advised that re-enactment of the language is appropriate.

Representative Lisa Rudd has indicated a willingness to consider our proposal as a sponsor or committee substitute but requested that I meet with you for your concurrence.

I hope that you will be able to propose this additional language as a sponsor substitute or that, in the alternative, you will have no objection to allowing this proposal to be considered as a committee substitute for HB 110.

I look forward to discussing this with you at 3:30 tomorrow afternoon.

Sincerely,

Lee McAnerney
Commissioner

Dear Judy,

Thank you for your telegram concerning the municipal clerks' proposed amendments to HB 483. I do appreciate the input from the clerks' association.

I have enclosed a copy of the proposed committee substitute for HB 483 which incorporates some of the amendments proposed by the clerks. A committee review of this substitute has not yet been scheduled but it will probably be heard again in two weeks.

Thank you again for your telegram and please let me know if I can be of help to you.

Yours sincerely,

Lisa Rudd, Chair

Re: HB 483, Revision to the Municipal Code

Dear Ms. Rudd:

On behalf of the Alaska Association of Municipal Clerks, I wish to submit the following comments regarding HB 483:

AS 29.13.100 (34) references those sections of Title 29 and Title 14 which apply to home rule municipalities. In reading 14.12.100, we find that 14.12.10 through 14.12.100 applies to home rule. We are unable to find this application within Title 29. We would request that HB 483 include an amendment to 29.13.100 for reference of home rule application of 14.12.10 through 14.12.100.

AS 29.28.030 provides for voter qualifications. We request that this section be amended to provide for a voter being registered within the municipality in which they wish to vote. This would alleviate problems currently encountered.

AS 29.48.180 (a) provides that each ordinance and resolution shall be cofied. 29.48.180 (c) defines codified and does not refer to resolutions. We do not feel a resolution holds the same status as an ordinance and therefore should not be included in the codified laws of a municipality.

AS 29.48.220 provides that audits will be made available to the public on request. Although we do not feel the intent of the section is to provide copies of the audit at no cost, we would request that the section be amended to provide copies of the audit to the public at cost. In support of this request, a copy of a letter received from the Alaska Court System is enclosed.

CITY OF WRANGELL, ALASKA

AS 29.53.230 (a) provides for annual foreclosure unless otherwise provided by ordinance. 29.53.240 (a) (1) provides that (city) shall annually present a petition for judgement and a certified copy of the foreclosure list for the previous year delinquency. We feel the separate sections conflict as they do not each state unless otherwise provided by ordinance.

HB 483 would amend AS 29.48.180 (a) to include "any punishment authorized for violation of an ordinance may be imposed only if the ordinance is codified and copies of the ordinance are made available for distribution to the public". We would request that the proposed amendment designate "distribution to the public at cost". In support of this request, a copy of a letter received from the Alaska Court System is enclosed.

This information was reviewed at the annual meeting of the Alaska Association of Municipal Clerks and referred to the Department of Community and Regional Affairs in response to their request for comments.

Respectfully submitted,

Joyce Rasier, CMC
Wrangell City Clerk

Re: House Bill 208

Dear Mr. Dotts:

This letter is in regard to the revision of Chapter 118, SLA 1972. Actual effective date: September 10, 1972.

I make reference to Sec. 29.53.100.ASSESSMENT ROLL.(b) Real property is assessed to the owner of record as shown in the records of the district recorder, who shall at least monthly provide the assessor a copy of each recorded change of ownership and the address of the party recording the change of ownership.

What the bill failed to mention is the fee to be charged for this service.

It is by the decision of the Administrative Director of Courts, that a fee of 25 cents per page will be charged. This fee is necessary to cover the cost for service and copies.

If you desire this service be provided your assessment office, please respond promptly by written request to Mrs. Mary A. Gray, State Recording Supervisor, 944 W 5th. Ave., Anchorage, Alaska 99501.

On receipt of your request we will establish a billing system on a once monthly basis.

It will be necessary for the Assessors Office to supply the recording office with a map showing the area that is incorporated with in their city or borough boundaries. This map is essential if the District Recorder is to provide you with this service.

Yours truly,

Mary A. Gray

RE: Proposed Amendments to House Bill No. 483

Dear Representative Rudd:

Attached is a copy of suggested amendments to House Bill No. 483 submitted by the Alaska Municipal Clerks Association. We heartily concur with the third proposed amendment, requiring registration within a municipality to be a qualified voter in a municipal election.

Existing statutory language is vague. Currently some municipalities demand registration within the municipality prior to voting in the municipal election and other municipalities do not require such registration. Confusion surrounds this issue, and legislative action would seem desirable. A draft of a proposed amendment is attached should the Committee wish to entertain this specific amendment. As to the other amendments, we hold no strong opinion, but offer them for your Committee review.

Sincerely,

Lee McAnerney, Commissioner

AS 29.28.030 is amended to read:

Sec. 29.28.030. Voter qualification. A person may vote in a municipal election only if he is a United States citizen who is qualified to vote in state elections and has been a resident and registered voter of the municipality for 30 days immediately preceding the election and who is registered to vote in state elections and is not disqualified under art. V of the state constitution. Voter registration by the municipality may not be required. This section applies to home rule and general law municipalities.

CITY OF WRANGELL, ALASKA

September 21, 1977

29.33.050 references education in Title 29 under the 1976 supplement. (prior to this, the reference to home rule was the provision that 29.33.050 applied to home rule if located outside an organized borough, through 29.43.030) - 29.33.050 specifically refers to 14.14.060 and 14.14.110 and the supplement includes reference to 14.12.020 (a). 14.12.100 states: Sec. 10-100 of this chapter (12) applies to home rule and general law. This should be included in Title 29.

29.23.250 provides that a mayor of a home rule city need be but 18 years of age. Home rule should be allowed to set additional age requirements by charter.

29.28.030 provides for voter qualifications. As discussed at the AML last year, the section should be amended to provide for registered within the municipality in which they wish to vote.

29.48.180 (a) provides that each ordinance and resolution shall be codified. (c) defines codified and does not refer to resolutions. Resolutions are not generally of a general and permanent nature and should not be included in the codified laws of a municipality.

14.12.080 provides to be eligible to be a member of a school board, a person must have the same qualifications as are necessary to be a municipal voter in the school district. This section was adopted during the time a voter must be 21 years of age and reside within the State for one year (1966). In 1972 voter qualifications were amended to 18 years of age and residency of 30 days, thus allowing a member of a school board to be 18 years of age and reside within the school district only 30 days. Municipalities should be allowed to set age and residency requirements on elected officials with voter approval. This was discussed at the last AML conference.

29.48.220 provides that audits will be made available to the public on request. Does this mean available to the public without cost or just for review.

29.53.230 (a) provides for annual foreclosure unless otherwise provided by ordinance. 29.53.240 (a) (1) provides that (city) shall annually present a petition for judgement and a certified copy of the foreclosure list for the previous year delinquency and does not contain unless otherwise provided by ordinance. The two separate sections conflict.

HB No. 483 would amend AS 29.48.180 (a) to include "any punishment authorized for violation of an ordinance may be imposed only if the ordinance is codified and copies of the ordinance are made available for distribution to the public". This proposed amendment should designate "distribution to the public at cost". (an example of possible problems is 29.53.100 (b) that provides that the State District Recorder shall at least monthly provide the assessor a copy of each recorded change of ownership...The Court System in Anchorage advised they had neglected to provide for a fee and asked that an agreeable fee be established.)

From: Evelyn Thompson, Borough Clerk Date 2-23-78

MESSAGE

The Municipal Clerks have always objected to codification of resolutions. Normally resolutions are not permanent and we see no need for codification. In our office, we keep an index of resolutions so that they can be found when needed. I would appreciate it if you could have the word "resolution" deleted from Sec. 29.48.180(a).

The Clerks normally have not had resolutions codified and feel that the word was inadvertantly included in the Statute when it was originally written.

Thank you for considering the above.

PLEASE REPLY IN AREA BELOW. *Thank You!* Signed: *Evelyn Thompson*

1-23-78

Explanation of House Bill No. 483

Section 1

Provides impetus to a new first class borough to develop into a home rule borough as swiftly as possible. If voters approve the question of incorporation and election of a charter commission, the charter commission members would be elected at a special election.

Section 2

Currently, city council members, mayors of cities, and mayors of boroughs begin their office on the first Monday following the election. No such date exists for assembly members; therefore this language clarifies the date assembly members assume office.

Section 3

Eliminates repetitive language contained under AS 29.28.020(a).

Section 4

See commentary under Section 3.

Section 5

Permits cities to call emergency meetings, as boroughs are permitted under AS 29.23.060.

Section 6

See commentary under Section 3.

Section 7

AS 29.23.310 currently permits the creation of zones for the election of borough school board members; however, Section 310 refers to AS 29.23.100 as the means to implement the creation of these zones. AS 29.23.100 was repealed by ch 118 SLA 1972, a law combining the old Title 7 with Title 29. The new language would describe the method for creating these zones.

Section 8

Simplifies language describing the relationship between boroughs and cities when boroughs have and exercise areawide powers.

Section 9

Permits cities to transfer the board of adjustment responsibility to the borough without borough assembly approval.

Section 10

Transfers certain powers from the platting board to the borough.

Section 11

Clarifies the need to codify ordinances prior to imposition of any punishment.

Section 12

Extends coverage of need for codification of ordinances to boroughs.

Section 13

Ch 56 SLA 1976 allows municipalities to create public corporations capable of issuing bonds to provide municipal services. however, the Attorney General feels that ch 56 SLA 1976 violates Article II Section 13 of the State's Constitution regarding the prohibition against more than one subject in a bill. Therefore, Section 13 of this bill would properly enact the provisions contained in the prior bill.

SCS CSHB 674amS
1976

AS 29.28.030 is amended to read:

Sec. 29.28.030. Voter qualification. A person may vote in a municipal election only if he is a United States citizen who is qualified to vote in state elections and has been a resident and registered voter of the municipality for 30 days immediately preceding the election and who is registered to vote in state elections and is not disqualified under art. V of the state constitution. Voter registration by the municipality may not be required. This section applies to home rule and general law municipalities.

JAY S. HAMMOND, GOVERNOR

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

DIVISION OF LOCAL GOVERNMENT ASSISTANCE / POUCH B – JUNEAU 99811

January 23, 1978

The Honorable Representative Lisa Rudd, Chairman
House Community and Regional Affairs Committee
Pouch "V"
Juneau, Alaska 99811

RE: Proposed Amendments to House Bill No. 483

Dear Representative Rudd:

Attached is a copy of suggested amendments to House Bill No. 483 submitted by the Alaska Municipal Clerks Association. We heartily concur with the third proposed amendment, requiring registration within a municipality to be a qualified voter in a municipal election.

Existing statutory language is vague. Currently some municipalities demand registration within the municipality prior to voting in the municipal election and other municipalities do not require such registration. Confusion surrounds this issue, and legislative action would seem desirable. A draft of a proposed amendment is attached should the Committee wish to entertain this specific amendment. As to the other amendments, we hold no strong opinion, but offer them for your Committee review.

Sincerely,

Lee McAnerney, Commissioner

HOUSE BILL NO. 509

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act exempting certain items from sales tax."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.53.415(a) is amended to read:

(a) A borough may levy and collect a sales tax not exceeding three per cent on sales [OR RENTS,] and on services made within the borough. The sales tax may apply to either or both [ANY OR ALL] of these sources but may not apply to rent, prescription drugs or food products for human consumption, nor may it apply to the sales of any energy source such as electricity, fuel oil, coal, or natural or manufactured gas when the energy source is sold for use in a residence by an occupant. Additional exemptions [EXEMPTIONS] may be granted by ordinance.

* Sec. 2. AS 29.53.415 is amended by adding a new subsection to read:

(e) For the purpose of this section "food products" includes, except as otherwise provided in this section, but is not limited to, cereals and cereal products; milk and milk products, including ice cream; oleomargarine; meat and meat products; poultry and poultry products; fish and fish products; eggs and egg products; vegetables and vegetable products; fruit and fruit products; spices, condiments and salt; sugar and sugar products; coffee and coffee substitutes; tea, cocoa products; or any combination of these. "Food products" does not include

(1) medicines, tonics, vitamins and medicinal preparations in any form;

(2) carbonated and noncarbonated packaged soft drinks and

RE: HB-509

Dear Representative Rudd:

A discussion was held at the February 6, 1978 meeting of the Council of the City of Haines concerning House Bill #509, exempting certain items from sales tax. At that time I presented the estimates of local sales tax revenue which would be lost as a result of the passage of this Bill, as outlined in my letter to you dated February 3.

Because of the diverse needs of each Alaskan community, it is the position of the Council that the regulation of the collection of sales tax is a matter which should be left in the control of each individual municipality. Haines, for example, serves a very large transient population in relation to the number of permanent residents. HB-509 would reduce the transient's burden of paying for services rendered by the City of Haines, but would add significantly to the tax burden of the permanent population. The estimated loss of $86,950 in annual sales tax revenues which would result from the passage of HB-509 would require a 58% increase

in the City's property tax levy, if it's present level of services were to be maintained.

Certainly it must be recognized that AS 29.53.415(a) already provides municipalities with the option of exempting the classifications of goods and services in question.

The members of the City Council concluded their discussion of this issue by casting a unanimous vote to express the City's opposition to HB-509. Please make the members of your committee aware of our position.

Sincerely,

Dan R. Bockhorst
City Administrator

City and Borough of Sitka

P.O. BOX 79 · SITKA, ALASKA · 99835

January 27, 1978

Representative Lisa Rudd
Chairman, House Community
and Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Representative Rudd:

Please be advised that the City and Borough of Sitka opposes HB 509 and HB 578. The legislation proposed in HB 509 and HB 578 can and is being taken care of by local government on a local preference basis. Our legislature should not be asked, nor should it volunteer to come up with a State-wide prescription for a local ailment.

Very truly yours,

Fermin Gutierrez
Administrator

cc: Pete Meland
Dick Eliason
Jim Rollie

Arguments against HB 509

1. Food, rent and fuel represents a large percentage of the tax income of most municipalities.

2. There would be a difficulty for the merchant in separating out items out at the store.

3. Some communities are in dire financial straits and cannot afford the loss of revenue unless it was supplanted with some state funds.

ATTN: Lisa Rudd, Chairman

Dear Ms. Rudd;

This letter is in response to a letter from Jim Roelle, Alaska Municipal League, requesting our input on HB 509 and 578. I will reiterate Jim's questions and follow with our answer as it relates to the City of North Pole.

1. What percent do you charge?
   3% on sales within the City limits of North Pole.

2. Are there any exemptions or limits by category of sales?
   The City's sales tax ordinance exempts rentals and casual sales of personal property, medical services by doctors, dentists, osteopaths, optometrists, psychologists and chropracters. Retail sales of prescription medicines. Sales by charitable organizations. Retail sales of food in school and college cafeterias. Subscription of newspapers and periodicals. Sales to the United States, State of Alaska or political subdivisions. Sales of feed for farm use. Services under a building or construction contract. Retail sales of real property. Funeral and burial services. Nursery and baby-sitting services.

3. Are there any exemptions as to who pays the tax?
   Senior Citizens over 65 and disabled citizens are entitled to a $60.00 annual rebate.

4. Gross income from sales tax.
   $250,000.00 sales tax revenue is projected for FY 1977-78 for the City of North Pole.

5. Percent of that income as it relates to your budgeted expenses.
   The City of North Pole's General Fund Budget is projected at $502,035.00 for FY 1977-78. Therefore, the $250,000.00 sales tax revenue is approximately

50% of all monies collected.

6. Is there a dedication of all or any part of your tax for specific purposes?
The money is allocated from General Fund to perform city services. I think you can see that when such money totals 50% of the General Fund, whether or not it is allocated for a specific purpose becomes a moot point.

Almost all revenue received from sales tax is from food products sold at a local supermarket. Therefore, the elemination of sales tax from food items would cost the City of North Pole around $200,000.00 annually in loss of revenue. Some confusion exists in our part as to whether cities should or shouldn't tax their populace. Several years ago North Pole was denied state aid because, as our legislators put it "you must first tax yourselves and try to help yourselves before the State will consider giving any aid." On the reverse side, we recently applied for a small CRA Grant on some street lighting and were told, "the monies should come from special assessments of the property owners, this program was designed for communities with no tax base and no other source of funding." As you can imagine, we are confused.

If the State denies the City the power to tax food items, it will be eliminating our greatest source of General Fund Revenue, even overshadowing our property tax assessment on the new 33 Million dollar North Pole Refinery. Budget estimates for FY 1978-79 with the refinery assessment could reach $685,000.00 If the State eleminates sales tax on food items it will be $485,000.00 or a reduction of $17,000.00 from FY 1977-78. This would completely stalemate our capital improvements program and we would again be telling our residents "We would like to (pave this street, install water distribution, put up traffic lights) but we simply do not have the funds."

I have attempted to present the facts in a clear and concise manner. If I told you exactly what I thought about all this, I would be arrested for sending obscene mail.

Thank you for your consideration in this matter.

Sincerely,

John Fischer

City of Fairbanks, Alaska

OFFICE OF CITY MANAGER 410 CUSHMAN STREET 452-1881

February 10, 1978

The Honorable Lisa Rudd
Chairman, Community and Regional
Affairs Committee
Pouch Y
Juneau Alaska 99811

SUBJECT: House Bills 509, 578

Dear Rep. Rudd

It is my understanding that the hearing on House Bill 509 and 578 has been continued to February 22, 1978. Therefore, I would like to have you consider the following as testimony on behalf of the City of Fairbanks.

Both of the above-mentioned bills are of great concern to Fairbanks as we currently have a sales tax within the City, the rate of which is 3%. The Fairbanks North Star Borough has a 2% sales tax.

The revenue from sales tax allows the City of Fairbanks to maintain a lower mill rate. The sales tax revenue to the General Fund will be approximately $2 Million Dollars, and approximately $4 Million Dollars will go to the Capital Improvement Fund.

Perhaps I should explain the division of the sales funds so that you have a better understanding of the situation. When the citizens of Fairbanks voted upon the sales tax they upheld a division of the tax as follows. One percent (1%) of the tax was to be used solely by the General Fund for any purpose thereof. Two percent (2%) of the tax was to go to the sales tax restricted fund. The restricted funds may be used for capital improvements, maintenance of capital improvements and debt service.

Airmail to Alaska is Faster

Effective January 1, 1978 the City of Fairbanks exempted food and drug items similar to those exemptions provided in House Bill 509. Along with the exemptions provided for food and medical supplies all building materials are exempt from sales tax. Also, there is a maximum tax of $30.00 per single item of purchase.

The total sales tax revenue represents approximately 39% of the Fairbanks Budget and, therefore, is a significant part of Fairbanks financing.

We strongly oppose the passage of House Bill 578 as it is a drastic intrusion upon the powers of the Home Rule City. If House Bill 578 were passed it would immediately mean a loss of $292,500.00 to the City of Fairbanks. The loss, of course, would increase as the volume of business increased within the City.

With the action taken by our local government, I see no need for House Bill 509.

It is my belief that until such time as the State of Alaska has a statewide sales tax, as do most of the states in the Lower '48, the legislature should refrain from imposing restrictions on local government in their administration of Home Rule Cities.

Sincerely

CITY OF FAIRBANKS

ROBERT R. WOLTING
City Manager

KETCHIKAN GATEWAY BOROUGH
344 FRONT STREET
KETCHIKAN, ALASKA 99901

February 10, 1978

Ms. Lisa Rudd, Chairman
Community and Regional
Affairs Committee
Pouch Y
Juneau, Alaska 99811

Dear Ms. Rudd:

To assist you in your deliberations on HB 509 and 578, we have compiled information, see below, about our local sales tax structure.

1) The Ketchikan Gateway Borough sales tax charge is 1 1/2% of the selling price. (Borough is collection agency for the City of Ketchikan which has a sales tax rate of 2 1/2% at present, thus within the City 4% is collected and 1 1/2% collected outside the city limits.)

2) There are no exemptions or limits by category of sales.

3) Both City and Borough exempt citizens over 65 paying sales tax providing they have made application.

4) Gross income from Borough sales tax collections are estimated at $980,000 for 1977-78 fiscal year.

5) Percent of sales tax income as it relates to all income is 9.86%. To expenses - 8.88%.

6) The Ketchikan Gateway Borough does not dedicate sales tax income to any specific project or purpose, thus uses sales tax revenues to lessen the property tax burden.

I hope this information will be of assistance to you and your Committee.

Sincerely,

KETCHIKAN GATEWAY BOROUGH

Re: House Bills 509 and 578

Dear Ms. Rudd:

The City of Kenai would like to have the Community and Regional Affairs Committee reflect the following data, as relates to the City of Kenai.

House Bill 509

1. Presently, the City of Kenai levies a three percent (3%) consumer sales tax and the Kenai Peninsula Borough levies two percent (2%), for a total of five percent (5%).

2. The following exemptions and maximum tax are allowable under the City of Kenai and Kenai Peninsula Borough Sales Tax Ordinance:

Section 25.10.020. Exemptions.

"The following classes of retail sales, services and rentals are exempt:

(1) Casual, isolated sales of property and services or the rental of personal or real property not in the regular course of the business of the seller.

(2) Hospital services and medical services performed by licensed medical doctors, dentists, osteopaths, optometrists, and chiropractors; and retail sales of medicinal preparations, drugs or appliances under a written prescription from one of the foregoing.

(3) Retail sales, services and rentals to religious and charitable organizations in the conduct of their regular religious and charitable functions and activities as defined by the revenue laws of the United States.

(4) Retail sales of food in college and school cafeterias which are operated primarily for teachers or students and which are not operated for profit.

(5) Subscriptions to newspapers and periodicals.

(6) Retail sales, services and rentals to the United States, the State of Alaska, or any instrumentality or political subdivision of either.

(7) Dues or fees to clubs, labor unions, and fraternal organizations.

(8) Sales of animal food, seed, plants, and fertilizers to farmers using such commodities to produce goods for sale.

(9) Retail sales of real property. Services performed by a real estate broker or agent are not exempt under this section.

(10) Retail sales or rent which the Borough is prohibited from taxing by the constitution or laws of the United States or the State of Alaska.

(11) Services performed by morticians licensed under AS 08.44.010; and retail sales of funeral supplies by such persons."

Section 25.10.025. Maximum Tax.

"The tax shall be applied only to the first $500.00 of each separate sale, rent or service transaction. The payment of rent, whether for real or personal property, in excess of $500.00 and for more than one month shall be treated as several separate transactions covering the rental for one month each. A transaction involving payment for services or personal property to be rendered or delivered over a period of more than one month for a consideration in excess of $500.00 shall be treated as several separate transactions occurring one each month over the period of time that the service or property is rendered or delivered."

3. Same as two (2) above.

4. Sales tax collections for the City of Kenai are as follows:

Fiscal Year	Amount	Percent
1971-72	$ 98,832	1%
1972-73	$145,384	1%
1973-74	$168,728	1%
1974-75	$208,400	1%
1975-76	$545,759	1% (7/1/75-9/30/75)
		3% (10/1/75-6/30/76
1976-77	$1,016,029	3%
1977-78	$655,076	3% (7/1/77-1/31/78)

5. Percent of Sales Tax Revenue to Total Revenues by Fund

	Debt Service Fund	General Fund	Capital Improvement Fund
1971-72	40.4%	-	-
1972-73	33.2%	-	-
1973-74	30.6%	-	-
1974-75	34.1%	-	-
1975-76	33.3%	13.7%	-
1976-77	41.3%	27.7%	-
1977-78 (Estimate)	55.3%	12.1%	100%

6. Proceeds of the three percent (3%) sales tax levied by the City of Kenai are as follows:

General Fund	1%
Debt Service	1%
Capital Improvements	1%
Total:	3%

7. Sales tax collected for fiscal year 1977-78 for the period of July 1, 1977 through January 31, 1978 amounted to $655,076. Of this amount $237,000, or thirty six percent, was generated from food purchases. An additional $41,594, or six percent, was generated from utilities (fuel for heating). The rental-related percentage is not identifiable, but is estimated as $70,000 or ten percent. Therefore, these exemptions contained in House Bill 509 would eliminate fifty-two percent (52%) of our sales tax revenue.

House Bill 578

The additional cost to the City of Kenai by this proposed legislation would be $21,000 or a loss of 3.2 percent.

Therefore, the City of Kenai must oppose House Bill 509, but would not vehemently object to House Bill 578.

Sincerely,

Vincent O'Reilly
Mayor

Re: HB 509 and HB 578

Lisa Rudd, Chairman
House Community &
Regional Affairs Committee
Pouch Y
Juneau, Ak 99811

Dear Chairman Rudd:

Mr Gordon Ryan, our city manager, has suggested that I might be able to supply your committee with some information pertinent to the effect that HB 509 and HB 578 would have on the City of Dillingham. Our community has three tax sources, real and personal property and a 3% sales tax. The tax base is extremely limited on real and personal property due to land status and lack of industry. For example, our neighboring Bristol Bay Borough which has several canneries within its jurisdiction had assessed real property of $17,048,875 compared with Dillingham's $9,659,245 and personal property valued at $12,252,971 compared with Dillingham's $5,588,379 in 1977. Bristol Bay Borough also has a raw fish tax which is a tremendous source of revenue for them. Dillingham is hamstrung in this area because the council feels that charging a raw fish tax in Dillingham would drive the fishermen from our only cannery, Peter Pan, since they can just as easily sell their fish to Queens Cannery which is located outside any taxing jurisdiction. I mention these facts to point out the importance of the sales tax revenue source to Dillingham.

HB 509 eliminates fuel oil, food, rent and electricity for residential use from the sales tax rolls. This would not only be a nightmare to administer for local markets but would also cut our revenue considerably. It is impossible to estimate how much of the total revenue from businesses engaged in providing these products is for home use only, but an example of the amounts presently collected by these businesses is as follows:

	FY 75-76	FY 76-77	6 mo. FY 77-78
Electricity	$ 7,777	$ 9,055	$ 5,885
Oil	22,678	25,615	19,529
Food	57,066	70,820	41,645
Rent	2,114	3,516	2,305
Total of Above	$ 89,635	$ 109,106	$ 69,365
Sales Tax Collected	$ 173,691	$ 214,624	$ 151,070
% Affected by HB 509	52%	51%	46%

Our total budget for FY 77-78 is $ 1,160,394. Of that total $215,000 is estimated from Sales Tax and $243,657 from Real and Personal Property Tax. The major portion of the remainder of the budget is from state and federal sources such as revenue sharing, CETA monies, grants, etc. By eliminating the suggested items from our taxing jurisdiction the bill would cut even further the amount of local revenue available to provide services to local residents. In Dillingham a comparatively small group of people are carrying the load of a 17 mill rate tax as far as property tax is concerned. Sales tax is something everyone share in including those who are transient or who have no property.

The effect of HB 578 is obvious. Revenues would be cut by 4% of the present amount of sales tax revenues collected or an estimated $8,600 for 1977-78.

Thank you for your consideration of these factors when making your decision about the two proposed bills.

Sincerely,

Lois R. Hermansen

Lois R. Hermansen
City Clerk
City of Dillingham

Sample effect of HB 578 (Freeman)

Dillingham $8,600 per year

Kenai City 21,000

Palmer 16,000 (equal to .5 mil property tax)

Juneau 127,600

Arguments against:

1. Sales tax and property tax are the only two revenue sources which may be varied and controlled by the council.

2. Losses would have to be made up by property taxes.

3. Flat 5% would lead to inequities because of differing types of sales, e.g., candy bars vs automobiles; and differing means of accounting, some worth more time than others.

   Large collectors such as grocery stores reap a large benefit whereas small businesses may get very little

4. Some municipalities have limited the number of exemptions and therefore figuring the return is fairly simple.

5. This should be a perogative of the local area.

HOUSE BILL 578, SUGGESTED AMENDMENTS

1. Change 5% to 3% in lines 13 and 18.

2. Add "...or $100.00 whichever is less."

3. Delete percentage and substitute "...a sum equal to $100.00 per quarter."

4. Local Option.

   Sec. 1 AS 29.53.415 language changed

   (e) The assembly of a home rule or general law borough which levys a sales or use tax as authorized under this section may, by ordinance provide for compensation to persons required by the assembly to collect, account for and transmit the proceeds of the tax.

   Same for Sec. 2 (b). Delete Sec. 3.

5. Majority Vote. May opt out.

   (f) A municipality may exempt itself from the requirements of subsection (e) if a majority of the voters voting on the question at any regular election, as defined by AS 29.78.010(14), or a special election called for that purpose, vote to exempt the municipality from the requirements of this subsection.

6. Majority Vote. May opt in.

   Rewrite the bill for AS 29.53.420 Referendum, adoption & modification.

   AS 29.53.420 is amended to add a new subsection (c)

   (c) At the time of a referendum vote on the question of levy of sales or use taxes or at any regular or special municipal election, the assembly may by ordinance place upon the ballot the question of allowing collectors of sales tax to retain a given percentage or a specified amount for the service of collecting the sales or use tax for the borough.

CITY OF KODIAK

ORDINANCE NO. 497

AN ORDINANCE OF THE CITY OF KODIAK MODIFYING THE MUNICIPAL SALES TAX

BE IT ORDAINED by the Council of the City of Kodiak, Alaska, as follows:

SECTION 1. Chapter 3.08 of the Kodiak City Code is hereby repealed and re-enacted to read as follows:

CHAPTER 3.08

SALES TAX

Sections

3.08.010 Levy of Sales Tax.

3.08.250 Foreclosure Against Real Property.
3.08.260 Collection by Distraint and Sale.
3.08.270 Prohibited Acts and Penalties.
3.08.280 Definitions.

3.08.010 Levy of Sales Tax.

A. A sales tax of three percent (3%) of the sales price or charge is hereby levied on all sales, rentals and services made within the City of Kodiak.

B. For purposes of the tax levied by this section, a sale of tangible personal property is made within the City of Kodiak if:

1. The sale is made by a business located within the city and delivery occurs within the city.

2. The sale is made by a business located within the city, the order is received or solicited within the city or payment is received within the city, and delivery is made to a purchaser on or adjacent to the road system within the Kodiak Island Borough.

3. The sale is made by a business located outside of the city as a result of solicitation inside of the city and payment or delivery occur within the city.

C. The tax levied by this section is applicable to all services rendered within the city, notwithstanding the fact that the business may be located outside of the city or that solicitation or payment may have occurred outside the city.

D. The sales tax on rentals is applicable to rentals for all real property located within the city and to rentals of personal property from a business within the city.

3.08.020 Accrual and Collection. Sales taxes imposed by this chapter are due and payable by the buyer at the time of payment for the purchase, service or rental, and are delinquent if not paid when due. Every person making sales or rentals, or rendering services that are taxable under this chapter shall collect the taxes from the purchaser at the time of the sale, rental or service, or with respect to credit transactions, at the time of collection of the sale price, rental or service fee, and shall transmit the monies collected on a quarterly basis to the city.

3.08.030 Installment Payments. When the payments for a purchase, rental or service are made on an installment basis, the entire sales tax shall be collected from the downpayment, or if a downpayment is not made or is insufficient to pay the tax, then from the entire first installment payment or payments until the tax is paid.

3.08.040 General Exemptions. The following classes of sales, rentals and services are exempt from the tax imposed by this chapter:

A. Casual and isolated sales and rentals of personal property, and services not rendered in the regular course of business of the seller.

B. Medical services performed by licensed medical doctors, dentists, osteopaths, optometrists, psychiatrists, psychologists and chiropractors; sales of medicinal preparations and drugs prescribed by medical doctors; and hospital services.

C. Sales, rentals and services to religious and charitable organizations as defined in section 501(c)(3), (4) and (1) of the Internal Revenue Code, for the conduct of regular religious or charitable functions and activities, and not for the support or maintenance of the general membership or for communal living.

D. Sales of food in school cafeterias and lunch rooms that are operated primarily for students.

E. Sales and services by nonprofit schools and student organizations within schools for support of the school, organization or extra curricular activities or events.

F. Sales, rentals and services to the United States, the State of Alaska and any agencies or political subdivisions thereof.

G. Dues or fees to clubs, labor unions and fraternal organizations.

H. Subscriptions to newspapers and periodicals.

I. Sales of animal food, seed, plants and fertilizers to farmers or ranchers for farm use.

J. Sales of insurance and bonds of guaranty and fidelity.

K. Funeral charges.

L. Transportation charges of commercial airlines or steamship companies.

M. Services rendered by banking or savings and loan institutions, or credit unions.

N. Services rendered by an employee to an employer in the normal course of employment.

O. Sales, rentals and services which the city is prohibited from taxing by the constitution or laws of the United States or the State of Alaska.

P. Retail sales in dining rooms or cafeterias of food furnished by nonprofit organizations under programs wholly or partially supported by government funds.

Q. Nursery and babysitting services.

R. Long distance transmission of telephone and telegraph messages.

3.08.050 Exemption of Sales for Resale.

The following sales of property and services are exempt from the sales tax:

A. Sales of property to wholesale dealers located in the city, who deal in property of the type sold, for the purpose of a subsequent sale by such dealer in the city.

B. Sales to retail dealers located in the city, who deal in property of the type sold, for the purpose of

a subsequent retail sale by such dealer in the city, which sale will be subject to the tax imposed by this chapter.

C. Sales of tangible personal property to a person engaged in manufacturing within the city of products sold primarily within the city, which property is converted into or becomes an ingredient or component part of the manufactured product or a container therefore, or otherwise enters directly into the manufacturing process.

D. Sales to a building or construction contractor or subcontractor, for use on a project within the City of building materials, supplies and other tangible personal property to be incorporated or used as component parts of a completed structure, driveway, landscaping and other portions of the project and services utilized directly in the construction, erection, landscaping and similar work on the project. This exemption shall not apply to tools, equipment, fuel, clothing, food and similar items of property utilized but not incorporated into a project.

3.08.060 Certificate of Exemption.

A. A person entitled to the exemption under subsections C or I of section 40, or section 50 of this chapter shall apply to the city for a certificate of tax exemption which will be issued, without charge, to qualified persons. The application shall be submitted on a form provided by the city clerk and shall contain the name, address, type of organization, the section under which the exemption is claimed and such other information as is required by the city clerk. Duplicate certificates will be issued on request.

B. A construction contractor or subcontractor requesting exemption under section 50 D must apply for, and obtain, separate certificates of exemption for each building project,

and the application and certificate shall reflect the correct location of the project by legal description and any other commonly recognized address. Each certificate of exemption shall be valid only for a specific business from which materials, supplies and other property are purchased or services obtained and the application for such certificate shall be signed by both the person seeking the exemption and the authorized representative of the business from which the property or services will be obtained.

C. The certificates of exemption shall be valid for a period of one year and the expiration date shall be printed on the face of the certificate. Exemption certificates may be renewed annually, without charge, by completing an application form containing information required to assess the continued existence of the exemption.

3.08.070 Revocation of Certificate of Exemption.

A. A certificate of tax exemption may be revoked by the city manager for any of the following acts or omissions:

1. Falsification of any statement or information in the application for certificate of exemption.

2. Utilization of the tax exempt certificate for the purchase or acquisition of non-exempt property, rentals or services.

3. Knowingly or negligently permitting or authorizing the use of the certificate by a person other than an authorized agent or employee of the person or entity to whom the certificate was issued.

B. Prior to revocation of a certificate, the holder of the certificate shall be provided with notice of the alleged

violation not less than 10 days prior to the proposed effective date for revocation of the exemption certificate. The person or entity to whom the certificate was issued may request a hearing before the city manager regarding the alleged violation by filing a written request with the city clerk prior to the effective date for revocation. If requested, the hearing shall be held within 20 days after the date of receipt of the request, and the exemption certificate shall not be revoked prior to the date of hearing.

C. A decision of the city manager revoking an exemption certificate may be appealed to the council by filing a written notice of appeal with the city clerk within 10 days after receipt of the decision. The hearing on the appeal shall be scheduled before the council at a regular or special meeting held within 30 days after receipt of the notice of appeal. The council may, in its discretion, hear the matter either on the record or de novo. If the appeal is heard de novo, no evidence may be presented before the counsil which was not presented before the city manager.

D. If an exemption certificate is revoked, a new certificate may not be issued to the same person or entity for a period of two years from the date of revocation.

E. The revocation provided by this section is an addition to any other penalties provided by law for the violations.

3.08.080 Tax Collectors-Registration Certificate.

A. All persons engaged in selling or renting property or rendering services subject to the tax imposed by this chapter shall file an application for a certificate of registration with the city clerk not later than 10 days after the effective date of this ordinance, or the date of commencing business in

the city, or opening of a place of business in the city. An application for a new business not previously registered to collect sales taxes shall be accompanied by a $10 deposit which the registrant may recover by a deduction from the remittance submitted with the first quarterly return filed, or if that return is insufficient, the balance shall be refunded. Those businesses filing sales tax returns on the effective date of this ordinance will automatically receive a registration certificate.

B. Upon receipt of a properly executed application, on a form provided by the city clerk, accompanied by the required deposit, the city clerk shall issue the applicant a certificate of registration, stating the address of the place of business to which it is applicable and authorizing such person to collect the sales tax. The certificate shall be prominently displayed at the place of business named on the certificate or if there is no regular place of business, the certificate shall be attached to the stand, truck or other merchandising or service device.

C. The certificate of registration is non-assignable and nontransferable, and must be surrendered to the city clerk by the person or entity to whom it is issued upon cessation of business at the location named in the certificate. If the business is continued at the same location but there is a change in its business form, the certificate holder making such change shall surrender the old certificate to the clerk for cancellation and the successor organization shall apply for a new certificate of registration. Upon receipt of such application properly executed, a new certificate bearing a new number will be issued to such successor.

D. When there is a change of address for the certificate holder's place of business, a new certificate of registration is required, bearing the same registration number, showing the new address.

E. An applicant for a new certificate required to reflect a change in business form or a change of address for an existing certificate holder is not required to post a deposit with the application.

3.08.090 Addition of Tax.

A. The tax collector shall add the tax imposed by this chapter to the price or charge, showing the tax as a separate and distinct item. The tax imposed on the sale of more than one separately priced item may be shown as a total tax on the aggregate price of all items purchased and delivered at one time.

B. The owner or other person providing products or services through a coin-operated vending or amusement machine shall collect the tax levied by this chapter and may include that tax in the fee charged to operate the machine. The allocation of the payment required to operate the machine, between the purchase price and sales tax, shall be explained by notice or marking on the device.

C. A business selling gasoline or deisel fuel delivered to the customer's vehicle in bulk may include the sales tax as an extra charge in the metered price for the fuel if a notice is posted on the meter or pump, or otherwise prominently displayed, explaining the allocation of the total cost between the charge for the fuel and the sales tax.

D. A business engaged in the sale of beverages for consumption on the premises may, in lieu of adding the tax as a separate item. A notice shall be prominently displayed in the

establishment dispensing the beverage explaining the allocation of the total price between the charge for the beverage and the sales tax collected.

E. A business providing for-hire passenger vehicle transportation services may, in lieu of adding the tax as a separate item, include the tax imposed by this chapter in the charge for the transporation. A notice shall be prominently displayed in each for-hire passenger vehicle explaining the allocation of the total charge between transportation charges and the sales tax collected.

F. When authorized by this section to be included in the price or charge for a product or service, the tax to be collected and remitted shall be determined by multiplying the gross receipts from the services or product by .03 and dividing that product by 1.03. Notices required by this section shall be provided by the city.

3.08.100 Assumption of Tax Prohibited. No person may advertise or state to the public, or to any buyer, tenant or consumer of property or services, directly or indirectly, that the tax imposed by this chapter or any part thereof will be assumed or absorbed by that person, or that it will not be added to the sales price or charge, or that it will be refunded, nor may any person assume, absorb or fail to add the tax or any part thereof or refund any tax or fail to separately state the tax to the buyer, tenant or consumer, unless otherwise specifically authorized by this chapter.

3.08.110 Tax Schedule. The amount of the tax to be added to the purchase price, rental or service charge shall be determined in accordance with the following schedule:

Charge	Tax
Under 25 cents	None
$ .25 through $ .45	$ .01

.46	through .75	.02
.76	through 1.24	.03
1.25	through 1.45	.04
1.46	through 1.75	.05
1.76	through 2.24	.06
2.25	through 2.45	.07
2.46	through 2.75	.08
2.76	through 3.24	.09
3.25	through 3.45	.10

Over 3.45 . . . . . Continue on same scale

3.08.120 Maximum Taxable Sale.

A. If the sales price of an item or items or the charge for rental of any property or performance of any service exceeds $500 for a single transaction, that portion of the price or charge in excess of $500 shall be exempt from the tax levied by this chapter.

B. In determining the maximum tax payable with regard to a single transaction for the rendering of services on a substantially regular basis, which services are generally repetitive in nature and are to be performed over a period of time under a contract, each period for payment or partial payment under the contract shall be deemed a separate service transaction. The maximum tax payable shall be applicable to each deemed service transaction with tax payments to accrue and become payable at the time of filing the next quarterly return to be submitted following receipt of payment for the service.

C. For purposes of computing the maximum tax, a rental of property for a period in excess of one month shall be deemed as a series of rentals with each rental transaction terminating as a rental payment is made. The maximum sales tax payable shall be applicable to each deemed rental with tax payments to accrue and become payable at the time of filing the next quarterly return to be submitted following receipt of the rental.

3.08.130 Title to Tax Proceeds. The title to the taxes collected pursuant to this chapter shall vest in the city upon collection by the tax collector.

3.08.140 Filing [illegible].

A. Each person who sells or rents property, or renders services taxable under this chapter in any quarter ending March 31, June 30, September 30 and December 31, shall, on or before the last day of the month succeeding the end of each quarter year complete, sign and file with the city a return for the preceding quarter, upon forms furnished by the city, setting forth the following:

1. The amount received from all sales, rentals and services made or rendered within the city.
2. The amount received from non-taxable sales, rentals and services, with a brief explanation of the non-taxable status.
3. The amount received from taxable sales, rentals and services.
4. The amount of tax attributable to the taxable sales, rentals and services.
5. The taxes collected.
6. Such other information and supporting papers as the council may require in the reporting form.

B. The taxes collected shall be remitted with the reporting form after deducting any administrative fees that may be allowed by section 3.08.160 of this chapter.

C. If the last day of the month is a Saturday, Sunday or legal holiday, tax returns and remittances, other than those delivered by mail, shall be due on or before the next preceding day on which the city offices are open for

business. Tax returns and remittances delivered by mail shall be considered as timely filed if postmarked on the due date or, if the post office is closed on that day, if postmarked on the next preceding day that the post office is open for business.

D. A person making sales or rentals, or rendering services, within the city shall make a return, even though none of the reported transactions are taxable, unless the person is a licensed medical doctor, dentist, osteopath, optometrist, chiropractor, hospital, religious or charitable organization or club, or a labor union.

E. A person who fails to timely comply with the provisions of this chapter relating to the filing of quarterly reports and remittance of taxes collected for any two quarters during a calendar year shall, if required by written notice from the finance director, file the required reports and transmit collected sales taxes monthly until such time as the finance director determines that a willingness and ability to comply with the requirements of this chapter has been established. Monthly reports and remittances shall be due on the 10th day of each month following the month of collection. Any person may, upon notification to the finance director, file reports and transmit taxes monthly.

F. A person doing business within the city for a period of time that is, or can reasonably expected to be, less than six months in duration, shall file sales tax returns and remit taxes on a monthly basis as provided in subsection E above.

G. A final sales tax return shall be filed and the tax due remitted within 15 days after the date of selling or terminating a business. The purchaser of the business shall withhold a portion of the purchase money sufficient to pay any sale tax, penalties and interest that may be due until seller

displays a receipt from the city evidencing total payment of the tax, interest and penalties due. If the purchaser fails to withhold the required sum from the payment due to the seller, the purchaser shall also be liable for the taxes, penalties and interest owed by the seller to the city.

3.08.150 Credit for Taxes. A person who has collected and remitted a tax on a sale, which tax is subsequently determined not to be due because a refund is granted for returned merchandise, payment is refused on a check received in conjunction with a sale, or similar circumstances may take a credit against future taxes. Proper documentation shall be made available by the tax collector, on request, to substantiate the credit taken.

3.08.160 Administrative Costs and Reimbursements. To compensate sellers, renters and persons rendering services for keeping the sales tax records and filing returns as required by this chapter and making prompt remittances, those persons shall be entitled to a fee equal to two percent of the amount of the tax collected, and that amount may be deducted when making remittances, provided that the reports and remittances are received on or before the due date for such reports and remittances. A person filing a report or remitting taxes collected after the due date forfeits his right and claim to the fee provided by this section and shall remit the entire tax due.

3.08.170 Penalty and Interest.

A. A person who fails to remit taxes collected on or before the due date shall pay, in addition to the tax due, a penalty of ten percent of the tax that is then due and unpaid.

B. Taxes that are not remitted to the city when due shall draw interest from the date of delinquency until paid at the rate of eight percent per annum. Interest shall not accrue

on the penalty assessed by subsection A of this section, but shall accrue on the civil penalty assessed by section 190 of this chapter.

3.08.180 Determination of Exemptions.

A. Every sale of property or service and every rental made within the city, or rendered or received by a person within the city, unless explicitly exempted by ordinance, is presumed to be subject to the tax imposed by this chapter.

B. A purchaser, tenant or other person obtaining property or service who claims an exemption under a provision of this chapter for which a certificate of exemption is required shall display the certificate at the time of the purchase or rental and the certificate number shall be noted on the receipt, invoice or other evidence of the transaction.

C. A purchaser, tenant or other person obtaining property or services who believes the tax has been charged in error may make a claim to the city for refund within 30 days after the date of sale.

D. If the finance director denies a refund of the tax, the taxpayer may appeal to the city manager by filing a written notice of appeal, within ten days after the finance director's decision, setting forth all facts relating to the claimed exemption. The city manager shall provide an opportunity for a hearing within thirty days after the receipt of the notice of appeal.

3.08.190 Failure to Collect Taxes.

A. A person required by this chapter to collect sales taxes levied, who fails to collect such taxes on taxable transactions, shall be assessed with a civil penalty of double the tax that should have been collected, as determined by an audit.

B. If any of the following defenses are established, the civil penalty imposed by this section shall be waived:

1. The securing, in good faith, of a certificate of exemption or a statement of eligibility for exemption from the person against whom the tax would have been levied.

2. Proof of a belief, based upon advice of legal counsel or the city finance director that the sale, rental or rendering of service was not subject to the tax levied by this chapter, accompanied by proof of notification in writing to the city manager based on such belief prior to or immediately following the transaction.

3. A reasonable attempt, in good faith, to collect the tax from the buyer.

C. A purchaser, renter or other person obtaining property or services who fails to pay the tax levied by this chapter on a taxable transaction shall be assessed with a civil penalty of double the taxes that should have been paid.

D. The civil penalties imposed by this section shall be in addition to any other civil or criminal penalties imposed by this chapter.

3.08.200 Preservation of Records. Every person required by this chapter to collect and remit taxes shall keep and preserve suitable records of the gross sales, rentals or service receipts, together with bills of sale and other pertinent records and documents which may be necessary to determine the amount of the tax due under this chapter and to substantiate the information provided in filed returns. The records required to be maintained shall be preserved for not less than three years after the remittance of the taxes and shall be subject to

examination of the city finance director or any other authorized employee of the city while engaged in reviewing or auditing the records of any taxpayer required to make a return under the provisions of this chapter. The city shall give written notice of intent to conduct an audit under this section, not less than five days prior to the audit.

3.08.210 Estimated Tax. If the city is unable to ascertain the correct tax to be paid by a seller because of the failure or refusal of the seller to file a return, keep accurate records or allow their inspection, or because a return has been falsified, the city may prepare an estimate of the tax due based on any information that may be available. Notice of the estimated tax shall be provided to the seller and shall become final for the purpose of establishing the tax liability unless the seller, within thirty days after receipt of notice of the estimated tax, files an accurate return supported by records determined by the finance director to be satisfactory, establishing a lesser liability.

3.08.220 Returns Confidential. Except in connection with official investigations or proceedings of the city, whether judicial or administrative, involving taxes due under this chapter, no officer, employee or agent of the city may divulge any information disclosed in a report or return filed under this chapter. The prohibition of this section shall not prohibit the preparation and use of statistical summaries of sales tax data that do not disclose the identity of any person filing reports required by this chapter.

3.08.230 Recovery of Taxes. Taxes due but not paid may be recovered by the city in an action against the buyer, tenant or recipient of services if that person has failed or refused to pay the tax on request by the seller or submitted a

false certificate of exemption. Taxes collected but not transmitted and taxes not requested or demanded by the person charged with the duty of collecting of tax may be recovered by an action against the person selling or renting the property or services.

3.08.240 Lien to Secure Payment of Tax.

A. The tax imposed by this chapter, together with any penalty and interest that may accrue, shall constitute a lien in favor of the city upon all of the property, real and personal, and any interest in such property owned or held by the person or persons required to pay the tax. The lien arises at the time of delinquency and continues for a period of two years from the date of notice to the city of the delinquency unless an action is initiated during that period to foreclose the lien or the lien is satisfied by distraint and sale.

B. The date of notice to the city of delinquency shall be the first of the following events to occur.

1. A required return is filed accurately reflecting the tax due and the return is not accompanied by the required remittance.

2. A notice of estimated tax is provided to a person by the city and the thirty day period for filing an accurate return has expired.

C. The lien created by this section is not valid against a mortgagee, deed of trust beneficiary, or other person holding a lien or security interest in the property, or a purchaser or judgment creditor, who acquires an interest in the property prior to filing by the city of a notice of lien in the office of the Kodiak District Recorder.

3.08.250 Foreclosure Against Real Property. A lien for the tax, interest and penalties created by this chapter may

be foreclosed, when authorized by the council by commencement of an action in the Superior Court pursuant to the procedure set forth in AS 34.45.170-220.

3.08.260 Collection by Distraint and Sale.

A. The city may collect taxes, with interest, penalties, and other additional amounts permitted by law, by distraint and sale of the property of the person liable to pay the taxes, interest, penalty or other additional amount, who neglects or refuses to pay them within ten days after receipt of notice and demand for payment.

B. In case of neglect or refusal to pay taxes or deficiencies as provided in this section, the city clerk may issue a warrant authorizing any police officer to levy upon, seize and sell any property, except exempt property belonging to the person for the payment of the amount due, with interest and penalty. When distraint is made as provided in this section, the police officer charged with the services shall make an inventory of the property served and leave a signed copy of that inventory with the owner or possessor of the property, or at his dwelling or usual place of business, if a person of suitable age and discretion can be found, or if the taxpayer is a corporation or other type or organization with an officer, manager, general agent, or agent for process, with a notation of the amount demanded and the time and place of sale.

C. The police officer shall immediately publish a notice of the time and place of sale at public auction, together with a description of the property distrained, in a newspaper published in the city and post a copy of the notice at the Post Office nearest the place where the sale is to be made.

D. The time of sale shall be not less than fifteen or more than sixty days from the date of the notification to

the owner or possessor of the property, and the place proposed for the sale shall not be more than five miles from the place of making the distraint. The sale may be continued from time to time in the discretion of the police officer, but not for more than thirty days after the date specified in the notice.

E. The property distrained shall be restored to the owner or possessor if, before the sale, payment of the amount due is made to the police officer charged with the collection, together with the fees and other charges.

F. The police officer conducting the sale under this section shall give to the purchaser a certificate of sale on payment in full of the purchase price. The certificate of sale:

1. Is prima facie evidence of the right of the police officer to make the sale, and conclusive evidence of the regularity of his proceedings in making the sale.

2. Transfers to the purchaser all right, title, and interest of the delinquent in and to the property sold.

3. Where the property consists of stock, is notice, when received, to the corporation to record the transfer on their books and records in the same manner as if the stock were transferred or assigned by the party holding the stock in lieu of an original or prior certificate, which is void, whether cancelled or not.

4. Where the subject of the sale is security or other evidence of debt, is a good and valid receipt to the person holding it, as against a person holding or claiming to hold possession of the security or other evidence of debt.

G. If property seized and sold is not sufficient to satisfy the claim of the city for which distraint or seizure is made, the police officer may, thereafter, and as often as is necessary, proceed to seize and sell in like manner any other property subject to the lien created by this chapter until the amount due from the taxpayer together with all expenses is fully paid.

H. A person in possession or control of property subject to distraint, upon which a levy is made, shall, upon demand by the police officer making the levy, surrender the property to the police officer, unless the property is, at the time of the demand, subject to an attachment under judicial process. A person who fails or refuses to so surrender the property is personally liable to the city for a sum equal to the value of the property not so surrendered, but not exceeding the amount of the taxes or deficiencies, including penalties and interest for the collection of which levy is made, together with costs and interest from the date of the levy.

I. All persons shall, on demand of a police officer about to distrain or having distrained on property, or rights of property, exhibit all books containing evidence or statements relating to the property liable to distrain for the tax due.

J. The provisions of this chapter are not exclusive but are in addition to all other existing remedies provided by law for the enforcement of a levy and collection of taxes of the city.

3.08.270 Prohibited Acts and Penalties.

A. No person may

1. fail or refuse to file a completed tax return required by this chapter, upon demand, or falsify any material statement in that return;

2. fail or refuse to collect taxes levied by this chapter and remit those taxes to the city as required;

3. conduct any business in the city relating to sales, rentals or services subject to taxation under this chapter without first applying for and obtaining a certificate of registration to collect the taxes imposed on sales, rentals and services; or

4. falsify any portion of an application for a Certificate of Exemption or a Statement of Eligibility for Exemption.

B. A person who violates a prohibition contained in subsection A of this section is, upon conviction, punishable by a fine of not more than three hundred dollars or imprisonment for a term not to exceed thirty days, or by both.

C. A person who violates any other provision of this chapter not specifically set forth in subsection A above is, upon conviction, punishable by a fine of not more than two hundred dollars.

3.08.280 Definitions. As used in this chapter

A. "buyer" or "purchaser" means a person who acquires an interest in real or personal property, or the right to use real or personal property, or who acquires services for consideration;

B. "rental" means permitting the use or occupancy of real or personal property for consideration;

C. "sale" means a transfer or exchange of any property of every kind and description, or the right to use or occupy such property, for consideration;

D. "sales price" or "charge" means the consideration, whether money, credit or other property or interest in property, without deduction for delivery costs, taxes or any other expense. The receipt of property or an interest in property as consideration, the "sales price" or "charge" shall be based on the fair market value of the property or interest in property.

E. "seller" means a person, whether acting as a principal, agent or broker, who sells, leases or rents real or personal property or provides services to another for consideration.

DATE: January 27, 1978

FILE NO. Legislature - 1978 Session

SUBJECT: HB 578, 5% Sales Tax Rebate to Merchants

Honorable Lisa Rudd, Chair
House Community & Regional Affairs Committee
Room 625 Court Building
Juneau, Alaska 99801

Dear Representative Rudd:

The Assembly Legislative Committee has reviewed House Bill 578 which would entitle persons collecting a municipal sales tax to retain 5% of the tax collected and has taken a position in opposition to the bill.

As the sales tax is something which is optional with each community, the method of collection and compensation to those collecting tax should, to maximum extent possible, be left to local option also. Each community can then tailor its procedures to what are perceived by the elected community leaders to be circumstances peculiar to its own situation. The need for this flexibility is demonstrated in the following hypothetical situation. The amount which the seller is permitted to retain is supposed to be full or partial compensation for the burden placed on the seller of collecting, accounting for and transmitting the sales tax. I think it can be safely assumed that there is little difference in this burden between a seller who must collect a 1/2 of 1% sales tax and one who must collect a 5% sales tax. Each must go through the same motions. However, the seller in a community which has a 5% sales tax will be authorized to retain ten times as much on the same taxable sales as the seller in a community which only collects a 1/2 of 1% tax. In a community such as Juneau, where two different rates of sales tax are imposed within the community, the proposed bill would compensate sellers in the 3% area three times as much as sellers doing the same taxable volume in the 1% area. By allowing each community to establish the method of compensation to sellers, the foregoing disparity will not necessarily occur.

Even if it is believed that a statewide percentage rebate should be established, 5% is too high as it provides far more compensation to many sellers than the burden of collecting the taxes. As an example, each of the four large grocery stores in the City & Borough of Juneau do a gross annual business which is roughly in the neighborhood of $5,000,000. A store doing that gross located in an area which levies a 3% sales tax will collect $150,000 in taxes;

5% of this amount is $7,500. One can obtain far more accounting services for $7,500 than are required to account for, report and transmit the sales tax.

The state and federal governments do not compensate employers for withholding, accounting for and transmitting income taxes of employees even though this is a far more difficult and time consuming task than accounting for sales tax. Just as withholding and transmitting to the government a part of an employee's wages is a burden placed on each person who engages in the privilege of hiring another person, so is the burden of collecting and transmitting sales taxes a burden uniformly borne by those who engage in the privilege of doing business within a community which levies a sales tax. Juneau does allow each seller to retain 1% of the taxes collected each quarter but the amount may not exceed $100 per quarter. In calendar year 1977, Juneau sellers had a total allowable discount of $19,800. Under House Bill 578, Juneau sellers could have retained $127,600 of the taxes collected, resulting in a tax loss to the municipality of $107,800. This amount would have to have been made up by some other revenue source such as property taxes.

For the reasons set forth above, the City & Borough of Juneau believes that House Bill 578 should not be passed.

Very truly yours,

Lee Sharp

January 25, 1978

Rep. Lisa Rudd

Chairman & Members
Community & Regional Affairs Committee
Alaska State House
Pouch V
Juneau, Alaska 99881

Dear Sir:

I appreciate the opportunity to comment on two bills before your committee. The bills that I am concerned about are House Bill No. 509 and House Bill No. 578.

House Bill No. 509

As you may be aware, the Fairbanks North Star Borough has already exempted food, hygiene, and prescription drug items from sales tax. The City of Fairbanks, in turn, concurred with this exemption. The City of North Pole could not afford to make this exemption, however they did choose, through a different mechanism, tax rebates per resident, to give some sales tax relief to their residents.

The ability of municipal officials to design and construct a taxing structure that meets their program needs and suits the character of their community is an essential component of local government.

House Bill No. 578

I feel House Bill No. 578 mandates a prorogative which presently exists as an option for locally elected councils and assemblies to consider. At present our assembly and councils have not chosen this mechanism as an aid to business.

I, therefore, must oppose both House Bill No. 578 and House Bill No. 509 as a state intrusion on local control.

Very truly yours,

JOHN A. CARLSON
Borough Mayor

CITY OF HAINES

TELEPHONE (907) 766-2231 — POST OFFICE BOX 239 — HAINES, ALASKA 99827

February 3, 1978

The Honorable Lisa Rudd, Chairman
House Community and Regional Affairs Committee
Pouch Y
Juneau, Alaska 99811

Dear Representative Rudd:

Jim Polle, Executive Director of the Alaska Municipal League, has asked me to provide you and your Committee with the following information concerning local sales tax matters for use in the upcoming hearings on House Bills 509 and 578.

TAX LEVIED: City of Haines: 3% Haines Borough: 1%

EXEMPTIONS: A list of exemptions from sales tax charged by the City of Haines is enclosed as Attachment 1. A list of the exemptions of the Haines Borough is enclosed as Attachment 2. Both the City and the Borough are presently considering expanding the list of sales transactions which are exempt from tax to include:

1. Sales made and services performed by governmental agencies
2. Sales made and services performed for governmental agencies.
3. Membership dues paid to clubs, labor unions and fraternal organizations.
4. Sales made and services performed for non-profit cooperatives.
5. The value of new or used articles taken in trade.
6. Receipts derived from sales resulting from orders received outside the corporate limits of the municipality, where delivery is made outside the corporate limits of the municipality.
7. Services under a building construction contract or subcontractor.
8. Sales of building or construction supplies exceeding $5,000 in any one calendar year.

GROSS INCOME RECEIVED FROM SALES TAX:

City of Haines 7/1/76-6/30/77: 217,968

Haines Borough 7/1/76-6/30/77: 80,532

PERCENT OF TOTAL INCOME PROVIDED BY SALES TAX:

City of Haines 7/1/76-6/30/77: $\frac{217,968}{1,248,428*} = 17.46\%$

Haines Borough 7/1/76-6/30/77: $\frac{80,532}{705,812} = 11.41\%$

*Includes all utility revenues as well as State and federal grants for capital improvements

SALES TAX INCOME IN RELATION TO TOTAL EXPENSES:

City of Haines 7/1/76-6/30/77: $\frac{217,968}{928,869} = 23.47\%$

Haines Borough 7/1/76-6/30/77: $\frac{80,532}{768,255} = 10.48\%$

DEDICATION OF SALES TAX PROCEEDS:

City of Haines: 2/3 of the revenue must be used for capital improvements; 1/3 may be used for general operating expenses.

Haines Borough: All proceeds to be used for retirement of principal and interest on School Construction Bonds

Too, in order to inform you of the impact that HB-509 would have on sales tax revenues of the City of Haines, I have prepared the following summary of income, in both absolute and relative terms, from taxes on sales of items which would be specifically exempt from tax if this bill becomes law.

	Sales tax income 7/1/76-6/30/77	Percent of total sales tax received
Rent	$ 9,110.84	4.18%
Prescription drugs	presently exempt	
Food	56,639.41	25.99%
Energy source for use in residences	21,192.79	9.72%
Totals	$ 86,943.04	39.89%

If you need any further information concerning this matter, please contact me.

Sincerely,

Dan R. Bockhorst

Dan R. Bockhorst
City Administrator

Encl: Attachment 1
Attachment 2

Attachment 1
Exemptions from Sales tax
City of Haines

Sec. 60.10.010 continued

(c) The sales price of all items purchased or delivered at the same time shall be added together and the tax levied on the aggregate amount thereof.

(d) The following are exempt from said tax:

(1) Salaries and wages paid to an employee.

(2) Sales made and services performed which are not in the regular course of business.

(3) Sales, rentals and services when the amount paid to any person for such sales, rentals and services by all persons doing business with such party does not agreegate $100.00 in any calendar month.

(4) Sales of insurance and bonds of guaranty and fidelity.

(5) Fees for medical, dental and hospital services.

(6) Remuneration received for services and materials including caskets, used or furnished for funerals.

(7) Wharfage charges and charges for freight handling and cargo handling on docks

(8) All sales of commodities made to a manufacturer, broker, wholesaler or dealer and which are not consumed or destroyed by such purchaser, but which are resold in the same or an altered form, or which are used to package, crate or deliver the products of such purchaser.

(9) All sales to a bona fide retailer when the same are purchased by him for resale in the ordainary course of business. In this connection, a retailer is one who regularly stocks merchandise for resale, displays the same to the public and holds himself out as regularly engaged in the business of selling such products either during a regular season or throughout the year directly to the consumer.

(10) All sales, rentals and services made, paid and performed during the hours, under the auspices and in direct participation with the annual Southeast Alaska State Fair.

(Ord. 229; adopted 8/1/77)

Attachment 2

Exemptions from sales tax

Haines Borough

Section: 04.20.030. Exempt Transactions. The sales price of all items purchased or delivered at the same time shall be added together and the tax levied on the aggregate amount thereof.

The following are exempt from said tax:

(a) Salaries and wages paid to an employee.

(b) Sales made and services performed which are not in the regular course of business.

(c) Sales, rentals, and services when the amount paid to any person for such sales, rents, and services by all persons doing business with such party does not aggregate $100.00 in any calendar month.

(d) Sales of insurance and bonds of guaranty and fidelity.

(e) Fees for medical, dental, and hospital services.

(f) Remuneration received for services and materials, including caskets, used or furnished for funerals.

(g) Wharfage charges and charges for freight handling and cargo handling on docks.

(h) All sales of commodities made to a manufacturer, broker, wholesaler, or dealer and which are not consumed or destroyed by such purchaser, but which are resold in the same or an altered form, or which are used to package, crate, or deliver the products of such purchaser.

(i) All sales to a bona fide retailer when the same are purchased by him for resale in the ordinary course of business. In this connection a retailer is one who regularly stocks merchandise for resale, displays the same to the public and holds himself out as regularly engaged in the business of selling such products either during a regular season or throughout the year direct to the consumer.

Pouch V
Juneau, Alaska 99811

Dear Representative Rudd:

The Alaska Municipal League has requested that we furnish yourself and your committee members the following sales tax data.

1. Sales tax within the City and Borough of Sitka is 4%.

2. Please refer to the enclosed copy of our sales tax ordinance which indicates those sales and services exempt from sales tax.

3. Persons over the age of 65 years are exempt from paying sales tax.

4. Our gross income from sales tax this fiscal year will be 1.5 million dollars.

5. This fiscal year our sales tax will represent 42% of our total revenue, and 37% for our total expenditures.

6. 2% of our sales tax is dedicated for education, and the other 2% for general operation of the municipality.

We oppose HB 509 and 578, and reiterate that sales tax should be a matter of local preference.

Very truly yours,

Fermin Gutierrez

February 3, 1978

Community and Regional Affairs Committee
Lisa Rudd, Chairman
Pouch Y
Juneau, Alaska 99811

Dear Madam Chairman:

The following information is submitted to your committee with the intent of advising you as to the position of the City of Dillingham with regard to HB 509 and HB 578. These bills are, as you are aware, with regard to sales tax and various amendments to be added to the Alaska Statutes regarding such. I would appreciate very much your committee being advised of the feelings of small communities such as Dillingham and the potential fiscal impact on these communities if such an elimination of certain items were indeed legislated. I know that you realize the degree to which small communities rely on such revenue and the difference with regard to impact between the large communities such as Anchorage and Fairbanks and those such as Dillingham, Bethel and other bush communities.

With that fact in mind I would like to present for your committee's information the following facts.

1. The City of Dillingham charges 3% sales tax.

2. The specific exemptions or limits by categories of sales are in the form of a $1,000 maximum single sale tax. Any item purchased at one given time with a value of over $1,000, the amount of such valuation over $1,000 is not subject to tax.

3. Exemptions for sales tax in general is provided to out of town consumers who order their supplies and have them delivered by common carrier.

4. FY77 gross income from sales tax was $214,624.50. The budgeted revenue for FY78 from sales tax is $215,000.

5. The sales tax is 18.52% of the total revenue for the City of Dillingham which for FY78 is $1,160,394.00.

6. Other than capital expenditures and equipment which is purchased from sales tax and which necessarily incorporates a large part of expenditures from that revenue source, the City of Dillingham additionally provides $30,000.00 in contribution to the School District.

I would very much appreciate your committees considering these facts with regard to small cities and if I can be of any assistance to you in providing additional data which would make your decisions and recommendations on HB 509 and HB 578 I would be more than pleased to present such information to you.

Respectfully yours,

Gordon W. Ryan

P.O.BOX 1397
KODIAK, ALASKA 99615

February 6, 1978

Representative Lisa Rudd, Chairman
Community and Regional Affairs Committee
Pouch Y
Juneau, Alaska 99811

Dear Rep~esntative Rudd:

I would like to provide some general information about sales tax for the Committee's information. Specifically, I am referring to HB 578 and HB 509.

At the present time, the City of Kodiak charges 3% sales tax. The City does not charge sales tax on items over $500. We do have a number of exemptions on who does pay the sales tax. Our gross income from sales tax estimated for the 1977/78 fiscal year is $1,350,000. This is 42% of the locally collected general fund revenues and 32% of the total general fund revenues. We do not have any dedication of any of our sales tax for a specific purpose.

In addition, I would like to provide you with some more information regarding HB 578. This is in regard to the retention of a sum equal to 5% of the proceeds of the tax collected by the individual doing the collecting. The City of Kodiak recently revised its sales tax ordinance and changed the fee from 3% to 2%. This was a compromise as the City was attempting to make it zero percent. It is obvious that the large collectors such as grocery stores and firms of that nature would reap a large benefit whereas the small businessman would hardly get anything at all. There are, of course, many ways to look at this fact; however, it is not fair as far as I can see to allow the large businesses to make out one form just as the small businesses do and still make substantial gains.

The other bill, HB 509, is very disturbing. At the present time, the City of Kodiak collects 25% to 35% of its sales tax revenue from those items which this bill wishes to exclude. I would like to be able to give you a more definite figure; however, there are many problems in separating out the different exemptions referred to in this bill.

I have been through a similar discussion regarding the exemption of food from

sales tax in Colorado. There is quite a problem for the supermarket to have to separate the item out when checking at the counter because the items do not come out of the basket separate; they are all mixed up. If sales tax is charged only on food items opposed to non-food, i.e. vitamins, soft drinks, etc., they have to be separately charged at the check stand. Anyone who has waited at the supermarket obviously knows that this would delay the process much further and cause a lot of problems for the individuals involved.

While the problems of the super market are relevant, it is most important that you understand that the City of Kodiak is in dire financial straits at this time. Any such change would have to be made up by State funds supplementing the City's losses. I see no such provision in this bill. I might also mention that I have asked the City Council to raise the sales tax from 3% to 5%. This is to cover additional costs of services as well as needed capital improvements. The decision regarding this will be made in the near future. Hopefully, the State Legislature will understand that the City needs the revenue it is now getting out of sales tax and is looking towards further reliance in that area in the future. We do not currently have a personal property tax because of the many problems it presents with inventories, boats and other items.

Thank you for your consideration in this very important matter. If you have any additional questions, please feel free to call on me at your convenience.

Very truly yours,

Re: H.B. 509
H.B. 578

Dear Lisa:

I would like to provide you with the following information relating to action on the above referenced bills.

Sales Tax data for the City of Yakutat (Fiscal year 1976-77)

1. 2% general Sales Tax
2. Exemption- are listed on attached exerpt from the Sales Tax Ordinance
3. Exemptions relating to who pays the tax are also attached.
4. Gross Revenues from Sales Tax: $49,952.
5. Item no. 4 is 23% of all expenditures for last fiscal budget.
6. Since May 1976 there are no dedications of all or any part of the tax for specific purposes collected.

Although the City Council has seriously considered an exemption for food items; but could not afford the large loss as most sales taxes, come from food oriented businesses. We do feel that serious consideration be given to strengthening the use tax concept. This would give us an acceptable area to retrieve revenue losses that would surely come as a result of your proposed bills. The Oil Industry has bitterly fought the Use Taxes instituted in other areas of the state.

I hope that this helps your decision in this matter.

Best Regards

Larry Powell
Mayor of Yakutat

Section 4. Exemptions. The following classes of retail sales, rentals and services are exempt from the tax imposed by this ordinance:

a. Sales, services, rentals and transactions amounting to less than $25.00 in any quarter year.

b. Casual and isolated retail sales of real or personal property, rental of personal property, and services not in the regular course of the business of the seller.

c. Funeral charges and services, and medical services performed by licensed medical doctors, dentists, osteopaths, optomertrists, psychologists, and chiropractors, prescribed by such, and hospital services.

d. The service of transporting students to and from grade or high schools in motor or other vehicles.

e. The sale of food in public, common, high school or college cafeterias or lunch rooms operated primarily for teachers and pupils, and not operated primarily for the public and not operated for profits.

f. The sale of newspapers and periodicals made directly to a consumer or user of newspapers or periodicals by a carrier.

g. Sales, rentals and services to the Unites States Government, the State of Alaska and its political subdivisions and municipalities.

h. Sales, rentals and services and transactions which the municipality is prohibited from taxing under the Constitution and laws of the United States or the State of Alaska.

i. Dues or fees to clubs, labor unions, fraternal organizations.

j. Salaries and wages received by an employee from an employer but this exemption shall not apply to the gross remuneration for furnishing labor and materials for accomplishing a specified result.

Juneau, Alaska 99811

Dear Ms. Rudd:

In connection with HB 509 and 578 we are submitting some information which may be of interest and helpful to you. We do not, however, have a borough in Nome.

1. Our rate of sales tax is 3%
2. Drugs (prescriptions), rent, new construction are exempt
3. State, Federal and city are exempt
4. Our gross income from sales tax 1977-$443,520.98
5. Gross income from sales tax is 22% of our total budget
6. None of our sales tax is dedicated for a specific purposes. It is all deposited to the general fund

In addition I am enclosing a copy of our sales tax ordinance which enlarges on exempts, etc.

We hope this information will be useful. To restrict collection of sales tax on food and electricity would seriously cut into our revenue if it were restricted at our level.

Yours very truly,

F. G. Breeden

CITY OF SKAGWAY

GATEWAY TO THE GOLD RUSH OF '98"
P. O. BOX 415 SKAGWAY, ALASKA 99840

February 6, 1978

Mrs. Lisa Rudd, Chairperson
Community & Regional Affairs Committee
Pouch Y
Juneau, Alaska 99811

Dear Mrs. Rudd:

It is understood that your committee shortly will be holding hearings on House Bill No. 509 - "An act exempting certain items from Sales Tax" and House Bill No. 578 - "An act relating to the levy and collection of Sales and Use Tax by Municipalities". Please introduce the following comments into the records of these hearings:

H.B. No. 509 -

The City of Skagway strongly opposes the exemption from taxation of the catagories of items as listed in the proposed legislation. The removal of these catagories as sources of tax revenue would result in a serious impairment of the City's financial stability. The City's financial planning is premised on the availability of sales tax revenue, as conservatively estimated, for application under the provisions of the City Code - i.e. for retirement of bonded indebtedness and construction of capital improvements to streets, sidewalks and utility systems. Further, the mandating at the State level of catagories for exemption from local tax is considered an usurpation of authority better left at the municipal level. Accordingly, the City of Skagway urges that your Committee recommend that H.B. No. 509 not be passed.

H.B. 578 -

The City of Skagway supports the concept that the person or entity charged with the responsibility for collection of municipal sales taxes should be compensated for the administrative costs of this effort. The proposed compensation in the amount of 5% of the amount collected is considered to be acceptable. Accordingly, the City of Skagway supports the passage of H.B. No. 578.

Sincerely,

Robert F. Messegee

February 6, 1978

Lisa Rudd, Chairman
Community and Regional Affairs Committee
Pouch Y
Juneau, Alaska
99811

Dear Ms. Rudd:

In reference to the hearing to be held on February 13, 1978 by the Community and Regional Affairs Committee regarding HB 509 & 578, the City of Petersburg volunteers the following information.

The City of Petersburg charges a 5% sales tax. The 5% sales tax is charged on items up to $1000.00. Government entities are exempted from the sales tax. The gross income from sales tax is $600,000.00. Approximately 1/2 of 1% of total sales tax relates to all budgeted income. There is a dedication of a portion of sales tax for specific purposes.

Hopefully, this information will be helpful to the Community and Regional Affairs Committee.

Sincerely,

David A. Moffat

Juneau, Alaska 99811

Re: HB 509, Sales Tax Exemptions

Dear Ms. Rudd:

The City of Wrangell wishes to go on record in opposition to the proposed sales tax legislation imposing State mandated exemptions.

The sales tax ordinance was enacted and approved by a majority vote of the qualified voters and can be changed, repealed, or exemptions added in the same manner. It would seem reasonable that the local people are the best judge of how they prefer to financially support their local schools and government. Eighty percent of our sales tax, as enacted, is dedicated to schools, health, sanitation and street construction. The tax supports approximately thirty percent of our budget at the present time. The exemptions included in HB 509 would reduce these funds by sixty to seventy percent. This would result in a reduction of services or increasing the property tax to cover the short fall.

In order to relieve senior citizens from any burden which sales tax may impose, the City has enacted a refund program of $15.00 per month to qualified persons.

It is our opinion that the local legislative bodies can incorporate exemptions in the sales tax ordinance if it is to the benefit of the local community.

Very truly yours,

James R. Eide
City Manager

February 7, 1978

Lisa Rudd, Chairman
Community & Regional Affairs Committee
Pouch Y
Juneau, Alaska 99811

Re: HB 509 and HB 578

Dear Ms. Rudd:

The City of Soldotna strongly protests passage of HB 509 and HB 578.

Soldotna has a 2% sales tax payable on amounts up to $500. Churches and government entities are exempt.

Our gross income from the sales tax was $323,894 in FY 1976-77. We have received $251,465 for the first six months of FY 1977-78. Our sales tax income as it relates to all other income is 27%, and is 29% of our budgeted expenses. The tax is not dedicated for a specific purpose, but goes into the general fund.

Of the money received this fiscal year, $98,000 has come from food sources and $31,000 from heating sources. Under HB 578 relating to levy and collection of sales and use tax, the City would lose $6,700. by the increase from 3% to 5% to individuals collecting the tax.

The City cannot afford to lose a large portion of its revenue. We are already faced with tremendous growth with its related problems and future impact, and are wondering where the money for increased services is coming from.

Sincerely,

Patricia C. Burdick
Acting City Clerk

PCB/bm

cc: Committee Members
Alaska Municipal League

At the end of the text of this book there is a section under the caption "Summary of Proposed Changes." This reads as follows:

> "As a whole, the most important changes needed in the state sales taxes include:
>
> 1. Elimination of all exemptions of consumer goods except perhaps prescription drugs."

I have been the administrator for the City of Palmer sales tax for nearly eight years and I think this recommendation certainly concurs with my experience. I would strongly urge the Alaska Municipal League to take a firm position in opposition of any type of exemptions. There may be some unique to a local community which are worthwhile, but let them make the decisions.

In reference to HB 578, I would certainly speak in opposition. I am aware that the provision has been under borough law for some time as it did not appear under city sales tax law. Some cities and boroughs have taken this prerogative but certainly 5% is more than is necessary in today's world. First of all, if the ordinance on sales tax is not riddled with exemptions, then the calculating and accounting will be a fixed percentage of the gross receipts which is a very simple matter as it does not require 5% of the tax collected. In this day and age with electronic cash registers, electronic calculators, etc., if you have not riddled the sales tax ordinance with exemptions, it is extremely simple to check any day's or month's receipt. If you co-mingle exempt and non-exempt items in the same sales or service of an organization, then you have created a bookkeeping monster and perhaps 5% is not nearly enough. If you will refer back to my opening statement about the fact that of our total revenues, only two items are under control of the Council, and in our case 70% of that total revenue is in the sales tax. Whatever you do to affect that sales tax has dramatic reaction with the City Council's responsibilities and authority. By allowing the 5% retention in our case of our total revenues of $330,000, you are talking about $16,500. If that revenue is removed from the sales tax then it must be applied to the property tax. In our case, 1 mill of taxation produces $30,000. By allowing this 5% retention you merely cause the City Council to levy an additional 1/2 mill of real and personal property tax on everyone in the City. In the majority of the cases this is going to be the owner-operator of the establishment who is retaining the 5%. The only alternative is whether he pays it once a month in twelve installments or once a year when property taxes are due.

In summation, I would like to say, Jim, that sales tax is a very sophisticated form of taxation and its administration is much more complicated than real

property taxes. Each municipality is unique within itself and it is best left to the local governing body who lives there 365 days a year to make these decisions. Please try to inform our legislators that these decisions are better made at home.

Sincerely,

William E. Curtis

ALASKA MUNICIPAL LEAGUE

204 N. FRANKLIN ST. JUNEAU, ALASKA 99801

Statement of

Jim Rolle

Executive Director

of the

Alaska Municipal League

Before

The House C&RA Committee

January 30,1978

Houes Bill 509
House Bill 578

MADAM CHAIRMAN-MEMBERS OF THE COMMITTEE

Good Morning

My name is Jim Rolle and I am here to testify on behalf of the Alaska Municipal League, as both HB 509 and HB 578 appear on your agenda today. I am in hopes that you will allow the philosophy of my remarks to apply to both bills. However the specifics will apply to HB 578 in so far as the numbers are concerned.

Sources of local revenue for municipalities in Alaska are limited to a very extensive degreee, to the income derived from local property and sales taxes.

Those tax reformers, who insist that the obligations ought to be borne according to the ability to pay, will find little comfort in the findings of a recent poll by the Advisory Commission on Intergovernmental Relations. (attached)

As analyzed, the poll shows that more people then ever, about 35% nation wide, regard the property tax as the most unfair tax of all. The report also shows federal income tax the second "worst" tax with sales tax seemingly more popular.

The report should baffle those who, like me and some elected municipal officials, long have condemned the sales levy as the most regressive form of taxation.

Whatever, the poll suggests that any attempts to enlarge taxes on income or property will have increasingly stiff opposition. This leads me to our point today.

We did a rough telephone survey of Municipal League members to find that should this act become law, our members will lose approximately 1.5 million dollars in local revenue. Obviously, these revenues will have to be found elsewhere. I should like to point out that the sales tax in most communities is a result of the peoples vote, not council or assembly action like the property tax.

Some communities, for a variety of reasons, already practice the concept of rebate or holdback. However, it was done locally and in the amounts most beneficial to the municipality and its population affected.

In the case of Fairbanks North Star Borough and the City of Fairbanks we are speaking roughly of $450,000 loss of revenue. In Juneau we a looking at $107,000, Palmer $15,000 and Kodiak $55,000, just as examples.

In conclusion, we feel that both of these bills, if passed, would have a serious adverse effect upon the operation of municipal governments, resulting in either a marked increase in the level of property tax or a reduction in the level of services offered to the public.

Therefore, the Alaska Municipal League opposes these bills.

Thank You.

Boundary commission shd. be represented—

Introduced: 1/10/78
Referred: Community &
Regional Affairs and Finance

IN THE HOUSE

BY THE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

HOUSE BILL NO. 585

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act establishing a local government study commission; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. LOCAL GOVERNMENT STUDY COMMISSION. There is established in the Department of Community and Regional Affairs a temporary local government study commission.

* Sec. 2. MEMBERSHIP OF COMMISSION. The commission has the following members:

(1) the commissioner of community and regional affairs or his designee;

(2) the chairman of the senate community and regional affairs committee;

(3) the chairman of the house community and regional affairs committee;

(4) four municipal officials appointed by the governor, one of whom must be from an organized borough or unified municipality, one from a first-class or home rule city located within an organized borough, and two from cities located within the unorganized borough;

(5) two residents of the unorganized borough, outside cities, appointed by the governor.

* Sec. 3. POWERS AND DUTIES OF THE COMMISSION. (a) The commission shall make recommendations to the governor and the legislature concerning the sufficiency of the existing local government structure and measures by which it may be improved, and toward that end, it shall

(1) study and evaluate existing and alternative means of local government finance;

(2) study and evaluate the differences between governmental services and burdens in organized boroughs and the unorganized borough;

(3) study and evaluate the relationships between the state and local governments;

(4) study and evaluate existing and alternative local government structures;

(5) hold public hearings in organized boroughs, cities and the unorganized borough;

(6) after one year of study, submit an interim report to the governor and the legislature;

(7) after two years of study, submit a final report with findings and recommendations to the governor and the legislature.

(b) In exercising its powers and fulfilling its responsibilities, the commission may:

(1) establish sub-committees to study each of the subjects set out in (a)(1) through (4) of this section;

(2) contract through the Department of Community and Regional Affairs for the professional services it considers necessary to prepare its final report.

* Sec. 4. DISSOLUTION OF COMMISSION. After presenting its final report, the commission is dissolved.

* Sec. 5. STAFF. The Department of Community and Regional Affairs through the division of local government assistance shall provide the staff for the commission.

* Sec. 6. EFFECTIVE DATE. This Act takes effect July 1, 1978.

AMENDMENT

Offered in Committee

By Rudd

TO: HOUSE BILL NO. 585

Page 2, line 9: insert the following;

(5) study and ascertain which governmental services are more effectively provided by municipalities than by the state;

Renumber remaining paragraphs.

HB 582

January 10, 1978

The Honorable Hugh Malone
Speaker of the House
Alaska State Legislature
Juneau, Alaska 99811

Dear Mr. Speaker:

Under the authority of art. III, Sec. 18, of the Alaska Constitution, and in accordance with AS 24.30.060(b) and the Uniform Rules of the Alaska State Legislature, I am transmitting a bill to establish a temporary local government study commission in the Department of Community and Regional Affairs.

The study commission, which will include the chairmen of the community and regional affairs committees of the legislature, is intended to be a blue-ribbon panel, the task of which will be to make a thorough, two-year study and analysis of all aspects of local government in Alaska and to make specific recommendations for any change thought desirable.

It will, for example, examine the present system of state financial support to local governments for their providing various services (such as public safety services) to ascertain whether it rewards local effort on an equitable basis and encourages, and does not discourage, the formation of local governments in areas where they should logically exist. The accomplishment of this task alone warrants the enactment of this legislation.

Ours is a strong tradition of local self-government. We have consistently sought to achieve our constitutionally stated goal of maximum local self-government with a minimum of local government units. The study commission's goal will be to see if we can do even better and to bring us specific recommendations toward that end.

This bill is the Department of Community and Regional Affairs' top priority. I urge its favorable consideration.

Sincerely,

S/JSH

Jay S. Hammond
Governor

THE LEGISLATURE OF THE STATE OF ALASKA
TENTH LEGISLATURE

FISCAL NOTE

I. REQUEST
Bill/Resolution No. establishing study HOUSE BILL NO. 585
Title "An Act ~~creating~~ a local government commission"...
Requested by Office of the Governor Date 11/29/77

II. FISCAL DETAIL
Agency Affected Department of Community and Regional Affairs
Program Category Affected Development
Budget Request Unit(s) Affected Local Government Assistance Division

EXPENDITURES (Thousands of Dollars)

	FY 77	FY 78	FY 79	FY 80	FY 81	FY 82
100 PERSONAL SERVICES			157.6	167.1		
200 TRAVEL			24.0	25.4

600 LAND & STRUCTURES						
700 GRANTS, CLAIMS, ETC.						
TOTAL			204.9	413.5		

FUNDING (Thousands of Dollars)

GENERAL FUND			204.9	413.5		
FEDERAL FUNDS						
OTHER (Specify)						

POSITIONS

FULL TIME			6	6		
PART TIME						
TEMPORARY						

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III) Assumptions:

1. Six staff members would be employed for the duration of the commission's existence. The staff members would include:

- One Local Government Specialist IV (Range 19) - supervises, coordinates and directs other staff members, advises commission on fiscal and legal matters of existing and future local governments, completes analysis of data and provides recommendations, responsible for technical reports and public information materials and is responsible for conduct of public hearings. (Monthly Salary ($2,322) + benefits ($578) x 12 months = $34,800)
- Four Local Government Specialists II (Range 15) - will investigate and collect data on the existing local government's fiscal capacity, intergovernmental relationships, alternative local government structures, draft reports, etc. (Monthly Salary ($1,727) + benefits ($475) x 12 months x 4 = $105,712)
- One Clerk Typist III (Range 8) - responsible for typing of reports, correspondence, filing and miscellaneous duties. (Monthly Salary ($1,092) + benefits ($337) x 12 months = $17,143)

IV. DATE 11/29/77 PREPARED BY Bruce Aronson
AGENCY Department of Community and Regional Affairs
PHONE 465-4700

Original: Legislative Finance
cc: Budget and Management
Prime Sponsor (First Legislator Named)

Total Personal Services $157,655

81 (Rev. 10/76)

2. Travel has been computed as follows:

= 9 commission members plus one staff member x average cost per trip per person (includes per diem) x eight trips per annum 10 x $300 x 8 = $24,000

Total Travel $24,000

3. Contractual expenses have been computed as follows:

A. Telephone - 6 phones @ $35/month x 12 months = $ 2,520
- long distance = 2,000

B. Rent - 650 square feet x $1.25 per square foot per month x 12 months = 9,750

C. Postage, printing, advertising of hearings and miscellaneous 3,500

Total Contractual $17,770

During the second fiscal year, in-depth reports by private consultants on selected topics will require an additional $200,000.

4. Commodities - office supplies, etc. $2,000

Total Commodities $ 2,000

5. Equipment - six desks and chairs, filing cabinets and one typewriter $3,476

$ 3,476

6. Inflation will be approximately six percent per year.

Total First Year Expenses $204,901

HB 585

ANCHORAGE
SCHOOL DISTRICT

January 24, 1978

The Honorable Lisa Rudd, Chairman (Person)
Members of the Community & Regional Affairs Committee
House of Representatives
Pouch V
Juneau, Alaska 99811

SUBJECT: HOUSE BILL 585

Dear Committee Members:

We note that HB 585, in establishing a local government study commission, excludes the participation of school boards.

In smaller communities, education is often the only local government service. In larger communities with organized first and second class boroughs the school board must, by statute (and, in the case of Anchorage, by charter), maintain a very intimate relationship with the local government, they being the final arbiter on the school budget.

If a commission is established to examine the relationship between local and state governments, it would seem highly appropriate to include the representation of local school boards.

Thank you for your consideration of this matter.

Respectfully submitted,

Heather Flynn

Heather Flynn, Legislative Chairperson
Anchorage School Board

Re: HB 585, "An act establishing a local government study commission; and providing for an effective date."

Dear Lisa:

We have noted with interest the initiative of the Administration in submitting this bill for legislative consideration. RurAL CAP has been interested in the establishment of effective and responsive local and regional governments in the Unorganized Borough for years.

As you may recall, the basic idea of a "Local Government Study Commission" was first introduced in the spring of 1975 (SB 136). At that time, proponents of the idea were looking for some method to create appropriate regional governments in the Unorganized Borough to assume the educational powers which, at the time, were being exercised by the Alaska State Operated School System. In the First Session of the Ninth Legislature, HB 35 was passed, regionalizing the ASOSS into the present configuration of 21 REAA's. This action effectively mooted the primary necessity (as it was seen at that time) for the passage of SB 136.

In working on the concepts embodied in the original version of SB 136, this organization, AFN, the Citizens' Participation Conference, and other rural residents and organizations generally agreed that some needed changes were indicated, to wit:

1. Control of the Commission should be more in the hands of officials who reside in the Unorganized Borough, in order to obviate the tendency to merely recommend that the status quo be extended to include the Unorganized Borough.

2. Also, it was felt that some form of "incentive grant" should be provided to local and regional groups who wanted to study the creation of local government on their own terms. Accordingly, through the initiative of Senators Sackett and Ferguson, the bill was amended to authorize up to $250,000 for the incentive grants program.

As indicated above, the Legislature decentralized ASSOSS and effectively mooted the perceived need for this Commission. Also, at that time, the Administration was not supportive of SB 136 (either as originally submitted, or as amended to include the grant program). In light of these two factors, the bill died when the Ninth Legislature adjourned in the Summer of 1976.

I believe that one of the things that has generally been overlooked in the debate surrounding the creation of regional governments in the unorganized borough is that there are a wide variety of government services which are demonstrably best conducted by a regional structure (whether that be government, a non-profit corporation, an REAA or whatever). Merely decentralizing the educational function throughout the State did not solve the myriad governmental problems experienced in rural Alaska. Among these are such things as coastal zone management, planning and zoning functions, local taxation, localization of the A-95 Clearinghouse procedure etc. All of these functions are most appropriately handled at a local or regional level.

Our position on HB 585, therefore, is that it is a good step in the right direction. However, we would again request that the membership on the council be expanded to include more residents of the Unorganized Borough. As well, I believe that it is most important that the incentive grants program be reinserted into the bill. As you well know, no local government is going to succeed unless and until the people who are to be governed agree that the form and structure of the government is appropriate to their needs. I am quite concerned that, if HB 585 is passed in its present form, the Commission (staffed by the Department of Community and Regional Affairs) will merely recommend minor adjustments to Title XXIX, submit their recommendations to the Legislature, and thereby impose a form of regional government on the Bush which is neither appropriate, needed, nor wanted.

The time has most certainly come to "turn the process around." If the Legislature were to create an incentive grants program, and give state-wide control of the program to a structure in which a reasonable amount of control were granted to residents of the Unorganized Borough, then local people, acting through their local and regional organizations, could request funding for a study, identify and hire their own staff to conduct the study, and have ultimate "sign-off" on the recommendation presented to the Legislature. I believe that this process would be more effective because it would provide the Legislature with recommendations more closely attuned to the wishes of local people.

In my opinion, one of the main reasons that most of Alaska's land mass is presently "unorganized" is that the present Title XXIX is simply inappropriate to rural Alaskan governmental needs. Although the passage of the "Third Class Borough Bill" during the last session of the Legislature presented a few more options for rural residents, the Administration has done virtually nothing to implement either the mandate or the intent of that piece of legislation. Therefore, I suggest that the time has come to put the process into the hands of the people and to permit them to conduct their own studies, come up with their own recommendations, and live by their own decisions.

Please excuse this rather hasty analysis. Due to time constraints, I haven't had the opportunity to present a well-documented and researched set of recommendations. Neither have I yet had an opportunity to discuss this issue, in depth, with rural residents. Be assured that, as those opportunities present themselves, we'll be in touch.

Finally, I would request that your Committee take no final action on the bill until its merits are discussed at the Citizens' Participation Conference. As you know, the CPC is scheduled to meet in Juneau on the 23, 24 and 25 of February; and local government issues will be on the agenda.

Thank you very much for your consideration of these remarks.

Sincerely,

Phil Smith,
Executive Director

HB
657

State of Alaska

LOCAL BOUNDARY COMMISSION

Petition from City of Petersburg)
Requesting annexation of)
remaining portion of Mitkof Island)

STATEMENT OF DECISION

Whereas, on November 22, 1977, the City of Petersburg submitted a petition to the Local Boundary Commission through the Department of Community and Regional Affairs in accordance with Title 29 of the Alaska Statutes requesting annexation of the area generally described as the balance of Mitkof Island; and

Whereas, on December 1, 1977, the Department found the petition in proper form with the requisite content and accompanying exhibits; and

Whereas, upon notification by the Department of the petition's sufficiency, the Local Boundary Commission scheduled a public hearing with notice as prescribed by law; and

Whereas, the Local Boundary Commission conducted a physical inspection of the proposed annexation territory and held a public hearing in the Petersburg City Council Chambers on Monday, January 9, 1978; and

Whereas, the Local Boundary Commission held a decisional meeting in Anchorage on January 16, 1978, to review the proceedings on the annexation petition;

NOW THEREFORE, the Local Boundary Commission makes the following findings of fact and enters its decision thereto:

The portion of the petition territory accepted by the Commission meets the regulatory standards for annexation as follows:

19 Alaska Administrative Code 05.010 (a) (3): The territory on either side of the Mitkof Highway within the recommended annexation extending southerly from the current City of Petersburg limits is generally being utilized and developed for residential and business purposes and such growth generally represents an extension of the Petersburg community beyond current city limits.

19 AAC 05.010 (a) (4): The territory recommended for inclusion in the city is in need of City of Petersburg general fund services such as fire and police protection, land use planning and zoning and the City is the most appropriate local government entity for providing such needed services. The City is capable of providing such services and has presented a differential taxation plan which the Commission finds appropriate for integrating the territory with the present city.

19 AAC 05.010 (a) (5): Both the scarcity of developable property and the suitability of property along the Mitkof Highway southerly from the present city limits has resulted in Petersburg community growth in this direction. The Commission foresees continued community growth in the area defined for inclusion in the City by the recommendation, and finds that such growth warrants City of Petersburg jurisdiction.

19 AAC 05.010 (a) (8): The Commission finds that both residents of and property owners in the territory recommended for inclusion within the city benefit from the existence of the adjacent city and by inclusion in the city will make tax contributions commensurate with benefits derived from provision of city services.

On the basis of the foregoing, the Local Boundary Commission affirms its decision to accept, with Commission modification, the City of Petersburg boundary change petition in accordance with Exhibit "A" attached hereto.

LOCAL BOUNDARY COMMISSION.

RE: HB 657 Transfer of Tidelands to Municipalities

By the Statehood Act, Alaska was granted title to tide and submerged lands according to the Submerged Lands Act of 1953 (PL 31, 83rd Congress, first session; 67 Stat. 29) which governs all other states in the Union.

Tidelands are defined in AS 38.05 as lands between the mean high tide line and a line shown on a plat which shall be the pierhead line established under the Act of Sept. 7, 1957, or the harbor line established under the Act of March 3, 1899, or if no pierhead line or harbor line is established then a line subject to approval by the director, with the concurrence of the commissioner, which shall be seaward of all tidelands and submerged lands occupied or suitable for occupation and development without unreasonable interference with navigation. Needless to say, tidelands come in all difference sizes and shapes!

The state has dispersed some of its tidelands to individuals and municipalities according to a preference right system established in AS 38.05.320. Tidelands preference rights, as defined by 38.05.320, are granted by the state to: individuals claiming rights to the lands by virtue of having occupied the land prior to 1959; and to home rule or first class cities (not boroughs) where their municipal boundaries as of 1964 are contiguous to the tidelands. This leaves out any tidelands of property annexed since 1964.

All other tidelands may be leased to interested parties (cities or individuals) by the state according to state leasing procedures. Tidelands are leased only for proposed development. Development seems to be thought of in terms of structures on the tidelands. AS 38.05.315 provides for leasing of state lands to political subdivisions for less than fair market value and without going through the normal auction procedures.

HB 657 addresses a situation in Skagway. In 1931 the U.S. Government deeded to the City a parcel of land just across the river from the city. Part of that area was outside the city boundaries in 1964 and therefore not eligible for tideland conveyance under the statutes. The area is still outside the city boundaries and it will not be included under the present annexation proposal either.

The city has more or less used the area as a park and picnic area and plans to continue its use as a park. The deed from the Federal Government stipulates perpetual public use. The city has in mind to build a boat float at Smuggler's Cove for picnickers.

Lisa,

I spoke with the City Manager in Skagway to find out what they had in mind for the tidelands. He said the idea popped into their heads when Westours began to think about building a day boat landing in Smugglers Cove to accommodate their new smaller tour boats which they are planning to run from Burners Bay to Skagway. It became apparent that the city did not have authority over the tidelands.

He said the community decided they did not want a commercial facility there, but did think it would be a good idea to have a pleasure boat float facility there and develop the area as a park and picnic area.

The question arises why the city could not go to the state to lease sufficient tidelands for the facility. It seems to be a matter of preference on the city's part.

The DNR apparently has no problem with the bill. Pat Conheady said as much but he said the department does not wish to change its policy with regard to tidelands i.e., it does not wish to change the statutes at this time to allow municipalities to gain title to more tidelands say, on property annexed since 1964.

I wonder if any other community has a situation like Skagway would be if this bill passed. That is, controlling tidelands outside the city boundaries. Are we establishing a precident that will require more special bills.

Would there be any other communities that would be able to benefit in a similar fashion if the bill were worded slightly differently?

HB657

FYI

February 3, 1978

The Honorable Joseph L. Orisini
Chairman, Senate Community and
Regional Affairs Committee
Alaska State Legislature
Pouch V, State Capitol
Juneau, Alaska 99811

Dear Joe:

Thank you for your letter of January 17, 1978, concerning SB 374 relating to transfer of tidelands and submerged lands. As you probably noticed, since your letter, an identical bill has also been introduced in the House (HB 657).

I share the concern that enactment of this legislation would set an undesirable precedent for allowing any other coastal city to seek similar legislation authorizing conveyance of additional tidelands and submerged lands from the state. For this reason and that discussed below, I believe that close examination and careful consideration should be given to SB 374 and its companion.

These bills are drawn narrowly and would authorize application for further conveyance only of tidelands and submerged lands contiguous to land which has been used as a public park for at least 45 years, and which has been granted to a city for park purposes by the United States. This specificity appears to be directed at a particular parcel of land in northern Southeastern Alaska, though I do not know where. Therefore, it is likely that the bills would constitute a "local and special act" in violation of Article II, Section 19 of the Alaska Constitution.

This constitutional provision was discussed and applied by the Alaska Supreme Court in the "Cook Inlet Land Trade Case," State v. Lewis, 559 P.2d 630, 642-4, (Ak. 1977). The court stated that the test to be applied is whether the legislation examined bears a fair and substantial relationship to legitimate state purposes. In that case the court found that the land trade legislation was valid because it was "designed to facilitate statewide land

use management and to resolve a host of pressing legal issues arising in the context of ANCSA." It is doubtful that purposes of such statewide concern exist for SB 374 and HB 657.

I hope these comments are of some help to your consideration of SB 374. Please contact me if you have any further questions.

Sincerely,

AVRUM M. CROSS

CITY OF SKAGWAY

GATEWAY TO THE GOLD RUSH OF '98'

P. O. BOX 415 SKAGWAY, ALASKA 99840

January 23, 1978

Senator Joe Orsini, Chairman
Senate Community & Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

This is in response to your letter of 13 January 1978 concerning Senate Bills No. 374, No. 375 and No. 388. These proposed pieces of legislation have been reviewed by the City Council. The position of the City of Skagway on each bill is as follows:

Identical to HB 657

Bill No. 374: The City of Skagway strongly supports the enactment of this bill. This legislation will enable the City to obtain title to tide and submerged lands adjacent to City Park lands which were conveyed to the City by the Federal Government on 30 November 1931. Ownership of these tide lands will facilitate future development of the Park by the City. A copy of the Federal patent transferring the Park lands is enclosed for your information.

Bill No. 375: The City of Skagway supports passage of this bill. It is considered to be in the best interests of the State of Alaska and the Alaskan municipalities that a portion of the permanent fund principal and income be made available for development of municipal capital facilities.

Bill No. 388: The City of Skagway concurs in the goals and objectives of the Alaska Coastal Management Act and, therefore, supports changes which will facilitate the work of the Coastal Policy Council. The City Council, however, does have reservations with regard to the wording of Section 1.(d) of the proposed regulation. To explain:

Although the need for alternates to the public members is justified, the method proposed for their selection is considered to be inadequate. It is suggested that, rather than having the principals select their alternates, the Assembly or Councils of the regions nominate alternates and that the Governor make the selections - in other words, alternates for public members be designated in the same manner as the principals.

There is one other point: Under the proposed legislation, it would be possible that alternates might constitute all or a majority of

the public participants in coastal policy actions. It is suggested that of the public members acting on coastal policy matters at least a majority be regular members.

Sincerely,

G.D. Acker

Coastal Council Coming Of Age

You don't hear much about the state's Coastal Zone Management Council right now, but that will be one of the hotter seats in town in coming years, predicts council member Fran Ulmer.

Ms. Ulmer, who is director of the governor's division of policy development and planning, told the Society of Petroleum Engineers here this week that the council isn't intended to be an extra step in the permit-granting process for oil operations.

Instead, she said, it sets guidelines for local areas to establish their own coastal management plans. The council will step in only when the local government and the state government disagree and the state decides the issue is of overriding public interest.

For example, she said, the state may determine a particular site is the best site for an onshore oil terminal but the local government says "no." Then the council will be called in as a tribunal. "I don't see that happening very often," she said.

The council is weighted in favor of local control, she said, with nine members representing local governments in nine areas of the state, and seven members representing state agencies.

In his introduction of Ms. Ulmer, Hob Iden of Atlantic Richfield Co. said oilmen from California are aware of the negative aspects of coastal zone management — its costs in time, manpower, money and, most of all, uncertainty.

"Hopefully, we can reduce that element of uncertainty," Ms. Ulmer said.

The council's guidelines for local plans were adopted last week, she said, and she urged the petroleum engineers to comment during the next 60 days while the guidelines are subject to public review.

"If you think the guidelines are unrealistic or too idealistic or inadequate, this is the time the council needs to hear from you," she said.

In order to qualify for federal funds under the Coastal Zone Management Act, the state's program must be approved by the federal government by December.

"What's in it for us?" she said. For one thing, $3 million next year for scientific studies, in addition to coastal impact funds. For another, a clause in the act says the state plan, if approved by the federal government, will be binding on federal agencies operating within the state.

"Not only will you know the rules of the game for local and state agencies, but for federal as well," she told the oilmen.

The original state legislation for coastal zone management would have vested decision-making in the state, but lawmakers received "violent protests," she said. "The message came through loud and clear" that Alaskans prefer the decisions to be made at the level of government closest to them.

The state act "gives local governments incredible control," she said.

Ms. Ulmer said there is a serious problem with the ability of some local governments to formulate plans for management of their coastlines. While some local governments are sophisticated enough to handle such planning, others are not. "I'm very troubled," she said. "The money is available in grants to help them but not nearly enough. It's a problem for all of us, especially the council."

The coastal management program "stands or falls on the local communities' ability to do a good job of planning, Ms. Ulmer said.

The state's chief petroleum geologist, Tom Marshall, pointed out at the meeting that with oil and gas development, there is less certainty of the site of development than with other resources industries, such as timber or mining.

"People generally are deceived by whether there will be oil fields where they are expected to be found," Marshall said.

CITY OF SKAGWAY

Lee McAnerney, Commissioner of Community & Regional Affairs
Ernst Mueller, Commissioner of Environmental Conservation
Ronald Skoog, Commissioner of Fish & Game

Representative Lisa Rudd
Pouch V
State Capital
Juneau, Alaska 99811

Dear Representative Rudd:

There are three essentially housekeeping items which should be considered by the State legislature insofar as amendments to the Alaska Coastal Management Act is concerned. Two of these housekeeping items are contained in two bills which have been introduced in the Second Session of the 10th Legislature. Senate Bill 388 addresses the legislative intent insofar as defining the qualifications of an alternate to the council is concerned. House Bill 663 addresses the housekeeping problem of a deadline set up in the original act which was impossible to meet by establishing a deadline of April 15, 1978. The third housekeeping item which is not addressed in either bill, has to do with the clarification as to whether the regulations adopted by the Alaska Coastal Management Policy Council are part of the Alaska Coastal Plan.

Senate Bill 388 rather clearly establishes that the public member alternates shall have the same qualifications as the public member appointed by the Governor. Assuming this was the intent of the legislature, that is that the alternates have the same qualification as the original appointee, I have no problem with SB 388 as it applies to public members. However, I believe that SB 388 should be modified slightly as it applies to cabinet members so that line 19 of Senate Bill 388 would read "of this section shall be a Deputy Commissioner or other high ranking employee (responsible officer or employee) of the Department".

House Bill 663 seems to answer the problem insofar as deadlines for adoption of the regulations are concerned.

In addition to the above two housekeeping items, I believe that a third housekeeping item should be addressed by amending AS 46.35.080 as follows: "AS 46.35.080 is amended by adding a final sentence to the section as follows: Any regulations adopted by the Alaska Coastal Management Policy Council shall be considered part of the Alaska Coastal Management program."

ALASKA
COASTAL MANAGEMENT PROGRAM

Inasmuch as all three of the above items are housekeeping items, it would appear to me that it would be beneficial if all three could be incorporated in a single bill so as to expedite hearings and final enactment. I will be available at the committee hearings and for personal contact with regard to these matters as you may see fit. Thank you for your consideration.

Sincerely,

Roger W. Allington, Co-Chairman
ACMPC

POUCH AD — JUNEAU 99811
PHONE 465-3512

January 26, 1978

The Honorable Lisa Rudd
Alaska State House of Representatives
Chairperson, House Community and
Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Representative Rudd:

I understand that your committee will be reviewing HB 663 on Friday, January 27. As I am committed to attending an all day meeting of the Growth Policy Council I will not be able to attend the committee hearing. However, I did want to share with you a comment on the bill.

The extension of the December 1977 deadline for the adoption of guidelines is probably not absolutely essential. However, to avoid any possible question about the legality of their adoption, I feel that it is advisable for the Legislature to change the deadline. I am quite confident that the entire Coastal Policy Council would feel reassured by such action.

Next week I will be in Washington, D.C., attending the White House Conference on Balanced Growth and Economic Development; so I will be unable to attend your meeting to review the guidelines. I know that Roger Allington and Glenn Akins will ably brief you on the guidelines and standards, but if there's any additional information or assistance which I can give upon my return, please let me know.

Sincerely,

Frances A. Ulmer (AW)

Frances A. Ulmer
Director

C&RA Committee Members:

The informational meeting on the Coastal Energy Impact Program (CEIP) which had been scheduled for this Monday, January 23rd has been rescheduled for Tuesday, January 31 at 11:15 a.m. in the Governor's Conference Room.

This will be an informal meeting with Ms. JoEllen Murphy, Director of Federal Programs and the State CEIP Coordinator, Doug Griffen.

COASTAL RESOURCE SERVICE AREA BOUNDARIES

A Determination Under Section 46.35.120(b) of the

Alaska Coastal Management Act (Ch. 84 SLA 1977)

December 2, 1977

Lee McAnerney

Commissioner

Alaska Department of

Community and Regional

Affairs

Kevin Waring

BY: Kevin Waring, Director

Division of Community

Planning

Debra E English

12/2/76

Introduction

Section 46.35.120(b) of the Alaska Coastal Management Act states that:

> The Commissionc of the Department of Community and Regional Affairs may, after public hearings held in the area affected, consolidate two or more regional educational attendance areas as a single coastal resource service area
>
> > (1) if a substantial portion of the coastal area contains land and water area owned by the federal government over which it exercises exclusive jurisdiction or land held in trust by the federal government for Alaska Natives over which the state would not exercise control as to use; or
> >
> > (2) if, after giving due consideration to the standards applicable to incorporation of borough governments and the likelihood that a borough will be incorporated within the area, the commissioner determines that the functions to be performed under this chapter could be undertaken more efficiently through the combination of two or more regional educational attendance areas as a single coastal resource service area.

All determinations under this section must be made by December 4, 1977.

Coastal resource service areas are areawide coastal planning districts that may be formed in portions of the unorganized borough outside of municipalities that have and exercise planning authority. Service area boundaries must parallel those of one or more existing regional educational attendance area (REAA); the area covered by an REAA cannot be subdivided in determining boundaries of units that might be organized as coastal resource service areas. No time limits are set for establishment of a coastal resource service area.

Actual organization may be initiated:

(1) by submission to the (Alaska Coastal Policy) council of a petition signed by a number of registered voters equal to 15 per cent of the number of votes cast within the coastal resource service area at the last state general election;

(2) by submission to the (Alaska Coastal Policy) council of a resolution approved by the city council or traditional village council of not less than 25 per cent of the number of cities and villages within the coastal resource service area; or

(3) at the direction of a majority of the members of the (Alaska Coastal Policy) council when it appears that a major economic development activity will occur.

In all cases, organization must be preceded by an election in the affected area.

Proposal

On June 21, 1977, the Commissioner of Community and Regional Affairs proposed consideration of coastal resource service area boundary adjustments in four regions, which included the following regional educational attendance areas.

(1) Regional educational attendance areas 3(Lower Yukon) and 4(Lower Kuskokwim).

(2) Regional educational attendance areas 6(Nushagak-Bristol Bay) and 7(Lake/Peninsula-Bristol Bay).

(3) Regional educational attendance areas 8(Aleutian Chain), 9(Pribilof), and 10(Adak).

(4) Regional educational attendance areas 18(Northern Panhandle), 19(Southern Panhandle), and 20(Metlakatla/Annette).

Response

To obtain comments on boundary adjustments under consideration, the Department of Community and Regional Affairs:

(1) scheduled and conducted public hearings in affected areas;

(2) attended and participated in public workshops conducted by the Office of Coastal Management;

(3) published a public notice in several newspapers of general circulation;

(4) sent a cover letter (or memorandum) and information packet to mayors and city managers of coastal communities in affected areas, village council presidents, village corporation presidents, Coastal Policy members from affected areas, numerous state and federal agencies, and a variety of interest groups;

(5) delivered presentations at meetings of organizations drawing individuals from throughout an affected area (e.g., the Southeastern Conference in Sitka, and a Bristol Bay Area Health Corporation Board of Directors meeting in King Salmon);

(6) held informal meetings and discussions with people in affected areas; and

(7) made a brief presentation to the Coastal Policy Council at their October, 1977 meeting in Kodiak.

Public hearings were held in Unalaska, Juneau, Dillingham, Ketchikan, and Craig. Hearings were also planned in Bethel, Emmonak, Naknek, St. Paul Island, and Petersburg, but were not conducted as a result of scheduling difficulties. Public sessions not actually conducted as formal hearings were held in Petersburg and King Salmon. Hearings were generally poorly attended, with members of the public present ranging from two to twelve.

Department of Community and Regional Affairs representatives attended coastal management workshops conducted in Kipnuk, Kotzebue, Juneau, Anchorage, Kodiak, Ketchikan, and Craig. Coastal resource service areas represented an item actively discussed at several of these workshops, as well as other workshops carried out in locations such as Bethel, Dillingham, and Unalaska.

Written comments were received from three state agencies, four federal agencies, and eight other individuals representing private corporations, non-profit associations, local governments, or no identifiable affiliation.

No clear consensus has emerged. Several comments received were not actually directed toward furnishing guidance on coastal resource service area boundaries. Many expressed a preference for creating coastal resource service areas smaller than existing REAA's. As previously noted, this is not allowed by statute.

Comments on the Nushagak-Bristol Bay and Lake/Peninsula-Bristol Bay REAA's (6 and 7) were mixed, but a majority of those presenting their views favored a single coastal resource service area for the Bristol Bay region.

Comments on the Northern Panhandle, Southern Panhandle and Metlakatla/ Annette REAA's (18, 19, and 20) were predominantly in favor of maintaining separate areas, although many also supported a coastal resource service area that would include two or more REAA's.

Comments on the Aleutian Chain, Pribilof and Adak REAA's (8, 9, and 10) were also mixed, but a majority of commentators supported maintaining three separate areas.

Input on the Lower Yukon and Lower Kuskokwim REAA's (3 and 4) was limited by an inability to schedule a hearing there, but a majority of those who made recommendations expressed a preference for a single coastal resource service area in the Yukon/Kuskokwim Delta region.

Determination

( ) Section 46.35.120(c) of the Alaska Coastal Management Act, which requires a final determination on coastal resource service area boundaries by December 4, 1977, should be amended. A majority of citizens appearing at public hearings and expressing themselves through other means were unable to make an informed recommendation on territory that should be included in a coastal resource service area without a clearer understanding of what a coastal management program would entail. A determination by the Commissioner of Community and Regional Affairs without substantial input from affected residents is inconsistent with the Act's emphasis on a strong local role in coastal decision-making. Since no time frame is specified for service area organization, the problem could be rectificed by revising Section 46.35.120(c) to read:

> (c) a determination under (b) of this section shall be made before organization of the coastal resource service area.

Because expanded opportunities for better informed public input might result in preferences contrary to combinations recommended in this report, specific provision for "deconsolidating" REAA's combined should also be made, if the amendment suggested above is not interpreted to accommodate that option.

(2) We encourage that if a service area is organized in the Bristol Bay region, it should include both the Nushagak-Bristol Bay and Lake/Peninsula-Bristol Bay REAA's (6 and 7), and have therefore combined these REAA's. Although distinctions exist between these two portions of the region, these differences are outweighed by areawide commonalities.

(3) We support maintenance of two separate coastal resource service areas in northern and southern Southeast Alaska, and inclusion of the Metlakatla/Annette REAA (20) in a single service area with the Southern Panhandle REAA (19). Inclusion of REAA's 19 and 20 in a single service area is based on the criterion in AS 46.35.120(b)(1) concerning land held in trust by the Federal Government for Alaska Natives. While Southeast Alaska is a distinct region, significant differences between communities at northern and southern extremes of the region, as well as substantial distances involved, discourage formation of a single service area at this juncture. In addition, Southeast's unusual situation, with a number of small, dispersed first class cities, relatively few second class and unincorporated communities, and a majority of coastline under U.S. Forest Service jurisdiction, points out a need to consider special adaptations of the coastal resource service area, or alternatives to it, for responsive coastal

planning and management in this region.

(4) At this time, we encourage maintenance of three separate areas for the Aleutian, Pribilof and Adak REAA's (8, 9, and 10). The Pribilof Islands are linked to the Aleutian Chain by certain transportation, cultural and related ties, but remoteness makes the Pribilofs an independent entity in many respects. While Section 46.35.120(b)(1) of the Act provides grounds for including Adak in a combined Aleutian coastal resource service area, a disadvantage would be that the Adak Island population, which is solely military, contrasts sharply with that of civilian communities characterizing the remainder of the Aleutian Chain.

(5) We encourage that if a service area is organized in the Yukon/Kuskokwim Delta region, it should include both the Lower Yukon and Lower Kuskokwim REAA's (3 and 4), but consider it inappropriate to place these REAA's in a single service area prior to adequate public hearings.

Conclusion

The major question facing unorganized borough residents with respect to the Alaska Coastal Management Program is what form coastal management should take in their areas. Coastal resource service area boundaries represent only one aspect of this question, and one that cannot be responded to in an informed manner without considering what a coastal management

program might consist of, and how it should be carried out. These answers can only be furnished after a thoughtful educational and local involvement effort which was not possible in the constricted time frame and with the limited subject matter that applied to consideration of service area boundaries.

The Office of Coastal Management's recently completed extensive series of public workshops has provided a crucial first step in informing localities and their citizens about coastal management. With a Coastal Policy Council that is just becoming operational, and basic guidelines and standards that are only now being formulated, disseminated, and reviewed, final determination of service area boundaries at this time is premature, however.

We strongly encourage that the Coastal Policy Council devote careful attention to the complex question of coastal planning and management in the unorganized borough, and that service area boundaries be considered in the more appropriate context of but one component of broader questions involving the unorganized borough, before final boundary determinations are made. A minor amendment to the Alaska Coastal Management Act, as described in this report, is required to allow service area boundaries to be considered in this context, and we support such a change as a step which would strengthen Alaska Coastal Management Program effectiveness.

MEMO

TO: Lisa Rudd FROM: Annette Smith

January 26, 1978

Subject: Approval of Coastal Management Guidelines and Standards

I asked Jack Chenoweth about the procedure for legislative approval of the guidelines and standards of the Coastal Management Policy Council and the possibility of amending them should the Committee feel this was necessary.

If we approach the guidelines as though they are part of the Coastal Management Program, then legislative approval is accomplished by concurrent resolution (46.35.080). In his opinion this precludes any amendment of the guidelines during the legislative process. It would be simply approval or rejection of the entire package. Therefore, any amending of the guidelines would have to be done to the hearing draft and submitted to the Council at its meeting in March when it deliberates on the final draft to be submitted to the Legislature.

Sec. 46.35.080 does not name the guidelines and standards specifically as part of the Program which is to be approved by concurrent resolution of the Legislature. It seems to include everything else which would logically make up the Alaska Coastal Management Program, i.e., each individual district program and any amendments or revisions will be submitted for approval by the Legislature as they appear.

Sec. 46.35.040 (p.7) identifies the guidelines and standards as "regulations" to be adopted under the provisions of the Administrative Procedures Act (AS 44.62). As regulations, they will eventually be reviewed by the Administrative Regulation Review Committee of the Legislature which can recommend annulment of certain regulations.

Section 6 of the CZM law provides that the Administrative Review Committee will review regulations adopted by the departments to insure conformity with the objectives and standards of the CZM Program.

Lisa:

Here's a copy of Joe Josephson's notes on CZM guidelines, given to the council in written form at the last meeting in Juneau.

Specifically, the problem we have is that an oil and gas lease is not specifically designated as a matter of "state concern", and although the guidelines and the statute clearly refer to "energy facilities" as matters of state concern, shouldn't the lease itself also be included under that definition? If it isn't, then there is vagueness in the law that will lead to litigation down the road...

You might raise the question, if you wish, at your meeting with CZM people on Friday. Otherwise, I'll keep you informed as to our progress with the council in getting the guidelines to clarify this matter....State DNR, incidentally, supports this inclusion of leases as matters of state concern...

Our intent is to in no way limit local govt P&Z jurisdiction over surface uses, but rather require that local govt P&Z be required to justify their action with an analysis, procedure, etc. which they would be required to do if with all "land uses of state concern", e.g. energy facilities. If an oil and gas lease is not included as an "energy facility" or designated as a "use of state concern", then the local govt can do what it wishes with zoning decisions over state oil and gas leases, with no requirement to justify their action.

Tim Bradner

1-12-78

Joe P. Josephson

NOTES FOR ALASKA COASTAL POLICY COUNCIL

Premise: Federal and state coastal zone management laws have as a principal goal the improvement of intergovernmental cooperation and coordination in the regulation and management of activities in the coastal zone.

Evidence for Premise: 1. Staff Comment #15: "The Council will determine if local programs are consistent with the guidelines and standards.

"The guidelines and standards will be the basic criteria for federal agencies to determine consistency..." (p. 5).

2. Staff Comment #25: "The purpose of coastal management is to coordinate efforts by different units of government, not establish new permits or layers of control..." (p. 16).

3. Staff Comment #2: "Standards will be implemented, primarily, by local zoning and existing state regulations...". (p. 22).

4. Staff Comment #36: "A basic concept leading to the development and approval of the Alaska Coastal Management Act was that no new coastal management permits would be created. The guidelines and standards may be applied as criteria for existing regulatory efforts, however." (p. 36).

5. Staff Comment #8: "The Act provides a test for the Council to apply to district programs when it is stated that a regional interest is being limited by local action." (p. 36)

6. Staff comment #25: "The state is responsible for siting decisions on a regional or statewide basis. The coastal management process will cause coordination with coastal districts. (p. 43).

7. Staff Comment #26: "District program guidelines and the standards encourage proper siting, not prohibition of (energy) facilities." (p. 43).

8. State statutes:

a. AS 46.40.070: Local restrictions or exclusions on a use of statewide concern should be approved in a local management plan only if "the District has based its restriction or exclusion on an analysis

showing that the proposed use is incompatible with the proposed site."

b. AS 46.40.020: Requires the adopted collection of local district plans to be "consistent" with "the recognition of the need for a continuing supply of energy to meet the requirements of the state and the contribution of a share of the state's resources to meet national energy needs".

c. AS 46.40.030: Requires district programs to be consistent with state guidelines and standards, and to include a description of the uses and activities which will be considered both proper and improper within the coastal area; a statement of policies to be applied, and the procedures to be used to determine whether specific proposals for land and water use activities shall be applied; and a designation of policies to be applied in coastal areas which merit "special attention".

d. AS 46.40.040: Requires the Alaska Coastal Policy Council to "initiate a process for identifying and managing uses of state concern within specific areas of the coast...". (State guidelines and standards must include policies and procedures to determine whether specific proposals for land and water use activities within a local district shall be allowed.)

e. AS 46.40.060: Requires the Council to find that local district programs are "substantially consistent" with all provisions of AS 46.40 and that the programs do not "arbitrarily or unreasonably restrict or exclude uses of state concern" before a local program can be approved. It also provides for mediation of disputes between the Council and local districts over elements of a local coastal plan.

f. AS 46.40.100: Provides for enforcement of local coastal programs and establishes a right to petition the State Council to show that a district coastal program is not being properly implemented or enforced.*

9. Legislative History of the Coastal Zone Management Act of 1972 (P.L. 92-583):

Senate Report No. 92-753, 3 U. S. Code Cong. &

Admin. News 4776 (92d Cong.):

"The intent of this legislation is to enhance state authority...

"...At present, local governments do possess authority in the coastal zone...Local government needs financial, planning, political, and other assistance to avert damage to natural values in the coastal zone...

"...The American Law Institute has estimated that at least 90% of the current land use decisions being made by local governments have no major effects on state or national interests. Local governments should maintain control over a great majority of matters which are only of local concern. The range of problems that arise in the coastal zone, however, often calls for wider jurisdictional range...

""It is the intent of the Committee to recognize the need for expanding state participation in the control of land and water use decisions in the coastal zone...".

10. See also, e.g., Mandelker & Sherry, "The National Coastal Zone Management Act of 1972", 7 Urban Law Annual 119 (1974): "...CZMA also seems directed toward a centralized supervision of shoreland uses that require state control... The second additional development control requirement...requires that the state CZMA program provide for 'adequate consideration of the national interest involved in the siting of facilities necessary to meet requirements which are other than local in nature.'...Critics of the American land use control process have long argued for greater state involvement in the regulatory system and have called for greater assumption of state power over the land use decisions of local government. Though restricted in application to the coastal zones of the thirty coastal states, the Coastal Zone Management Act of 1972 represents the first national effort, through congressional initiative, to bring about a re-allocation of these land use control powers."

See also W. Brewer, "The Concept of State and Local Relations under the CZMA", 16 William & Mary L. Rev. 717 (1975): "One of the goals of the Coastal Zone Management Act of 1972 is to shift the focus of decisionmaking in certain

areas of regional and national interest from the local to the state level."

11. 15 CFR 923.11; 15 CFR 923.43 (requires that state programs provide "a method of assuring that local land and water uses regulations within the coastal zone do not unreasonably restrict or exclude land and water uses of regional benefit"); 15 CFR 923.52 (requires the state to "consult" with industry to "determine the potential regional, interstate, national and/or international demand for such facilities in each state" and says that "the adequacy of a state's consideration" during program development of national interest involved in the planning for or siting of facilities which may be more than local in nature" is very important in terms of obtaining federal approval of state programs.)

Query: With respect to energy development sites, and energy production areas leased by the state, do the proposed guidelines and standards adequately protect the national and state interest?

Relevant Provisions:

6 AAC 80.020 - would require the Division of Policy Development and Planning to determine the consistency of state actions with the Alaska Coastal Management Program and to respond to federal agency determinations of the consistency of federal actions therewith. DPDP would not have a like role with regard to local actions. However, "the Council shall identify specific uses of state concern (as defined in AS 46.40.210(6)) and areas of the coast where uses of state concern shall be sited and managed...". Also, the Council "shall direct the development of management policies and practices for uses of state concern by state agencies and coastal resource districts". Query: what is the definition in AS 46.40.210(6)? What does it mean to "direct the development of management policies and practices"? What authority is thereby given?

6 AAC 80.060 - "Sites suitable for the development of major nearshore and onshore petroleum-related facilities shall be identified by the state in cooperation with coastal resource districts. The siting and approval of these facilities shall be based on the policies of the State of Alaska concerning the onshore and nearshore aspects of

OCS development. Coastal resource districts may use and apply these policies in the preparation of district coastal management programs." Query: Why is the reference just to state "policies...concerning the onshore and nearshore aspects of OCS development"? Why does the paragraph say only that districts "may" use and apply these policies, instead of that they "must" or "shall" do so?

6 AAC 85.010 - Boundaries within a district coastal management program "may diverge from the interim boundaries (the requirements for which are set out in the same paragraph) but must "exclude those areas owned, leased, held in trust, or whose use is otherwise subject solely to the discretion of the federal government, its agents, and officers." Query: why is this exclusion only as to federally owened, controlled, or leased areas? What is the relationship intended as to state-leased lands, and the obvious state interests to be inferred, i.e., the attainment of production from the leased areas where the resource exists in commercial quantities?

6 AAC 85.010(7) - "Policies and regulations (of the district coastal management program) shall be consistent with the standards of the Alaska Coastal Management Program contained in 6 AAC 80 and shall meet...additional criteria...".

6 AAC 85.010(8) - (The district plan shall include) "a description "of the uses and activities which will be considered proper and the uses and activities which will be considered improper with respect to the land and water within the coastal area. This description shall be based upon the district's statement of overall needs, objectives, or goals. or the district's comprehensive land and resource use plan, and shall be consistent with the standards of the Alaska Coastal Management Program contained in 6 AAC 80."

6 AAC 85.010(9) - "...It shall be the general policy of the coastal resource district to approve specific proposals for land and water uses and activities which are consistent with the district coastal management program."

6 AAC 85.040 - (Districts shall provide)"opportunities for coordination and review by governmental agencies and other parties with a significant interest in coastal resources...".

PROBLEM: Since federal regulations, and federal and state statutes, seek to promote coordination of government activities, and to recognize paramount national and state interests, the proposed new regulations should make manifest, as a matter of legislative housekeeping, that local coastal districts will not thwart state land management policy. This is obviously the intended policy, and indeed a goal of the Coastal Zone Management Act. (See above). But it must be an explicit regulatory standard governing the review of coastal district plans and plan implementation.

There are many ways to accomplish this correction of an oversight, or of the susceptibility of the existing draft to misinterpretation inviting dispute or litigation, including the following:

Add a provision saying that "coastal resource districts shall consider that the uses contemplated by the issuance of state leases for mineral and petroleum resource extraction are specific uses of state concern. District coastal management programs and plans shall be consistent with such uses."

Or/And

Add to proposed 6 AAC 85.010(7): "Policies and regulations (of the district) shall be consistent with the standards of the Alaska Coastal Management Program contained in 6 AAC 80 and shall meet...additional criteria, <u>including consistency with uses contemplated by the issuance of state leases within the district for mineral and petroleum resource extraction or related purposes</u>."

Or/And

Add to proposed 6 AAC 85.010(8): "The description of the uses and activities which will be considered proper within the coastal area shall not be inconsistent with established state policy as made manifest by the issuance of leases in effect for the exploration or extraction of mineral or petroleum resources of the state."

Or/And

Add to proposed 6 AAC 85.010(9): "...It shall be the general policy of the coastal resource district to approve specific proposals for land and water uses and activities which are consistent with the district coastal management program, and the classification and management policies governing state lands as otherwise established or promulgated."

RATIONALE

1. Protects paramount state interests and state policy governing state lands.
2. Creates a more favorable environment for business and investment, tending to increase bidding on state leases in a more predictable climate.
3. Avoids possibility of regulatory vagueness leading to (1) intergovernmental conflicts or (2) conflicts between private parties and government, or (3) litigation.
4. Proposed state preleasing procedures will provide ample opportunity for comment and input from districts and municipalities prior to state decision to lease.

Re: telephone conversation with Gordon Ryan, City Manager of Dillingham. I conveyed to him what was in the letter of May 15 from the Department of Environmental conservation - that the Commissioner doesn't see the need for HB 707.

Gordon Ryan said that they might have problems with the new site location. He says the site they're looking at now will probably be unacceptable by DEC because of the high water table therefore he still sees the need for HB 707.

5/16/78 - Sent copy of DEC's letter to Gordon Ryan asking for his response in writing as soon as possible.

STATE OF ALASKA

DEPT. OF ENVIRONMENTAL CONSERVATION

JAY S. HAMMOND, GOVERNOR

May 15, 1978

The Honorable Nels A. Anderson, Jr.
House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Representative Anderson:

I understand that you may be interested in pursuing passage of HB-707. As progress is being made toward solving the Dillingham problem, you may wish to reconsider the need for this bill. It is my impression that the Dillingham situation is well on the way to a mutually acceptable solution.

As you probably know, Dillingham applied for a permit on or about April 1 as required by a compliance order. On April 12 Richard Williams and Gary Garthwait of our Department, and Mr. Don Caswell, Public Works Director, City of Dillingham visited the proposed site for a new landfill on Wood River Road. Mr. Williams and Mr. Garthwait were optimistic about the general potential of the site. Mr. Caswell confirmed the statement in Dillingham's permit application that soils and groundwater data would be available after the spring melt.

On April 19, 1978 Mr. Reinwand, our Deputy Commissioner reminded Mr. Ryan, Dillingham's City Manager, of the need for the soils and groundwater data. Mr. Reinwand also furnished Mr. Ryan with some sample development plans for the site.

Mr. Garthwait has maintained contact with Dillingham officials and is not aware of any real problems they are having meeting our requirements. If you are aware of something I am not aware of, I would greatly appreciate a telephone call.

Sincerely,

Ernst W. Mueller
Commissioner

Gordon Ryan - 842 - 5211

5/15/78

Gordon Ryan -

Enclosed a letter we've received from DEC.

Please respond to the letter in writing and send to our office as soon as possible.

Thank you.

IN THE HOUSE BY ANDERSON

HOUSE BILL NO. 707

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - SECOND SESSION

HB7

A BILL

For an Act entitled: "An Act relating to sanitary landfills."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 46.03.020 is amended by adding a new paragraph to read:

(12) require relocation of municipal sanitary landfills; if the municipality has not received patent to the total amount of land for which it is eligible under AS 29.18.190 and 29.18.200, and if exercise of the municipality's power of eminent domain would be required to provide a suitable relocation site, the department may not require relocation until a suitable relocation site becomes available without requiring the use of the power of eminent domain.

* Sec. 2. AS 46.03.900 is amended by adding a new paragraph to read:

(25) "sanitary landfill" means a land area used for the disposal of solid waste.

Mr. Gordon Ryan
City Manager
City of Dillingham
Box 191
Dillingham, AK 99576

Dear Mr. Ryan,

Concerning Choggiung's mile 7 gravel pit as a future solid waste disposal site, as you are aware per our discussion recently, Choggiung is developing the pit with a future dump site in mind. We are conforming to D.E.C. and B.L.M. guidelines in that we are not excavating below three feet to the water table and the pit is well concealed from the Dillingham Aleknagik road. This should be a suitable dump site for the City when the gravel is exhausted. This summer we uncovered a rich vein of clean aggregate which extends from the Northern portion of our current excavation. This deposit could supply Choggiung's construction company with superior quality gravel for 3-5 years depending upon market condirions. As you know, the mile 7 pit is the closest gravel source we have to town. Moving out the road to another site would be economically disastrous to our company. We are working to acquire gravel on Native allotments closer to town but as yet have had little success. We therefore regret to inform you that the mile 7 pit will not be available for solid waste desposal until the valuable material in the pit can be sold. We appreciate that the City recently made a large purchase of gravel from us to help deplete the pit, but there's still a long way to go. We're selling gravel at the lowest prices in town. We do intend to turn the pit over to a dump site, but as you can well understand, this cannot occur until the gravel is exhausted. I hope this clarification proves helpful to you and others who may not realize that both Choggiung and the City are doing all they can to solve the dump problem.

Sincerely,

J.P. Godfrey
General Manager

February 14, 1977

Mr. Widom
City Manager
Box 191
Dillingham, Ak. 99576

Cenai Mr. Widem:

Any time that would be convenient you should schedule a meeting. The Choggiung boardland the City council shave a number of interests and we encourage a frank swapping of ideas, frustrations and proposals.

Concerning the gravel pit we hope to begin hauling from this site early thi this summer. The warm winter could make for an early start up for our construction season. At such time as we have reduced the floor of the pit to within four feet of the water table we will consider the development of a sanitary land fill site here. As you know we have been developing the site consonant with the development plan worked up by the people at DEC. So when this area is no longer economically useful to us we will certainly have you in mind. Our letter of September 21, 1976, spelled out our feelings on this matter rather clearly. A copy was sent to all council members at that time.

The Division of Aviation is probably pushing DEC hard. We respect their concerns but if your response must be immediate we suggest you find a new location.

Sincerely yours,

William Tennyson
President

P.O. BOX 247 • DILLINGHAM, ALASKA 99576 • PHONE (907) 842-3083

September 21, 1976

Ivan Widom
City Manager
City of Dillingham
Dillingham, Alaska 99576

Camai Mr. Widom:

Choggiung Ltd. has worked diligently this summer to clear the 7 mile gravel pit for use as a sanitary land fill site for the City of Dillingham. Fortunately or unfortunately, depending on your view, the pit area still contains an impressive amount of gravel. The quality of the gravel is excellent and our best estimates indicate that at least 12' - 15' feet of gravel still remain in the two acre circular deposit.

Choggiung Ltd. sold gravel at a reasonable rate this summer from this area. We kept prices down so that gravel use would become common again in this area. We sold gravel to all corners, whether they be private, public, competitors, or what have you. But try as we might we did not lower the pit floor to the minimum three feet above the water table for which we were shooting.

Then we receive a letter from the City stating that the move into the pit is soon to occur. When Mrs. Schroeder and council members met with the Choggiung Board the board indicated their willingness to work towards a solution of the dump problem through use of the 7 mile pit. But this willingness was based on exhausting the gravel and developing and managing a pit satisfactory to the road residents. However, we do not believe that such a move is in the best interests of the community at this time. The result will drive up the price of gravel and waste an excellent deposit in mid-development. Further it will create strained feelings between the City and the Village at a time when these emotions are best bottled.

What it boils down to seems to be this. Since it selected 7 townships of land from the federal government under the provisions of ANCSA Choggiung has acted as the land sugar daddy in this community. Even though less than 1% of this land has been transferred to Choggiung ownership the village corporation has bent over backwards to meet the City's land needs. First it was land for the KDLG tower. Choggiung went out on a limb to make acres available but now the community has a functioning radio station that the entire region appreciates.

The RCA antenna lease recently concluded by the City is another example of Choggiung's willingness to make land use decisions in the best interests of the community. The fragile conveyance arrangement we cooked up for that transaction was again above and beyond the limits of the land laws that control us. But Choggiung made these efforts in your behalf because a community value was at stake.

Yet another indication of this same attitude on Choggiung's port is the conveyance of land for the first City garbage dump project. When the City requested the acreage Choggiung manipulated the land laws so that this land would be under your management control. Unfortunately the road proved worthless because the area was unsuitable for land fill purposes. But Choggiung did not smirk or cast the City adrift even then. The village worked hard to convince the housing authority that this same tract could be used for housing purposes. The village even suggested that the Authority should purchase the road from the City as then the expenditures there would not be a total loss. You have copies of our correspondence on this matter.

We offer these examples of Choggiung's willingness to make land use decisions and to expend considerable effort that benefits the community as a defense of our unwillingness to put garbage over gravel at 7 mile. The airport pit has served the City well since the City began expending effort to control this situation. Rather than ruining the 7 mile pit or creating a marginal temporary site in this area we urge the City to postpone occupation of 7 mile until the gravel here has been substantially depleted. As any review of the 7 mile site will show, Choggiung has been working this deposit in accordance with the development plan prepared by the State DEC. Visual screening has been accomplished through the use of spoil berms. A constant eye has been peeled for the water table so that excavation does not go too deep. We have been playing ball to the best of our ability and now we request that you take these factors into account.

It should be remembered that garbage dumps and airports are good neighbors in Anchorage and other municipalities with much heavier air traffic than Dillingham. Another fact that springs to mind is that the City is not always so quick to take the advice and direction of the Division of Aviation in land use matters. Perhaps an extension of time will allow cogent land management in the 7 mile area to develop.

We appreciate your correspondence on this matter and look forward to a responsible land use decision from the City.

Sincerely yours,

William Tennyson

Dillingham, Alaska 99576

Dear William:

The City Council discussed the 1280 acres which will be reconveyed to the city at last nights meeting. They appreciate your boards efforts to provide us with areas for such things as potential dump sites,gravel,sewer needs, etc.

They have requested I ask if it would be possible to square off the area marked 9 and change this amount to the Catholic Mission area, Survey 3699, for possible school or educational purposes. Twenty-five acres were mentioned.We realize the council has not given all of the input to your board on this matter that they perhaps could have,however, the Catholic Mission property has been discussed for some time as a school or college site. We are aware that some of the land has been already set aside for Prince,Jones,Franklin and the church.

Would it be possible to have some of our council meet with your board at the next regular meeting to discuss both the 7 mile pit and this reconveyance?

Sincerely yours,

Laura

RE: GARBAGE DUMP

Camai Laura:

Our meeting is scheduled for June 2. It beginsat 7 but you will not come up until 8. We received a copy of a petition indicating that the road people and others were not happy with the Mile 7 alternative. I also received an indication that the folks at PHS figure that the land they manage will not support additional land fill activities. Has aviation softened their line? The dumps are at the airports in Anchorage and they certainly have a more active air transport industry there. The problem appears to be a thorny one and I believe that much care and preparations should precede any decision.

Sincerely,

Tom Hawkins

Re: GARBAGE AA-6659A

Dear Mr. Merrick:

Sanitary land fill plans march forward. Gary Garthwart of the State's Department of Environmental Conservation visted Dillingham and gave us a go ahead on the site we described to you. We attach his letter to the City Manager.

Now the crunch. DEC cannot issue permits unless you assure the City's land tenure. Choggiung plans to reconvey all of the unsurveyed land in Section 16 T13S R55W S.M. to the City. We will also reconvey Lot 2 of USS 4974 to them. But as things go I.C. may never issue. So we need that interim action that will let us do what needs to be done.

We look forward to your response.

Sincerely,

Tom Hawkins

Fall, 1977

Attempts Made by the City of Dillingham to Relocate Landfill Site

I. SITE NORTH OF TOWN ON CHOGGIUNG LAND SELECTION

A. Choggiung managed to secure permission for us to use this land, conveyed by quit claim deed, which they have not actually received by reconveyance yet themselves.

B. Site approval given by DEC. (They now say it was not approved)

C. All of our Local Service Roads and Trails monies for three years used to build a road to this site (Amount $65,000+).

D. Road was completed in fall of 1975.

E. When crew began digging trench for solid waste, water level was too high and the hole filled with water after digging only a few feet. Difference of opinion on whether the area could be drained and used. Most people of the opinion that if drained it would take a year or more before it would be usable.

II. ATTEMPTS MADE TO SELECT A DIFFERENT SITE

A. Worked closely with Tom Hawkins, Land Planner for Choggiung in attempt to select another site.

B. After consideration of several different locations which had to be abandoned due to proximity to airport, in line of flight, no access, too near stream, etc., 7 mile gravel pit appeared to be best location found.

C. Choggiung informally agreed to make this site available after gravel was removed. City paid to have a test boring done to determine how much gravel remained and how high the water table was. It was determined that an additional 15 feet of gravel was in the pit. Members of City Council met with Choggiung Board.

D. Stockholders of Choggiung who live near the area of gravel pit drafted a petition signed by over 70 stockholders protesting the location of the landfill in this gravel pit.

E. Choggiung Board reversed plan to make the pit available, stated it is doubtful that pit is located within city limits, said they had already given us one "dump site" and asked how many times they have to do this for the city.

F. Relations became somewhat strained between city and village corporation.

III. FACTORS CONTRIBUTING TO PROBLEM

A. Lack of continuity. Since the effort was begun in 1975 to relocate the landfill, the city has had 4 city managers and 2 acting city managers, 4 public works directors. Choggiung has had 3 managers.

B. Everyone agrees the dump must be moved but nobody wants it

C. City attempts to complete needed projects using its own labor force in order to stretch limited funds available as far as possible. For this reason, water and sewer work, road building, a city dock, cold storage plant remodelling, as well as normal maintenance tasks have been carried out by a public works director, foreman, and 5 general maintenance crew. The 5 man crew are CETA employees. Turnover has been rapid, many leave to go fishing during the summer and so training must be repeated frequently. Additional help is hired when special funding is available, such as for the cold storage remodelling.

IV. ATTEMPTS TO MAINTAIN PRESENT SITE IN BEST POSSIBLE CONDITION.

A. Two landfill maintenance people are hired through the CETA program to control dumping and keep the area as clean as possible.

B. D-7 Caterpillar was purchased at a cost of over $30,000 to push back the garbage and compact daily.

C. A permit was received to kill birds at the dump. This procedure broke down temporarily due to change of city personnel, but was reinstated with good results.

V. OTHER ATTEMPTS TO RELOCATE SINCE DEC HEARINGS JUNE 6, 1977.

A. Other possible sites pursued with the following results:

1. Owner of abandoned gravel pit contacted about possible purchase by city. Owner not interested. He has sold lots nearby for new homes and some have been built. Pit is not too desirable because there are no screening trees and it was not developed in a way which would make it suitable.

2. Owner of property contacted the city and offered to sell his land since he was leaving the area. Price requested was not to be devulged, but was in the 6 figure bracket. Site would also require great deal of development. ↓ too near airport.

3. Another abandoned gravel pit was investigated. It is on land selected for a native allotment, has not been granted yet. BLM was contacted by city to try to learn status. They said status was indefinite due to possible mineral availability, and would require several hearings before status could be resolved. Nothing had been started on these hearings and no plans to begin were prospective. This site had been considered several years ago and local residents protested because of a nearby stream. They secured support from Fish and Game in their protest, and the site was dropped at that time.

4. Better relationship regained with Choggiung and further attempts made to secure Mile 7 pit. They have discovered a new vein of gravel and do not foresee its availability for several years.

Dillingham Landfill (Continued)

VI. ALTERNATIVES

A. Attempt to drain original new site to which road was built. One problem involved is that road is already deteriorating and garbage trucks would have difficulty using it, especially during breakup. If road must be rebuilt, this would use a good portion of our LSR&T monies again, and streets are desperately needed in the townsite to open up building lots which are now locked in. If the town is to develop, these must be built.

B. Wait for Choggiung to empty their pit and make every effort to maintain the present dump in a satisfactory manner to eliminate the bird hazard. Possibly a high fence could be built around the area to cut down on the unsightliness inherent in any landfill.

The City of Dillingham has not been indifferent to the need to move the landfill site. They have spent a considerable portion of the city's available resources, both monetary and manhours, toward that end. Now that a city manager and public works director have been secured who intend to stay for a long period of time, and as they have become knowledgeable about the problems existing, a solution is being actively sought.

An attempt was made to build roads this fall with LSR&T 2 years allocation of $91,000. Originally we were told that none of the funds could be used for the purchase of gravel. Later this was clarified to state that if we could document that no free gravel was available to us from any source, we could purchase it. The city council appointed a committee to revise the priorities of the streets to be built and the Dept. of Transportation was contacted to clarify the procedure to be followed. The council hoped to help empty Choggiung's gravel pit by expending these monies for gravel for road building.

Procedure involved (see attached) was so lengthy and time consuming that it was doubtful if it could have been completed this fall unless very good weather was promised. This project, along with additional funds to bring the total to $135,000 will be ready to begin in the spring of 1978.

Telecom Robert Haneline/Dept. Transportation 9/20/77 (243-1255)

Procedure for securing Local Service Roads and Trails Funds

1. Contract agreement signed by local governing body sent to Anchorage office. It will be forwarded to Juneau for action by their headquarters office.

2. Agreement includes the following:

   a. Statement of intent
   b. Cost estimate
   c. Description of roads to be built.
   d. Project location map.
   e. Typical roadway cross-section showing width, slopes, etc.

3. Resolution signed by city council stating they want the funds authorized to be spent on this project.

4. Something to show that we have right-of-way easements. Could be a townsite map if adequate rights-of-way are shown.

5. Need backup statement showing that no free access gravel pits are available for our use and that we will have to purchase the gravel. Also stipulate the cost per yard which will be paid.

NO FUNDS CAN BE EXPENDED BEFORE APPROVAL OF THIS AGREEMENT IS REACHED OR WE WILL NOT BE REIMBURSED FOR THEM. Will take about 1 week to get this back.

Second step - After approval of agreement, can proceed with design and charge these costs to the project.

BEFORE ADVERTISING a list of bid items, contract plans and estimate of cost must be sent to Dept of Transportation for approval. After this approval is given, we can advertise for bids. Minimum bid period on small projects of this type is 15 days. At end of bid period, we can open the bids.

BEFORE AWARDING CONTRACTS the bids must be submitted to Dept of Transportation for their approval.

The specs can be written in such a way that alternates can be provided, perhaps each street listed separately and bid on as many as they want. This way can utilize the full amount of money available.

Priority list can be changed up until the time of the resolution, then must be followed.

Mr. Haneline will send a book of specs used on a job at Aleknagik which would be of help to us and perhaps eliminate need for engineering firm. He stated that starting on construction this late in the season would probably result in a waste of materials due to high moisture content and would be a drain on our funds.

Dear Mr. Case:

Kyle Cherry informed me of the plans the City of Dillingham is making for operating a sanitary landfill. Needless to say, we are pleased to hear of your plans and will certainly assist you in planning and site selection. I have made many attempts the past three days to call you but have not succeded in getting through. I would like to spend July 2nd in Dillingham and would like to meet with you to discuss your plans and look at the proposed site at that time. I plan to arrive on the morning Wien flight and leave in the afternoon if possible.

I will continue to try to call you to confirm this meeting and would appreciate hearing from you if I have not contacted you by the time this letter arrives.

I look forward to working with you on this project.

Very truly yours,

Gary F. Garthwait
Sanitary Engineer I

Mr. Samuel Coxson
City Manager
City of Dillingham
P. O. Box 191
Dillingham, Alaska 99567

Dear Mr. Coxson:

Enclosed is information we discussed regarding Solid Waste Processing.

The cost data presented is not applicable to Dillingham because of several factors including recent excalating materials costs, these processes become more economical when dealing with large scale installations, and the remoteness of Dillingham from manufacturing sources. I also wish to restate that processes such as shredding and baling are only methods of reshaping Solid Waste and the problem of ultimate disposal still remains even though the waste goes through the processing stage.

I have reviewed past correspondence between you and our department and see that Lance Elphic has sent you some information on refuse incineration. You stated you found incineration to be too costly and therefore are investigating other alternatives. I believe you will discover that other methods of processing will be even more costly because unlike with incineration, you are still faced with landfilling a large volume of waste. Shredding has proven advantageous when it preceeds resource recovery or when landfill space is very costly. Baling reduces volume but still requires landfilling. Processing of waste becomes economical when it reduces the cost of disposal. I would estimate that shredding or baling would only slightly effect your landfilling cost whereas incineration would effect that cost somewhat more. Our requirements for landfilling the shredded or baled material are basically the same as for landfilling the raw refuse and so these processes would not eliminate your landfill problems.

As Mr. Elphic stated, time is of the essence, and if processing is not presently feasable, a properly located and operated landfill needs to be developed. As you stated in our conversation , regardless of the processing method, a landfill for ultimate disposal is necessary.

Sincerely,

Gary F. Garthwait

STATE OF ALASKA
DEPT. OF ENVIRONMENTAL CONSERVATION

JAY S. HAMMOND, GOVERNOR

POUCH O – JUNEAU 99811

February 10, 1978

The Honorable Lisa Rudd
Chairman
Community and Regional Affairs Committee
House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Madam Chairman:

On January 31, 1978, HB 707--relating to the solid waste management authority of the Department of Environmental Conservation--was introduced and referred to the House Community and Regional Affairs Committee. The immediate focus of the bill appears to be to assist the City of Dillingham in its opposition to the department's attempts to alleviate the public safety and environmental hazards created by that city's dump. That matter is now in the courts. In the long run, the bill could preclude approval of Alaska's solid waste management plan by the U.S. Environmental Protection Agency. Aside from being an embarrassment to a state trying to demonstrate its environmental responsibility, EPA disapproval would also involve a loss of federal solid waste management funds to the state, and, in the future, local governments, and may very well result in increased federal involvement in solid waste management in Alaska.

In analyzing the bill, it is important to understand the concept of a "sanitary landfill." A sanitary landfill has been universally defined as a solid waste facility sited to avoid safety, health and environmental hazards, confined to the smallest practicable area, and covered on a daily basis. Over the past several years, my department has worked closely with Alaska municipalities to convert their "dumps" to "sanitary landfills." Normally, this can be accomplished without requiring the closing of the existing facility. The program, I believe, has met with a substantial amount of success.

In some cases, however, cooperation has not been enough, and enforcement action is necessary. The City of Dillingham provides a case in point. Because of its location, the Dillingham dump creates both water pollution and public safety hazards. The proximity of the dump to the airport is

the department's greatest concern. Dumps--particularly poorly operated ones--attract birds, which in turn threaten air safety. A near catastrophe in Homer in September, 1976, which was disclosed at hearings on the Dillingham facility, illustrates well the magnitude of that threat. A Wien 737 jet with 52 passengers encountered a flock of sea gulls upon takeoff. One engine exploded and another stalled as several birds were ingested into the jet engines. Thankfully, the pilot was able to restart one engine and return to Homer before crashing into the sea. The cost to Wien from this one incident exceeded $250,000.

Because of this hazard, dumps located close to airports must, in certain circumstances, be relocated. Dillingham has recognized that this is the case with their facility, but has been, in our view, less than aggressive in finding other sites. HB 707, by precluding the department from directing relocation in the event that eminent domain is necessary, would substantially impair the department's ability to reduce adverse impacts associated with local dumps. While we are confident that relocation of the Dillingham facility can be accomplished without the use of eminent domain, the bill may well thwart necessary remedial action in future cases.

This is particularly true in light of the Resource Conservation and Recovery Act, passed by Congress in 1976. (P.L. 94-580) The Act authorizes the establishment of minimum standards for both hazardous waste disposal and solid waste management in general (secs. 3004, 4002), and provides states with the opportunity to develop solid waste programs to implement those standards (secs. 3006, 4007). My department is working hard to develop such a state program. The primary consequences of failure to develop an adequate program are (1) loss of solid waste management grant funds (sec. 4007(b)); and (2) direct U.S. Environmental Protection Agency involvement in local solid waste management (secs. 3005, 3006). EPA, it should be noted, can directly enforce its guidelines for solid waste management if an imminent environmental or public health hazard is present (sec. 7003).

The fundamental goal of the federal act is to convert existing dump facilities to sanitary landfills--which have been defined by EPA in the manner stated at the outset of this letter (except for the cover requirements). The act also mandates the closure of open dumps. To accomplish this, relocation of municipal facilities will sometimes be

required. The draft EPA guidelines, for example, explicitly require relocation where the facility is in close proximity to an airport--as is the case in Dillingham. Because HB 707 would deny the department the enforcement authority necessary to carry out the federal guidelines, and because the bill defines "sanitary landfill" to include open dumps--no matter how great the hazards they pose to the environment and human life--the likely consequence of its enactment would be substantial direct federal control over Alaska's solid waste problems. This would not only make solid waste control substantially more onerous on Alaska's municipalities, but would add considerable ammunition to the assertion that Alaska is incapable of managing its own affairs.

If you or any member of the committee have questions on this matter, please do not hesitate to contact me.

Sincerely,

Ernst W. Mueller
Commissioner

Al -

Will you move the amendment on SB 388 (coastal Mgmt - delete 1st section) & then move the bill?

Thanks -

L.

I'M PREPARED TO VOTE ON IT, NOT MOVE IT.

AL

HB
733

RUDD-HB733

DEVELOPMENT CITIES

Chapter 22 includes maximum participation by state agencies in ... review, guidance, financial and program assistance, but gives major control to the development city. The development city has all the powers of a regular general law city of its particular class.

There is no clear designation of the responsibilities of the developer, financial or otherwise, except that he must present an approved local hire agreement as a prerequisite to incorporation, and he must show satisfactory contracts for company products to show that the whole project should succeed.

State participation:

1) Council, membership includes Commissioner of DC&RA
Members appointed by Governor and serve at his pleasure.

2) State review of preliminary planning.
(Doesn't say anything about consistency with state regulations, though I suppose that is implied.
Doesn't say anything about the final comprehensive plan.
Doesn't say who will pay for either the preliminary plan or the comprehensive plan. Just says the city shall do it. So, it seems within the city's perrogative to approach the state for at least partial funding.)

3) State review of contracts for sale of company products before city can proceed with capital plans. This seems to be the major limitation on the city.

4) State to participate in local hire agreement with developer e.g., recruitment, vocational training, relocation assistance...

5) State agencies to look out for funds to help finance city's capital improvement program.

6) Revenue sharing program, state land selection.

Major control and options to City:

1) Time limits provided forall state action, but none designated for city.

2) All provisions of Title 29 apply where consistent with Chapt. 22
Thus city has all the powers and perogatives of a general law city.

3) Council acts as own housing and urban renewal authority.

4) At least 2 council members represent the developer.

Differences from regular cities:

1) Council is 5 members instead of 6 or 7
Appointed by governor - 1 mbr = Commissioner of DC&RA
- 4 public members

2) Exec. Dir. appointed by Council instead of Mayor
Has all powers of executive under Title 29
so he can be manager and mayor

3) State keeps close review of city programs.

4) City gets preferential treatment for state funding in that state agencies are charged to keep an ey out for funds to help finance city's capital program.

DEVELOPMENT CITIES

Sec. 29.18.220 Legislative findings. The legislature finds that the development of natural resources in isolated and relatively unpopulated areas requires a policy and procedure which will provide planning, financial and other assistance necessary for encouraging orderly development of well-planned, diversified and economically sound new cities necessary to support the sound development of the state's resources by both the private and public sector. It is the purpose of && 220-460 of this chapter to set out the mutual responsibilities of the private and public sectors to achieve these objectives with a view to securing information valuable to future legislatures so that general legislation applicable to the establishment of development cities may be perfected.

Sec/ 29.18.230 Class of city is designated by DC&RA.

Sec. 29.18.240 Incorporation is achieved by petition of industrial developer and decision by Local Boundary Commission, or by Act of the legislature.
Area must not be served by existing municipality or be reasonably practicable to be served by existing municipality.

Sec. 29.18.250 Petition must include the usual (class, name, boundaries) plus "maps, documents, preliminary economic development projections preliminary population projections, outline of the industrial developer's investigative and development expenditures and its proposed capital program, and other information required by the DC&RA to show that the proposed city meets the standards for incorporation."
Petition also includes local hire agreement.

Sec. 29.18.270 DC&RA to investigate petition and determine whether development expenditures and proposed capital program by developer serve the public interest and demonstrate probability of being carried forward to a successful conclusion.
DC&RA to report findings to LBC.

Sec. 29.18.290 Decision on Incorporation by LBC. Must not be able to be served by existing municipality either by annexation, service area, etc. and must serve the public interst.
There is provision for borough to serve area under contract with developer and implement the proposed development program, but borough may decline to do so.
(preferential designation?)
LBC may dissolve city if development does not take place within 5 years, but decision may be appealed under Admin. Procedures Act.

Sec. 29.18.300 Preliminary planning is to be done by the city and submitted to state. This is preliminary to the final comprehensive plan.
State review is by dev. of planning & research, DC&RA and DEC.

There are time limits throughout pertaining to state action.
DC&RA report on petition -- w/in 60 days
LBC decision on inc. -- within 60 days
State agency review of
preliminary plans --- within 60 days

Sec. 29.18.320 City may not proceed with commitment of funds or formal undertakings for physical development until it produces contracts for sale of company products or other evidence to show it will succeed.
State review, but state must act or city can proceed.

Sec. 29.18.330 Local hire agreement and on-the-job training.
State to assist through its various programs, e.g., recruitment, vocational training, relocation assistance...

DEVELOPMENT STAGE means that period of time extending from the date of incorporation until the population reaches 400 or 5 years has elapsed, whichever is earlier.

Sec. 29.18.340 Council, appointed by Gov., Commissioner of DC&RA and 4 public members (at least 2 members from developer's list of nominees)
Serves at the pleasure of the Gov. Councilmen need not be residents.
Powers -- of school board, if outside a borough
-- of planning commission, with review by state

Sec. 29.18.370 City Executive Director appointed by council (may be a member)
Powers and duties of executives as set out in Title 29.

Sec. 29.18.390 State agencies to insure needs of development city are considered in the allocation of funds for capital improvement projects.

Sec. 29.18.400 Transition. 400 permanent residents.
Gradual election of council members and increase in membership; election of mayor (4th year) and at year 4 may elect to become home rule.
If, after 5 years the population is not yet at 400, DC&RA will order an election of city officials and designate a new class city if appropriate.

Sec. 29.18.410 Council acts as its own housing and urban renewal authority "if such powers have been granted to cities under applicable provisions of law."

Sec. 29.18.420 Land Selection. DNR to get transfer of federal lands to state and then city to select 10%. Cost of survey borne by city.

Sec. 29.18.430 Revenue Bonds may be issued without voter approval during development stage -- just majority vote of the council.

Sec. 29.18.440 Shared Revenues. City is entitled to revenue sharing as per other cities.

Sec. 29.18.450 All provisions of Title 29 apply to development cities.

HB

741

AMENDMENT

To: CSHB 741

Page 1, line 14: After "services," insert "(i)"

Page 1, line 22: After "service", delete the comma, insert a semicolon and the following new material:

"and

(ii) during the fiscal year in which a payment is made under (i) of this subparagraph, payment shall be made to the borough or unified municipality for the portion of the fiscal year during which police protection services are initiated, to be determined at the rate authorized in this paragraph on the basis of the new population ~~of the service area~~ served by the implementation of the police protection service and the fractional portion of the fiscal year in which police protection service is implemented."

IN THE HOUSE

BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

CS FOR HOUSE BILL NO. 741

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act providing state aid for extending municipal police protection services; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 43.18.010(a)(1) is amended by adding a new subparagraph to read:

(C) in addition to the payment authorized in this paragraph, to facilitate the extension of municipal police protection services, (G) payment shall be made to a unified municipality or organized borough assuming responsibility for police protection services areawide within the municipality, in the area of the borough outside cities, or within a service area of the municipality; the payment authorized by this subparagraph may be paid only in the fiscal year in which extension of police protection is implemented and shall be determined at the rate authorized in this paragraph on the basis of the population to be served by the extension of the service;

* Sec. 2. This Act takes effect July 1, 1978.

M E M O R A N D U M

TO: Lisa Rudd FROM: Annette Smith AS

REF: HB 741, revenue sharing for extension of police services. Memo from Anchorage Municipality, May 15, 1978

The attached memo from the Municipality of Anchorage poses three questions. I checked with the DC&RA for the answers.

(1) When does it take effect?

July 1, 1978

(2) How long will the extra $12/capita extend?

For the first year of operation.

(3) Will a unified municipality or organized borough receive the regular $12/capita for operational costs of the extended service if those services begin on a date other than July 1?

No

Chugiak/Eagle River plans to begin service on April 1, 1979. They will be eligible to receive $12/capita under HB 741 as soon as they apply, (providing the operation is in full swing, ie., providing 24 hour service).

This would be for the period of operation from April 1 to July 1, 1979. Under present statute this period from April to July 1, 1979 would not be eligible.

Then, on July 1, 1979, Chugiak/Eagle River will be eligible for the regular $12/capita allowed under the regular revenue sharing program. The provisions of HB 741 do not come into play at this time.

If the service is begun on July 1 of a given year, then the municipality is entitled to the regular $12/capita plus the extra $12/capita of HB 741. At total of $24/capita if thereby received if the service is begun on July 1.

Muldoon and Sand Lake expect to start July 1, 1978.

Anchorage would like to get the total of $24/capita for the situation in Chugiak/Eagle River, where they expect to start police service in April instead of July.

Anchorage also would like to be given the extra $24/capita when they start to hire personnel and not have to wait until they are providing the normally required 24 hour service.

I do not know how you wish to respond to the Municipality. I understand they have talked directly to the DC&RA. Also, last week at the teleconference they asked the same question. I believe they are only asking the questions as an introduction to their proposed amendment.

annette - do U dope this out, we don't need amendment to my bill. We need amendment to present law, giving pro-rated payment for part of the year service. ~~Only amendment~~ If I am right, plz. have Jack draft -

GEORGE M. SULLIVAN, MAYOR

OFFICE OF THE MUNICIPAL MANAGER

May 15, 1978

Dear Legislator:

We have three basic questions concerning HB 741: (1) When does it take effect?; (2) How long will the extra $12 per capita extend?; and (3) Will a unified municipality or organized borough receive the regular $12 per capita for operational costs of the extended services if those services begin on a date other than July 1?

We have included suggested language which answers these questions as follows. HB 741 would take effect when the unified municipality or organized borough incurs start-up costs associated with the extension of services. Such start-up costs begin when the municipality or borough begins to select personnel for the extended services.

Under our suggested language the additional $12 per capita would last for an entire year. For example, when the Municipality of Anchorage begins hiring personnel in January 1979, for extension of services to Chugiak/Eagle River in April of 1979, we would receive the additional $12.00 per capita from January 1979 to January 1980.

Finally, because we would be operational in Chugiak/Eagle River in April 1979, and not eligible for the regular $12 per capita for operational costs until July 1979, the suggested language would allow us to receive the regular $12 per capita from April to July 1, 1979.

The suggested language is as follows:

78

Paragraph C

In addition to the payment authorized in this paragraph, to facilitate the extension of Municipal Police Protection services, payment at the rate of $12 per capita on the basis of the population to be served by the extension of the services shall be made to a unified municipality or organized borough assuming responsibility for police protection services areawide within the municipality or within a service area of the municipality; the payment authorized by this subparagraph shall begin when the unified municipality or organized borough begins to incur start-up costs associated with the extension of municipal police protection services, and such payment shall continue for one full year. If the extension of municipal police protection services becomes operational on any date other than July 1, then the payment authorized in (a) of this paragrach shall begin on the date the services become operational.

Would require new fiscal note

departs from general thrust of existing law

This suggested language may present problems regarding appropriation for the regular $12 per capita for operational costs for the extended service, e.g. an appropriation at the time of start-up and an appropriation on July 1.

I will be down in Juneau this week, and then will be ready to discuss this and any other problems with our suggested language for HB 741.

Sincerely,

Mitchell D. Grave

Municipality of Anchorage
5/78

HB 741: AN ACT PROVIDING STATE AID FOR EXTENDING MUNICIPAL POLICE PROTECTION SERVICES; AND PROVIDING FOR AN EFFECTIVE DATE, and SB 420: AN ACT MAKING A SPECIAL APPROPRIATION TO THE MUNICIPALITY OF ANCHORAGE FOR POLICE PROTECTION; AND PROVIDING FOR AN EFFECTIVE DATE.

The Municipality of Anchorage strongly supports the approval of HB 741. The bill would provide for much needed assistance in helping to defray the start-up costs associated with extending municipal police protection services. Included in such initial costs are the acquisition and training of new police officers prior to the date the extended police protection can be provided, purchase of uniforms, vehicles, communications equipment and other equipment and supplies.

The State of Alaska will also benefit from passage of HB 741. Knowing that the State will assist in defraying the large start-up costs, municipalities may be more encouraged to establish or expand their own police protection services thereby dramatically reducing the state's responsibility for policing in those areas. This would permit a reduction in recurring state expenditures or enable the state to shift its police resources to other areas of the state.

With approval of HB 741, but only with the approval of HB 741, the Municipality of Anchorage would remove its request by SB 420 for supplemental appropriation to the Municipality for extending police protection into the Muldoon/Sand Lake areas effective July 1, 1978. However, we would recommend a supplemental appropriation to a municipality which has made previous commitments to expand police protection services at a time other than July 1st. This would be a pro-rata portion of the year's regular police services state shared revenues to help defray normal police operations (rather than initial start-up costs) from the date of provision of such services until the following July 1st. (In Anchorage's case, police services will be implemented in Eagle River/Chugiak on 4/1/79.)

(8) vehicles specified in sec. 200(b)(8) of this chapter	60	50	40	30	20
(9) vehicles specified in sec. 250 of this chapter	40				

* Sec. 2. AS 28.10.255 is amended by adding a new subsection to read:

(i) A resident 65 years of age or older is entitled to an exemption from tax levied under (b)(2) of this section for one motor vehicle subject to license tax under sec. 200(b)(2) of this chapter. No exemption may be granted except upon written application for exemption on a

form prescribed by the department. The state shall reimburse a borough or city, as appropriate, for the tax revenues lost to it by the operation of this subsection.

February 1, 1978

Mr. Jerome R. Sager
1774 Dimond Parkway
Anchorage, Alaska 99507

Representative Lisa Rudd
2827 Lore Road
Anchorage, Alaska 99507

Dear Representative Rudd:

The vehicle registration tax legislation passed two years ago is much in need of revision for the following reasons:

(1) Registration tax is not deductible from Federal Income Taxes, while Personal Property Taxes are deductible. The wording of the present registration tax could be revised to correct this.

(2) The owner of an old car, regardless of the value of the car, must pay $20.00 in tax. This means that a car valued at $200.00 pays $20.00 tax or 10%. This violates the States rule prohibiting municipalities from levying a property tax higher than 30 mills.

(3) A person endeavoring to conserve by buying a smaller car must pay a tax equal to any larger car of this same year. In our present energy conscience society this seems counter-productive.

I urge you to give this some consideration.

Incidently, as a result of this legislation that will "reduce the average taxpayers personal property tax," my tax increased 400%.

Sincerely,

Jerome Sager

February 16, 1978

Ms. Lisa Rudd
Representative for Dist. 11 - Senate Dist. I
Pouch V
Juneau, AK 99811

Dear Ms. Rudd:

We are writing in regards to the fee schedule on our new 1978 vehicle registration forms.

As far as we are concerned, the base tax fee of $20.00 for vehicles with a model year of 1974 and older is far too high.

Last year, our two older model automobiles were valued at a combined value of $300.00, and we paid approximately $3.00 tax on the two vehicles!! Now we are expected to pay $40.00 tax and an additional $60.00 in registration fees!! That is a very high expense for the value of the two cars. Don't you think?

Something must be changed, and we are counting on you to help us get the base tax fee lowered, for older model automobiles, to no more than $5.00. This is a much more reasonable figure.

Thank you so much for your time and help.

Sincerely,
David R. Sweezey

February 28, 1978

Representative Lisa Rudd
Pouch V
Juneau, Alaska 99811

Dear Representative Rudd:

I am upset about the rate schedule for personal property tax on motor vehicles now being collected by the State for the Municipality of Anchorage. The method of collection seems fair and reasonable: that does not concern me. But the rate schedule for this tax is inadequate to the point of being unjust and inequitable.

Last year I paid personal property taxes to the Municipality of Anchorage in the amounts of $2.64 for my automobile and $1.52 for my motorcycle. This year, under the new system, I am being charged $20 for the same car (now 11 years old) and $4 for the same motorcycle. I am sure you would agree that this is an unreasonable and unjustifiable increase in my taxes.

While I am being overtaxed for my older car, the owner of a new car, according to a source in the Municipal Tax Assessor's Office, may be undertaxed by an even greater amount. In addition, under this rate schedule the owner of a new $40,000 Rolls Royce will be taxed exactly the same amount as the owner of a new $5,000 Volkswagen.

I am certain that a more equitable rate schedule for motor vehicle taxes can be put into effect without a great deal of difficulty. And, with a new rate schedule, it is possible that more tax would be collected than presently.

Please see what you can do on this matter. May I look forward to some tax relief this year or am I stuck with a 750% tax increase on my car?

Thank you very much.

Sincerely,

Pat Preis

ANCHORAGE ASSEMBLY

February 8, 1978

Senator Ed Willis
Pouch V, State Capitol
Juneau, Alaska 99811

Dear Ed:

Thank you for your quick response to the auto registration tax problem. I have a copy of your Senate Bill 471 which was introduced on February 7th and referred to State Affairs and Finance.

The tax deductibility problem seems to be taken care of by the name change from "Annual Motor Vehicle Registration Tax" to "Annual Motor Vehicle Property Tax." Property taxes generally are deductible while registration taxes are not. Additionally, the reference on line 13 to a percentage of fair market value is indicative of the fact that the tax is indeed ad valorum oriented and thus deductible qualified.

The election to pay one and one-half percent of value in lieu of the tax set forth in the table is a good stroke. This will properly address the problem of older, low value vehicles and will restore everyone's original intent that older vehicle owners would pay their fair share but not more. I cannot assess the impact of paperwork on Department of Revenue but you might expect that department to raise some concern. I expect that other alternatives to solution of the problem might surface once the bill goes to hearing.

The exemption of one vehicle from taxation for the elderly will be welcomed by persons in that group. Seniors have always been subject to personal property tax (even under the old system) so this is a new benefit for them. I have no problem with this since the State will reimburse the municipality for any potential lost revenue. I don't know whether this section will receive flak from representatives of other jurisdictions which do not levy such a tax or whether the statewide price tag on such an exemption is one which is affordable. Again, I am sure this will all be hashed out in committee.

Ed, let me thank you for your responsiveness on this. You have pointed out that several changes may take place once the committees start their review. Regardless of the exact end product you are to be commended for starting things moving.

Sincerely,

Dave

Dave Rose

[illegible]

I AM GOING TO TRY AGAIN TO SEND TWO PAGE LETTER AND I HAVE POST TO SEN. WILLIS VIA CRT.

TO: SENATOR ED WILLIS

SUBJECT: TESTIMONY FOR STATE AFFAIRS COMMITTEE, FEB. 16, 1973, REGARDING AUTO REGISTRATION TAX

FROM: DAVE ROSE, ANCHORAGE MUNICIPAL ASSEMBLYMAN

GOOD AFTERNOON, I REGRET THAT I AM UNABLE TO BE IN JUNEAU WITH YOU TODAY TO DISCUSS THE PROBLEMS BEING ENCOUNTERED WITH THE AUTO REGISTRATION TAX IN ANCHORAGE. I DO APPRECIATE, HOWEVER, THE OPPORTUNITY TO ENTER THIS TESTIMONY AND AM PARTICULARLY APPRECIATIVE OF THE COMMITTEE'S WILLINGNESS TO DISCUSS THE MATTER AND SEEK SOLUTIONS.

BASICALLY THERE ARE TWO PROBLEMS: FIRST, THE TAX ADVERSELY AFFECTS THOSE WHO OWN OLDER VEHICLES IN THAT IT PROVIDES HIGHER TAXATION UNDER THIS SCHEME THAN UNDER THE OLD PERSONAL PROPERTY TAX SCHEME. SECONDLY, THERE IS A STRONG PROBABILITY THAT THE CURRENT TAX IS NOT INCOME TAX DEDUCTIBLE WHEREAS THE OLD PERSONAL PROPERTY TAX WAS DEDUCTIBLE.

THIS MATTER WAS DISCUSSED BEFORE THE ANCHORAGE ASSEMBLY UNDER SPECIAL ORDERS OF BUSINESS ON TUESDAY EVENING, FEB. 14, 1973. AT THAT TIME THE ASSEMBLY DISCUSSED THE BILL BEFORE YOU THIS AFTERNOON AS WELL AS ALTERNATIVES. THIS TESTIMONY REPRESENTS THE POINT OF VIEW OF THE ANCHORAGE MUNICIPAL ASSEMBLY.

WITH RESPECT TO TAXATION DEDUCTIBILITY: THE ASSEMBLY FULLY SUPPORTS THE PROPOSED CHANGE OF THE NAME OF THE TAX FROM "REGISTRATION" TO "PROPERTY". THIS MAY ASSIST IN CONVINCING INTERNAL REVENUE THAT WE ARE TALKING ABOUT THE TYPE OF TAX WHICH IS DEDUCTIBLE.

WITH RESPECT TO ADJUSTMENT OF TAX RATES: TESTIMONY BY THE MUNICIPAL ASSESSOR INDICATES THAT 65 PERCENT OF OUR PEOPLE PAY LESS TAXES UNDER THE AUTO TAX APPROACH THAN UNDER THE PERSONAL PROPERTY TAX APPROACH; 15 PERCENT PAY ABOUT THE SAME, AND 20 PECENT PAY MORE. THOSE WHO PAY MORE ARE THOSE WHO OWN THE OLDER VEHICLES. WE HAVE DOUBTS THAT THE ELECTION TO PAY ONE AND ONE HALF PERCENT OF FAIR MARKET VALUE - AS PROVIDED IN SB 471 - IS GOING TO BE ADMINISTRATIVELY WORKABLE. IT IS PERHAPS THE FAIREST APPROACH BUT PROBABLY WILL BE EXTREMELY COSTLY TO EXECUTE. FOR EXAMPLE, THE TAXPAYER WHO HAS A ONE DOLLAR DIFFERENCE BETWEEN THE TAX TABLE AND THE ELECTION WOULD PROBABLY TAKE THE ELECTION ROUTE THUS INCURRING A HIGH GOVERNMENT COST IN EXCESS OF THE ONE DOLLAR SAVED.

THE ASSEMBLY RECOMMENDS THAT SB 471 BE ALTERED TO PROVIDE FOR AN EXTENSION OF THE EXISTING TABLE FOR AUTOMOBILES. PROVIDE FOR A SIXTH YEAR AT AT TAX RATE OF 15 DOLLARS; A SEVENTH YEAR AT 10 DOLLARS AND AN EIGHT YEAR AND OLDER COLUMN AT 5 DOLLARS. WE FEEL THAT ALL VEHICLES, REGARDLESS OF AGE, SHOULD PAY AT LEAST FIVE DOLLARS AND THAT THE CHART SHOULD NOT BE CUT OFF IN SUCH A MANNER AS TO PROVIDE FOR NO TAX AT ALL ON SOME VEHICLES.

THE ASSEMBLY DID NOT DISCUSS THE PROVISION OF THE BILL WHICH PROVIDES EXEMPTION FOR THE ELDERLY AS THERE HAS BEEN NO INITIAL REQUEST FOR SUCH AN EXEMPTION. IF THE EXEMPTION IS PROVIDED, WE CONCUR WITH THE WORDING IN THE BILL; PARTICULARLY THAT WHICH APPEARS ON LINES 21 AND 22.

I HOPE I HAVE BEEN OF SOME HELP IN THIS MATTER. IF YOU HAVE QUESTIONS, I [illegible]

SSHB
760

DEPARTMENT OF PUBLIC SAFETY
DIVISION OF MOTOR VEHICLES

The Honorable Randy Phillips
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

February 28, 1978

RE: SSHB 760

Dear Representative Phillips:

In an attempt to respond to your request for a fiscal note dealing with Section 2, of SSHB 760, I want to make you aware of the fact that the following figures are based upon certain assumptions. The department does not have the data required to give you an accurate projection of lost revenue in these communities.

According to the Office of the Aging there are approximately 2432 people in the three communities affected by this bill who are age sixty-five (65) or older. There are 1727 in Anchorage, 540 in Ketchikan and 165 in Petersburg.

In order to provide you with approximations the following assumptions were made:

(1) We assumed that 65% of the people in this category own vehicles.
(2) We assumed that the average age of these vehicles was four years.
(3) We assumed that all of these vehicles were passenger vehicles.

Given these assumptions the projected revenue loss is $47,430.00. This is broken down as follows:

	# 65 or older	# Vehicles	Revenue Lost
Anchorage	1727	1123	33690
Ketchikan	540	351	10530
Petersburg	165	107	3210
Totals:	2432	1581	47430

If we can be of further assistance please contact us again.

Sincerely yours,

Robert J. Stickles
Chief of Driver Services
Division of Motor Vehicles

Richard L. Block
Director

You asked me the other day if I could provide you with the copy of conditions that I suggested be imposed, should municipalities allow unbonded contracts of up to $250,000.

What is attached is the information which I provided the Community and Regional Affairs Committee at their hearing on HB 766.

This is indeed a very rough cut at some suggested conditions and is not to be interpreted as either exact or entirely all necessary, but does point out the approach that I think ought to be taken, should any governmental agency allow the use of unbonded contracts for work of any significant size.

Should this be offered as an amendment on the floor, I would urge that there be some minor modifications to reflect some additional information which I have received concerning these conditions.

Should you desire, I would be happy to provide you with a draft of a modified list of suggested conditions.

RLC:lc2:7
cc: Lisa Rudd, Chairman
Community and Regional Affairs
Committee of the House

Additional material requested from Div. of Ins.
AS

The State, or a political subdivision of the State, may award a contract of up to $200,000 without the requirement of bond, provided all of the following conditions are met:

(1) The contractor is, and for five years immediately preceding the award of contract has been, a licensed contractor having its principal offices in the state;

(2) The contract is for alteration, repair or maintenance of existing buildings or improvements and requires the performance of substantially all work by the contractor utilizing his own tools, equipment and employees, and requires the contractor to use no subcontractors.

(3) The contractor has a financial statement as of no earlier than nine months prior to submitting the bid for the contract, certified by a certified public accountant showing:

(a) a net worth of no less than 20% of the face amount of the contract;

(b) A profit from contracting operations for at least both of the last two fiscal years preceding the award of the contract, and for at least three of the last five years preceding the award of the contract;

(c) The contractor has not defaulted on any contract awarded him in the last three years.

(4) The contractor provides evidence that he has fully performed contracts of similar work in the state in both of the last two years preceding the award of the contract.

(5) The total amount of all contracts being performed by the contractor during the term of the subject contract, including the contract being awarded under this statute, does not exceed seven times the net worth of the contractor.

(6) The State, or political subdivision, awarding the contract has received bids from at least three other contractors, whose bids are accompanied by a bid bond or who meet the qualifications of this subsection, and the successful contractor's bid is not less than 10% lower than the average of all bids on the same job

(7) The State, or political subdivision, establishes a disbursement procedure wherein:

(a) funds are disbursed in periodic progress payments relating to the amount of work performed to date of disbursement;

(b) No less than 10% of each disbursement is withheld to the end of the contract to assure completion fo the contract;

(c) the State or political subdivision performs such audits and requires such lien releases as is appropriate to assure payment of all employers of and suppliers to the contractor.

TO: CS FOR HOUSE BILL NO. 766

Page 1, lines 12 - 15: delete all material and insert the following:

Sec. 36.25.025. EXEMPTION BY MUNICIPALITIES. (a) A municipality may exempt contractors from compliance with the provisions of sec. 10(a) of this chapter if

(1) the contract is one for the alteration, repair or maintenance of an existing building or improvement and

(2) the estimated cost of the project does not exceed $250,000.

(b) An exemption authorized by this section shall be granted by ordinance. No ordinance is effective to grant the exemption provided in this section unless it

(1) establishes or incorporates by reference a provision for disbursement by which

(A) funds are disbursed in periodic progress payments in relation to the amount of work performed under the contract to the date of disbursement;

(B) not less than 10 per cent of each disbursement is withheld by the municipality to the end of the contract; and

(C) lien releases sufficient to assure payment of all employees and suppliers of the contractor are required; and

(2) provides that

(A) a contractor claiming the benefit of the exemption has been a licensed contractor for at least two years preceding the award of the contract and has his principal office in the state;

(B) the contractor has not defaulted on any contract awarded to him during the three years preceding the award of the contract; and

(C) the contract requires substantially all work by the contractor utilizing his own tools, equipment and employees, and prohibits the use of subcontractors.

TO: Lisa FROM: Annette

HB 766

I talked with Rocky Gutterrez of Sitka about this bill. He said he believed the bill was proposed by small contractors who have difficulty getting adequate bonding for projects.

Construction performance bonds apparently are based on the contractor's experience and his assets -- mostly finances, plus various other small details such as the contractor's financial statements must be done by a CPA. Cost of a bond is based on a percentage of the project -- usually 1.5%.

Performance bonds come into play when a contractor defaults on the contract for some reason, like bankruptcy, Then the insurance company picks up the tab or finishes the project as the case may be. Mr. Gutterrez says there have been times when it took the city 2 years to collect from the bonding company.

Mr. Gutterrez favors the legislation in that it allows municipalities to use local contractors who may not be able to get a performance bond. The cost of the bond is just added on to the bid price, he says. (That cost, on a $250,000 project at 1.5% would be an additional $3,750.) There are contractors in Sitka who are perfectly capable of doing small projects for the city but are unbonded and the city believes it is good policy to give the local guys the jobs. Sitka handles such situations by requiring the deposit of a 25% performance cashiers check with the city. This narrows the field at the outset. The municipality also provides for advance payments on materials once presented with all the invoices for same. Rocky believes most $250,000 jobs would be preferably handled this way by the city rather than requiring a bond. But, he said, there may be instances when the city would believe that the project risk is such that a performance bond would be desireable. In that case, such would be required in the contract specifications.
I would say that Sitka has things under control.

Small contractors do have difficulty obtaining bonds. I guess this is due to the conservative nature of the insurance business and the bad track record which Alaska has. (There have been several defaults in the state, particularly to the Westward.)

There are very few bond brokers in Alaska and they remain in the larger towns like Anchorage and Juneau. The bonding companies are generally in Seattle. I talked with Dawson Company here in Juneau who do some bond brokering. They say it is particularly hard on small contractors in small towns becuase there is little or no money in bonding these outfits and they do not have access to the bond brokers. It is not worthwhile for Dawson to go out to the towns to check out these small outfits. Also, bonding companies (these being the big guys in Seattle) require CPA financial statements for the contracting companies. Many smaller towns do not even have a CPA nearby.

This bill can be seen as helping the small contractor in a small municipality who normally cannot obtain the necessary bonding. And it may be seen as a help to the small municipality from the stand point of their desire to use local contractors for small projects. My only comment is that it is the small contractor who is most likely to default on a contract and it is the small community which is least likely to have the money to pick up the tab or to pay the expenses of prosecuting through the courts. While there is argument that a municipality need not pass such an ordinance, it is also the small municipality which is most likely to yield to pressure from a local contractor to pass such an ordinance. Very often it is the weight of the state or the restrictions in state statutes which guides local decisions and keeps them out of trouble.

CULTURAL FACILITIES DEVELOPMENT COMMITTEE

(Preliminary Data for Bond Issue)

Contact person:
Shirley Rediger
State Coordinator
586-6806 Juneau
225-3077 Ketchikan
127 So. Franklin St.
Juneau, AK 99801

Allan Gregg
President, CFDC
Box 1069 1078
Wrangell, AK.
Phone 874-3570

BACKGROUND:

A state wide hearing conducted by the Alaska State Arts Council in 1974 revealed a crucial needs for cultural facilities in most Alaskan communities.

A direct resultant of this hearing was the formation of a state committee. This committee developed the concepts and found funding for a Theater Development Project, a unique experiment in a community arts planning. An appropriation of 68,000 from the Alaska Legislation, 10,000 grant from the National Endowment For The Arts, and 5,000 from each participating municipality was secured. This funding allowed communities to hire consultants and technicians to implement the planning process. For the most part, communities used the services of Eldon Elder Associates, Inc., 27 West 67 Street, New York, New York 10023.

The plans developed for each community are available under separate cover. A typical report of the planning and research in each community includes the following:

History of the Project
Community Characteristics
Plan Development
Cost of Project
Site Selection
Recommendations for Future Action

At the present time the Cultural Facilities Development Committee has engaged a part time executive to assist the committee is compiling the data necessary to promote and implement a bond issue which will provide the funds necessary to build these Cultural Facilities.

This is a brief outline of the Cultural Facilities Development for your initial review.

However, detailed data available by November 1st on these facilities will include:

1. Comprehensive report from Eldon Elder Associates or other theater consultants. (see sample book attached)

2. Summary statement of the facility: purposes for which it will be used; why it is needed; what benefits will accrue the community; how maintenance staffing and programming for the facility will be financed.

3. Summary of physical layout: space allocations, dimensions and schematic drawings, if possible.

4. Site acquisition: a copy of written agreements where applicable.

5. Cost breakdown: architect's and engineer's fees, equipment, parking, inflation (1979-80 construction target dates) 1% construction cost for art works.

6. Official letter or resolution from municipality to show municipality's willingness to administer funds for construction and management of facility (if appropriate).

Annette - I guess we need all this info for our deliberations on the bond proposal —

COMMUNITIES INVOLVED IN THEATER DEVELOPMENT PROJECT

Eleven 12 communities have been involved in planning for a cultural facility. The communities are as follows:

Anchorage	Naknek
Angoon	Petersburg
Cordova	Sitka
Dillingham	Skagway
Haines	Juneau
Ketchikan	Kodiak

BRIEF SUMMARY DESCRIPTION OF EACH FACILITY

ANGOON: Contact Person

Maxine Thompson
City Clerk
P. O. Box 189
Angoon, AK

This cultural facility will be called the Living Museum. Its primary purpose will be to serve as a museum for the artifacts owned by the community.

The building will be fireproof which will maximize the security of the art objects. Local clans and individuals may deposit their artifacts in this facility for safe keeping and may check them out to use for dancing, pay-off parties or other Indian activities. Another facet of the proposed facility will be space and equipment which can be used for cultural arts activities, particularly, Tlingit dancing, movies, speakers, lectures and so on. It is felt that this building will be great asset in developing tourism.

The building is 2,000 square feet of space and will cost $500,000. City land will be used and the City will own the facility.

ANCHORAGE: Contact Person

Betzi Woodman
117 E. Cook Avenue
Anchorage, AK 99501
Phone 277-0764

Roy H. Helms
Alaska State Council
on the Arts
619 Warehouse Avenue
Suite 220
Anchorage, AK 99501
Phone 278-1558

Anchorage's cultural facility will be part of the Anchorage Center, a complex for cultural, recreational, community and convention activities. The need for an Arts facility has been defined by the Mayor's Advisory Committee. 138 groups performed in Anchorage in 1975 and an estimated 250 groups performed in 1976. The existing facilities cannot accommodate the demand for space. It is felt that an arts facility would greatly enhance the ability of the local groups, such as the Civic Ballet, Civic Opera, Symphony, Community Chorus and Community Theater to offer more and better quality performance to Anchorage residents.

The Cultural Facilities Development Committee has budgeted 25 million for this facility.

CORDOVA: Contact Person

Chris Putnam
P. O. Box 518
Cordova, AK
Phone 424-7369

The proposed building in Cordova -- The Cordova Arts and Humanities Center, is conceived as a facility available for use by schools, the community, and outside groups for performances and other purposes. The primary use of the building will be for a 350 seat theater with a secondary use as an Arts and Crafts school and show area. Cost of facility $3,420,000.

DILLINGHAM: Contact Person

Dorothy Anderson
P. O. Box 234
Dillingham, AK
Phone 842-5302

A multi-purpose cultural facility is being planned for Dillingham. This building will have many functions including performing arts, day care center, community education, radio broadcasting and university extension courses.

Dillingham is the center of a 10 village community and this facility will serve the entire region as well as the village of Dillingham. The cost of the facility is 9 million. The city of Dillingham agrees to own the facility. A site is available for this building.

HAINES: Contact Person

David Y. Nanney
General Delivery
Haines, AK 99827
Phone 766-2763

The city of Haines is renovating and expanding the Chilkat Center for the Arts. The Chilkat Center for the Arts is an historical building renovated in 1967. The proposed renovation and improvement program will provide much needed equipment and space to insure that a complete facility which will meet the needs of the community will exist in Haines. This will include renovation of heating and plumbing systems, improved building insulation and fire protection, renovation of second floor space to a multippurpose social center and rehearsal room, expanded lobby and display space, construction of a new wing to house shops, dressing rooms, storage areas, and new mechanical equipment and improvements to lighting and sound equipment. Cost of project is $1,474,614.00

KETCHIKAN: Contact Person

John W. "Jack" Shay Jr.
P.O. Box 3159
Ketchikan, AK 99901

Ketchikan is developing a plan for a multi-purpose cultural facility that will implement furthering both the performing and the visual arts in a manner that will enhance the artist and his work, the cultural opportunities of the local community and the interests and needs of visitors to Ketchikan. A 400 seat theater is planned. Basic structure will be approximately 15,320 aquare feet. Total cost of project is $6 million.

JUNEAU: Contact Person

Jane Stewart
925 Calhoun
Juneau, AK 99801
Phone 586-1220

Juneau will be building a Performing Arts Center. This proposed new center will contain 5900 square feet of floor space. A medium size theater capable of holding 700 to 750 people and a smaller flat floor "forum" with retractable theater seating capable of holding 20 to 250 persons for meetings and cultural presentations. The building also would contain a scenery workshop, costume workshop, a crafts shop for local artists, dressing rooms, rehearsal halls, a performer waiting room (green room), besides office space and radio and future television operations. Projected cost of this facility is $12.3 million.

KODIAK: Contact Person

Gerald C. Wilson
P.O. Box 1792
Kodiak, AK

The Kodiak Community Center will be a round type construction quite similar to the center in Fairbanks. It will be used by every people-oriented organization in Kodiak for art, dance, craft, theater workshops, meetings, crab festivals, state activities, conventions, meetings, education, fisheries oriented businesses, U.S. Coast Guard functions. Kodiak growth makes the Community Center essential to the community's survival. Projected cost is $4 million.

NAKNEK: Contact Person

Anita Erickson
Box 136
Naknek, AK 99633

A community cultural center museum is proposed in Naknek. This will be a single story 8 room building with 2,152 total square feet. This facility will provide a focal point for local cultural programs. Artists could arrange displays and instruction sessions using the facilities. By viewing museum exhibits, visitors to the area could obtain an idea and an appreciation of the transition in life styles that has ocurred locally in recent time. At the present time the oral history program and the collection of historical objects are stored in a Bristol Bay Borough school building.

The shortage of storage space in the school may force these accumulated historical materials to be stored in private homes.

The cost of this building will be ~~$50,000~~ 400,388.

PETERSBURG: Contact Person

Syd Wright
Petersburg High School
P. O. Box 289
Petersburg, AK 99833

The proposed Petersburg Fine Arts Center has a 350 seat theater with supporting rooms, a lobby arts and crafts display area, an arts and crafts room and space for the local FM radio station. This theater will be built on school property. The proposed facility will be a community center and open to use by everyone. The maintenance, staffing and programming will be carried out under the existing school administration structure with the possible addition of a part time technical theater person. The cost of proposed project is $3,549,910.

SITKA: Contact Person

Jan Craddick
P. O. Box 678
Sitka, AK 99835
Phone 747-8581

The proposed Intercultural Arts Center in Sitka is a 68,000 square foot arts center which has been designed to house both the performing and visual arts. The center spaces will include a 750 seat procenium theater, 250 seat arena where productions can be staged in-the-round, a high security art exhibit area, two low security areas for art displays, a community crafts workshop, scene and costume shops, a green room and office spaces. Most if not all of these spaces can be used for a variety of functions. The theater can be used for dramatic and musical productions, for conventions and for public meetings. The arena can also house conventions, and when its bleacher seating is folded back can serve from a caterer's kitchen, 200 in a banquet setting.

The projected construction and equipment cost for the facility is$9.5million (if the building is completed in 1980) as opposed to $7 million if it were built today.

SKAGWAY: Contact Person

Diana Cates
President, Skagway Arts Council
P. O. Box 116
Skagway, AK 99840

The initial plans for performing arts facility in Skagway were to renovate the old railroad depot. The railroad building would be remodeled to accommodate a theater/auditorium, office/exhibition center. Since this building is owned by the U.S. Department of Interior National Park Service, a cooperative joint effort with the city has been attempted. However, at this point in time, the National Park Service has taken the position that the plans conceived by the theater consultant, Eldon Elder are too ambitious and may be in conflict with the National Historical Preservation Act (Section 106)

Since the Skagway community and the Park Service are in an apparent "stalemate" position at this time, the Skagway Performing Arts Center will not be included in the bond package, unless the difficulties are resolved in the next 30 days.

Cultural Facilities Development Committee
(Data for Bond Issue)

UPDATE

SKAGWAY: Contact Person

Dianna Cates
Executive Secretary
Skagway Fine Arts Council
P.O. Box 116
Skagway, Ak. 99840
Ph. 983-2378

The Skagway cultural facility plan has been updated and revised to create a new multi-purpose cultural building. The updated plans include theatre, museum, archives, court space, city government offices, and day care. The building will provide a civic center for a growing population and for the 100,000+ tourists who visit Skagway each year. For this new facility projected cost is 4.7 million

Dear Legislator:

The informational packet you received concerning 12 communities' projected Cultural Facilities did not include this update on Skagway's plan. Please include this in your information about the Cultural Facilities Development Committee.

If additional information is needed at this time, please call the CFDC Coordinator, Shirley Rediger, at 586-6806.

CULTURAL FACILITIES GRANT PROGRAM

HB 781 by Duncan, et. all

Adds a new section to AS 43.18 , State Aid to Local Governments

The bill establishes within the Department of Commerce a cultural facilities fund and grant program to assist municipalities in construction and development of cultural facilities.

Funds are from either direct appropriations or bond issue.

Grants are limited to only one per municipality and the municipality must show active participation in a share of the construction costs and the full maintenance and operation of the completed facility.

Applications must be submitted for review and comment by the Advisory Commission on cultural facilities.

By signed agreement with the Department of Commerce, municipality must
-- have title or extensive lease to the land for the facility;
-- provide the local share of the construction costs;
-- return any excess funds;
-- proceed expeditiously;
-- but not substantially depart from the approved plans;
-- assume costs of maintenanceand operation either directly or by delegation to an approved organization;
-- have the feasibility of the project approved by department

Municipality must use the facility for stated purposes or reimburse the state.

Formula for Local Share

average per capita assessed valuation of municipality/ average per capita valuation of the state x maximum contribution percent to estimated total project cost.

Maximum contribution required -- based on population

Up to 5,000 = 10%
5,001 to 10,000 = 20%
10,000 + = 30%

Land Match. The fair market value of the site land is allowed as part of the city contribution.

Priority list. The bill recongizes funds appropriated may not be sufficient to cover all projects approved. Commissioner of Commerce is to establish a priority list based on regulations.

Cost Overruns. If actual project costs are more than anticipated -- Commissioner may provide additional funds but ratio of state/local participation is maintained.

Annual Report to Legislature. Commissioner reports annually to Legislature on grant program and activities and expenses of the Advisory Commission.

Regulations. Commissioner may adopt regulations to carry out the program.

Definitions: "cultural facility" means a structure or complex the principal purpose of which is to serve the visual and performing arts, including but not limited to a theatre, concert hall or gallery, or to serve as the repository of the historical or contemporary heritage of the community and its people;"

Advisory Commission on Cultural Facilities.

Advisory Commission is under the Department of Commerce
Five members appointed by the Governor from recommendations of the Arts Council.
No pay except travel and perdiem
Maximum 4 meetings/year.
Duties: Advise commissioner regarding approval of grants.

HB 769 by Parr

Deletes all reference to the Advisory Commission on Cultural Facilities.

Land may not by part of the local match.

SSHB 769

Establishes the cultural facilities fund and grant program in the Department of Community and Regional Affairs.

Local share:

50% of total project costs if municipality is not in a "poverty area"

20% of total project costs if municipality is in poverty area and 1/2 of the local share may be in-kind.

Sets a time limit for adoption of department regulations for determination of a priority list of applicants (90 days from the date of the Act).

Definition of cutural facility different:

"cultural facility" means a structure or complex the principal purpose of which is to serve the visual, performing or fine arts, including but not limited to a theatre, concert hall or gallery;" /or to serve as the repository of the historical or contemporary heritage of the community and its people/ ← NOT INCLUDED IN SSHB769.

"poverty area" means a district in which 15 per cent or more of the population, based upon the most recent census data, falls under 125 per cent of the Office of Economic Opportunity guidelines."

policy

Advisory Commission

5 Members - no compensation

First year - Travel - 4 meetings @ $200 per meeting.....$4,000
per diem @ $150 per meeting..... 3,000

Second year - Travel - 3 meetings - travel & per diem @ $400 per meeting.....6,000

Third year - Travel - 2 meetings - travel & per diem @ $425 per meeting.....4,250

Assumptions:

1. Personnel Services

   One Professional person, a Capital Improvement Project Coordinator (range 20) will be required. This position will:

   a) establish an inclusive application process
   b) work closely with each community which applies for cultural facility funds
   c) administer the grant program
   d) oversee the engineering and architectural work and;
   e) prepare the financial package to go to bid.

   cost estimate verification?

   (Salary $2,296 per month, plus benefits of $567 per month.)

   In addition, one clerical person working half-time will be required. Clerk Typist III (range 8) for correspondence, filing, etc.

   (Salary $546 per month plus benefits of $169 per month.)

2. Travel requirements are estimated at 12 trips @ $300 per trip (per diem included in estimate). These trips will be required during the application process, to meet with the cultural coordinating committees over architectural designs and engineering estimates and during the early stages of construction.

3. Contractual

   A. Rent - 250 feet^2 @ $1.25 per feet^2/month $3,700
   B. Telephone, communications..... 1,000
   C. Postage, etc..... 300
   D. Printing and advertising 1,000
   E. Professional fees and services..... 1,200

4. Commodities

   Office supplies..... 300

5. Equipment

   Desk, chair, file cabinet, calculator..... 1,500

After FY '79 - Inflation estimated @ 6% per year

Equipment and advertising - larger expenditures required first year.

CORDOVA

6. SUMMARY OF SPACES (Approximate Square Footage Required)

	Approximate Square Footage	
	300-350 seats	500-550 seats
a. PUBLIC SPACE		
(1) Performance-Oriented		
Entry	300 sq.ft.	300 sq.ft.
Lobby/Exhibition	1,200	1,800
Box Office/House Manager's Station	150	200
Cloakroom	300	400
Rest Rooms	400	500
Auditorium	2,600	4,000
(2) Production/Workshop/School-Oriented		
Entry	300	300
Rest Rooms	500	500
Subtotal: Public Space	5,750 sq.ft.	8,000 sq.ft.

	Approximate Square Footage	
	300-350 seats	500-550 seats
b. PERFORMERS' SPACE		
Orchestra Area	350 sq.ft.	350 sq.ft.
Stage House	2,200	2,200
Trap Room	450	450
Waiting Area	240	240
Dressing Rooms (3)	495	495
Greenroom/Makeup Room/Costume Room/ Fabric Crafts Workshop	700	700
Toilet Rooms	300	300
Changing Room	250	250
Rehearsal Room/Meeting Room/Lecture Room	1,200	1,200
Kitchenette	100	100
Practice Rooms (3)	260	260
Subtotal: Performers' Space	6,545 sq.ft.	6,545 sq.ft.

CORDOVA (cont.)

* Based on 8% total gross floor area indicated as average required for integral heating and refrigeration plants.

KETCHIKAN

5. Preliminary Specifications - The review of existing recreational activities, arts activities, and visitor industry needs indicates that Ketchikan can program a high usage rate for the following spaces:

Space		Sq. Ft.	Description
1. Performance Center	A	5,000	400 seats, raked seating divideable no fly gallery.
		1,500	Set room, storage, wardrobe room, projection room, toilet rooms, lobby, etc.
2. Open Space	R.	11,000	Recreation, convention, banquet, dinner theatre, exhibits, festivals
	A	2,000	Storage for inventory
	A	2,000	Lockers and showers
3. Multi-purpose Room	R	1,500	Green Room, Carpeted
4. Meeting Rooms	R	5,000	Meetings, quiet recreation
5. Special Uses	R.	5,000	Box office, manager's office, snack bar and lounge, kitchen, radio station (FM), darkroom, mudroom, pre-school room, senior citizens' lounge.
6. Circulation	U	4,000	Sufficient to obtain adequate viewing areas, separation where necessary, and flexibility.
7. Mechanical	U	3,000	Approx. 8% of floor area
		40,000 sq. ft.	total

The following cost estimate is based on these space needs.

Function	Cost	Breakdown
1. Construction including architecture, engineering inspection and 6% inflation	$4,800,000	$120/sq. ft.
2. Site preparation, parking, landscaping, lighting, storm drain	$600,000	150 parking spaces plus reserve for related site expenses
3. Mechanical and fixed inventory	$600,000	In order to obtain maximum flexibility in a limited amount of space special equipment is needed such as soundproof removable walls.
	$6,000,000	Subtotal
4. Contingency	600,000	10% for contingency or additive alternatives
	$6,600,000	Total

STATE AND LOCAL PAYMENTS UNDER HB 781

PREPARED BY
LEGISLATIVE AFFAIRS AGENCY
RESEARCH DIVISION
MARCH 29, 1978

ASSUMPTIONS: (1) FACILITY COSTS FOR THE INITIAL 12 PARTICIPATING MUNICIPALITIES ARE AS REPORTED
(2) FACILITY COSTS FOR MUNICIPALITIES WITH POPULATIONS >10,000 ARE ESTIMATED AT $18,650,000
(3) FACILITY COSTS FOR MUNICIPALITIES WITH POPULATIONS OF 5,000-10,000 ARE ESTIMATED AT $7,750,000
(4) FACILITY COSTS FOR FIRST CLASS CITIES WITH POPULATIONS <5,000 ARE ESTIMATED AT $3,383,750
(5) FACILITY COSTS FOR SECOND CLASS CITIES ARE ESTIMATED AT $450,000
(6) PROPERTY VALUES FOR CITIES WITHOUT ASSESSMENTS ARE ESTIMATED (EST)

Cost of Cultural Facility to Municipality

	Cost of Facility	Local Cost HB 781	Local Cost HB 769
Anchorage	$25,000,000	$ 4,430,000 less cost of donated land	$ 12,500,000
Juneau	$12,300,000	$ 1,549,800 " " " " "	$ 6,150,000
Sitka	$ 9,500,000	$ 1,045,000 " " " " "	$ 4,750,000
Ketchikan	$ 6,000,000	$ 660,000 " " " " "	$ 3,000,000
Dillingham*	$ 9,000,000	$ 288,000 " " " " "	$ 1,800,000 (50% i kin
Cordova *	$ 3,420,000	$ 109,440 " " " " "	$ 684,000 (50% i kin

Figures are based upon 1977 Alaska Taxable Tables

For HB 781 the $\frac{\text{average per capita assessed valuation of municipality}}{\text{average per capita assessed valuation of state ($42,872)}}$ equal

Anchorage	.59
Juneau	.42
Sitka	.55
Ketchikan	.55
Dillingham	.32
Cordova	.32

* Area considered poverty area for purposes of this table only.
A list of the poverty areas in the state will be fowarded shortly.

SUGGESTED AMENDMENTS TO HB 781

1. Provide for Assessment of property for municipal match -

   The municipality shall furnish a appraisal of the property by a recognized appraiser and the appraisal shall be subject state review.

2. Change land match to "real" property.

3. Delete lines 4 & 5, p. 2 - authority under AS 29.48

   (Suggested by Lee Sharp)

4. Official municipal recognition of an arts organization (arts council).

5. Administration and operation of the facility to be by a "coordinating committee' with x number from the arts.

   (The municipality agrees to assume responsibility for the maintenance and operation of the facility through a committee established by ordinance composed of respresentatives of those groups using the facility of which at least 50% of the members are representatives of arts organizations.)

-- This approach may be cumbersome and (5) and (6) on page 3 seem to address this, particularly (6) which says the municipality must use the facility as a cultural facility. --

TO: Lisa Rudd FROM: Annette Smith

SUBJECT: Cultural Facilities Legislation, HB 781

You requested a percentage breakdown of the various proposals for cultural facilities for art and cultural uses and other than cultural uses including strictly revenue producing uses. The following is a representative sample by square footage:

	Art & Cultural Uses	Possible Other Uses - Rental	Utility & Circultaion
Dillingham	25%	49%	26%
Sitka	59%	22%	19%
Cordova	65%	19%	16%
Ketchikan	26%	56%	18%
Petersburg	75%	12%	13%
Juneau	61%	27%	13%
Skagway	61%	35%	4%

These percentages were difficult to nail down accurately. The percentages for possible other than strictly cultural and art uses are pretty much the maximum that can be expected for most of the proposals. Sitka, Petersburg, Juneau and Cordova are primarily cultural facilities. (Haines, Angoon and Anchorage+ Naknek are also totally cultural and they are not included in this breakdown.) Space use for other activities are: Possible use of the "green room" areas for community group meetings or convention meetings, but these could also be used for rehearsals and cultural or arts seminars; "scene shop space" which can be used by the school; "administrative office space" which under some circumstances could be rented out to an other than cultural use.

Special circumstances exist in each case. Cordova and Petersburge expect to operate the facility through the school system which means the school uses will occupy much of the daytime use. Shop space will probably be used quite a bit by the students and by the community education program. Sitka expects considerable daytime use by the school and community college, though the facility will not be operated by the educational interests. Juneau has a small day care facility planned and plans to house KTOO (educational station) in the facility also.

Ketchikan's percentages look worse than they really are. I have included all multipurpose areas in the "other possible use" category, but there is no reason why these areas would not also be used for cultural seminars, workshops, dinner theaters, etc. Ketchikan does not anticipate renting office space. Their facility seems to be planned as a true community building.

Dillingham expects to have a great deal of rental space available to assist with the operating costs. It is interesting to note that their utility and circulation space goes up also with the varied uses.

Skagway's estimates are sill pretty crude since they have changed their mind mid-stream, so to speak. The original plan was to renovate the old railroad terminal in cooperation with the U.S. Park Service. Now they envision a new building with a theater, museum and city offices. The 4% utility figure is probably unrealistic, as is including a city hall in the grant.

You will notice the absence of Kodiak in this breakdown. I do not have a breakdown of floor space for the Kodiak facility. We do know, however, that they plan a multipurpose facility which will be available for convention use. In fact, they estimate that convention use will take up at least 50% of the use time. They are apparently optimistic about attracting several conventions to Kodiak. In any event, I believe we can expect their plans right now to be somewhere in between Ketchikan's and Dillingham's plans.

TIME

To arrive at an estimated use time is difficult. If the facility were open 15 hours a day (8 a.m.to 11 p.m.), and cultural and art uses were primarily at night, the facility would be used for those purposes approximately for 4 hours in the evening (7-11p.m.), or approx. 25% of the time. However, we cannot expect the facility to be used by arts groups every evening and even given a weekend or week long arts exhibit, we might still be pressed to guarantee use 25%of the available time for the arts.

Use will vary according to the community. Some communities, I imagine will close up the building when not in use. The busier the facility, the more a community will push for full use, however, to assist with operating expenses which go on regardless of which group uses the facility. In other words, I believe the time element is elusive.

ATTACHMENTS

Attached are sample space summaries. A quick look will show you what I meant about the difficulty in breaking down use percentages.

State of Alaska

Class Specification

CAPITAL IMPROVEMENT PROGRAM COORDINATOR 8450-20

Definition:

Under direction of the Director of Facility Planning and Procurement, is responsible for coordination of all contacts and communications between client agencies and the Department from initial project conception through client occupancy or assumption of use.

Distinguishing Characteristics:

This class is established to function as the client agencies' advocate in expediting facility construction, assisting in compliance with administrative requirements and the preparation and submittal of information needed by the Department for facility development.

Examples of Duties:

Assists client agencies in preparation and submittal of information and data required by Departmental processes, project funding authorities and regulatory agencies.

Assures facility planning processes are undertaken in the proper sequence to maximize departmental effectiveness in serving the client agency; provides liaison between client and other units in the Department at sequential steps in the procurement process; arranges contacts and conducts meetings between client, departmental personnel and other involved agencies.

Works directly with client agency to develop project scope, schedule, budgeting and required communications network.

Participates in development and presentation of project budget, acts as liaison with budget review agencies and expedites budget review processes.

Identifies permits,waivers, easements and other compliance documents needed, identifies and establishes contact between regulatory authorities and client agenies; maintains liaison with regulatory authorities to assure timely review and documentation of necessary approvals.

Responds to all complaints from client agencies; contacts the unit subject to complaint and works to resolve differences; reports deficiencies in documentation to clients and assists in developing necessary information; identifies deficiencies in departmental processes to expedite facility procurement; mediates disputes between clients and providers.

Performs other related duties as necessary.

Knowledges, Skills and Abilities:

Knowledge of: principles, practices and procedures of agency management and public administration to include budgeting, reimbursable service agreements, personnel management and supply distribution and control; required reporting and administrative control procedures; role and procedural requirement of construction regulatory agencies; construction scheduling sequence.

Ability to: establish and maintain cooperative relationships between client and provider agencies; identify communications problems between the parties served and recommend corrective action; inspire confidence in the responsiveness of the department to client needs; analyze transactional and policy problems and develop and implement solutions.

Minimum Qualifications:

Five years of professional experience in public administration involving preparation and monitoring of reimbursable services agreements, in architecture, in the management of capital improvement projects, or in construction, programming, planning, design or expediting where responsibilities included expediting permits, design work, funding and property acquisition in addition to supply and logistical support.

Orig: 6/1/77

To HB 781 -

Change (e)(6) to read --

(6) the parties agree that if property constructed or developed with financial assistance provided under this section is ~~converted~~ used for to purposes other than for principal use as a cultural facility, ~~the commissioner shall require~~ the municipality shall reimburse the state for that portion of the market value of the property which the state's investment in the property bears to the total investment from all sources made in the property.

Insert a new (i) to read --

(i) In his evaluation under (d)(2) of this section of the ability of the municipality to maintain and operate a facility upon completion, the commissioner may not disqualify an application for a grant under this section if the applicant demonstrates that use or commitment to use by parties other than groups directly concerned with use of the facility for artistic or cultural activities, including allied community and educational uses, is reasonably necessary to secure regular use of the facility and an adequate contribution of revenues to supplement revenues to meet costs of operation and maintenance derived from general municipal sources or from groups using the facility for the principal purpose for which constructed.

Liisa Rudd, Chairman
Community & Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

To Honorable Miss Rudd;

Please support HB 781 and 782. These bills will make it possible for the development of a Regional Cultural Center in Dillingham, through use of State Bond Monies. This region is growing quickly, yet many dedicated citizens have no place to pursue their services, present instructional programs, meet in committee, organize office space, or otherwise upgrade and express widespread civic and cultural involvements. Such a center would do much to bring citizens together, focus on meaningful activities, and facilitate the best committments that democracy makes possible.

I know the plan is well developed and would be responsibly administered. It is the sort of objective that State officials could point to with pride and participate in with leadership.

I speak for many concerned people in our community when I urge you to lend your support to these bills and help our communities obtain the sort of building that would benefit this entire region.

Thank you for your service and attention.

RE: HB 781 & HB 782

Dear Representative Rudd:

HB 781/782 describes a unique means of providing aid to communities throughout this State who have been searching for a place to gather, perform and share culturally enriching programs. Although Wrangell has not completed its study data for its own facility, there is great interest in the project conforming to these bills' description.

The Wrangell Chamber of Commerce, Inc. strongly feels that passage of this legislation without alteration will enable participating communities to not only culturally enrich the area, but also broaden their economic base.

Conditions set forth in this legislation are the only way in which Alaskan communities can afford to construct and maintain these much needed facilities.

In light of the years of preparation behind this project, we wish to support its validity and urge positive action on the part of you and your committee.

Sincerely,

for Douglas Holbeck,
President, Wrangell Chamber of Commerce, Inc.

Dear Rep. Rudd and Committee Members,

The Wrangell Arts Council has reviewed HB 781 and 782 and strongly feels that this legislation could provide much needed facilities throughout the state.

We would like to go on record as supporting this legislation including its realistic guidelines for implementation. We would also like you and your committee to approve this legislation in the hopes that the voters of Alaska will get the chance to see state funds put to use benefitting all Alaskans.

Sincerely,
Wrangell Arts Council

Dillingham Arts Council

Dillingham, Alaska 99576
February 23, 1978

Representative Lisa Rudd, Chairman
Community & Regional Affairs Committee
Pouch V
Juneau, AK 99811

Dear Representative Rudd:

We of the Dillingham Arts Council are asking that you support HB 781 and 782. These bills, sponsored by Representative Duncan, provide for placing proposed cultural facilities on next fall's ballot for bond issue. One of these facilities would be located at Dillingham.

This cultural center has been a project of our arts council for four years. During this time data on community needs and plans for the center have been developed. The final plan is an educational-cultural complex providing services for this entire region. The needs provided for are regular and vocational classrooms for adult education, a museum, theater, day-care center, and office space for various organizations. Of special concern to us is the theater.

We must have state funding in order to build this center. Please support these bills.

Very truly yours,

Norma Adkison

Norma Adkison, President
Dillingham Arts Council

Greater Sitka Arts Council Inc.

BOX 1090 SITKA, ALASKA 99835

Lisa Rudd
Pouch 5
Juneau, Alaska

Dear Ms Rudd;

As President of the Greater Sitka Arts Council, it has been brought to my attention that there are two bills pending regarding Cultural Facilities Development in the House.

Speaking for Sitka and the financial situation of most smaller towns in Southeast, we strongly endorse the passage of House Bill #781/782 by Representative Duncan. The use of land as a match in funding the center would be the only feasible course for our city. If we had to come up with hard cash, it is doubtful our city would be able to participate. On behalf of the Greater Sitka Arts Council, I urge passage of Bill #781/782.

Thank you.

Judy Ferguson
President GSAC

BRISTOL BAY REGIONAL RESOURCE CENTER

Box 10234 Dillingham, Alaska 99576 Phone (907) 842-5531

Robert T. Brown
Director

February 23, 1978

The Honorable Representative Lisa Rudd, Chairman
Community & Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Rep. Rudd:

I am writing in asking your support of HB 781 and 782 which would place the proposed cultural facilities on next fall's ballot for bond issue.

As Director of the Bristol Bay Regional Resource Center we are quite interested in a Regional Cultural Center. We are, indeed, interested in leasing space for our operation of providing educational services to the school districts of the Bristol Bay area. We are further committed to interfacing with other local agencies as we broaden our scope of services and opportunities to the youth and citizenry of Bristol Bay. The opportunity to share a Cultural Center with other agencies would help facilitate these efforts. As Dillingham becomes more so the socio-economic center of the Bristol Bay area buildings must be provided to meet the growth.

Thank you for listening and do appreciate any support you may lend to this cause.

Sincerely,

Robert T. Brown
Director

THE AMERICAN LEGION - DEPARTMENT OF ALASKA

P. O. BOX 250 JUNEAU, ALASKA 99802

January 21, 1978

Resolution passed by the Department Executive Committee
at Haines, Alaska

RESOLUTION NO. 78-3

WHEREAS, It is recognized that the existence of adequate cultural facilities in Alaskan communities is of direct benefit to the economy and quality of life in such communities; and

WHEREAS, The educational and cultural programs made possible by such facilities have been proven to be a determent to crime and social deviance; and

WHEREAS, Legislation is now being proposed to provide state matching funds for the construction of such facilities; now, therefore, be it

RESOLVED, That The American Legion, Department of Alaska, in Executive Committee Meeting assembled in Haines, Alaska on January 21, 1978, supports in concept the proposed legislation to implement, by law, State of Alaska matching grant funds to communities which qualify for justified cultural facilities and projects; and be it further

RESOLVED, That The American Legion urges the Legislature of the State of Alaska and the Governor to act favorably on the legislation so that a bond issue for first increment funding can go before the voters of the State in November of 1978; and be it further

RESOLVED, That copies of this resolution be sent to each member of the Alaska Legislature and to the Governor of Alaska.

Rep. Lisa Rudd, Chairwoman
House Community & Regional Affairs Committee
Pouch V
Juneau, AK 99801

Dear Lisa:

Once again I'd like to remind you of our great interest here in Haines in HB 781 and 782 providing for state participation in the construction of cultural facilities in various parts of the state.

HB 781 and 782 represent the thinking anddesires of numerous communities that have worked hard together to put together a package which is truly state-wide, and which represents large and small communities alike.

Naturally, Haines, as the seat of the biennial Alaska State Community Theatre Festival, is most interested in passage of the legislation, since it will permit badly needed construction to make our Chilkat Center for the Arts the proper all-year facility we need.

Your efforts in passing HB 781 and 782—bills which are preferable to HB 768 and 769 which address the same problem but not so well—will be much appreciated.

Sincerely,

Raymond R. Menaker

P.C. 3.3.78

Box 606
Cordova, Alaska 99574
February 27, 1978

Dear Governor Hammond:

I am writing in support of House Bills 781 and 782 which authorize the construction of community cultural facilities (781) and provide a bond which will implement the construction thereof (782). I am aware that there are several other bills which pertain to this same issue; however, it is my opinion that bills 781 and 782 provide the best choice of legislation being presented in consideration of this issue.

A twenty-four year resident of the state of Alaska, I attended the University of Alaska, graduating in 1960. I have lived and worked in a number of Alaskan communities and have been a high school teacher for the past ten years. During my years in Alaska, I have been consistently involved with what may be broadly termed the humanities. It is my firm opinion that the bills for construction of community cultural facilities are not concerned with frills, as the voices of protest may opine, but with the essential nourishment of the human spirit. Looking back to even the most "primitive" societies one finds that after the hunting and fishing was done a great amount of time was spent on cultural activities.

I tend toward the thought that in this era of technological advancement we've been neglecting the humanizing elements. The National Endowment for the Arts, enabling every state and many cities therein to form arts councils and develop arts programs, is a healthy indication that a good many persons see the need not only for national funding and guidance, but also the fact that the essential communication will take place at the community level.

Here in Cordova we have been working with the Cultural Facilities Development Committee for several years. The school board has passed a resolution acknowledging the need for a humanities center and a desire to operate it for the benefit of both the school and the community. The city council has agreed with the school board and has volunteered the land necessary for construction when the bond issue passes.

Thank you for your thoughtful consideration of this matter.

Sincerely yours,

Gail T. Nolan

RE: HOUSE BILLS 781 and 782

Dear Representative Rudd and
Committee Members:

This letter is to urge you to support House bills 781 and 782, introduced by Representative Duncan, which deal with cultural facilities around this state.

In addition to having an obvious artistic benefit, we feel that the buildings themselves will stimulate the growth and economy of the communities involved in this project and for future communities which wish to take part.

Never has Alaska seen a project of such scope and magnitude initiated directly by the people, which sets out their needs, will encompass the majority of Alaska's population, provide jobs and been supported by so many various organizations and political groups.

Passage of these two bills will, in our opinion, be one of the best ways of allowing all Alaskans to participate in stimulating their local economy, enriching their lives, provide jobs, and promote tourism--one of the cleanest industries in the world.

Sincerely,

Susie Sauser

Dear Ms Rudd:

As Superintendent of the Dillingham City Schools, I wish to express support for the inclusion of the proposed cultural facilities on next fall's ballot for bond issue. I feel that HB 781 and 782 would urgently fit the needs of our community.

There is a real need for a regional cultural center in Dillingham. Some of the needs which such a center could meet are at present either not being met or are being met with make-shift facilities. Such a facility would be particularly worthwhile for the school system in that it would reduce the overload in the use of school facilities and make possible the scheduling of many more school/community events. I also feel that the proposal facilities would enable us to expand our offerings, especially in the performing arts, as we would then have access to adequate production facilities, such as a stage and an auditorium.

Your consideration would be greatly appreciated.

Sincerely,

Herbert Oba

Representative Lisa Rudd, Chairman
Community and Affairs Committee
Pouch V
Juneau, Alaska 99801

Dear Ms. Rudd,

I am writing in support of House Bill 781 and 782. As I understand it these bills would provice funds for a regional cultural center to be located in Dillingham.

This facility is sorely needed. The school is the only building in the city that can be scheduled for many of the activities such a center could provide and the school is over scheduled without meeting half the demands placed upon it. Many activities have to be part time and done in a place not established for these activities in order for them to be held at all.

One glaring need that this facility would aid would be activities for the young in our community. With the exception of the school, there is virtually no where for the youth to go and hardly any activities for them. This facility would provide relief to these programs.

I ask your support for the regional cultural center in the Bristol Bay Area.

Sincerely,

Don LeClair

March 1, 1978

Representative Lisa Rudd, Chairman
Community & Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Representative Rudd:

This letter is in support of House Bills #'s 781 & 782 for the proposed regional cultural center for Dillingham.

A center of this nature is non-existence in Dillingham as well as Bristol Bay and would be used to its fullest capacity by all agencies in this area. All the agencies in Dillingham use either the Dillingham Youth Center, which is too small and very uncomfortable; or the High School Gym, which needs to be scheduled far in advance so as not to conflict with school activities; for their meetings, banquets, hearings, etc.

If such a facility was available the Johnson-O'Malley and Indian Education programs would definitely utilize it. Under the Indian Education programs we provide the Native Heritage Museum that is presently cramped in the local City Library. We do not have any space for our storage cabinets or exhibit panels to store when they are not in use. With the regional culture center we can have one area set aside for our museum and expand it to a larger facility with adequate storage space. The students in the Dillingham Schools and well as community members tour our various art displays of local artists, statewide exhibits, student & adult native crafts and articles and artifacts of the native culture, but the limit of space dampers the total appreciation of our museum.

Also the Johnson-O'Malley program has evening carving and skinsewing classes, native dances, native olympics and a large variety of activities, that could be held in a cultural center, for students. A facility of this nature with a warm atmosphere would put the enthusiasm and interest back with the students.

Once again, please support House Bills #'s 781 & 782 for the proposed regional cultural center for Dillingham.

Sincerely yours,

Rose Heyano

The Honorable Jay Hammond, Governor
State of Alaska
Pouch A
Juneau, Alaska 99811

Dear Governor Hammond:

As Program Director for the Willimbon Municipal Arts Council, I endorse this appropriation request for the support of House Bills 701 and 702, such bills being to expand the Regional Cultural Center that is being erected in Willimbon.

We are a trade union of artists and craftsmen who live and work in Willimbon. We are a relatively young organization, having been established only a couple of months. Our membership is growing rapidly and we feel it is due to the success of the Regional Cultural Center. We feel that the Center is a valuable asset to the community and will be a great benefit to the people.

We are very pleased to learn that this bill has been introduced. On January 25, our members unanimously passed a motion to support the establishment of the Regional Cultural Center here in Willimbon. If the bills pass, they must be signed before March 31, 1977 or 75% of the bill will be paid by the Federal government. We would appreciate your support for the bill. If you require any further information, please do not hesitate to contact me at my office.

We therefore urge you to give the bills your favorable vote, and to actively seek their passage in the legislature.

Thank you very much.

Respectfully yours,

Helen E. Rowe, Program Director
Willimbon Municipal Corporation

14 March 1978

Rep. Lisa Rudd. -

I am writing in support of H.B. 781 and 782 sponsored by Rep. Duncan. The development of Fine Arts Centers throughout the state is essential to preserve, protect and promote the works of Alaskan artists.

Bills 781 and 782 ensure that Sitka will be able to begin developing the Sitka Intercultural Arts Center. The land-match clause and clause developing an advisory committee are most important to the success of the total plan.

The Honorable Lisa Rudd
Alaska State House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Representative Rudd:

This letter is to indicate our support for H.B. 781 introduced by Representative Jim Duncan of Juneau. Alaska has long been in the vanguard of states concerned about the access of its people to the arts. This performing Arts Bill introduced by Representative Jim Duncan, will insure the performing arts a lasting place throughout Alaska. Most of the communities which would benefit by this bill could not expect performing arts centers to be constructed by the private sector. The people of this State will only have access to the arts if the performing art centers are built with State participation. In most cases communities will not have the cash necessary to match State funds on a dollar for dollar basis. Thus, it is important to allow municipal contributions to be in the form of land. Duncan's Bill does these things and should be passed.

Yours very truly,

James F. Clark

Pouch V, Juneau, Alaska 99811

Dear Representative Rudd:

We are asking your support, and that of your committee for the two bills on Cultural Facilities Development, HB 781 and HB 782.

Our exoerience in Juneau has been that cultural centers are usually at the bottom of the oricrity list for construction. The Juneau Douglas High School gym was built several years before the school auditorium, but soon the auditorium was so booked with school events that other community activities were crowded out. A church building has been a stopgap for the Little Theater, but it is inadequate. Another need is for exhibition space. The State Museum has its own showings,and there is seldom space for other shows.

The two bills you are considering hold out some hope for Alaska cities to obtain cultural centers,so we are asking that you consider them carefully, and support them if you can see your way to do so.

Thank you for your assistance.

Very truly yours,
Dick & Mary Peter
Mr. and Mrs. Richard Peter

Please support HB 781 and HB 782

We are all dancers and need such a cultural facility. Right now we rehearse in church basements. We need such a facility to further local/community talents and creativity. We need such a facility so professional companies can perform in Juneau.

Dear Representative Rudd;

We would like to urge you to support HB 781 and HB 782 regarding the Cultural Facilities Project. Juneau desparately needs an adequate performing arts facility, as do the other communities in the state involved in the project. Judging from the number of activities going on this spring alone, we're sure that a performing arts facility will be well-used in Juneau.

Jim Duncan's bills provide for community involvement in these cultural facilities projects and the communities will benefit greatly from them. As members of the Juneau Oratorio Choir, the chorus for "CARMEN", and as individuals, we hope that you will give these bills careful consideration and support.

Thank you for your help.

Sincerely,

J. Allan MacKinnon

Capitol

Dear Representative Rudd:

I am writing in regard to HB 781,782, concerning the Cultural Facilities Development Project. I consider this project essential and urge you to pass these bills out of Community and Regional Affairs unanimously.

Here in Juneau, as well as in other communities throughout the state, we have a desperate need for a performing arts center. As a writer I know of many instances in which we here in Juneau found it difficult to set up a literary program because there were no adequate facilities. Those concerned with music, dance, and drama have had an even harder time. If we are to recognize the importance of the arts in all our lives and move forward, culturally, in this state, we must have adequate facilities.

Please vote now to support and move along HB 781,782.

Sincerely,

Sheila B. Nickerson

Dear Rep. Rudd:

Although we are currently travelling, we do wish to express our support for H.B. 781 and 782, co-sponsored by Jim Duncan et al.

The creation of an art center in Sitka and the other towns involved will be an economic as well as cultural contribution to Alaskans.

Additionally, it will point out to others that there is more to Alaska than wilderness and pipeline.

We also believe that legislators will someday look

region. The cultural center is one of these more out-standing achievements, when it is complete.

Sincerely,

Rev. and Mrs. Robert W. Stertz

Lisa Rudd
Chairman, House Community and Regional Affairs Committee
Juneau, Alaska 99801

Dear Lisa Rudd:

This letter is written to request your support of House Bill #781 and #782.

As a physician, I am concerned with the health of my community as well as other communities and of greater Alaska. In this regard, the bond issues provided for in the above bills would allow the state to assist the communities which have put together developmental plans for civic centers and therefore enrich the sociocultural environment and consequently the "health" of the community in general.

I feel this kind of investment is a sound investment and definitely affords these communities the opportunity to improve their quality of life. I feel that the communities included in the bond issue request have made sound plans for the development of these centers and should be supported.

This is to respectfully request your support.

Sincerely,

R. Holmes Johnson, M.D.

Rep. Bill Miles
Box V
Juneau, Alaska 99801

Dear Bill:

You have many difficult issues facing you and I do not envy you the job of trying to sort through the immensities of both money and implications for the State. It is almost more than can be dealt with, particularly in a year so fraught with pressures of elections and other matters. In spite of what is written about the House or Senate, for that matter, in the press, I feel from my observations that the individuals are really struggling to come up with equitable decisions. I appreciate those like yourself who will not be pressured into a quick decision if you cannot see some aspect of the long range effects.

So many times, people are pushed to make a quick decision on a big project and within a few years it is demonstrated that it was not all that important in the total picture. Waiting a little longer for the waters to clear will not hurt some situations.

But there is one smaller item which may already have come up on the floor which I think deserves passage for numerous reasons and which will have values down the years beyond what many can see now. That is HB 781 and 78 As you know, I have been part of this planning for some time--first with the Bicentennial Commission, then with the Mayor's Advisory Committee and then in conjunction with the state-wide group. It is refreshing to work on something cooperatively where benefits can be gained in more places than just Anchorage, to know that Anchorage votes are vital to its success and to know that we think that's great.

The important values, however, are on what it will mean to each community to have an adequate center about which creative endeavors can be generated. The fact that the project requires grass-roots statements of individual community needs, that thorough planning is required so that the facility will indeed be correctly designed, that the local government entity has to agree to maintenance and operation--all make it a good project. Buildings alone, of course, don't bring creative activities into being. But good facilities make it possible for those creative souls to carry out their activities in a manner worthy of the effort and they also contribute toward upgrading whatever the programs might be.

The provision for the Advisory Commission is wise. It will help communities work out proper plans and designs and will encourage groups to seek the professional assistance they need to do this.

I believe that creative progress in communities is as vital for the peoples' health as sewers and roads and airports. True, people have to eat and have economic life of some sort. But value is either without some soul-satisfying activity which enlivens the imagination and makes people "feel good?"

Governor Jay Hammond
Juneau, Alaska 99801

Dear Governor Hammond,

We are waiting to ask your support of House Bills 781 and 782 for statewide cultural facilities. Having been a visitor to our community, you are probably well aware of the great need for this kind of facility in Cordova. The educational facilities that we have at present are very inadequate. It is difficult to schedule the school related uses and activities in these facilities, let alone trying to schedule community use of the buildings. A cultural facility designed to meet our particular needs would be a great boost to cultural activities and certainly of much educational benefit.

Sincerely,
Jack and Paula Lamb

Re: House Bills 781 and 782

Dear Community and Regional Affairs Committee:

A Performing Arts Center is in great need by the residents and visitors of Juneau, and similar facilities are needed in many other areas of Alaska.

While touring with the St. Paul Singers over a seven year period, visiting approximately eighteen communities, from Ketchikan to Kotzebue, we found very few facilities outside our two largest cities which could easily be used for cultural activities. We "made-do", as Alaskans have for years, but it seems that our communities deserve better facilities than that which they experience at present.

Alaskans need entertainment, whether provided by themselves or guests, and adequate facilities in which to be entertained.

I strongly urge you to unanimously pass House Bills 781 and 782 out of committee, for the benefit of all Alaskans.

Sincerely,

Jean E. Grummett

Juneau, Alaska 99811

Dear Lisa,

I know that our community is very much in need for an auditorium. Our community doesn't have a recreation center for teen-agers, so they don't have anything to do except get into mischief. People have to think about their children's future. What is there that can provide entertainment for our community? NOTHING!! That is the whole problem. There is not a movie hall, there is no teen age recreation center, no museum, or a place where people can just talk and get to know eachother. We (Dillingham) are trying to support alot of little villages, when we don't have any facilities to support them with. Another big problem is, fishing is our main event in the summer, quite alot of people fall off their boat and drown because they don't know how to swim! We are in need of a swimming pool to save lifes!! Please help our communities, by passing this bill number 781 & 782 for a helping hand.

Sincerely,

CITY OF DILLINGHAM

P.O. BOX 191 DILLINGHAM, ALASKA 99576

TELEPHONE (907) 842-5211 or 842-5212

BASIS FOR COST ESTIMATES

DILLINGHAM REGIONAL CULTURAL CENTER

SPACE ALLOCATIONS:		SQUARE FEET
Stage/Auditorium/Classrooms		7,665
Museum and Craft Rooms		2,399
Day Care Center		1,761
Rental Space		
Bristol Bay Area Health Corporation	4,000	
Bristol Bay Native Association	6,000	
University Extension Program	5,600	
Regional Resource Center	2,000	17,600
General and Miscellaneous		
Kitchen	207	
Conference/Banquet Room	1,540	
Boiler Room	1,216	
Mechanical Equipment	1,026	
Stairs and Elevator	464	
Corridors	6,600	
Toilet Area	540	11,593
TOTAL USEABLE SPACE		41,018
TOTAL AREA PER OUTSIDE DIMENSIONS		45,000

COST ESTIMATE FOR PLAN "B" (45,000 sq/ft @ $200/sq.ft) is $9,000,000.00

Current building costs in Dillingham vary but the recent school gymnasium which included no restroom facilities and minimum equipment cost $150/sq.ft. to build and equip. The estimate of $200/sq.ft. for the Cultural Center is intended to include all equipment.

The preliminary plan is subject to change of use areas to be determined by needs which may arise, but the major areas have remained unchanged since the original plan was drawn in 1975. The primary intent is to allocate enough space to meet community and regional needs and still allow enough rental space to provide income for maintenance of the building.

Dear Ms. Rudd:

We have already corresponded once about HB 781 and 782, and your comment about my concern for the "health" of my community was appreciated. The fact that you put the word in quotes leads me to suspect that I used the word with tongue in cheek. On the contrary, as I presume you are aware , we are learning more and more that the psychological "climate" of the individual has a profound effect on his health and furthermore, the psychological "climate" is largely dependent upon the environmental "climate." In this sense "climate" refers to the terrain, the weather and the physical and biological community. So I really used the word "health" in an un-quote fashion.

To get back to the principal reason for this letter, I write to discourage any amendment to propose legislation that would increase the local participation requirement. It should be kept in mind that the community is already supplying the land (in our case six acres) a sum computed by a formula based on the population (in our case two hundred sixty-six thousand dollars) and a plan for management of the facility which insures that there will be no ongoing expenses to the state. To me this is a way of saying that the cultural facilities grant is a "seed grant" which is the most sensible kind of investment. The State sows the "seed" and the community supplies the soil, the work, the fertilizer and sees to it that it results in a full grown and self perpetuating plant. I cannot see how any of the communities can be expected to come up with more local support than is already required.

Our Cultural Facilities Committee met a few days ago to discuss the Consortium Agreement with the agencies involved in the Management Board, the City's agreement with the architect, the advanced planning and the local promotion of the facility and the possible forthcoming bond issue. We feel confident that the legislature will support the issue but do not feel as confident that the Governor will endorse it. We know he feels the investment a worthy one but it will remain to be seen whether he feels it as worthy as many other issues that are also

14 June 1978

Mr. Dean Ehrich, Executive Director
Alaska Visitors Association
201 East 3rd Avenue
Anchorage, Alaska 99501

Dear Mr. Ehrich,

I appreciate your telegram in support of the cultural facilities legislation, HB 781 and HB 782. I do not believe the amendment you suggested is really needed, however. The legislation has been drafted to be fairly flexible so that communities will be able to build facilities with community meetings and conventions in mind, as I know several of them intend to do. The emphasis on the cultural aspects of the facilities protects those uses from being entirely overtaken by the other uses you described, but nothing precludes convention uses being included in the facility.

Unfortunately, the legislation has been bottled up in the Senate Community and Regional Affairs Committee, chaired by Senator Orsini, and from all indications he does not intend to let it out of committee.

Yours sincerely,

Lisa Rudd

THE ALASKA VISITORS ASSOCIATION URGES PASSAGE OF HB731 AND HB732 RELATING TO STATE AID TO MUNICIPALITIES FOR THE CONSTRUCTION AND DEVELOPMENT OF CULTURAL FACILITIES SUBJECT, HOWEVER, TO AN AMENDMENT CHANGING THE MEASURES TO INCLUDE THE FOLLOWING LANGUAGE "CULTURAL, COMMUNITY AND MEETING FACILITIES."

WE FEEL THIS CHANGE WILL CLARIFY THE BILLS TO ENSURE THAT SMALLER COMMUNITIES MAY HAVE THE OPTION TO DEVELOP MULTIPLE PURPOSE FACILITIES TO PROVIDE COMMUNITY MEETING PLACES ALONG WITH THE VARIOUS CULTURAL FACILITIES DESCRIBED IN THE LEGISLATION. FURTHER, HAVING THIS OPTION AVAILABLE WOULD OPEN THE WAY TO MAKE WHATEVER FACILITIES DEVELOPED EVENTUALLY SELF-SUPPORTING.

YOUR FAVORABLE CONSIDERATION OF AVA S POSITION WOULD BE DEEPLY APPRECIATED.

DEAN EHRICH, EXECUTIVE DIRECTOR

ALASKA VISITORS ASSOCIATION

Lynn Canal Community Players, Inc.

HAINES, ALASKA 99827

March 17, 1978

Lisa Rudd, Chairman
Community & Regional Affairs Committee
House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Ms. Rudd:

The Lynn Canal Community Players, Inc. is one of the oldest little theatre groups in SE Alaska, having given its first production in 1957. Since that time, its members have been the prime movers in bringing cultural entertainment to the Chilkat Valley and producing many theatrical productions of their own.

This group was instrumental in initially establishing a cultural facility in the Haines area during the Centennial year, when funds were made available for such a project. By using one of the large unused buildings at old Ft. Wm. H. Seward, the Chilkat Center for the Arts took form. However, this building is in sad need of renovation, as well as enlargement. The Alaska State Drama Festival takes place here every other year (1979 will be next), and present facilities are woefully inadequate.

We wholeheartedly support the proposed bond issue which will make facilities available to many other communities. The emergence of adequate cultural facilities in the cities and towns of Alaska will spark an upsurge in all phases of the arts, bringing the 49th state in line with many other states which are considerably ahead in the fostering of arts and cultures.

Let us not let this opportunity slip by! These centers will have multiple uses, such as meeting rooms, convention centers, dinners, art shows and displays, and adequate facilities for visiting artists, both in the performing and visual arts fields. Alaska is attracting tourism--now a major industry. How much more could be done for the visitor were such centers available?

We support HB 781 & 782, but not the bill proposing matching funds, as this immediately kills the possibility of ever having such centers in communities. We sincerely urge you to get it out of committee with a "do pass".

Sincerely,

LYNN CANAL COMMUNITY PLAYERS, INC

March 8, 1978

Representative Lisa Rudd, Chairman
Community and Regional Affairs Committee
Pouch V
Juneau, Alaska 99801

Dear Representative Rudd:

The Sitka Fine Arts Committee would like to urge your support of HB 781 and 782. These companion bills, introduced by Representative Jim Duncan and several others, represent the needs of our community as well as the eleven other communities planning arts facilities.

There are two points which these two bills cover that are not covered by other legislation dealing with the subject; first, a match based on community size and including land as part of the match, and second, an Advisory Board which would advise the Department of Commerce and Economic Development about funding priorities.

It is essential that land be part of the match and that the cash match be related to community size. Without such consideration, many communities would be unable to participate in the project. It is equally important that an advisory board be included in the program. The facilities that have been planned by the participating communities reflect several years of effort by those communities. Their plans represent careful thought and thorough research, and the resulting designs are based on community arts needs. Obviously the present bond issue will not serve all the above communities. It is essential that community funding be based on priorities. An advisory board, as outlined in the Duncan legislation, could state those priorities.

As your committee considers these pieces of legislation, we respectfully request that you consider HB 781 and 782 as the legislation that best meets our needs.

Sincerely,

Jan Craddick

March 6, 1978

Ms. Lisa Rudd, Chairperson
House Community and Regional Affairs Committee
Courthouse Room 20
Juneau, Alaska 99811

Dear Ms. Rudd:

As an art instructor I would like to strongly voice my support of the Duncan bill for cultural facilities, HB 781-782.

I have been a member of the Baranof Arts and Crafts Association and involved with the development of the Intercultural Arts facility since its proposal in 1974. Our main interest is the high security gallery and studio space that has been developed as a part of this building. We also recognize the overbooking of the Centennial Building which now tries to serve this purpose but does not have a secure gallery nor adequate facilities for stage productions of any kind.

Sitka is a small but very active community as far as the arts are concerned. Because of the community's size it is impossible for us to support the Parr bill as it requires 50% matching money, plus the full responsibility for operational and ongoing expenses. The Duncan bill requires a lower percentage rate of matching funds for small communities and will allow the value of donated land to apply toward this money.

Please let us know other ways we can lend support to HB 781-782 to insure its adoption.

Sincerely,

Alice Slattery

Dear Representative Rudd:

I want to express my support for the Cultural Facilities Development project.

I am especially interested in facilities which encourage local performances and participation and provide workshops where people can learn and pursue new skills in the arts and crafts.

I would also like to urge that serious consideration be given to the inclusion of public libraries in the cultural center in any community which does not have an adequate public library building. It seems to me that the public library is a very basic part of local cultural facilities.

Sincerely,

Dear Lisa Rudd,

I would like to write as a private citizen in support of HB 781 and 782 which would place the proposed cultural facility on next fall's ballot for bond issue.

As coordinator of the Dillingham Extension Center I cannot speak for the Policy Advisory Board which is the local voice for the Dillingham Extension Center. I do know that the Extension Center looks toward facilities of some kind to use in the near future. Facilities will be needed to house classrooms for academic courses as well as those for vocational training (this section would be more specialized). Office space would certainly be used if class facilities were used. The reason that the Policy Advisory Board cannot give you a statement at this time is that they are waiting for our feasibility study to be completed. This completion date will be mid to late March.

March 1, 1978

Representative Lisa Rudd, Chairman
Community & Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Lisa Rudd,

I'm writing to urge your support of House Bills No's. 781 & 782 for cultural facilities. Reasons the the Bristol Bay region and Dillingham are in great need for such a facility are as follows:

1. This facility would serve a region with a population of 5,000 to 6,000 people, not just a community of 1350 because Dillingham is a service center for the Bristol Bay Region.
2. There is no facility in the entire region that houses an auditorium, museum, day-care center, community collage, vocational shops, arts and crafts shops, and a multipurpose recreational room.
3. Any school program (other than basketball and wrestling)and community event has to be scheduled in advance arround these sport activities. This will still be the case when the new gymnasium will be in use.
4. The city of Dillingham has an extremely low tax base and most likely will never ever be able to build such a facility. Therefore, House Bills No. 781 & 782 are the only one that the city of Dillingham would be able to support on a required match bases.
5. Since this project started four years ago, Dillingham has shown continued growing support for the proposed facility. Each time a user group has been asked about their needs, the demands for space and a variety of services continues to encrease.
6. The Bristol Bay area needs to plan for the future continued growth that is not only affecting this region but all of Alaska. People of Bristol Bay that have traveled to other areas of the state have been most impressed with the facilities that exist in the rural communities of Nome, Bethel, Kotzebue, but not in Dillingham.why not?
7. The University of Alaska's Dillingham is in the process of conducting a region wide feasibility study for a community collage to be located in this area. The proposed regional cultural center has already planned to accomodate part of their needs and could be expanded to include all their needs.

My interest in the proposed facility is as museum coordinator for the Indian Education Heritage Museum program. This has been in existance for four years but for the first time it has had an area to display their collection along with statewide rotating exhibits. The city has beenmost cooperative in letting us share a corner of the City Library. But with the hiring of a full time -fully qualified librarian, all the new books will finaly be processed and placed on new shelves. So once again I'm afraid that we shall be left out in the cold! There will be no spot for us to provide the public with our educational and cultural services in local archology, cultural history, native arts and crafts, plus those services offered through the Alaska State Museum and Libraries and the Alaska State Council on the Arts.

The purposal for the Regional Cultural Center to be located in Dillingham includes this much needed museum display and shop space. So once again please support House Bills No. 781 & 782 for cultural facilities. Thank you for your time and support.

most sincerely,

Irma I. O'Brien

cc. Nels Anderson
Governor Hammond

Southeast Alaska Regional Arts Council · Box 2133 · Sitka · AK · 99835

Telephone (907) 747-8177

March 3, 1978

Honorable Lisa Rudd, Chairperson
Community and Regional Affairs Committee
House of Representatives
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Chairperson Rudd and Committee:

We understand that HB 781 and 782 by Duncan and 12 co-sponsors to provide for funding of construction of cultural facilities throughout the State of Alaska is being considered by the Community and Regional Affairs Committee. The Southeast Alaska Regional Arts Council has had a long affiliation with the Cultural Facilities Development Project and wishes to go on record in full support of the Duncan bill in its present form.

A portion of the Cultural Facilities Development Project was begun by the Southeast Regional Arts Council in 1974, with the assistance of a $68,000 planning grant from the Alaska State Legislature and large local contributions, to plan and design badly needed performing arts centers for seven Southeast cities. Meanwhile, independent planning and development efforts to respond to similar needs were proceeding in the North. The need for cultural facilities, ranging from larger performing arts centers with theatre, gallery, and other multi-use space to small "living museum" facilities, has been so great as to sustain citizen interest and involvement and considerable local contributions for the last four years, culminating in the statewide Cultural Facilities Development Committee now incorporated as a separate entity.

Having worked closely with the twelve communities actively participating in the project to develop their cultural facilities, I am confident in saying that Representative Duncan's Cultural Facilities bill is the only feasible approach to funding of construction costs with a statewide bond issue. It is most doubtful that a single community among those with extensive planning completed could generate the necessary matching funds required by HB 768/769 by Representative Parr, nor is it felt that the funds should be allocated exclusively by the Department of Commerce and Economic Development without Advisory Commission input. Representative Duncan's bill, which includes the cost of donated land for the facilities as allowable match, includes a sliding scale by population to determine the amount of match, and makes provision for an Advisory Commission to assist the Commissioner in awarding of aid, is by far the most equitable and farsighted means of responding to the longstanding need for adequate facilities.

We urge you to look at the extensive documentation detailing the planning which has already been completed for each of the cultural facilities which provides justification for the longstanding need for the facilities, costs involved in construction, and considerable local support to make the facilities a reality throughout Alaska and lend your support to HB 781 and 782. The communities are making a considerable commitment to donate land and fund all ongoing costs of the facilities, which are considerable, but statewide support is needed to fund construction costs. Thank you for your support of this far-sighted approach to cooperatively funding needed cultural facilities throughout Alaska.

Sincerely,

Marlene A. Lund
Executive Director
Southeast Alaska Regional Arts Council, Inc.

TO WHOM IT MAY CONCERN:

The Anchorage Arts Council, a private non-profit membership organization dedicated to the development of all of the Arts in Anchorage, strongly endorses the goals and purposes of the Cultural Facilties Development Committee in the creation of cultural facilties throughout the state of Alaska.

Furthermore, the Anchorage Arts Council strongly supports the concepts and mechanisms of state financial assistance to communities for construction of cultural facilities as set forth by House Bill 731 (HB-781 Duncan). The Anchorage Arts Council feels that it is critical for the smaller communities in the state, as well as Anchorage, to be able to utilize the value of land as a legitimate match for state funds. The Anchorage Arts Council also feels that provision for a scaled matching formula would prove more equitable for the smaller communities in the state.

Construction of cultural facilities in Alaska is an urgent community need and a state-wide concern that will prove beneficial to hundreds of thousands of Alaskan residents.

CITY AND BOROUGH OF JUNEAU SCHOOL DISTRICT
P.O. BOX 808 • DOUGLAS, ALASKA 99824

PLEASE USE AIR MAIL TO ALASKA

March 10, 1978

Representative Lisa Rudd, Chairman
House Committee on Community and Regional Affairs
Alaska State Legislature

Dear Representative Rudd:

The Board of Education of the City and Borough of Juneau School District wishes to express its support of HB #781 and HB #782 assisting the development of cultural facilities in Alaska. The construction of such facilities would act as a significant impetus to the growth and quality of the performing arts in our community and would, through increased exposure, provide a strengthened educational experience in the arts for our students.

We feel that education in the arts is an important element in the development of the whole individual and reinforces in varied ways the development of intellectual and physical capabilities. Exposure to the performing arts within the community is a vital part of a child's education, serving both to motivate individual participation and to open new horizons for career and leisure. Although Juneau is not the smallest nor the most isolate community in Alaska, it is, nevertheless, particularly difficult to provide these cultural experiences to our students without assistance.

The Juneau-Douglas School Board urges the House Committe on Community and Regional Affairs to favorably pass HB #781 and HB #782 and, by so doing, to enrich the educational opportunities for children in Alaska.

Sincerely,

Bill Johnson cb

SITKA, ALASKA 99835

March 10, 1978

The Honorable Representative Lisa Rudd
Chairman, Community and Regional Affairs
Pouch V
Juneau, Alaska 99811

Dear Ms. Rudd:

I am writing you in support of House Bill 781 and House Bill 782 especially in reference to Sitka. The project will provide an outstanding opportunity for extending services to this community and Southeast Alaska. From the viewpoint of this television and media producer, the facility has long been needed and will be well used as soon as completed.

I'm especially concerned about the Parr legislation related to the same Performing Arts facilities. Concerns of the utmost importance to me are:

1. Inability to use valuable land for in-kind community match.
2. Lack of requirement for an Advisory Committee.
3. Demand of 50% cash match (only Anchorage would qualify).

Unfortunately, these legislative components are not acceptable to our needs here. Therefore, I strongly support HB's 781 and 782 and would encourage you to do likewise.

We will appreciate your consideration of this matter.

Sincerely yours,

Dan Etulain Ph.D.
Director of Educational Media/Television

March 22, 1978

Senator Jo Orsini, Chairman
Senate Community & Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

Thank you for the opportunity to comment on Senate Bills 507 and 508. Listed below are the answers to questions in your March 9, letter.

1. A needs assessment was done by the Kodiak Chamber of Commerce to see what kinds of activities could be utilized if a facility were built. The primary activity is a 500 seat theater. At the present time, the city's only facilities for cultural activities and large group gatherings for public purposes are the Elk's Club, High School, and Jr. High School gymansiums, as well as the Borough Assembly Meeting Room. None of these are considered adequate for meetings of 100 people or more.

The Kodiak Russian Dancers and other similar cultural groups find it very difficult to utilize any of the above mentioned facilities. With a 500 seat theater we would be able to attract many new cultural and civic activities into the community, as well as better serve the public with the types of activities that are now occurring.

In relation to the Community College, this new facility would provide classrooms for art instruction and drama. This is a current need for the Kodiak Community College. And is one of the reasons they are looking at giving us a piece of land.

2. The total cost of the facility is in the neighborhood of four million dollars. We have approached the University of Alaska regents to obtain a piece of land at the Community College campus, which is located in the City limits. At the present time, we are looking at about six acres which includes parking. Local funding is questionable, depending on the requirements of the legislation and the operation and maintenance costs. The City of Kodiak does not have any funds currently available in which to provide a local match.

3. The annual operating costs of the facility are approximately one hundred thousand dollars. These funds can be raised in several different ways. One, of course, is to charge for the use of the facilities. This would include conventions

and others from inside and outside the community. Another way would be to charge a hotel tax, that revenue could be earmarked specifically for the cultural facility maintenance fund. This tax would be collected by the City of Kodiak.

4. As mentioned above, the specific site we are now looking at is located at the Community College. We do not have the current value of this site, however, this information will be provided as soon as it is available. The site is now owned by the State of Alaska and we are trying obtain it from the Regents. In preliminary discussions with the University, they are quite interested in the land donation, as this facility would be utilized by the college as well. The last we heard this request will be taken up by the regents at their next meeting in the early part of April in Juneau.

5. The Community Development Plan is now being revised by the Kodiak Island Borough planning commission. This facility will be in that plan. For the 1978 fiscal year, the City of Kodiak will have the cultural facility in its capital improvements program. In addition, this type of facility has been mentioned as a priority item in the City's overall economic development program.

6. Depending on the specific location of the facility, we should have sewer, roads and water to the site provided by the City of Kodiak. If funds were not available from the project, the City of Kodiak would consider providing the necessary infrastructure, however it depends on where the ultimate site is.

If you require any additional information, please feel free to call on me at your convenience.

Very truly yours,

CITY OF KODIAK

Re: Testimony on House Bills 781 & 782

Dear Representative R d and Committee Members:

To clarify some statements I made while testifying before your committee on Monday morning, March 13th, I would like to state that my references to priorities for which communities would most likely be funded from the initial thirty million dollar bond issue were purely subjective. The priorities the Cultural Facilities Development Committee used were merely suggestions from within the Committee as we discussed ways of working with a thirty million dollar proposal instead of the eighty million dollars required for full funding. The Committee has made no definite decisions concerning priorities for funding and, as can be seen from the proposed legislation, these decisions would be up to the State Department of Commerce and the Advisory Board, regardless of what the Cultural Facilities Development Committee desired.

I would like to thank all committee members for giving the Cultural Facilities Development Committee the opportunity to give testimony regarding this important legislation. If you have any further questions please do not hesitate to contact myself or Mrs. Shirley Rediger, at any time.

Sincerely,

Allan P. Gregg

Subject: HB781, HB769, SSHB769

Dear Chairman Rudd:

The City of Seldovia is presently building a Library, using a State grant. We need more facilities.

Construction cost can be minimized, if buildings are built to local acceptable conditions, as opposed to State and Federal standards.

Houses which cost $50 to $60 a square foot under Farm Home regulations, cost over $85 a square foot when built to State and EDA standards.

The need is great, but we must permit the Local Government to reduce construction cost in Rural Alaska.

Respectfully

City of Seldovia

Seldovia, Alaska 99663

Dear Mr. Smith,

Thank you for your letter regarding HB 781 and SSHB 769, establishing a cultural facilities construction grant program for municipalities. We have heard from several municipalities in the state that such a program is needed.

Your comments on the high costs of construction are much appreciated. However you did not go into sufficient detail to show how local acceptable standards might differ from State or Federal standards. Could you perhaps give me an example of a state standard that is being imposed in the construction of Seldovia's library which is unreasonable and increasing the cost of construction?

I will share your letter with members of the House Community and Regional Affairs Committee. Thanks again for writing.

Yours sincerely,

Lisa Rudd

Governor Jay Hammond
Pouch A
Juneau, Alaska 99811

Dear Governor Hammond:

This is to voice my strong support for a multipurpose cultural center for Dillingham.

Presently, there is a girth of space for community activities and cultural events. We must rely almost entirely on the High School gym with limited seating on backless benches and folding chairs. The conference room of the City Hall is small and the Youth Center poses hazards.

Dillingham is the recognized regional center for the Bristol Bay Area. It is growing both in size and sophistication. The proposed cultural center would meet the needs of civic groups and encourage an appreciation of the arts. The improved quality of life would have a stimulati g and elevating effect on all the village and townspeople of the Bristol Bay Area.

Sincerely,

BRISTOL BAY AREA HEALTH CORPORATION

February 23, 1978

Thought you might be interested. Thanks —

Dear Connie —

Please excuse the form letter. As I mentioned on the telephone, letters of support for HB 781 and 782 introduced by Representative Duncan and co-sponsors needs support now if we are to be considered for a Regional Cultural Center. The reason for supporting these specific bills is because others being introduced would require up to a 50% match of funds by the local community. This bill requires a 10% match based on the assessed valuation of the community, which would bring ours down considerably lower than that.

Perhaps you have only heard that the proposed center is sort of a pie in the sky dream. It sounds big for Dillingham, but actually, planning has been going on for about 4 years and has included many questionaires to community organization as to local needs. The basic part of the plan is for a stage/auditorium. The auditorium would seat 500 people but two portions of it can be closed off with movable doors to make classrooms which would seat 75 people. This facility could be used by the high school drama and music departments, for programs at Beaver Roundup time, concerts and programs throughout the year, and for showing movies as part of a money raising project to help support maintenance of the building. The projection equipment could also be made available for non-profit groups to show their films in this theater instead of the gym or youth center as they presently do.

Other portions of the building would be used for a day care center, kitchen, conference and banquet room, museum and craft rooms, and there would be rental space which has already been spoken for by the University of Alaska Extension Service, Regional Resource Center, BBNA and the Health Corporation. It is expected that the major cost of maintenance of the building would come through rental of this allocated space. Several groups have also indicated that they would like to rent the conference room for large meetings. Location of the building near the school would make it accessible to them for meeting some of their presently unmet space needs.

There are 12 communities around the state that are requesting funds for a cultural center. If the bond passes, some of them are going to have new facilities. Some of them already have many nice buildings, they are requesting a specific theater. Dillingham has planned to meet many of the needs of the community with one building. We feel that Dillingham should be considered for this money--others interested include Valdez, Kodiak, Sitka, Juneau, Skagway, Naknek, Anchorage, Petersburg--if the money is made available, why not to us?

Many people have commented lately that in travelling to Bethel and Kotzebue they have seen many fine facilities built by the state for those communities. People in Bethel are quoted as saying "Bethel fights the state for what it wants, Dillingham fights each other". If we pull together, maybe Dillingham can have a needed facility too.

The city council has supported the idea of the center with the stipulation that it must be able to maintain itself. If the center is to have a chance to get on the ballot, letters of support are needed now to the following people:

Governor Jay Hammond
Pouch A
Juneau, Ak 99811

Lisa Rudd, Chairman
Community & Regional Affairs
Pouch V
Juneau, Ak 99811

Steve Cowper, Chairm
House Finance Committ
Pouch V

I can't mail out copies of the plan but would welcome a visit from you to look it over at City Hall. Thanks for your help.

Gail Hammond

January 5, 1978

Mr. Tiny Boyer
P.O. Box 1485
Kodiak, Alaska 99615

Dear Tiny:

Under separate cover we will be forwarded Preliminary Plans for the proposed Convention Center at Kodiak. These are conceptual drawings only and are not to be interpreted as the final scheme. More input and discussion with the user agencies in your area is required, however, for a starting point they are adequate for presentation to the authorities in Juneau.

We have discussed costs of building with several contracting firms who have had considerable experience in construction in areas similar to Kodiak, and along with our own experience, we have arrived at an estimate which would be valid for the 1979 and 1980 building season.

We have estimated the construction costs as follows:

To construct shell, as indicated on plans	$2,260,000.00
To complete interior (basic)	1,000,000.00
Theater Design & Special Finishes	
Acoustics	
Lighting	
Stage Housing	
Special Consultants	80,000.00
Landscaping	
Design & Consultants	
Parking & Paving	
Traffic Flow	
Special Outdoor Lighting	353,000.00
Architectural Design Fee	
Structural	
Mechanical Services	
Electrical	171,500.00
Soils Consultant & Investigations	
Design of Footings	
Special Foundations	35,000.00
Total Costs for overall completion	$3,899,500.00

There may be adjustments according to the site that is selected and the bearing quality of the footings, but included in the above figure, adequate prices have allowed for a substantial foundation.

We trust this information meets your requirements for the moment and if anything has been overlooked, please contact our office immediately.

Best wishes for success in you building program.

Yours truly,

Peter R.D. Vout, A.I.A.

March 7, 1978

Community & Regional Affairs
Lisa Rudd, chairman

Dear Lisa,

I write to urge your support of Representative Duncan's Cultural Facilities bill....HB781, HB782.

Some of us in Southeast Alaska have been working on this project since 1974, with financial support on several occasions from the legislature.

So far as I know, it must be the only project which has been planned in advance with costs established based on 1980 construction.

It is exciting to me that what was a SE objective has spread to other communities in Alaska - and all have joined with the same advance planning.

The Performing Arts Center committee in Juneau is a committee of the Greater Juneau Arts and Humanities Council. On the Planning Committee, of which I am chairman, there are eight other members.

There are 16 USER groups which have helped to develop plans for the Juneau center. This means that all of the performing arts have been represented and have played a role in the devlopment of plans thus far. In addition to this, we have twenty-five or more persons on the Development Committee. I should note that each of the USER groups have memberships varying from small to large.

It would surely be meaningful to Juneau to have a performing arts center. Since our population is relatively small, the burden of maintaining and operating the facility will fall on the Borough, so funding through a state-wide bond issue is critical to Juneau having the facility. The Borough Assembly members have indicated full support of the project provided that land can be a major part of the "match".

I look forward to hearing positions as they are presented to your committee.

Sincerely

Jane Stewart

March 9, 1978

Representative Lisa Rudd
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Representative Rudd:

I am writing to urge your support for HB 781 and HB 782 relating to the Cultural Facilities Development program. As a member of the Juneau-Douglas Branch of the American Association of University Women I have been active in our branch cultural activities - the Annual Alaskan Arts & Crafts Show and the annual Fellowship play.

We find it a problem each year to locate a suitable place for these events at reasonable cost. If Juneau had a Performing Arts Center, I am sure our organization would be a user and that our annual cultural events would be even better attended and presented.

I am sure that the problem of adequate cultural facilities is not confined to Juneau. Every community should have the opportunity and the facilities to enjoy music, theatre, art, and the other group activities which bring us together as people.

So I hope that you will work to pass this bill out of the C&RA Committee soon so it can be considered by the Finance Committee.

Thank you very much for taking time to read my comments.

Sincerely,

Jan Hickey

March 9, 1978

Representative Lisa Rudd
Pouch V
Juneau, Alaska 99811

Dear Representative Rudd:

I think Juneau needs a Performing Arts Center. I have always enjoyed going to plays and concerts, and have felt the lack of it in Juneau. Though the Juneau-Douglas Little Theater does a good job, the available facilities are inadequate. If Juneau had a Performing Arts Center then not only could they have local talent perform but also bring in some of the professional road companies to put on plays and bring in concert groups.

At the moment Juneau has too many bars and not enough places to go to enjoy some of the more cultured things in life. I would like to see Juneau with a place to go see plays, ballets, concerts and operas. I think it would make an already beautiful town a much more desirable place to live.

Sincerely,

Nancy K. Moore

Nancy R. Moore

P.S. This is covered under HB 781 and HB 782.
N.R.M.

Dear Ms. Rudd;

I would like to add my support to HB 781 and 782 sponsored by Jim Duncan for the Juneau Cultural Facilities project.

I have been a participant in the art community of Juneau and the state for the past 15 years and believe that Juneau is truly a cultural center whose only limitation is adequate facilities. This center would be a boost to the entire state.

Sincerely,

Ms. Sharron Lorugh

March 10, 1978

Rep. Lisa Rudd
House Committee on Community and Regional Affairs
Pouch V
Juneau, Alaska 99811

Dear Rep. Rudd:

I am writing in support of House Bills 781 and 782 introduced by Rep. Duncan and others.

Allowing local communities to use land as a part of their matching contributions is vital for Juneau's participation in such a program. In addition, land is certainly a major cost item in any such undertaking and should be allowed as a portion of the total cost.

As an individual active in the performing arts, I know how great the need is for such facilities here in Juneau. The production of two operettas and the current production of a full-length opera have been frustrating, at best, due to the lack of local facilities.

I sincerely hope that both HB 781 and HB 782 will be sent from your committee with a "do pass" recommendation.

Sincerely,

Charles M. Northrip

Community & Regional Affairs
Lisa Rudd, chairman

Dear Lisa,

I write to urge your support of Representative Duncan's Cultural Facilities bill....HB781, HB782.

Some of us in Southeast Alaska have been working on this project since 1974, with financial support on several occasions from the legislature.

So far as I know, it must be the only project which has been planned in advance with costs established based on 1980 construction.

It is exciting to me that what was a SE objective has spread to other communities in Alaska - and all have joined with the same advance planning.

The Performing Arts Center committee in Juneau is a committee of the Greater Juneau Arts and Humanities Council. On the Planning Committee, of which I am chairman, there are eight other members.

There are 16 USER groups which have helped to develop plans for the Juneau center. This means that all of the performing arts have been represented and have played a role in the devlopment of plans thus far. In addition to this, we have twenty-five or more persons on the Development Committee. I should note that each of the USER groups have memberships varying from small to large.

It would surely be meaningful to Juneau to have a performing arts center. Since our population is relatively small, the burden of maintaining and operating the facility will fall on the Borough, so funding through a state-wide bond issue is critical to Juneau having the facility. The Borough Assembly members have indicated full support of the project provided that land can be a major part of the "match".

I look forward to hearing positions as they are presented to your committee.

Sincerely

Jane Stewart

The Hon. Jim Duncan
House of Representatives
Pouch V, Capitol Bldg.
Juneau, Alaska 99811

Dear Rep. Duncan:

I am writing in support of HB 781, 782 which you sponsored for Cultural Facilities Development.

We are President and Secretary, respectively, of the Juneau Symphony, and see a great need in Juneau for a Performing Arts Center which this bill could provide. Rehearsal and performance space in Juneau are terribly limited at present, almost to a critical point.

My husband also participates in several other activities: member of the Juneau Brass (which will be playing at the Seahawks/Alaska Legislature basketball game this evening) and member of several chamber groups. Finding a suitable spot for rehearsal and performances is almost impossible, and several gatherings have had to be held in homes which proves to be extremely crowded.

I cannot be too emphatic about our support of the above-mentioned bill and would urge all legislatures to support it.

Sincerely,

Bill Clarke Jr.

Greater Juneau
Arts & Humanities Council

March 10, 1978

The Honorable Lisa Rudd
Chairperson
Community & Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Representative Rudd:

On behalf of the Greater Juneau Arts & Humanities Council, I would strongly urge your favorable support in passing HB 781/782 out of your committee.

These two pieces of enabling legislation are the result of several years of effort from the combined resources of many, many interested Alaskans and myriad organizations.

Especially critical to the welfare of cultural facilities development is the fact that HB 782 allows for land to be used as a local match. If land is not allowed as a match, most communities -- including Juneau -- would be unable to raise the percent of cash match required in addition to municipal donation of the land and municipal funding of maintenance and operation costs.

The support of this legislation by your committee and eventual passage by members of the Legislature would give all Alaskans an opportunity to then vote on this bonding in the November General Election.

Please, help us to realize the dream and recognition of all those who are willing to support cultural facilities in Alaska. In the words of W. Somerset Maugham - who perhaps said it best: "Culture is not just an ornament; it is the expression of a nation's character, and at the same time it is a powerful instrument to mold character."

Thank you.

Sincerely yours,
Patricia A. Saylors

Governor Jay Hammond
Pouch A
Juneau, Alaska 99811

Dear Governor Hammond:

I am writing to say I support HB's #781 and 782. I feel our community needs a Regional Cultural Center. I think that unless the center is on the 1978 Bond Issue, Dillingham will not be able to have a cultural center. My reason for feeling this way is the immediate needs of the community, and the rising cost of building, and the increasing cost of maintenance.

The longer the delay, the less chance of support or financing. In order that the "dream" becomes a reality, it should be within the next year. If delayed the potential user groups may no longer have a need or interest in the center, to the extent which they presently indicate. The delay would also raise maintenance costs possibly to a prohibitive level that would again eliminate potential user groups.

As you are aware we have no theatre, movie house, or other place for community activities. The gymnasium is utilized as available for some civic functions but, is far from adequate for the performing arts let alone for a capasity crowd in a safe manner.

As a member of the Dillingham Community I am aware of no office space available in many groups such as Arts Council, and Chamber of Commerce, the officers keep their pertinent records in their own homes, because no central location is available.

We are growing community - we need a Regional Community Center now.

I ask for your support of HB's 781 and 782.

Sincerely yours,

Barbara S. Lowy

Lisa Rudd, Representative
State Legislature
Juneau, Alaska

Dear Lisa:

This is to add my support to HB781 and 782 now in your Committee -- Cultural Facilities Development Projects.

All of our communities have need of such facilities - but I can speak to the dire need for more convention type facilities for Juneau. My job for the Federal Govt. requires that I make space arrangements for meetings, training sessions, workshops, etc. all the time. There just is not enough places in Juneau to meet the needs this community has. Any organization that needs meeting room can testify to that.

As Training Officer for the BIA I can testify to the fact that the few conference rooms in the State Buildings and the Federal Building are not sufficient for agency needs, and there just is not enough other facilities to take up the slack.

Anything you can do to move this legislation would be appreciated by everyone who works with this problem. Should you need further information or documentation let me know.

March 9, 1976

Dear Mrs. Rudd and CRA Committee Members:

This letter is a plea for the CRA committee's affirmative consideration of HB 761, 762 which concern a Performing Arts Center in Juneau. No doubt, there will be other letters sent to your committee bringing you other points of view.

All who have been involved in the presentation of concerts or plays to the public in general or to interested groups, have been perplexed at the lack of places where such presentations can be made. The high school auditorium alone cannot provide space for all programs in a growing community. The churches have been most generous in providing spaces, but even they have a heavy schedule for their own programs, and often the public presentation is not of a nature suitable to be given in a sanctuary. My interests have been in the cultural arts only, and here are some of the serious situations encountered by just a few organizations.

1. The Juneau-Douglas Concert Association often has the opportunity to present artists that are enroute to or from other spots in Alaska. Lack of space for presentations has often prevented Juneau's taking advantage of such cultural offerings;

2. The Juneau Little Theater recently provided an excellent presentation of Man of La Mancha, but the building in which the play was given was small, inadequate and dingy. Why must the Capital of Alaska have such a shortcoming?

3. The Juneau Oratorio Choir which gives several concerts a year also provides workshops for choirs in Juneau. It is certainly in the interest of all church choirs that their choirs have extended training here. Such workshops need space for meetings during the day and in the evenings.

4. For the past few years, Juneau has hosted an excellent String Symposium sponsored by the Performing Arts Council. String players from Southeastern Alaska come here for training and performance. Again, the churches have been generous, but it is obvious that the growing symposium, holding its sessions over the weekend when working people can come here, will find churches in need of their space for their own services.

5. In some years, the SE Alaska Music Festival is hosted by Juneau. From personal experience I can testify that Sitka's art center provided an adequate and a beautiful space for the Festival's practices and performances. Juneau, with at least 5 times Sitka's population, has nothing to equal such a center. Why not?

o. Juneau, and, in fact, all SE Alaska, has many artists whose work must have some exposure. The proposed Arts Center could provide a continuously-rotating art museum for the benefit of the artists, the people of Juneau, and tourists and visitors.

These are obviously only one person's partial involvement in the arts. I have not mentioned the small groups of young artists who need "exposure and experience" and who ought to be heard--here. I have not mentioned the tourists who may be artists who could be persuaded to present concerts if a space were attractive and readily available. I have not mentioned school groups from Juneau and SE Alaska who need more space than the school can provide when all groups converge during a festival. I have not mentioned the various ethnic groups who should have an opportunity to present to the general public their cultural heritage.

The arts are the continuing education for enriched living of all age groups. In Europe, many opera and concert houses are provided by the state as places where all the people can learn and enjoy art. Certainly Juneau can provide for its people and for those of SE Alaska a place where the treasures of sight and sound can be presented. Juneau is a growing community; we cannot accept a shrinking, moribund cultural atmosphere.

My thanks go to Jim Duncan for introducing the bills, and my urgent plea for the favorable and unanimous consideration of HB 701-702.

Thank you.

Sincerely yours,

Adelheid G. Pauls

Juneau, Alaska 99811

Dear Governor Hammond,

As members of the Cordova Arts and Pageants, Ltd. board of directors, we urge you to support HB 781 and HB 782.

Cordova needs a performing arts center. We have been actively working for several years to make this a realization. Through support from community members and our local school district we have financed the plans for such a center. Community support alone gave us $1600 during a two night variety show. Alaskans give strong emphasis to cultural activities, and we are proud that Alaska is number one in the nation in dollars spent on the arts. Cordova needs a performing arts center so that our community can have the best performers and the best in performances.

We strongly urge you to support HB 781 and HB 782.

Dear Governor Hammond,

Cordova needs a performing arts center. There are currently two bills in the House, HB 781 and HB 782, which I strongly urge you to support.

Many fine groups have come to Cordova to perform through the work of the Alaska State Council on the Arts, the National Endowment for the Arts, and our local council, Cordova Arts & Pageants, Ltd., but many obstacles are often presented because there is no adequate facility. Our multi-purpose gym lacks adequate acoustics, comfortable seating but most important high school activities demand almost constant use of this facility.

I strongly urge you to support HB 781 and HB 782.

Sincerely,

Richard W. Croff

Dear Ms. Rudd,

The Baranof Arts & Crafts Assoc. is in full support of Rep. Duncan's H.B. 781/782. We feel the passage of Duncan's bill is essential to the successful completion of the Cultural Facilities Development Project. A land match is the only feasible way for most communities to provide matching funds. The appointment of an advisory commission by the govenor from State Arts Council recommendations of people familiar with the project and its needs is extremely important to its success.

Sincerely yours,
Baranof Arts & Crafts Assoc.

Jay S. Hammond,
Governor of Alaska
Pouch A,
Juneau, Alaska 99811

Dear Governor Hammond,

As an active member of Cordova Arts & Pageants, Ltd. which is the local arts council for the community, I have worked for four years to bring visual and performing art programs to Cordova. It is often with great difficulty that a program can be scheduled because we lack a center especially for cultural activities. Since our only facility with adequate space is the high school gym, school activities do take precedence even when our programs have been scheduled weeks in advance. The high school gym is inadequate in many ways lacking adequate acoustics, comfortable seating, as well as scheduling for rehearsal, practice and performance.

Cordova needs a performing arts center. I strongly urge you to support HB 781 and 782. So many programs and exhibits are available to us through the Alaska State Council on the Arts and the National Endowment for the Arts, and we wish to give the performers our best efforts and our community the best performances possible.

Sincerely,

Kay A. Groff

Rep. Lisa Rudd
Alaska State Legislature
House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Lisa:

I wish to support House Bills 781 - 782: State Aid: Municipalities: Cutural Facilities and Bonds for Cultural Facilities legislation.

I have lived and participated in the performing arts in Juneau, Fairbanks and in Anchorage. Although these are urban settings, each has a very limited capacity for the performing and cultural arts due to the fact that no space is especially designed to accomodate the needs. Over the years I have had the pleasure of watching a solid and healthy arts community take shape in Alaska but these efforts - especially in the smaller communities - are frustrated by inadequate or no available room.

These various cultural groups have the capacity to work together and share among themselves; they been doing it for a long time. It is important if we are to take advantage of talented and dedicated people that we provide the type of space they need and not treat them as though they were just passing through. I believe the legislation which has been proposed will give adequate places for a variety of traditional and non-traditional art forms.

After all, we have seen men on the moon and a pipeline of some note built through impossible circumstances - can't we provide something for the spirit?

Sincerely yours,

Mary Lou Spartz

LISA RUDD

Municipality of Anchorage 5/28

HB 843: AN ACT PROVIDING FOR EQUALIZATION OF THE TAX RESOURCES OF MUNICIPALITIES, CONTINUING A PORTION OF THE PROGRAM OF STATE AID FOR MUNICIPAL PURPOSES; AND PROVIDING FOR AN EFFECTIVE DATE.

Under HB 843, Sections 43.18.010-43.18.050 of the preser t statutes are repealed. These sections provide the authority for current state-shared revenues. In lieu of this, new Chapters 88 and 89 have been added to Section 29 of the statutes. Chapter 88 deals with a new source of revenue called an "Equalization Entitlement". Chapter 89 provides for the continuation of a portion of the state-shared revenues formerly authorized in Section 43.

A review of HB 843 reveals it to be ambiguous in certain cases as well as presenting a redistribution of income approach to state revenue sharing. On the basis of the information made available to us, it appears to be detrimental to the Municipality of Anchorage. The Municipality of Anchorage has severe reservations concerning HB 843.

HB 843 presents a redistribution of income approach to the concept of state-shared revenues. The title of the new item of revenue "Equalization Entitlement" provides an insight in itself. The stated purpose of the bill is "to assure that no municipality suffers impoverishment of necessary public services, relative to other municipalities, because of the chance location of taxable wealth in the state." (Sec. 29.88.005). One of the criticisms of the present law is that it does not include "ability to pay" considerations. A community with a larger than the state average per capita property valuation receives revenues at the same rate as communities which are relatively poor. It is further stated that the same criticisms can be raised with respect to per capita income differentials from which taxes are paid. The net effect of the formula is to favor economically disadvantaged communities.

1. A municipality will be better off if it is high or low in the various components of the equalization entitlement formula as follows:

Population	High
General Govt. Property Tax Mill Rate	High
Sales Tax % Rate	High
Local Per Capita Income*	Low
Local Per Capita Property Value*	Low

* Compared to state averages

2. Anchorage has both a higher than average per capita income and per capita property value. This is confirmed by the Printout which shows Anchorage to have unfavorable income and property value factors in the computation formula compared with most other jurisdictions within the state.

3. HB 843 would greatly reduce the degree of local automony. Communities would be faced with a new restriction as to use of the state revenues. Under current state statutes, state-shared revenues may be expended for any public purpose for which the local government has power to expend public funds, except for a few limitations regarding health facilities revenues. Sec. 29.88.030 of HB 843 contains additional requirements regarding the use of funds for specific service areas and tax zones. Although the new provisions are fairly consistent with the way Anchorage has been allocating past state-shared revenues, we would no longer have the flexibility to do otherwise if the circumstances so warrant.

4. Another possible problem with the proposed formula contained in HB 843 is that it would tie a municipality's position in the revenue sharing pool to statewide variables such as statewide assessed value that are largely beyond its control. For example, a major resource development project that might alter variables such as statewide per capita income and assessed value could affect the revenue sharing entitlements of local governments without regard to changes in need for those municipalities Under HB 843, it is difficult for a municipality to project what its revenue sharing entitlement might be two or three years in the future.

5. In a rapidly growing area such as Anchorage, the local per capita income and property value would likely increase at a greater rate than the state average thereby creating an adverse effect in the equalization formula.

6. After first having become reasonably satisfied with the validity of the revenue sharing data elements, the "new" version printouts and formula modification were analyzed to determine the effect on Anchorage. Two of Anchorage's concerns with the original version of HB 843 appear to have been rectified.

- The sales tax portion of the proposed revenue sharing formula has been changed to eliminate the disproportionate weight given to a sales tax in the original formula. The effect of the change is to cause the proposed revenue sharing allocation system to be neutral with respect to each municipality's taxing philosophy. However, Section 29.88.045, subpart 2 (b)V, of the bill appears to exclude hotel-motel tax.

- Revenues from Anchorage's 5% hotel and motel tax have been recognized as a sales tax in the new printouts. It is interesting to note that Anchorage's hotel and motel tax receipts are almost equal to all of Juneau's sales tax receipts and are almost half of the city of Fairbanks'

sales tax receipts. However, the effect of this has been reduced by the above change in the sales tax portion of the proposed revenue sharing formula.

The following matrix provides a comparison of the effect on Anchorage of HB 843:

	1977 Actual (a)	Original HB 843	Substitute HB 843
Amount Shown on State Printout	$8.4 million	$9.2 million (b)	$9.6 million (c)
Amount if Funded at 1977 Level	$8.4 million	$6.8 million	$6.6 million
Anchorage's % of State Total	46%	37%	36%

(a) $18.3 million total state payout
(b) $25.0 million total state payout
(c) $27.0 million total state payout

The second line of the above matrix shows Anchorage's funding if the total state funding were not increased. Under HB 843, Anchorage's share of state-shared revenues will diminish from 46% of the state total to only 36%. For comparative purposes, it should be noted that a 46% share of a $27.0 million state payout would equal $12.4 million.

We find it difficult to support the philosophical approach behind HB 843. There is no simple correlation between tax base, personal income and what state revenue sharing should be. Tax base is only indicative of the size of the physical plant (building, dwellings, etc.) within a given community. Tax base does not necessarily relate to service needs or demands. Urban densities, congested traffic, large numbers of unemployed and crime rates are more closely connected to the need for service. Service demands criteria are important factors to consider before making any judgments on tax base and its relationship to state revenue sharing.

The assumpption behind HB 843 as the bill is presently drafted appears to be that some municipalities are not receiving a fair share of revenue sharing funds, and, conversely, that other local governments are receiving a disproportionate amount of available dollars to which they are not equitably entitled. Although the first portion of this assumption may be correct, Anchorage objects to the implication that the Municipality is receiving more under the present revenue sharing program than it should equitably receive. Our calculations indicate that, at present, Anchorage receives approximately 46% of state revenue sharing funds. Wtih approximately 50% of the state's population, the present program is, if anything, slightly inequitable on a per capita basis for Anchorage taxpayers. Under the proposal advanced in HB 843, the percentage of revenue sharing funds for Anchorage would decline to only 36%. Although there may be merit in providing increased assistance to municipalities with a relatively small tax base resource, it seems difficult to jusitfy taking funds from Anchorage that will, in essence, need to be replaced by Anchorage taxpayers. It is well known that the

existing revenue sharing program has been under funded in recent years. If a need is felt to provide increased assistance to some municipalities, a strong statement from the Legislature calling for 100% funding of the present program would be an appropriate beginning. If funding at a higher level can be provided by the state (i.e., the $27.0 million level proposed in the substitute HB 843), then the state revenue sharing rates contained in the existing law should be increased to partially compensate for the increase in the consumer price index since they were originally established. This would help local governments in maintaining a status quo in the services they are able to render through state shared revenues rather than lose ground due to inflation.

Municipality of Anchorage 5/28

HB 843: AN ACT PROVIDING FOR EQUALIZATION OF THE TAX RESOURCES OF MUNICIPALITIES, CONTINUING A PORTION OF THE PROGRAM OF STATE AID FOR MUNICIPAL PURPOSES; AND PROVIDING FOR AN EFFECTIVE DATE.

Under HB 843, Sections 43.18.010-43.18.050 of the present statutes are repealed. These sections provide the authority for current state-shared revenues. Two of Anchorage's concerns with the original version of HB 843 appear to have been rectified.

- The sales tax portion of the proposed revenue sharing formula has been changed to eliminate the disproportionate weight given to a sales tax in the original formula. The effect of the change is to cause the proposed revenue sharing allocation system to be neutral with respect to each municipality's taxing philosophy. However, Section 29.88.045, subpart 2 (b)V, of the bill appears to exclude hotel-motel tax.

- Revenues from Anchorage's 5% hotel and motel tax have been recognized as a sales tax in the new printouts. It is interesting to note that Anchorage's hotel and motel tax receipts are almost equal to all of Juneau's sales tax receipts and are almost half of the city of Fairbanks'

sales tax receipts. However, the effect of this has been reduced by the above change in the sales tax portion of the proposed revenue sharing formula.

The following matrix provides a comparison of the effect on Anchorage of HB 843:

	1977 Actual (a)	Original HB 843	Substitute HB 843
Amount Shown on State Printout	$8.4 million	$9.2 million (b)	$9.6 million (c)
Amount if Funded at 1977 Level	$8.4 million	$6.8 million	$6.6 million
Anchorage's % of State Total	46%	37%	36%

(a) $18.3 million total state payout
(b) $25.0 million total state payout
(c) $27.0 million total state payout

The second line of the above matrix shows Anchorage's funding if the total state funding were not increased. Under HB 843, Anchorage's share of state-shared revenues will diminish from 46% of the state total to only 36%. For comparative purposes, it should be noted that a 46% share of a $27.0 million state payout would equal $12.4 million.

We find it difficult to support the philosophical approach behind HB 843. There is no simple correlation between tax base, personal income and what state revenue sharing should be. Tax base is only indicative of the size of the physical plant (building, dwellings, etc.) within a given community. Tax base does not necessarily relate to service needs or demands. Urban densities, congested traffic, large numbers of unemployed and crime rates are more closely connected to the need for service. Service demands criteria are important factors to consider before making any judgments on tax base and its relationship to state revenue sharing.

The assumpption behind HB 843 as the bill is presently drafted appears to be that some municipalities are not receiving a fair share of revenue sharing funds, and, conversely, that other local governments are receiving a disproportionate amount of available dollars to which they are not equitably entitled. Although the first portion of this assumption may be correct, Anchorage objects to the implication that the Municipality is receiving more under the present revenue sharing program than it should equitably receive. Our calculations indicate that, at present, Anchorage receives approximately 46% of state revenue sharing funds. Wtih approximately 50% of the state's population, the present program is, if anything, slightly inequitable on a per capita basis for Anchorage taxpayers. Under the proposal advanced in HB 843, the percentage of revenue sharing funds for Anchorage would decline to only 36%. Although there may be merit in providing increased assistance to municipalities with a relatively small tax base resource, it seems difficult to jusitfy taking funds from Anchorage that will, in essence, need to be replaced by Anchorage taxpayers. It is well known that the

existing revenue sharing program has been under funded in recent years. If a need is felt to provide increased assistance to some municipalities, a strong statement from the Legislature calling for 100% funding of the present program would be an appropriate beginning. If funding at a higher level can be provided by the state (i.e., the $27.0 million level proposed in the substitute HB 843), then the state revenue sharing rates contained in the existing law should be increased to partially compensate for the increase in the consumer price index since they were originally established. This would help local governments in maintaining a status quo in the services they are able to render through state shared revenues rather than lose ground due to inflation.

NOTES TO MARCH 25, 1978 REVENUE SHARING PRINTOUTS

The "new" version printouts are based on a modification of the formula that appears in HB 843 and SB 502. The sales tax portion of the formula is changed. Instead of multiplying the sales tax per cent rate by 2.3, the new version compares the sales tax revenues of each municipality to the revenue generated by 1 mil of property tax in each municipality. The quotient is expressed as a mil rate equivalent. The effect of the change is to cause the proposed revenue sharing allocation system to be neutral with respect to each municipality's taxing philosophy.

REVENUE SHARING DATA--1977

PER CAPITA EXISTING: The dollar amounts in this column correspond to the entitlements received this year by each municipality for all service categories except road maintenance, health facilities and hospitals, and military entitlements. The categories in this column would be repealed by HB 843. Entitlements are lumped into the first listing for each municipality with several listings.

R,H,M: The dollar amounts in the column correspond to the 1978 entitlements that will be received for road maintenance, health facilities and hospitals, and military support. These categories of the present revenue sharing law are saved by HB 843.

TOTAL ENTITLEMENT: The column sums the entitlements that will be received this year (each entitlement has been adjusted for the cost of living allowance).

POP: The certified population numbers used by the Department of Community and Regional Affairs (CRA) for the revenue sharing program.

PER CAPITA PROP. VALUE: The column lists the full and true property value of each municipality or subdivision thereof divided by the population of the municipality or subdivision thereof. Municipalities without property assessments are estimated (EST). The estimated value for second class cities in the unorganized borough is determined by averaging the per capita property values for communities in the unorganized borough with populations of 750 or less.

1976 PCI: The dollar amounts listed in the column correspond to the per capita income figures as determined by adjusting the 1974 Bureau of Census income estimates by 1976 data supplied by the National Planning Data Corp.

PROP. TAX: The numbers in the column correspond to the adjusted property tax mil rate of each municipality or subdivision thereof. Property tax rates appropriated to educational purposes are excised from the base figure before the mil rate is adjusted to the equivalent mil rate on the full and true value of property as determined by the state assessor.

SALES TAX: The numbers correspond to the sales tax per cent rate in each municipality. Sales tax appropriated to education is not included. The per cent rate shown is used in the original version of HB 843, but is not used in the new formula.

S. TAX REVENUE: Sales tax revenues are obtained from the municipal audits filed with the Dept. of CRA. When 1977 audits were not available, the sales tax revenue number taken from the 1976 audits was inflated to represent the expected increase in sales tax revenues in 1977. When no audit was available, each community known to have a sales tax ordinance was credited with an estimated sales tax revenue amount obtained by a similar community with the same sales tax rate in effect.

COLA: Cost of living allowance.

'NEW' PROPOSED REVENUE SHARING (1977 DATA)

PROPERTY TAX: The adjusted property tax mil rate.

S.T. EQUIV: The column lists the sales tax equivalent expressed as a mil rate. The number is determined by dividing the actual sales tax revenues of each municipality (less any portion appropriated to educational purposes) by the revenue generated by 1 mil of property tax on the full and true value of property in that municipality.

PCI RATIO: The numbers are the quotients determined by dividing the state average per capita income ($8,001) by the per capita income of each municipality or when available, the per capita income of a subdivision of a municipality. A quotient greater than 1 indicates that the per capita income is lower than the state average.

PROPERTY RATIO: The numbers are the quotients determined by dividing the state average per capita property value ($42,871.8) by the full and true per cpaita property value of each municipality or subdivision thereof. As with the PCI ratio, a number greater than 1 indicates that the municipality has a per capita property value lower than the state average.

AVE. RATIO: The numbers in the column are the average of the two previous columns.

LOCAL EFFORT: The numbers are the result of adding the property tax mil rate to the sales tax mil rate equivalent and multiplying the sum by the average ratio. The product of the local effort number and the proration factor (3.3516427) is the dollar amount per capita that each municipality would receive under the formula portion of HB 843. The local effort factor is not allowed to exceed 25, as specified for in HB 843.

POP.: Population.

PER CAPITA ENTITLEMENT: The dollar amounts are determined by multiplying the local effort factor times the population times the proration factor of 3.3516427. (The proration factor represents the upward proration of each entitlement necessary to pay out a total of $25 million.)

TOTAL (+ RHM): The column adds the entitlement in the previous column to the entitlement for road maintenance, health facilities and hospitals, and military support.

PRESENT ENTITLEMENT: The dollar amount that will be received by each municipality in 1978.

This printout does not consider Sec. 9 of HB 843 which specifies that each municipality will, for the next three years, receive no less than their 1978 entitlement. The next printout does consider Sec. 9. The entitlements shown on the next printout for municipalities which receive more under the formula than their 1978 entitlement are 96.9% of the entitlements shown on this printout due to the Sec. 9 add ons.

'NEW' VERSION HOUSE BILL NO. 843 (1977 DATA)

PROPERTY TAX: The adjusted property tax mil rate.

S.T. EQUIV: The calculated mil rate equivalent of each municipality's sales tax.

POP: Population.

CHAPTER 88 ENTITLEMENT: The dollar amounts represent the entitlements calculated for Chapter 88 of HB 843, which is the formula entitlement.

CHAPTER 89 ENTITLEMENT: The dollar amounts represent the entitlements calculated for Chapter 89 of HB 843, which is the entitlement for road maintenance, health facilities, and military support.

SECTION 9 ADD ON: The dollar amounts listed in the column correspond to the difference between the 1978 entitlement and the entitlement under HB 843 for every community which receives less under the proposed legislation than they did in 1978.

HB 843 ENTITLEMENT: This column sums the three previous columns and multiplies the sum by .96861730, which is the downward proration factor necessary to pay out $25 million after the Sec. 9 add ons have been considered.

PRESENT ENTITLEMENT: The actual 1978 entitlement which will be received by each municipality.

ALASKA HOUSE OF REPRESENTATIVES

Community and Regional Affairs Committee

LISA RUDD, Chair

Pouch V, State Capitol
Juneau, Alaska 99811
(907) 465-3870

M E M O R A N D U M

TO: Lisa Rudd

FROM: Annette Smith DATE: April 28, 1978

SUBJECT: Revenue Sharing

You have asked me to look at the present revenue sharing program and at the new proposal for revenue sharing contained in HB 843 in terms of the validity of each program's intent and its workability. And further, to examine the concerns expressed so far by the municipalities and the Department of Community and Regional Affairs with regard to HB 843, together with any possible solutions there may be. The following, then, is a brief summary of each program and its intent, and a compilation of the problems expressed with HB 843 and the suggestions which have been made for amendments.

The present revenue sharing statute was adopted in 1969 to respond to an intolerable situation developing with Alaska's local governments. Mike Bradner summarized the situation in his Study of State Spending Impact on Local Government as follows:

> "Alaska's municipalities in 1969 were in something of a 'double trouble' situation. Many were facing a growing restlessness among real property taxpayers, while at the same time they were under tremendous pressure for expansion and improvements. Real property tax rates had moved generally upward in Alaska communities in the mid-1960s, in part to finance post-statehood growth and optimism, and secondly under the expanded ability to serve brought by the creation of boroughs.
>
> Anchorage was particularly under pressure from growth expansion, with taxes running in the area of 20-mils total, while Fairbanks had experienced a run-up of taxes in the 1960s from fairly modest rates to a total of 26 mils (plus 5% sales tax)."[1]

---

1 Mike Bradner, Study of State Spending Impact on Local Government, 1978, p. 6.

Not every local government situation was the same. Some municipalities were under pressures from increasing population to expand services, while others were simply struggling to catch up with long unmet needs of their communities.

The revenue sharing program was therefore conceived and organized in terms of population and services. The two primary factors determining the shared revenue allocation to each community are: (1) population and (2) categories of services provided by the municipality. Service categories range from the basics of police and fire, through land use planning and transportation facilities, to hospitals operation and construction. Each category is assigned a dollar value or, as in HB 70, assigned a unit value. Values vary according to how important a service is felt to be.[2]

The statute requires certain minimum qualifications as a prerequisite to funding each service. For example, the fire department must be registered by the state fire marshall, police service must be available 24 hours a day, and hospital and health care facilities must be licensed by the Department of Health and Social Services. AS 43.18.040 provides that the Department of C&RA will establish regulations to assure that each municipality is performing the services they claim at least at the prescribed minimum level. The tenor of the statute however, is that the Department should distribute funds to any municipality which is making the barest attempt to provide a service to its residents.

The basic rationale of the program seems to be that population requires services. The simplicity of the program is very attractive since it is easy for everyone to understand. But the program favors the more sophisticated and populous municipalities. One need only look at the increasing share of the pot which Anchorage has commanded over the years with its rapidly expanding population and municipal government. From 1973 to 1977 Anchorage has gone from 40.3% to 47.5% of the total revenue sharing allocation. This becomes an important factor when the program is not fully funded.

Over the years the eligible categories have been increased as municipalities have increased services, and there are several proposals currently in the Legislature which would expand eligible services further. For example: HB 70 would include solid waste disposal and ambulance; SB 507 would include cultural facilities operation; HB 536 would extend revenue sharing for contractual health care facilities in the bush; and HB 691 would extend revenue sharing for certain municipal operations in state or federally owned health care facilities.

---

2 See Attachment No. I.

Since its inception there have been calls for reform in the program. It was recognized immediately that the purely per capita approach is not particularly helpful to the smaller municipalities. There is recognized a certain "irreducable minimum cost of doing business" regardless of population.[3] Even the very smallest cities should provide certain basic administrative services. There is no catagory for administrative services.

Another problem is the lack of requirements for standards and criteria for services. All the Department of C&RA is required to do is satisfy itself that the municipality is providing the service it is claiming. Quality of the service is not an important factor. Thus a city can qualify for $1500 a mile for road maintenance for a few miles of road which are rarely if ever graded. A city can locate ar open space, call it a park and qualify for $5.00 per capita in revenue sharing, leaving the park maintenance up to the birds.

Several of the amendments to the revenue sharing program have been for the purpose of changing the amounts to be received for each category. Presumably, this was to meet the rising costs of services and also to assist in the distribution of any increased appropriations. But any such changes had to be accomplished by going through the entire legislative process.

Finally, it was recognized that the categorical approach did not take into account the actual underpinings of local government services, namely, local property and sales taxes which are the primary sources of funding for municipal services.

---

3 Letter from Representative Mike Miller, Chairman, Interim Committee on Revenue Sharing to Senator Genie Chance, December 8, 1975, p. 2.

The present program delivers the same rate of funding for services regardless of whether the municipalities have any local support at all or whether they have to tax themselves to the hilt to provide those services.

In 1975 an interim committee was established to study the revenue sharing program and to recommend necessary revisions to the statute. The committee's resultant proposal was HB 474 which is, I understand, substantially contained in the current HB 70.

It is interesting to note that Mike Miller's letter of introduction for HB 474 discusses the fact that several municipalities argued for a revenue sharing program which would recognize local tax effort as being a more equitable and realistic approach to revenue sharing. In fact, the interim committee studied legislative proposals which would have implemented such a concept. However, the concept was not adopted by the committee. Apparently, when the figures were run on the local effort proposals, municipalities realized they may not do as well as they expected.[4] I do not know the details of these proposals. Suffice it to say, Alaska's municipalities have recognized the need for reform of the revenue sharing statute and have actually advocated the concept of local effort as a legitimate basis for revenue sharing.

Intent

The stated intent of the present state aid to local governments program is to "reduce local taxation in reasonable proportion to the amount of state aid received". The question is whether the program has had such an effect on local taxation.

There is no doubt that revenue sharing is of great assistance to local government operations, however, it can be argued that the stated intent -- to lower taxes -- has not been accomplished in reasonable proportion to the amount of state aid received.

---

4 Mike Miller's letter P. 3

Mike Bradner's recent report on the state spending impact on local governments gives an idea of the favorable effect state aid has had on local government tax rates. His report concentrates only on Anchorage and Fairbanks, but since these communities are the two largest in Alaska, and therefore the two most likely to benefit most from the per capita base of the present revenue sharing program, his report is pertinent. Mr. Bradner's study does indicate that the total state aid program has contributed to lowered taxes in Fairbanks; in Anchorage it has allowed taxes to remain constant while the municipality has expanded the quantity and quality of its services.

The state aid which helped Fairbanks lower its taxes was state aid for school construction. The borough was able to lower borough taxes and thus allow city taxes to remain constant without undue burden to the taxpayers. While Fairbanks has not added substantial new services, it has increased the quality of its services which apparently was greatly needed. Increased property values due at first to inflation and most recently to high value pipeline company property has contributed to the Fairbanks municipalities' ability to keep tax rates down.

The Municipality of Anchorage has been able to keep tax rates relatively constant while embarking on a program of rapid expansion of municipal government. Mr. Bradner contributes this success also to school aid, revenue sharing and increased property values (and, of course, good management).

Several of the smaller first class cities, on the other hand, are still high in tax rates and low in services. Dillingham has a 1977 tax rate of 17 mils; Cordova, 22, Nome 17.9, and all first class cities have a sales tax.

Across the state municipal governments have been growing over the past ten years in costs as well as in services. Inflation is probably factor number one. Pressure from the local populations to provide more and better services is another prime factor. Pressures also have been growing from the federal and state governments for local governments to provide more services and

more sophisticated administration. [5]

Expansion costs; and while revenue sharing appropriations have increased substantially over the years, the program has not been able to live up to its stated intent to lower taxes in proportion to state aid received. It has helped municipalities get their feet under themselves and it has assisted in the expansion of municipal services.

Proponents of HB 843 argue that the intent of present law to reduce local taxes proportional to state aid is lost because the formula takes no account of what local taxes are and what the local tax base is. Feeding money to a municipality for services at the same rate, regardless of the rate at which the minicipality must tax itself to provide those services, does not reach to the intent of the legislation.

The sponsors of HB 70 seem to have recognized the superfulousness of the intent to reduce taxes, since they left out of the bill any statement of intent whatsoever.

It is conceivable that there is a reasonable public purpose in assuring that specific services are provided by local government, especially if the services are directly related to the health and welfare of the citizens. However, the present program allows a mix of health and welfare and commercial and economic services. There are presently 11 service categories recognized as eligible to receive revenue sharing monies. This is exactly half of the services enumerated in AS 29.48.030. as services which municipalities are empowered to provide. Why are some services favored over others? Why not include every local service?

---

5 Examples: EPA requirements to revamp municipal sewer and water systems; Coastal Zone Management Program, demanding more sophisticated planning and administration; the State Highway Department encouraging increased local maintenance of road systems.

It may be argued that the categorical approach may encourage municipalities to assume more local services and thereby reduce the state's participation in local government services.

Observations of the Department of CRA indicate that revenue sharing is not a sufficient incentive to expand services at the local level. There is not a category which provides enough money to encourage a municipality to assume responsibility for a service. Police service, surprisingly, is a financial loss even at $12.00 per capita. The City of Yakutat, population 442, has avoided taking on local police services. It would probably cost them $50,000 for a one man police department. Revenue sharing would be $5,300 . The State Troopers, therefore provide police protection for Yakutat. The community of Eagle River, population 7,200, resisted local police service for years. It was the community's desire for a better quality of service which finally lead to the determination to assume responsibility for local police service. Their entitlement will be $86,400.

The broadness of the categories and the lack of any criteria will, however, encourage the small cities to seek to qualify for some categories at the minimal level - parks and recreation, health facilities and roads being the easiest for which to qualify.

SUMMARY

The present revenue sharing program enjoys the support of most if not all of the state's municipalities. Although somewhat arbitraty, it is simple and easy for everyone to understand. It has assisted municipalities to meet the increased demands made on them during the past 10 years of growth, especially favoring the larger population centers where the full spectrum of local services is provided.

However, the program is not without recognized deficiencies. The Act has been amended every year since its enactment and the 1975-76 Legislative interim committee considered major overhauls of the program including a local effort concept supported by the Municipal League. The comcept of local effort as the legitimate basis for a revenue sharing program has again been proposed in HB 843.

HB 843

HB 843 repeals all provisions of the present program which allocate monies on a per capita basis (police, fire, parks and recreation, land use planning, transportation, and air and water pollution control). Sections of the present program which allocate monies on an other than per capita basis (health facilities, hospitals, road maintenance and military installations) are retained.

The repealed portion is replaced with a per capita allocation system based on population, taxing rate, and a factor which compares each local government to the state average using per capita property value and per capita income as indicators.

Some municipalities with high property values and low tax rates will lose revenue sharing dollars with this approach. Additionally, several second class cities and one first class city which do not levy any local taxes would receive less. In order to give these communities a chance to come to grips with the new approach, Section 10 of the bill provides a generous three year hold harmless clause so that no municipality will get less than its 1978 entitlement.

The sponsor substitute also includes $25,000 minimum grants to all municipalities in a effort to increase the effectiveness of those local governments.

INTENT

The intent as stated in the sponsor substitute is to:

1. Improve the revenue raising and distribution system for the benefit of residient of home rule and general law municipalities by providing for more equitable allocation of financial resources among municipalities to improve their fiscal capacities;

2. Assure that no municipality suffers improverishment of necessary public services, relative to other municipalities, because of the change location of taxable wealth in the state;

3. Provide an incentive to improvement of the administrative capacity of less populous municipalites. [6]

The basic rationale is that those cities with high property values and high per capita incomes are generally in a better position to fund their local government services than are the municipalities with low property values and low incomes. One mill of tax from a poor tax base will not generate as much revenue as from a good tax base, nor will the revenues go as far to fund services.

---

6 SSHB 843 p.1

The framers of HB 843 have recognized that there is a great imbalance in the distribution of wealth in the state created by the development of the state's oil wealth. The equalization approach is intended to bring every community in line with a mean level of wealth. Most of the state's municipalities have to be brought up to the mean because the North Slope Borough and Valdez far outstrip every other community in terms of wealth. And those economically disadvantaged communities are given an extra tug through this program.

The statement of intent discards any attempt to influence the lowering of municipal taxes. It may therefore run into opposition from conservative interests who would like to at least think that state pressure is being placed on municipalities to lower taxes. The conservative goal of lowering taxes is replaced with the liberal goal of distributing a portion of the state's resource wealth to municipalities and their citizens not directly benefitting from those resources. The conservative side is addressed by the concept that a show of local effort is prerequisite to receiving state shared revenues. This worthy idea is somewhat dampened by the introduction of a generous minimum grant for every community regardless of local effort or population.

The minimum grants provision addresses the "irreducable cost of doing business" on the very basic level. It is considered that just to be organized and functioning as a municipality requires operation funds to hire a person, rent space, but supplies and postage, hold meetings and elections and pay for an audit.

Finally the bill leaves it up to local decision makers what services they wish to provide, presumably according to what they can afford. This eliminates the inequities of the service categories approach where some services were given more weight (dollars) than others and more or less arbitrarily. It also eliminates the encouragement to provide services just because they are included in the shopping list eligible for revenue sharing.

PROBLEMS WITH HB 843

It is difficult to argue against the concept of revenue sharing according to local effort, and it is difficult to argue that all the state's residents should not benefit from the state's resource wealth. However, it is fairly easy to argue the specifics of how to go about it. The following concerns have been raised with regard to HB 843:

1. The formula includes statewide variables over which the municipality has no contol; thereby making it difficult to do any long range financial planning. Primarily this problem relates to the state averages which are involved. A variance of .50 in both the PCI and the PCPV ratio can mean as much as $300,000 difference in the Anchorage areawide entitlement.

The projections which have been made for HB 843 have used a 1977 data base; that is, one year old data. And this data has just become available in 1978. It may be helpful to use a 2 year old data base on which to determine entitlements. This would at least give municipalities a secure base for projections. The drawback would be that the revenue sharing entitlements would be a bit antiquated.

2. The formula for determining local effort does not induce lowering of taxes, but rather encourages keeping taxes high. As noted earlier, it is not the intent of the program to reduce taxes, but rather to augment the local tax revenues. Local tax effort for local services is considered a good thing, otherwise the state would be fully funding local services.

A ceiling of 25 local effort factor has been included in the bill. A municipality gets no more credit for local effort over that figure. Therefore, it is not to a municipality's advantage to raise taxes above that level purely for revenue sharing purposes. There are several cities in the state which already come out above 25 in local effort (primarily first class cities), which might indicate they are hard pressed to meet demand made on their local governments.

John Williams has made a study of how much these municipalities would be able to reduce taxes and still retain the same revenue sharing entitlement.[7] His findings indicate most municipalities may reduce taxes a very small amount provided everything remains equal. It is probably more realistic to expect only those communities about the 25 local effort factor would actually be able to reduce taxes.

It is more likely municipalities will keep taxes the same and increase either the quality or quantity of municipal services. Municipalities which do not now levy a tax may find it advantageous to levy a tax. This is considered a plus by the framers of HB 843. Additionally, municipalities which lose substantial revenue sharing funds under this new approach (by virtue of having a low tax rate and high PCPV and PCI) may find it advantageous to raise tax rates to make up the difference. Valdex, for example, will have to raise their mil rate .20 mils to regain their former entitlement level.

---

7 Memo from John Williams to Terry Gardiner, April 17, 1978, Attachment II.

Lowering the maximum local effort factor to 20 or 15 would have the effect of: 1) reducing the total pay-out; 2) helping those communities with high per capita assessed value, high per capita income, and lower tax rates come closer to the average and thereby receive a larger entitlement; 3) decreasing any incentive there may be to raise taxes for revenue sharing purposes; and 4) decreasing the entitlements to those cities which are above the 25 factor already.

It should be kept in mind that there are two ceilings placed on local effort. One is the 25 local effort factor ceiling of HB 843, and the other is how much the local taxpayers wish to fund services. There is a constant pressure exerted by the taxpayers to lower taxes, regardless of how low they are. It will be more difficult for a council or assembly to reduce taxes, in that a good deal more study will have to be done on the various repercussions of such a move.

The formula, then, while not specifically conducive to lowering taxes, is also not necessarily an incentive to increase taxes except in a case where there are no taxes or very low taxes. The pressures to go either up or down with taxes come primarily from the local taxpayers either in the form of demands for services or demands for lower taxes. [8]

3. Per capita income is not an appropriate indicator of a municipality's ability to pay. It is argued that a city with relatively high income may have either a low or no property tax base, leaving the municipality with a poor showing in the local effort factor. Income tax is not an option available to municipalities. The City of Sand Point testified that a small number of very successful fishermen has driven the PCI for that community up out of proportion. Large tracts of land may be owned by out-of-state landowners or corporations whose income is not reflected in the community.

The framers of HB 843 argue that state averages are needed to come up with relative numbers for the formula, and two indicaters, namely PCPV and PCI, are necessary to make the equation mathematically valid. They maintain that income is a valid indicator of a municipalities ability to pay. Without it, the picture would be lopsided. If the PCI were left out of the formula, there would be a dramatic change in the entitlements of several municipalities.

At my request, John Williams ran the figures for all municipalities given a local effort factor of 20 and eliminating PCI from

---

8 Other pressure may come from the state and federal governments as exampled in footnote 5, page 6

from the formula. The changes were,indeed dramatic. Anchorage gains about $2 million dollars; Juneau gains a few hundred thousand; Sand Point gains $18,000 or 30% and the North Slope Borough loses practically all of its entitlement. This is because the North Slope Borough property values are about 10 times the state average, but the per capita income is well below the state average which serves to bring that municipalities profile more in line with reality. The other main losers with this approach are the first class cities and some second class cities, which by and large are the municipalities which show the highest local effort factors. [9]

4. The conversion of sales tax to a millage equivalent has been called into question by both Anchorage and the Department of C&RA. Anchorage felt that the conversion gives a disproportionate emphasis on sales tax. This has been taken care of to some extent by the Department's suggestion of converting the sales tax to millage equivalent according to the revenue generated.

For example:		
	Property Tax Revenues (10 mils)	$1,000,000
	Sales Tax Revenues (3%)	300,000
	Total Revenues	$1,300,000

One mil property tax equals $100,000 in revenues.

Total Revenues	$1,300,000
Revenue from 1 mil property tax	100,000

=13 mil (millage equivalent) [10]

This is a more equitable approach in that it easily takes into account the local situation. Any exemptions granted by municipal ordinances, such a food, are reflected in the revenues. But sales tax will generally outshine millage simply because it can generate more revenues from the turnover of goods and services in a community.

Sales tax is in the formula because it is one of the two main sources of revenue open to local governments. In some communities this is the only revenue source, since there is no property tax base. Anchorage fortunately has not found it necessary to impose a general sales tax. The hotel tax which the Municipality of Anchorage levies on its visitors is presently not included in HB 843, but it can be included by amendment. The addition to Anchorage's entitlement would be about $320,000.[11]

---

9 Attachment III

10 Letter to Gardiner from DC&RA, March 14, 1978

11 Anchorage Hotel tax = $1,108,739 revenue= .244 millage equivalent.

Anchorage has also argued that this revenue sharing formula actually encourages Anchorage to institute a sales tax. According to Legislative Research, the institution of a 1% sales tax in Anchorage would increase its revenue sharing entitlement by $959,003. Direct revenues from the sales tax would be at lease $12.6 million. For each additional revenue sharing dollar, therefore, the Municipality would generate more than $13 in direct tax revenues.[12] It is not likely the extra $900 thousand in revenue sharing alone would be sufficient incentive for the Anchorage area to insitiute a sales tax, but this is a decision the local taxpayers would have to make.

The Department of C&RA pointed out that several small municipalities could reach the 25 local effort facot simply by instituting a 1.5% sales tax. This was true for the original HB 843, but since the millage equavalent is now determined according to the sales tax revenues, this is no longer likely.

5. The high minimum grants ($25,000) detract from the philosophy of the program, that local effort is a prerequisite for state aid. Most of the small second class cities get revenue sharing dollars in amounts substantially less that $25,000 + COLA. But they do also receive federal revenue sharing dollars. It could be several years before many of these cities are developed enough to find it advantageous to increase their local effort beyond the present level, which in many cases is zero. The burden of local effort remains on the medium and larger sized cities while the smaller ones get a free ride.

The counter argument is that if the state will provide enough money for a city to actually function as a city (including perhaps an administrative person, an office, typewriter, etc.) the city will start to find other sources of revenue, provide more services, and eventually increase its citizens' desires to the point where local effort is required in order to fund the expanded services. It has been suggested that a minimum grant of $15,000 + COLA would be more appropriate and would serve the same end result. It should be kept in mind that these municipalities also receive Federal revenue sharing funds, although in many cases it is not more than $1,000.[13]

More importantly, it should be noted that several of the second class cities incorporated in the state are not really functioning as municipalities now.

---

12 Memo from John Williams, Legislative Affairs to Terry Gardiner, 3/8/78.

13 Attached print out dated 4/26/78 also shows minimum entitlements at $15,000 + COLA. Attachment III

The Department of Community and Regional Affairs has compiled an overview of the state's municipalities and the basic administrative services (i.e. regular elections, regular council meetings, budget and accounting systems, local ordinances, administrative personnel employed, community planning) provided on the local level.[14] The results show that a significant number of municipalities do not provide any of these basic administrative services.

Some of these cities still do receive state and federal revenue sharing and state shared taxes. All of them will receive at least the $25,000 minimum grant if HB 843 (or HB 70) is instituted.

It may be in order to have the Local Boundary Commission take a close look at some of these municipalities and dissolve those which are not functioning.

6. The new program reduces the degree of local autonomy in that it specifies that funds allocated on a service area basis or differential tax zones must be spent in those areas. The present program leaves it up to the municipality to determine how the funds shall be spent.

This provision was included as a logical extention of the local effort philosophy. That is that the area generating the revenues should benefit from the additional input provided by the state.

Most municipalities expressing concern over this provision have hastened to add that this is currently their policy anyway. This section, of course, may be easily eliminated.

7. The Department of C&RA has suggested that that portion of the property tax used to support enterprise activities such as utilities and boat harbors should be subtracted from the eligible millage. (That amount going to support schools is already subtracted.) The argument is that they should be self-supporting services and this revenue sharing approach may in fact be an incentive to always have these activities partially subsidized by taxes

The present revenue sharing program provides revenue sharing for water and sewer systems and transportation facilities which includes docks and boat harbors. The Department does not agree with this support.

---

14 Local Government Checklist, Alaska Local Government, by Paul Conger, Research Analyst, Vol. XVII, No. 2, February 1978, pp. 6-12, Attachment IV

The argument to retain revenue sharing support of such services would be that in some areas it may not be possible to make these services self-supporting at this time. Water and sewer would be a prime example in the small cities which have had to install expensive treatment plants requiring extra personnel, chemicals, energy, maintenance. User fees skyrocket, but operation still requires some subsidy from the municipal general fund. A bus service is another example of a needed service, which cannot support itself at the outset at least until its clientele is built up.

8. The Department has also suggested that road maintenance be eliminated either from the formula or from the Chapter 89 per mile allocation. The argument is that municipalities are paid twice for this function. $1,500 a mile sounds like a very generous amount. I understand that the Highway Department has been trying to encourage municipalities to take over responsibility for more of their local roads, and perhaps the $1,500 per mile is part of that encouragement. However, when this amount is translated into the costs of road maintenance, it does not seem so generous. Without revenue sharing support it is probable several municipalities would drop much of their road maintenance.

If the Department could suggest a change in either the formula or the per mile entitlement, which would keep entitlements fairly equal, an amendment may be possible.

9. A further suggestion of the Department is that support of military installations be incorporated into the formula. I have suggested that the Department propose a formula which would accomplish this.

10. One of the largest concerns with the adoption of this new program is funding. The sponsors have provided a model with a total payout of $27 million. The present program funding level is $18.3 million. This in itself is a major policy decision for the Legislature. Is it appropriate to increase municipal revenue sharing nearly $9 million? And can municipalities expect full funding in the future?

General municipal revenue sharing has increased since 1970 from $2.0 to an estimated $18.3 in 1978 -- $16.3 million in 8 years. Much of this increased funding was due to new cities, boroughs and fire districts joining the program since 1970. The program's participants have increased from 9 boroughs and 54 cities in 1970 to 3 unified governments, 7 boroughs, 139 cities and 45 fire protection groups in 1977. 15

---

15 Revenue Sharing Funding Summary Sheet. Attachment V

Additional increases in the appropriations were accomplished by amendments to the per capita service categories.

It may be that the time is appropriate for a substantial increase because both HB 474, proposed in 1976, and HB 70, introduced in 1977, carried fiscal notes in the range of $25 million.

Over the years the revenue sharing program has not always enjoyed full funding; 1973, 1974, and 1977 being the most noteworthy with funding allocations at 92.27%, 91.96% and 95% respectively.

There are some important guarantees contained in HB 843 -- the minimum grant entitlement and the Section 10 grandfather entitlements. This program will not work without the increased level of funding. The bill's sponsor has therefore included the provision that the program will not take effect unless the full appropriation of $27 million has been secured. It would be advantageous to build a similar mechanism into the bill at least for the next three years (the duration of Section 10) and preferably extending into the future, so that no municipality will suffer unduly from underfunding of the total program.

SUMMARY

The comcept of HB 843 makes sense in that it approaches state aid to local governments from the standpoint of augmenting their local revenue sources. It attempts to address the local situation insofar as how easily local revenues can be generated. It gets away from the strictly per capita approach which only favors metropolitan areas, and the service categories approach which places a strain on small municipalities to try to qualify for something even at the barest minimum in order to add some extra dollars into their meager treasuries.

The infusion of extra dollars into the program is welcome and needed as more and more responsibilities are being thrust on local governments.

The program appears workable as proposed though it could sustain amendments which may work to the advantage of some municipalities.

The greatest problem with the bill appears to be its dependent on statewide variables. Every municipality relates to the others in that increases or decreases in entitlements conversely affects all the others, because the program is funded with a set amount of money. Property values and per capita income can be affected by major factors over which municipalities either

singly or collectively can have no control. With so many variables involved a municipality cannot plan ahead with much accuracy, thus reducing its level of responsiveness to the local citizenry. Unforunately, this reference to statewide averages is also the beauty of the bill in its intent to distribute the state's wealth according to relative need.

1975	12,929,000	12,458,626	2 unified governments 119 cities 8 boroughs 48 fire protection groups
1976	15,130,100	14,039,600	3 unified governments 138 cities 8 boroughs 38 fire protection groups
1977	~~15,113,600~~ 16,959,346 4/	~~16,969,800~~ (est.) 17,335,512	3 unified governments ~~157~~ 39 cities ~~8~~ 7 boroughs 45 fire protection groups

1/ Supplemental appropriation provided by Chapter 1, SLA 1970.
2/ $413,930 of FY 1973 appropriation allocated by 1972 Legislature to provide additional funding for approved entitlements of FY 1972 applicants.
3/ Additional funds provided by Revised Program for health facilties initially determined to be non-qualifying.
4/ The proration factor between full funding and available funding would be approximately 89.06%.

BRU MUNICIPAL SERVICES REVENUE SHARING BRU CODE 07-73-02-01-01 REVISED

12 ANALYTIC STATEMENT

#2 BASIC ADIMINISTRATIVE SERVICE - LGAD TRAVEL

To provide LGAD with an overview of basic administrative services (i.e. regular elections, regular council meetings, budget and accounting systems, local ordinances, administrative personnel employed, community planning) provided on the local level and assistance rendered by LGAD, an efficienty rating and Table, similar to that used in the previous section, was prepared.

The method used to determine the cities efficiency rating in reference to the basic administrative services they provided is as follows:

A city would be given a rating of -

"6" if the city provided all six services listed above in 1977;

"5" if the city provided all 5 of the six services listed above in 1977;

"4" if the city provided 4 of the six services listed above in 1977;

"3" if the city provided 3 of the six services listed above in 1977;

"2" if the city provided 2 of the six services listed above in 1977;

"1" if the city provided 1 of the six services listed above in 1977;

"0" if the services were not provided.

Mention should be made of the difference between the criteria utilized in this efficiency rating and the one prepared for the SRS-Travel sections in Table 2 and 3. The cities in this section are given efficiency ratings based on administrative services provided in 1977 and does not extend back to include the years 1972-76; however, the travel section in Table 4 does comprise the six year period.

The outcome of the efficiency rating for cities conducting basic administative functions is listed below:

33 cities received a rating of 6
11 cities received a rating of 5
20 cities received a rating of 4
17 cities received a rating of 3
20 cities received a rating of 2
11 cities received a rating of 1
12 cities received a rating of 0

Information was not obtainable on 16 of the cities.

To portray the relationship between the cities based on their efficiency ratings and travel by LGAD to those cities, Table 4 depicts this comparison and can be interpreted in the same manner as Table 2-3.

It is difficult to measure the two factors in this section because the information on services rendered does not extend back to 1972, as does the travel data. The data on Table 4 does indicate that towns providing all the functions in 1977 were also the cities that received the most visits over the past six years. An indicator that would be more revealing regarding the current status of the "services-travel" relationship, is the fact that of the 33 cities that provided all six functions, ten of those cities were visited at least once in 1977.

3 ADMINISTRATIVE PERSONNEL ON DUTY/LGAD TRAVEL

One of the points of interest that was entertained when the topics for the Local Government Checklist were considered, was the desire to see what impact administrative personnel at the local level had on the cities' ability to provide the basic administrative services listed in the previous section. Furthermore, it was discussed that we should ascertain what influence, if any, assistance rendered by LGAD had on their capacity to facilitate the above mentioned duties. *Data compiled from the checklist relative to basic administrative services produced the results listed below.

The cities in the left hand column illustrates the breakdown of cities that have administrative personnel on duty in 1977, but received no visits from LGAD. In the right hand column, is the breakdown of cities that have administrative personnel on duty and were visited by LGAD in 1977.

BASIC ADMINISTRATIVE SERVICES

NO LGAD VISIT	LGAD VISIT
75 cities had administrative personnel on duty in 1977 and did not receive any visits by LGAD that year.	32 cities had administrative personnel on duty in 1977 and were visited by LGAD during this year.
14%, or 11 cities, provided all six services;	69%, or 22 cities, provided all six services;
6%, or 5 cities, provided 5 of the 6 services;	19%, or 6 cities, provided 5 of the 6 services;
25%, or 19 cities, provided 4 of the 6 services;	3%, or 1 city, provided 4 of the 6 services;
20%, or 15 cities, provided 3 of the 6 services;	3%, or 1 city, provided 3 of the 6 services;
26%, or 20 cities, provided 2 of the 6 services;	6%, or 2 cities, provided 2 of the 6 services;
8%, or 6 cities, provided 1 of the 6 services.	No city in this category provided less than two services;
No city in this category provided less than one service.	

*Data not available on 16 cities

NO ADMIN PERSONNEL
NO VISITS - 1977

15 cities had no administrative personnel on duty in 1977 and received no visits from LGAD

1 city provided 2 of the six services

2 cities provided 1 of the six services

12 cities provided no administrative services

NO ADMIN PERSONNEL
VISITED - 1977

One city having no administrative personnel on duty, received a visit from LGAD

1 city provided 2 of the six services

As the above information indicates, cities that are without administrative personnel are also cities that have the poorest record of providing administrative services. Cities that have administrative personnel on board show a noticeable increase in the number of services provided. This is supported by the fact that 50 of the 75 cities in this category provided at least half of the services listed in this study. The appreciable difference, however, of the cities' ability to provide administrative services, based on the criteria presented in this section, is the combination of administrative personnel on duty and a visit by LGAD. This combination appears to be a good mixture with 55% more cities providing all six services than those that did not benefit from a visit by LGAD.

4 Population STATE REVENUE AND BASIC ADMINISTRATIVE FUNCTIONS

To broaden the overview of Alaskan cities, Table 5 provides an accounting of the basic administrative services provided at the local level in relation to a breakdown based on population.

Table 5 denotes the basic administrative services provided in 1977, and relates this to a population breakdown throughout the state. All Alaskan cities, with a population of 800 or more, with the exception of one, provided all six of the basic administrative functions. Cities with the second best average were in the 600-699 population range averaging 5.4 of the services in 1977. Cities with a population of 0-99 received the poorest average, averaging only 1.11 basic administrative services during 1977.

5 Incorporation Date STATE REVENUE & BASIC ADMINISTRATIVE FUNCTIONS

To supplement the population data presented in Section 4, material was also gathered to provide a comparison between cities based on their incorporation dates. The motivation behind this comparison was to draw a parallel between the cities with early incorporation dates against cities that have incorporated more recently, to see if one is demonstrating an ability to provide more viable government based on the criteria that we have established in this study. In making this comparison, incorporated cities were grouped in the following manner:

1) cities incorporated 1970-76 totaling 57*
2) cities incorporated 1960-69 totaling 51*
3) cities incorporated 1900-59 totaling 31

Table 6 displays the comparison between the groups.

In reference to State Revenue Sharing:

1) 27 cities, or 87% of the cities in the older group received SRS all six years;

2) 36 cities, or 71% of the cities in the middle group (1960-69) received SRS all six years;

3) 16 cities, or 28% of the cities in the 1970 or later group received SRS all six years.

Based on the above, cities incorporated prior to 1970 are applying for and receiving SRS far more successfully than cities incorporated after 1970. Also cities incorporated after 1970 had eight cities receiving no SRS the past six years; while in the older group, no city received less than four years of SRS.

Regarding the second element of concern in this section, basic administrative services rendered at the local level, the breakdown of the cities is as follows:

The older group performed an average of 5.54 of the services in 1977, having 22 cities, or 71%, providing all six administrative functions;

The middle group performed an average of 3.30 of the services in 1977 with 8 cities, or 16%, providing all six administrative functions;

The group incorporated in 1970 or later, performed an average of 2.36 of the basic administrative services in 1977 with only three, or 5%, performing all six activites.

In both revenue sharing and basic administrative services rendered, the

older group showed a definite upper hand over those cities incorporated more recently by having 87% of the cities in their group receiving SRS all six years and 70% of the cities in this group performing all the basic administrative services in 1977. This would indicate that cities that have been exposed to the process of applying for and receiving SRS, and have had time to become acquainted with the operations of municipal government, have the edge in providing more viable government at the local level.

Dear ~~Representative Malone,~~ Hugh

The Cordova City Council at the regular meeting of March 13, 1978 voted unanimously to support House Bill 843. The City of Cordova presently has one of the highest tax rates in the state with a 22 mill property tax plus 4% sales tax. The additional revenue generated by House Bill 843 would be a significant step in the reduction of local taxes.

We appreciate and encourage your efforts to reduce the local tax burden.

Very truly yours,

Perry D. Lovett

Representative Lisa Rudd
Chairperson, House Community
& Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Representative Rudd:

The purpose of this letter is to inform your Committee that the Municipal Administration has reviewed HB 843 and would object to further action on this legislation until all affected local governments have been able to thoroughly assess the strengths and weaknesses of the proposed new revenue sharing formula.

The assumption behind HB 843 as the bill is presently drafted appears to be that some municipalities are not receiving a fair share of revenue sharing funds, and, conversely, that other local governments are receiving a disproportionate amount of available dollars to which they are not equitably entitled. Although the first portion of this assumption may be correct, the Anchorage Administration objects strongly to the implication that the Municipality is receiving more under the present revenue sharing program than it should equitably receive. Our calculations indicate that, at present, Anchorage receives approximately 46% of state revenue sharing funds. With approximately 50% of the state's population, the present program is, if anything, slightly inequitable on a per capita basis for Anchorage taxpayers. Under the proposal advanced in HB 843, the percentage of revenue sharing funds for Anchorage would decline to only 40%. Although there may be merit in providing increased assistance to municipalities with a relatively small tax base resource, it seems difficult to justify taking funds from Anchorage that will, in essence, need to be replaced by Anchorage taxpayers. The Committee is, of course, well aware that the existing revenue sharing program has been under funded in recent years. If a need is felt to provide increased assistance to some municipalities, a strong statement from the Legislature calling for 100% funding of the present program would be an appropriate beginning.

Another possible problem with the proposed formula contained in HB 843 is that it would tie a municipality's position in the revenue sharing pool to statewide variables such as statewide assessed value that are largely beyond its control. For example, a major resource development project that might alter variables such as statewide per capita income and assessed value could affect the revenue sharing entitlements of local governments without regard to changes in need for those municipalities. Under HB 843, it is difficult for a municipality to project what its revenue sharing entitlement might be two or three years in the future.

Although Anchorage does not oppose the concept of a new approach to revenue sharing, the formula proposed in HB 843 would so radically depart from the present system and would have such major impacts on local governments, that it should not be adopted without thorough review and input from both small and large municipalities. For example, Anchorage would like to be presented with a series of printouts similar to those accompanying HB 843 showing the relative position of the Municipality under a variety of realistic assumptions about future statewide assessed value and per capita income. Perhaps a study committee consisting of legislators, representatives from the state administration and local governments could study the proposal prior to the commencement of the next Legislature and could respond with recommendations for a new approach to revenue sharing that would be equitable for all parties concerned.

I appreciate the opportunity to comment on this legislation. If the Committee has any questions concerning the above, please contact me at 264-4237.

TDB:gml

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

DIVISION OF LOCAL GOVERNMENT ASSISTANCE / POUCH B — JUNEAU 99811

April 5, 1978

The Honorable Lisa Rudd, Chair
House Community and Regional
Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Representative Rudd:

Re: HB 843

You have asked for our opinion concerning the ways in which a Municipality may unduly benefit from the proposed revenue sharing bill (HB 843). The Department analysis of the bill (contained in the 14 March 1978 letter to you) explains very briefly some of the problem areas of the bill. In addition to that letter, Local Government Specialist Bruce Aronson of the Department offers the following comments concerning the ways in which municipalities may manipulate the proposed statute to their own best interest.

1. Enterprise activities (utilities, small boat harbors, etc.) should not be included in the formula. In other words, any sales and/or property taxes levied to support enterprise activities should be excluded from the tax rates. If this is not done, the tax rates might be unfairly inflated, and utility fees would be reduced. The State of Alaska would, in effect, support an activity that should be self-supporting.

2. Since the categories of roads, ice roads, and health services and facilities are retained in the legislation, it hardly seems appropriate to include any locally generated taxes, used to fund these services, under Ch. 88 of the bill. A gross example of this type of situation would be a single purpose service area created for road maintenance being eligible under Ch. 88 of the bill for the basic local tax effort formula funds, and also receiving $1,500 per mile for roads maintained. This dual eligibility would seem to be necessary.

3. A simple and rational approach to establish assessed valuations per capita for second class cities in the unorganized borough would

benefit by a low assessed value per capita number. Our earlier suggestion of averaging the per capita assessed value of municipalities of population less than 750 located in the unorganized borough is still one available alternative.

4. HB 843 arbitrarily multiplies the sales tax rate times 2.3 and adds in the property tax rate (in mills). It would be to any municipality's advantage to analyze the "rate of return" to the municipality under its current tax rates. By altering the sales and property tax rates (and assuming total local revenue is constant) a municipality may be able to gain slightly. A "cure-all" to this problem would be to add all locally collected taxes and divide by the revenue generated from one mill property tax. This new number would be the "millage equivalent". By doing the above, a municipality would not tinker with local tax rates to gain some additional State shared wealth.

5. If a municipality has no local retail stores, and/or property that could be taxed (utilizing a property tax) it would be to the municipality's advantage to "raise" local "taxes" until the maximum local effort factor has reached (25). One estimate by Legislative Affairs indicates that in a small rural city, the local effort factor is reached when a 1½% sales tax is levied. No additional benefit occurs when the number 25 is reached.

Sincerely,

Lee McAnerney
Commissioner

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

DIVISION OF LOCAL GOVERNMENT ASSISTANCE / POUCH B — JUNEAU 99811

March 14, 1978

The Honorable Terry Gardiner, Representative
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Representative Gardiner:

Re: HB 843 "An Act providing for equalization of the tax resources of municipalities and continuing a portion of the program of state aid for municipal purposes; and providing for an effective date."

This bill (as well as SB 502) would dramatically alter the method by which the State of Alaska distributes financial assistance to municipalities. Currently, under AS 43.18, the State distributes in excess of $18 million dollars annually to municipalities and volunteer fire departments in the unorganized borough utilizing a categorial approach. For example, if a city has a police department, and meets the minimum requirements, the State pays the city $12 per person served by the police department. No consideration is given to the relative ability of the city taxpayers to support the police department, nor the rate of municipal taxation.

The existing revenue sharing formula (AS 43.18) encourages municipalities to provide a wide variety of services, even though the quality of such services may be minimal, and no local tax effort is required. Additionally, the present revenue sharing program favors the more sophisticated municipalities (due to the categorial approach) as well as favoring municipalities having greater populations in a relatively small area. The new concept of distributing State generated wealth utilizing a formula based on relative taxable wealth, relative ability to pay, tax rates, and population makes sense to us and is definitely a step forward in assisting the development of local government in Alaska. Briefly, the concept may be described as helping those municipalites willing to help themselves.

The Department's initial review of HB 843 indicates that consideration should be given to amending the bill in the following areas:

1. The municipal tax rates should be downwardly adjusted to account for taxes used to support utilities (utilities should be self-supporting), and taxes used to support roads, ice roads, and health services and facilities (these categories are retained in this legislation).

2. Since there are no assessed valuations for essentially all second class cities in the unorganized borough, perhaps an arbitrary assessed value could be established. One approach is to compute an average assessed valuation per capita figure based on all first class cities in the unorganized borough having a population less than 750 (the Department already has these figures). This approach would be equitable and inexpensive. Those cities (3) having a population in excess of 750 could be assessed at State expense.

3. Other components of the formula should be carefully considered. For instarce, are the per capita income figures credible? Also, because petroleum property in a few boroughs so distorts the State average valuation, should that figure be adjusted? Exclusion of extreme values or use of the median property value in the State might be appropriate alternatives.

4. For ease of administration, we feel the military population should be treated in a manner consistent with that used for the civilian population. One method of accomplishing this would be to apply the areawide local effort factor to the military population.

5. The concept of calculating a millage equivalent based on all revenues should be explored. For example, a city collecting $1,000,000 dollars from a 10 mill property tax, and $300,000 from a 3% sales tax, would be given a millage equivalent of:

Property Tax Revenues	$1,000,000
Sales Tax Revenues	300,000
Total Revenues	$1,300,000

One mill property tax equals $100,000 in revenues.

$$\frac{\text{Total Revenues}}{\text{Revenue from 1 mill property Tax}} = \frac{\$1,300,000}{\$\ 100,000} = 13 \text{ mills (millage equivalent)}$$

This approach would seem to be equitable in that residents have determined locally the best balance between sales and property taxes to produce sufficient municipal revenues.

The Division of Research, Legislative Affairs Agency has prepared an analysis of the impact of this bill (at various funding levels) on all municipalities.

The Department wholeheartedly supports the concept of HB 843. Also, the proposed amendments would in our opinion, improve the intent of the act providing for equalization of the tax resources of municipalities.

Sincerely,

Lee McAnerney

CITY of BETHEL

P. O. Box 388 • Bethel, Alaska 99559
543-2297 — Area Code 907

March 29, 1978

Representative Lisa Rudd
Chairperson House Community and Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Representative Rudd:

At the regular City Council Meeting of March 27, 1978, Council passed and approved Resolution No. 231, endorsing House Bill No. 843, "AN ACT PROVIDING FOR EQUALIZATION OF TAX RESOURCES OF MUNICIPALITIES AND CONTINUING A PORTION OF THE PROGRAM OF STATE AND FOR MUNICIPAL PURPOSES; AND PROVIDING FOR AN EFFECTIVE DATE."

Although the present systems for distributing State Revenue Sharing funds does assist municipalities in providing services there exists an incentive in the revenue sharing program for municipalities to increase or improve the service by increasing local taxes. Under the provision of House Bill No. 843, however, this would all change the proposed formula allocation system, increase the amount of revenue sharing if the Community increases its sales tax or property tax.

If your office should have any questions in regard to Bethels position on the piece of legislation do not hisitate to contact me.

Sincerely,

Lyman Hoffman

Lyman Hoffman
City Manager

CITY OF BETHEL
RESOLUTION NO. 231

A RESOLUTION OF THE CITY OF BETHEL, ALASKA ENDORSING "AN ACT PROVIDING FOR EQUALIZATION OF TAX RESOURCES OF MUNICIPALITIES AND CONTINUING A PORTION OF THE PROGRAM OF STATE AID FOR MUNICIPAL PURPOSES; AND PROVIDING FOR AN EFFECTIVE DATE." IN THE FORM OF HOUSE BILL NO. 843.

WHEREAS, House Bill No. 843, would not distribute State Revenue Sharing strictly on a per capita basis with the remaining 25% allocated according to miles of road maintained and number of health facilities and hospitls, but would improve the allocation system and revenue raising for the benefit of home rule and general law municipalities by providing a more equitable allocation of financial resources among municipalities, and to assure no municipality would suffer impoverishment of necessary public services because of chance location of taxable wealth in the State, and

WHEREAS, this bill would accomplish this by implementing an equalization formula that would base entitlement due each municipality on its population, relative to general revenue and local tax efforts, and

WHEREAS, Bethel City Council believes that the passage of this bill would distribute State Revenue Sharing dollars on a much more equitable basis than the system presently utilized.

NOW THEREFORE, be it resolved that the City of Bethel, Alaska endorses House Bill No. 843, "AN ACT PROVIDING FOR EQUALIZATION OF THE TAX RESOURCES OF MUNICIPLITIES AND CONTIUING A PORTION OF THE PROGRAM OF STATE AID FOR MUNICIPAL PURPOSES; AND PROVIDING FOR A EFFECTIVE DATE.", and would support simular legislation if introduced in the Senate, and

BE IT FURTHER RESOLVED that the City of Bethel encourages the State Legislature to pass and approve this legislation.

PASSED AND APPROVED by the Bethel City Council this 21 day of March, 1978.

APPROVED:

JOHN P. GUINN, MAYOR

ATTEST:

Laura Franke
LAURA FRANKE, CITY CLERK

Municipality of Anchorage

MEMORANDUM

DATE: March 9, 1978

TO: Ted Berns, Municipal Attorney

FROM: Larry D. Crawford, Director, OMB LP for LC.

SUBJECT: House Bill NO. 843

The following comments are offered regarding House Bill No. 843 providing for "equalization of the tax resources of municipalities and continuing a portion of the program of state aid for municipal purposes." Comments from the Finance Department have been incorporated in this memorandum.

GENERAL

Under HB 843, Sections 43.18.010-43.18.050 of the present statutes are repealed. These sections provide the authority for current state-shared revenues. In lieu of this, new Chapters 88 and 89 have been added to Section 29 of the statutes. Chapter 88 deals with a new source of revenue called an "Equalization Entitlement." Chapter 89 provides for the continuation of a portion of the state-shared revenues formerly authorized in Section 43. Exhibit A is a copy of HB No. 843; Exhibit B is a copy of the present statutes authorizing state-shared revenues.

Exhibit C is an analysis of HB 843 prepared by the State Legislative Affairs Agency and contains an attachment (Exhibit D) demonstrating the comparative revenue distribution under current law and HB 843.

A review of HB 843 reveals it to be ambiguous in certain cases as well as presenting redistribution of income approach to state revenue sharing. On the basis of the information made available to us, it appears to be detrimental to the Municipality of Anchorage.

AMBIGUITIES

Many of the ambiguities in HB 843 have been clarified by the analysis contained in Exhibit C. However, some problems remain.

1. Two sections (Sec 29.88.055 & 29.73.060) refer to "fiscal year" without indicating whose fiscal year - - the state or local. Complex calculations will be required because of the different fiscal year periods regardless of which year is implied.

2. Section 29.88.030 would lead one to believe that two series of computations would have to be made for the Municipality of Anchorage - - - one for service areas and another for taxing districts. However, the computations in Exhibit D are based on taxing districts.

3. Exhibit C (page 6) states that in the equalization entitlement, the property tax mill rates and sales tax per cent rates are to be converted to mill equivalents. Where is this so stated in the bill? By converting both factors to mill equivalents, a disproportionate emphasis is placed on the sales tax.

4. In order to determine the equalization entitlement in Exhibit D, the products of the formula in HB 843 have been multiplied by a factor of 2.983535316 - - - what

authorizes such a factor? Without the factor, the equalization entitlement per the formula would have been only $6.1 million. With the factor it becomes $18.3 million.

APPROACH TO STATE REVENUE SHARING

HB 843 presents a redistribution of income approach to the concept of state-shared revenues. The title of the new item of revenue - - - "Equalization Entitlement" - - - provides an insight in itself. The stated purpose of the bill is "to assure that no municipality suffers impoverishment of necessary public services, relative to other municipalities, because of the chance location of taxable wealth in the state." (Sec 29.88.005). One of the criticisms of the present law stated in Exhibit C (page 3) is that it does not include "ability to pay" considerations. A community with a larger than the state average per capita property valuation receives revenues at the same rate as communities which are relatively poor. It is further stated that the same criticisms can be raised with respect to per capita income differentials from which taxes are paid. The net effect of the formula is to favor economically disadvantaged communities.

EFFECTS ON THE MUNICIPALITY OF ANCHORAGE

1. A municipality will be better off if it is high or low in the various components of the equalization entitlement formula as follows:

Population	High
General Govt. Property Tax Mill Rate	High
Sales Tax % Rate	High
Local Per Capita Income*	Low
Local Per Capita Property Value*	Low

* Compared to state averages

At this point, it may be interesting to compare these state components with the following used in determining federal revenue sharing entitlements and whether a governmental jurisdiction is better off if it is high or low:

Population	High
Tax Effort	High
Relative Income	Low

Both the federal and state components follow the same pattern.

2. Anchorage has both a higher than average per capita income and per capita property value. This is confirmed by Exhibit D which shows Anchorage to have unfavorable income and property value factors in the computation formula compared with most other jurisdictions within the state.

3. The most discriminatory portion of the formula, however, is the sales tax element. Sales taxes receive disproportionate weight in the formula (e.g., a 4% sales tax carries the same weight as a 9.20 mill rate). Using the computations for Anchorage in Exhibit D, Anchorage would be entitled to the following additional revenues under the equalization entitlement at the various indicated sales tax rates:

Sales Tax	Additional Entitlement
2%	$3.3 million
3%	$5.0 million
4%	$6.6 million
5%	$8.3 million

In effect, HB 843 is detrimental to Anchorage for its lack of a sales tax. Although Anchorage does have a 5% hotel and motel tax, no provision for such a selective tax is made in the bill.

4. HB 843 would greatly reduce the degree of local automony. In addition to the effects of the lack of a sales tax, communities would be faced with a new restriction as to use of the state revenues. Under current state statutes (see Exhibit B - Sec. 43.18.010 (f)), state-shared revenues may be expended for any public purpose for which the local government has power to expend public funds, except for a few limitations regarding health facilities revenues. Sec. 29.88.030 of HB 843 contains additional requirements regarding the use of funds for specific service areas and tax zones. Although the new provisions are fairly consistent with the way Anchorage has been allocating past state-shared revenues, we would no longer have the flexibility to do otherwise if the circumstances so warrant.

5. In a rapidly growing area such as Anchorage, the local per capita income and property value would increase at a greater rate than the state average thereby creating an adverse effect in the equalization formula.

6. Total state-shared revenues to Anchorage under the new bill shown on the front page of Exhibit D are $9.2 million compared to $8.4 million using the present law. From that, it would appear that the bill is advantageous to us. However, if you look at the last page of Exhibit D, you will find that these amounts are based on total funding of $25 million for the new bill versus $18.3 million under the present law. Will the state appropriation really increase by nearly $7 million if HB 843 is passed? Since there is nothing to indicate such an increase, if only the current level of $18.3 million is available for distribution, Anchorage's share would be only approximately $6.7 million - - - that's $1.7 million less than under the present law. No matter which figure you use as the base, under HB 843 Anchorage's share of state-shared revenues will diminish from 46% of the state total to only 37%.

OTHER CONSIDERATIONS

The impact of the D-2 lands issue is uncertain at this time - - how will the state-selected lands ultimately affect the state per-capita property value? Major concerns relate to the complex calculations and the Municipality's ability to generate the base data required during the budget process. The problems we have now in getting estimated assessed valuations, population, road mileage and hospital bed and facility figures give us an indication of the problems that would be faced.

JAY S. HAMMOND
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

March 20, 1978

The Honorable Lisa Rudd
Chairman
Community and Regional Affairs
Committee
House
Pouch V
Juneau, Alaska 99811

Dear Representative Rudd:

In my November 5, 1977, speech to the Alaska Municipal League, I suggested that the State look for means by which to reward localities which make good faith efforts to tax themselves. In that talk, I sketched a plan whereby shared revenue would vary inversely to a municipality's per capita property values. This suggestion was made in recognition of the disparity of wealth among the communities in our State. I feel the proposed formula is a useful step toward implementation of the concepts contained in that speech.

I have been briefed on legislative proposals (SB 502, HB 843) to redesign the Municipal Revenue Sharing Program. Under these proposals, a municipality's entitlement would be determined by a formula to include as key elements both population and local effort. The latter would, as I understand it, incorporate local property and sales tax rates adjusted by a factor to account for local differences in property tax base and income.

I commend the Legislature for the careful study and deliberation which has gone into preparation of the proposals. I also support the philosophy of State and local government relationships and responsibilities which is expressed in the proposals. I would like to briefly mention several reasons for my support.

First, I believe that the most responsive government is that which is closest to the people it serves. Under the present categorical approach to Revenue Sharing, the State exerts considerable influence on the direction and type of local

services to be provided. I believe the proposed formula approach will give localities more desirable flexibility to determine service priorities at the local level.

Second, I have been an advocate for some time for the formation of local governments in the unorganized borough. At the November 10, 1977, Convention of the Alaska Federation of Natives, I expressed the view that a major obstacle to local government formation was an inadequate tax base which made it difficult for many rural areas to adequately meet the costs of local government services. I indicated then that Revenue Sharing adjusted for variations in per capita property values would help alleviate these problems. I believe the proposed legislation provides a useful tool for encouraging action in this regard.

My staff and that of the Department of Community and Regional Affairs have studied the legislation and have suggested refinements which we feel would facilitate administration of a formula based program. My position on funding of the proposal will have to await review of the fiscal impact of this legislation and the action the Legislature takes in the budget act itself.

Sincerely,

Jay S. Hammond
Governor

February 24, 1978

Report of the Local Government Committee
RurAlCap Citizen Participation Conference

The committee recognized the large number of House and Senate bills, either proposed or already introduced, addressing state, city, and borough needs. In addition, the committee recognized the limited time available to review and comment on these bills.

The committee, therefore, decided to study only those bills of extreme importance, that have the greatest impact on boroughs and cities. The committee, following the advise and suggestion of the assigned Technical Assistant, chose to consider, in detail, the following bills:

see below
- o HB843: "Providing for equalization of the tax resources of municipalities and continuing a portion of the program of state aid for municipal purposes".
- o SB502 Identical to HB843.

see below — o SB208 "Relating to municipal organization grants".

add non residents — o SSHB75 "Authorizing a borough or city tax on net income".

- o HB~~502~~ "Providing for assessment, levy, and collection of a tax on developed land in the unorganized borough".
- o HB~~509~~ "Exempting certain items from sales tax".
- o HB~~578~~ "Relating to the levy and collection of sales and use tax by municipalities".

The committee, after study and evaluation of the bills identified above, recommended the following:

1. HB843/SB502: The committee supports this bill in principle, with the stipulation that: (a) Section 29.88.010(b) be revised to indicate that the grant made available to a municipality be a minimum of $50,000 in those cases where the indicated formula grant is lower than $50,000, and (b) the last sentence of Section 29.89.010(a) ("No payment may be made...") be eliminated.

2. SB208: The committee supports this bill with the proposed Department of Community and Regional Affairs ammendments relative to dollar amounts available under Section 29.18.180(1) and (2) (please see the attached). Further, the committee feels that a section should be added to provide for pre-planning study grants of up to $50,000 for borough incorporation, and up to $25,000 for city incorporation; provided that: (1) the applicant submit a projected budget, (2) unexpended grant monies be returned to the State, and (3) identification of local governing bodies eligible for pre-planning grants occur.

3. SSHB75: The committee supports the concept of this bill with a stipulation that Section 29.53.500(g) be modified to include transient residents as subject to income tax payment. The concern of the committee is that non-resident wage earners should be taxed on their earned income.

cannery workers, etc.

The committee members unanimously agreed that they cannot support HB202, HB509, and HB578 and, therefore, have recommend to the entire Citizen Participation Conference delegation that it not support the bills.

Submitted: February 24, 1978

Committee Chairperson: Mr. Lutena Mulitalo
Facilitator: Mr. Gordon Jackson
Technical Assistant: Mr. Bill Pritchard

STATE SPENDING IMPACT ON LOCAL GOVERNMENT

Second, in terms of the present, the 1977 school debt pick-up legislation has some far reaching impact on local government.

--Fairbanks principal bond debt . . . . $40.7 million
--(less) Municipally Bonded Projects . .$ 3.0 million

--School debt picked up by state . . . .$37.7 million (est.)
--Net remaining borough liability. . . .$ 3.7 million

However, Fairbanks' actual debt exposure "plus interest" will be $62-million, with all but $3-million (plus interest) being the actual amount the state will pick up on behalf of the borough. In other words, the 1977 action of the legislature will leave the state's second largest borough with only a debt of $3 million plus interest.

The Fairbanks and Anchorage school principal and interest to be picked up by the state as a result of the 1970 and 1977 laws totals about $188-million.

The simple point to be made here is that two enactments (1970 and 1977), have made Alaska local governments virtually debtless. Such a situation is beyond the wildest dreams of policymakers throughout most of the other states.

TOTAL STATE AID TO LOCAL SCHOOLS
1966 - 1977
(in millions)

1966 . . . . . .$16.9	1972 . . . . . .$66.7
1967 . . . . . .$19.4	1973 . . . . . .$69.6
1968 . . . . . .$20.8	1974 . . . . . .$73.1
1969 . . . . . .$25.8	1975 . . . . . .$83.8
1970 . . . . . .$35.1	1976 . . . . . $119.6
1971 . . . . . .$64.1	1977 . . . . . $124.4

The chart on the following page tracks school aid down as it impacted Juneau, Anchorage, and Fairbanks between 1966 and 1977.

STATE EDUCATION AID TO ANCHORAGE, FAIRBANKS, JUNEAU (In Millions)			
	ANCHORAGE	FAIRBANKS	JUNEAU
1966	$ 7.1	$ 2.4	$1.1
1967	$ 8.1	$ 2.7	$1.3
1968	$ 8.9	$ 2.6	$1.3
1969	$11.2	$ 3.3	$1.6
1970	$16.5	$ 4.8	$2.1
1971	$31.0*	$ 9.2*	$4.3*
1972	$29.0	$ 8.4	$4.1
1973	$30.8	$ 8.5	$4.6
1974	$34.8	$ 9.1	$4.9
1975	$38.7	$10.9	$5.4
1976	$45.0	$14.5	$6.4
1977	$49.1	$16.1	$7.1
TOTAL	$301.3-Million	$92.5-Million	$44.2-Million

The above chart shows school aid increasing very marginally in the late 1960s, taking a jump in 1969 after increased severance taxes boosted state income in 1968, again aid increased in 1970 in anticipation of the bonus sale in late 1969, and then state school support approximately doubled for Fairbanks, Anchorage, and Juneau under the Alaska School Foundation Act of 1970.

It should be noted also that Anchorage commands almost half of total state aid to education throughout the schedule.

STATE AID FOR LOCAL SCHOOL CONSTRUCTION DEBT (In Millions)			
Year	Debt Service & Cash Payments	Entitlement (% & Less Cig. Tax)	Authorized Reimbursement
1971	$ 6.1	$ 2.4	$ 1.8
1972	$ 7.3	$ 2.3	$ 2.3
1973	$ 9.7	$ 3.5	$ 3.4
1974	$16.9	$ 7.0	$ 5.7
1975	$18.2	$ 7.6	$ 5.6
1976	$21.6	$ 9.2	$ 8.8
1977	$25.6	$10.1	$ 9.0
1978	$24.2	$10.8	$10.8 (50%)*
1979	$25.4	$25.6	$23.6 (100%)

*Total 71-76 $45.4 million

C

The previous chart shows the rate of state pickup of local school construction debt beginning in 1971, and following through until 1978 and 1979 when the state financial outlay will double from $10.8 million per year to $23.6 million.

Other sources of direct aid from the state to school districts are also present. For example, at the beginning of the bonus money period the state enacted the State Impact Program, patterned after the federal impact program (PL874), and designed to compensate local school districts for the impact of state employees working in "tax exempt" facilities (industrial tax loss).

For example, a community such as Fairbanks annually collected approximately $500,000 in state impact aid, for a cumulative revenue between 1969 and 1974 of $2.5 million. In addition, local school districts have been fully compensated by the state for school bus costs. Again, using Fairbanks as a localized example, transportation aid in recent years has run about $1 million annually, for a cumulative between 1969 and 1974 of $5.7 million.

Additionally, local communities were receiving substantial state aid under the State General Revenue Sharing Programs, with aid being broken down by areas of responsibility (fire, police, hospital, etc.), being exercised by a city or borough.

GENERAL MUNICIPAL REVENUE SHARING (in millions)	
1970	$ 2.0
1971	$ 6.3
1972	$ 7.5
1973	$ 7.8
1974	$ 8.8
1975	$12.4
1976	$ -
1977	$16 6

Borough (unified government)

c

Alaska municipalities in 1969 were in something of a "double trouble" situation. Many were facing a growing restlessness among real property taxpayers, while at the same time they were under a tremendous pressure for expansion and improvements. Real property tax rates had moved generally upward in Alaska communities in the mid-1960s, in part to finance post-statehood growth and optimism, and secondly under the expanded ability to serve brought by the creation of boroughs.

Anchorage was particularly under pressure from growth expansion, with taxes running in the area of 20-mills total, while Fairbanks had experienced a run-up of taxes in the 1960s from fairly modest rates to a total of 26-mills (plus 5% sales tax).

Hence, the beginning of bonus money revenue sharing was both a potential source of tax relief for local taxpayers, and a means of financing the needs of community growth without tax increases. During the period many communities would have an expanding assessed value base to help finance growth, but that increasing assessed value also demonstrates the pressure the community was under. Other communities were simply struggling to catch-up with long unmet needs under the momentum and optimism of statehood. Anchorage perhaps typifies the growth impacted community, struggling to just finance growth needs without increasing taxes, while Fairbanks typified the community simply trying to finance needs for existing population and still experiencing a tax run-up.

The relationship of revenue sharing from the $900-Million can therefore be viewed from a perspective of:

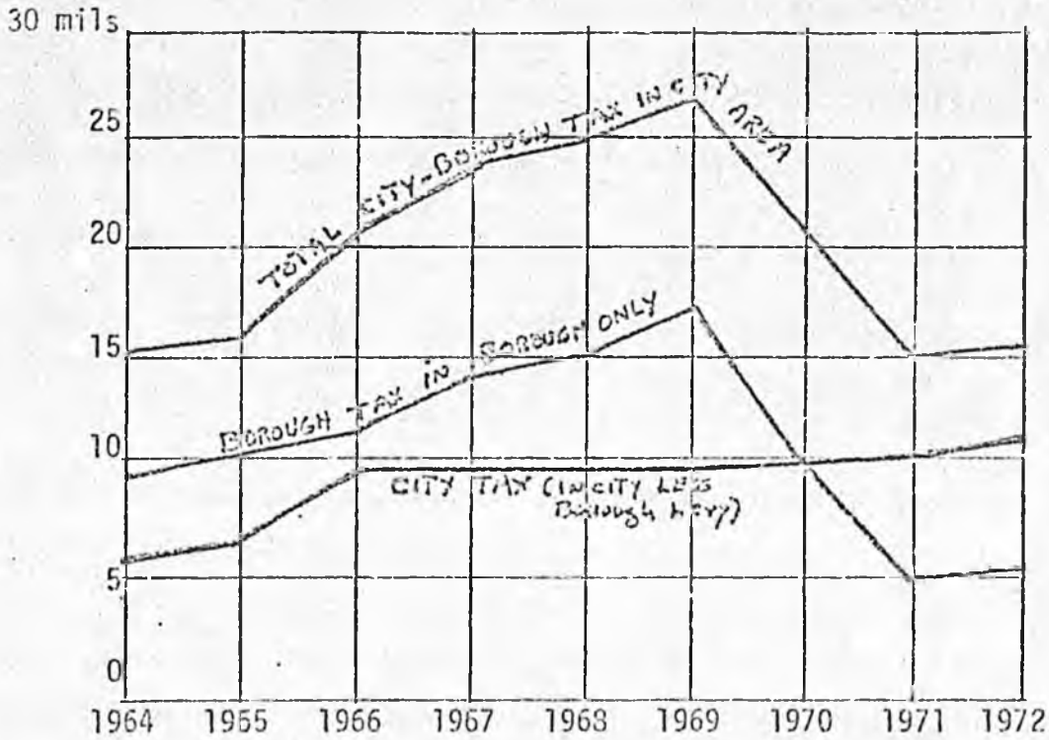
1) Tax reductions by local community

2) Increased services (evidenced by increases in employees)

3) Increased local assessment value as an indicator of local growth pressures.

The following charts focus primarily on Alaska's larger and more sophisticated urban communities, in part because they typify what was happening in the late '60s and early '70s to a majority of Alaskans, and because any attempt to analyze Alaskan local government in terms of an overall view is difficult --local curcumstances of grass roots government in Alaska varies so greatly individualized comparison is difficult if not impossible. However, the view of state action as a catalyst to local government policy by viewing individual communities, at least provides some opportunity for a comprehensive insight to the dramatic influence the state has through revenue sharing.

The following chart provides some insight to the experience of Fairbanks from a real property tax viewpoint in the mid-1960s and the early 1970s. The impact of the state revenue sharing efforts can be seen beginning in 1969.



FAIRBANKS REAL PROPERTY TAXES 1964 - 1972

The Fairbanks graph is perhaps the most dramatic in terms of visability of $900-Million revenue sharing impact. Initially the community opted to take its revenue sharing benefits in the form of real property tax reductions on the borough level. The business of the borough being primarily schools was in a position to take the most advantage in terms of benefits, being the recipient of the major share of revenue sharing through school foundation aid. The general municipal functions of the borough at the time were just beginning to develop.

The City of Fairbanks, which qualified only for general municipal revenue sharing, used revenues to keep its tax rate relatively "level," while expanding some operations at a revenue advantage by shifting powers to the borough, and also through a mildly increasing assessed evaluation base.

c

However, Fairbanks by the end of the 1960s was undergoing a genuine tax crisis. The combined borough/city property taxes levied in the city area, grew from a traditional level of about 16-mills in the early 1960's, to a record high of 26-mills in 1969 --only 4-mills short of the state legal limit. The level of taxes in 1969, in fact, generated a "taxpayers revolt" in Fairbanks that did not subside until the middle 1970's, despite the fact that taxes dropped 40% in the city and 60% in the borough area by 1971.

The tax crisis of 1969 in Fairbanks forced the community to take its $900 million benefits largely in tax reductions rather than ... expanded services. It was the borough which was able to cut taxes due to the state school support increases. The city on the other hand benefited greatly by the tax cut of the borough, since the relief granted city property owners from the borough cut "relieved tax pressure," and allowed the city to maintain its level of taxation. As a result the city was able to gradually expand services through: 1) increased state revenue sharing, 2) increasing assessed property values, 3) annexation of new areas (and assessed values), and 4) through the gradual shift of city services to the "broader" tax base of the borough.

Generally, the Fairbanks pattern was reflected throughout the state to some degree, with schools able to generate the tax break, so that cities, which generated most "homeowner" services, could expand their taxes and services beneath that shelter of relief.

Fairbanks represented the most extreme crisis of municipalities in 1969. The community had a 26-mill tax level in the city area, and also had a 5% sales tax in the city zone. However, even with such high tax levels the Fairbanks Community was still just struggling to fill out the needs of its basic pre-1964 structure. In other words, like alot of other communities, Fairbanks was simply struggling to "catch up" with needs.

During the period Fairbanks was growing slowly, with the assessed evaluation of the city growing from $90 million in 1964 to $179 million in 1972. The borough's value also doubled from a 1964 level of $150 million in 1964 to a 1972 level of $301 million. However, a large share of the value gains were simply reevaluation of existing properties, as compared with additions of new property values. However, between 1972 and 1974 Fairbanks added another $100 million in value, and with the addition of full pipeline assessed values the community has now soared over the billion dollar assessed value mark. The addition of the pipeline as a rich industrial tax base, has probably resolved Fairbanks' real property tax problems. In just two years Fairbanks went from a prime example of a tax-poor community to a prime example of a tax-rich community.

C

The impact of state revenue sharing can also be seen by a quick comparison of the "changing relationships" of the larger revenue sources in the Fairbanks Borough.

FAIRBANKS BOROUGH REVENUE RELATIONSHIPS

State Foundation Act, Sales Tax, Property Tax

Revenue Source	68-69	69-70	70-71	71-72	73-74	74-75
State Fd. Act	$3.5(1)	$4.7(1)	$9.0(1)	$8.2(1)	$9.2(1)	$9.7(1)
Sales Tax	$1.6(3)	$2.0(3)	$2.1(3)	$2.2(2)	$2.6(2)	$3.0(2)
Property Tax	$3.3(2)	$3.3(2)	$2.2(2)	$1.3(3)	$2.2(3)	$2.7(3)

(*) Numbers reflect rank is predominant revenue earner

Viewing the three predominant revenue producers, state school support has been number one since back in the early 1960s, although at times it barely eclipsed property taxes as number two. Sales tax ran third.

However, in 1971-72 the state school support had widened its lead as number one to almost double sales tax and property taxes combined, and property taxes dropped behind sales taxes to third place.

Nor does the above chart show the whole picture. By 1978 the total revenue of the borough coming from other governments had increased to about 70% of total revenue, while traditional sales taxes and property taxes commanded about 25% of total revenue.

An alternate picture is what the impact of new state revenues did to employment by local governments. However, this is a somewhat difficult picture to show because it involves revenue "relief" that affected three inter-related governments, and it also was a period when services were gradually being transfered from the smaller population base or cities to the larger base of the relatively new borough governments.

The following chart shows Fairbanks combined city/borough employment totals. Combining the totals compensates for statistical error inherent in transfers of powers and services from the city to the borough.

TOTAL EMPLOYEES FAIRBANKS CITY AND BOROUGH[1]

1968 - 1975

Government	1968	1969	1970	1971	1972	1973	1974	1975	1976
Borough	40	45	53	69	85	117	137	174	172
Education	399	370	463	478	459	464	471	564	732
City	173	194	237	288	306	263	262	259	-
TOTAL ALL GOVT	612	609	753	835	850	844	870	997	

(1)Does not include School classified employees

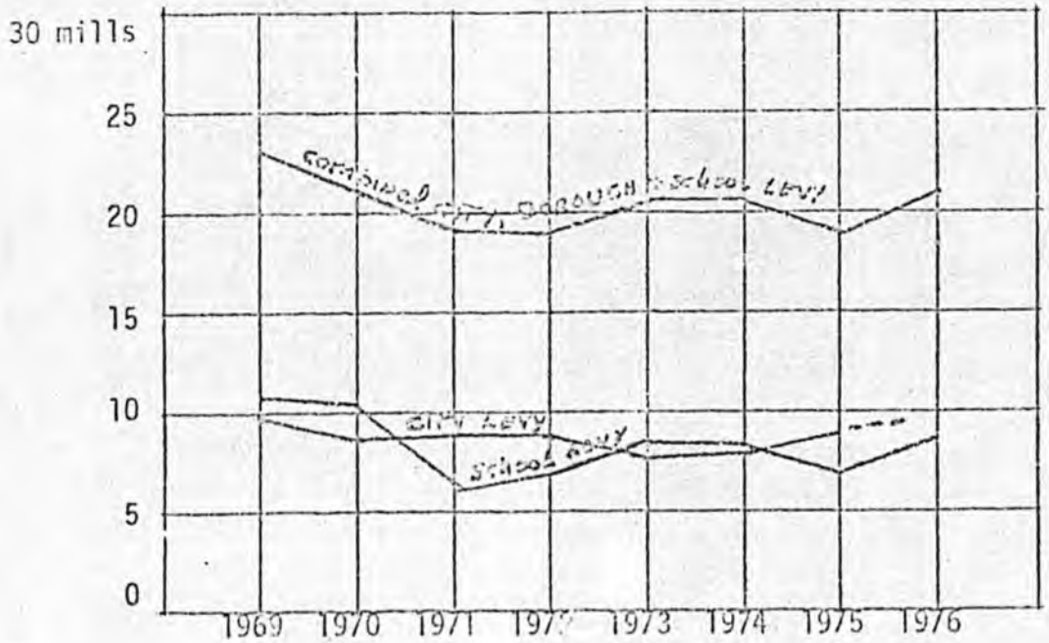
The previous chart shows some employment jumps in the 1969 - 1975 period, and then an increase in the pipeline period. However, during the period the borough's general government growth was in part due to a transfer of function from the city, and the jump in education between 1974 and 1975 was due to the transfer into the system of "on-base" schools (from the state).

THE ANCHORAGE PICTURE

The Anchorage impact due to state revenue transfers is less precise, in part because the expanding Anchorage community took their "relief" from the state largely in the form of expanded services. Anchorage during the period was undergoing a period of rapid expansion, and it is likely that the large infusions of state revenue simply enabled the community to meet new demands without a tax increase.

The Anchorage tax base also rests predominantly on real property taxes, supplemented by a personal property tax. The community does not have a sales tax, a luxury few Alaska municipalities have been able to afford.

The Borough was also much more aggressive in Anchorage in absorbing services (powers) from the city that would be more equitably provided on the expanded tax base of the borough. However, transfers of services tends to distort the indicators of "growing or falling" tax levies, total spending, and numbers of employees. Nevetheless, the collective totals tend to show whatever pattern was prevalent. During the period Anchorage's assessed evaluation was also growing significantly, thus expanding the tax base of the community.



ANCHORAGE REAL PROPERTY TAXES 1969 - 1976

The above chart shows the infusion of state revenue sharing in 1969-1976 dropping basically school taxes, allowing the city to drop taxes slightly while increasing services.

ANCHORAGE BOROUGH REVENUE RELATIONSHIPS

Property Taxes and Other Governmental Revenue

Revenue Source	68-69	69-70	70-71	71-72	73-74	74-75
Revenue Other Gov't Sources	$17.4	$24.2	$38.6	$44.7	$54.9	$68.1
Property Taxes	$15.8	$14.0	$11.6	$16.5	$33.0	$30.6

(in millions)

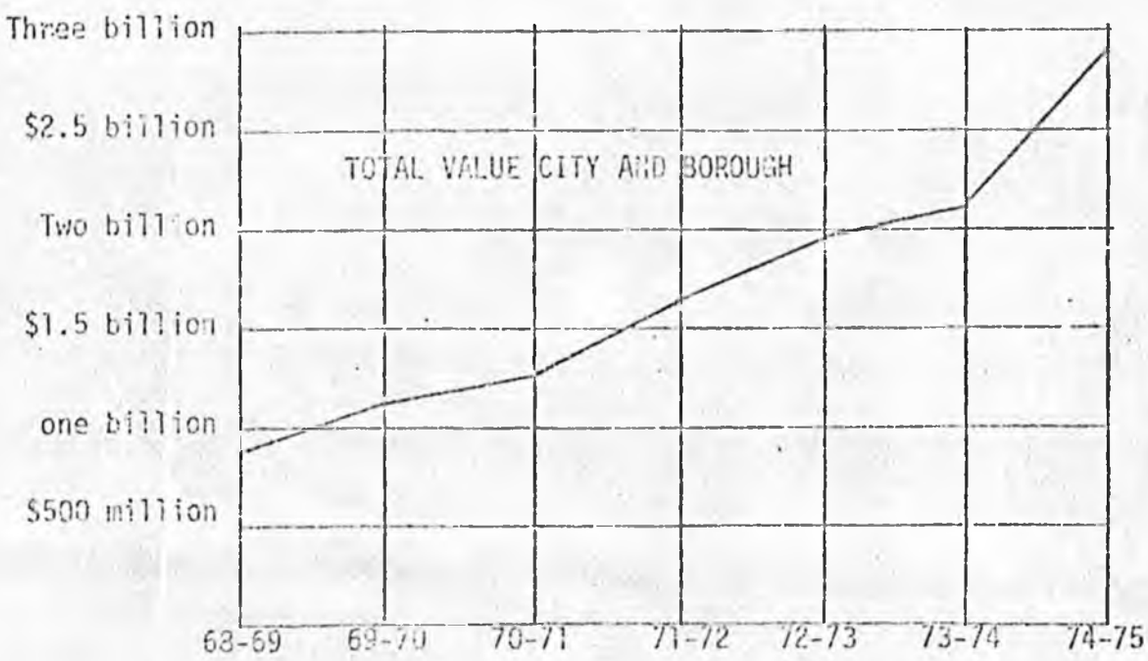
The above chart does not reflect total borough revenues. However, it does show the changing revenue relationship from 1968-'69, when property tax revenues almost equaled "other governmental transfers," until 1974-'75 when "other governmental transfers" double property taxes. Total revenues from the two sources went from $35-million (68-69) to $98-million (1974-75).

The total spending of the Anchorage Borough went from $34.8 million in 1968-69, to $104.9-million in 1974-'75. Since Anchorage chose rapid expansion of services during the 1968-'75 period, the following charts reflects growth by function and expenditure.

ANCHORAGE BOROUGH GROWTH BY SPENDING AND PROGRAM

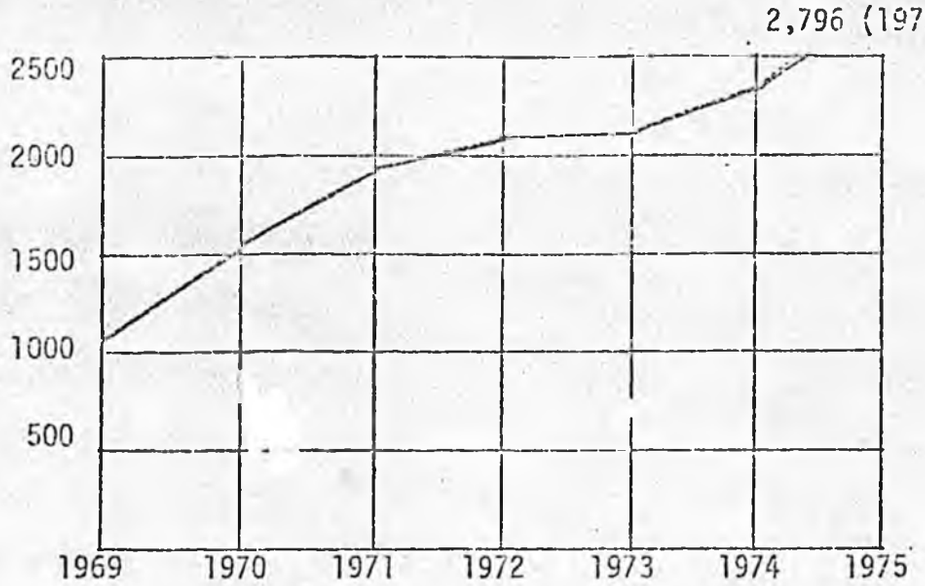
1968-'69 to 1974-'75

Program	1968-'69	1971-'72	1974-'75
General Gov.	$2.1 (million)	$6.9 (million)	$13.3 (million)
Health	$409,000	$1.3 "	$ 3.4 "
Public Safety	$627,000	$2.4 "	$ 6.2 "
Consv. Nat. Rcs.	$ 11,740	$704,624	$ 2.0 "
Education	$21.2 (million)	$45.0 (million)	$64.2 (million)
Debt Service	$ 3.5 (million)	$ 8.5 (million)	$14.1 (million)
TOTAL SPENDING	$34.8 million	$65.3 million	$104.9 million



GROWTH ANCHORAGE EVALUATION 1969-'68 to 1974-'75

c



GROWTH BY EMPLOYEES ANCHORAGE CITY AND BOROUGH

The growth in the numbers of employees in the Anchorage city and borough reflected a rapid growth between 1969 and 1971, and then leveled off until 1974.

In general the uniformity of Anchorage real property taxes between 1969 and 1975, the increases in general spending, the growth in assessed value, and the growth in numbers of employees, all reflect a community that was in the midst of expansion. Hence, the impact of state revenue sharing for Anchorage was to moderate the costs of growth and expansion for local taxpayers.

IN THE HOUSE

HOUSE BILL NO. 843

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act providing for equalization of the tax resources of municipalities and continuing a portion of the program of state aid for municipal purposes; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29 is amended by adding a new chapter to read:

CHAPTER 88. MUNICIPAL TAX RESOURCE EQUALIZATION.

Sec. 29.88.005. PURPOSE. It is the purpose of this chapter to improve the revenue raising and distribution system for the benefit of residents of home rule and general law municipalities by providing for more equitable allocation of financial resources among municipalities to improve their fiscal capacities, and to assure that no municipality suffers impoverishment of necessary public services, relative to other municipalities, because of the chance location of taxable wealth in the state.

Sec. 29.88.010. STATE EQUALIZATION OF THE RESOURCES OF MUNICIPALITIES FOR GENERAL GOVERNMENT SERVICES. (a) During each fiscal year the state shall pay to a municipality an equalization entitlement for general government services provided by the municipality.

(b) The equalization entitlement due each municipality is based on its population, relative ability to generate revenue, and local tax rate and is determined by the application of the formulas:

(1) Entitlement = P x LE

where P = population; and

LE = local effort, but not exceeding 25.

(2) LE shall be calculated in accordance with the formula

$$LE = (PT + 2.3\ ST) \times \frac{(SPCI/LPCI + SPCPV/LPCPV)}{2}$$

where PT = property tax mill rate;

ST = sales tax per cent rate;

SPCI = state average per capita income;

LPCI = local per capita income;

SPCPV = state average per capita property value; and

LPCPV = local per capital property value.

(c) For purposes of this section,

(1) the population of the taxing unit is determined annually in accordance with sec. 15 of this chapter;

(2) property tax mill rate equals the full and true ad valorem mill rate of the taxing unit for general government services during the preceding fiscal year of the taxing unit determined by adjustment of the unit's property tax rate in accordance with sec. 20 of this chapter;

(3) sales tax per cent rate equals the full and true sales tax per cent rate of the taxing unit for general government services during the preceding fiscal year of the taxing unit determined by adjustment of the unit's sales tax rate in accordance with sec. 20 of this chapter;

(4) state per capita income equals the state average per capita income determined in accordance with sec. 20 of this chapter;

(5) local per capita income equals the local taxing unit per capita income determined in accordance with sec. 20 of this chapter;

(6) state per capita property value equals the state average per capita assessed property value determined in accordance with sec. 20 of this chapter; and

(7) local per capita property value equals the local taxing unit per capita assessed property value determined in accordance with sec. 20 of this chapter.

Sec. 29.88.015. DETERMINATION OF POPULATION. For purposes of this chapter, population of a taxing unit shall be determined by the latest figures of the United States Bureau of the Census or other population data which, in the judgment of the department, is reliable.

adjust tax rate down for muni. exemptions

Sec. 29.88.020. DETERMINATIONS OF LOCAL EFFORT. (a) Not later than October 15 of each fiscal year, or as soon thereafter as is reasonably convenient, the department shall make a final determination of the tax effort of each taxing unit which will be used as the basis for computation of entitlements and distribution of equalization entitlements for the fiscal year under this chapter. The department shall make the determinations based upon the information returned by the municipality and upon the several audits or financial statements prepared and submitted by the municipality.

(b) If, upon review of information obtained by the department, it determines that a portion of the estimated or actual municipal tax effort claimed by the municipality does not qualify for inclusion in and recognition as tax effort for general government purposes, the department shall deduct an amount equal to its estimate of revenue which is not recognized for these purposes before computing the local tax effort entitlement for general property or general sales tax rate. Before making a determination to disallow an amount, the department shall first notify the municipality in writing of the reasons for the proposed disallowance and provide the municipality reasonable time in which to respond or to challenge the department's determination.

(c) The per capita income of the state or of the taxing unit shall be determined by the department by the latest figures of the

United States Bureau of the Census or other reliable data computed for the state and its municipalities or election districts and which, in the judgment of the department, is reliable. The department may not accept an estimate of per capita income from a municipality unless the municipality provides estimates of data for all municipalities; if the most reliable data computed for the state and its municipalities expresses per capita income on the basis of election districts or similar regional unit, the department may apply the data to all taxing units within the election district or similar regional unit.

(d) The per capita full and true per capita assessed property value shall be computed by the state assessor in the manner provided for computation of state aid to education under AS 14.17. The state assessor shall compute a value under this subsection for any municipal school district which is authorized to levy and collect a property tax but which does not levy a tax.

Sec. 29.88.025. FINANCIAL REPORTS. No entitlement may be computed and distributed to a municipality until the municipality has first submitted a financial report to the department for the fiscal year preceding the year for which the entitlement is sought, together with a budget for the municipality's current fiscal year. The financial reports shall specifically include a listing of general revenues collected from taxes levied and assessed by the municipality which, in the opinion of the municipal officials, are eligible for inclusion within computations for determination of the local effort of the taxing unit. The department may, by regulation, prescribe procedures and filing dates for submitting financial reports and for obtaining all information required to compute and determine the municipality's local effort.

Sec. 29.88.030. LIMITATION ON COMPUTATION AND USE OF ENTITLEMENTS. (a) Entitlements allocated to a unified municipality or organized

borough which includes cities or service areas shall be computed with reference to and expended by the municipality in accordance with the following:

(1) an entitlement determined with reference to the local effort of a municipality for areawide purposes shall be used for areawide purposes only;

(2) an entitlement determined with reference to the local effort of a municipality for a service area shall be used for that service area only;

(3) an entitlement determined with reference to the local effort of a municipality for exercise of a nonareawide power shall be used for the provision of nonareawide services only.

(b) Entitlements allocated to a city which contains one or more differential tax zones established under AS 29.53.405 having differential levies for services shall be computed with reference to and expended by the municipality in accordance with the following:

(1) an entitlement determined with reference to the local effort of the city for areawide purposes shall be used for areawide purposes only; and

(2) an entitlement determined with reference to the local effort of the city in a differential tax zone shall be used for the provision of a service in that tax zone only.

Sec. 29.88.040. EQUALIZATION ACCOUNT. (a) This chapter may not be construed so as to create a debt to the state.

(b) The municipal tax equalization account is established. Funds to carry out the provisions of this chapter may be appropriated annually by the legislature to the account. The amount appropriated to the account shall be fully allocated by the department for the purpose of fulfilling each municipality's share authorized under sec. 10 of this

chapter, and shall be distributed by the department pro rata among eligible municipalities.

Sec. 29.88.045. REGULATIONS. The department may adopt regulations necessary to implement the purposes and provisions of this chapter.

Sec. 29.88.050. DEFINITIONS. In this chapter

(1) "department" means the Department of Community and Regional Affairs;

(2) "general government services" means those services, exclusive of public education, which are authorized to and provided by a municipality; for purposes of this chapter, the term

(A) includes property and sales tax levies for retirement of debt service, except debt service attributable to public education construction costs;

(B) excludes fees for government services and inspections, special assessments upon property, or locally levied taxes the incidence of which does not generally burden residents or property owners within the taxing unit;

(3) "municipality" means a city, borough or unified municipality incorporated under the laws of the state;

(4) "taxing unit" means a municipality and

(A) in a borough or unified municipality, a service area or the entire area outside cities;

(B) in a city, a differential tax zone.

* Sec. 2. AS 29 is amended by adding a new chapter to read:

CHAPTER 89. STATE AID FOR MISCELLANEOUS MUNICIPAL PURPOSES.

Sec. 29.89.005. REVENUE SHARING PAYABLE. In addition to the entitlements under ch. 88 of this title, during each fiscal year the state shall pay aid to a municipality or other eligible recipient which has

the power to provide the services described in this chapter and exercises the power in the manner required by this chapter.

Sec. 29.89.010. STATE AID TO MUNICIPALITIES FOR ROADS. (a) The state shall pay to a city or organized borough of any class which has power to provide for road maintenance and exercises the power a sum equal to $1,500 a mile for each mile of road, street or highway maintained by the local government, excluding the official state highway system, roads, streets or highways not dedicated to public use, any roads, streets or highways maintained under the local service road program (AS 19.30.111 - 19.30.251), and alleyways, in accordance with regulations adopted by the Department of Transportation and Public Facilities. No payments may be made for maintenance of roads not used by automotive equipment.

(b) Frozen waterways and connections from inhabited areas to the waterways which may be safely used for public transportation by automotive equipment and are so used during a portion of a year are eligible for payments of $900 per mile if the waterways and connections are maintained during the period of use by a municipality or combination of municipalities. The Department of Community and Regional Affairs, after consultation with the Department of Transportation and Public Facilities, shall determine which waterways and connections qualify and, where the waterways or connections lie outside the corporate limits of a municipality, which municipality is eligible for the shared revenue unless the municipalities involved have agreed in writing to a particular distribution.

Sec. 29.89.015. STATE AID TO MUNICIPALITIES AND OTHER ELIGIBLE RECIPIENTS FOR HEALTH FACILITIES AND HOSPITALS. (a) The state shall pay $2 per capita to a municipality which has the power to provide health facilities and services and in which a hospital is located.

(b) In addition to the payment made under (a) of this section, the state shall make payments

(1) to a municipality which has the power to provide hospital facilities and services and which exercises the power on the basis of $1,000 per bed for each bed actually used for patient care limited to the number of beds provided for in the construction design of the hospital, or $75,000 a hospital for those hospitals with 10 or more beds, or $25,000 a hospital for those hospitals with less than 10 beds, as the municipality may elect; funds received under this paragraph may be used only for hospitals and shall be apportioned among qualifying hospitals as the municipality determines;

(2) on the basis set out in (1) of this subsection to a municipality for nonprofit hospitals not operated by a municipality if the municipality first certifies to the department that the hospital is in compliance with all standards for hospitals which have been adopted by the municipality; in the absence of this certification the funds which would have gone to the hospital lapse into the state general fund; payments to the municipality shall be transferred to the hospital in accord with the basis by which the entitlement was generated by the hospital and shall be applied to the annual cost of operation and maintenance of the hospital or for the provision of health care service at the hospital as the directors of the hospital determine;

(3) $1,000 per bed to an organized borough or city outside an organized borough in which a health facility is operated for each bed actually used for patient care, limited to the number of beds provided for in the construction design of the health facility, or $4,000 per health facility as the municipality may determine;

(c) A hospital may not receive payment under both (b)(1) and (b)(2) of this section.

(d) Funds received by a municipality under (a) or (b)(3) of this section shall be used for expenses of health services or operation and maintenance of facilities as the municipality determines.

(e) Before funds may be distributed under this section, the commissioner of health and social services shall certify to the distributing agency that any accumulation of assets by nonprofit corporations or other recipients under this section are dedicated irrevocably to a public purpose.

Sec. 29.89.020. STATE AID FOR HOSPITAL CONSTRUCTION. If construction of a facility began after January 1, 1968 and state matching aid for construction approved for payment to the municipality or other facility sponsor constitutes less than 25 per cent of the total project cost, the state shall pay to the municipality or other facility sponsor each fiscal year a sum equal to $2,500 a bed for the maximum number of beds provided for in the construction design of the facility. State aid provided for in this section shall continue until the municipality or other facility sponsor has received an amount which, combined with state matching money for construction of the facility, equals 25 per cent of the total project cost. No funds received for construction shall be used for any other purpose.

Sec. 29.89.025. STATE AID TO MUNICIPALITIES FOR POPULATION LOCATED ON MILITARY RESERVATIONS. (a) A municipality may not receive state shared revenue provided in this chapter based on the population residing on that portion of a military reservation annexed to a municipality after January 1, 1973, except as provided in this section.

(b) If a military reservation is located within a municipality, the municipality is limited in its entitlement to state shared revenue, based on the population residing on the reservation, as follows:

(1) $6 per capita for police protection services under (c) of

this section;

(2) $1.25 per capita for parks and recreation services under (d) of this section;

(3) $2.50 per capita for transportation services or facilities under (e) of this section.

(c) Shared revenue may be paid for police protection services under this section if

(1) municipal police protection is available 24 hours a day; and

(2) municipal police officers are citizens of the United States who are at least 19 years of age and none of whom has been convicted of a crime involving moral turpitude within the past 10 years.

(d) Shared revenue may be paid for parks and recreation services under this section if the municipality provides parks or recreation facilities or services within or in the near vicinity of the military reservation.

(e) Shared revenue may be paid for transportation services or facilities under this section if the municipality provides municipally operated small boat harbors, ports, airports, or mass transit systems.

Sec. 29.89.030. STATE AID TO VOLUNTEER FIRE DEPARTMENTS IN THE UNORGANIZED BOROUGH. (a) The state shall pay to a volunteer fire department registered with the state fire marshal and serving an area not in an organized borough or a city a sum for protection purposes equal to $7.50 per capita for the population served by the department, as determined by the state fire marshal using the latest figures of the United States Bureau of the Census or other reliable data.

(b) Grants shall be made as set out in (a) of this section to facilitate the organization of volunteer fire departments in an area not in an organized borough or a city, upon application of the proposed fire

protection group to the state fire marshal and approval of applications according to standards of organization and service prescribed by regulations promulgated by the state fire marshal.

(c) In this section, "fire protection" includes, but is not limited to, fire protection provided by a volunteer fire department registered with the state fire marshal which has official recognition and financial support from the community or area in which it is located.

Sec. 29.89.035. POPULATION DETERMINATION. For purposes of this chapter, population shall be determined by the latest figures of the United States Bureau of the Census or other reliable population data, including but not limited to public school enrollment figures, public utility connection, registered voters or certified employment payrolls.

Sec. 29.89.040. AREA COST-OF-LIVING DIFFERENTIAL. (a) State payments to a municipality or other eligible recipient under this chapter shall reflect area cost-of-living differentials. Amounts distributed shall be based upon the sum of per capita, per mile and per bed or facility grants due each municipality or other recipient multiplied by the appropriate area cost-of-living differential. The area cost-of-living differential for each recipient shall be determined annually by election district under the provisions of AS 39.27.030; however, the area cost-of-living differential to be applied shall not result in an amount to be distributed less than the base allocation.

(b) The election districts used in (a) of this section are those designated by the proclamation of reapportionment and redistricting of December 7, 1961, and retained for the house of representatives by proclamation of the governor September 3, 1965.

Sec. 29.89.045. UNIFICATION, MERGER OR CONSOLIDATION OF MUNICIPALITIES. If a borough and the cities within the borough merge, consolidate or unify in accordance with AS 29.68, the amount of revenue

sharing to which the successor municipality is entitled shall be computed for the first year and each year thereafter as if the merger, consolidation or unification had not occurred, and the successor municipality shall receive not less than the amount so computed.

Sec. 29.89.050. CONSTRUCTION AND IMPLEMENTATION OF CHAPTER. (a) This chapter may not be construed so as to create a debt of the state.

(b) The special municipal services account is established. Funds to carry out the provisions of this chapter may be appropriated annually by the legislature to the account. If amounts in the account are insufficient for the purpose of each municipality's or other recipient's share authorized under this chapter, such funds as are available shall be distributed pro rata among eligible municipalities and other recipients.

(c) Money in the special municipal services account which, at the end of the fiscal year for which the money is appropriated, exceeds the amount required for the allocations authorized in this chapter reverts to the general fun

Sec. 29.89.055. REGULATIONS. The Department of Community and Regional Affairs shall adopt regulations necessary to carry out the purposes of this chapter. The regulations shall include minimum standards required to qualify a municipality for grants for each service and provisions for a performance report adequate to demonstrate to the department that each service for which credit was allowed was actually performed by the municipality, at least at the prescribed minimum level.

Sec. 29.89.060. DEFINITIONS. In this chapter

(1) "hospital" means a licensed hospital determined by the Department of Health and Social Services to be a general hospital; the term excludes facilities operated or wholly supported by the state or the federal government;

(2) "health facility" means public health centers, maternity homes and community mental health centers, facilities for the mentally or physically handicapped, nursing homes and convalescent centers which are licensed, when required, by the state under AS 18.20.010 - 18.20.130 and are owned or operated or both by a local government or by a nonprofit corporation or other nonprofit sponsor; the term excludes facilities operated or wholly supported by the state or the federal government.

* Sec. 3. AS 29.23.560(a)(3) is amended to read:

(3) tax assessment and tax levy figures as requested specifically indicating the amount or rate of levy for general government, education, and other purposes;

* Sec. 4. AS 29.23.560(a) is amended by adding new paragraphs to read:

(4) a copy of the current annual budget of the municipality;

(5) a summary of the optional property and sales tax exemptions authorized in the municipality by ordinance, together with the municipality's estimate of the revenues lost to it by operation of each of the exemptions.

State should adjust tax rate down for exemptions .020 (p.3)

* Sec. 5. AS 29.23.560(b) is amended to read:

(b) Compliance with the provisions of this section is a prerequisite to receipt of municipal tax resource equalization assistance under ch. 88 of this title and state aid for miscellaneous municipal services under ch. 89 of this title [STATE-SHARED REVENUES UNDER AS 43.18]. The Department of Community and Regional Affairs [STATE] shall withhold annual allocations under those chapters [THAT CHAPTER] in the event of noncompliance until such time as the report requirements are met [COMPLIED WITH].

* Sec. 6. AS 29.73 is amended by adding a new section to read:

Sec. 29.73.060. TAXPAYER NOTICE. (a) If a municipality levies

and collects real or personal property taxes, the governing body shall furnish the following notice with tax statements mailed for the fiscal year for which aid is received under AS 14.17, AS 43.18.100, and chapters 88 and 89 of this title:

"NOTICE TO TAXPAYER

For the current fiscal year the (city) (borough) has been allocated the following amount of state aid for school and municipal purposes under the applicable financial assistance Acts:

PUBLIC SCHOOL FOUNDATION PROGRAM ASSISTANCE (AS 14.17)	$
STATE AID FOR RETIREMENT OF SCHOOL CONSTRUCTION DEBT (AS 43.18.100)	$
MUNICIPAL TAX RESOURCE EQUALIZATION ASSISTANCE (AS 29.88)	$
STATE AID FOR MISCELLANEOUS MUNICIPAL SERVICES (AS 29.89)	$
TOTAL AID	$

The millage equivalent of this state aid, based on the dollar value of a mill in the municipality during the current assessment year and for the preceding assessment year, is:

	MILLAGE EQUIVALENT	
	PREVIOUS YEAR	THIS YEAR
PUBLIC SCHOOL FOUNDATION PROGRAM ASSISTANCE	.... MILLS	.... MILLS
STATE AID FOR RETIREMENT OF SCHOOL CONSTRUCTION DEBT	.... MILLS	.... MILLS
MUNICIPAL TAX RESOURCE EQUALIZATION ASSISTANCE	.... MILLS	.... MILLS

STATE AID FOR MISCELLANEOUS

MUNICIPAL SERVICES .... MILLS .... MILLS

TOTAL MILLAGE EQUIVALENT .... MILLS .... MILLS"

(b) If the municipality levies and collects only a sales tax, the governing body shall provide a notice substantially in the form set out in (a) of this section. In providing notice under this subsection, the council or assembly shall substitute for the millage equivalency its estimate of the equivalent sales tax rate for each of the categories of financial assistance set out in (a) of this section. Notice shall be provided

(1) by publishing in a newspaper of general circulation within the municipality a copy of the notice once each week for a period of three successive weeks, with first publication to occur not earlier than 45 days before the first day of the municipality's fiscal year; or

(2) if there is no newspaper of general circulation in the municipality, by posting a copy of the notice for at least 20 days in at least two public places within the municipality, with posting to occur not earlier than 45 days before the first day of the municipality's fiscal year.

(c) Compliance with the provisions of this section is a prerequisite to receipt of municipal tax resource equalization assistance under ch. 88 of this title and state aid for miscellaneous municipal services under ch. 89 of this title. The Department of Community and Regional Affairs shall withhold annual allocations under those chapters until municipal officials demonstrate that the requirements of this section have been met.

* Sec. 7. AS 29.13.100 is amended by adding new paragraphs to read:

(38) AS 29.73.060 (taxpayer notice)

(39) AS 29.88 (municipal tax resource equalization assistance)

(40) AS 29.89 (state aid for miscellaneous municipal services)

* Sec. 8. AS 43.18.010 - 43.18.050 and secs. 4 and 5, ch. 120, SLA 1977 are repealed.

* Sec. 9. Other provisions of this Act notwithstanding, a municipality which would receive less money under the provisions of this Act than it was entitled to receive in fiscal year 1978 under the provisions of AS 43.18 repealed by this Act shall, until June 30, 1981, be entitled to receive an amount equal to that authorized for fiscal year 1978 under the former provisions of AS 43.18, in accordance with those provisions.

* Sec. 10. This Act takes effect July 1, 1978.

Notes to printout 2 submitted with memo of February 8, 1978

(1) *LOCAL GOV'T:* Local governments are presented with boroughs and communities therein listed first. The breakdown of each borough is consistent with their revenue sharing application ("SA" means service area).

(2) *PROPERTY TAX:* The column lists the property tax mil rate applied to service area of municipality. Property taxes dedicated to or expended for education are excised from each government's tax base.

(3) *SALES TAX:* The column lists the sales tax percentage rate provided for by each local government. Only sales taxes which fall evenly upon the local populace are allowable under the proposal.

(4) *PCI RATIO:* The column lists the quotient generated by dividing the state-wide average per capita income by the respective local government per capita income. Communities with PCI's below the state average will have quotients larger than 1.

(5) *PROPERTY RATIO:* The column lists the quotient generated by dividing the state-wide per capita property value by the local government per capita property value. Communities "poorer" than the state average will have quotients larger than 1.

(6) *AVE RATIO:* The column lists the average of the PCI and PCPV ratios as expressed in the two preceding columns. The number appearing in this column is multiplied by the local tax effort to generate the local effort factor in the proposed formula. For those local governments where no property assessment has been made, we have estimated *(EST)* the per capita value by looking to similar communities where assessments have been made. About 13% of the state population lives in those communities where a property value assessment has not been made. Two Anchorage Borough service areas have been designated as "estimated" because of inconsistencies between the state assessor's report of "full and true" values for some service areas and the population for those service areas as reported by the Anchorage Borough.

(7) *LOCAL EFFORT:* The column lists the product of multiplying the local tax effort (property tax plus 2.3 times sales tax) by the average ratio value in column 6. We have not allowed the local effort factor to exceed 25. This effectively limits the local government from increasing tax levels indiscriminately to seek incremental revenue sharing allocations.

(8) *POP.:* The column lists the population base accepted by the Department of C.R.A. for the purpose of determining revenue sharing entitlements.

(9) *COLA:* The column lists the cost of living allowance multiplier used by C.R.A. in determining entitlements.

(10) *NEW ENTITLEMENT:* The column lists the pro-rated entitlement received by each local government under the proposed per capita distribution.

(11) *TOTAL (+RHM):* The column totals the per capita entitlement shown in column 10 with the non-per capita entitlements for road maintenance, hospitals, etc. The non-per capita entitlements are listed at parity with each community's full entitlement as allowed by C.R.A., and each entitlement is multiplied by the *COLA* factor before it is added to the per capita entitlement.

(12) *PRESENT ENTITLEMENT:* The column lists the entitlements provided for at parity (multiplied by the *COLA* factor) under present law. The non-per capita entitlements due the Anchorage and Juneau boroughs are lumped into the first service area listed for each borough.

The last three columns are totaled at the bottom of the printout. The present entitlements in the last column will total more than was actually received by the local governments in FY 77, since the program was funded at such a level so as to require a pro-rated reduction from each entitlement. As is evident, the proposed formula adjusted the per capita entitlements by a coefficient so that the total payout for the proposal will be $25 million.

MEMORANDUM

SUBJECT: HB 843 (W.O. #7/R)

TO: The Honorable Terry Gardiner

FROM: John Williams
Research Analyst

You have asked that we prepare an analysis of HB 843, an Act providing for equalization of the tax resources of municipalities and continuing a portion of the program of state aid for municipal purposes; and providing for an effective date. The following analysis consists of: (1) a discussion of present revenue sharing law; (2) an overview of the general implications of the bill; (3) the financial distribution scheme as provided for in the bill; (4) a discussion of the allocation formula; and (5) an attachment demonstrating the comparative revenue distribution under current law and HB 843.

PRESENT REVENUE SHARING

HB 843 would amend the current state aid to local governments program, as provided for in AS 43.18.010-090. The current law provides for the legislature to annually appropriate an amount to be distributed to local governments according to a series of local services which are eligible under the program. Approximately 75% of the revenues are distributed on a per capita basis; the remainder are allocated according to miles of road maintained and the number of health facilities and hospitals (either on a per facility basis or a per bed basis). Services in support of military installations are apportioned on a per capita

EXHIBIT C

basis but according to a different schedule than utilized for civilian populations. The Department of Community and Regional Affairs (CRA) determines whether a municipality qualifies under the provisions specified for each eligible service category. When eligibility has been certified, the municipality then receives a statutorily set amount per capita (or medical facility or mile of road maintained) specified for each service category. For example, a municipality receives $12 per capita for police protection, $7.50 per capita for fire protection, and $2 per capita for land use planning. Should the liability of the program exceed the legislatively appropriated amount, all municipal entitlements are prorated so that the total liability equals the available money.

The legislative intent for the program was restated via the passage of HB 89 in 1977 (120 SLA 1977 becomes effective July 1, 1978) to read "(t)he intent of §§ 10-100 of this chapter in authorizing state aid for....municipal services is that municipalities which levy taxes reduce those levies in reasonable proportion to the amount of state aid received by the municipality for a given fiscal year" (sec. 4, HB 89).

Using the criteria established by the legislative intent, there would appear to be two considerations regarding the present revenue sharing law which indicate that it cannot fully accomplish the intent. (1) The present distribution system does not consider the local tax rate in distributing revenues. Those communities which have a relatively high tax rate receive payments at the same rate as communities which supply minimal or no services from local taxes. Instead, present law directs the Dept. of CRA to determine whether specific services which

are being supplied by the municipalities qualify them for categorical entitlements, regardless of differences in tax rates utilized in funding those service categories.[1] (2) Additionally, present law does not include "ability to pay" considerations. A community with a larger than state average per capita property valuation receives revenues at the same rate as communities which are relatively poor. The same criticism can be raised with respect to per capita income differentials from which taxes are paid. A circular argument can be developed which demonstrates that poorer communities must set taxing rates at higher levels to generate the same revenues per capita as wealthier municipalities, which in turn requires a greater proportion of the disposable income of the poorer municipality residents to pay the additional tax burden vis-a-vis wealthier communities. The alternative for the poorer community is to forgo local services, which causes concomitant financial loss if the forgone services were eligible for revenue sharing dollars. The actual result is often substandard services.

---

[1] The eligible services list has expanded since inception and presently includes services related to health and welfare, transportation, recreation, and economic development (a bill before the legislature this year would add cultural activities). Since the eligible services list has greatly expanded, it would appear timely to consider allowing any public service specifically authorized by a municipality to be considered as eligible for revenue sharing dollars. A method for accomplishing this would be to look directly at the local tax rate in determining the distribution of the revenue sharing appropriation, since the tax rate will reflect the level and number of services provided by municipal tax revenues.

OVERVIEW OF HB 843

HB 843 repeals essentially all provisions of the present revenue sharing law which allocate monies on a per capita basis (police, fire, parks and recreation, land use planning, transportation, and air and water pollution control). Present law which allocates monies for health facilities, hospitals, road maintenance, fire districts outside of municipalities, and support of military installations is saved.

The repealed portion is replaced with a per capita allocation system based upon population, taxing rate, and a factor which compares each local government to the state average using per capita property value and per capita income as indicators. Our analysis indicates that any appropriation to the program in excess of $23 million will increase the entitlement for all local governments with local tax ordinances in effect except the North Slope Borough and the City of Valdez. Several second class cities and one first class city with no local taxes would receive less. Section 9 of the bill provides for all local governments to be held harmless for three years after passage, such that no municipality will receive less during that three year period than they did in 1978, regardless of their entitlement as calculated by the specified formula.

FINANCIAL DISTRIBUTION SCHEME

HB 843 provides that revenue sharing dollars shall be utilized by municipalities in the taxing jurisdiction for which the amount of entitlement is determined. Boroughs with area-wide taxes for general government services except education shall receive revenue sharing

allocations to be used for area-wide purposes. For boroughs with differential taxing rates in service areas, revenue sharing entitlements based upon the service area tax rates must be utilized only in those service areas. First or second class cities with city-wide taxes would receive an allocation based upon the city-wide tax rate to be used city-wide (except for education). Cities with differential taxing zones would receive allocations according to the tax rate applied in each differential tax zone.

This system of distribution would appear to have a neutral effect with respect to the unification of existing governments. We do not find any circumstance where a subsequent unification agreement would cause a decrease in the revenue sharing entitlement for identical services. The bill contains a hold harmless clause for entitlements under the non per capita portion should a subsequently unified local government be entitled to less than the preceding multiple local governments.

ALLOCATION FORMULA

HB 843 specifies a formula to be used in determining entitlements for per capita revenue sharing distributions. The formula utilizes three considerations: (1) population; (2) tax rate; and (3) the relative "ability to pay" of each local government or subunit thereof.

The formula is:

$$\text{Entitlement} = \underbrace{P}_{A} \times \underbrace{\left[\underbrace{(PT + 2.3ST)}_{B} \times \underbrace{\left(\frac{SPCPV/LPCPV + SPCI/LPCI}{2}\right)}_{C}\right]}_{D}$$

where P = population
PT = property tax mil rate
ST = sales tax per cent rate
SPCPV = state average per capita property value
LPCPV = local per capita property value
SPCI = state average per capita income
LPCI = local per capita income

We will discuss the formula according to the portions indicated by the braces.

Part A

The population is determined in the same fashion as provided for in present law. Any reasonable population estimate is accepted by the Dept. of CRA.

Part B

Part B indicates the portion of the formula which determines the local tax rate. Property tax mil rates and sales tax per cent rates are converted to mil equivalents. The 2.3 conversion factor multiplied by

the sales tax rate was determined by comparing the revenue that could be generated by applying a one mil property tax to the total full and true assessed property value in the state and a one per cent sales tax to the total retail business in the state. That comparison demonstrates that a one per cent sales tax would generate 2.3 times more revenue than a one mil property tax.

Part C

The portion of the formula set out by brace C averages two ratios that compare the "economic base" of each local government to the state average. The ratios are mathematically designed to create a number larger than one for communities lower than the state average for the two indicators, and a number smaller than one for communities above the state average. The average of the two ratios is then multiplied times the computed tax rate so as to adjust upward the local tax effort of economically disadvantaged communities and downward economically advantaged communities.

Part D

The portion set out by brace D is called the local effort factor, and is not allowed to exceed 25. The ceiling has the effect of setting a limit on the amount of support given to each municipality under the revenue sharing program. This, in combination with the required publishing of revenue sharing entitlements, would appear consistent with the legislative intent of the program, which is to diminish local tax burdens.

The bill further provides for adjustments in both sales tax and property tax rates based on optional exemptions allowed under Alaska law. As an example, a municipality utilizing the $10,000 residential property tax exemption would be required to declare the revenues forgone by the exemption, and a comparative portion of the tax would be excised from the tax rate base before computing that municipality's entitlement. Mandatory exemptions, such as agricultural lands and senior citizens housing would not affect the tax rate, since the forgone revenues are reimbursed by the state.

ATTACHMENTS

We are submitting two computer printouts, the first showing the data base we used for our analysis, and the second demonstrating how the revenues would be distributed by the proposed formula. The present data base utilizes 1976 data. The significant difference between the present 1976 data base and a 1977 data base which we intend to complete shortly is the additional valuation of the trans-Alaska pipeline which results in a sizeable increase in the total property in the state. Presently, the pipeline is equal to just under half of the total property value in the state. To demonstrate the local effects of the incremental value of the pipeline when comparing 1976 to 1977 data, the 1976 PCPV for Valdez and the North Slope Borough were $66,000 and $142,000 respectively; whereas their 1977 PCPV were $162,000 and $390,000. The state-wide average PCPV was $29,700 in 1976 and $42,900 in 1977.

We are also attaching a computer graphic demonstrating the distribution of "wealth" as estimated by per capita property value using 1977 data.

→ spec. entitlements
→ game playing by
Munis on taxes
→ obligation of state
to attempt to
equalize?
→ other states or
feds do this?

Lisa -

If possible I'd like to see a vote by your committee on HB843. Many of the comments & criticisms made are easily addressable by amendments. Some will always be opposed to the desire to restrict the thrust of revenue sharing. More time to study won't change philosophical objections. Time to study legitimate amendments regarding the functioning & effects of the bill may be appropriate. Are you intending to push HB370? There may not be any interim committees this year. More later. Thanks for your work on the bill. T.G.

Ms. Rudd

Background Material
House C&RA Committee files
Re: HB 843

PRESENT REVENUE SHARING FUNDING

Local Government Hi-lites

Police Protection	12.00 each person
Fire Protection	7.50 each person
Air/Water Pollution	2.00 each person
Land Use Planning	2.00 each person
Parks and Recreation	5.00 each person
Transportation Facilities	5.00 each person
Road Maintenance	
a. Public Roads	1500.00 each mile
b. Ice Roads	900.00 each mile
Health Service	2.00 each person
Health Facilities	1000.00 each bed
	4000.00 each facility
Hospitals	1000.00 each bed
	25000.00 each hospital
	75000.00 each hospital
Construction Aid (Hospitals)	2500.00 each bed

Notes to printout 1 submitted with memo of February 8, 1978.

(1) *LOCAL GOV'T:* Local governments are presented with boroughs and communities therein listed first. The breakdown of each borough is consistent with their revenue sharing application ("SA" means service area).

(2) *PER CAP. EXIST.:* The column lists the total entitlements distributed on a per capita basis (police, fire, parks and rec., air and water pollution, land use planning, transportation, and health services).

(3) *HEALTH & ROADS:* The column lists entitlements distributed on a non-per capita basis. This includes road maintenance (distributed on a mile basis), health facilities, hospitals, and construction aid (distributed on a per facility basis, i.e., hospitals). For boroughs which submitted their applications according to service areas, we have lumped the non-per capita entitlements in the first listed service area.

(4) *MILITARY:* Those local governments which supply services related to the support of military installations receive entitlements according to the services supplied and the military population. As with the health and roads category, the military entitlements are lumped into the first service area listed if a local government has multiple listings.

(5) *TOTAL ENTITLEMENT:* The column totals the three prior columns and represents the total entitlement each community is qualified to receive. The cost of living allowance factor (column 8) is factored into the three columns which break down the total entitlement. The actual monies received by a local government will be less than that listed, since the entitlements are pro-rated according to the money appropriated to the local government assistance program.

(6) *POP.:* The column lists the population base accepted by C.R.A. for the purpose of determining revenue sharing entitlements.

(7) *PER CAP. PROP. VALUE:* The column lists the "full and true" per capita property value as determined by the state assessor. For those local governments where no property assessment has been made, we have estimated *(EST.)* the per capita property value by looking to similar communities where assessments have been made. About 13% of the state population lives in those communities where a property value assessment has not been made. Two Anchorage Borough service areas have been designated as "estimated" because of inconsistencies between the state assessor's report of "full and true" property values for some service areas and the population for those service areas as reported by the Anchorage Borough. The per capita property value figures listed for these two service areas are more than likely inaccurate, but we are not capable of correcting the data without further clarification from the Department.

(8) *COLA:* The column lists the cost of living allowance multiplier used by the C.R.A. in determining entitlements.

(9) *PROPERTY TAX:* The column lists the property tax assessment for each service area or local government, less the levies designated for schools. If a levy was not specifically dedicated by a local government to schools, we obtained income and expenditure figures from the local government audits and calculated an apportionment to schools, which was then deducted from the local government property tax base.

(10) *SALES TAX:* As with property tax, the column lists the sales tax rate for each local government or service area, unless the tax was dedicated to schools. When a school dedication was not declared, we obtained information from the local government audits and diminished the sales tax base according to the portion of sales tax receipts appropriated to schools.

(11) *1974 PCI:* This column lists the Bureau of Census per capita income figures for 1974.

HB 843

WORKSHOP ON SSHB 843

MUNICIPAL REVENUE SHARING

Governor's Conference Room
Monday, May 8, 1978
9:00 a.m. to 3:00 p.m.

Representative Lisa Rudd, Chair of the House Community and Regional Affairs Committee presiding.

Representative Rudd opened the meeting stating the purpose of this work session was to provide an opportunity for an in-depth look at this revenue sharing proposal and to discuss any problem areas which may be identified.

The morning session was devoted to review of the proposed legislation. The bill's sponsor, Representative Terry Gardiner, summarized the provisions of the bill and addressed the concepts of local effort and equalization. John Williams, Legislative Research, reviewed the elements of the formula. Representative Rudd outlined four concerns which she had with the proposed program and asked the municipal representatives to address those concerns during the workshop discussions:

1. The complexity of the proposed formula;

2. The validity of the local effort concept as a basis for revenue sharing program;

3. The question of whether equalization is a legitimate concern of the state;

4. The question of whether it is a legitimate state concern to assure the provision of certain services on the local level.

During the afternoon session municipal representatives gave their comments on the concepts and specifics of the proposed legislation. The following is a summary of the major points of the discussions:

1. The formula is too complicated and includes too many variables. Mr. Sharp of Juneau suggested a simplification of the formula. The same product (millage equivalent) can result from taking the sum of the total municipal revenues, subtracting any revenues specifically excluded, and dividing that remainder by what 1 mil would bring from 100% of full and true value.

The main objection still remains, however; that each municipality's entitlement is dependent upon several statewide variables over which it has no control. It was suggested that entitlements could be computed with two year old data rather than current data, thereby making it easier for a municipality to figure its expected entitlement. The drawback to this approach is that entitlements will not reflect the most recent changes which, if an industrial development project is involved, can be major.

2. Locally generated school tax support should be included. Most communities tax themselves for additional school support over and above what is received from the school foundation program and the school constuction program. Petersburg, for example, devotes its entire 5% sales tax to school support. Anchorage claims 42% or about 6 mils goes to education. This was felt to be a legitimate indicator of local effort. At least one municipality, however, suggested that education should be left out of the program of state aid for municipal operations since such motherhood issues have a tendency to take over.

3. The formula seems to be a compulsion to keep taxes high rather than an incentive to reduce taxes. It is a built in uncertainty for assemblies and councils about future revenues and their effect on revenue sharing entitlements. John Williams pointed out that there are two mitigating factors: 1) The local effort factor ceiling of 25. No municipality will get revenue sharing credit for taxation above this figure; and 2) The willingness of local taxpayers to pay taxes. This last is considered the major determining factor. Any reduction in tax rate translates into more of a loss in direct revenues than in revenue sharing dollars. Bruce Aronsen, of the Department of Community and Regional Affairs, stated the ratio was about 12 to 1 ($12 local revenues to $1 revenue sharing).

Ketchikan pointed out that the present revenue sharing program bears no relation to taxation. The money just comes, so to speak. With HB 843, municipalities really have to consider the effects of their taxing policies.

It was also discussed that the present revenue sharing program has at best helped maintain the tax level while allowing increases of municipal services. More likely, it has just slowed the tax increase.

4. Anchorage maintains there is no direct correlation between tax base and service needs. In a growing community there are more service needs, crime, transportation, etc. Anchorage, for example, is a crossroads and service center for much of Alaska, therefore it services more than just its population. A sales tax does address this to a degree, and Anchorage would request that their hotel-motel sales tax be counted in the local effort formula. SSHB 843 specifically excludes taxes which do not generally burden the entire citizenry. Another example of such special tax is the raw fish tax of the Bristol Bay Borough.

5. Single purpose service districts. Fairbanks questioned the appropriateness of treating service districts as separate political units, as this may have a tendency to encourage a separatist attitude on the part of the service districts. Boroughs would rather consider service areas as an integral part of the whole. SSHB 843 specifies that funds allocated on a service area basis or by differential tax zones must be spent in those areas. Mr. Nordale also pointed out that they have several single purpose service districts, providing only road maintenance. These districts can receive double payment under Chapter 89 (RHM) and under Chapter 88 (formula).. This can lead to a situation where a service area can be receiving as much as twice as much money as they actually need.

If this is actually a problem, a solution may be to allow for petition to the DC&RA to use the funds elsewhere. The municipalities may prefer to delete the provision in HB 843 which requires the use of revenue sharing funds in the service areas.

6. Include per capita debt as a measure of local effort. Theoretically, municipal debt is considered in this formula since it is reflected in the tax rate. If local effort for education is included, all possibilities for local debt will be included since much of a municipality's bonded debt is for school construction. Dillingham pointed out that a city must first have a tax base before it can incur bonded debt. Several Alaskan municipalities are precluded from bonding by virtue of having no tax base.

7. Is it a legitimate state interest to see that a certain level of local services is maintained? Mr. Nordale pointed out that it does seem to be state policy to emphasize such services as police and fire protection since those categories receive the greatest intitlement in the revenue sharing program and have historically received the most attention

and amendment. Mr. Sharp pointed out that if it is a legitimate state responsibility to assure certain local services, then it is also incumbant upon the state to see that those services are actually being provided at some quality level. The present revenue sharing program does not address this aspect. The municipalities generally agreed that revenue sharing is not usually a major determinent in what services are to be provided, although the Fairbanks Borough maintains that the availability of revenue sharing dollars does help sell certain programs at the local level such as their air pollution control program.

8. Is equalization a legitimate concern of the state : Mr. Lovett of Cordova said he sees the bill as an attempt to equalize the quality of life in Alaskan communitites. A municipality of a certain size must provide the full specturm of basic services for its residents regardless of the cost. For example, Cordova devotes more than 20% of its budget to police protection. A population of a few hundred more could use the same size police department but would also have a larger tax base to fund it. A community the size of Cordova must forgo many of the amenities because it must concentrate all its resources on providing the basics. He was pleased to see that the Legislature had recognized this need and was addressing it through the revenue sharing program.

Mr. Sharp of Juneau noted that court cases in California, New Jersey and Texas have established the concept of equalization in the area of education by recognizing a person's right to equal protection in the quality of education. The courts have found that it is not appropriate to finance education strictly on the basis of local property tax revenues because of the disparities in property tax base. He said he expected the equalization concept to be extended into the area of local government services in the near future and was pleased to see the Alaska Legislature taking the lead in recognizing this idea.

Mayor Sullivan from Anchorage suggested that if the state felt it appropriate to give more assistance to the poorer communities, it could be done through maintaining the existing revenue sharing program, but with an additional appropriation and distribution to help so-called "disadvantaged" communities.

The main concern of the Municipality of Anchorage was that their percent of the total program would be reduced under HB 843. Under present law, Anchorage is entitled to 45.66%; SSHB 843 would only provide them with 35.77%.

45.66%; SSHB 843 would only provide them with 35.77%. Anchorage felt that other municipalities were being upgraded at the expense of Anchorage.

Representative Gardiner pointed out that the result will be the same whether HB 843 is used or the present program plus an additional distribution program as Mayor Sullivan suggested. It should not be viewed in terms of taking away from anyone. In actual fact, Anchorage will gain between $1 and $2 million dollars under the proposed program.

Mr. Jim Rolle, Executive Director
Alaska Municipal League
204 N. Franklin Street
Juneau, Alaska 99801

Dear Jim,

Attached is a copy of a proposed committee substitute for SSHB 843, which I believe addresses most of the concerns expressed by the various municipalities at our workshop May 8th. I have included changes in the following areas.

1. The tax levy for school support is included in the local effort computation.

2. The formula is simplified somewhat by computing taxing rate from the total tax revenues of the municipality.

3. Special taxes such as the Anchorage hotel/motel tax and the Bristol Bay Borough fish tax are included in the local effort formula.

4. Some conditions are placed on the distribuiton of the minimum grant entitlements to small communities. The purpose of these conditions is to encourage those cities to function at least on a basic level as local governments.

This CS will not be considered by the CRA Committee this session, but I do feel we have laid groundwork this year which will hasten action next year if the bill is reintroduced. I am sending you a copy of this draft in the event the Municipal League wishes to work on the bill during the interim. I certainly appreciate your cooperation during our committee hearings on this bill, and if I can provide any further information from our files, please do not hesitate to call my office.

Yours sincerely,

Lisa Rudd

Commissioner Lee McAnerney
Department of Community and Regional Affairs
Pouch B , Room 213, Community Bldg.
Juneau, Alaska 99811

Dear Commissioner McAnerney,

Attached is a copy of a proposed committee substitute for SSHB 843, equalization of the tax resources of municipalities. The CS will not be considered by the CRA Committee this session, but I do feel we have laid groundwork this year which will hasten action next year if the bill is reintroduced.

The committee substitute addresses most of the concerns expressed by the various municipalities at out workshop on May 8th. I have included changes in the following areas:

1. The tax levy for school support is included in the local effort computation.

2. The formula is simplified somewhat by computing taxing rate from the total tax revenues of the municipality.

3. Special taxes such as the Anchorage hotel/motel tax and the Bristol Bay Borough fish tax are included in the local effort formula.

4. Some conditions are placed on the distribution of the minimum grant entitlements to small communities. The purpose of these conditions is to encourage those cities to function at least on a basic level as local governments.

I am sending you a copy of this draft in the event the Department wishes to work on the bill during the interim. I certainly appreciate the assistance provided by your staff during the committee's work on this bill. If we can provide any further information from our files, please let me know.

Yours sincerely,

Hon. Terry Gardiner
Pouch V
Juneau, Alaska 99811

Dear Terry,

Attached is a copy of a proposed committee substitute for SSHB 843, equalization of the tax resources of municipalities. This CS will not be considered by the CRA Committee this session, but I do feel we have laid the groundwork this year which will hasten action next year if you should decide to reintroudce the bill.

The committee substitute addresses most of the concerns expressed by the various municipalities at our workshop May 8th. I believe the changes proposed in the CS are necessary for acceptance of the bill by most municipalities. I have included changes in the following areas:

1. The tax levy for school support is included in the local effort computation.

2. The formula is simplified somewhat by computing taxing rate from the total tax revenues of the municipality.

3. Special taxes such as the Anchorage hotel/motel tax are included in the local effort formula.

4. Some conditions are placed on the distribution of the minimum grant entitlements to small communities. The purpose of these conditions is to encourage those cities to function at least on a basic level as local governments.

I certainly appreciate all your help and cooperation during our committtee hearings on this bill, and I hope these changes meet with your approval.

Yours sincerely,

Lisa Rudd

Mr. Phil Smith, Executive Director
Rural Alaska Community Action Program, Inc.
P.O. Box 3-3908
Anchorage, Alaska 99501

Dear Phil,

I appreciate your sending me a copy of RurAL CAP Resolution #78-15, urging passage of SSHB 843, particularly the $25,000 minimum grant section.

I have serious reservations about the philosophical basis of the revenue sharing program proposed in HB 843. However, I have worked on the bill and come up with a committee substitute that, more acceptable to the municipalities than the original bill. If someone should reintroduce the bill next year, I hope they will use my proposed CS.

I have always supported the concept of a minimum grant to municipalities to assist with basic administrative services. As you may recall, the $25,000 minimum grant is also included in HB 70 which we passed out of committee last year. But the fact that HB 70 is still in House Finance Committee seems to indicate there is no determination on the part of the Legislature to do anything about revenue sharing this session.

Yours sincerely,

Lisa Rudd

Representative Lisa Rudd, Chairman
House Community and Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Lisa:

For your information, I am including RurAL CAP Resolution #78-15, relating to the necessity of passage of HB.843. It is my understanding that members of your committee are not inclined to take affirmative action on this bill during the present legislative session. Therefore, I draw your attention to the second "Resolved" in which we urge a basic appropriation of $25,000 to every second-class city and/or IRA or traditional council in Alaska for the purposes of establishing basic village and municipal management capabilities.

I recognize that the fiscal impact of this recommendation is somewhat significant; however, the loss of funds and governmental quality that results from a lack of adequate management funding in the villages is difficult to measure. I would certainly appreciate your consideration of this concern and would be happy to speak with you about it at greater length should you so desire.

Sincerely,

Phil Smith
Executive Director

RESOLUTION #78-15

ENTITLED: IN SUPPORT OF AFFIRMATIVE ACTION ON HB.843

WHEREAS, revenues for the State's Revenue Sharing Program provide the bulk of most revenues available to Alaska's small municipalities; and

WHEREAS, in spite of this, most small communities lack the resources to hire and retain professional municipal management personnel, thereby risking the loss of potential funding for needed municipal functions; and

WHEREAS, HB.843 would rectify inequities in the present Revenue Sharing Program and provide funding for the management of municipal governments in rural Alaska; and

WHEREAS, the delegates to the Citizens' Participation Conference endorsed HB.843 and assigned its passage a High Priority, requesting only that the "base grant" for municipalities be increased to $50,000 and that roads "not ordinarily used for motor vehicles" be included as an amendment to AS 29.89.010(a); and

WHEREAS, the fiscal implications of HB.843 appear to be eroding legislative support for its passage;

now, therefore, be it

RESOLVED, that the Rural Alaska Community Action Program does hereby re-endorse HB.843 and urges its swift passage by the Legislature; however,

be it further

RESOLVED, that, in the event HB.843 cannot pass as presently written, or with the inclusion of the amendatory suggestions of the CPC, a program of direct support of $25,000 to every second class city and/or IRA or traditional council in Alaska be provided to encourage quality management of village municipal affairs.

Dated this 3rd day of May, 1978, in Anchorage, Alaska.

2 June 1978

Hon. John A. Carlson
Fairbanks North Star Borough
P.O. Box 1267
Fairbanks, Alaska 99701

Dear Mayor Carlson,

I sincerely appreciate your participation in the revenue sharing workshop here May 8th. I felt the roundtable discussion was very valuable, and some of the ideas discussed will be incorporated into a committee substitute bill.

The idea which seemed to generate the most positive discussion was that of including in the formula the portion of the local tax levy which is dedicated to school support. I have enclosed for your purusal a copy of a computer print-out showing the effect of including school support. This is one of your suggestions which will be included in a committee substitute of the bill.

I do not expect action on HB 843 this year. A bill of this magnitude and financial impact cannot get proper treatment during the remainder of this session. However, the concept and the committee substitute can be reintroduced next session, and I plan to have it in workable form in that event.

It has been a pleasure for me to work with the municipalities on this and other community and regional affairs issues throughout the last two years. The participation and information that has been provided by local officials on much of the legislation before the committee supports my belief in strong and capable local government. Best wishes for continued success.

Yours sincerely,

Lisa Rudd

Municipality of Anchorage 5/28

HB 843: AN ACT PROVIDING FOR EQUALIZATION OF THE TAX RESOURCES OF MUNICIPALITIES, CONTINUING A PORTION OF THE PROGRAM OF STATE AID FOR MUNICIPAL PURPOSES; AND PROVIDING FOR AN EFFECTIVE DATE.

Under HB 843, Sections 43.18.010-43.18.050 of the present statutes are repealed. These sections provide the authority for current state-shared revenues. In lieu of this, new Chapters 88 and 89 have been added to Section 29 of the statutes. Chapter 88 deals with a new source of revenue called an "Equalization Entitlement". Chapter 89 provides for the continuation of a portion of the state-shared revenues formerly authorized in Section 43.

A review of HB 843 reveals it to be ambiguous in certain cases as well as presenting a redistribution of income approach to state revenue sharing. On the basis of the information made available to us, it appears to be detrimental to the Municipality of Anchorage. The Municipality of Anchorage has severe reservations concerning HB 843.

HB 843 presents a redistribution of income approach to the concept of state-shared revenues. The title of the new item of revenue "Equalization Entitlement" provides an insight in itself. The stated purpose of the bill is "to assure that no municipality suffers impoverishment of necessary public services, relative to other municipalities, because of the chance location of taxable wealth in the state." (Sec. 29.88.005). One of the criticisms of the present law is that it does not include "ability to pay" considerations. A community with a larger than the state average per capita property valuation receives revenues at the same rate as communities which are relatively poor. It is further stated that the same criticisms can be raised with respect to per capita income differentials from which taxes are paid. The net effect of the formula is to favor economically disadvantaged communities.

1. A municipality will be better off if it is high or low in the various components of the equalization entitlement formula as follows:

Population	High
General Govt. Property Tax Mill Rate	High
Sales Tax % Rate	High
Local Per Capita Income*	Low
Local Per Capita Property Value*	Low

* Compared to state averages

2. Anchorage has both a higher than average per capita income and per capita property value. This is confirmed by the Printout which shows Anchorage to have unfavorable income and property value factors in the computation formula compared with most other jurisdictions within the state.

3. HB 843 would greatly reduce the degree of local automony. Communities would be faced with a new restriction as to use of the state revenues. Under current state statutes, state-shared revenues may be expended for any public purpose for which the local government has power to expend public funds, except for a few limitations regarding health facilities revenues. Sec. 29.88.030 of HB 843 contains additional requirements regarding the use of funds for specific service areas and tax zones. Although the new provisions are fairly consistent with the way Anchorage has been allocating past state-shared revenues, we would no longer have the flexibility to do otherwise if the circumstances so warrant.

4. Another possible problem with the proposed formula contained in HB 843 is that it would tie a municipality's position in the revenue sharing pool to statewide variables such as statewide assessed value that are largely beyond its control. For example, a major resource development project that might alter variables such as statewide per capita income and assessed value could affect the revenue sharing entitlements of local governments without regard to changes in need for those municipalities. Under HB 843, it is difficult for a municipality to project what its revenue sharing entitlement might be two or three years in the future.

5. In a rapidly growing area such as Anchorage, the local per capita income and property value would likely increase at a greater rate than the state average thereby creating an adverse effect in the equalization formula.

6. After first having become reasonably satisfied with the validity of the revenue sharing data elements, the "new" version printouts and formula modification were analyzed to determine the effect on Anchorage. Two of Anchorage's concerns with the original version of HB 843 appear to have been rectified.

- The sales tax portion of the proposed revenue sharing formula has been changed to eliminate the disproportionate weight given to a sales tax in the original formula. The effect of the change is to cause the proposed revenue sharing allocation system to be neutral with respect to each municipality's taxing philosophy. However, Section 29.88.045, subpart 2 (b)V, of the bill appears to exclude hotel-motel tax.

- Revenues from Anchorage's 5% hotel and motel tax have been recognized as a sales tax in the new printouts. It is interesting to note that Anchorage's hotel and motel tax receipts are almost equal to all of Juneau's sales tax receipts and are almost half of the city of Fairbanks'

sales tax receipts. However, the effect of this has been reduced by the above change in the sales tax portion of the proposed revenue sharing formula.

The following matrix provides a comparison of the effect on Anchorage of HB 843:

	1977 Actual (a)	Original HB 843	Substitute HB 843
Amount Shown on State Printout	$8.4 million	$9.2 million (b)	$9.6 million (c)
Amount if Funded at 1977 Level	$8.4 million	$6.8 million	$6.6 million
Anchorage's % of State Total	46%	37%	36%

(a) $18.3 million total state payout
(b) $25.0 million total state payout
(c) $27.0 million total state payout

The second line of the above matrix shows Anchorage's funding if the total state funding were not increased. Under HB 843, Anchorage's share of state-shared revenues will diminish from 46% of the state total to only 36%. For comparative purposes, it should be noted that a 46% share of a $27.0 million state payout would equal $12.4 million.

We find it difficult to support the philosophical approach behind HB 843. There is no simple correlation between tax base, personal income and what state revenue sharing should be. Tax base is only indicative of the size of the physical plant (building, dwellings, etc.) within a given community. Tax base does not necessarily relate to service needs or demands. Urban densities, congested traffic, large numbers of unemployed and crime rates are more closely connected to the need for service. Service demands criteria are important factors to consider before making any judgments on tax base and its relationship to state revenue sharing.

The assumpption behind HB 843 as the biil is presently drafted appears to be that some municipalities are not receiving a fair share of revenue sharing funds, and, conversely, that other local governments are receiving a dis proportionate amount of available dollars to which they are not equitably entitled. Although the first portion of this assumption may be correct, Anchorage objects to the implication that the Municipality is receiving more under the present revenue sharing program than it should equitably receive. Our calculations indicate that, at present, Anchorage receives approximately 46% of state revenue sharing funds. Wtih approximately 50% of the state's population, the present program is, if anything, slightly inequitable on a per capita basis for Anchorage taxpayers. Under the proposal advanced in HB 843, the percentage of revenue sharing funds for Anchorage would decline to only 36%. Although there may be merit in providing increased assistance to municipalities with a relatively small tax base resource, it seems difficult to jusitfy taking funds from Anchorage that will, in essence, need to be replaced by Anchorage taxpayers. It is well known that the

existing revenue sharing program has been under funded in recent years. If a need is felt to provide increased assistance to some municipalities, a strong statement from the Legislature calling for 100% funding of the present program would be an appropriate beginning. If funding at a higher level can be provided by the state (i.e., the $27.0 million level proposed in the substitute HB 843), then the state revenue sharing rates contained in the existing law should be increased to partially compensate for the increase in the consumer price index since they were originally established. This would help local governments in maintaining a status quo in the services they are able to render through state shared revenues rather than lose ground due to inflation.

PART TIME						
TEMPORARY						

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

Assumptions

1. The Department would not estimate the local per capita assessed valuations for second class cities in the unorganized borough not currently collecting a property tax.

2. In fiscal year 1978 approximately $18,340,000 will be distributed under the existing program. Section nine of the bill would require for only the next 3 years a minimum annual appropriation of at least $18,340,000. It should be noted, that the FY'79 budget request for grants under the existing program is over $20,400,000.

IV. DATE 3/13/78 PREPARED BY Bruce Aronson Bruce Aronson
AGENCY Community & Regional Affairs

Original: Legislative Finance
cc: Budget and Management
Prime Sponsor (First Legislator Named)

33-001 (Rev. 10/76)

HB 843 Revenue Sharing

Comparison of gains under Local Effort ceiling:

LE 25	LE 30
Anchorage	BB Boro
Kodiak Boro	Fbks Boro (Fbks City)
Sitka	Haines Boro
Second Class Cities	Juneau
	Kenai
	Ketchikan
	Mat-Su
	North Slope
	Valdez
	First Class Cities
	Wrangell
	Yakutat

1. Boroughs gain overall because of school levy.
2. Cities lose overall because boroughs gain.
3. Most boroughs gain under LE of 30 because their local effort is higher. Generally it is the cities within the boroughs which gain because their LE is higher.

With LE of 30

Anchorage Areawide gains $2.4 million
Fbks Boro AW gains $200,000
Juneau AW gains $300,000
Ketchikan AW gains $100,000
Kodiak AW gains $ 70,000
Matanuska-Susitna AW $ 200,000
North Slope AW gains $ 2,000
Sitka gains $ 24,000
1st Class cities lose.

WORKSHOP ON SSHB 843

MUNICIPAL REVENUE SHARING

Governor's Conference Room
Monday, May 8, 1978
9:00 a.m. to 3:00 p.m.

Representative Lisa Rudd, Chair of the House Community and Regional Affairs Committee presiding.

Representative Rudd opened the meeting stating the purpose of this work session was to provide an opportunity for an in-depth look at this revenue sharing proposal and to discuss any problem areas which may be identified.

The morning session was devoted to review of the proposed legislation. The bill's sponsor, Representative Terry Gardiner, summarized the provisions of the bill and addressed the concepts of local effort and equalization. John Williams, Legislative Research, reviewed the elements of the formula. Representative Rudd outlined four concerns which she had with the proposed program and asked the municipal representatives to address those concerns during the workshop discussions:

1. The complexity of the proposed formula;

2. The validity of the local effort concept as a basis for revenue sharing program;

3. The question of whether equalization is a legitimate concern of the state;

4. The question of whether it is a legitimate state concern to assure the provision of certain services on the local level.

During the afternoon session municipal representatives gave their comments on the concepts and specifics of the proposed legislation. The following is a summary of the major points of the discussions:

1. The formula is too complicated and includes too many variables. Mr. Shar, of Juneau suggested a simplification of the formula. The same product (millage equivalent) can result from taking the sum of the total municipal revenues, subtracting any revenues specifically excluded, and dividing that remainder by what 1 mil would bring from 100% of full and true value.

The main objection still remains, however; that each municipality's entitlement is dependent upon several statewide variables over which it has no control. It was suggested that entitlements could be computed with two year old data rather than current data, thereby making it easier for a municipality to figure its expected entitlement. The drawback to this approach is that entitlements will not reflect the most recent changes which, if an industrial development project is involved, can be major.

2. Locally generated school tax support should be included. Most communities tax themselves for additional school support over and above what is received from the school foundation program and the school constuction program. Petersburg, for example, devotes its entire 5% sales tax to school support. Anchorage claims 42% or about 6 mils goes to education. This was felt to be a legitimate indicator of local effort. At least one municipality, however, suggested that education should be left out of the program of state aid for municipal operations since such motherhood issues have a tendency to take over.

3. The formula seems to be a compulsion to keep taxes high rather than an incentive to reduce taxes. It is a built in uncertainty for assemblies and councils about future revenues and their effect on revenue sharing entitlements. John Williams pointed out that there are two mitigating factors: 1) The local effort factor ceiling of 25. No municipality will get revenue sharing credit for taxation above this figure; and 2) The willingness of local taxpayers to pay taxes. This last is considered the major determining factor. Any reduction in tax rate translates into more of a loss in direct revenues than in revenue sharing dollars. Bruce Aronsen, of the Department of Community and Regional Affairs, stated the ratio was about 12 to 1 ($12 local revenues to $1 revenue sharing).

Ketchikan pointed out that the present revenue sharing program bears no relation to taxation. The money just comes, so to speak. With HB 843, municipalities really have to consider the effects of their taxing policies.

It was also discussed that the present revenue sharing program has at best helped maintain the tax level while allowing increases of municipal services. More likely, it has just slowed the tax increase.

4. Anchorage maintains there is no direct correlation between tax base and service needs. In a growing community there are more service needs, crime, transportation, etc. Anchorage, for example, is a crossroads and service center for much of Alaska, therefore it services more than just its population. A sales tax does address this to a degree, and Anchorage would request that their hotel-motel sales tax be counted in the local effort formula. SSHB 843 specifically excludes taxes which do not generally burden the entire citizenry. Another example of such special tax is the raw fish tax of the Bristol Bay Borough.

5. Single purpose service districts. Fairbanks questioned the appropriateness of treating service districts as separate political units, as this may have a tendency to encourage a separatist attitude on the part of the service districts. Boroughs would rather consider service areas as an integral part of the whole. SSHB 843 specifies that funds allocated on a service area basis or by differential tax zones must be spent in those areas. Mr. Nordale also pointed out that they have several single purpose service districts, providing only road maintenance. These districts can receive double payment under Chapter 89 (RHM) and under Chapter 88 (formula).. This can lead to a situation where a service area can be receiving as much as twice as much money as they actually need.

If this is actually a problem, a solution may be to allow for petition to the DC&RA to use the funds elsewhere. The municipalities may prefer to delete the provision in HB 843 which requires the use of revenue sharing funds in the service areas.

6. Include per capita debt as a measure of local effort. Theoretically, municipal debt is considered in this formula since it is reflected in the tax rate. If local effort for education is included, all possibilities for local debt will be included since much of a municipality's bonded debt is for school construction. Dillingham pointed out that a city must first have a tax base before it can incur bonded debt. Several Alaskan municipalities are precluded from bonding by virtue of having no tax base.

7. Is it a legitimate state interest to see that a certain level of local services is maintained? Mr. Nordale pointed out that it does seem to be state policy to emphasize such services as police and fire protection since those categories receive the greatest intitlement in the revenue sharing program and have historically received the most attention

and amendment. Mr. Sharp pointed out that if it is a legitimate state responsibility to assure certain local services, then it is also incumbant upon the state to see that those services are actually being provided at some quality level. The present revenue sharing program does not address this aspect. The municipalities generally agreed that revenue sharing is not usually a major determinent in what services are to be provided, although the Fairbanks Borough maintains that the availability of revenue sharing dollars does help sell certain programs at the local level such as their air pollution control program.

8. Is equalization a legitimate concern of the state? Mr. Lovett of Cordova said he sees the bill as an attempt to equalize the quality of life in Alaskan communitites. A municipality of a certain size must provide the full specturm of basic services for its residents regardless of the cost. For example, Cordova devotes more than 20% of its budget to police protection. A population of a few hundred more could use the same size police department but would also have a larger tax base to fund it. A community the size of Cordova must forgo many of the amenities because it must concentrate all its resources on providing the basics. He was pleased to see that the Legislature had recognized this need and was addressing it through the revenue sharing program.

Mr. Sharp of Juneau noted that court cases in California, New Jersey and Texas have established the concept of equalization in the area of education by recognizing a person's right to equal protection in the quality of education. The courts have found that it is not appropriate to finance education strictly on the basis of local property tax revenues because of the disparities in property tax base. He said he expected the equalization concept to be extended into the area of local government services in the near future and was pleased to see the Alaska Legislature taking the lead in recognizing this idea.

Mayor Sullivan from Anchorage suggested that if the state felt it appropriate to give more assistance to the poorer communities, it could be done through maintaining the existing revenue sharing program, but with an additional appropriation and distribution to help so-called "disadvantaged" communities.

The main concern of the Municipality of Anchorage was that their percent of the total program would be reduced under HB 843. Under present law, Anchorage is entitled to 45.66%; SSHB 843 would only provide them with 35.77%.

45.66%; SSHB 843 would only provide them with 35.77%. Anchorage felt that other municipalities were being upgraded at the expense of Anchorage.

Representative Gardiner pointed out that the result will be the same whether HB 843 is used or the present program plus an additional distribution program as Mayor Sullivan suggested. It should not be viewed in terms of taking away from anyone. In actual fact, Anchorage will gain between $1 and $2 million dollars under the proposed program.

These persons sent HB843 Letter + print out on 2 June 78. VBa

April 17, 1978

MEMORANDUM

SUBJECT: SSHB 843, Revenue Sharing

TO: The Honorable Terry Gardiner

FROM: John Williams
Research Analyst

You have asked that we estimate the amounts of tax reduction that could occur in municipalities across the state should SSHB 843 become law with the $27 million appropriation as specified in Section 11 of the bill. We have attached a series of notes to accompany the printout of our analysis.

There are three aspects of the analysis which need clarification. They are (1) the assumptions relating to changes in population, property value, services supplied by municipalities, etc; (2) the response of communities to receiving more money from local government assistance; and (3) the manner in which we were forced to treat 1978 actual revenue sharing entitlements. These three considerations are discussed below.

General Assumptions

For purposes of the analysis, we have utilized the basic data previously developed to estimate payments under SSHB 343 in 1978 and have maintained that basic data base through 1979. The effect is that no population increases are considered from 1978 to 1979, services are maintained at their 1978 levels, and property values and income remain constant. The only consideration that changes in our model is the amount and distribution mechanism of revenue sharing entitlements. In 1978, present law is used to calculate revenue sharing entitlements. In 1979, it is assumed that the funding level and allocation mechanism of SSHB 843 is in effect. The only consideration that the model does not utilize is the "hold harmless provision", as provided for in Section 10 of the bill. The significant effect of this omission is to show a net loss of revenue sharing entitlements in 1979 for the Fairbanks North Star Borough, Kenai Peninsula Borough, North Slope Borough, Sitka Borough, Wasilla, Valdez, Akolmiut, Delta Junction, Huslia, Port Heiden, and Unalakleet, which would not actually be required, since Section 10 of the bill prevents any municipality from receiving less during the next three years than their 1978 entitlement.

Local Government Responses

Municipalities that receive additional money from the state revenue sharing program would respond in a variety of ways. Many would increase the quality of government services or add additional services. Some may reduce taxes. For the purposes of our analysis, we have assumed that all boroughs and first class cities (except Saint Mary's, which has no taxes) apply the incremental increase in revenue sharing entitlements to tax reduction so as to maintain a level of operating capital in 1979 that is equal to (or slightly in excess of) their 1978 operating capital. Hence, all boroughs and first class cities except the five mentioned above will reduce taxes to some degree. The Fairbanks North Star Borough, Kenai Peninsula Borough, North Slope Borough, Sitka Borough, and Valdez increase their taxing rate to maintain a constant level of operating capital. All second class cities (except Wasilla) are assumed to absorb the additional revenues and to increase their level of governmental services. Five second class cities (Wasilla, Akolmiut, Delta Junction, Huslia, Port Heiden, and Unalakleet) will receive a lesser entitlement in 1979 than 1978 because we have not considered the hold harmless provision of SSHB 843.

1978 Entitlements

Presently, we are unable to distribute 1978 entitlements over the subunits of boroughs and cities with multiple tax zones. We can only lump-sum each entitlement. The lump-sum amounts are entered on the first line of each borough and city with multiple listings. This treatment of the 1978 entitlements causes the need for clarification of particular aspects of the printout. Since the program is adjusting 1979 tax rates in such a way so as to hold the revenues available to each municipality equal for 1978 and 1979, anomalous results appear on the printout. Namely, since the intent is to maintain a constant dollar amount from one year to the next, the program necessarily reduces area-wide taxes at a lesser rate than would actually be allowed, since the 1978 operating budget contains the entire borough revenue sharing entitlement, and the 1979 entitlement is distributed across the service areas. In the case of Anchorage, the tax reduction area-wide is actually a tax increase, since the area-wide entitlement in 1979 is about $2.5 million less than the total entitlement of $8.4 million in 1978. The total Anchorage entitlement in 1979 is about $1.6 million greater than in 1978, which demonstrates that Anchorage could have a net tax reduction for all service areas. The .54 mil increase shown for Anchorage area-wide should be compared to the tax decrease in each service area to generally understand the amount of tax reduction that could be realized by each service area.

Please let us know if we may be of further assistance.

NOTES TO "MUNICIPAL TAX PROJECTION TO 1979 WITH PAYOUT AT $27 MILLION"

The purpose of the printout is to demonstrate the degree of tax reduction that could commence in each municipality should HB 843 become law. Several assumptions are made in determining the tax reductions, most importantly that every borough and first class city (except Saint Mary's) take advantage of the opportunity to reduce taxes, and that none of the second class cities (except Wasilla) change their tax policy.[1] Other assumptions follow.

(1) Boroughs and first class cities adjust their tax policy to maintain constant 1978 dollars in their "operating budget". Operating budget is defined as revenues from property and sales taxes plus their revenue sharing entitlement. An operating budget for 1978 is determined, and tax policy is modified to maintain at least the same operating revenues in 1979.

(2) Population is held constant and no change in present services (either quality or quantity) is assumed. Property values are not changed, nor is the relative revenue generating capacity of each municipality's sales tax.

(3) The 1978 taxing rate is determined by converting each municipality's sales tax to the property tax mil rate equivalent (at full and true value) that would generate the same amount of revenue as is received by each municipality from their 1978 sales tax. The sales tax "mil equivalent" is then added to the property tax mil rate (adjusted to the rate on full and true value) and the sum expressed as the total mil equivalent of taxes for each municipality. The calculated tax reduction that could commence in 1979 is expressed as the total mil equivalent of taxes for each municipality. The calculated tax reduction that could commence in 1979 is expressed as mil equivalents of tax that could be excised from the 1978 taxing rate, either as a reduction in sales or property tax or both.

(4) 1978 revenue sharing entitlements are credited to area-wide use in those municipality's with several listings. It is not possible at this time to distribute each entitlement over the service areas or tax zones for which each portion of the entitlement should be credited. For example, Anchorage (area-wide) was credited with the full $8,378,557 of entitlement in 1978. However, 1979 entitlements are distributed across service areas (except road, health, and military entitlements). Hence, in 1979, area-wide Anchorage receives $5,896,502 (approximately $2.5 million less than in 1978). This treatment of the 1978 entitlements causes an apparent tax increase to be required in Anchorage (area-wide).

---

[1] Wasilla has not been singled out intentionally. The city was mistakenly considered a first class city. However, it is interesting to note the minimum amount of local tax effort that would be required in Wasilla to maintain constant revenues.

(5) Section 10 of SSHB 843 is not considered in the analysis. Section 10 guarantees that every municipality shall, until 1981, receive no less than their entitlement in 1978. Hence, those municipalities which would receive less in 1979 than in 1978 show an increase in taxes necessary to maintain a constant operating budget. Communities affected by the hold harmless clause are the Fairbanks North Star Borough, Kenai Peninsula Borough, North Slope Borough, Sitka Borough, Wasilla, Valdez, Akolmiut, Delta Junction, Huslia, Port Heiden, and Unalakleet.

Following is a description of the numbered columns appearing on the printout.

Column 1: Lists the adjusted property tax rate of each municipality. Adjustment is made by deducting any portion of property taxes used for education, and adjusting the remainder to the equivalent tax rate on the full and true assessed value of property in that municipality. The numbers are expressed as a mil rate.

Column 2: Lists the equivalent property tax rate necessary to generate the same amount of revenue as actually received by each municipality from its sales tax. The numbers are mil rate equivalents.

Column 3: Sums the two previous columns. The numbers in this column are used in the analysis as the local taxing rate against which 1979 tax reductions are calculated.

Column 4: The dollar amounts shown are the sum of revenues which each municipality should receive from sales and property taxes plus their 1978 revenue sharing entitlement.

Column 5: Lists the 1978 actual revenue sharing entitlement. For municipalities with multiple listings, the entitlement is credited entirely to the first, or area-wide, listing.

Column 6: The column lists the calculated taxing rate which each municipality could assess to maintain a constant money supply from the total of sales and property taxes plus the 1979 revenue sharing entitlement. The numbers represent the sum of property tax mil rates and sales taxes expressed as a mil rate equivalent.

Column 7: Lists the difference between the 1979 taxing rate and the 1978 taxing rate. Except for previously mentioned exceptions, municipalites will generally be able to reduce taxes. The tax reductions shown in the column are mil rates on the full and true property value. Actual reductions would generally be greater than the number shown since the assessment roles of municipalities are generally less than the full and true value (because of exempted property and slight differences between assessed and market value).

Column 8: Lists the projected revenue sharing entitlement that each municipality would receive based upon the aforementioned assumptions. Each unit of local effort is worth $3.60 per capita in 1979. It is assumed that $27 million is appropriated to the revenue sharing program.

Column 9: The model was designed to maintain constant dollars for municipal operations. Hence, the 1979 operating budget is equal to the revenues from the adjusted sales and property taxes and the 1979 revenue sharing entitlement. The dollar amounts in this column equal or slightly exceed the 1978 operating budget in Column 4.

NOTES TO MARCH 25, 1978 REVENUE SHARING PRINTOUTS

The "new" version printouts are based on a modification of the formula that appears in HB 843 and SB 502. The sales tax portion of the formula is changed. Instead of multiplying the sales tax per cent rate by 2.3, the new version compares the sales tax revenues of each municipality to the revenue generated by 1 mil of property tax in each municipality. The quotient is expressed as a mil rate equivalent. The effect of the change is to cause the proposed revenue sharing allocation system to be neutral with respect to each municipality's taxing philosophy.

REVENUE SHARING DATA--1977

PER CAPITA EXISTING: The dollar amounts in this column correspond to the entitlements received this year by each municipality for all service categories except road maintenance, health facilities and hospitals, and military entitlements. The categories in this column would be repealed by HB 843. Entitlements are lumped into the first listing for each municipality with several listings.

R,H,M: The dollar amounts in the column correspond to the 1978 entitlements that will be received for road maintenance, health facilities and hospitals, and military support. These categories of the present revenue sharing law are saved by HB 843.

TOTAL ENTITLEMENT: The column sums the entitlements that will be received this year (each entitlement has been adjusted for the cost of living allowance).

POP: The certified population numbers used by the Department of Community and Regional Affairs (CRA) for the revenue sharing program.

PER CAPITA PROP. VALUE: The column lists the full and true property value of each municipality or subdivision thereof divided by the population of the municipality or subdivision thereof. Municipalities without property assessments are estimated (EST). The estimated value for second class cities in the unorganized borough is determined by averaging the per capita property values for communities in the unorganized borough with populations of 750 or less.

1976 PCI: The dollar amounts listed in the column correspond to the per capita income figures as determined by adjusting the 1974 Bureau of Census income estimates by 1976 data supplied by the National Planning Data Corp.

PROP. TAX: The numbers in the column correspond to the adjusted property tax mil rate of each municipality or subdivision thereof. Property tax rates appropriated to educational purposes are excised from the base figure before the mil rate is adjusted to the equivalent mil rate on the full and true value of property as determined by the state assessor.

SALES TAX: The numbers correspond to the sales tax per cent rate in each municipality. Sales tax appropriated to education is not inclu . The per cent rate shown is used in the original version of HB 843, buc is not used in the new formula.

S. TAX REVENUE: Sales tax revenues are obtained from the municipal audits filed with the Dept. of CRA. When 1977 audits were not available, the sales tax revenue number taken from the 1976 audits was inflated to represent the expected increase in sales tax revenues in 1977. When no audit was available, each community known to have a sales tax ordinance was credited with an estimated sales tax revenue amount obtained by a similar community with the same sales tax rate in effect.

COLA: Cost of living allowance.

'NEW' PROPOSED REVENUE SHARING (1977 DATA)

PROPERTY TAX: The adjusted property tax mil rate.

S.T. EQUIV: The column lists the sales tax equivalent expressed as a mil rate. The number is determined by dividing the actual sales tax revenues of each municipality (less any portion appropriated to educational purposes) by the revenue generated by 1 mil of property tax on the full and true value of property in that municipality.

PCI RATIO: The numbers are the quotients determined by dividing the state average per capita income ($8,001) by the per capita income of each municipality or when available, the per capita income of a subdivision of a municipality. A quotient greater than 1 indicates that the per capita income is lower than the state average.

PROPERTY RATIO: The numbers are the quotients determined by dividing the state average per capita property value ($42,871.8) by the full and true per cpaita property value of each municipality or subdivision thereof. As with the PCI ratio, a number greater than 1 indicates that the municipality has a per capita property value lower than the state average.

AVE. RATIO: The numbers in the column are the average of the two previous columns.

LOCAL EFFORT. The numbers are the result of adding the property tax mil rate to the sales tax mil rate equivalent and multiplying the sum by the average ratio. The product of the local effort number and the proration factor (3.3516427) is the dollar amount per capita that each municipality would receive under the formula portion of HB 843. The local effort factor is not allowed to exceed 25, as specified for in HB 843.

POP.: Population.

PER CAPITA ENTITLEMENT: The dollar amounts are determined by multiplying the local effort factor times the population times the proration factor of 3.3516427. (The proration factor represents the upward proration of each entitlement necessary to pay out a total of $25 million.)

TOTAL (+ RHM): The column adds the entitlement in the previous column to the entitlement for road maintenance, health facilities and hospitals, and military support.

PRESENT ENTITLEMENT: The dollar amount that will be received by each municipality in 1978.

This printout does not consider Sec. 9 of HB 843 which specifies that each municipality will, for the next three years, receive no less than their 1978 entitlement. The next printout does consider Sec. 9. The entitlements shown on the next printout for municipalities which receive more under the formula than their 1978 entitlement are 96.9% of the entitlements shown on this printout due to the Sec. 9 add ons.

'NEW' VERSION HOUSE BILL NO. 843 (1977 DATA)

PROPERTY TAX: The adjusted property tax mil rate.

S.T. EQUIV: The calculated mil rate equivalent of each municipality's sales tax.

POP: Population.

CHAPTER 88 ENTITLEMENT: The dollar amounts represent the entitlements calculated for Chapter 88 of HB 843, which is the formula entitlement.

CHAPTER 89 ENTITLEMENT: The dollar amounts represent the entitlements calculated for Chapter 89 of HB 843, which is the entitlement for road maintenance, health facilities, and military support.

SECTION 9 ADD ON: The dollar amounts listed in the column correspond to the difference between the 1978 entitlement and the entitlement under HB 843 for every community which receives less under the proposed legislation than they did in 1978.

HB 843 ENTITLEMENT: This column sums the three previous columns and multiplies the sum by .96861730, which is the downward proration factor necessary to pay out $25 million after the Sec. 9 add ons have been considered.

PRESENT ENTITLEMENT: The actual 1978 entitlement which will be received by each municipality.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

DIVISION OF LOCAL GOVERNMENT ASSISTANCE / POUCH B — JUNEAU 99811

March 14, 1978

The Honorable Terry Gardiner, Representative
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Representative Gardiner:

Re: HB 843 "An Act providing for equalization of the tax resources of municipalities and continuing a portion of the program of state aid for municipal purposes; and providing for an effective date."

This bill (as well as SB 502) would dramatically alter the method by which the State of Alaska distributes financial assistance to municipalities. Currently, under AS 43.18, the State distributes in excess of $18 million dollars annually to municipalities and volunteer fire departments in the unorganized borough utilizing a categorial approach. For example, if a city has a police department, and meets the minimum requirements, the State pays the city $12 per person served by the police department. No consideration is given to the relative ability of the city taxpayers to support the police department, nor the rate of municipal taxation.

The existing revenue sharing formula (AS 43.18) encourages municipalities to provide a wide variety of services, even though the quality of such services may be minimal, and no local tax effort is required. Additionally, the present revenue sharing program favors the more sophisticated municipalities (due to the categorial approach) as well as favoring municipalities having greater populations in a relatively small area. The new concept of distributing State generated wealth utilizing a formula based on relative taxable wealth, relative ability to pay, tax rates, and population makes sense to us and is definitely a step forward in assisting the development of local government in Alaska. Briefly, the concept may be described as helping those municipalites willing to help themselves.

This approach would seem to be equitable in that residents have determined locally the best balance between sales and property taxes to produce sufficient municipal revenues.

The Division of Research, Legislative Affairs Agency has prepared an analysis of the impact of this bill (at various funding levels) on all municipalities.

The Department wholeheartedly supports the concept of HB 843. Also, the proposed amendments would in our opinion, improve the intent of the act providing for equalization of the tax resources of municipalities.

Sincerely,

Lee McAnerney
Commissioner

MEMORANDUM

SUBJECT: Revenue Sharing (W.O. #14/R)

TO: The Honorable Terry Gardiner

FROM: John Williams
Research Analyst

You have asked that we determine the additional revenues the Municipality of Anchorage would be entitled under HB 843 should they implement a 1% sales tax and the actual tax revenues th would receive. The attached printout was run using the same information and programming that we utilized in developing the printout entitled "HOUSE BILL 843 $25 MILLION" with the exception of crediting Anchorage with a 1% sales tax and adjusting the proration accordingly. The additional revenues for Anchorage total $959,003.

We also estimated the amount of revenue that a 1% municipal sales tax would generate in Anchorage. We utilized Department of Revenue data from gross business receipts and attempted to isolate generally taxed retail business (the codes included were the same codes we used in comparing sales tax to property tax revenue generation). Our estimate suggests that a 1% sales tax on retail transactions in Anchorage would generate at least $12.6 million in revenue.

Comparing the increase in tax revenues attributable to a 1% sales tax to the increase in Anchorage's revenue sharing entitlement under HB 843 because of the 1% sales tax suggests that for each additional revenue sharing dollar Anchorage would receive, the municipality would generate more than $13 in direct tax revenues.

Please let us know if we may be of further assistance.

Juneau, Alaska 99811

Dear Representative ~~Malone~~ Hugh,

The Cordova City Council at the regular meeting of March 13, 1978 voted unanimously to support House Bill 843. The City of Cordova presently has one of the highest tax rates in the state with a 22 mill property tax plus 4% sales tax The additional revenue generated by House Bill 843 would be a significant step in the reduction of local taxes.

We appreciate and encourage your efforts to reduce the local tax burden.

Very truly yours,

Perry D. Lovett
City Manager

February 17, 1978

MEMORANDUM

SUBJECT: HB 843 (W.O. #7/R)

TO: The Honorable Terry Gardiner

FROM: John Williams
Research Analyst

You have asked that we prepare an analysis of HB 843, an Act providing for equalization of the tax resources of municipalities and continuing a portion of the program of state aid for municipal purposes; and providing for an effective date. The following analysis consists of: (1) a discussion of present revenue sharing law; (2) an overview of the general implications of the bill; (3) the financial distribution scheme as provided for in the bill; (4) a discussion of the allocation formula; and (5) an attachment demonstrating the comparative revenue distribution under current law and HB 843.

PRESENT REVENUE SHARING

HB 843 would amend the current state aid to local governments program, as provided for in AS 43.18.010-090. The current law provides for the legislature to annually appropriate an amount to be distributed to local governments according to a series of local services which are eligible under the program. Approximately 75% of the revenues are distributed on a per capita basis; the remainder are allocated according to miles of road maintained and the number of health facilities and hospitals (either on a per facility basis or a per bed basis). Services in support of military installations are apportioned on a per capita

basis but according to a different schedule than utilized for civilian populations. The Department of Community and Regional Affairs (CRA) determines whether a municipality qualifies under the provisions specified for each eligible service category. When eligibility has been certified, the municipality then receives a statutorily set amount per capita (or medical facility or mile of road maintained) specified for each service category. For example, a municipality receives $12 per capita for police protection, $7.50 per capita for fire protection, and $2 per capita for land use planning. Should the liability of the program exceed the legislatively appropriated amount, all municipal entitlements are prorated so that the total liability equals the available money.

The legislative intent for the program was restated via the passage of HB 89 in 1977 (120 SLA 1977 becomes effective July 1, 1978) to read "(t)he intent of §§ 10-100 of this chapter in authorizing state aid for....municipal services is that municipalities which levy taxes reduce those levies in reasonable proportion to the amount of state aid received by the municipality for a given fiscal year" (sec. 4, HB 89).

Using the criteria established by the legislative intent, there would appear to be two considerations regarding the present revenue sharing law which indicate that it cannot fully accomplish the intent. (1) The present distribution system does not consider the local tax rate in distributing revenues. Those communities which have a relatively high tax rate receive payments at the same rate as communities which supply minimal or no services from local taxes. Instead, present law directs the Dept. of CRA to determine whether specific services which

are being supplied by the municipalities qualify them for categorical entitlements, regardless of differences in tax rates utilized in funding those service categories.[1] (2) Additionally, present law does not include "ability to pay" considerations. A community with a larger than state average per capita property valuation receives revenues at the same rate as communities which are relatively poor. The same criticism can be raised with respect to per capita income differentials from which taxes are paid. A circular argument can be developed which demonstrates that poorer communities must set taxing rates at higher levels to generate the same revenues per capita as wealthier municipalities, which in turn requires a greater proportion of the disposable income of the poorer municipality residents to pay the additional tax burden vis-a-vis wealthier communities. The alternative for the poorer community is to forgo local services, which causes concomitant financial loss if the forgone services were eligible for revenue sharing dollars. The actual result is often substandard services.

---

[1] The eligible services list has expanded since inception and presently includes services related to health and welfare, transportation, recreation, and economic development (a bill before the legislature this year would add cultural activities). Since the eligible services list has greatly expanded, it would appear timely to consider allowing any public service specifically authorized by a municipality to be considered as eligible for revenue sharing dollars. A method for accomplishing this would be to look directly at the local tax rate in determining the distribution of the revenue sharing appropriation, since the tax rate will reflect the level and number of services provided by municipal tax revenues.

OVERVIEW OF HB 843

HB 843 repeals essentially all provisions of the present revenue sharing law which allocate monies on a per capita basis (police, fire, parks and recreation, land use planning, transportation, and air and water pollution control). Present law which allocates monies for health facilities, hospitals, road maintenance, fire districts outside of municipalities, and support of military installations is saved.

The repealed portion is replaced with a per capita allocation system based upon population, taxing rate, and a factor which compares each local government to the state average using per capita property value and per capita income as indicators. Our analysis indicates that any appropriation to the program in excess of $23 million will increase the entitlement for all local governments with local tax ordinances in effect except the North Slope Borough and the City of Valdez. Several second class cities and one first class city with no local taxes would receive less. Section 9 of the bill provides for all local governments to be held harmless for three years after passage, such that no municipality will receive less during that three year period than they did in 1978, regardless of their entitlement as calculated by the specified formula.

FINANCIAL DISTRIBUTION SCHEME

HB 843 provides that revenue sharing dollars shall be utilized by municipalities in the taxing jurisdiction for which the amount of entitlement is determined. Boroughs with area-wide taxes for general government services except education shall receive revenue sharing

allocations to be used for area-wide purposes. For boroughs with differential taxing rates in service areas, revenue sharing entitlements based upon the service area tax rates must be utilized only in those service areas. First or second class cities with city-wide taxes would receive an allocation based upon the city-wide tax rate to be used city-wide (except for education). Cities with differential taxing zones would receive allocations according to the tax rate applied in each differential tax zone.

This system of distribution would appear to have a neutral effect with respect to the unification of existing governments. We do not find any circumstance where a subsequent unification agreement would cause a decrease in the revenue sharing entitlement for identical services. The bill contains a hold harmless clause for entitlements under the non per capita portion should a subsequently unified local government be entitled to less than the preceding multiple local governments.

ALLOCATION FORMULA

HB 843 specifies a formula to be used in determining entitlements for per capita revenue sharing distributions. The formula utilizes three considerations: (1) population; (2) tax rate; and (3) the relative "ability to pay" of each local government or subunit thereof.

The formula is:

$$\text{Entitlement} = \underbrace{P}_{A} \times \underbrace{\left[\underbrace{(PT + 2.3ST)}_{B} \times \underbrace{\left(\frac{SPCPV/LPCPV + SPCI/LPCI}{2}\right)}_{C}\right]}_{D}$$

where P = population
PT = property tax mil rate
ST = sales tax per cent rate
SPCPV = state average per capita property value
LPCPV = local per capita property value
SPCI = state average per capita income
LPCI = local per capita income

We will discuss the formula according to the portions indicated by the braces.

Part A

The population is determined in the same fashion as provided for in present law. Any reasonable population estimate is accepted by the Dept. of CRA.

Part B

Part B indicates the portion of the formula which determines the local tax rate. Property tax mil rates and sales tax per cent rates are converted to mil equivalents. The 2.3 conversion factor multiplied by

the sales tax rate was determined by comparing the revenue that could be generated by applying a one mil property tax to the total full and true assessed property value in the state and a one per cent sales tax to the total retail business in the state. That comparison demonstrates that a one per cent sales tax would generate 2.3 times more revenue than a one mil property tax.

Part C

The portion of the formula set out by brace C averages two ratios that compare the "economic base" of each local government to the state average. The ratios are mathematically designed to create a number larger than one for communities lower than the state average for the two indicators, and a number smaller than one for communities above the state average. The average of the two ratios is then multiplied times the computed tax rate so as to adjust upward the local tax effort of economically disadvantaged communities and downward economically advantaged communities.

Part D

The portion set out by brace D is called the local effort factor, and is not allowed to exceed 25. The ceiling has the effect of setting a limit on the amount of support given to each municipality under the revenue sharing program. This, in combination with the required publishing of revenue sharing entitlements, would appear consistent with the legislative intent of the program, which is to diminish local tax burdens.

The bill further provides for adjustments in both sales tax and property tax rates based on optional exemptions allowed under Alaska law. As an example, a municipality utilizing the $10,000 residential property tax exemption would be required to declare the revenues forgone by the exemption, and a comparative portion of the tax would be excised from the tax rate base before computing that municipality's entitlement. Mandatory exemptions, such as agricultural lands and senior citizens housing would not affect the tax rate, since the forgone revenues are reimbursed by the state.

HB 843

The bill would eliminate the current revenue sharing distributions which are based on dollar amounts per capita for specific services provided by the municipality (e.g., police, fire, hospitals) and would substitutea payment formula based on local tax effort and a community's ability to pay taxes (and thus fund local services). The intent of the proposed legislation is to help those municipalities willing to help themselves.

Sponsors of HB 843 point out that although the intent of the present state revenue sharing program is to assist municipalities in reducing local taxes, this has not happened since the present payment formula bears no relation to either local tax effort or local tax base. The present formula is based on the types of services provided by the local government but does not take into account the community's ability to pay for those services. As a result, local government services are often provided on a very minimal level just for the purposes of gaining revenue sharing monies. The present program thereby tends to favor the more sophisticated municipalities which provide more local services. It also favors the more populated areas since entitlements are based on population figures as well.

The formula proposed in HB 843 would eliminate the emphasis on local government services and would emphasize instead the local tax effort; that is, the property and sales taxes levied by the municipality. The formula also takes into account the municipality's ability to generate revenues from taxes relative to other municipalities in the state by computing the local taxable wealth relative to the state overall. Thus, a community is not penalized by the formula for having less taxable wealth than another.

The framers of HB 843 have retained the portions of the present revenue sharing program which allocate funds on a non-per capita basis (road maintenance, hospitals, health facilities and military support) and have included a 3 year grandfather clause so that no municipality will

SUBJECT: Revenue Sharing (W.O. #14/R)

TO: The Honorable Terry Gardiner

FROM: John Williams
Research Analyst

You have asked that we determine the additional revenues the Municipality of Anchorage would be entitled under HB 843 should they implement a 1% sales tax and the actual tax revenues they would receive. The attached printout was run using the same information and programming that we utilized in developing the printout entitled "HOUSE BILL 843 $25 MILLION" with the exception of crediting Anchorage with a 1% sales tax and adjusting the proration accordingly. The additional revenues for Anchorage total $959,003.

We also estimated the amount of revenue that a 1% municipal sales tax would generate in Anchorage. We utilized Department of Revenue data from gross business receipts and attempted to isolate generally taxed retail business (the codes included were the same codes we used in comparing sales tax to property tax revenue generation). Our estimate suggests that a 1% sales tax on retail transactions in Anchorage would generate at least $12.6 million in revenue.

Comparing the increase in tax revenues attributable to a 1% sales tax to the increase in Anchorage's revenue sharing entitlement under HB 843 because of the 1% sales tax suggests that for each additional revenue sharing dollar Anchorage would receive, the municipality would generate more than $13 in direct tax revenues.

Please let us know if we may be of further assistance.

JAY S. HAMMOND
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

March 20, 1978

The Honorable Lisa Rudd
Chairman
Community and Regional Affairs
Committee
House
Pouch V
Juneau, Alaska 99811

Dear Representative Rudd:

In my November 5, 1977, speech to the Alaska Municipal League, I suggested that the State look for means by which to reward localities which make good faith efforts to tax themselves. In that talk, I sketched a plan whereby shared revenue would vary inversely to a municipality's per capita property values. This suggestion was made in recognition of the disparity of wealth among the communities in our State. I feel the proposed formula is a useful step toward implementation of the concepts contained in that speech.

I have been briefed on legislative proposals (SB 502, HB 843) to redesign the Municipal Revenue Sharing Program. Under these proposals, a municipality's entitlement would be determined by a formula to include as key elements both population and local effort. The latter would, as I understand it, incorporate local property and sales tax rates adjusted by a factor to account for local differences in property tax base and income.

I commend the Legislature for the careful study and deliberation which has gone into preparation of the proposals. I also support the philosophy of State and local government relationships and responsibilities which is expressed in the proposals. I would like to briefly mention several reasons for my support.

First, I believe that the most responsive government is that which is closest to the people it serves. Under the present categorical approach to Revenue Sharing, the State exerts considerable influence on the direction and type of local

services to be provided. I believe the proposed formula approach will give localities more desirable flexibility to determine service priorities at the local level.

Second, I have been an advocate for some time for the formation of local governments in the unorganized borough. At the November 10, 1977, Convention of the Alaska Federation of Natives, I expressed the view that a major obstacle to local government formation was an inadequate tax base which made it difficult for many rural areas to adequately meet the costs of local government services. I indicated then that Revenue Sharing adjusted for variations in per capita property values would help alleviate these problems. I believe the proposed legislation provides a useful tool for encouraging action in this regard.

My staff and that of the Department of Community and Regional Affairs have studied the legislation and have suggested refinements which we feel would facilitate administration of a formula based program. My position on funding of the proposal will have to await review of the fiscal impact of this legislation and the action the Legislature takes in the budget act itself.

Sincerely,

Jay S. Hammond
Governor

MEMORANDUM

SUBJECT: Revenue Sharing Proposal W.O. #4879

TO: The Honorable Lisa Rudd

FROM: John Williams
Research Analyst

As per your conversation of January 30 with Gregg Erickson, we are submitting the following discussion proposal for modifying the state aid to local governments (revenue sharing) program. This memorandum describes the legislative intent with respect to the present revenue sharing program, why the present law does not seem to fit with the legislative intent, the considerations which are incorporated in the enclosed proposal, how the proposal would work (along with a break-down of revenue sharing payments by community), and some comments on the ramifications of possible modifications to the proposal.

It is our hope that the following material may provide a useful starting point for further discussion.

BACKGROUND

The statement of purpose contained in Alaska's revenue sharing statute, (enacted in 1970) reads: "The intent of this chapter in authorizing state aid for municipal purposes is that local governments which levy property taxes reduce those levies in reasonable proportion to the amount of state aid received by a local government for a given fiscal year." (AS 43.18.030(a)).

In 1977 the legislature passed HB 89 (introduced by Representative Cotten) which affected revenue sharing in two ways. First, the bill expanded state support to local school programs by assuming the bonded

indebtedness of local governments for school construction. Second, it modified the legislative intent of the state aid to local governments program. The new language, which takes effect July 1, 1978, states: "The intent of secs. 10 - 100 of this chapter in authorizing state aid for educational purposes and municipal services is that municipalities which levy taxes reduce those levies in reasonable proportion to the amount of state aid received by the municipality for a given fiscal year." Other sections of the bill require municipalities which levy either sales taxes or property taxes to inform the residents of the amount of revenue sharing dollars received by the municipality and the property tax mil rate equivalent or sales tax per cent rate equivalent represented by that transfer.

The new language broadens the intent of the state aid to local governments program from an intended reduction in property taxes to an intended reduction in local property and sales taxes. These taxes are the only two which can be levied by the municipal government uniformly on the residents of that municipality. Hence, the intent as stated by the language which takes effect in July of this year is to reduce taxation by municipalities upon their residents, proportional to the amount of state revenues received.

The present mechanism for distributing revenue sharing money takes no direct account of levels of local taxation. Instead, a schedule of typical local government services have been established and revenue sharing monies are paid on a dollar amount per capita for the specified

services. It is conceivable that there is a reasonable public purpose in allowing only specific services provided by a local government to be eligible for state "matching" funds, especially if the services are directly related to the health and welfare of the citizens. However, the present allowable services for revenue sharing purposes includes a mix of health and welfare services and commercial or economic services. Since the eligible services have been expanded to include a broad cross-section of local services, why prohibit any local service from receiving state "matching" funds?

Present redistribution via revenue sharing does not consider local tax effort other than as implied by specific services provided by the local government. For example, communities with no property tax (or sales tax) receive revenue sharing dollars for services at the same rate as a community supplying the same service with a 20 mil property tax rate. Obviously the former community cannot reduce the tax burden for its citizens any more by receiving revenue sharing dollars. Additionally, the system does not attempt to relate local taxation efforts to the 'wealth' or 'ability to pay' of the local populace. For example, a 'wealthy' government may be assessing a property tax at a 20 mil rate and generating $400 per capita; whereas a less wealthy community may generate $200 per capita with the same 20 mil rate. Insofar as per capita property value estimates the wealth of the people residing within a local government boundary, the 20 mil property tax assessment rate on the poorer community removes a greater proportion of the disposable income of the residents while generating half the revenue of the wealthier community.

Wealth or ability to pay is not represented strictly by per capita property valuation. Several factors must be considered to relate a particular tax rate to the economic impact on the citizenry as measured by the ability to pay the tax burden.

FACTORS CONSIDERED IN PROPOSED FORMULA

There are two prime considerations in the proposal presented herein: (1) local tax effort; and (2) ability to pay taxes (and thus fund local services). These two factors are weighted equally in the proposal.

Local Tax Burden

The two primary mechanisms for local governments to extract tax revenues from the general public on are sales and property taxes. The local tax burden portion of the proposed formula considers sales taxes and property taxes according to their relative burden on the average citizen of the state. This was determined by comparing the 1976 revenue that could be generated by a 1% sales tax on the total retail business in the state and the revenue that could be generated by a 1 mil property tax on the total estimated property in the state (only a small proportion of the property value had to be estimated). This calculation results in 2.34 times more revenue being generated by a 1% sales tax than a 1 mil property tax. To express the local tax rate in a uniform manner, sales

tax percentages can thus be converted to mil rate equivalents by multiplying the sales tax rate by 2.3. The mil rate equivalent can then be added to the property tax rate, with the sum representing the local tax effort. (For example, a community with a 5 mil property tax and a 2% sales tax would have a local tax burden of 9.6 mil equivalents.)

Because of the school foundation program, we have excised all levies or portions of levies which are appropriated to schools. The foundation program pays all or nearly all school costs. Thus, "wealthier" communities which decide to fund their local school districts at greater than the state determined minimum requirements have made a decision to increase their local tax burden for one of many local services necessary. By removing school levies, we have placed tax burdens for all other local services on an equal footing. For the purposes of constructing our computer model, this required determining the proper diminishment of local tax efforts by gleaning school appropriations from the local government audits for all communities which do not separately report tax levies for schools. Should this proposal become law, a requirement of reporting tax assessments for educational purposes would obviate the need for this task.

This determination of a local tax burden is a dramatic change from the present revenue sharing formula which bases its distribution on specific services rendered by the local government (we will discuss

at a later time those revenue sharing monies which are not allocated on a per capita basis, such as road maintenance, health facilities, and hospitals). This proposal looks at the taxes levied to determine the quantity of services which each local government is attempting to supply. The decision to allocate those revenues over any mix of an infinite number of public purposes is left solely to the local government and not encouraged or discouraged by the state revenue sharing program via its system of rewarding some services and ignoring others on an arbitrary dollars per capita basis.

Ability to Pay

The "ability to pay" portion of the proposal could also be called the "ability to generate revenue" in that it measures two indicators of the relative ability of a local government to tax its citizenry compared to the state average.

Since the two taxation methods which generally fall on the local populace are sales taxes and property taxes, the "ability to pay" portion of the proposal measures the per capita income (PCI) and per capita property value (PCPV) of the local government and compares the local values to the state-wide average. Each factor is determined in the same way--viz. by determining the ratio of the state-wide PCPV to the local PCPV and the ratio of the state-wide

PCI to the local PCI. These two ratios are then averaged to determine the local ability to pay (or ability to generate revenue).

As an example, the 1976 state-wide PCPV was $29,712 and the state-wide PCI was $7,918 (estimate). A community with a PCPV of $10,000 and a PCI of $5,000 would have ratios of 2.97 and 1.58 respectively. By averaging these two ratios, the local ability to pay factor is 2.28, which indicates that their ability to raise revenues compared to the state-wide average is 1/2.23 (43.8%) at equal taxation rates.

In the case of a non-unified borough with incorporated cities, the taxing entity (city or borough) is attributed the taxes assessed by the municipality for the population upon which the taxes are levied. As examples, taxes levied by boroughs for areawide purposes would use the PCI, PCPV, and population numbers borough-wide; borough taxes levied only within a particular service area would be modified by PCI and PCPV for the population within that service area; and a city levying city-wide taxes would use the population, PCI and PCPV for the city. Revenue sharing monies appropriated by the proposal would be required to be utilized in the area to which the taxation is applied. This data management could be achieved by requiring local governments to submit their taxation data according to the service area in which the tax applies and the population for that area. The state assessor can assign full and true PCPV's and

can obtain data from census estimates on the PCI for the most recent year available. (Our present computer model uses 1976 data except for PCI which is 1974 data. We have recently received 1976 PCI data which will be used when we complete our 1977 data base.)

Approximately 13% of the Alaskan population live in communities where no property assessment is made. For this proposal to be implemented, the state assessor would complete property value estimates in key communities within each region of the state for purposes of determining (estimating) the property valuation in non-assessed communities. We would recommend that this could be accomplished by requiring a property value estimation for one community within each of the 1961 election districts where assessments are not completed, since that apportioning of the state best represents the socio-economic and cultural divisions of the state. The 1961 election districts are presently utilized for revenue sharing purposes, the school foundation program, state per diem determinations, etc.

HOW THE PROPOSAL OPERATES

The revenue sharing proposal we are presenting would apportion payments via two mechanisms: (1) utilizing the methodology developed in the last section; and (2) by retention of that portion of the present law which apportions revenues on a non-per capita basis (road maintenance, hospitals, etc.).

New Per Capita Methodology

The per capita apportionment utilized in this formula involves three components--population, taxation effort, and ability to pay. Population estimates would be submitted by the local governments and certified by the Department of Community and Regional Affairs (no change from present law). Taxation effort would be determined by the addition of property tax rates plus 2.3 times the sales tax rate, with the sum expressed in mil equivalents. Ability to pay is determined by averaging the PCPV and PCI ratios. The formula would appear as LE X P, where LE equals the local effort and 'P' is the population. LE is equal to T X R, where T is equal to the local tax burden and 'R' is the average of the PCI and PCPV ratios.[1] To discourage increased local taxes for the purpose of receiving more revenue sharing dollars, a ceiling should be placed on the LE factor. Our present model places that ceiling at 25.

1 The entire equation would be:

Entitlement =

$$[\text{Population X } ((\text{PT} + 2.3\text{ST}) \text{ X } (\frac{\text{St PCI/Loc PCI} + \text{St PCPV/Loc PCPV}}{2}))]$$

+

Non per-capita entitlement;

Where PT = property tax, ST = sales tax, PCI = per capita income, and PCPV = per capita property value.

Non-Per Capita Distribution

The second part of the allocation involves the same methods utilized by present law for items not conditioned on a per capita basis. This would include road maintenance (allocated on a per mile of road maintained basis), hospitals (allocated on a per bed or per facility basis), health facilities (allocated on a per facility basis) and military support. Military payments are in fact made on a per capita basis, but utilize a different formula than applied to civilian populations. Since there is no local taxation of military personnel, there is no basis upon which to allocate monies for support of military facilities. We suggest maintaining this portion of present law along with the items not claimed on a per capita basis. Four local governments claim revenue sharing dollars based on services supplied to military installations.

The non-per capita allocation is modified by the 'COLA' factor as provided for in present law. Our computer model does not modify the revenues apportioned on a per capita basis (contrary to present law). There are arguments that can be made for applying or not applying the COLA factor. We have chosen to apply it to the non-per capita portion of the allocation formula, since that portion tends to represent costs related to construction and maintenance more so than do the factors in the per capita portion. There is no black and white distinction, however, and the model can be easily run with or without the COLA applied to either or both portions of the formula.

As with present law, after the local entitlements have been determined for all governments involved, the payments are prorated to allocate the total appropriation to the aid to local governments program. The administration has proposed a funding level slightly in excess of $20 million for the program in the FY 79 budget. Our present model is set to pay out $25 million.

Any scheme which distributes revenue sharing monies on a basis different than presently used will result in some communities getting less and others getting more than under the present method. Hence, it would seem that any major revision in the revenue sharing program would require an increase in the appropriation so as to hold harmless nearly all local governments. (Of those communities which collect taxes, three would receive less under this proposal. King Cove would have received less in 1977 because their local non-school taxation was near zero. The North Slope Borough and Valdez would receive less because of extremely high oil and gas property values. We are attaching a graph which demonstrates the divergence of these two local governments from the state average per capita property value, and which concomitantly demonstrates their local ability to generate revenue.)

ADDITIONAL COMMENTS

Twenty-eight communities (of the approximately 170 local governments) either do not levy or have not reported sales or property taxes and as a result receive no money under the per capita portion of the proposal.

It would seem unnecessarily harsh to diminish their state assistance without first giving these communities time to consider their taxation policy. A number of means could be used to accomplish this. For example, they could be held harmless for one year, and thus receive an amount no less than they received in FY 1978.

Other factors which would cause inequities in the formula relate to various exemptions allowed under state law. Any exemption provided for in some but not all local governments will change the effective tax rate by a factor proportionate to whatever tax would otherwise apply to the exempted material. As examples, some communities have exempted food and drugs from local sales taxes. To use the stated sales tax rate for that local government without correcting the rate for the revenues foregone by the exemption would allow that local government to utilize a higher tax base for revenue sharing purposes than actually imposed upon the citizenry. With some check of previous tax records and a degree of estimation, corrections could be made to the tax rate to reflect the tax burden foregone by the exemption. Similar cases occur with an optional $10,000 residential property tax exemption (AS 29.53.025(a)), household furniture exemptions to $500 (AS 29.53.025(b)(1)), and other exemptions as allowed in AS 29.53.025(c),(d), and (f).

Mandatory municipal tax exemptions, such as agricultural lands, and senior citizen housing, do not affect the equitability of the formula since the state reimburses to the affected municipality the revenues foregone by the exemption.

A somewhat more complicated exemption is applied to commercial fishing vessels (AS 29.53.125(b)(1)). Local governments may tax commercial fishing vessels, but at a rate not to exceed $5 for any vessel under 5 net tons or $15 per vessel for vessels larger than 5 net tons. This 'partial' exemption would significantly inflate the true property tax burden for communities such as Kodiak, where the major commercial investment in the city is fishing boats, with many of the newer shrimp and crab vessels having market values well in excess of $1 million. This particular exemption would appear to be the result of a legislative subsidy to the Alaska commercial fishing industry. We bring it to your attention, but have no comments on how you may want to address the matter, if at all.

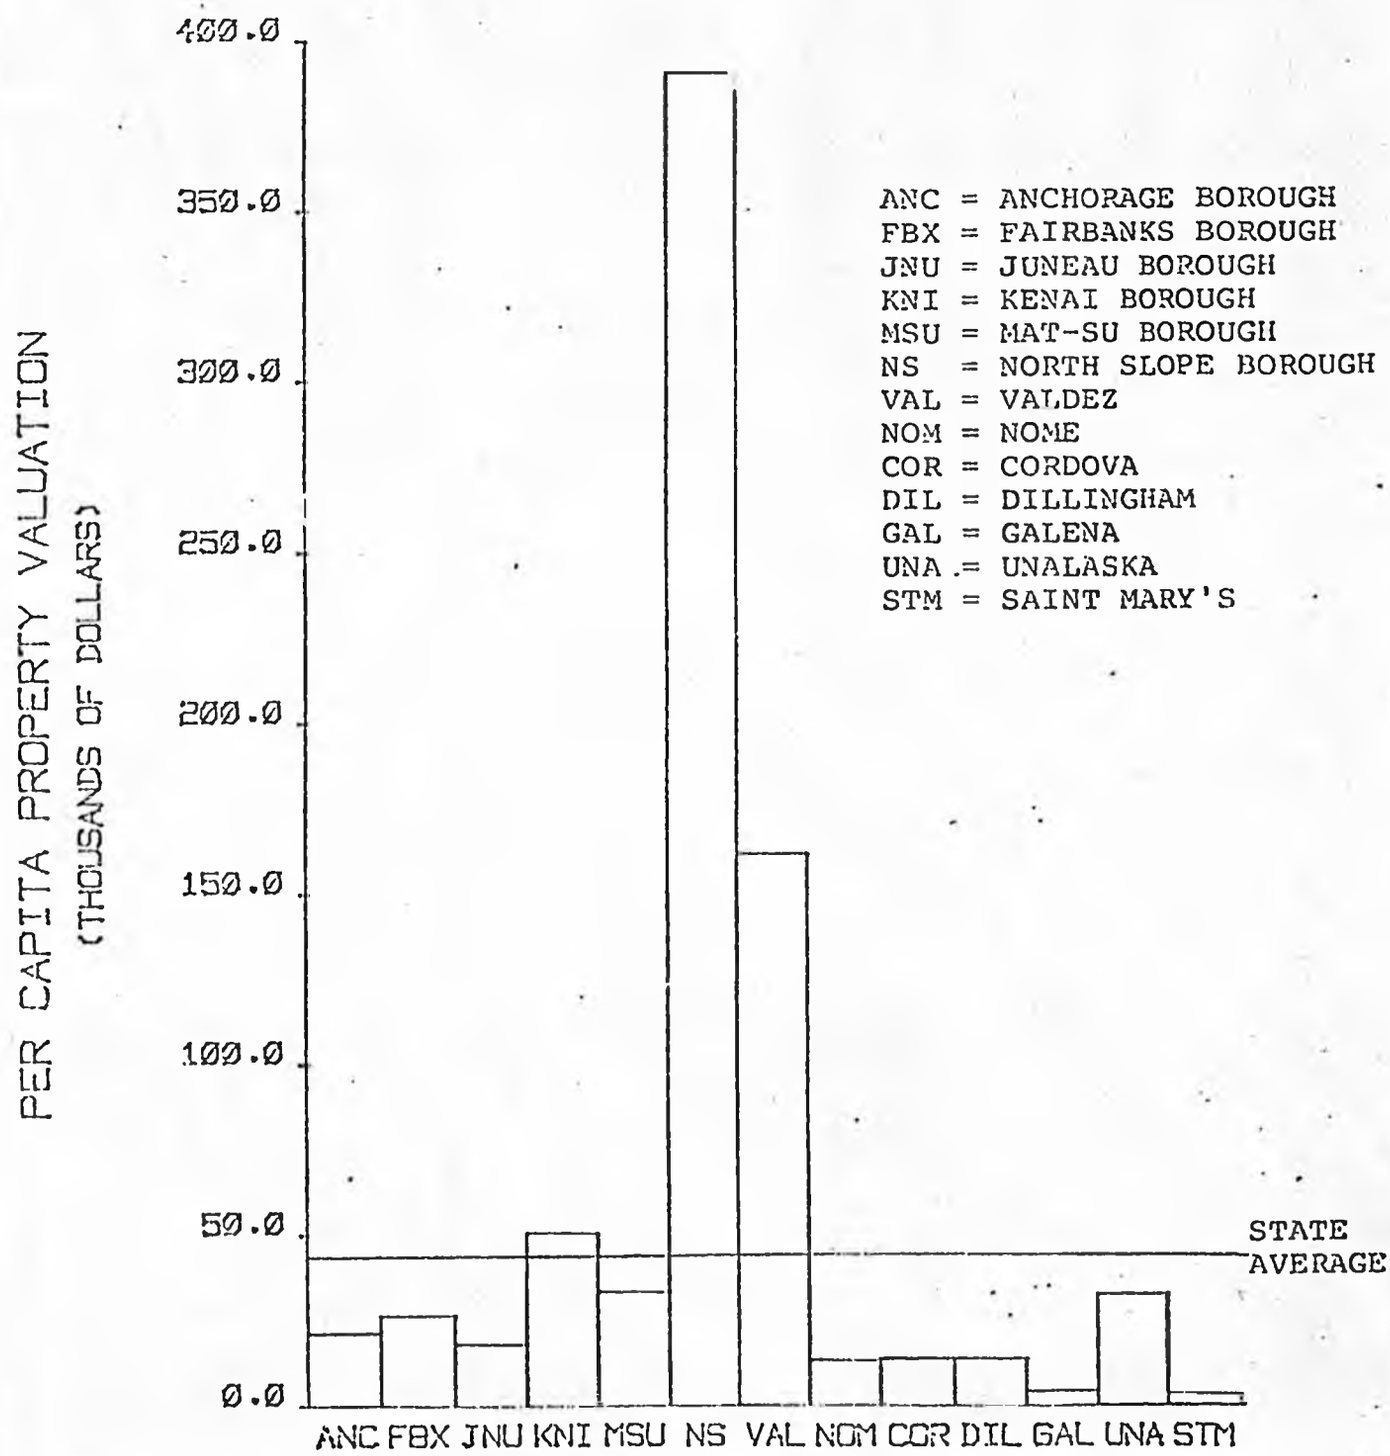
ATTACHMENTS

We are submitting two computer printouts, the first showing the data base we used for our analysis, and the second demonstrating how the revenues would be distributed by the proposed formula. The present data base utilizes 1976 data. The significant difference between the present 1976 data base and a 1977 data base which we intend to complete shortly is the additional valuation of the trans-Alaska pipeline which results in a sizeable increase in the total property in the state. Presently, the pipeline is equal to just under half of the total property value in the state. To demonstrate the local effects of the incremental value of the pipeline when comparing 1976 to 1977 data, the 1976 PCPV for Valdez and the North Slope Borough were $66,000 and $142,000 respectively; whereas their 1977 PCPV were $162,000 and $390,000. The state-wide average PCPV was $29,700 in 1976 and $42,900 in 1977.

We are also attaching a computer graphic demonstrating the distribution of "wealth" as estimated by per capita property value using 1977 data.

PER CAPITA PROPERTY VALUATION
1977



prepared by
Legislative Affairs
Agency
see attached memorandum

Notes to printout 1 submitted with memo of February 8, 1978.

(1) *LOCAL GOV'T:* Local governments are presented with boroughs and communities therein listed first. The breakdown of each borough is consistent with their revenue sharing application ("SA" means service area).

(2) *PER CAP. EXIST.:* The column lists the total entitlements distributed on a per capita basis (police, fire, parks and rec., air and water pollution, land use planning, transportation, and health services).

(3) *HEALTH & ROADS:* The column lists entitlements distributed on a non-per capita basis. This includes road maintenance (distributed on a mile basis), health facilities, hospitals, and construction aid (distributed on a per facility basis, i.e., hospitals). For boroughs which submitted their applications according to service areas, we have lumped the non-per capita entitlements in the first listed service area.

(4) *MILITARY:* Those local governments which supply services related to the support of military installations receive entitlements according to the services supplied and the military population. As with the health and roads category, the military entitlements are lumped into the first service area listed if a local government has multiple listings.

(5) *TOTAL ENTITLEMENT:* The column totals the three prior columns and represents the total entitlement each community is qualified to receive. The cost of living allowance factor (column 8) is factored into the three columns which break down the total entitlement. The actual monies received by a local government will be less than that listed, since the entitlements are pro-rated according to the money appropriated to the local government assistance program.

(6) *POP.:* The column lists the population base accepted by C.R.A. for the purpose of determining revenue sharing entitlements.

(7) *PER CAP. PROP. VALUE:* The column lists the "full and true" per capita property value as determined by the state assessor. For those local governments where no property assessment has been made, we have estimated *(EST.)* the per capita property value by looking to similar communities where assessments have been made. About 13% of the state population lives in those communities where a property value assessment has not been made. Two Anchorage Borough service areas have been designated as "estimated" because of inconsistencies between the state assessor's report of "full and true" property values for some service areas and the population for those service areas as reported by the Anchorage Borough. The per capita property value figures listed for these two service areas are more than likely inaccurate, but we are not capable of correcting the data without further clarification from the Department.

(8) *COLA:* The column lists the cost of living allowance multiplier used by the C.R.A. in determining entitlements.

(9) *PROPERTY TAX:* The column lists the property tax assessment for each service area or local government, less the levies designated for schools. If a levy was not specifically dedicated by a local government to schools, we obtained income and expenditure figures from the local government audits and calculated an apportionment to schools, which was then deducted from the local government property tax base.

(10) *SALES TAX:* As with property tax, the column lists the sales tax rate for each local government or service area, unless the tax was dedicated to schools. When a school dedication was not declared, we obtained information from the local government audits and diminished the sales tax base according to the portion of sales tax receipts appropriated to schools.

(11) *1974 PCI:* This column lists the Bureau of Census per capita income figures for 1974.

COMPARISON OF REVENUE SHARING OPTIONS

ESTIMATED PAYOUTS IN 1977

MUNICIPAL TAX PROJECTION TO 1979 WITH PAYOUT AT $27 MILLION

THIS ANALYSIS ASSUMES THAT SSHB843 BECOMES LAW IN 1978
PRORATION FACTOR IN 1979 IS 3.59984349175

PREPARED BY
LEGISLATIVE AFFAIRS AGENCY
RESEARCH DIVISION
APRIL 14, 1978

(1) BOROUGHS AND FIRST CLASS CITIES ADJUST TAX POLICY TO MAINTAIN CONSTANT 1978 DOLLARS
(OPERATING BUDGET = REVENUES FROM PROPERTY AND SALES TAX + REVENUE SHARING ENTITLEMENT
(2) POPULATION AND SERVICES HELD CONSTANT, INFLATION EFFECTS BALANCE FOR COSTS AND TAX REVENUES
(3) TAX REDUCTIONS APPLIED TO 'MIL EQUIVALENT' TAXING RATE
(4) 1978 REVENUE SHARING ENTITLEMENTS CREDITED TO AREA WIDE USE WHERE CITIES OR BOROUGHS HAVE MULTITPLE LISTINGS
(5) ROADS, HEALTH-RELATED, AND MILITARY ENTITLEMENTS IN 1979 ARE CREDITED TO AREA-WIDE USE
(6) HOLD HARMLESS CLAUSE OF SSHB843 (SECTION 10) NOT APPLIED IN THIS ANALYSIS
(7) SECOND CLASS CITIES (AND SAINT MARY'S) ARE NOT ANTICIPATED TO REDUCE TAXES IN RESPONSE TO ADDITIONAL REVENUES (NA)

( ) INDICATE NEGATIVE NUMBERS

204 N. FRANKLIN ST.
JUNEAU, ALASKA 99801

April 26, 1978

Representative Lisa Rudd, Chair
House Community and Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Representative Rudd:

On Wednesday, April 19, the Board of Directors of the Alaska Municipal League voted unanimously, by telephone, in support of the concept embodied in HB 843. However, there was no support for its passage this year.

It was felt there were too many variables which would require further study by the municipalities to determine the long term effect. It would be our hope that the time between now and the next session will provide us ample opportunity to get behind a bill like HB 843.

On this same subject, I am attaching a copy of a notice sent to all our members after conversations with Annette Smith.

Thank you for this opportunity to comment.

Regards,

Jim Rolle
Executive Director

BULLETIN # 78-31

TO: ALL MUNICIPAL MEMBERS

RE: HB 843

Representative Lisa Rudd, Chairman of the House CRA Committee will be holding a workshop on HB 843, Monday, May 8, at 9:00 am in the Governor's Conference Room.

The purpose of the workshop will be to open discussion on the bill so that more understanding can be had in addition to the pros and cons.

Everyone is welcome. If you have any questions, please feel free to call.

Jim Rolle
Executive Director

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

DIVISION OF LOCAL GOVERNMENT ASSISTANCE / POUCH B – JUNEAU 99811

April 5, 1978

The Honorable Lisa Rudd, Chair
House Community and Regional
Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Representative Rudd:

Re: HB 843

You have asked for our opinion concerning the ways in which a Municipality may unduly benefit from the proposed revenue sharing bill (HB 843). The Department analysis of the bill (contained in the 14 March 1978 letter to you) explains very briefly some of the problem areas of the bill. In addition to that letter, Local Government Specialist Bruce Aronson of the Department offers the following comments concerning the ways in which municipalities may manipulate the proposed statute to their own best interest.

1. Enterprise activities (utilities, small boat harbors, etc.) should not be included in the formula. In other words, any sales and/or property taxes levied to support enterprise activities should be excluded from the tax rates. If this is not done, the tax rates might be unfairly inflated, and utility fees would be reduced. The State of Alaska would, in effect, support an activity that should be self-supporting.

2. Since the categories of roads, ice roads, and health services and facilities are retained in the legislation, it hardly seems appropriate to include any locally generated taxes, used to fund these services, under Ch. 88 of the bill. A gross example of this type of situation would be a single purpose service area created for road maintenance being eligible under Ch. 88 of the bill for the basic local tax effort formula funds, and also receiving $1,500 per mile for roads maintained. This dual eligibility would seem to be necessary.

3. A simple and rational approach to establish assessed valuations per capita for second class cities in the unorganized borough would

benefit by a low assessed value per capita number. Our earlier suggestion of averaging the per capita assessed value of municipalities of population less than 750 located in the unorganized borough is still one available alternative.

4. HB 843 arbitrarily multiplies the sales tax rate times 2.3 and adds in the property tax rate (in mills). It would be to any municipality's advantage to analyze the "rate of return" to the municipality under its current tax rates. By altering the sales and property tax rates (and assuming total local revenue is constant) a municipality may be able to gain slightly. A "cure-all" to this problem would be to add all locally collected taxes and divide by the revenue generated from one mill property tax. This new number would be the "millage equivalent". By doing the above, a municipality would not tinker with local tax rates to gain some additional State shared wealth.

5. If a municipality has no local retail stores, and/or property that could be taxed (utilizing a property tax) it would be to the municipality's advantage to "raise" local "taxes" until the maximum local effort factor has reached (25). One estimate by Legislative Affairs indicates that in a small rural city, the local effort factor is reached when a 1½% sales tax is levied. No additional benefit occurs when the number 25 is reached.

Sincerely,

Lee McAnerney
Commissioner

Terry - We have received a number of requests for time in Juneau about the interim committee. Any suggestions? Pls. return letter
Lisa

Representative Lisa Rudd
Chairperson, House Community
& Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Representative Rudd:

The purpose of this letter is to inform your Committee that the Municipal Administration has reviewed HB 843 and would object to further action on this legislation until all affected local governments have been able to thoroughly assess the strengths and weaknesses of the proposed new revenue sharing formula.

The assumption behind HB 843 as the bill is presently drafted appears to be that some municipalities are not receiving a fair share of revenue sharing funds, and, conversely, that other local governments are receiving a disproportionate amount of available dollars to which they are not equitably entitled. Although the first portion of this assumption may be correct, the Anchorage Administration objects strongly to the implication that the Municipality is receiving more under the present revenue sharing program than it should equitably receive. Our calculations indicate that, at present, Anchorage receives approximately 46% of state revenue sharing funds. With approximately 50% of the state's population, the present program is, if anything, slightly inequitable on a per capita basis for Anchorage taxpayers. Under the proposal advanced in HB 843, the percentage of revenue sharing funds for Anchorage would decline to only 40%. Although there may be merit in providing increased assistance to municipalities with a relatively small tax base resource, it seems difficult to justify taking funds from Anchorage that will, in essence, need to be replaced by Anchorage taxpayers. The Committee is, of course, well aware that the existing revenue sharing program has been under funded in recent years. If a need is felt to provide increased assistance to some municipalities, a strong statement from the Legislature calling for 100% funding of the present program would be an appropriate beginning.

Another possible problem with the proposed formula contained in HB 843 is that it would tie a municipality's position in the revenue sharing pool to statewide variables such as statewide assessed value that are largely beyond its control. For example, a major resource development project that might alter variables such as statewide per capita income and assessed value could affect the revenue sharing entitlements of local governments without regard to changes in need for those municipalities. Under HB 843, it is difficult for a municipality to project what its revenue sharing entitlement might be two or three years in the future.

Although Anchorage does not oppose the concept of a new approach to revenue sharing, the formula proposed in HB 843 would so radically depart from the present system and would have such major impacts on local governments, that it should not be adopted without thorough review and input from both small and large municipalities. For example, Anchorage would like to be presented with a series of printouts similar to those accompanying HB 843 showing the relative position of the Municipality under a variety of realistic assumptions about future statewide assessed value and per capita income. Perhaps a study committee consisting of legislators, representatives from the state administration and local governments could study the proposal prior to the commencement of the next Legislature and could respond with recommendations for a new approach to revenue sharing that would be equitable for all parties concerned.

I appreciate the opportunity to comment on this legislation. If the Committee has any questions concerning the above, please contact me at 264-4237.

TDB:gml

Municipality of Anchorage

MEMORANDUM

DATE: March 9, 1978

TO: Ted Berns, Municipal Attorney

FROM: Larry D. Crawford, Director, OMB LDC for LC.

SUBJECT: House Bill NO. 843

The following comments are offered regarding House Bill No. 843 providing for "equalization of the tax resources of municipalities and continuing a portion of the program of state aid for municipal purposes." Comments from the Finance Department have been incorporated in this memorandum.

GENERAL

Under HB 843, Sections 43.18.010-43.18.050 of the present statutes are repealed. These sections provide the authority for current state-shared revenues. In lieu of this, new Chapters 88 and 89 have been added to Section 29 of the statutes. Chapter 88 deals with a new source of revenue called an "Equalization Entitlement." Chapter 89 provides for the continuation of a portion of the state-shared revenues formerly authorized in Section 43. Exhibit A is a copy of HB No. 843; Exhibit B is a copy of the present statutes authorizing state-shared revenues.

Exhibit C is an analysis of HB 843 prepared by the State Legislative Affairs Agency and contains an attachment (Exhibit D) demonstrating the comparative revenue distribution under current law and HB 843.

A review of HB 843 reveals it to be ambiguous in certain cases as well as presenting redistribution of income approach to state revenue sharing. On the basis of the information made available to us, it appears to be detrimental to the Municipality of Anchorage.

AMBIGUITIES

Many of the ambiguities in HB 843 have been clarified by the analysis contained in Exhibit C. However, some problems remain.

1. Two sections (Sec 29.88.055 & 29.73.060) refer to "fiscal year" without indicating whose fiscal year - - the state or local. Complex calculations will be required because of the different fiscal year periods regardless of which year is implied.

2. Section 29.88.030 would lead one to believe that two series of computations would have to be made for the Municipality of Anchorage - - - one for service areas and another for taxing districts. However, the computations in Exhibit D are based on taxing districts.

3. Exhibit C (page 6) states that in the equalization entitlement, the property tax mill rates and sales tax per cent rates are to be converted to mill equivalents. Where is this so stated in the bill? By converting both factors to mill equivalents, a disproportionate emphasis is placed on the sales tax.

4. In order to determine the equalization entitlement in Exhibit D, the products of the formula in HB 843 have been multiplied by a factor of 2.983535316 - - - what

authorizes such a factor? Without the factor, the equalization entitlement per the formula would have been only $6.1 million. With the factor it becomes $18.3 million.

APPROACH TO STATE REVENUE SHARING

HB 843 presents a redistribution of income approach to the concept of state-shared revenues. The title of the new item of revenue - - - "Equalization Entitlement" - - - provides an insight in itself. The stated purpose of the bill is "to assure that no municipality suffers impoverishment of necessary public services, relative to other municipalities, because of the chance location of taxable wealth in the state." (Sec 29.88.005). One of the criticisms of the present law stated in Exhibit C (page 3) is that it does not include "ability to pay" considerations. A community with a larger than the state average per capita property valuation receives revenues at the same rate as communities which are relatively poor. It is further stated that the same criticisms can be raised with respect to per capita income differentials from which taxes are paid. The net effect of the formula is to favor economically disadvantaged communities.

EFFECTS ON THE MUNICIPALITY OF ANCHORAGE

1. A municipality will be better off if it is high or low in the various components of the equalization entitlement formula as follows:

Population	High
General Govt. Property Tax Mill Rate	High
Sales Tax % Rate	High
Local Per Capita Income*	Low
Local Per Capita Property Value*	Low

* Compared to state averages

At this point, it may be interesting to compare these state components with the following used in determining federal revenue sharing entitlements and whether a governmental jurisdiction is better off if it is high or low:

Population	High
Tax Effort	High
Relative Income	Low

Both the federal and state components follow the same pattern.

2. Anchorage has both a higher than average per capita income and per capita property value. This is confirmed by Exhibit D which shows Anchorage to have unfavorable income and property value factors in the computation formula compared with most other jurisdictions within the state.

3. The most discriminatory portion of the formula, however, is the sales tax element. Sales taxes receive disproportionate weight in the formula (e.g., a 4% sales tax carries the same weight as a 9.20 mill rate). Using the computations for Anchorage in Exhibit D, Anchorage would be entitled to the following additional revenues under the equalization entitlement at the various indicated sales tax rates:

Sales Tax	Additional Entitlement
2%	$3.3 million
3%	$5.0 million
4%	$6.6 million
5%	$8.3 million

In effect, HB 843 is detrimental to Anchorage for its lack of a sales tax. Although Anchorage does have a 5% hotel and motel tax, no provision for such a selective tax is made in the bill.

4. HB 843 would greatly reduce the degree of local automony. In addition to the effects of the lack of a sales tax, communities would be faced with a new restriction as to use of the state revenues. Under current state statutes (see Exhibit B - Sec. 43.18.010 (f)), state-shared revenues may be expended for any public purpose for which the local government has power to expend public funds, except for a few limitations regarding health facilities revenues. Sec. 29.88.030 of HB 843 contains additional requirements regarding the use of funds for specific service areas and tax zones. Although the new provisions are fairly consistent with the way Anchorage has been allocating past state-shared revenues, we would no longer have the flexibility to do otherwise if the circumstances so warrant.

5. In a rapidly growing area such as Anchorage, the local per capita income and property value would increase at a greater rate than the state average thereby creating an adverse effect in the equalization formula.

6. Total state-shared revenues to Anchorage under the new bill shown on the front page of Exhibit D are $9.2 million compared to $8.4 million using the present law. From that, it would appear that the bill is advantageous to us. However, if you look at the last page of Exhibit D, you will find that these amounts are based on total funding of $25 million for the new bill versus $18.3 million under the present law. Will the state appropriation really increase by nearly $7 million if HB 843 is passed? Since there is nothing to indicate such an increase, if only the current level of $18.3 million is available for distribution, Anchorage's share would be only approximately $6.7 million - - - that's $1.7 million less than under the present law. No matter which figure you use as the base, under HB 843 Anchorage's share of state-shared revenues will diminish from 46% of the state total to only 37%.

OTHER CONSIDERATIONS

The impact of the D-2 lands issue is uncertain at this time - - how will the state-selected lands ultimately affect the state per-capita property value? Major concerns relate to the complex calculations and the Municipality's ability to generate the base data required during the budget process. The problems we have now in getting estimated assessed valuations, population, road mileage and hospital bed and facility figures give us an indication of the problems that would be faced.

City of Fort Yukon

RE: HB 843 City of Ft Yukon revenue sharing increase

In the fiscal year ending June 30th 1977, the City of Ft. Yukon received $56,183.00 in state revenue sharing funds. In addition, sales taxes at the 3 percent maximum allowed brought in an additional $50,148.00 Other sources of revenue (federal revenue sharing, license and permits, fines, state program reimbursement and miscellaneous revenues) brought in an additional $80,688.00 income. However, during that same period expenses for each city department were administration, $139,810.00, the Police Department, $38,170.00, Fire Protection, $2,450.00, Streets and Roads, $40,621.00, Water and Sanitation, $5,978.00, Recreation, $12,904.00, Community TV, $22,141.00, this totals $262,074.00, in expenses against $187,019.00.

In revenue the city was able to partially balance the books by running the only liquor store in town and the net income from that enterprise actively, after all expenses were accrued, was about $34,419.00 In the current fiscal year for 9 months ending March 31, the city has received city sales tax at 3 percent of $30,654.00 and state revenue sharing of $26,877.00, with an additional amount still to be received. Federal revenue sharing has totaled $16,306.00 and other income of $9,942.00 for total revenues of $83,779.00 Received to date however the expenses by Department for the same period are administration, $99,187.00, Police, $27,144.00, Fire protection, $2,333.000, Planning and Zoning, $3,000.00, Parks and Recreation, $7,115.00, Public Works $6,080.00, Sanitation $1,001., Community TV $29,280.00. This totals $175,140.00 in expenses for a net loss of $91,361.00. Only by adding the net earnings for the city liquor store, $103,682.00, for the year, has the city been able to make up some of the deposit for both this year and last. The city is limited by the amount of sales tax it can collect under the 3 percent ceiling. These revenues are also limited by the amount of goods and services that are avialable in the city as well as the disposable income of the revenue. Ft. Yukon is not on the connected road system of the state and tourism is not a large source of income in the community. Many of the residents do much of their retail purchasing in Fairbanks and the city

looses out on the sales tax from those purchases. Ft. Yukon is a hub of transportation and a limited commerce area for the residents of the Yukon Flats,which is the only incorporated city in the region and, although for state revenue sharing purposes, ts population is listed as 637 people, in actuality it may support many more people on a seasonal basis . The state entitlement of $10.00 per resident for police protection provides the city with less than 1/2 of the salary of the Chief of Police even using all of the federal revenue sharing for police protection. The police department must still be supported by other areas of income. This is one area where the city could use additional support. Other notes on expenditures, water and sewer serve of $60.00 per month per customer was rejected by most of the residents of the city. This service could bring in additional income if provided by the city. Cost of road maintenance for FY 77, $40,621.00, Revenue sharing received FY 77 (for that purpose) $30,856.00.

IN REFERENCE TO HB843 CITY OF FT YUKON REVENUE SHARING INCREASED TESTIMONY

IN THE FISCAL YEAR ENDING JUNE 30TH 1977, THE CITY OF FT YUKON RECEIVED DLRS56,183. IN STATE REVENUE SHARING FUNDS. IN ADDITION SALES TAXES AT THE 3 PERCENT MAXIMUM ALLOWED BROUGHT IN AN ADDITIONAL DLRS50,148.00. OTHER SOURCES OF REVENUE (FEDERAL REVENUE SHARING, LINCENSE AND PERMITS, FINES, STATE PROGRAM REIMBURSEMENT AND MISCELLANEOUS REVENUES) BROUGHT IN AN ADDITIONAL DLRS80,688. INCOME. HOWEVER, DURING THAT SAME PERIOD EXPENSES FOR EACH CITY DEPARTMENT WERE ADMINISTRATION, DLRS139,810., THE POLICE DEPARTMENT DLRS38,170., FIRE PROTECTION DLRS2,450., STREETS AND ROADS DLRS40,621., WATER AND SANITATION DLRS5,978., RECREATION DLRS12,904., COMMUNITY TV DLRS22,141., THIS TOTALS DLRS262,074., IN EXPENSES AGAINST DLRS187,019. IN REVENUE THE CITY WAS ABLE TO PARTIALLY BALANCE THE BOOKS BY RUNNING THE ONLY LIQUOR STORE IN TOWN AND THE NET INCOME FROM THAT ENTERPRISE ACTIVELY, AFTER ALL EXPENSES WERE ACCRUED WAS ABOUT DLRS34,419. THE CURRENT FISCAL YEAR FOR 9 MONTHS ENDING MARCH 31 THE CITY HAS RECEIVED CITY SALES TAX AT 3 PERCENT OF DLRS30,654. AND STATE REVENUE SHARING OF DLRS26,877. WITH AN ADDITIONAL AMOUNT STILL TO BE RECEIVED. FEDERAL REVENUE

SHARING HAS TOTALED DLRS16,306. AND OTHER INCOME OF DLRS9,942. FOR TOTAL REVENUES OF DLRS83,779. RECEIVED TO DATE HOWEVER THE EXPENSES BY DEPARTMENT FOR THE SAME PERIOD ARE ADMINISTRATION, DLRS99,187.; POLICE, DLRS27,144.; FIRE PROECTION, DLRS2,333.; PLANNING AND ZONING , DLRS3,000.; PARKS AND RECREATION, DLRS7,115., PUBLIC WORKS DLRS6,080.; SANITATION DLRS1,001.; COMMUNITY TV DLRS29,280.; THIS TOTALS DLRS175,140. IN EXPENSES FOR A NET LOSS OF DLRS91,361. ONLY BY ADDING THE NET EARNINGS FOR THE CITY LIQUOR STORE DLRS103,682. FOR THE YEAR, HAS THE CITY BEEN ABLE TO MAKE UP SOME OF THE DEPOSIT FOR BOTH THIS YEAR AND LAST. THE CITY IS LIMITED BY THE AMOUNT OF SALES TAX IT CAN COLLECT UNDER THE 3 PERCENT CEILING THESE REVENUES ARE ALSO LIMITED BY THE AMOUNT OF GOODS AND SERVICES THAT ARE AVAILABLE IN THE CITY AS WELL AS THE DISPOSABLE INCOME OF THE REVENUE. FT YUKON IS NOT ON THE CONNECTED ROAD SYSTEM OF THE STATE AND TOURISM IS NOT A LARGE SOURCE OF INCOME IN THE COMMUNITY. MANY OF THE RESIDENTS DO MUCH OF THEIR RETAIL PURCHASING IN FAIRBANKS AND THE CITY LOOSES OUT ON THE SALES TAX FROM THOSE PURCHASES. FT YUKON IS A HUB OF TRANSPORTATION AND LIMITED COMMERCE FOR THE RESIDENTS OF THE YUKON FLATS WHICH IS THE ONLY INCORPORATED CITY IN THE REGION AND ALTHOUGH FOR STATE REVENUE SHARING PURPOSES ITS POPULATION IS LISTED AS 637 PEOPLE IN ACTUALLITY IT MAY SUPPORT MANY MORE PEOPLE ON A SEASONAL BASIS THE STATE ENTITLEMENT OF DLRS10 PER RESIDENT FOR POLICE PROTECTION PROVIDES THE CITY WITH LESS THAN 1/2 OF THE SALARY OF THE CHIEF OF POLICE EVEN USING ALL OF THE FEDERAL REVENUE SHARING FOR POLICY PROTECTION THE POLICE DEPARTMENT MUST STILL BE SUPPORTED BY OTHER AREAS OF INCOME. THIS IS ONE AREA WHERE THE CITY COULD USE ADDITIONAL SUPPORT OTHER NOTES ON EXPENDITURES WATER AND SEWER SERVE OF DLRS60 PER MONTH PER CUSTOMER WAS REJECTED BY MOST OF THE RESIDENTS OF THE CITY. THIS SERVICE COULD BRING IN ADDITIONAL INCOME IF PROVIDED BY THE CITY. COST OF ROAD MAINTENANCE FY77 DLRS40,621. REVENUE SHARING RECEIVED FY77 (FOR THAT PURPOSE) DLRS30,856

Anchorage, AK 99507

Dear Representative Rudd:

Fairbanks Memorial Hospital is very interested in House Bill 843 dealing with revenue sharing and hospital construction money. We were wondering whether you had any ideas as to whether this bill has potential for passage during this session.

We do have some comments in regards to this bill if it will be presented in your committee. I might state that Sally Smith, from Fairbanks, has also been apprised of these comments and suggested that we contact your office to determine whether the bill would be acted upon. We encourage you to bring this issue to your committee since there are several sections of the bill which we feel need clarification and restatement, and we feel that since the bill is in the workings, that the current bill should be amended to include our ideas of concern.

Hoping to hear from you.

Sincerely,

Tom Mingen cd

March 29, 1978

Representative Lisa Rudd
Chairperson House Community and Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Representative Rudd:

At the regular City Council Meeting of March 27, 1978, Council passed and approved Resolution No. 231, endorsing House Bill No. 843, "AN ACT PROVIDING FOR EQUALIZATION OF TAX RESOURCES OF MUNICIPALITIES AND CONTINUING A PORTION OF THE PROGRAM OF STATE AND FOR MUNICIPAL PURPOSES; AND PROVIDING FOR AN EFFECTIVE DATE."

Although the present systems for distributing State Revenue Sharing funds does assist municipalities in providing services there exists an incentive in the revenue sharing program for municipalities to increase or improve the service by increasing local taxes. Under the provision of House Bill No. 843, however, this would all change the proposed formula allocation system, increase the amount of revenue sharing if the Community increases its sales tax or property tax.

If your office should have any questions in regard to Bethels position on the piece of legislation do not hisitate to contact me.

Sincerely,

Lyman Hoffman

Lyman Hoffman

"Deep Sea Port and Transportation Center of the Kuskokwim"

CITY OF BETHEL
RESOLUTION NO. 231

A RESOLUTION OF THE CITY OF BETHEL, ALASKA ENDORSING "AN ACT PROVIDING FOR EQUALIZATION OF TAX RESOURCES OF MUNICIPALITIES AND CONTINUING A PORTION OF THE PROGRAM OF STATE AID FOR MUNICIPAL PURPOSES; AND PROVIDING FOR AN EFFECTIVE DATE." IN THE FORM OF HOUSE BILL NO. 843.

WHEREAS, House Bill No. 843, would not distribute State Revenue Sharing strictly on a per capita basis with the remaining 25% allocated according to miles of road maintained and number of health facilities and hospitls, but would improve the allocation system and revenue raising for the benefit of home rule and general law municipalities by providing a more equitable allocation of financial resources among municipalities, and to assure no municipality would suffer impoverishment of necessary public services because of chance location of taxable wealth in the State, and

WHEREAS, this bill would accomplish this by implementing an equalization formula that would base entitlement due each municipality on its population, relative to general revenue and local tax efforts, and

WHEREAS, Bethel City Council believes that the passage of this bill would distribute State Revenue Sharing dollars on a much more equitable basis than the system presently utilized.

NOW THEREFORE, be it resolved that the City of Bethel, Alaska endorses House Bill No. 843, "AN ACT PROVIDING FOR EQUALIZATION OF THE TAX RESOURCES OF MUNICIPLITIES AND CONTIUING A PORTION OF THE PROGRAM OF STATE AID FOR MUNICIPAL PURPOSES; AND PROVIDING FOR A EFFECTIVE DATE.", and would support simular legislation if introduced in the Senate, and

BE IT FURTHER RESOLVED that the City of Bethel encourages the State Legislature to pass and approve this legislation.

PASSED AND APPROVED by the Bethel City Council this 21 day of March, 1978.

APPROVED:

JOHN P. GUINN, MAYOR

ATTEST:

LAURA FRANKE, CITY CLERK

House Bill 843

Members: Rudd, Kelly, Phillips, Loveseth, Snider, Anderson

Visitors & Resource Persons: Commissioner McAnerney, Palmer McCarter, Rep. Mike Miller, Jim Rolle, Marilyn Miller, John Williams, Rep. Gardiner.

Testifiers: Leo Rassmussen, Mayor of Nome; Judy Slajer, Ketchikan Borough Manager; James Veazey, Senior Citizen Ombudsman, Ketchikan; David Jensen, Sand Point and King Cove; Wes Howe, Mat-Su Borough Manager; David Rose, Assemblyman, Anchorage; Tom Mingen, Administrator Fairbanks Memorial Hospital; Nancy Kraning, Assistant City Manager, Bethel.

Leo Rasmussen, Nome: Small communities are farther outside revenue sharing. It seems Nome would get $13,000 more under the old revenue sharing act. The original intent of the present revenue sharing act, to decrease taxation, is good, but it is not working.

Judith Slajer, Ketchikan: Ketchikan Borough believes they can support the concept, but more time is needed to analyse the bill.

James Veazey, Ketchikan Senior Citizens: Senior citizen group is opposed to revenue sharing dollars being allocated for the Ketchikan hospital. The hospital is run by a church organization, but is run as a profit making business. Profit goes to the church organization. The monies should be spent on construction of the hospital facility or better, on such things as badly needed road construction.

Dave Jensen, King Cove and Sand Point: Has some objection to the method of determining the entitlement. It is moving more and more toward the Federal Revenue Sharing Program. Takes particular exception to the per capita income being used in the formula. PCI has no bearing on the equalization of tax resources. Could have a high property value and low income, as in Sand Point. Also noted the COLA differential is not included in the formula computation, but is only inserted afterward. There should be some attempt at equalization of the purchasing power of the dollar in the various areas of the state. Suggested the per capita debt should be included in the formula, that is , the local tax burden.

Wes Howe, Mat-Su Borough: Mat-Su has no strong position at this time. Some observations, however, would include the formula proposed in HB 843 is very complicated which leads to problems with revenue projections as well as citizen understanding. Another problem is with new service areas. Some may not need to have a tax for the service, but without a tax, the proposed act would provide no revenue sharing. The proposed bill would give little incentive to start new municipal services whereas the present program does encourage new services. The bill does not take into account other forms of local effort such as fees and specific taxes. Finally, utilities may be subsidized by taxes in some municipalities currently, and this bill may encourage the continuation of such tax support.

Representative Gardiner: It is not the intent of this bill to encourage or to put pressure on municipalities to increase services. This would be considered a local decision.

Rudd: It would seem that the proposed bill would place a heavy bookkeeping responsibility on municipalities in that the revenue sharing would be allocated by service area. Is this so?

Howe: It is not so much a bookkeeping problem as it is trying to cope with the complicated formula.

Rudd: The present revenue sharing monies do not need to be spent in a particular service area. but the new bill would provide that those revenue sharing dollars allocated for a service area be spent in that area. Is this a problem?

Howe: The policy of the Mat-Su Borough has been and is consistent with the provision of the new bill.

Tom Mingen, Administrator, Fairbanks Memorial Hospital: Expressed concern over revenue sharing hospital construction moneys. A recent attorney general's opinion has stated that revenue sharing construction monies can be for new beds only. Fairbanks hospital's construction plans include not just the addition of beds, but also of additional services. They would like to count on revenue sharing dollars for the new services as well.

Dave Rose, Assemblyman: Stressed that his views are his own at this point, since Assembly has taken no official position. He noted that there is always a finite amount of money approriated for revenue sharing. Under the new bill, Anchorage's percent of the total is decreased. Therefore, their prorated share of the total is less if the appropriation does not fully fund the program. He also noted Anchorage's hotel sales tax should be included in the formula. He liked the simplicity of the present system, compared to the many variables which go into the new bill. Some of these variables may not be available some years, or delayed; e.g., property values are currently on a year delay basis. Finally, the proposed complicated formula may be a detriment to long range fiscal planning. He suggested the bill needs more study by all municipalities and should be held until next session.

Gardiner: He plans to have the C&RA Committee introduce an appropriation bill for $27 million to be passed this year. He will have a sponsor substitute bill to offer which will provide that the program will not go into effect unless it is funded to the tune of $27 million. The sponsor substitute will also include the sales tax millage equivalent computed by revenues.

Rose agreed the appropriation is essential.

Rudd: Has been thinking of the same points. She also believes that the state should stay with the revenue sharing program based on services. It is in the state's best interest to assure that local governments are providing necessary local services.

Rose: The present categorical approach has been a concern for several years, but no one has come up with anything better.

Nancy Kraning, Bethel: The proposed bill is supported by the Bethel City Council which has passed a resolution to that effect. A copy was sent to theC&RA Committee. She noted that a pay out of at least $25 million should be mandatory. She likes the fact that smaller communities getmore revenue sharing monies under this new bill.

Representative Anderson: Noted that the sponsor substitute will include a minimum amount allocated to every community. This was at his request. This will help those communities which currently only get a few thousand dollars in revenue sharing, hardly enough to do an audit.

Carrol Donnelson, Manpower, Bethel: She stated she was a bit confused about the equalization of resources philosophy of the proposed bill when she looked at the projected allocations for communities in her area, only 8 of them received more dollars than presently, some only the same amount.

Gardiner: The bill contains a hold harmless clause for three years so that no community will receive less than they are presently. However, it is the intent that communities without any taxation at all would not receive any revenue sharing monies. Anderson's idea of a minimum amount would assure everyone a share of the pot. This concept was contained in HB 70 and passed by the C&RA Committee so it will likely be accepted in the new sponsor substitute of HB 843. With this minimum even cities with no revenue sharing would get some.

Rudd: One of the main points of the bill is how much a municipality is willing to tax itself to provide services.

There being no further testimony or comments from the committee members, the meeting was adjourned at 6:00 p.m.

February 24, 1978

Report of the Local Government Committee
RurAlCap Citizen Participation Conference

The committee recognized the large number of House and Senate bills, either proposed or already introduced, addressing state, city, and borough needs. In addition, the committee recognized the limited time available to review and comment on these bills.

The committee, therefore, decided to study only those bills of extreme importance, that have the greatest impact on boroughs and cities. The committee, following the advise and suggestion of the assigned Technical Assistant, chose to consider, in detail, the following bills:

see below
- o HB843: "Providing for equalization of the tax resources of municipalities and continuing a portion of the program of state aid for municipal purposes".
- o SB502 Identical to HB843.

see below — o SB208 "Relating to municipal organization grants".

add non residents — o SSHB75 "Authorizing a borough or city tax on net income".

- o HB~~302~~ "Providing for assessment, levy, and collection of a tax on developed land in the unorganized borough".
- o HB~~309~~ "Exempting certain items from sales tax".
- o HB~~378~~ "Relating to the levy and collection of sales and use tax by municipalities".

The committee, after study and evaluation of the bills identified above, recommended the following:

1. HB843/SB502: The committee supports this bill in principle, with the stipulation that: (a) Section 29.88.010(b) be revised to indicate that the grant made available to a municipality be a minimum of $50,000 in those cases where the indicated formula grant is lower than $50,000, and (b) the last sentence of Section 29.89.010(a) ("No payment may be made...") be eliminated.

2. SB208: The committee supports this bill with the proposed Department of Community and Regional Affairs ammendments relative to dollar amounts available under Section 29.18.180(1) and (2) (please see the attached). Further, the committee feels that a section should be added to provide for pre-planning study grants of up to $50,000 for borough incorporation, and up to $25,000 for city incorporation; provided that: (1) the applicant submit a projected budget, (2) unexpended grant monies be returned to the State, and (3) identification of local governing bodies eligible for pre-planning grants occur.

3. SSHB75: The committee supports the concept of this bill with a stipulation that Section 29.53.500(g) be modified to include transient residents as subject to income tax payment. The concern of the committee is that non-resident wage earners should be taxed on their earned income.

The committee members unanimously agreed that they cannot support HB202, HB509, and HB578 and, therefore, have recommend to the entire Citizen Participation Conference delegation that it not support the bills.

Submitted: February 24, 1978

Committee Chairperson: Mr. Lutena Mulitalo
Facilitator: Mr. Gordon Jackson
Technical Assistant: Mr. Bill Pritchard

STATE SPENDING IMPACT ON LOCAL GOVERNMENT

STATE SPENDING IMPACT ON LOCAL GOVERNMENT

No assessment of, or attempt to monitor, state government growth can be complete without considering the impact of state actions on the state's primary partner in public policy --local government. In a broad sense, especially from the standpoint of public spending, local government is something of an extension of state government onto the local level. The latter is especially true in Alaska.

The generous revenue relationship of the central Alaska government and local governments date back to the Territorial period. The revenue relationship was greatly accelerated in the early 1970s by the availability of surplus revenue --the $900 million. However, the same acceleration is again taking place today in "prospect" of surplus revenue derived from Prudhoe Bay taxes and royalties. For example, in 1977, in one action the Legislature proceeded to wipe out local school construction debt as of July, 1977. Secondly, high on the discussion list is 100% state support of local schools. Two briefly presented figures serve to demonstrate the dramatic degree of state action in the post-1970 period, and in the present period of "prospective" Prudhoe royalty wealth.

First, between 1969 and 1976 the Legislature, in excess of the current rates of funding of the pre-1970's, gave Alaska local governments an estimated additional:

$445 million

The above figure is approximate, with a great deal of argument being possible surrounding any supposition concerning what the rates of funding increases might have been if the $900 million had never existed. However, there are also considerable monies provided to local governments not included in the above figure.

In other words, roughly speaking, a case can be made that half of the $900 million was committed to the benefit of Alaskan local governments and their taxpayers.

Second, in terms of the present, the 1977 school debt pick-up legislation has some far reaching impact on local government.

--Fairbanks principal bond debt . . . . $40.7 million
--(less) Municipally Bonded Projects . .$ 3.0 million

--School debt picked up by state . . . .$37.7 million (est.)
--Net remaining borough liability. . . .$ 3.7 million

However, Fairbanks' actual debt exposure "plus interest" will be $62-million, with all but $3-million (plus interest) being the actual amount the state will pick up on behalf of the borough. In other words, the 1977 action of the legislature will leave the state's second largest borough with only a debt of $3 million plus interest.

The Fairbanks and Anchorage school principal and interest to be picked up by the state as a result of the 1970 and 1977 laws totals about $188-million.

The simple point to be made here is that two enactments (1970 and 1977), have made Alaska local governments virtually debtless. Such a situation is beyond the wildest dreams of policymakers throughout most of the other states.

TOTAL STATE AID TO LOCAL SCHOOLS
1966 - 1977
(in millions)

1966 . . . . . .$16.9	1972 . . . . . .$66.7
1967 . . . . . .$19.4	1973 . . . . . .$69.6
1968 . . . . . .$20.8	1974. . . . . .$78.1
1969 . . . . . .$25.8	1975 . . . . . .$88.8
1970 . . . . . .$35.1	1976 . . . . . $119.6
1971 . . . . . .$64.1	1977 . . . . . $124.4

The chart on the following page breaks school aid down as it impacted Juneau, Anchorage, and Fairbanks between 1966 and 1977.

c

STATE EDUCATION AID TO ANCHORAGE, FAIRBANKS, JUNEAU (In Millions)			
	ANCHORAGE	FAIRBANKS	JUNEAU
1966	$ 7.1	$ 2.4	$1.1
1967	$ 8.1	$ 2.7	$1.3

1969	$11.2	$ 3.3	$1.6
1970	$16.5	$ 4.8	$2.1
1971	$31.0*	$ 9.2*	$4.3*
1972	$29.0	$ 8.4	$4.1
1973	$30.8	$ 8.5	$4.6
1974	$34.8	$ 9.1	$4.9
1975	$38.7	$10.9	$5.4
1976	$45.0	$14.5	$6.4
1977	$49.1	$16.1	$7.1
TOTAL	$301.3-Million	$92.5-Million	$44.2-Million

The above chart shows school aid increasing very marginally in the late 1960s, taking a jump in 1969 after increased severance taxes boosted state income in 1968, again aid increased in 1970 in anticipation of the bonus sale in late 1969, and then state school support approximately doubled for Fairbanks, Anchorage, and Juneau under the Alaska School Foundation Act of 1970.

It should be noted also that Anchorage commands almost half of total state aid to education throughout the schedule.

STATE AID FOR LOCAL SCHOOL CONSTRUCTION DEBT (In Millions)			
Year	Debt Service & Cash Payments	Entitlement (% & Less Cig. Tax)	Authorized Reimbursement
1971	$ 6.1	$ 2.4	$ 1.8
1972	$ 7.3	$ 2.3	$ 2.3
1973	$ 9.7	$ 3.5	$ 3.4
1974	$16.9	$ 7.0	$ 5.7
1975	$18.2	$ 7.6	$ 5.6
1976	$21.6	$ 9.2	$ 8.8
1977	$23.6	$10.1	$ 9.0
1978	$24.2	$10.8	$10.8 (50%)*
1979	$25.4	$23.6	$25.6 (100%)

*Total 71-76 $45.4 million

C

The previous chart shows the rate of state pickup of local school construction debt beginning in 1971, and following through until 1978 and 1979 when the state financial outlay will double from $10.8 million per year to $25.6 million.

Other sources of direct aid from the state to school districts are also present. For example, at the beginning of the bonus money period the state enacted the State Impact Program, patterned after the federal impact program (PL874), and designed to compensate local school districts for the impact of state employees working in "tax exempt" facilities (industrial tax loss).

For example, a community such as Fairbanks annually collected approximately $500,000 in state impact aid, for a cumulative revenue between 1969 and 1974 of $2.5 million. In addition, local school districts have been fully compensated by the state for school bus costs. Again, using Fairbanks as a localized example, transportation aid in recent years has run about $1 million annually, for a cumulative between 1969 and 1974 of $5.7 million.

Additionally, local communities were receiving substantial state aid under the State General Revenue Sharing Programs, with aid being broken down by areas of responsibility (fire, police, hospital, etc.), being exercised by a city or borough.

Borough (unified government)

c

Alaska municipalities in 1969 were in something of a "double trouble" situation. Many were facing a growing restlessness among real property taxpayers, while at the same time they were under a tremendous pressure for expansion and improvements. Real property tax rates had moved generally upward in Alaska communities in the mid-1960s, in part to finance post-statehood growth and optimism, and secondly under the expanded ability to serve brought by the creation of boroughs.

Anchorage was particularly under pressure from growth expansion, with taxes running in the area of 20-mills total, while Fairbanks had experienced a run-up of taxes in the 1960s from fairly modest rates to a total of 26-mills (plus 5% sales tax).

Hence, the beginning of bonus money revenue sharing was both a potential source of tax relief for local taxpayers, and a means of financing the needs of community growth without tax increases. During the period many communities would have an expanding assessed value base to help finance growth, but that increasing assessed value also demonstrates the pressure the community was under. Other communities were simply struggling to catch-up with long unmet needs under the momentum and optimism of statehood. Anchorage perhaps typifies the growth impacted community, struggling to just finance growth needs without increasing taxes, while Fairbanks typified the community simply trying to finance needs for existing population and still experiencing a tax run-up.

The relationship of revenue sharing from the $900-Million can therefore be viewed from a perspective of:

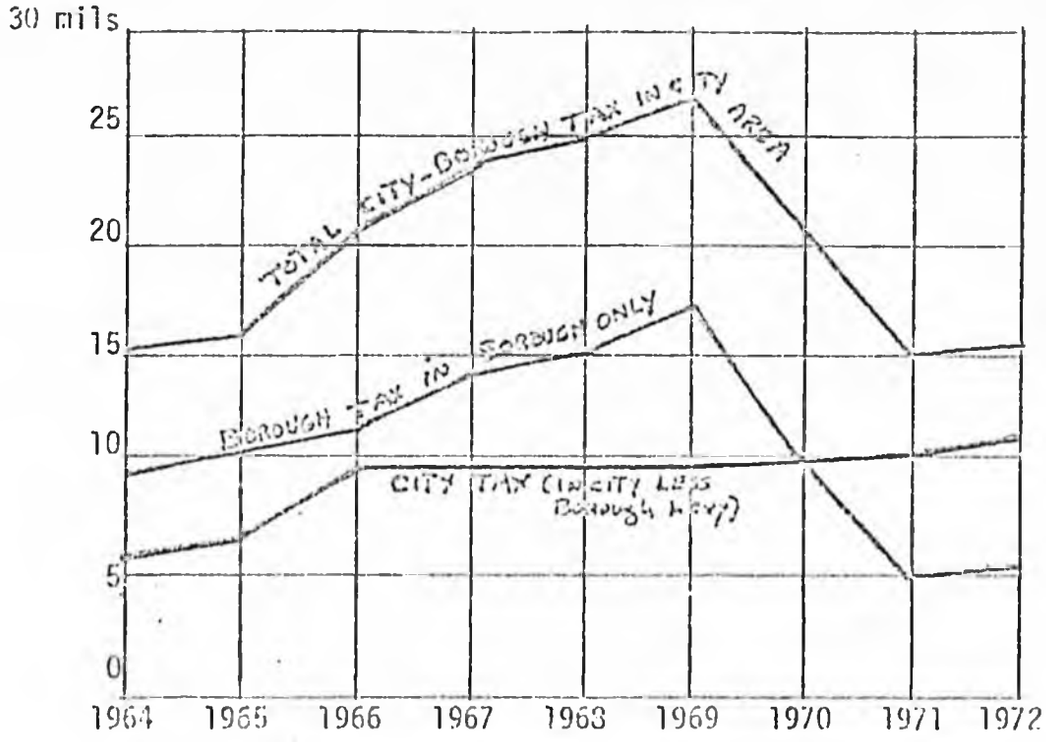
1) Tax reductions by local community

2) Increased services (evidenced by increases in employees)

3) Increased local assessment value as an indicator of local growth pressures.

The following charts focus primarily on Alaska's larger and more sophisticated urban communities, in part because they typify what was happening in the late '60s and early '70s to a majority of Alaskans, and because any attempt to analyze Alaskan local government in terms of an overall view is difficult --local curcumstances of grass roots government in Alaska varies so greatly individualized comparison is difficult if not impossible. However, the view of state action as a catalyst to local government policy by viewing individual communities, at least provides some opportunity for a comprehensive insight to the dramatic influence the state has through revenue sharing.

The following chart provides some insight to the experience of Fairbanks from a real property tax viewpoint in the mid-1960s and the early 1970s. The impact of the state revenue sharing efforts can be seen beginning in 1969.



FAIRBANKS REAL PROPERTY TAXES 1964 - 1972

The Fairbanks graph is perhaps the most dramatic in terms of visability of $900-Million revenue sharing impact. Initially the community optec to take its revenue sharing benefits in the form of real property tax reductions on the borough level. The business of the borough being primarily schools was in a position to take the most advantage in terms of benefits, being the recipient of the major share of revenue sharing through school foundation aid. The general municipal functions of the borough at the time were just beginning to develop.

The City of Fairbanks, which qualified only for general municipal revenue sharing, used revenues to keep its tax rate relatively "level," while expanding some operations at a revenue advantage by shifting powers to the borough, and also through a mildly increasing assessed evaluation base.

C

However. Fairbanks by the end of the 1960s was undergoing a genuine tax crisis. The combined borough/city property taxes levied in the city area, grew from a traditional level of about 16-mills in the early 1960's, to a record high of 26-mills in 1969 --only 4-mills short of the state legal limit. The level of taxes in 1969, in fact, generated a "taxpayers revolt" in Fairbanks that did not subside until the middle 1970's, despite the fact that taxes dropped 40% in the city and 60% in the borough area by 1971.

The tax crisis of 1969 in Fairbanks forced the community to take its $900 million benefits largely in tax reductions rather than — expanded services. It was the borough which was able to cut taxes due to the state school support increases. The city on the other hand benefited greatly by the tax cut of the borough, since the relief granted city property owners from the borough cut "relieved tax pressure," and allowed the city to maintain its level of taxation. As a result the city was able to gradually expand services through: 1) increased state revenue sharing, 2) increasing assessed property values, 3) annexation of new areas (and assessed values), and 4) through the gradual shift of city services to the "broader" tax base of the borough.

Generally, the Fairbanks pattern was reflected throughout the state to some degree, with schools able to generate the tax break, so that cities, which generated most "homeowner" services, could expand their taxes and services beneath that shelter of relief.

Fairbanks represented the most extreme crisis of municipalities in 1969. The community had a 26-mill tax level in the city area, and also had a 5% sales tax in the city zone. However, even with such high tax levels the Fairbanks Community was still just struggling to fill out the needs of its basic pre-1964 structure. In other words, like alot of other communities, Fairbanks was simply struggling to "catch up" with needs.

During the period Fairbanks was growing slowly, with the assessed evaluation of the city growing from $90 million in 1964 to $179 million in 1972. The borough's value also doubled from a 1964 level of $150 million in 1964 to a 1972 level of $301 million. However, a large share of the value gains were simply reavaluation of existing properties, as compared with additions of new property values. However, between 1972 and 1974 Fairbanks added another $100 million in value, and with the addition of full pipeline assessed values the community has now soared over the billion dollar assessed value mark. The addition of the pipeline as a rich industrial tax base, has probably resolved Fairbanks' real property tax problems. In just two years Fairbanks went from a prime example of a tax-poor community to a prime example of a tax-rich community.

c

The impact of state revenue sharing can also be seen by a quick comparison of the "changing relationships" of the larger revenue sources in the Fairbanks Borough.

FAIRBANKS BOROUGH REVENUE RELATIONSHIPS

State Foundation Act, Sales Tax, Property Tax

Revenue Source	68-69	69-70	70-71	71-72	73-74	74-75
State Fd. Act	$3.5(1)	$4.7(1)	$9.0(1)	$8.2(1)	$9.2(1)	$9.7(1)
Sales Tax	$1.6(3)	$2.0(3)	$2.1(3)	$2.2(2)	$2.6(2)	$3.0(2)
Property Tax	$3.3(2)	$3.3(2)	$2.2(2)	$1.3(3)	$2.2(3)	$2.7(3)

(*) Numbers reflect rank is predominant revenue earner

Viewing the three predominant revenue producers, state school support has been number one since back in the early 1960s, although at times it barely eclipsed property taxes as number two. Sales tax ran third.

However, in 1971-72 the state school support had widened its lead as number one to almost double sales tax and property taxes combined, and property taxes dropped behind sales taxes to third place.

Nor does the above chart show the whole picture. By 1978 the total revenue of the borough coming from other governments had increased to about 70% of total revenue, while traditional sales taxes and property taxes commanded about 25% of total revenue.

An alternate picture is what the impact of new state revenues did to employment by local governments. However, this is a somewhat difficult picture to show because it involves revenue "relief" that affected three inter-related governments, and it also was a period when services were gradually being transfered from the smaller population base or cities to the larger base of the relatively new borough governments.

The following chart shows Fairbanks combined city/borough employment totals. Combining the totals compensates for statistical error inherent in transfers of powers and services from the city to the borough.

TOTAL EMPLOYEES FAIRBANKS CITY AND BOROUGH[1]

1968 - 1975

Government	1968	1969	1970	1971	1972	1973	1974	1975	1976
Borough	40	45	53	69	85	117	137	174	172
Education	399	370	463	478	459	464	471	564	732
City	173	194	237	288	306	263	262	259	-
TOTAL ALL GOVT	612	609	753	835	850	844	870	997	

(1)Does not include School classified employees

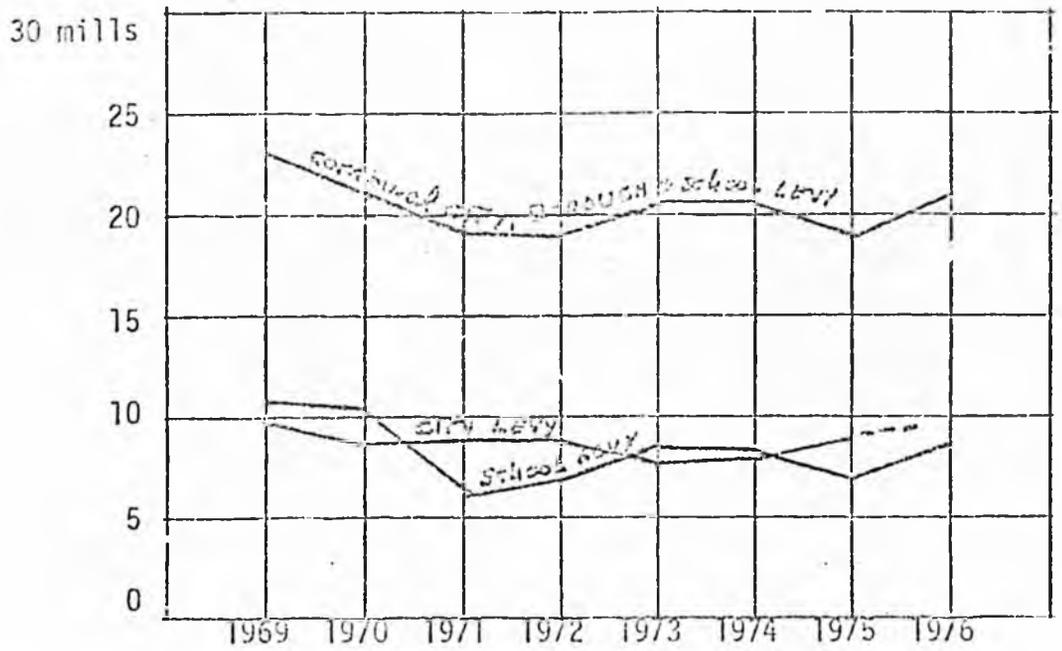
The previous chart shows some employment jumps in the 1969 - 1975 period, and then an increase in the pipeline period. However, during the period the borough's general government growth was in part due to a transfer of function from the city, and the jump in education between 1974 and 1975 was due to the transfer into the system of "on-base" schools (from the state).

THE ANCHORAGE PICTURE

The Anchorage impact due to state revenue transfers is less precise, in part because the expanding Anchorage community took their "relief" from the state largely in the form of expanded services. Anchorage during the period was undergoing a period of rapid expansion, and it is likely that the large infusions of state revenue simply enabled the community to meet new demands without a tax increase.

The Anchorage tax base also rests predominantly on real property taxes, supplemented by a personal property tax. The community does not have a sales tax, a luxury few Alaska municipalities have been able to afford.

The Borough was also much more aggressive in Anchorage in absorbing services (powers) from the city that would be more equitably provided on the expanded tax base of the borough. However, transfers of services tends to distort the indicators of "growing or falling" tax levies, total spending, and numbers of employees. Nevetheless the collective totals tend to show whatever pattern was prevalent. During the period Anchorage's assessed evaluation was also growing significantly, thus expanding the tax base of the community.



ANCHORAGE REAL PROPERTY TAXES 1969 - 1976

The above chart shows the infusion of state revenue sharing in 1969-1976 dropping basically school taxes, allowing the city to drop taxes slightly while increasing services.

ANCHORAGE BOROUGH REVENUE RELATIONSHIPS

Property Taxes and Other Governmental Revenue

Revenue Source	68-69	69-70	70-71	71-72	73-74	74-75
Revenue Other Gov't Sources	$17.4	$24.2	$38.6	$44.	$54.9	$68.1
Property Taxes	$15.8	$14.0	$11.6	$16.5	$33.0	$30.6

(in millions)

The above chart does not reflect total borough revenues. However, it does show the changing revenue relationship from 1968-'69, when property tax revenues almost equaled "other governmental transfers," until 1974-'75 when "other governmental transfers" double property taxes. Total revenues from the two sources went from $36-million (68-69) to $98-million (1974-75).

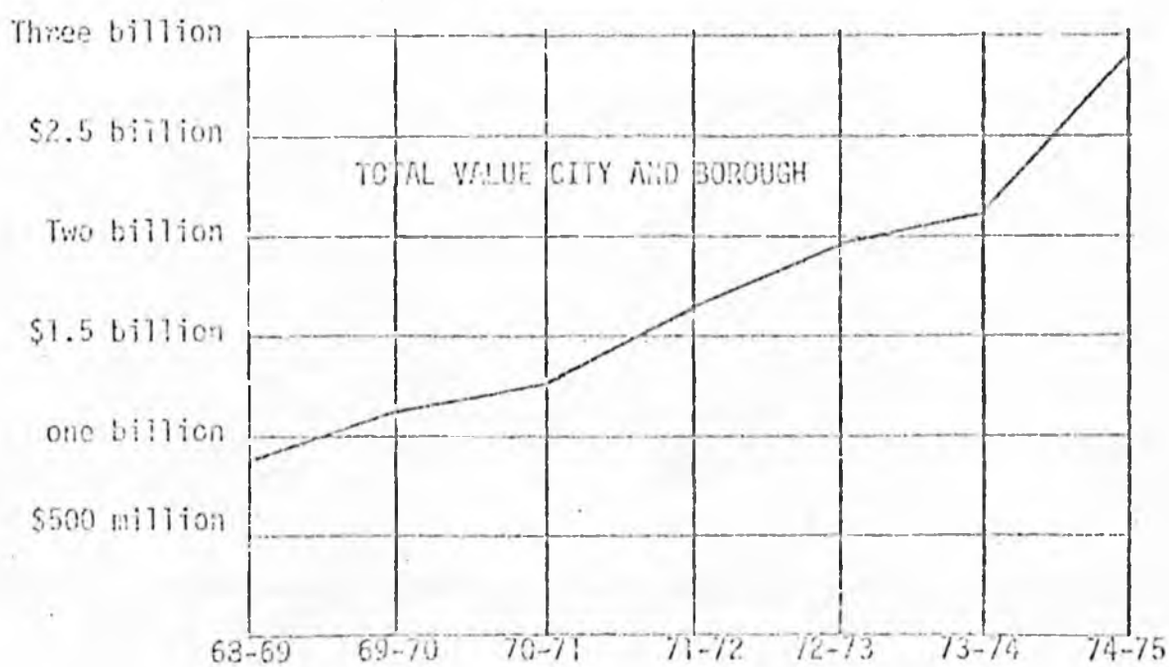
c

The total spending of the Anchorage Borough went from $34.8 million in 1968-69, to $104.9-million in 1974-'75. Since Anchorage chose rapid expansion of services during the 1963-'75 period, the following charts reflects growth by function and expenditure.

ANCHORAGE BOROUGH GROWTH BY SPENDING AND PROGRAM

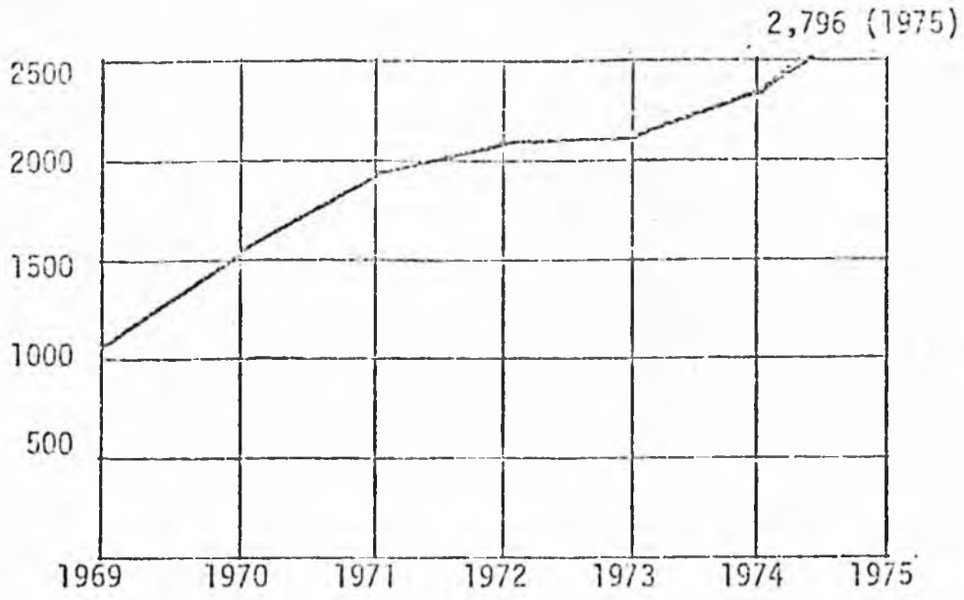
1968-'69 to 1974-'75

Program	1968-'69	1971-'72	1974-'75
General Gov.	$2.1 (million)	$6.9 (million)	$13.3 (million)
Health	$409,000	$1.3 "	$ 3.4 "
Public Safety	$627,000	$2.4 "	$ 6.2 "
Consv. Nat. Rcs.	$ 11,740	$704,624	$ 2.0 "
Education	$21.2 (million)	$45.0 (million)	$64.2 (million)
Debt Service	$ 3.5 (million)	$ 8.5 (million)	$14.1 (million)
TOTAL SPENDING	$34.8 million	$65.3 million	$104.9 million



GROWTH ANCHORAGE EVALUATION 1969-'68 to 1974-'75

c



GROWTH BY EMPLOYEES ANCHORAGE CITY AND BOROUGH

The growth in the numbers of employees in the Anchorage city and borough reflected a rapid growth between 1969 and 1971, and then leveled off until 1974.

In general the uniformity of Anchorage real property taxes between 1969 and 1975, the increases in general spending, the growth in assessed value, and the growth in numbers of employees, all reflect a community that was in the midst of expansion. Hence, the impact of state revenue sharing for Anchorage was to moderate the costs of growth and expansion for local taxpayers.

The following schedule provides a history of the program as well as a projection of the total costs:

FY	AVAILABLE APPROPRIATION	FULL FORMULA FUNDING	NUMBER OF APPLICANTS PARTICIPATING
1970	$ 1,000,000 1,020,000 1/	$ 2,015,281	9 boroughs 54 cities
1971	6,500,000	6,333,708	1 unified government 80 cities 8 boroughs 5 fire protection groups
1972	7,085,000 415,000 2/	7,505,497	1 unified government 94 cities 8 boroughs 14 fire protection groups
1973	7,800,000 44,300 3/	8,501,575	2 unified governments 107 cities 7 boroughs 20 fire protection groups
1974	8,777,000	9,544,000	2 unified governments 109 cities 8 boroughs 44 fire protection groups
1975	12,929,000	12,458,626	2 unified governments 119 cities 8 boroughs 48 fire protection groups
1976	15,130,100	14,039,600	3 unified governments 138 cities 8 boroughs 38 fire protection groups
1977	15,113,600 4/	16,969,800 (est.)	3 unified governments 157 cities 8 boroughs 45 fire protection groups

1/ Supplemental appropriation provided by Chapter 1, SLA 1970.
2/ $413,930 of FY 1973 appropriation allocated by 1972 Legislature to provide additional funding for approved entitlements of FY 1972 applicants.
3/ Additional funds provided by Revised Program for health facilties initially determined to be non-qualifying.
4/ The proration factor between full funding and available funding would be approximately 89.06%.

Municipality of Anchorage

MEMORANDUM

DATE: March 9, 1978

TO: Ted Berns, Municipal Attorney

FROM: Larry D. Crawford, Director, OMB LDC for LC.

SUBJECT: House Bill NO. 843

The following comments are offered regarding House Bill No. 843 providing for "equalization of the tax resources of municipalities and continuing a portion of the program of state aid for municipal purposes." Comments from the Finance Department have been incorporated in this memorandum.

GENERAL

Under HB 843, Sections 43.18.010-43.18.050 of the present statutes are repealed. These sections provide the authority for current state-shared revenues. In lieu of this, new Chapters 88 and 89 have been added to Section 29 of the statutes. Chapter 88 deals with a new source of revenue called an "Equalization Entitlement." Chapter 89 provides for the continuation of a portion of the state-shared revenues formerly authorized in Section 43. Exhibit A is a copy of HB No. 843. Exhibit B is a copy of the present statutes authorizing state-shared revenues.

Exhibit C is an analysis of HB 843 prepared by the State Legislative Affairs Agency and contains an attachment (Exhibit D) demonstrating the comparative revenue distribution under current law and HB 843.

A review of HB 843 reveals it to be ambiguous in certain cases as well as presenting redistribution of income approach to state revenue sharing. On the basis of the information made available to us, it appears to be detrimental to the Municipality of Anchorage.

AMBIGUITIES

Many of the ambiguities in HB 843 have been clarified by the analysis contained in Exhibit C. However, some problems remain.

1. Two sections (Sec 29.88.055 & 29.73.060) refer to "fiscal year" without indicating whose fiscal year - - the state or local. Complex calculations will be required because of the different fiscal year periods regardless of which year is implied.

2. Section 29.88.030 would lead one to believe that two series of computations would have to be made for the Municipality of Anchorage - - - one for service areas and another for taxing districts. However, the computations in Exhibit D are based on taxing districts.

3. Exhibit C (page 6) states that in the equalization entitlement, the property tax mill rates and sales tax per cent rates are to be converted to mill equivalents. Where is this so stated in the bill? By converting both factors to mill equivalents, a disproportionate emphasis is placed on the sales tax.

4. In order to determine the equalization entitlement in Exhibit D, the products of the formula in HB 843 have been multiplied by a factor of 2.983535316 - - - what

authorizes such a factor? Without the factor, the equalization entitlement per the formula would have been only $6.1 million. With the factor it becomes $18.3 million.

APPROACH TO STATE REVENUE SHARING

HB 843 presents a redistribution of income approach to the concept of state-shared revenues. The title of the new item of revenue - - - "Equalization Entitlement" - - - provides an insight in itself. The stated purpose of the bill is "to assure that no municipality suffers impoverishment of necessary public services, relative to other municipalities, because of the chance location of taxable wealth in the state." (Sec 29.88.005). One of the criticisms of the present law stated in Exhibit C (page 3) is that it does not include "ability to pay" considerations. A community with a larger than the state average per capita property valuation receives revenues at the same rate as communities which are relatively poor. It is further stated that the same criticisms can be raised with respect to per capita income differentials from which taxes are paid. The net effect of the formula is to favor economically disadvantaged communities.

EFFECTS ON THE MUNICIPALITY OF ANCHORAGE

1. A municipality will be better off if it is high or low in the various components of the equalization entitlement formula as follows:

Population	High
General Govt. Property Tax Mill Rate	High
Sales Tax % Rate	High
Local Per Capita Income*	Low
Local Per Capita Property Value*	Low

* Compared to state averages

At this point, it may be interesting to compare these state components with the following used in determining federal revenue sharing entitlements and whether a governmental jurisdiction is better off if it is high or low:

Population	High
Tax Effort	High
Relative Income	Low

Both the federal and state components follow the same pattern.

2. Anchorage has both a higher than average per capita income and per capita property value. This is confirmed by Exhibit D which shows Anchorage to have unfavorable income and property value factors in the computation formula compared with most other jurisdictions within the state.

3. The most discriminatory portion of the formula, however, is the sales tax element. Sales taxes receive disproportionate weight in the formula (e.g., a 4% sales tax carries the same weight as a 9.20 mill rate). Using the computations for Anchorage in Exhibit D, Anchorage would be entitled to the following additional revenues under the equalization entitlement at the various indicated sales tax rates:

Sales Tax	Additional Entitlement
2%	$3.3 million
3%	$5.0 million
4%	$6.6 million
5%	$8.3 million

In effect, HB 843 is detrimental to Anchorage for its lack of a sales tax. Although Anchorage does have a 5% hotel and motel tax, no provision for such a selective tax is made in the bill.

4. HB 843 would greatly reduce the degree of local automony. In addition to the effects of the lack of a sales tax, communities would be faced with a new restriction as to use of the state revenues. Under current state statutes (see Exhibit B - Sec. 43.18.010 (f)), state-shared revenues may be expended for any public purpose for which the local government has power to expend public funds, except for a few limitations regarding health facilities revenues. Sec. 29.88.030 of HB 843 contains additional requirements regarding the use of funds for specific service areas and tax zones. Although the new provisions are fairly consistent with the way Anchorage has been allocating past state-shared revenues, we would no longer have the flexibility to do otherwise if the circumstances so warrant.

5. In a rapidly growing area such as Anchorage, the local per capita income and property value would increase at a greater rate than the state average thereby creating an adverse effect in the equalization formula.

6. Total state-shared revenues to Anchorage under the new bill shown on the front page of Exhibit D are $9.2 million compared to $8.4 million using the present law. From that, it would appear that the bill is advantageous to us. However, if you look at the last page of Exhibit D, you will find that these amounts are based on total funding of $25 million for the new bill versus $18.3 million under the present law. Will the state appropriation really increase by nearly $7 million if HB 843 is passed? Since there is nothing to indicate such an increase, if only the current level of $18.3 million is available for distribution, Anchorage's share would be only approximately $6.7 million - - - that's $1.7 million less than under the present law. No matter which figure you use as the base, under HB 843 Anchorage's share of state-shared revenues will diminish from 46% of the state total to only 37%.

OTHER CONSIDERATIONS

The impact of the D-2 lands issue is uncertain at this time - - how will the state-selected lands ultimately affect the state per-capita property value? Major concerns relate to the complex calculations and the Municipality's ability to generate the base data required during the budget process. The problems we have now in getting estimated assessed valuations, population, road mileage and hospital bed and facility figures give us an indication of the problems that would be faced.

February 17, 1978

MEMORANDUM

SUBJECT: HB 843 (W.O. #7/R)

TO: The Honorable Terry Gardiner

FROM: John Williams
Research Analyst

You have asked that we prepare an analysis of HB 843, an Act providing for equalization of the tax resources of municipalities and continuing a portion of the program of state aid for municipal purposes; and providing for an effective date. The following analysis consists of: (1) a discussion of present revenue sharing law; (2) an overview of the general implications of the bill; (3) the financial distribution scheme as provided for in the bill; (4) a discussion of the allocation formula; and (5) an attachment demonstrating the comparative revenue distribution under current law and HB 843.

PRESENT REVENUE SHARING

HB 843 would amend the current state aid to local governments program, as provided for in AS 43.18.010-090. The current law provides for the legislature to annually appropriate an amount to be distributed to local governments according to a series of local services which are eligible under the program. Approximately 75% of the revenues are distributed on a per capita basis; the remainder are allocated according to miles of road maintained and the number of health facilities and hospitals (either on a per facility basis or a per bed basis). Services in support of military installations are apportioned on a per capita

basis but according to a different schedule than utilized for civilian populations. The Department of Community and Regional Affairs (CRA) determines whether a municipality qualifies under the provisions specified for each eligible service category. When eligibility has been certified, the municipality then receives a statutorily set amount per capita (or medical facility or mile of road maintained) specified for each service category. For example, a municipality receives $12 per capita for police protection, $7.50 per capita for fire protection, and $2 per capita for land use planning. Should the liability of the program exceed the legislatively appropriated amount, all municipal entitlements are prorated so that the total liability equals the available money.

The legislative intent for the program was restated via the passage of HB 89 in 1977 (120 SLA 1977 becomes effective July 1, 1978) to read "(t)he intent of §§ 10-100 of this chapter in authorizing state aid for....municipal services is that municipalities which levy taxes reduce those levies in reasonable proportion to the amount of state aid received by the municipality for a given fiscal year" (sec. 4, HB 89).

Using the criteria established by the legislative intent, there would appear to be two considerations regarding the present revenue sharing law which indicate that it cannot fully accomplish the intent. (1) The present distribution system does not consider the local tax rate in distributing revenues. Those communities which have a relatively high tax rate receive payments at the same rate as communities which supply minimal or no services from local taxes. Instead, present law directs the Dept. of CRA to determine whether specific services which

are being supplied by the municipalities qualify them for categorical entitlements, regardless of differences in tax rates utilized in funding those service categories.[1] (2) Additionally, present law does not include "ability to pay" considerations. A community with a larger than state average per capita property valuation receives revenues at the same rate as communities which are relatively poor. The same criticism can be raised with respect to per capita income differentials from which taxes are paid. A circular argument can be developed which demonstrates that poorer communities must set taxing rates at higher levels to generate the same revenues per capita as wealthier municipalities, which in turn requires a greater proportion of the disposable income of the poorer municipality residents to pay the additional tax burden vis-a-vis wealthier communities. The alternative for the poorer community is to forgo local services, which causes concomitant financial loss if the forgone services were eligible for revenue sharing dollars. The actual result is often substandard services.

---

[1] The eligible services list has expanded since inception and presently includes services related to health and welfare, transportation, recreation, and economic development (a bill before the legislature this year would add cultural activities). Since the eligible services list has greatly expanded, it would appear timely to consider allowing any public service specifically authorized by a municipality to be considered as eligible for revenue sharing dollars. A method for accomplishing this would be to look directly at the local tax rate in determining the distribution of the revenue sharing appropriation, since the tax rate will reflect the level and number of services provided by municipal tax revenues.

OVERVIEW OF HB 843

HB 843 repeals essentially all provisions of the present revenue sharing law which allocate monies on a per capita basis (police, fire, parks and recreation, land use planning, transportation, and air and water pollution control). Present law which allocates monies for health facilities, hospitals, road maintenance, fire districts outside of municipalities, and support of military installations is saved.

The repealed portion is replaced with a per capita allocation system based upon population, taxing rate, and a factor which compares each local government to the state average using per capita property value and per capita income as indicators. Our analysis indicates that any appropriation to the program in excess of $23 million will increase the entitlement for all local governments with local tax ordinances in effect except the North Slope Borough and the City of Valdez. Several second class cities and one first class city with no local taxes would receive less. Section 9 of the bill provides for all local governments to be held harmless for three years after passage, such that no municipality will receive less during that three year period than they did in 1978, regardless of their entitlement as calculated by the specified formula.

FINANCIAL DISTRIBUTION SCHEME

HB 843 provides that revenue sharing dollars shall be utilized by municipalities in the taxing jurisdiction for which the amount of entitlement is determined. Boroughs with area-wide taxes for general government services except education shall receive revenue sharing

allocations to be used for area-wide purposes. For boroughs with differential taxing rates in service areas, revenue sharing entitlements based upon the service area tax rates must be utilized only in those service areas. First or second class cities with city-wide taxes would receive an allocation based upon the city-wide tax rate to be used city-wide (except for education). Cities with differential taxing zones would receive allocations according to the tax rate applied in each differential tax zone.

This system of distribution would appear to have a neutral effect with respect to the unification of existing governments. We do not find any circumstance where a subsequent unification agreement would cause a decrease in the revenue sharing entitlement for identical services. The bill contains a hold harmless clause for entitlements under the non per capita portion should a subsequently unified local government be entitled to less than the preceding multiple local governments.

ALLOCATION FORMULA

HB 843 specifies a formula to be used in determining entitlements for per capita revenue sharing distributions. The formula utilizes three considerations: (1) population; (2) tax rate; and (3) the relative "ability to pay" of each local government or subunit thereof.

The formula is:

$$\text{Entitlement} = \underbrace{P}_{A} \times \underbrace{\left[\underbrace{(PT + 2.3ST)}_{B} \times \underbrace{\left(\frac{SPCPV/LPCPV + SPCI/LPCI}{2}\right)}_{C}\right]}_{D}$$

where P = population
PT = property tax mil rate
ST = sales tax per cent rate
SPCPV = state average per capita property value
LPCPV = local per capita property value
SPCI = state average per capita income
LPCI = local per capita income

We will discuss the formula according to the portions indicated by the braces.

Part A

The population is determined in the same fashion as provided for in present law. Any reasonable population estimate is accepted by the Dept. of CRA.

Part B

Part B indicates the portion of the formula which determines the local tax rate. Property tax mil rates and sales tax per cent rates are converted to mil equivalents. The 2.3 conversion factor multiplied by

the sales tax rate was determined by comparing the revenue that could be generated by applying a one mil property tax to the total full and true assessed property value in the state and a one per cent sales tax to the total retail business in the state. That comparison demonstrates that a one per cent sales tax would generate 2.3 times more revenue than a one mil property tax.

Part C

The portion of the formula set out by brace C averages two ratios that compare the "economic base" of each local government to the state average. The ratios are mathematically designed to create a number larger than one for communities lower than the state average for the two indicators, and a number smaller than one for communities above the state average. The average of the two ratios is then multiplied times the computed tax rate so as to adjust upward the local tax effort of economically disadvantaged communities and downward economically advantaged communities.

Part D

The portion set out by brace D is called the local effort factor, and is not allowed to exceed 25. The ceiling has the effect of setting a limit on the amount of support given to each municipality under the revenue sharing program. This, in combination with the required publishing of revenue sharing entitlements, would appear consistent with the legislative intent of the program, which is to diminish local tax burdens.

The bill further provides for adjustments in both sales tax and property tax rates based on optional exemptions allowed under Alaska law. As an example, a municipality utilizing the $10,000 residential property tax exemption would be required to declare the revenues forgone by the exemption, and a comparative portion of the tax would be excised from the tax rate base before computing that municipality's entitlement. Mandatory exemptions, such as agricultural lands and senior citizens housing would not affect the tax rate, since the forgone revenues are reimbursed by the state.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

DIVISION OF LOCAL GOVERNMENT ASSISTANCE / POUCH B – JUNEAU 99811

March 14, 1978

The Honorable Terry Gardiner, Representative
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Representative Gardiner:

Re: HB 843 "An Act providing for equalization of the tax resources of municipalities and continuing a portion of the program of state aid for municipal purposes; and providing for an effective date."

This bill (as well as SB 502) would dramatically alter the method by which the State of Alaska distributes financial assistance to municipalities. Currently, under AS 43.18, the State distributes in excess of $18 million dollars annually to municipalities and volunteer fire departments in the unorganized borough utilizing a categorial approach. For example, if a city has a police department, and meets the minimum requirements, the State pays the city $12 per person served by the police department. No consideration is given to the relative ability of the city taxpayers to support the police department, nor the rate of municipal taxation.

The existing revenue sharing formula (AS 43.18) encourages municipalities to provide a wide variety of services, even though the quality of such services may be minimal, and no local tax effort is required. Additionally, the present revenue sharing program favors the more sophisticated municipalities (due to the categorial approach) as well as favoring municipalities having greater populations in a relatively small area. The new concept of distributing State generated wealth utilizing a formula based on relative taxable wealth, relative ability to pay, tax rates, and population makes sense to us and is definitely a step forward in assisting the development of local government in Alaska. Briefly, the concept may be described as helping those municipalites willing to help themselves.

21-P3LH

The Department's initial review of HB 843 indicates that consideration should be given to amending the bill in the following areas:

1. The municipal tax rates should be downwardly adjusted to account for taxes used to support utilities (utilities should be self-supporting), and taxes used to support roads, ice roads, and health services and facilities (these categories are retained in this legislation).

2. Since there are no assessed valuations for essentially all second class cities in the unorganized borough, perhaps an arbitrary assessed value could be established. One approach is to compute an average assessed valuation per capita figure based on all first class cities in the unorganized borough having a population less than 750 (the Department already has these figures). This approach would be equitable and inexpensive. Those cities (3) having a population in excess of 750 could be assessed at State expense.

3. Other components of the formula should be carefully considered. For instance, are the per capita income figures credible? Also, because petroleum property in a few boroughs so distorts the State average valuation, should that figure be adjusted? Exclusion of extreme values or use of the median property value in the State might be appropriate alternatives.

4. For ease of administration, we feel the military population should be treated in a manner consistent with that used for the civilian population. One method of accomplishing this would be to apply the areawide local effort factor to the military population.

5. The concept of calculating a millage equivalent based on all revenues should be explored. For example, a city collecting $1,000,000 dollars from a 10 mill property tax, and $300,000 from a 3% sales tax, would be given a millage equivalent of:

Property Tax Revenues	$1,000,000
Sales Tax Revenues	300,000
Total Revenues	$1,300,000

One mill property tax equals $100,000 in revenues.

$$\frac{\text{Total Revenues}}{\text{Revenue from 1 mill property Tax}} = \frac{\$1,300,000}{\$\ 100,000} = 13 \text{ mills (millage equivalent)}$$

This approach would seem to be equitable in that residents have determined locally the best balance between sales and property taxes to produce sufficient municipal revenues.

The Division of Research, Legislative Affairs Agency has prepared an analysis of the impact of this bill (at various funding levels) on all municipalities.

The Department wholeheartedly supports the concept of HB 843. Also, the proposed amendments would in our opinion, improve the intent of the act providing for equalization of the tax resources of municipalities.

Sincerely,

Lee McAnerney
Commissioner

March 14, 1978

Representative Hugh Malone
Pouch V
Juneau, Alaska 99811

Dear ~~Representative Malone:~~ Hugh,

The Cordova City Council at the regular meeting of March 13, 1978 voted unanimously to support House Bill 843. The City of Cordova presently has one of the highest tax rates in the state with a 22 mill property tax plus 4% sales tax. The additional revenue generated by House Bill 843 would be a significant step in the reduction of local taxes.

We appreciate and encourage your efforts to reduce the local tax burden.

Very truly yours,

Perry D. Lovett
City Manager

JAY S. HAMMOND
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

March 20, 1978

The Honorable Lisa Rudd
Chairman
Community and Regional Affairs
Committee
House
Pouch V
Juneau, Alaska 99811

Dear Representative Rudd:

In my November 5, 1977, speech to the Alaska Municipal League, I suggested that the State look for means by which to reward localities which make good faith efforts to tax themselves. In that talk, I sketched a plan whereby shared revenue would vary inversely to a municipality's per capita property values. This suggestion was made in recognition of the disparity of wealth among the communities in our State. I feel the proposed formula is a useful step toward implementation of the concepts contained in that speech.

I have been briefed on legislative proposals (SB 502, HB 843) to redesign the Municipal Revenue Sharing Program. Under these proposals, a municipality's entitlement would be determined by a formula to include as key elements both population and local effort. The latter would, as I understand it, incorporate local property and sales tax rates adjusted by a factor to account for local differences in property tax base and income.

I commend the Legislature for the careful study and deliberation which has gone into preparation of the proposals. I also support the philosophy of State and local government relationships and responsibilities which is expressed in the proposals. I would like to briefly mention several reasons for my support.

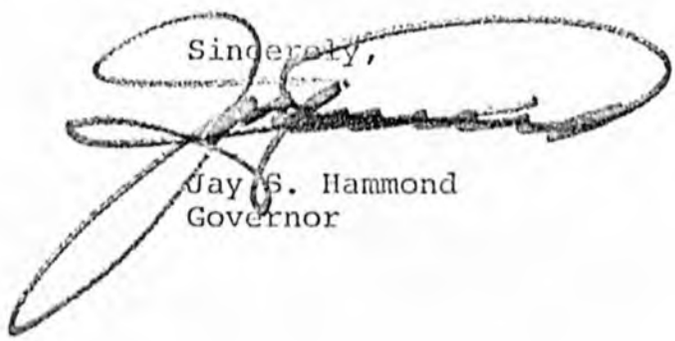
First, I believe that the most responsive government is that which is closest to the people it serves. Under the present categorical approach to Revenue Sharing, the State exerts considerable influence on the direction and type of local

services to be provided. I believe the proposed formula approach will give localities more desirable flexibility to determine service priorities at the local level.

Second, I have been an advocate for some time for the formation of local governments in the unorganized borough. At the November 10, 1977, Convention of the Alaska Federation of Natives, I expressed the view that a major obstacle to local government formation was an inadequate tax base which made it difficult for many rural areas to adequately meet the costs of local government services. I indicated then that Revenue Sharing adjusted for variations in per capita property values would help alleviate these problems. I believe the proposed legislation provides a useful tool for encouraging action in this regard.

My staff and that of the Department of Community and Regional Affairs have studied the legislation and have suggested refinements which we feel would facilitate administration of a formula based program. My position on funding of the proposal will have to await review of the fiscal impact of this legislation and the action the Legislature takes in the budget act itself.

Sincerely,



Jay S. Hammond
Governor

MEMORANDUM

SUBJECT: Revenue Sharing (W.O. #14/R)

TO: The Honorable Terry Gardiner

FROM: John Williams
Research Analyst

You have asked that we determine the additional revenues the Municipality of Anchorage would be entitled under HB 843 should they implement a 1% sales tax and the actual tax revenues they would receive. The attached printout was run using the same information and programming that we utilized in developing the printout entitled "HOUSE BILL 843 $25 MILLION" with the exception of crediting Anchorage with a 1% sales tax and adjusting the proration accordingly. The additional revenues for Anchorage total $959,003.

We also estimated the amount of revenue that a 1% municipal sales tax would generate in Anchorage. We utilized Department of Revenue data from gross business receipts and attempted to isolate generally taxed retail business (the codes included were the same codes we used in comparing sales tax to property tax revenue generation). Our estimate suggests that a 1% sales tax on retail transactions in Anchorage would generate at least $12.6 million in revenue.

Comparing the increase in tax revenues attributable to a 1% sales tax to the increase in Anchorage's revenue sharing entitlement under HB 843 because of the 1% sales tax suggests that for each additional revenue sharing dollar Anchorage would receive, the municipality would generate more than $13 in direct tax revenues.

Please let us know if we may be of further assistance.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

DIVISION OF LOCAL GOVERNMENT ASSISTANCE POUCH B — JUNEAU 99811

April 5, 1978

The Honorable Lisa Rudd, Chair
House Community and Regional
Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Representative Rudd:

Re: HB 843

You have asked for our opinion concerning the ways in which a Municipality may unduly benefit from the proposed revenue sharing bill (HB 843). The Department analysis of the bill (contained in the 14 March 1978 letter to you) explains very briefly some of the problem areas of the bill. In addition to that letter, Local Government Specialist Bruce Aronson of the Department offers the following comments concerning the ways in which municipalities may manipulate the proposed statute to their own best interest.

1. Enterprise activities (utilities, small boat harbors, etc.) should not be included in the formula. In other words, any sales and/or property taxes levied to support enterprise activities should be excluded from the tax rates. If this is not done, the tax rates might be unfairly inflated, and utility fees would be reduced. The State of Alaska would, in effect, support an activity that should be self-supporting.

2. Since the categories of roads, ice roads, and health services and facilities are retained in the legislation, it hardly seems appropriate to include any locally generated taxes, used to fund these services, under Ch. 88 of the bill. A gross example of this type of situation would be a single purpose service area created for road maintenance being eligible under Ch. 88 of the bill for the basic local tax effort formula funds, and also receiving $1,500 per mile for roads maintained. This dual eligibility would seem to be necessary.

3. A simple and rational approach to establish assessed valuations per capita for second class cities in the unorganized borough would

benefit by a low assessed value per capita number. Our earlier suggestion of averaging the per capita assessed value of municipalities of population less than 750 located in the unorganized borough is still one available alternative.

4. HB 843 arbitrarily multiplies the sales tax rate times 2.3 and adds in the property tax rate (in mills). It would be to any municipality's advantage to analyze the "rate of return" to the municipality under its current tax rates. By altering the sales and property tax rates (and assuming total local revenue is constant) a municipality may be able to gain slightly. A "cure-all" to this problem would be to add all locally collected taxes and divide by the revenue generated from one mill property tax. This new number would be the "millage equivalent". By doing the above, a municipality would not tinker with local tax rates to gain some additional State shared wealth.

5. If a municipality has no local retail stores, and/or property that could be taxed (utilizing a property tax) it would be to the municipality's advantage to "raise" local "taxes" until the maximum local effort factor has reached (25). One estimate by Legislative Affairs indicates that in a small rural city, the local effort factor is reached when a 1½% sales tax is levied. No additional benefit occurs when the number 25 is reached.

Sincerely,

Lee McAnerney
Commissioner

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

Assumptions

1. The Department would not estimate the local per capita assessed valuations for second class cities in the unorganized borough not currently collecting a property tax.

2. In fiscal year 1978 approximately $18,340,000 will be distributed under the existing program. Section nine of the bill would require for only the next 3 years a minimum annual appropriation of at least $18,340,000. It should be noted, that the FY'79 budget request for grants under the existing program is over $20,400,000.

Dear Representative Rudd:

Fairbanks Memorial Hospital is very interested in House Bill 843 dealing with revenue sharing and hospital construction money. We were wondering whether you had any ideas as to whether this bill has potential for passage during this session.

We do have some comments in regards to this bill if it will be presented in your committee. I might state that Sally Smith, from Fairbanks, has also been apprised of these comments and suggested that we contact your office to determine whether the bill would be acted upon. We encourage you to bring this issue to your committee since there are several sections of the bill which we feel need clarification and restatement, and we feel that since the bill is in the workings, that the current bill should be amended to include our ideas of concern.

Hoping to hear from you.

Sincerely,

Tom Mingen cd

Juneau, Alaska 99811

Dear Representative Rudd:

At the regular City Council Meeting of March 27, 1978, Council passed and approved Resolution No. 231, endorsing House Bill No. 843, "AN ACT PROVIDING FOR EQUALIZATION OF TAX RESOURCES OF MUNICIPALITIES AND CONTINUING A PORTION OF THE PROGRAM OF STATE AND FOR MUNICIPAL PURPOSES; AND PROVIDING FOR AN EFFECTIVE DATE."

Although the present systems for distributing State Revenue Sharing funds does assist municipalities in providing services there exists an incentive in the revenue sharing program for municipalities to increase or improve the service by increasing local taxes. Under the provision of House Bill No. 843, however, this would all change the proposed formula allocation system, increase the amount of revenue sharing if the Community increases its sales tax or property tax.

If your office should have any questions in regard to Bethels position on the piece of legislation do not hisitate to contact me.

Sincerely,

Lyman Hoffman

Lyman Hoffman
City Manager

CITY OF BETHEL
RESOLUTION NO. 231

A RESOLUTION OF THE CITY OF BETHEL, ALASKA ENDORSING "AN ACT PROVIDING FOR EQUALIZATION OF TAX RESOURCES OF MUNICIPALITIES AND CONTINUING A PORTION OF THE PROGRAM OF STATE AID FOR MUNICIPAL PURPOSES; AND PROVIDING FOR AN EFFECTIVE DATE." IN THE FORM OF HOUSE BILL NO. 843.

WHEREAS, House Bill No. 843, would not distribute State Revenue Sharing strictly on a per capita basis with the remaining 25% allocated according to miles of road maintained and number of health facilities and hospitls, but would improve the allocation system and revenue raising for the benefit of home rule and general law municipalities by providing a more equitable allocation of financial resources among municipalities, and to assure no municipality would suffer impoverishment of necessary public services because of chance location of taxable wealth in the State, and

WHEREAS, this bill would accomplish this by implementing an equalization formula that would base entitlement due each municipality on its population, relative to general revenue and local tax efforts, and

WHEREAS, Bethel City Council believes that the passage of this bill would distribute State Revenue Sharing dollars on a much more equitable basis than the system presently utilized.

NOW THEREFORE, be it resolved that the City of Bethel, Alaska endorses House Bill No. 843, "AN ACT PROVIDING FOR EQUALIZATION OF THE TAX RESOURCES OF MUNICIPLITIES AND CONTIUING A PORTION OF THE PROGRAM OF STATE AID FOR MUNICIPAL PURPOSES; AND PROVIDING FOR A EFFECTIVE DATE.", and would support simular legislation if introduced in the Senate, and

BE IT FURTHER RESOLVED that the City of Bethel encourages the State Legislature to pass and approve this legislation.

PASSED AND APPROVED by the Bethel City Council this 21 day of March, 1978.

Re: House Bill 483

Dear Sally:

This is to follow up my telephone conversation January 24th with your secretary concerning HB 483. You inquired concerning the bill generally, and particularly Sections 1 and 13. As you know, HB 483 was submitted strictly as a clarification or cleanup bill. Section 1, however, does add something new to the first class borough incorporation process. The addition is, however, designed only to eliminate what is now a cumbersome process. Since neither second or third class boroughs are now authorized to adopt home rule charters, this amendment is not and should not be applicable to them. There seems to be little reason why, if the residents of the area desire it, that the incorporation and home rule charter process should not be initiated at the same election. To require two elections simply adds to the time lag and cost. Since the incorporation process itself requires petition, review by Department of C&RA, and a hearing in the area by the Local Boundary Commission with its report prior to the election, it would seem highly unlikely that any resident would be unaware of the issues at the time of the election. I think that Section 1 is very worthwhile and in keeping with a policy of avoiding needless frustration and cost without jeopardizing adequate notice and communication to citizens.

HB 483

As to Section 13, this simply extends to municipalities a device which the State has used considerably. It is included in HB 483 only because of the apparent violation of the one subject rule caused by its inclusion in Chapter 56 SLA 1976. This provision is of some interest in Fairbanks because of the possiblity of its use for funding of the Fairbanks Memorial Hospital. Without going into the discussion as to whether Section 13 could be better written to better serve its goals, since this is a curative bill I do not see any particular problem with including it. The mechanism of public corporations for financing is not uncommon throughout the United States and provides a desirable flexibility. To delete this section from the bill might indicate an intent of the Legislature not to permit the utilization of public corporations for community facilities and have a chilling effect on plans which might be in the evolution process. It would seem to me that there is little likelihood of a massive rush to make use of this provision and certainly if there were foreseeable problems, the Legislature could deal with them at a later time.

I hope that this has been of some assistance to you.

Very truly yours,

March 23, 1978

Ms. Lisa Rudd
Chairman
House Community Regional
Affairs Committee
Pouch Y
Juneau, Alaska 99811

Dear Mrs. Rudd:

On behalf of the Ketchikan Gateway Borough I would like to express our interest in passage of HB 855 relating to public corporations or other municipal instrumentalities.

The provisions of this bill were incorporated in another bill which was passed in the last session and as I understand there is a question of legality of these provisions because the bill passed covered two subjects.

The City of Ketchikan and the Ketchikan Gateway Borough have been discussing a joint Transportation Authority for the City ports and the Borough airport which is possible, as I understand, for a home rule municipality such as our City, however, the limitations of a second class borough do not enable us to create such an authority. Therefore, we would like to encourage re-passage of this enabling legislation in order that the legal avenues are available to us should we choose.

Thank you.

Sincerely,

HB855

MEMORANDUM

February 16, 1978

SUBJECT: Brief history of AS 29.59

TO: Representative Nels A. Anderson, Jr.

FROM: John B. Chenoweth
Legislative Counsel

My recollection of the circumstances relating to the adoption and taking effect of the bill embodying this provision is this:

In mid-session of 1976, Bob Dupere called to the attention of the Senate Community and Regional Affairs Committee the proposal by the IRS to tighten regulations defining the tax-exempt status of public corporations. Dupere has, of course, a working knowledge of municipal finance with respect to Alaska's local governments, and appreciated the potential problems that would have been presented under the particular changes then under consideration by the IRS. His suggestion to meet the problems was to make clear that municipalities had the authority to establish public corporations for carrying out specific municipal purposes, to protect the tax-exempt status (insofar as that was possible) of these creatures in the event local governments determined to make use of public corporations to meet public purposes or needs. At the time, as I recall, the possibility of establishment of a public corporation for hospital care was under active consideration, as, I think, was the proposal to use municipal authority to provide public services to major industrial users.

At any rate, the bill was drafted and presented. Committee members endorsed the attachment of the provision to a bill offered by the governor making technical amendments to the existing authority of the Alaska Municipal Bond Bank Authority. I do not recall whether the provision was added on to the governor's bill in anticipation of possible veto of the same provision standing alone, or whether it was added because, on that day, the governor's bill happened to present itself as a handy vehicle. That is where it was put — but in redrafting the bill to carry the amendment, the draftsman neglected to conform the title.

The governor signed the bill into law. However, in a most unusual move, his transmittal letter to the Legislature pointed out the problem posed by the failure to limit the bill to one subject and to conform the title to the substantive provisions of the amended bill:

> "I have signed the following bill and am transmitting the enrolled and engrossed copies to the Lieutenant Governor's Office for permanent filing:
>
> SENATE COMMITTEE SUBSTITUTE FOR
> COMMITTEE SUBSTITUTE FOR
> HOUSE BILL NO. 674
> amended Senate (Chapter 56, SLA 1976)
>
> Even though I have signed this bill into law, I have been advised by the Attorney General that the inclusion of Sec. 4 in the bill violates Article II, Section 13 of the Alaska Constitution. This provision requires that bills are to be confined to one subject and that the subject be expressed in the title. Accordingly, the Attorney General has advised that Sec. 4 of the bill is void and of no effect.
>
> I am bringing this matter of the Attorney General's advise (sic) to your attention so that those legislators who were relying on Sec. 4 to accomplish some objective may be notified as to its probable effect. Those legislators may then want to take appropriate action such as introducing new legislation to cover the subject set forth in Sec. 4 of the bill."

1976 House Journal, at p. 1280.

I have to question why the Attorney General determined that only section 4 of the legislation, that section adding what is now AS 29.59, was "void and of no effect" -- why, in fact, the entire bill was not tainted with the same objection -- and whether, for that reason, the opinion rendered to the governor is correct. Nevertheless, it is the closing paragraph of the governor's transmittal letter which the provision designated "*Sec. 13" in the original version of HB 483 is intended to address.

Assuming that the governor's statement, based on the attorney general's advice, is correct, then it seems that you have two courses open: Repeal AS 29.59 or re-enact it, with or without substantive amendment. At least as to any municipality which may have acted in reliance on the section, or which may in the future, I think it desirable, in response to the governor's invitation, that the legislature act, for inaction only maintains the "cloud" on AS 29.59 first pointed out in the above-cited transmittal letter.

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M

March 17, 1978

SUBJECT: HB 855: relating to public corporations and other instrumentalities of municipal government. (Work Order No. 5187)

TO: Representative Lisa Rudd, Chairperson
House Community and Regional Affairs Committee

FROM: John B. Chenoweth
Legislative Counsel

You have posed four questions with reference to HB 855 which bear upon the use by local governments of public agencies as a means by which to issue obligations on a tax-exempt basis. HB 855 would re-enact provisions of AS 29.59, specifically authorizing public corporations or like instrumentalities established by municipal governments to issue obligations in order to fund the costs of construction of public facilities. The reasons favoring re-enactment of AS 29.59 are alluded to in my memorandum to Representative Nels Anderson of February 16, attached to this memorandum.

The statutory provision which eventually was enacted into law as AS 29.59 was first drafted during the 1976 session in response to proposed additions to and amendments of regulations by the US Treasury. The changes proposed, incorporated into regulations relating to definition and administration of the Internal Revenue Code, would have defined limits which public agencies established by local governments would have been required to satisfy in order to gain or retain the benefit of tax-exempt interest on the agent's obligations to the extent enjoyed by the obligations of the municipality which were directly issued. The purpose of the proposed rule change was, at least in the view of the Treasury, that public agencies which were issuing the obligations be in actual fact substantially controlled and directed by the local government unit or units in whose behalf they were issuing obligations. In the language of the Treasury-prepared synopsis of the regulations

> In general, the proposed amendments [to IRS regulations] provide that only a constituted authority of a state or local government unit may issue obligations on behalf of the unit. The authority must be specifically authorized pursuant to state law to issue obligations on behalf of the unit to accomplish a public purpose of the unit. The authorization must specify the public purpose of the governmental unit on behalf of which the authority is authorized to issue obligations and also must create the authority or provide that the governmental unit may create the authority. The authority must be created and operated solely to accomplish a public purpose of the governmental unit.
>
> The proposed amendment requires a closer connection between the authority and the governmental unit including control of the authority's board and organizational or supervisory control over the authority of the governmental unit.

AS 29.59 was drafted to respond to the threshhold requirements of the then-proposed federal regulation changes, namely, the requirement that the public agencies be specifically authorized in applicable state law, that they be authorized to undertake or fulfill a public purpose, that the public purpose for which authorized be specified, and that the grant of authority represent a grant for only the accomplishment of that public purpose.

The stringent requirements of the regulations proposed by the Treasury were not adopted. Rather, former provisions of the Code of Federal Regulations relating to tax-exempt interest paying obligations were substantially continued.

The current law on the subject appears to be this --

The applicable statute is 26 USC 103(a):

> (a) GENERAL RULE. Gross income does not include interest on --
>
> (1) the obligations of a State, a Territory, or a possession of the United States, or any political subdivision of any of the foregoing, or of the District of Columbia;. . .

The statutory exemption embraces debt obligations of local governments, whether issued "directly" or "indirectly," that is, through the use of a public corporation as agent:

> Obligations issued by or on behalf of any State or local governmental unit by constituted authorities empowered to issue such obligations are the obligations of such a unit. . . .

and

> The term "political subdivision", for purposes of this section [26 CFR §1.103-1], denotes any division of any State or local governmental unit which is a municipal corporation or which has been delegated the right to exercise part of the sovereign power of the unit. . . .

26 CFR §1.103-1(b).

I

Your first question -- whether the same concerns which prompted introduction and enactment of the legislation in 1976 are still of concern -- is probably better answered in the negative. The stringent requirements which the Treasury was suggesting in the amendments and changes mentioned earlier in this monograph have not been adopted and are not now under active consideration. Assuming that the principal factor motivating HB 674's introduction in the 1976 session was to obviate anticipated challenges to the authority of agencies or corporations established by local governments in Alaska to issue tax-exempt obligations for the benefit of the local government -- and I think it is a fairly good assumption -- the apparent urgency of the situation then does not control or affect events now.

II

The answer to the first part of your second question, insofar as it applies to tax-exempt obligations in general (exclusive of the problems of the use of industrial development bonds), is likewise "no." The Treasury, in 1976, did not adopt the regulations as contemplated at that time; the existing body of regulation -- including, of course, revenue rulings and the body of case law -- has been continued forward with few substantive changes.

III

Your third question departs from further examination of applicable regulations of the IRS. It presents the question of whether there is a state constitutional "check" on the establishment of public corporations or agencies by Alaska municipalities to undertake public purposes. Your question cites the general statement of policy contained in Article X, sec. 1 of the state constitution, which recounts the philosphy underlying the existing local government article:

> The purpose of this article is to provide for maximum local self-government with a minimum of local government units, and to prevent duplication of tax-levying jurisdictions. A liberal construction shall be given to the powers of local government units.

The reference to "units" in this section is unusual -- the term appears nowhere else in the article. The next following section, section 2, describes the requirement that "all local government powers . . . be vested in boroughs and cities," to the exclusion of any other kind or species of local authority having the very important power of taxation. By virtue of the interposition of the phrase "powers of local government units" in section 1 and the requirement imposed by section 2 that full local government powers devolve only upon boroughs and cities, and based upon the transcript and record of proceedings of the constitutional convention, I conclude that the use of the word "units" in the first section was intended to embrace only the two general types of local government authorized. It was not thought that the limitation would apply to the establishment of mechanisms by the local government units themselves after they were incorporated. Quite the contrary: the powers of local government units were intended to be liberally construed (Art. X, sec. 1), and the authority of a political subdivision to establish a public enterprise or public corporation in furtherance of legitimate public purposes is at least alluded to in Article IX, sec. 11, and appears there and in commentary in the record of the constitutional convention without restriction as to number or kind of agency. In short, I believe that the state constitutional provision enunciating a policy of a "minimum of local government units" may not be understood to be a limitation on the use of public enterprises or corporations -- public agencies, generally -- to supplement direct provision of public services by local governments. Other circumstances or conditions may compel that conclusion: the constitutional provision cited, in my opinion, does not.

IV

Your concluding query requires examination of tax-levying authority under AS 29.59 and existing limitations on the authority of local governments to levy property taxes. The tax limitations of AS 29.53.050 appear to be inapplicable to taxes of a public corporation or similar public agency established by a municipality under authority granted by AS 29.59. There is no direct relationship between the two statutory provisions mentioned such that the limitations section of AS 29.53.050 need be extended and made applicable to public agencies. The grant of authority set out in AS 29.59 does not extend to the public corporation or similar instrumentality the right to levy taxes. That right is limited, by the state constitution, to the levy and collection by cities and boroughs only. Thus, the right of the public corporation to issue obligations on behalf of the municipality for public purposes, if understood as having the effect of using the public corporation as a "front" for the municipality, cannot circumvent the limitation on delegation of taxing authority only to cities and boroughs, requiring the municipality to raise necessary revenues to pay off obligations of the corporation within the general limitation of AS 29.53. Similarly, if the right granted be seen as one by which a public corporation is authorized to issue <u>its</u> obligations for public purposes in furtherance of the responsibilities of municipalities, the grant of authority does not carry with it the right to levy and collect taxes for the purpose, and concern about conflict with AS 29.53 is unfounded. (The latter is analogous, at the local level, to the relationship between the State and ASHA, a public corporation: ASHA bonds are strictly revenue bonds; ASHA is not authorized to offer obligations on the strength of the full faith and credit of the people of Alaska, nor is the State legally obliged to bail ASHA out of any financial embarrassments.) In summary, in no instance can I conceive of a public corporation established under AS 29.59 having a valid argument on which to enforce a levy in excess of that provided for generally in statute.

V

I do not want to leave points 1 and 2 of this paper without mentioning two other matters:

While it is true, of course, that the failure of the IRS to adopt the regulations proposed in early 1976 constitutes a change of circumstance over the intervening two-year period,

it is equally true that, apart from AS 29.59, there is no generally applicable provision by which a city or borough is granted authority to establish a corporation or instrumentality to use as an agent in the issuance of debt obligations on its behalf. I am not aware that any Alaska municipality has placed reliance on the provision in the two years it has appeared in the statutes. Repeal of the provision, or even non-alteration, probably poses no problem. However, though AS 29.59 was drafted and enacted under circumstances quite different than those presently known, to the extent that a clear statement of authority for the establishment of a corporation for the purposes indicated is desirable, the provision does serve that purpose. The committee will, of course, enunciate the policy: I did not want to leave the impression that, because circumstances have changed, the statute no longer serves a useful role.

Secondly, I want to caution that this memo is not intended to address or suggest disposition of the issues which surround the very complicated subject of tax treatment of the interest earned on industrial development bonds. (In requesting your questions in writing, I wanted to try to assure that the questions could be answered in a manner which did not require extended treatment of the handling of industrial development bonds, a relatively more common means of involving public purpose financing through the intermediary of a public corporation, but one which is, in terms of tax-exempt eligibility, far more complicated.) The tax-exempt status of industrial development bonds -- defined, generally, as bonds whose proceeds are used in an activity engaged in for profit by other than a governmental unit or other than an organization exempt from tax (i.e. corporations with nonprofit status under §501(c)(3)) and on which either the payment of the principal and interest is secured in whole or in part by property to the payments received from the property are pledged for the payment of principal and interest -- is subject to far more extended and extensive limitations that those of bonds which would be issued by public corporations or instrumentalities whose existence is authorized under AS 29.59.

I trust that this fully responds to your questions.

M E M O R A N D U M

February 16, 1978

SUBJECT: Brief history of AS 29.59

TO: Representative Nels A. Anderson, Jr.

FROM: John B. Chenoweth
Legislative Counsel

My recollection of the circumstances relating to the adoption and taking effect of the bill embodying this provision is this:

In mid-session of 1976, Bob Dupere called to the attention of the Senate Community and Regional Affairs Committee the proposal by the IRS to tighten regulations defining the tax-exempt status of public corporations. Dupere has, of course, a working knowledge of municipal finance with respect to Alaska's local governments, and appreciated the potential problems that would have been presented under the particular changes then under consideration by the IRS. His suggestion to meet the problems was to make clear that municipalities had the authority to establish public corporations for carrying out specific municipal purposes, to protect the tax-exempt status (insofar as that was possible) of these creatures in the event local governments determined to make use of public corporations to meet public purposes or needs. At the time, as I recall, the possibility of establishment of a public corporation for hospital care was under active consideration, as, I think, was the proposal to use municipal authority to provide public services to major industrial users.

At any rate, the bill was drafted and presented. Committee members endorsed the attachment of the provision to a bill offered by the governor making technical amendments to the existing authority of the Alaska Municipal Bond Bank Authority. I do not recall whether the provision was added on to the governor's bill in anticipation of possible veto of the same provision standing alone, or whether it was added because, on that day, the governor's bill happened to present itself as a handy vehicle. That is where it was put -- but in redrafting the bill to carry the amendment, the draftsman neglected to conform the title.

The governor signed the bill into law. However, in a most unusual move, his transmittal letter to the Legislature pointed out the problem posed by the failure to limit the bill to one subject and to conform the title to the substantive provisions of the amended bill:

> "I have signed the following bill and am transmitting the enrolled and engrossed copies to the Lieutenant Governor's Office for permanent filing:
>
> SENATE COMMITTEE SUBSTITUTE FOR
> COMMITTEE SUBSTITUTE FOR
> HOUSE BILL NO. 674
> amended Senate (Chapter 56, SLA 1976)
>
> Even though I have signed this bill into law, I have been advised by the Attorney General that the inclusion of Sec. 4 in the bill violates Article II, Section 13 of the Alaska Constitution. This provision requires that bills are to be confined to one subject and that the subject be expressed in the title. Accordingly, the Attorney General has advised that Sec. 4 of the bill is void and of no effect.
>
> I am bringing this matter of the Attorney General's advise (sic) to your attention so that those legislators who were relying on Sec. 4 to accomplish some objective may be notified as to its probable effect. Those legislators may then want to take appropriate action such as introducing new legislation to cover the subject set forth in Sec. 4 of the bill."

1976 House Journal, at p. 1280.

I have to question why the Attorney General determined that only section 4 of the legislation, that section adding what is now AS 29.59, was "void and of no effect" -- why, in fact, the entire bill was not tainted with the same objection -- and whether, for that reason, the opinion rendered to the governor is correct. Nevertheless, it is the closing paragraph of the governor's transmittal letter which the provision designated "*Sec. 13" in the original version of HB 483 is intended to address.

Assuming that the governor's statement, based on the attorney general's advice, is correct, then it seems that you have two courses open: Repeal AS 29.59 or re-enact it, with or without substantive amendment. At least as to any municipality which may have acted in reliance on the section, or which may in the future, I think it desirable, in response to the governor's invitation, that the legislature act, for inaction only maintains the "cloud" on AS 29.59 first pointed out in the above-cited transmittal letter.

STATE OF ALASKA
THE LEGISLATURE

POUCH Y - STATE CAPITOL
JUNEAU, ALASKA 99811
907-465-3800

LEGISLATIVE AFFAIRS AGENCY

MEMORANDUM March 17, 1978

SUBJECT: HB 855: relating to public corporations and other instrumentalities of municipal government. (Work Order No. 5187)

TO: Representative Lisa Rudd, Chairperson
House Community and Regional Affairs Committee

FROM: John B. Chenoweth
Legislative Counsel

You have posed four questions with reference to HB 855 which bear upon the use by local governments of public agencies as a means by which to issue obligations on a tax-exempt basis. HB 855 would re-enact provisions of AS 29.59, specifically authorizing public corporations or like instrumentalities established by municipal governments to issue obligations in order to fund the costs of construction of public facilities. The reasons favoring re-enactment of AS 29.59 are alluded to in my memorandum to Representative Nels Anderson of February 16, attached to this memorandum.

The statutory provision which eventually was enacted into law as AS 29.59 was first drafted during the 1976 session in response to proposed additions to and amendments of regulations by the US Treasury. The changes proposed, incorporated into regulations relating to definition and administration of the Internal Revenue Code, would have defined limits which public agencies established by local governments would have been required to satisfy in order to gain or retain the benefit of tax-exempt interest on the agent's obligations to the extent enjoyed by the obligations of the municipality which were directly issued. The purpose of the proposed rule change was, at least in the view of the Treasury, that public agencies which were issuing the obligations be in actual fact substantially controlled and directed by the local government unit or units in whose behalf they were issuing obligations. In the language of the Treasury-prepared synopsis of the regulations

> In general, the proposed amendments [to IRS regulations] provide that only a constituted authority of a state or local government unit may issue obligations on behalf of the unit. The authority must be specifically authorized pursuant to state law to issue obligations on behalf of the unit to accomplish a public purpose of the unit. The authorization must specify the public purpose of the governmental unit on behalf of which the authority is authorized to issue obligations and also must create the authority or provide that the governmental unit may create the authority. The authority must be created and operated solely to accomplish a public purpose of the governmental unit.
>
> The proposed amendment requires a closer connection between the authority and the governmental unit including control of the authority's board and organizational or supervisory control over the authority of the governmental unit.

AS 29.59 was drafted to respond to the threshhold requirements of the then-proposed federal regulation changes, namely, the requirement that the public agencies be specifically authorized in applicable state law, that they be authorized to undertake or fulfill a public purpose, that the public purpose for which authorized be specified, and that the grant of authority represent a grant for only the accomplishment of that public purpose.

The strin ent requirements of the regulations proposed by the Treas ry were not adopted. Rather, former provisions of the Code f Federal Regulations relating to tax-exempt interest paying obligations were substantially continued.

The current law on the subject appears to be this --

The applicable statute is 26 USC 103(a):

> (a) GENERAL RULE. Gross income does not include interest on --
>
> (1) the obligations of a State, a Territory, or a possession of the United States, or any political subdivision of any of the foregoing, or of the District of Columbia;. . .

The statutory exemption embraces debt obligations of local government whether issued "directly" or "indirectly," that is, through the use of a public corporation as agent:

> Obligations issued by or on behalf of any State or local governmental unit by constituted authorities empowered to issue such obligations are the obligations of such a unit. . . .

and

> The term "political subdivision", for purposes of this section [26 CFR §1.103-1], denotes any division of any State or local governmental unit which is a municipal corporation or which has been delegated the right to exercise part of the sovereign power of the unit. . . .

26 CFR §1.103-1(b).

I

Your first question -- whether the same concerns which prompted introduction and enactment of the legislation in 1976 are still of concern -- is probably better answered in the negative. The stringent requirements which the Treasury was suggesting in the amendments and changes mentioned earlier in this monograph have not been adopted and are not now under active consideration. Assuming that the principal factor motivating HB 674's introduction in the 1976 session was to obviate anticipated challenges to the authority of agencies or corporations established by local governments in Alaska to issue tax-exempt obligations for the benefit of the local government -- and I think it is a fairly good assumption -- the apparent urgency of the situation then does not control or affect events now.

II

The answer to the first part of your second question, insofar as it applies to tax-exempt obligations in general (exclusive of the problems of the use of industrial development bonds), is likewise "no." The Treasury, in 1976, did not adopt the regulations as contemplated at that time; the existing body of regulation -- including, of course, revenue rulings and the body of case law -- has been continued forward with few substantive changes.

III

Your third question departs from further examination of applicable regulations of the IRS. It presents the question of whether there is a state constitutional "check" on the establishment of public corporations or agencies by Alaska municipalities to undertake public purposes. Your question cites the general statement of policy contained in Article X, sec. 1 of the state constitution, which recounts the philosphy underlying the existing local government article:

> The purpose of this article is to provide for maximum local self-government with a minimum of local government units, and to prevent duplication of tax-levying jurisdictions. A liberal construction shall be given to the powers of local government units.

The reference to "units" in this section is unusual -- the term appears nowhere else in the article. The next following section, section 2, describes the requirement that "all local government powers . . . be vested in boroughs and cities," to the exclusion of any other kind or species of local authority having the very important power of taxation. By virtue of the interposition of the phrase "powers of local government units" in section 1 and the requirement imposed by section 2 that full local government powers devolve only upon boroughs and cities, and based upon the transcript and record of proceedings of the constitutional convention, I conclude that the use of the word "units" in the first section was intended to embrace only the two general types of local government authorized. It was not thought that the limitation would apply to the establishment of mechanisms by the local government units themselves after they were incorporated. Quite the contrary: the powers of local government units were intended to be liberally construed (Art. X, sec. 1), and the authority of a political subdivision to establish a public enterprise or public corporation in furtherance of legitimate public purposes is at least alluded to in Article IX, sec. 11, and appears there and in commentary in the record of the constitutional convention without restriction as to number or kind of agency. In short, I believe that the state constitutional provision enunciating a policy of a "minimum of local government units" may not be understood to be a limitation on the use of public enterprises or corporations -- public agencies, generally -- to supplement direct provision of public services by local governments. Other circumstances or conditions may compel that conclusion: the constitutional provision cited, in my opinion, does not.

IV

Your concluding query requires examination of tax-levying authority under AS 29.59 and existing limitations on the authority of local governments to levy property taxes. The tax limitations of AS 29.53.050 appear to be inapplicable to taxes of a public corporation or similar public agency established by a municipality under authority granted by AS 29.59. There is no direct relationship between the two statutory provisions mentioned such that the limitations section of AS 29.53.050 need be extended and made applicable to public agencies. The grant of authority set out in AS 29.59 does not extend to the public corporation or similar instrumentality the right to levy taxes. That right is limited, by the state constitution, to the levy and collection by cities and boroughs only. Thus, the right of the public corporation to issue obligations on behalf of the municipality for public purposes, if understood as having the effect of using the public corporation as a "front" for the municipality, cannot circumvent the limitation on delegation of taxing authority only to cities and boroughs, requiring the municipality to raise necessary revenues to pay off obligations of the corporation within the general limitation of AS 29.53. Similarly, if the right granted be seen as one by which a public corporation is authorized to issue its obligations for public purposes in furtherance of the responsibilities of municipalities, the grant of authority does not carry with it the right to levy and collect taxes for the purpose, and concern about conflict with AS 29.53 is unfounded. (The latter is analogous, at the local level, to the relationship between the State and ASHA, a public corporation: ASHA bonds are strictly revenue bonds; ASHA is not authorized to offer obligations on the strength of the full faith and credit of the people of Alaska, nor is the State legally obliged to bail ASHA out of any financial embarrassments.) In summary, in no instance can I conceive of a public corporation established under AS 29.59 having a valid argument on which to enforce a levy in excess of that provided for generally in statute.

V

I do not want to leave points 1 and 2 of this paper without mentioning two other matters:

While it is true, of course, that the failure of the IRS to adopt the regulations proposed in early 1976 constitutes a change of circumstance over the intervening two-year period,

it is equally true that, apart from AS 29.59, there is no generally applicable provision by which a city or borough is granted authority to establish a corporation or instrumentality to use as an agent in the issuance of debt obligations on its behalf. I am not aware that any Alaska municipality has placed reliance on the provision in the two years it has appeared in the statutes. Repeal of the provision, or even non-alteration, probably poses no problem. However, though AS 29.59 was drafted and enacted under circumstances quite different than those presently known, to the extent that a clear statement of authority for the establishment of a corporation for the purposes indicated is desirable, the provision does serve that purpose. The committee will, of course, enunciate the policy: I did not want to leave the impression that, because circumstances have changed, the statute no longer serves a useful role.

Secondly, I want to caution that this memo is not intended to address or suggest disposition of the issues which surround the very complicated subject of tax treatment of the interest earned on industrial development bonds. (In requesting your questions in writing, I wanted to try to assure that the questions could be answered in a manner which did not require extended treatment of the handling of industrial development bonds, a relatively more common means of involving public purpose financing through the intermediary of a public corporation, but one which is, in terms of tax-exempt eligibility, far more complicated.) HB
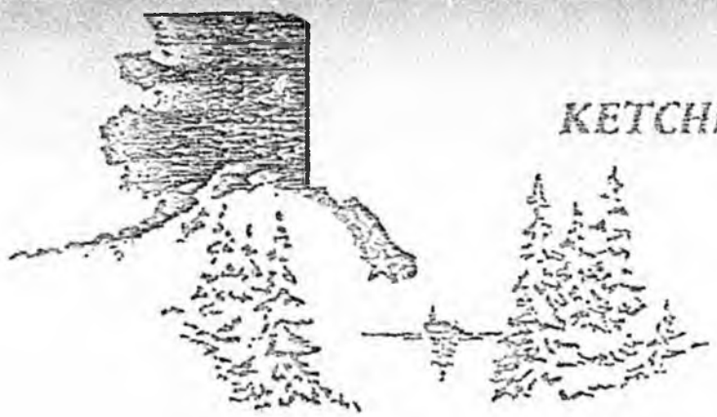
873



KETCHIKAN GATEWAY BOROUGH
344 FRONT STREET
KETCHIKAN, ALASKA 99901

March 27, 1978

Re: HB 873

The Honorable Lisa Rudd
Chairman
House Community & Regional
Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Chairman Rudd:

In our borough, a second-class borough, there are twelve (12) elected officials: mayor, elected-at-large; four (4) assemblymen, elected-at-large from the area outside the City of Ketchikan; a seven (7) assemblymen appointed from the City Council. As a second-class borough the provisions of AS 29.23.530 apply. All our twelve (12) elected officials have 3-year staggered terms. Under the existing provisions of AS 29.23.530 in order to effect an entire salary change for all elected official positions, three elections must take place before all members are receiving the same salary.

A Ketchikan Gateway Borough Assembly salary change (from $100 to $150) commenced with the October, 1976 election and will be completed when those elected in October, 1978 take office at which time all eleven will again be receiving the same compensation.

Having observed this transition from $100 to 150 per month, it is apparent that among the elected officials, the procedure involved is a point of irritation as all have the same responsibilities.

I believe there are sufficient checks in our local government structures to preclude the actions of elected officials from becoming actions directed toward overt personal

gain at the expense of the local taxpayers. Those local governments to which the existing requirements apply are those smaller municipalities where actions of the elected officials are constantly subject to very close public scrutiny. Elected officials salaries must be set by ordinance on which public hearings are held, these salaries are included in the annual budget on which public hearings are held, and the appropriations needed to pay these salaries are made by ordinance on which public hearing are held.

Therefore, I am of the opinion that the present provisions of AS 29.23.530 are unduly restrictive and I support HB 873 as proposed.

Sincerely,

Judith A. Slajer
Borough Manager

RE: HB 873 "An act relating to the salaries of elected municipal officials"

Dear Ms. Rudd:

I wish to present testimony in favor of passage of HB 873.

Having had the privilege of being elected a full time Borough Chairman in October of 1968, when the budget was set in June of 1968 for a part time Borough Chairman, I found that compensation could not be increased because of the wording in the statute. I am very happy to see HB 873 introduced as this would amend this restriction.

I concur that wages should not be decreased, as a person running for that office naturally would expect to receive the compensation shown in the budget, but should, on the other hand, not be restricted from receiving just compensation for his efforts.

Very truly yours,

JOHN A. CARLSON
Borough Mayor

BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

HOUSE BILL NO. 874

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to a study of provision of local government services in the unorganized borough."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. FINDINGS. (a) Article X of the Constitution of the State of Alaska provides for local government in the state. It states: "The purpose of this article is to provide for maximum local government with a minimum of local government units, and to prevent duplication of tax-levying jurisdictions." It also establishes a local boundary commission and requires establishment in the executive branch of the state government of an agency to advise and assist local government.

(b) The constitution became operative on January 3, 1959. Although boroughs have been established in certain areas of the state and cities exist in the unorganized borough, the purpose of the local government article has not otherwise been implemented, leaving large areas of the state without functioning local governments. As a result of the need for services and desirability for local control of provision of these services, single purpose agencies funded entirely by the state have been created to fill the vacuum. These agencies sometimes have overlapping boundaries thereby diluting responsiveness to the public.

(c) The factual basis for more fully implementing the constitutional mandate is not available. A study by the Local Boundary Commission, aided by the Department of Community and Regional Affairs and an advisory committee with public participation, would provide needed data.

* Sec. 2. STUDY. The Local Boundary Commission shall conduct a study on

provision of local government services in the unorganized borough. The study shall consider

(1) whether there are areas which should be incorporated as local government units;

(2) whether there are areas that should be annexed to existing local government unit

(3) whether there are areas which should be established by the legislature as service areas, and, if so, what services should be provided to each area;

(4) whether the legislature should consider establishing new classes of local government in the state, or should make changes in existing forms;

(5) methods of financing newly created local government units from both state and local finances;

(6) other matters the commission considers relevant.

* Sec. 3. STAFF SUPPORT. The Department of Community and Regional Affairs shall provide staff services to the Local Boundary Commission for performance of the study, but the commission may, within appropriations available for the purpose, contract with other persons for development of data or recommendations on specific matters.

* Sec. 4. ADVISORY COMMITTEE. An advisory committee to the Local Boundary Commission for the study is established. The committee is composed of the chairmen of the senate and house community and regional affairs committees, three members who reside in the unorganized borough outside cities, two members representing municipalities in the unorganized borough, one member representing school boards in borough or city school districts in the unorganized borough, and one member representing school boards in regional educational attendance areas. The committee shall elect its own chairman. The committee shall review recommendations proposed by the commission, comment to

the commission on each proposed recommendation, and perform other duties as assigned by the Local Boundary Commission.

* Sec. 5. PUBLIC HEARING. The Local Boundary Commission in conjunction with the advisory committee shall hold public hearings within the unorganized borough. At least one hearing shall be held in each judicial district of the state and other hearings may be held at the discretion of the commission.

* Sec. 6. REPORT. The Local Boundary Commission shall prepare a final report with findings and recommendations and submit the report and recommendations to the governor and, through the Legislative Council, to the legislature on or before September 1, 1979.

HB 875 Payments to 1st class and home rule municipalities from National Forest revenues.

This bill adds a new section to extend to first class and home rule cities in the unorganized borough a portion of the revenues received from National Forest lands. The law presently shares these revenues with boroughs for support of schools and roads. Payments are based on national forest acreage within the municipalities.

The Federal law, 16 U.S.C. 500, as cited in the statute, gives a portion of the national forest stumpage revenues to states for distribution to "counties" for the support of schools and roads. When Alaska became a state, it was thought that boroughs were Alaska's answer to counties and so the revenue was shared with boroughs.

Obviously, boroughs are not the only municipalities which support schools and roads, but since the federal law specifies counties, and it is felt that the federal government will not accept cities in the unorganized borough as a special form of county, HB 875 is worded so as to get around the specifics of the federal law. In HB 875 the cities will receive a share of the national forest revenues from the general fund. The general fund contains the remainder of the national forest shared revenues after some have been dispursed to boroughs. In other words, it is not going directly to the cities, but is appropriated at a later date to them from the general fund.

DC&RA handles the dispursement of funds (which they receive from the Forest Service) to boroughs. They will give us a fiscal note on the impact of this legislation. An estimate is about 8 cities.

JUN

REP REPRESENTATIVE RUDD

THE PURPOSE OF THIS WIRE IS TO INFORM YOU THAT THE MUNICIPALITY OF ANCHORAGE STRONGLY SUPPORTS HOUSE BILL 555 & IS URGES ITS FAVORABLE CONSIDERATION BY YOUR COMMITTEE. THIS LEGISLATION WOULD IMPLEMENT THE QUOTE OPERATION BREAKTHROUGH UNQUOTE PROGRAM IN ANCHORAGE AS WELL AS PROVIDING IMPETUS FOR SIMILAR PROJECTS IN OTHER COMMUNITIES THROUGHOUT THE STATE.

I AM CERTAIN I DO NOT NEED TO REMIND YOU OF THE EVER PRESENT DILEMMA POSED FOR LOCAL GOVERNMENT BY DEMANDS FOR SERVICES AND CAPITAL IMPROVEMENTS ON THE ONE HAND AND THE NEED TO MINIMIZE LOCAL TAX BURDENS ON THE OTHER. PROGRAMS SUCH AS BREAKTHROUGH CAN SERVE AS AN EFFORT BY CONCERNED CITIZENS TO OVERCOME THIS DILEMMA AND TO PLACE RESPONSIBILITY FOR A DECISION ON MAJOR COMMUNITY IMPROVEMENTS BEFORE THE VOTERS.

GIVEN THE ABILITY OF THE STATE TO BORROW CAPITAL IMPROVEMENT FUNDS

AT RATES SUBSTANTIALLY BELOW THOSE AVAILABLE TO LOCAL GOVERNMENT, AND THE INCREASING REVENUE BEING MADE AVAILABLE FROM RESOURCE DEVELOPMENT, THE TIME IS PARTICULARLY RIPE FOR A COMMITMENT BY THE STATE TO ASSIST LOCAL GOVERNMENT TAXPAYERS IN MAKING THEIR COMMUNITIES, SAFE, PLEASANT AND ATTRACTIVE PLACES. IN ANCHORAGE, BREAKTHROUGH IS RESPONSIBLE FOR URGING THE ASSEMBLY TO PLACE BEFORE THE VOTERS SEVERAL BOND PROPOSITIONS WHICH, IF ENACTED, WOULD BE USED TO MATCH STATE FUNDS PROVIDED UNDER HB886 TO PROVIDE NEEDED COMMUNITY IMPROVEMENTS.

MANY OF THE PROJECTED IMPROVEMENTS SUCH AS CULTURAL AND SPORTS CENTERS, ROAD IMPROVEMENT, AND LIBRARIES AND MUSEUMS WILL BENEFIT THOSE RESIDENTS OF THE STATE WHO VISIT OR TRAVEL THROUGH ANCHORAGE, IN ADDITION TO PERMANENT RESIDENTS OF THE MUNICIPALITY. PERHAPS MORE IMPORTANTLY, PASSAGE OF HB 886 WILL, AS NOTED ABOVE, MATERIALLY PROVIDE INCENTIVE IN OTHER COMMUNITIES FOR GROUPS SIMILAR TO BREAKTHROUGH TO TRY TO OVERCOME THE DILEMMA BETWEEN TAX BURDEN AND COMMUNITY NEEDS AND TO MAKE ALASKAN COMMUNITIES MORE ATTRACTIVE TO THOSE OUTSIDE [illegible] ACCURATE STATISTICS AND [illegible] FOR THEIR COMMITTEE.

IF I CAN BE OF OTHER HELP AS BY WAY ASSISTANCE TO THE COMMITTEE, PLEASE DO NOT HESITATE TO CALL MY OFFICE AT 264-4461, OR CONTACT MR. TED [illegible], MUNICIPAL ATTORNEY, AT 264-4317. THANK YOU FOR THE OPPORTUNITY TO COMMENT ON THIS LEGISLATION. (LETTER FORTHCOMING).

Re: House Bill 886

Dear Representative Rudd:

The purpose of this letter is to inform you that the Municipality of Anchorage strongly supports House Bill 886 and urges its favorable consideration by your Committee. This legislation would implement the "Operation Breakthrough" program in Anchorage as well as providing impetus for similar projects in other communities throughout the state.

I am certain I do not need to remind you of the ever present dilemma posed for local government by demands for services and capital improvements on the one hand and the need to minimize local tax burdens on the other. Programs such as Breakthrough represent an effort by concerned citizens to overcome this dilemma and to place responsibility for a decision on major community improvements before the voters.

Given the ability of the state to borrow capital improvement funds at rates substantially below those available to local government, and the increasing revenue being made available from resource development, the time is particularly ripe for a commitment by the state to assist local government taxpayers in making their communities safe, pleasant and attractive places. In Anchorage, Breakthrough is responsible for urging the Assembly to place before the voters several bond propositions which, if enacted, would be used to match state funds provided under HB 886 to provide needed community improvements.

Many of the projected improvements such as cultural and sports centers, road improvement, libraries and museums will benefit those residents of the state who visit or travel through

Anchorage, in addition to permanent residents of the Municipality. Perhaps more importantly, passage of HB 886 will, as noted above, hopefully provide incentive in other communities for groups similar to Breakthrough to try to overcome the dilemma between tax burdens and community needs and to make Alaskan communities equal or superior to those outside in providing adequate services and facilities for their residents.

If I or my staff can be of any assistance to the Committee, please do not hesitate to call my office at 264-4431, or contact Mr. Ted Berns, Municipal Attorney, at 264-4237. Thank you for the opportunity to comment on this legislation.

Sincerely,

MUNICIPALITY OF ANCHORAGE

Honorable Lisa Rudd
Alaska House of Representatives
Pouch V
State Capitol Building
Juneau, Alaska 99811

Dear Lisa:

As indicated, I brought some of our staff together to review the allocation problems you are having with HB 886. As a result, we came up with the following:

1. Question: Although there seems to be support for the presently proposed method of determining local shares under HB 886, the application of the formula results in a $650 million package. The proposed method includes a heavier weighting for smaller, less populated communities. For example, communities with populations of less than 10,000 would receive $3,000 per capita vs. $1,000 per capita for Anchorage. How can we accommodate the originally proposed methodology and stay within $400 million?

   Suggestion: Calculate the relative shares under the proposed methodology. Distribute the $400 million amount pro-rata using the percentages derived from the $650 million allocations. This approach will continue the heavier weightings for small communities. It also has the advantage of being relatively straight forward.

2. Question: The State is concerned about being able to predict the required funding under HB 886 for each fiscal year. How can this be accomplished?

   Suggestion: Establish a ceiling amount for each fiscal year and distribute the $400 million over a eight to ten year period, including one to two years for closing out the program. This would result in something less than $400 million given the present value of an annual allocation over an eight to ten year period.

Suggestion: Each community would be required to present a Capital Improvement Program requesting the funds. The State should have some flexibility in allocating the funds during each fiscal year so that communities who are prepared to proceed can receive available funds. Over the eight to ten year period, no community would receive more than its maximum amount allowable under the formula.

I trust these comments will be of some value to you.

Sincerely,

Douglas C. Weiford
Municipal Manager

/jlc

Municipality of Anchorage
5/78

HB 886: AN ACT RELATING TO STATE AID FOR MUNICIPAL CAPITAL IMPROVEMENT; AND PROVIDING FOR AN EFFECTIVE DATE.

HB 886 would facilitate the "Operation Breal·through" program in Anchorage and provide impetus for similar projects in other communities throughout the state. The Municipality of Anchorage supports this bill.

Local government faces an ever present dilemma posed by demands for services and capital improvements and the need to minimize local tax burdens. Programs such as Breakthrough represent an effort by concerned citizens to overcome this dilemma by placing responsibility for decisions on major community improvements before the voters. Breakthrough is responsible for urging the Anchorage Assembly to place before the voters several bond propositions which would be used to match state funds under HB 886 to provide needed community improvements.

The State can borrow capital improvement funds at rates substantially below those available to local government, and resource development is making increased revenue available to the State. Thus, the time is particularly ripe for a commitment by the State to assist local government taxpayers in making their communities safe, pleasant, and attractive places to live.

Many of Breakthrough's projected improvements such as cultural and sports centers, road improvement, and libraries and museums will benefit those residents of the State who visit or travel through Anchorage as well as the permanent residents of the Municipality.

Perhaps more importantly, HB 886 will provide incentive in other communities for groups similar to Breakthrough to try to overcome the dilemma between tax burdens and community needs. We hope that such groups will make Alaskan communities equal or superior to those Outside in providing adequate services and facilities for their residents.

CS FOR HOUSE BILL NO. 886

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to state aid for municipal capital improvements; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 43.18 is amended by adding new sections to read:

Sec. 43.18.200. INTENT. It is the intent of the legislature that, so long as the state general fund is augmented by a substantial dollar contribution from the development of Alaska's petroleum resources, appropriations be made annually under secs. 200 - 255 of this chapter to share a portion of that resource revenue with municipalities for their capital improvement projects.

Sec. 43.18.205. MUNICIPAL CAPITAL IMPROVEMENT ACCOUNT. The municipal capital improvement account is established. The account consists of appropriations for distribution under secs. 200 - 255 of this chapter to municipalities to assist in paying the costs of eligible municipal capital improvement projects for which no bonding, notes, or other indebtedness was incurred before July 1, 1978.

Sec. 43.18.210. GRANTS TO MUNICIPALITIES. (a) During each fiscal year, the state shall allocate to each municipality in the state an amount equal to 50 per cent of the annual principal and interest owing by that municipality on its general obligation bonded indebtedness for an eligible capital improvement for which bonding, notes or other indebtedness was incurred on or after July 1, 1978, or, if funds are available, make a grant to the municipality of 50 per cent of the costs of the capital improvement which the municipality seeks to construct or

acquire.

(b) The estimated cost of an eligible capital improvement project may not exceed costs developed in accordance with the standards and criteria adopted by the commissioner of the Department of Transportation and Public Facilities under AS 35.10.160 - 35.10.200. State funds may not be committed to nor expended for construction cost overruns or other costs in excess of the original project estimated cost.

(c) Subject to (a) of this section, a municipality may, for a proposed municipal capital improvement eligible for state assistance under this section, obtain from the state a grant for the capital improvement in an amount equal to 50 per cent of the cost of the project or 50 per cent of the amount that would be the local share not financed by other state or federal assistance programs or private grants, whichever is the lesser. The municipal share of the funding of the eligible capital improvement may be obtained by the municipality from any source lawfully available to it, including but not limited to the sale of general obligation bonds.

Sec. 43.18.215. LIMITATION ON GRANTS. (a) No more may be allocated to a municipality from the municipal capital improvement account than

(1) $3,000 per capita on the first 1,000 population;

(2) $2,000 per capita on population over 1,000 but less than 10,000;

(3) $1,000 per capita on population of 10,000 and more.

(b) When a municipality has been allocated the maximum amount provided in (a) of this section for that municipality, it is no longer eligible to obtain grants from the municipal capital improvement account regardless of population changes within the municipality after that time.

(c) For purposes of this section,

(1) the population used for computing the entitlement is the population of the municipality on Ju[illegible] 1, 1978, as determined by the department;

(2) the limitation on allocations in (a) of this section applicable to a borough shall be based upon the population of the borough with respect to an eligible capital improvement which the borough has authority to provide on an areawide basis;

(3) the limitation on allocations in (a) of this section applicable to a city or service area of a borough shall be based upon the population of the city or service area of the borough with respect to an eligible capital improvement which the city has authority to provide or which the borough has authority to provide on a service area basis.

Sec. 43.18.220. APPLICATION FOR AID. (a) The commissioner shall prescribe the necessary forms and procedures to be used in applying for grants under secs. 200 - 255 of this chapter.

(b) A municipality seeking aid under secs. 200 - 255 of this chapter must apply to the department by September 15 of the prior fiscal year.

(c) The department

(1) may not administer secs. 200 - 255 of this chapter in a manner that diminishes the authority of a municipality[,] to determine what types, priorities or design of capital improvements are appropriate for its community.

(2) may make no determination of eligibility based upon its evaluation of the desirability or priority of a project.

Sec. 43.18.225. CONDITIONS OF GRANTS. (a) Funds distributed to a municipality under secs. 200 - 255 of this chapter must be received,

held, and expended by the municipality in accordance with the applicable provisions of law and of regulations adopted by the department. Funds provided under secs. 200 - 255 of this chapter, but which are not required for the project for which they were granted or which are in excess of that municipality's entitlement for grants as that entitlement is limited by sec. 215 of this chapter, shall be returned to the department and deposited in the general fund.

(b) Each municipality shall maintain financial records of the receipt and disbursement of state funds received under secs. 200 - 255 of this chapter and money provided toward local effort. The records must be in the form prescribed by the department and are subject to audit by it at any time.

(c) Before funds are distributed to a municipality by the department, the commissioner shall require municipal officers to demonstrate that the municipality has secured financial assistance from other federal and state programs to the maximum possible extent.

Sec. 43.18.230. RESPONSIBILITY TO MAINTAIN AND OPERATE CAPITAL IMPROVEMENT. Every municipality obtaining funds under secs. 200 - 255 of this chapter shall be solely responsible for the maintenance and operation of the capital improvement. Nothing in secs. 200 - 255 of this chapter obligates the state to participate in or contribute to the cost of operation and maintenance of the capital improvement.

Sec. 43.18.235. SUBMISSION OF CAPITAL IMPROVEMENT PLAN REQUIRED. No funds may be made available under secs. 200 - 255 of this chapter unless the municipality submits to the department a five-year capital improvement plan showing the capital improvements planned for the municipality during the next five years, the planned sources of revenues to pay for the capital improvements, and operational costs of the capital improvements.

Sec. 43.18.240. NOTICE OF GRANTS. The municipality shall furnish a notice with tax statements mailed for the fiscal year for which state grants for general obligation bonded indebtedness or cash grants for capital improvements are received under secs. 200 - 255 of this chapter setting out the amount made available by the state to the municipality for that fiscal year. This information shall be incorporated in any notice to the taxpayer required under sec. 30 of this chapter in connection with state aid to local governments.

Sec. 43.18.245. CONSTRUCTION AND IMPLEMENTATION. (a) Sections 200 - 255 of this chapter may not be construed so as to create a debt of the state.

(b) Funds to carry out the provisions of secs. 200 - 255 of this chapter may be appropriated annually by the legislature into the municipal capital improvement account. If amounts in the account are insufficient to meet the allocations authorized by the commissioner under secs. 200 - 255 of this chapter, the funds available shall be distributed pro rata among each municipality based upon its computed entitlement.

Sec. 43.18.250. REGULATIONS. The department shall adopt regulations necessary to carry out the provisions of secs. 200 - 255 of this chapter.

Sec. 43.18.255. DEFINITIONS. In secs. 200 - 255 of this chapter, unless the context requires otherwise,

(1) "commissioner" means the commissioner of community and regional affairs;

(2) "department" means the Department of Community and Regional Affairs;

(3) "eligible capital improvement" means a public facility or public work, funds for the construction of which may be secured by the issuance of the municipality's general obligation bonds; the term ex-

cludes an elementary and secondary school and a medical facility;

(4) "municipality" means a unified municipality or a home rule borough or a general law borough or city of any class incorporated under the laws of the state.

* Sec. 2. This Act takes effect immediately in accordance with AS 01.10.-070(c).

improvement in an amount equal to 50 per cent of the cost of the project or 50 per cent of the amount that would be the local share not financed by other programs or private grants, whichever is the lesser. The municipal share of the funding of the capital improvement may be obtained by the municipality from any source lawfully available to it, including but not limited to the sale of general obligation bonds.

Sec. 43.18.220. LIMITATION ON GRANTS. (a) No more may be allocated to a municipality from the municipal capital improvement account than pop. as of 7/1/78

(1) $3,000 per capita on the first 1,000 population;

(2) $2,000 per capita on population over 1,000 but less than 10,000;

(3) $1,000 per capita on population of 10,000 and more.

(b) When a municipality has been allocated the maximum amount provided in (a) of this section for that municipality, it is no longer eligible to obtain grants from the municipal capital improvement account regardless of population changes within the municipality after ~~that time~~ 7/1/78.

Sec. 43.18.230. APPLICATION FOR AID. (a) The commissioner shall prescribe the necessary forms and procedures to be used in applying for grants under secs. 200 - 295 of this chapter.

(b) A municipality seeking aid under secs. 200 - 295 of this chapter must apply to the department by September 15 of the prior fiscal year.

(c) The department may not [adopt regulations, review applications from municipalities, or otherwise] administer secs. 200 - 295 of this chapter in a manner that diminishes the authority of a municipality [in its sole discretion,] to determine what types, priorities or design of capital improvements are appropriate for its community. [No state

cut this, or p. 4, l. 2

judgment as to the appropriateness of a particular capital improvement in a particular community is a factor in determining eligibility of capital improvements for funding under secs. 200 - 295 of this chapter.]

Sec. 43.18.240. CONDITIONS OF GRANTS. (a) Funds distributed to a municipality under secs. 200 - 295 of this chapter must be received, held, and expended by the municipality in accordance with the applicable provisions of law and of regulations adopted by the department. Funds provided under secs. 200 - 295 of this chapter, but which are not required for the project for which they were granted or which are in excess of that municipality's entitlement for grants under sec. 220 of this chapter must be returned to the department and deposited in the general fund.

(b) Each municipality shall maintain financial records of the receipt and disbursement of state funds received under secs. 200 - 295 of this chapter and money provided toward local effort. The records must be in the form prescribed by the department and are subject to audit by it at any time.

Sec. 43.18.250. RESPONSIBILITY TO MAINTAIN AND OPERATE CAPITAL IMPROVEMENT. Every municipality obtaining funds under secs. 200 - 295 of this chapter shall[, by accepting such funds,] be solely responsible for the maintenance and operation of the capital improvement. Nothing in secs. 200 - 295 of this chapter obligates the state to participate in or contribute to the cost of operation and maintenance of the capital improvement.

Sec. 43.18.260. SUBMISSION OF CAPITAL IMPROVEMENT PLAN REQUIRED. (a) No funds may be made available under secs. 200 - 295 of this chapter unless the municipality submits to the department a five-year capital improvement plan showing the capital improvements planned for the municipality during the next five years, the planned sources of revenues to

pay for the capital improvements, and operational costs of the capital improvements. The department may make no determinations of eligibility based upon its evaluation of the desirability or priority of a project.

Sec. 43.18.270. NOTICE OF GRANTS. The municipality shall furnish a notice with tax statements mailed for the fiscal year for which state grants for general obligation bonded indebtedness or cash grants for capital improvements are received under secs. 200 - 295 of this chapter setting out the amount made available by the state to the municipality for that fiscal year. This information shall be incorporated in any notice to the taxpayer required under sec. 30 of this chapter in connection with state aid to local governments.

Sec. 43.18.280. CONSTRUCTION AND IMPLEMENTATION. (a) Sections 200 - 295 of this chapter may not be construed so as to create a debt of the state.

(b) Funds to carry out the provisions of secs. 200 - 295 of this chapter may be appropriated annually by the legislature into the municipal capital improvement account. If amounts in the account are insufficient to meet the allocations authorized by the commissioner under secs. 200 - 295 of this chapter, the funds available shall be distributed pro rata among each municipality based upon its computed entitlement.

Sec. 43.18.290. REGULATIONS. The department shall adopt regulations necessary to carry out the provisions of secs. 200 - 295 of this chapter.

Sec. 43.18.295. DEFINITIONS. In secs. 200 - 295 of this chapter, unless the context requires otherwise,

(1) "commissioner" means the commissioner of community and regional affairs;

(2) "department" means the Department of Community and Regional Affairs;

(3) "municipality" means a unified municipality or a home rule borough or a general law borough or city of any class incorporated under the laws of the state.

* Sec. 2. This Act takes effect immediately in accordance with AS 01.10.-070(c).

TEN YEAR MUNICIPAL CAPITAL PROJECTIONS STUDY

1978 - 1987

In preparing this capital projects study, it immediately became apparent that municipal and borough officials face many difficulties when allocating public funds for capital projects. This conflict is best characterized by limited funds and an excess of needed or suggested projects. Further projection difficulties arise when it becomes necessary to determine the priority of projects, compliance with a Comprehensive Plan, coordination between various projects, public sentiment, and the impact on the present and future social, economic, physical, and environmental systems of the political subdivisions.

It must be recognized that these projections, developed with the best available information, are subject to the availability of funds. With permanent fund assistance, as well as various other grants, many of these could be realized. Conversely, many of these necessary projects may not be realized in the event of the non-availability of those funds.

Twenty municipalities responded and although they by no means represent all the projects, they do give an indication of the magnitude of the financial needs that face the municipalities of Alaska.

Attached are the results of the study. Requirements are shown (1) by municipality, (2) municipality and project, (3) size of project and, (4) sources of funds. Of the total $1,499,753,000 in dollar costs only $1,130,178,000 was recognized as coming from a specific source: either State, Federal, or local subject to availability of funds. Municipalities were not able to determine where the additional $369,575,000 would come from if the projects were to be constructed.

Care was taken to differentiate between those projects one would like to see and those projects which were vital to general welfare of the community. These costs presently represent those projects which are vital to the community and which will have to be funded through whatever sources of capital is available or they may never be realized. The Permanent Fund may be a means to meet a portion of these requirements.

RE: Summary of House Bill 886

Section 1 establishes the municipal capital improvement account to assist in paying the costs of municipal capital improvements. The account is funded by Legislative appropriation.

The bill provides for two types of grants:

(1) An annual grant in an amount equal to 50% of the annual principal and interest of the G.O. bonded debt of the municipality incurred on or after July 1, 1978. This is similar to the school construction program where the municipality bonds for the entire amount but the state participates in the debt retirement.

(2) 50% matching grants for construction or purchase costs of capital improvements depending on availability of funds. It is assumed that debt retirement is the first priority of this account.

Limitations in this section are: (1) the state does not participate in cost overruns; and (2) if the project includes funding from another program, the state's share under this Act may not be more than 50% of the local share.

A separate section places a limit on the total amount a municipality may receive from the capital improvement based on population. (Refer to the enclosed computer print-out for a list of maximums)

The DC&RA administers the program but can exercise no authority over the choice or appropriateness of capital improvements to be done by the municipality. However, the municipality must submit a 5 year capital improvement plan showing projects planned, financing plans and costs of operation of the capital improvement.

Conditions of the grants are: (1) grant funds must be handled according to applicable laws and regulations; (2) excess funds are to be returned to the department; (3) proper financial records are to be kept by the municipality; and (4) the minicipality has sole responsibility for operation and maintenance costs.

Funds to the capital improvement account are appropriated annually by the Legislature. If the appropriations are insufficient to cover allocations, the department will distribute funds on a prorated basis.

Nothing in the bill can be construed so as to create a debt of the state (see B. Berrier's memo of March 9, 1978).

ALASKA HOUSE OF REPRESENTATIVES

Community and Regional Affairs Committee

LISA RUDD, Chair

Pouch V, State Capitol
Juneau, Alaska 99811
(907) 465-3870

NOTE: THIS IS A REVISED SCHEDULE
MARCH 21, 1978

The House Community and Regional Affairs Committee will consider the following bills during the week of March 20, 1978.

COMMUNITY & REGIONAL AFFAIRS-Room 647, Court Building, 9:00 a.m.

Monday - March 20

HB 781 (SSHB 769)	Authorizing state aid to municipalities for the construction and development of cultural facilities.
HB 782 HB 768	Providing for the issuance of bonds for the purpose of paying the cost of cultural facilities.

Wednesday - March 22

HB 202	Assessment, levy and collection of a tax on developed land in the unorganized borough.

Friday - March 24

HB707	Relating to Sanitary landfills
HB667	Spec. Approp. for Dillingham landfill
HJR 58	Relating to the Bureau of Indian Affairs and Bristol Bay.

The committee will meet at 9:00 a.m. in room 647 of the Court Building in Juneau (directly across the street from the State Capitol).

We would be very happy to receive testimony from you on any of these bills. You may appear in person at the hearings or you may submit written testimony to the chair at pouch V, Juneau, Alaska 99811.

HIGHLIGHTS OF A PROPOSED ACT RELATING TO COMMUNITY DEVELOPMENT AND STATE FINANCIAL ASSISTANCE FOR MUNICIPAL CAPITAL IMPROVEMENTS

The attached draft bill is presented for your consideration. It has been developed to provide a mechanism for State contribution to the financing of municipal capital improvements, while maintaining maximum autonomy of local governments in applying their own values and priorities in selection of capital improvements under this program.

The matching ratio is 50% State and 50% local funds for any project. The State would have the option of providing its share either from general obligation bond issues or (to avoid the cost of interest) from a direct grant funding 50% of the cost of the project.

Municipalities may, but are not required to, obtain their matching share from the proceeds of municipal bond issues. Thus, if a municipality cannot or chooses not to issue general obligation bonds, the municipality's share may come from other sources such as its treasury or proceeds of federal grants. The purpose is to provide flexibility to Alaska's smaller municipalities.

The bill contains a permanent ceiling on the total amount of State funding for individual municipalities under the Act. To take account of the larger per capita needs of smaller communities, especially where capital projects are involved, a graduated scale has been proposed, such that a progressively less restrictive per capita ceiling on State funding applies to medium-sized (between 1,000 and 10,000 population) and small (population up to 1,000) communities.

Administration would be by the Department of Community and Regional Affairs. The Department's role, however, would be strictly limited to such functions as confirming population data, fiscal capacity, and the existence of a municipal capital improvement plan. It is the intention of the bill's drafters that the State (thus, the Department) not become involved in value judgments concerning the desirability of a project for a particular community, the validity of the community's priorities for development, or the design of the project.

A clause has been incorporated to protect the State against the burden of any cost overruns that might occur on construction of any capital improvement under the Act.

A definition for "capital improvements" has been purposely omitted, in order to give maximum flexibility to municipalities of various sizes and diverse needs in selecting capital improvements under this Act.

Examples of capital improvements which may be chosen by some municipalities include streets, sidewalks and trail systems; public transportation facilities, water transportation facilities such as harbors, wharves and port facilities; public buildings such as city or borough offices and maintenance shops; public sanitation facilities such as for solid waste collection and disposal; park and recreation facilities; libraries, museums, convention centers and performing arts centers; power generation and distribution facilities; improvements to publicly owned facilities for energy conservation or environmental protection purposes; facilities required to preserve subsistence life style; fire protection facilities; public safety facilities; and industrial park facilities such as for cold storage or warm storage.

This list is for illustrative purposes only. Any attempt to define "capital improvements" by a list in the Act will inevitably result in inadvertent omission of worthy projects needed by some municipalities.

The bill's drafters intended that this Act supplement, and not duplicate or replace, other legislation providing for State financial participation, such as for water, sewers and schools. Therefore, a subsection has been inserted to clarify that funds under this Act are to be available for such projects only to the extent that actual State plus federal funding of such project under other legislative authority falls short of the 50% State share provided herein.

The maximum cost to the State under a program of this kind over a period of thirty years is estimated to be approximately 28.8 million per year. This estimate is based on a total State commitment to fund one-half of $800 million in capital improvements and assuming financing of the capital improvements with 30-year 6% municipal tax-free bonds.

February 21, 1978

Hon. Lisa Rudd, Chairperson
Committee on Community and Regional Affairs
Alaska State Legislature
Room 620, State Court Building
Juneau, Alaska 99801

Dear Ms. Rudd:

Thank you for agreeing to have your committee introduce our bill entitled "An Act Relating to Community Development and State Financial Assistance for Municipal Capital Improvements".

We were unable to get word to Ted Berns quickly enought to insert a change, on page two, to conform the actual language with the intentions of Breakthrough. Enclosed is a revised page two, which entirely replaces page two in the version you were given.

This correction provides that whenever there are federal funds (or a combination of federal funds and state funds under other programs) available for any given project, the balance of the project cost would be split equally between local and state funding under the program established by this bill.

We would appreciate if your Committee staff would give this revision to the Legislative Affairs Agency, so that the version which emerges is correct. For identification purposes we have also attached a copy of the first page of the bill.

Thank you very much.

Sincerely yours,

Elizabeth Cuadra

New Draft

AN ACT RELATING TO COMMUNITY
DEVELOPMENT AND STATE FINANCIAL
ASSISTANCE FOR MUNICIPAL CAPITAL IMPROVEMENTS

SECTION 1. (a) During each fiscal year, ~~and in accordance~~ with agreements entered into by the State and the municipality, the State shall allocate to every incorporated municipality in the State of Alaska an amount equal to fifty percent (50%) of the annual principal and interest owing by the municipality on general obligation bonded indebtedness for capital improvements incurred by the municipality after 1977, or, if monies are available, make a grant to the municipality of fifty percent (50%) of the costs of the capital improvement which the municipality seeks to construct or acquire.

No monies under this act shall be applied to principal and interest which was due and owing before 1979 or for general obligation bond issues authorized before 1978.

(b) The Department of Community and Regional Affairs shall express its financial commitment to each municipality, concerning each capital improvement project to receive State monies under this act, in a written agreement, before the project is begun, binding the State to its share of the funding of the project; provided, however, that no State monies shall be committed to nor expended for construction

cost overruns or other costs in excess of the original project estimated cost, set forth in the agreement.

SECTION 2. ~~Any~~ a municipality may, for ~~any~~ a proposed municipal capital improvement eligible for State assistance under this act, obtain from the State a grant for the capital improvement in an amount equal to fifty percent (50%) of the cost of the project or fifty percent (50%) of the amount that would be the local share not financed by other programs, whichever is the greater. The municipal share of the funding of the capital improvement may be obtained by the municipality from any source lawfully available to it ~~for such use~~, including but not limited to the sale of general obligation bonds.

SECTION 3. No more in grants or for principal shall be allocated to any municipality under this act than:

$3,000 general obligation bond indebtedness per capita or $3,000 in cash per capita on the first 1,000 population;

$2,000 general obligation bond indebtedness per capita or $2,000 in cash per capita on population over 1,000 but less than 10,000;

$1,000 general obligation bond indebtedness per capita or $1,000 in cash per capita on population of 10,000 and more.

SECTION 4. Every municipality obtaining monies under this act shall, by accepting such monies, be solely responsible for the maintenance and operation of the capital improvement. Nothing in this act shall obligate the State to participate in or contribute to the cost of operation and maintenance of such capital improvements.

SECTION 5. (a) No monies shall be made available under this Act unless the municipality submits to the State of Alaska Department of Regional and Community Affairs a five-year capital improvement plan showing the capital improvements planned for the municipality during the next five years, and the planned sources of revenues to pay for the capital and

operational costs of the capital improvements; provided that the Department of Community and Regional Affairs shall make no determinations based upon its evaluation of the desirability or priority of a project.

(b) No monies shall be paid as 50% of the cost of a capital improvement or as 50% of the annual principal and interest cost of a capital improvement unless the municipality has first obtained a written confirmation from the Department of Regional and Community Affairs that the municipal capital improvement is eligible for matching by the State in cash or by paying 50% of the principal and interest upon general obligation bonds authorized by the voters of the municipality or to be submitted to the voters for authorization after 1977. The Department of Community and Regional Affairs shall have the sole discretion as to whether 50% of a capital improvement shall be funded in cash as opposed to the State paying 50% of the principal and interest upon a general obligation bond issue for a capital improvement, but shall, in any event, advise the municipality promptly whether the proposed capital improvement, or portions of it, will qualify for State participation under this act, whether the State participation will be in cash or by the State paying 50% of principal and interest on the general obligation bond for capital improvements, and the approximate date upon which any payments by the State in cash or toward the principal and interest shall be paid.

SECTION 6. (a) The municipality shall provide the following notice to the voters in any general obligation bond election, both in the required notice of election and the ballot, regarding State participation in the principal and interest costs of the capital improvements:

Proposition (set forth bonding proposition)

(The State of Alaska may pay 50% of the principal and interest on the bonded indebtedness)

$_____

No bond notice, ballot or bond approval shall be invalid because of failure to set forth the above notice. The sole remedy of any aggrieved person, including the State of Alaska, under this section is an action for mandamus in the courts of Alaska to require inclusion of the notice or postponement of the election until the notice is included.

(b) In addition, the municipality shall furnish a notice with tax statements mailed for the fiscal year for which State aid for general obligation bonded indebtedness or cash grants for capital improvements are received under this act setting forth the amount made available by the State to the municipality for that fiscal year. This information shall be incorporated in any notice to the taxpayer required under AS 43.18.030 in connection with State aid to local governments.

SECTION 7. No monies shall be made available for principal and interest under this act until January 1, 1979. Should general obligation bonds be sold before January 1, 1979 and should principal or interest payments become owing upon such bonds before January 1, 1979, any monies owing by the municipality upon such bonds before January 1, 1979 shall not be eligible for matching under this act; provided that nothing in this act shall be construed as prohibiting a municipality from borrowing for planning, engineering, drawings, design, specifications and bid documents in 1978 with repayment from a State grant under this act, from proceeds of any authorized bond issue or from municipal revenues as provided by law.

SECTION 8. (a) The State of Alaska Department of Community and Regional Affairs shall promulgate regulations to implement this act, including, but not limited to form of applications, standards for determining eligibility of capital improvements, determination of population, financial capacity, proof of actual application of monies by municipalities to general obligation bonded indebtedness, calculation of amounts to be allocated to a municipality and time of payments.

(b) In no event, however, shall the Department of Community and Regional Affairs or any State official promulgate regulations, review applications from municipalities or otherwise administer this act in such a manner as to diminish the authority of municipalities, in their sole discretion,

to determine what types of capital improvements, or priorities therefor, or design thereof, are appropriate for their communities. No State judgment as to the appropriateness of a particular capital improvement in a particular community shall become a factor in determining eligibility of capital improvements for funding under this act.

SECTION 9. This act is effective immediately upon passage.

cost overruns or other costs in excess of the original project estimated cost, set forth in the agreement.

(c) State monies shall not be expended under this act for capital improvement projects for which the federal and State actual funding level, under other programs, equals or exceeds the 50% share established by this act for State participation in municipal capital improvements.

SECTION 2. Any municipality may, for any proposed municipal capital improvement eligible for State assistance under this act, obtain from the State a grant for the capital improvement in an amount equal to fifty percent (50%) of the cost of the project to the extent that monies are available for this purpose. The municipal share of the funding of the capital improvement may be obtained by the municipality from any source lawfully available to it for such use, including but not limited to the sale of general obligation bonds.

SECTION 3. No more in grants or for principal shall be allocated to any municipality under this act than:

$3,000 general obligation bond indebtedness per capita or $3,000 in cash per capita on the first 1,000 population;

$2,000 general obligation bond indebtedness per capita or $2,000 in cash per capita on population over 1,000 but less than 10,000;

ANCHORAGE DRAFT BILL ON STATE FINANCIAL ASSISTANCE TO MUNICIPAL CAPITAL IMPROVEMENT PROJECTS

1. State sets up a yearly allocation to each municipality equal to 50% of annual principal and interest owing by municipality on G.O. bonded indebtedness incurred after 1977.

   How much principal and interest are we looking at in Anchorage alone?
   How do the dates of 1979 and 1978 fit in?

   or State can make a 50% grant for a new project when monies are available.

   Can municipalities have both?
   How are monies available? Is a set amount allocated each year to the dept. based on the principal & interest owing and then left over monies for the 50% grant program determined by the fact that some municipalities did not apply that year?

2. State is not liable for any cost overruns on any project.

3. Municipality may use any lawful funds for its 50% match (muni. g.o. bonds) including state and federal grants so long as state/fed. share from other grant programs does not exceed 50% of the project. ???

   It is possible then to have a project totally funded from other than municipal funds? e.g., 50% state and federal grants
   50% state grant under this Act

4. Formula for maximum grants: amount/capita

   $3,000/cap. for first 1,000 pop.
   $2,000/cap. over 1,000 pop. up to 10,000 pop.
   $1,000/cap. for 10,000 pop. and more.....

City w/ pop. of 500 entitled to	$ 1,500,000	(Hooper Bay)
City w/ pop. of 1,000 entitled to	$ 3,000,000	(Skagway)
City w/ pop. of 2,000 entitled to	$ 5,000,000	(Cordova)
City w/ pop. of 16,000 entitled to	$ 27,000,000	(Mat-Su Boro)
City w/ pop. of 180,000 entitled to	$191,000,000	(Anchorage)

5. C&RA decides whether state share of capital improvement project will be by 50% cash grant or 50% of principal and interest on bonded indebtedness of municipality.

   What determines eligibility of project?
   How does C&RA decide which type of funding is to be used?
   Do cities make application for each project?

telephone (907) 279-1977

BREAKTHROUGH is a citizens' study and action group, formed to develop recommendations for the improvement of Anchorage. The rapid growth of Anchorage puts extra demands on all residents to decide what kind of city we wish to see develop during the coming decade. BREAKTHROUGH'S aim is to facilitate a public process for identifying actions and priorities for building a good community, place its recommendations before the people of Anchorage for their consideration, and assist in implementing the plan which emerges from this process.

BREAKTHROUGH consists of a steering committee and several task forces, formed to represent, as comprehensively as possible, the varied points of view and geographic areas within the community. Results of the studies carried out by the task forces have recently been submitted to the steering committee. Topics of study and recommendations include transportation, crime, community facilities, parks and recreation, central business district development and beautification, public utilities, and financing mechanisms. Many of the action recommendations involve capital improvements.

With the task force reports in hand, the time has come for a wider public dialogue and for initial implementation steps, particularly those requiring new legislation.

The attached draft bill is proposed in order to establish a mechanism for sharing of state funds with Alaska municipalities which decide to undertake capital improvements and are willing to provide local matching funds.

For further information, please contact BREAKTHROUGH'S general chairman, Max Hodel, at 279-9640 (1300 East 5th Ave., Anchorage 99501); or the BREAKTHROUGH office, at 279-1977.

HIGHLIGHTS OF A PROPOSED ACT RELATING TO COMMUNITY DEVELOPMENT AND STATE FINANCIAL ASSISTANCE FOR MUNICIPAL CAPITAL IMPROVEMENTS

The attached draft bill is presented for your consideration. It has been developed to provide a mechanism for State contribution to the financing of municipal capital improvements, while maintaining maximum autonomy of local governments in applying their own values and priorities in selection of capital improvements under this program.

The matching ratio is 50% State and 50% local funds for any project. The State would have the option of providing its share either from general obligation bond issues or (to avoid the cost of interest) from a direct grant funding 50% of the cost of the project.

Municipalities may, but are not required to, obtain their matching share from the proceeds of municipal bond issues. Thus, if a municipality cannot or chooses not to issue general obligation bonds, the municipality's share may come from other sources such as its treasury or proceeds of federal grants. The purpose is to provide flexibility to Alaska's smaller municipalities.

The bill contains a permanent ceiling on the total amount of State funding for individual municipalities under the Act. To take account of the larger per capita needs of smaller communities, especially where capital projects are involved, a graduated scale has been proposed, such that a progressively less restrictive per capita ceiling on State funding applies to medium-sized (between 1,000 and 10,000 population) and small (population up to 1,000) communities.

Administration would be by the Department of Community and Regional Affairs. The Department's role, however, would be strictly limited to such functions as confirming population data, fiscal capacity, and the existence of a municipal capital improvement plan. It is the intention of the bill's drafters that the State (thus, the Department) not become involved in value judgments concerning the desirability of a project for a particular community, the validity of the community's priorities for development, or the design of the project.

A clause has been incorporated to protect the State against the burden of any cost overruns that might occur on construction of any capital improvement under the Act.

A definition for "capital improvements" has been purposely omitted, in order to give maximum flexibility to municipalities of various sizes and diverse needs in selecting capital improvements under this Act.

Examples of capital improvements which may be chosen by some municipalities include streets. sidewalks and trail systems; public transportation facilities, water transportation facilities such as harbors, wharves and port facilities; public buildings such as city or borough offices and maintenance shops; public sanitation facilities such as for solid waste collection and disposal; park and recreation facilities; libraries, museums, convention centers and performing arts centers; power generation and distribution facilities; improvements to publicly owned facilities for energy conservation or environmental protection purposes; facilities required to preserve subsistence life style; fire protection facilities; public safety facilities; and industrial park facilities such as for cold storage or warm storage.

This list is for illustrative purposes only. Any attempt to define "capital improvements" by a list in the Act will inevitably result in inadvertent omission of worthy projects needed by some municipalities.

The bill's drafters intended that this Act supplement, and not duplicate or replace, other legislation providing for State financial participation, such as for water, sewers and schools. Therefore, a subsection has been inserted to clarify that funds under this Act are to be available for such projects only to the extent that actual State plus federal funding of such project under other legislative authority falls short of the 50% State share provided herein.

shd apply only to projects for which no other fed. or state $ are avail.

The maximum cost to the State under a program of this kind over a period of thirty years is estimated to be approximately 28.8 million per year. This estimate is based on a total State commitment to fund one-half of $800 million in capital improvements and assuming financing of the capital improvements with 30-year 6% municipal tax-free bonds.

New Draft

AN ACT RELATING TO COMMUNITY
DEVELOPMENT AND STATE FINANCIAL
ASSISTANCE FOR MUNICIPAL CAPITAL IMPROVEMENTS

SECTION 1. (a) During each fiscal year, and in accordance with agreements entered into by the State and the municipality, the State shall allocate to every incorporated municipality in the State of Alaska an amount equal to fifty percent (50%) of the annual principal and interest owing by the municipality on general obligation bonded indebtedness for capital improvements incurred by the municipality after 1977, or, if monies are available, make a grant to the municipality of fifty percent (50%) of the costs of the capital improvement which the municipality seeks to construct or acquire.

No monies under this act shall be applied to principal and interest which was due and owing before 1979 or for general obligation bond issues authorized before 1978.

(b) The Department of Community and Regional Affairs shall express its financial commitment to each municipality, concerning each capital improvement project to receive State monies under this act, in a written agreement, before the project is begun, binding the State to its share of the funding of the project; provided, however, that no State monies shall be committed to nor expended for construction

cost overruns or other costs in excess of the original project estimated cost, set forth in the agreement.

(c) State monies shall not be expended under this act for capital improvement projects for which the federal and State actual funding level, under other programs, equals or exceeds the 50% share established by this act for State participation in municipal capital improvements.

SECTION 2. Any municipality may, for any proposed municipal capital improvement eligible for State assistance under this act, obtain from the State a grant for the capital improvement in an amount equal to fifty percent (50%) of the cost of the project to the extent that monies are available for this purpose. The municipal share of the funding of the capital improvement may be obtained by the municipality from any source lawfully available to it for such use, including but not limited to the sale of general obligation bonds.

SECTION 3. No more in grants or for principal shall be allocated to any municipality under this act than:

$3,000 general obligation bond indebtedness per capita or $3,000 in cash per capita on the first 1,000 population;

$2,000 general obligation bond indebtedness per capita or $2,000 in cash per capita on population over 1,000 but less than 10,000;

$1,000 general obligation bond indebtedness per capita or $1,000 in cash per capita on population of 10,000 and more.

SECTION 4. Every municipality obtaining monies under this act shall, by accepting such monies, be solely responsible for the maintenance and operation of the capital improvement. Nothing in this act shall obligate the State to participate in or contribute to the cost of operation and maintenance of such capital improvements.

SECTION 5. (a) No monies shall be made available under this Act unless the municipality submits to the State of Alaska Department of Regional and Community Affairs a five-year capital improvement plan showing the capital improvements planned for the municipality during the next five years, and the planned sources of revenues to pay for the capital and

operational costs of the capital improvements; provided that the Department of Community and Regional Affairs shall make no determinations based upon its evaluation of the desirability or priority of a project.

(b) No monies shall be paid as 50% of the cost of a capital improvement or as 50% of the annual principal and interest cost of a capital improvement unless the municipality has first obtained a written confirmation from the Department of Regional and Community Affairs that the municipal capital improvement is eligible for matching by the State in cash or by paying 50% of the principal and interest upon general obligation bonds authorized by the voters of the municipality or to be submitted to the voters for authorization after 1977. The Department of Community and Regional Affairs shall have the sole discretion as to whether 50% of a capital improvement shall be funded in cash as opposed to the State paying 50% of the principal and interest upon a general obligation bond issue for a capital improvement, but shall, in any event, advise the municipality promptly whether the proposed capital improvement, or portions of it, will qualify for State participation under this act, whether the State participation will be in cash or by the State paying 50% of principal and interest on the general obligation bond for capital improvements, and the approximate date upon which any payments by the State in cash or toward the principal and interest shall be paid.

SECTION 6. (a) The municipality shall provide the following notice to the voters in any general obligation bond election, both in the required notice of election and the ballot, regarding State participation in the principal and interest costs of the capital improvements:

Proposition (set forth bonding proposition)

(The State of Alaska may pay 50% of the principal and interest on the bonded indebtedness)

$_____

No bond notice, ballot or bond approval shall be invalid because of failure to set forth the above notice. The sole remedy of any aggrieved person, including the State of Alaska, under this section is an action for mandamus in the courts of Alaska to require inclusion of the notice or postponement of the election until the notice is included.

(b) In addition, the municipality shall furnish a notice with tax statements mailed for the fiscal year for which State aid for general obligation bonded indebtedness or cash grants for capital improvements are received under this act setting forth the amount made available by the State to the municipality for that fiscal year. This information shall be incorporated in any notice to the taxpayer required under AS 43.18.030 in connection with State aid to local governments.

SECTION 7. No monies shall be made available for principal and interest under this act until January 1, 1979. Should general obligation bonds be sold before January 1, 1979 and should principal or interest payments become owing upon such bonds before January 1, 1979, any monies owing by the municipality upon such bonds before January 1, 1979 shall not be eligible for matching under this act; provided that nothing in this act shall be construed as prohibiting a municipality from borrowing for planning, engineering, drawings, design, specifications and bid documents in 1978 with repayment from a State grant under this act, from proceeds of any authorized bond issue or from municipal revenues as provided by law.

SECTION 8. (a) The State of Alaska Department of Community and Regional Affairs shall promulgate regulations to implement this act, including, but not limited to form of applications, standards for determining eligibility of capital improvements, determination of population, financial capacity, proof of actual application of monies by municipalities to general obligation bonded indebtedness, calculation of amounts to be allocated to a municipality and time of payments.

(b) In no event, however, shall the Department of Community and Regional Affairs or any State official promulgate regulations, review applications from municipalities or otherwise administer this act in such a manner as to diminish the authority of municipalities, in their sole discretion,

to determine what types of capital improvements, or priorities therefor, or design thereof, are appropriate for their communities. No State judgment as to the appropriateness of a particular capital improvement in a particular community shall become a factor in determining eligibility of capital improvements for funding under this act.

SECTION 9. This act is effective immediately upon passage.

Original Draft

AN ACT RELATING TO COMMUNITY
DEVELOPMENT AND STATE FINANCIAL
ASSISTANCE FOR MUNICIPAL CAPITAL IMPROVEMENTS

SECTION 1. (a) During each fiscal year, and in accordance with agreements entered into by the State and the municipality, the State shall allocate to every incorporated municipality in the State of Alaska an amount equal to fifty percent (50%) of the annual principal and interest owing by the municipality on general obligation bonded indebtedness for capital improvements incurred by the municipality after 1977, or, if monies are available, make a grant to the municipality of fifty percent (50%) of the costs of the capital improvement which the municipality seeks to construct or acquire.

No monies under this act shall be applied to principal and interest which was due and owing before 1979 or for general obligation bond issues authorized before 1978.

(b) The Department of Community and Regional Affairs shall express its financial commitment to each municipality, concerning each capital improvement project to receive State monies under this act, in a written agreement, before the project is begun, binding the State to its share of the funding of the project; provided, however, that no State monies shall be committed to nor expended for construction

cost overruns or other costs in excess of the original project estimated cost, set forth in the agreement.

(c) State monies shall not be expended under this act for capital improvement projects for which the federal and State actual funding level, under other programs, equals or exceeds the 50% share established by this act for State participation in municipal capital improvements.

SECTION 2. Any municipality may, for any proposed municipal capital improvement not financed by the proceeds of a municipal general obligation bond issue which would be eligible for State assistance under this act, obtain from the State a grant for the capital improvement in an amount equal to fifty percent (50%) of the cost of the project to the extent that monies are available for this purpose.

SECTION 3. No more in grants or for principal shall be allocated to any municipality under this act than:

$3,000 general obligation bond indebtedness per capita or $3,000 in cash per capita on the first 1,000 population;

$2,000 general obligation bond indebtedness per capita or $2,000 in cash per capita on population over 1,000 but less than 10,000;

$1,000 general obligation bond indebtedness per capita or $1,000 in cash per capita on population of 10,000 and more.

SECTION 4. Every municipality obtaining monies under this act shall, by accepting such monies, be solely responsible for the maintenance and operation of the capital improvement. Nothing in this act shall obligate the State to participate in or contribute to the cost of operation and maintenance of such capital improvements.

SECTION 5. (a) No monies shall be made available under this Act unless the municipality submits to the State of Alaska Department of Regional and Community Affairs a five-year capital improvement plan showing the capital improvements planned for the municipality during the next five years, and the planned sources of revenues to pay for the capital and

operational costs of the capital improvements; provided that the Department of Community and Re. nal Affairs shall make no determinations based upon its evaluation of the desirability or priority of a project.

(b) No monies shall be paid as 50% of the cost of a capital improvement or as 50% of the annual principal and interest cost of a capital improvement unless the municipality has first obtained a written confirmation from the Department of Regional and Community Affairs that the municipal capital improvement is eligible for matching by the State in cash or by paying 50% of the principal and interest upon general obligation bonds authorized by the voters of the municipality or to be submitted to the voters for authorization after 1977. The Department of Community and Regional Affairs shall have the sole discretion as to whether 50% of a capital improvement shall be funded in cash as opposed to the State paying 50% of the principal and interest upon a general obligation bond issue for a capital improvement, but shall, in any event, advise the municipality promptly whether the proposed capital improvement, or portions of it, will qualify for State participation under this act, whether the State participation will be in cash or by the State paying 50% of principal and interest on the general obligation bond for capital improvements, and the approximate date upon which any payments by the State in cash or toward the principal and interest shall be paid.

SECTION 6. (a) The municipality shall provide the following notice to the voters in any general obligation bond election, both in the required notice of election and the ballot, regarding State participation in the principal and interest costs of the capital improvements:

Proposition (set forth bonding proposition)

(The State of Alaska may pay 50% of the principal and interest on the bonded indebtedness)

$___$ _____

No bond notice, ballot or bond approval shall be invalid because of failure to set forth the above notice. The sole remedy of any aggrieved person, including the State of Alaska, under this section is an action for mandamus in the courts of Alaska to require inclusion of the notice or postponement of the election until the notice is included.

(b) In addition, the municipality shall furnish a notice with tax statements mailed for the fiscal year for which State aid for general obligation bonded indebtedness or cash grants for capital improvements are received under this act setting forth the amount made available by the State to the municipality for that fiscal year. This information shall be incorporated in any notice to the taxpayer required under AS 43.18.030 in connection with State aid to local governments.

SECTION 7. No monies shall be made available for principal and interest under this act until January 1, 1979. Should general obligation bonds be sold before January 1, 1979 and should principal or interest payments become owing upon such bonds before January 1, 1979, any monies owing by the municipality upon such bonds before January 1, 1979 shall not be eligible for matching under this act; provided that nothing in this act shall be construed as prohibiting a municipality from borrowing for planning, engineering, drawings, design, specifications and bid documents in 1978 with repayment from a State grant under this act, from proceeds of any authorized bond issue or from municipal revenues as provided by law.

SECTION 8. (a) The State of Alaska Department of Community and Regional Affairs shall promulgate regulations to implement this act, including, but not limited to form of applications, standards for determining eligibility of capital improvements, determination of population, financial capacity, proof of actual application of monies by municipalities to general obligation bonded indebtedness, calculation of amounts to allocated to a municipality and time of payments.

(b) In no event, however, shall the Department of Community and Regional Affairs or any State official promulgate regulations, review applications from municipalities or otherwise administer this act in such a manner as to diminish the authority of municipalities, in their sole discretion,

to determine what types of capital improvements, or priorities therefor, or design thereof, are appropriate for their communities. No State judgment as to the appropriateness of a particular capital improvement in a particular community shall become a factor in determining eligibility of capital improvements for funding under this act.

SECTION 9. This act is effective immediately upon passage.

Municipality of Anchorage

POUCH 6-650
ANCHORAGE, ALASKA 99502
(907) 274-2525

GEORGE M. SULLIVAN,
MAYOR

OFFICE OF THE MAYOR

April 4, 1978

Representative Lisa Rudd, Chairperson
Community & Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Re: House Bill 886

Dear Representative Rudd:

The purpose of this letter is to inform you that the Municipality of Anchorage strongly supports House Bill 886 and urges its favorable consideration by your Committee. This legislation would implement the "Operation Breakthrough" program in Anchorage as well as providing impetus for similar projects in other communities throughout the state.

I am certain I do not need to remind you of the ever present dilemma posed for local government by demands for services and capital improvements on the one hand and the need to minimize local tax burdens on the other. Programs such as Breakthrough represent an effort by concerned citizens to overcome this dilemma and to place responsibility for a decision on major community improvements before the voters.

Given the ability of the state to borrow capital improvement funds at rates substantially below those available to local government, and the increasing revenue being made available from resource development, the time is particularly ripe for a commitment by the state to assist local government taxpayers in making their communities safe, pleasant and attractive places. In Anchorage, Breakthrough is responsible for urging the Assembly to place before the voters several bond propositions which, if enacted, would be used to match state funds provided under HB 886 to provide needed community improvements.

Many of the projected improvements such as cultural and sports centers, road improvement, libraries and museums will benefit those residents of the state who visit or travel through

Anchorage, in addition to permanent residents of the Municipality. Perhaps more importantly, passage of HB 886 will, as noted above, hopefully provide incentive in other communities for groups similar to Breakthrough to try to overcome the dilemma between tax burdens and community needs and to make Alaskan communities equal or superior to those outside in providing adequate services and facilities for their residents.

If I or my staff can be of any assistance to the Committee, please do not hesitate to call my office at 264-4431, or contact Mr. Ted Berns, Municipal Attorney, at 264-4237. Thank you for the opportunity to comment on this legislation.

Sincerely,

MUNICIPALITY OF ANCHORAGE

George M. Sullivan
Mayor

TEN YEAR MUNICIPAL CAPITAL PROJECTIONS STUDY

1978 - 1987

In preparing this capital projects study, it immediately became apparent that municipal and borough officials face many difficulties when allocating public funds for capital projects. This conflict is best characterized by limited funds and an excess of needed or suggested projects. Further projection difficulties arise when it becomes necessary to determine the priority of projects, compliance with a Comprehensive Plan, coordination between various projects, public sentiment, and the impact on the present and future social, economic, physical, and environmental systems of the political subdivisions.

It must be recognized that these projections, developed with the best available information, are subject to the availability of funds. With permanent fund assistance, as well as various other grants, many of these could be realized. Conversely, many of these necessary projects may not be realized in the event of the non-availability of those funds.

Twenty municipalities responded and although they by no means represent all the projects, they do give an indication of the magnitude of the financial needs that face the municipalities of Alaska.

Attached are the results of the study. Requirements are shown (1) by municipality, (2) municipality and project, (3) size of project and, (4) sources of funds. Of the total $1,499,753,000 in dollar costs only $1,130,178,000 was recognized as coming from a specific source: either State, Federal, or local subject to availability of funds. Municipalities were not able to determine where the additional $369,575,000 would come from if the projects were to be constructed.

Care was taken to differentiate between those projects one would like to see and those projects which were vital to general welfare of the community. These costs presently represent those projects which are vital to the community and which will have to be funded through whatever sources of capital is available or they may never be realized. The Permanent Fund may be a means to meet a portion of these requirements.

RE: Summary of House Bill 886

Section 1 establishes the municipal capital improvement account to assist in paying the costs of municipal capital improvements. The account is funded by Legislative appropriation.

The bill provides for two types of grants:

—— (1) An annual grant in an amount equal to 50% of the annual principal and interest of the G.O. bonded debt of the municipality incurred on or after July 1, 1978. This is similar to the school construction program where the municipality bonds for the entire amount but the state participates in the debt retirement.

—— (2) 50% matching grants for construction or purchase costs of capital improvements depending on availability of funds. It is assumed that debt retirement is the first priority of this account.

Limitations in this section are: (1) the state does not participate in cost overruns; and (2) if the project includes funding from another program, the state's share under this Act may not be more than 50% of the local share.

A separate section places a limit on the total amount a municipality may receive from the capital improvement based on population. (Refer to the enclosed computer print-out for a list of maximums)

The DC&RA administers the program but can exercise no authority over the choice or appropriateness of capital improvements to be done by the municipality. However, the municipality must submit a 5 year capital improvement plan showing projects planned, financing plans and costs of operation of the capital improvement.

Conditions of the grants are: (1) grant funds must be handled according to applicable laws and regulations; (2) excess funds are to be returned to the department; (3) proper financial records are to be kept by the municipality; and (4) the minicipality has sole responsibility for operation and maintenance costs.

Funds to the capital improvement account are appropriated annually by the Legislature. If the appropriations are insufficient to cover allocations, the department will distribute funds on a prorated basis.

Nothing in the bill can be construed so as to create a debt of the state (see B. Berrier's memo of March 9, 1978).

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M

March 9, 1978

SUBJECT: Municipal capital improvements
(Work Order No. 5037)

TO: Representative Lisa Rudd
Chairman
House Community and Regional Affairs Committee

FROM: Billy G. Berrier
Director
Division of Legal Services

The bill draft essentially incorporates the submitted draft but has changes in form and has administrative provisions, which appear routinely necessary, added [Secs. 200, 230(a) and (b) and 290]. These additions rendered certain of the administrative provisions of the submitted draft unnecessary.

There is one major change. It is required to make the bill constitutional.

The submitted draft provided that the state would enter into an agreement with a borough or city under which the state would agree to pay 50 per cent of the debt service for the life of a bond issue. The effect of this agreement is that the state would be obligated to appropriate the amount necessary for that percentage during the life of the bonds. It is clear that a duty to pay would be created and that the duty constitutes a pledge of the full faith and credit of the state.

Creation of a state debt not authorized by a vote of the people is forbidden by Art. IX, sec. 8 of the state constitution which provides in relevant part:

> "No state debt shall be contracted unless authorized by law for capital improvements and ratified by a majority of the qualified voters of the state who vote on the question..."

The only possible alternative method of assuring funding, regardless of appropriation, for the life of a bond issue would be to create a dedication from the general fund for this purpose. Dedicated funds, however, are constitutionally prohibited by the constitution in Art IX, sec. 7 which provides in relevant part:

> "The proceeds of any state tax or license shall not be dedicated to any special purpose except as provided in section 15 of this article or when required by the federal government for state participation in federal programs."

The exceptions noted are not relevant here.

For the reason that a requirement of future funding on the part of the state is not constitutional, the bill as drafted sets up a municipal capital improvement construction account for which annual appropriations are necessary and allows pro rata reductions (or indeed no payment at all) if appropriations are insufficient or not made.

March 28, 1978

The Honorable Russ Meekins
House of Representatives
Alaska State Legislature
Pouch V, State Capitol
Juneau, Alaska 99811

Dear Representative Meekins:

IN RE: Senior Citizens Property Tax Exemption, AS 29.53.020

FY 78	Assessed Value	Exemption
Current Operation:	103,992,129	$1,512,800
Legislative Proposal:	138,309,532	2,057,379
Difference:	34,317,403	$ 554,600

FY 79		
Current Operation:	117,344,450	$1,919,025
Legislative Proposal:	154,894,674	2,515,220
Difference:	37,550,224	$ 596,195

The preliminary data outlined above is in response to the request for the probable impact of redefining "permanent place of abode" to exempt the senior citizen homeowner "total tract".

This information has been obtained largely by telephone from only those municipalities most likely to be heavily impacted by such a redefinition. No attempt was made to project the impact, should a more liberal program influence additional applications, it should be noted that this could be an important factor.

The estimates should not in any way be considered as other than assumptions for projection basis. A computer analysis of the FY 78 program is

being prepared by the Division of Data Processing. It is predicted that a detailed report will be available from Department of Administration Data Processing Division within a few days.

Sincerely,

Lee McAnerney
Commissioner

M E M O R A N D U M March 20, 1978

SUBJECT: Proposed amendment of the senior citizens property tax statute, changing the term "permanent place of abode." (W.O. #5198)

TO: Representative Al Ose, Chairman
Administrative Regulation Review Committee

FROM: John B. Chenoweth, Legislative Counsel

Work order 5198, asking that AS 29.53.020(e) be amended by incorporating into it a definition of "permanent place of abode" found in AS 29.63.065 (special assessment exemptions for senior citizens), has been assigned to me.

Would you please clarify for me the purpose of the change requested?

In AS 29.63.065, there is no separate definition of the term "permanent place of abode." Rather, there appears, in sec. 65(a), the following:

> The real property owned and occupied by a resident 65 years of age or over, or the spouse, widow, widower, or minor heir of the original applicant, on which is located only his permanent place of abode which is a single family residence, is exempt ...

If I adapt the foregoing language directly into the senior citizen property tax exemption provision, I believe you will be creating more problems than you will resolve. The new language added to the senior citizen property exemption language would limit the application for the exemption to property "on which is located only [the] permanent place of abode" without regard to whether the parcel also contained outbuildings, a farm or garage, or commercial buildings. It does not address the multi-family residential situation (i.e. condominiums). Moreover, adaptation into the senior citizen property tax exemption of the language of AS 29.63.065 would likely not clear up the current confusion that exists with respect to whether less than the entire parcel of property may receive the benefit of the property tax exemption.

I assume that the purpose of this request is to cut off the authority of the administering agency, the Department of Community and Regional Affairs, to enforce its regulation purportedly limiting the senior citizen property tax to five acres or less than the entire parcel. If this is the purpose of this work order request, may I respectfully suggest to you the following language:

AS 29.53.020(i) is repealed and re-enacted to read:

(i) In (e) - (i) of this section, "real property"

(1) means

(A) the dwelling or residence of the applicant if the dwelling or residence is a single-family residence or structure, together with the entire parcel or tract of real property on which the residence is located; or

(B) the dwelling or residential unit of the applicant, if the dwelling or residential unit is part of a multi-family residence or structure, together with a proportional part of the parcel or tract of real property on which the residence is located which is held in common;

(2) includes, but is not limited to, mobile homes, whether classified as real or personal property for municipal tax purposes.

Subsection (a)(1) would provide the operative definition with respect to single-family residences; (a)(2) would address the multi-family situation, including jointly-owned duplexes and condominium units, extending the exemption to a portion of any commonly owned property in the tract or parcel on a prorated basis.

Would you please advise, at your earliest convenience, as to how I should proceed with this request. Thank you.

JBC:hjd

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

DIVISION OF LOCAL GOVERNMENT ASSISTANCE

POUCH B – JUNEAU 99811

February 14, 1978

The Honorable Al Ose, Representative
Alaska State Legislature
Pouch "V"
Juneau, Alaska 99801

Dear Representative Ose:

This letter is written to offer additional written background to support and explain the Department's operation of the Senior Citizen's Property Tax Exemption program as authorized by AS 29.53.020 (e)-(i).

Last year the legislature approved passage of CS for HB 5 which effectively removes the previous $40,000 (third quartile) property value limitation of the program. In both our written and verbal testimony before the various committees which acted on HB 5, the Department indicated that the State administration and municipal governments had established property size limitations for this program in the absence of any specific legislative acreage limitation. In preparing our fiscal notes to the legislature indicating the additional cost to be incurred by removal of the $40,000 limitation, we pointed out in every instance that, as an assumption, a maximum of 5 acre land limitation would remain in affect. To further document this statement I attach copies of the fiscal notes which were prepared for original HB 5 and CS for HB 5.

Currently the departmental regulation which further describes "permanent place of abode" is found at 19 AAC 35.120 (4) and is defined as "a dwelling, or a dwelling unit in a multiple dwelling, including lots and outbuildings, or an appropriate portion thereof, which are necessary to convenient use of the dwelling unit;"

Municipalities throughout the State (who determine initial eligiblity for the exemption) have generally further defined the statute and this regulation to include acreage not to exceed 1 acre in urban areas and 5 acres in rural areas.

In order to further clarify existing regulation, the Department has proposed new regulations which would revise the current definition of "principal place of abode" by adding the language "limited to not more than 1 acre if urban nor more than 5 acres if rural as determined by the local assessor". This proposed new regulatory language would formalize the practice that has heretofore been administered by most assessors at the local municipal government level in the interest of maintaining uniform, statewide standards.

As you know, the Department last year was very much opposed to removal of the "third quartile" property value limitation (i.e., $40,000) that had previously been legislated. We offered, as a suggestion, a "circuit breaker" concept which would allow additional exemption for senior citizens based on need as measured by impact on income. A letter to Senator Sackett dated February 24, 1977 is also attached which includes that proposal of the department.

In summary, we feel that the current regulations governing this program are reasonable and that the proposed regulation (which would further define "principal place of abode" as including land not to exceed 1 and 5 acre limitation for urban and rural areas, respectively) is appropriate in order to provide some reasonable and equitable basis for the administration of this particular exemption program. As previously indicated, we would be happy to work with you or any other legislator or legislative committee in reviewing this or any other state mandated property tax relief program.

If we can provide you with additional information please advise.

Sincerely,

Lee McAnerney
Commissioner

by: Palmer McCarter
Director

cc: Honorable Huge Malone, Representative
Alaska State Legislature

APPENDIX B

SENIOR CITIZEN PROPERTY TAX EXEMPTION
AS 29.53.020(e)-(i)

Effective January 1, 1973, the first Senior Citizen Property Tax Exemption Program was enacted. (ch 118 SLA 1972) Effective January 1, 1974, the $10,000 gross annual income limitation as a prerequisite to eligibility was deleted. (Sec. 1 ch 60 SLA 1974) Effective January 1, 1975, an extension of the filing date deadline for good cause shown was authorized. (Sec. 1 ch 65 SLA 1975) Effective January 1, 1977, a formula was adopted for determining an assessed value exemption limit each year. (Sec. 1 ch 217 SLA 1976)

> AS 29.53.020(e): "... the assessed value limit is the upper limit of the third quartile class in a frequency distribution of previous year assessed values in the state..."

The property tax exemption limit for the 1977 tax year has been determined to be the assessed value of the real property up to and including 40,000 in assessed value. The frequency distribution of assessed values approved for exemption in the 1976 program is illustrated in Table B-2.

In response to objections to the assessed value limit, a "circuit breaker" assistance amendment is proposed. The amendment is a favorable and acceptable measure intended to relieve disproportionate impact to senior citizen income affected by tax values over the exemption limit.

The property tax exemption application form 21-400 has been expanded to allow senior citizen homeowners to renew special assessment deferments, AS 29.63.065, on the same form; in order to avoid duplicate verification of qualifying criteria each year. (See Appendix C, Senior Citizen Special Assessment Exemption)

A breakdown of the 1976 program impact listed by participating municipalities, is illustrated in Table B-1.

A four-year performance summary of the property tax exemption program is outlined below:

Tax Year	Number of Applications Approved	Assessed Value Exempt	Total Revenue Reimbursement	Average Value Per Application	Average Tax Per Application
1973	911	12,960,993	$ 197,050	14,227	$216
[1]1974	1,887	40,842,657	631,891	21,644	335
[2]1975	2,426	59,918,061	930,915	24,698	384
1976	2,608	76,737,060	1,171,227	29,424	449

[1] *$10,000 income limit deleted*

[2] *Extended filing deadline*

* Includes 10,000 Value Municipal Residential Property Exemption, AS 29.53.035(a)

STATE OF ALASKA

JAY S. HAMMOND, Governor

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

DIVISION OF LOCAL GOVERNMENT ASSISTANCE / *POUCH B - JUNEAU 99811*

March 31, 1978

The Honorable Al Ose
Chairman, Administrative
Regulation Review Committee
Pouch V
Juneau, Alaska 99811

Dear Representative Ose:

RE: Memorandum from John B. Chenoweth, Legislative Counsel in compliance with request (W.O. #5198) - March 20, 1978

I concur with Mr. Chenoweth's suggestion that the incorporation of language from AS 29.63.065 into AS 29.53.020 (e) is inappropriate. Most important, AS 29.63.065 does not provide for an exemption, per se. It only qualifies the property for an interest free loan. The total property is presumed to be benefitted, hence a lien is generated also against the total property.

The language suggested by Mr. Chenoweth as an amendment to repeal and re-enact AS 29.53.020 (i) fails to clarify the statutory language in AS 29.53.020 (e) which says, in effect, that the portion of "real property" owned and occupied as a permanent place of abode is a required exemption.

The term "real property" includes land, structures and any other improvements installed in or on the land.

The lack of specificity as to what constitutes permanent place of abode is not made more restrictive by an attempt to redefine "real property".

AS 29.53.020 (b)(3) (relating to property for religious purposes) is specific as to land to be included with exemption and states "lots supporting and adjacent to a structure or residence mentioned in (1) or (2) of this subsection which are necessary to convenient use;" (underscore added for emphasis).

Should the political intent of Alaska legislators be to provide exemption in the form of a total "homestead" type of tax free ownership, regardless of years of ownership or Alaska residency, for the entire legally described property on which is situated the residential structure of the Senior Citizen owner occupant, that should be stated at AS 29.53.020 (e). A prohibition against combining properties after a specific date solely to increase benefit should be included.

The need to administratively define permanent place of abode would be thereby negated and a blanket exemption which would ignore the income producing characteristics and the excess of land as a factor would prevail.

Sincerely,

LEE MCANERNEY
COMMISSIONER

Affairs Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Lisa Rudd:

I hope you will give House Bill no. 899, "An Act relating to the senior citizens' property tax exemption; and providing for an effective date," a do pass recommendation. Even with all of the federal and state help it is still hard for a senior citizen to get by. This bill should help lessen the burden.

Thank you,

Richard Willson

TENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to approval and recording of subdivisions; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 40.15.010 is amended to read:

Sec. 40.15.010. APPROVAL AND RECORDING OF SUBDIVISIONS. Before the lots or tracts of any subdivision or dedication may be sold, [OR] offered for sale, or conveyed, the subdivision or dedication shall be submitted for approval to the authority having jurisdiction, as prescribed in this chapter. The regular approval of the authority shall be shown on it or attached to it and the subdivision or dedication shall be filed for record in the office of the recorder. The recorder shall not accept a plat of a subdivision or dedication for filing unless it shows this approval. The recorder shall not accept a deed for filing unless it is accompanied by this approval, or by an affidavit of the grantor stating that no subdivision is created by the deed, or by a certified waiver of the requirement of plat under AS 29.33.170. If no platting authority exists as provided in secs. 70 - 130 of this chapter, lands may be sold without approval.

prohibits gifts & leasing w/o approval

* Sec. 2. This Act takes effect immediately in accordance with AS 01.10.-070(c).

Ms. Lisa Rudd, Chair
Committee on Community &
Regional Affairs
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Ms. Rudd:

Subject: Recordation of Property Splits Not Approved by Platting Authority

This is a follow up to Marilyn Miller's contact with you concerning the need for legislation to carry out the position of the Alaska Municipal League that proof of approval by the local platting authority should be required prior to the filing of an instrument affecting the boundaries of land.

A serious problem has arisen because Statutes do not prohibit the recording of property splits which have not been approved.

AS 29.33.190(b) provides as follows: "No person may record a plat or seek to have a plat recorded unless it bears the approval of the platting board. A person who knowingly violates this requirement is punishable upon conviction by a fine of not more than $500." This Borough is not anxious to prosecute persons who knowingly or unknowingly violate the State Statutes requiring platting authority approval of property splits. More importantly, such prosecution does not resolve the multitude of problems which stem from such recordation. Here's an example of what happens:

The owner of a 20 acre tract describes by aliquot parts 5 acres of the 20 acres and sells the 5 acres. The 5 acres may or may not be physically accessible or legally accessible.

A subsequent owner wants to split the 5 acres into 1 acre parcels. He cannot do so because the 5 acre parcel is illegally created and not recognized by the Platting Board. The new owner then has to retrace the proper platting procedure (or get a waiver of platting requirements under AS 29.33.170). It may or may not be possible for the original 5 acre split to be done in conformance with platting requirements.

A big hassle results.

The grantee suffers. An extraordinary amount of staff time is required to clean up the mess. The grantor who violated the platting requirements has long since sold the other 15 acres and flown to Hawaii. He does not suffer. The platting statutes are circumvented.

The proposed legislation would provide an effective means of getting compliance to Statutes which require platting authority approval of all property splits. We do not now have an effective means.

I hope you will see fit to get such legislation introduced so that Boroughs can more effectively carry out their platting mandate.

Very truly yours,

Wesley M. Howe
Borough Manager

Ms. Lisa Rudd, Chairman
Committee on Community &
Regional Affairs
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Ms. Rudd:

Subject: HB 900 Approval and Recording of Subdivisions

This is to express support of the subject bill. It appears to solve the problems presented in my letter of March 6, 1978 which urged introduction of this legislation.

While present law provides that the recorder shall not accept a subdivision unless it has been processed, nothing in existing law prevents a recorder from recording a deed for a parcel of property which has been created without the approval of the platting authority through the platting process or through a waiver of platting requirements. Such recordings have created hardships on buyers of such property and have caused immense administrative problems for the Borough as well as inconvenience for the public.

We urge that the Community and Regional Affairs Committee recommend passage of this bill.

Very truly yours,

Wesley M. Howe
Borough Manager

affidavit or waiver.

* Sec. 2. This Act takes effect immediately in accordance with AS 01.10.-070(c).

So what is accomplished?
How does an unrecorded deed fit in?

TO: Lisa FROM: Annette

HB 900 includes the language recommended by Wes Howe of the Mat-Su Borough. We have two letters from him in the file explaining what he wishes to accomplish through this bill. Essentially the Mat-Su Borough would wish to strengthen the existing law so that no subdivisions will be able to slip by the platting boards.

We have gone a step further in the drafting of the bill by including the words "or conveyed" in the first sentence. This was included to get at a situation described by Marilyn Miller when she spoke with you about introducing the legislation; that is, a case where land is given to another party, not sold. The same hassles as Mr. Howe describes can result from such a free conveyance as with one that is sold.

However, if the committee wishes to reach these conveyances, it may be necessary to also amend the definition of subdivision in Title 40, which describes a subdivision in terms of parcels to be sold or to be used for building.

I have asked Mr. Berrier to be on hand to answer any questions about the effect of this bill on present statutes.

If the committee does not wish to reach these conveyances, then the rest of the proposed language will, in fact, strengthen the statute enough to address a good portion of the problems facing borough platting boards as a result of situations similar to those Mr. Howe described.

(2) "subdivision" means the division of a tract or parcel of land into two or more lots, sites, or other divisions for the purpose, whether immediate or future, of sale or building development, and includes resubdivision and, when appropriate to the context, relates to the process of subdividing or to the land or areas subdivided. HOUSE BILL NO. 913

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to day care programs."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 44.47.250 is repealed and re-enacted to read:

Sec. 44.47.250. POWERS AND DUTIES. The department shall

(1) implement and administer a program to assist in providing day care for the children of low-income families according to the requirements of secs. 250 - 310 of this chapter;

(2) establish standards of eligibility for day care benefi

(3) contract for the care of children of eligible familie

(4) establish procedures to periodically review the needs families receiving day care benefits;

(5) contract with municipalities to perform its duties und secs. 250 - 310 of this chapter within that municipality; the municipality may subcontract with another organization in the community to perform administrative duties;

(6) contract with day care facilities outside of municipal ties; to provide more effective administration of programs in the un ganized borough, the department may contract with another organizati in the community or with an organization serving the region in which the community is located to perform administrative duties;

(7) adopt regulations necessary for the performance of its duties under secs. 250 - 310 of this chapter.

HF 913

(2) "community" means home rule cities and boroughs, cities and boroughs of any class, and unorganized boroughs and villages which are social units;

(3) "department" means the Department of Community and Regional Affairs;

(4) "region" means an area larger than a community, or including all or part of more than one community, but sufficiently integrated that it may be treated as a unit for administration of particular services. (§ 2 ch 200 SLA 1972)

Article 6. Community Legal Assistance Grants.

Section
200. Community legal assistance grant fund
210. Eligibility
220. Grants
230. Regulations

Sec. 44.47.200. Community legal assistance grant fund. There is created in the Department of Community and Regional Affairs the community legal assistance grant fund. From legislative appropriations to the fund, the department shall make grants to eligible communities and regions for the purpose of enabling them to obtain legal assistance. (§ 1 ch 60 SLA 1975)

Sec. 44.47.210. Eligibility. First and second class cities and unincorporated villages, and regional associations of those communities, may apply to the department for a grant under § 200 of this chapter. Grants shall be made only to those communities or regions that would otherwise be unable to obtain legal assistance. No regional or village corporation formed under the Alaska Native Claims Settlement Act (P.L. 92-203) is eligible for a grant under § 200 of this chapter. (§ 1 ch 60 SLA 1975)

Sec. 44.47.220. Grants. Grants made under § 200 of this chapter shall be used for a single legal project and not for the provision of general legal counsel. The department shall assure that the grant is spent for necessary legal assistance and that appropriate accounting procedures are maintained. Grants may not exceed $20,000. (§ 1 ch 60 SLA 1975)

Sec. 44.47.230. Regulations. The department shall adopt regulations to carry out the purposes of §§ 200—220 of this chapter. (§ 1 ch 60 SLA 1975)

Article 7. Day Care Assistance.

Section
250. Powers and duties
260. Local participation

Section
270. Conditions of receipt of benefits
280. Eligibility of families for benefits
290. Contributions by parent or guardian
300. Child care facilities
310. Definitions

Editor's note. — Section 1, ch. 66, SLA 1975, provides: "Findings of fact; purpose. The legislature finds that a need exists in the state for the provision of adequate day care facilities for families with low income. Adequate child care facilities allow the parent or guardian to work outside the home and in many cases to avoid the need for welfare and other forms of public assistance. The purpose of this Act is to establish in the Department of Community and Regional Affairs a program to aid low income families in urban and rural areas of the state in providing adequate care for their children."

Sec. 44.47.250. Powers and duties. (a) The department shall

same (1) implement and administer a program to assist in providing day care for the children of low-income families according to the requirements of §§ 250—310 of this chapter;

same (2) establish standards of eligibility for day care benefits;

same (3) contract for the care of children of eligible families;

same (4) establish procedures to periodically review the needs of families receiving day care benefits;

X (5) provide notification to the local government body of the request for a contract with a day care facility.

— (b) The department ~~may~~ shall

same (1) adopt regulations necessary for the performance of its duties under §§ 250—310 of this chapter;

(2) contract with municipalities to perform its duties under §§ 250—310 of this chapter within that municipality [with the approval of the department,] the municipality may subcontract with another organization in the community to perform administrative duties;

(3) [deleted]

(4) contract with day care facilities outside of municipalities; to provide more effective administration of programs in the unorganized borough, the department may contract with another organization in the community or with an organization serving the region in which the community is located to perform administrative duties. (§ 2 ch 66 SLA 1975; am § 1 ch 272 SLA 1976)

Effect of amendment. — The 1976 amendment deleted "with day care facilities" following "contract" in paragraph (3) of subsection (a), and in subsection (b), substituted "municipalities" for "local agencies" in paragraph (2), added the language beginning "within that municipality" to the end of paragraph (2), deleted paragraph (3), which read "solicit recommendations from local governing bodies regarding local agencies which may provide contractual services under this section," and added paragraph (4).

Legislative committee report. — For report on ch. 66, SLA 1975 (HCS CSSB 120), see 1975 Senate Journal, p. 257; 1975 House Journal, p. 876.

Sec. 44.47.260. Local participation. When a contract is made under § 250(b)(2) of this chapter between the department and a municipality, the municipality shall pay the costs of administering the contractual duties within its jurisdiction. (§ 2 ch 66 SLA 1975; am § 2 ch 272 SLA 1976)

Effect of amendment. — The 1976 amendment substituted "municipality" for "local agency within an incorporated borough or city of the state" and for "incorporated borough or city."

Sec. 44.47.270. Conditions of receipt of benefits. Benefits may be paid for the care of children of a low income family only if a parent or guardian, because of the day care, is freed to work or to attend school. In no event shall benefits be paid for the care of children of a family where one parent or guardian is not working or attending school and is physically and mentally capable of caring for the children. (§ 2 ch 66 SLA 1975)

Sec. 44.47.280. Eligibility of families for benefits. The department shall determine the eligibility of families for day care benefits on the basis of the following factors:

(1) net income of the family including salary, alimony, child support, retirement benefits, social security, and any other source of income;

(2) number of children in the family;

(3) whether there is one parent or guardian solely responsible for the care of the family;

Repealed 1977

(4) whether the family receives aid to families with dependent children and is eligible for day care service under aid to families with dependent children;

(5) other factors found relevant by the department. (§ 2 ch 66 SLA 1975)

Sec. 44.47.290. Contributions by parent or guardian. The department shall develop a sliding fee scale based on the factors listed in § 280 of this chapter for purposes of determining the amount to be contributed by the parent or guardian for child care. The contribution of the parent or guardian shall be paid to the day care facility. (§ 2 ch 66 SLA 1975)

Sec. 44.47.300. Child care facilities. (a) Parents or guardians shall select the day care facility for the care of their children.

(b) Benefits shall be paid by the department directly to the municipality contracting with the day care facility or, outside of a municipality, to the facility upon receipt of a billing from a municipality or facility. (§ 2 ch 66 SLA 1975; am § 3 ch 272 SLA 1976)

Effect of amendment. — The 1976 amendment rewrote this section.

Sec. 44.47.310. Definitions. In §§ 250—310 of this chapter

(1) "day care facility" means a center or home licensed in accordance with the provisions of AS 47.35.010—47.35.030 or recognized by the federal government for the care of children;

(2) "department" means the Department of Community and Regional Affairs;

(3) "child" means a person ~~who has not reached the age of 7~~ [illegible] 11 years of age;

(4) "day care" means the care, supervision, and guidance of a child or children unaccompanied by a parent or legal guardian on a regular basis for periods of less than 24 hours a day.

(5) "municipality" includes a home rule, general law and unified municipality, as defined in AS 29. (§ 2 ch 66 SLA 1975; am §§ 6—8 ch 253 SLA 1976; am §§ 4, 5 ch 272 SLA 1976)

Revisor's note (1976). — Paragraph (3) of AS 44.47.310 was amended by both § 7, ch. 253, SLA 1976, and § 4, ch. 272, SLA 1976. Since the two amendments appear to be inconsistent, and ch. 253 is superseded by ch. 272, only the later enactment has been given effect here.

Effect of amendments. — The first 1976 amendment rewrote paragraphs (1) and (3) and added paragraph (4).

The second 1976 amendment substituted "who has not reached the age of 7" for "up to the mandatory school age" in paragraph (3) and added paragraph (5).

DAY CARE ASSISTANCE PROGRAM

Section
10. Day Care Assistance Program Authority
20. Conditions of Contracting
30. Computation of Grant Funds
40. Responsibilities of Contractors
50. Power and Duties of the Department in Administering the State Day Care Assistance Program
60. Definitions

19 ACC 50.010. DAY CARE ASSISTANCE PROGRAM AUTHORITY. The authority of the department under AS 44.47.250-44.47.310 has been delegated by the Commissioner of Community and Regional Affairs to the Division of Community and Rural Development within the department.

(a) The purpose of the state day care assistance program is to assist low income parents or guardians who are working or training to pay the cost of licensed day care.

(b) The state day care assistance program will encourage day care in licensed facilities for those children previously left unattended or without adequate supervision while their parents are working or training.

19 ACC 50.020. CONDITIONS OF CONTRACTING. (a) Local communities interested in the state day care assistance program may apply to the Department demonstrating the need for a local day care assistance program, the existence of licensed day care facilities and a local commitment and administrative capability to operate the program. Upon approval of the grant application, contracts will be established delineating local and departmental responsibilities for program administration.

(b) A participating government may chose to administer the program directly, or communities whose grant is less than

restrictive for-option to subcontract in any smaller participating gov'ts.

$100,000 may seek approval from the department to subcontract for another appropriate local agency to perform the administrative functions. If a local government is approved to subcontract, it shall: who decides to approve & based on what?

- seems to be a lack of criteria for approval of subcontractor by department

(1) ensure that all interested persons are made aware that proposals for subcontracts are being accepted for the day care assistance program administration; and

(2) ensure that the subcontractor meets the subcontractor requirements of:

(A) Formal training or experience totalling at least four years in one of the helping professions.

(B) Demonstrated capability to interpret and apply written instructions.

(C) Demonstrated administrative ability to compute gross income and adjusted net income.

(D) Administrative experience in program operation.

(E) Experience or training in office organization or management.

(F) Experience in administering a Social Service Program.

(G) Must devote a minimum of 6 hours per day Monday through Friday to the day care assistance program. This item does not apply to communities receiving grants of less than $100,000.

(c) Technical assistance in application development, in program planning and in all aspects of program administration is available from the Department upon request.

(d) In order to qualify for participation in the state day care assistance program a local government shall agree to assume financial responsibility for the administration of the program.

(e) A local program shall be funded in an incorporated area only with the consent of the appropriate local government.

(f) If the responsible local government is a first class or home rule city or borough, it shall ensure that its accounting system for the day care assistance program be set up as follows:

(1) Separate funds and accounting codes shall be established for receipt and disbursement of state day care funds.

(2) Expenditures from this fund shall be audited under regular Borough or City program and financial auditing procedures.

(3) The Division of Community and Rural Development Child Care Programs Coordinator shall receive a report of municipal or borough audits of the day care account at least once yearly.

(g) If the responsible local government is a second class city or unorganized borough, the accounting system for the day care assistance program shall be set up as follows:

(1) Separate funds and acccounting codes shall be established for receipt and disbursement of state day care funds.

(2) A yearly statement of income and expenditures shall be required by the Department in connection with program and financial audits conducted by visiting day care program staff memebers.

19 ACC 50.030 COMPUTATION OF GRANT FUNDS. (a) The total grant to be received by any community will be computed by taking the ratio of a community's licensed day care spaces to the number of licensed day care spaces statewide and awarding that percentage of the total state funds to the community applying for a day care assistance grant. Additional grant funds may be made available when other communities having licensed day care spaces chose not to participate in the day care assistance program.

(b) A waiver from the requirements of this rule will be given for good cause shown.

19 ACC 50.040. RESPONSIBILITIES OF CONTRACTORS. (a) It is the responsibility of the Contractor to administer the Alaska day care assistance program on a community-wide basis.

(b) The contractor shall be accountable for state funds which it receives to subsidize day care services in the community. The accountability shall include the maintenance of program and financial records of the program including records concerning: applications, determination of client eligibility, payments to child care facilities, local administrative expenses, and program operating statistics as required by the Department.

(1) Unless otherwise agreed upon, the contractor's program and financial accounting system must utilize standard application, authorization billing, and reporting forms provided by the Department.

(2) The contractor must make all program and financial records available to the Department or its designated representative upon request.

(c) The contractor shall utilize the differential subsidy scale established by the Department for that community as a basis for determination of client eligibility for state day care assistance funds. This scale shall be applied to the adjusted net income of the client to determine a range of subsidy for which he or she is eligible.

(1) The adjusted net income of the client shall be arrived at by taking the projected gross income per year and subtracting the following:

DRAFT

(A) federal income tax,

(B) state income tax,

(C) state education tax,

(D) social security taxes (FICA)

(E) retirement,

(F) unemployment insurance contributions, and

(G) mandatory union dues or agency fee.

In addition, for the number of eligible children in the family greater than one, deduct the allowable child deduction from the income figure.

(2) Consideration of other factors the contractor or applicant deems to be relevant in eligibility determination shall require written approval by the Division of Community and Rural Development Child Care Programs Coordinator.

Harvey Pitts sole discretion for all factors to be taken into consideration.

(d) Eligibility determination shall be made prior to delivery of services.

(e) Applicants or recipients may appeal denial or termination of eligibility for day care subsidy to the Director, Division of Community and Rural Development, Department of Community and Regional Affairs for initial hearing, and thereafter according to applicable provisions in the Alaska Administrative Code.

(f) The contractor shall review the day care needs and the eligibility of each program recipient at least every three months. A minimum of two (2) weeks notice must be given to any recipient prior to termination of day care assistance when the recipient continues to meet eligibility criteria.

fairly broad

(g) Local agencies shall establish procedures to verify applicant's statements regarding eligibility certification.

DRAFT

Copies of current pay stubs should be retained to verify applicant's income.

(h) Subsidy payments shall be authorized only for day care services to individuals:

(1) who have obtained care in a licensed facility for their child and,

(2) who are determined "eligible" under the provisions of the Act and Departmental and local guidelines.

(i) The contractor shall provide assistance to day care centers or family day care homes as needed to insure proper completion of the standard Community and Regional Affairs billing and reporting forms.

(j) It is the responsibility of the contractor to make prompt payment to licensed day care facilities within 15 working days of receipt of properly completed Day Care Facility Billing and Reporting Forms.

(k) Day care payment shall be made to licensed day care facilities only for authorized hours and on an attendance basis only.

(l) The contractor shall inform the appropriate licensed day care facility immediately of any change in the status of terms of subsidy of a client.

(2) The contractor shall assure that a new authorization form is filled out and signed by all parties every time that there is a change in authorized hours for day care or a change in the percentage to be paid by the parent and the state.

(3) It is the responsibility of the contractor to report any instance of day care facilities making extra charges to program clients to the Division of Community and Rural Development, Child Care Programs Coordinator.

what pieces of info are required of the contractor in order to

(l) The Contractor shall maintain a current file of licensed day care facilities and the current rates charged by licensed day care facilities.

(l) It is the contractor's responsibility to remove all references to a day care facility from the provider file two weeks after the date that the license expired if that agency has not been notified by the appropriate licensing authority of a renewal of the license or issuance of an interim provisional license.

(2) It is the contractor's responsibility not to authorize payment for day care services in a facility beyond two weeks after the expiration date on the license. Before subsidy is suspended for children in that facility at the end of the two week period, the contractor shall contact the appropriate licensing authority to ascertain that notification of a renewal or provisional license for such facilities has not been lost in the mail.

(3) Should a day care facility fail to maintain its license, the contractor shall then inform parents or guardians of State assisted children in that facility that they must place their child in another licensed home or center or cease to receive state assistance. Every effort shall be made to secure satisfactory and timely alternative day care facilities in such cases.

monitor spending progress admin.

(m) The contractor shall submit monthly statistical reports to the Department in such form and containing such information as the Director of the Division of Community and Rural Development may require, and shall comply with such provisions as the Director finds necessary to assure the correctness and verification

what info that how no

how admin. is carrying out elig. determination - check onsite - child support statement

of such reports.

(n) A waiver from the requirements of this rule will be given for good cause shown.

19 ACC 50.050. POWERS AND DUTIES OF THE DEPARTMENT IN ADMINISTERING THE STATE DAY CARE ASSISTANCE PROGRAM. (a) It is not the intention of the day care assistance program to guarantee the availability of day care services to all those individuals who would qualify for subsidy on the basis of income and other criteria defined herein. The Department cannot guarantee that licensed day care facilities will be available for a particular child whose parents or guardians meet eligibility requirements.

(b) Department officials shall have access to financial and other records pertaining to administration of the program at all times.

(c) The Division of Community and Rural Development staff shall conduct periodic on-site monitoring visits to determine how the contractor is meeting both its program and financial management responsibilities as defined in the Act and in contractual agreements.

(d) When the Director finds that the contractor is not in compliance with the work program and contract, he/she shall notify the local government who specifically? by letter preferably of the problem and the requirement for compliance. If after a reasonable period satisfactory adjustments are not made, he shall notify the local government that further payments shall be withheld until the deficiencies are corrected.

(e) State funding for day care assistance is made available by the Department to the contractor only for direct subsidy payments to licensed facilities for child care services delivered.

(1) The Department shall make State funds available for expenditure for day care services only where the rates of payment for services do not exceed an amount reasonable and necessary to assure the quality of service, are in accord with costs reasonably assigned to such services, and records are available which describe and support the rates.

(2) The Community and Regional Affairs day care subsidy funds shall be paid on a daily attendance basis. The rates paid shall be set by the Director at an equitable level and shall be reviewed each fiscal year. Attendance shall be figured on the basis of five hour blocks of time. Up to five fours of attendance in a twenty-four hour period is considered part time. Attendance exceeding five hours and up to ten hours is considered full time. Attendance exceeding ten hours in a twenty-four period is considered more than full time for payment purposes.

(3) The Department shall not reimburse communities for day care subsidies beyond the maximum daily rate for part time, full time, and more than full time care except in the case of exceptional children.

(4) The Department shall not reimburse local communities for payments made to a licensed day care facility services performed more than two weeks after status as a licensed day care facility has expired.

(f) The Department shall release funds on a timely basis

each month after receipt of the contractor's billing to the State and properly completed Monthly Local Agency Statistical Report. When it is necessary for program operation, arrangements may be made for advance payment by the Department.

(g) The "differential subsidy scale" (DDS) has been established as the basis for eligibility and fee determination.

(1) The Department shall establish a series of subsidy levels in the form of a sliding fee schedule indicating the percentage of day care costs to be paid by the parent according to family size.

(2) The highest child care subsidy shall be provided to those clients with the lowest income.

(3) Each Community's sliding fee schedule (Community DSS) shall be established by the Department and shall incorporate within it adjustments for cost of living within that community.

(4) The cost of living factor applied will be that utilized by the State in its revenue sharing program.

(5) Those communities wishing to dispute the accuracy of this factor shall provide the Director of the Division of Community and Rural Development with data prescribed by the Department to substantiate their claim.

(h) The Department shall design and distribute standardized application, authorization, billing and reporting forms to contractors for their use in program operation.

(i) The Department is responsible for providing technical assistance to local communities engaged in either planning or operating a local day care program under this Act. Training will also be provided in eligibility determination, financial counseling and other program areas as requested and as staff is available.

(j) The Department shall report yearly to the Legislature

on the impact of this legislation on the Alaska communities receiving assistance.

(k) The Department shall initially provide participating local communities who have not assumed day care licensing authority, with a computer list detailing information on currently licensed local day care facilities. In communities where municipalities have assumed day care licensing authority, the contractor should coordinate with the appropriate municipal licensing agency.

(l) The Department shall, with the cooperation of the contractor, be responsbile for implementation of billing procedures and monitoring of the rate licensed facilities charge the State and State assisted families for the care of children to assure that:

(1) All services offered by the licensed day care facilities to the general public are provided to State funded children and the rate charged for care is both inclusive of such services and equivalent to the rate charged to the general public. The Department shall not pay any charges in addition to the licensed day care facilities established daily rate.

(2) The State is charged by a licensed day care facility at the same rate that the public is charged for second, third or additional family children. The Department shall share information relating to noncompliance with the contractor.

(m) A waiver from the requirements of this rule will be given for good cause shown.

19 ACC 50.060. DEFINITIONS. (a) Contractor means the local governing unit or other community agency subcontracted by the local governing unit to receive, either directly or in-

directly, state funds for day care assistance, and to administer the Department of Community and Regional Affairs day care assistance locally.

(b) Department means the Department of Community and Regional Affairs.

(c) Division means the Department of Community and Regional Affairs, Division of Community and Rural Development.

(d) Director means the Director of the Division of Community and Rural Development.

(e) Child Care Program Coordinator means the coordinator for the Alaska State Day Care Assistance Program.

(f) Licensed day care facility means a day care facility currently holding an active license for the care of children issued by the Division of Social Services Department of Health and Social Services, or an appropriated municipality who has assumed the power to license day care providers under AS 29.48.035.

(g) Licensed day care spaces means the total number of infants and children a licensed day care facility is currently allowed to have on the premises at any one time.

(h) Day care services means activity providing direct care and protection of infants and children outside of their own home during a period of less than 24 hours per day.

(i) Part time care means day care up to five hours in a twenty-four hour period.

(j) Full time care means day care for more than five hours through ten hours in a twenty-four hour period.

(k) More than full time care means day care for more than the hours but less than twenty-four in a twenty-four hour period.

(l) Eligible child means a child who is under 18 years of age and who is living in the home of either a natural parent or legal guardian.

(m) Infant means a child ages birth through 24 months.

(n) Child means a child ages 25 months through 10 years.

(o) A waiver from the definition of this . . will be given for good cause shown.

CHAPTER 58.
CERTIFICATE OF NEED FOR CHILD CARE FACILITY REVOLVING LOAN.

19 AAC 58.010. CERTIFICATE OF NEED FOR CHILD CARE FACILITY REVOLVING LOAN FUND APPLICANT ELIGIBILITY CRITERIA. A child care facility seeking a loan from the Child Care Facility Revolving Loan Fund must first apply to the Department of Community and Regional Affairs, Division of Community and Rural Development, Child Care Programs, for a certificate of need. Criteria eligibility set forth in AS 44.33.

Changes to revolving loan fund (HB 806) would delete the certificate of need. At least it passed out of H-HESS that way.

TO: Eric Lee, Director
Community and Rural Development

FROM: Representative Lisa Rudd

RE: Day Care Assistance Program Regulations

Thank you for sending me a copy of the proposed regulations for the Day Care Assistance Program. I am submitting the following comments which I would like to see incorporated into the final regulations.

19 ACC 50.020. CONDITIONS OF CONTRACTING.

(b) HB 913 currently under consideration by the Legislature changes AS 44.47.250 by deleting departmental authority for subcontractor approval. I support this change because (1) the contractor (municipality) remains responsible for program administration, (2) the department (CRA) monitors and reviews program effectiveness and (3) the department retains statutory authority to terminate program funds at any time.

Furthermore, I am opposed to language in the regulations which restricts subcontracting to smaller (under $100,000 grant) participating governments. It seems to be in direct conflict with the purpose of the Day Care Assistance Program which is "to allow as much local flexibility as possible."

19 ACC 50.040. RESPONSIBILITIES OF CONTRACTORS

(g) I recommend that a standard form be developed by the Department to notify recipients prior to termination of day care assistance when the recipient continues to meet eligibility criteria.

I make this recommendation based on the fact that heretofore, the lack of an established procedure for notification of recipients has resulted in providing little, if any, advance notice and often with inadequate explanation for the termination of assistance.

(k)(3) I also recommend that standard notice forms be developed for informing parents or guardians that the day care facility has not met licensing requirements and that parents or guardians must place their child in another licensed home or center.

19 ACC 50.050. POWERS AND DUTIES OF THE DEPARTMENT IN ADMINISTERING THE STATE DAY CARE ASSISTANCE PROGRAM.

Some general comments regarding this section appear to be in order. I recommend that more detailed regulations be drafted under this section detailing the procedures to be followed by the Department in its review and monitoring activities. It seems appropriate to have an extablished procedure specifying all documentation that the contractor is responsible for providing and how the Department uses the information to come to its conclusions regarding program operation and effectiveness. Such an established monitoring procedure would also insure uniformity in evaluation and provide reliable statistics on the day care assistance program when gathered in a consistent manner statewide.

More specifically, I strongly urge that a mechanism be established to deal with program administration deficiencies. Adaptation of the following language (under subsection (d)) would be along the lines of my thinking:

If the Department, during regular review and monitoring, finds administrative or financial mismanagement;

(a) written recommendations illustrating the deficiency, with suggestions for improvement, must be submitted to the contractor requesting that corrective action be taken. The contractor is further requested to respond in writing.

(b) ~~After 30 days has elapsed and satisfactory adjustments~~ If satisfactory adjustments have not been made w/in 30 days ~~are not made~~, the Department will issue a second letter, with a copy to the Commissioner, notifying the contractor of failure to take the necessary corrective action resulting in termination of funding 2 weeks from the date of issue of the letter until program improvements have been made.

Subject: Pension Fund Investments

The attached material pertains to investments of the pension fund. Legislative Audit provided me with a copy of the 1977 Audit and a copy of the pertinent statute pages.

Apparently, the system is administered by the Commissioner of Administration and governed by a 5 member Board of Directors (2 elected from members of the retirement system, and 3 appointed from the personnel board). However, the Commissioner of Revenue acts as the Treasurer of the fund and is empowered to invest and reinvest the assets of the pension fund. There is a long list of investments which can be made (AS 39.35.110) -- U.S. Treasury Bonds; FHA insured real estate mortgages; corporate stocks and bonds; other insured mortgages and real estate liens.

There are no particular regulations involved in the investments of these funds. The general outline of what is considered a good investment is pretty much spelled out in the list of possible investments which can be made. The Commissioner is supposed to "exercise the judgment and care under the circumstances then prevailing which a man of ordinary prudence, discretion, and intelligence exercises in the management of his own affairs...." The Commissioner of Administration has the financial statement and audit prepared for an annual report to the governor and to the Legislature.

The 1977 Audit does not show a specific loan or mortgage to the Fairbanks hospital. Presumably, it could be carried with a commercial mortgage company and listed under "Conventional/residential mortgages serviced by_____," at the back of the audit document.

Sterling Gallagher has an appointment with you at 8:00 a.m. Monday morning to discuss with you the loan to the Fairbanks hospital.

Board of Directors
State of Alaska Public Employees
Retirement System
Juneau, Alaska

We have examined the statements of assets and equity arising from cash transactions of the State of Alaska Public Employees Retirement System as of June 30, 1977 and 1976, and the related statements of changes in equity arising from cash transactions for the years then ended. Our examinations were made in accordance with generally accepted auditing standards and, accordingly, included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances. Cash and investment accounts at June 30, 1977 and 1976 were confirmed by direct communication with the depositaries, custodians and servicing financial institutions.

As described in Note A, the System's policy is to prepare its financial statements on the basis of cash receipts and disbursements. Accordingly, the accompanying financial statements are not intended to present financial position and results of operations in conformity with generally accepted accounting principles.

In our opinion, the financial statements referred to above present fairly the assets and equity arising from cash transactions of the State of Alaska Public Employees Retirement System as of June 30, 1977 and 1976, and the changes in equity arising from cash transactions for the years then ended, on the basis of accounting described in Note A, which basis has been consistently applied.

STATE OF ALASKA
PUBLIC EMPLOYEES RETIREMENT SYSTEM

NOTES TO FINANCIAL STATEMENTS

YEARS ENDED JUNE 30, 1977 AND 1976

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

The State of Alaska Public Employees Retirement System, established January 1, 1961, is a contributory pension system covering substantially all full-time employees of the State of Alaska. In addition, employees of participating political subdivisions are included in the System. A separate retirement system covers teachers. Elected officials may participate in the System at their option.

Investments are stated at cost. Investment income consists of interest, dividends and the gain or loss on disposition of investments, which is the difference between the acquisition cost and the net sales proceeds.

The System maintains its records, and the financial statements are prepared, on the cash basis of accounting.

Contributions, interest and dividends, retirement benefits, refunds to terminating members and administrative expenses are recorded when cash is received or disbursed. Deferred discount or premium on mortgages is amortized over the terms of the mortgages.

NOTE B - DESCRIPTION OF THE SYSTEM:

Peace officers and firemen contribute 5% of gross pay to the System; other members contribute 4-1/4%. Members earn interest on their contributions at the rate of 2-1/4%, credited semiannually. Employers contribute at actuarially determined rates which are estimated to be sufficient to annually fund current service costs and fund prior service costs over 40 years.

Peace officers and firemen are entitled to full retirement benefits upon completion of 20 years of service or at age 55. Other participants may retire at age 55 with at least five years of service or at any age with at least 30 years of service. All members of the System may take early retirement as defined in the System with reduced benefits. Upon termination, member contributions are refundable with accrued interest. All retirees receive a minimum monthly benefit of $17.50 for each year of credited service.

NOTE C - ACTUARIAL METHOD:

The employer contribution rates are determined actuarially on the basis of the aggregate method with supplemental liability.

Significant actuarial assumptions affecting employer funding rates are: 5% investment yield and salary escalation of 5% per year. Assets are valued at cost.

The increase in the actuarially determined unfunded prior service liability, from $52,600,000 in 1976 to $77,132,000 in 1977, arises from legislation which reduced retirement ages and retroactively increased benefits.

ADDITIONAL INFORMATION

The additional information presented in the following pages has been taken from the accounting and other records of the System and has been subjected to the tests and other auditing procedures applied in the examination of the financial statements for the year ended June 30, 1977. In our opinion, such information is fairly presented in all material respects in relation to the financial statements taken as a whole although it is not necessary for a fair presentation of the System's assets and equity or changes in equity arising from cash transactions.

April 13, 1978

Representative Sally Smith
Pouch V
State Capitol
Juneau, AK 99811

Dear Sally:

As vice chairman of the Community & Regional Affairs Committee, I am sure you are aware that House Bill #917 has been referred to this committee. We appreciate very much the contact that you have maintained with us through Tom Mingen at the hospital.

I am sure you realize that this bill could result in excess of six million dollar savings to users of the hospital over the next several years. As we understand, this plan has the approval of the state's financial consultant as a very viable way of financing hospital additions.

It is imperative that this legislation or a reasonable facsimile thereof is passed this session. The present addition to our hospital will be completed early this summer and financing must be completed prior to December 1, 1978. If this bill is not passed, we will be forced to use conventional financing at an interest rate of approximately 10%.

I will greatly appreciate anything you can do to see that this legislation is enacted du ing this session.

Warmest regards.

Sincerely yours,

Ron Nerland

RN/pe

MUNICIPALITY OF ANCHORAGE

MEMORANDUM

DATE: April 25, 1978

TO: Lisa Rudd

FROM: The Legislative Advisory Committee of the Municipal Health Commission

SUBJECT: House Bill 917

We attempted to send comments on House Bill 917 for the public hearing scheduled by your committee on Friday, April 21. Unfortunately, the public hearing was over before we were able to telex the information to you. We were informed by your legislative assistant that the committee would accept comments on House Bill 917 through mid week. Found attached is the Legislative Review and Recommendations we developed on House Bill 917. We hope your committee will consider our input before making any decisions on this bill.

1) It transfers to the State the responsiblity of a private medical facility to obtain funding. We question this use of public assets to enhance private enterprise.

2) It creates an added layer of bureaucracy.

3) The Board of Directors are appointed rather than elected.

4) May be costly to the State taxpayers. Anytime a new office is established secretaries must be hired, phones enstalled, letterhead printed, public announcements made etc. An office to support the Medical Facility Authority would therefore be costly to the State taxpayers. Additionally, with this legislation allowing the State to manage and operate a medical facility as well as purchase and/or construct real or personal property, the costs and expenses incurred would directly affect the State budget. The potential for cost to the State taxpayers in this case is overwhelming.

5) May have adverse affects on the development of medical facilities. Criteria does not exist in this legislation for selection of the facilities or geographic areas that would benefit from this legislation. Those not selected could be adversely affected by the States action.

6). There exists State and Federal legislation that addresses and provides for planning organizations, Health Systems Agencies, that deal specifically with health facilities and programs. The Health Systems Agencies presently through their review and planning process assess the need for medical facilities throughout the state. This proposed legislation ignores these planning bodies and their orderly plans and processes for medical facility development.

TESTIMONY ON HB 917 FROM SUBCOMMITTEE OF THE ANCHORAGE MUNICIPAL HEALTH COMMISSION

Telefoned by Mary Wlters, Staff to Municipal Health Commission

The following is a statement by the Legislative Subcommittee.

The Municipal Health Commission will meet next Wednesday to discuss the subcommittee's recommendations.

The Legislative Committee of the Anchorage Municipal Health Commission urges defeat of HB 917 for the following reasons:

1. It transfers to the state the responsibility of a private medicatl facility to obtain funding. We question this use of public assets to enhance private enterprise.

2. It creates an added layer of bureaucracy.

3. The board of directors are appointed rather than elected.

4. The bill may be costly to state taxpayers.

5. It may have an adverse effect on the development of medical facilities.

6. There exists state and federal legislation that addresses and provides for planning oranizations that deal specifically with health facilities and programs. This proposed legislation ignores these planning bodies.

I asked Ms Walters for some amplification of objections #4, 5 & 6 in the written statement which they will send down. She also mentioned that the committee had discussed that section of the legislation which seems to set up the authority as a possible regulatory agency, if not immediately, at least setting the stage for the future.

A more complete statement will be forthcoming next week.

Annette Smith
4/21/78 12:00 p.m.

Mary Walters 264-4261

POSITION PAPER/Department of Health and Social Services

HOUSE BILL 917

"An Act relating to an Alaska Medical Facility Authority."

Accessibility to adequate medical care is not available to all Alaskans due to the lack of certain medical facilities and the inadequacy of other medical structures throughout the State.

Planning surveys indicate a need for additional mental health centers, public health centers, facilities for the developmentally disabled, rehabilitation facilities and drug abuse and alcoholism treatment facilities. Architectural surveys of hospitals, nursing homes and intermediate care homes often indicate a need for modernization or replacement of many of these facilities. As the population increases, additions to these facilities may be needed. Many of Alaska's existing facilities do not meet Life Safety requirements and are not functionally designed to operate efficiently or to provide cost savings through such means as energy conservation.

The intent of House Bill 917 is to establish a means of financing the construction and equipping of medical facilities for which a community-based need has been demonstrated. By providing an economic mechanism to finance such facilities, efforts to contain spiraling health care costs could be enhanced. Both municipal, non-profit and profit-making entities are eligible to apply to the proposed Alaska Medical Facility Authority for funding, thus enabling all potential consumers of service to take advantage of the cost-savings realized through the financing mechanism.

As a part of its efforts to contain rising health care costs, the Department of Health and Social Services is naturally concerned about curbing the unnecessary proliferation of medical facilities. Section 18.26.220 stipulates that any medical facility assisted in any way by the proposed Medical Facility Authority would be subject to those licensure and determination of need provisions currently a part of the Alaska Statutes. Any additional requirements promulgated at a future date would also need to be satisfied before eligibility for application was granted. Even those facilities "grandfathered in" under special provision of AS 18.07 must meet the community-determination of need test before being eligible for funding from the proposed Medical Facility Authority. These provisions not only assist the State in guarding against the over-building of medical facilities, but ensure that those facilities utilizing this source of State support benefit from inclusion in the comprehensive State and regional planning process.

The establishment of an alternative financing mechanism for non-municipally owned medical facilities would assist communities in developing the services necessary to meet the health needs of their residents in the most cost-effective manner possible.

HB 917 Relating to Alaska Medical Facility Authority

Questions:

1. Where is the need? For an extra commission and authority?

2. Are health facilities in Alaska lucrative enough to repay loans adequately?

3. Is the authority limited to financing municipal and non-profit health corporations?

4. Exec. Dir. pd. out of bond $?

Amendments:

1. Public members on the Board.
   Appointed for their expertise in the field.

2. Local laws and ordinances to be applicable to facilities constructed.

3. The maximum amount of a loan not to exceed the total cost ofthe facility.

5. What commercial firm has For. loan -?

6. ability to ... pay?

7. p. 5, line 27

8. Conflicts of interest?

Arch. Health Commission

M E M O R A N D U M

TO: Lisa Rudd FROM: Annette Smith

REF: HB 917

I received a telephone call from Ron Nerland, President of the Community Hospital Foundation in Fairbanks (456-6641) He wanted to talk with you about HB 917 and provide any information you may need. He said a Mr. William Doolittle will be attending the hearing on Friday to testify for the Fairbanks hospital and will be bringing with him backup information and letters of support.

This bill, he said, is largely created at the request of the Fairbanks hospital foundation. For a little background, the Community Hospital Foundation was created about 10 years ago and a hospital was built and paid for. About two years ago, an addition was planned for and construction begun. This construction is to be completed late this summer.

The initial cost of this new addition was to be $8 million. The Foundation had a fund raising campaign with a goal of $6 million. They already had $1 million in the bank, and another $1 million was anticipated through revenue sharing.

The total cost has turned out to be $11 million. They received $2.5 million on their first fund raising campaign. They had a second campaign and have $3+ million pledged and they anticipate another $2 million pledged.

Their present financing is through a commercial mortgage financing firm, with a 25 year pay-off at 10% interest. The financing firm has given them interim financing with a committment deadline of December on the total financing package.. Mr. Nerland stated that the shortage of finances will have to come out of room rents.

The more attractive alternative is using tax free revenue bonds at an interest rate of 7%. Over the years this will save the hospital $10 million -- a savings to hospital users as well.

I asked him about the possibility of having the municipality carry the bonds for the hospital. He stated that in order for the municipality to do that, the hospital would have to turn over the title to the municipality. He said there is a very strong feeling in Fairbanks about their people's hospital. The people built it themselves, and they do not wish to turn over the title to any government.

He wanted to stress that if HB 917 is not passed this year, it will not do the Fairbanks people any good, since they must take the first alternative, i.e., commercial financing at 10% by December of this year.

SECTIONAL ANALYSIS: HB 917

Sterling Gallagher
Commissioner of Revenue

The Alaska Medical Facility Authority is designed to aid in the construction and equipping of established and potential medical facilities through financing in the municipal bond market. Similar financial assistance is available to municipalities that wish to expand medical services via medical facilities through the Municipal Bond Bank. This bill provides an additional means of financing to those profit or non profit medical entities which are not municipally owned or eligible for participation in the Municipal Bond Bank. Section 103 of the Internal Revenue Code permits tax exempt financing for these purposes.

18.26.010. The Legislative finding and policy section is necessary to establish the public purpose under which medical facilities can be financed in the municipal market. The Legislative findings are that there are inadequate medical facilities in certain localities. One of the policies is to provide alternative methods of financing and assistance in obtaining financing for the purpose of building or upgrading medical facilities in those localities.

18.26.020. Creation of the authority as a public corporation and instrumentality of the state within the Department of Revenue, but with a separate and independent legal existence.

18.26.030. Establishes the Commissioner of Revenue as chairperson of the Board of Directors, and the Commissioner of Community and Regional Affairs and Commissioner of Health and Social Services as the other two members of the Board.

18.26.040. This section establishes a quorum of two for the Board to function and states that members will serve without salary and that they may hire an Executive Director. Notice of meetings must be given in accordance with regulations adopted by the board and all meetings must be open to the public.

18.26.050. The powers of the authority are set forth in this section. They are comparable to those of similar bodies created in the state.

18.26.060. This section states that the Authority may not maintain or operate any medical facility except as provided in a trust indenture under default.

18.26.070. All expenses incurred by the authority are the sole obligations of the authority and no liability will accrue to the state.

18.26.080. The authority may borrow money and issue revenue bonds after the Board finds by resolution that the operator of the medical facility is financially competent to operate the facility and to retire the debt. Also a resolution may be passed establishing the public purpose of the particular facility and its projected cost. The bond resolution shall set out all the terms and conditions on the sale of the bonds. Bonds are negotiable instruments for purposes of the Uniform Commercial Code. The bond resolution must provide for the establishment of a special fund and may specify contractual terms. The superior court has jurisdiction to hear and determine actions or proceedings relating to the authority.

18.26.090. The authority may issue Bond Anticipation Notes under terms and conditions set by resolution.

18.26.100. This section states that the bonds may be secured by trust agreements.

18.26.110. There is no personal liability for the members of the authority or the person executing the bonds.

18.26.120. All notes and bonds issued against any special funds are a valid claim against that fund.

18.26.130. No member of the board, advisory employees or consultants may vote on a resolution or influence any decision where she/he has a conflict of interest. If violated, monetary gain must be returned, and person may be fined and jailed.

18.26.140. Any pledge of revenue or assets by the authority is binding from the time the pledge is made against any party irrespective of the actual notice.

18.26.150. The revenue bonds issued by the authority are not either directly, indirectly or contingently obligations of the State; they are paid solely from the revenue of the authority.

18.26.160. The rights of bondholders to protect investments via court intervention is specifically established.

18.26.170. The authority may invest its funds in prudent investments as defined in AS 37.10, but may pay no higher price for the investments than the offering or market price.

18.26.180. The bonds are legal security for banks, trust companies, savings and loans and other fiduciaries.

18.26.190. The State of Alaska pledges that it will not alter or limit the rights vested in this authority with respect to outstanding obligations.

18.26.200. The authority shall keep accurate accounting and shall make a report each year to the Governor and the Legislature. The Governor may investigate the affairs of the authority, may examine the property and records of the authority, and may prescribe methods of accounting and the rendering of periodical reports in relation to projects undertaken by the authority.

18.26.210. All medical facilities are subject to state requirements for public buildings and structures.

18.26.220. All facilities shall meet state licensing requirements and shall obtain a certificate of need before financing under this authority.

18.26.230. The bonds of the authority are exempt from all taxes except for gift, inheritance and estate taxes. However real and personal property that is leased to a third party is subject to all local taxes.

18.26.240. All earnings of the authority excess to its needs are the exclusive property of the state.

18.26.250. The authority is not a political subdivision of the state for purposes of AS 37.10, a municipal corporation for purposes of AS 29. or a state agency for purposes of AS 37.

18.26.900. Definition of terms.

file HB 917

April 13, 1978

Representative Sally Smith
Pouch V
State Capitol
Juneau, AK 99811

Dear Sally:

As vice chairman of the Community & Regional Affairs Committee, I am sure you are aware that House Bill #917 has been referred to this committee. We appreciate very much the contact that you have maintained with us through Tom Mingen at the hospital.

I am sure you realize that this bill could result in excess of six million dollar savings to users of the hospital over the next several years. As we understand, this plan has the approval of the state's financial consultant as a very viable way of financing hospital additions.

It is imperative that this legislation or a reasonable facsimile thereof is passed this session. The present addition to our hospital will be completed early this summer and financing must be completed prior to December 1, 1978. If this bill is not passed, we will be forced to use conventional financing at an interest rate of approximately 10%.

I will greatly appreciate anything you can do to see that this legislation is enacted du ring this session.

Warmest regards.

Sincerely yours,

Ron Nerland

RE: HB 917

I spoke with Jack Chenoweth today about HB 917. He said you had asked him to look at the bill. Basically, he had no legal problems with the provisions in the bill. His two questions were:

1. Where is the need for this bill? He said there are very few health facilities in the state which can show enough of a profit to adequately pay back revenue bonds. Anchorage and possibly Fairbanks being the only places where medical care is actually good business. The other hospitals in the state, those run by municipalities or the PHS are operated at an expense to the taxpayers. How would a health center in Nome make enough money to pay back a loan from the authority. There just is not that much use.
Since the basis of this medical facility authority is revenues from the pay back on loans and bonds, I believe it would be worth asking the Administration to show where they think the use of this authority would come from.

2. Is it possible to use the Municipal Bond Bank to accomplish the same thing? I explained to him the opinions of Mr. Berrier and Mr. Rose in this regard; that opening up the Municipal Bond Bank to non-profit or other public corporations would in fact be detrimental to the municipal bonds which it handles. We did talk about including medical facilities in the Industrial Development Authority.

One question that I have is if this authority is limited to dealing with municipalities and non-profit corporations only? The bill states something to this effect on p. 4 (8), but this may not be a strict limitation. Would you ask Revenue at the hearing?

Comparison of HB 917 to South Dakota statute

A quick comparison of HB 917 to the South Dakota statute of health and educational facilities authority indicates they contain essentially the same provisions. The South Dakota statute is more elaborate in that it goes into more detail on each provision. This seems to be a drafting style preferred in the Lower 48.

The basic differences are as follows:

1. The authority is operated by a 7 member board rather than the 3 member board contained in HB 917. The members are chosen according to their experience in various fields considered important to the program. E.g., One member is to be experienced in hospital ahd health care construction and financing; another in health facility architecture; another in municipal and state financing, etc. This board made up of public members requires then provisions for terms of office, vacancies, election of officers and other organizational details. HB 917 provides for 3 commissioners to make up the governing board. Terms of office are therfore not an issue. the commissioners may designate an alternate from their departments. Board members must provide a surety bond for the performance of their duties. Presumably, all commissioners give such a bond upon appointment to the office of commissioner.

2. Public works laws of the state are not applicable to the projects financed by the South Dakota authority. Also, competitive bidding is not required. HB 917 is just the opposite; it specifically states that both are applicable.

3. Local laws and ordinances are applicable to facilities constructed by the South Dakota authority. There is no such statement in HB 917.

4. The South Dakota law is more elaborate on the leasing of facilities. It contains four sections on the terms of the leases, option to purchase, duration of the leases which may not be shorter than the maturity of the bonds, establishment of rent and charges and rules and regulations for use of the facilities. HB 917 does not go into such detail and it probably is extraneous.

5. A maximum on the amount of loans is established. The amount of any loan may not exceed the total cost of the facility (p. 87) HB 917 does not provide for a limit.

6 In the refunding of loans, the South Dakota authority must make a series of findings: that financing is in the public interest, that it will alleviate a financial hardship upon the participating health institution; that it will result in lesser cost of patient care and will result in a savings to third parties. HB 917 does not require the authority to make any such findings for refunding.

more...

7. Initial and annual planning service fees are required of participating institutions which are to be used for consultant planning services to determine the need and location of facilities in a given area. The only mention of determining need in HB 917 is requiring a certificate of need as a prerequisite for funding any facility construction. (p. 17)

The basic provisions for financing seem to be the same between the two bills. Jack Chenoweth took a quick look at HB 917 and had no legal problems with it.

Dear Representative Rudd:

We the undersigned, representing varied public and private interests in our community, are in support of House Bill 917. This act, creating a bonding mechanism to provide additional alternatives to medical facilities for issuing bonds under a State authority, is a necessity in the Fairbanks area and in other areas throughout the State. This act would provide a mechanism for Fairbanks Memorial Hospital to finance its new addition and thus would save an approximate six million dollars in interest costs. We are extremely supportive of House Bill 917 and urge your committee to take immediate action on this bill.

POSITION PAPER/Department of Health and Social Services

HOUSE BILL 917

"An Act relating to an Alaska Medical Facility Authority."

Accessibility to adequate medical care is not available to all Alaskans due to the lack of certain medical facilities and the inadequacy of other medical structures throughout the State.

Planning surveys indicate a need for additional mental health centers, public health centers, facilities for the developmentally disabled, rehabilitation facilities and drug abuse and alcoholism treatment facilities. Architectural surveys of hospitals, nursing homes and intermediate care homes often indicate a need for modernization or replacement of many of these facilities. As the population increases, additions to these facilities may be needed. Many of Alaska's existing facilities do not meet Life Safety requirements and are not functionally designed to operate efficiently or to provide cost savings through such means as energy conservation.

The intent of House Bill 917 is to establish a means of financing the construction and equipping of medical facilities for which a community-based need has been demonstrated. By providing an economic mechanism to finance such facilities, efforts to contain spiraling health care costs could be enhanced. Both municipal, non-profit and profit-making entities are eligible to apply to the proposed Alaska Medical Facility Authority for funding, thus enabling all potential consumers of service to take advantage of the cost-savings realized through the financing mechanism.

As a part of its efforts to contain rising health care costs, the Department of Health and Social Services is naturally concerned about curbing the unnecessary proliferation of medical facilities. Section 18.26.220 stipulates that any medical facility assisted in any way by the proposed Medical Facility Authority would be subject to those licensure and determination of need provisions currently a part of the Alaska Statutes. Any additional requirements promulgated at a future date would also need to be satisfied before eligibility for application was granted. Even those facilities "grandfathered in" under special provision of AS 18.07 must meet the community-determination of need test before being eligible for funding from the proposed Medical Facility Authority. These provisions not only assist the State in guarding against the over-building of medical facilities, but ensure that those facilities utilizing this source of State support benefit from inclusion in the comprehensive State and regional planning process.

The establishment of an alternative financing mechanism for non-municipally owned medical facilities would assist communities in developing the services necessary to meet the health needs of their residents in the most cost-effective manner possible.

PMS REP LISA RUDD DELIVER ABOUT 9AM

ROOM 647 COURT BLDG Attn: Members of House C+RA Committee

JUN

FOR TESTIMONY BEFORE THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE ON HB917

PROVIDENCE HOSPITAL OPPOSED HB917, QUOTE AN ACT RELATING TO AN (ALASKA MEDICAL FACILITY AUTHORITY) UNQUOTE FOR THE FOLLOWING REASONS:

1. WE DO NOT UNDERSTAND WHY THIS BILL WAS FILED AT ALL. THERE IS ABSOLUTELY NO CLEAR EVIDENCE THAT THERE EXISTS INADEQUATE OR INSUFFICIENT MEDICAL CARE AND HEALTH CARE FACILITIES FOR THE RSIDENTS OF THE STATE OF ALASKA.

2. ADEQUATE PUBLIC AND PRIVATE FINANCING OF MEDICAL FACILITIES IS ALREADY AVAILABLE WHENTHERE IS A DEMONSTRATED NEED FOR A FACILITY AND DEMONSTRATED FINANCIAL FEASIBILITY ADDITIONAL SOURCES OF FUNDING ARE NOT NEEDED. PRIVATE SOURCES OF MONEY AVAILABLE INCLUDE DIRECT OBLIGATION BONDS AND MORTGAGES. GOVERNMENT SOURCES INCLUDE MUNICPAL TAX-EXEMPT BONDS, FUNDS UNDER PUBLIC LAW 93-641 (THE OLD HILL BURTON LAW), AND FUNDS BY THE PUBLIC HEALTH SERVICE, NATIVE CORPORATIONS, REVENUE SHARING AND OTHER PROGRAMS.

3. THE BILL IS VERY UNCLEAR REGARDING THE RELATIONSHIP OF FACILITIES FUNDED BY THE AUTHORITY TO THE EXISTING STATE

CERTIFICATE OF NEED LAW. ANY MEDICAL FACILITY CONSTRUCTION MUST GO THROUGH THE CURRENT STATE CERTIFICATE OF NEED PROCESS PRIOR TO MAKING FUNDING AVAILABLE.

4. THE BILL IS DIRECTLY CONTRARY, IN PHILOSOPHY, TO ALL EXISTING CONFLICT OF INTEREST LEGISLATION IN ALASKA. SECTION 18.26.130 OF THIS BILL PERMITS BOARD MEMBERS OF THE AUTHORITY TO DIRECTLY BENEFIT FROM THE DESIGNATION OF THE BOARD. ALL A BOARD MEMBER HAS TO DO IS TO DISCLOSE A CONFLICT OF INTEREST AND REMOVE HIMSELF FROM THE VOTING ON THAT ISSUE.

5. THE BILL MAY BE IN VIOLATION OF THE CONSTITUTION OF THE STATE OF ALASKA. SECTION 18.26.140 OF THIS BILL, PROVIDES THAT ONCE THE AUTHORITY PLEDGES REVENUE TOBOND HOLDERS, THAT THE PLEDGE WILL TAKEPRIORITY OVER ALL CONTRACT OR TORT OBLIGATIONS TO THE EXTENT THE LAW PERMITS THE AUTHORITY TO NOT BE FINANCIALLY RESPONSIBLE FOR BREACHES OF CONTRACTS OR TORTS, IT IS IN VIOLATIONOF ARTICLE I SECTION 15 OF THE ALASKA CONSTITUTION. THIS COULD MEAN, FOR EXAMPLE,THAT EITHER THE TATE GETS LEFT HOLDING THE BAG OR AN INJURED PERSON MAY NOT BE JUSTLY COMPENSATED.

6. THE BILL APPEARS TO ESTABLISH ANOTHER BUREAUCRATIC LAYER, WHOSE POWERS HAVE NOT BEEN THOROUGHLY THOUGHT OUT.

7. IN CONCLUSION, THE PEOPLE OF ALASKA HAVE NOT HAD THE OPPORTUNITY FOR ADEQUATE PUBLIC EXPLANATION AND DISCUSSION OF THIS VERY COMPLEX LEGISLATION. WE DO NOT FEEL THIS BILL IS IN THE BEST INTEREST OF THE PEOPLE OF THE STATE OF ALASKA. FOR THESE REASONS, PROVIDENCE HOSPITAL MUST OPPOSE THE PASSAGE OF HB917

CHRIS BEARDELEY FOR AL M. CAMOSSO ADMINISTRATOR

M E M O R A N D U M

TO: Lisa Rudd FROM: Annette Smith

REF: HB 917

I received a telephone call from Ron Nerland, President of the Community Hospital Foundation in Fairbanks (456-6641) He wanted to talk with you about HB 917 and provide any information you may need. He said a Mr. William Doolittle will be attending the hearing on Friday to testify for the Fairbanks hospital and will be bringing with him backup information and letters of support.

This bill, he said, is largely created at the request of the Fairbanks hospital foundation. For a little background, the Community Hospital Foundation was created about 10 years ago and a hospital was built and paid for. About two years ago, an addition was planned for and construction begun. This construction is to be completed late this summer.

The initial cost of this new addition was to be $8 million. The Foundation had a fund raising campaign with a goal of $6 million. They already had $1 million in the bank, and another $1 million was anticipated through revenue sharing.

The total cost has turned out to be $11 million. They received $2.5 million on their first fund raising campaign. They had a second campaign and have $3+ million pledged and they anticipate another $2 million pledged.

Their present financing is through a commercial mortgage financing firm, with a 25 year pay-off at 10% interest. The financing firm has given them interim financing with a committment deadline of December on the total financing package.. Mr. Nerland stated that the shortage of finances will have to come out of room rents.

The more attractive alternative is using tax free revenue bonds at an interest rate of 7%. Over the years this will save the hospital $10 million -- a savings to hospital users as well.

I asked him about the possibility of having the municipality carry the bonds for the hospital. He stated that in order for the municipality to do that, the hospital would have to turn over the title to the municipality. He said there is a very strong feeling in Fairbanks about their people's hospital. The people built it themselves, and they do not wish to turn over the title to any government.

He wanted to stress that if HB 917 is not passed this year, it will not do the Fairbanks people any good, since they must take the first alternative, i.e., commercial financing at 10% by December of this year.

Municipality of Anchorage

MEMORANDUM

DATE: April 25, 1978

TO: Lisa Rudd

FROM: The Legislative Advisory Committee of the Municipal Health Commission

SUBJECT: House Bill 917

We attempted to send comments on House Bill 917 for the public hearing scheduled by your committee on Friday, April 21. Unfortunately, the public hearing was over before we were able to telex the information to you. We were informed by your legislative assistant that the committee would accept additional comments on House Bill 917 through mid week. Found attached is the Legislative Review and Recommendations we developed on House Bill 917. We hope your committee will consider our input before making any decisions on this Bill.

LEGISLATIVE REVIEW & RECOMMENDATIONS
OF THE LEGISLATIVE ADVISORY COMMITTEE
OF THE MUNICIPAL HEALTH COMMISSION

1. BILL NUMBER AND TOPIC: House Bill 917 - Alaska Medical Facility Authority.

2. WHAT IS THE CURRENT STATUS OF THE BILL? Presently in House Community and Regional Affairs with additional referral to House HESS.
WHAT IS THE TIME FRAME FOR INFLUENCING THE BILL'S OUTCOME BY THIS COMMITTEE OR COMMISSION? This legislative session.

3. WHAT DOES THE BILL DO? Provides for an organization in the State government that will function as a mechanism through which medical facilities (proposed or existing) can obtain financing.

4. WHO DOES IT AFFECT? Existing and proposed medical facilities and state taxpayers.

5. HOW MUCH DOES IT COST? Unknown.

6. IS IT DIRECTED TO A SPECIFIC GEOGRAPHIC AREA? No.

7. IS IT DIRECTED TO A SPECIFIC GROUP? Yes.
WHO? Owners and operators of existing and proposed medical facilities.
HOW DOES IT AFFECT OTHERS? May affect the public through increased taxes.

8. WHAT ARE ITS STRENGTHS? Alternative (public) mechanism for financing medical facilities.

9. WHAT ARE ITS DRAWBACKS, WEAKNESSES? 1) Transfers to the State the responsibility of a private medical facility to obtain funding. We question this use of public assets to enhance private enterprise.
2) Could be costly to the State taxpayers.
3) Is an added layer of bureaucracy.
4) The Board of Directors are appointed rather than elected.
5) Already have a state and federal legislation that addresses and provides two planning organizations that deal specifically with health facilities and programs. This legislation ignores those planning bodies.
6) May have adverse affects on the development of medical facilities.

10. IS THE IDEA NEW? No.
ARE THERE PRECEDENTS? Yes.
WHERE? Federal Public Law.

11. HOW WOULD THIS BILL AFFECT THE ANCHORAGE HEALTH SERVICES PLAN? Would affect the Anchorage Health Services Plan adversely.

12. WHAT IS THE COMMITTEE'S RECOMMENDATION? That HB 917 DOES NOT become law. for the following reasons:
1) It transfers to the State the responsibility of a private medical facility to obtain funding. We question this use of public assets to enhance private enterprise.
2) It creates an added layer of bureaucracy.
3) The Board of Directors are appointed rather than elected.

4) May be costly to the State taxpayers. Anytime a new office is established secretaries must be hired, phones installed, letterhead printed, public announcements made etc. An office to support the Medical Facility Authority would therefore be costly to the State taxpayers. Additionally, with this legislation allowing the State to manage and operate a medical facility as well as purchase and/or construct real or personal property, the costs and expenses incurred would directly affect the State budget. The potential for cost to the State taxpayers in this case is overwhelming.

5) May have adverse affects on the development of medical facilities. Criteria does not exist in this legislation for selection of the facilities or geographic areas that would benefit from this legislation. Those not selected could be adversely affected by the States action.

6) There exists State and Federal legislation that addresses and provides for planning organizations, Health Systems Agencies, that deal specifically with health facilities and programs. The Health Systems Agencies presently through their review and planning process assess the need for medical facilities throughout the state. This proposed legislation ignores these planning bodies and their orderly plans and processes for medical facility development.

THE PRECEDING DOCUMENT(S) MAY NOT FILM LEGIBLY BECAUSE OF POOR QUALITY OF THE ORIGINAL.

HCR
125

LETTER OF INTENT -- CSHCR 125

By the Community and Regional Affairs Committee

Testimony received by the Community and Regional Affairs Committee identified two provisions of regulations submitted by the Alaska Coastal Policy Council for which change is suggested. Both bear upon the desire of members of the committee to maintain the broadest possible opportunity for public participation in and understanding of the process of developing district and state coastal management programs. Specifically,

(1) in 6 AAC 85.120(b), it is the intent of the committee that, in addition to giving of notice of public hearing by newspaper advertisement, where no newspaper of general circulation exists within a community or region, general notice should be given by radio;

(2) in 6 AAC 85.140, it is the intent of the committee that broad public circulation through general notice or radio broadcast be given to recommendations of the Coastal Policy Council in its review of district programs, that the public at-large (rather than only those persons specifically served a written copy of the Council's recommendation) have opportunity to respond with written comments, and that the public at-large enjoy the opportunity to attend all subsequent sessions, including mediation sessions.

Language adopted by the Coastal Policy Council in each of sections cited complies with the letter of each underlying statute; the committee recommends reconsideration and change to more nearly accord with the spirit of public participation and understanding which is the basis of the coastal management program.

30. Program management and coordination

6 AAC 80.010. COVERAGE OF REGULATIONS. (a) This title contains guidelines and standards for the use of and application by districts and state agencies in carrying out their responsibilities under the Alaska Coastal Management Act, AS 46.40, and AS 44.19.891 -- 44.19.894.

(b) Nothing in this chapter or in any district program may be construed as displacing or diminishing the authority of any state agency or local government with respect to resources in the coastal area. Uses and activities conducted by state agencies in the coastal area shall be consistent with the applicable district program and the standards contained in this chapter. In authorizing uses or activities in the coastal area under its statutory authority, each state agency shall grant authorization if, in addition to finding that the use or activity complies with the agency's statutes and regulations, the agency finds that the use or activity is consistent with the applicable district program and the standards contained in this chapter.

(c) At a minimum, the Council will review this title annually.

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.020. PUBLIC PARTICIPATION AND INFORMATION. (a) The Council will provide adequate, effective, and continuing opportunities for public participation from the beginning of the Alaska Coastal Management Program. The Council will give notice of when and where opportunities for public participation will be provided before adoption of guidelines and standards, review and approval of district programs and amendments to district programs, and amendments to the Alaska Coastal Management Program.

(b) The Council will not approve a district program or significant amendment of a district program unless evidence of [significant] opportunities for public participation at the district level has been provided.

(c) The Council will make available to the public information and educational materials concerning coastal management, in understandable form, including

(1) a guide for the development of district programs;

(2) maps and narratives describing physical and biological characteristics to be used in establishing boundaries of coastal areas;

(3) areas recommended for Council designation as areas which merit special attention;

(4) maps showing the distribution and abundance of coastal fish and wildlife species with commercial, recreational, subsistence, or general ecological importance;

(5) an identification of major data and information sources concerning coastal management;

(6) a summary of information regarding coastal regions;

(7) summaries of public hearings and workshops;

(8) films and slide programs;

(9) written material summarizing or explaining the Alaska Coastal Management Program; and

(10) the Council's annual report to the legislature.

(d) At public meetings concerning the Alaska Coastal Management Program, the Council will insure that, where reasonably requested, translation into appropriate Native language is provided.

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.030. PROGRAM MANAGEMENT AND COORDINATION. (a) The Office of Coastal Management is the designated lead agency for the Alaska Coastal Management Program. The Office of Coastal Management will

(1) present the staff position regarding matters before the Council;

(2) coordinate the activities of state agencies participating in the Alaska Coastal Management Program; and

(3) review state and federal actions for consistency with the Alaska Coastal Management Program, subject to Council review.

(b) The Council will initiate an interagency program of comprehensive resource management for each geographic region contained in AS 44.19.891(a)(1). Regional programs will

(1) assist the Council and districts in identifying uses of state concern[1] and developing management policies for these uses;

(2) provide resource, social, and economic information on a coordinated regional basis; and

(3) assist the Council and districts in identifying, avoiding, or minimizing existing or potential conflicts.

(c) Plans and recommendations developed as part of the regional program described in (b) of this section shall be transmitted to the district through the Office of Coastal Management. District planning efforts shall demonstrate review and consideration of these plans and recommendations. If the final district program proposed does not agree with the regional program plans and recommendations, the differences will be resolved by the Council.

(d) The Council will prepare a manual of standards for the management of land and water uses in the coastal area to assist in the development of district and state agency programs.

Authority: AS 44.19.893
AS 46.40.040

1. "uses of state concern" is defined in AS 46.40.210(6).

ARTICLE 2.
USES AND ACTIVITIES

Section
40. Coastal development
50. Geophysical hazard areas
60. Recreation
70. Energy facilities
80. Transportation and utilities
90. Fish and seafood processing
100. Timber harvest and processing
110. Mining and mineral processing
120. Subsistence

6 AAC 80.040. COASTAL DEVELOPMENT. (a) In planning for and approving development in coastal areas, districts and state agencies shall give, in the following order, priority to

(1) water-dependent uses and activities;

(2) water-related uses and activities; and

(3) uses and activities which are neither water-dependent nor water-related for which there is no feasible and prudent inland alternative to meet the public need for the use or activity.

(b) The placement of structures and the discharge of dredge or fill material into coastal water shall, at a minimum, comply with Parts 320-323, Title 33, Code of Federal Regulations, Navigation and Navigable Waters.

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.050. GEOPHYSICAL HAZARD AREAS. (a) Districts and state agencies shall identify known geophysical hazard areas and areas of high development potential in which there is a substantial possibility that geophysical hazards may occur.

(b) Development in areas identified under (a) of this section may not be approved by the appropriate state or local authority until siting, design, and construction measures for minimizing property damage and protecting against loss of life have been provided.

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.060. RECREATION. (a) Districts shall designate areas for recreational use. Criteria for designation of areas of recreational use are:

(1) the area receives significant use by persons engaging in recreational pursuits or is a major tourist destination; or

(2) the area has potential for high quality recreational use because of physical, biological, or cultural features.

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.070. ENERGY FACILITIES. (a) Sites suitable for the development of major onshore, nearshore, offshore, and OCS energy facilities shall be identified by the state in cooperation with districts.

Who in State?

(b) The siting and approval of major oil and gas facilities shall be based on the policies of the State of Alaska concerning the onshore and nearshore aspects of oil and gas development.

(c) Districts shall consider that the uses authorized by the issuance of state leases for mineral and petroleum resource extraction are specific uses of state concern. District programs and plans shall be consistent with such uses.

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.080. TRANSPORTATION AND UTILITIES. (a) Transportation and utility routes and facilities in the coastal area shall be sited, designed, and constructed so as to be compatible with local community goals and desires as expressed in district programs and local comprehensive plans.

(b) Transportation and utility routes and facilities shall be sited inland from beaches and shorelines unless the route or facility is water-dependent or no feasible and prudent inland alternative exists to meet the public need for the route or facility.

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.090. FISH AND SEAFOOD PROCESSING. Districts shall identify and may designate areas of the coast suitable for the location or development of facilities related to commercial fishing and seafood processing.

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.100. TIMBER HARVEST AND PROCESSING. (a) Commercial timber harvest activities in the coastal area shall be sited in areas where the management of reforestation, using the best available technology, will result in producing a sustained yield of merchantable timber unless the area is to be converted to a use other than timber harvest.

(b) Commercial timber harvest activities in the coastal area shall be conducted so as to meet the following standards:

(1) the location of facilities and the layout of logging systems shall be managed so as to minimize potential for adverse environmental impacts;

(2) assure unrestricted fish movement in coastal waters; and

(3) timber harvest and timber management activities shall be planned and implemented so as to protect streambanks and shorelines, prevent adverse impacts on fish resources and habitats, and minimize adverse impacts on wildlife resources and habitats as determined on a case-by-case basis by the Alaska Departments of Natural Resources, Environmental Conservation, and Fish and Game, districts, and appropriate federal agencies.

(c) Commercial timber transport, storage, and processing in the coastal area shall be conducted so as to meet the following standards:

(1) onshore storage of logs shall be encouraged where compatible with the objectives of the Alaska Coastal Management Program;

(2) sites for in-water dumping and storage of logs shall be selected and these activities conducted so as to minimize adverse effects on the marine ecosystem, minimize conflicts with recreational uses and activities, be safe from storms, and not constitute a hazard to navigation;

(3) roads for log transport and harvest area access shall be planned, designed, and constructed so as to minimize mass wasting, erosion, sedimentation, interference with drainage, and adequately maintained until such time as they are returned to their pre-road natural drainage pattern (put to bed); and

(4) stream crossings, including bridges and culverts, shall be kept to a minimum number, designed to withstand seasonal high water and flooding, and provide for unrestricted passage of fish.

(d) Upon the effective date of a regulation adopted under the authority of forest practices legislation establishing a standard corresponding to a standard in this section, the standard in this section will not be applicable.

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.110. MINING AND MINERAL PROCESSING. (a) Mining and mineral processing in the coastal area shall be permitted, designed, and conducted so as to be compatible with the standards contained in this chapter, adjacent uses and activities, regional programs, statewide and national needs, district programs, and local comprehensive plans.

(b) Sand and gravel may be extracted from coastal waters, intertidal areas, barrier islands, and spits when there is no feasible and prudent alternative to coastal extraction which will meet the public need for the sand or gravel.

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.120. SUBSISTENCE. (a) Districts and state agencies shall recognize and assure opportunities for subsistence usage of coastal areas and resources.

(b) Districts shall identify areas in which subsistence is the dominant use of coastal resources.

(c) Districts may, after consultation with appropriate state agencies, Native corporations, and any other persons or groups, designate areas identified under (b) of this section as subsistence zones in which subsistence shall have priority over all non-subsistence uses and activities.

(d) Before a potentially conflicting use or activity may be authorized within areas designated under (c) of this section, a study of the possible adverse impacts of the proposed potentially conflicting use or activity upon subsistence usage shall be conducted and appropriate safeguards to assure subsistence usage shall be provided.

(e) Districts sharing migratory fish and game resources shall be required to submit compatible plans for habitat management.

Authority: AS 44.19.893
AS 46.40.040

ARTICLE 3.
RESOURCES AND HABITATS

Section
130. Habitats
140. Air, land, and water quality
150. Historic, prehistoric, and archaeological resources

6 AAC 80.130. HABITATS. (a) Habitats in the coastal area which are subject to the Alaska Coastal Management Program include

(1) offshore areas;

(2) estuaries;

(3) wetlands and tideflats;

(4) rocky islands and seacliffs;

(5) barrier islands and lagoons;

(6) exposed high energy coasts;

(7) rivers, streams, and lakes; and

(8) important upland habitat.

(b) The habitats contained in (a) of this section shall be managed so as to maintain or enhance the biological, physical, and chemical characteristics of the habitat which contribute to its capacity to support living resources.

(c) In addition to the standard contained in (b) of this section, the following standards apply to the management of the following habitats:

(1) manage offshore areas as a fisheries conservation zone so as to maintain or enhance the state's sport, commercial, and subsistence fishery;

(2) manage estuaries so as to assure adequate water flow, natural circulation patterns, nutrients, and oxygen levels, and avoid the discharge of toxic wastes, silt, and destruction of productive habitat;

(3) manage wetlands and tideflats so as to assure adequate water flow, nutrients, and oxygen levels and avoid adverse effects on natural drainage patterns, the destruction of important habitat, and the discharge of toxic substances;

(4) manage rocky islands and seacliffs so as to avoid the harassment of wildlife, destruction of important habitat, and the introduction of competing or destructive species and predators;

(5) manage barrier islands and lagoons so as to maintain adequate flows of sediments, detritus, and water, avoid the alteration or redirection of wave energy which would lead to the filling in of lagoons or the erosion of barrier islands, and discourage activities which would decrease the use of barrier islands by coastal species, including polar bears and nesting birds;

(6) manage high energy coasts by assuring the adequate mix and transport of sediments and nutrients and avoiding redirection of transport processes and wave energy; and

(7) manage rivers, streams, and lakes to protect natural vegetation, water quality, important fish or wildlife habitat, and natural water flow.

(d) Uses and activities in the coastal area which will not conform to the standards contained in (b) and (c) of this section may be allowed by the district or appropriate state agency providing the following are established:

(1) significant public need for the proposed use or activity;

(2) no feasible and prudent alternative to meet the public need for the proposed use or activity which would conform to the standards contained in (b) and (c) of this section; and

(3) all feasible and prudent steps to maximize conformance with the standards contained in (b) and (c) of this section will be taken.

(e) In applying this section, districts and state agencies may use appropriate expertise, including regional programs referred to in sec. 30(b) of this chapter.

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.140. AIR, LAND, AND WATER QUALITY. Notwithstanding any other provision of this chapter, the statutes, regulations, and procedures of the Alaska Department of Environmental Conservation with respect to the protection of air, land, and water quality are incorporated into the Alaska Coastal Management Program and, as administered by that agency, constitute the components of the coastal management program with respect to those purposes.

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.150. HISTORIC, PREHISTORIC, AND ARCHAEOLOGICAL RESOURCES. Districts and appropriate state agencies shall identify areas of the coast which are important to the study, understanding, or illustration of national, state, or local history or prehistory.

Authority: AS 44.14.893
AS 46.40.040

ARTICLE 4.
AREAS WHICH MERIT SPECIAL ATTENTION

Section
160. Areas Which Merit Special Attention

6 AAC 80.160. AREAS WHICH MERIT SPECIAL ATTENTION. (a) Districts and appropriate state agencies shall recommend to the Council areas to be designated as areas which merit special attention.[2] Recommendations shall include the following information:

(1) the basis or bases for designation pursuant to AS 46.40.210(1) or (b) of this section;

(2) a map showing the geographical location, surface area, and, where appropriate, bathymetry of the area;

(3) a description of the area which includes dominant physical and biological features;

(4) the existing ownership, jurisdiction, and management status of the area, including existing uses and activities;

(5) the existing ownership, jurisdiction, and management status of adjacent shoreland and sea areas, including existing uses and activities;

(6) present and anticipated conflicts among uses and activities within or adjacent to the area, if any; and

(7) a proposed management scheme, consisting of the following:

(A) a description of the uses and activities which will be considered proper and the uses and activities which will be considered improper with respect to land and water within the area;

(B) a summary or statement of the policies which will be applied in managing the area; and

(C) an identification of the authorities which will be used to implement the proposed management scheme.

(b) In addition to the categories contained in AS 46.40.210(1), areas which merit special attention may include the following:

(1) areas important for subsistence hunting, fishing, food gathering, and foraging;

(2) areas with special scientific values or opportunities, including those where ongoing research projects could jeopardized by development or conflicting uses and activities; and

2. "areas which merit special attention" is defined in AS 46.40.210(1).

(3) potential estuarine or marine sanctuaries.

(c) Management schemes for areas which merit special attention shall preserve, protect, enhance, or restore the value or values for which the area was designated.

Authority: AS 44.19.893
AS 46.40.040

ARTICLE 5.
GENERAL PROVISIONS

Section
170. Definitions

6 AAC 80.170. DEFINITIONS. In this chapter

Real Word?

(1) "barrier islands and lagoons" means depositional coastal environments formed by deposits of sediment offshore or coastal remnants which form a barrier of low-lying islands and bars protecting a salt-water lagoon with free exchange of water to the sea;

(2) "coastal water" means those waters adjacent to shorelines which contain a measurable quantity of seawater, including sounds, bays, lagoons, bayous, ponds, and estuaries, and the living resources which are dependent on these waters;

(3) "Council" means the Alaska Coastal Policy Council;

(4) "district" means coastal resource district as defined in AS 46.40.210(2);

(5) "district program" means district coastal management program;

(6) "estuary" means a semi-closed, coastal body of water which has a free connection with the sea and within which seawater is measurably diluted with freshwater derived from land drainage;

(7) "exposed high-energy coasts" means open and unprotected sections of coastline with direct exposure to ocean generated wave impacts and usually characterized by coarse sand, gravel, boulder beaches, and well-mixed coastal waters;

(8) "facilities related to commercial fishing and seafood processing" include hatcheries and related facilities, seafood processing plants and support facilities, marine industrial and commercial facilities, and aquaculture facilities;

(9) "geophysical hazards" include potential flooding, tsunami run-up, landslides, snowslides, severe faults, and ice hazards;

(10) "mining and mineral processing" means the development of mineral resources extracted in tidal rivers, coastal waters, and on continental shelves of the open sea, and found in surface, subsurface, and aqueous deposits;

(11) "offshore areas" means submerged lands and waters seaward of the coastline;

(12) "rocky islands and seacliffs" means islands of volcanic or tectonic origin with rocky shores and steep faces, offshore rocks, capes, and steep rocky seafronts;

(13) "tideflats" means mostly unvegetated areas that are alternately exposed and inundated by the falling and rising of the tide;

(14) "transportation and utility routes and facilities" include power transmission lines, mineral slurry, oil and gas pipelines, land and marine corridors, railways, highways, roadways, air terminals, water and sewage transfer, and facilities required to operate and maintain them;

(15) "upland" means drainages, aquifers, and land, the use of which would have a direct and significant impact on coastal waters;

(16) "water-dependent" means a use or activity which can be carried out only on, in, or adjacent to water areas because the use requires access to the water body;

(17) "water-related" means a use or activity which is not directly dependent upon access to a water body, but which provides goods or services that are directly associated with water-dependence and which, if not located adjacent to water, would result in a public loss of quality in the goods or services offered; and

(18) "wetlands" includes both freshwater and saltwater wetlands; freshwater wetlands means those environments characterized by rooted vegetation which is partially submerged either continuously or periodically by surface freshwater with less than .5 parts per thousand salt content and not exceeding three meters in depth; saltwater wetlands means those coastal areas along sheltered shorelines characterized by halophytic hydrophytes and macroalgae extending from extreme low tide to an area above extreme high tide which is influenced by sea spray or tidally-induced watertable changes.

AS 46.40.040

CHAPTER 85.
GUIDELINES FOR DISTRICT COASTAL MANAGEMENT PROGRAMS

ARTICLE 1
PROGRAM ELEMENTS

Section
10. Needs, objectives and goals
20. Organization
30. Boundaries
40. Resource inventory
50. Resource analysis
60. Subject uses
70. Proper and improper uses
80. Policies
90. Implementation
100. Public participation

6 AAC 85.010. NEEDS, OBJECTIVES, AND GOALS. Each district program shall include a statement of the district's overall coastal management needs, objectives, or goals, or the district's comprehensive land and resource use plan.

Authority: AS 44.19.893
AS 46.40.030
AS 46.40.040

6 AAC 85.020. ORGANIZATION. Each district program shall include a description of the district program organization for coastal management. Budgetary and staff needs and, where appropriate, a schedule for necessary reorganization shall be included.

Authority: AS 44.19.893
AS 46.40.030
AS 46.40.040

6 AAC 85.030. BOUNDARIES. (a) Each district program shall include a map of the boundaries of the coastal area within the district subject to the district program.

(b) Prior to Council approval of the district program, initial boundaries shall be based on Biophysical Boundaries of Alaska's Coastal Zone,[1] and shall include the zone of direct interaction and the zone of direct influence.

(c) Final boundaries of the coastal area subject to the district program may diverge from the initial boundaries if the final boundaries:

1. available from the Office of Coastal Management, Division of Policy Development and Planning, Office of the Governor.

(1) extend inland and seaward to the extent necessary to manage uses and activities that have or are likely to have a direct and significant impact on coastal waters; and

(2) include all transitional and intertidal areas, salt marshes, saltwater wetlands, islands, and beaches.

(d) Providing that the criteria contained in (c) of this section are met, final boundaries of the coastal area subject to the district coastal management program may be based on political jurisdiction, cultural features, planning areas, watersheds, topographic features, uniform setbacks, or the dependency of uses and activities on water access.

(e) The boundaries of the district shall be sufficiently compatible with those of adjoining areas to allow consistent administration of the Alaska Coastal Management Program. What Mean ?

Authority: AS 44.19.893
AS 46.40.030
AS 46.40.040

6 AAC 85.040. RESOURCE INVENTORY. Each district program shall include a resource inventory which describes, in a manner, sufficient for program development and implementation:

(1) habitats contained in 6 AAC 80.130 that are found within and adjacent to the district;

(2) major cultural resources that are found within and adjacent to the district;

(3) major land and water uses and activities which are conducted within and adjacent to the district;

(4) major land and resource ownership and management responsibilities within and adjacent to the district; and

(5) major historic, prehistoric, and archaeological resources which are found within and adjacent to the district.

Authority: AS 44.19.893
AS 46.40.030
AS 46.40.040

6 AAC 85.050. RESOURCE ANALYSIS. Each district program shall include a resource analysis which describes, in a manner sufficient for program development and implementation:

(1) significant anticipated changes in elements listed under sec. 40 of this chapter;

(2) an evaluation of the environmental capability and sensitivity of resources and habitats, including cultural resources, for land and water uses and activities; and

(3) an assessment of the present and anticipated needs and demands for coastal habitats and resources.

Authority: AS 44.19.893
AS 46.40.030
AS 46.40.040

6 AAC 85.060. SUBJECT USES. Each district program shall include a description of the land and water uses and activities which are subject to the district program. The uses and activities contained in 6 AAC 80 shall, if applicable, be subject to the district program.

Authority: AS 44.19.893
AS 46.40.030
AS 46.40.040

6 AAC 85.070. PROPER AND IMPROPER USES. Each district program shall include a description of the uses and activities, including uses of state concern, that will be considered proper and the uses and activities, including uses of state concern, that will be considered improper within the coastal area, including land and water use designations. This description shall be based on the district's statement of overall needs, objectives, or goals, or the district's comprehensive land and resource use plan, under sec. 10 of this chapter, and shall be consistent with the standards contained in ch. 80 of this title.

Authority: AS 44.19.893
AS 46.40.030
AS 46.40.040

6 AAC 85.080. POLICIES. Each district program shall include a summary or statement of the policies that will be applied to land and water uses and activities subject to the district program and the process which will be used to determine whether specific proposals for land and water uses and activities will be allowed. It shall be the general policy of the district to approve specific proposals for uses and activities within areas designated for those uses and activities under sec. 70 of this chapter. Districts shall use existing means appropriate for the evaluation of specific proposals to the greatest extent feasible and prudent. Policies and procedures under this section shall be consistent with the standards contained in ch. 80 of this title and shall meet the following criteria:

(1) comprehensiveness, so as to apply to all uses, activities, and areas in need of management;

(2) specificity, so as to allow clear understanding of who will be affected by the district program, how they will be affected, and whether specific proposals for land and water uses and activities will be allowed; and

(3) enforceability, so as to insure implementation of and adherence to the district program.

Authority: AS 44.19.893
AS 46.40.030
AS 46.40.040

6 AAC 85.090. IMPLEMENTATION. Each district program shall include a description of the methods and authorities which will be used to implement the district program. Methods and authorities must be adequate to insure program implementation and any additional methods or authorities which are required shall be specified. Methods and authorities include: land and water use plans; municipal ordinances and resolutions, including shoreline, zoning, and subdivision ordinances and building codes; state and federal statutes and regulations; capital improvements programs; the purchase, sale, lease, or exchange of coastal land and water resources; cooperative agreements; tax exemptions for non-development purchase of development rights; memoranda of understanding; and coordinated project or permit review procedures.

Authority: AS 44.19.893
AS 46.40.030
AS 46.40.040

6 AAC 85.100. PUBLIC PARTICIPATION. Each district program shall include evidence of effective and significant opportunities for public participation in program development, under sec. 120 of this chapter.

Authority: AS 44.19.893
AS 46.40.030
AS 46.40.040

ARTICLE 2.
GOVERNMENT PROCESS

Section
110. Submittals to Council
120. Public involvement
130. Coordination and review
140. Council review

6 AAC 85.110. SUBMITTALS TO COUNCIL. (a) During program development, districts shall submit brief annual progress reports concerning program development to the Council

(b) Following adoption of the final program, districts shall submit brief annual progress reports concerning program implementation to the Council.

(c) All significant amendments to the district program shall be submitted to the Council for approval. The Office of Coastal Management will review proposed amendments to determine if Council approval is required. This determination is subject to Council review when requested by a Council member.

(d) Districts shall give conceptual approval to district programs and significant amendments to district programs prior to their submittal to the Council. The district program as approved by the Council becomes effective upon adoption by the district.

Authority: AS 44.19.893
AS 46.40.030
AS 46.40.040

6 AAC 85.120. PUBLIC INVOLVEMENT. (a) No less than two public meetings shall be held within the district during program development to inform the public and receive comments concerning the program. A brief summary or report of the matters considered at the public meeting held under this subsection shall be prepared by the district, made available to the public, and retained for inclusion in the record file referred to in sec. 140(c) of this chapter.

(b) At least 30 days before giving conceptual approval to the district program or significant amendment to the district program, the district shall give public notice of the proposed action by conspicuous advertisement in a newspaper of general circulation within the district. The notice must specify the time and place of a public hearing on the proposed action. The public hearing under this subsection may be held not sooner than 10 days after first publication of the notice. At the public hearing, each interested person shall be given the opportunity to present statements, arguments, or contentions, orally or in writing. Districts shall insure that, where reasonably requested, translation into appropriate Native language is provided. The district shall consider all relevant matter presented to it. A written transcript or electronic recording of the public hearing shall be submitted to the Council.

radio also

(c) In addition to the requirements of (b) of this section, districts shall provide publically advertised opportunities for public involvement in the development of all program elements contained in secs. 10 -- 100 of this chapter.

(d) Districts shall provide the public, in a timely manner and in understandable form, information explaining the district coastal management program, the requirements of public participation in program development, how and when the public may

participate in program development, what information is available, and where such information may be obtained.

Authority: AS 44.19.893
AS 46.40.030
AS 46.40.040

6 AAC 85.130. COORDINATION AND REVIEW. Districts shall provide opportunities for coordination and review by federal, state, and local governmental agencies, including adjacent districts, and others with a significant interest in coastal resources or which are conducting or may conduct uses and activities that have or are likely to have a direct and significant impact on the district's coastal area.

Authority: AS 44.19.893
AS 46.40.030
AS 46.40.040

6 AAC 85.140. COUNCIL REVIEW. (a) When a district program or significant amendment to a district program is given conceptual approval by the district, the program or amendment together with the transcript or recording of the public hearing held under sec. 120(b) of this chapter and all other material on which the district based its decision shall be submitted to the Council.

(b) Within 30 days of submission of the district program or amendment under (a) of this section, the Office of Coastal Management will issue a quasi-legislative recommendation. The recommendation may be based, in whole or in part, on matters not submitted by the district under (a) of this section. Any matters so used shall be identified in the recommendation. The recommendation will contain findings and conclusions based on this chapter, the standards contained in ch. 80 of this title, AS 46.40.060, and AS 46.40.070. The recommendation will be served on the district, the Council, and all persons who testified or submitted timely written statements at the public hearing held under sec. 120(b) of this chapter.

(c) A record file containing all matter submitted by the district under (a) of this section, the Office of Coastal Management's recommendation under (b) of this section, and all matters on which the recommendation was based will be maintained at the Office of Coastal Management and at a convenient location within the district.

(d) Within 30 days after service of the recommendation, any person served with the recommendation may serve upon the Council comments on the recommendation. Within 10 days after the deadline for serving comments on the Council under this subsection, the Office of Coastal Management may submit additional matter to the Council in response to the comments. All comments served and all additional matter submitted under this subsection will be placed in the record file.

(e) Within 20 days after the deadline for the Office of Coastal Management's submission of additional matter to the Council under (d) of this section, the Council will approve or disapprove the district program, in whole or in part. The Council's decision will contain findings and conclusions based on this chapter, the standards contained in ch. 80 of this title, AS 46.40.060, AS 46.40.070, and matter contained in the record file. The Council will, in its discretion, adopt the findings and conclusions of the Office of Coastal Management by reference. The Council will serve its decision under this subsection on the district, on all persons who submitted timely comments on the staff recommendation under (d) of this section, and place the decision in the record file.

(f) If the Council's decision under (e) of this section disapproves, in whole or in part, the district program, the decision will specify the date and location for the initial mediation session under AS 46.40.060(b). Mediation sessions will be held within the district and scheduled with due regard for the convenience of the participants. Any person served with the Council's decision under (e) of this section may attend mediation sessions.

(g) If the Council and district reach accord in mediation sessions held under (f) of this section, the Council will, within 20 days after reaching accord, serve its modified decision on the district, all persons who were served with the Council's decision under (e) of this section, and place the modified decision in the record file. The modified decision will contain findings and conclusions, based on the record file and additional matters adduced during mediation, necessary to demonstrate that the modified decision does not violate this chapter, the standards contained in ch. 80 of this title, AS 46.40.060, and AS 46.40.070.

(h) If the Council and the district do not reach an accord, the Council will, within 20 days after its determination that an impasse has been reached, set the matter for adjudicatory hearing pursuant to AS 46.40.060(c). Notice of the hearing under AS 44.62.370(c) will be served on the district and all persons who were served with the Council's decision under (e) of this section. Any person served with notice of the hearing under this subsection may intervene as a party to the hearing.

ARTICLE 3.
GENERAL PROVISIONS

Section
150. Definitions

6 AAC 85.150. DEFINITIONS. In this chapter

(1) "beaches" means the area affected by wave action directly from the sea;

(2) "coastal water" has the same meaning as in 6 AAC 80.170(2);

(3) "Council" means the Alaska Coastal Policy Council;

(4) "district" means coastal resource district as defined in AS 46.40.210(2);

(5) "district program" means district coastal management program;

(6) "islands" means bodies of land surrounded by water on all sides; interior portions of major islands may be excluded if uses of these lands do not cause direct and significant impacts on coastal waters;

(7) "saltwater wetlands" has the same meaning as that contained in 6 AAC 80.170(18); and

(8) "transitional and intertidal areas" means areas subject to periodic or occasional inundation by tides, as, for example, coastal floodplains, storm surge areas, tsunami and hurricane zones, and washover channels.

INTER-AGENCY ROUTING SLIP

TO: Annette

ATTN:

REMARKS: I think this should take care of the problem with respect to the CZM regs and their subsequent amendment by the Coastal Policy Council.

FROM: jc DATE: 5/2

AS 46.40.080 is amended to read:

Sec. 46.40.080. EFFECTIVE DATE OF ALASKA COASTAL MANAGEMENT REGULATIONS AND PROGRAM. The Alaska coastal management regulations adopted under sec. 40 of this chapter, the coastal management program adopted by the council, and any additions, revisions, or amendments of those regulations or of the program, take effect upon adoption of a concurrent resolution of approval adopted by a majority of the members of each house of the legislature or by a vote of approval of a majority of the members of each house at the time the houses are convened in joint session to confirm executive appointments submitted by the governor.

SUMMARY OF COUNCIL CHANGES TO FINAL DRAFT,

ACMP GUIDELINES AND STANDARDS

This paper summarizes the major comments received from public hearings on the Hearing Draft of the Guidelines and Standards, and shows in a general way, how the Alaska Coastal Policy Council dealt with those comments. At its meeting on March 30 and 31, the Council was presented with a Staff Recommendations draft of the Guidelines. The Council used this and the hearing comments to produce their final guidelines which were then sent to the Legislature and the Attorney General in early April.

Since then, the Attorney General has examined the final guidelines and made a number of clerical and grammatical changes. A revised final draft is now available and attached which contains those changes.

HEARING COMMENTS	COUNCIL RESPONSE
1. Guidelines are too vague, and could lead to interpretation problems. Conversely, others said that the guidelines were too strict and eliminated too many local options.	The Council elected to retain more flexible language to protect local options. To protect from arbitrary interpretation, a careful review and approval procedure was devised and inserted at the end of Chapter 85.(85.140)
2. Unclear as to status of Guidelines, upon whom are they effective?	A new section, 80.010. was added to clarify the applicability of the guidelines.
3. Timber harvest too strict.	This section has been slackened and reduced to allow more flexibility. (See 80.100)
4. All Standards (Art. 80.) sections contain undefined terms, or words which will be difficult to interpret.	All sections in Article 80 have been streamlined with interpretive words eliminated or replacwith court-tested phrases like "feasible and prudent".
5. Many sections contain redundant provisions.	A careful edit has eliminated this,
6. Needs definitions.	A definitions section has been added to the end of each of the two main chapters.
7. Subsistence use needs more detail.	A substantial addition was provided for the subsistence section.

Legislative Intent - As part of the Resolution or separate Letter of Intent

In approving the guidelines and standards as part of the coastal management program, the Legislature does not abrogate its right to annul any regulations in the future as it sees fit.

General Comments on Final Draft of Coastal Management Guidelines and Standards

The final draft of the Guidelines and Standards was extensively rewritten during the Coastal Policy Council's meeting in Juneau March 30-31.

The revision was based essentially on the staff recommendations presented at the Council meeting. The recommendations were designed to reflect the comments and objections that had been made in regard to the previous draft through the public hearing process and written comments from the public.

In general, the final draft represents a shortened, less mandatory, and more forthcoming attitude towards economic activity than the earlier draft.

Two new sections were added: the first section on Coverage of the Regulations and additional sections on Definitions. These were added in response to public hearing comments.

Certain phraseology was either eliminated from the draft or rephrased in the interest of avoiding possible court tests. Phrases such as "to the maximum extent possible (or feasible)" have been eliminated. Mandatory language such as "districts shall avoid" or "actions shall not interfere with...." have also been modified

In place of phrases "to the maximum extent possible", the words "feasible and prudent" have been used extensively. The words "feasible and prudent" were chosen as preferable since they have been defined in federal court cases -- feasible meaning "technologically possible" and prudent meaning "economically and socially reasonable".

In place of wording such as "shall avoid" or "shall not interfere", new language such as "shall be managed so as to minimize potential for adverse impacts" has been substituted.

New flexibility has been put into the regulations under subsistence, for example, by using the phrasing "shall recognize and assure opportunities for subsistence usage" instead of the previous "shall assure subsistence" in an earlier draft. Districts are given the option of designating subsistence as the priority use in subsistence zones, but are not mandated to do so across the board as the earlier draft implied.

Attached are reference sheets to the sections of the Act pertaining to the guidelines and standards and definitions of "uses of state concern" and "areas which merit special attention."

ALASKA COASTAL MANAGEMENT ACT

Sec. 46.35.040. DUTIES OF THE ALASKA COASTAL POLICY COUNCIL. Through the public hearing process and the recording of the minutes of the hearings, the Alaska Costal Policy Council shall

(1) by regulation, adopt under the provisions of the Administrative Procedure Act (AS 44.62), within six months of the effective date of this Act, for the use of and application by coastal resource districts and state agencies for carrying out their responsibilities under this chapter, guidelines and standards for:

(A) identifying the boundaries of the coastal area subject to the district coastal management program;

(B) determining the land and water uses and activities subject to the district coastal management program;

see p.3 (d)

(C) Developing policies applicable to the land and water uses subject to the district coastal management program;

(D) Developing regulations applicable to the land and water uses subject to the district coastal managment program;

(E) developing policies and procedures to determine whether specific proposals for the land and water uses or activities subject to the district coastal management program shall be allowed;

(F) designating and developing policies for the use of areas of the coast which merit special attention; and

(G) measuring the progress of a coastal resource district in meeting its responsibilities under this chapter;

(2) develop and maintain a program of technical and financial assistance to aid coastal resource districts in the development and implementation of district coastal management programs;

(3) undertake review and approval of district coastal managment programs in accordance with this chapter;

(4) initiate a process for identifying and managing uses of state concern within specific areas of the coast;

(5) develop procedures or guidelines for consultation and coordination with federal agencies managing land or conducting activities potentially affecting the coastal area of the state.

COASTAL MANAGEMENT ACT

Definitions from the Act:

(1) AREA WHICH MERITS SPECIAL ATTENTION means a delineated geographic area within the coastal area which is sensitive to change or alteration and which, because of plans or commitments or because a claim on the resources within the area delineated would preclude subsequent use of the resources to a conflicting or incompatible use, warrants special management attention, or which, because of its value to the general public, should be identified for current or future planning, protection, or acquisition; these areas, subject to council definition of criteria for their identification, include:

(A) areas of unique, scarce, fragile or vulnerable natural habitat, cultural value, historical significance, or scenic importance;

(B) areas of high natural productivity or essential habitat for living resources;

(C) areas of substantial recreational value or opportunity;

(D) areas where development of facilities is dependent upon the utilization of, or access to, coastal waters;

(E) areas of unique geologic or topographic significance which are susceptible to industrial or commercial development;

(F) areas of significant hazard due to storms, slides, floods, erosion or settlement; and

(G) areas needed to protect, maintain, or replenish coastal land or resources, including coastal flood plains, aquifer recharge areas, beaches and offshore sand deposits.

COASTAL MANAGEMENT ACT

Definitions from the Act:

(6) USES OF STATE CONCERN means those land and water uses which would significantly affect the long-term public interest; these uses, subject to council definition of their extent, include:

(A) uses of national interest, including the use of resources for the siting of ports and major facilities which contribute to meeting national energy needs, construction and maintenance of navigational facilities and systems, resource development of federal land, and national defense and related security facilities that are dependent upon coastal locations;

(B) uses of more than local concern, including those land and water uses which confer significant environmental, social, cultural, or economic benefits or burdens beyond a single coastal resource district;

(C) the siting of major energy facilities or large-scale industrial or commercial development activities which are dependent on a coastal location and which, because of their magnitude or the magnitude of their effect on the economy of the state or the surrounding area, are reasonably likely to present issues of more than local significance;

(D) facilities serving statewide or interregional transportation and communication needs; and

(E) uses in areas established as state parks or recreational areas under AS 41.20 or as state game refuges, game sanctuaries or critical habitat areas under AS 16.20.

SUBJECT: CZM Guidelines and Standards

I asked Murray Walsh of the Coastal Management Office to provide us with a one or two page summary of the major changes from the hearing draft of the guidelines to the final draft. Murray will also be here Wednesday morning to answer questions about the Guidelines. Mr. Allington also plans to attend.

Murray reported the Attorney General has made several changes in the final draft -- mostly clerical, he assures me. He expects to have the new final draft delivered to us tomorrow. I will distribute it to the members as soon as I get it.

Vivian Hegg of the Legue of Women Voters, paid a visit. She will be prepared to give testimony on the guidelines and standards on Wednesday. Her main concerns were that if the Legislature annulled some of the regulations, the Districts would be left at a disadvantage in developing their programs. She asked if there were problems areas if a letter of intent could accomplish the same purpose without annulling the regulations.

I can appreciate her point with regard to guidance for the local districts. However, I would be a bit concerned about the legal and political ramifications of a letter of intent to the effect that certain regulations need revision. Such a letter could be used as evidence in a suit for ex mple. Better, a simple letter to the Council requesting revisions, though this is not as strong as outright annullment.

Ms Hegg also raised a possible problem with the guidelines and standards being accepted as part of the program and/or being approved by the full Legislature.

1) The Act does not state they are part of the program;
2) The Act does not state that they need approval by the Legislature;
3) Question of whether the Administrative Regulation Review Committee can review and recommend annulment of regulations once approved by the whole body;
4) What happens with future revisions and amendments to the regulations by the Counci? Is Legislative approval needed before any changes can take effect?
5) Jack Chenoweth recommends clarifying the Act as to whether guidelines and standards will be part of the program or if not, how any future amendments to the regulations will be handled.

LEGISLATIVE AFFAIRS AGENCY

MEMORANDUM

March 28, 1978

SUBJECT: Opinion request: Review and approval of coastal management regulations

TO: Senator Joseph L. Orsini

FROM: John B. Chenoweth
Legislative Counsel

Your March 27th request of Bill Berrier with respect to the scope of legislative review of pending coastal management regulations has been referred to me for reply.

The scope of legislative review of regulations embodying guidelines and standards applicable to the adoption and implementation of coastal management programs by municipalities and service areas does not appear to me to differ from the scope of review authorized for other agency regulations under AS 44.62.320: the Legislature may, by concurrent resolution, annul an agency-adopted regulation. Nothing requires the Legislature to act on this body of regulations as a single unit, though that is, of course, one means by which the Legislature may proceed.

I am aware of the contention that the regulations required to be adopted by the Coastal Policy Council are ineffective until approved by adoption of a concurrent resolution or by vote of the members at a joint session of the Legislature. The argument presumably rests on AS 46.40.080:

> The Alaska coastal management program adopted by the council, and any additions, revisions, or amendments of the program, take effect upon adoption of a concurrent resolution by a majority of the members of each house of the legislature or by a vote of the majority of the members of each house at the time the houses are convened in joint session to confirm executive appointments submitted by the governor.

I cannot say that the section cited requires prior affirmative action of the council's regulations. Prior approval is mandated for "the coastal management program" and for "additions, revisions, and amendments of the [coastal management] program," which, in the context of the legislation (absent a definition of the term "program"), appears to include only the individual planning elements prepared by the municipalities and service areas. As AS 46.40 now reads, it is not certain that approval by the Legislature is a requisite to having the regulations take effect.

The Legislature may not directly rewrite or repromulgate administrative regulations. It may amend or repeal the underlying statutory authority, thereby necessitating review and repeal or revision of affected regulations.

Because prior legislative approval of the council submission is not required under the interpretation offered herein, your question regarding the propriety of approval followed by later legislative review (presumably for purposes of annulment of the regulation) is moot.

COASTAL MANAGEMENT PROGRAM

NOTICE OF PROPOSED ADOPTION OF REGULATIONS

OF THE ALASKA COASTAL POLICY COUNCIL

Notice is hereby given that the Alaska Coastal Policy Council, under authority vested by AS 46.40.040(1) and AS 44.19.893(1), proposes to adopt regulations in Title 6, Part 5 of the Alaska Administrative Code to implement AS 46.40.040(1) and AS 44.19.893(1). These proposed regulations will constitute the guidelines and standards of the Alaska Coastal Management Program, for the use of and application by coastal resource districts and state agencies, and include comprehensive standards for the management of uses, activities, resources, and habitats in the coastal area and guidelines for the development of district coastal management programs.

The proposed regulations are organized as follows:

Chapter 80: Standards of the Alaska Coastal Management Program.

Article 1: Government process.
Article 2: Uses and activities.
Article 3: Resources and habitats.
Article 4: Areas which merit special attention.

Chapter 85: Guidelines for District Coastal Management Programs.

Notice is also given that any person interested may present oral or written statements or arguments relevant to the action proposed at hearings to be held at the following locations and times:

Juneau 7:00 pm on Feb. 15 in the City-Borough Assembly Chambers.
Kodiak 7:30 pm on Feb. 20 in the Borough Assembly Chambers.
Sitka 7:00 pm on Feb. 20 in the Centennial Building.
Barrow 7:30 pm on Feb. 20 in the North Slope Borough Building.
Anchorage 7:00 pm on Feb. 22 in the Anchorage Historical and Fine Arts Museum.
Nome 7:30 pm on Feb. 22 in the City Hall, Council Chambers.
Unalaska 7:30 pm on Feb. 23 in the Unalaska School.
Kotzebue 7:30 pm on Feb. 24 in the City Hall, Council Chambers.
Cordova 7:30 pm on Feb. 28 in the Library Council Chambers.
Dillingham 7:30 pm on Feb. 28 in the City Hall.
Valdez 7:30 pm on Mar. 1 in the Council Chambers.
Ketchikan 7:30 pm on Mar. 1 in the Council Chambers.
Bethel 7:30 pm on Mar. 2 in the Courthouse/City Office Building, Council Chambers.
Kenai 7:30 pm on Mar. 3 in the Kenai Peninsula Borough Building, Assembly Room.
Homer 1:00 pm on Mar. 4 at the Homer Museum.

Copies of the proposed regulations may be obtained from municipal offices in the above listed locations or from the following address:

Coordinator
Office of Coastal Management
Division of Policy Development & Planning
Pouch AP
Juneau, Alaska 99811

Any person may file written statements or arguments relevant to the proposed action with the Coordinator, Office of Coastal Management, at the above address. Comments to be considered must be received at the above address on or before March 6, 1978.

The Alaska Coastal Policy Council may at any time after March 6, 1978 adopt the proposals substantially as described above without further notice.

DATED at Juneau, Alaska this 18 day of January, 1978.

Frances A. Ulmer
Co-Chairman
Alaska Coastal Policy Council

DRAFT

TITLE 6. GOVERNOR'S OFFICE

PART 5. ALASKA COASTAL POLICY COUNCIL.

Chapter
30. Standards of the Alaska Coastal Management Program
85. Guidelines for District Coastal Management Programs

CHAPTER 80.
STANDARDS OF THE ALASKA COASTAL MANAGEMENT PROGRAM

Article
1. Government process
2. Uses and activities
3. Resources and habitats
4. Areas which merit special attention

ARTICLE 1. GOVERNMENT PROCESS

Section
10. Public participation and information
20. Program management and coordination

6 AAC 80.010. PUBLIC PARTICIPATION AND INFORMATION. (a) The Council will provide adequate, effective, and continuing opportunities for public participation from the beginning in the Alaska Coastal Management Program. The Council will give notice of when and where opportunities for public participation will be provided before the adoption of guidelines and standards, the review and approval of district coastal management programs, and the review and approval or adoption of amendments, revisions, or additions to the Alaska Coastal Management Program.

(b) The Council will not approve a district coastal management program or any amendment, revision, or addition thereto unless evidence of significant opportunities for public participation at the district level has been provided.

(c) The Council will make available to the public information and educational materials concerning the Alaska Coastal Management Program in understandable form, including but not limited to the following:

(1) a guide for the development of district coastal management programs;

(2) comprehensive policies to guide the management of coastal uses and activities as they occur in specific coastal areas;

DRAFT

(3) maps and narratives describing the physical and biological characteristics of coastal areas to be used in establishing boundaries;

(4) areas identified by state agencies and the public for Council designation as areas which merit special attention;

(5) a guide for the siting and development of major petroleum-related facilities in onshore and nearshore areas;

(6) an inventory of coastal fish and wildlife resources, with maps showing the location and range of species with commercial, recreational, or subsistence importance;

(7) an identification of major data and information sources concerning coastal management;

(8) a compilation and summary of information regarding coastal regions, including, where appropriate, a comprehensive list of issues and policies;

(9) summaries of public hearings and workshops;

(10) films and slide and tape programs;

(11) brochures, pamphlets, and tabloids summarizing and explaining the Alaska Coastal Management Program; and

(12) The Council's annual report to the legislature.

(d) At any public meeting concerning the Alaska Coastal Management Program, the Council will insure that, where necessary, translation into the appropriate Native language is provided.

6 AAC 80.020. PROGRAM MANAGEMENT AND COORDINATION. (a) The Office of Coastal Management, in its capacity as staff to the Council, shall be the designated lead agency for the Alaska Coastal Management Program. The Office of Coastal Management shall:

(1) present the official staff position regarding matters before the Council, including but not limited to the review and approval of district coastal management programs;

(2) apply for, receive, use, and distribute funds provided under all sections, except section 308, of the Coastal Zone Management Act of 1972, 16 USC 1451 et. seq., as amended, PL 94-370.

DRAFT

(3) coordinate the activities of state agencies participating in the Alaska Coastal Management Program and delegate tasks to a specific agency or agencies, as appropriate;

(4) determine the consistency of state actions with the Alaska Coastal Management Program, subject to Policy Council determination if requested by a Council member; and

(5) respond to federal agency determinations of the consistency of federal actions with the Alaska Coastal Management Program, subject to Policy Council response if requested by a Council member.

(b) The Council will identify and adopt management policies and practices for specific uses of state concern and areas of the coast where uses of state concern may be sited and managed.[1] The Council will direct the development of management policies and practices for uses of state concern by state agencies and coastal resource districts.

(c) The Council will initiate an interagency program of comprehensive resource management for each geographic region described in AS 44.19.891(a)(1). Regional programs shall be conducted to:

(1) assist the Council in identifying uses of state concern within specific areas of the coast and developing management policies and practices for these uses and areas;

(2) provide resource, social, and economic information on a coordinated regional basis as necessary for development and implementation of the Alaska Coastal Management Program; and

(3) assist the Council in identifying, avoiding, and minimizing existing or potential conflicts between coastal resource districts and state and national interests.

(d) The mechanics of coordinating district plans with state agency plans and recommendations developed as part of the regional program outlined in (c) of this section shall be as described herein. State agencies having jurisdiction within a district shall transmit their plans and recommendations to the district through the Coordinator of the Office of Coastal Management. District planning efforts shall demonstrate a review and consideration of state agency plans and recommendations. If the final district plan proposed does not agree with state agency plans and recommendations, the differences will be resolved by the Council

1. "Uses of state concern" is defined in AS 46.40.210(6).

DRAFT

in accordance with this Title and the Alaska Coastal Management Act.

(e) The Council will prepare a manual of standards for the management of land and water uses in the coastal area to assist in the development of district and state agency plans.

ARTICLE 2. USES AND ACTIVITIES

Section
30. Offshore, shoreline, and waterfront development
40. Geophysical hazard areas
50. Recreation and tourism
60. Energy-related facilities
70. Transportation and utilities
80. Fishing and seafood processing
90. Timber harvest
100. Mining and mineral processing
110. Air, land, and water quality
120. Subsistence

6 AAC 80.030. OFFSHORE, SHORELINE, AND WATERFRONT DEVELOPMENT. (a) Development and activities related to development conducted in offshore, shoreline, and waterfront areas shall, to the greatest extent practicable, maintain and enhance:

(1) the resource values and biological productivity of the coastal area;

(2) access to coastal waters by the public;

(3) the availability of sites for water-dependent or water-related uses and activities; and

(4) the national and statewide interests in navigation.

(b) The provisions of 11 AAC 62.030, Protection of Fish and Game, shall apply to development and activities related to development in the coastal area.

(c) Dredging shall be conducted in a manner which minimizes bottom disturbance and adverse effects on mollusks, shellfish, marine and anadromous fish, marine birds and animals, and water quality.

(d) The placement of structures and the discharge of dredged or fill material into coastal waters, nontidal streams, lakes, and adjacent wetlands shall, as a minimum standard, be conducted

DRAFT

pursuant to Parts 320-323, Title 33, Code of Federal Regulations, Navigation and Navigable Waters, and AS 16.05.870, Protection of Fish and Game.

(e) In planning for and approving uses and activities in shoreline and waterfront areas, coastal resource districts and state agencies shall give, in the following order, priority to:

(1) water-dependent uses and activities;

(2) water-related uses and activities; and

(3) uses and activities which are neither water-dependent nor water-related for which there is no feasible inland location.

6 AAC 80.040. GEOPHYSICAL HAZARD AREAS. (a) Coastal resource districts and appropriate state agencies shall identify or cause to be identified geophysical hazard areas in the coastal area, including but not limited to areas of potential flooding, tsunami run-up, landslides, snowslides, earthquakes, subsidence, severe erosion, and ice hazards.

(b) Development and related activities in geophysical hazard areas may not be approved until siting, design, and construction measures for avoiding or minimizing potential loss of life and damage to property have been provided. In areas of severe hazard potential where siting, design, and construction measures may not be sufficient to avoid or minimize potential loss of life and damage to property, development and related activities shall be prohibited.

6 AAC 80.050. RECREATION AND TOURISM. (a) Coastal resource districts and appropriate state agencies shall identify areas of the coast which:

(1) have been designated as a unit of a local, state, or national park, refuge, or wilderness system;

(2) receive significant use by persons engaging in recreational pursuits or are major tourist destinations;

(3) have a potential for high quality recreational use because of unique physical, biological, ecological, or cultural features;

(4) are important for recreational use because of their proximity to population centers or transportation systems;

(5) provide access to recreational resources;

DRAFT

(6) are recognized for their scenic value;

(7) are listed or nominated for listing on the National Register of Historic Places; or

(8) are determined to be significant by the state historic preservation officer.

Areas so identified shall have as their dominant management value the protection and public use of the recreation, scenic, or heritage resource for which the area was identified and shall be managed consistently with that value.

(b) The development of recreation and tourism and facilities related to recreation and tourism in the coastal area shall be consistent with the preservation, protection, and enhancement of natural and cultural resources.

6 AAC 80.060. ENERGY-RELATED FACILITIES. Sites suitable for the development of major nearshore and onshore energy-related facilities shall be identified by the state in cooperation with coastal resource districts. The siting and approval of these facilities shall be based on the policies of the State of Alaska concerning the onshore and nearshore aspects of OCS development.[2] Coastal resource districts may use and apply these policies in the preparation of district coastal management programs.

6 AAC 80.070. TRANSPORTATION AND UTILITIES. (a) Transportation and utility routes and facilities in the coastal area shall, to the greatest extent practicable, be sited, designed, and constructed so as to:

(1) avoid adverse impacts on the resources and habitats identified in sec. 130 of this chapter;

(2) be compatible with adjacent uses and activities, local community goals and desires, and regional and statewide needs;

(3) combine more than one mode of transport or utility into common corridors;

(4) allow for the concurrent use of facilities; and

(5) maintain scenic values.

2. As adopted on 01/13/78 by the Alaska Coastal Policy Council; available from the Department of Community and Regional Affairs or the Office of Coastal Management.

DRAFT

(b) Land based transportation and utility routes and corridors and air-related transportation facilities shall be sited upland from beaches and shorelines unless access to the water is a primary goal or requirement of the route, corridor, or facility and no feasible inland alternative exists.

(c) Water-based transportation and utility routes shall be sited and designed so as to minimize interference with uses and activities related to the harvest of marine plants and animals.

(d) Air-related transportation routes and facilities shall be sited, designed, and constructed so as to minimize interference with wildlife migration, nesting, and breeding provided that such placement does not interfere with safety.

(e) Traditional navigation and transportation routes and aides to navigation shall have high priority for shoreline and in-water locations.

(f) Transportation and utility routes and facilities include but are not limited to power transmission lines, mineral slurry, oil and gas pipelines, land and marine corridors, railways, highways, roadways, air terminals, water and sewage transfer, and facilities required to operate and maintain them.

6 AAC 80.080. FISHING AND SEAFOOD PROCESSING. (a) The offshore waters within the state's jurisdiction are designated a fisheries conservation zone and uses and activities conducted in this area shall be managed so as to maintain and enhance the Alaska sport and commercial fishery. In the management of this area, the State shall coordinate, as appropriate, with the North Pacific Fishery Management Council, the National Marine Fisheries Service, the U.S. Coast Guard, and other federal agencies responsible for implementation of the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265, April 13, 1976).

(b) Coastal resource districts and appropriate state agencies shall identify sites suitable for the location or development of facilities related to commercial fishing and seafood processing. Criteria for the identification of these sites are:

(1) avoidance of adverse impacts on resources and habitats identified in sec. 130 of this chapter;

(2) adherence to all federal and state water quality standards;

(3) minimization of obstructions to navigation; and

(4) compatibility with adjacent uses and activities and community goals and desires.

DRAFT

(c) Facilities related to commercial fishing and seafood processing include but are not limited to hatcheries and related facilities, seafood processing plants and support facilities, and marine industrial and commercial facilities.

6 AAC 80.090. TIMBER HARVEST. (a) Timber harvest is limited to areas where data and information indicate an absence of reforestation problems that would preclude that area from producing a sustained yield of merchantable timber unless the area is to be converted to a use other than timber harvest.

(b) Timber harvest and associated activities in the coastal area shall be conducted so as to meet the following standards:

(1) the location of facilities and the layout of logging systems shall not adversely impact sensitive areas and shall utilize land that has a minimum potential for water pollution and other adverse environmental impacts;

(2) blockage of and interference with fish movement and habitat in streams, lakes, wetlands, estuaries, and other bodies of water shall be avoided;

(3) shoreline management zones, including but not limited to buffer strips and riparian zones, shall be planned and established along all water courses, lake shores, and marine shorelines; the width of this zone shall be based on ability to withstand blowdown and prevent impacts on fish or wildlife resources as determined on a case-by-case basis by appropriate federal, state, and local expertise; resource values and environmental sensitivity shall determine whether and to what extent timber may be harvested from these zones;

(4) slash, logging debris, and other materials shall be treated so as to enhance reforestation, not constitute a fire hazard, and not interfere with wildlife and fish habitat; and

(5) minimal habitat to maintain game populations and key migratory routes shall be left in timber harvest areas.

(c) Timber transport, storage, and processing in the coastal area shall be conducted so as to meet the following standards:

(1) the onshore storage of logs shall be encouraged where compatible with other objectives of the Alaska Coastal Management Program;

(2) sites for the in-water dumping and storage of logs shall be selected and these activities shall be conducted

DRAFT

so as to minimize adverse effects on the marine ecosystem, minimize conflicts with recreational uses and activities, be safe from storms, and not consitute a hazard to navigation;

(3) roads for log transport and harvest area access shall be planned, designed, and constructed so as to avoid mass wasting, minimize erosion, sedimentation, and interference with drainage, and adequately maintained for the entire period of timber processing or put to bed; and

(4) stream crossings, including bridges and culverts, shall be kept to a minimum number and designed to withstand seasonal high water and flooding and to prevent obstructions to the migration of anadromous and resident fish.

6 AAC 80.100. MINING AND MINERAL PROCESSING. (a) Mining and mineral processing in the coastal area, including but not limited to the development of mineral resources extracted in tidal rivers, coastal waters, and on continental shelves of the open sea, and found in surface, subsurface, and aqueous deposits, shall be sited, designed, and conducted so as to:

(1) avoid adverse impacts on the resources and habitats identified in sec. 130 of this chapter; and

(2) be compatible with adjacent uses and activities, local community goals and desires, and regional and statewide needs.

(b) Mining and mineral development in the coastal area shall conform to all applicable air and water quality standards and any rules, regulations, or statues relevant to mining and mineral development conducted in coastal waters.

(c) Extraction of sand and gravel in the coastal area shall meet the following additional standards:

(1) all feasible alternatives, including upland alternatives, have been considered;

(2) extraction takes place only during that portion of the year when it will be least harmful to anadromous fish, marine fish, shellfish, mollusks, and marine birds and mammals affected by the extraction;

(3) extraction on marine beaches or offshore dune systems may not initiate or increase significant adverse erosion or deposition; and

DRAFT

(4) sand or gravel may be removed from estuaries only in areas of active shoaling, provided the shoal is not critical marine habitat. Only the accreted material may be removed.

6 AAC 80.110. AIR, LAND AND WATER QUALITY. Coastal resource districts and state agencies shall use and apply all applicable provisions of 18 AAC, Environmental Conservation, to maintain high standards of air, land, and water quality in the coastal area.

6 AAC 80.120. SUBSISTENCE. Coastal resource districts and appropriate state agencies shall recognize and assure subsistence usage of coastal areas and resources.

ARTICLE 3. RESOURCES AND HABITATS

Section
130. Resources and Habitats

6 AAC 80.130. RESOURCES AND HABITATS. (a) Natural resources and habitats in the coastal area that are subject to the Alaska Coastal Management Program include but are not limited to the following:

(1) offshore areas, including the submerged lands and waters seaward of the coastline extending to the continental shelf break;

(2) estuaries, including semi-enclosed bodies of water having an opening to the sea and containing greater than 0.5 ppt of salt, including but not limited to river mouths, deltas, fjords, inlets, bays, and tidewater glaciers;

(3) wetlands and tideflats, including lands shallowly submerged by water and characterized by vegetation complexes consisting primarily of sedges, rushes, and grasses; coastal wetlands are not strictly limited to the zone inundated by tides and are characterized by coastal marshes which generally have an extensive freshwater zone in the higher area and a tidally influenced saltwater zone in the lower area;

(4) rocky islands and seacliffs, including islands of predominantly volcanic or tectonic origin with rocky shores and steep faces, offshore rocks, capes, and steep rocky sea fronts;

(5) barrier islands and lagoons, including depositional coastal environments formed by deposits of sediments offshore which form a barrier of low-lying islands and bars protecting a salt-water lagoon with a free exchange of water to the sea;

DRAFT

(6) exposed high energy coasts, including relatively featureless sections of the coastline with direct exposure to ocean generated wave impacts and usually characterized by mixed sand and gravel beaches and an active surf zone;

(7) rivers and lakes; and

(8) coastal uplands, including those upland areas having a direct or significant impact on the coastal area.

(b) Coastal resource districts and appropriate state agencies shall identify and plan for the management of the resources and habitats listed in (a) of this section. The following are the standards which apply to the management of these resources and habitats:

(1) offshore areas - maintain the capacity of offshore areas to support anadromous fish, marine fish, shellfish, marine birds, marine mammals, and supporting species;

(2) estuaries - maintain the capacity of estuaries to support anadromous fish, marine fish, migratory birds, marine birds, mammals and supporting species; maintain adequate water flows and oxygen levels where fish populations overwinter; prohibit the discharge of toxic wastes and materials into estuaries in the winter;

(3) wetlands and tideflats - maintain wetlands habitat for migratory birds, anadromous fish, big game, small mammals, and supporting species;

(4) rocky islands and seacliffs - maintain the availability and quality of rocky island and seacliff breeding habitat for marine mammals, seabirds, and supporting species; avoid harassment, pollution, or the introduction of unnatural predators;

(5) barrier islands and lagoons - maintain the flow of sediments and water; prevent the alteration or redirection of wave energy; prevent the filling in of lagoons or the destruction of barrier islands; discourage activities which may cause polar bears to avoid denning on barrier islands;

(6) exposed high energy coasts - avoid the dumping of materials toxic or harmful to marine life, including but not limited to larvae and juvenile stages of crabs, shrimp, and razor clams, marine fish, and supporting species;

(7) rivers and lakes - maintain the capacity of rivers and lakes to support anadromous fish, migratory birds, small mammals, big game, and supporting species; and

DRAFT

(3) coastal uplands - maintain upland bird and big game populations.

ARTICLE 4. AREAS WHICH MERIT SPECIAL ATTENTION

Section
140. Areas Which Merit Special Attention

6 AAC 80.140. AREAS WHICH MERIT SPECIAL ATTENTION. (a) Coastal resource districts and appropriate state agencies shall recommend to the Council areas to be designated as areas which merit special attention.[3] Recommendations shall include the following information:

(1) the basis or bases for designation pursuant to AS 46.40.210(1) or (c) of this section;

(2) a map showing the geographical location, surface area and, where appropriate, bathymetry of the area;

(3) a description of the area which includes dominant physical and biological features;

(4) the existing ownership, jurisdiction, and management status of the area, including existing uses and activities;

(5) the existing ownership, jurisdiction, and management status of adjacent shoreland and sea areas, including existing uses and activities;

(6) present and anticipated conflicts among uses and activities within an adjacent to the area, if any;

(7) a proposed management scheme, consisting of the following:

(A) a description of the uses and activities which will be considered proper and the uses and activities which will be considered improper with respect to land and water within the area;

(B) a summary or statement of the policies which will be applied in managing the area; and

(C) an identification of the authorities which will be used to implement the proposed management scheme.

3. "Areas which merit special attention" is defined in AS 46.40.210(1).

DRAFT

(b) The Council will designate and establish management schemes for areas which merit special attention. Approval of a district coastal management program which recommends designation of an area pursuant to (a) of this section constitutes a Council designation.

(c) In addition to the categories contained in AS 46.40.210(1), areas which merit special attention may include the following:

(1) areas important for subsistence hunting, fishing, food gathering, and foraging;

(2) areas with special scientific values or opportunities, including but not limited to those where ongoing research projects could be jeopardized by development or conflicting uses and activities; and

(3) potential estuarine or marine sanctuaries.

(d) Management schemes for areas which merit special attention shall preserve, protect, enhance, or restore the value or values for which the area was designated.

DRAFT

CHAPTER 85. GUIDELINES FOR DISTRICT COASTAL MANAGEMENT PROGRAMS

Section
10. Program elements
20. Submittals to Council
30. Public involvement
40. Coordination and review

6 AAC 85.010. PROGRAM ELEMENTS. Each district coastal management program shall include the elements listed in this section.

(1) A statement of the district's overall needs, objectives, or goals, or the district's comprehensive land and resource use plan.

(2) A description of the district's administrative structure. This structure shall be sufficient for program development and implementation. Budgetary and staff needs, and, where appropriate, a schedule for reorganization shall be included.

(3) A map of the boundaries of the coastal area within the district which is subject to the district coastal management program.

(A) Prior to Council approval of the district program, interim boundaries shall be based on Biophysical Boundaries of Alaska's Coastal Zone[1] and shall include the zone of direct interaction and the zone of direct influence but shall exclude the zone of indirect influence.

(B) Final boundaries of the coastal area subject to the district coastal management program may diverge from the interim boundaries providing the final boundaries:

(i) extend inland and seaward to the extent necessary to manage uses and activities that have or are likely to have a direct and significant impact on the coastal ecosystem; and

(ii) include all transitional and intertidal areas, salt marshes, islands, and beaches.

1. Developed by the Alaska Department of Fish and Game, Marine Coastal Habitat Management Program, 1977; available from the Office of Coastal Management, Division of Policy Development and Planning.

DRAFT

(C) Providing that the criteria contained in (B) of this subsection are met, final boundaries of the coastal area subject to the district coastal management program may be based on political jurisdiction, cultural features, planning areas, watersheds, topographic features, uniform setbacks, or the dependency of uses and activities on water access.

(D) The Council will insure that the boundaries of an approved district program are sufficiently compatible with those of adjoining areas to allow consistent administration of the Alaska Coastal Management Program.

(4) A resource inventory which describes, in a manner sufficient for program development and implementation, the following:

(A) resources and habitats identified in 6 AAC 80.130 that are found within and adjacent to the district;

(B) major cultural resources that are found within and adjacent to the district, including but not limited to demographic, historical, and financial resources, utilities, and major facilities;

(C) major land and water uses and activities that are conducted within and adjacent to the district; and

(D) major land and resource ownership and management within and adjacent to the district.

(5) A resource analysis which describes, in a manner sufficient for program development and implementation, the following:

(A) significant anticipated changes in (4)(A)-(D) of this section;

(B) an evaluation of the environmental capability and suitability of resources and habitats, including cultural resources, for land and water uses and activities;

(C) an assessment of the present and anticipated needs and demands for coastal resources;

(D) geophysical hazard areas identified pursuant to 6 AAC 80.040;

(E) areas related to recreation and tourism identified pursuant to 6 AAC 80.050;

DRAFT

(F) sites suitable for the development of major nearshore and onshore energy related facilities identified pursuant to 6 AAC 80.060;

(G) sites suitable for the development of facilities related to fisheries enhancement and commercial fishing and seafood processing identified pursuant to 6 AAC 80.080;

(H) areas important for subsistence hunting, fishing, food gathering, and foraging, pursuant to 6 AAC 80.120.

(I) areas to be recommended for designation as areas which merit special attention pursuant to 6 AAC 80.140; and

(J) an assessment of present and anticipated power and economic development requirements, including but not limited to designation of areas or sites suitable for the development of uses, activities, and facilities, as deemed appropriate by the district.

Existing data and information, including but not limited to data and information listed in 6 AAC 80.010, shall be utilized to the greatest extent practicable in the preparation of the resource inventory and analysis. Appropriate state agencies shall assist coastal resource districts in preparing the resource inventory and analysis.

(6) A statement, list, or definition of the land and water uses and activities which are subject to the district coastal management program. The uses and activities contained in 6 AAC 80.030 - 6 AAC 80.120 shall, if applicable, be subject to the district coastal management program. A district coastal management program may consider uses and activities which are conducted outside of the district if these uses and activities have or could have a direct and significant impact on the district.

(7) A description of the uses and activities, including uses of state concern,[2] that will be considered proper and the uses and activities that will be considered improper with respect to the land and water within the coastal area. This description shall be based upon the district's statement of overall needs, objectives, or goals, or the district's comprehensive land and resource use plan, and shall be consistent with the standards of the Alaska Coastal Management Program contained in 6 AAC 80 and the Alaska Coastal Management Act.

(8) A summary or statement of the policies and regulations that will be applied to the land and water uses and activities subject to the district coastal management program and the policies and procedures which will be used to determine whether

2. "Uses of state concern" is defined in AS 46.40.210(6).

DRAFT

specific proposals for land and water uses and activities may be allowed. It shall be the general policy of the coastal resource district to approve specific proposals for land and water uses and activities which are consistent with the district coastal management program. Districts shall utilize existing forums and procedures appropriate for the determination of specific proposals to the greatest extent practicable, including but not limited to forums and procedures related to planning and zoning. Policies, regulations, and procedures shall be consistent with the standards of the Alaska Coastal Management Program contained in 6 AAC 80 and shall meet the following criteria:

(A) comprehensibility, so as to provide for all uses, activities, and areas in need of management;

(B) specificity, so as to allow clear understanding of who will be affected by the district coastal management program, how they will be affected, and whether specific proposals for land and water uses and activities may be allowed; and

(C) enforceability, so as to insure implementation of and adherence to the district coastal management program.

(9) A description of the methods and authorities that will be used to implement the district coastal management program. Methods and authorities must be adequate to insure program implementation. Additional methods and authorities which are required shall be specified. Methods and authorities may include but are not limited to land and water use plans, municipal ordinances and resolutions, including shoreline ordinances, zoning ordinances, subdivision ordinances, and building codes, state and federal statutes and regulations, capital improvements programs, the purchase, sale, lease, or exchange of coastal land and water resources, cooperative agreements, memoranda of understanding, and coordinated permit or project review procedures. Coastal resource districts may enter into cooperative management agreements with parties conducting uses or activities outside of the district in conformity with the Alaska Coastal Management Program and this Title.

(10) Evidence of effective and significant public involvement in program development, pursuant to sec. 030 of this chapter.

DRAFT

6 AAC 85.020. SUBMITTALS TO COUNCIL. (a) During program development, coastal resource districts shall submit brief annual progress reports concerning program development to the Council.

(b) Following approval of the district coastal management program by the Council and adoption of the program by the district, coastal resource districts shall submit brief annual progress reports concerning program implementation to the Council. The Council will review annual progress reports to insure that the district is making adequate progress in complying with the Alaska Coastal Management Act, this Title, and the adopted district coastal management plan.

(c) All significant additions, amendments, and revisions to the district coastal management program shall be submitted to the Council. The Office of Coastal Management shall review proposed additions, amendments, and revisions to determine if Council approval is required. This determination is subject to review by the Council when requested by a council member.

(d) Coastal resource districts shall give conceptual approval to the district coastal management program and significant additions, amendments, and revisions to the district coastal management program prior to their submittal to the Council. Following Council approval, the district shall adopt the program, addition, amendment, or revision.

6 AAC 85.030. PUBLIC INVOLVEMENT. (a) At least two public meetings shall be held within the coastal resource district during coastal management program development to inform the public about and to solicit public comments concerning the program. A brief summary or report of the matters considered shall be prepared by the district and made available to the public following each meeting.

(b) At least 30 days before giving conceptual approval to the district coastal management program or significant additions, amendments, or revisions thereto, the coastal resource district shall give public notice of the proposed action. At least one public hearing shall be held during the period of the notice. At the public hearing, each interested person shall be given the opportunity to present statements, arguments, or contentions, orally or in writing. Districts shall insure that, where necessary, translation into the appropriate Native language is provided. The district shall consider all relevant matter presented to it. A written transcript, minutes, or an electronic recording of the public hearing shall be submitted to the Council as an element of the district coastal management program.

DRAFT

(c) In addition to the requirements of (b) of this section, coastal resource districts shall provide opportunities for public involvement from the beginning in the development of all program elements.

(d) Coastal resource districts shall provide to the public, in a timely manner and in understandable form, information explaining the district coastal management program, the requirements of public participation in program development, how and when the public may participate in program development, and what information is available.

6 AAC 85.040. COORDINATION AND REVIEW. Coastal resource districts shall provide opportunities for coordination and review by federal, state and local governmental agencies and other parties with a significant interest in coastal resources within or adjacent to the district or which are conducting or may conduct uses and activities that have or are likely to have a direct and significant impact on the coastal resource district.

DRAFT

--referred to in 6 AAC 80.060--

Policies of the State of Alaska Concerning the Onshore and Nearshore aspects of OCS Development[1]

Policy 1. Optimum location. The state shall ensure that the siting of major onshore and nearshore petroleum-related[2] facilities minimizes adverse environmental and social effects while satisfying industrial requirements. Where possible, siting decisions will not foreclose other land and water uses.

1a. Preliminary siting criteria. The state shall develop preliminary siting criteria for major nearshore and onshore petroleum-related facilities.[3] These criteria should consist of basic siting considerations that would capitalize on the public benefits of OCS development and reduce its adverse effects.

1b. Information needs for evaluating proposals. In order to adequately evaluate major development proposals, the state requires from developers at least the information listed in Table 5.2.[4]

Policy 2. Consolidation. Major petroleum-related facilities shall be consolidated to the maximum extent feasible unless consolidation produces greater adverse environmental or social consequences.

2a. Planning provisions. The state shall encourage industrial facility planning that allows for reasonable expansion and offers adequate assurance that other operators and necessary support industries could share the facility.

2b. Exceptions. Consolidation of onshore facilities shall be discouraged if the capacity of existing facilities cannot be expanded in an environmentally and socially acceptable way. Instances when this might occur include, but are not limited to, the following:

(1) Affected communities oppose the expansion of existing facilities.

1. As adopted by the Alaska Coastal Policy Council 01/13/78.

2. Major nearshore and onshore petroleum-related facilities include: a) marine service bases; b) air transport facilities; c) pipelines and rights-of-way; d) separation, treatment and storage facilities; e) LNG plants; f) transfer terminals related to petroleum production; g) concrete platform fabrication yards; h) refineries; and i) petrochemical plants.

3. Table 5.1, Appendix A.

4. Appendix B.

(2) Additional harbor activities would seriously jeopardize marine safety.

(3) Water supply is insufficient for future demand.

(4) Environmental protection measures (e.g., ballast treatment facilities and solid waste disposal sites) at existing facilities could not be expanded to handle new loads.

(5) Air and water quality problems would be compounded to a point where projected environmental degradation would exceed allowable air and water quality standards.

Policy 3. Compatibility. Industrial and commercial use of land shall be compatible with adjacent uses, projected community needs and high standards of environmental quality.

Policy 4. Concurrent use, reuse, conversion and removal. The state shall encourage the concurrent use of petroleum-related facilities for other economic or public uses if possible, the reuse or conversion of these facilities when no longer needed for petroleum-related activities, and the removal of the facility if it cannot be used for other purposes. The state shall further encourage reclamation and restoration of disturbed areas upon termination of active use.

4a. Study possibilities. The state shall investigate possibilities for concurrent use, reuse and conversion of petroleum-related facilities and incorporate these findings in state land use, economic and public facility planning.

4b. Lease stipulations. Where appropriate, the state will specify concurrent use, reuse, conversion or removal of facilities as stipulations on leases of state uplands, tidelands, submerged lands and shorelands. The state shall also require reclamation or restoration of distrubed areas upon termination of active use on these lands.

Policy 5. Protection of environmental quality. The state shall in all cases consider the effect of development upon: a) vulnerable or unique populations and habitats, b) renewable resources having a high commercial, recreational, cultural and/or aesthetic value, c) areas of high biological productivity and/or diversity, and d) areas of high development hazard. The effect of development on these features of the natural and human environment must be considered in determining optimum locations of development activities (Policy 1), appropriate design of facilities, and compatibility of the proposed development with maintenance of a high level of environmental quality (Policy 3).

5a. Sensitive areas. The state shall protect ecologically sensitive areas, including but not limited to: estuaries, wetlands river deltas, fish spawning grounds, intensive use habitat, bird nesting areas, waterfowl and shorebird staging areas, migration routes, wildlife wintering habitat, and sea mammal rookeries and hauling out grounds, by requiring environmentally acceptable technology or, if necessary, recommending alternate sites.

5b. Facility design. These state shall encourage design, construction, and operation of facilities to maintain a high level of environmental quality through, for example:

(1) use of existing facilities and consolidation of new facilities;

(2) minimizing dredge and fill, clearing, and other surface alteration;

(3) use of environmentally safe technology;

(4) adherence to Alaska's environmental protection laws and regulations pertaining to air quality, water use, water quality and solid waste disposal;

(5) proper burial of submarine pipelines, particularly in trawling areas;

(6) operation of helicopters at sufficient altitudes above seabird colonies and other noise-sensitive habitats to minimize disruption; and

(7) reclamation or restoration of disturbed areas upon termination of active industrial use.

Policy 6. Shoreline development. The state shall encourage reservation of the shoreline for water dependent or water related uses.

Policy 7. Resident employment preferences. Alaskan residents shall receive preference for employment. Resident employment preference shall apply to retention as well as hiring.

7a. Voluntary agreements. The state will encourage the petroleum industry and related companies to adopt resident employment preference policies.

7b. Lease stipulation. As a stipulation on all state leases, the state will require that employment preference be given to Alaskan residents.

Policy 8. Manpower training. The state shall encourage manpower training programs that would qualify the existing resident labor force for jobs in the petroleum industry.

Policy 9. Public costs. Public costs resulting from OCS-related activities shall be shared by state and local governments, the federal government, the petroleum industry and other private developers.

Policy 10. Public facilities. The state shall promote full use of public facilities[5] while ensuring high standards of public service.

10a. New facilities. Before the state plans, funds or constructs new public facilities, they must be justified by the level of economic activity and stable population growth expected through at least the production phase of OCS development.

10b. Temporary facilities. The state shall encourage temporary means of expanding public facilities to handle increased demands of a temporary nature.

Policy 11. Public services. The state shall provide new or expanded public services[6] in a timely fashion.

Policy 12. Public information and opinion. Early in the OCS development process the state shall inform the public about OCS development and obtain public opinion on industrial growth and technological options.

12a. Attitudinal surveys and workshops. The state will encourage and participate in the dissemination of public information on OCS development and the conduct of attitudinal surveys and workshops early in the OCS development process.

12b. Local coastal management programs. The state will encourage the development of local coastal management programs in OCS-affected coastal communities. An approved local coastal management plan will be recognized as an expression of community views regarding industrial growth.

5. Public facilities include, but are not limited to, sewerage and water systems, ports, airports, roads, schools and hospitals.

6. Public servies include, but are not limited to, education, health care, child care, planning, manpower training, social services, and the criminal justice system.

DRAFT

12c. Orientation of non-resident employees. The state will encourage development companies to conduct orientation programs for non-resident employees on community values and the results of attitudinal surveys to minimize misunderstandings between temporary residents and permanent members of a community.

Policy 13. Local management. The state shall seek to strengthen local planning, fiscal and management roles, including human resources planning and program development. The state shall also offer assistance to communities in coping with the adverse effects of development.

13a. Technical assistance. The state will assist communities in directing growth according to local preferences. In rendering assistance, the state will emphasize consideration of state-wide, regional and minority interests.

13b. State land disposal. The state will to the maximum extent feasible lease, sell or exchange state land in the vicinity of existing communites: a) if such actions enhance local control over development and the site satisfies the state's siting criteria; and b) an approved municipal plan establishes the desirability of expansion onto state-owned parcels and provides for phased growth. Although local preference is a significant factor in deciding whether to lease, sell or exchange state land near existing communities, it is not the only factor. Additional considerations are specified in the Alaska Statutes and Administrative Code.

Policy 14. State-local coordination. Where a community makes a concerted effort to develop and act on its position regarding OCS development, the state shall adapt its actions (e.g. capital investments, leasing, permit issuance) to community preference to the extent that such actions also respect state-wide, regional and minority interests.

Policy 15. Coordination among state agencies. The state shall seek to coordinate at the outset the actions of all state agencies that must eventually act on major development proposals.

15a. Interagency review. The A-95 Clearinghouse should coordinate review of major state actions related to development of the outer continental shelf.

15b. Major state actions. The state shall establish a process through which all major state actions regarding OCS development are coordinated.

15c. Information exchange. The state shall establish a system for improving the transfer of information among state agencies and between them and the public.

Policy 16.. State-federal coordination. The state shall seek to coordinate state and federal development decisions.

16a. Pipeline transportation plan. The state should prepare a comprehensive plan regarding pipeline trasportation and encourage the participation of appropriate federal agencies (e.g., FPG, ICC, BLM, Department of Transportation).

16b. Coastal management. The state's OCS policies will be incorporated into the state's coastal management program. When Alaska's coastal management program receives federal approval, these policies will significantly influence federal coastal decisions.

Policy 17. Cooperative management and development. The state shall seek to cooperate with landowners, developers and government agencies in the development and management of OCS-related onshore facilities.

DRAFT

APPENDIX A

TABLE 5.1

PRELIMINARY SITING CRITERIA
FOR
MARINE SERVICE BASES
OIL TERMINALS
LNG PLANTS

Onshore vs. offshore. Site facilities onshore until alternatives offshore are proven safe and environmentally acceptable.

Expansion. Select sites with sufficient acreage to allow for reasonable expansion of facilities. (1)

Infrastructure. If possible, site facilities where existing infrastructure (e.g., roads, docks, airstrips) is capable of satisfying industrial requirements. (1)

Navigational safety. Avoid harbors and shipping routes with reefs, shoals, drift ice, and other obstructions that might jeapordize safe navigation.

Site preparation. Select sites where development would entail minimal site clearing, dredging, and construction in productive wetlands, estuaries, deltas, and other sensitive areas. (1)

Tsunami. Site fuel, crude oil, and LNG storage tanks at elevations sufficiently above mean sea level to escape the highest tsunami run-up.

Pipelines. Align pipelines away from active faults and areas of subsidence.

Shipping routes. Site oil terminals so as to minimize the probability of oil spills affecting fishing grounds and spawning grounds.

Fire and explosion. Site fuel, crude oil and LNG storage and transfer areas downwind from populated areas to reduce the hazard of fire and explosion to human populations.

Resource protection. Site facilities so that unique environments and areas of particular scenic, recreational, and cultural value will be protected.

Water quality. Site facilities in areas of least biological productivity, diversity, and vulnerability, and where effluents and spills can be controlled or contained easily.

DRAFT

Air quality. Site facilities where winds and air currents freely disperse pollutants, thereby reducing their concentrations.

Compatibility. Select sites designated for industrial purposes or well separated from residential, commercial, and institutional land uses, where industrial traffic will not pass through population centers, and vessel movements will not result in overcrowded harbors or interfere with fishing operations and equipment.

---

(1) Application of site preparation, expansion and infrastructure criteria requires basic information on harbor dimensions, acreage and infrastructure needs.

APPENDIX B

TABLE 5.2

INFORMATION NEEDS

1. Type of facility proposed, e.g., service base, marine terminal, LNG plant.

2. Location of all facilities and activities associated with or expected to be attracted to the proposed development, e.g., helicopter operations, construction camps. motels.

3. Description of proposed facility, e.g., acreage, site plans.

4. Expansion: probability of additional demand on the proposed facility in the future; provisions for expansion and sharing of the facility with other companies.

5. Schedule: proposed construction schedule and anticipated operational timetable over the life of the facility, e.g., type and level of seasonal activities, anticipated years of peak usage.

6. Land status and ownership of development site and other land affected by the proposal, e.g., private, public, unpatented, in litigation.

7. Management of the project, e.g., an oil company, a Native corporation, joint management.

8. Contractors and subcontractors for all or portions of the project.

9. Resource requirements: quantities and probable sources of power, water, gravel, and other materials.

10. Transport: frequency and routes of boat and aircraft movements and expected level of vehicular traffic in the region resulting from construction or operation of the facility.

11. Employment: anticipated number of persons to be employed by job description, tenure (permanent/temporary), and place of employment.

12. Population: approximate addition to the population of Alaska by place.

13. Public services: extent of need for and means of providing public services, e.g., roads, sewers, water, solid waste disposal, medical care, police and fire protection, and other health and social services

14. Environmental implications: potential environmental benefits,

DRAFT

conflicts and mitigative measures, particularly concerning solid waste management and air and water quality.

15. Siting and design features to compensate for natural processes (e.g., floods, earthquakes, storms, erosion and sedimentation), to provide for safe and effective management of sewage and solid waste; and to minimize noise and visual impacts.

16. Economic implications, e.g., public cost and revenues resulting from the proposed project; potential conflicts with existing industry; anticipated expenditures by Alaska by place.

17. Social implications, e.g., training programs, local hiring policy, housing.

18. Arrangements for reducing environmental, economic, and social conflicts, e.g., traffic control systems, oil spill contingency plan, compensation plan.

19. Alternative sites for the required facilities and operations, and reasons for rejecting alternative sites.

MEMORANDUM State of Alaska

TO: Rep. Lisa Rudd, Chairman
Community and Regional Affairs
Committee

DATE: 1 February 1978

FILE NO:

TELEPHONE NO:

FROM: Glenn Akins, Coordinator
Alaska Coastal Management Program

SUBJECT: Guidelines & Standards

One of the questions I felt we could have answered better today was your concern about what "state" meant within the guidelines and standards.

The Alaska Coastal Management Act identifies specific tasks for the Department of Community and Regional Affairs (providing technical and financial assistance to the districts, consolidating service areas). All other tasks are to be carried out by other state agencies, coordinated by the Council and the "Office of Coastal Management". I would have preferred to use the "Division of Policy Development and Planning" in the guidelines and standards, but the Council wanted to single out OCM. In my opinion, OCM is not separate in any way from DPDP.

Many of the responsibilities in the guidelines and standards may be assigned to a specific state agency. We will have to do this in the management program document (to be submitted to the Department of Commerce in June). Some agency responsibilities are not clear to us now, however. We are due reports from three state agencies which will enable us to identify more clearly what agency will be responsible for each part of the guidelines and standards. But, at present, it is left to the Council, and its staff, to sort that out.

THE FOLLOWING PAGES WERE TREATED AS
A UNIT IN THE ORIGINAL FILE.

State of Alaska
Position on OCS-Related
Onshore and Nearshore Activities

April 1977

The position in this report concerns state actions regarding onshore and nearshore activities associated with development of the outer continental shelf (OCS). It has been adopted for the Administration by the Coastal Management Policy Committee and the Governor. The policies are one component of the general policy base for the Alaska Coastal Management Program (ACMP). By virtue of their adoption, these policies are now the interim operating policies for the state and shall guide all state actions dealing with OCS-related onshore and nearshore activities until the full coastal management policy base is formulated and approved. Because of the immediate need for a unified state position on OCS-related onshore and nearshore activities, and because of the complexity and importance of the subject area, these policies have been developed in advance of the remainder of ACMP policy. Federal approval of ACMP under the provisions of Section 306 of the Coastal Zone Management Act of 1972 is scheduled for June of 1978. At this time, the OCS policies will take on added significance as they relate to federal coastal decisions on OCS matters.

The state's position regarding OCS-related onshore and nearshore activities consists of goals, findings, policies and procedures for carrying out the policies. Goals are broad statements of long-term end results the state wishes to achieve; findings are facts, observations and concerns specific to OCS-related onshore development; and policies are guidelines for state actions. The state's goals, findings and policies are presented under six headings: industrial facility planning, resource management, employment, public expenditures, local self-determination and coordination.

GOALS

1. INDUSTRIAL FACILITY PLANNING: Optimum location and efficient use of industrial facilities in terms of the public interest.

2. RESOURCE MANAGEMENT: Balanced development and protection of natural and human resources.

3. EMPLOYMENT: Increased employment opportunities for the resident labor force.

4. PUBLIC EXPENDITURES: A fiscally sound and equitable approach to public expenditures.

5. LOCAL SELF-DETERMINATION: Support of life-style preferences and local management of OCS-related activities.

6. COORDINATION: Timely, coordinated development decisions.

FINDINGS AND POLICIES

INDUSTRIAL FACILITY PLANNING

Findings

Public involvement in facility siting. Public involvement in the siting of industrial facilities is customarily triggered by specific development proposals. Waiting until a proposal is well developed reduces uncertainty regarding the location, design and operation of a facility. A firm proposal, however, tends to restrict public comment to the pros and cons of establishing a facility at a particular location, thereby foreclosing the option of siting the facility at an alternative site. A preferable approach to facility siting is to ensure protection of the public interest through early public assessment of potential development sites and later public scrutiny of specific proposals.

Information. Accurate assessments of oil and gas reserves, employment and demands on local resources such as water, electricity and sewage treatment are essential to planning for onshore activities. Notices of support activities (Stipulation 5) and development plans (OCS Order 15), required of all operators in the northern Gulf of Alaska, provide some of this information. There is, however, no mechanism for verifying this information. Furthermore, the notices of support activities and development plans are not made public in sufficient time to influence the planning that must be undertaken by state and local governments, and other affected parties. This information essentially reports on industrial planning that has already taken place. What is needed is advance information

about development options so that the public is involved early in the facility siting process.

Consolidation. In the strictest sense, consolidation refers to a) the development and operation of an industrial facility as a unit by a single company or group of companies (unitization) or b) the sharing of the same facility. Broadly, however, consolidation refers to the concentration of different industrial activities in a single location, as in an industrial park.

Consolidation of petroleum facilities offers several benefits. The greatest public advantage of consolidation is that the effects of development - visual, environmental, social and economic - are concentrated in the fewest different locations. Cost savings may be realized from reduced capital and operating expenditures and avoidance of delays in processing necessary permits. Fewer sites imply less complicated and less costly systems of monitoring and of providing basic services such as fire and police protection.

Incompatible land uses. Industrial activities may not be compatible with neighboring land uses. An important mechanism for ensuring compatibility with existing and projected land uses is zoning. Most local governments in Alaska can exercise zoning powers, as can the state in certain instances. These powers are not always exercised, however.

Concurrent use, reuse and conversion. In many Alaskan communities there is a need for better port facilities. With proper planning, concurrent use of industrial facilities for community purposes could alleviate such shortages. Service bases offer the greatest potential for concurrent use, particularly as a general cargo dock, because of a similarity of purpose and vessel size.

If a facility's operations are replaced by similar activities, only minor rehabilitation and structural alterations might be necessary. Many facilities including docks, fuel storage tanks, warehouses, outside storage yards, office buildings, onshore pipelines and repair shops could be reused in this manner.

The use of warehouses, office buildings and other structures for radically different activities such as seafood processing, tourism or recreation would require substantial interior redesign. If ultimate uses of facilities are anticipated and desired, siting decisions and arrangements for conversion could be made when the facility is first designed.

Reclamation or restoration. Specialized oil and gas facilities such as crude oil storage tanks and liquefaction plants usually are not directly reusable or easily converted. If no appropriate ultimate use is determined for these facilities, they should be removed and the site reclaimed or restored. Land disturbed temporarily by construction activities should also be reclaimed or restored. Since this will be costly, provisions for ensuring and financing site reclamation or restoration should be specified in stipulations to leases or permits.

Policies

Policy 1. Optimum location. The state shall ensure that the siting of major onshore and nearshore petroleum-related facilities* minimizes adverse environmental and social effects while satisfying industrial requirements. Where possible, siting decisions will not foreclose other land and water uses.

To ensure that the most suitable sites are chosen, the petroleum industry, government and the local communities must cooperate closely. An informed public must be involved early in the industrial siting process, before firm proposals are presented. A constructive way to influence industrial siting decisions would be for the public to develop and communicate its preliminary siting criteria. Later public scrutiny of specific proposals will be most efficient, thorough and equitable if the public also conveys its information needs.

1a. Preliminary siting criteria. The state shall develop preliminary siting criteria for major nearshore and onshore petroleum-related facilities. These criteria should consist of basic siting considerations that would capitalize on the public benefits of OCS development and reduce its adverse effects.

*Major nearshore and onshore petroleum-related facilities include: a) marine service bases; b) air transport facilities; c) pipelines and rights-of-way; d) separation, treatment and storage faciliities; e) LNG plants; f) transfer terminals related to petroleum production; g) concrete platform fabrication yards; h) refineries and i) petrochemical plants.

Preliminary siting criteria have been developed for service bases, oil terminals and LNG plants. They are listed in Table 5.1. These criteria were designed for the Gulf of Alaska, and reflect resource management concerns, consideration of the facilities likely to be built in the Gulf, and also specific conditions there such as earthquakes. As types of facilities, conditions and our understanding of OCS facility siting change, we can expect these preliminary siting criteria to change also.

1b. Information needs for evaluating proposals. In order to adequately evaluate major development proposals, the state requires from developers at least the information listed in Table 5.2.

TABLE 5.1

PRELIMINARY SITING CRITERIA
FOR
MARINE SERVICE BASES
OIL TERMINALS
LNG PLANTS

Onshore vs. offshore. Site facilities onshore until alternatives offshore are proven safe and environmentally acceptable.

Expansion. Select sites with sufficient acreage to allow for reasonable expansion of facilities. (1)

Infrastructure. If possible, site facilities where existing infrastructure (e.g., roads, docks, airstrips) is capable of satisfying industrial requirements. (1)

Navigational safety. Avoid harbors and shipping routes with reefs, shoals, drift ice, and other obstructions that might jeopardize safe navigation.

Site preparation. Select sites where development would entail minimal site clearing, dredging, and construction in productive wetlands, estuaries, deltas, and other sensitive areas. (1)

Tsunami. Site fuel, crude oil and LNG storage tanks at elevations sufficiently above mean sea level to escape the highest tsunami run-up.

Pipelines. Align pipelines away from active faults and areas of subsidence.

Shipping routes. Site oil terminals so as to minimize the probability of oil spills affecting fishing grounds and spawning grounds.

Fire and explosion. Site fuel, crude oil and LNG storage and transfer areas downwind from populated areas to reduce the hazard of fire and explosion to human populations.

Resource protection. Site faciliites so that unique environments and areas of particular scenic, recreational, and cultural value will be protected.

Water quality. Site faciliites in areas of least biological productivity, diversity and vulnerability, and where effluents and spills can be controlled or contained easily.

Air quality. Site facilities where winds and air currents freely disperse pollutants, thereby reducing their concentrations.

Compatibility. Select sites designated for industrial purposes or well separated from residential, recreational, commercial, and institutional land uses, where industrial traffic will not pass through population centers, and vessel movements will not result in overcrowded harbors or interfere with fishing operations and equipment.

Local acceptance. Site facilities at locations acceptable to local communities provided there is no overriding and opposing state-wide, regional or minority interest.

---

(1) Application of site preparation, expansion and infrastructure criteria requires basic information on harbor dimensions, acreage and infrastructure needs.

	SERVICE BASE	OIL TERMINAL	LNG PLANT

TABLE 5.2

INFORMATION NEEDS

1. Type of facility proposed, e.g., service base, marine terminal, LNG plant.

2. Location of all facilities and activities associated with or expected to be attracted to the proposed development, e.g., helicopter operations, construction camps, motels.

3. Description of proposed facility, e.g., acreage, site plans.

4. Expansion: probability of additional demand on the proposed facility in the future; provisions for expansion and sharing of the facility with other companies.

5. Schedule: proposed construction schedule and anticipated operational timetable over the life of the facility, e.g., type and level of seasonal activities, anticipated years of peak usage.

6. Land status and ownership of development site and other land affected by the proposal, e.g., private, public, unpatented, in litigation.

7. Management of the project, e.g., an oil company; a Native corporation, joint management.

8. Contractors and subcontractors for all or portions of the project.

9. Resource requirements: quantities and probable sources of power, water, gravel and other materials.

10. Transport: frequency and routes of boat and aircraft movements and expected level of vehicular traffic in the region resulting from construction or operation of the facility.

11. Employment: anticipated number of persons to be employed by job description, tenure (permanent/temporary), and place of employment.

12. Population: approximate addition to the population of Alaska by place.

13. Public services: extent of need for and means of providing public services, e.g., roads, sewers, water, solid waste disposal, medical care, police and fire protection, and other health and social services.

14. Environmental implications: potential environmental benefits, conflicts and mitigative measures, particularly concerning solid waste management and air and water quality.

15. Siting and design features to compensate for natural processes (e.g., floods, earthquakes, storms, erosion and sedimentation); to provide for safe and effective management of sewage and solid waste; and to minimize noise and visual impacts.

16. Economic implications, e.g., public cost and revenues resulting from the proposed project; potential conflicts with existing industry; anticipated expenditures in Alaska by place.

17. Social implications, e.g., training programs, local hiring policy, housing.

18. Arrangements for reducing environmental, economic and social conflicts, e.g., traffic control systems, oil spill contingency plan, compensation plan.

19. Alternative sites for the required facilities and operations. and reasons for rejecting alternative sites.

Policy 2. Consolidation. Major petroleum-related facilities shall be consolidated to the maximum extent feasible unless consolidation produces greater adverse environmental or social consequences.

This policy means the state will discourage new onshore petroleum-related facilities as long as existing sites are capable of handling anticipated demand. The effects of consolidation may not always be desirable, however, so it is important to discuss exceptions to the basic policy.

2a. Planning provisions. The state shall encourage industrial facility planning that allows for reasonable expansion and offers adequate assurance that other operators and necessary support industries could share the facility.

2b. Exceptions. Consolidation of onshore facilities shall be discouraged if the capacity of existing facilities cannot be expanded in an environmentally and socially acceptable way. Instances when this might occur include, but are not limited to, the following:

(1) Affected communities oppose the expansion of existing facilities.

(2) Additional harbor activities would seriously jeopardize marine safety.

(3) Water supply is insufficient for future demand.

(4) Environmental protection meansures (e.g., ballast treatment facilities and solid waste disposal sites) at existing facilities could not be expanded to handle new loads.

(5) Air and water quality problems would be compounded to a point where projected environmental degradation would exceed allowable air and water quality standards.

Policy 3. Compatibility. Industrial and commercial use of land shall be compatible with adjacent uses, projected community needs and high standards of environmental quality.

As stated in the findings for this section, zoning is a major mechanism for ensuring compatibility. Under existing statutes, the state has the authority to zone the unorganized borough and land surrounding airports. It should use these authorities to ensure that major petroleum-related facilities and associated activities are compatible with other land and resource uses. In incorporated areas, the state should abide by local zoning ordinances.

Policy 4. Concurrent use, reuse, conversion and removal. The state shall encourage the concurrent use of petroleum-related facilities for other economic or public uses if possible, the reuse or conversion of these facilities when no longer needed for petroleum-related activities,

and the removal of the facility if it cannot be used for other purposes. The state shall further encourage reclamation and restoration of disturbed areas upon termination of active use.

In this policy the state acknowledges the contribution OCS-related onshore facilities could make to local and regional economies if planned with imagination and foresight. Provisions for long-term use of facilities should be included in initial stages of planning.

4a. Study possibilities. The state shall investigate possibilities for concurrent use, reuse and conversion of petroleum-related facilities and incorporate these findings in state land use, economic and public facility planning.

4b. Lease stipulations. Where appropriate, the state will specify concurrent use, reuse, conversion or removal of facilities as stipulations on leases of state uplands, tidelands, submerged lands and shorelands. The state shall also require reclamation or restoration of disturbed areas upon termination of active use on these lands.

RESOURCE MANAGEMENT

Findings

Coastal resources. The coastal regions of the state exhibit a great diversity and vitality of living and aesthetic resources which are important aspects of the character and economy of these regions. Marine mammals, fish, shellfish, terrestrial game mammals, furbearers, waterfowl and shorebirds abound along with forests, kelp and seagrass beds and a rich and complex understory of supporting plant and animal communities. Three classes of areas are particularly important in sustaining these resources - areas of high productivity, areas of high diversity, and areas of high vulnerability.

Estuaries, wetlands, shorelands, river deltas and intertidal zones are among the important features providing essential habitat in coastal regions. Maintaining the ecological integrity of these features is critical to preserving the value of coastal resources for commercial and subsistence use, recreational appreciation and scientific study, and for protecting the natural environment.

Demands upon renewable resources. Increasing and competing demands are placed upon coastal lands and waters of Alaska through industrial development, commerce, transportation, extraction of renewable and non-renewable resources, residential development, recreation and waste disposal. These demands necessarily alter to some degree the balance of coastal

ecological systems. Essential habitat may be physically lost, diversity and productivity reduced, and populations of mammals, fish, and birds disturbed.

Critical habitat. Some coastal resources have an inherent vulnerability that makes protection especially critical. Fish spawning and rearing grounds, bird nesting and staging areas, sea mammal rookeries and hauling out grounds, and wildlife wintering areas are among the well-defined and limited habitats the protection of which are essential to maintaining valued resource diversity and productivity. Both habitat requirements and resident populations at risk must be recognized in establishing critical areas.

Water supply. Service bases, oil terminals and LNG plants require dependable sources of fresh water in large quantities. Fresh water is used for domestic purposes, drilling, fire protection and cooling. Increased demand for fresh water in coastal areas raises concerns as to: a) potential impacts on ground and surface water such as lowering of the water table, saltwater intrusion and reduced stream flow; b) adverse effects on fish and wildlife if surface water sources are reduced below the minimum flow necessary to sustain them; and c) possible competition with municipal water systems and other users.

Saltwater could also be used for drilling and cooling. If seawater is withdrawn in large quantities, many marine organisms will be entrained upon intake and killed by pressure and temperature change or chemicals.

Waste disposal and water quality. Service bases, oil terminals and LNG plants also produce solid wastes and effluents that present special disposal problems. Solid wastes include contaminated drilling wastes, lubrication oils and waxes, oil sludges and chemical slurries that require disposal in a sanitary landfill. Sludges produced during storage and treatment of crude oil may contain heavy metals and hazardous chemicals.

Service bases, oil terminals and LNG plants will also discharge effluents into nearby waters. Liquid waste is produced from sewage treatment, ballast treatment and cooling water that is significantly warmer than the receiving waters into which it is discharged and often contains biocides and rust inhibitors. The chronic introduction of soluble hydrocarbons into receiving waters adjacent to ballast treatment facilities could impose a long-term toxic effect on sensitive marine organisms.

Hazardous wastes and effluents from OCS-related facilities raise serious concerns as to their proper disposal and subsequent effects on water quality, biota and human health. Proper management of hazardous wastes and effluents requires well designed sanitary landfill sites, effluent standards and monitoring systems.

Air quality. OCS-related activities will emit a number of pollutants that may cause air quality and related health and nuisance problems under unfavorable topographical and meteorological conditions. Major

emissions will include particulates and sulphur dioxide from tanker and shore facility combustion, dust from wind and traffic, and evaporation of hydrocarbons from fuel storage tanks and tankers.

Policies

Policy 5. Protection of environmental quality. The state shall in all cases consider the effect of development upon: a) vulnerable or unique populations and habitats, b) renewable resources having a high commercial, recreational, cultural and/or aesthetic value, c) areas of high biological productivity and/or diversity, and d) areas of high development hazard. The effect of development on these features of the natural and human environment must be considered in determining optimum locations of development activities (Policy 1), appropriate design of facilities, and compatibility of the proposed development with maintenance of a high level of environmental quality (Policy 3).

5a. Sensitive areas. The state shall protect ecologically sensitive areas, including but not limited to: estuaries, wetlands, river deltas, fish spawning grounds, intensive use habitat, bird nesting areas, waterfowl and shorebird staging areas, migration routes, wildlife wintering habitat, and sea mammal rookeries and hauling out grounds, by requiring environmentally acceptable technology or, if necessary, recommending alternate sites.

5b. Facility design. The state shall encourage design, construction, and operation of facilities to maintain a high level of environmental quality through, for example:

(1) use of existing facilities and consolidation of new facilities;

(2) minimizing dredge and fill, clearing, and other surface alteration;

(3) use of environmentally safe technology;

(4) adherence to Alaska's environmental protection laws and regulations pertaining to air quality, water use, water quality and solid waste disposal;

(5) proper burial of submarine pipelines, particularly in trawling areas;

(6) operation of helicopters at sufficient altitudes above seabird colonies and other noise-sensitive habitats to minimize disruption; and

(7) reclamation or restoration of disturbed areas upon termination of active industrial use.

Policy 6. Shoreline development. The state shall encourage reservation of the shoreline for water dependent or water related uses.

This policy would reduce the disturbance of non-water dependent development on the sensitive coastal environment without preempting activities like shippping that require waterfront facilities. Storage tanks, processing facilities, offices and warehouses should be located at inland sites where feasible.

5b. Facility design. The state shall encourage design, construction, and operation of facilities to maintain a high level of environmental quality through, for example:

(1) use of existing facilities and consolidation of new facilities;

(2) minimizing dredge and fill, clearing, and other surface alteration;

(3) use of environmentally safe technology;

(4) adherence to Alaska's environmental protection laws and regulations pertaining to air quality, water use, water quality and solid waste disposal;

(5) proper burial of submarine pipelines, particularly in trawling areas;

(6) operation of helicopters at sufficient altitudes above seabird colonies and other noise-sensitive habitats to minimize disruption; and

(7) reclamation or restoration of disturbed areas upon termination of active industrial use.

Policy 6. Shoreline development. The state shall encourage reservation of the shoreline for water dependent or water related uses.

This policy would reduce the disturbance of non-water dependent development on the sensitive coastal environment without preempting activities like shippping that require waterfront facilities. Storage tanks, processing facilities, offices and warehouses should be located at inland sites where feasible.

EMPLOYMENT

Findings

Temporary nature of oil industry employment. The temporary character of employment in the oil industry stems from the nature of oilfield development. This involves very intense activity in the early stages of development, a gradual decline over the following five to six years, and a fairly low level of activity for the remainder of the life of the field. Generally long-term employment is about one-fifth of peak employment.

Out-of-state labor. Oil companies and contractors are expected to recruit personnel for rigs, lay barges, bury barges and platforms from out-of-state. Labor for operating permanent platforms will probably be recruited locally.

Entry level jobs. An entry level job at a service base, oil terminal or LNG plant is likely to be a roustabout position. A roustabout is a general laborer. No particular training is necessary, but a high school diploma is preferred by most employers.

Construction. The largest labor force will be for construction of onshore facilities. The construction phase is expected to last approximately five years.

Long-term jobs. The need for permanent production and maintenance staff on platforms, and operating crews at service bases, oil terminals and LNG plants could provide long-term jobs for Alaskans.

Secondary employment. In addition to jobs directly created by oil companies and their contractors, there will be other jobs which result from the general increase in economic activity in the state. This secondary employment occurs mainly in the service and government sector in such categories as transportation, telecommunications, schools and medical care. Secondary employment is expected to be low and split between Anchorage and the other coastal communities.

Wages. Generally, the jobs created by OCS development will comand high wages. If wages offered by local industries cannot compete favorably with those offered by the petroleum industry, part of the local labor force may be diverted. This could cause labor shortages in traditional local industries. If the local labor force is attracted to long-term jobs in the petroleum industry, the local economy will probably remain relatively stable despite the change in occupations. If, on the other hand, the dislocation is short-term, the resultant damage to traditional local industries may not be offset by new economic activity. For this reason, the state stands to benefit most from long-term employment for its residents.

Policies

Policy 7. Resident employment preferences. Alaskan residents shall receive preference for employment. Resident employment preference shall apply to retention as well as hiring.

Resident employment preference will produce the most stable long-term benefit to the state if residents are chosen for jobs with potential for long-term employment. At the present time, operating and maintenance crews on platforms and at service bases, oil terminals and LNG plants offer the greatest possibilities for long-term jobs.

7a. Voluntary agreements. The state will encourage the petroleum industry and related companies to adopt resident employment preference policies.

7b. Lease stipulation. As a stipulation on all state leases, the state will require that employment preference be given to Alaskan residents.

Policy 8. Manpower training. The state shall encourage manpower training programs that would qualify the existing resident labor force for jobs in the petroleum industry.

As a complement to the resident employment preference policy, manpower training should concentrate on skills needed for long-term jobs in the petroleum industry. The state should utilize available state services to the fullest extent possible to recruit and train Alaskan residents to fill these jobs.

PUBLIC EXPENDITURES

Findings

Overbuilding/underbuilding. Overbuilding public facilities is as detrimental to the state and its communities as is underbuilding. Overbuilding saddles the public with debts unmet by future revenues. Underbuilding may result in service standards falling below acceptable levels.

Population growth patterns. If oil is not found in commercial quantities, exploration on the outer continental shelf will cease within five years of the lease sale. Therefore, until a commercial discovery is made, virtually all OCS-related population growth should be considered temporary. Much of the peak in direct employment created by oilfield development is accounted for by construction workers who are mainly transients. This means that long-term additions to the population of Alaska will be considerably less than the peak, which will probably occur about five to ten years after the lease sale.

OCS-related public costs. Monitoring OCS development, reviewing project proposals, enforcement of regulations, environmental damage, changes in land values, and the provision of public services are all public costs of OCS development. Some of these costs must be incurred before there are sufficient revenues to finance them.

Shortcomings in existing revenue system. The Alaska Department of Revenue stated in its comments on the environmental impact statement for the northern Gulf OCS lease sale, "The State of Alaska acquires the vast majority of the liabilities associated with OCS development off its coast, but inadequate revenues to support that activity even assuming federal revenue sharing."

Since OCS leases involve tracts beyond the state's territorial boundaries, Alaska does not share in the bonuses or royalties they produce, and cannot tax oil and gas property on the outer continental shelf. The only federal revenues the state will receive will be coastal energy impact funds and limited federal grants such as Title IX Economic Development Assistance grants or the OCS supplement to the Coastal Zone Management grant.

Changes in federal revenue sharing arrangements and the extension of Alaska's taxing jurisdiction to the outer continental shelf would greatly alleviate the financial burden of OCS development on Alaska. The state has voiced its support of amendments to the OCS Lands Act that would authorize federal revenue sharing through taxation, royalties or bonuses.

Specific changes in the state's revenue system could also help. Two important areas that deserve attention are the current exemption of LNG plants and other petroleum facilities from the state's oil and gas property tax (AS 43.56) and the $1,500 per capita limit on borough tax-raising ability.

Policies

Policy 9. Public costs. Public costs resulting from OCS-related activities shall be shared by state and local governments, the federal government, the petroleum industry and other private developers.

Since development of the outer continental shelf is a federal initiative whose primary beneficiaries will be oil and gas consumers in the lower 48 states, the public costs of OCS development should not be paid by the State of Alaska alone, but rather should be shared as equitably as possible. Aside from modifications to the state's tax laws, public costs can be shared equitably through such means as increased federal revenue sharing, joint private-public funding of public facilities and services that will serve both industry and the public, and private funding all facilities and services not planned as part of long-term settlements.

Policy 10. Public facilities. The state shall promote full use of public facilities* while ensuring high standards of public service.

This policy seeks to avoid overbuilding public facilities without allowing public service standards to fall below acceptable levels. The state can

---

* Public facilities include, but are not limited to, sewerage and water systems, ports, airports, roads, schools and hospitals.

apply this policy most directly through the planning, funding and construction of public works.

10a. New facilities. Before the state plans, funds or constructs new public facilities, they must be justified by the level of economic activity and stable population growth expected through at least the production phase of OCS development.

10b. Temporary facilities. The state shall encourage temporary means of expanding public facilities to handle increased demands of a temporary nature.

Policy 11. Public services. The state shall provide new or expanded public services* in a timely fashion.

To predict fluctuations in demand for existing or new services the state should monitor change in communities. Information from frequent censuses and other methods of monitoring change should help the state channel public resources expeditiously.

---

* Public services include, but are not limited to, education, health care, child care, planning, manpower training, social services, and the criminal justice system.

LOCAL SELF-DETERMINATION

Findings

Changes in life style. Existing life styles, particularly those built on subsistence, will be difficult to preserve in the face of OCS oil and gas development. Subsistence is a way of life that relies directly on the land and its resources through hunting, gathering and fishing. Increased reliance on a cash economy and increased recreational pressure on fish and wildlife resources are factors that will further erode present life styles. Changes in community social and economic composition and patterns produce individual and community stress. Early, informed and unified efforts to influence the course of development are the most valuable tools at the disposal of communities to direct and control change and stress in the community.

New demands on local government. Onshore industrial development will place new demands on local governments. Local management capabilities may not be equal to the complex problems of OCS-related onshore activities.

Cost. Effective local management of OCS facilities is expensive. The Yak-Tat Kwaan, the village corporation for Yakutat, estimates that it has spent over $200,000 developing and carrying out its plan for an industrial port facility on Monti Bay. Local government often relies on federal grants for planning funds. Most grants require a local match ranging from one-fifth to one-third of the total cost of the project. When a great deal of planning is required in a short period of time, it may be difficult for communities to finance their share of the cost.

Policies

Policy 12. Public information and opinion. Early in the OCS development process the state shall inform the public about OCS development and obtain public opinion on industrial growth and technological options.

Because of its complexity and uncertainty, it is difficult to accurately assess the implications of OCS activities for a community or region. Nonetheless, for the state to adapt its actions to community views (Policy 14) it is crucial that public sentiment be articulated on the basis of the best available information.

12a. Attitudinal surveys and workshops. The state will encourage and participate in the dissemination of public information on OCS development and the conduct of attitudinal surveys and workshops early in the OCS development process.

12b. Local coastal management programs. The state will encourage the development of local coastal management programs in OCS-affected coastal communities. An approved local coastal management plan will be recognized as an expression of community views regarding industrial growth.

12c. Orientation of non-resident employees. The state will encourage development companies to conduct orientation programs for non-

resident employees on community values and the results of attitudinal surveys to minimize misunderstandings between temporary residents and permanent members of a community.

Policy 13. Local management. The state shall seek to strengthen local planning, fiscal and management roles, including human resources planning and program development. The state shall also offer assistance to communities in coping with the adverse effects of development.

Through this policy the state intends to help local governments prepare themselves to meet the new demands that OCS development will place on them.

13a. Technical assistance. The state will assist communities in directing growth according to local preferences. In rendering assistance, the state will emphasize consideration of state-wide, regional and minority interests.

13b. State land disposal. The state will to the maximum extent feasible lease, sell or exchange state land in the vicinity of existing communities: a) if such actions enhance local control over development and the site satisfies the state's siting criteria; and b) an approved municipal plan establishes the desirability of expansion onto state-owned parcels and provides for phased growth. Although local preference is a significant factor in deciding whether to lease, sell or exchange state land near existing communities, it is not the only factor. Additional considerations are specified in the Alaska Statutes and Administrative Code.

COORDINATION

Findings

Lack of coordination. Presently decisions as to where and how development will take place are made by many different federal, state, local and private entities. Poor coordination among these parties causes needless confusion, wasted effort and delay.

State decisions. State agency actions that would affect OCS development range far beyond granting permits and leases, although these are two of the state's most significant authorities. Also included are land sales, land exchanges and capital investments.

Federal decisions. In addition to its substantial regulatory powers, the federal government plays a key role in OCS development in Alaska. It owns millions of acres of land, some of which could be used for onshore facilities or the extraction of building materials. It grants easements, the most important of which are pipeline rights-of-way. It also sets the lease sale schedule, conducts lease sales and promulgates offshore operating orders.

Local decisions. After the lease sales have been held and all necessary permits have been granted, local governments are typically left with the task of managing onshore industrial facilities. Local ordinances must be enforced, zoning regulations complied with, and public services provided.

Policies

Policy 14. State-local coordination. Where a community makes a concerted effort to develop and act on its position regarding OCS development, the state shall adapt its actions (e.g., capital investments, leasing, permit issuance) to community preference to the extent that such actions also respect state-wide, regional and minority interests.

In this policy the state voices its intent to support community preferences. Recognizing that OCS development decisions will sometimes affect more than one community, the state must balance its support of local preferences against considerations of state-wide and regional interest. Furthermore, where there are different views expressed within a community the state must consider the effects of its actions on minority interests.

Policy 15. Coordination among state agencies. The state shall seek to coordinate at the outset the actions of all state agencies that must eventually act on major development proposals.

Early coordination of state actions helps the state make timely and appropriate decisions. Mechanisms for coordination can be easily established.

15a. Interagency review. The A-95 Clearinghouse should coordinate review of major state actions related to development of the outer continental shelf.

15b. Major state actions. The state shall establish a process through which all major state actions regarding OCS development are coordinated.

15c. Information exchange. The state shall establish a system for improving the transfer of information among state agencies and between them and the public.

Policy 16. State-federal coordination. The state shall seek to coordinate state and federal development decisions.

The state has been very active in its efforts to influence the OCS lease sale schedule. It should continue to comment on federal OCS activities and proposed legislation. As OCS development in Alaska progresses, it will become increasingly important for the state to cooperate closely with the federal government in the management of Alaska's land and resources.

16a. Pipeline transportation plan. The state should prepare a comprehensive plan regarding pipeline transportation and encourage the participation of appropriate federal agencies (e.g., FPC, ICC, BLM, Department of Transportation).

16b. Coastal management. The state's OCS policies will be incorporated into the state's coastal management program. When Alaska's coastal management program receives federal approval, these policies will significantly influence federal coastal decisions.

Policy 17. Cooperative management and development. The state shall seek to cooperate with landowners, developers and government agencies in the development and management of OCS-related onshore facilities.

Cooperative management and development agreements are constructive ways of coordinating the many different decisions that contribute to successful development. The state is willing to enter into cooperative management and development agreements and to manage its lands and resources accordingly.

IMPLEMENTATION

The state's position on OCS-related onshore and nearshore activities will guide future state actions in this regard. As future events and new information warrant, the state will update its OCS policies.

The following actions are the most important means through which the state will implement its OCS policies.

1. Review of major federal and state actions. Reviewing major federal and state actions is an important way for the state to ensure that these governmental acts, and the private and public activities they affect, are in conformance with state policy. Of all the policy implementation measures at the state's disposal, this is perhaps the broadest because of the wide range of actions subject to state review. Implementation of all state OCS policies will be furthered through rigorous review of major federal and state actions. When the Alaska Coastal Management Program is approved by the federal government, state review of federal actions for conformance with state coastal policies will have even greater force than at present.

2. State planning and regulatory activities. The state is charged with a number of planning and regulatory responsibilities, including: 1) issuing permits and leases for such actions as water appropriation, tidelands use, sand and gravel extraction, and effluent discharge; 2) regulating land use surrounding airports and in the unorganized borough; and 3) preparing implementation plans for the Federal Water Pollution Control Act and Clean Air Act.

These planning and regulatory activities are forceful means of implementing the state's Industrial Planning policies (1-4), Resource Management policies (5-6),and Resident Employment preference policy (7).

3. State land selection and disposal. State lands are selected for many different reasons, including resource protection, resource development, and community expansion. As proprietor of a large portion of public lands, the state strongly influences the pattern of development through decisions to dispose of interest in state land. State land selection and disposal are important ways of implementing the state's Indsutrial Planning policies (1-4), Resource Management policies (5-6), and Local Management policy (13).

4. Allocation of state and federal resources. The state allocates not only its own fiscal and human resources, but also federal funds such as coastal energy impact funds and EDA grants. Implementation of the state's Manpower Training policy (8), Public Expenditures policies (9-11), and Local Self-Determination policies (12-13) will be accomplished only if adequate resources are channeled into needed public services (e.g., manpower training, health and social services, enforcement of regulations, and improving local management capabilities), and the costs of providing these services are borne equitably by industry, the federal government, and state and local government.

The following types of new legislation and administrative orders would improve the state's ability to implement its OCS policies.

1. Energy facility siting legislation that provides for a definition of energy facility, information disclosure, site identification, site selection, financing and administration. (See Alaska Department of Community and Regional Affairs, Concept of Major Energy Facility Planning Legislation (draft), 1976).

2. Expansion of the definition of taxable property under the oil and gas property tax (AS 43.56) to include oil refineries, gas processing plants, LNG facilities and petrochemical operations.

3. Legislation establishing a liability fund and procedures for compensating fishermen for lost and damaged equipment, lost time and other damages.

4. Enabling legislation that authorizes local governments to collect prepayment of taxes.

5. Administrative order or legislation establishing a single state office to provide applications for and information about permits and leases.

6. Administrative order authorizing state participation in joint federal-state surveillance of OCS activities.

TITLE 6. GOVERNOR'S OFFICE

PART 5. ALASKA COASTAL POLICY COUNCIL.

Chapter
80. Standards of the Alaska Coastal Management Program
85. Guidelines for District Coastal Management Programs

CHAPTER 80.
STANDARDS OF THE ALASKA COASTAL MANAGEMENT PROGRAM

Article
1. Government process
2. Uses and activities
3. Resources and habitats
4. Areas which merit special attention

ARTICLE 1. GOVERNMENT PROCESS

Section
10. Public participation and information
20. Program management and coordination

6 AAC 80.010. PUBLIC PARTICIPATION AND INFORMATION. (a) The Council will provide adequate, effective, and continuing opportunities for public participation from the beginning in the Alaska Coastal Management Program. The Council will give notice of when and where opportunities for public participation will be provided before the adoption of guidelines and standards, the review and approval of district coastal management programs, and the review and approval or adoption of amendments, revisions, or additions to the Alaska Coastal Management Program.

(b) The Council will not approve a district coastal management program or any amendment, revision, or addition thereto unless evidence of significant opportunities for public participation at the district level has been provided.

(c) The Council will make available to the public information and educational materials concerning the Alaska Coastal Management Program in understandable form, including but not limited to the following:

(1) a guide for the development of district coastal management programs;

(2) comprehensive policies to guide the management of coastal uses and activities as they occur in specific coastal areas;

DRAFT

(3) maps and narratives describing the physical and biological characteristics of coastal areas to be used in establishing boundaries;

(4) areas identified by state agencies and the public for Council designation as areas which merit special attention;

(5) a guide for the siting and development of major petroleum-related facilities in onshore and nearshore areas;

(6) an inventory of coastal fish and wildlife resources, with maps showing the location and range of species with commercial, recreational, or subsistence importance;

(7) an identification of major data and information sources concerning coastal management;

(8) a compilation and summary of information regarding coastal regions, including, where appropriate, a comprehensive list of issues and policies;

(9) summaries of public hearings and workshops;

(10) films and slide and tape programs;

(11) brochures, pamphlets, and tabloids summarizing and explaining the Alaska Coastal Management Program; and

(12) The Council's annual report to the legislature.

(d) At any public meeting concerning the Alaska Coastal Management Program, the Council will insure that, where necessary, translation into the appropriate Native language is provided.

6 AAC 80.020. PROGRAM MANAGEMENT AND COORDINATION. (a) The Office of Coastal Management, in its capacity as staff to the Council, shall be the designated lead agency for the Alaska Coastal Management Program. The Office of Coastal Management shall:

(1) present the official staff position regarding matters before the Council, including but not limited to the review and approval of district coastal management programs;

(2) apply for, receive, use, and distribute funds provided under all sections, except section 308, of the Coastal Zone Management Act of 1972, 16 USC 1451 et. seq., as amended, PL 94-370.

DRAFT

(3) coordinate the activities of state agencies participating in the Alaska Coastal Management Program and delegate tasks to a specific agency or agencies, as appropriate;

(4) determine the consistency of state actions with the Alaska Coastal Management Program, subject to Policy Council determination if requested by a Council member; and

(5) respond to federal agency determinations of the consistency of federal actions with the Alaska Coastal Management Program, subject to Policy Council response if requested by a Council member.

(b) The Council will identify and adopt management policies and practices for specific uses of state concern and areas of the coast where uses of state concern may be sited and managed.[1] The Council will direct the development of management policies and practices for uses of state concern by state agencies and coastal resource districts.

(c) The Council will initiate an interagency program of comprehensive resource management for each geographic region described in AS 44.19.891(a)(1). Regional programs shall be conducted to:

(1) assist the Council in identifying uses of state concern within specific areas of the coast and developing management policies and practices for these uses and areas;

(2) provide resource, social, and economic information on a coordinated regional basis as necessary for development and implementation of the Alaska Coastal Management Program; and

(3) assist the Council in identifying, avoiding, and minimizing existing or potential conflicts between coastal resource districts and state and national interests.

(d) The mechanics of coordinating district plans with state agency plans and recommendations developed as part of the regional program outlined in (c) of this section shall be as described herein. State agencies having jurisdiction within a district shall transmit their plans and recommendations to the district through the Coordinator of the Office of Coastal Management. District planning efforts shall demonstrate a review and consideration of state agency plans and recommendations. If the final district plan proposed does not agree with state agency plans and recommendations, the differences will be resolved by the Council

1. "Uses of state concern" is defined in AS 46.40.210(6).

DRAFT

in accordance with this Title and the Alaska Coastal Management Act.

(e) The Council will prepare a manual of standards for the management of land and water uses in the coastal area to assist in the development of district and state agency plans.

ARTICLE 2. USES AND ACTIVITIES

Section
30. Offshore, shoreline, and waterfront development
40. Geophysical hazard areas
50. Recreation and tourism
60. Energy-related facilities
70. Transportation and utilities
80. Fishing and seafood processing
90. Timber harvest
100. Mining and mineral processing
110. Air, land, and water quality
120. Subsistence

6 AAC 80.030. OFFSHORE, SHORELINE, AND WATERFRONT DEVELOPMENT. (a) Development and activities related to development conducted in offshore, shoreline, and waterfront areas shall, to the greatest extent practicable, maintain and enhance:

(1) the resource values and biological productivity of the coastal area;

(2) access to coastal waters by the public;

(3) the availability of sites for water-dependent or water-related uses and activities; and

(4) the national and statewide interests in navigation.

(b) The provisions of 11 AAC 62.030, Protection of Fish and Game, shall apply to development and activities related to development in the coastal area.

(c) Dredging shall be conducted in a manner which minimizes bottom disturbance and adverse effects on mollusks, shellfish, marine and anadromous fish, marine birds and animals, and water quality.

(d) The placement of structures and the discharge of dredged or fill material into coastal waters, nontidal streams, lakes, and adjacent wetlands shall, as a minimum standard, be conducted

DRAFT

pursuant to Parts 320-323, Title 33, Code of Federal Regulations, Navigation and Navigable Waters, and AS 16.05.870, Protection of Fish and Game.

(e) In planning for and approving uses and activities in shoreline and waterfront areas, coastal resource districts and state agencies shall give, in the following order, priority to:

(1) water-dependent uses and activities;

(2) water-related uses and activities; and

(3) uses and activities which are neither water-dependent nor water-related for which there is no feasible inland location.

6 AAC 80.040. GEOPHYSICAL HAZARD AREAS. (a) Coastal resource districts and appropriate state agencies shall identify or cause to be identified geophysical hazard areas in the coastal area, including but not limited to areas of potential flooding, tsunami run-up, landslides, snowslides, earthquakes, subsidence, severe erosion, and ice hazards.

(b) Development and related activities in geophysical hazard areas may not be approved until siting, design, and construction measures for avoiding or minimizing potential loss of life and damage to property have been provided. In areas of severe hazard potential where siting, design, and construction measures may not be sufficient to avoid or minimize potential loss of life and damage to property, development and related activities shall be prohibited.

6 AAC 80.050. RECREATION AND TOURISM. (a) Coastal resource districts and appropriate state agencies shall identify areas of the coast which:

(1) have been designated as a unit of a local, state, or national park, refuge, or wilderness system;

(2) receive significant use by persons engaging in recreational pursuits or are major tourist destinations;

(3) have a potential for high quality recreational use because of unique physical, biological, ecological, or cultural features;

(4) are important for recreational use because of their proximity to population centers or transportation systems;

(5) provide access to recreational resources;

DRAFT

(6) are recognized for their scenic value;

(7) are listed or nominated for listing on the National Register of Historic Places; or

(8) are determined to be significant by the state historic preservation officer.

Areas so identified shall have as their dominant management value the protection and public use of the recreation, scenic, or heritage resource for which the area was identified and shall be managed consistently with that value.

(b) The development of recreation and tourism and facilities related to recreation and tourism in the coastal area shall be consistent with the preservation, protection, and enhancement of natural and cultural resources.

6 AAC 80.060. ENERGY-RELATED FACILITIES. Sites suitable for the development of major nearshore and onshore energy-related facilities shall be identified by the state in cooperation with coastal resource districts. The siting and approval of these facilities shall be based on the policies of the State of Alaska concerning the onshore and nearshore aspects of OCS development.[2] Coastal resource districts may use and apply these policies in the preparation of district coastal management programs.

by the council? by whom?

6 AAC 80.070. TRANSPORTATION AND UTILITIES. (a) Transportation and utility routes and facilities in the coastal area shall, to the greatest extent practicable, be sited, designed, and constructed so as to:

(1) avoid adverse impacts on the resources and habitats identified in sec. 130 of this chapter;

(2) be compatible with adjacent uses and activities, local community goals and desires, and regional and statewide needs;

(3) combine more than one mode of transport or utility into common corridors;

(4) allow for the concurrent use of facilities; and

(5) maintain scenic values.

2. As adopted on 01/13/78 by the Alaska Coastal Policy Council; available from the Department of Community and Regional Affairs or the Office of Coastal Management.

DRAFT

(b) Land based transportation and utility routes and corridors and air-related transportation facilities shall be sited upland from beaches and shorelines unless access to the water is a primary goal or requirement of the route, corridor, or facility and no feasible inland alternative exists.

(c) Water-based transportation and utility routes shall be sited and designed so as to minimize interference with uses and activities related to the harvest of marine plants and animals.

(d) Air-related transportation routes and facilities shall be sited, designed, and constructed so as to minimize interference with wildlife migration, nesting, and breeding provided that such placement does not interfere with safety.

(e) Traditional navigation and transportation routes and aides to navigation shall have high priority for shoreline and in-water locations.

(f) Transportation and utility routes and facilities include but are not limited to power transmission lines, mineral slurry, oil and gas pipelines, land and marine corridors, railways, highways, roadways, air terminals, water and sewage transfer, and facilities required to operate and maintain them.

6 AAC 80.080. FISHING AND SEAFOOD PROCESSING. (a) The offshore waters within the state's jurisdiction are designated a fisheries conservation zone and uses and activities conducted in this area shall be managed so as to maintain and enhance the Alaska sport and commercial fishery. In the management of this area, the State shall coordinate, as appropriate, with the North Pacific Fishery Management Council, the National Marine Fisheries Service, the U.S. Coast Guard, and other federal agencies responsible for implementation of the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265, April 13, 1976).

(b) Coastal resource districts and appropriate state agencies shall identify sites suitable for the location or development of facilities related to commercial fishing and seafood processing. Criteria for the identification of these sites are:

(1) avoidance of adverse impacts on resources and habitats identified in sec. 130 of this chapter;

(2) adherence to all federal and state water quality standards;

(3) minimization of obstructions to navigation; and

(4) compatibility with adjacent uses and activities and community goals and desires.

DRAFT

(c) Facilities related to commercial fishing and seafood processing include but are not limited to hatcheries and related facilities, seafood processing plants and support facilities, and marine industrial and commercial facilities.

6 AAC 80.090. TIMBER HARVEST. (a) Timber harvest is limited to areas where data and information indicate an absence of reforestation problems that would preclude that area from producing a sustained yield of merchantable timber unless the area is to be converted to a use other than timber harvest.

(b) Timber harvest and associated activities in the coastal area shall be conducted so as to meet the following standards:

(1) the location of facilities and the layout of logging systems shall not adversely impact sensitive areas and shall utilize land that has a minimum potential for water pollution and other adverse environmental impacts;

(2) blockage of and interference with fish movement and habitat in streams, lakes, wetlands, estuaries, and other bodies of water shall be avoided;

(3) shoreline management zones, including but not limited to buffer strips and riparian zones, shall be planned and established along all water courses, lake shores, and marine shorelines; the width of this zone shall be based on ability to withstand blowdown and prevent impacts on fish or wildlife resources as determined on a case-by-case basis by appropriate federal, state, and local expertise; resource values and environmental sensitivity shall determine whether and to what extent timber may be harvested from these zones;

(4) slash, logging debris, and other materials shall be treated so as to enhance reforestation, not constitute a fire hazard, and not interfere with wildlife and fish habitat; and

(5) minimal habitat to maintain game populations and key migratory routes shall be left in timber harvest areas.

(c) Timber transport, storage, and processing in the coastal area shall be conducted so as to meet the following standards:

(1) the onshore storage of logs shall be encouraged where compatible with other objectives of the Alaska Coastal Management Program;

(2) sites for the in-water dumping and storage of logs shall be selected and these activities shall be conducted

DRAFT

so as to minimize adverse effects on the marine ecosystem, minimize conflicts with recreational uses and activities, be safe from storms, and not consitute a hazard to navigation;

(3) roads for log transport and harvest area access shall be planned, designed, and constructed so as to avoid mass wasting, minimize erosion, sedimentation, and interference with drainage, and adequately maintained for the entire period of timber processing or put to bed; and

(4) stream crossings, including bridges and culverts, shall be kept to a minimum number and designed to withstand seasonal high water and flooding and to prevent obstructions to the migration of anadromous and resident fish.

6 AAC 80.100. MINING AND MINERAL PROCESSING. (a) Mining and mineral processing in the coastal area, including but not limited to the development of mineral resources extracted in tidal rivers, coastal waters, and on continental shelves of the open sea, and found in surface, subsurface, and aqueous deposits, shall be sited, designed, and conducted so as to:

(1) avoid adverse impacts on the resources and habitats identified in sec. 130 of this chapter; and

(2) be compatible with adjacent uses and activities, local community goals and desires, and regional and statewide needs.

(b) Mining and mineral development in the coastal area shall conform to all applicable air and water quality standards and any rules, regulations, or statues relevant to mining and mineral development conducted in coastal waters.

(c) Extraction of sand and gravel in the coastal area shall meet the following additional standards:

(1) all feasible alternatives, including upland alternatives, have been considered;

(2) extraction takes place only during that portion of the year when it will be least harmful to anadromous fish, marine fish, shellfish, mollusks, and marine birds and mammals affected by the extraction;

(3) extraction on marine beaches or offshore dune systems may not initiate or increase significant adverse erosion or deposition; and

DRAFT

(4) sand or gravel may be removed from estuaries only in areas of active shoaling, provided the shoal is not critical marine habitat. Only the accreted material may be removed.

6 AAC 80.110. AIR, LAND AND WATER QUALITY. Coastal resource districts and state agencies shall use and apply all applicable provisions of 18 AAC, Environmental Conservation, to maintain high standards of air, land, and water quality in the coastal area.

6 AAC 80.120. SUBSISTENCE. Coastal resource districts and appropriate state agencies shall recognize and assure subsistence usage of coastal areas and resources.

ARTICLE 3. RESOURCES AND HABITATS

Section
130. Resources and Habitats

6 AAC 80.130. RESOURCES AND HABITATS. (a) Natural resources and habitats in the coastal area that are subject to the Alaska Coastal Management Program include but are not limited to the following:

(1) offshore areas, including the submerged lands and waters seaward of the coastline extending to the continental shelf break;

(2) estuaries, including semi-enclosed bodies of water having an opening to the sea and containing greater than 0.5 ppt of salt, including but not limited to river mouths, deltas, fjords, inlets, bays, and tidewater glaciers;

(3) wetlands and tideflats, including lands shallowly submerged by water and characterized by vegetation complexes consisting primarily of sedges, rushes, and grasses; coastal wetlands are not strictly limited to the zone inundated by tides and are characterized by coastal marshes which generally have an extensive freshwater zone in the higher area and a tidally influenced saltwater zone in the lower area;

(4) rocky islands and seacliffs, including islands of predominantly volcanic or tectonic origin with rocky shores and steep faces, offshore rocks, capes, and steep rocky sea fronts;

(5) barrier islands and lagoons, including depositional coastal environments formed by deposits of sediments offshore which form a barrier of low-lying islands and bars protecting a salt-water lagoon with a free exchange of water to the sea;

DRAFT

(6) exposed high energy coasts, including relatively featureless sections of the coastline with direct exposure to ocean generated wave impacts and usually characterized by mixed sand and gravel beaches and an active surf zone;

(7) rivers and lakes; and

(8) coastal uplands, including those upland areas having a direct or significant impact on the coastal area.

(b) Coastal resource districts and appropriate state agencies shall identify and plan for the management of the resources and habitats listed in (a) of this section. The following are the standards which apply to the management of these resources and habitats:

(1) offshore areas - maintain the capacity of offshore areas to support anadromous fish, marine fish, shellfish, marine birds, marine mammals, and supporting species;

(2) estuaries - maintain the capacity of estuaries to support anadromous fish, marine fish, migratory birds, marine birds, mammals and supporting species; maintain adequate water flows and oxygen levels where fish populations overwinter; prohibit the discharge of toxic wastes and materials into estuaries in the winter;

(3) wetlands and tideflats - maintain wetlands habitat for migratory birds, anadromous fish, big game, small mammals, and supporting species;

(4) rocky islands and seacliffs - maintain the availability and quality of rocky island and seacliff breeding habitat for marine mammals, seabirds, and supporting species; avoid harassment, pollution, or the introduction of unnatural predators;

(5) barrier islands and lagoons - maintain the flow of sediments and water; prevent the alteration or redirection of wave energy; prevent the filling in of lagoons or the destruction of barrier islands; discourage activities which may cause polar bears to avoid denning on barrier islands;

(6) exposed high energy coasts - avoid the dumping of materials toxic or harmful to marine life, including but not limited to larvae and juvenile stages of crabs, shrimp, and razor clams, marine fish, and supporting species;

(7) rivers and lakes - maintain the capacity of rivers and lakes to support anadromous fish, migratory birds, small mammals, big game, and supporting species; and

DRAFT

(8) coastal uplands - maintain upland bird and big game populations.

ARTICLE 4. AREAS WHICH MERIT SPECIAL ATTENTION

Section
140. Areas Which Merit Special Attention

6 AAC 80.140. AREAS WHICH MERIT SPECIAL ATTENTION. (a) Coastal resource districts and appropriate state agencies shall recommend to the Council areas to be designated as areas which merit special attention.[3] Recommendations shall include the following information:

(1) the basis or bases for designation pursuant to AS 46.40.210(1) or (c) of this section;

(2) a map showing the geographical location, surface area and, where appropriate, bathymetry of the area;

(3) a description of the area which includes dominant physical and biological features;

(4) the existing ownership, jurisdiction, and management status of the area, including existing uses and activities;

(5) the existing ownership, jurisdiction, and management status of adjacent shoreland and sea areas, including existing uses and activities;

(6) present and anticipated conflicts among uses and activities within an adjacent to the area, if any;

(7) a proposed management scheme, consisting of the following:

(A) a description of the uses and activities which will be considered proper and the uses and activities which will be considered improper with respect to land and water within the area;

(B) a summary or statement of the policies which will be applied in managing the area; and

(C) an identification of the authorities which will be used to implement the proposed management scheme.

3. "Areas which merit special attention" is defined in AS 46.40.210(1).

DRAFT

(b) The Council will designate and establish management schemes for areas which merit special attention. Approval of a district coastal management program which recommends designation of an area pursuant to (a) of this section constitutes a Council designation.

(c) In addition to the categories contained in AS 46.40.210(1), areas which merit special attention may include the following:

(1) areas important for subsistence hunting, fishing, food gathering, and foraging;

(2) areas with special scientific values or opportunities, including but not limited to those where ongoing research projects could be jeopardized by development or conflicting uses and activities; and

(3) potential estuarine or marine sanctuaries.

(d) Management schemes for areas which merit special attention shall preserve, protect, enhance, or restore the value or values for which the area was designated.

DRAFT

procedural steps

CHAPTER 85 GUIDELINES FOR DISTRICT COASTAL MANAGEMENT PROGRAMS

Section
10. Program elements
20. Submittals to Council
30. Public involvement
40. Coordination and review

6 AAC 85.010. PROGRAM ELEMENTS. Each district coastal management program shall include the elements listed in this section.

(1) A statement of the district's overall needs, objectives, or goals, or the district's comprehensive land and resource use plan.

(2) A description of the district's administrative structure. This structure shall be sufficient for program development and implementation. Budgetary and staff needs, and, where appropriate, a schedule for reorganization shall be included.

(3) A map of the boundaries of the coastal area within the district which is subject to the district coastal management program.

(A) Prior to Council approval of the district program, interim boundaries shall be based on Biophysical Boundaries of Alaska's Coastal Zone[1] and shall include the zone of direct interaction and the zone of direct influence but shall exclude the zone of indirect influence.

(B) Final boundaries of the coastal area subject to the district coastal management program may diverge from the interim boundaries providing the final boundaries:

(i) extend inland and seaward to the extent necessary to manage uses and activities that have or are likely to have a direct and significant impact on the coastal ecosystem; and

(ii) include all transitional and intertidal areas, salt marshes, islands, and beaches.

1. Developed by the Alaska Department of Fish and Game, Marine Coastal Habitat Management Program, 1977; available from the Office of Coastal Management, Division of Policy Development and Planning.

DRAFT

specific proposals for land and water uses and activities may be allowed. It shall be the general policy of the coastal resource district to approve specific proposals for land and water uses and activities which are consistent with the district coastal management program. Districts shall utilize existing forums and procedures appropriate for the determination of specific proposals to the greatest extent practicable, including but not limited to forums and procedures related to planning and zoning. Policies, regulations, and procedures shall be consistent with the standards of the Alaska Coastal Management Program contained in 6 AAC 80 and shall meet the following criteria:

(A) comprehensibility, so as to provide for all uses, activities, and areas in need of management;

(B) specificity, so as to allow clear understanding of who will be affected by the district coastal management program, how they will be affected, and whether specific proposals for land and water uses and activities may be allowed; and

(C) enforceability, so as to insure implementation of and adherence to the district coastal management program.

(9) A description of the methods and authorities that will be used to implement the district coastal management program. Methods and authorities must be adequate to insure program implementation. Additional methods and authorities which are required shall be specified. Methods and authorities may include but are not limited to land and water use plans, municipal ordinances and resolutions, including shoreline ordinances, zoning ordinances, subdivision ordinances, and building codes, state and federal statutes and regulations, capital improvements programs, the purchase, sale, lease, or exchange of coastal land and water resources, cooperative agreements, memoranda of understanding, and coordinated permit or project review procedures. Coastal resource districts may enter into cooperative management agreements with parties conducting uses or activities outside of the district in conformity with the Alaska Coastal Management Program and this Title.

(10) Evidence of effective and significant public involvement in program development, pursuant to sec. 030 of this chapter.

DRAFT

6 AAC 85.020. SUBMITTALS TO COUNCIL. (a) During program development, coastal resource districts shall submit brief annual progress reports concerning program development to the Council.

(b) Following approval of the district coastal management program by the Council and adoption of the program by the district, coastal resource districts shall submit brief annual progress reports concerning program implementation to the Council. The Council will review annual progress reports to insure that the district is making adequate progress in complying with the Alaska Coastal Management Act, this Title, and the adopted district coastal management plan.

(c) All significant additions, amendments, and revisions to the district coastal management program shall be submitted to the Council. The Office of Coastal Management shall review proposed additions, amendments, and revisions to determine if Council approval is required. This determination is subject to review by the Council when requested by a council member.

(d) Coastal resource districts shall give conceptual approval to the district coastal management program and significant additions, amendments, and revisions to the district coastal management program prior to their submittal to the Council. Following Council approval, the district shall adopt the program, addition, amendment, or revision.

6 AAC 85.030. PUBLIC INVOLVEMENT. (a) At least two public meetings shall be held within the coastal resource district during coastal management program development to inform the public about and to solicit public comments concerning the program. A brief summary or report of the matters considered shall be prepared by the district and made available to the public following each meeting.

(b) At least 30 days before giving conceptual approval to the district coastal management program or significant additions, amendments, or revisions thereto, the coastal resource district shall give public notice of the proposed action. At least one public hearing shall be held during the period of the notice. At the public hearing, each interested person shall be given the opportunity to present statements, arguments, or contentions, orally or in writing. Districts shall insure that, where necessary, translation into the appropriate Native language is provided. The district shall consider all relevant matter presented to it. A written transcript, minutes, or an electronic recording of the public hearing shall be submitted to the Council as an element of the district coastal management program.

DRAFT

(c) In addition to the requirements of (b) of this section, coastal resource districts shall provide opportunities for public involvement from the beginning in the development of all program elements.

(d) Coastal resource districts shall provide to the public, in a timely manner and in understandable form, information explaining the district coastal management program, the requirements of public participation in program development, how and when the public may participate in program development, and what information is available.

6 AAC 85.040. COORDINATION AND REVIEW. Coastal resource districts shall provide opportunities for coordination and review by federal, state and local governmental agencies and other parties with a significant interest in coastal resources within or adjacent to the district or which are conducting or may conduct uses and activities that have or are likely to have a direct and significant impact on the coastal resource district.

DRAFT

--referred to in 6 AAC 80.060--

Policies of the State of Alaska Concerning the Onshore and Nearshore aspects of OCS Development[1]

Policy 1. Optimum location. The state shall ensure that the siting of major onshore and nearshore petroleum-related[2] facilities minimizes adverse environmental and social effects while satisfying industrial requirements. Where possible, siting decisions will not foreclose other land and water uses.

1a. Preliminary siting criteria. The state shall develop preliminary siting criteria for major nearshore and onshore petroleum-related facilities.[3] These criteria should consist of basic siting considerations that would capitalize on the public benefits of OCS development and reduce its adverse effects.

1b. Information needs for evaluating proposals. In order to adequately evaluate major development proposals, the state requires from developers at least the information listed in Table 5.2.[4]

Policy 2. Consolidation. Major petroleum-related facilities shall be consolidated to the maximum extent feasible unless consolidation produces greater adverse environmental or social consequences.

2a. Planning provisions. The state shall encourage industrial facility planning that allows for reasonable expansion and offers adequate assurance that other operators and necessary support industries could share the facility.

2b. Exceptions. Consolidation of onshore facilities shall be discouraged if the capacity of existing facilities cannot be expanded in an environmentally and socially acceptable way. Instances when this might occur include, but are not limited to, the following:

(1) Affected communities oppose the expansion of existing facilities.

1. As adopted by the Alaska Coastal Policy Council 01/13/78.

2. Major nearshore and onshore petroleum-related facilities include: a) marine service bases; b) air transport facilities; c) pipelines and rights-of-way; d) separation, treatment and storage facilities; e) LNG plants; f) transfer terminals related to petroleum production; g) concrete platform fabrication yards; h) refineries; and i) petrochemical plants.

3. Table 5.1, Appendix A.

4. Appendix B.

(2) Additional harbor activities would seriously jeopardize marine safety.

(3) Water supply is insufficient for future demand.

(4) Environmental protection measures (e.g., ballast treatment facilities and solid waste disposal sites) at existing facilities could not be expanded to handle new loads.

(5) Air and water quality problems would be compounded to a point where projected environmental degradation would exceed allowable air and water quality standards.

Policy 3. Compatibility. Industrial and commercial use of land shall be compatible with adjacent uses, projected community needs and high standards of environmental quality.

Policy 4. Concurrent use, reuse, conversion and removal. The state shall encourage the concurrent use of petroleum-related facilities for other economic or public uses if possible, the reuse or conversion of these facilities when no longer needed for petroleum-related activities, and the removal of the facility if it cannot be used for other purposes. The state shall further encourage reclamation and restoration of disturbed areas upon termination of active use.

4a. Study possibilities. The state shall investigate possibilities for concurrent use, reuse and conversion of petroleum-related facilities and incorporate these findings in state land use, economic and public facility planning.

4b. Lease stipulations. Where appropriate, the state will specify concurrent use, reuse, conversion or removal of facilities as stipulations on leases of state uplands, tidelands, submerged lands and shorelands. The state shall also require reclamation or restoration of distrubed areas upon termination of active use on these lands.

Policy 5. Protection of environmental quality. The state shall in all cases consider the effect of development upon: a) vulnerable or unique populations and habitats, b) renewable resources having a high commercial, recreational, cultural and/or aesthetic value, c) areas of high biological productivity and/or diversity, and d) areas of high development hazard. The effect of development on these features of the natural and human environment must be considered in determining optimum locations of development activities (Policy 1), appropriate design of facilities, and compatibility of the proposed development with maintenance of a high level of environmental quality (Policy 3).

5a. Sensitive areas. The state shall protect ecologically sensitive areas, including but not limited to: estuaries, wetlands river deltas, fish spawning grounds, intensive use habitat, bird nesting areas, waterfowl and shorebird staging areas, migration routes, wildlife wintering habitat, and sea mammal rookeries and hauling out grounds, by requiring environmentally acceptable technology or, if necessary, recommending alternate sites.

5b. Facility design. These state shall encourage design, construction, and operation of facilities to maintain a high level of environmental quality through, for example:

(1) use of existing facilities and consolidation of new facilities;

(2) minimizing dredge and fill, clearing, and other surface alteration;

(3) use of environmentally safe technology;

(4) adherence to Alaska's environmental protection laws and regulations pertaining to air quality, water use, water quality and solid waste disposal;

(5) proper burial of submarine pipelines, particularly in trawling areas;

(6) operation of helicopters at sufficient altitudes above seabird colonies and other noise-sensitive habitats to minimize disruption; and

(7) reclamation or restoration of disturbed areas upon termination of active industrial use.

Policy 6. Shoreline development. The state shall encourage reservation of the shoreline for water dependent or water related uses.

Policy 7. Resident employment preferences. Alaskan residents shall receive preference for employment. Resident employment preference shall apply to retention as well as hiring.

7a. Voluntary agreements. The state will encourage the petroleum industry and related companies to adopt resident employment preference policies.

7b. Lease stipulation. As a stipulation on all state leases, the state will require that employment preference be given to Alaskan residents.

Policy 8. Manpower training. The state shall encourage manpower training programs that would qualify the existing resident labor force for jobs in the petroleum industry.

Policy 9. Public costs. Public costs resulting from OCS-related activities shall be shared by state and local governments, the federal government, the petroleum industry and other private developers.

Policy 10. Public facilities. The state shall promote full use of public facilities[5] while ensuring high standards of public service.

10a. New facilities. Before the state plans, funds or constructs new public facilities, they must be justified by the level of economic activity and stable population growth expected through at least the production phase of OCS development.

10b. Temporary facilities. The state shall encourage temporary means of expanding public facilities to handle increased demands of a temporary nature.

Policy 11. Public services. The state shall provide new or expanded public services[6] in a timely fashion.

Policy 12. Public information and opinion. Early in the OCS development process the state shall inform the public about OCS development and obtain public opinion on industrial growth and technological options.

12a. Attitudinal surveys and workshops. The state will encourage and participate in the dissemination of public information on OCS development and the conduct of attitudinal surveys and workshops early in the OCS development process.

12b. Local coastal management programs. The state will encourage the development of local coastal management programs in OCS-affected coastal communities. An approved local coastal management plan will be recognized as an expression of community views regarding industrial growth.

5. Public facilities include, but are not limited to, sewerage and water systems, ports, airports, roads, schools and hospitals.

6. Public servies include, but are not limited to, education, health care, child care, planning, manpower training, social services, and the criminal justice system.

DRAFT

12c. Orientation of non-resident employees. The state will encourage development companies to conduct orientation programs for non-resident employees on community values and the results of attitudinal surveys to minimize misunderstandings between temporary residents and permanent members of a community.

Policy 13. Local management. The state shall seek to strengthen local planning, fiscal and management roles, including human resources planning and program development. The state shall also offer assistance to communities in coping with the adverse effects of development.

13a. Technical assistance. The state will assist communities in directing growth according to local preferences. In rendering assistance, the state will emphasize consideration of state-wide, regional and minority interests.

13b. State land disposal. The state will to the maximum extent feasible lease, sell or exchange state land in the vicinity of existing communites: a) if such actions enhance local control over development and the site satisfies the state's siting criteria; and b) an approved municipal plan establishes the desirability of expansion onto state-owned parcels and provides for phased growth. Although local preference is a significant factor in deciding whether to lease, sell or exchange state land near existing communities, it is not the only factor. Additional considerations are specified in the Alaska Statutes and Administrative Code.

Policy 14. State-local coordination. Where a community makes a concerted effort to develop and act on its position regarding OCS development, the state shall adapt its actions (e.g. capital investments, leasing, permit issuance) to community preference to the extent that such actions also respect state-wide, regional and minority interests.

Policy 15. Coordination among state agencies. The state shall seek to coordinate at the outset the actions of all state agencies that must eventually act on major development proposals.

15a. Interagency review. The A-95 Clearinghouse should coordinate review of major state actions related to development of the outer continental shelf.

15b. Major state actions. The state shall establish a process through which all major state actions regarding OCS development are coordinated.

15c. Information exchange. The state shall establish a system for improving the transfer of information among state agencies and between them and the public.

Policy 16.. State-federal coordination. The state shall seek to coordinate state and federal development decisions.

16a. Pipeline transportation plan. The state should prepare a comprehensive plan regarding pipeline trasportation and encourage the participation of appropriate federal agencies (e.g., FPG, ICC, BLM, Department of Transportation).

16b. Coastal management. The state's OCS policies will be incorporated into the state's coastal management program. When Alaska's coastal management program receives federal approval, these policies will significantly influence federal coastal decisions.

Policy 17. Cooperative management and development. The state shall seek to cooperate with landowners, developers and government agencies in the development and management of OCS-related onshore facilities.

DRAFT

APPENDIX A

TABLE 5.1

PRELIMINARY SITING CRITERIA
FOR
MARINE SERVICE BASES
OIL TERMINALS
LNG PLANTS

Onshore vs. offshore. Site facilities onshore until alternatives offshore are proven safe and environmentally acceptable.

Expansion. Select sites with sufficient acreage to allow for reasonable expansion of facilities. (1)

Infrastructure. If possible, site facilities where existing infrastructure (e.g., roads, docks, airstrips) is capable of satisfying industrial requirements. (1)

Navigational safety. Avoid harbors and shipping routes with reefs, shoals, drift ice, and other obstructions that might jeapordize safe navigation.

Site preparation. Select sites where development would entail minimal site clearing, dredging, and construction in productive wetlands, estuaries, deltas, and other sensitive areas. (1)

Tsunami. Site fuel, crude oil, and LNG storage tanks at elevations sufficiently above mean sea level to escape the highest tsunami run-up.

Pipelines. Align pipelines away from active faults and areas of subsidence.

Shipping routes. Site oil terminals so as to minimize the probability of oil spills affecting fishing grounds and spawning grounds.

Fire and explosion. Site fuel, crude oil and LNG storage and transfer areas downwind from populated areas to reduce the hazard of fire and explosion to human populations.

Resource protection. Site facilities so that unique environments and areas of particular scenic, recreational, and cultural value will be protected.

Water quality. Site facilities in areas of least biological productivity, diversity, and vulnerability, and where effluents and spills can be controlled or contained easily.

DRAFT

Air quality. Site facilities where winds and air currents freely disperse pollutants, thereby reducing their concentrations.

Compatibility. Select sites designated for industrial purposes or well separated from residential, commercial, and institutional land uses, where industrial traffic will not pass through population centers, and vessel movements will not result in overcrowded harbors or interfere with fishing operations and equipment.

---

(1) Application of site preparation, expansion and infrastructure criteria requires basic information on harbor dimensions, acreage and infrastructure needs.

	SERVICE BASE	OIL TERMINAL	LNG PLANT
Harbor depth (ft. below MLLW)		-----	-----
Access channel	20	66	46
Turning basin	19	61	42
Berthing area	18	58	40
Turning Basin (diameter in ft.)	420-840	2,000-4,000	2,100-4,200
Level land near waterfront (ac.)	4-20 (1-2 berths) 63-88 (10 berths)	70-500	40-500
Infrastructure

Dock (ft.)	200-2,000	1,000	1,000
Road network connecting dock, airstrip and community	yes	yes	yes

APPENDIX B

TABLE 5.2

INFORMATION NEEDS

1. Type of facility proposed, e.g., service base, marine terminal, LNG plant.

2. Location of all facilities and activities associated with or expected to be attracted to the proposed development, e.g., helicopter operations, construction camps, motels.

3. Description of proposed facility, e.g., acreage, site plans.

4. Expansion: probability of additional demand on the proposed facility in the future; provisions for expansion and sharing of the facility with other companies.

5. Schedule: proposed construction schedule and anticipated operational timetable over the life of the facility, e.g., type and level of seasonal activities, anticipated years of peak usage.

6. Land status and ownership of development site and other land affected by the proposal, e.g., private, public, unpatented, in litigation.

7. Management of the project, e.g., an oil company, a Native corporation, joint management.

8. Contractors and subcontractors for all or portions of the project.

9. Resource requirements: quantities and probable sources of power, water, gravel, and other materials.

10. Transport: frequency and routes of boat and aircraft movements and expected level of vehicular traffic in the region resulting from construction or operation of the facility.

11. Employment: anticipated number of persons to be employed by job description, tenure (permanent/temporary), and place of employment.

12. Population: approximate addition to the population of Alaska by place.

13. Public services: extent of need for and means of providing public services, e.g., roads, sewers, water, solid waste disposal, medical care, police and fire protection, and other health and social services.

14. Environmental implications: potential environmental benefits,

DRAFT

conflicts and mitigative measures, particularly concerning solid waste management and air and water quality.

15. Siting and design features to compensate for natural processes (e.g., floods, earthquakes, storms, erosion and sedimentation), to provide for safe and effective management of sewage and solid waste; and to minimize noise and visual impacts.

16. Economic implications, e.g., public cost and revenues resulting from the proposed project; potential conflicts with existing industry; anticipated expenditures by Alaska by place.

17. Social implications, e.g., training programs, local hiring policy, housing.

18. Arrangements for reducing environmental, economic, and social conflicts, e.g., traffic control systems, oil spill contingency plan, compensation plan.

19. Alternative sites for the required facilities and operations, and reasons for rejecting alternative sites.

Frances A. Ulmer, Co-Chairman
Alaska Coastal Policy Council
Office of Coastal Management
Division of Policy & Development & Planning
Pouch AP
Juneau, Alaska 99811

Dear Ms. Ulmer:

The Legislative Committee of the Alaska Association of REALTORS welcomes this opportunity to make a few general and specific comments regarding the proposed regulations concerning the Alaska Coastal Management program.

Under the Coastal Zone Management Act, the state is beginning to "engage in comprehensive land and water use planning in coastal areas..." or to put it in plain words, to institute additional controls on the use of land in the "coastal area."

Often in the drafting of statutory regulations and in the formulation of land use planning controls, many people in government feel that is not necessary or desirable to "dot all the i's and cross all the t's." This bureaucratic vagueness allows great leeway for administrative interpretation which may or may not be beneficial to the public and is greatly dependent upon the individual who is enforcing and defining the regulations.

In response to the notice of this hearing, we had hoped to be able to examine the proposed regulations and offer comments on those requirements that were to be placed on the various districts as they developed their individual management programs. In short, what could be required of the districts, how it was to be implemented and what areas were to be included. It would appear that the public is in a position of "waiting for the other shoe to drop" or perhaps "waiting for the sword to fall." GAAC 80.010 (c) the council will make available.... in understandable form....(1) a guide for the development of district coastal management programs; (2)comprehensive policies....(3) maps and narratives describing the physical and biological characteristics of coastal areas to be used in establishing boundaries.

GAAC 80.020(e) The council will prepare a manual of standards for the management of land and water uses in the coastal area to assist in the development of district and state agency plans.

It is our opinion that the above missing documents constitute the "standards and guidelines" mentioned in the notice for these public hearings and that without them neither the public, nor any legislative

REALTOR® is a registered mark which identifies a professional in real estate who subscribes to a strict Code of Ethics as a member of the NATIONAL ASSOCIATION OF REALTORS®

review committee can fathom what the council will be requiring of the districts.

GAAC 80.040 Geophysical hazard areas. Who is to have the final say in the designation of these areas, a state agency, the local district governmental unit or the council? In the event that "development or related activities" are proposed in a hazard area, to whom does the owner apply for approval of his "siting, design and construction measures?"

Chapter 85

At this stage of the process we, and we're sure many others, hoped to be able to define what areas you are intending to control. In GAAC 85.010(3)(A), it states that the "interim boundaries shall be based on biophysical boundaries of Alaska's coastal zone and shall include the zone of direct interaction and the zone of direct influence", as shown on the referenced fish and game maps. In as much as these are only the interim boundaries, we will not go into detail on the amount of area that will be controlled by whatever standards, guidelines and policies you will be formulating in the future. We must make a comment on the fact that few people outside of the government are aware that within these interim boudaries lies the coastal city of Palmer, the major portion of the Anchorage Bowl (all land to the 1,000' contour level), the Susitna River basin up to and including Devil's Canyon, approximately 80% of all habitable land on the Kenai Peninsula, and what appears to be all the land on Kodiak Island with the exception of the mountain tops, etc. etc. etc.

GAAC 85.010(3)(B)(i) states that "final boundaries...may diverge from the interim boundaries providing the final boundaries: extend inland and seaward to the extent necessary to manage uses and activities that have or are likely to have a direct and significant impact on the coastal ecosystem". We find no definition section in the proposed regulations for any of the terms used in the regulations. "Coastal ecosystem" should be defined so that districts can be assured that their individual programs are encompassing those areas which the council feels should be controlled. The public is not served when a district adopts a program only to have it rejected by the council because it does not restrict uses in areas the council feels should be restricted, and equally important, the citizens within a district should be able to tell whether the proposed local program is more encompassing than that mandated by the council.

We feel that the council should look at defining regional areas where individual districts will impact the same coastal areas. A framework could be set up for coordination of individual district programs in the formative stage prior to each district approving a program and sending it to the council.

There is one change that we would propose that the council adopt. There appears to be an attempt lately to obtain public input and public involvement in government. Our proposed wording would enable the council and the districts to achieve more input from the affected public and would give the public due notice of actions which directly involve them. We suggest that GAAC 85,030(b) be amended by adding a new third and fourth sentence....

during the period of the notice. ANY PROPERTY OWNER WHOSE RIGHT TO USE OF HIS LAND WILL BE DIMINISHED BY ADOPTION OF THE PROGRAM, MUST BE INDIVIDUALLY NOTICED BY MAIL AT LEAST 14 DAYS PRIOR TO THE HEARING. THE NOTICE SHALL FULLY EXPLAIN THE DIMUNITION IN USE HE WILL SUFFER UPON ADOPTION OF THE PLAN, at the public....." Most governmental units notice individual property owners if a change in use of their or adjoining properties is proposed. If a person owns 80 acres on the banks of the Susitna River which he can subdivide now and upon adoption of the program he will not be allowed to subdivide, he should be informed prior to the action being taken. If a person has a 2½ acre homesite where he is now planning to build a home or cabin and the program would preclude construction, he should be told. If someone has a piece of land in Kodiak where, under existing ordinances he can develop a condominium project or apartment house and under the proposed district program he would be precluded from that construction, he should be made aware.

The council has developed very definitive policies concerning the off-shore and near shore aspects of OCS development and criteria in appendix A & B. In GAAC 80.090, timber harvest and GAAC 80.100 mining and mineral processing, there is much substance for those who are concerned in those areas to address. But as to the impact these regulations will have on the individual property owner, not concerned with oil, minerals or timber, they are sadly vague.

Sincerely,

ALASKA ASSOCIATION OF REALTORS

Re: Proposed Adoption of Regulations of the
Alaska Coastal Policy Council

Gentlemen:

Our organization has briefly reviewed the proposed regulations and noted in particular the lack of time offered the general public for review and comment. The hearings commenced February 15th, were concluded on March 4th, and have a cut-off date of March 6th for comments to be considered. In other words, only two days have been provided from conclusion of the hearings to cessation of public input. The coordinators of the program have stressed the need for public participation, but in reality have not provided sufficient time for the public review and comment. We are, of course, aware of opportunities for early comment in public meetings held, for example, at Juneau, Kodiak, and Anchorage. Members of our association did attend the Juneau and Anchorage meetings, but quite frankly the issues were not well drawn, and the meetings were not well enough organized to provide for meaningful public comment.

The proposed regulations will have an immense and serious impact to the preservation, use, and development of all of Alaska's lands and resources. The non governmental working public will be tremendously affected by the impact of these regulations. We contend that under these circumstances, additional time for review of impacts and in-depth consideration of the guidelines is not only necessary, but a requisite of the federal requirements which provide funding for the programs.

Even without the time for a thorough review, we have noted what appears to be inconsistencies and omissions. These are explained briefly in subsequent paragraphs.

The guidelines will impact the environment and economic well being of interior Alaska due to effects, as examples, on transportation and water quality. Furthermore, because of the vague definition of Coastal Zone, some interior communities may be directly affected. However, no hearing notifications or other attempts have been made to advise interior communities of the regulations, or probable impacts. Because of this serious omission, we would question the propriety and possibly legality of approving the regulations at this time.

The guidelines do not contain a definition of terms. Although some terms are defined in the text, it is not certain if they apply generally. Many of the terms and phrases used in the guidelines are not adequately defined, could have dual meaning, thus be left open to misenterpretation. Examples of some of the terms requiring definition include (1) Coastal Zone; (2) Consistency; (3) Water-dependent; (4) Navigation, national and statewide; (5) Navigation; (6) Minimization; and (7) subsistence. Many of these terms require definition to allow meaningful interpretation before impacts and implication of the guidelines can be assessed.

One of the purposes of the original legislation was to provide for participation of the local governing bodies in the planning and management of the Coastal Zone. The guidelines do not appear to adequately address this issue. Although it may be argued that local membership on the council satisfies this requirement, the extent of the region and dilution of local authority by other numbers mitigates local control. The guidelines should be more specific in defining local participation and how this interacts with state and federal jurisdictions, management, and control.

The guidelines refer to local agency control of the coastal region being vested with the Office of Coastal Management. However, the guidelines do not define responsibilities of this agency, or other state agencies concerned with land and resource management. A cursory review indicates that some 14 state agencies, 21 major federal agencies, all the organized boroughs, and numerous communities will be directly affected by various activities set forth in the guideline. However, the guidelines do not confirm any guideline methods for intergovernmental involvement. A review of this complex involvement is needed in order to meet the specificity alledged in the guidelines. Furthermore, agency responsibilities should be closely defined.

Environmental concerns and other attributes affecting development are referenced in the guidelines. But no mention is made to consideration of employment or economic well being. This omission has very serious implications insofar as both coastal and interior communities are concerned and constitutes a major deficiency of the guidelines.

The guidelines do not provide for timely administration or penalties for inordinate administrative delays by state and federal agencies. Administrative delays are historical in Alaska and must be avoided if local needs are to be satisfied. The guidelines should address this issue specifically.

We are certain many other unanswered questions will arise with comprehensive review of the guidelines. Again, however, additional time is needed to assess the impact of the guidelines and determine their compatibility with existing agency responsibilities, statutes, regulations, and policies.

We appreciate the opportunity of expressing our concerns, but again stress the shortness of time for public review and request a minimum 60-day extension prior to approval.

Sincerely,

C. C. Hawley

Borough raises objections over coastal zone draft

KODIAK DAILY
MIRROR
FEBRUARY 21,1978
PAGE ONE

The borough has objected to language in the Alaska Coastal Management program standards which could be interpreted to leave ultimate control for coastal management in Juneau rather than in local areas.

Borough planner Harry Milligan objected forcefully at last night's public hearing on the final wording of the draft of the standards and guidelines, to language in the proposed document which would give the state the final say in several areas.

Several regulations which allowed for final "approval" by the state were cited.

"We want it clearly understood," Milligan said "that if a district prepares a plan which is consistent with guidelines, the council shall adopt that plan as submitted."

Alaska Coastal Policies Council associate planner Judith Anderegg of Juneau said in a telephone interview today "a lot of communities are concerned about this whole issue of state and local control in this act."

At the hearing last night Mrs. Anderegg did not respond to Milligan's objections, however, today she said some areas of the act are "too strongly worded in favor of state control."

She said there is a lot of room for local control explaining that the whole intent of the act and legislation is for local communities to do local planning.

Milligan said his reasoning behind the changes he suggested in the language of the final draft was "to take the politics out of the act."

During the meeting last night, which had a small attendance, was moderated by a panel including Mayor Betty Wallin, a member of the Alaska Coastal Policies Council; borough assemblyman Dr. Michael Emmick, of Port Lions and Anderegg.

Mrs. Wallin, in response to an objection by Milligan to an item on subsistence in which he said more specificity was needed, told the gathering that the council was waiting to get more comments from the local areas before drafting a final policy on subsistence.

Ole Harder, a local fisherman, commented on subsistence that "it has to be so Fish and Game can shut it down if necessary. It should be left so the department can say no because the run cannot afford it."

Anderegg answered that "Fish and Game's authority would not be superceded by anything in these regulations."

Mrs. Anderegg, who also served on a moderating panel for the Juneau public hearing on the final draft, reports that both Kodiak and Juneau have offered "very helpful comments."

The staff feels that the communities are making very worthwhile comments," she said.

Dale Tubbs, a borough retained land management consultant, told the Mirror last week that the regulations as drafted, depending on how they're interpreted could take final control for coastal management out of the local areas and put them in Juneau.

"There's a battle going on now," Tubbs said, "and they're going to try and hold the control in Juneau."

Sen. Kay Poland, reached at her home in Juneau yesterday, commented, "If people are lazy, the bureaucracy will always take over."

Poland, D-Kodiak, said that she is on the regulation review committee for coastal management and "I'm sure

(Continued on Page 2)

From page 1

we'll be taking a look at them."

"Those regulations have not been adopted," Sen. Poland said. "They will also be looked at by the community and regional affairs committees in both the house and senate," she said.

The final drafts of the standards and guidelines will be given final review by the council at a meeting in Juneau on March 30 and 31, Mayor Wallin said.

All comments gleaned from the public hearings held in coastal communities throughout the state will be included in the draft before final consideration by the council, she said.

The coastal mangement guidelines and standards were developed by the state in compliance with a federal act relating to the management of coastal resources of the state.

The standards which are being drafted to include local suggestions from two series of public hearings, one series last fall to gather the public views and a second series, in progress now

TO: Community and Regional Affairs Committee Members

FROM: Lisa Rudd, Chair

RE: HCR 125 - Coastal Zone Management Regulations

I have asked that HCR 125 (approving coastal management guidelines and standards) be returned to our committee. I was not aware, at the time we approved the resolution, that the Attorney General's office review of the guidelines and standards had not been completed.

The Attorney General's office has now completed its review, and has made some changes in the regulations. Most of the changes are extremely minor (capitalizations and changes in word order, etc.), but one or two are more substantive. I would like the committee to review the changes.

Attached are the regulations, with the changes indicated in handwriting and underlining.

Also attached is a letter from the Coast Guard which I received after we passed out HCR 125. The committee may wish to address some of their concerns in the letter of intent.

We will meet on Wednesday, May 17th at 9:00 a.m. to reconsider HCR 125.

DEPARTMENT OF TRANSPORTATION
UNITED STATES COAST GUARD

MAILING ADDRESS:
Commander (dpl)
17th Coast Guard District
P. O. Box 3-5000
Juneau, Ak 99802
(907) 586-7355

16000
1 MAY 1978

Honorable Lisa Rudd
State of Alaska House of Representatives
Pouch V
Juneau, AK 99811

Dear Ms. Rudd:

The Coast Guard appreciates the opportunity to correspond with your committee concerning the 13 April 1978 Standards and Guidelines for Alaska's Coastal Management Program (ACMP). These Standards and Guidelines represent a considerable departure from the previous drafts on which the Coast Guard was allowed to comment. The Coast Guard feels that this version of the Standards and Guidelines is severely deficient in the areas of participation, specificity, and priority of uses.

Participation. The Office of Coastal Zone Management in Alaska has attempted to provide federal agencies with the opportunity to participate in the development of Alaska's program. Section 923.51 of the federal regulations requires, however, that the State "provide for federal agency input on a timely basis." The Coast Guard feels that the State has been deficient in this regard due to the shortness of time allowed for agency comments between successive drafts of the Standards and Guidelines. This is the sixth occasion in the last six months that the Coast Guard has commented on a different draft of this document. This rapidity of drafts has not allowed sufficient time for coordination between the various agencies of the Department of Transportation, nor the opportunity to carefully evaluate the content of the Program. Furthermore, this "final" version of the Standards and Guidelines was approved by the Council and submitted to the legislature without an opportunity for federal review, even though it differed substantially from previous drafts. Written comments have yet to be received by the Coast Guard addressing our stated concerns. The Coast Guard feels therefore that this past history of short lead times for response combined with the lack of formal feedback from the State does not meet the federal requirements for participation.

Section 306(c)(1) of the Coastal Zone Management Act requires federal agency participation in the development of the Program at an early stage in the process. The Coast Guard recommends that a provision for this participation be included in section 6 AAC 80.020 of the Standards.

The Coast Guard has commented on several occasions that a mechanism is needed for government participation at the district level in the development of the local plans. The Coast Guard is concerned that each district may develop its own mechanism for government participation and then cite compliance or non-compliance with this mechanism as evidence of government participation. Because the actual decision concerning adequacy of participation will be made at the State level by the Council, the Coast Guard feels that it is very important that a well developed State mechanism for participation be defined as part of the ACMP. If this accomplished, the process will not vary from district to district and all parties will have a clear understanding of their responsibilities and opportunities. It is therefore recommended that Section 85.100 be expanded to detail exactly when, where, and how government agencies will be allowed to participate in the development process.

Priority of Uses.

Section 923.13 of the federal regulations requires that the State must: "(1) Identify what constitute uses of regional benefit; and (2) identify those methods that shall be used to assure that unreasonable restrictions or exclusions of such uses by local land and water use regulations shall not occur." The Coast Guard finds no mention of regional benefit, national interest, or defense considerations in the Guidelines and Standards. National Defense, including Coast Guard functions and responsibilities such as search and rescue and fisheries enforcement, should be identified in Chapter 80, Article 2 of the Standards as an important priority use of the Coastal Zone. This priority provides the basis for regulating future land and water use, provides a common reference point for resolving potential conflicts, and is important for future acquisition of areas not presently controlled by the Coast Guard.

Section 6 AAC 80.080 of the Standards addresses water based transportation routes. Under the Ports and Waterways Safety Act of 1972, the Coast Guard is authorized to establish vessel traffic services in ports, harbors, and other waters subject to congested vessel traffic. Any district plans dealing with the management and control of vessel traffic should be coordinated with the Coast Guard to insure such plans are compatible with Coast Guard traffic control responsibilities. There is also considerable regional and national interest connected with transportation and these considerations should be mentioned in this section.

Specificity. The present Standards and Guidelines are lacking in specificity and substance and, as a result, the plans developed and implemented by the Alaska Coastal Resource Districts may vary so widely that the Coast Guard may be compelled to operate under as many as 50 different

plans within Alaska rather than under one plan which is implemented by various local government units. This situation would present an unacceptable burden on the Coast Guard and other federal agencies and is therefore considered a serious defect which must be remedied.

The Coast Guard feels that the Standards and Guidelines are deficient in the following areas concerning specificity:

a. The standards and criteria upon which decisions pursuant to the program will be based are not sufficiently specific to provide "(i) a clear understanding of the content of the program, especially in identifying who will be affected by the program and how, and (ii) a clear sense of direction and predictability for decision makers who must take actions pursuant to or consistent with the management program." These provisions are required by section 923.3(a)(2) of the Federal Coastal Zone Management Approval Regulations.

b. Section 923.12(a) requires the States to "develop policies and procedures by which uses determined to be subject to the management program will be permitted, conditioned, modified, and/or prohibited. These policies and procedures regarding management of uses and/or their impacts must be capable of effective implementation at the time of program approval." Alaska's section 6 AAC 85.070 and 6 AAC 85.080 delegates these functions to the districts. This creates a situation where each district's uses and policies may differ and is therefore not authorized under the federal regulations.

The effective implementation required under this section can not occur under Alaska's present Standards and Guidelines. If the State delegates the responsibilities of establishing uses and policies to the individual districts (85.070 and 85.080), and the district policies and uses are not submitted to NOAA with the ACMP (district plans will be developed later), it is impossible to implement meaningful management procedures regarding unknown uses and policies. It is therefore not clear what status the Program will have before the district plans are in place.

c. Section 923.12(e) of the Federal regulations states that "to the extent a state's government program policies are generalized, performance standards that will be used to enforce these policies will need to be sufficiently explicit and specific that persons affected by the management program will have a reasonable understanding of what uses would be permitted in which locations of the Coastal Zone and under what condition." The Coast Guard feels that the Standards are neither explicit nor specific and do not provide the required clear understanding as to what uses are permitted in any location.

The Coast Guard is very interested in coastal zone management and desires to work closely with the State of Alaska in implementing the ACMP. However, the mere opportunity to comment on the various stages of combined plan development when with the lack of response received concerning these comments, can not be considered real participation. The continued failure of the State to react to the concerns expressed herein is viewed as a matter of concern and is considered a serious continuing deficiency under the federal regulations. I am hopeful that these defects can be corrected before the ACMP is sent to NOAA, and am looking forward to continuing interaction with the State in coastal zone matters.

Sincerely,

J. B. HAYES
Rear Admiral, U. S. Coast Guard
Commander Seventeenth Coast Guard District

Roger Allington, Co-Chairperson
Alaska Coastal Policy Council
Office of the Governor

AVRUM M. GROSS
ATTORNEY GENERAL

By:
Arthur H. Peterson
Assistant Attorney General
and Regulations Attorney

Regulations re coastal management guidelines and standards (6 AAC 80 and 6 AAC 85)

We have reviewed these regulations in accordance with AS 44.62.060, and approve them for filing by the lieutenant governor. A duplicate original of this memorandum is being furnished the lieutenant governor, along with your regulations and related documents.

Under AS 44.62.125(b)(6), "waters" has been corrected to read "water" in 6 AAC 80.100(b)(2) and 6 AAC 80.900(7), and "must be" has been corrected to read "are" in 6 AAC 85.070.

We note that a "pre-final" version of these regulations was submitted to the legislature April 7, 1978 and that this final version was delivered to Representative Lisa Rudd May 4; the corrected page 15, but not the three corrections mentioned above, was delivered to her May 5. Representative Rudd's Community and Regional Affairs Committee has favorably reported HCR 125, approving these regulations, but neither house of the legislature has yet voted on the matter. This means that, although all requirements of the Administrative Procedure Act (AS 44.62) have now been met and the lieutenant governor may file these regulations, he will not be able to note the effective date in appropriate places (assuming the constitutionality of the effective-date precondition in AS 46.40.080 and assuming that the word "program" in that section means or includes these regulations). You should make certain that, as soon as the legislature completes action on the matter, this information is relayed to the lieutenant governor.

PART 6.
ALASKA COASTAL POLICY COUNCIL.

Chapter
80. Standards of the Alaska Coastal Management Program
85. Guidelines for District Coastal Management Programs

CHAPTER 80.
STANDARDS OF THE ALASKA COASTAL MANAGEMENT PROGRAM.

Article
1. Government Process
2. Uses and Activities
3. Resources and Habitats
4. Areas Which Merit Special Attention
5. General Provisions

ARTICLE 1.
GOVERNMENT PROCESS.

Section
10. Coverage of chapter [regulations]
20. Public participation and information
30. Program management and coordination

[regulations] [Title] [Guidelines]

6 AAC 80.010. COVERAGE OF CHAPTER. (a) This chapter contains standards for the use of and application by districts and state agencies in carrying out their responsibilities under the Alaska Coastal Management Act (AS 46.40, and AS 44.19.891 -- 44.19.894).

[may be construed]

(b) Nothing in this chapter or in any district program displaces or diminishes the authority of any state agency or local government with respect to resources in the coastal area. Uses and activities conducted by state agencies in the coastal area must be consistent with the applicable district program and the standards contained in this chapter. In authorizing uses or activities in the coastal area under its statutory authority, each state agency shall grant authorization if, in addition to finding that the use or activity complies with the agency's statutes and regulations, the agency finds that the use or activity is consistent with the applicable district program and the standards contained in this chapter.

[Title]

(c) At a minimum, the council will review this chapter annually. (Eff. , Reg.)

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.020. PUBLIC PARTICIPATION AND INFORMATION. (a) The council will provide adequate, effective, and continuing opportunities for public participation from the beginning of the Alaska coastal management program. The council will give notice of when and where opportunities for public participation will be provided before adoption of guidelines and standards, review and approval of district programs and amendments to district programs, and amendments to the Alaska coastal management program.

(b) The council will not approve a district program or significant amendment of a district program unless evidence of significant opportunities for public participation at the district level has been provided.

(c) The council will make available to the public information and educational materials concerning coastal management, in understandable form, including

(1) a guide for the development of district programs;

(2) maps and narratives describing physical and biological characteristics to be used in establishing boundaries of coastal areas;

(3) areas recommended for council designation as areas which merit special attention;

(4) maps showing the distribution and abundance of coastal fish and wildlife species with commercial, recreational, subsistence, or general ecological importance;

(5) an identification of major data and information sources concerning coastal management;

(6) a summary of information regarding coastal regions;

(7) summaries of public hearings and workshops;

(8) films and slide programs;

(9) written material summarizing or explaining the Alaska coastal management program; and

(10) the council's annual report to the legislature.

(d) At public meetings concerning the Alaska coastal management program, the council will insure that, when requested and reasonably necessary, translation into the appropriate Native language is provided. (Eff. , Reg.)

Authority: AS 44.19.893
AS 46.40.040

[where reasonably requested]

6 AAC 80.030. PROGRAM MANAGEMENT AND COORDINATION. (a) The Office of Coastal Management is the designated lead agency for the Alaska coastal management program. The Office of Coastal Management shall

(1) present the staff position regarding matters before the council;

(2) coordinate the activities of state agencies participating in the Alaska coastal management program; and

(3) review state and federal actions for consistency with the Alaska coastal management program, subject to council review.

(b) The council will initiate an interagency program of comprehensive resource management for each geographic region listed in AS 44.19.891(a)(1). Regional programs will

(1) assist the council and districts in identifying uses of state concern and developing management policies for these uses; footnote deleted

(2) provide resource, social, and economic information on a coordinated regional basis; and

(3) assist the council and districts in identifying, avoiding, or minimizing existing or potential conflicts.

(c) Plans and recommendations developed as part of the regional program described in (b) of this section must be transmitted to the district through the Office of Coastal Management. District planning efforts must demonstrate review and consideration of these plans and recommendations. If the final district program proposed does not agree with the regional program plans and recommendations, the differences will be resolved by the council.

(d) The council will prepare a manual of standards for the management of land and water uses in the coastal area to assist in the development of district and state agency programs. (Eff. , Reg.)

Authority: AS 44.19.893
AS 46.40.040

ARTICLE 2.
USES AND ACTIVITIES.

Section
40. Coastal development
50. Geophysical hazard areas
60. Recreation
70. Energy facilities
80. Transportation and utilities
90. Fish and seafood processing
100. Timber harvest and processing
110. Mining and mineral processing
120. Subsistence

6 AAC 80.040. COASTAL DEVELOPMENT. (a) In planning for and approving development in coastal areas, districts and state agencies shall give, in the following order, priority to

(1) water-dependent uses and activities;

(2) water-related uses and activities; and

(3) uses and activities which are neither water-dependent nor water-related for which there is no feasible and prudent inland alternative to meet the public need for the use or activity.

Proposed change from.

(b) The placement of structures and the discharge of dredged or fill material into coastal water must, at a minimum, comply with Parts 320-323, Title 33, Code of Federal Regulations (Vol. 42 of the Federal Register, pp. 37133--47 (July 19, 1977)). (Eff. , Reg.)

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.050. GEOPHYSICAL HAZARD AREAS. (a) Districts and state agencies shall identify known geophysical hazard areas and areas of high development potential in which there is a substantial possibility that geophysical hazards may occur.

(b) Development in areas identified under (a) of this section may not be approved by the appropriate state or local authority until siting, design, and construction measures for minimizing property damage and protecting against loss of life have been provided. (Eff. , Reg.)

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.060. RECREATION. Districts shall designate areas for recreational use. Criteria for designation of areas of recreational use are:

(1) the area receives significant use by persons engaging in recreational pursuits or is a major tourist destination; or

(2) the area has potential for high quality recreational use because of physical, biological, or cultural features.
(Eff. , Reg.)

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.070. ENERGY FACILITIES. (a) Sites suitable for the development of major onshore, nearshore, offshore, and outer continental shelf energy facilities must be identified by the state in cooperation with districts.

(b) The siting and approval of major oil and gas facilities must be based on the policies of the State of Alaska concerning the onshore and nearshore aspects of oil and gas development.

(c) Districts shall consider that the uses authorized by the issuance of state leases for mineral and petroleum resource extraction are [SPECIFIC] uses of state concern. District programs and plans must be consistent with those uses. [SUCH]
(Eff. , Reg.)

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.080. TRANSPORTATION AND UTILITIES. (a) Transportation and utility routes and facilities in the coastal area must be sited, designed, and constructed so as to be compatible with local community goals and desires as expressed in district programs and local comprehensive plans.

(b) Transportation and utility routes and facilities must be sited inland from beaches and shorelines unless the route or facility is water-dependent or no feasible and prudent inland alternative exists to meet the public need for the route or facility. (Eff. , Reg.)

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.090. FISH AND SEAFOOD PROCESSING. Districts shall identify and may designate areas of the coast suitable for the location or development of facilities related to commercial fishing and seafood processing. (Eff. , Reg.)

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.100. TIMBER HARVEST AND PROCESSING. (a) Commercial timber harvest activities in the coastal area must be sited in areas where the management of reforestation, using the best available technology, will result in producing a sustained yield of merchantable timber unless the area is to be converted to a use other than timber harvest.

(b) Commercial timber harvest activities in the coastal area must be conducted so as to meet the following standards:

(1) the location of facilities and the ~~layout of~~ logging systems must be managed so as to minimize potential for adverse environmental impacts;

~~(2) unrestricted fish movement in coastal waters must be assured;~~ and

(3) timber harvest and timber management activities must be planned and implemented so as to protect streambanks and shorelines, prevent adverse impacts on fish resources and habitats, and minimize adverse impacts on wildlife resources and habitats as determined on a case-by-case basis by the Alaska Departments of Natural Resources, Environmental Conservation, and Fish and Game, districts, and appropriate federal agencies.

(c) Commercial timber transport, storage, and processing in the coastal area must be conducted so as to meet the following standards:

(1) onshore storage of logs must be encouraged where compatible with the objectives of the Alaska coastal management program;

(2) sites for in-water dumping and storage of logs must be selected and these activities conducted so as to minimize adverse effects on the marine ecosystem, minimize conflicts with recreational uses and activities, be safe from storms, and not constitute a hazard to navigation;

(3) roads for log transport and harvest area access must be planned, designed, and constructed so as to minimize mass wasting, erosion, sedimentation, and interference with drainage, and must be adequately maintained until they are returned to their pre-road natural drainage pattern (put to bed); and

(4) stream crossings, including bridges and culverts, must be kept to a minimum number, designed to withstand seasonal high water and flooding, and must provide for unrestricted passage of fish.

(d) Upon the effective date of regulations adopted under the authority of forest practices legislation establishing a standard corresponding to a standard in this section the standards in this section will not be applicable.

(Eff. , Reg.)

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.110. MINING AND MINERAL PROCESSING. (a) Mining and mineral processing in the coastal area must be permitted, designed, and conducted so as to be compatible with the standards contained in this chapter, adjacent uses and activities, regional programs, statewide and national needs, district programs, and local comprehensive plans.

(b) Sand and gravel may be extracted from coastal waters, intertidal areas, barrier islands, and spits when there is no feasible and prudent alternative to coastal extraction which will meet the public need for the sand or gravel.
(Eff. , Reg.)

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.120. SUBSISTENCE. (a) Districts and state agencies shall recognize and assure opportunities for subsistence usage of coastal areas and resources.

(b) Districts shall identify areas in which subsistence is the dominant use of coastal resources.

(c) Districts may, after consultation with appropriate state agencies, Native corporations, and any other persons or groups, designate areas identified under (b) of this section as subsistence zones in which subsistence uses and activities have priority over all non-subsistence uses and activities.

(d) Before a potentially conflicting use or activity may be authorized within areas designated under (c) of this section, a study of the possible adverse impacts of the proposed potentially conflicting use or activity upon subsistence usage must be conducted and appropriate safeguards to assure subsistence usage must be provided.

(e) Districts sharing migratory fish and game resources must submit compatible plans for habitat management.
(Eff. ; Reg.)

Authority: AS 44.19.893
AS 46.40.040

ARTICLE 3.
RESOURCES AND HABITATS.

Section
130. Habitats
140. Air, land, and water quality
150. Historic, prehistoric, and archaeological resources

6 AAC 80.130. HABITATS. (a) Habitats in the coastal area which are subject to the Alaska coastal management program include

(1) offshore areas;

(2) estuaries;

(3) wetlands and tideflats;

(4) rocky islands and seacliffs;

(5) barrier islands and lagoons;

(6) exposed high energy coasts;

(7) rivers, streams, and lakes; and

(8) important upland habitat.

(b) The habitats contained in (a) of this section must be managed so as to maintain or enhance the biological, physical, and chemical characteristics of the habitat which contribute to its capacity to support living resources.

(c) In addition to the standard contained in (b) of this section, the following standards apply to the management of the following habitats:

Substituted for "manage" in beginning of sentence.

(1) offshore areas must be managed as a fisheries conservation zone so as to maintain or enhance the state's sport, commercial, and subsistence fishery;

(2) estuaries must be managed so as to assure adequate water flow, natural circulation patterns, nutrients, and oxygen levels, and avoid the discharge of toxic wastes, silt, and destruction of productive habitat;

(3) wetlands and tideflats must be managed so as to assure adequate water flow, nutrients, and oxygen levels and avoid adverse effects on natural drainage patterns, the destruction of important habitat, and the discharge of toxic substances;

(4) rocky islands and seacliffs must be managed so as to avoid the harassment of wildlife, destruction of important habitat, and the introduction of competing or destructive species and predators;

(5) barrier islands and lagoons must be managed so as to maintain adequate flows of sediments, detritus, and water, avoid the alteration or redirection of wave energy which would lead to the filling in of lagoons or the erosion of barrier islands, and discourage activities which would decrease the use of barrier islands by coastal species, including polar bears and nesting birds;

(6) high energy coasts must be managed by assuring the adequate mix and transport of sediments and nutrients and avoiding redirection of transport processes and wave energy; and

(7) rivers, streams, and lakes must be managed to protect natural vegetation, water quality, important fish or wildlife habitat and natural water flow.

(d) Uses and activities in the coastal area which will not conform to the standards contained in (b) and (c) of this section may be allowed by the district or appropriate state agency if the following are established:

[PROVIDING]

(1) there is a significant public need for the proposed use or activity; inserted

(2) there is no feasible and prudent alternative to meet the public need for the proposed use or activity which would conform to the standards contained in (b) and (c) of this section; and

(3) all feasible and prudent steps to maximize conformance with the standards contained in (b) and (c) of this section will be taken.

(e) In applying this section, districts and state agencies may use appropriate expertise, including regional programs referred to in sec. 30(b) of this chapter. (Eff. , Reg.)

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.140. AIR, LAND, AND WATER QUALITY. Notwithstanding any other provision of this chapter, the statutes pertaining to and the regulations and procedures of the Alaska Department of Environmental Conservation with respect to the protection of air, land, and water quality are incorporated into the Alaska coastal management program and, as administered by that agency, constitute the components of the coastal management program with respect to those purposes. (Eff. ; Reg.)

no approval by legis.

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.150. HISTORIC, PREHISTORIC, AND ARCHAEOLOGICAL RESOURCES. Districts and appropriate state agencies shall identify areas of the coast which are important to the study, understanding, or illustration of national, state, or local history or prehistory. (Eff. ; Reg.)

Authority: AS 44.14.893
AS 46.40.040

ARTICLE 4.
AREAS WHICH MERIT SPECIAL ATTENTION.

Section
160. Areas which merit special attention

6 AAC 80.160. AREAS WHICH MERIT SPECIAL ATTENTION. (a) Districts and appropriate state agencies shall recommend to the council areas to be designated as areas which merit special attention.[1] Recommendations must include the following information:

[1] footnote deleted

(1) the basis or bases for designation under AS 46.40.210(1) or (b) of this section;

(2) a map showing the geographical location, surface area and where appropriate, bathymetry of the area;

(3) a description of the area which includes dominant physical and biological features;

(4) the existing ownership, jurisdiction, and management status of the area, including existing uses and activities;

(5) the existing ownership, jurisdiction, and management status of adjacent shoreland and sea areas, including existing uses and activities;

(6) present and anticipated conflicts among uses and activities within or adjacent to the area, if any; and

(7) a proposed management scheme, consisting of the following:

(A) a description of the uses and activities which will be considered proper and the uses and activities which will be considered improper with respect to land and water within the area;

(B) a summary or statement of the policies which will be applied in managing the area; and

(C) an identification of the authority which will be used to implement the proposed management scheme.

(b) In addition to the categories contained in AS 46.40.210(1), areas which merit special attention may include the following:

(1) areas important for subsistence hunting, fishing, food gathering, and foraging;

(2) areas with special scientific values or opportunities, including those where ongoing research projects could be jeopardized by development or conflicting uses and activities; and

(3) potential estuarine or marine sanctuaries.

(c) Management schemes for areas which merit special attention must preserve, protect, enhance, or restore the value or values for which the area was designated.

(d) As used in this section, "areas which merit special attention" has the same meaning as in AS 46.40.210(1). (Eff. , Reg.)

ARTICLE 5.
GENERAL PROVISIONS.

Section
900. Definitions

6 AAC 80.900. DEFINITIONS. Unless the context indicates otherwise, in this chapter

(1) "barrier islands and lagoons" means depositional coastal environments formed by deposits of sediment offshore or coastal remnants which form a barrier of low-lying islands and bars protecting a salt-water lagoon with free exchange of water to the sea;

(2) "coastal water" means all water bodies in the coastal area, including wetlands and the intertidal area;

} changed

(3) "council" means the Alaska Coastal Policy Council;

(4) "district" means a coastal resource district as defined in AS 46.40.210(2);

(5) "district program" means a district coastal management program;

(6) "estuary" means a semi-closed coastal body of water which has a free connection with the sea and within which seawater is measurably diluted with freshwater derived from land drainage;

(7) "exposed high-energy coasts" means open and unprotected sections of coastline with direct exposure to ocean generated wave impacts and usually characterized by coarse sand, gravel, boulder beaches, and well-mixed coastal waters;

(8) "facilities related to commercial fishing and seafood processing" includes hatcheries and related facilities, seafood processing plants and support facilities, marine industrial and commercial facilities, and aquaculture facilities;

(9) "geophysical hazards" includes potential flooding, tsunami run-up, landslides, snowslides, severe faults, and ice hazards;

(10) "mining and mineral processing" means the development of mineral resources extracted in tidal rivers, coastal water, and on continental shelves of the open sea, and found in surface, subsurface, and aqueous deposits;

(11) "offshore areas" means submerged lands and waters seaward of the coastline;

(12) "rocky islands and seacliffs" means islands of volcanic or tectonic origin with rocky shores and steep faces, offshore rocks, capes, and steep rocky seafronts;

(13) "tideflats" means mostly unvegetated areas that are alternately exposed and inundated by the falling and rising of the tide;

(14) "transportation and utility routes and facilities" include power transmission lines, mineral slurry lines, oil and gas pipelines, land and marine corridors, railways, highways, roadways, air terminals, water and sewage transfer, and facilities required to operate and maintain the route or facility;

(15) "upland" means drainages, aquifers, and land, the use of which would have a direct and significant impact on coastal water;

(16) "uses of state concern" has the same meaning as in AS 46.40.210(6); < New — replaces footnote

(17) "water-dependent" means a use or activity which can be carried out only on, in, or adjacent to water areas because the use requires access to the water body;

(18) "water-related" means a use or activity which is not directly dependent upon access to a water body, but which provides goods or services that are directly associated with water-dependence and which, if not located adjacent to water, would result in a public loss of quality in the goods or services offered;

(19) "wetlands" includes both freshwater and saltwater wetlands; "freshwater wetlands" means those environments characterized by rooted vegetation which is partially submerged either continuously or periodically by surface freshwater with less than .5 parts per thousand salt content and not exceeding three meters in depth; "saltwater wetlands" means those coastal areas along sheltered shorelines characterized by halophytic

hydrophytes and macroalgae extending from extreme low tide to an area above extreme high tide which is influenced by sea spray or tidally-induced watertable changes.

NEW SECTION → 6 AAC 85.010. COVERAGE OF CHAPTER. (a) This chapter contains guidelines for the use of and application by districts in carrying out their responsibilities under the Alaska Coastal Management Act (AS 46.40 and AS 44.19.891--894).

(b) At a minimum, the council will review this chapter annually. (Eff. , Reg.)

Authority: AS 44.19.893
AS 46.40.030
AS 46.40.040

6 AAC 85.020. NEEDS, OBJECTIVES, AND GOALS. Each district program must include a statement of the district's overall coastal management needs, objectives, or goals, or the district's comprehensive land and resource use plan. (Eff. , Reg.)

Authority: AS 44.19.893
AS 46.40.030
AS 46.40.040

6 AAC 85.030. ORGANIZATION. Each district program must include a description of the district program organization for coastal management. Budgetary and staff needs and, where appropriate, a schedule for necessary reorganization must be included. (Eff. , Reg.)

Authority: AS 44.19.893
AS 46.40.030
AS 46.40.040

6 AAC 85.040. BOUNDARIES. (a) Each district program must include a map of the boundaries of the coastal area within the district subject to the district program.

(b) Before council approval of the district program, initial boundaries must be based on Biophysical Boundaries of Alaska's Coastal Zone (published by the Office of Coastal Management and the Alaska Department of Fish and Game, 1978, a copy of which is on file with the Office of the Lieutenant Governor, and which is available from the Office of Coastal Management) and must include the zone of direct interaction and the zone of direct influence.

(c) Final boundaries of the coastal area subject to the district program may diverge from the initial boundaries if the final boundaries:

(1) extend inland and seaward to the extent necessary to manage uses and activities that have or are likely to have a direct and significant impact on marine coastal water; and

(2) include all transitional and intertidal areas, salt marshes, saltwater wetlands, islands, and beaches.

(d) If the criteria in (c) of this section are met, final boundaries of the coastal area subject to the district program may be based on political jurisdiction, cultural features, planning areas, watersheds, topographic features, uniform setbacks, or the dependency of uses and activities on water access.

(e) The boundaries of the district must be sufficiently compatible with those of adjoining areas to allow consistent administration of the Alaska coastal management program.
(Eff. , Reg.)

Authority: AS 44.19.893
AS 46.40.030
AS 46.40.040

6 AAC 85.050. RESOURCE INVENTORY. Each district program must include a resource inventory which describes, in a manner sufficient for program development and implemeantation:

(1) habitats listed in 6 AAC 80.130 that are found within or adjacent to the district;

(2) major cultural resources that are found within or adjacent to the district;

(3) major land and water uses and activities which are conducted within or adjacent to the district;

(4) major land and resource ownership and management responsibilities within or adjacent to the district; and

(5) major historic, prehistoric, and archaeological resources which are found within or adjacent to the district. (Eff. , Reg.)

Authority: AS 44.19.893
AS 46.40.030
AS 46.40.040

6 AAC 85.060. RESOURCE ANALYSIS. Each district program must include a resource analysis which describes, in a manner sufficient for program development and implementation:

(1) significant anticipated changes in the matters identified under sec. 50 of this chapter;

(2) an evaluation of the environmental capability and sensitivity of resources and habitats, including cultural resources, for land and water uses and activities; and

(3) an assessment of the present and anticipated needs and demands for coastal habitats and resources. (Eff. , Reg.)

Authority: AS 44.19.893
AS 46.40.030
AS 46.40.040

6 AAC 85.070. SUBJECT USES. Each district program must include a description of the land and water uses and activities which are subject to the district program. The uses and activities mentioned in ch. 80 of this title, if applicable, are subject to the district program. (Eff. , Reg.)

Authority: AS 44.19.893
AS 46.40.030
AS 46.40.040

6 AAC 85.080. PROPER AND IMPROPER USES. Each district program must include a description of the uses and activities, including uses of state concern, that will be considered proper, and the uses and activities, including uses of state concern, that will be considered improper within the coastal area, including land and water use designations. This description must be based on the district's statement of overall needs, objectives, or goals, or the district's comprehensive land and resource use plan, under sec. 20 of this chapter, and must be consistent with the standards contained in ch. 80 of this title. (Eff. , Reg.)

Authority: AS 44.19.893
AS 46.40.030
AS 46.40.040

ARTICLE 2.
GOVERNMENT PROCESS.

Renumbered

Section
120. Submittals to council
130. Public involvement
140. Coordination and review
150. Council review

6 AAC 85.120. SUBMITTALS TO COUNCIL. (a) During program development, districts shall submit brief annual progress reports concerning program development to the council.

(b) Following adoption of the final program, districts shall submit brief annual progress reports concerning program implementation to the council.

(c) All significant amendments to the district program must be submitted to the council for approval. The Office of Coastal Management shall review proposed amendments to determine if council approval is required. This determination is subject to council review when requested by a council member.

(d) Districts shall give conceptual approval to district programs and significant amendments to district programs before prior to their submission to the council. The district program as approved by the council becomes effective upon adoption by the district. (Eff. , Reg.)

Authority: AS 44.19.893
AS 46.40.030
AS 46.40.040

6 AAC 85.130. PUBLIC INVOLVEMENT. (a) No less than two public meetings must be held within the district during program development to inform the public and receive comments concerning the program. A brief summary or report of the matters considered at the public meeting held under this subsection must be prepared by the district, made available to the public, and retained for inclusion in the record file referred to in sec. 150(c) of this chapter.

(b) At least 30 days before giving conceptual approval to the district program or significant amendment to the district program, the district shall give public notice of the proposed action by conspicuous advertisement in a newspaper of general circulation within the district. The notice must specify the time and place of a public hearing on the proposed action. The public hearing under this subsection may be held not sooner than 10 days after publication of the notice. At the public hearing, each interested person must be given the opportunity to present statements, arguments, or contentions,

orally or in writing. Districts shall insure that, where reasonably requested, translation into the appropriate Native language is provided. The district shall consider all relevant matter presented to it. A written transcript or electronic recording of the public hearing must be submitted to the council.

(c) In addition to the requirements of (b) of this section, districts shall provide publically advertised opportunities for public involvement in the development of all program elements contained in secs. 20 -- 110 of this chapter.

(d) Districts shall provide the public, in a timely manner and in understandable form, information explaining the district coastal management program, the requirements of public participation in program development, how and when the public may participate in program development, what information is available, and where that information may be obtained.
(Eff. , Reg.)

Authority: AS 44.19.893
AS 46.40.030
AS 46.40.040

6 AAC 85.140. COORDINATION AND REVIEW. Districts shall provide opportunities for coordination and review by federal, state, and local governmental agencies, including adjacent districts, and other persons with a significant interest in coastal resources or who are conducting or may conduct uses and activities that have or are likely to have a direct and significant impact on the district's coastal area.
(Eff. , Reg.)

Authority: AS 44.19.893
AS 46.40.030
AS 46.40.040

6 AAC 85.150. COUNCIL REVIEW. (a) When a district program or significant amendment to a district program is given conceptual approval by the district, the program or amendment, together with the transcript or recording of the public hearing held under sec. 130(b) of this chapter and all other material on which the district based its decision, must be submitted to the council.

(b) Within 30 days after submission of the district program or amendment under (a) of this section, the Office of Coastal Management shall issue its recommendation. The recommendation may be based, in whole or in part, on matters not submitted by the district under (a) of this section. Any matters so used must be identified in the recommendation and placed in the record file under (c) of this section. The recommendation must contain findings and conclusions based on this chapter, the standards contained in ch. 80 of this title, AS 46.40.060, and AS 46.40.070. The recommendation must be served on the

district, the council, and all persons who testified or submitted timely written statements at the public hearing held under sec. 130(b) of this chapter.

(c) A record file containing all matter submitted by the district under (a) of this section, the Office of Coastal Management's recommendation under (b) of this section, and all matters on which the recommendation was based must be maintained at the Office of Coastal Management and at a convenient location within the district.

(d) Within 30 days after service of the recommendation, any person served with the recommendation may serve upon the council comments on the recommendation. Within 10 days after the deadline for serving comments on the council under this subsection, the Office of Coastal Management may submit additional matter to the council in response to the comments. All comments served and all additional matter submitted under this subsection will be placed in the record file.

(e) Within 20 days after the deadline for the Office of Coastal Management's submission of additional matter to the council under (d) of this section, the council will approve or disapprove the district program, in whole or in part. The council's decision will contain findings and conclusions based on this chapter, the standards contained in ch. 80 of this title, AS 46.40.060, and AS 46.40.070. The council's findings and conclusions will be based upon matters contained in the record file. The council will, in its discretion, adopt the findings and conclusions of the Office of Coastal Management by reference. The council will serve its decision under this subsection on the district and on all persons who submitted timely comments on the staff recommendation under (d) of this section, and will place the decision in the record file.

(f) If the council's decision under (e) of this section disapproves, in whole or in part, the district program, the decision will specify the date and location for the initial mediation session under AS 46.40.060(b). Mediation sessions will be held within the district and will be scheduled with due regard for the convenience of the participants. Any person served with the council's decision under (e) of this section may attend mediation sessions.

(g) If the council and district reach accord in mediation sessions held under (f) of this section, the council will, within 20 days after reaching accord, serve its modified decision on the district and all persons who were served with the council's decision under (e) of this section, and will place the modified decision in the record file. The modified decision will contain findings and conclusions, based on the record file and additional matters adduced during mediation, necessary to demonstrate that the modified decision does not violate this chapter, the standards contained in ch. 80 of this title, AS 46.40.060, or AS 46.40.070.

(h) If the council and the district do not reach an accord, the council will, within 20 days after its determination that an impasse has been reached, set the matter for an adjudicatory hearing under AS 46.40.060(c). Notice of the hearing under AS 44.62.370(c) will be served on the district and all persons who were served with the council's decision under (e) of this section. Any person served with notice of the hearing under this subsection may intervene as a party to the hearing. (Eff. , Reg.)

ARTICLE 3.
GENERAL PROVISIONS.

Section
900. Definitions

6 AAC 85.900. DEFINITIONS. Unless the context indicates otherwise, in this chapter

(1) "beaches" means the area affected by wave action directly from the sea;

new word

(2) "marine coastal water" means water adjacent to shorelines which contains a measurable quantity of seawater, including sounds, bays, lagoons, bayous, ponds and estuaries, and the living resources which are dependent on these bodies of water;

Taken from 6 AAC 80. 170(2)

(3) "council" means the Alaska Coastal Policy Council;

(4) "district" means a coastal resource district as defined in AS 46.40.210(2);

(5) "district program" means a district coastal management program;

(6) "islands" means bodies of land surrounded by water on all sides; interior portions of major islands may be excluded from the coastal area if uses of these islands do not cause direct and significant impacts on coastal waters;

corrected

(7) "saltwater wetlands" has the same meaning as that contained in 6 AAC 80.900(19); and

(8) "transitional and intertidal areas" means areas subject to periodic or occasional inundation by tides, including coastal floodplains, storm surge areas, tsunami and hurricane zones, and washover channels. (Eff. , Reg.)

AVRUM M. GROSS
ATTORNEY GENERAL

By:
Arthur H. Peterson
Assistant Attorney General
and Regulations Attorney

Regulations re coastal management guidelines and standards (6 AAC 80 and 6 AAC 85)

We have reviewed these regulations in accordance with AS 44.62.060, and approve them for filing by the lieutenant governor. A duplicate original of this memorandum is being furnished the lieutenant governor, along with your regulations and related documents.

Under AS 44.62.125(b)(6), "waters" has been corrected to read "water" in 6 AAC 80.100(b)(2) and 6 AAC 80.900(7), and "must be" has been corrected to read "are" in 6 AAC 85.070.

We note that a "pre-final" version of these regulations was submitted to the legislature April 7, 1978 and that this final version was delivered to Representative Lisa Rudd May 4; the corrected page 15, but not the three corrections mentioned above, was delivered to her May 5. Representative Rudd's Community and Regional Affairs Committee has favorably reported HCR 125, approving these regulations, but neither house of the legislature has yet voted on the matter. This means that, although all requirements of the Administrative Procedure Act (AS 44.62) have now been met and the lieutenant governor may file these regulations, he will not be able to note the effective date in appropriate places (assuming the constitutionality of the effective-date precondition in AS 46.40.080 and assuming that the word "program" in that section means or includes these regulations). You should make certain that, as soon as the legislature completes action on the matter, this information is relayed to the lieutenant governor.

Office of the Governor

M E M O R A N D U M May 15, 1973

SUBJECT: Annulment of regulations affecting the state's coastal management program: SCR 103

TO: Senator Joseph L. Orsini, Chairman
Senate Community and Regional Affairs Committee

FROM: John B. Chenoweth, Legislative Counsel

You have asked whether favorable action by the Legislature on a resolution approving regulations adopted by the Coastal Policy Council and filed with the Lieutenant Governor precludes subsequent annulment of any provision of those regulations. The Department of Law has provided you a memorandum opinion answering the question in the negative, and, though the basis for this opinion differs, I would agree with the conclusion reached in the memorandum from Mr. Peterson, the Assistant Attorney General.

Earlier, this Agency provided you an opinion concluding that the legislature need not give formal approval to the regulations adopted by the Coastal Policy Council as a condition of their taking effect. By that earlier opinion we suggest that legislative approval of the regulations presented adds nothing to their stature as guidelines and standards for the program. To give effect to the proposed regulations, all the Council is legally required to do is comply with those general provisions of the state's Administrative Procedure Act relating to preparation and adoption of regulations. Prior legislative approval not being specifically required, there is nothing to suggest that the Legislature may not review and disapprove a regulation of the Coastal Policy Council in the manner provided by AS 44.62.320.

JBC:hjd

The legislature has been informed by the Attorney General's Office of the State of Alaska that it [illegible] must only approve or reject the Coastal Management Regulations 6 AAC 80.010 et seq and 6 AAC 85.010 et seq. The Legislature has also been informed that unless these regulations are approved by this session of the legislature that severe problems will result in the ability of the State and local governments to receive funds with which to develop plans to cope with problems in the Coastal Zone. The legislature is very dissatisfied with 6 AAC 80.100 because it is unclear as to what result is really intended and because its language is so overbroad [illegible]. However since the legislature may not amend these sections and since it is important to approve these regulations in some form now, regulations 6 AAC 80.010

COASTAL ZONE MANAGEMENT

~~Regulations 6 AAC 80.010~~ et. seq. are approved ~~subject to the following comments and reservations.~~ It is the intent of the Legislature that Section 6 AAC 80.100 should not place additional burdens on the forest products industry until such time as additional or amended regulations can be adopted. It is also the intent of the Legislature that a Forest Practices Act adopted by the Legislature in the future shall set forth requirements and regulations governing forestry operations in coastal zone management areas and shall be in substitute of regulations set forth in 6 AAC 80.100. The Legislature recommends and, if such proposed regulations are adopted by the Council, hereby approves the following regulation in place of 6 AAC 80.100 as submitted to it:

6 AAC 80.100. TIMBER HARVEST AND PROCESSING.

(a) Commercial timber harvesting in the coastal area shall be conducted so as to meet the following standards:

(1) the facilities shall be located and logging operations conducted so as to minimize long term adverse environmental impacts;

(2) minimize impact on fish movement in coastal waters; and

(3) timber harvest and timber regeneration activities shall be implemented so as to protect streambanks and shorelines, minimize adverse impacts on fish resources and habitats, and minimize adverse long term impacts on wildlife resources and habitats.

(b) Commercial timber transport, storage, and processing in the coastal area shall be conducted so as to meet the following standards:

(1) onshore storage of logs shall be encouraged where compatible with the objectives of the Alaska Coastal Management Program;

(2) sites for in-water dumping and storage of logs shall be selected and these activities conducted so as to minimize adverse impacts on the marine ecosystem, minimize conflicts with recreational uses and activities, be safe from storms, and not constitute a hazard to navigation;

(3) roads for log transport and harvest area access shall be designed and constructed so as to minimize mass wasting, erosion, sedimentation, interference with drainage, and ~~be~~ adequately maintained until such time as they are returned to their pre-road natural drainage pattern (put to bed); and

(4) stream crossing, including bridges and culverts, shall be kept to a minimum number, designed to withstand seasonal high water and flooding, and provide for ~~unrestricted~~ passage of fish.

(c) Upon the effective date of a Forestry Practices Act the coastal zone regulations will not be applicable for timber harvesting and other forest practices.

(d) Nothing in the coastal zone regulations shall prevent timber harvesting on private land, provided such harvesting meets the standards set forth in this section, ~~until additional regulations are adopted.~~

Honorable Lisa Rudd
State of Alaska House of Representatives
Pouch V
Juneau, AK 99811

Dear Ms. Rudd:

The Coast Guard appreciates the opportunity to correspond with your committee concerning the 13 April 1978 Standards and Guidelines for Alaska's Coastal Management Program (ACMP). These Standards and Guidelines represent a considerable departure from the previous drafts on which the Coast Guard was allowed to comment. The Coast Guard feels that this version of the Standards and Guidelines is severely deficient in the areas of participation, specificity, and priority of uses.

Participation. The Office of Coastal Zone Management in Alaska has attempted to provide federal agencies with the opportunity to participate in the development of Alaska's program. Section 923.51 of the federal regulations requires, however, that the State "provide for federal agency input on a timely basis." The Coast Guard feels that the State has been deficient in this regard due to the shortness of time allowed for agency comments between successive drafts of the Standards and Guidelines. This is the sixth occasion in the last six months that the Coast Guard has commented on a different draft of this document. This rapidity of drafts has not allowed sufficient time for coordination between the various agencies of the Department of Transportation, nor the opportunity to carefully evaluate the content of the Program. Furthermore, this "final" version of the Standards and Guidelines was approved by the Council and submitted to the legislature without an opportunity for federal review, even though it differed substantially from previous drafts. Written comments have yet to be received by the Coast Guard addressing our stated concerns. The Coast Guard feels therefore that this past history of short lead times for response combined with the lack of formal feedback from the State does not meet the federal requirements for participation.

Section 306(c)(1) of the Coastal Zone Management Act requires federal agency participation in the development of the Program at an early stage in the process. The Coast Guard recommends that a provision for this participation be included in section 6 AAC 80.020 of the Standards.

The Coast Guard has commented on several occasions that a mechanism is needed for government participation at the district level in the development of the local plans. The Coast Guard is concerned that each district may develop its own mechanism for government participation and then cite compliance or non-compliance with this mechanism as evidence of government participation. Because the actual decision concerning adequacy of participation will be made at the State level by the Council, the Coast Guard feels that it is very important that a well developed State mechanism for participation be defined as part of the ACMP. If this accomplished, the process will not vary from district to district and all parties will have a clear understanding of their responsibilities and opportunities. It is therefore recommended that Section 85.100 be expanded to detail exactly when, where, and how government agencies will be allowed to participate in the development process.

Priority of Uses.

Section 923.13 of the federal regulations requires that the State must: "(1) Identify what constitute uses of regional benefit; and (2) identify those methods that shall be used to assure that unreasonable restrictions or exclusions of such uses by local land and water use regulations shall not occur." The Coast Guard finds no mention of regional benefit, national interest, or defense considerations in the Guidelines and Standards. National Defense, including Coast Guard functions and responsibilities such as search and rescue and fisheries enforcement, should be identified in Chapter 80, Article 2 of the Standards as an important priority use of the Coastal Zone. This priority provides the basis for regulating future land and water use, provides a common reference point for resolving potential conflicts, and is important for future acquisition of areas not presently controlled by the Coast Guard.

Section 6 AAC 80.0[illegible] of the Standards addresses water based transportation routes. Under the Ports and Waterways Safety Act of 1972, the Coast Guard is authorized to establish vessel traffic services in ports, harbors, and other waters subject to congested vessel traffic. Any district plans dealing with the management and control of vessel traffic should be coordinated with the Coast Guard to insure such plans are compatible with Coast Guard traffic control responsibilities. There is also considerable regional and national interest connected with transportation and these considerations should be mentioned in this section.

Specificity. The present Standards and Guidelines are lacking in specificity and substance and, as a result, the plans developed and implemented by the Alaska Coastal Resource Districts may vary so widely that the Coast Guard may be compelled to operate under as many as 50 different

plans within Alaska rather than under one plan which is implemented by various local government units. This situation would present an unacceptable burden on the Coast Guard and other federal agencies and is therefore considered a serious defect which must be remedied.

The Coast Guard feels that the Standards and Guidelines are deficient in the following areas concerning specificity:

a. The standards and criteria upon which decisions pursuant to the program will be based are not sufficiently specific to provide "(i) a clear understanding of the content of the program, especially in identifying who will be affected by the program and how, and (ii) a clear sense of direction and predictability for decision makers who must take actions pursuant to or consistent with the management program." These provisions are required by section 923.3(a)(2) of the Federal Coastal Zone Management Approval Regulations.

b. Section 923.12(a) requires the States to "develop policies and procedures by which uses determined to be subject to the management program will be permitted, conditioned, modified, and/or prohibited. These policies and procedures regarding management of uses and/or their impacts must be capable of effective implementation at the time of program approval." Alaska's section 6 AAC 85.070 and 6 AAC 85.080 delegates these functions to the districts. This creates a situation where each district's uses and policies may differ and is therefore not authorized under the federal regulations.

The effective implementation required under this section can not occur under Alaska's present Standards and Guidelines. If the state delegates the responsibilities of establishing uses and policies to the individual districts (85.070 and 85.080), and the district policies and uses are not submitted to NOAA with the ACMP (district plans will be developed later), it is impossible to implement meaningful management procedures regarding unknown uses and policies. It is therefore not clear what status the Program will have before the district plans are in place.

c. Section 923.12(e) of the Federal regulations states that "to the extent a state's government program policies are generalized, performance standards that will be used to enforce these policies will need to be sufficiently explicit and specific that persons affected by the management program will have a reasonable understanding of what uses would be permitted in which locations of the Coastal Zone and under what condition." The Coast Guard feels that the Standards are neither explicit nor specific and do not provide the required clear understanding as to what uses are permitted in any location.

The Coast Guard is very interested in coastal zone management and desires to work closely with the State of Alaska in implementing the ACMP. However, the mere opportunity to comment on the various stages of combined plan development when with the lack of response received concerning these comments, can not be considered real participation. The continued failure of the State to react to the concerns expressed herein is viewed as a matter of concern and is considered a serious continuing deficiency under the federal regulations. I am hopeful that these defects can be corrected before the ACMP is sent to NOAA, and am looking forward to continuing interaction with the State in coastal zone matters.

Sincerely,

J. B. HAYES
Rear Admiral, U. S. Coast Guard
Commander Seventeenth Coast Guard District

The Honorable Hugh Malone
Alaska State House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Mr. Malone:

The Coastal Policy Council met in Juneau May 4 and 5 to discuss a number of issues which we have had to ignore to date while developing and refining the guidelines and standards which were submitted to you in early April.

One of the issues discussed is coastal management in the unorganized borough. Staff prepared a series of thorny questions to stimulate discussion (see attached). Not surprisingly few of the questions were answered and several more were identified. However, the Council did reach consensus on several policy positions, two of which require legislative action for implementation.

The Council adopted the attached resolution supporting that provision of HCSSB 338 which extends the time for consolidation of coastal resource service areas.

The Council also requests funding from the Legislature to assist those areas of the unorganized borough which wish to engage in the organization and planning efforts associated with initial development of a district coastal management plan. The Council received testimony from a number of individuals, including Dan Branch (AVCP), John Shively (NANA), Ralph Amouaka (Aleutian/Pribilof), and George Allen (Rural Cap) indicating that although there are groups in the unorganized borough interested in assisting the organization of districts to do coastal planning, no resources currently exist for those groups to do the necessary travel, communication and education which would be essential. As you are aware, the Alaska Coastal Management Act provides that coastal planning must be done by local resource districts except in extreme situations when the Council may direct such planning. In the unorganized borough resource district planning can be accomplished only through the formation of a resource service area. Many areas want and/or need the benefits of coastal resource planning but need assistance in organizing a service area.

ALASKA
COASTAL MANAGEMENT PROGRAM

The Council made the policy decision that it would be desirable to assist those areas which are interested in organizing, and moved to request the Free Conference Committee on the Budget to consider an appropriation of $500,000 to be used for pass through monies for organization efforts by local, public and native groups.

We understand that the lateness of the session and other funding priorities may preclude an appropriation for this purpose at this time. However, we feel it deserves your consideration.

Sincerely,

Frances A. Ulmer

Honorable Joe Orsini
Chairman, Senate Community and
Regional Affairs Committee
Alaska State Legislature
Pouch V
State Capitol
Juneau, Alaska 99811

Dear Senator Orsini:

Thank you for the copies of the letter sent to you by the U.S. Coast Guard on May 1, 1978.

The Office of Coastal Management has examined that letter in detail at our request, and has prepared the attached response.

We have reviewed OCM's response and generally concur with it. Please advise us if you should receive any additional communications of this type, and we will be pleased to respond again.

We appreciate the opportunity to comment on this matter, and we are at your disposal for any future discussions on the ACMP Guidelines and Standards

Sincerely,

Roger Allington, Co-Chairman
Alaska Coastal Policy Council

Frances A. Ulmer, Co-Chairman,
Alaska Coastal Policy Council

ALASKA
COASTAL MANAGEMENT PROGRAM

May 10, 1978

OFFICE OF COASTAL MANAGEMENT.

Staff Response

To

May 1, 1978 Letter From

Admiral Hayes to Senator Joe Orsini.

We believe that the concerns expressed by the Coast Guard reflect a basic misunderstanding of the legal status of the guidelines and standards within the Alaska Coastal Management Program.

While the Coast Guard cites several sections of the guidelines and standards, federal Coastal Zone Management Act, and federal approval regulations in their letter, we can find no place in which the Alaska Coastal Management Act was cited. The guidelines and standards, as regulations, were never intended to stand alone from the statute under which they were promulgated. They can only be understood as implementing, interpreting, or making specific, but in no event repeating, the Alaska Act. See Drafting Manual for Administrative Regulations (State of Alaska Legislative Affairs Agency, 1976).

I. PARTICIPATION

The first major concern raised in the letter concerns "Participation". The problem cited here is lack of "a

It was, at all times, the intent of the Council to include federal agencies in the definition of the term "public". We believe that the above sections satisfy the concerns raised by the Coast Guard regarding participation.

Additionally, 6 AAC 85.130 specifically requires that "Districts shall provide opportunities for coordination and review required by federal...agencies..." (This would apply both before and after program approval).

6 AAC 85.140, provides that any party who participated in the district public hearing shall be served with and allowed the opportunity to comment on staff recommendations concerning the approval of district programs by the Council, as well as be served with the Council's decision, and allowed to attend mediation sessions. In the event of an adjudicatory hearing between the Council and a district, any such person may intervene as a party.

The internal guidelines of the Alaska Coastal Policy Council, adopted by the Council in March, 1978, contain other relevant provisions, as follows:

> "(1) Opportunities shall be provided for participation of federal agencies in the development, review and approval of all parts of the Alaska Coastal Management Program. Notice of Council meetings, public hearings, and other Council activities shall be provided to allow federal agency review and comment on the guidelines and standards, district programs, and any changes or additions to the Alaska Coastal Management Program. Considerable opportunities for review of Alaska's coastal program will be provided, by the State and by the federal Office of Coastal Zone Management, after the program is submitted to the Secretary of Commerce for approval under the provisions of Section 306 of the federal Coastal Zone Management Act of 1972, as amended.

(2) The Council shall provide coastal districts with a specific listing of state and federal agencies having interests, expertise and responsibilities concerning coastal resources, habitats, and development.

(3) Detailed procedures for federal consultation and consistency shall be contained in the management program document to be submitted to the Secretary of Commerce in mid-1978..."

II. PRIORITY OF USES

The second major concern cited by the Coast Guard is the failure of the guidelines and standards to "mention...regional benefit, national interest, or defense considerations". (p. 2).

This comment has apparently resulted directly from a failure by the Coastal Guard to consider the provisions of the Alaska Coastal Management Act in conjunction with the guidelines and standards.

6 AAC 85.070 requires each district program to "include a description of the uses and activities, including uses of state concern, that will be considered proper, and the uses and activities, including uses of state concern, that will be considered improper within the coastal area, including land and water use designations."

The definitions of the term "uses of state concern" is contained in AS 46.40.210(6) and includes "(A) uses of national interest, including...navigational facilities...and national defense and related security facilities..." and "(B) uses of more than local concern...".

In reviewing district programs, the Council is required to find that the district program does not "arbitrarily or unreasonably restrict or exclude uses of state concern". AS 46.40.060. The following section of the Act, AS 46.40.070(c), contains detailed criterial for making this finding.

In addition, the Council has specifically provided that the interagency (state) regional planning team "assist the Council and districts in identifying uses of state concern and developing management policies for these uses". 6 AAC 80.030(b)(3).

III. SPECIFICITY

The third major concern expressed by the Coast Guard is that "the present Standards and Guidelines are lacking in specificity and substance and, as a result, the plans developed and implemented by Alaska Coastal Resource Districts (sic) may vary so widely that the Coast Guard may be compelled to operate under as many as 50 different plans within Alaska rather than under one plan which is implemented by various local government units." (pps. 2 -- 3).

This concern suggests a misunderstanding of the federal (306) approval regulations as well as the Alaska Coastal Management Act.

Proposed federal Coastal Zone Management Approval regulation 923.42 concerns the "technique of control" which a state chooses to exercise its coastal management program. One such technique is "direct state control". Under this

technique, the state controls land and water uses through "direct state land and water use planning and regulation." This would, in fact, result in "one plan" statewide. However, the technique chosen by the State of Alaska, and reflected in the Alaska Coastal Management Act, is "local implementation". Under this technique, the state sets basic standards or criteria, while the local governments prepare local programs. Given the diversity and independence of communities in Alaska, any other plan would be unacceptable.

In our opinion, the Alaska Act and guidelines and standards provide the minimum amount of uniformity required for an implementable coastal management program while allowing the maximum amount of local discretion. The standards to be applied by the Council concerning uses of state concern, referred to above, provide the assurance to the Coast Guard and other federal agencies that they will not, in fact, have their functions impaired by local programs. Coordination can be assured if the Coast Guard will keep abreast of district program development and Council review of those programs.

This office understands that the Coast Guard, or any other federal agency, may have difficulty in monitoring the development of district programs. We have always responded to those concerns by committing the Office of Coastal Management and the Department of Community and Regional Affairs to assist in every way possible to assure adequate federal input to local programs (see Council's Internal Guidelines, above).

We will transmit information on national interests to the districts, provide districts with lists of contact people in federal agencies, inform federal agencies of pending events at the district level, send federal agencies' drafts of district materials when they are available, and, mount special efforts to involve federal agencies in the Council review of district programs. All of these services will be set forth in detail in the ACMP program document, but we do not believe that reporting these services in the Guidelines and Standards is appropriate.

The Coast Guard letter discusses a number of specific examples in which the guidelines and standards are allegedly not sufficently specific (p. 3). The issue of improper delegation of authority from the Council to the districts is raised. In more than one case, the Coast Guard alleges non-compliance with federal regulations.

With respect to these matters, we would note that the State of Alaska Department of Law has determined, in approving the regulations under AS 44.62.060, that they meet basic "legality" and "constitutionality" requirements, and hence do not constitute an improper delegation. The basic philosophy of decentralization and maximum district control was decided by the legislature when it enacted the Alaska Coastal Man-agement Act. The guidelines reflect this.

IV. TOO RAPID DEVELOPMENT

Finally, the Coast Guard notes the rapid pace at which the guidelines and standards were developed, and the lack of time on their part for adequate coordination and review

(p. 1). Parties who have been involved in the development of the guidelines and standards since the inception of the Council in September, 1977 are cognizant of this problem. Both the Alaska Coastal Management Act and the federal program approval requirements have had the effect of making time of the essence. During the six months in which it had to work on the guidelines and standards, the OCM staff distributed, according to the Coast Guard, six drafts for comment; this was done in an effort to maximize participation and coordination, not impair it. At some point, the comments had to end and a draft had to be submitted to the legislature. This was done in early April.

We would also note that the Hearing Draft, which preceded the final draft sent to the legislature, was made available to the Coast Guard in late January. The formal comment period ended in early March (nearly 60 days after publication). Another three weeks elapsed from the time of closing the formal comment period to the actual Council meeting at which the Hearing Draft was revised into the final Draft. The Coast Guard attended that meeting. The Council dealt with each section of the Guidelines and Standards individually, and provided an opportunity for public comment on each section as it came up for Council consideration. The Coast Guard made no effort to comment in this framework, although this was the appropriate time and place to bring up specific points to the Council.

We would note that the first section of the guidelines

and standards, 6 AAC 80.010, requires the Council to review the regulations annually. This reflects the Council's desire to continue refining and improving the guidelines and standards, in cooperation with the Coast Guard and all other interested parties, and its awareness that the version adopted in April is not cast in stone.

The Coast Guard did provide written comments on the January hearing draft of the guidelines and standards. We have not made individual replies to these comments or to any others since the final guidelines and standards themselves constitute our best response. The Coast Guard's comments were used along with dozens of others to prepare the final guidelines and standards that were sent to the legislature. We will respond to the individual comments as time permits, but given the shortness of time remaining, we feel that our primary duty is to prepare the ACMP program document and other tasks related to transmission of the final guidelines and standards to the legislature.

V. SUMMARY

Time continues to be of the essence. The Alaska Coastal Management Program is in its fourth year of program development. It must receive program approval from NOAA this year or it will be ineligible for further development funding. Any changes in the guidelines and standards at this point would require APA review and legislative approval, an impossibility before the legislature adjourns this summer. The effect of pressing for such changes at this time would not result in a correction of defects before submittal to NOAA, but rather result in a scuttling of the Alaska Coastal Management Program.

OF COUNSEL
M E MONAGLE

May 16, 1978

The Honorable Joseph L. Orsini
Chairman, Senate Community & Regional
Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

Thank you for your letter to me of May 3, 1978 regarding the Coastal Management Regulations. I have specifically reviewed proposed section 6 AAC 80.100 dealing with timber harvest and processing. Due to the press of other business, most notably D-2 Legislation in Congress, I have not had an opportunity to focus on the Coastal Zone Regulations until now.

At ALP we have assumed that passage of SB-59, the Forest Practice Act, would supercede the Coastal Zone regulations. Upon reviewing 6 AAC 80.100 (d) we are not so sure. That section provides that Forest Practices legislation would be substituted for the Coastal Zone Management Act when the Forest Practices legislation is passed. An additional proviso of that subsection, however, requires that the Forest Practices Act establish a standard "corresponding to a standard in this section". A fast check of the Forest Practices Act shows that it will not establish such corresponding standards. Indeed, the Coastal Zone Regulations will establish much higher standards and, therefore, there will be no substitution. We find this to be a most alarming situation.

Hence, this will be a somewhat detailed letter dealing with a number of problems in the timber area.

1. Section 6 AAC 80.100 requires the siting of timber harvest activities in areas "where the management of reforestation, using the best available technology will result in producing a sustained yield of merchantable timber". There does not appear to be a definition of "sustained yield" in the Act. The Federal government has used the words "sustained yield", (as appear in the Multiple Use Sustained Yield Act of 1960) to mean non-declining yield. More recently, in 1976 in the National Forest Management Act, the long standing Forest Service interpretation of Multiple Use Sustained Yield Act was incorporated into law. Were there to be any lawsuit on this, it would seem to me that a Court would use the Federal definition to interpret the words "sustained yield".

If "sustained yield" means non-declining yield it will make it impossible for many Native corporations to operate. Testimony before the Natural Resources Committee, on the Forest Practices Act indicated that. Accordingly, the requirement in the proposed draft of S.B. 59 that timber harvesting be limited to areas that would produce a "sustained yield" of merchantable timber was deleted from that Act. (Compare draft of S.B. 59 Section 41.17.040(b)(1) with CSSB 59 Section 41.17.060(b). Accordingly, even though ALP does not operate on private land, we would urge that subsection (a) be eliminated entirely.

The reason for suggesting elimination is that reforestation is not the business of the Coastal Zone Management Act. What that Act is attempting to insure is that activities in the coastal region are done in a sound environmental way. That is, its purpose is protection of the environment, not reforestation. Accordingly, it is inappropriate for Subsection (a) to be included in these regulations.

2. Subsection (b)(2) requires an assurance of unrestricted fish movement in coastal waters. It would therefore appear that any causeway built in connection with a log dump, and perhaps even wet log storage areas would be

prohibited. Accordingly, we would recommend that the words "assure unrestricted" be deleted and that the words "minimize restriction of" be inserted instead. This would seem to achieve the desired result without unreasonably burdening the timber industry.

3. Subsection (b)(3) has the potential for stopping the entire timber industry in coastal Alaska. It requires that timber harvesting be conducted in a way to "prevent adverse impacts on fish resources and habitats". It may be impossible to do this, depending, of course, on what is meant by "adverse impacts". "Adverse impacts" is not defined in the regulations, and therefore will mean what a Court says it means. What are adverse impacts? No one really seems to know. There is concern for example that long-range, low-level amounts of sedimentation impact fish. We cannot disprove that this is so. Therefore, any group citing this fact could halt any timber operation in coastal Alaska. We would most strongly urge that the word "prevent" be deleted and that the word "minimize" be substituted in lieu thereof. This would make it consistent with impacts on wildlife or resources and their habitats.

Further, we would suggest that the words "minimize" adverse impacts" be defined. The definition should be drafted so as not to prohibit logging where adequate streamside mitigation measures are utilized. Adequate streamside mitigation measures include presently accepted practices in Southeastern Alaska, as required in the Southeast Area Guides put out by the Forest Service.

In any event, please be assured that we are extremely concerned about this section and urge you to mitigate its clear possibility for great damage to the industry.

4. So that the definition for "minimize adverse impacts" is consistent throughout we would suggest that the word "effects" in the third line of Subsection (c)(2) be deleted, and the word "impacts" be substituted therefore.

5. Subsection (d) also should be altered. The words "establishing a standard corresponding to a standard

in this section" should be deleted entirely. The Forest Practices Act should be the sole vehicle for determining what are and what are not appropriate forest practices. Operators should not be faced with dual sets of regulations emanating from different agencies of the State government. One of the principal reasons why we have worked so hard at ALP for the Forest Practices Act is to eliminate the nightmare of several State agencies using overlapping procedural requirements to regulate the same things. The words which we suggest for deletion would have just that effect. As the section is presently written a court somewhere would have to determine whether or not a standard in the Forest Practices Act was similar to that required in the Coastal Zone Management Act. This simply should not be allowed to happen.

Thank you again for providing us with a copy of these regulations, and the opportunity to respond. I am taking this opportunity to forward them to representative Lisa Rudd, who is Chairman of the House Community and Regional Affairs Committee for her consideration as well.

Yours very truly,

James F. Clark

Re: Coastal Zone Regulations

Dear Lisa:

Thank you very much for your interest in the concerns of our clients Yak-Tat Kwaan, Inc. and Koncor Forest Resource Management Co. We very much appreciate the meeting you set up concerning the Coastal Zone Regulations. At that meeting we submitted what we thought would be a better version of 6 AAC 80.100 along with some ideas for a letter of intent for the legislature. At that meeting you proposed that certain sections of 6 AAC 80.100 be deleted leaving other sections in for approval by the legislature. I indicated that under the practical constraints on every one, since the legislature does not seem to either have the power or is willing to challenge the opinion of the Attorney General that it does not have the power to amend the regulations, your proposal is the best one at this time. As we mentioned at the meeting, we still have problems with 6 AAC 80.100(b)(1) because it seems to refer to potential adverse environmental impacts as opposed to actual adverse environmental impacts. This will put a tremendous burden on the timber industry to show that they will not cause "potential" adverse environmental impacts. As I know you realize, it is very difficult to prove that you will not cause a potential adverse environmental impact and it was my understanding that you were going to refer to this problem in a letter of intent or instruction to the Alaska Coastal Policy Council with suggestions that it be corrected. Also we are concerned with the use of the word "planned" in 6 AAC 80.100 (c)(3), which is a section which you indicated you are going to recommend that the legislature approve. We hope that the council will see fit to delete this word in the future. As I indicated,

our concern is that the regulations will be used to examine the management process of someone in the timber industry as opposed to being only concerned with the design and construction of roads. Fran Ulmer indicated that my concern was totally misplaced and that there was no intention to get into determining how a company involved in the timber industry would be managed. Therefore, there should be no problem in the deletion of the word "planned." I hope this will be contained in your recommendation to the Alaska Coastal Policy Council.

Also I indicated to you and to Murray Walsh that my clients still preserve their right to appear before the Council to make suggestions concerning any new regulations or changes in these regulations as they deem appropriate and that I did not expect to have them told at such time that our willingness to go along with the regulations with your changes because of the practical problems faced by the legislature should be deemed as somehow an acceptance that these regulations are in the best form possible.

Enclosed is a copy of my letter to Joe Orsini which transmits a copy of this letter to him. Because of Joe's birthday party last Friday, I did not have a chance to speak with him at length and told him that I would send him a copy of my letter to you, along with a letter to him concerning these regulations.

Again, thank you for your interest in the problems of these regulations and I hope that your suggestions as to how to solve the problems in the timber harvest and processing part of the regulations will be accepted by your committee and by the legislature.

Sincerely yours,

KEANE, HARPER, PEARLMAN AND
COPELAND

Re: Coastal Zone Regulations

Dear Joe:

Thank you for the few minutes you had to spend with me last Friday.

Enclosed is a copy of my letter to Lisa, which I said I would send to you.

The content of Lisa's proposal is not clear in my letter to Lisa. It was my understanding that Lisa's suggestion was that certain sections of the timber harvest and processing regulations in the Coastal Zone Regulation be deleted. These sections were 6 AAC 80.100(a),(b), (2)(b), (3), (c)(4), and (d). This will leave sections 6 AAC 80.100 (b)(1), and (c)(1) through (3).

As you can tell from my letter to Lisa our attitude toward this proposal is that it seems the best political compromise at this time and we hope to be able to clean up the rest of the problems when new regulations are reviewed again by the Coastal Zone Council.

Sincerely yours,

KEANE, HARPER, PEARLMAN AND
COPELAND

Juneau, Alaska 99811
(907) 465-3870

LETTER OF INTENT - - CSHCR 125

By the Community and Regional Affairs Committee

Testimony received by the Communtiy and Regional Affairs Committee identified three sections of the regulations submitted by the Alaska Coastal Policy Council for which change is suggested. The first two sections bear upon the desire of the members of the committee to maintain the broadest possible opportunity for public participation in the understanding of the process of developing district and state coastal management programs. Specifically,

(1) in 6 AAC 85.120(b), it is the intent of the committee that, in addition to giving of notice of public hearing by newspaper advertisement, where no newspaper of general circulation exists within a community or region, general notice should be given by radio;

(2) in 6 AAc 85.140, it is the intent of the committee that broad public circulation through general notice or radio broadcast be given to recommendations of the Coastal Policy Council in its review of district programs, that the public at-large (rather than only those persons specifically served a written copy of the Council's recommendations) have oportunity to respond with written comments, and that the public at-large enjoy the opportunity to attend all subsequent sessions, including mediation sessions.

Language adopted by the Coastal Policy Council in each of the sections cited complies with the letter of each underlying statute; the committee recommends reconsideration and change to more nearly accord with the spirit of public participation and understanding which is the basis of the coastal management program.

The third section of the regulations of concern to the committee is the standards for timber harvest and processing in the coastal area, 6 AAC 801100. The committee finds the language and intent of this section to be confusing and potentially detrimental to the development of timber harvest and processing in the coastal portions of the state.

Rather than disapprove the entirety of the section, leaving no standards for interim guidance to state agencies and local districts, the committee has chosen to disapprove only the paragraphs which give rise to confusion and protest, leaving those paragraphs which state broad policies for timber harvest and processing activity. They will serve as a guide for coastal management districts in the formulation of their respective programs, and to demonstrate to the federal government that the Coastal Policy Council is attempting to meet the threshold requirements of applicable federal laws in order to gain the benefits of federal program approval, federal financial assistance, and, most significantly, federal consistency with the state program ultimately adopted.

It is the intent of the committee, with respect to the timber harvest and processing section under review, that the Coastal Policy Council review the entire section and resubmit a comprehensive standard for consideration and approval by the next Legislature. A comprehensive policy statement should, at minimum,

(1) Define the term "sustained yield" if the Council determines that "sustained yield" is an appropriate standard for timber harvest in coastal areas,
(2) Eliminate absolute terminology with regard to the environmental impacts of timber harvest activity or define the term "adverse environmental impacts" to mitigate the absolute terminology;
(3) Clarify the relationship between this section and a future Alaska forest practices act;
(4) Establish a process for coordinating the efforts of the various state departments and federal agencies which have jurisdiction in the area of timber harvest and processing.

LISA RUDD, CHAIR
HOUSE C&RA COMMITTEE

6 AAC 80.100. TIMBER HARVEST AND PROCESSING. (a) Commercial timber harvest activities in the coastal area must be sited in areas where the management of reforestation, using the best available technology, will result in producing a sustained yield of merchantable timber unless the area is to be converted to a use other than timber harvest.

(b) Commercial timber harvest activities in the coastal area must be conducted so as to meet the following standards:

(1) the location of facilities and the layout of logging systems must be managed so as to minimize potential for adverse environmental impacts;

(2) unrestricted fish movement in coastal waters must be assured; and

(3) timber harvest and timber management activities must be planned and implemented so as to protect streambanks and shorelines, prevent adverse impacts on fish resources and habitats, and minimize adverse impacts on wildlife resources and habitats as determined on a case-by-case basis by the Alaska Departments of Natural Resources, Environmental Conservation, and Fish and Game, districts, and appropriate federal agencies.

(c) Commercial timber transport, storage, and processing in the coastal area must be conducted so as to meet the following standards:

(1) onshore storage of logs must be encouraged where compatible with the objectives of the Alaska coastal management program;

(2) sites for in-water dumping and storage of logs must be selected and these activities conducted so as to minimize adverse effects on the marine ecosystem, minimize conflicts with recreational uses and activities, be safe from storms, and not constitute a hazard to navigation;

(3) roads for log transport and harvest area access must be planned, designed, and constructed so as to minimize mass wasting, erosion, sedimentation, and interference with drainage, and must be adequately maintained until they are returned to their pre-road natural drainage pattern (put to bed); and

(4) stream crossings, including bridges and culverts, must be kept to a minimum number, designed to withstand seasonal high water and flooding, and must provide for unrestricted passage of fish.

(d) Upon the effective date of a regulation adopted under the authority of forest practices legislation establishing a standard corresponding to a standard in this section, the standard in this section will not be applicable.

GOVERNOR'S OFFICE

Register 6 AAC 80.100.

6 AAC 80.100. TIMBER HARVEST AND PROCESSING. (a) Commercial timber harvest activities in the coastal area must be conducted so as to meet the following standards:

(1) The location of facilities and the layout of logging systems must be managed so as to minimize potential for adverse environmental impacts;

(b) Commercial timber transport, storage, and processing in the coastal area must be conducted so as to meet the following standards:

(1) Onshore storage of logs must be encouraged where compatible with the objectives of the Alaska coastal management program;

(2) Sites for in-water dumping and storage of logs must be selected and these activities conducted so as to minimize adverse effects on the marine ecosystem, minimize conflicts with recreational uses and activities, be safe from storms, and not constitute a hazard to navigation;

(3) Roads for log transport and harvest area access must be planned, designed, and constructed so as to minimize mass wasting, erosion, sedimentation, and interference with drainage, and must be adequately maintained until they are returned to their pre-road natural drainage pattern (put to bed).

OF COUNSEL
M. E. MONAGLE

May 16, 1978

The Honorable Joseph L. Orsini
Chairman, Senate Community & Regional
Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

Thank you for your letter to me of May 3, 1978 regarding the Coastal Management Regulations. I have specifically reviewed proposed section 6 AAC 80.100 dealing with timber harvest and processing. Due to the press of other business, most notably D-2 Legislation in Congress, I have not had an opportunity to focus on the Coastal Zone Regulations until now.

At ALP we have assumed that passage of SB-59, the Forest Practice Act, would supercede the Coastal Zone regulations. Upon reviewing 6 AAC 80.100 (d) we are not so sure. That section provides that Forest Practices legislation would be substituted for the Coastal Zone Management Act when the Forest Practices legislation is passed. An additional proviso of that subsection, however, requires that the Forest Practices Act establish a standard "corresponding to a standard in this section". A fast check of the Forest Practices Act shows that it will not establish such corresponding standards. Indeed, the Coastal Zone Regulations will establish much higher standards and, therefore, there will be no substitution. We find this to be a most alarming situation.

Hence, this will be a somewhat detailed letter dealing with a number of problems in the timber area.

1. Section 6 AAC 80.100 requires the siting of timber harvest activities in areas "where the management of reforestation, using the best available technology will result in producing a sustained yield of merchantable timber". There does not appear to be a definition of "sustained yield" in the Act. The Federal government has used the words "sustained yield", (as appear in the Multiple Use Sustained Yield Act of 1960) to mean non-declining yield. More recently, in 1976 in the National Forest Management Act, the long standing Forest Service interpretation of Multiple Use Sustained Yield Act was incorporated into law. Were there to be any lawsuit on this, it would seem to me that a Court would use the Federal definition to interpret the words "sustained yield".

If "sustained yield" means non-declining yield it will make it impossible for many Native corporations to operate. Testimony before the Natural Resources Committee, on the Forest Practices Act indicated that. Accordingly, the requirement in the proposed draft of S.B. 59 that timber harvesting be limited to areas that would produce a "sustained yield" of merchantable timber was deleted from that Act. (Compare draft of S.B. 59 Section 41.17.040(b)(1) with CSSB 59 Section 41.17.060(b). Accordingly, even though ALP does not operate on private land, we would urge that subsection (a) be eliminated entirely.

The reason for suggesting elimination is that reforestation is not the business of the Coastal Zone Management Act. What that Act is attempting to insure is that activities in the coastal region are done in a sound environmental way. That is, its purpose is protection of the environment, not reforestation. Accordingly, it is inappropriate for Subsection (a) to be included in these regulations.

2. Subsection (b)(2) requires an assurance of unrestricted fish movement in coastal waters. It would therefore appear that any causeway built in connection with a log dump, and perhaps even wet log storage areas would be

prohibited. Accordingly, we would recommend that the words "assure unrestricted" be deleted and that the words "minimize restriction of" be inserted instead. This would seem to achieve the desired result without unreasonably burdening the timber industry.

3. Subsection (b)(3) has the potential for stopping the entire timber industry in coastal Alaska. It requires that timber harvesting be conducted in a way to "prevent adverse impacts on fish resources and habitats". It may be impossible to do this, depending, of course, on what is meant by "adverse impacts". "Adverse impacts" is not defined in the regulations, and therefore will mean what a Court says it means. What are adverse impacts? No one really seems to know. There is concern for example that long-range, low-level amounts of sedimentation impact fish. We cannot disprove that this is so. Therefore, any group citing this fact could halt any timber operation in coastal Alaska. We would most strongly urge that the word "prevent" be deleted and that the word "minimize" be substituted in lieu thereof. This would make it consistent with impacts on wildlife or resources and their habitats.

Further, we would suggest that the words "minimize" adverse impacts" be defined. The definition should be drafted so as not to prohibit logging where adequate streamside mitigation measures are utilized. Adequate streamside mitigation measures include presently accepted practices in Southeastern Alaska, as required in the Southeast Area Guides put out by the Forest Service.

In any event, please be assured that we are extremely concerned about this section and urge you to mitigate its clear possibility for great damage to the industry.

4. So that the definition for "minimize adverse impacts" is consistent throughout we would suggest that the word "effects" in the third line of Subsection (c)(2) be deleted, and the word "impacts" be substituted therefore.

5. Subsection (d) also should be altered. The words "establishing a standard corresponding to a standard

in this section" should be deleted entirely. The Forest Practices Act should be the sole vehicle for determining what are and what are not appropriate forest practices. Operators should not be faced with dual sets of regulations emanating from different agencies of the State government. One of the principal reasons why we have worked so hard at ALP for the Forest Practices Act is to eliminate the nightmare of several State agencies using overlapping procedural requirements to regulate the same things. The words which we suggest for deletion would have just that effect. As the section is presently written a court somewhere would have to determine whether or not a standard in the Forest Practices Act was similar to that required in the Coastal Zone Management Act. This simply should not be allowed to happen.

Thank you again for providing us with a copy of these regulations, and the opportunity to respond. I am taking this opportunity to forward them to representative Lisa Rudd, who is Chairman of the House Community and Regional Affairs Committee for her consideration as well.

Yours very truly,

James F. Clark

The Honorable Hugh Malone
Alaska State House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Mr. Malone:

The Coastal Policy Council met in Juneau May 4 and 5 to discuss a number of issues which we have had to ignore to date while developing and refining the guidelines and standards which were submitted to you in early April.

One of the issues discussed is coastal management in the unorganized borough. Staff prepared a series of thorny questions to stimulate discussion (see attached). Not surprisingly few of the questions were answered and several more were identified. However, the Council did reach consensus on several policy positions, two of which require legislative action for implementation.

The Council adopted the attached resolution supporting that provision of HCSSB 338 which extends the time for consolidation of coastal resource service areas.

The Council also requests funding from the Legislature to assist those areas of the unorganized borough which wish to engage in the organization and planning efforts associated with initial development of a district coastal management plan. The Council received testimony from a number of individuals, including Dan Branch (AVCP), John Shively (NANA), Ralph Amouaka (Aleutian/Pribilof), and George Allen (Rural Cap) indicating that although there are groups in the unorganized borough interested in assisting the organization of districts to do coastal planning, no resources currently exist for those groups to do the necessary travel, communication and education which would be essential. As you are aware, the Alaska Coastal Management Act provides that coastal planning must be done by local resource districts except in extreme situations when the Council may direct such planning. In the unorganized borough resource district planning can be accomplished only through the formation of a resource service area. Many areas want and/or need the benefits of coastal resource planning but need assistance in organizing a service area.

Dear Senator Orsini:

Thank you for the copies of the letter sent to you by the U.S. Coast Guard on May 1, 1978.

The Office of Coastal Management has examined that letter in detail at our request, and has prepared the attached response.

We have reviewed OCM's response and generally concur with it. Please advise us if you should receive any additional communications of this type, and we will be pleased to respond again.

We appreciate the opportunity to comment on this matter, and we are at your disposal for any future discussions on the ACMP Guidelines and Standards

Sincerely,

ALASKA
COASTAL MANAGEMENT PROGRAM

May 10, 1978

OFFICE OF COASTAL MANAGEMENT.

Staff Response

To

May 1, 1978 Letter From

Admiral Hayes to Senator Joe Orsini.

We believe that the concerns expressed by the Coast Guard reflect a basic misunderstanding of the legal status of the guidelines and standards within the Alaska Coastal Management Program.

While the Coast Guard cites several sections of the guidelines and standards, federal Coastal Zone Management Act, and federal approval regulations in their letter, we can find no place in which the Alaska Coastal Management Act was cited. The guidelines and standards, as regulations, were never intended to stand alone from the statute under which they were promulgated. They can only be understood as implementing, interpreting, or making specific, but in no event repeating, the Alaska Act. See Drafting Manual for Administrative Regulations (State of Alaska Legislative Affairs Agency, 1976).

I. PARTICIPATION

The first major concern raised in the letter concerns "Participation". The problem cited here is lack of "a

mechanism for public participation at the district level in the development of local plans." (p. 1). The Coast Guard requests that 6 AAC 85.100 be "expanded to detail exactly when, where, and how government agencies will be allowed to participate in the development process". (p. 2).

We believe that a thorough reading of the guidelines and standards will provide this guidance.

6 AAC 85.120 requires that each district hold no less than two public meetings during the course of program development. The purpose of these meetings is to "inform the public and receive comments concerning the program". Reports of these meetings must be kept in a public file. 85.120(a).

The same section then requires each district to hold a formal public hearing before giving conceptual approval to a district program. At the hearing, "each interested person" is given the opportunity to comment, orally or in writing. A transcript or recording of this meeting must be sent to the Council. 85.120(b).

In addition, districts are required to "provide publicly advertised opportunities for public involvement in the development of all program elements...". 85.120(c).

The district is required to "provide the public, in a timely manner and in understandable form, information explaining the district coastal management program, the requirements of public participation in program development, how and when the public may participate in program development, what information is available, and where such information be obtained". 85.120(d).

It was, at all times, the intent of the Council to include federal agencies in the definition of the term "public". We believe that the above sections satisfy the concerns raised by the Coast Guard regarding participation.

Additionally, 6 AAC 85.130 specifically requires that "Districts shall provide opportunities for coordination and review required by federal...agencies..." (This would apply both before and after program approval).

6 AAC 85.140, provides that any party who participated in the district public hearing shall be served with and allowed the opportunity to comment on staff recommendations concerning the approval of district programs by the Council, as well as be served with the Council's decision, and allowed to attend mediation sessions. In the event of an adjudicatory hearing between the Council and a district, any such person may intervene as a party.

The internal guidelines of the Alaska Coastal Policy Council, adopted by the Council in March, 1978, contain other relevant provisions, as follows:

> "(1) Opportunities shall be provided for participation of federal agencies in the development, review and approval of all parts of the Alaska Coastal Management Program. Notice of Council meetings, public hearings, and other Council activities shall be provided to allow federal agency review and comment on the guidelines and standards, district programs, and any changes or additions to the Alaska Coastal Management Program. Considerable opportunities for review of Alaska's coastal program will be provided, by the State and by the federal Office of Coastal Zone Management, after the program is submitted to the Secretary of Commerce for approval under the provisions of Section 306 of the federal Coastal Zone Management Act of 1972, as amended.

(2) The Council shall provide coastal districts with a specific listing of state and federal agencies having interests, expertise and responsibilities concerning coastal resources, habitats, and development.

(3) Detailed procedures for federal consultation and consistency shall be contained in the management program document to be submitted to the Secretary of Commerce in mid-1978..."

II. PRIORITY OF USES

The second major concern cited by the Coast Guard is the failure of the guidelines and standards to "mention...regional benefit, national interest, or defense considerations". (p. 2).

This comment has apparently resulted directly from a failure by the Coastal Guard to consider the provisions of the Alaska Coastal Management Act in conjunction with the guidelines and standards.

6 AAC 85.070 requires each district program to "include a description of the uses and activities, including uses of state concern, that will be considered proper, and the uses and activities, including uses of state concern, that will be considered improper within the coastal area, including land and water use designations."

The definitions of the term "uses of state concern" is contained in AS 46.40.210(6) and includes "(A) uses of national interest, including...navigational facilities...and national defense and related security facilities..." and "(B) uses of more than local concern...".

In reviewing district programs, the Council is required to find that the district program does not "arbitrarily or unreasonably restrict or exclude uses of state concern". AS 46.40.060. The following section of the Act, AS 46.40.070(c), contains detailed criterial for making this finding.

In addition, the Council has specifically provided that the interagency (state) regional planning team "assist the Council and districts in identifying uses of state concern and developing management policies for these uses". 6 AAC 80.030(b)(3).

III. SPECIFICITY

The third major concern expressed by the Coast Guard is that "the present Standards and Guidelines are lacking in specificity and substance and, as a result, the plans developed and implemented by Alaska Coastal Resource Districts (sic) may vary so widely that the Coast Guard may be compelled to operate under as many as 50 different plans within Alaska rather than under one plan which is implemented by various local government units." (pps. 2 -- 3).

This concern suggests a misunderstanding of the federal (306) approval regulations as well as the Alaska Coastal Management Act.

Proposed federal Coastal Zone Management Approval regulation 923.42 concerns the "technique of control" which a state chooses to exercise its coastal management program. One such technique is "direct state control". Under this

technique, the state controls land and water uses through "direct state land and water use planning and regulation." This would, in fact, result in "one plan" statewide. However, the technique chosen by the State of Alaska, and reflected in the Alaska Coastal Management Act, is "local implementation". Under this technique, the state sets basic standards or criteria, while the local governments prepare local programs. Given the diversity and independence of communities in Alaska, any other plan would be unacceptable.

In our opinion, the Alaska Act and guidelines and standards provide the minimum amount of uniformity required for an implementable coastal management program while allowing the maximum amount of local discretion. The standards to be applied by the Council concerning uses of state concern, referred to above, provide the assurance to the Coast Guard and other federal agencies that they will not, in fact, have their functions impaired by local programs. Coordination can be assured if the Coast Guard will keep abreast of district program development and Council review of those programs.

This office understands that the Coast Guard, or any other federal agency, may have difficulty in monitoring the development of district programs. We have always responded to those concerns by committing the Office of Coastal Management and the Department of Community and Regional Affairs to assist in every way possible to assure adequate federal input to local programs (see Council's Internal Guidelines, above).

We will transmit information on national interests to the districts, provide districts with lists of contact people in federal agencies, inform federal agencies of pending events at the district level, send federal agencies' drafts of district materials when they are available, and, mount special efforts to involve federal agencies in the Council review of district programs. All of these services will be set forth in detail in the ACMP program document, but we do not believe that reporting these services in the Guidelines and Standards is appropriate.

The Coast Guard letter discusses a number of specific examples in which the guidelines and standards are allegedly not sufficently specific (p. 3). The issue of improper delegation of authority from the Council to the districts is raised. In more than one case, the Coast Guard alleges non-compliance with federal regulations.

With respect to these matters, we would note that the State of Alaska Department of Law has determined, in approving the regulations under AS 44.62.060, that they meet basic "legality" and "constitutionality" requirements, and hence do not constitute an improper delegation. The basic philosophy of decentralization and maximum district control was decided by the legislature when it enacted the Alaska Coastal Man-agement Act. The guidelines reflect this.

IV. TOO RAPID DEVELOPMENT

Finally, the Coast Guard notes the rapid pace at which the guidelines and standards were developed, and the lack of time on their part for adequate coordination and review

(p. 1). Parties who have been involved in the development of the guidelines and standards since the inception of the Council in September, 1977 are cognizant of this problem. Both the Alaska Coastal Management Act and the federal program approval requirements have had the effect of making time of the essence. During the six months in which it had to work on the guidelines and standards, the OCM staff distributed, according to the Coast Guard, six drafts for comment; this was done in an effort to maximize participation and coordination, not impair it. At some point, the comments had to end and a draft had to be submitted to the legislature. This was done in early April.

We would also note that the Hearing Draft, which preceded the final draft sent to the legislature, was made available to the Coast Guard in late January. The formal comment period ended in early March (nearly 60 days after publication). Another three weeks elapsed from the time of closing the formal comment period to the actual Council meeting at which the Hearing Draft was revised into the final Draft. The Coast Guard attended that meeting. The Council dealt with each section of the Guidelines and Standards individually, and provided an opportunity for public comment on each section as it came up for Council consideration. The Coast Guard made no effort to comment in this framework, although this was the appropriate time and place to bring up specific points to the Council.

We would note that the first section of the guidelines

and standards, 6 AAC 80.010, requires the Council to review the regulations annually. This reflects the Council's desire to continue refining and improving the guidelines and standards, in cooperation with the Coast Guard and all other interested parties, and its awareness that the version adopted in April is not cast in stone.

The Coast Guard did provide written comments on the January hearing draft of the guidelines and standards. We have not made individual replies to these comments or to any others since the final guidelines and standards themselves constitute our best response. The Coast Guard's comments were used along with dozens of others to prepare the final guidelines and standards that were sent to the legislature. We will respond to the individual comments as time permits, but given the shortness of time remaining, we feel that our primary duty is to prepare the ACMP program document and other tasks related to transmission of the final guidelines and standards to the legislature.

V. SUMMARY

Time continues to be of the essence. The Alaska Coastal Management Program is in its fourth year of program development. It must receive program approval from NOAA this year or it will be ineligible for further development funding. Any changes in the guidelines and standards at this point would require APA review and legislative approval, an impossibility before the legislature adjourns this summer. The effect of pressing for such changes at this time would not result in a correction of defects before submittal to NOAA, but rather result in a scuttling of the Alaska Coastal Management Program.

OF COUNSEL
M. E. MONAGLE

May 16, 1978

The Honorable Joseph L. Orsini
Chairman, Senate Community & Regional
Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

Thank you for your letter to me of May 3, 1978 regarding the Coastal Management Regulations. I have specifically reviewed proposed section 6 AAC 80.100 dealing with timber harvest and processing. Due to the press of other business, most notably D-2 Legislation in Congress, I have not had an opportunity to focus on the Coastal Zone Regulations until now.

At ALP we have assumed that passage of SB-59, the Forest Practice Act, would supercede the Coastal Zone regulations. Upon reviewing 6 AAC 80.100 (d) we are not so sure. That section provides that Forest Practices legislation would be substituted for the Coastal Zone Management Act when the Forest Practices legislation is passed. An additional proviso of that subsection, however, requires that the Forest Practices Act establish a standard "corresponding to a standard in this section". A fast check of the Forest Practices Act shows that it will not establish such corresponding standards. Indeed, the Coastal Zone Regulations will establish much higher standards and, therefore, there will be no substitution. We find this to be a most alarming situation.

Hence, this will be a somewhat detailed letter dealing with a number of problems in the timber area.

1. Section 6 AAC 80.100 requires the siting of timber harvest activities in areas "where the management of reforestation, using the best available technology will result in producing a sustained yield of merchantable timber". There does not appear to be a definition of "sustained yield" in the Act. The Federal government has used the words "sustained yield", (as appear in the Multiple Use Sustained Yield Act of 1960) to mean non-declining yield. More recently, in 1976 in the National Forest Management Act, the long standing Forest Service interpretation of Multiple Use Sustained Yield Act was incorporated into law. Were there to be any lawsuit on this, it would seem to me that a Court would use the Federal definition to interpret the words "sustained yield".

If "sustained yield" means non-declining yield it will make it impossible for many Native corporations to operate. Testimony before the Natural Resources Committee, on the Forest Practices Act indicated that. Accordingly, the requirement in the proposed draft of S.B. 59 that timber harvesting be limited to areas that would produce a "sustained yield" of merchantable timber was deleted from that Act. (Compare draft of S.B. 59 Section 41.17.040(b)(1) with CSSB 59 Section 41.17.060(b). Accordingly, even though ALP does not operate on private land, we would urge that subsection (a) be eliminated entirely.

The reason for suggesting elimination is that reforestation is not the business of the Coastal Zone Management Act. What that Act is attempting to insure is that activities in the coastal region are done in a sound environmental way. That is, its purpose is protection of the environment, not reforestation. Accordingly, it is inappropriate for Subsection (a) to be included in these regulations.

2. Subsection (b)(2) requires an assurance of unrestricted fish movement in coastal waters. It would therefore appear that any causeway built in connection with a log dump, and perhaps even wet log storage areas would be

prohibited. Accordingly, we would recommend that the words "assure unrestricted" be deleted and that the words "minimize restriction of" be inserted instead. This would seem to achieve the desired result without unreasonably burdening the timber industry.

3. Subsection (b)(3) has the potential for stopping the entire timber industry in coastal Alaska. It requires that timber harvesting be conducted in a way to "prevent adverse impacts on fish resources and habitats". It may be impossible to do this, depending, of course, on what is meant by "adverse impacts". "Adverse impacts" is not defined in the regulations, and therefore will mean what a Court says it means. What are adverse impacts? No one really seems to know. There is concern for example that long-range, low-level amounts of sedimentation impact fish. We cannot disprove that this is so. Therefore, any group citing this fact could halt any timber operation in coastal Alaska. We would most strongly urge that the word "prevent" be deleted and that the word "minimize" be substituted in lieu thereof. This would make it consistent with impacts on wildlife or resources and their habitats.

Further, we would suggest that the words "minimize" adverse impacts" be defined. The definition should be drafted so as not to prohibit logging where adequate streamside mitigation measures are utilized. Adequate streamside mitigation measures include presently accepted practices in Southeastern Alaska, as required in the Southeast Area Guides put out by the Forest Service.

In any event, please be assured that we are extremely concerned about this section and urge you to mitigate its clear possibility for great damage to the industry.

4. So that the definition for "minimize adverse impacts" is consistent throughout we would suggest that the word "effects" in the third line of Subsection (c)(2) be deleted, and the word "impacts" be substituted therefore.

5. Subsection (d) also should be altered. The words "establishing a standard corresponding to a standard

in this section" should be deleted entirely. The Forest Practices Act should be the sole vehicle for determining what are and what are not appropriate forest practices. Operators should not be faced with dual sets of regulations emanating from different agencies of the State government. One of the principal reasons why we have worked so hard at ALP for the Forest Practices Act is to eliminate the nightmare of several State agencies using overlapping procedural requirements to regulate the same things. The words which we suggest for deletion would have just that effect. As the section is presently written a court somewhere would have to determine whether or not a standard in the Forest Practices Act was similar to that required in the Coastal Zone Management Act. This simply should not be allowed to happen.

Thank you again for providing us with a copy of these regulations, and the opportunity to respond. I am taking this opportunity to forward them to representative Lisa Rudd, who is Chairman of the House Community and Regional Affairs Committee for her consideration as well.

Honorable Joseph L. Orsini, Chairman
Senate Community & Regional Affairs
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

We have just recently been made aware of possible problems in the Coastal Zone Management Regulations concerning Section 6AAC 80.100 dealing with timber harvest and processing.

We had assumed that passage of SB-59, the Forest Practices Act, would take precedent over the Coastal Zone regulations. However, we are now concerned over the opposition given to SB-59 and do not see in this Bill the wording that would allow it to supersede the Coastal Zone regulations.

We are aware of the late date and the fact that the Senate is only in the position of pass or not pass on the regulations. What we would propose, would be an acceptance of the regulations in principle but a request to the Coastal Zone Council that they amend the regulations such that they do not exceed the requirements of the Forest Practices Act.

As we have previously expressed to you, our hope in getting a Forest Practices Act was to pull together the various State requirements and reduce the duplication of regulations and repetitive permits faced by timber operators.

Any attention you can give to this problem will be appreciated.

Sincerely,

D. L. Finney, Manager
Forestry & Government Affairs

P.O. BOX 237 / DILLINGHAM / ALASKA 99576 / PH. (907) 842-3070.

February 17, 1978

Representative Nels Anderson, Jr.
Pouch V
Juneau, Alaska 99811

Dear Nels:

Just received your letter you wrote to Ted Angasan dated 14 February, 1978.

I'm in full support of your Resolution #58. I don't want to see you withdraw your Bill or quit working for a Regional office for here. It's long overdue. Our people in the villages and here have contiruously asked for a BIA office in the Bristol Bay Region.

Things are okay here. Keep up the good work. Give Dorothy and the kids my best regards.

Regards,

BRISTOL BAY NATIVE CORPORATION

Harvey

Harvey Samuelsen
President

HS:ms

Recommendation

The Bristol Bay Native Association and the Alaska Federation of Natives should secure the cooperation of BIA and the state's Congressional Delegation in obtaining Congressional authorization and appropriation of funds under PL 93-638 to enable villages to hire a village leader and to establish a village administrative office.

Meeting Local Needs — Three Examples

Communities should develop their priorities, then proceed to explore funding sources. A careful analysis of the project, both capital and operating costs and revenue, should be prepared. Alternative methods of accomplishing the objective should be evaluated. For example, the Alaska Village Electric Co-op, Inc. (AVEC) has found that it requires a village of 125 to 150 to economically justify the installation of a power system. Villages complain that if they receive their power from the local school, it is not available in the summer. Possibly AVEC could purchase the equipment from the school, add the necessary additional equipment and the school could purchase power from the community. In addition, if a community without power is located within 5-7 miles from a village with power, it may be economical for AVEC to install a transmission line. This additional load may also enable the village with power to better service and amortize their facilities.

A small village may desire a grocery store. Even if it is a co-op, analysis may indicate it is not economic in view of the capital requirements. However, a consumer buying co-op could be organized which would have many of the advantages of a store yet promise lower prices for food because of the absence of capital costs. A common desire of villages is to establish a bulk fuel storage tank. A word of caution — unless a careful analysis is prepared of the proposal, the resulting fuel may be more expensive than the present distribution system. Both Community Enterprise Development Corporation (CEDC) and Alaska Native Industries Cooperative Association (ANICA) are prepared to assist in evaluating the feasibility of a fuel oil operation. The feasibility of alternative methods of supplying fuel locally should be examined, with the attendant costs, before committing to a particular project.

Recommendations

1) There are many possible sources of funding for local projects. BBNA should designate one individual to gather information on funding sources and to keep current on changes in regulations and development of new sources. The availability of this resource person should be publicized among the villages.

2) Many federal and state agencies have considerable impact on the Natives of Bristol Bay; however, BIA has a special relationship. BIA has regional offices in Alaska to facilitate communication with Natives and Native organizations. The Bristol Bay region is served by Anchorage and communication has been difficult. It is expensive for Bristol Bay residents to personally pursue problems or projects with BIA in Anchorage when other forms of communication fail. It is therefore recommended that BIA establish a Regional Office in Dillingham.

3) The importance to economic development of political and social development of the Region and villages should not be underestimated. It is recommended that BBNA and BBAHC develop additional strategies to stimulate local initiative in these areas while continuing to provide important direct services and resource assistance.

velopment of para-professionals supervised by a Registered Nurse. This RN has considerable nursing experience and background. Other programs of BBAHC include innovative approaches to Alcoholism and Drug Abuse, village health planning and village planning. BBAHC also has a unique and "vibrant" Medical Department that produces video and audio media and an Emergency Medical Services Planner.

The above organizations are serving many of the needs of the Bristol Bay region which reduces the need to develop an areawide borough. The residents should maintain the initiative on this matter, with discussions and proper planning, rather than allowing the decision on formation of a borough to be made externally.

With the development of oil and gas resources in Bristol Bay, the question of a region-wide taxing authority should again be reviewed. The North Slope Borough has recognized the advantage to be gained from mineral development in remote areas.

2) **Community Development.** An earlier study produced under this Act, **Bristol Bay: The Fisheries and Its People,** detailed the needs and priorities of each village in the region. The above study was a "grass roots" planning document in which the people in each village indicated their needs. Implementation remains.

Most villagers have neither the training nor access to information, agencies, etc to prepare grant requests. This could be an important function of the Bristol Bay Area Health Corporation and the Bristol Bay Native Association, who could serve the needs of villages by assisting them in initiating grants. The existence of the planning, no matter how well prepared, will not build any houses, develop water and sewer systems or meet any of the other desired goals. Someone or some group must initiate the process and push for its implementation. Federal and State Agencies will respond, but it is very unlikely that they will initiate any of the projects.

The Importance of Local Initiative

Probably the single most important ingredient in community development is local initiative and desire. An external group, such as a borough or BBNA, can assist the local community; however, the "driving force" needs to be the community leadership. An outside group does not want to be in the position of providing services to people who appear indifferent to the service. In addition, all outside agencies have more than enough to do without seeking to provide services to communities who do not really care.

Community leadership can be difficult when the planning, organizing and follow-through must depend entirely on volunteers who must support a family and where records are scattered in individual homes. Some villages are able to overcome these handicaps and effectively initiate and develop projects. Many other villages are not able to do so.

Public Law 93-638, the India . Self Determination and Indian Education Assistance Act, was designed to encourage Natives to assume local control of many services previously provided directly by the federal government. An important contribution to local Native planning and implementing of projects would be the provision of funds under Pl. 93-638 to enable villages to employ a village leader and construction funds for a village office and meeting room. This leader would then have the time to coordinate planning and supervise implementation of projects.

STIMULATING POLITICAL AND SOCIAL DEVELOPMENT

Political and social development should ideally proceed prior to or concurrently with economic development if the residents of Bristol Bay are to fully realize the benefits of economic development. An important step in this development would be the establishment of a regional municipal government. The Bristol Bay region, however, presently has neither the population nor economic resources to support an effective borough government. Several villages have incorporated as second class cities, however, and every effort should be expended to assist them in developing an effective local government. As additional villages incorporate and gain experience in government, a borough may become feasible and desirable.

Planning and discussion of a borough government should not be delayed until a borough is forced upon the region by external circumstances. The thinking should be long range and the concepts discussed at the village level. The establishment of the borough should be delayed, however, until the need for its services is recognized and the costs and benefits are known.

1) **Present Regional Infrastructure.** At the present time there are three organizations assuming many of the functions ordinarily performed by an areawide borough.

   a) **Bristol Bay Borough.** The Bristol Bay region currently has one borough — the Bristol Bay Borough. The Bristol Bay Borough, however, includes only the communities of Naknek, South Naknek and King Salmon. The remainder of the region is unorganized; however the present borough has initiated action to expand its boundaries.

   b) **Bristol Bay Native Association.** The Bristol Bay Native Association (BBNA) is composed of the representatives of the 29 Native villages of Bristol Bay. The BBNA Board of Directors meets three times yearly to discuss issues of a political nature, as well as to hear reports on current activities and to plan for future activities. The Executive Committee meets more frequently.

in the social development area, BBNA has spearheaded a regional housing authority, is actively involved (in cooperation with the Rural Alaska Community Action Program) in winterizing homes in the South Peninsula area and has introduced grants of local assistance to a number of villages. Additionally, BBNA is actively involved in employment assistance, job development, post-secondary classroom training, limited skills development; BBNA Education is involved in the administration of a bilingual, bicultural education programs to 18 villages directly, and four more indirectly. The Association also has an Office of Community Advocacy, specifically for the purposes of village and community planning activities.

BBNA is also involved in planning and helping to spearhead and coordinate the development of an economic system. Planning activities include coordinating the development of an overall development plan with village corporation development. Programs include Economic Planning, with input from a regionally composed OEDP Committee; employment and training services, including a DOC prime contract and several subcontracts; a Johnson-O'Malley educational enrichment program; village advocacy, local government assistance, grantswriting for villages, and other like activities.

   c) **Bristol Bay Area Health Corporation.** The Bristol Bay Area Health Corporation (BBAHC) is composed of representatives of all 29 Native villages of Bristol Bay. The BBAHC Board of Directors meets four times annually, with the Executive Committee meeting more frequently.

The spheres of activity are social and economic, i.e., improving the health standards and medical service delivery in Bristol Bay. Programs of this organization include a Community Health Aid Program which is geared toward de-

SUMMARY OF RECOMMENDATIONS

This section abstracts the recommendations from each of the following sections and organizes them by the responsible agency.

FEDERAL GOVERNMENT

Department of Interior

It is strongly urged that D-2 legislation establishing future land use carry a provision that specifically guarantees traditional users the right to traditional usage of the land in federally withdrawn lands.

Bureau of Indian Affairs

It is urged that a Regional Office of BIA be established in Dillingham.

BIA is urged to request Congress to authorize and appropriate funds under PL 93-638, The Indian Self-Determination and Indian Educational Assistance Act, to allow small villages to hire a village leader and establish a village administrative office.

DEPARTMENT OF AGRICULTURE

U.S. Forest Service

The U.S. Forest Service is requested to make an inventory of timber resources of Bristol Bay and determine the maximum substainable yield.

The Forest Sciences Laboratory in Juneau is requested to evaluate the grazing potential of forest lands in the Bristol Bay region when funds are available.

Soil Conservation Service

The Soil Conservation Service is requested to make an Environmental Impact Statement of the effect of reindeer herding in Bristol Bay including an estimate of the carrying capacity.

DEPARTMENT OF COMMERCE

Economic Development Administration

Funds should be sought from EDA to conduct a manpower assessment and training program to support a reindeer industry.

STATE OF ALASKA

Department of Natural Resources

It is strongly urged that specific legislation be enacted guaranteeing traditional usage of the land for designated state restricted lands, for example, the proposed Wood-Tikchik State Park.

Department of Education

Bilingual and bicultural curriculums should be developed which include industrial arts training.

Local schools foster community pride in educational achievement. We recommend that local school programs be strengthened and that additional local high schools be established.

The Department of Education and the University of Alaska are urged to jointly develop a program of vocational education and training for the Bristol Bay region.

Department of Labor

The Department of Labor is urged to develop a training program for vocational skills needed in construction and in possible oil and gas development.

Department of Aviation

A projected construction schedule for upgrading airports in Bristol Bay villages should be prepared and funds requested. Priority should be given to those villages needing these improvements in order to develop their business potential.

Department of Fish and Game

The Department of Fish and Game is urged to develop and initiate projects to replenish the stock of salmon.

The Department is also requested to evaluate the impact of reindeer herding on the game resources of Bristol Bay.

Department of Public Works

The Department of Public Works is urged to build a boat harbor at Perryville and Chignik so that local fishermen can fish on a year-round basis. Naknek and South Naknek also need boat harbors.

University of Alaska

The University of Alaska should develop training programs designed to develop entrepreneural and management talent among

FROM: Representative Lisa Rudd

RE: HJR 58 - Relating to the Bureau of Indian Affairs and Bristol Bay.

Your resolution relating to the BIA and Bristol Bay, HJR 58, has been referred to our committee and we will need some backup information on the bill before it is considered in committee.

Some specific questions occurred to me as I reviewed the bill and I wish you would include information about them in the backup material which you provide for the committee:

1) What is the population of the region?

2) How many villages are involved?

3) What do the terms "village leader" and "village administration" mean in lines 25 and 26?

4) What governmental services are presently being delivered by the BIA in the Bristol Bay area?

Thanks, Nels, for clarifying these points for me.

Yours sincerely,

Lisa Rudd

LR/vb

3. Continued - Village Administration - This would tie in with the village leader (Last 4 paragraphs). Having local control, the people would naturally need an administrative office set up to administer the programs previously done by the federal government.

4. Mrs. Williams, Secretary of the BIA Area Director's office, Juneau informed me of what governmental services are presently being delivered by the BIA in the Bristol Bay area.

1) Higher education, Employment Assistance

2) Realators

3) Social Services - welfare, food stamps

4) 93-638 Grant Program - Indian Self-Determination Act

If this is not enough information I can call the Anchorage Area office and get all the governmental services being delivered by BIA.

Also, I can research how effective the Bristol Bay Area people think these BIA services are.

Most of this information was taken from the Study - "Bristol Bay - Its Potential and Development". Enclosed are excerpts from the study.

MEMORANDUM

TO: REPRESENTATIVE LISA RUDD

FROM: REPRESENTATIVE NELS A. ANDERSON, JR.

SUBJECT: Backup material for HJR 58 - BIA in Bristol Bay

First, I will answer your questions in your memo of February 15, 1978.

1. The population of the Bristol Bay Region is approximately 5,000.

2. 29 villages are involved.

3. The Importance of Local Initiative - Probably the single most important ingredient in community development is local initiative and desire. An external group, such as a borough or BBNA, can assist the local community; however, the "driving force" needs to be the community leadership. An outside group does not want to be in the position of providing services to people who appear indifferent to the service. In additon, all outside agencies have more than enough to do without seeking to provide services to communities who do not really care.

Community Leadership can be difficult when the planning, organizing and follow-through must depend entirely on volunteers who must support a family and where records are scattered in individual homes. Some villages are able to overcome these handicaps and effectively initiate and develop projects. Many other villages are not able to do so.

Public Law 93-638, the Indian Self Determination and Indian Education Assistance Act, was designed to encourage Natives to assume local control of many services previously provided directly by the federal government. An important contribution to local Native planning and implementing of projects would be the provision of funds under PL 93-638 to enable villages to employ a village leader and construction funds for a village office and meeting room. This leader would then have the time to coordinate planning and supervise implementation of projects.

RECOMMENDATION - The Bristol Bay Native Association and the Alaska Federation of Natives should secure the cooperation of BIA and the state's Congressional Delegation in obtaining Congressional authorization and appropriation of funds under PL 93-638 to enable villages to hire a village leader and to establish a village administrative office.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

OFFICE OF THE COMMISSIONER POUCH B -- JUNEAU 99811

March 9, 1978

The Honorable Joe McKinnon
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Representative McKinnon:

Attached is a copy of a list of all subgrantees employing CETA/PSE participants. The list includes the number of positions currently authorized, positions currently filled, and the number that each subgrantee will be reduced or increased on April 1, 1978 and June 1, 1978. The list is broken out by administrative region of the Department of Community and Regional Affairs. A map of Alaska showing the regions is included for easy reference.

Each subgrant is classified as either sustainment or project. Projects are those subcontracts negotiated as a result of the increased funding under the President's economic stimulus program. Sustainments are those contracts negotiated to sustain an enrollment of 516 participants which represent the number covered by the grant prior to the increase created by the stimulus package. By regulation, all projects must be eliminated before sustainment subgrants can be reduced.

The following chart reflects the number of enrollees currently on board. They are broken out by region as well as each region's percent of the total before and after the reduction.

TITLE VI

	BEFORE RESCHEDULE		AFTER RESCHEDULE	
	# of Positions	% of Positions	# of Positions	% of Positions
Region 1	262	35	164	32

NEWS RELEASE

MIKE GRAVEL

U.S. Senator-Alaska

March 13, 1978

Release: Immediate

GRAVEL REQUESTS FUNDS TO SAVE PUBLIC SERVICE JOBS

WASHINGTON -- Sen. Mike Gravel has asked Labor Secretary Ray Marshall for special funds to preserve 234 public employment positions in Alaska. Gravel said the positions, which were created to reduce unemployment, would be terminated April 1 unless the special funds are provided.

The 234 jobs are among 750 public employment positions administered by the state Department of Community and Regional Affairs. The jobs are provided under the Comprehensive Employment and Training Act (CETA).

Gravel said the jobs are threatened by a disagreement between the Department of Community and Regional Affairs and officials at the federal Region X office in Seattle.

According to the letter, the Region X office insisted that the department's program could be run with 750 job positions at a cost of $875 per position. The department's real costs have been higher, and in essence, it is now running out of money.

The Region X office finally recognized this situation, Gravel said, and raised the cost allowed per participant to $971. However, the allocation of federal money to the department was

NOT RAISED TO MEET THE HIGHER COST, MEANING THAT POSITIONS WOULD HAVE TO BE ELIMINATED IN ORDER FOR THE DEPARTMENT TO STAY WITHIN ITS BUDGET.

THE DEPARTMENT HAD A TWO-YEAR ALLOCATION OF ABOUT $11 MILLION FOR ITS CETA JOBS. GRAVEL SAID ANOTHER $1 MILLION FROM DISCRETIONARY FUNDS CONTROLLED BY SECRETARY MARSHALL WOULD ALLOW THE 234 POSITIONS TO LAPSE THROUGH ATTRITION, WITHOUT PUTTING PEOPLE OUT OF WORK APRIL 1.

THE ALASKA DEMOCRAT SAID THE STATE AGENCY HAD REQUESTED ADDITIONAL MONEY TO SAVE THE 234 JOBS, BUT HAD BEEN TURNED DOWN.

"THE DEPARTMENT WAS INFORMED THAT REDISTRIBUTED FUNDS WERE ONLY AVAILABLE TO INCREASE THE NATIONAL ENROLLMENT LEVEL AND NOT TO SUBSIDIZE EXISTING ENROLLMENT LEVELS," GRAVEL SAID. "THEREFORE, DESPITE THE FACT THAT ALASKA HAS THE HIGHEST UNEMPLOYMENT RATE IN THE REGION, NOT TO MENTION THE NATION, THE REDISTRIBUTED FUNDS WERE ALLOTTED TO AREAS WITH DROPPING UNEMPLOYMENT RATES.

"I AM GREATLY DISTURBED BY THE APPARENT DISTORTION OF THE INTENT OF THE CETA PROGRAM TO THE EXTENT THAT NATIONAL GOALS SUPERCEDED RATIONAL PROGRAM OBJECTIVES. WHEN IT BECOMES MORE IMPORTANT TO SATISFY PUBLIC RELATIONS GOALS THAN TO MEET THE CRITICAL NEEDS OF THE UNEMPLOYED, I QUESTION THE RELEVANCY OF THE PROGRAM."

GRAVEL SAID, "THE NATIONAL PROGRESS MADE IN REDUCING UNEMPLOYEMENT HAS NOT RESULTED IN REDUCED UNEMPLOYMENT IN ALASKA. OUR UNEMPLOYMENT RATE HAS CONSISTENTLY BEEN THE HIGHEST IN THE NATION.. IN FACT, IT IS USUALLY AT LEAST DOUBLE THE NATIONAL AVERAGE."

MIKE GRAVEL

The Honorable F. Ray Marshall
Secretary of Labor
Department of Labor Building
200 Constitution Avenue
Washington, D. C. 20210

Dear Secretary Marshall:

As you well know, the Comprehensive Employment and Training Act (CETA) program is the major Federal program for attacking structural and countercyclical unemployment. A significant initiative by the Administration last year resulted in 725,000 public service jobs, and a gradual decline in the unemployment rate nationally. The unemployment rate continues to decline and for the first time in several years a stabilizing trend is apparent.

Unfortunately, the national progress made in reducing unemployment has not resulted in reduced unemployment in Alaska. Our employment rate has consistently been the highest in the nation. In fact, it is usually at least double the national average.

It is with a very serious concern for Alaska's unemployed and a desire that the CETA program be utilized to its maximum effectiveness that I bring to your attention a critical problem involving the Balance of State prime sponsor. This situation has escalated to the point that I am requesting discretionary funds be made available to the prime sponsor.

Last year, the Alaska Department of Community and Regional Affairs assumed the Balance of State prime sponsorship. It reorganized the administration of the program to assure improved services to rural Alaska and developed consistent liaison with the Title III prime sponsors, which had been seriously lacking. At this time, the Balance of State program has stabilized and is successfully providing client services.

Unfortunately, the rapid improvement in the program has created a significant problem. Recent computations of program

costs by the prime sponsor indicate that the allowable costs per participant per month can no longer be tolerated if the program is to function through the fiscal year. Therefore, the client enrollment must be reduced 234 positions by April 1, 1978 due to the necessary modification in the cost per participant per month.

I want to present to you the history of this modification, which I think clearly illustrates why at this time the directive from the Department of Labor is unfair to the clients who must be laid-off and embarrassing to the Department of Community and Regional Affairs, which has acted in good faith.

The Balance of State prime sponsor commenced employment services in July 1977. Based on additional funds available, through the Economic Stimulus appropriation, its contract was modified in July, September and October 1977. In August the Region expressed concern over the low enrollment level and indicated that the prime sponsor would have to meet the enrollment level by September 30. In addition, the prime sponsor was advised that it was expected to absorb any excess funds due to prior program inefficiencies under different administration.

In order to comply, the prime sponsor decided to overenroll by 20%. Since history of the program indicated that it was difficult to maintain a constant enrollment, it was the determination of the prime sponsor that only by overenrolling for a period could it hope to reach the enrollment goal. The vacancy rate at this time was 30% and the cost per participant per month was $1050.00

The national interest in meeting President Carter's 725,000 public service jobs goal heightened the pressure on the Balance of State prime sponsor to meet its individual goal while absorbing past deficiencies. In November, the Regional office sent telegrams to the prime sponsors notifying them of their modified enrollment goals and its intention to reprogram.

With primary focus transferred to the enrollment levels, it became necessary to revise the cost per participant per month. As you know, each prime sponsor is funded by formula and either the prime sponsor's costs determine his enrollment, or vice versa. In the case of Region X the prime sponsors were expected to conform their costs to their enrollment levels.

As negotiations between the prime sponsor and the Regional office began in November, the prime sponsor found itself in an unusually difficult position. It was attempting to meet the enrollment goals, but finding that its costs would not allow it to do this within budget. When it presented this dilemma to the Regional office, it responded that the average cost per participant per month from July to October in the Balance of State program had been $875.00, and with this cost-per-participant base it should be able to meet the enrollment goal.

The base period used by the Region included the early stages of the employment program when enrollment was low and was characterized by turnover. The prime sponsor determined that a more realistic cost base was September through October when a program had begun to stabilize. The average cost per participant per month for this period was $1000.

However, in Region X's desire to maximize the available funds and achieve the President's announced goal the prime sponsor's $1000 cost per participant was rejected. On November 29, the prime sponsor proposed a new modification of $948.00, which was below costs at the time. This was also rejected by Region X and finally in December the prime sponsor agreed to $875.00 per participant. With this cost level the prime sponsor was expected to fill 750 job slots.

Notwithstanding the allowable cost level, the prime sponsor averaged $951.00 cost per participant per month from July to December 1977, and $984.00 from August to December 1977. The real cost of the program coupled with the prime sponsor's effort and success in meeting the enrollment goal made a significant impact on its budget.

The Regional office recently notified the Balance of State prime sponsor that its cost per participant per month will be raised to $971.00, which means that it must eliminate 234 employment positions by April 1. I submit to you, Mr. Secretary, that this action should have been taken last November when the prime sponsor requested a modification in the cost per participant and a modified enrollment level. If that had occurred in November, the reduced enrollment could have proceeded slowly and been achieved by attrition.

It is well known and easily documented that the cost of living in Alaska is the highest in the nation. An entry-level secretary would earn more than the $875.00 allowed by the Regional office for CETA positions. With the explicit mandate of the legislation requiring CETA employees to be paid commensurate with private sector for similar work performed, it is remarkable that the prime sponsor could place clients at all.

An additional fact you should be aware of involves the allocation of redistributed funds. When the Balance of State prime sponsor requested additional funds to help them maintain the high enrollment, it was informed that redistributed funds were only available to increase the national enrollment level and not to subsidize existing enrollment levels. Therefore, despite the fact that Alaska has the highest unemployment rate in the region, not to mention the nation, the redistributed funds were allotted to areas with dropping unemployment rates.

I am greatly disturbed by the apparent distortion of the intent of the CETA program to the extent that national goals superceded rationale program objectives. When it becomes more important to satisfy public relations goals than to meet the critical needs of the unemployed, I question the relevancy of the program. Alaska has significantly benefitted from the Title III CETA program and I hope will be given an opportunity to benefit from the Balance of State program. I recognize that it is more difficult to tailor national programs to Alaska, but I would point to the Title III program as evidence of the possibilities of doing this.

I would appreciate your investigation of this matter. Since the prime sponsor has an April 1 deadline, it is imperative that action be taken prior to this date. If it is not, clients will be laid-off and it will be impossible to rehire them due to the eligibility criteria. In this regard I request that you seriously consider a grant to the Balance of State prime sponsor from your discretionary fund. This would allow them to honor their contracts while beginning the phase-down in enrollment slots.

I wish to thank you in advance for your attention to this matter. Should you need further information in the course of your review, I trust you will not hesitate to call on me.

Sincerely,

Mike Gravel

HJR

CENTER FOR EQUALITY OF OPPORTUNITY IN SCHOOLING
THE ALASKA NATIVE FOUNDATION
411 WEST 4th AVENUE • ANCHORAGE, ALASKA 99501 • PHONE (907) 274-2541

April 6, 1978

Honorable Lisa Rudd
House of Representatives
Juneau, Alaska 99811

Dear Representative Rudd:

The Office of Education in Washington, D.C., is currently promulgating regulations which would end direct General Assistance Center services to school districts in Alaska.

The two enclosed papers provide a brief overview of the situation. "Implications..." sets out the effect upon Alaska should these new regulations become adopted, and the "Summary Report" tells of CEOS services in Alaska during the nine month period July 1, 1977 - March 30, 1978.

If you agree that Alaska with its multi-cultures can be most appropriately served by having a separate center for multi-cultural, bias-free, and multi-lingual assistance, please send letters and/or school board resolutions of support to Alaska's congressional delegation in Washington, D.C., and to Mr. Elton Ridge, as soon as possible. Attached is a list of names and addresses. The deadline for comments is April 19, 1978.

Thank you very much.

Sincerely yours,

CENTER FOR EQUALITY OF
OPPORTUNITY IN SCHOOLING

Jane

Jane Yamashiro
Senior Associate

Enclosures:
(1) "Implications..."
(2) Summary Report
(3) List of addresses

Implications of proposed regulations for multi-cultural and non-sexist technical assistance in Alaska

For nearly two years the Alaska Native Foundation has operated the Center for Equality of Opportunity in Schooling, funded under Title IV of the Civil Rights Act of 1964. Technically, it is a General Assistance Center providing race and sex desegregation assistance to school districts throughout Alaska at their request. In terms of staff time, the most important activity of the Center is planning and conducting workshops on-site for teachers and administrators in human relations and multi-cultural awareness, but assistance has also taken the form of developing checklists for Native materials development, a handbook for bilingual program planning, instruments for teacher selection, and a study on strategies for meeting developmental needs of rural youth.

By awarding the contract on a competitive basis for two successive years to the Foundation, the U.S. Office of Education accepted the proposed activities as consonant with the goals of the Civil Rights Act and its amendments. In 1977 the Foundation was advised before it was awarded the contract that multi-year funding should be anticipated and that applicants should plan accordingly.

This week, the March 20 Federal Register was received in Alaska carrying proposed rules for assistance centers narrowly defining their functions and establishing new multi-state service areas that effectively bar the Foundation or any other Alaska institution from entering the competition and that will bring to an end the kind and level of service provided to Alaska districts.

With regard to race and sex desegregation assistance, Alaska, is proposed to be a part of a service area including Washington, Oregon and Idaho. With regard to "national origin" desegregation, Alaska is proposed to be part of a service area including those states, Hawaii, Guam, the Pacific Trust Territory, Samoa, and the Northern Marianas! Since any assistance center would necessarily be located near populations to be served, no Alaska institution could be a successful applicant.

SUMMARY REPORT

CENTER FOR EQUALITY OF OPPORTUNITY IN SCHOOLING

SERVICES TO ALASKA

July 1, 1977 - March 30, 1978
(9 Month Period)

Prepared by Lydia Hays
Assistant Director, CEOS
March 30, 1978

CEOS Staff: Bob Arnold, Lydia Hays, Jane Yamashiro, Jim Chase, Dick Dauenhauer and Mary Lekanof

I. Alaska School Districts receiving direct assistance:

Total number of School Districts assisted:	28*
Total number of School Districts in Alaska:	50
Percentage of school districts served by CEOS in Alaska during the 9 month period	56%*

* NOTE: Statewide events wherein CEOS conducted portions of or all of the sessions included virtually all school districts

II. Types of assistance rendered:

A. Workshops conducted

1. Alaska Native and multi-cultural education/human relations	21
2. Human Relations/Values Clarification	4
3. Title IX, to eliminate sex discrimination	6
4. (Other workshops scheduled but cancelled for various reasons; are to be rescheduled)	4)
Total workshops held	31

Even more distressing is that services needed by Alaska districts to help them provide greater equality of opportunity to all learners will be virtually unobtainable under the scheme proposed. Such services have, heretofore, been provided with funds authorized under the Civil Rights Act.

The proposed rules would restrict race desegregation services to districts which are literally desegregating. There are none in Alaska, but this doesn't mean a minority child has an equal chance. The proposed rules would re-name a category of activities chiefly arising from English language deficiencies as "natural origin desegregation assistance." Can such assistance be rendered to Alaska's largest group of bilingual speakers--Alaska Natives? Their problem is not "national origin."

Finally, the proposed rules would artificially separate activities which are inseparable. Race, sex, language and culture persist in being key factors in making educational opportunities unequal. Reducing racism and sexism and increasing opportunities for all learners dictates that all key factors be addressed together.

What is needed in Alaska is a civil rights assistance center authorized to provide all three kinds of services. What is needed is that a center be in Alaska. Essentially this is what has existed since 1976, and any substantial change ought to be preceded by more than thirty days notice.

Comments on the proposed rules will be accepted until April 19, 1978, they should be addressed to: Mr. Elton W. Ridge, Room 2001, FOB-6, 400 Maryland Avenue SW, Washington D.C., 20202.

Robert D. Arnold

April 3, 1978

B. Consultations/requests for information through visits to CEOS office and telephone calls 90+

(NOTE: Requests for information by letter are not included in the 90+ figure. It is estimated that an additional 75 requests have come to CEOS by letter.)

III. Alaska education agencies receiving CEOS assistance on a statewide basis wherein virtually all school districts were represented:

A. Alaska Department of Education

1. Presentation on multi-cultural education at the State Right to Read Conference
2. Planning, conducting and evaluating the Language Assessment Training workshop (Dec., 1977, Anchorage)
3. Planning goals and objectives for the work session at the Bilingual-Bicultural Conference (Feb., 1978)
4. Conducting two of the 12 sectionals at the Bilingual-Bicultural Conference (Feb., 1978)
5. Consultation on ESAA proposals in Alaska
6. Consultation with Director of ADOE, Educational Program Support
7. Consultation with Director, Bilingual-Bicultural Program, ADOE
8. Consultation with the Commissioner of Education State of Alaska on multi-cultural education needs in Alaska

B. NEA Teacher Conference (March, 1978)

Conduct of three educational sectionals offered at the conference: 1) cross-cultural/linguistics education in the classroom; 2) Title IX, elimination of sex discrimination in schools, and 3) Alaska Native culture, and human attitudes

C. Alaska State School Board Association

Workshop on cross-cultural awareness and communication skills enhancement

IV. Other agencies requesting and receiving assistance from CEOS on cross-cultural awareness, prejudice/discrimination and Title 9 education:

1. Cook Inlet Native Association
2. ARCO Oil Company
3. Alaska Native Language Center
4. Southcentral Regional Resource Center

5. Southeast Regional Resource Center
6. Aleutian/Pribilof Is. Native Association
7. Adult Basic Education Program, Fairbanks
8. Black Caucus, Anchorage
9. Central Lutheran Church, Anchorage
10. United Methodist Church, statewide
11. McLaughlin Youth Center
12. Bristol Bay Native Corp.
13. Alaska Division of Banking and Securities
14. Center for Northern Educational Research, University of Alaska
15. HEW, Region X
16. Office of Civil Rights, Region X
17. Adult Literacy Lab, University of Alaska
18. City Manager, Seldovia
19. X-CED Teacher Training Program, University of Alaska
20. Alaska Native Hospital/ Anchorage; statewide services
21. Alaska Bilingual Advisory Committee
22. Sheldon Jackson College, Sitka
23. University of Alaska
24. Alaska Methodist University
25. Alaska Legal Services
26. Kuskokwim Community College
27. Kellogg Human Resources Project, University of Alaska
28. Ft. Richardson Military Post
29. Anchorage Police Department
30. Alaska Rural Community Action Program
31. Hope Cottage staff for handicapped children
32. University of Alaska Rural Secondary Schools Project
33. Alaska Legislative Affairs Council
34. Alaska Library Assn.
35. Galena Community College
36. Bureau of Indian Affairs, Regional Director
37. Lawyers
38. Alaska Federation of Natives
39. Human Rights Commission
40. Human Rights Commission, Maine
41. Anchorage TV and newspapers
42. Alaska State Library/Media
43. HEW, Washington, D. C.
44. Portland, Lau Center

V. Additional projects conducted by CEOS during the 9 month period:

1. Two cultural awareness posters for school districts
2. Evaluation of business management courses for Alaska Natives in villages
3. Proofreading BIA Tribal Definition research paper
4. Checklist for Planning culturally relevant curriculum materials
5. Research and writing of new chapter to Alaska Native Land Claims, a first in culturally relevant curriculum for Alaska Natives
6. Special mailing, Alaska Native language materials bibliography
7. Preparation of Language Assessment Test for students; distribution to requesting school districts
8. Language Assessment Test Validation Project
9. Research paper on Aleut written literature
10. Development of Alaska Native linguistics exercises for

workbook to be used in language classes
11. Discrimination in Testing, a project in the design stage
12. Bibliography mailings on multi/cultural materials
13. Film evaluations for cultural bias
14. Supplemental educational learning opportunities for for rural ALaska Native Youth, a project in process

VI. Current requests for CEOS assistance:

1. Gateway Borough School District
2. Alaska Gateway School District
3. Hoonah City Schools

SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

Senator Joe Orsini
Chairman

Senate Bill No. 47 — Croft
Prime Sponsor

Resolution No. ____

This Bill is currently in the Senate Community and Regional Affairs Committee for consideration. Your response, as prime sponsor, to the following questions will serve to hasten Committee action on this Bill.

1. What is the need for your proposed legislation; what is the goal you are trying to accomplish?

At the present time, if a person makes improvements (painting, landscaping, fencing, etc., on their home the value goes up and they pay more taxes. This discourages some people from improving their property. The bill would impose a moratorium on such increases and encourage people to beautify their property.

2. Are there any other viable ways of accomplishing this same goal?

A system of grants or loans might be utilized, but this seems more cumbersome and probably more expensive.

3. Persons or groups you know of who are supporting the legislation.

I know of no organized support for the bill.

4. Persons or groups you know of who are opposing the legislation.

Municipalities have traditionally opposed this type of legislation but I do not know of any specific opposition to this bill.

5. Can you foresee any new problems that might be caused as a result of enactment of your bill?

If not properly implemented by the Municipality, there might be problems.

6. What is the earliest time you would like the Senate Community and Regional Affairs Committee to consider your bill?

I would appreciate the Committee considering the bill the week of February 28.

Haines Borough
P.O. Box 2314
Haines, Alaska 99827

February 16, 1977

Senator Joe Orsini
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

The Haines Borough Assembly wishes to thank you for your letters and copies of proposed bills which may have an effect on our municipality.

Please accept this letter in support of Senate Bill No. 47 - "An Act allowing municipal property tax exemptions for certain improvements to real property." This bill was discussed at great length and the Assembly feels that if passed, this would be of a great advantage to the taxpayers in our area. We are constantly receiving comments concerning the increase of taxes due to improvements on their homes. Many of the residents of Haines feel that they should be given "a break" for trying to keep their homes nice looking which, when completed, would enhance the exterior appearance or quality of the land or structure.

Also, for your information, I am sending to you a copy of the minutes for a meeting held concerning the recent attorney general's opinion concerning third class borough powers and a copy of the newpaper article that was published by our local paper, the Chilkat Valley News. We would be interested in any comments you may have concerning our problem here in Haines.

Thank you for your time and concern.

Sincerely,

Kathy Dixon

The Honorable Joseph Orsini, Chmn.
Senate Community & Regional Affairs Committee
Alaska State Legislature
Juneau, Alaska 99811

Re: SB No. 47

Dear Senator Orsini:

I am writing you as a citizen of Douglas for the past 25 years, a property owner and as a member of the Project Pride Committee of the Juneau Borough.

For years, I have felt that the home-owner who takes pride in keeping his property in good repair and making exterior improvements that would enhance the appearance of the property is penalized by having to pay a greater tax assessment than the slob down the street who has a comparable piece of property but does nothing in the way of maintenance or beautification, and the home is usually surrounded by junk cars, abandoned trailers, etc.

Maybe I am wrong, but I have felt that perhaps the fear of having to pay increased taxes was the primary reason for the slob's life-style. With this bill and given wide publicity once it becomes law, I would hope all of Alaska will embark on a giant-size cleanup campaign with empassis on paint-up, fix-up.

My membership on the Project Pride Committee has been mainly directed toward pursuing the possibilities of a tax credit or rebate when the property owner makes exterior improvements, but without this type of enabling legislation; my efforts have been in vain.

With the passage of this bill, not only will the property owner benefit, but the neighborhood, the community, city and state as well. I urge your support of the bill---it has been long over due.

Sincerely yours,

Julie H. Isaac

PS Please advise me when this will be taken up by your committee. My phone is 364-2431. Thank you.

THE CITY AND BOROUGH OF JUNEAU
CAPITAL OF ALASKA
155 SOUTH SEWARD ST. JUNEAU, ALASKA 99801

DATE: March 16, 1977

FILE NO. Legislature-1977

SUBJECT: Senate Bill 47

The Honorable Joseph L. Orsini
Chairman
Senate Community and Regional
Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

The City and Borough of Juneau supports the concept expressed in Senate Bill 47 but suggests that certain changes might make the bill more workable.

As we understand it, the intent of the bill is to allow the municipality to exempt from taxation that portion of an increase in assessed valuation which can be attributed to new maintenance, repair or renovation of an existing structure where such work enhances the exterior appearance. The first sentence of the exemption reads, however, that the exemption goes to "the assessed value of improvements to real property." As the "improvements to real property" include the entire existing structure, it appears that the bill would authorize the municipality to exempt the entire assessed value of the structure if recent maintenance, repair or renovation has caused the assessed value to increase. If it is the intent of the Legislature to exempt only the increase, and not the value of the entire structure, I would suggest that the first sentence be changed to read as follows:

> (F) Municipalities may by ordinance exempt from taxation all or any part of the increase in assessed value of improvements to real property if such increase in assessed value is directly attributable to alteration of the natural features of the land or new maintenance, repair or renovation of an existing structure and if the alteration, maintenance, repair or renovation, when completed, enhances the exterior appearance or esthetic quality of the land or structure.

The approach taken in the above suggested language involves three changes from the original. First, it would authorize the municipality to allow an exemption of part of the increase attributable to new maintenance, etc. rather than requiring that the municipality allow a full exemption or no exemption. The amount of the partial exemption would have to be set forth in the ordinance. The second change makes clear the fact that the exemption could not exceed the amount of the increase in assessed valuation which is directly attributable to the new maintenance, etc. The third change involves the implication in the existing language that an exemption may be given prior to the actual accomplishment of the alteration or maintenance. The proposed language indicates that an enhancement must have occurred before the exemption can be given.

The exceptions to the exemption which appear in the second sentence of the section are well thought out and should be retained.

We would suggest that municipalities be given a little more flexibility than is currently provided in the last sentence of the proposed section. As presently written, the section would require the municipality to give the exemption for a period of four years. We would suggest that rather than this all or nothing approach the municipalities be authorized to grant the exemptions for a period not exceeding four years. Also, requiring that the period run from the date the improvement is completed or the date of approval of an application, whichever is later, creates the problem whereby a property owner may come in three or four years after the improvement has been completed to make application. At this point it may be extremely difficult to determine the increase caused by the improvement. I would suggest that this part be deleted so that the municipalities may deal with that problem in the ordinance which authorizes the exemptions. Therefore, I suggest that the last sentence of the bill be changed to read as follows:

> An exemption provided under this subsection may continue for a period not to exceed four years from the day the improvement is completed.

If you have any questions, I would be happy to discuss them with you. I can be reached at 586-3300.

Dear Ms. Rudd:

Subject: Senate Bill 126

This Borough favors the elimination of the requirement that municipal officials be elected by a majority of the votes cast, since that may require runoff elections which attract very little interest.

We believe this matter should be optional for municipalities and, therefore, we favor SB 126.

Very truly yours,

Re: SB 126

Dear Ms. Rudd:

When the Alaska Municipal Clerks met in Juneau last month, they reviewed all of the election bills that had been introduced at that time and paid particular attention to bills pertaining to run-off elections. Prior to the meeting in Juneau, a survey had been taken to obtain statistics on run-off elections. The Clerks found that only in four instances over the years had a run-off election made any changes. The Clerks objected to run-off elections due to the additional cost involved and the fact there there is a very small turnout when an additional municipal election is held within days after the regular municipal election. In view of the above, the Clerks would favor HB 9 or SB 125 which would allow municipalities to exempt themselves from run-off elections by ordinance.

The Matanuska-Susitna Borough has found it necessary to hold only one run-off election and that was for one School Board member. In that instance, the second high candidate won and the results didn't change the outcome of the election.

In view of the above, I would like to go on record as opposing SB 126 as noted above. A copy of the Clerks' position on various bills is enclosed for your information.

I appreciated your appearing at one of the Clerks' sessionsin Juneau.

Thank you for bringing the above to the attention of your committee.

Yours respectfully,

Evelyn Thompson

Borough Clerk

Enc.

TO: MEMBERS OF AAMC LEGISLATIVE REPORT April 20, 1977

Compiled below are brief summaries of several bills now pending in the Legislature and, also, the AAMC's position worked out by the Clerks attending the Clerks Education program in Juneau, March 28-April 1. All members are encouraged and requested to read the various bills, review the AAMC's position, and write your own legislators of your & AAMC's position.

HOUSE BILL 24 - Compensation of Election Officers (referrals: House Finance)

Description - Increases pay of Judges from $4.50 to $5 and Canvass Board from $5 to $5.50

AAMC's Position - Oppose. Board members received a raise last year which increased our election costs as much as 25% for the boards, which is the largest cost in any election. Part of the reason they serve is a sense of civic duty and volunteer effort. They are not serving in this capacity to make a living wage at it - there aren't enough elections each year to do so. The idea behind payment is compensation for expenses like gas, transportation, babysitting, etc.

HOUSE BILL 131 (CSHB 131 Judiciary) - Freedom of Information (referral: Senate Judiciary - has passed House)

Description - provides State Policy for privacy and public information, makes certain exceptions of records to be open to inspection, provides procedure for requests for records, establishes enforcement procedures, covers mishandling of records and obstruction of access to records and lists definitions.

AAMC's Position - Oppose in its present form. Amend to include local option - that would satisfy us. 1. Bill is tailored for State records. Municipalities have different types of records from State and from each other. 2. Bill leaves determination of definitions of what's confidential and what isn't to the Clerk since she is the custodian of the records. Interpretation differs from Clerk to Clerk. 3. Definitions are vague - it would appear that complainants in perhaps a health violation would have to be disclosed. It is also unclear whether the complainants to the Ombudsman would have to be disclosed. Cost to small municipalities would increase. They do not have staff attorneys and would need to retain or at least check with an attorney fairly frequently for verification of their decision on confidentiality. Six municipalities have a public information ordinance adopted or in progress.

HOUSE BILL 188 (CSHB 188) - Voter Registration (referral: Senate Rules)

Description - increases number of registrars per precinct

AAMC's Position - Amend "shall appoint" to "may appoint" and raise precinct size criteria to 500 (this bill may have been amended to satisfy the Election Supervisor since 4/1)

HOUSE BILL 218 (CSHB 218) - Voter Registration (referral: House Judiciary)

Description - Amends Title 15 (State Election Code) to provide that a voter may register at the time of voting, changes provision that voter may vote in precinct in which he is registered to "election district", provides a voter may register before an election judge at any time throughout the year including election day, provides same procedure for re-registering, rewords procedure on manner questioned ballots may be counted and adds State special election to those elections which will determine purging.

AAMC's Position - Opposed. If it passes, voters could vote on election day and not by questioned ballot. If this is the idea, then do away with State registration entirely as Municipalities would have to institute their own systems for voter registration if this becomes law (and they were allowed by State law to do so.) State's position on this bill is that Legislature should wait and see what happens with the Federal registration bill - if that's passed, then there is little at the local (State) level that can be done.

HOUSE BILL 243 - Public Meetings (referral: House State Affairs)

Description - 2/3rds vote required for executive session, added reasons for executive session, covers chance or social meetings and what can and cannot be done; lists requirements for public notice of meetings, written records of all meetings; time period for suits to contest action of public body, etc.

HOUSE BILL 243 (cont.)

AAMC's Position - Needs amendment. On a chance meeting, if business is discussed, what is the consequence? 72 hour notice is too long, should be 24 hours. Also change "to discuss or act" to "to discuss and act". Should be 30 days - notification on suits, rather than 90. 30 days is ample period for most court actions and for appeal on most other municipal actions. 90 days is hanging fire too long - it puts the original meeting action in too much jeopardy. Further action based on original action could take place within that 90 days and further complicate the situation. Appeal should be speedy. Re: 72 hour notice provision - agendas are not usually finalized 72 hours prior to a meeting. Also, the longer the notice requirement, the sooner you are going to have to cut off deadlines like public appearance requests - thereby denying the public the right to appear at a meeting. Re: mailing the agenda to anyone who requests it. Delete. In most cases the mail system is such that mailed agenda reaches the person requesting it after the meeting takes place. Also, there is no limit or specification on who pays the mailing cost. Assume its the municipality - can you see all 194,500 people in Anchorage wanting agendas mailed to them? The cost would be absolutely horrendous for mailing alone, not including the cost of duplicating, envelopes and salaries involved. Legislative hearings are not announced 72 hours prior to the hearing. Legislators should have to come under the same regulations - a copy of the notice of each legislative hearing be mailed to every registered voter in the State of Alaska requesting one.

SENATE BILL 126 - Run-Off Elections (referral: House CRA, then Judiciary)

Description - Exempts Municipalities from run-offs with exception of Mayor's position

AAMC's Position - Oppose this particular bill, favor instead HB 9 and SB 125 which exempt Municipalities from all run-off provisions, including Mayor, by ordinance. Mandatory run-off provisions have been in effect since 1972. Of the Municipalities that have had to hold run-offs since that date, there have been 209 seats on the original (regular) ballot and of those, 29 went to a run-off. Only 4 of those run-off seats resulted in a change. Only 1 run-off for Mayor since 1972. All others have involved other offices. Percentage of voter participation in run-offs has steadily decreased since inception of mandatory run-off and costs have increased by some 27%

Chairman Community & Regional Affairs
Assembley 100
Juneau, Alaska 99811

Dear Senator Orsini:

At the present time the community and regional affairs is administrating state RDA grants in the amount of $20,000.00. Several of the villages in our region are currently receiving these grants. These have been greatly instrumental increasing the capacity of village councils of our area.

We would request your support with the increase in these grants from $20,000.00 to $40,000.00 as is contained Senate Bill 213. By increasing the amount of the grant from $20,000.00 to $40,000.00 it will greatly offset increased costs of construction due to inflation and other factors.

Your support is appreciated.

House C & RA Committee
Members -
Thought you should
see this letter -
Lisa

Senator Joe Orsini, Chairman
Community & Regional Affairs
Committee
Pouch V
Juneau, AK 99811

Dear Senator Orsini:

Thank you for the opportunity to present our views on upcoming legislation.

SB 241

One bill of particular interest to the Fairbanks North Star Borough is Senate Bill 241. In its current form, the Fairbanks North Star Borough must oppose the proposed legislation. The attached resolution by the Fairbanks Chamber of Commerce also demonstrates local opposition to SB 241. We have been working with other Boroughs on the formulation of a substitute for SB 241 and hope to be able to support substitute legislation.

The basic problem with the current situation is the fact that boroughs are selecting state selected land and are not receiving prompt action on their selections. While this bill goes a long way to resolve that matter, Article 3A, "Determination of Entitlement" ends future land entitlements.

We feel that there will be a great deal of land selection activity by the State within the North Star Borough in the future, and we cannot see equity in taking from the boroughs their entitlement of 10% of state selected land within their boundaries per A.S. 29.18.190-200; companion to the Mandatory Borough Act.

We further feel that there is a need for a cooperative selection effort by the State Division of Lands and Alaska's Boroughs in exercising future selections within the organized municipalities. We definitely wish the opportunity to testify regarding this bill and other legislation affecting Borough selection of state selected lands.

SB 210

While I favor property tax relief, it appears that the proposed Senate Bill 210 is premature at this time. The State's record in being able to fund shared revenue in construction debt reimbursement has been very poor in that we seldom receive full funding on revenue sharing commitments. Furthermore, this legislation is somewhat in opposition to the philosophy of local control as adopted by the Alaska Municipal League.

When municipal governments go to the bond market, a major consideration in

determining their bond rating has been their property values and the amount of pressure on them. In conclusion, whereas I am generally in support of those things which relieve pressures on the property tax, we feel this legislation is premature (effective date 1979) and would recommend deferring it to subsequent legislatures.

Very truly yours,

CS SB 372

The purpose of SB 372 is to correct an oversight in SB 371 Chapter 43 SLA 77. The intent of the law was to have it apply to home rule municipalities as well as general law municipalities and SB 372 would clarify this point.

Municipality of Anchorage

POUCH 6-650
ANCHORAGE, ALASKA 99502
(907) 274-2525

GEORGE H. SULLIVAN, MAYOR

OFFICE OF THE MUNICIPAL ATTORNEY

August 26, 1977

Senator Edward C. Willis
Box 402
Eagle River, Alaska 99577

Re: Senate Bill No. 37/Chapter 48 SLA 77.

Dear Senator Willis:

During the First Session of the Tenth Legislature, you co-sponsored Senate Bill No. 37 entitled "An Act Relating to the Sale, Repurchase and Disposition of the Proceeds of the Sale of Tax Foreclosed Real Property". This bill was subsequen enacted by the Legislature as Chapter 48 SLA 77. As you remember, your bill amended various portions of AS 29.53 dealing with foreclosure procedures by local government. Specifically, the bill was intended to prevent the loss of valuable interests in real property through inadequate notice or the inadvertent actions of local government. I believe you are familiar, for example, with the situation involving property originally owned by Mr. Russell Oberg in the Chugiak/Eagle River area.

In studying provisions of Title 29 concerning tax foreclosure, I have recently discovered that several of the sections in AS 29.53 are omitted from the list of sections applicable to home-rule municipalities under AS 29.13.100. As you can see from the attached copy, the provisions of AS 29.53 that are applicable to home-rule municipalities in Alaska end with Section 350. It is therefore apparent that the portions of your bill (SB 37) amending Sections 370-380 of AS 29.53 could be construed to be inapplicable to the Municipality of Anchorage as a home-rule local government. However, I want to assure you that it has been the Municipality's policy to follow the provisions of AS 29.53 in the foreclosure, sale or dedication of real property.

SB 372 Extending provisions of law governing the sale, repurchase, and disposition of the proceeds of the sale of tax-forclosed real property to home rule municipalities.

This is a housekeeping measure. Reference SB 37 passed last year to remedy a situation which was reocurring in Anchorage. (The Oberg case)

The intent of SB 37 was to have the law pertain to home rule municipalities as well as general law. It was a drafting oversight that this provision was not included in SB 37.

CS FOR SS FOR SB 37

Present Law:	Bill Sec.	Effect of Amendment:
Tax foreclosed land is redeemed by paying liens, penalties, interests and costs.	(1)	"Costs" shall include cost of publishir notices & locating mortgage and Lien holders.
Redemption period expiration notices are sent to record owners	(2)	also sent to all lien and mortgage holders, if value is $10,000 or more.
No provision	(3)	Municipalities may recover costs of publishing notices and locating mortgage and lien holders (as required by section 2)
Foreclosed land can be held for public purposes by resolution	(4)	must be done by ordinance; notice must be sent to former owner (unless land has been held more than 10 years)
Record owner can repurchase land by paying taxes, interests, and delinquent taxes	(5)	must also pay the administrative costs of foreclosure and sale (including publishing costs, and costs of locating mortgage & lien holders)
Right of former owner to repurchase expires after one year	(6)	expires after ordinance adopted providing the land be kept for a public purpose
Proceeds from sale of foreclosed land are divided between borough and municipality	(7)	owner is entitled to proceeds in excess of taxes, interest, penalties, and costs. (must claim within 6 mos.)
AS 29.48.130(a) requires assembly or council to use ordinances to exercise certain powers.	(8)	adds to those powers which must be exercised by ordinance the retention or sale of tax-foreclosed property

Foreclosure Victims Seek Changes

"Somebody just asked me wasn't it awful about the Obergs losing land for taxes when I found out the same thing happened to me."

That statement was made recently by Thilman Wallace of Chugiak who said the Greater Anchorage Area Borough had also taken 39½ acres of his land as park and open space land after foreclosure for less than $200 in taxes due from 1973.

Wallace, who has had his problems with the borough and neighbors in his struggle to subdivide Swiss Alps apparently was delinquent in property taxes and failed to make payment during the one-year redemption period. His land — which he said is worth $200,000 — and foreclosed land in which Russell and Elsie Oberg had an interest were foreclosed in March, 1974 and dedicated as borough open space land July 28, 1975. That dedication ended their rights to pay off the taxes and redeem their property.

Wallace said he later received a notice on one of three adjacent parcels he owns in Chugiak, advising that the property would be put up for tax sale. He said he immediately went to the borough offices and paid off outstanding taxes on several different parcels on the tax rolls. He was not aware that any had been taken, he said, and believed that he had protected all of them.

To make matters worse, Wallace said he had just raised $15,000 and paid off a mortgage on it after the property had already been taken. The lost land is not part of the Swiss alps homesteads.

The Obergs situation had been different. They had sold part of their homestead in Peters Creek to Ernie Lampert. Lampert ran into finacial difficulties and ended in bankruptcy with several liens against the property. He apparently had transferred the property to a B. Bailey, the name which was on published foreclosure lists. The Obergs said they had asked to be notified of any foreclosure action, but that a card to obtain this notice apparently had strayed from borough files.

Both Wallace and Oberg said they plan to take the matter to court and will argue several points in an effort to regain title to their property.

But they are also interested in seeing the state law changed to prevent situations of this type from happening to others.

State laws in Alaska allow taxing agencies to foreclose on property to recover delinquent taxes plus penalty and interest. There is a one year redemption period in which the owner may redeem his property by paying the amount due. After that time, the property may be sold.

Apparently there is another provision, however, which allows the municipality to retain the property for some "immediate public need." The municipality gains title to the land subject only to payments of state and federal liens and has no obligation to pay off mortgages or other liens. Once the land has been so designated, its redemption is not possible.

Wallace said that although he was notified that the third tract — which was delinquent on the same basis as the surrounding land which was taken — was to be put up for tax sale, he was not given notice that the two tracts were to be up for dedication as park land.

"It looks like we should have our 'Miranda rights' or something," Wallace said. He said he had been following a murder trial underway last week in Anchorage and had been impressed with concern for rights of the two young men accused of murdering a youth who formerly lived in Peters Creek. "They kept asking the police if they had advised the accused of their rights, how they did it and when. I can't halp but wonder why Russ and I didn't have the same consideration in being advised of our rights."

The local men hope to see the laws changed to require municipalities to send notices to parties who have an interest in the property on which taxes are delinquent. Requiring lienholders to sign a card which can be misfiled or otherwise disappear should not be sufficient, they say.

They also believe that a municipality should not be able to gain land just for the taxes due. They say it should be put up for sale with the municipality collecting only the taxes and penalty and interest plus cost. If the municipality wants the land, they feel it should pay the owners or lienholders the difference between the taxes due and its market value.

Existing laws, they feel, could lead a land-hungry municipality to gobble up all land on which taxes are not paid, thus seriously reducing the tax base and putting extra burden on remaining property owners.

GEORGE M. SULLIVAN, MAYOR

OFFICE OF THE MUNICIPAL ATTORNEY

August 26, 1977

Senator Edward C. Willis
Box 402
Eagle River, Alaska 99577

Re: Senate Bill No. 37/Chapter 48 SLA 77.

Dear Senator Willis:

During the First Session of the Tenth Legislature, you co-sponsored Senate Bill No. 37 entitled "An Act Relating to the Sale, Repurchase and Disposition of the Proceeds of the Sale of Tax Foreclosed Real Property". This bill was subsequen enacted by the Legislature as Chapter 48 SLA 77. As you remember, your bill amended various portions of AS 29.53 dealing with foreclosure procedures by local government. Specifically, the bill was intended to prevent the loss of valuable interests in real property through inadequate notice or the inadvertent actions of local government. I believe you are familiar, for example, with the situation involving property originally owned by Mr. Russell Oberg in the Chugiak/Eagle River area.

In studying provisions of Title 29 concerning tax foreclosure, I have recently discovered that several of the sections in AS 29.53 are omitted from the list of sections applicable to home-rule municipalities under AS 29.13.100. As you can see from the attached copy, the provisions of AS 29.53 that are applicable to home-rule municipalities in Alaska end with Section 350. It is therefore apparent that the portions of your bill (SB 37) amending Sections 370-380 of AS 29.53 could be construed to be inapplicable to the Municipality of Anchorage as a home-rule local government. However, I want to assure you that it has been the Municipality's policy to follow the provisions of AS 29.53 in the foreclosure, sale or dedication of real property.

I was very happy for the opportunity to provide you with input in Juneau concerning the Municipality's interests in SB 37 and appreciated your concern in developing a bill that adequately protects both the interests of local governments and affected property owners in tax foreclosure proceedings. I therefore felt that you should be advised of my findings concerning the problems with applying this measure, as presently written, to home-rule municipalities. You may wish to consider submitting a brief amendment to AS 29.13.100 that would apply all of the sections of AS 29.53 included in SB 37 to home-rule municipalities. Since there will not be another round of tax foreclosure proceedings until next year, present questions concerning the applicability of SB 37 to the Municipality of Anchorage should not cause any problems in the near future. If I can be of any further assistance in this matter, please feel free to call me at 264-4349.

Sincerely yours,

Theodore D. Berns
Assistant Municipal Attorney

COASTAL RESOURCE SERVICE AREA BOUNDARIES

A Determination Under Section 46.35.120(b) of the

Alaska Coastal Management Act (Ch. 84 SLA 1977)

December 2, 1977

Lee McAnerney

Commissioner

Alaska Department of

Community and Regional

Affairs

Kevin Waring

BY: Kevin Waring, Director

Division of Community

Planning

Debra E English

12/2/76

Introduction

Section 46.35.120(b) of the Alaska Coastal Management Act states that:

> The Commissioner of the Department of Community and Regional Affairs may, after public hearings held in the area affected, consolidate two or more regional educational attendance areas as a single coastal resource service area
>
> > (1) if a substantial portion of the coastal area contains land and water area owned by the federal government over which it exercises exclusive jurisdiction or land held in trust by the federal government for Alaska Natives over which the state would not exercise control as to use; or
> >
> > (2) if, after giving due consideration to the standards applicable to incorporation of borough governments and the likelihood that a borough will be incorporated within the area, the commissioner determines that the functions to be performed under this chapter could be undertaken more efficiently through the combination of two or more regional educational attendance areas as a single coastal resource service area.

All determinations under this section must be made by December 4, 1977.

Coastal resource service areas are areawide coastal planning districts that may be formed in portions of the unorganized borough outside of municipalities that have and exercise planning authority. Service area boundaries must parallel those of one or more existing regional educational attendance area (REAA); the area covered by an REAA cannot be subdivided in determining boundaries of units that might be organized as coastal resource service areas. No time limits are set for establishment of a coastal resource service area.

Actual organization may be initiated:

(1) by submission to the (Alaska Coastal Policy) council of a petition signed by a number of registered voters equal to 15 per cent of the number of votes cast within the coastal resource service area at the last state general election;

(2) by submission to the (Alaska Coastal Policy) council of a resolution approved by the city council or traditional village council of not less than 25 per cent of the number of cities and villages within the coastal resource service area; or

(3) at the direction of a majority of the members of the (Alaska Coastal Policy) council when it appears that a major economic development activity will occur.

In all cases, organization must be preceded by an election in the affected area.

Proposal

On June 21, 1977, the Commissioner of Community and Regional Affairs proposed consideration of coastal resource service area boundary adjustments in four regions, which included the following regional educational attendance areas.

(1) Regional educational attendance areas 3(Lower Yukon) and 4(Lower Kuskokwim).

(2) Regional educational attendance areas 6(Nushagak-Bristol Bay) and 7(Lake/Peninsula-Bristol Bay).

(3) Regional educational attendance areas 8(Aleutian Chain), 9(Pribilof), and 10(Adak).

(4) Regional educational attendance areas 18(Northern Panhandle), 19(Southern Panhandle), and 20(Metlakatla/Annette).

Response

To obtain comments on boundary adjustments under consideration, the Department of Community and Regional Affairs:

(1) scheduled and conducted public hearings in affected areas;

(2) attended and participated in public workshops conducted by the Office of Coastal Management;

(3) published a public notice in several newspapers of general circulation;

(4) sent a cover letter (or memorandum) and information packet to mayors and city managers of coastal communities in affected areas, village council presidents, village corporation presidents, Coastal Policy members from affected areas, numerous state and federal agencies, and a variety of interest groups;

(5) delivered presentations at meetings of organizations drawing individuals from throughout an affected area (e.g., the Southeastern Conference in Sitka, and a Bristol Bay Area Health Corporation Board of Directors meeting in King Salmon);

(6) held informal meetings and discussions with people in affected areas; and

(7) made a brief presentation to the Coastal Policy Council at their October, 1977 meeting in Kodiak.

Public hearings were held in Unalaska, Juneau, Dillingham, Ketchikan, and Craig. Hearings were also planned in Bethel, Emmonak, Naknek, St. Paul Island, and Petersburg, but were not conducted as a result of scheduling difficulties. Public sessions not actually conducted as formal hearings were held in Petersburg and King Salmon. Hearings were generally poorly attended, with members of the public present ranging from two to twelve.

Department of Community and Regional Affairs representatives attended coastal management workshops conducted in Kipnuk, Kotzebue, Juneau, Anchorage, Kodiak, Ketchikan, and Craig. Coastal resource service areas represented an item actively discussed at several of these workshops, as well as other workshops carried out in locations such as Bethel, Dillingham, and Unalaska.

Written comments were received from three state agencies, four federal agencies, and eight other individuals representing private corporations, non-profit associations, local governments, or no identifiable affiliation.

No clear consensus has emerged. Several comments received were not actually directed toward furnishing guidance on coastal resource service area boundaries. Many expressed a preference for creating coastal resource service areas smaller than existing REAA's. As previously noted, this is not allowed by statute.

Comments on the Nushagak-Bristol Bay and Lake/Peninsula-Bristol Bay REAA's (6 and 7) were mixed, but a majority of those presenting their views favored a single coastal resource service area for the Bristol Bay region.

Comments on the Northern Panhandle, Southern Panhandle and Metlakatla/ Annette REAA's (18, 19, and 20) were predominantly in favor of maintaining separate areas, although many also supported a coastal resource service area that would include two or more REAA's.

Comments on the Aleutian Chain, Pribilof and Adak REAA's (8, 9, and 10) were also mixed, but a majority of commentators supported maintaining three separate areas.

Input on the Lower Yukon and Lower Kuskokwim REAA's (3 and 4) was limited by an inability to schedule a hearing there, but a majority of those who made recommendations expressed a preference for a single coastal resource service area in the Yukon/Kuskokwim Delta region.

Determination

(1) Section 46.35.120(c) of the Alaska Coastal Management Act, which requires a final determination on coastal resource service area boundaries by December 4, 1977, should be amended. A majority of citizens appearing at public hearings and expressing themselves through other means were unable to make an informed recommendation on territory that should be included in a coastal resource service area without a clearer understanding of what a coastal management program would entail. A determination by the Commissioner of Community and Regional Affairs without substantial input from affected residents is inconsistent with the Act's emphasis on a strong local role in coastal decision-making. Since no time frame is specified for service area organization, the problem could be rectificed by revising Section 46.35.120(c) to read:

> (c) a determination under (b) of this section shall be made before organization of the coastal resource service area.

Because expanded opportunities for better informed public input might result in preferences contrary to combinations recommended in this report, specific provision for "deconsolidating" REAA's combined should also be made, if the amendment suggested above is not interpreted to accommodate that option.

(2) We encourage that if a service area is organized in the Bristol Bay region, it should include both the Nushagak-Bristol Bay and Lake/Peninsula-Bristol Bay REAA's (6 and 7), and have therefore combined these REAA's. Although distinctions exist between these two portions of the region, these differences are outweighed by areawide commonalities.

(3) We support maintenance of two separate coastal resource service areas in northern and southern Southeast Alaska, and inclusion of the Metlakatla/Annette REAA (20) in a single service area with the Southern Panhandle REAA (19). Inclusion of REAA's 19 and 20 in a single service area is based on the criterion in AS 46.35.120(b)(1) concerning land held in trust by the Federal Government for Alaska Natives. While Southeast Alaska is a distinct region, significant differences between communities at northern and southern extremes of the region, as well as substantial distances involved, discourage formation of a single service area at this juncture. In addition, Southeast's unusual situation, with a number of small, dispersed first class cities, relatively few second class and unincorporated communities, and a majority of coastline under U.S. Forest Service jurisdiction, points out a need to consider special adaptations of the coastal resource service area, or alternatives to it, for responsive coastal

planning and management in this region.

(4) At this time, we encourage maintenance of three separate areas for the Aleutian, Pribilof and Adak REAA's (8, 9, and 10). The Pribilof Islands are linked to the Aleutian Chain by certain transportation, cultural and related ties, but remoteness makes the Pribilofs an independent entity in many respects. While Section 46.35.120(b)(1) of the Act provides grounds for including Adak in a combined Aleutian coastal resource service area, a disadvantage would be that the Adak Island population, which is solely military, contrasts sharply with that of civilian communities characterizing the remainder of the Aleutian Chain.

(5) We encourage that if a service area is organized in the Yukon/Kuskokwim Delta region, it should include both the Lower Yukon and Lower Kuskokwim REAA's (3 and 4), but consider it inappropriate to place these REAA's in a single service area prior to adequate public hearings.

Conclusion

The major question facing unorganized borough residents with respect to the Alaska Coastal Management Program is what form coastal management should take in their areas. Coastal resource service area boundaries represent only one aspect of this question, and one that cannot be responded to in an informed manner without considering what a coastal management

program might consist of, and how it should be carried out. These answers can only be furnished after a thoughtful educational and local involvement effort which was not possible in the constricted time frame and with the limited subject matter that applied to consideration of service area boundaries.

The Office of Coastal Management's recently completed extensive series of public workshops has provided a crucial first step in informing localities and their citizens about coastal management. With a Coastal Policy Council that is just becoming operational, and basic guidelines and standards that are only now being formulated, disseminated, and reviewed, final determination of service area boundaries at this time is premature, however.

We strongly encourage that the Coastal Policy Council devote careful attention to the complex question of coastal planning and management in the unorganized borough, and that service area boundaries be considered in the more appropriate context of but one component of broader questions involving the unorganized borough, before final boundary determinations are made. A minor amendment to the Alaska Coastal Management Act, as described in this report, is required to allow service area boundaries to be considered in this context, and we support such a change as a step which would strengthen Alaska Coastal Management Program effectiveness.

February 23, 1978

Amendment proposed to A.S. 46.40.210(6)(C)

Purpose: Protection of State and lessees against possible unreasonable and arbitrary actions.

Suggested Change: 46.40.210(6) - "Uses of state concern... include... (Local plans must be consistent with)

(C) the siting of major energy facilities, activities pursuant to a state oil and gas lease, or large-scale industrial or commercial development activities which are dependent on a coastal location and which, because of their magnitude or the magnitude of their effect on the economy of the state or the surrounding area, are reasonably likely to present issues of more than local significance;

Effect: Each District Coastal Management Program must be submitted for approval by the Alaska Coastal Zone Management Council. In approving the District Program, the Council must find under existing law that the Program "does not arbitrarily or unreasonably restrict or exclude uses of state concern". A.S. 46.40.060(a). Thus, by amending the definition of "uses of state concern" in A.S. 46.40.210(6), the state and its lessees would have clearer protection against "arbitrarily" or "unreasonably" imposed restrictions or exclusions. Local control Restricted only if "unreasonable or arbitrary"

Rationale:

1. 1976 federal amendments to Coastal Zone Management Act require state managers to submit state management plans to local officials in advance of implementation, with opportunity for comment. CZMA, § 306(c)(2)(B).
2. Amendment would protect paramount state interest and state policy governing state lands, in matters of greater than local concern, without pre-empting or restricting local authority, except as to arbitrary or unreasonable conduct.
3. Creates a more favorable environment for investment, thus tending to increase responses to state invitations for bidding, etc.
4. Reduces possibility of regulatory vagueness leading to (a) intergovernmental conflicts; (b) conflicts between the private sector and government; (c) litigation.
5. Proposed state preleasing procedures will provide ample opportunity for comment and input from districts before state decisions to lease are final, adding to protections provided by the 1976 federal amendments.

BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

CS FOR SENATE BILL NO. 430

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act extending the authority of the Alaska Municipal Bond Bank; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 44.58.170(b) is amended to read:

(b) Notwithstanding any provision of law, to the extent that any department or agency of the state is the custodian of money payable to a municipality, at any time after written notice to the department or agency head from the bond bank authority that the municipality is in default on the payment of principal or interest on municipal <u>general obligation</u> bonds of the municipality then held or owned by the bond bank authority, the department or agency shall withhold the payment of that money from that municipality and pay over the money to the bond bank authority for the purpose of paying principal of and interest on bonds of the bond bank authority.

* Sec. 2. AS 44.58.180(c) is amended to read:

(c) Notwithstanding the provisions of (a) and (b) of this section, the total amount of bond bank authority bonds and notes outstanding at any one time, except bonds or notes issued to fund or refund bonds or notes, may not exceed $150,000,000 <u>for the purchase of general obligation bonds and $150,000,000 for the purchase of revenue bonds</u>.

* Sec. 3. AS 44.58.410(3) is amended to read:

(3) "municipal bond" means a bond or note or evidence of debt which constitutes

<u>(A) a general obligation bond which is</u> a direct and

general obligation of a political subdivision of the state, all the taxable property within which is subject to taxation to pay the bond, note or evidence of debt, and the interest without limitation, as to rate or amount generally to the extent permitted by law or to avoid a default as provided for second class cities under AS 29.53.410; or

(B) a revenue bond issued by a municipality which is a pledge of the revenue of a revenue-producing capital improvement payable solely from unpledged revenue of the public facility for which the obligations are issued; or

(C) a general obligation bond or revenue bond combined or additionally secured;

* Sec. 4. AS 44.58.420 is amended to read:

Sec. 44.58.420. SHORT TITLE. This chapter may be cited as the Alaska Municipal Bond Bank Authority Act or the Alaska Municipal Bond Bank Act. The Alaska Municipal Bond Bank Authority created by this chapter may be referred to as the Alaska Municipal Bond Bank with the same legal effect as if the reference were to Alaska Municipal Bond Bank Authority.

* Sec. 5. This Act takes effect immediately in accordance with AS 01.10.-070(c).

ALASKA MUNICIPAL BOND BANK AUTHORITY

February 6, 1978

Senator Joe Orsini
Chairman, Community and Regional Affairs Committee
Pouch V, State Capitol
Juneau, Alaska 99811

Dear Joe:

Thank you for your recent letter requesting my comments on SB 430 which will be reviewed by your committee.

The Board of Directors, by resolution, fully supports the Bill provided a new Section is added as follows:

"Sec 2. AS 44.58.420 is amended to read:

Section 44.58.420. SHORT TITLE. This chapter may be cited as the Alaska Municipal Bond Bank Authority Act or the Alaska Municipal Bond Bank Act. The Alaska Municipal Bond Bank Authority created by this chapter may be referred to as the Alaska Municipal Bond Bank with the same legal effect as if the reference were to Alaska Municipal Bond Bank Authority."

The above change will allow us to market bonds without the word "Authority" appearing in our name. We are advised that the word "Authority" infers that the bond is more of a revenue issue rather than general obligation. Also, some housing authorities and port authorities have recently fallen into market disfavor. If this amendment to title is passed, we plan to drop the word "Authority" on general obligation issues but would probably retain it for revenue issues. Dropping the word may provide market savings of as much as 20 basis points on G.O. issues.

Section 1 of SB 430 will enable us to meet the needs of smaller cities wishing to accomplish projects not properly classified as general obligation. These include utilities, docks, ports, etc. This change is extremely important if we are to be in a position to assist communities impacted by offshore energy exploration and development.

Hope you can schedule early action on the Bill. I'll be pleased to meet with the committee.

Sincerely,

David A. Rose, Executive Director

Summary of CSHB 430

CSSB 430. Extending the authority of the Alaska Municipal Bond Bank.

By expanding the definition of municipal bonds in Section 3, SB 430 extends the authority of the Municipal Bond Bank to include revenue bonds as well as general obligation bonds of municipalities. Revenue debt was not included in the original bond bank authority because it was felt the Bond Bank needed to establish a "track record" before it expanded into the area of revenue debt. The broadening of the definition of municipal bonds will permit the Bond Bank to assist smaller cities in financing projects such as utility and port development and will enable it to use CEIP Federal money to leverage debt rather that State funds.

Mr. Rose can elaborate on the proposal to use CEIP funds to back up municipal revenue bonds, but basically it consists of a method to use a portion of the $69 million available to the state under CEIP which is designated for Credit Assistance, i.e., loans to municipalities for the construction of facilities in response to coastal energy impact. The loan money is now available at 8% from the Federal government. The Bond Bank proposes to borrow up to $50 million of these funds from the Feds at 8%, reinvest the money at 8% and use that money to back up its municipal revenue bonds with a 100% guarantee, thereby securing a lower rate for the municipalities. This idea was conceived by the DC&RA and the Bond Bank and has been well received by all parties concerned. In order for the program to work effectively, however, the Bond Bank needs this extra authority in the field of revenue bonds.

Section 2 is part of the committee substitute. It establishes a ceiling ($150 million) on the amount of revenue bonds outstanding at any one time. This is the same ceiling as for general obligation bonds. This ceiling on bonds is considered desireable for the first few years of operation of the program.

Section 1 inserts the distinction of the type of municipal bonds referred to in that section since there are now two types of municipal bonds in the Authority.

Section 4 is inserted at the request of the Bond Bank. The change will allow them to market general obligation debt without the stigma of the word "Authority" which frequently has the connotation of risk, and thus may result in higher interest rates.

The insertion of the words "to the extent permitted by law" (Sec. 3, p. 2, line 4) was at the request of Lee Sharp of Juneau and is designed to clear up a gray area created by the Kalamarides decision on municipal tax limitation. Apparently, in order for the Bond Bank to buy a city's bonds, the city has to promise to levy taxes without limitation as to rate or amount. The Kalamarides decision declares that a municipality may not make that promise. As a result, the bond bank cannot buy the city's bonds because it has no authority to. There is a Supreme Court ruling pending on this decision. The amendment language would allow the city to make whatever pledge the court finally determines the law to be. The new language also has the blessings of Eric Wolforth, bond counsel.

THE CITY AND BOROUGH OF JUNEAU
CAPITAL OF ALASKA
155 SOUTH SEWARD ST. JUNEAU, ALASKA 99801

DATE: March 16, 1978

FILE NO. Legislature - 1978 Session

SUBJECT: SB 430, AMBBA Authority

Honorable Joe Orsini, Chairman
Senate Community and Affairs Committee
Pouch "V"
Juneau, Alaska 99811

Dear Senator Orsini,

As you and the committee are no doubt aware, litigation involving the oil companies and the North Slope Borough have cast doubts on the meaning of sections of Title 29 which relate to the extent of the authority of municipalities to pledge taxes to secure debt. The decision in the Superior Court placed certain limitations on the language which municipalities and bond counsel had not previously believed existed. The definition of "municipal bond" as it appears in the Alaska Municipal Bond Bank Act reflects the commonly held view that there was no limitation on the authority of the municipality to levy taxes for the purposes of securing and paying debt and interest. The bond bank is authorized by the Act to buy only municipal bonds which are defined as bonds which have an unlimited tax pledge. Unfortunately, the decision in the North Slope case prohibits the municipality from making an unlimited pledge of taxes. Therein lies the problem. The AMBBA is authorized by law to buy bonds which boroughs, first class and home rule municipalities are unable to issue under the North Slope decision. To overcome this dilemma, we suggest that the following amendment be made to Senate Bill 430:

> In line 16, after the word "generally" add the phrase "to the extent permitted by law".

This amendment would authorize the AMBBA to purchase municipal bonds where the municipality had made a pledge of its taxes to the extent authorized by law. The law being what the court says it is (until the legislature changes it), this amendment would authorize the purchase by the AMBBA of municipal bonds which it cannot now purchase under the North Slope ruling.

I believe that the proposed amendment is in keeping with the original purpose of defining a municipal bond in the

manner it presently appears; that is, that the bond be backed by the maximum full faith and credit pledge which the municipality could lawfully make.

Today, I discussed this proposed amendment with Eric Wolforth, who is bond counsel for the AMBBA. He concurred that the proposed amendment would alleviate the problem created by the North Slope decision as it relates to the authority of the bond bank to purchase bonds.

We urge the committee to include the proposed language in a committee substitute for Senate Bill 430.

Very truly yours,

Gerald L. Sharp
City/Borough Attorney

[illegible] ANCT.

ATTEMPTS TO TRY AGAIN TO SEND TWO PAGE LETTER FROM DAVE ROSE TO SEN. WILLIS VIA OTC.

TO: SENATOR ED WILLIS

SUBJECT: TESTIMONY FOR STATE AFFAIRS COMMITTEE, FEB. 16, 1978, REGARDING AUTO REGISTRATION TAX

FROM: DAVE ROSE, ANCHORAGE MUNICIPAL ASSEMBLYMAN

GOOD AFTERNOON, I REGRET THAT I AM UNABLE TO BE PERSONALLY WITH YOU TODAY TO DISCUSS THE PROBLEMS BEING ENCOUNTERED WITH THE AUTO REGISTRATION TAX IN ANCHORAGE. I DO APPRECIATE, HOWEVER, THE OPPORTUNITY TO ENTER THIS TESTIMONY AND AM PARTICULARLY APPRECIATIVE OF THE COMMITTEE'S WILLINGNESS TO DISCUSS THE MATTER AND SEEK SOLUTIONS.

BASICALLY THERE ARE TWO PROBLEMS: FIRST, THE TAX ADVERSELY AFFECTS THOSE WHO OWN OLDER VEHICLES IN THAT IT PROVIDES HIGHER TAXATION UNDER THIS SCHEME THAN UNDER THE OLD PERSONAL PROPERTY TAX SCHEME. SECONDLY, THERE IS A STRONG PROBABILITY THAT THE CURRENT TAX IS NOT INCOME TAX DEDUCTIBLE WHEREAS THE OLD PERSONAL PROPERTY TAX WAS DEDUCTIBLE.

THIS MATTER WAS DISCUSSED BEFORE THE ANCHORAGE ASSEMBLY UNDER SPECIAL ORDERS OF BUSINESS ON TUESDAY EVENING, FEB. 14, 1978. AT THAT TIME THE ASSEMBLY DISCUSSED THE BILL BEFORE YOU THIS AFTERNOON AS WELL AS ALTERNATIVES. THIS TESTIMONY REPRESENTS THE POINT OF VIEW OF THE ANCHORAGE MUNICIPAL ASSEMBLY.

WITH RESPECT TO TAXATION DEDUCTIBILITY: THE ASSEMBLY FULLY SUPPORTS THE PROPOSED CHANGE OF THE NAME OF THE TAX FROM "REGISTRATION" TO "PROPERTY". THIS MAY ASSIST IN CONVINCING INTERNAL REVENUE THAT WE ARE TALKING ABOUT THE TYPE OF TAX WHICH IS DEDUCTIBLE.

WITH RESPECT TO ADJUSTMENT OF TAX RATES: TESTIMONY BY THE MUNICIPAL ASSESSOR INDICATES THAT 65 PERCENT OF OUR PEOPLE PAY LESS TAXES UNDER THE AUTO TAX APPROACH THAN UNDER THE PERSONAL PROPERTY TAX APPROACH; 15 PERCENT PAY ABOUT THE SAME, AND 20 PECENT PAY MORE. THOSE WHO PAY MORE ARE THOSE WHO OWN THE OLDER VEHICLES. WE HAVE DOUBTS THAT THE ELECTION TO PAY ONE AND ONE HALF PERCENT OF FAIR MARKET VALUE - AS PROVIDED IN SB 471 - IS GOING TO BE ADMINISTRATIVELY WORKABLE. IT IS PERHAPS THE FAIREST APPROACH BUT PROBABLY WILL BE EXTREMELY COSTLY TO EXECUTE. FOR EXAMPLE, THE TAXPAYER WHO HAS A ONE DOLLAR DIFFERENCE BETWEEN THE TAX TABLE AND THE ELECTION WOULD PROBABLY TAKE THE ELECTION ROUTE THUS INCURRING A HIGH GOVERNMENT COST IN EXCESS OF THE ONE DOLLAR SAVED.

THE ASSEMBLY RECOMMENDS THAT SB 471 BE ALTERED TO PROVIDE FOR AN EXTENSION OF THE EXISTING TABLE FOR AUTOMOBILES. PROVIDE FOR A SIXTH YEAR AT AT TAX RATE OF 15 DOLLARS; A SEVENTH YEAR AT 10 DOLLARS AND AN EIGHT YEAR AND OLDER COLUMN AT 5 DOLLARS. WE FEEL THAT ALL VEHICLES, REGARDLESS OF AGE, SHOULD PAY AT LEAST FIVE DOLLARS AND THAT THE CHART SHOULD NOT BE CUT OFF IN SUCH A MANNER AS TO PROVIDE FOR NO TAX AT ALL ON SOME VEHICLES.

THE ASSEMBLY DID NOT DISCUSS THE PROVISION OF THE BILL WHICH PROVIDES EXEMPTION FOR THE ELDERLY AS THERE HAS BEEN MUNICIPAL REQUEST FOR SUCH AN EXEMPTION. IF THE EXEMPTION IS PROVIDED, WE CONCUR WITH THE WORDING IN THE BILL; PARTICULARLY THAT WHICH APPEARS ON LINES 21 AND 22.

I HOPE I HAVE BEEN OF SOME HELP IN THIS MATTER. IF YOU HAVE QUESTIONS, I [illegible]

Municipality
of
Anchorage

POUCH 6-650
ANCHORAGE, ALASKA 99502
(907) 274-2525

ANCHORAGE ASSEMBLY

February 8, 1978

Senator Ed Willis
Pouch V, State Capitol
Juneau, Alaska 99811

Dear Ed:

Thank you for your quick response to the auto registration tax problem. I have a copy of your Senate Bill 471 which was introduced on February 7th and referred to State Affairs and Finance.

The tax deductibility problem seems to be taken care of by the name change from "Annual Motor Vehicle Registration Tax" to "Annual Motor Vehicle Property Tax." Property taxes generally are deductible while registration taxes are not. Additionally, the reference on line 13 to a percentage of fair market value is indicative of the fact that the tax is indeed ad valorum oriented and thus deductible qualified.

The election to pay one and one-half percent of value in lieu of the tax set forth in the table is a good stroke. This will properly address the problem of older, low value vehicles and will restore everyone's original intent that older vehicle owners would pay their fair share but not more. I cannot assess the impact of paperwork on Department of Revenue but you might expect that department to raise some concern. I expect that other alternatives to solution of the problem might surface once the bill goes to hearing.

The exemption of one vehicle from taxation for the elderly will be welcomed by persons in that group. Seniors have always been subject to personal property tax (even under the old system) so this is a new benefit for them. I have no problem with this since the State will reimburse the municipality for any potential lost revenue. I don't know whether this section will receive flak from representatives of other jurisdictions which do not levy such a tax or whether the statewide price tag on such an exemption is one which is affordable. Again, I am sure this will all be hashed out in committee.

Ed, let me thank you for your responsiveness on this. You have pointed out that several changes may take place once the committees start their review. Regardless of the exact end product you are to be commended for starting things moving.

Sincerely,

Dave Rose

Joe Guthrie 3894 W.O. 4855

(i) *Special rules relating to compensating use taxes.* (1) In general, a use tax on an item is complementary to a general sales tax on similar items if the use tax is imposed on an item which was not subject to such general sales tax but which would have been subject to such general sales tax if the sale of the item had taken place within the jurisdiction imposing the use tax. For example, a tax imposed by State A on the use of a motor vehicle purchased in State B is complementary to the general sales tax of State A on similar items, if the latter tax applies to motor vehicles sold in State A.

(2) Since a compensating use tax is treated as a general sales tax, it is subject to the rule of subparagraph (C) of section 164(b)(2) and paragraph (g)(4) of this section that no deduction is allowed for a general sales tax imposed in respect of an item at a rate other than the general rate of tax (except in the case of lower rates on the sale of food, clothing, medical supplies, and motor vehicles). The fact that a compensating use tax in respect of any item provides for an adjustment in the rate of the compensating use tax or the amount of such tax to be paid on account of a sales tax on such item imposed by another taxing jurisdiction is not taken into account in determining whether the compensating use tax is imposed in respect of the item at a rate other than the general rate of tax. For example, a compensating use tax imposed by State C on the use of an item purchased in State D is considered to be imposed at the general rate of tax even though the tax imposed by State C allows a credit for any sales tax paid on such item in State D, or the rate of such compensating use tax is adjusted to reflect the rate of sales tax imposed by State D. [Reg. § 1.164-3.]

.01 Historical Comment: Proposed 1/19/57. Adopted 10/7/57 by T. D. 6256. Amended 12/21/64 by T. D. 6750 to reflect Sec. 207(a) and (b) of P. L. 88-272.

[¶ 1453A] Definitions—Deductible State Taxes

• ◦ *CCH Explanation*

.01 Real property taxes.—Real property taxes include those imposed on interests in real property and levied for the general public welfare. This does not include assessments for local benefits (see Reg. § 1.164-4, ¶ 1455).

.02 Personal property taxes.—To qualify for deduction as personal property taxes, the tax must be—

(1) an ad valorem tax—one assessed in proportion to the value of the property;

(2) an annual tax—one *imposed* on an annual basis (even though it is *collected* more or less often than once a year); and

(3) a tax imposed on personal property (even though in form it may be imposed on the exercise of a privilege).

License fees paid for the registration of a motor vehicle are deductible as personal property taxes, therefore, if they meet these three qualifications. Meeting the ad valorem requirement is the most difficult. Reg. § 1.164-3(c) specifies that a motor vehicle tax based on weight, model year, and horsepower, or any of these characteristics, is not an ad valorem tax. But a tax based partly on value and partly on other criteria can qualify in part.

Example: State X imposes a motor vehicle registration tax of 2 percent of the value of the vehicle plus 20 cents per hundredweight. A, a resident of X, owns a car having a value of $2,000

APPENDIX A

FARM USE LAND ASSESSMENT

AS 29.53.035

APPENDIX A

FARM USE LAND ASSESSMENT
AS 29.53.035

The 1976 Program Summary includes data for the four boroughs involved in the program as indicated on 89 applications filed which are subject to the department's final audit and approval.

Effective January 1, 1968, the first Farm and Agricultural Land Deferred Tax Program was enacted.(ch 82 SLA 1967) Effective January 1, 1975, the act was substantially amended.(Sec 1 ch 90 SLA 1974) And effective January 1, 1977, the act was further amended.(Sec 3 ch 229 SLA 1976)

The 1974 amendment reduced the yearly gross farm income requirement from 25% to 10%; provided for the averaging of income over a three year period; provided for estimated farm income for the current year; provided for the use of the lessee farm income to qualify the owner for farm use assessment; increased to seven years the deferred tax payment provision; and provided for reimbursement by the state of property tax revenue lost to the municipality in the operation of the act.

The 1976 amendment increased the penalty for conversion of the land to a use incompatible with farm use by requiring the owner to pay an amount equal to the additional tax at the current mill levy together with eight percent interest for the preceeding seven years as though the land had not been assessed for farm use purposes.

Experience over the last several years has vividly demonstrated the difficulty of administering existing legislation dealing with the dual or differential assessment included in AS 29.53.035.

The omission of a lien provision to make the eligible property liable for the payment to the state of an amount equal to the deferred taxes plus interest is a glaring weakness in the legislation requiring farm use assessments in addition to assessments mandated by AS 29.53.060 at full and true value.

In an effort to correct the obvious deficiency in the existing law, an amendment is respectfully suggested and recommended.

FARM USE LAND ASSESSMENT

ALASKA ADMINISTRATIVE CODE TITLE 19
DEPARTMENT OF COMMUNITY AND REGIONAL AFFAIRS

CHAPTER 55
FARM USE LAND ASSESSMENT

19 AAC 55.010. FORMS. (a) The Department of Community and Regional Affairs Form 21-410 and Form 21-411 are adopted for use in application for the farm and agricultural land use assessment and tax deferment program.

(b) Application and authorization forms shall be made available by and shall be returned to the clerk or assessor of the municipality in which the land for which the farm use assessment and tax deferment are sought is located.

19 AAC 55.020. SUPPLEMENTARY INFORMATION SUPPORTING APPLICATION FOR THE ASSESSMENT AND TAX DEFERMENT. (a) Applicants for the assessment and tax deferment shall in addition to the application prescribed in Section 10 of this Chapter:

(1) provide for inspection by the clerk or assessor of the municipality copies of the applicant's state income tax returns as required for the application as submitted and such other information as may reasonably establish that the applicant has derived at least 10 per cent of his yearly gross income from the agricultural use of the land for which the assessment and tax deferment are sought and that the percentage was from agricultural use; or

(2) attach to the application form an authorization, signed and notarized, granting to the office of the state assessor the right of inspecting Alaska income tax returns to ascertain that the applicant has derived the requisite level of yearly gross income from the use of the land for which the application is submitted for farm purposes.

(b) Failure to provide documentation or authorization required by this section forfeits the claim for the farm use assessment and tax deferment.

19 AAC 55.030. APPEAL. An applicant for the farm use assessment and tax deferment who believes that the valuation or classification assigned to the land that is the subject of the application is erroneous may appeal to the board of equalization of the municipality in which the land is located in the manner provided by AS 29.53.130. The municipality shall report the disposition of all such appeals to the state assessor.

19 AAC 55.040. MAINTENANCE OF RECORDS: DUPLICATE COPIES. The municipality in which the land is located shall maintain separate files and records of all applications for the farm use assessment and tax deferment, whether allowed by the municipality or not, including valuation of the property under the full and true value standard of AS 29.53.060. Duplicate copies of all records relating to the application entered in the file shall be forwarded to the state assessor. The municipality shall investigate to determine whether title to land for which the assessment and deferment have been granted has been conveyed or alienated in such a way that the assessment or deferment may be terminated and shall advise the state assessor as to the results of its investigation.

19 AAC 55.050. CONFIDENTIALITY. Tax records and other documents providing evidence of the applicant's eligibility for the farm use assessment and tax deferment are confidential and shall be used only for the purpose of ascertaining whether the applicant is entitled to the benefits of the assessment and deferment.

19 AAC 55.060. DEFINITIONS. In this Chapter:

(1) "farm use assessment" means the value of the unit or parcel of property for which application for a farm use assessment and tax deferment is made, based upon its highest and best use as farm or agricultural land;

(2) "yearly gross income" means the income of the applicant for the year preceding the tax year for which the application is filed and means the adjusted gross income of the applicant as defined in Section 62 of the Internal Revenue Code (26 USC 62).

FARM USE ASSESSMENT APPLICATION

AS 29.53.035 ~~March 1~~

Application must be filed on or before February 1 of the assessment year.
Complete one form for each parcel of property within the farm unit.

PROPOSED LEGISLATION

AN ACT

Relating to the differential assessment and deferred tax reimbursement payment by the state to a municipality for revenue lost to it by the operation of Section 29.53.035.

Be it enacted by the legislature of the State of Alaska:

AS 29.53.035 is amended to read:

(a) Farm use lands included in a farm unit and not dedicated or being used for nonfarm purposes shall be assessed on the basis of full and true value for farm use (, AND SHALL NOT BE ASSESSED AS IF SUBDIVIDED OR USED FOR SOME OTHER NONFARM PURPOSE.) The assessor shall maintain records valuing the farm use land for both full and true value and farm use value. Should the farm use land be converted to a use incompatible with farm use, the owner shall be liable to pay an amount equal to the additional tax at the current mill levy together with eight percent interest for the preceding seven years, as though the land had not been assessed for farm use purposes. Payment by the owner shall be made to the state to the extent of its reimbursement for revenue loss under (e) of this section for the preceding seven years. The balance of the payment shall be made to the city or borough.

(e) Subject to legislative appropriations for the purpose, the state shall reimburse a borough or city, as appropriate, for the real property tax revenues lost to it by the operation of this section. Reimbursement under this subsection is a lien in favor of the state against the property for which a partial tax deferred payment has been approved and granted. Upon recordation in the recording office of the district in which the property is situated, the lien is prior and superior to other liens against the property except for general taxes and may be enforced by lien foreclosure as provided in AS 34.10.070 - 34.10.220. The lien becomes immediately due and payable on change of use to a purpose not compatible with farm and agricultural use.

SUGGESTED LEGISLATION
AS 29.53.035
FARM USE LAND ASSESSMENT

The preservation of farm and agricultural land as open space areas is vitally important to the continuance of that which is designated as beneficial to the health and welfare of the people, statewide, nationwide and worldwide.

To accomplish the desired objective it is necessary to make it financially possible and attractive to owners of open space areas to utilize such properties for purposes which are consistent with agricultural use.

Much of the open space area possesses an actual full and true value several times higher than the farm and agricultural use value. The assessment and taxation of such property at the higher value creates an ownership financial burden that is a compelling factor in the trend away from maintaining land in a use compatible with farm and agricultural purposes.

The most logical approach to preserving as much area as possible in a use compatible with farm and agricultural purposes is the "Development Rights" concept by which an owner may apply for farm use assessment and petition the state to reimburse the municipality for revenue lost. In exchange for the granting of the application and petition, the owner would grant to the state a first option to purchase the development rights to the property.

At some future date, should a change of use be inescapable, the state would have the prerogative to purchase the development rights at a negotiated price or release the option upon payment by the owner of an amount equal to the total state reimbursement to the municipality for the revenue lost. At some future date should a change of use be inescapable, the option to purchase could be exercised at a negotiated price.

This concept offers several advantages and benefits to owners, potential owners and the general public. One immediate and direct benefit to an owner is the opportunity to continue ownership and use without the burden of satisfying high value liability on a lower value use. The possibility of transferring title to property that will not change use is enhanced by the protection from a high value tax liability. A second benefit is the possibility that the state has an opportunity to purchase the development rights and guide the growth or change in an area in a fashion that is complementary and compatible with the trend indicated at that time.

This total concept provides the necessary mechanism for orderly statewide land use development which is designed and determined to be in the best interests of all residents of Alaska.

MEMORANDUM State of Alaska

DEPARTMENT OF COMMUNITY & REGIONAL AFFAIRS

TO: Lee McAnerney
Commissioner

DATE: February 18, 1977

FILE NO:

THRU: Palmer McCarter
Director

TELEPHONE NO:

FROM: S. Robert Dozier
State Assessor

SUBJECT: Senate Concurrent Resolution No. 12 "Farm and Agricultural Land Use Assessment and Tax Deferment Program" (AS 29.53.035)

Senate Concurrent Resolution No. 12 if adopted by an affirmative vote of both houses annuls Administrative Regulation 19 AAC 38.020 which was adopted by the Department as a means of verifying that the applicant is actively engaged in farming the land for profit and that 10 percent of his yearly gross income is derived by use of land for farm purposes.

Under Administrative Regulation 19 AAC 38.020 the applicant may either provide for inspection by the local assessor a copy of his Alaska State Income Tax Return and other information as may be required or attach to the application form an authorization, signed and notarized, granting to the Office of the State Assessor the right of inspecting Alaska income tax returns to ascertain the requisite level of income.

Approximately 2/3 of the 86 applications received by the Department under the 1976 program provided necessary verification of income to the local assessor. The remaining applicants submitted Income Authorization forms to the Office of the State Assessor.

A copy of Form 21-411 "Authorization for Income Verification" as adopted by the Department is attached.

The notarized signature on the income verification form authorizes the Department of Revenue to inspect the applicant's Alaska state income tax returns and release to the State Assessor the answer to the following question: "Does the gross income attributed to farm use land equal or exceed 10% of the applicant's adjusted gross income?"

Should 19 AAC 38.020 be annulled, legislative intent will be established which prohibits local and state government officials the right to verify the requisite level of yearly gross income.

The farm use land value assessment statute AS 29.53.035 was enacted as a relief measure designed to assist a property owner who is actively engaged in farming land for profit by deferment of a portion of his current tax liability. Lands included in a farm ownership unit, although only partially utilized, are considered eligible for the special farm use assessment. The deferred tax for a period not to exceed seven years, becomes a tax liability against the applicant only at such time the land is converted to a nonfarm use.

The payback penalty imposed by statute against the owner at the time farm land is converted to nonfarm purposes has been vividly demonstrated to be impossible to enforce. For example the accumulated seven year tax deferment liability may be against one or more prior owner-applicants. The current owner-developer will have no deferred tax liability. If it is legislative intent that the deferred tax liability be repaid to the State an amendment to existing law will be required which assigns the deferred tax liability to the property rather than to the applicant (i.e. establishing a tax lien against the property at such time as a deferred payment of taxes is allowed).

Enactment of Senate Concurrent Resolution No. 12 will deny both the local and state governments an opportunity to verify income. This will result in an open-end tax exemption program rather than a tax deferment program for owners of land not dedicated or used for farm purposes.

Attachment

March 18, 1977

LETTER OF INTENT TO SCR 12

The intent of the Senate Community and Regional Affairs Committee, in the approval of SCR 12, is that the language of 19 AAC 38.020 is repugnant to the concerns of Alaskans, and should be annulled.

However, the Committee felt that the implementation of the regulations was inoffensive and reasonable, and well served the intent of the statutes. Therefore, while the Committee believes the regulation itself should be annulled, it could see no reason to change the existing procedures, and recommends the adoption of a new regulation which more closely describes these procedures.

TESTIMONY
SENATE JOINT RESOLUTION NO. 46

The scheduling of hearings in Alaskan communities impacted by pipeline construction along the Alcan is an excellent idea.

For Alaska, the proposed pipeline will entail much more than a right-of-way. It is a large scale industrial project passing through communities with no local government, no statutory authority to control growth, no ability to tax development and no mechanism to officially receive impact assistance.

While the pipeline will be built primarily on federal lands, State funds and technical assistance will be required to anticipate what might happen and to prevent unwanted impacts. My department has in the past, been responsible for providing planning assistance to unincorporated villages and for seeing that federal impact money (CEIP) was distributed to those communities needing funds.

We thus have a great interest in the proposed federal project recognizing that, at the same time, the Federal Energy Regulatory Commission and the Department of Interior both have the responsibility to inform Alaskan communities of the scope and magnitude of the project, to solicit their views on the project itself and its impact on the environment, village organization, values, use of land and lifestyles, and most importantly, they have the responsibility to incorporate the findings of the hearings in the conditions of right-of-way leases and certificates of public convenience and necessity.

To further strengthen the resolution before your committee today, I recommend the following changes be made:

> BE IT RESOLVED by the Alaska State Legislature that the Department of Interior and the Alaska Gas Project Office of the Federal Energy Regulatory Commission are respectfully requested to schedule separate or joint hearings on socio-economic impacts in Alaskan communities this year, especially in those located on or near the proposed route. And furthermore,
>
> BE IT RESOLVED that the Federal Energy Regulatory Commission use the findings of the hearings in conditions of the Certificate of Public Convenience and Necessity and that the Department of the Interior incorporate findings in the right-of-way lease it issues.

The Canadian government has been forthright in its intent to seek out the implications of pipeline development along both the Alcan and Arctic routes. The Berger and the Lysyk Commissions reflect well Canada's genuine respect for the hearing process and the government's ability to lay out the terms and conditions under which development will take place, keeping in mind the best interest of the communities and people who will be affected.

Our federal government should take heed to the Canadian example and begin soon. With the proposed additions, I heartily support this resolution.
