7. Fifty Percent Tax Levy. The differential tax zones as originally proposed drew a close parallel to those utilized in Wrangell's annexation. Subsequently the Council at a meeting on January 3, 1978 determined that it did not want the tax levy pegged to the utility services afforded since they were at least in theory financially self-sustaining. The City accordingly submitted an Addendum dated January 6, 1978 deleting the tie-in of the tax levy to the utility services, and keeping the 50% tax levy for basic general services and administration. This seemingly comports with the question raised in the January 4, 1978 report to the Local Boundary Commission by the Department of Community & Regional Affairs Local Government Assistance Section wherein it stated:

> "The Department raises the question of whether it would be appropriate for the City to collect property tax for the utility functions. The utilities would normally be considered an enterprise function which would be self-supportive from the user rates or surcharges associated with the particular utility."

The first year 50% figure is admittedly somewhat arbitrary and would invoke some isolated cases of unfairness. Working from the general 50% zone as a starting point, it was felt by the Council that it would be appropriate for the newly-enfranchised taxpayers to participate in the adjustments and fine tuning respecting the establishment of differential zones in tax year #2 (1980).

I apologize for not being able to furnish you with better data respecting the projected sales tax revenues, but please advise if you think I may be of further assistance.

Respectfully submitted,

Statement on Annexation - 1977-78

There are many aspects to be considered on annexation of the balance of Mitkof Island to the City of Petersburg before a final decision is made. As the ordinance now reads, if I understand it, I'm absolutely opposed to it.

Firstly, I'm opposed to annexation on a moral basis in that the residents of the area in question do not have any say-so in the process. In fact, even the citizens of the town itself, have no direct vote on the issue. It is a decision of six people on the council controlling the destiny of not only the epople now living inside the present city limits, but also those living without. I am quite sure that if a poll were to be taken, those people living outside of the present city would vote 90% to 95% against annexation. To be not able to control your own destiny, is not the democratic way of life as we have known it in this great land of ours.

Now for the hard facts of the cost of this monstrosity. I'm quite sure that in the final analysis, it will actually cost the present residents of Petersburg more than if the area in question is not annexed.

As I understand it, the schools would lose about $53,000.00 in state funds, which is paid to the schools for those children living outside the city. This is a considerable amount, and if the grapevine telegraph is correct, the present school administration is opposed to the move because of the loss of such a sum.

If we were to be annexed, there are services that must be provided. The two main services involved are water and sewer. Looking at the present high cost of construction, I'm quite sure that these two services can not be provided for less than $7,000,000. And these are the two main services of any city!

Another service that must be provided is fire protection and there is not any way under the sun to give fire protection without an adequate water system, with hydrants located within reasonable distances of all homes. Also there must be a fire engine located within the area involved. Even though the City of Petersburg has the best volunteer fire department in the state, it is impossible to get true protection where the fire engines are located 1½ to 38 miles from the areas to be protected.

While on the subject of protection, let us go into police protection. To be properly policed and patrolled in the area that we are talking about, another police car would be needed, as well as three or four patrolmen. I'm sure that all we could get in the line of patrol, would be one or two tours per night if the police force were not increased and another police car not added to the fleet. Then also, while this area was being patrolled, the City itself would not be having any protection whatsoever. Now all of these so-called services would be costing you and I, the tax payer, more money.

Now if this business of annexation is to increase the tax base in order for the city to go in debt farther through bond issues, then I'm very much opposed to

annexation which I'm sure all clear thinking citizens of Petersburg would also be. It must be realized that all bond issues must be re-paid and the only way to repay those debts is by higher taxation. It must be very clear that the residents of Petersburg are highly incensed and opposed to paying more taxes.

In another area of services that are rendered, let us take the hospital for instance. From what I've been made to believe, it is on a paying basis. Perhaps it is not making a huge profit but nevertheless it is paying its own way. I'm quite sure that the Scow Bay residents who use this facility pay for the care given them and that because of the added revenue that is brought in, they help support and make this a going and profitable operation.

Now we will go into the operation of the power and light department. If we are to be annexed, the city will lose the surcharge that is added to our monthly bill. This alone will amount to a considerable amount of monies when added up at the end of the year. It must be remembered that the power lines from the Blind Slough hydroplant go through this area. Also if the area is annexed, I would presume that the city would put in street lighting of sufficient luminosity that we would have a well lighted street at all times. Personally, I would hate to pay for the capital expenditure plus the cost of energy on this operation.

It has been noted by some people that we would not receive all of the services and that we would be taxed only in proportion to the services that we receive. If so, what services will we receive? And also, will the taxes be arbitrarily set on these services? And will the taxes to pay for the administration and clerical work of these services be in proportion to the taxes paid by the city residents. If, for instance, we do not receive sewer or water, will we be taxed for administration of those services within the present city?

As another item of interest, it might be well to remember that the businesses that are bringing <u>new</u> monies into the area at all times, are the businesses that would be hardest hit by these taxes. With the timber industry in its present unsettled state, it would be almost criminal to saddle an industry with new taxes. Something like this might be the "straw that broke the camel's back" and there would be 40 to 50 men on unemployment rolls. And if that should happen there would be no monies coming in with which to pay taxes.

Again let me impress upon your the loss of state school funds, the added capital costs and maintenance of the services if and when provided. Also bear in mind that those people living outside of the present city limits did so at their own choosing, which is the great Americam way of life. Let us have a democracy where people control their own destiny and way of life. This is a moral issue concerning the very roots of democracy.

Pouch B
Juneau, Alaska 99811

Dear Ms. McAnerney,

Electric System: Self sustaining

I am writing to let you know that I oppose the annexation of the remainder of Mitkof Island by the City of Petersburg.

Fire protection: value in (1) saving lives (2) saving property
Water System revenue sustaining (100% Assess back)
Police: admitted to be of value although @ add'l cost.
P & Z, Uniform building code fire code

For a municipality of just over 2000 people to try controlling all functions on a land area this large seems utterly ridiculous. The city provided services we would receive after annexation are minimum. We already have electricity for which we pay a 15% sur-charge. The extension of water and other services would be prohibitive in cost. We now provide these services on our own. Without a large piped water system fire protection, as provided by city trucks, is of little value. Sea water would provide a water source of limited value only at extreme high tide and then only a small number of houses are close enough to the water to be affected. Police protection would be limited unless new cars were purchased and more officers hired.

It is my understanding that we would lose our State Patrol Officer if the entire island was within the city limits. We would also lose about $50,000.00 of state financial support to our schools.

Perhaps most important is the fact that many, living outside of the city limits on Mitkof Highway, have done so by choice. The annexation, if passed, would place a basically rural area under numerous rules and restrictions designed to help urban business and residential areas run smoothly. These rulings would only frustrate current out of town residents.

In a past election the voters of Petersburg turned down annexation. The vast majority of us, living outside of town, want no part of it. I really don't know who the main backers of this petition are or what they hope to gain.

Let me close by saying that I and all my neighbors are opposed to this petition. I hope it will not be passed in haste to the legislature without careful consideration of all the facts and the opinions of those affected.

Sincerely yours,

Richard J. Walsh, D.V.M.

Dear Sirs,

I an writing in regards to the proposed annesation of Mitkof Island. As part owner of U. S. Survey 1226 situated on the East side of Wrangell Narrows, Mitkof Island, Alaska. R.80E T61S abuts sections 20, 21, 28 and 29. I am opposed to the annexation of the Southwest portion of Mitkof Island in which the above survey is located. The area is not connected by road and I doubt if it will be in the foreseeable future. It does not require any municipal services nor does it put any demands on the municipality. My only information on the proposed annexation is from a legal notice in the Dec. 28, 1977 issue of the Petersburg Pilot, which I purchased on Jan. 2, 1978. I feel with my limited information that the area does not meet the requirements of annexation 19AAC 05.010.

I am also specking for the other part owners in USS 1226. They are Lynne Campbell, Wrangell and Carolyn Buseman, Seattle, Wash.

Respectifully,

Kenneth C Mason

DEPT. OF COMMUNITY
AND REGIONAL AFFAIRS

December 12, 1977

Ms. Lee McAnerny, Commissioner
Department of Community & Regional Affairs
Pouch D
Juneau, Alaska 99801

Dear Ms. McAnerny:

This letter is to inform you of the strong opposition in this area to the actions of the Petersburg City Council in the matter of the annexation of Mitkof Island to the City of Petersburg. It is in the records that the people of Petersburg (this does not include those people living outside the present boundaries) voted overwhelmingly against annexation of any more lands to the City. This vote was taken at a general or city election only about two and one half years ago. When talking to residents of the City, it seems that their opinions on thematter have not changed in the slightest. As no vote was taken with the people living outside the City boundaries, there is not exact figure that can be set on those that are "for or against" in that area. But in talking to these people, it appears that over 90% are not in favor of annexation but are in favor of leaving the area as it is.

The passing of the annexation ordinance was a "railroading" job of supreme political engineering. The whole process took about two weeks with only one public hearing immediately preceeding the 2nd and 3rd readin, and passage of the ordinance. The public hearing, the 2nd and 3rd reading and vote for passage all took place within a time space of about 2½ hours!

We people who live outside of the present City boundaries and who would be most affected by annexation feel that our constitutional rights have been abridged in that we have no vote in the matter. If the area to be annexed were contiguous to the City in respect to homes and businesses, then perhaps there would be good cause for annexation. If such were true, I'm sure that there would not be the violent opposition to annexation as there is now.

The City Council and those people who are in favor of this annexation are jealous of the position that we outsider are in. We chose this life style of living in a rural atmosphere. We do not have many of the amenities of living in a city but that is our problem and should not concern those within the city environs as long as we are not a menace to their health and safety.

We feel that we will receive no benefits from this annexation without huge costs, not only to those living within the proposed annexation area but also to those who are presently living within the City. It is almost a certainty that no water or sewage facilities would be provided in years and then only with a

huge outlay of monies obtained by bonding, which is nothing more than a note of indebtedness which must be repaid through taxes or high utility rates. As to other services that would be rendered, there will be huge costs involved as to police protection; another patrol car would be needed plus three or more patrolmen to insure proper patrol and protection. An Alaska State Trooper is stationed in this area at the present time and is doing an adequate job and if past history bears us out, as in the case of Wrangell annexation, he would begone within a month.

If this annexation becomes a reality, the City of Petersburg would become one of the largest area wise cities in the State of Alaska and at the same time it would abe one of the smaller cities, population wise. It seems that this would be nothing but a huge "albatross" tied around the necks of not only those who would be annexed but also of those who are presently residing within the City of Petersburg.

Another service that would be "so-called" provided, would befire protection. How can there be fire protection without hydrants within suitable distance of buildings and dwellings? Fire insurance companies do not recognize any protection unless there are adequate hydrants within 1,000 feet of a building. In order to get this protection, a whole new water system would have to be constructed. There is absolutely no promise of such construction for the future.

There are many, many more reasons against annexation, too many to ennumerate in fact.

It is hoped that you and your cohorts in Community and Regional Affairs will give your utmost consideration to the problems involved in this matter. Again, let me say that this involves not only the "outsiders" but also the "insiders" of Petersburg.

Very truly yours,

Lars Eide

Ms. Lee McAnerny
Commissioner of Community & Regional Affairs
Pouch B
Juneau, Alaska 99801

Dear Ms. McNerny:

I would like to point out a few things I feel have not been adequately studied, pertaining to the proposed annexation of Mitkof Island by the City of Petersburg.

The school presently receives $53,000 from the state for tuition per year for the kids living outside the city limits. This revenue will cease when annexation takes place. Assuming that the city figures are correct and that the assessed valuation outside the city is approximately $7,000,000, at 50% the mill rate this amounts to $49,000. This money will have to be made up by increased taxes. Assuming that the city will collect an additional $25,000 from sales tax, if they are going to provide 24 hour police protection they will have to hire 4 additional patrolmen to adequately give this service. Any less will not afford the same protection the city now enjoys, this would add a minimum of $60,000 per year in payroll plus one or two cars. Again the difference has to be made up in increased taxes.

I understand that many people are concerned about the people outside the city limits getting a free ride. Let's think about this for a moment, after long thought on this subject I can only think of one "the dump". I understnad that is going to change shortly.

We may consider the Fire department or fire protection. I'm sure the people outside appreciate the fire department responding to their calls of fires, but in all fairness and honesty, using common sense it is only a token gesture by mere fact of the distances involved, if and when the city is financially prepared to run fire hydrants out to the proposed annexed area should they be thinking of annexation.

Let us consider for a moment the ambulance. Anyone using this service must pay for that service whether they live in or out of the city. This service is not provided for free to anyone.

Let's talk about the school for a moment. Yes, it is true the kids outside use our schools, however, the state pays the tuition for these kids in the amount of $53,000 per year. The money comes from the state taxes that everyone pays whether they live inside or outside the city. If they don't work for a living chances are they aren't going to pay any taxes at all any way. The state pays 96% of the revenue the school uses now, again coming from state taxes. 4% comes from

a local effort. This 4% in the case of Petersburg, comes from sales tax, this means that those who live outside the city limits and shop inside do in fact contribute to the local effort for schools.

Let us consider water & sewer. The people who receive these services living outside the city limits are paying for these services. I understand that the people receiving water are paying 50% more for thier water than those living inside the city.

Last but not least is electricty. First it must be pointed out that the city did not run the lines out the Mitkof Highway to service those people living out there, but in fact, ran the lines from 19 mile back to service the epole in town. It is only natural and goob business to supply those people on the way back to town. Especially, when you consider they charge them 15% more for their electricity.

Again, I would like to point out after annexation this lost revenue will have to be made up somewhere. I would think in increased power rate.

I would like to sum up by giving some figures I have compiled.

INCREASED INCOME		INCREASED COST	
Real & Personel property tax	$49,000	Additional polic3	$60,000
Sales tax	25,000	Capital Expenditures	6,000
Stumpage	838	Tuition	53,000
		Electric surcharge	29,780
		Water surcharge	3,633
TOTALS	s$74,838		$152,413
NET LOSS	$77,575		

These monies will have to be made up in increased taxes or a raise in power and or water rates or a combintation of all three.

January 2, 1978

Ms Lee McAnerny
Commissioner of Community & Regional Affairs
Pouch B
Juneau, Alaska 99801

Dear Ms McAnerny,

This letter is regarding the proposed annexation of Kitkof Island by the City of Petersburg. While my comments shall generally be negative in nature concerning the annexation I must admit that I do not totally oppose the idea. However it seems to me that annexation should be of mutual choice and of substantial benfit to all groups envolved. For the second time this does not seem to be the case. Once before while I have been living here annexation came before the people, who live in the city of Petersburg it was turned down. Now neither the citizenry of Petersburg or the rest of the people who live onKitkof Island, who have never had the opportunity of choice, are not being given a voice via the ballot box. This one reason for my opposition. I do not like other people deciding what they think is best for me without my consent. Let the issue agian be decided at the ballot box where it should be.

While I am a member of the group to be annexed my membership was not decided by having some strong desire to be on my own in the wilderness for there are far better places in Alaska to fulfill that desire than "Out the Road" in Petersburg. I simply purchased the first home that met my families needs after arriving in Petersburg three years ago. I am quite willing to pay my fair share for service received. But so far nobody has been able to tell me what my fair share is or will be or what services I might receive. This is my second reason for annexation opposition. At this time I get the feeling that annexation is being used as a bitter pill to cure our ills both in and out of town. Yet the reasons why have not fully been placed before the peole who must take the pill. If I knew the answers to some of the following questions then maybe I could make a decision in favor of annexation, but until I have some answers Imust remain opposed.

What type of fire protection will the community have? What is the cost now and after annexation? Will fire protection reduce my fire insurance.

What kind of police protection will I and the rest of the community recieve? What is this protection going to cost me and the other tax payers. Will we continue to have a state trooper based here?

What will the tax structure be for those who will not recieve full service from the community.

Icould go on and on for theemore I think the more unanswered questions come tomind. I thank you for your time and hope that you will also seek the answers before you act on this matter.

Sincerely yours,
John G. Egeland

January 3,1978

Dear Ms. McAnerny:

This letter is in reference to the annexation of the Scow Bay area by the City of Petersburg.

I have lived in Petersburg for many years and watched the council attempt to annex this area by the vote of the people. This so far has failed and now they ignore this vote and attempt to do as they please.

I realize I work in Petersburg and also spend most of my money there. I also pay the taxes except for the property tax. I also pay a penalty charge on any service I get from the city, such as power, because I live outside the city limits.

I also realize that in the near future I will probably have to pay a property tax to the state and I have no complaint on that.

The point I would like to make is that just last year I bought property and built a house in Scow Bay so as not to be controlled by the city council and now they want to annex us.

I don't believe this is quite right and I hope you will look at this situation very close before you make your decision.

Respectfully

Subject Annexationf of Mitkof Island by City of Petersburg

MAGILL TRAILER PARK
BOX 444
PETERSBURG, ALASKA 99833

Dec 29, 1977

RECEIVED
DEC 30 1977
DEPT. OF COMMUNITY
AND REGIONAL AFFAIRS

Mrs. Lee Mc Anerny
Commissioner of
Community and Regional Affairs
Pouch B
Juneau, Alaska

Dear Mrs. Mc Anerny:

In 1975 the Citizens of Petersburg voted No to annexation of areas outside their boundaries. Those of us adjacant the City were relieved. We were aware the Petersburg City Council wished annexation to occur to provide a broader property base, to be able to sell more bonds, for projects not necessarily approved by the Petersburg voters. We knew the City was already bonded to capacity and suffered a poor credit rating.

Once again annexation is being attempted by the City Council of Petersburg. This time they are not consulting the voters.

When a hearing was held by the council recently, the citizens outside of town were told they would receive no new services in the forseable future. Any services we now receive are revenue producing services. Some of which are very lucrative for the City. In the case of electricity for our Trailer Park, we have paid for both the poles and wires the City sells electricity from for eight customers.

All out of City people pay 50% more for water than City dwellers as well as a 15% surcharge on electricity. Since we put in our own water lines and maintain them, this is a lucrative water tax. Less than twenty out of City families are on the City Sewer system, and since Petersburg itself has large sections without sewer connections to the new sewer system, it will be years before additional sewer service can be granted out of town citizens. When the new sewer plant was built we asked to have our Trailer Park included in the plan, grant Federal funds were availabe. However the Petersburg City Council refused to give us this additional sewer service. Now the cost of puting in the lines and pumps would be prohibitive.

MAGILL TRAILER PARK
BOX 444
PETERSBURG, ALASKA 99833

Our property lies adjacant the southern boundaries of the City of Petersburg and there is vacant land surrounding ninty per cent of this area. We had planned to leave undeveloped seven or eight acres of our fifteen acres, possibly build some trout ponds, in this ravine filled area. We wonder how our plans would fare with a City planning and zoning board.

Mainly we do not feel we are being treated as American citizens when those with more power than we have, can simply annex our property. If we should be paying taxes, more than we do, with water and electricity tax, then let it be to the State of Alaska.

A small town always is prey to local politics. A small town on the end of an Island the size of Kitkof should not be allowed to make the major Coastal Managment decisions for such a large area.

I was present when the Boundary Commission gave freedom to the people of Kuperanof. I still feel this was a grand decision, People should be free to choose their own destiny.

Respectfully,

Enid Magill

Petersburg Trip Report
December 19-21, 1977

Monday, December 19, Doug Griffin and I left Juneau at 2:00 p.m. on Alaska Airlines, arriving in Petersburg at 2:30 p.m. Dave Moffet, the Petersburg City Manager, met us at the airport and drove us to the City offices. We talked informally with Dave, and several council members joined us in our discussion.

They had a few questions regarding borough formation, annexation procedures, loss of State school support for students outside present City boundaries and property taxes that can be gained from the annexed residents. The Department of Education estimated that the City of Petersburg would lose $47,800 in tuition foundation support during the next fiscal year. However, an additional $10,000 - $15,000 in PL 874 payments would approximate 1 percent of the State foundation support for those children whose parents live or work on federal property. This means Petersburg could lose between $32,800 and $37,800 in school support monies as a result of the proposed annexation.

The estimated value of the real and personal property in the area proposed to be annexed is $7,040,000. The initial proposed tax differential zone for basic general services at 7 mills would not bring additional tax revenues of $49,280 until FY 78 - 79; however, an additional $17,220 for State Revenue Sharing will be realized. The estimated loss for the first year would be between $15,580 and $20,580. Although sales tax has generally been used for purposes of providing local educational support, the effects of the proposed annexation may only be considered a trade off after FY 78 - 79.

The council members seemed a bit unsure of what annexation involved and were hesitant when it came to concrete budget figures to support annexation. This is primarily because the basic general services and administration costs have not been further enumerated. Doug explained that annexation of all of Mitkof Island would give the City more coastal zone management plan authority, strictly speaking, and that could be seen as an advantage for annexation. However, the City of Petersburg has not undertaken a coastal zone management plan primarily due to the problem of being able to determine what any of the federal guidelines might be.

Doug and I attended the City Council meeting at 7:30 p.m. and answered the same type of questions from the audience that was asked by the

Council earlier. Approximately 20 people were at the meeting, and none of the citizens were adamently opposed to annexation. It was clearly stated at the meeting that we were there to answer questions and not to take testimony on the proposed annexation. The questioning was not as rough or as indepth as we had anticipated. Mayor Ted Smith did ask a question as to whether the Department of Education would continue to provide bussing of those students outside the City.

On Tuesday, December 20, Doug and I visited with Dave Moffet, City Manager and Ed Lapeyri, owner of the lumber yard - saw mill outside the City limits. Ed favors formation of a borough and is opposed to the proposed annexation. I explained to Mr. Lapeyri that the proposed changes in the regulations would preclude formation of a borough unless another incorporated area was included in the borough boundaries. Mr. Lapeyri said he would propose that Kake, Kupreanof, Petersburg and Wrangell be included in a proposed borough. It would provide adequate school support and municipal selection of land for private ownership which the timber industry could take advantage of.

We could not get out of Petersburg at 11:25 p.m. as scheduled due to the heavy snowfall. This gave Doug and me a chance to post additional notices about the local boundary hearing, and, we drove out the road to be annexed. We visited Alaska State Trooper Bowlington and Wildlife Protection Officer Russell to discuss how annexation would affect providing police protection. They concluded that, if the area proposed was annexed, at least 3 or 4 additional officers plus an additional patrol car would be needed to provide adequate patrol for the area. Trooper Bowlington explained that AS 18.65.010 of the Troopers Manual requires that State Troopers are also required to enforce municipal ordinances. The area proposed to be annexed would not preclude him doing the job for the entire region, which includes an area much larger than Mitkof Island.

We spent most of the afternoon driving out the Mitkof Road to inspect the area to be annexed. Due to the road and weather conditions it took a couple of hours just to drive to Mile 18 and back. We noted that there was no residential housing beyond Mile 7 1/2. On the way back we stopped to talk to Roy Sokol, the owner of the liquor store outside the present City limits. Mr. Sokol explained that people living outside the area would be opposed to annexation because they are presently contributing their local sales tax to support any municipal services they take advantage of while in the City limits. He feels strongly about having any organized government forced upon them.

Wednesday, December 21, I contacted the Planning and Zoning Commission to determine its involvement with any coastal zone management plan or State land selection. The local Planning and Zoning Commission was not involved in the decision for annexation and would be opposed to annexing all of Mitkof Island. We had an opportunity to look at a map of the

State land selection for the City of Petersburg. Dennis Murphy, a U. S. Forest Service employee and member of the Planning and Zoning Commission, provided us with this information. After Alaska Airlines overheaded for the second day in a row, Doug and I chartered out of Petersburg on Alaska Island Air. We left Petersburg at approximately 12:15 p.m. and arrived back at the office at 1:30 p.m.

Observations

Although we estimated that the City may receive $49,280 in real and personal property taxes, this money could not be collected during the upcoming fiscal year. An assessment would first need to be provided of the actual real and personal property valuation in January 1978. The City Clerk, Jerry VanBleck, provided me with a copy of the estimated taxable property in the territory and the estimate of population based upon an actual enumeration prepared under the supervision of the City Clerk.

In talking with those people outside the city limits, they were opposed to annexation because they feel they are supporting Petersburg through their sales taxes and do not believe they will receive any additional services than they now have. Some feel that their 7 mill property tax will be used to bail Petersburg out of its financial problem and not provide them with a significantly higher level of service. At the present time the City of Petersburg does provide police protection, fire protection and ambulance service beyond the City limits despite any legal liability problems.

Re: Petersburg Annexation
Mailing of Petition and Brief

Dear Mayor or City Clerk:

This office is legal counsel for the City of Petersburg which is currently in the process of petitioning for extension of its municipal boundaries by annexation. We have a problem in connection with the annexation and its origin was right in this office.

On November 22, 1977, this office filed the City of Petersburg's Annexation Petition and Brief with the Department of Community and Regional Affairs. On that date copies of the Petition were mailed by regular mail to Kake, Wrangell, and Kupreanof. The next day, realizing that the regulations prescribed that the mailing shall be by registered or certified mail, this office again mailed copies of the Petition and Brief to Kake, Wrangell and Kupreanoff -- this time by certified mail. The problem was that, for reasons which remain unknown to me, the envelope addressed to Kupreanof was sent out without postage. Then to aggravate the problem, the Petersburg Post Office sat on it from receipt in late November until the present time, it not being returned to this office until December 20, 1977.

These factual circumstances give rise to major concern on the part of the Local Boundary Commission because notice to adjoining municipalities is a jurisdictional

precondition to the convening of a valid Local Boundary Commission proceeding. In yesterday's mail you probably received a copy of a letter which I addressed to Mr. Erik Simpson of the Department of Community and Regional Affairs which recited the problem which I was having with the return receipt of mail addressed to Kupreanof. With today's return of the envelope which was "returned for postage", I am perfectly aware of what the problem was and its origin. And now I convey my sincere apologies for having to trouble you.

It is my considered opinion that this defect can be remedied in either of two ways. The first is to have the Mayor or Clerk of the City of Kupreanof prepare a letter addressed to me which acknowledges receipt of Petersburg's Annexation Petition, Brief and Exhibits postmarked November 22, 1977, stating the approximate date on which they were received, probably around November 24 or 25, 1977, then have your letter notarized either by a Notary Public for the State of Alaska or by the U.S. Postmistress. It is essential that your statement be either notarized or sworn to by the postmistress. I would ask that you then send the letter back to me. That is the preferable procedure, I believe. The other alternative would be to have the City of Kupreanof take formal action in the form of a resolution waiving the requirement that the petitioner send copies of the Annexation Petition, Brief, and Exhibits to the adjoining municipality of Kupreanof at or about the time Petition was filed with the Department of Community and Regional Affairs. In such event, the resolution should also acknowledge that notice of the Petition had in fact been received by the City via mailing postmarked November 22 (or perhaps it was possibly even November 23 if the mail was picked up here in Juneau late that day).

I solicit your prompt attention and favorable cooperation.

Enclosed is another copy of the Petition, Brief, and Exhibits taken from the envelope which was returned to this office for postage.

Very truly yours,

ROBERTSON, MONAGLE, EASTAUGH & BRADLEY

Re: In the Matter of Annexation by City of Skagway, Alaska

Gentlemen:

This letter supplements the Brief of Pacific and Arctic Railway and Navigation Company filed in the above entitled proceeding.

Wherever throughout the railroad's Answering Brief reference is made to the distance from the northern boundary of the City to the U.S./Canada international border as "almost 20 miles", this should be amended to read "approximately 12 miles". However, where throughout the Answering Brief, reference is made to the distance from the City to the border via the railway, this remains "almost 20 miles".

In reply to the petitioner's Errata and Addenda filed the 26th day of November, 1976, the railroad submits the following:

1. Reference to a topographic map of the area submitted herewith shows that the only land which is not very steep hillsides is the valley of the Skagway River including the White Pass Fork and the Warm Pass Valley. The White Pass Fork is in a steep gorge. The Warm Pass Valley has steep hillsides and is boulder-strewn along the river. There is a small amount of land capable of being developed at the confluence of these two streams. Downstream the river is in a gorge all the way to the East fork within a distance of three miles from the northerly limits of the City of Skagway. There is a small amount

of land near the mouth of the East fork capable of development. From there down to the northerly boundary of Skagway there is an area of flat land occupied by the numerous channels of the Skagway River, which is a braided stream in this area. Its course changes constantly and only at a few places along the banks is there any chance of development. U. S. Survey 3312 is in one of these few places approximately two miles from the City's north boundary. The mountain sides are too steep for any development. Although the City is entitled to select 10% of the land owned by the State within its boundaries, it appears there is very little land which is of any value for development. In fact, the City could select all of the land suitable for development with little or no extension of its boundaries.

2. When the Legislature allowed the cities and boroughs to select 10% of the State land within their boundaries, it would have resulted in every municipality in Alaska extending its boundaries in order to create a right to selecting more land whether it needed the land or not, except for the fact that the local Boundary Commission had the duty to protect the State from such unnecessary acquisitions beyond the needs of the communities. If the City of Skagway is allowed to acquire an additional 106,000 acres and to select 10,600 acres in addition to the selections to which it is already entitled, then a city like Juneau should be allowed to annex Admiralty Island and all of the mainland half way to Petersberg and half way to Haines and Skagway. If such practice was allowed, the State would lose almost 10% of all its lands because there would be no end to the amount of land various communities would claim they are entitled to. It is your duty to protect the State while giving the city what lands it needs, if any.

The City of Skagway has not shown how the services will be provided to the territory it proposes to be annexed or when they will be commensed to be furnished or fully available although it plans to start taxation in 1978. 19 AAC 05.020 requires as a condition precedent to granting annexation that the services will be provided within a reasonable time or differential tax zones will be established. No such showing has been made so

therefore the application should be denied. Although the Commission may find that some services are needed and can be furnished under some plan which the City may furnish later, the fact remains that there is no need for any extension of municipal services more than one and one half miles from the corporate limits of the city. There must first be a need and then a plan capable of being implemented. Without a need the plan should be confined to the area which the Commission finds is in need of these services.

Respectfully submitted

N. C. Banfield

Nov. 24, 1977

Ladies and Gentlemen of the Local Boundary Commission:

On the evening of Monday, November 21, 1977 I was one of several out-of-city residents of Mitkof Island who attended the public hearing and Petersburg City Council meeting. The subject of the hearing was the first item on the agenda of the city council: A petition by the city council of Petersburg to annex Mitkof Island. The out-of-city residents had numerous questions concerning this important matter--unfortunately the city council was not prepared and so were unable to supply anything except vague generalizations.

Whereas the city council of the city of Petersburg has had two years in which to study the feasibility of the aforementioned annexation (two years having elapsed since the last time the city council tried to petition for annexation of the island), and whereas the city council of the city of Petersburg has by its own admission no idea whether such annexation is feasible, I therefore submit that the aforementioned petition is premature at best, and that until an in depth feasibility and impact study have been undertaken and completed and presented to the public, such a petition is at best ridiculous.

I further submit that whereas the overwhelming majority of the out-of-city residents of Mitkof Island are opposed to the aforementioned annexation, and that whereas many out-of-city residents of the island favor alternative methods of incorporation of the area, further feasibility and impact studies should be undertaken; to wit:

1. The creation of a unified first class borough, to include the city of Petersburg and Mitkof Island.

2. The creation of a unified second class borough, to include the city of Petersburg and Mitkof Island.

3. The creation of a second class borough, to include Mitkof Island and to exclude the city of Petersburg.

4. The creation of a first class borough, to include Mitkof Island and to exclude the city of Petersburg.

5. The creation of a first class borough to include Mitkof Island, the city of Petersburg, Kupreanof Island, Kuiu Island, the northern half of Prince of Wales Island and the southern half of Admiralty Island.

6. The creation of a second class borough to include Mitkof Island, the city of Petersburg, Kupreanof Island, Kuiu Island, the northern half of Prince of Wales Island and the southern half of Admiralty Island.

7. Further alternative methods of incorporating that part of Mitkof Island which lies outside the city limits of the city of Petersburg.

During the public hearing it became evident that while the city council of the city of Petersburg wants the taxes of the out-of-city residents of the island, they want to give these same residents no services. When asked how they could pay for the extra services which would be demanded by the residents of the area being considered for annexation the council seemed surprised that we should want or need any services beyond those now available. It should be noted that the services now available are inadequate for the area for which they are legally responsible, let alone the area being considered for annexation. If the area in question were annexed the State Troopers who now protect the island would almost certainly be withdrawn, and the present city police department of the city of Petersburg cannot even protect the post office, (which is across the street from the police department) from vandals; therefore the lobby of the post office must be locked after 6:00 P. M. Although the city has a fine volunteer fire department, it is physically impossible for them to protect more than the city proper--last Saturday they arrived at Sandy Beach (two miles from downtown) just in time to see Bill and Joyce Jenkins' house metamorphose into an excellent site for a wienie roast. While Sandy Beach is outside the city limits, the department, although it has no legal responsibility has a moral obligation which it cannot fulfill; if the area were annexed they would have a legal responsibility but lack the physical resources necessary to fulfill this responsibility.

In closing I should like to make a subjective observation: The city council of the city of Petersburg reminds me of a third class juggler, who unable to handle the objects now in motion, deigns to turn the act into a comedy by calling for more objects.

Sincerely yours,

T. Herlinger

PETITION

1. PETITIONER'S NAME. The petitioner's name is City of Petersburg, Alaska, and mailing address is P.O. Box 329, Petersburg, Alaska 99833; Phone: 772-4511.

2. ATTORNEY. Petitioner's attorney is Robertson, Monagle, Eastaugh & Bradley, P.O. Box 1211, Juneau, Alaska 99802; Phone: 586-3340.

3. BOUNDARY DESCRIPTION. The legal description of the territory all in the First Judicial District, State of Alaska sought to be annexed is:

> The entirety of Mitkof Island and contiguous waters extending a distance of 1,000 feet from line of mean high tide excepting in Wrangell Narrows which distance shall be the mid-points between Mitkof and Kupreanof Islands.

4. LAND QUANTITY. The quantity of land in the territory proposed for annexation is 211 square miles, excluding the tide and submerged lands and present municipal limits.

5. VALUATION. The estimated value of real property in the proposed territory is $6,790,000, valuation of personal property being estimated at $250,000.

6. POPULATION. The number of residents in the territory proposed to be annexed is 514.

7. PROPERTY TAX. There is no real or personal property tax levied against the property.

8. SALES TAX. There is no sales tax levied by or collected in the territory.

9. BONDED INDEBTEDNESS. There is no outstanding bonded indebtedness for which the territory to be annexed is currently responsible.

10. EXHIBITS. Incorporated by reference are the following exhibits:

A. Legal description of present municipal boundaries.

B. Map of existing boundaries.

C. Map of proposed territory sought by annexation.

D. Certified ordinance authorizing annexation procedures.

E. City Attorney's affidavit respecting information sources.

F. Attorney's certificate of service.

DATED this 22nd day of November, 1977.

PETITION OPPOSING ANNEXATION TO

PETERSBURG, ALASKA

WE, THE UNDERSIGNED, BEING CITIZENS OF MITKOF ISLAND, BOTH INSIDE AND OUTSIDE THE PRESENT CITY LIMITS OF PETERSBURG, ARE STRONGLY OPPOSED TO THE PROPOSED ANNEXATION TO PETERSBURG AT THIS TIME DUE TO THE METHODS USED BY THE CITY IN DIRECT OPPOSITION TO THE DESIRES OF THE MAJORITY OF THE CITIZENS AND BECAUSE OF ERRORS IN THE FIGURES AS PRESENTED TO THE LOCAL BOUNDARY COMMISSION AND THE FAILURE BY THE CITY TO PROPERLY RESEARCH AND DOCUMENT THE ECONOMIC CHANGES SUCH ANNEXATION WOULD PRESENT TO THE CITY RESIDENTS AND THOSE IN THE ADJOINING PROPOSED AREAS. WE ARE EXTREMELY CONCERNED IN THE MANNER IN WHICH THE CITY HAS PRESENTED THIS ANNEXATION WITHOUT PROPER PUBLIC INPUT. WE ALSO PETITION THE HOUSE AND SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEES TO HOLD A JOINT HEARING IN PETERSBURG IN ORDER TO OBTAIN THE TRUE FACTS AND PUBLIC INPUT REGARDING THIS PROPOSED ANNEXATION.

PETITION OPPOSING ANNEXATION TO

PETERSBURG, ALASKA

WE, THE UNDERSIGNED, BEING CITIZENS OF MITKOF ISLAND, BOTH INSIDE AND OUTSIDE THE PRESENT CITY LIMITS OF PETERSBURG, ARE STRONGLY OPPOSED TO THE PROPOSED ANNEXATION TO PETERSBURG AT THIS TIME DUE TO THE METHODS USED BY THE CITY IN DIRECT OPPOSITION TO THE DESIRES OF THE MAJORITY OF THE CITIZENS AND BECAUSE OF ERRORS IN THE FIGURES AS PRESENTED TO THE LOCAL BOUNDARY COMMISSION AND THE FAILURE BY THE CITY TO PROPERLY RESEARCH AND DOCUMENT THE ECONOMIC CHANGES SUCH ANNEXATION WOULD PRESENT TO THE CITY RESIDENTS AND THOSE IN THE ADJOINING PROPOSED AREAS. WE ARE EXTREMELY CONCERNED IN THE MANNER IN WHICH THE CITY HAS PRESENTED THIS ANNEXATION WITHOUT PROPER PUBLIC INPUT. WE ALSO PETITION THE HOUSE AND SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEES TO HOLD A JOINT HEARING IN PETERSBURG IN ORDER TO OBTAIN THE TRUE FACTS AND PUBLIC INPUT REGARDING THIS PROPOSED ANNEXATION.

TO: COMMUNITY & REGIONAL AFFAIRS COMMITTEE

ATTENTION: Honorable Joseph Orsini,
Chairman, and Committee
Members

From: Gertrude B. Lyons
P. O. Box 1128
Petersburg, AK 99833

Date: February 8, 1978

I am on the Board of Directors of the Petersburg Indian Association and have been a resident of the City of Petersburg all my life and have been authorized by unanimous vote of the Board to appear and protest to the Legislature any extension of the boundaries of Petersburg. The members of the Petersburg Indian Association are strongly opposed to the recommendations of the Local Boundary Commission to the Legislature of the State of Alaska concerning the extension of the boundaries of the City of Petersburg.

The Petersburg Indian Association was formed because of the various Alaska native groups, including the Tlingit-Haida Central Council, the Alaska Native Brotherhood, the Alaska Native Sisterhood, and Sealaska Corporation, which had programs to be administered within the Petersburg area. The Petersburg Indian Association is a combination and serves and represents all Alaska native programs administered in the Petersburg area. There are approximately one hundred eighty-five (185) adult members in the Petersburg Indian Association, all of whom are residents residing in the existing City of Petersburg.

The Petersburg Indian Association has reviewed the petition submitted by the City of Petersburg to the Department of Community and Regional Affairs for the annexation or expansion of the existing city limits of Petersburg and the recommendations of the Local Boundary Commission to the Legislature. The Petersburg Indian Association is strongly opposed to any expansion of the existing city limits of Petersburg.

The existing tax base for the City of Petersburg, including real property taxes, sales taxes, and utility charges is extremely high and before any of the existing utilities are expanded to additional areas, and before any additional police and fire protection services are expanded to additional areas, it appears to the Petersburg Indian Association that steps should be made to improve and reduce the charges to the existing residents within the present city limits of the City of Petersburg. The cost of expanding utilities and services to any additional areas could only be met by additional taxes far and above those which would be generated through the annexation of the additional area.

I was employed for eight (8) years as a dispatcher for the City of Petersburg Police Department, having left that position approximately one (1) year ago. In reviewing the petition of the City of Petersburg for additional areas to be annexed I noted the number of emergency medical treatment calls that they attributed to

areas outside the existing city limits. Based upon my own observations and experience, by far the vast majority of these calls would have been to the Petersburg Municipal Airport or to the float plane charter services operated in and out of Petersburg, bringing injured or sick persons from other areas to receive treatment at the Petersburg hospital.

The existing fire equipment is inadequate to serve outlying areas without the addition of water lines and hydrants as the present tank trucks or pumper trucks would not be sufficient to fight any major fire without fire hydrants being located in the immediate vicinity.

If police protection is to be afforded in the additional annexed area it will require that at least one additional squad car be added to the existing police force and at least four (4) officers, one for each shift and one as a relief officer. The existing bonded indebtedness of the City of Petersburg is the highest per capita in the State of Alaska. It would seem apparent that if additional services and utilities are afforded to areas outside the existing city limits, that the only way this could be accomplished would be by incurring additional bonded indebtedness which would place an undue burden and hardhip on the taxpayers and residents of the City of Petersburg. This is particularly true of our native residents who for the most part are employed on a seasonal basis, which severely limits their income and ability to pay any additional taxes or utility charges.

Before any additional areas are added to the City of Petersburg, the Petersburg Indian Association and myself feel that definite steps and improvements should be made within the city limits to reduce the taxes and improve existing services and utilities, particularly the electric utility services which, in my opinion, are the highest in the State. Presently people outside of the existing city limits of Petersburg pay a surcharge on top of their electric service charges for being rendered that service by the city; however, if these areas are included in the city this surcharge would be lost, and the only way that this could be made up is by adding to the already high electric service charges being taxed on the residents of the City of Petersburg.

For these reasons, the Petersburg Indian Association respectfully requests that the Senate and the House of Representatives pass a concurrent resolution rejecting the recommendation of the Local Boundary Commission.

Respectfully,

Gertrude B. Lyons

Gertrude B. Lyons

SUMMARY OF PROPOSED PETERSBURG ANNEXATION

Present area of Petersburg: 2.1 square miles

Area to be annexed: Northern half of Mitkof Island (approx. 45 sq. miles)

Property value for annexed area: Approximately $7 million in real and personal property.

Present population of Petersburg: 2 126

Population in annexation area: 514

Purpose for annexation:

1. "Substantial population" exists in outlying area
2. Petersburg currently provides limited municipal services to the area.
3. Petersburg owns property in the area
4. Petersburg serves as the commercial center for the area.
5. Petersburg currently has jurisdiction in the area for parks, roads, trails, hydroelectric facilities, an airport, and its municipal water supply.
6. Petersburg residents use are for recreation
7. Annexation of area would provide logical and rational basis for Petersburg to plan and manage future growth, including:
    a) Coastal Zone Management
    b) Planning and Zoning
    c) State land selections

Additional reasons for annexation:

The City already provides basic municipal services to Mitkof Island (fire, ambulance, public protection) whenever it can, but residents of outlying areas receive these services without paying taxes for them.

Reasons in opposition to annexation (by plaintiff in Court suit):

1. City violated procedural requirements by submitting information favorable to annexation after January 5 deadline.
2. Supporters of the annexation submitted erroneous and deliberately misleading information to the Boundary Commission, including:
    a) Population figures for the City of Petersburg
    b) Increase in power rates resulting from annexation
    c) Requirement for increased sales taxes
    d) Costs relating to the extension of sewer and water services
    e) Adverse impact on the Petersburg School District budget
3. Plaintiffs were denied access to public information by the City of Petersburg regarding data submitted by the City to the Commission.
4. A previous election (August 26, 1976) showed 279 opposed and only 73 in favor of the expansion of the City's boundaries.
5. Boundary Commission has not correctly applied the statutory

standards for annexation to the Petersburg situation. (19 AAC 05.010.020)

Additional concerns expressed by letter of protest:

Taxes in Petersburg are already among the highest in Alaska yet municipal services are poor. Any attempt by the City to annex Mitkof Island would greatly extend the City's obligation to provide municipal services to outlying areas from which little or no revenue could be derived.

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MINUTES

FEBRUARY 7, 1978

Present: Chairman Orsini, Senators Willis, Hackney and Sumner. Wm. K. Mearig; J. R. Floden; Frances G. Westre; David A. Moffat; Gene Owens; Sigvald J. Strandberg; Erick J. Simpson; Sunny A. Hick; Gertrude Lyons; Lars Eide; Ed Lapeyri; James F. Petersen; Annette Smith; Bruce Aronson.

Absent: Senator Ferguson

Chairman Orsini convened the hearings at 3:15 PM. He announced that the Committee would take testimony on SJR 38, 29 & 40 but would take no action on the resolutions that day.

SJR 39 (Proposed Annexation by Haines Borough):

Chairman Orsini asked Sigvald Strandberg, Chairman of the Boundary Commission, to give the circumstances behind the proposed annexation of land on which stood fuel tankds formerly operated by the military. Mr. Strandberg described the action as pro forma in nature to allow the Haines Borough to eliminate a pocket of non-borough land inside its borders. He explained that the final disposition of tank farm property, which would be handled by the General Services Administration, would not be affected by the Borough's action and that the military had not objected to the proposed annexation. Mr. Strandberg also stated that no objections had been made by members of the public during the Boundary Commission's hearings in Haines. No one else wished to testify on SJR 39 and Chairman Orsini closed the hearings on the resolution.

SJR 38 (Proposed Annexation by the City of Skagway):

Mr. Strandberg noted that the City of Skagway originally requested to extend its boundary to the Canadian border and that of the Haines Borough. He noted that this raised the question in the Boundary Commission's opinion of what properly constituted city government versus that of a borough. The Commission therefore recommended a smaller extention of the City's boundaries and informed the City that it could, if conditions warrented, petition the Commission in the future to move its jurisdiction to the Canadian border. The City of Skagway supported this action by the Commission and agreed with the recommendation. Strandberg acknowledged that public testimony by persons residing outside the present City boundaries was opposed to annexations since they believed that they were already paying for municipal services through the sales tax. In response to questions from Committee members, he said that the Commission had not considered the inclusion of the Dyea area into the City of Skagway and that such an action would require separate Commission action.

William Ruddy, an attorney representing the City of Skagway, said that public opposition had been expressed to the proposed annexation but that it was not organized.

In the absence of further public testimony, Chairman Orsini closed the hearings on the resolution.

SJR 40 (Proposed Annexation by the City of Petersburg):

Mr. Strandberg said that public hearings had been held by the Commission in Petersburg January 9 before an overflow crowd with the testimony being broadcast live over the local radio station. On January 16 the commissioners held a telephonic conference and approved a recommendation for the extension of the City of Petersburg boundary.

He explained that the Commission's recommendation called for the city boundary to be extended only over the northern portion of Mitkof Island, an area of approximately 45 square miles. The City had originally petitioned for the annexation of all Mitkof Island, an area of approximately 211 square miles. Mr. Strandberg said that the Commission respected the City's reasons for the larger request, which included concerns about Coastal Management and municipal selection of state lands. He said that this again raised the question of borough versus city government and that the Commission had recommended an area for annexation that would take in almost all residents, but not all the territory, of Mitkof Island. He noted that, in the Commission's view, the natural development of the City of Petersburg lay along Mitkof Highway and that the outlying areas did benefit from municipal services. The incorporation of this area would remove the present tax inequity between the residents of the City and the outlying district. Mr. Strandberg pointed out that the City of Petersburg has a narrow tax base, but a fairly heavy bonded indebtedness. The 2,126 City residents have a bonded indebtedness of $3.7 million against a property valuation of $34 million. Thsi gives the City a debt/valuation ratio of approximately 11% as opposed to a 5.4% ratio for the City and Borough of Juneau and 3% for the City of Ketchikan. He noted that there were considerable private land holdings south of Petersburg along the Mitkof Highway.

In response to questions from Committee members, Mr. Strandberg made the following comments: The City indicated that it would assess one-half, or 7 mills, of the present City mill rate against the residents of the outlying area for the first year after annexation. Petersburg City Councilmen run at large and therefore there would be no council seat per se representing the annexed outlying area. During the public hearings in Petersburg, public sentiment ran about four to one against annexation. The August 26, 1975, election during which City voters rejected annexation was a straw vote on another proposed annexation and for which sketchy data had been gathered in regard to potential tax revenues. Service areas in the unorganized Borough could be established by the Legislature only if the same services could not be provided by annexation to existing local governments.

The vote of the Commission had been three to one for the proposed annexation. Children in the outlying area presently attend City schools shich receive tuition payments from the State. The economic future of Petersburg lies fishing and some logging. Industry would find it attractive to locate in the outlying area following annexation.

William Ruddy, the attorney representing the City of Petersburg, and William Mearig, representing the Petersburg city government, testified

jointly. Mr. Mearig stated that the 1975 annexation vote concerned the proposed annexation of West Petersburg, which has now incorporated separately as the City of Kupreanof, and did not pertain to the present recommendation. He noted that the Environmental Protection Agency was requiring the extension of sewer and water facilities to outlying areas. Either the City of Petersburg would provide these services or they would be mandated at the state or federal level. In response to questions from the Committee members, Mearig concurred that Petersburg's economic future lay with fishing and stated that any expansion of fishing facilities would probably occur at the four plants currently within the City's boundaries. Because of environmental and esthetic concerns, little or no development is likely to take place in the Narrows. He commented that strictly speaking it was illegal for the City to provide municipal services to the outlying area.

James Petersen, the attorney representing the plaintiffs in the court suit opposing the proposed annexation, testified that his clients opposed the annexation on the grounds that insufficient study had been given to the revenue, tax burden, and expense of the action. He stated that the original petition requesting annexation had been hastily put together and that the municipal ordinance had had its first reading with no public input. The second and third readings took place on the same night. Studies were lacking on population density, cost of police protection, cost of water and sewer facilities, and cost of electric power extension. Peterson said that his clients were not opposed to annexation per se and believed that the establishment of a service district (outside of the municipal boundary) could provide a viable solution. He emphasized that it was not only residents of outlying areas who opposed annexation but the residents of the City as well.

Frances Westre testified, as a member of the Petersburg City Council, that the Council had unanimously approved the proposed annexation as being in the best interests of the community of Petersburg and its environs. She said that the apparent haste in acting upon the petition was due to the legal requirement to submit all annexation recommendations to the Legislature by the tenth day of session. She pointed out that Petersburg and Wrangel were jointly studying a proposal for hydroelectric development in the Thomas Bay area that would provide relatively inexpensive power for economic development in the area. Ms. Westre said that Bruce Aronson of the Department of Community and Regional Affairs had originally raised the annexation question in Petersburg several years ago.

Lars Eide read to the Committee a letter he sent on December 12, 1977, to Commissioner of Community and Regional Affairs Lee McAnerney protesting the proposed annexation as contrary to the wishes of the majority of the people of Petersburg. He stated he was part owner of Mitkof Lumber Company which employes approximately 23 persons about 75% of whom lived in the City and 90% of the company's production was exported.

David Moffat, City Manager of Petersburg, said that the impetus for annexation had originated from residents in the outlying areas and that he had heard of little opposition to the proposal from within the City. He noted that, without the existence of the City of Petersburg, it would be unlikely that industries outside city limits would have located in the area. Moffat pointed out that the City has a

significant interest in exercising planning for Coastal Management for Mitkof Island as well as achieving a wider basis for future municipal selection of state land. He also noted that the possibility of a deep water port had been studied for the southern tip of Mitkof Island.

Ed Lapeyri, a resident and General Manager of Mitkoff Lumber Company, a plaintiff in a court suit against the annexation, testified that outlying residents did not receive municipal services for wohich they did not pay. He stated that residents outside city limits paid a 15% surcharge for electricity and a 50% surcharge for water. As for fire protection, the State paid the City $7.50 per capita for residents outside City limits. He submitted to the Committee the following petition signed by 543 residents of the general Petersburg area:

"WE, THE UNDERSIGNED, BEING CITIZENS OF MITKOF ISLAND, BOTH INSIDE AND OUTSIDE THE PRESENT CITY LIMITS OF PETERSBURG, ARE STRONGLY OPPOSED TO THE PROPOSED ANNEXATION TO PETERSBURG AT THIS TIME DUE TO THE METHODS USED BY THE CITY IN DIRECT OPPOSITION TO THE DESIRES OF THE MAJORITY OF THE CITIZENS AND BECAUSE OF ERRORS IN THE FIGURES PRESENTED TO THE LOCAL BOUNDARY COMMISSION AND THE FAILURE BY THE CITY TO PROPERLY RESEARCH AND DOCUMENT THE ECONOMIC CHANGES SUCH ANNEXATION WOULD PRESENT TO THE CITY RESIDENTS AND THOSE IN THE ADJOINING PROPOSED AREAS. WE ARE EXTREMELY CONCERNED IN THE MANNER IN WHICH THE CITY HAS PRESENTED THIS ANNEXATION WITHOUT PROPER PUBLIC INPUT. WE ALSO PETITION THE HOUSE AND SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEES TO HOLD A JOINT HEARING IN PETERSBURG IN ORDER TO OBTAIN THE TRUE FACTS AND PUBLIC INPUT REGARDING THIS PROPOSED ANNEXATION."

Mr. Lapeyri said that these signatures were obtained within three days last week and that every reasonable effort was made to insure that resident adults were the only persons who signed. He told the Committee that of the 543 petition signers, 193 lived outside the City and 350 lived within the City limits.

Mr. Lapeyri charged that during the City Council deliberations on the annexation petition, a show of hands indicated that only 11 of the 93 persons present supported annexation and that, of the 6 who testified in favor of the measure, four were city employees or relatives of Council members. He said that real property valuation for the 1975 proposed annexation was $6.3 million and in 1977 only $6.7 million for a slightly different area. He also cited an unidentified study undertaken by a local private firm that indicated no significant economic development in Petersburg in the future. In response to Committee members' questions he acknowledged that fishing was considerably more important economically to Petersburg than logging which he characterized as "shakey".

Gene Owens, a resident of Petersburg, testified in support of the proposed annexation . He stressed that the State had consistently urged localities to assume local government control in the Unorganized Borough in such matters as Coastal Management planning. Mr. Owens said that the annexation of land on Mitkof Island by Petersburg was consistent with that objective.

John Floden, city engineer for Petersburg, spoke in favor of the annexation recommendation and pointed out that the City had basically proposed a service area concept. He noted that 19% of the population

of Petersburg currently lives outside the city limits. This meant that those inside the city pay 19% more for municipal services than thier just share, while those outside pay 19% less. Mr. Floden said that without the extension of planning and zoning powers to the present outlying areas they were likely to develop in a haphazard manner leading to severe water and sewage problems in the future. There were instances in the outlying area where land was being subdivided into lots too small handle on-site sewage and water. Mr. Floden said that the City's goal in the annexed area would be to maintain large lots so as to prevent the need to establish sewer and water lines to high density residential and commercial dwellings. Additionally the projected linkage of Mitkof Highway with a proposed Stikine Highway could result in unrestrained commercial development of gas stations, drive-ins, etc. along the way unless proper planning and zoning authority existed to control it. In response to Committee members' questions, he said he believed a comprehensive community development plan for Petersburg had been prepared in 1965/66.

Certrude Lyons, a plaintiff in the court suite against the proposed annexation and a member of the Board of Directors of the Petersburg Indian Association, testified that the increased costs association with the extension of services to outlying areas would work an undue hardship on Native residents of Petersburg who were primarily dependent upon seasonal employment. Ms. Lyons said that the membership of the Petersburg Indian Association was approximately 185 adult persons and that the Association was the combined organization for the Tlingit-Haida Central Council, the Alaska Native Brotherhood, the Alaska Native Sisterhood, and Sealaska Corporation.

Sunny Hicks, a resident of the Petersburg area and opponent of the proposed annexation, characterized the community atmosphere of Petersburg as a "local Watergate situation" where neighbors were divided against one another and conversations were surreptitiously recorded. She blieved that local ani. sities had been inflamed by the City's handling of the annexation petition. She stressed that the residents of the outlying area considered themselves to be members of the general Petersburg community and were willing to assume their share for local services. She questioned whether the City was capable of efficiently carrying out its present obligations, much less undertake more extensive ones without the compensation of major new revenues.

William Mearig requested to testify a second time to present his views as a private citizen in addition to his capacity as a city official. He said that the proposed annexation offered outlying residents their first chance to participate in the political decisions affecting them locally, even in the absence of a separate election district for the area. He stated that participation in local government in such matters as Coastal Management offered residents more protection than if they remained unorganized and allowed either the State or federal government to impose regulations on them.

In the absence of further public testimony on SJR 40, Chairman Orsini concluded public hearings on the resolution and adjourned the Committee at 6:28 PM.

FOR: Senate Community and Regional Affairs Committee members

PREPARED BY: Ben Harding, Senate C/RA Committee Staff

DATE: February 16, 1978

SUMMARY OF ECONOMIC AFFECTS OF PETERSBURG ANNEXATION

GENERAL

Revenue Gains

High estimate:	$238,600 *
Low estimate:	$ 88,600 **

(*using sales tax estimate of $150,000 annually)
(**using sales tax estimate of $50,000 annually)

Revenue Losses or Added Expenses

High estimate:	$182,000 *
Low estimate:	$157,000 **

These estimates are based on the following assumptions:

a) No added water and power services to annexed areas (per City policy).
b) No added police, ambulance, or fire services (per City statements that these services are already funded through State revenues sharing).

(*using high estimate for increased administrative costs)
(**using low estimate for increased administrative costs)

FINANCIAL BREAK-DOWN BY CATEGORIES

Revenue Gains

1) Sales Tax Revenues:	High estimate:	$150,000
	Low estimate:	$ 50,000

The City has estimated that a sales tax could raise approximately $150,000 annually in new revenues from the annexed area. Annexation opponents contend that this figure is greatly inflated and that a more realistic estimate is closer to $50,000. The City has acknowledged that its estimate is very rough and that it was not able to obtain firm data on which to base its figures.

2) Electricity Rate Increases

$1 a month for residential and commercial users

$2 a month for industrial users

Estimated revenue: $19,000

It is the City's intent that electricity rate increases will equal and offset revenue losses from the elimination of surcharges on water and electricity to users in the previously outlying areas.

3) State Revenue Sharing (using a population increase of 500)

Police	$6,000
Air and Water Pollution	1,000
Parks and Recreation	2,500
Transportation	2,500
Roads (est. 3 miles)	4,500
Health Service	1,000
Regular*	850
Liquor*	1,100
Amusement and games*	150
Gross receipts tax**	1,000
Total Revenue:	$20,600

(*from Department of Revenue estimates)
(**Department of Revenue estimates $2,000 in revenue sharing from gross receipts. However over $1,000 annually appears already to have been inadvertently shared with the City)

4) Property Tax Revenue

7 mills on an estimated $7 million in real and personal property $49,000

Revenue losses of Increased Expenses:

1) New Administrative Costs

High estimate:	$50,000 *
Low estimate:	$25,000 **

This figure is derived from the assumption that increased administrative responsibilities, such as Planning and Zoning, for the annexed area will require an increase in City administrative personnel.

(*using high estimate of 1 officer and 1 secretary plus office start up costs)

(**using low estimate of 1 secretary/clerk plus office start up costs)

2) Elimination of State Tuition Payments

$97,700

This figure is based on the calculation that 100 students will come from the annexed area. For 1977/78 payments, the Department of Education is using $976.74 per pupil. Currently 115 students from outlying areas (including 5 from Kupreanof) attend Petersburg schools. The City's own loss projection was $47,000 which was calculated on the Department of Education payments per pupil of $443.61. That was the rate of payment used by the State last year. These payments will more than double this year.

3) Other Expenses

a)	Electricity and water extension costs	$ 0 *
b)	Police, ambulance and fire service costs	$ 0 **

(*City plans no extension of power and water service beyond present level)

(**City plans to maintain these services at present level using existing State revenue sharing funds)

BACKGROUND

In its original annexation petition, the City of Petersburg requested the annexation of all Mitkof Island, an area of approximately 211 square miles.

The Local Boundary Commission recommended instead the annexation of the northern end of Mitkof Island, or about 45 square miles. The Commission's rationale was that 211 square miles would have created a territory calling for a borough organization without Petersburg having gone through the borough government process. The Commission believed that a city government provides essentially direct services to its citizens whereas a borough exercises regional responsibilities. As a result, its recommendation provided for the City of Petersburg to annex areas containing virtually all the population of Mitkof Island, but excluded uninhabited or yet-to-be-developed areas.

Following annexation, the City has said that it would increase electricity rate charges by $1 a month for residential and commercial users and be $2 a month for industrial customers. The present surcharges to outlying residents for City water and electricity would then be dropped. The City's intent is that the rate increases would equal the loss of revenue resulting from the elimination of the surcharges.

The City has no plans to extend water or electricity, beyond its present service level, to the annexed area. Police, fire and ambulance services to these areas are projected to remain unchanged and funded through State revenue sharing. (Confirmed in telephone conversation with Petersburg City Manager by Staff)

Other revenue-raising means the City plans to use include: a 7 mill tax levy on approximately $7 million in real and personal property located in the annexed area, a sales tax on transactions under $1,000, and the receipt of increased State revenue sharing funds.

Major revenue losses or increased expenses resulting from annexation include the dropping of State tuition payments, surcharge elimination, and the cost of probable added administrative services.

The proposed annexation has been strongly opposed by plaintiffs in a court suit who charge that inadequate study and planning have gone into the proposal. They cite poor or expensive municipal services and a high bonded indebtedness as evidence of the City's inability to take on added municipal obligations. A petition containing the signatures of 543 Petersburg residents in opposition to the annexation was presented to the Senate Community and Regional Affairs Committee February 7.

ANALYSIS

A major charge made by opponents of annexation is that the City is presently overextended financially and could under no circumstances assume additional financial obligations without the assurance of at least matching revenues. The annexation opponents contend that any new sources of revenue in the outlying area are minor and would be more than off-set by increased expenses.

The City acknowledges that its data on the economic impact of annexation

are fragmentary and based on rough estimates open to challenge. In fact, the attorney for the City wrote to the Boundary Commission that "I am strongly inclined to agree with that assessment about a short-term negative cash flow but similarly inclined to discount its magnitude predicated on the knowledge that many of the general services... have been provided heretofore." The attorney, L.B. Jacobson, further noted, "...nor was I of the opinion that financial viability of an annexation proposal was one of the standards promulgated in (state regulations) or the Alaska Constitution."

A summary economic analysis indicates, however, that the City has a fair chance of breaking even financially in the event of annexation, provided it does not extend to the annexed area any services it is presently not making available. The annexation would reduce somewhat, the City's unusually high (11%) bonded indebtedness to property valuation ratio. It would also increase City valuation by an estimated $7 million in real and personal property from the annexed area. (See attached table to compare Petersburg population and bonded indebtedness with similar Alaskan communities.)

It would appear from testimony presented by a number of city officials at the Senate hearings, however, that the proposed annexation does not directly address the real reasons which impelled the City to request the annexation of Mitkof Island in the first place.

Those reasons are threefold: 1) the desire to plan for the Coastal Management of Mitkof Island, 2) the desire to obtain an adequate land base for later municipal selection of state lands, and 3) the desire to plan for the rational and orderly development of Mitkof Island. None of these objectives is significantly met by the proposed annexation of the northern quarter of Mitkof Island. In fact, from one viewpoint, the recommended annexation only adds to the City's problems without providing any of the benefits which the incorporation of the entire island would entail.

Nevertheless, the Boundary Commission's question, i.e. would the annexation of the 211 square miles of Mitkof Island create a de facto borough government rather than a city?, appears valid.

The implementation of the proposed annexation would not however settle the issue. The City of Petersburg supports the Boundary Commission's recommendation for the smaller area annexation despite its desire to annex all of Mitkof Island. But the City has also expressed the intention to renew its petition next year for the incorporation of all Mitkof Island under the City's jurisdiction. At that time, the same issues and the same arguments of city versus borough government and the need for local regional control will have to be addressed again.

(Issued January, 1978)

State of Alaska

LOCAL BOUNDARY COMMISSION

Petition from City of Petersburg)
Requesting annexation of)
remaining portion of Mitkof Island)

STATEMENT OF DECISION

Whereas, on November 22, 1977, the City of Petersburg submitted a petition to the Local Boundary Commission through the Department of Community and Regional Affairs in accordance with Title 29 of the Alaska Statutes requesting annexation of the area generally described as the balance of Mitkof Island; and

Whereas, on December 1, 1977, the Department found the petition in proper form with the requisite content and accompanying exhibits; and

Whereas, upon notification by the Department of the petition's sufficiency, the Local Boundary Commission scheduled a public hearing with notice as prescribed by law; and

Whereas, the Local Boundary Commission conducted a physical inspection of the proposed annexation territory and held a public hearing in the Petersburg City Council Chambers on Monday, January 9, 1978; and

Whereas, the Local Boundary Commission held a decisional meeting in Anchorage on January 16, 1978, to review the proceedings on the annexation petition;

NOW THEREFORE, the Local Boundary Commission makes the following findings of fact and enters its decision thereto:

The portion of the petition territory accepted by the Commission meets the regulatory standards for annexation as follows:

19 Alaska Administrative Code 05.010 (a) (3): The territory on either side of the Mitkof Highway within the recommended annexation extending southerly from the current City of Petersburg limits is generally being utilized and developed for residential and business purposes and such growth generally represents an extension of the Petersburg community beyond current city limits.

19 AAC 05.010 (a) (4): The territory recommended for inclusion in the city is in need of City of Petersburg general fund services such as fire and police protection, land use planning and zoning and the City is the most appropriate local government entity for providing such needed services. The City is capable of providing such services and has presented a differential taxation plan which the Commission finds appropriate for integrating the territory with the present city.

19 AAC 05.010 (a) (5): Both the scarcity of developable property and the suitability of property along the Mitkof Highway southerly from the present city limits has resulted in Petersburg community growth in this direction. The Commission foresees continued community growth in the area defined for inclusion in the City by the recommendation, and finds that such growth warrants City of Petersburg jurisdiction.

19 AAC 05.010 (a) (8): The Commission finds that both residents of and property owners in the territory recommended for inclusion within the city benefit from the existence of the adjacent city and by inclusion in the city will make tax contributions commensurate with benefits derived from provision of city services.

On the basis of the foregoing, the Local Boundary Commission affirms its decision to accept, with Commission modification, the City of Petersburg boundary change petition in accordance with Exhibit "A" attached hereto.

LOCAL BOUNDARY COMMISSION.

STATE OF ALASKA

LOCAL BOUNDARY COMMISSION

JUNEAU, ALASKA

RECOMMENDATION FOR ANNEXATION OF TERRITORY TO THE CITY OF PETERSBURG, ALASKA

SUBMITTED JANAURY 18, 1978

RECOMMENDATION FOR ANNEXATION OF TERRITORY

TO THE

CITY OF PETERSBURG

WHEREAS, petitioner, the City of Petersburg, has requested that the entirety of Mitkof Island be annexed to the City of Petersburg, including the contiguous waters extending a distance of 1,000 feet from the line of mean high tide excepting in Wrangell Narrows at which distance shall be the midpoint between Mitkof and Kupreanof Islands; and

WHEREAS, subject to proper notice, the Local Boundary Commission conducted a public hearing in Petersburg on January 9, 1978, to hear testimony from the public concerning the proposed annexation; and

WHEREAS, upon conclusion of the public hearing the Local Boundary Commission requested additional data to supplement the hearing record; and

WHEREAS, petitioner, City of Petersburg, submitted the supplemental information requested to be distributed to Commission members; and

WHEREAS, the Local Boundary Commission held a decisional meeting on January 16, 1978;

NOW THEREFORE, the Local Boundary Commission recommends that pursuant to Article X, Section 12 of the Alaska Constitution and Alaska Statute 44.19.260, the petition brief and reply brief of annexation to the City of Petersburg was approved and the Local Boundary Commission modified the boundary to include a portion of Mitkof Island north of UT59S, Copper River Meridian. The official description of the proposed boundaries of the City of Petersburg are as follows:

Beginning at the SW corner of Section 31, UT59S, R81E, Copper River Meridian, Alaska; thence in an easterly direction along the S boundary of Section 31 protracted to its intersection with the mean low water of Mitkof Island; thence in a northerly, northwesterly direction along the meandering mean low water of Mitkof Island to the northerly tip of Mitkof Island; thence in a northwesterly direction to the center of the mouth of Wrangell Narrows; thence in a southerly direction along the center line of Wrangell Narrows to the point of intersection on the S boundary of Section 34, UT59S, R79E; thence easterly along the S boundary of UT59S to the point of beginning, containing 46.1 square miles more or less.

In accordance with Article X, Section 12 of the Alaska Constitution, this recommendation shall become effective forty-five days after presentation to the Legislature or at the end of the Session, whichever is earlier, unless disapproved by a resolution concurred in by a majority of the members of each House.

Report To Local Boundary Commission

Annexation
To
present limits
of
The 1st Class City of
Petersburg

Department of Community & Regional Affairs
Local Government Assistance

January 4, 1978

The City of Petersburg was organized in 1912 and exists as a first class city under the laws of Alaska. The City of Petersburg's boundaries encompass more or less 2.1 square miles excluding tide and submerged lands. The City's population for 1977 State Revenue Sharing purposes, as accepted by the Department of Community and Regional Affairs, is 2,126.

The City of Petersburg is situated on the northern end of Mitkof Island where the Wrangell Narrows connect to Frederick Sound. The City is located on a low lying plane extending between sea level and a general elevation of 200 feet. This area is approximately 5 square miles. The lack of topographical relief in this area has made it possible for Petersburg to expand beyond its present boundaries.

The City proposes to modify and extend its municipal corporate boundaries. The annexation of contiguous lands and adjacent waters to Mitkof Island will expand the existing general boundaries southward to encompass the entire island. Annexation was first contemplated in 1975 and proposed encompassing west Petersburg, which is now the City of Kupreanof. The City Council followed an October 1975 referendum mandate from its citizens not to pursue annexation, but the City now has current circumstances which it feels necessitates extension of the municipal boundaries to include the entire Mitkof Island.

On November 22, 1977, the Department of Community and Regional Affairs received a petition and brief for the annexation proposed by the City of Petersburg. On December 1 the Department accepted and found the petition and brief to be substantially in proper form and containing the factual information required.

Attached is a copy of the letter from L. B. Jacobson, petitioners' attorney, explaining the difficulty of mailing the petition and brief to the City of Kupreanof. However, the Department feels every reasonable effort was made to contact the City of Kupreanof.

Attached is a notice of filing the petition as published in the Petersburg Pilot, December 14, 1977. At the request of Representative E. J. Haugen and the City of Petersburg Erik Simpson and Doug Griffin scheduled a trip to Petersburg from December 19 through 21 to answer questions concerning annexation. On December 19, 1977, a notice of public hearing for the proposed annexation was submitted to the Petersburg Pilot. Since the notice could not be published in the newspaper until December 28, five notices of the public hearing were posted within the City at the post office, City Clerk's office, Archie's, The Trading Union and the Magistrate's office. Outside the City the notice was posted at Scow Bay Liquor, The Beachcombers and Mitkof Lumber on December 20, 1977.

In the petitioners' brief the City of Petersburg reports that seven annexation standards are satisfied for the territory proposed for annexation.

The City of Petersburg maintains that the annexation standards depicted by 19 AAC 05.010 of subsections (3) through (9) are applicable and satisified. Realizing that the City of Petersburg may propose annexation if only one of these standards is met, the Department will indicate the applicable standards and summarize any issues raised as follows:

Under subsection (3), the petitioners claim that the standard is satisfied because the territory between Blind Slough and Petersburg is essentially urban in character.

The Department notes that this standard may only partially be satisfied because the territory proposed for annexation beyond Mile 8 of the Mitkof Highway is not essentially urban in character.

Under subsection (4), the petitioners claim the residents of the area are presently in need of all the basic municipal services, and the City of Petersburg is in a most favorable position to provide them. The City has presently felt the necessity to provide a minimum level of police, fire and ambulance services outside the present City limits.

The Department raises the issue that police, fire and ambulance services cannot legally be provided outside the City limits according to AS 29.48.037. The above municipal powers are not extraterritorial powers granted to the City of Petersburg by state statute.

Under subsection (5), the petitioners maintain there is no doubt that the future growth of Petersburg will occur within the territory and that annexation will permit the City to plan and control its development. It is envisioned that State land selections under the Statehood Act and the municipal entitlement of 10 percent of the vacant unappropriated land within the annexed territory will cause a material deviation from the old patterns of growth and development.

The Department raises the issue that this territory could be annexed at a time when the State receives title to this land rather than second guess which lands will actually become available for State land selection and municipal entitlement.

Under subsection (6), the petitioners maintain that annexation will alleviate the condition presently jeopardizing the health and safety of the City residents, particularly nonresidents. The City feels that to deny police, fire and ambulance services and to not respond to residents who have accidents while outside the City does allow nonresidents to receive services without cost. The City simultaneously suffers substantial tort liability exposure.

Annexation would alleviate this problem if minimum level services are provided to the residents outside the City. Since no additional

tax levy may be collected in the territory proposed for annexation until Fiscal Year 1978 - 79, the Department is concerned about the ability of the City to pay additional school support from the sales tax and make any capital expenditures needed to effectively provide police, fire and ambulance services to those residents beyond Mile 8 of the Mitkof Highway.

According to 19 AAC 30.050.020 no annexation will be approved unless the annexing city demonstrates to the satisfaction of the Commission that it is capable of extending and willing to provide services to the annexed areas. The 50 percent property tax for administrative services may need to be further itemized depending on the capability and willingness of the city to provide specific services.

Under subsection (7), the petitioners feel that the extension of city water, sewer and garbage collection will inevitably follow annexation. The services are dependent upon obtaining a favorable cost benefit ratio both to the City and the consumer.

The Department raises the question whether it would be appropriate for the City to collect property tax for the utility functions. The utilities would normally be considered an enterprise function which would be self-supportive from the user rates or surcharges associated with the particular utility.

Under subsection (8), the petitioners maintain that the residents and owners of property in the territory to be annexed receive the benefit of City services without remunerative tax contribution.

The Department notes that the City sales tax collected from residents and nonresidents alike has been used to substantially support the school and pay for the hospital and swimming pool bonded indebtedness. Previously the Federal and State Revenue Sharing funds have adequately covered the cost of providing the operating expenditures for the library, museum and parks and recreational programs.

Under subsection (9), the petitioners state that annexation is otherwise necessary in three important aspects to accomplish valid public purposes:

(1) All of the City's various properties and facilities would be within the jurisdiction of its boundaries.

Although it may be argued that City-owned rock quarries and mineral sites should be within the City limits to provide direct jurisdiction, the Department notes that the territorial jurisdiction protecting the water supply and the watershed may be preserved by adopting an ordinance to enforce the jurisdiction outside the City's present boundaries.

(2) The City feels that to participate in the coastal zone management program the entire Mitkof Island should be annexed.

Although the federal guidelines have not been developed, the Department notes that the City has not budgeted for nor is presently engaged in an effort to develop a district coastal zone plan by December 4, 1979.

(3) The City could also acquire additional properties to facilitate its growth and development through the acquisition of public and private properties as a result of State land selection.

The Department notes that only after the State has received title to the property will the City finally determine which territory will facilitate growth and development either in the private or the public sector. The Department also has some questions as to whether the City would receive all the State lands selected, particularly the section at the southern end of Mitkof Island.

According to 19 AAC 30.10.120, the Department has summarized the issues raised in the petition and brief with comments to those issues which are deemed relevant to the proposed annexation. The Department issues no recommendation regarding this proposed annexation.

JAMES F. PETERSEN
ATTORNEY & COUNSELLOR AT LAW
319 SEWARD STREET
THOMAS G. NAVE, ASSOCIATE JUNEAU, ALASKA 99801 (907) 586-3530

February 4, 1978

Senator Joseph Orsini, Chairman,
House Committee of Community and
Regional Affairs
Room 101, Assembly Building
Juneau, Alaska 99811

Re: Opposition to Local Boundary Commission's Recommendations Regarding Petersburg Annexation Area
Our File No. P-8706

Dear Senator Orsini:

Please be advised that this office represents a number of the residents in Petersburg who strongly object to the procedures utilized by both the City of Petersburg and the Local Boundary Commission in determining that the city limits of Petersburg should be extended. For your information, I have attached hereto and to the copies of this letter which is being furnished to each member of your committe, copies of the pleadings which were filed on behalf of these citizens with the superior court here in Juneau. A review of these pleadings will clearly demonstrate the basis for the objection of the people of Petersburg.

As you and the members of your committee are aware, the recommendations by the Local Boundary Commission automatically come into being forty-five days after they have been submitted to the legislature, unless the House and the Senate pass a concurrent resolution rejecting said recommendations. Because of the total lack of community input into both the City of Petersburg's petition to the Local Boundary Commission and the decision of the Local Boundary Commission, the people of Petersburg sought a temporary restraining order preventing the recommendations from going to the legislature; however, the superior court did not enter the temporary restraining order. In order for a restraining order to issue by the court, the parties seeking the same must show immediate harm. The court took the position that the mere

recommendations by the Local Boundary Commission to the legislature did not cause such immediate harm as to require the issuance of a temporary restraining order, and for that reason the same was denied by the superior court.

There is presently circulating in Petersburg petitions objecting to any annexation to Petersburg without having adequate studies made to determine the total impact that such an annexation would have upon the City of Petersburg and its citizens. At last report, these petitions have been signed by over half of the adult residents of the Petersburg area, and the indication was that by the time the petitions were presented to the House Committee on Community and Regional Affairs and the the Senate Committee on Community and Regional Affairs they would have better than 75% of the signatures of the adult population of the Petersburg area.

A number of Petersburg residents would like to attend the Committee hearings, but because of the time and expense involved, if at all possible they would like to have the committees meet jointly in Petersburg to enable the citizens to express their concerns over this proposed annexation. For instance, the Petersburg Indian Association is almost unanimously opposed to any expansion of the existing city boundaries without adequate studies regarding the impact of such an expansion; however, the Petersburg Indian Association does not have adequate funding to send a delegate up to Juneau to testify before the committees. The Petersburg Indian Association is representative of all native organizations and groups in the Petersburg area and is responsible for administering the various native programs in the Petersburg area, they have a membership of over two hundred adults.

After reviewing the attachments to this letter, should you have any questions in reference to the same, please do not hesitate to contact me. Thank you.

Yours very truly,

James F. Petersen

SCRA

DEPARTMENT OF COMMUNITY AND REGIONAL AFFAIRS

In the Matter of the Annexation by)
the City of Petersburg, Alaska)
) PETITIONER'S BRIEF

I. In General. The City of Petersburg, Alaska is a first class city organized in 1910 and existing under the laws of the State of Alaska. The City of Petersburg's original municipal boundaries encompass 2.1 square miles more or less, excluding tide and submerged lands. They have remained unchanged. Petersburg's population for FY 1977 revenue sharing purposes as compiled for and approved by the Alaska Department of Community and Regional Affairs was 2,126.

Annexation was first contemplated in 1975, which proposal encompassed West Petersburg, now the City of Kupreanof. The Council followed an October 1975 referendum mandate from its citizens to not pursue annexation, but current circumstances warrant extension of municipal boundaries, albeit modified as to territory. The population residing in the territory sought to be annexed has mixed feelings about annexation and the passage of two years did not yield a consensus sufficient to proceed under local action.

II. Municipal Services Provided Within The City. The City of Petersburg currently provides electrical, water, sewer, garbage and solid waste disposal services to its residents. The City provides maintenance and repair services for city streets and rights-of-way, and the Public Works Department extends utility lines to new subdivisions and housing developments.

Law enforcement within its jurisdiction is undertaken by the Petersburg Police Department consisting of a chief,

ROBERTSON, MONAGLE, EASTAUGH & BRADLEY
A PROFESSIONAL CORPORATION
206 N. B. A. BLDG. PHONE 586-3340
P.O. BOX 1211, JUNEAU, ALASKA 99802

captain, sergeant, three officers, plus a public safety officer for canine control and parking. The Department has two patrol cars, a canine truck and an ambulance. The police department has paramedic capacity, and EMT's from the police department and fire department respond to ambulance calls. The police department offers 24-hour service 7 days a week with radio-equipped vehicles with CB backup.

Fire protection within the City is furnished by the Petersburg Volunteer Fire Department operated out of City Hall and which possesses major equipment as follows: 1963 American LaFrance pumper with 500 gallon tank, 1967 American LaFrance pumper with 500 gallon tank, 1975 American LaFrance pumper with a 750 gallon tank, 1952 Jeep pumper without tank, 1938 International Harvester pumper with a 100 gallon tank, and a 1969 Ford Rescue Van. The Department is staffed with one paid full-time lieutenant. The chief and two assistant chiefs are part-time, and the backbone of the department lies in its 22 volunteers. The volunteers meet weekly for fire and EMT training, and representatives regularly attend fire fighting schools within the State.

Petersburg's primary industry is fishing and the City has, in addition to a major port development project currently in progress, old and new boat harbors furnishing 220 stalls plus transient and floatside moorage. The stalls are furnished with water hookups and electricity, and the harbors also have a pay phone, public lavatory, a refuse dumpster, and two boat grids.

The municipal library is located in City Hall, available to the public.

Petersburg General Hospital has 15 short-term beds and 10 beds for long-term care. It has an emergency room,

ROBERTSON, MONAGLE, EASTAUGH & BRADLEY
A PROFESSIONAL CORPORATION
209 N. B. A. BLDG. PHONE 586-3340
P.O. BOX 1211, JUNEAU, ALASKA 99802

operating room, delivery room, and possesses x-ray facilities, laboratory, blood bank, cardiac monitor, and defibrilator. Use of the hospital facilities is not limited to Petersburg residents and there is no surcharge for nonresidents. It has 28 employees, 15 full-time and 13 on a part-time basis. Two independent physicians reside in Petersburg. In the last fiscal year, the Petersburg General Hospital has accommodated 342 patients and treated 891 emergency and outpatient cases.

Clausen Memorial Museum is an entirely City operated entity both in terms of physical plant and personnel.

The City owns the physical plant and facilities of the local school system operated by the Petersburg School District through its School Board. The plant consists of an elementary school, an old and a new high school buildings, an old gym for community and gradeschool physical education, and a swimming pool and industrial arts building. The swimming pool is used by the students during the school day but is open to the public on evenings and weekends. Total enrollment is 613 which includes 105 students from Mitkof Island outside the city and 5 students from Kupreanof. There are 47 teachers including two principals.

III. Extra-Territorial Services. The City currently provides extra-territorial fire protection and ambulance response service to nonresidents on a gratuitous basis. The City earlier implemented a plan of contractual fire protection but found it administratively burdensome and politically untenable. There were no fires outside the City requiring response. The ambulance and EMT service responded to 73 calls in 1976, 20 of which were outside of the present city limits. In 1977 to date, the ambulance has responded on 56 occasions, 19 of which were outside the City.

PHONE 586-3340

The City furnishes electricity to 215 extra-territorial customers and imposes a 15% surcharge above the normal in-city rate.

There are slightly in excess of 50 customers outside of the City who are connected to the City water utility and they pay a 50% surcharge over the in-city water rate.

There are 15 customers outside the present city limits connected to the municipal sewer utility and they pay no surcharge above the standard sewer rate.

The City affords garbage collection service to its residents, and while such service is not afforded to nonresidents, the garbage dump is operated and maintained by the City and is gratuitously available for nonresidents. The school district does not impose a nonresident tuition fee as to those students residing outside of the City nor is there any prohibition or surcharge imposed for use of school facilities such as the gym or swimming pool by nonresidents.

The hospital imposes no nonresident surcharge, and while the emergency and outpatient case records do not indicate a breakdown between resident versus nonresident, a substantial number of patients were treated at that facility, most commonly in connection with commercial fishing, logging and auto accidents. The City imposes no extra charge for nonresident's use of the municipal library, port facilities, cemetery, recreation areas, or other general services. Police protection outside the City is furnished by the Alaska State Trooper placed at Petersburg. The City has entered into a mutual aid agreement with the State of Alaska for fire protection at the airport which lies outside the City in exchange for the City's use of the State's major

P.O. BOX 1211, JUNEAU, ALASKA 99802

firefighting equipment for responding to in-City fires.

IV. City-Owned Properties Outside the Existing Boundaries. A substantial portion of the City's electrical system lies outside the City. The City of Petersburg owns and operates the Blind Slough Hydroelectric Project, the site of which is approximately 15 air miles south/southeast of the present City of Petersburg, or 17 miles via the Mitkof Highway. The power house generates 2,000 KW and lies on the west side of Blind River with the dam at Crystal Lake lying approximately a mile and a half via trail above to the southwest. Current estimated replacement value for the dam, penstock, generators, and miscellaneous equipment is $6 million. A distribution line runs from the Blind Slough Hydro facility to the City of Petersburg with 5 substations inbetween.

The City of Petersburg operates a sanitary landfill which is approximately 1 mile south of the present city limits via Sandy Beach Road. This facility is operated 6 days per week and serves most of the disposal needs of the Mitkof Island population.

The rock quarry is approximately 1 mile south of the airport and the City of Petersburg has applied to the State of Alaska for continued use of the quarry, part of which will be exclusively for the City's use if the pending application is approved. This 15 acre quarry site is developed to provide shot-rock for the City's needs in road construction, gravel production, and land fill material for tideland development.

The Sandy Beach Recreation Area is owned and operated by the City through its parks and recreation board. It is just south of the present city boundaries and affords

A PROFESSIONAL CORPORATION
200 N. B. A. BLDG.
PHONE 586-3340
P.O. BOX 1211, JUNEAU, ALASKA 99802

picnic tables, restrooms, and covered shelters at the beach which is also used by the hardy for swimming.

The Water Treatment Plant and City reservoir lie approximately 1 mile further south beyond the City landfill. The reservoir is approximately 5 acres and the treatment facility capacity is designed at 4 million gallons per day. A 750,000 gallon capacity storage tank is located between the treatment plant and the City. Estimated replacement cost for this system is $1 million.

The Petersburg cemetery which is owned, operated and maintained by the City consists of 982 plots and lies approximately 1/4 mile south of the City boundaries on the Mitkof Highway.

V. What is in the Area Proposed for Annexation?

A total of 514 persons reside outside the City limits and within the area proposed for annexation.

In addition to City-owned facilities recited in the previous section, numerous federal, state and privately-owned properties and enterprises exist.

At the federal level, the Forest Service has most of the facilities. It operates and maintains campground and recreation areas known as the Blind Island Picnic area, the Blind Slough Recreation area, Ohmer Creek Campground, Sumner Strait Campground, Wilson Creek picnic area and the Three Lakes Recreation area. (See Appendix A) In addition to these, the Forest Service maintains the Three Lakes Loop Road which is available for recreational purposes, the collecting of wood for fireplaces, fishing and various other recreational activities, and is about 25 miles in length, going over toward the Ideal Cove vicinity.

The Forest Service also has the old University of Alaska Experimental Fur Farm, and the Forest Service operates

ROBERTSON, MONAGLE, EASTAUGH & BRADLEY

200 N. B. A. BLDG.
P.O. BOX 1211, JUNEAU, ALASKA 99802
PHONE 586-2340

a warehouse at Scow Bay. The majority of land on Mitkof Island is under Forest Service jurisdiction.

The U.S. Coast Guard owns 41.25 acres in the vicinity of Mile 6 on the Mitkof Highway.

The Federal Power Commission still has a land withdrawal at the Blind Slough Hydro Electric facility and that is the land on which the City maintains its hydroelectric plant and where the Light & Power Department superintendent and his family reside.

The State of Alaska owns and operates the Mitkof Highway running along the west and south sides of Mitkof Island, approximately 30 miles in length. The State Department of Transportation also operates a maintenance facility outside the city limits where they keep their materials and equipment.

The Alaska Department of Fish and Game operates a major facility at Blind Slough, specifically a fish hatchery.

The Alaska Division of Lands controls various rock and materials quarries which are on state land in addition to the airport quarry which the City operates. All of these quarries are outside the present City limits.

The most heavily used state facility is the airport immediately south of the present city boundaries consisting of a gravel runway suited for 737 jet service by Alaska Airlines twice daily to Petersburg.

The majority of the remainder of the land on Mitkof Island not owned by the Forest Service is in State of Alaska ownership, earmarked as Mental Health land under the Division of Lands jurisdiction.

VI. Non-Governmental Property Ownership Outside.

There are approximately 182 houses, plus a few summer cabins.

ROBERTSON, MONAGLE, EASTAUGH & BRADLEY
A PROFESSIONAL CORPORATION
200 N. B. A. BLDG. PHONE 586-2340
P.O. BOX 1211, JUNEAU, ALASKA 99802

There is also a church, four trailer courts, one cafe, two welding shops, a motor carrier transfer company, six warehouses, three construction companies, two building supplies, a consumers co-op, a liquor store, nightclub, general business, two logging companies, a lumber mill, marine transportation dock, and three airlines.

VII. New Developments. The City of Petersburg is presently advertising for construction of Phase I of the Port Project. This port will supply berthing facilities for the Coast Guard and possibly other federal and state agencies. A small boat moorage will be developed in the future and a docking facility and land fill with leasable land area and a lift-out facility with 100-ton capacity is envisioned in the prospective development. Total estimated construction costs for Phases I and II are approximately $1.1 million.

The City has just completed construction of a major repair job on the Blind Slough Hydroelectric facility, the dam being faced with aluminum sheeting, reinforcement of the penstock supports, and spillway area capacity was increased.

Major construction on the municipal sewer treatment plant was completed and approved September 1, 1977 and the remainder is scheduled for estimated completion by January 1, 1978. It is an $8 million project.

On October 1, 1976, the City of Petersburg completed construction on its new high school and the reconstruction of the swimming pool was undertaken concurrently. Phase II of the high school development is now in the planning stage.

The City of Petersburg has completed planning and is in the developmental phases of several new subdivisions which will open for construction as soon as utilities and access are complete. Road construction is currently in

ROBERTSON, MONAGLE, EASTAUGH & BRADLEY
A PROFESSIONAL CORPORATION
209 N. B. A. BLDG. PHONE 586-5340
P.O. BOX 1211, JUNEAU, ALASKA 99802

process as well as sewer line extension and water line development to the subdivisions.

The Petersburg Power & Light Department is in the process of installing an additional 1,200 KW diesel generator.

VIII. Ongoing and Future Non-City Development.

The U.S. Forest Service is in the final planning process for establishing a tree nursery to be undertaken at the site of the old University of Alaska experimental fur farm at approximately 9 Mile Mitkof Highway. This nursery will have a capacity of about 1 million containerized seedlings each year to provide planting stock for Forest Service activities, and private landowners and the State of Alaska will also be able to acquire planting stocks from this nursery.

There are presently two active timber sales at the south end of Mitkof Island, specifically Bear Creek No. 1 which is an independent sale being operated by Louisiana Pacific which has a log transfer point at Pape's Landing. The second is a Pacific Northern Timber Contract and it has a log transfer point at the south end of Blind Slough.

Forest Service also has an appropriation for installation of a boat ramp and dock on the extreme south shore of Mitkof Island, this project to be undertaken in conjunction with the State of Alaska.

The State of Alaska Department of Transportation has awarded a contract for construction of Phase II of the Mitkof Highway from the downtown Petersburg area out to Sandy Beach. The State Department of Fish & Game has ongoing construction of the fish hatchery at Blind Slough and will be working with the Department of Transportation to construct a new bridge over the Blind River for hatchery access and

ROBERTSON, MCNAGLE, EASTAUGH & BRADLEY
A PROFESSIONAL CORPORATION
200 N. F. A. BLDG. PHONE 586-3340
P.O. BOX 1211, JUNEAU, ALASKA 99802

other public purposes.

Private subdivision development is also occurring outside the present city boundaries, the major growth area being in the vicinity of Skow Bay.

The Forest Service is currently cooperating with the City of Petersburg in repair and relicensing of the Blind Slough Hydro project. This project includes a man at Crystal Lake and a pipeline to the power house down to Blind Slough.

Intergovernmental cooperation at the local level is occurring by joinder of Petersburg with Wrangell in formation of the Thomas Bay Power Authority which will ultimately connect the Wrangell electrical system with the Petersburg distribution system, tying in somewhere on the south end of Mitkof Island in the vicinity of Blind Slough.

IX. Why the Boundaries Proposed?

The municipal boundaries of Petersburg have not changed for over 65 years. Until perhaps the last decade growth in and around the City of Petersburg has not warranted extension of the municipal boundaries based upon necessity of extension of municipal services in light of costs and service benefit to both the City and residents outside of the municipal boundaries. It became apparent to the City Council, however, that the City by reason of its serving as a major fishing port and as the commercial and industrial center of the area, has conferred substantial benefits upon the residents and owners of properties outside the City without corresponding tax contributions for municipally-provided services. Further, the apparent need for basic services such as the promotion and control of land and usage and development through planning and zoning authority and

ROBERTSON, MONAGLE, EASTAUGH & BRADLEY
A PROFESSIONAL CORPORATION
200 N. S. A. BLDG. PHONE 586-5340
P.O. BOX 1211, JUNEAU, ALASKA 99802

extension of full police and fire protection to the areas outside of the City which are, in part, urban in character, mandated consideration of an annexation proposal.

Petersburg's 1975 annexation proposal is a matter of record both in the files of Community and Regional Affairs and in the courts. Petersburg's own residents did not like the territorial boundaries described in the former proposal which included West Petersburg (now Kupreanof) and extended down to Blind Slough.

This proposal differs from the former in two significant respects: (1) West Petersburg is excluded from the proposal, and (2) all of Mitkof Island is included, not limited exclusively to the developed portions fronting Wrangell Narrows between Blind Sough and the present City.

The residents within the territory proposed for annexation naturally use the City-owned and maintained school, hospital, library, museum, cemetery, port facility, and all other municipal facilities, including city streets and roadways. The nonresidents benefit from the access to and actual utilization of the aforementioned municipal facilities but other than through payment of the local sales tax do not financially contribute to their establishment, maintenance or perpetuation in any manner corresponding with the contributions from local residents. It is felt by the Council that an annexation proposal encompassing a smaller territory would cause political foment to the extent that a proposal would include some residents and exclude others, and for the second reason that a small proposal at this time would merely be a piecemeal approach to the ultimate inclusion of the entire island at a future time anyway. Finally, the Council has determined that inclusion of Mitkof Island in

ROBERTSON, MONAGLE, EASTAUGH & BRADLEY
A PROFESSIONAL CORPORATION
203 H. G. A. BLDG. PHONE 586-3340
P.O. BOX 1211, JUNEAU, ALASKA 99802

its entirety as the municipal boundaries for the City of Petersburg are in the best interests when viewed in the light of Coastal Zone Management and State land selections.

X. Applicable Standards Satisfied.

19 AAC 05.010 describes the standards for annexable territory, subsection (a) reciting standards to be considered when the territory to be annexed is contiguous to present municipal boundaries. It is the City of Petersburg's position that subsections (3) through and including subsection (9) are applicable and satisfied as follows:

(3) The territory between Blind Slough and Petersburg proper is essentially urban in character. Virtually all of the extra-territorial population resides therein and the City provides electrical service to all dwellings and commercial enterprises therein. While it suffers from the lack of zoning control, it is accurate to state that the land is largely platted and held for sale and in fact the State of Alaska Division of Lands conducted a major land sale within the area in 1972. (See Appendix B). The population stems primarily from actual growth of the City beyond its legal boundaries, particularly the extension of population from Petersburg to Skow Bay.

(4) The residents in the territory need all of the basic municipal services, providing none to themselves and certainly the City of Petersburg is in a more favored position to provide them rather than some other municipality. An alternative is for residents in the territory to form their own municipal government, but it would invariably suffer from an inadequate population base and be capable of furnishing only very basic services. Formation of such local government would also run afoul of the constitutional

ROBERTSON, MONAGLE, EASTAUGH & BRADLEY
A PROFESSIONAL CORPORATION
200 N. B. A. BLDG. PHONE 586-3340
P.O. BOX 1211, JUNEAU, ALASKA 99802

mandate found in Article X, §1 of the Alaska Constitution, to-wit:

> "The purpose of this Article is to provide for maximum local self-government with a minimum of local government units, and to prevent duplication of tax-levying jurisdictions."

(5) There can be no doubt that future growth and development of Petersburg will occur within the territory. Annexation will permit the City to plan and control its development. The reason that growth and development have been limited to the "strip" on Mitkof Island adjacent to Wrangell Narrows is because the remaining land has been tied up in U.S. Forest Service jurisdiction and simply incapable of development from a legal standpoint of ownership. It is envisioned that state land selections under the Statehood Act and municipal entitlement of 10% of the vacant unappropriated lands within the annexed territory will cause a materal deviation from the old pattern of development.

(6) It is entirely accurate to state that annexation will alleviate a condition presently jeopardizing the health and safety of city residents and particularly nonresidents. The issue of whether the City of Petersburg should expand its fire, police and ambulance protection service beyond the municipal limits has been a troublesome issue and one on which there has been much vacillation. To deny the service is to not respond to residents have an accident while outside the City limits, yet to provide the services gives the nonresidents something for nothing and the City simultaneously suffers substantial tort liability exposure. Even to provide such fire service on a contractual basis is to inevitably do nothing but watch in anguish over the house which burns without contractual protection while the volunteers hose down the protected neighboring properties. Perhaps the

ROBERTSON, MONAGLE, EASTAUGH & BRADLEY
A PROFESSIONAL CORPORATION
250 H. B. A. BLDG. PHONE 586-3340
P.O. BOX 1211, JUNEAU, ALASKA 99802

major "danger zone" outside the City is at the Airport and Petersburg's residents and nonresidents alike use this facility as well as the general sector. The State Troopers are to respond to criminal matters at the airport and presumably the State Division of Aviation handles fire control. The latter presumption is, however, largely a fiction and the interim patchwork takes the form of mutual aid agreement whereunder the City's volunteer fire department responds to airport fires and crashes.

(7) The extension of City water service, sewer service and garbage collection service will inevitably follow annexation albeit at disjointed times dependent upon attaining a favorable cost/benefit ratio both to the City and to the consumer. The electrical service is already areawide. The municipal water system has excess capacity as does the wastewater treatment plant and solid waste disposal plant.

(8) It is self-evident that the residents and owners of property in the territory to be annexed receive the benefit of City services without commensurate tax contributions. Illustrations abound where general services are provided to nonresidents without surcharge, yet it is the Petersburg real property owner who has unfairly shouldered the burden of establishing, operating and maintaining the general facilities.

(9) Annexation is otherwise necessary in three important respects to accomplish valid public purposes: (1) To have all of the City's various properties and facilities within its jurisdictional boundaries, (2) to participate in Coastal Zone Management affecting the entire island, and (3) to enable the City of Petersburg to acquire additional

ROBERTSON, MONAGLE, EASTAUGH & BRADLEY

PHONE 586-5340

properties to facilitate its own growth and development, for example, rock quarry and material sites.

It should be noted that snowmobiling, cross-country skiing, hunting, and summer recreational hiking occur on the virtual entirety of Mitkof Island and the police and fire departments' EMTs ought properly to be charged with responding to calls for assistance from their citizens.

XI. Taxes, Services and Benefits in Transition.

Upon receiving annexation authority the City of Petersburg proposes immediately to confer planning and zoning control, police and ambulance service, and fire protection throughout the enlarged jurisdiction. Garbage collection service throughout the area would be phased in as quickly as possible following annexation, consistent with the availability of the trucks and manpower. The City of Petersburg's fiscal year runs from July 1 through June 30 the next calendar year. Since the effective date of the annexation, if granted, would fall in the middle of calendar year 1978, and most probably at a time other than commencement of Petersburg's 1978-79 fiscal year, it is contemplated that the services which the City is to provide should be phased in on a schedule roughly commensurate with additional revenue which is generated from capital improvement. The City will not impose taxation, either on real or personal property, in the territory proposed for annexation until tax year 1979.

Extension of the water and sewer utility services will be undertaken on a basis compatible with the City's financial ability with a view toward a favorable cost/benefit ratio. This will be done in piecemeal fashion and to adjust for the inequitable provision of utilities services, the

ROBERTSON, MONAGLE, EASTAUGH & BRADLEY
A PROFESSIONAL CORPORATION
200 N. S. A. BLDG. PHONE 586-5340
P.O. BOX 1211, JUNEAU, ALASKA 99802

City proposes to implement a program of diffential tax zones on a schedule to be from time to time amended as the scale of services changes. The initial proposed tax differential zones will be proposed as follows:

Service	Percentage of Tax Levy
Basic general services and administration	50%
Electrical utility service	15%
Sewerage and wastewater treatment	15%
Water utility	15%
Garbage collection	5%

The surcharges to nonresident consumers of water and electricity would all continue through 1978 and thence be discontinued.

The administration in the City of Petersburg recognizes the need for fire, rescue and ambulance service within the expanded jurisdiction; a plan will be formulated to ascertain how to best respond to the additional requirements, perhaps by creating one or more fire substations in the newly annexed area.

The construction of new residential and commercial structures and additions thereto in the new territory will be subject to the National Building, Plumbing and Electrical Codes as well as the Fire Prevention Code, thus ensuring greater value through compliance with recognized standards. The City's comprehensive zoning plan will have to be expanded commensurate with its enlarged jurisdiction. In undertaking this task, the City plans to (1) recognize non-conforming uses through "grandfather rights" and (2) amend the Planning Commission Ordinance to add at least two members residing in the newly-annexed territory prior to formulating enlargement

ROBERTSON, MONAGLE, EASTAUGH & BRADLEY
A PROFESSIONAL CORPORATION
300 N. B. A. BLDG. PHONE 586-3340
P.O. BOX 1211, JUNEAU, ALASKA 99802

of the comprehensive zoning plan for the entire area.

Members of the population currently residing outside of the City and using municipally-provided services are unable to play a role in the formulation of policy pertaining to those services. If authorized, the annexation would, in addition to the obvious benefit of the privilege of voting, allow those who are currently nonresidents of the City to participate in the policy making process through candidacy for elective office such as the Council and School Board and to serve on numerous committees and commissions.

There are no inter-municipal agreements regarding transitional provision of services and distribution of assets and liabilities because this proposed annexation does not affect any other City or Borough.

XII. Conclusion.

The territory proposed for annexation contains approximately 20% of Mitkof Island's total population. Although numerous and independent, the residents in the territory sought for annexation do not constitute a sufficient population base to warrant establishment of a borough and they accordingly rely upon the City to provide basic governmental services.

Growth is inevitable in the territory--both in terms of population and in terms of increased commercial and governmental activity. If the bottom fishery development progresses as contemplated, Petersburg's waterfront will be active to the point of excessive demand.

Acquiring jurisdiction to implement planning is desirable as to the entirety of Mitkof Island. The need for revision of Petersburg's comprehensive plan on an area-wide

ROBERTSON, MONAGLE, EASTAUGH & BRADLEY
A PROFESSIONAL CORPORATION
200 N. B. A. BLDG. PHONE 586-2340
P.O. BOX 1211, JUNEAU, ALASKA 99802

basis is indicated. New zoning is desirable to encourage organized growth and compatible neighboring uses. The expansion of municipal services into the annexed territory will inevitably bring the concommitant burden of taxation. The City is not engaged in an imperialistic plan to acquire properties by expanding its jurisdiction for the purpose of generating income. Its function instead is to provide for efficient, adequate and economical government operating on a break-even basis in accordance with the will of the populace. Those inhabitants of the territory and absentee property owners who would oppose the proposed annexation merely because of the necessary incident of taxation should be mindful of the fact that for years Petersburg's taxpayers have unfairly shouldered the entire financial burden of providing the municipal schools, library, boat harbors, museum, fire and ambulance and police services, streets and roadways, hospital, cemetery which they have used without commensurate contribution. Moreover, the establishment of differential taxation zones predicated upon services provided and benefits received will assure basic fairness.

Petersburg is a progressive community and Mitkof Island is on the threshold of imminent additional growth. Recognizing this, the City wishes to respond to this impact by enlarging its jurisdiction "to provide the maximum local self government" consistent with Alaska's constitutional mandate.

DATED this 22nd day of November, 1977.

ORDINANCE NO. 381
City of Petersburg, Alaska

AN ORDINANCE PROPOSING THE MODIFICATION OF THE MUNICIPAL BOUNDARIES OF THE CITY OF PETERSBURG BY ANNEXATION OF MITKOF ISLAND AND ADJACENT WATERS OUT TO THE CENTER OF WRANGELL NARROWS CHANNEL WHERE MITKOF ISLAND IS BOUNDED BY THE NARROWS AND OUT 1000 FEET FROM SHORE AROUND THE REMAINDER OF THE ISLAND PERIMETER.

BE IT ORDAINED BY THE COUNCIL OF THE CITY OF PETERSBURG, ALASKA:

Sec. 1. Classification. This Ordinance is of an impermanent nature and is not to be codified in the Petersburg Code of Ordinances.

Sec. 2. Declaration of Intent. The City of Petersburg proposes to modify and extend its municipal corporate boundaries and jurisdiction by annexation of contiguous lands and adjacent waters on Mitkof Island to expand the existing general boundary southward to encompass the entire island.

Sec. 3. Description. The propsed boundaries of the City of Petersburg, Petersburg Recording District, First Judicial District, State of Alaska, including the territories to be annexed by this proposal, are as follows:

The entirety of Mitkof Island out to the center of Wrangell Narrows Channel where Mitkof Island is bounded by the narrows and out 1000 feet from shore around the remainder of the island perimeter.

Sec. 4. Standards. It is verily believed that the territory proposed for annexation described in the preceding paragraph does and will comply with the annexation standards prescribed in 19 AAC 05.010.

Sec. 5. Procedure. The City of Petersburg shall forthwith petition for a local government boundary change pursuant to Chapter 10, Title 19, Alaska Administrative Code.

Sec. 6. Purpose of Annexation. The purpose of the proposed annexation is to extend the municipal boundaries and jurisdiction of the City of Petersburg, Alaska to comport with the essentially urban character of the territory for which annexation is proposed, and accordingly enunciates the following considerations:

1. There exists a substantial population in the territory for which annexation is proposed,
2. The City of Petersburg currently provides limited municipal services to the territory,

3) The City of Petersburg owns several properties in the territory which are outside the existing municipal boundary,
4) The City of Petersburg serves as the commercial and industrial center of the territory,
5) The City of Petersburg currently asserts extra territorial jurisdiction with respect to parks, roads, trails, hydroelectric facility, an airport, and its water supply in the territory proposed for annexation,
6) Recreational usages by municipal residents of the area proposed for annexation, and
7) An extension of municipal services to the territory proposed for annexation is logical and foreseeable, and the extension of municipal boundaries will enable the City of Petersburg to control and provide for the organized development of likely future growth,
8) Coastal Zone Management.....
9) Planning and Zoning.....
10) State Land Selections.....

Sec. 7. Annexation. The City Manager, Mayor, City Clerk, City Attorney and such other municipal officials as are deemed appropriate are authorized to initiate, petition, and implement such procedures as may be necessary to complete this annexation proposal and as may be modified by the Local Boundary Commission and Alaska State Legislature.

Sec. 8. Effective Date. This ordinance shall become effective on the third day after adoption, excluding the date of enactment. However, the official map and zoning map of the City of Petersburg shall not be modified except by subsequent ordinance enactment following consideration, hearing, and determination by the Local Boundary Commission and the Alaska State Legislature.

Sec. 9. Severability. If any provision of this ordinance or any application thereof to any person or circumstance is held invalid, the remainder of this ordinance and the application to other persons or circumstances shall not be affected thereby.

PASSED AND APPROVED by the City Council of the City of Petersburg, Alaska

this 21 day of November, 1977.

Leonard Wilson
Mayor

COPPER RIVER MERIDIAN, ALASKA

SUMMARY FOR SKAGWAY ANNEXATION

Present area of Skagway: 931.5 acres

Area of proposed annexation: approximately 10 times present area

Present population of Skagway: 695

Population in area of annexation: 29

Purposes of annexation (per City):

1. Skagway has become the commercial center for the outlying area.
2. Skagway provides certain municipal services to outlying area, including:
   a) City dump
   b) City schools
   c) City medical clinic
   d) City library, museum, roads and other municipal facilities
   e) Limited city-supported police services
3. City could plan for rational and orderly economic development of area through planning and zoning powers for activities including:
   a) Port development
   b) Klondike Goldrush Historical Park
   c) Skagway Carcross Road construction

Upon annexation, the City would have the following policy towards the new area:

1. Taxation would be a differential basis
2. Municipal services such as sewer and water would be extended on City's financial ability and on cost/benefit ratio.
3. City would not impose property taxes until 1978

Background Note:

The City of Skagway originally desired to annex all the area between the Haines Borough and the Canadian border (approximately 166 square miles). According to G. D. Aker, Skagway City Manager, the previous City Council reduced the area to essentially what is being proposed by the Boundary Commission which Aker described as an "equitable compromise". Aker said that the new City Council, which desires the larger area, was assured that the City of Skagway could petition for a new annexation without prejudice once the present recommendation went into effect.

On February 6, Sigvald Strandberg told the House Community & Regional Affairs Committee that the Boundary Commission had not recommended the larger area for annexation by Skagway for the following reasons:

1. 166 square miles appeared to be too large an area for city government, as generally defined in Alaska, even though in Skagway's case it would produce possible revenue without the liability of supplying services to populations in remote areas.

2. Skagway had been resisting incorporating itself into the Haines Borough or into a borough of its own, yet with the larger annexation proposal it was seeking borough-like status.

3. The Commission generally believed that cities should provide government to areas of fairly substantial concentrations of urban and suburban populations. Skagway's larger annexation request would have extended the City's boundaries to unpopulated areas.

EDITORIAL WITH A PLEA! - - - - - - -

AN OPEN LETTER TO

THE STATE LEGISLATURE:

SKAGWAY IS AN IMPORTANT GATEWAY & RICH IN HISTORICAL AND OTHER POTENTIALITIES - PAST, PRESENT AND FUTURE.

UNFORTUNATELY IT IS IN AN UNORGANIZED BOROUGH, WITH BUT A SMALL PORTION OF THE AREA BEING AN ORGANIZED CITY.

THE PROBLEMS ARE SO COMPLEX THAT THE PRESENT RECOMMENDATIONS FOR ADDING A SMALL PORTION OF THE AREA INTO THE CITY DOESN'T GO FAR ENOUGH; THE NUMBER OF PERSONS LIVING OUTSIDE THE CITY MAKES IT A GROWING PROBLEM TO GET TOGETHER WITH THE CITY AND AGREE ON AN APPROVED PLAN FOR COMMERCIAL AND PERSONAL USE OF THE VALUABLE & NEEDED WATERFRONT OUTSIDE OF THE CITY; PLUS OTHER PROBLEMS OF:MORE VISITORS; A NEW HIGHWAY TO ALASKA HIGHWAY; THE NEW NATIONAL PARK; A SUBSTANTIAL GROWTH AND DEVELOPMENT OF OIL & OTHER MINERALS IN YUKON AND NORTHWESTERN BRITISH COLUMBIA PORTIONS OF CANADA.

IT WOULD PRESENTLY APPEAR IMPOSSIBLE FOR THE STATE GOVERNMENT TO RESOLVE IMPORTANT MATTERS FOR THE COMMON GOOD OF THE AREA & ALASKA,WITH THE GROWING,DIVERGENT VIEWS OF PERSONS BOTH WITHIN AND WITHOUT THE CITY.

IT IS, THEREFORE, RECOMMENDED THAT THE LEGISLATURE APPOINT A TASK FORCE COMMITTEE TO INVESTIGATE THIS UNFORTUNATE SITUATION TO ENDEAVOR TO COME UP WITH RECOMMENDATIONS WHICH WOULD BE TO THE BEST INTERESTS OF THE AREA, THE STATE AND THAT OF OUR CANADIAN NEIGHBORS.

IN SHORT: PLEASE DO NOT LET US BE LOCKED UP IN SUCH A WAY THAT WOULD HINDER THE GREATEST AND BEST USE FOR VISITOR AND COMMERCIAL PURPOSES KEEPING MIND THAT SKAGWAY HAS BEEN AN IMPORTANT GATEWAY FOR CANADIAN VISITORS AND OTHER BUSINESS FOR 79 YEARS, AND THE IMMEDIATE FUTURE PROSPECTS FOR GREATLY IMPROVED VISITOR & BUSINESS USE FROM THIS SOURCE VIA.THE NEW HIGHWAY, THE EXISTING RAILWAY & INCREASED AIR SERVICE IS SIGNIFICANT AND SHOULDN'T BE TAKEN LIGHTLY.

CITY OF SKAGWAY

GATEWAY TO THE GOLD RUSH OF "98"

P. O. BOX 415 SKAGWAY, ALASKA 99840

February 2, 1978

Senator Joseph L. Orsini
Chairman, Community & Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

Please reference your letter of 23 January 1978 concerning the recommendations of the Local Boundary Commission for annexation of land by the City of Skagway.

The views of all interested citizens of the Skagway community were considered by the City Council in the development of its annexation petition. Similarly, in the development of its recommendation, the Local Boundary Commission offered an opportunity for public participation and all views expressed by the City Council and concerned citizens were given full consideration. Although the boundary descriptions contained in the L.B.C. recommendations differ from those proposed in the City's petition, it is considered that they reflect an equitable compromise. Accordingly, the City Council recommends that the lands as described in the L.B.C. recommendation be annexed to the City of Skagway.

Sincerely,

G.D. Acker

STATE OF ALASKA

LOCAL BOUNDARY COMMISSION

JUNEAU, ALASKA

RECOMMENDATION FOR ANNEXATION OF TERRITORY TO THE CITY OF SKAGWAY

SUBMITTED JANAURY 18, 1978

RECOMMENDATION FOR ANNEXATION OF TERRITORY

TO THE

CITY OF SKAGWAY

WHEREAS, petitioner, the City of Skagway has requested that certain territory be annexed to the City of Skagway; to wit: an area contiguous to the City containing residential, commercial, industrial and recreational lands; and

WHEREAS, subsequent to giving proper notice, the Local Boundary Commission conducted a public hearing in Skagway on June 22, 1977, to consider whether the territory for which the City of Skagway petitioned should be annexed to the City; and

WHEREAS, following the public hearing the Local Boundary Commission convened a decisional meeting at which it reviewed the City of Skagway's petition, supporting brief and all testimony received prior to and during the June 22, 1977, public hearing; and

WHEREAS, the Local Boundary Commission has determined that certain portions of the territory meet the standards for annexation in that the area is likely to see development that will require municipal services; and

WHEREAS, the City of Skagway is the only local government located proximate to the territory which has the capability of providing the needed services;

NOW THEREFORE, the Local Boundary Commission recommends that pursuant to Article X, Section 12 of the Alaska Constitution and Alaska Statutes

44.19.260 that the amended petition for annexation of territory to the City of Skagway be approved and that the boundaries of the City of Skagway be changed to read as follows:

Beginning at the NW corner of the NE 1/4 of the NE 1/4 of Section 36, UT27S, R59E, Copper River Meridian, Alaska; thence East to the NE Corner of Section 31, UT27S, R60E; thence South along the center line common to Sections 31 and 32, UT27S, R60E, to the point where it intersects the National Forest Boundary; thence in an easterly direction along the National Forest Boundary to corner number 3 of the National Forest Elimination, located at Bain 5645; thence in a southerly direction along the National Forest Boundary to corner number 4 of the National Forest Elimination, located at Skag 4140; thence in a westerly direction along the National Forest Boundary to corner 5 of the National Forest Elimination; thence continuing in a westerly direction until the extension of this westerly line intersects the mean low water of Taiya Inlet; thence in a northerly direction along the mean low water of Taiya Inlet to the point where the mean low water intersects the NS center line of Section 14, UT28S, R59E; thence in a northerly direction to the SE corner of the SW 1/4 of the SW 1/4 of section 11, UT28S, R59E; thence in a north northeast direction to the point of beginning, containing 11.0 sq. miles, more or less.

In accordance with Article X, Section 12 of the Alaska Constitution, this recommendation shall become effective forty-five days after presentation to the legislature or at the end of the session, whichever is earlier, unless disapproved by a resolution concurred in by a majority of the members of each house.

CITY OF SKAGWAY
GATEWAY TO THE GOLD RUSH OF "98"
P. O. BOX 415 SKAGWAY, ALASKA 99840

January 17, 1977

Mr. Palmer McCarter
Director, Division of Local Government Assistance
Department of Community & Regional Affairs
Pouch B
Juneau, Alaska 99811

Dear Palmer:

Please refer to our telephone conversation of yesterday and to Jake Jacobson's letter of 11 January concerning the annexation petition. I passed along to the City Council the rationale which preclude action on the City's petition during the current legislative session. This was accepted along with expressions of considerable disappointment, to say the least.

Although there continues to be a lack of unanimity among the Council members as to the scope of the territory to be annexed as well as the form of governance to be adopted, there is a consensus that there is a need to prepare for the impacts of foreseen community growth - specifically through the making of land available for development and by the exercise and provision of municipal controls and services. It was primarily for the purpose of satisfying these ends that the annexation petition was submitted. The City Council looks to the Local Boundary Commission to resolve the questions of municipal boundaries and type of government - city or borough - in the best interests of all entities concerned - the peoples of the City, the Territory and the State. Inasmuch as this decision must await the convening of the next Legislature, the City Council intends to reexamine and refine its position. Further, as the composition of the Council has changed, it is believed that it would be helpful if the City Council might meet again with a member of your staff. Accordingly, within the next several months, I will contact you or Pat Poland to request a visit with the City Council in Skagway.

The City Council appreciates the consideration your office has given to this matter and would be grateful to receive your continued assistance.

Sincerely,

G.D. Acker

G.D.Acker
City Manager

LOCAL BOUNDARY COMMISSION

City of Skagway petition for)
Annexation of unorganized)
borough territory)

Statement of Decision

Whereas, on November 14 , 1976 , the City of Skagway submitted a petition to the Local Boundary Commission through the Department of Community and Regional Affairs in accordance with Title 29 of the Alaska Statutes requesting the annexation of unorganized borough territory generally northerly and westerly of and contiguous to the present corporate limits of the city; and

Whereas, on November 15 , 1976, the Department found the petition in proper form; and

Whereas, the Local Boundary Commission scheduled a public hearing with prescribed public notice; and

Whereas, the Commission conducted a physical inspection of the proposed annexation territory and held a public hearing in the Skagway City Council Chambers on June 22, 1977; and

Whereas, the Commission held a public decisional meeting immediately following t e adjournment of the public hearing;

Now, therefore, the Commission confirms its decision to accept, with modification (reduction of proposed annexation territory), the City of Skagway boundary change proposal in accordance with Exhibit "A" attached hereto and enters the following summary of findings in correlation with Commission regulations:

19 Alaska Administrative Code 05.010 (a) (3): Significant portions of the approved territory are generally being used to support the natural growth and expansion of the Skagway community beyond current city limits.

19 AAC 05.010 (a) (4): The territory approved for annexation is in need of Skagway City general fund services, is presently benefitted thereby, and the City of Skagway is capable and willing to provide general fund services. The city is the only local government entity in existence in the area capable of supplying needed services and jurisdiction to residents of the territory.

19 AAC 05.010 (a) (5): The Commission finds that the territory approved is absorbing Skagway population growth and community expansion and because of this, should be under the jurisdiction of the City of Skagway for orderly control of this growth.

Dear Ms. Dailey

Recently, I have had correspondence from Charles G. Adams Jr., the Executive Director of the CJPA concerning LEAA programs and monies.

In turn, he mailed me the latest State-wide Criminal Justice Plan. He have also informed me that all monies through FY 78 have been obligated and that there will be a decrease of CJPA funds for Alaska during FY 79.

However, he have stated that although the four villages in the LKCC area are not eligible under State Statutes, LKCC as a non-profit Corporation might be eligible.

I have noted that the 1978 Plan includes all money currently available and Federal money, <u>including Indian Desk Money</u>.

As you have probably heard via telephone the Lower Kuskokwim Coast Corporation is going to be holding an area meeting on April 7 and 8 at Tuntutuliak. Your participation in the meeting would be good for both the CJPA and the village people as it would be an interchange of ideas and an educational process for all participants, as we are expecting participants to come from the Kuskokwim Native Association and the United Villages Inc., of Nelson Island.

Of primary concern are the following which you might cover:

1.) Indian Desk monies allocation for the State of Alaska.

2.) Eligibility criteria for incorporated village and/or non-profit corporations with jurisdictional powers.

3.) The role of CJPA in Bush Justice Conference and/or Bush Alaska.

4.) Pre-application and application process

Lower Kuskokwim Coast Corporation
GENERAL DELIVERY • KIPNUK, ALASKA 99614 • (907) 598-8001

5.) Other concerns such as Block grants, Law enforcement training, Legislative consideration on Policy protection State Revenue Sharing, etc.

I realize that this might seem like alot, but the CPJA has been like a non-existent entity in our side of the State. For confirmation on the attendence of the meeting you could call me at 598-8001.

Sincerely,

STATE OF ALASKA
DEPARTMENT OF PUBLIC SAFETY
OFFICE OF THE COMMISSIONER
JUNEAU

July 5, 1977

Senator Orsini,

Sorry for the length of time for your response to this letter. As you can see by attached letter, letter was prepared in late May. There were two reasons for this delay, one because we were waiting for some backup material and two, because the Commissioner was out of town. Compounded, they caused the length of delay in response. My apologies.

Barbara Tennison

Barbara Tennison
Secretary to the Commissioner

P.S. Please tell Jan I said hello and think of her often.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF PUBLIC SAFETY

DIVISION OF STATE TROOPERS / POUCH N – JUNEAU 99811

DEPARTMENT OF PUBLIC SAFETY
Pouch N
Juneau, Alaska 99801

May 26, 1977

Senator Joe Orsini
Chairman
Senate Community and Regional Affairs Committee
Alaska State Legislature Senate
Pouch A
Juneau, Alaska 99801

Dear Senator Orsini:

In response to your letter of May 5 regarding Village Police Training. I am gratified that your committee is addressing the problems of the Village Policeman.

As you may not know the Department of Public Safety provides training, funded by federal grants, in four stages. First when a council selects a new village police officer the local trooper provides on-the-job training in such basics as reports, records, when to call the Trooper, community relations, searches, arrests, prisoner handling and related matters.

If the Police Officer applies he is then given a one week training course which consists of 50 hours of classroom and practical training. These one week courses are held in the bush and are generally held once a year at 2-4 locations. Last year classes were conducted at Dillingham, Fort Yukon, Bethel and Nome.

The third phase is a four week 160 hour course at the Academy in Sitka. This course is the course presented to all Municipal Police Officers with those portions not applicable to the villages eliminated. Other portions of the course are modified to make them applicable to village life and put them at a level more readily grasped by the participant.

Finally, those officers from the more remote villages are placed with a larger bush police department for three days to allow them first hand experience in law enforcement.

The Department had scheduled a cycle of training for Village Police Officers scheduled to commence this spring; however, because of a reduction of "Indian Desk LEAA Funds" our grant was not approved as originally submitted. The revised grant is pending approval at Region 10 Headquarters in Seattle. We expect approval momentarily. Additionally we have submitted an action grant to fund training for Village Police Officers from "inelegible" villages. As soon as we receive word of our grants approval. we will announce a training

Senator Orsini continued.

schedule for village officers, which will consist of a bush one week course this fall and an Advanced Academy Class early in next year. We will avoid summer training whenever possible because many village officers are dependant upon subsistence fishing and hunting and find it difficult to get away from the village in the summer.

Lengthening the courses would fail to address the needs of the "inelegible" villages which contain about half the bush population. Doubling the number of courses would allow inclusion of the inelegible villages. The cost of this doubled program would be approximatley $350,000. in the absence of Federal funding.

I am enclosing a copy of the model used in development of the Village Police Training Curriculum.

If I may be of further assistance please contact me.

Sincerely,

Richard L. Burton
Commissioner
Department of Public Safety

encl.

cc: Mel Personett, Deputy Commissioner
Captain Walter Gilmour, Director of Training

DEVELOPMENT OF VILLAGE POLICE TRAINING PROGRAM

The establishment of a training program of providing training for Village Police Officers by necessity progresses on three fronts simultaneously. The job requirements are established by statute, functional requirements and locally developed requirements.

The statutes require governments to provide public safety and exclude certain individuals from selection as peace officers. There are requirements dictated by the function of law enforcement such as; knowledge of civil liberty laws, or steps required to make a legal arrest. The local government establishes its own requirements, which might be patrolling river for people in danger.

The development of the training program specific steps:

First a detailed examination of the job requirements, explicit or implicit is made to discover and describe the job behaviors needed to be a police officer in an Alaskan Village. When these behaviors are described they are compared with the trainee.

The body of skills and cognatives between what the trainee knows and what he needs to satisfy the job requirements is the identified needs. For example; all policemen need to be able to write, they further need to be able to write reports.

The trainee knows how to write, so writing is not an identified need. The trainee does not have experience, or special training in report writing, which therefore is an identified need.

When the needs are identified they can be stated in measureable objectives such as; "be able to write an accurate, clear, precise report from observation, testimony and inference." Each need is then reduced to a measureable objective.

The total of the objectives are then grouped by major subject heading and examined for time needed to impart. This becomes the curriculum.

The curriculum is examined to decide which method of teaching each subject will be used and texts, aids and materials are required. The manual skills are routinely taught by demonstration and practice. Cognative requirements are generally best suited to lecture and example. Skill in use of the baton for self-defense can be imparted quickest by demonstration and practice while the recognition of "probable cause" cannot be practiced, but is quickest learned by lecture and example.

The final step before conducting training is obtaining instructional resources. This is the physical collusion at the site for training the instructors materials and fiscal resources needed to carry out the curriculum.

While this training program is being developed the villages are recruiting officers. The Department of Public Safety has only minimal input in the recruiting and selection of Village Police Officers. It is usually low

key and informal advise to the Council from the local Alaska State Trooper. The first significant influence exerted by the Department of Public Safety is when the selected officers apply for training, the local State Trooper is asked to check him out to determine what kind of officer he might be. In questioned cases only those applicants personally recommended by the on-scene Alaska State Trooper are invited to training. All applicants for training in the fourth week course are further screened for prior disqualifying convictions. It is the involvement of the Alaska State Trooper Field Officer in the screening which is the most significant innovation in the Village Police Training Program. This ongoing process identifies a body of eligible trainees.

The third aspect of the Village Police Program is the efforts by the Field Alaska State Troopers to assist villages with no village policeman in recruitment of an eligible applicant and correspondence with the training program to obtain formal training for the Village Police Officers.

Additionally, when Alaska State Troopers visit the villages where trained and untrained officers are located they conduct informal on-the-job training in subjects which the Village Policemen need additional training. They also evaluate the Village Policemen in the performance of his duties and input to the Village Police Training Program discerned training requirements. A standard report form for OJT and evaluation is being developed. When developed the evaluation form will be completed each time an Alaska State Trooper visits the village where a trained officer is employed.

As a result of the three pronged effort we now have a training course and a body of trainees to receive the training. The students are evaluated during the training phase and the best performers during the one week school are selected for the four week training academy in Sitka.

Upon completion of the training phase the students will travel to "Bush" population centers for local OJT administered by the police departments of the population centers. The program content is the Alaska Police Standards Field Training Manual, modified to suit the "Bush" location. A portion of the OJT Program is the evaluation of the performance of the trainee. As illustrated on the attached model this evaluation is fed back into the training development cycle and modifies the curriculum. Thus, the evaluation phase becomes a factor in program content and is the most important factor in changing the identified needs.

19 AAC 30.020.

(1) Police Protection: An applicant is eligible for payment if the following minimum standards are met:

(A) the applicant must provide police protection with one or more police officers on duty or on call at all times.

(B) a police officer must be at least 19 years of age and must not have been convicted by a court of a crime which is classified as a felony in this state within the past 10 years;

(C) an applicant will not be eligible to receive revenue sharing funds unless a police officer within 12 months after his appointment has satisfactorily completed a basic course in police training approved by the Department of Public Safety. The commissioner may grant an extension of time for the completion of the basic program by a police officer upon presentation of evidence by the municipality that a police officer is unable to complete the basic program within 12 months of his appointment due to illness, injury, family emergency, military service or special duty assignment. An extention may also be made when the commissioner determines that it would be in the public interest.

(D) notwithstanding the provisions of (A) and (B) of this section, the commissioner may waive the requirements set forth in paragraph (C) on presentation of evidence by the municipality and acceptance of the evidence by the Police Standards Council that a police officer is otherwise qualified based on work experience, education, or training;

(E) recognition of the applicant by the Police Standards Council as a "participating police department" is evidence of eligibility under this section.

(2) FIRE PROTECTION:

(A) a municipal applicant is eligible for payment if it provides fire protection. Fire protection includes, but is not limited to, fire protection provided by a volunteer fire department which is currently registered with the state fire marshal and which has official recognition and financial support from the municipality in which it is located;

(B) a volunteer fire department located outside a municipality is eligible if it meets the following criteria:

(i) it is currently registered with the state fire marshal; and

(ii) minimum financial support as defined in 19 AAC 30.-020(10) is provided; and

(iii) unexpended funds are dedicated irrevocably for the operation and maintenance of fire protection services;

(C) organizational grants shall be made on the same basis to facilitate the organization of a volunteer fire department in an area not in a municipality upon application of the proposed fire protection group to the state fire

QUESTIONNAIRE

1. When did you begin the Police Training Program in your city?
   THREE OR FOUR YEARS AGO

2. Does your city like having its own policeman? YES ✓ NO ___

3. Does your village still have its policeman? YES ✓ NO ___

4. If not, was paying the salary for a policeman a serious problem for your village? YES ___ NO ✓
   What was the main reason you no longer have one?

5. Do you think that the Alaska State Trooper is helpful when your city has problems? YES ✓ NO ___ BUT due to SHORTAGE OF MANPOWER, THEY DON'T RESPOND RIGHT AWAY

6. What changes would you like to make in the Police Training Program to make the program better? A POLICEMAN SHOULD HAVE A MORE TRAINING IN ORDER TO FUNCTION BETTER

7. What can the State do to help your city with the Police Training Program? IF THE CITY HAVE TWO POLICEMAN INSTEAD OF ONE IT WOULD MAKE ALL THE DIFFERENCE IN THE WORLD IF THE STATE COULD APPROPRIATE MORE MONEY FOR VILLAGE POLICEMAN

8. Does your village policeman serve the needs of the people or are more police services needed? YES ✓ NO ✓ FOR SECOND SENTENCE
   FOR FIRST SENTENCE

9. Does your City Council handle unpleasant situations effectively? YES ___ NO ✓

10. Do you think that what your village policeman learned at Sitka was mainly for the village policeman rather than the big city policeman? In other words, do you think that he was adequately trained to handle problems in the rural areas? YES ___ NO ✓

11. Are there any other comments you would like to make regarding your village police program? WISH THERE IS MORE MONEY FOR TRAINING FOR VILLAGE POLICE IT SURE WOULD HELP.

Village Of: COPPER CENTER, ALASKA

KLUTI-KAAH CORP.

Has your Village been aware of the provisions of Section 14(c)(3) and (4) of the ANCSA?

Yes

Have you given consideration to taking some formal action in that regard?

Yes, however, we haven't received one square inch of our land entitlement under ANCSA.

Have you conferred with the Municipality on this issue?

No, there's no municipality in our Village. We will convey to the State in trust under A.S. 44.47.150.

Has any agreement been reached between you and the Municipality on how to proceed in this regard?

N/A

Have you reached any agreement with the Municipality on the lands to be conveyed under Section 14(c)(3) and (4)?

N/A

Does it appear as though there may be a confrontation on the issue?

We might have problems with the Bristol Bay Borough as it is claiming to be the recipient under 14(c)(3) of ANCSA. However, the Borough is obviously not a municipality "in" our Village, as required by 14(c)(3), so it is not entitled to any of our land.

What do you feel the State Legislature or Administration can do to help in this land selection and conveyance?

The legislature should amend A.S. 44.47.150 to make it unequivocally clear that the Borough is not entitled to a 14(c)(3) conveyance. It is obviously not a municipality "in" the villages and is not entitled to any land. The legislature has ultimate authority over the Boroughs under Alaska's Constitution and such action would assist in the orderly implementation of ANCSA.

Has your Village been aware of the provisions of Section 14(c)(3) and (4) of the ANCSA?

Yes

Have you given consideration to taking some formal action in that regard?

Yes. We have been gathering data for implementation of 14-c

Have you conferred with any State Officials on this issue?

No, not at this time.

What do you feel the State Legislature or Administration can do to help in this land selection and conveyance?

At the time the state begins to promulgate regulations, villages within each region should have direct input. The Regulations should be flexible enough to work with on a village by village basis. Most villages in Alaska, I'm sure have no experience in utilizing their Regional Corporation land department for technical assistance and advice. The State would do well to coordinate their efforts with the Regions as well as the villages. Such Cooperation will ease the conveyances and hopefully, speed through a successful conclusion.

April 4, 1977

Mr. Joe Orsini, Chairman
Senate Community & Regional
Affairs Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Mr. Orsini:

Re: Your letter March 28th with attached questionaire concerning ANCSA Section 14(c)(3) & (4).

Thank you for asking our views on this subject. We have answered your questions as best we can for the moment, but we do not feel we can be responsive to the law until there is more knowledge and definition of it's terms. We would appreciate any advise or information your committee may develop. In interpreting our questions you might be alert to the fact that the following circumstances exist at St. Mary's:

1) There are three Village Corporations within the single core township.

2)Part of the core township is covered by a city.

3) There are two cities whose boundaries adjoin.

4) There are four village corporations who have land selections within the boundaries of one city.

5) There does not appear to be any Native Corporation selected lands within either of the two neighboring cities upon which there are "improvements". All improved areas have already been patented or covered by BLM townsite surveys. This includes State and Federal interests covered by the Federal Aid to Airports Act.

6) There is one village immediately adjacent to a city boundary, but outside the city, upon which there are typical village improvements and living facilities and which is on unpatented ground. This same village has land selections within the city boundaries.

Following are questions we seek answers to:

1) Ref: Sec. 14(c)(3), line 4....what is the definition of "improved land"? If there is no"improved land on which the Native village is located" involved, is there an obligation to convey any land at all? The following "provided" clause seems to go back again to the reference to "improved land". Further, line two seems to carry with it the connotation that the situation is a whole city within the boundaries of a village selection and possibly confining the requirement to a circumstance where that circumstance exists. That definitely is not the case we are faced

St. Mary's Native Corporation

P.O. Box 162
St. Mary's, Alaska 99658

Mr. Joe Orsini April 4, 1977

we are faced with at St. Mary's.

2) Does each Village Corporation having selected lands within the boundaries of a city have to give a minimum of 1280 acres each to the City?

3) If a Village Corporation has selected lands in two or more cities does it have to give 1280 acres minimum to each and every city?

4) Does the 1280 acre grant from the village corporation to the city have to be within the core township and/or within city boundaries?

5) Would a city's zoning and land use planning powers superceed or give control over the exercise of transportation, utility, survey and other blanket type easements otherwise reserved in patents covering lands within a city? In this regard we are especially looking at the prospect of local governments being capable of regulating and restricting the routings of these kinds of activities so that routings become specific and not allowed to wander indiscriminately in opposition to a Village Corporation's own plans and best interests.

You might also advise, Mr. Orsini, if the legislature would look favorably on rural cities expanding their boundaries to outlandish sizes if, in the final analysis, it appears that is the only way in which local contol over blanket easements can be maintained.

Thank you again for soliciting our comments. We anxiously await your answer to our questions.

Very truly yours,

Paul T. Dixon

Has any agreement been reached between you and the Municipality on how to proceed in this regard?

No.

Have you reached any agreement with the Municipality on the lands to be conveyed under Section 14(c)(3) and (4)?

No.

Does it appear as though there may be a confrontation on the issue?

No.

What do you feel the State Legislature or Administration can do to help in this land selection and conveyance?

I think assisting the City in developing their future requirements with respect to future expansion and needs of the City for lands under the ANCSA would be very beneficial. I would, however, caution and advise that the Corporation and the City work hand in hand with the State Community & Regional Affairs in the planning effort so as to avoid any future confrontation.

Sir:

This is in response to your questionnaire received March 31, 1977, regarding 14 (c) (3) and (4) of the Alaska Native Claims Settlement Act.

We have been well aware of this section of the act and have been addressing the problem, both formally and informally within the Board of Directors and with the City Council members of the City of Yakutat.

Please find enclosed the completed questionnaire that you requested.

Very truly yours,

YAK-TAT KWAAN, INC. CORPORATION

Dear Senator,

I am replying to the enclosed questionnaire recently received from your office.

I feel the questions raised by you will be high priority issues that cannot be ignored by any village corporation or municipality.

Any plausible solutions offered by your office to those inevitable concerns will certainly be received with acute interest.

Sincerely,

Peter Demoski

Peter Demoski, Pres.

1. Has your Village been aware of the provisions of Section 14(c)(3) and (4) of the ANCSA?

2. Have you given consideration to taking some formal action in that regard?

3. Have you conferred with the Municipality on this issue?

4. Has any agreement been reached between you and the Municipality on how to proceed in this regard?

5. Have you reached any agreement with the Municipality on the lands to be conveyed under Section 14(c)(3) and (4)?

6. Does it appear as though there may be a confrontation on the issue?

7. What do you feel the State Legislature or Administration can do to help in this land selection and conveyance?

Village Of: Nulato Corporation

1. Yes, this has been a concern among several entities within our community. From the Village Corporation's standpoint itself, we foresee difficulties in any land reconveyance to the municipality, resident and non-resident Natives, resident non-Natives, local businessmen, and future business groups.

2. Interior Village Association, a non-profit corporation organized for the purpose of assisting village corporations administer to their land and financial assets, is presently in the process of itemizing forseeable problems, and finding solutions that will enable village corporations to make land reconveyance agreements which will be in accordance with condition of ANSCA and state laws. Current conflicts among various agencies with interests in lands to be conveyed prevent the findings of IVA to be distributed to villages in the immediate future.

3. Yes, this has been raised repeatedly between us at corporation board meetings and village council meetings.

4. While both bodies realize the existence of the problems, and recognize the overall procedure of the reconveyance issue, attention to detail still needs to be determined and satisfactorily settled.

5. Only an unofficial assessment of the acreage of lands to be conveyed to the village has been discussed. No final acreage determination, acreage location, or acreage limitations has been agreed upon.

6. Yes. The existing suitable acreage in and around our village is limited due to natural obstacles, as waterways and swamps. Access to lands suitable for building and village expansion will be completed in the near future. I foresee conflicts between our corporation and council about the dispositions of suitable lands.

7. The State Legislature or Administration can work closely with organizations like Interior Village Association, since they have personnel familiar with their individual villages' problems. Settlements without this consideration will never be satisfactory to all corporations and agencies concerned with the issues.

88

Has your Village been aware of the provisions of Section 14(c)(3) and (4) of the ANCSA?

yes

Have you given consideration to taking some formal action in that regard?

yes

Have you conferred with the Municipality on this issue?

yes

Has any agreement been reached between you and the Municipality on how to proceed in this regard?

yes

Have you reached any agreement with the Municipality on the lands to be conveyed under Section 14(c)(3) and (4)?

no

Does it appear as though there may be a confrontation on the issue?

no

What do you feel the State Legislature or Administration can do to help in this land selection and conveyance?

allow conveyance of lands under ANCSA to occur prior to State selection

May 13, 1977

The Honorable Joseph Orsini
Alaska State Senate
Pouch V
State Capitol Building, Rm. 101
Juneau, Alaska 99811

Dear Senator Orsini:

Received your letter of May 7 regarding your concern with the Section 14(c)(3).

Your analysis that the Corporations have been more active in addressing themselves to the issue, than have the municipalities is correct. We have discussed and concerned ourselves with this subject on several occasions, however, we have not arrived at any definitive conclusions. We do not anticipate a great deal of conflict in resolving differences between the Corporation and the Municipality of Saxman. However, our circumstances is perhaps better than some in that the Corporation is controlled exclusively by Natives and the Municipal Government leadership in Saxman is almost exclusively Natives. Most of the Municipal leaders are shareholders in the Cape Fox Corporation (C.F.C.).

Despite the above-mentioned unity, we can foresee a long and protracted dialogue between the two groups before a final agreement can be reached. This will be a severe drain upon the financial and leadership resources of both C.F.C. and Municipal Government of Saxman. While I cannot speak to the needs of the M.G.S., I can assure you that this Corporation would appreciate financial assistance in meeting the cost of reaching a final agreement on 14(c). The legal fees and consulting fees will be extensive even under the most congenial and compatible circumstances.

As you may already know, the Village Corporations, in general, are incurring great expenses in start up cost and long delays in the acquisition of their lands that were pledged to them by the passage of the Claims Act. And, we estimate that it will be six months to two years before lands will be conveyed, and our administrative and management cost continue. The smaller villages with fewer shareholders are beginning to feel a severe financial pinch. 14(c) could very well be the straw that broke the camels back if we're not careful in most Village Corporations' circumstances.

I do not believe it appropriate for the State to provide direct counsel or assistance to the Corporation or to the Municipal Government. As you are very aware, this is a political circumstance and one that must be worked out between the two parties in question. However, it would be appropriate and desirable for the State to assist by providing grants and/or technical assistance to help the parties in question.

On behalf of the Cape Fox Board of Directors and shareholders, I want to thank you for your interest and concern with this very important issue.

Sincerely,

F. A. Seymour
Executive Vice President

April 7, 1977

Senator Joe Orsini, Chairman
Senate Community and Regional Affairs Commission
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini,

I received your letter dated March 28, 1977 . I do not agree with you, in your letter where you state, "One of the less recognized aspects of the Alaska Native Land Claims Settlement Act has been those provisions of Section 14(c) (3) and (4) relating to the reconveyance of village lands to governmental agencies". I think all the villages, village corporations, and regional corporations through out Alaska are aware of and are greatly concerned about implementation of the provisions in Section 14(c) (3) and (4).
Tatitlek Corporation and the village of Tatitlek is also very concerned as to what procedures and guidelines your committee or any other appropriate committee will put into regulations in implementing Alaska Statute A.S. 44.77.150 village land conveyed in trust. (A) (B) (C) (D) (E) (F) (G).
I agree that your committee, villages,village corporations, and regional corporations should get together and look into possible areas of confrontation in implementing, procedures and guidelines in provisions set forth in Alaska Statute, (A.S. 44.47.150) (A) (B) (C) (D) (E) (F) (G).
I appreciate your suggestion that the state could possibly fund the planning process of the land to be conveyed.
Next monday the Bureau of Indian Affairs is sponsoring Land Planners Training at Anchorage. The University of Alaska will be conducting ten weeks of training, for three or four trainees from ATHNA and Chugach Regions. Tatitlek Corporation was fortunate by having one nomination to the course. The course will be on 14 (c) related training and will actually do 14(c) planning. If the State could compliment funding on this kind of course it really would be a big help.
We appreciate your concern in this matter and look forward to more correspondence with you.

Sincerely,

John Borodkin

John Borodkin, President

c.c. Andy Allen, Tatitlek Village Council

Answers to Questions concerning provisions
concerning 14(c).

1. Tatitlek Corporation board of directors have been aware of the provisions of Sec. 14(c) (3) and (4) of the Alaska Native Claims Settlement Act for the past two years. Last year during Tatitlek Corp. annual stockholders meeting we invited Carl Smith and Marliss Prasse from State of Claska , Community and Regional Affairs Agency to discuss provisions of Sec. 14 (c) (3) (4) with our stockholders at Tatitlek.

2. Village of Tatitlek is seriously considering Incorporating as 2nd class municipality.

3. Yes! during our 1976 annual stockholders meeting at Tatitlek.

4. No. We need much more information before proceeding in this regard.

5. No. We need more information on Municipal government and planning on municipal needs on long range basis.

6. No. Provide planning is acceptable on 14 (c) (3) (4) to Tatitlek Village Council, Tatitlek Corporation.

7. Tatitlek Corporation feels through grant funding form the State agencies that we can implement provisions of Sec. 14 (c) (3) and (4) much quicker than the villages can. Most villages have no money, no budget and therefore have no means of implementing provisions of Sec. 14 (c) (3) and (4). Tatitlek Corporation and Village of Tatitlek strongly feels that the State legislature or Administration can help by funding in implementing provisions of Sec. 14 (c) (3) and (4).

RE: Sec. 14 (c)(3) ANCSA

Dear Senator Orsini:

Your letter of May 7, 1977 has been referred to me for reply.

I am glad to see that the State Legislature is taking an active interest in any problems that may develop when reconveyance of lands takes place.

The amount of financial assistance to make knowledgeable decisions will probably vary by locality and the various problems encountered. Since we have a good relationship with our municipal government, I don't foresee any problems here in Angoon although there may be some in the future.

I would like to make one suggestion as you consider this issue that could be helpful to the outlying villages. There is a definite need for planning for municipal expansion and the reconveyance study could, at very little extra cost, provide much needed planning data.

I will at your request, develop a plan for reconveyance with the City of Angoon and provide you with a cost breakdown and time schedule. This may be of assistance to you as you consider the financial aspects.

There is often a tendency to suggest general solutions to very complex and diverse problems and I hope that your committee will not be overly pessimistic in your approach. It may be best to develop a set of flexible guidelines so that you can review these transfers on a case by case basis and only provide guidance when needed.

I hope I have been of assistance and I would be glad to discuss this with you at your convenience.

Kindest regards.

Sincerely,

Sterling R. Bolima

Mr. Sterling R. Bolima

Has your Village been aware of the provisions of Section 14(c)(3) and (4) of the ANCSA? Yes, we have been aware of the reconveyance of Village lands to the Municipal Corporation or the State for the purpose of existing airport sites, easements etc...

Have you given consideration to taking some formal action in that regard? Yes, we are against most of the easements proposed by recreationists and hunters because ~~the~~ most of the easements proposed run through our major hunting, fishing and trapping areas.

Have you conferred with the Municipality on this issue?
Not that I know of.

Has any agreement been reached between you and the Municipality on how to proceed in this regard?
No

Have you reached any agreement with the Municipality on the lands to be conveyed under Section 14(c)(3) and (4)?
No.

Does it appear as though there may be a confrontation on the issue?
I dont know

What do you feel the State Legislature or Administration can do to help in this land selection and conveyance?
They can send us the State law ~~and~~ and Federal law on reconveyance of lands. They can also explain the provisions of Section 14(c)(3) and (4) of the ANCSA in a way that we can better understand it.

Dear Senator Orsini:

I have reviewed your letter of April 7 in regards to the provisions of 14 (c) (3a) and (4) of the Native Claims Settlement Act. We are, of course, acutely aware of the impact of these provisions and are actively working with our local municipality. However, I cannot see that the state should get involved in a problem that will either be resolved on the local level or in the Federal courts.

Involvement of the State of Alaska in an area which is complicated and untested in the courts can only serve to confuse the situation. It is my understanding that your political philosophy is to keep the state out of local affairs unless it is absolutely necessary. In keeping with that philosophy, I would urge that your committee drop any furhter inquiry into an area where you can be of no assistance.

Yours truly,

Tommy Sheldon Sr.
President

Dear Senator:

This will acknowledge your letter of March 28, 1977 relating to the reconveyance of village land to municipal governments.

We have discussed the above with our attorney and also other attorneys. It is our desire that any lands conveyed to the municipalities will be done so in the following manner: land will be restricted and will be for use only by shareholders, all timber will be removed. Village corporations should set guidelines in regards to these reconveyances without any interference from the municipal governments or other governmental entities.

Most of the small villages are governed by shareholders of its local corporation. At the present, we have had not objections regarding the conveyance of land to the municipality. Land title may be in jeopardy when non-natives take control of the municipal governments. We must be certain that the reconveyed land will always belong, or revert back to the villag corporation.

We appreciate your concern and we are very pleased to know you are planning before the conveyances of land are made.

Respectfully,

Albert Davis

Dear Senator Orsini:

The Klawock Heenya Corporation has always been aware of Section 14 (c) and how vague it is written. The Corporation has drafted its views on Section 14 (c) (3), which was presented to the City Council. Upon presentation the President of the Corporation explained Section 14 (c) of the Act and made it clear that the views that were being presented were only the views of the Corporation. It was further explained that what the Corporation was looking for was:

1. To make the City Council aware of Section 14 (c), and how vague it was written.

2. To have the City Council review what the Corporation thoughts were on Section 14 (c), and to have them come up with their own point of view.

3. To then meet jointly so as to proceed toward some agreement that would be satisfactory to both entities.

However, to this day this office has not heard from the City Council and could not express as to whether they are taking this subject too lightly, or whether they are going to confront the Corporation without first trying to meet jointly.

Klawock Heenya Corporation feels that if state funds were made available to the village corporation and municipal government to go jointly on a comprehensive land use plan, the final analsis of the plan would show what land under 14 (c) (3) would be of best interest to both entities, plus show an overall plan as to how the corporation and municipal government could best work together with the land, whether it be corporation or municipal land, in the coming future.

Sincerely yours,

Leonard Kato
President

I expect to be chairman of this interim committee, and as such would be interested in some of your specific concerns. Of particular importance would be your perception of an estimate of the amount of financial assistance you might need, so that an appropriation could be put into next year's state budget. I would be interested in hearing from you on this.

Sincerely,

Joe Orsini

Senator Joe Orsini

Honorable Senator:
Municipal selection had been made already within the process of 3 years. The following had been the process of the selection:

A) General Village Meeting
1. General selection
i) lands elected for farmers, future expansion, road projection, water & sanitation
ii) Seaden Land Committee approval

B) Screening & Study by Municipal Government & final approval

C) Sea Lion provides a technical man - local hire - same reason that made selection - Sea Lion technical Sea Lion pays the travels

Ø refund us if State does finance the selection of 1A(C).

No confrontation no problem unless screwed by some bureaucrat.

Dear Senator,

I am glad that the Legislature and many villages are aware of the many complexities that will evolve during the selection of the 14 (c)(3) acreage between village corporations and municipalities.

The Legislature is to be commended for considering the formation of an interim committee to investigate this issue and offer state assistance in financial terms.

Nulato has a high favorable relationship between corporation and municipality. However, this may be due to a misunderstanding of the technical issues involved about such a complex problem by the majority of both organizations.

I do have one concern in regards to your letter of May 5, 1977. You indicated a request for an estimation of financial assistance needed for an appropriation to be put into next year's budget.

We recently received a notice from BLM that a selection of lands by the municipality be determined prior to a survey. BLM will be here in July and August to do this survey.

It seems that we will be deprived of any state financial assistance.

Please advise.

Sincerely,

Peter Demoski

Juneau, Alaska 99801

Dear Senator:

This will acknowledge your letter of March 28, 1977 relating to the reconveyance of village land to municipal governments.

We have discussed the above with our attorney and also other attorneys. It is our desire that any lands conveyed to the municipalities will be done so in the following manner: land will be restricted and will be for use only by shareholders, all timber will be removed. Village corporations should set guidelines in regards to these reconveyances without any interference from the municipal governments or other governmental entities.

Most of the small villages are governed by shareholders of its local corporation. At the present, we have had not objections regarding the conveyance of land to the municipality. Land title may be in jeopardy when non-natives take control of the municipal governments. We must be certain that the reconveyed land will always belong, or revert back to the village corporation.

We appreciate your concern and we are very pleased to know you are planning before the conveyances of land are made.

Respectfully,

Albert Davis

Senator Joe Orsini
Pouch V
Juneau, Alaska

Dear Senator Orsini:

The Klawock Heenya Corporation has always been aware of Section 14 (c) and how vague it is written. The Corporation has drafted its views on Section 14 (c) (3), which was presented to the City Council. Upon presentation the President of the Corporation explained Section 14 (c) of the Act and made it clear that the views that were being presented were only the views of the Corporation. It was further explained that what the Corporation was looking for was:

1. To make the City Council aware of Section 14 (c), and how vague it was written.

2. To have the City Council review what the Corporation thoughts were on Section 14 (c), and to have them come up with their own point of view.

3. To then meet jointly so as to proceed toward some agreement that would be satisfactory to both entities.

However, to this day this office has not heard from the City Council and could not express as to whether they are taking this subject too lightly, or whether they are going to confront the Corporation without first trying to meet jointly.

Klawock Heenya Corporation feels that if state funds were made available to the village corporation and municipal government to go jointly on a comprehensive land use plan, the final analsis of the plan would show what land under 14 (c) (3) would be of best interest to both entities, plus show an overall plan as to how the corporation and municipal government could best work together with the land, whether it be corporation or municipal land, in the coming future.

Sincerely yours,

Leonard Kato

LK:rs

Has your Village been aware of the provisions of Section 14(c)(3) and (4) of the ANCSA?

Yes.

Have you given consideration to taking some formal action in that regard?

Yes.

Have you conferred with the Municipality on this issue?

Yes.

Has any agreement been reached between you and the Municipality on how to proceed in this regard?

No.

Have you reached any agreement with the Municipality on the lands to be conveyed under Section 14(c)(3) and (4)?

No.

Does it appear as though there may be a confrontation on the issue?

No.

What do you feel the State Legislature or Administration can do to help in this land selection and conveyance?
I think assisting the City in developing their future requirements with respect to future expansion and needs of the City for lands under the ANCSA would be very beneficial. I would, however, caution and advise that the Corporation and the City work hand in hand with the State Community & Regional Affairs in the planning effort so as to avoid any future confrontation.

Village Of: Nulato Corporation

1. Yes, this has been a concern among several entities within our community. From the Village Corporation's standpoint itself, we foresee difficulties in any land reconveyance to the municipality, resident and non-resident Natives, resident non-Natives, local businessmen, and future business groups.

2. Interior Village Association, a non-profit corporation organized for the purpose of assisting village corporations administer to their land and financial assets, is presently in the process of itemizing forseeable problems, and finding solutions that will enable village corporations to make land reconveyance agreements which will be in accordance with condition of ANSCA and state laws. Current conflicts among various agencies with interests in lands to be conveyed prevent the findings of IVA to be distributed to villages in the immediate future.

3. Yes, this has been raised repeatedly between us at corporation board meetings and village council meetings.

4. While both bodies realize the existence of the problems, and recognize the overall procedure of the reconveyance issue, attention to detail still needs to be determined and satisfactorily settled.

5. Only an unofficial assessment of the acreage of lands to be conveyed to the village has been discussed. No final acreage determination, acreage location, or acreage limitations has been agreed upon.

6. Yes. The existing suitable acreage in and around our village is limited due to natural obstacles, as waterways and swamps. Access to lands suitable for building and village expansion will be completed in the near future. I foresee conflicts between our corporation and council about the dispositions of suitable lands.

7. The State Legislature or Administration can work closely with organizations like Interior Village Association, since they have personnel familiar with their individual villages' problems. Settlements without this consideration will never be satisfactory to all corporations and agencies concerned with the issues.

Has your Village been aware of the provisions of Section 14(c)(3) and (4) of the ANCSA? Yes. This has been discussed. It is our intention to formally incorporate the municipality this summer.

Have you given consideration to taking some formal action in that regard? Yes — we are studying which lands would be most suitable to reconvey so as to make the municipal corporation viable.

Have you conferred with the Municipality on this issue? No. It hasn't been organized formally yet. But when it is we will confer.

Has any agreement been reached between you and the Municipality on how to proceed in this regard? (See above.) It is our feeling we will find agreement on reconveyances.

Have you reached any agreement with the Municipality on the lands to be conveyed under Section 14(c)(3) and (4)? (See above)

Does it appear as though there may be a confrontation on the issue? Very doubtful. We anticipate close and cordial relationships.

What do you feel the State Legislature or Administration can do to help in this land selection and conveyance? We are open to suggestions ourselves. Perhaps if the State would assume costs of surveying and other such costs it would be helpful.

Senator Joe Orsini, Chairman
Senate Community and Regional Affairs Commission
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini,

I received your letter dated March 28, 1977 . I do not agree with you, in your letter where you state, "One of the less recognized aspects of the Alaska Native Land Claims Settlement Act has been those provisions of Section 14(c) (3) and (4) relating to the reconveyance of village lands to governmental agencies". I think all the villages, village corporations, and regional corporations through out Alaska are aware of and are greatly concerned about implementation of the provisions in Section 14(c) (3) and (4).
Tatitlek Corporation and the village of Tatitlek is also very concerned as to what procedures and guidelines your comittee or any other appropriate committee will put into regulations in implementing Alaska Statute A.S. 44.77.150 village land conveyed in trust. (A) (B) (C) (D) (E) (F) (G).
I agree that your committee, villages,village corporations, and regional corporations should get together and look into possible areas of confrontation in implementing, procedures and guidelines in provisions set forth in Alaska Statute, (A.S. 44.47.150) (A) (B) (C) (D) (E) (F) (G).
I appreciate your suggestion that the state could possibly fund the planning process of the land to be conveyed.
Next monday the Bureau of Indian Affairs is sponsoring Land Planners Training at Anchorage. The University of Alaska will be conducting ten weeks of training, for three or four trainees from ATINA and Chugach Regions. Tatitlek Corporation was fortunate by having one nomination to the course. The course will be on 14 (c) related training and will actually do 14(c) planning. If the State could compliment funding on this kind of course it really would be a big help.
We appreciate your concern in this matter and look forward to more correspondence with you.

Sincerely,

John Borodkin

John Borodkin, President

c.c. Andy Allen, Tatitlek Village Council

Answers to Questions concerning provisions concerning 14(c).

1. Tatitlek Corporation board of directors have been aware of the provisions of Sec. 14(c) (3) and (4) of the Alaska Native Claims Settlement Act for the past two years. Last year during Tatitlek Corp. annual stockholders meeting we invited Carl Smith and Marliss Prasse from State of Claska , Community and Regional Affairs Agency to discuss provisions of Sec. 14 (c) (3) (4) with our stockholders at Tatitlek.

2. Village of Tatitlek is seriously considering Incorporating as 2nd class municipality.

3. Yes! during our 1976 annual stockholders meeting at Tatitlek.

4. No. We need much more information before proceeding in this regard.

5. No. We need more information on Municipal government and planning on municipal needs on long range basis.

6. No. Provide planning is acceptable on 14 (c) (3) (4) to Tatitlek Village Council, Tatitlek Corporation.

7. Tatitlek Corporation feels through grant funding form the State agencies that we can implement provisions of Sec. 14 (c) (3) and (4) much quicker than the villages can. Most villages have no money, no budget and therefore have no means of implementing provisions of Sec. 14 (c) (3) and (4). Tatitlek Corporation and Village of Tatitlek strongly feels that the State legislature or Administration can help by funding in implementing provisions of Sec. 14 (c) (3) and (4).

Has your Village been aware of the provisions of Section 14(c)(3) and (4) of the ANCSA?

Have you given consideration to taking some formal action in that regard?

Have you conferred with the Municipality on this issue?

Has any agreement been reached between you and the Municipality on how to proceed in this regard?

Have you reached any agreement with the Municipality on the lands to be conveyed under Section 14(c)(3) and (4)?

Does it appear as though there may be a confrontation on the issue?

What do you feel the State Legislature or Administration can do to help in this land selection and conveyance?

Affairs Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

I have reviewed your letter of April 7 in regards to the provisions of 14 (c) (3a) and (4) of the Native Claims Settlement Act. We are, of course, acutely aware of the impact of these provisions and are actively working with our local municipality. However, I cannot see that the state should get involved in a problem that will either be resolved on the local level or in the Federal courts.

Involvement of the State of Alaska in an area which is complicated and untested in the courts can only serve to confuse the situation. It is my understanding that your political philosophy is to keep the state out of local affairs unless it is absolutely necessary. In keeping with that philosophy, I would urge that your committee drop any furhter inquiry into an area where you can be of no assistance.

Yours truly,

Tommy Sheldon Sr.
President

as

cc John Shively, Vice-President

CAPE FOX CORPORATION

SAXMAN

May 13, 1977

The Honorable Joseph Orsini
Alaska State Senate
Pouch V
State Capitol Building, Rm. 101
Juneau, Alaska 99811

Dear Senator Orsini:

Received your letter of May 7 regarding your concern with the Section 14(c)(3).

Your analysis that the Corporations have been more active in addressing themselves to the issue, than have the municipalities is correct. We have discussed and concerned ourselves with this subject on several occasions, however, we have not arrived at any definitive conclusions. We do not anticipate a great deal of conflict in resolving differences between the Corporation and the Municipality of Saxman. However, our circumstances is perhaps better than some in that the Corporation is controlled exclusively by Natives and the Municipal Government leadership in Saxman is almost exclusively Natives. Most of the Municipal leaders are shareholders in the Cape Fox Corporation (C.F.C.).

Despite the above-mentioned unity, we can foresee a long and protracted dialogue between the two groups before a final agreement can be reached. This will be a severe drain upon the financial and leadership resources of both C.F.C. and Municipal Government of Saxman. While I cannot speak to the needs of the M.G.S., I can assure you that this Corporation would appreciate financial assistance in meeting the cost of reaching a final agreement on 14(c). The legal fees and consulting fees will be extensive even under the most congenial and compatible circumstances.

As you may already know, the Village Corporations, in general, are incurring great expenses in start up cost and long delays in the acquisition of their lands that were pledged to them by the passage of the Claims Act. And, we estimate that it will be six months to two years before lands will be conveyed, and our administrative and management cost continue. The smaller villages with fewer shareholders are beginning to feel a severe financial pinch. 14(c) could very well be the straw that broke the camels back if we're not careful in most Village Corporations' circumstances.

I do not believe it appropriate for the State to provide direct counsel or assistance to the Corporation or to the Municipal Government. As you are very aware, this is a political circumstance and one that must be worked out between the two parties in question. However, it would be appropriate and desirable for the State to assist by providing grants and/or technical assistance to help the parties in question.

On behalf of the Cape Fox Board of Directors and shareholders, I want to thank you for your interest and concern with this very important issue.

Sincerely,

F. A. Seymour
Executive Vice President

Tanana, [illegible] 99777

RE: Sec. 14 (a)(3) [illegible]

[illegible] Tanana Chiefs:

Your letter of Mar. 7, 1977 has been referred to me for reply.

I am glad to see that the Tanana Chiefs is taking an active interest in many problems that may develop when reconveyance of lands takes place.

The amount of financial assistance to make knowledgeable decisions will probably vary by locality and the various problems encountered. Since we have a [illegible] with [illegible] regional corporation, I doubt if Angoon can qualify to receive any of this money in the future.

I would like to make one suggestion as you proceed with those that could be helped by the village trust, [illegible] Native corporation should be given [illegible] to the village trust, [illegible] should be [illegible].

[illegible] with the Tanana Chiefs [illegible] Angoon [illegible] Native [illegible] to our [illegible] [illegible] needs.

Senator Joe Orsini
Chairman, Community &
Regional Affairs Committe
Pouch V Juneau, Alaska 99811

Dear Senator Orsini:

Your letter cated May 5th has been received, and is under full consideration by the board of directors. The issue at this time is the 1280 acres and who will be responsible, whether Municipities, or the village corporations, for selections of the land. In spite of some disagreements we need technical assistance as well as funds, it is pretty hard to estimate at this time how much money our corporation will need, my rough estimate would be around $5,000.00 you would be in a better posistion to be a interim chairman of the committee that will be formed soon, I and the rest of the board of Azachorak Inc. will be in full support of your endeavor for this, thank you very much.

Sincerely,

Andrew Brown Sr.
President, Azachorak Inc.

M

Has your Village been aware of the provisions of Section 14(c)(3) and (4) of the ANCSA?

YES

Have you given consideration to taking some formal action in that regard?

WE HAVE BEEN WORKING ON THIS WITH AHTNA INC.

Have you conferred with the Municipality on this issue?

NO MUNICIPALITY

Has any agreement been reached between you and the Municipality on how to proceed in this regard?

NO MUNICIPALITY

Have you reached any agreement with the Municipality on the lands to be conveyed under Section 14(c)(3) and (4)?

NO MUNICAPALITY

Does it appear as though there may be a confrontation on the issue?

NO

What do you feel the State Legislature or Administration can do to help in this land selection and conveyance?

Title: PRESIDENT

Village Of: COPPER CENTER, ALASKA

KLUTI-KAAH CORP.

Has your Village been aware of the provisions of Section 14(c)(3) and (4) of the ANCSA?

Yes

Have you given consideration to taking some formal action in that regard?

Yes, however, we haven't received one square inch of our land entitlement under ANCSA.

Have you conferred with the Municipality on this issue?

No, there's no municipality in our Village. We will convey to the State in trust under A.S. 44.47.150.

Has any agreement been reached between you and the Municipality on how to proceed in this regard?

N/A

Have you reached any agreement with the Municipality on the lands to be conveyed under Section 14(c)(3) and (4)?

N/A

Does it appear as though there may be a confrontation on the issue?

We might have problems with the Bristol Bay Borough as it is claiming to be the recipient under 14(c)(3) of ANCSA. However, the Borough is obviously not a municipality "in" our Village, as required by 14(c)(3), so it is not entitled to any of our land.

What do you feel the State Legislature or Administration can do to help in this land selection and conveyance?

The legislature should amend A.S. 44.47.150 to make it unequivocally clear that the Borough is not entitled to a 14(c)(3) conveyance. It is obviously not a municipality "in" the villages and is not entitled to any land. The legislature has ultimate authority over the Boroughs under Alaska's Constitution and such action would assist in the orderly implementation of ANCSA.

Municipalities

to VC. & munis & reg. corps who responded to questionnaire

Alaska State Legislature

Senate

JUNEAU, ALASKA

May 5, 1977

Dear

Thank you for your response to our questionnaire regarding lands under Sec. 14(c)(3) of the ANCSA. Because of the good number of returns, the following trends could be determined from those responses:

1. As to be expected, the village corporations have been somewhat more active in addressing the issue than have the municipalities.

2. There is a wide disparity of opinion with regard to specifically what criteria is to be used in the selection of the 1280 acres and specifically who is to make the selection.

3. While there generally has been some dialogue between the municipality and the village corporation, there has as yet been little agreement reached on either the selection process or the specific lands selected.

4. Confrontation is anticipated in half of the cases by both village corporations and municipalities.

5. The vast majority of both village corporations and municipalities would like some aid from the state in the form of funding grants or technical assistance, as well as defining guidelines for the selection process.

The Legislature has tentatively approved the formation of an interim committee to look at this issue in some detail, both to more specifically define the type and magnitude of state assistance needed and to hopefully avert the many confrontations that seem to be building. As with many aspects of the Land Claims Act, there are unanticipated complexities that are enough to put a strain on even the best of working relationships between village corporation and municipality.

I expect to be chairman of this interim committee, and as such would be interested in some of your specific concerns. Of particular importance would be your perception of an estimate of the amount of financial assistance you might need, so that an appropriation could be put into next year's state budget. I would be interested in hearing from you on this.

Sincerely,

Joe Orsini

Re: ANCSA

Regional Corporation

Dear :

For you information, the Senate Community and Regional Affairs Committee is sending you a copy of the letter and enclosures which were sent to all the Village Corporations and corresponding municipalities. As the letter states, this Committee hopes to create beneficial interaction between them and receive input (see questionaire) in order to ascertain what actions have been taken in regards to the Alaska Native Claims Settlement Act.

If you have any comments or suggestions, or if we can be any assistance to you, please do not hesitate to contact this office.

Sincerely,

One of the less recognized aspects of the Alaska Native Land Claims Settlement Act (ANCSA) has been those provisions of Section 14(c)(3) and (4), relating to the reconveyance of Village land to governmental agencies (see enclosed copy of the Section and the pertinent Alaska Statute, AS 44.47.150). However, as the land conveyance process approaches completion, this reconveyance portion of the ANCSA will undoubtedly become more of an issue.

Because of the numerous questions that will inevitably be raised regarding the implementation of these sections, it is the feeling of the Senate Community and Regional Affairs Committee that we should begin to address the issue now, before the occurrence of possible confrontation, so as to see if some mutually acceptable procedures can be reached. It would seem to be in the best interests of all concerned that some sort of planning process be undertaken regarding the selection of the land to be reconveyed, which could involve the use of state funds.

It will help our consideration of the subject if we could get some information with respect to your current disposition on the issue. In that regard, we would appreciate your response to the questions on the following page. Please feel free to elaborate on any of your answers, and make whatever other comments you desire.

Sincerely,

Joe Orsini

finds is qualified for land benefits under this Act, the Secretary shall issue to the Village Corporation a patent to the surface estate in the number of acres shown in the following table:

If the village had on the 1970 census enumeration date a Native population between—	It shall be entitled to a patent to an area of public lands equal to—
25 and 99	69,120 acres.
100 and 199	92,160 acres.
200 and 399	115,200 acres.
400 and 599	138,240 acres.
600 or more	161,280 acres.

The lands patented shall be those selected by the Village Corporation pursuant to subsection 12(a). In addition, the Secretary shall issue to the Village Corporation a patent to the surface estate in the lands selected pursuant to subsection 12(b).

(b) Immediately after selection by any Village Corporation for a Native village listed in section 16 which the Secretary finds is qualified for land benefits under this Act, the Secretary shall issue to the Village Corporation a patent to the surface estate to 23,040 acres. The lands patented shall be the lands within the township or townships that enclose the Native village, and any additional lands selected by the Village Corporation from the surrounding townships withdrawn for the Native village by subsection 16(a).

Patent requirements.

(c) Each patent issued pursuant to subsections (a) and (b) shall be subject to the requirements of this subsection. Upon receipt of a patent or patents:

(1) the Village Corporation shall first convey to any Native or non-Native occupant, without consideration, title to the surface estate in the tract occupied as a primary place of residence, or as a primary place of business, or as a subsistence campsite, or as headquarters for reindeer husbandry;

(2) the Village Corporation shall then convey to the occupant, either without consideration or upon payment of an amount not in excess of fair market value, determined as of the date of initial occupancy and without regard to any improvements thereon, title to the surface estate in any tract occupied by a nonprofit organization;

(3) the Village Corporation shall then convey to any Municipal Corporation in the Native village or to the State in trust for any Municipal Corporation established in the Native village in the future, title to the remaining surface estate of the improved land on which the Native village is located and as much additional land as is necessary for community expansion, and appropriate rights-of-way for public use, and other foreseeable community needs: *Provided*, That the amount of lands to be transferred to the Municipal Corporation or in trust shall be no less than 1,280 acres;

(4) the Village Corporation shall convey to the Federal Government, State or to the appropriate Municipal Corporation, title to the surface estate for existing airport sites, airway beacons, and other navigation aids, together with such additional acreage and/or easements as are necessary to provide related services and to insure safe approaches to airport runways; and

(5) for a period of ten years after the date of enactment of this Act, the Regional Corporation shall be afforded the opportunity to review and render advice to the Village Corporations on all land sales, leases or other transactions prior to any final commitment.

Sec. 44.47.150. Village land conveyed in trust. (a) The commissioner of the Department of Community and Regional Affairs is designated to accept, administer, and dispose of land conveyed to the state in trust by village corporations under § 14(c)(3) of the Alaska Native Claims Settlement Act (P.L. 92-203, 85 Stat. 703) for the purposes specified in that section.

(b) Transfer of land by sale, lease, right-of-way, easement, or permit, including transfer of surface resources, may be made by the commissioner only after approval of an appropriate village entity such as the traditional council, a village meeting, or a village referendum. Such approval shall be by resolution filed with the department.

(c) Within one complete state fiscal year after the incorporation of a municipality in the village or of a municipality which includes all or part of the village, land acquired under this section shall be conveyed without cost to the municipality, and the municipality shall succeed to all the entrusted interest in the land.

(d) Separate accounts shall be maintained in the name of each village for the land, including the revenues from the land, acquired from each village corporation under this section, and within 90 days of the close of each state fiscal year a statement of the account for each municipality shall be prepared by the commissioner and be made available to the village and to the public upon request.

(e) Upon the conveyance of land to a municipality under this section, the commissioner shall account to the municipality for all profits including interest from the land, and the municipality may then request that the governor submit a request to the legislature for an appropriation for the amount due it.

(f) No title or interest to lands acquired by the department under this section may be acquired by adverse possession or prescription.

(g) For the purposes of this chapter, the term municipality includes only first and second class cities incorporated under the laws of the state. (§ 1 ch 119 SLA 1975)

Mr. Leonard Kato
President
Klawock Heenya Co p.
P.O. Box 25
Klawock, Alaska 99925

Dear Mr. Kato:

Thank you very much for your thoughtful letter on the Section 14(c)(3) issue.

Letters have gone out to all Village Corporations and affected municipalities in this regard, and yours was one of the very first responses I have received, with none yet from any municipality. Perhaps an "official" letter from a legislative committee will begin to spur the munipalities into taking some sort of action on the subject, or at least get them thinking.

Hopefully, both the municipalities and the Village Corporations will see the value in cooperation; confrontation will do nothing but cause animosity and make the lawyers wealthy. While there has been little interest in this subject at the state level thus far, it is my hope to be able to recommend to the Legislature, with support from letters such as yours, that state funds be available next year for assistance in the planning and selection process.

Again, thank you for your letter, and I would urge you to renew your efforts at attempting to discuss the issue with the City Council. If I can be of any help in this regard, please let me know.

Sincerely,

Senator Joe Orsini

April 1, 1977

Senator Joe Orsini
Pouch V
Juneau, Alaska

Dear Senator Orsini:

The Klawock Heenya Corporation has always been aware of Section 14 (c) and how vague it is written. The Corporation has drafted its views on Section 14 (c) (3), which was presented to the City Council. Upon presentation the President of the Corporation explained Section 14 (c) of the Act and made it clear that the views that were being presented were only the views of the Corporation. It was further explained that what the Corporation was looking for was:

1. To make the City Council aware of Section 14 (c), and how vague it was written.

2. To have the City Council review what the Corporation thoughts were on Section 14 (c), and to have them come up with their own point of view.

3. To then meet jointly so as to proceed toward some agreement that would be satisfactory to both entities.

However, to this day this office has not heard from the City Council and could not express as to whether they are taking this subject too lightly, or whether they are going to confront the Corporation without first trying to meet jointly.

Klawock Heenya Corporation feels that if state funds were made available to the village corporation and municipal government to go jointly on a comprehensive land use plan, the final analsis of the plan would show what land under 14 (c) (3) would be of best interest to both entities, plus show an overall plan as to how the corporation and municipal government could best work together with the land, whether it be corporation or municipal land, in the coming future.

Sincerely yours,

Leonard Kato

FEDERAL REGISTER ANNOUNCEMENTS

Following are references to recent Federal Register Announcements of particular interest to CBPA members:

AIR POLLUTION

EPA issues notice on review of prevention of significant air quality deterioration permit applications. Fed'l Reg. Wed. March 8, '78. Page 9529.

AIR POLLUTION

EPA sets forth attainment status of States in relation to national ambient air quality standards. Fed'l Reg. Fri. March 3, '78. Page 8962.

CLEAN AIR ACT

EPA announces workshop meetings on 2-17, 3-17, 4-14, and 5-12-78 to discuss development of a regulation to provide for consistent implementation by the various regional offices. Fed'l Reg. Mon. Feb. 6, '78. Page 4872.

CONTROL OF AIR POLLUTION FROM NEW MOTOR VEHICLES AND ENGINES

EPA clarifies and changes its Selective Enforcement Auditing regulations and revises the vehicle exhaust emission test procedures for 1978 and later model years; effective 2-2-78 (Part II of this issue) (2 documents). Fed'l Reg. Thurs. Feb. 2, '78. Pages 4552,4553.

AIR QUALITY DETERIORATION

EPA extends comment period to 1-31-78 on proposal and conference. Fed'l Reg. Fri. Dec. 23,'78 Page 64427.

AIR POLLUTION

EPA designates three methods for measuring concentrations of NO_2 in the air. Fed'l Reg. Wed. Dec. 14,'77. Page 62970.

EPA proposes requirements for the implementation of the national ambient air quality standards for lead, and schedules a public hearing for 1-17-78; comments by 2-17-78 (Part V of this issue) (2 documents). Fed'l Reg. Wed. Dec. 14, '77.

AIR PROGRAMS

EPA modifies proposed regulations for prevention of significant air quality deterioration and announces hearing date of 1-9-78. Fed'l Reg. Thurs. Dec. 8, '77. Page 62020

RECREATION ON PUBLIC LANDS

Interior/BLM establishes permit and fee system; effective 3-27-77 (Part III of this issue). Fed'l Reg. Fri. Feb. 24, '78. Page 7868.

AIR POLLUTION

Interior/NPS issues notice of final identification of Mandatory Class I Federal areas where visibility is an important value and responds to public comments on preliminary findings of task force. Fed'l Reg. Fri. Feb. 24, '78. Page 7721.

IMPORTANT FARMLANDS INVENTORY

USDA/SCS prescribes general guidelines for a national program of inventorying prime and unique farmland; effective 1-31-78. Fed'l Reg. Tues. Jan. 31, '78. Page 4030.

WATERSHED PROJECTS

USDA/SCS adds procedures to deauthorize projects which have been dormant for eight years; effective 2-7-78. Fed'l Reg. Tues. Jan. 31, '78. Page 4029.

COASTAL ZONE MANAGEMENT

Commerce/NOAA publishes interim final regulations on development and approval of programs; effective 4-1-78 (Part II of this issue). Fed'l Reg. Wed. March 1, '78. Page 8373.

WATER MANAGEMENT

USDA/SCS issues final guidelines for use of channel modification; effective 3-1-78. Fed'l Reg. Wed. March 1, '78. Page 8252.

SOLID WASTE MANAGEMENT

EPA issues interim guidelines for public participation; comments by 12-13-78 (Part III of this issue). Fed'l Reg. Thurs. Jan. 12, '78. Page 1902.

NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM

EPA proposes revision of regulation; comments by 2-6-78 (Part IV of this issue). Fed'l Reg. Fri. Jan. 6, '78. Page 1256.

NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM

EPA proposes regulations which would indicate that the amounts of pollutants in any existing discharge would be incorporated as NPDES permit limitations unless otherwise modified in the permit. Fed'l Reg. Fri. Dec. 30, '77. Page 65209.

POLLUTION CONTROL FACILITIES

EPA revises certification regulations to conform to internal Revenue Code provisions; effective 1-9-78. Fed'l Reg. Mon. Jan. 9, '78. Page 1339.

ENVIRONMENTAL IMPACT

CEQ issues memorandum to Heads of all Agencies on interim guidance to Federal agencies on referrals to the Council of proposed Federal actions found to be environmentally unsatisfactory. Fed'l Reg. Thurs. Dec. 1, '77. Page 61066

PRESIDENT'S REORGANIZATION PROJECT

OMB solicits comments by 1-14-78 on reorganization study of natural resources and environmental functions. Fed'l Reg. Mon. Dec. 19, '77. Page 63665.

NATIONAL ENVIRONMENTAL POLICY ACT OF 1969

USDA/FS requests comments by 12-29-77 on revised implementation guidelines. Fed'l Reg. Tues. Nov. 29, '77. Page 60769.

EMERGENCY ENERGY CONSERVATION PROGRAM

CSA proposes substantive changes to its policy statement; comments by 12-27-77 (Part V of this issue). Fed'l Reg. Fri. Nov. 25, '77. Page 60432.

CENTRAL AIR CONDITIONERS

DOE prescribes final energy conservation test procedures; effective 1-1-78. Fed'l Reg. Fri. Nov. 25, '77. Page 60150.

FEDERAL LAND POLICY AND MANAGEMENT

USDA/FS implements the National Forest townsite provisions in eleven Western States and Alaska; effective 2-10-78. Fed'l Reg. Fri. Feb. 10, '78. Page 5821.

FLOOD PLAIN MANAGEMENT

Water Resources Council issues implementation guidelines (Part VI of this issue). Fed'l Reg. Fri Feb. 10, '78, Page 6030.

RURAL DEVELOPMENT

USDA/FmHA proposes regulations on Area Development Assistance Grants for comprehensive planning; comments by 3-10-78 (Part III of this issue). Fed'l Reg. Wed. Feb. 8, '78. Page 5488.

STATE WATER STANDARDS

EPA issues interim rule on State authority to assess penalties for vilation; effective 2-8-78. Fed'l Reg. Wed. Feb. 8, '78. Page 5372.

EPA proposes amendment to State Public Water System Supervision Program Grant regulations; comments by 4-10-78. Fed'l Reg. Wed. Feb. 8, '78. Page 5390.

ISSUE STATUS

Western Conference

Reno

March 20, 1978

As an aid in determining the evolving status of on-going issues that affect attendees to the Western Conference, Reno, attached is a culling of selected news articles that have appeared in the Environmental Reporter during the past three months.

We hope you find this information of service in alerting you to issues of particular importance to your association's membership.

James A. Cook

HOUSE RULES COMMITTEE CLEARS OCS BILL FOR FLOOR ACTION AFTER MONTHS OF DELAY

The House of Representatives is expected to vote soon on the outer continental shelf bill (HR 1614).

Action on the bill had been delayed for several months because of an October 25 decision by the Rules Committee to defer action on the OCS measure until 1978. The committee January 23 cleared the way for a vote by the House.

Despite support from the Carter Administration and House Speaker Thomas P. O'Neill (D-Mass) for early action on HR 1614, the committee had voted 10-to-5 in October to shelve the bill.

The committee action to defer the measure followed intense lobbying efforts by the oil industry, which says the measure would slow development of offshore oil and gas.

The Senate passed an OCS bill (S 9) by an overwhelming margin of 60 to 19 on July 15. The House Select Committee on the OCS approved a measure July 27 and sent it to the full House for consideration.

Proposed changes contained in HR 1614 would be the first revision to statutes pertaining to federal oil leases on the outer continental shelf in nearly 25 years. In addition to the President and O'Neill, the measure is supported by environmentalists and most coastal states.

Sponsored by Congressman John Murphy (D-NY), chairman of the House Ad Hoc Select OCS Committee, HR 1614 would require the Interior Secretary to prepare an offshore leasing program covering the next five years. States and local governments would have a voice in the plan. Bids for at least half the leases would have to use some alternative to the long time system of bonus bids, which favors companies that have large amount of front-end capital.

Backers of HR 1614 say prompt action is needed because of a scheduled January 31 sale of oil and gas tracts off the New England coast.

Two Rules Committee members who previously had voted against the bill reversed their votes. Congressmen B.F. Sisk (D-Calif) and Morgan Murphy (D-Ill) provided the necessary margin to get the measure to the House floor.

Sisk said he still has doubts about the bill. But he said he feels the measure should go to the floor for full consideration.

Congressman John Young (D-Tex), an opponent of the bill, said HR 1614 "will not raise one Btu of energy. It is designed strictly as an environmental-type bill that will thwart the effort to produce oil and gas off the New England and Eastern Seaboard."

Two congressmen are expected to offer substitutes to HR 1614 when the bill reaches the floor.

Breaux Substitute

A substitute to be offered by Congressman John B. Breaux (D-La) would allow the Interior Secretary to use his discretion in requiring experimental bidding systems on OCS leases.

The Breaux substitute would prohibit the Secretary from using the experimental bidding systems on more than 50 percent of the leases.

Breaux has said that requiring the Secretary to use experimental bidding systems would cost the Federal Government $375 million in lost revenue.

The experimental bidding system would lead to federal involvement in development and exploration of the OCS, Breaux has said, and thus create more bureaucracy. "I don't think we need the Federal Government participating in the process," according to Breaux.

The Breaux substitute would authorize the Secretary to conduct geological and geophysical explorations on the OCS and to contract for oil and gas explorations. HR 1614, however, would prohibit the Secretary from taking such action.

Minority Substitute

A minority substitute, to be offered by Congressman Hamilton Fish, Jr. (R-NY), would require Interior to use alternative bidding systems on at least 10 percent of the OCS leases. The Secretary, however, would be prevented from using experimental bidding on more than 30 percent of the leases.

National Environmental Policy Act provisions in HR 1614 would be left intact, and the Fish substitute would require drilling operations to use the best and safest technology to protect the environment.

The Fish substitute would delete any reference to an oil spill pollution fund because this issue will be taken up by the House Merchant Marine Committee in a measure (HR 6803) pending before the committee.

By eliminating this provision and other "useless verbiage," the Fish substitute would cut HR 1614 in half, according to a minority aide to the OCS committee.

The Fish substitute also would eliminate Section 31 from HR 1614. Section 31 deals with documentation, registry, and manning requirements for vessels and structures. The section would require use of domestic or permanent resident alien crews on vessels, vehicles, or structures conducting OCS activities.

AIR BOARD ADOPTS MODEL RULE TO REDUCE LIGHTERING EMISSIONS

The California Air Resources Board has approved a model rule to control hydrocarbon and sulfur oxide emissions from petroleum lightering operations and ordered all 11 California coastal air pollution control districts to adopt either the model or similar regulations.

The board has given the districts until March 8, with possible time extensions, to adopt lightering rules based on the model. If the districts do not adopt similar rules by that date, the board will establish lightering rules for the districts. If the board succeeds in enforcing these controls, it could be a national precedent.

Lightering is a procedure in which petroleum-carrying supertankers, too large to enter California ports, are unloaded by smaller vessels that travel between the supertankers and the refinery ports. The process, which transfers large amounts of oil from one vessel's cargo tanks to another, pushes out gas fumes accumulated inside the cargo holds from previous trips.

The air board says these emissions are a major source of air pollution in Southern California. The board estimates that 16,400 pounds per day of hydrocarbon gases, with a potential daily maximum of 71,300 pounds, are released in the air from petroleum lightering operations.

In addition, combustion from the ship engines also contributes significant amounts of pollutants, the board says. It estimates that 22,500 pounds per day of sulfur oxides, 3,000 pounds per day of nitrogen oxides, and 1,000 pounds per day of particulates are released from ship engine combustion.

At present, Chevron USA, Shell Oil Company, and Coastal States Corporation conduct California's largest lightering operations, with approximately nine supertankers unloading per month off the coast of San Clemente Island.

Model Rule

The model rule is one of the first attempts by the state to regulate air pollution from sources outside its territorial boundaries and the first to apply to all ships.

The model rule requires that hydrocarbon emissions during loading of each 1,000 gallons of organic liquids be reduced 80 percent by March 1, 1978, and 95 percent by 1980. This reduction can be achieved by:

- Requiring the tank owner or operator to wash the holding tanks so the organic vapors do not exceed 0.5 percent by volume immediately before lightering into tanks, and short-loading a lighter so the organic liquid in the tank is at least 10 feet below deck level; or
- Using alternative emission control practices or equipment, such as mechanical vapor recovery systems.

Emissions of sulfur compounds would be reduced by requiring lighters to burn fuel with a sulfur content of no more than 0.5 percent by weight while in California waters.

The model rule would require final compliance by July 1, 1980.

Coast Guard Expresses Concern

The U.S. Coast Guard has expressed several concerns over the model rule. It says aspects needing more consideration include:

- Potential safety risks, i.e., increased risk of explosions, oil spills from washing the tanks, reduced ship stability, and adverse structural effects from installation of mechanical vapor recovery systems;
- The need or justification for such a rule; and,
- Whether the state can exert jurisdiction over such a rule.

The Coast Guard is responsible for certifying the safety of any pollution devices used by seagoing vessels. A Coast Guard official told Environment Reporter that although the rule is meant to be technology-forcing, no approved mechanical vapor recovery systems now exist for ships. Coast Guard officials estimate that development of an acceptable system could take from three to five years.

Coast Guard and oil industry officials also contend that the state's attempt to regulate in the lightering zone — 65 miles at sea — violates the U.S. Constitution and international agreements.

"Restrictions in the recognized right of freedom of navigation should not be imposed lightly for they carry international in addition to state and national implications," said Coast Guard Commander Jonathan Ide of the 11th Coast Guard District in Long Beach.

Because of the Coast Guard's concerns over the model rule, the California agency is considering making "minor" changes to the rule, an Air Board spokesman told Environment Reporter January 23.

He said that although none of the districts has adopted lightering rules yet, they are now in the process of doing so.

The Air Resources Board plans to meet February 23 to discuss the progress of the coastal districts in adopting lightering rules.

The board says, "It is critical to the oil transportation industry that lightering rules which are consistent be adopted throughout the state."

Board officials say the rule was adopted in an atmosphere of legal uncertainty, and they say the issue eventually may be settled in the courts.

UDALL REJECTS REQUEST FOR EXTENSION OF STRIP MINING REGULATIONS DEADLINES

Congressman Morris Udall (D-Ariz) says he will not ask Congress to extend the February 4 and May 4 deadlines for compliance with interim surface mining regulations despite pleas from coal industry and state reclamation officials for an extension.

State and coal industry officials said at oversight hearings held by the House Subcommittee on Energy and the Environment January 19 and 20 that they do not have enough time to comply with the interim program of the Surface Mining Control and Reclamation Act of 1977.

Walter Heine, director of the Interior Department's Office of Surface Mining, and environmentalists urged Udall to reject the extension request. Their input was a crucial factor in Udall's decision to let the issue drop.

"I thought they would all be able to agree to extend compliance deadlines for 90 days," Subcommittee Chairman Udall said January 24. "But the environmentalists were opposed to it, and it would have taken at least 90 days to pass legislation. I'm not going to go after an extension."

State reclamation officials said the lack of federal grants accounts for the states' inability to carry out the interim regulations.

The Office of Surface Mining's fiscal 1978 budget request still is tied up in Congress, making it impossible for federal officials to disburse funds to the states.

Heine said extending the compliance deadlines would create additional confusion, and he said such action assumes that federal officials will be inflexible in applying and enforcing the Act's provisions.

Industry, Environmentalist Differences

Coal industry officials gave the following reasons for their extension request:

- Their inability to comply with the regulations because of a lack of federal technical assistance, bad weather, strikes, and the delay in promulgation of the regulations;
- The inability of federal regulators to enforce the interim program because of the personnel shortage resulting from the lack of a congressionally approved budget.

The Surface Mining Act requires operators of new surface mines to comply with an interim program by February 4, and operators of existing mines must bring their facilities into compliance by May 4. Small operators have until January 1, 1979, to meet the provisions of the interim program.

Karl Englund, director of the Environmental Policy Institute's citizen coal project, said: "Anyone opening a new mine after February 4 has known since August 4 that his operation would have to meet the limited requirements of the interim program on February 4."

Englund said "there is no rational reason why an operator opening a mine on February 5 would want to construct haul roads, sediment ponds, and valley fills in a manner that would violate the standards with which he must comply in 90 days."

The industry's second argument — the lack of personnel in the surface mining office — also does not justify extending compliance deadlines, Englund said.

Although the staff shortage will result in a lack of inspections "the Act assumes that operators will make a good faith attempt to comply with or without the existence of an inspector force," he said.

Operators still can request technical assistance from state regulators, Englund added. "Moreover, the Office of Surface Mining will be increasing its staff and field personnel in February and March," he said.

Likewise, Englund said that extending the May 4 deadline for operators of existing mines makes little sense. "Operators argue that weather and the strike have prevented them from working on their mines in order to bring them into compliance by May 4," Englund said. "We assume their concerns are with pre-existing or nonconforming structures, such as settling ponds and haul roads now in use which do not comply with surface mining regulations but which must comply by May 4, 1978."

Englund said the law provides for exemptions of such structures on a case-by-case basis. "There is no reason to allow those operators who can comply to be exempted, which is what an across-the-board delay would do," Englund said.

Further Industry Concerns

Industry officials also said the regulations issued by the Interior Department exceed the requirements of the Act.

Representatives of the National Coal Association and American Mining Congress said the regulations' prime farmland and blasting provisions establish "unrealistic performance standards."

Buddy Beach, manager of Consolidation Coal Company's environmental impact reports, criticized the rule requiring mine operators to design sedimentation ponds for drainage of mined areas.

"A pond of this size is not only environmentally disruptive," Beach said, "but in steep mountain areas it would require massive dams where no flat land is available."

Congressman James Santini (D-Nevada) attacked the surface mining office's promulgation of the regulations:

"I find it astonishing that the Office of Surface Mining finds it necessary to promulgate 400 pages of regulations," Santini said. "They should not be permitted to make industry and the states spin their wheels to achieve unreasonable goals."

Santini joined industry and state officials in calling for delay in the compliance date.

Land Use

ANDRUS PRESENTS ADMINISTRATION PLAN FOR ALASKA LANDS TO SENATE COMMITTEE

Secretary of the Interior Cecil D. Andrus January 19 presented the Carter Administration's plan to designate 92 million acres of federal lands in Alaska for parks, wildlife refuges, wild and scenic rivers, and national forests.

"Through enactment of our proposals, we can be certain that the crown jewels of Alaska — its most spectacular natural environments, recreation areas, and wildlife habitats — will remain intact for the benefit of our nation's citizens," Andrus told the Senate Committee on Energy and Natural Resources.

The committee is considering four bills — S 499, S1500, S1787, and S1546 — to designate 83.47 million acres, 114.7 million, acres 25.2 million acres, and Admiralty Island, respectively, as a unit of the National Park System.

The Administration's proposed amendment to include 92 million acres in the four systems is designed to protect whole watersheds and ecosystems, Andrus said, while also allowing resource exploration and development wherever possible.

Designated Wilderness Areas

The 92 million acres included in the Administration proposal would establish 10 new units and expand three existing units of national parks (41.7 million acres); nine new units and expand five units in wildlife refuges (45.1 million acres); add 33 rivers to wildlife and scenic rivers (2.3 million acres); and add 3 million acres to national forests.

In addition, the Administration proposed to create 43.3 million acres of "instant wildreness," mostly in areas already designated as national parks or wildlife refuges. One controversial wilderness designation would apply to the 8.9 million-acre Arctic Wildlife Refuge, which is rich in oil and gas reserves, but also is a haven for caribou, waterfowl, bears, seals, and other wildlife.

Andrus said the Administration plan would leave plenty of Alaska' 375 million acres open to development. The state would receive more than 103 million acres, much of which will be open to development, he said.

"The natives are receiving more than 44 million acres, some of which will be developed." An additional 100 million acres will remain outside the four systems to be available for mining, timber harvesting, hunting, fishing, and other uses for the benefit of Alaska and the U.S., Andrus said.

Energy Concerns Raised

Chairman Henry M. Jackson (D-Wash) of the Senate Committee on Energy and Natural Resources asked Andrus how much of the oil and gas reserves would be made inaccessible by the Administration's proposal.

In response, Andrus said there are 145 million acres of sedimentary oil and gas basins in Alaska, of which 105 million acres or 70 percent of these basins are not included in the proposal.

Andrus added that 1.8 million acres of proven high oil and gas reserves are included in the Arctic Wildlife Refuge, which has been proposed for wilderness designation. He said this area is very sensitive and fragile and "should be the last spot we extract." Many of these areas can be "given back to exposure for development," he added.

Senator Ted Stevens (R-Alaska) said he is quite disturbed about a briefing book distributed to agencies and assessing the mineral potential of the Alaskan lands. According to Stevens, the information did not appear to have been provided to the Office of Management and Budget and there appeared to be a lot of inaccuracies in the data.

Stevens said the total mineral assessment data should be made available, and he said Interior's briefing book should be corrected to reflect the true mineral potential in Alaska.

House Subcommittee Markup

While Andrus presented the Administration's plan to the Senate Committee on Energy and Natural Resources, the House Interior oversight and Alaska lands subcommittee began final consideration of a revised version of HR 39, which would set aside 102 million acres of Alaskan land for parks, wildlife refuges, wild and scenic rivers and national forests.

The original bill proposed to set aside 116 million acres in the four protection systems (Current Developments, September 23, 1977, p. 784).

Enforcement

CARTER ADMINISTRATION WEIGHS MEASURE TO BOLSTER FEDERAL FACILITY COMPLIANCE

The Carter Administration is considering a new executive order which, combined with the $516 million requested for federal agency cleanup in the fiscal 1979 budget, would bolster federal compliance with enviornmental statutes, according to an Administration source.

No decision has been made to issue the order, the source told Environment Reporter January 25, but the current draft will undergo interagency review nonetheless once the Office of Management and Budget, which is developing the policy along with the Environmental Protection Agency, finishes work on it.

If issued, the order would replace Executive Order 11752 signed by then President Nixon in 1973. That order calls for compliance, but it does not promise the necessary cleanup funds (Environment Reporter — Federal Laws 71:0201). Federal facilities traditionally have cited insufficient funding as a key reason for their inability to comply with environmental requirements.

According to the Carter Administration source, the order under review "makes a very strong commitment that federal facilities are going to meet the requirements of the various environmental statutes, provides a mechanism so that sufficient funds are in the budget to meet the requirements, and where there's a difference between EPA and the agency" being regulated, provides "a mechanism for resolving it very fast."

EPA Deputy Administrator Barbara Blum, in kicking off the Administration's cleanup campaign aganist federal facilities, had said OMB had promised support for money to get the job done (Current Developments, October 28, 1977, p. 964; December 9, 1977, p. 1174). With that commitment, she said EPA would sue if necessary to get federal facilities to clean up.

OMB apparently made good its earlier commitment, approving a $105 million increase in proposed budget authority for pollution control from federal facilities.

The new order would go a step futher and establish a mechanism for providing funds beyond the $516 million for pollution control, according to the Administration source.

He said OMB might look elsewhere in an agency's budget for additional funds to pay for more costly controls required by EPA or to handle increased cost estimates.

He said the process for resolving disputes over pollution control requirements would involve first a meeting between EPA and the regulated agency and then, if necessary, a negotiating session with OMB. Asked what would happen if there were further disagreement, he said "there won't be."

He said the order under consideration "recognizes EPA as the official agency overseeing the process and having the authority to bring noncompliance cases to the director of OMB immediately."

He described EPA's potential litigation against noncomplying federal facilities as "an extremely last resort."

The draft order does not change any residual legal authority EPA has to sue federal facilities, he said, but "it's an extremely remote possibility that they'd use it, given the provision of funds."

SOUTHERN CALIFORNIA AIR DISTRICT OUTLINES CONDITIONS FOR SOHIO'S OIL TANKER FACILITIES

LOS ANGELES — (By an Environment Reporter staff correspondent) — Permit conditions including a trade-off policy for new source review of proposed supertanker facilities in the Port of Long Beach were approved by the South Coast Air Quality Management District January 17.

The facilities would be used for transporting oil from the Alyeska pipeline in Alaska to eastern markets.

The action marks the end of the first phase of hearings which began in July 1977. Phase two will begin once Sohio Transportation Company decides whether to accept the provisions and proceed with plans to build the two-berth, 500,000 barrel-per-day oil terminal.

During phase two, the company would present details of its trade-off proposals. Any final permit decision by the air quality district must be approved by the California Air Resources Board and the Environmental Protection Agency.

Under permit conditions approved January 17, the emissions chargeable to the Sohio project would be determined at two levels, the 97th percentile operational mode or the maximum operational level (MOL) and the total annual emissions. For sulfur oxides, the MOL would be 5,108 pounds per day and the total annual emissions would be 1.2 million pounds per year; for nitrogen oxides, 5,884 pounds per day and 1.3 million pounds per year; for particulate matter, 791 pounds per day and 200,000 pounds per year; and for organics, 1250 pounds per day and 310,000 pounds per year.

In explaining its recommendation prior to adoption, the technical committee said the Project Benefit Ratio is the total annual emissions reductions obtained through trade-offs divided by the total annual project emissions for each pollutant.

For example, for a Project Benefit Ratio of two, the required annual trade-offs would equal twice the annual project emissions. This would result in a net emissions reduction or benefit within the district equal to project emissions.

According to the technical committee, the safety factor will ensure that no degradation in air quality will occur during times of maximum operating levels by requiring daily trade-offs to exceed the 97th percentile emissions by a factor of 1.2 or greater. "For purposes of adding a safety factor, we define the MOL to be the maximum day of the month (97th percentile)," the committee said.

The Project Benefit Ratio for the Sohio project was set at two to one for sulfur oxides, nitrogen oxides, and particulate matter, and 7.2 to one for organics. The safety factor was set at 1.2 to one for all of the pollutants.

In approving the 7.2 to one ratio for organics, the local air board disregarded the advice of its staff and technical committee which had recommended five to one for organics. In approving the more stringent ratio, the board noted that it will apply to hydrocarbons, a major component of photochemical smog which presents the most serious health threat in Southern California.

Operating restrictions adopted by the air district would prohibit tankers visiting the SOHIO terminal from doing any of the following while in the coastal waters:

- Take ballast water into cargo tanks or perform any other ballasting operation that would result in the release of hydrocarbon vapors to the atmosphere;
- Purge, gas-free, or otherwise deliberately expell vapors from cargo tanks, except as necessary to operate the inert gas system, unless the permittees can demonstrate that there will be no emissions of hydrocarbon vapors as a result of the above activities;
- Burn bunker fuel having a sulfur content of more than 0.25 percent by weight.
- Transfer any portion of its cargo to any vessel, including a barge;
- Load cargo (not including the tanker's own bunker fuel and provisions and supplies);
- Open ullage hatches on cargo tanks except that gauging of tanks shall be in accordance with 46 C.F.R. Section 32.20-20 on tankers subject to that regulation;
- Set pressure vent valves on cargo tanks at a pressure differential of less than 1.5 pounds per square inch;
- Wash cargo tanks.
- Engage in maintenance, repair, or inspection of cargo tanks that could result in the escape of hydrocarbon vapors; and
- Engage in cargo unloading, internal transfers of oil, or bunkering until an oil spill boom has been properly deployed.

The local air board also voted that the maximum total capacity of tankers at berth for unloading at any one time will be limited to 330,000 dead weight tons.

The unloading rate could not exceed 240,000 barrels per hour, and the amount of crude oil unloaded in any one year could not exceed 182.5 million barrels per year.

At the suggestion of the technical committee, the board voted to postpone adoption of enforcement and monitoring provisions until phase two. The committee felt that the staff should work with EPA, the state, Sohio, and other interested parties and agencies to obtain "concurrence" in other necessary conditions so that one set of permit conditions would be issued.

Trade-off Candidates

In its brief dated January 6, the air district staff said that Sohio submitted a tentative listing of possible trade-off candidates, and the staff's preliminary analysis indicated that the following may qualify as viable trade-off candidates:

- Five-stage lime scrubber on Southern California Edison Alamitos power plant;
- Control of organic emissions from dry cleaners;
- Co-generation of electricity,
- Control of glass plant emissions;
- Control of NOx emissions from natural gas-fired stationary internal combustion engines; and
- Fuel switching.

EPA ADOPTS POLICY INVOLVING PUBLIC IN DEVELOPING WASTE MANAGEMENT PROGRAMS

The Environmental Protection Agency January 12 (43 FR 1902) adopted interim guidelines (40 CFR 249) for public involvement in the development of solid waste management programs.

The guidelines apply to EPA offices, federal agencies carrying out provisions of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act. They apply also to states and municipalities receiving federal funds under the Act, and they require:

- A summary report of public participation efforts conducted by EPA and states and municipalities receiving federal funds under the Act;
- Inclusion of a section on public participation in future regulations issued by EPA under the Act; and
- Inclusion of a public participation program in EPA grant regulations related to solid waste management grants.

Use of the guidelines is a condition of performance by states and local governments receiving federal money under the Act, EPA said. Failure to comply with the guidelines may subject recipients of federal funds and the EPA administrator to citizen lawsuits.

The Act requires the EPA administrator to maintain a central reference library housing information on nine key areas of solid waste management. Those materials are to be available to states, municipalities, and interested persons.

The EPA administrator also must disseminate information on solid and hazardous waste management and resource conservation.

EPA defines public participation as public meetings, workshops, and conferences, distribution of reference materials related to solid waste, and opportunity for individuals and groups to comment on regulations and guidelines prior to their promulgation.

Some comments submitted to EPA on the public participation guidelines had suggested full or partial reimbursement of costs for participation by individuals and groups.

Several individuals claimed that public participation in administrative proceedings carries a heavy financial burden. EPA officials agreed that a reimbursement program deserves serious consideration.

Others recommended that a set percentage of a solid waste management project's budget should be allocated and earmarked specifically for public participation.

EPA officials said determining the public participation needs of states and municipalities must be done on a case-by-case basis.

Comments on the guidelines may be submitted before February 14 to the deputy Assistant Administrator of Solid Waste, EPA, Washington, D.C. 20460.

EPA'S SOLID WASTE MANAGEMENT PROGRAM COMES UNDER FIRE FROM STATE OFFICIALS

National Governors Association representatives January 19 criticized the Environmental Protection Agency's draft strategy for carrying out national solid waste management program.

Texas Health Department official Wally Osborne said the strategy represents a major shift in EPA positions on the Resource Conservation and Recovery Act of 1976.

"The draft fails to recognize individual state requirements," Osborne said (Current Developments, December 23, p. 1315). "It does away with state autonomy and clearly circumvents the intent of the Act."

Osborne and other state officials repeatedly said the key to a successful solid waste program is direct financial assistance to state, regional, and local governments.

The absence of funding in the Act was viewed as the greatest single impediment to progress in solid waste management efforts.

David J. Damiano, commissioner of Philadelphia's Department of Streets, told EPA officials: "Incentives to local governments to stimulate implementation of RCRA should take the form of direct financial assistance since our cities are financially unable to implement high capital cost resource recovery facilities."

Damiano called on federal officials to provide guidance and assistance in efforts to overcome public opposition to the national solid waste management program.

Damiano criticized EPA's emphasis on hazardous and toxic waste: "Turning to resource recovery or hazardous and toxic wastes before providing needed relief for the overall solid waste problem is a luxury we cannot afford."

The agency's draft strategy provided grants for conversion or construction of solid waste disposal facilities in rural communities with low populations and high levels of waste generation.

Damiano urged EPA to give priority to urban areas and called the rural emphasis "a mix-up of priorities. There is no valid reason for discrimination against cities in favor of rural communities," Damiano said.

EPA's draft strategy drew criticism also from industry representatives.

Arthur Handley, solid waste programs consultant for Malcolm Pirnie Inc., White Plains, N.Y., said the strategy delays resource recovery implementation by failing to acknowledge existing recovery technologies.

"The statement's failure to acknowledge that recovery implementation can take place now could decrease the momentum of many projects which are in the design stage and could deter others from proceeding," Handley said.

Thomas Conry, project coordinator of Technical Information Project, said EPA should provide hazardous waste recycling incentives.

Additionally, Conry recommended that EPA emphasize the following:

- Monitoring of hazardous waste composition, including analysis of selected wastes for their complete chemical composition,
- Public participation and education regarding hazardous wastes; and
- Establishment of adequate and convenient hazardous waste disposal facilities.

Air Pollution

EPA REVISES STRATEGY FOR ENFORCING DELAYED COMPLIANCE ORDER PROVISIONS

The Environmental Protection Agency January 16 revised its strategy for enforcing delayed compliance order provisions of the Clean Air Act Amendments of 1977.

The changes affect the federal role in granting or reviewing cleanup deadline extensions for stationary sources by:

- Subjecting federal issuance of delayed compliance orders (DCO's) and federal approval or disapproval of state-issued DCO's to informal rulemaking procedures of the Administrative Procedures Act;
- Limiting EPA approval or disapproval of state-issued DCO's to criteria in Section 113(d), thereby excluding a good faith test;
- Prohibiting EPA from disapproving state-issued DCO's on the basis that they fail to waive certain rights to seek judicial review.

The revisions are reflected in a January 16 memorandum to the regions from Marvin B Durning, EPA assistant administrator for enforcement. The memorandum is published in the Full Text section of this issue.

It modifies the second version of the agency's enforcement strategy which, although draft, is current policy until the final version is issued (Current Developments, December 2, 1977, p. 1132). The final enforcement strategy is expected early in February.

'Additional Resource Burden'

The memorandum says the informal rulemaking requirements impose "an additional resource burden upon the EPA regional offices and EPA headquarters," and it promises detailed procedural guidance to reduce the impact.

In issuing a DCO, EPA is to use the Federal Register to give notice of the proposed order, solicit public comment, and provide opportunity for a public hearing.

EPA is to follow similar procedures in acting on state-issued DCO's, except that it is not required to provide an opportunity for a public hearing. The state is to have provided that opportunity earlier. Failure to do so is grounds for EPA disapproval of the order.

Approach to Recalictrance

According to the memorandum, EPA will not issue DCO's to sources that have an egregious history of noncompliance and recalictrance, have serious violations, and/or are likely candidates for civil or criminal penalties.

As a result of this approach, it says, "there will be no category of cases involving a federally issued DCO and a federal court action relating to the pre-DCO period."

EPA encourages states to follow a policy similar to its own but, the memorandum says, the agency cannot base approval or disapproval of state-issued DCO's on failure to follow suit. Criteria in Section 113(d) is to govern federal review.

However, the memorandum says, "a DCO does not insulate a source from initiation of an action to collect civil or criminal penalties for violations which occurred during periods in which the order was not in effect (i.e., the period of violation prior to the DCO period)."

It says EPA will pursue judicially imposed penalties for this period as well as for later noncompliance in cases where the state acted differently than EPA would have done, considering the source's recalcitrance and the seriousness of the violation.

EPA ISSUES FURTHER GUIDANCE ON AMBIENT AIR STANDARDS ATTAINMENT

Six U.S. cities must be classified as photochemical oxidant nonattainment areas under the Clean Air Act becaue of their size, even though no data exist to support either an attainment or nonattainment designation, a January 3 memorandum to regional administrators of the Environmental Protection Agency says.

The memorandum, written by David G. Hawkins, EPA assistant administrator for air and waste management, is to "provide additional guidance on the attainment/nontainment area designations relative to Section 107 of the Clean Air Act." The memorandum is published in the Full Text section of this issue.

Earlier Guidance

The January 3 memorandum does not differ substantially from earlier attainment/nonattainment guidance circulated by Hawkins on October 7, 1977 (Current Developments, October 14, 1977, p. 902). The October document said any urban areas over 200,000 in the U.S. should be presumed in violation of the ambient air quality standard for photochemical oxidants in the absence of data showing attainment.

According to the most recent Hawkins memo, at least six U.S. cities for which data are not available should be presumed in violation: Aurora-Elgin, Ill. (population 233,000); Fort Wayne, Ind. (population 226,000); Lansing, Mich. (population 230,000); Charleston, S.C. (population 228,000); and Columbus, Ga. (population 208,000).

Another 99 cities of more than 200,000 population have submitted oxident data, Hawkins said. The Clean Air Act requires EPA to issue lists of attainment and nonattainment areas by February 3, 1978.

Populous Areas Top Priority

Although the attainment/nonattainment designation requirement applies also to smaller urban areas, the Hawkins memorandum says, "significant resources should not be devoted by EPA to designation activities for areas less than 200,000 in population.

"Areas designated as attainment or unclassified will be controlled by prevention of significant deterioration (PSD) review," the memorandum says.

EPA REVISES STRATEGY FOR ENFORCING DELAYED COMPLIANCE ORDER PROVISIONS

The Environmental Protection Agency January 16 revised its strategy for enforcing delayed compliance order provisions of the Clean Air Act Amendments of 1977.

The changes affect the federal role in granting or reviewing cleanup deadline extensions for stationary sources by:

- Subjecting federal issuance of delayed compliance orders (DCO's) and federal approval or disapproval of state-issued DCO's to informal rulemaking procedures of the Administrative Procedures Act;
- Limiting EPA approval or disapproval of state-issued DCO's to criteria in Section 113(d), thereby excluding a good faith test;
- Prohibiting EPA from disapproving state-issued DCO's on the basis that they fail to waive certain rights to seek judicial review.

The revisions are reflected in a January 16 memorandum to the regions from Marvin B Durning, EPA assistant administrator for enforcement. The memorandum is published in the Full Text section of this issue.

It modifies the second version of the agency's enforcement strategy which, although draft, is current policy until the final version is issued (Current Developments, December 2, 1977, p. 1132). The final enforcement strategy is expected early in February.

'Additional Resource Burden'

The memorandum says the informal rulemaking requirements impose "an additional resource burden upon the EPA regional offices and EPA headquarters," and it promises detailed procedural guidance to reduce the impact.

In issuing a DCO, EPA is to use the Federal Register to give notice of the proposed order, solicit public comment, and provide opportunity for a public hearing.

EPA is to follow similar procedures in acting on state-issued DCO's, except that it is not required to provide an opportunity for a public hearing. The state is to have provided that opportunity earlier. Failure to do so is grounds for EPA disapproval of the order.

Approach to Recalictrance

According to the memorandum, EPA will not issue DCO's to sources that have an egregious history of noncompliance and recalictrance, have serious violations, and/or are likely candidates for civil or criminal penalties.

As a result of this approach, it says, "there will be no category of cases involving a federally issued DCO and a federal court action relating to the pre-DCO period."

EPA encourages states to follow a policy similar to its own but, the memorandum says, the agency cannot base approval or disapproval of state-issued DCO's on failure to follow suit. Criteria in Section 113(d) is to govern federal review.

However, the memorandum says, "a DCO does not insulate a source from initiation of an action to collect civil or criminal penalties for violations which occurred during periods in which the order was not in effect (i.e., the period of violation prior to the DCO period)."

It says EPA will pursue judicially imposed penalties for this period as well as for later noncompliance in cases where the state acted differently than EPA would have done, considering the source's recalcitrance and the seriousness of the violation.

EPA ISSUES FURTHER GUIDANCE ON AMBIENT AIR STANDARDS ATTAINMENT

Six U.S. cities must be classified as photochemical oxidant nonattainment areas under the Clean Air Act becaue of their size, even though no data exist to support either an attainment or nonattainment designation, a January 3 memorandum to regional administrators of the Environmental Protection Agency says.

The memorandum, written by David G. Hawkins, EPA assistant administrator for air and waste management, is to "provide additional guidance on the attainment/nontainment area designations relative to Section 107 of the Clean Air Act." The memorandum is published in the Full Text section of this issue.

Earlier Guidance

The January 3 memorandum does not differ substantially from earlier attainment/nonattainment guidance circulated by Hawkins on October 7, 1977 (Current Developments, October 14, 1977, p. 902). The October document said any urban areas over 200,000 in the U.S. should be presumed in violation of the ambient air quality standard for photochemical oxidants in the absence of data showing attainment.

According to the most recent Hawkins memo, at least six U.S. cities for which data are not available should be presumed in violation: Aurora-Elgin, Ill. (population 233,000); Fort Wayne, Ind. Another 99 cities of more than 200,000 population have submitted oxident data, Hawkins said. The Clean Air Act requires EPA to issue lists of attainment and nonattainment areas by February 3, 1978.

Populous Areas Top Priority

Although the attainment/nonattainment designation requirement applies also to smaller urban areas, the Hawkins memorandum says, "significant resources should not be devoted by EPA to designation activities for areas less than 200,000 in population.

"Areas designated as attainment or unclassified will be controlled by prevention of significant deterioration (PSD) review," the memorandum says.

OIL SHALE DEVELOPMENT WILL CAUSE AIR, WATER, SOLID WASTE PROBLEMS

Development of an oil shale industry could have adverse environmental consequences, including air, water, and solid waste pollution, according to an Environmental Protection Agency report on anticipated environmental changes from oil shale development.

Environmental restraints, socio-economic problems, and uncertain environmental protection costs make the outlook for the oil shale industry uncertain, the report says. Nevertheless, oil shale development is moving forward, urged on by the high price of world oil, the potential for high profits, and decreasing U.S. supply of conventional energy sources, it says.

Aside from environmental pollution, other potential adverse effects of oil shale development include disruption of the land, hazardous health effects, and creation of boom towns with stressing side effects, the report says.

Greatest Environmental Roadblock

"There will be a lot" of solid waste from oil shale operations, the report says, in the form of fine particles of raw shale from crushing operations, catalysts from refining processes, and spent shale that remains after the oil is removed.

The report says the disposal of spent shale is "the greatest environmental roadblock to oil shale development. The potential effects of the enormous amount of spent shale cross all major environmental boundaries."

The problem of spent shale disposal is a key to success of the industry and will have to be resolved in relation to air, water, land, and the quality of life in the processing area, the report says.

Air Pollution

To minimize dust and particulate air pollution from shale mining operations, wetting agents will be used during drilling, after blasting, and along transport routes from the mines. Baghouse filters similar to those used in industrial smokestacks will be placed in crusher units to capture the dust from the shale as it is pulverized. Wet scrubbers will control particulates generated in retorting operations.

According to the report, however, none of the processes being considered for a commercial-sized oil shale industry can meet both federal and Colorado pollution standards (85 percent of the oil shale resources are located in Colorado, 10 percent in Utah, and 5 percent in Wyoming).

Water Pollution

Oil shale operations would withdraw large amounts of water to extract and process oil shale. Depletion of local water supplies, disruption of stream beds and groundwater aquifers, and resulting water contamination are a problem for the industry. Before the shale industry develops, the potential water pollution hazards associated with the various processes must be examined, the report says.

Land disruptions from oil shale mining include increased erosion and sedimentation, removal or burial of vegetation, and a change in the mix of native trees, shrubs, and grass species, the report says.

To minimize these impacts, disturbed areas should be returned "as nearly as possible" to their natural state, it says.

The health hazards from an oil shale industry presently are under study to define their severity and to identify solutions.

Avoiding boom towns will take thoughtful planning, money to carry out the plans, and support of those who live in the shale country, the report says. The Western Governors Regional Energy Policy Office is a key force that will help alleviate boom town conditions and adverse societal impacts of energy development, it says.

Research

EPA and 16 other government agencies are studying many aspects of oil shale development and are developing environmental controls in conjunction with oil shale processing technology. These studies are developed with funds provided by the Office of Energy, Minerals, and Industry through the federal Interagency Energy/Environmental Research and Development Program.

Over $35 million has been earmarked for oil shale research over the next five years, with $10 million to $20 million coming from EPA/OEMI through the interagency program, the report says.

Private industry, universities, and independent research contractors also are researching oil shale problems.

Copies of the report, "Oil Shale and the Environment" (Document No. EPA-600/9-77-033), are available from the National Technical Information Service, Springfield, Va. 22161.

EPA REGION VIII OUTLINES WORK PLAN TO CLEAN UP DENVER'S AIR

An Environmental Protection Agency Region VIII work plan calls for a state-federal program to clean up the air in Denver, where the air is the dirtiest in the region and in the U.S. in some respects.

Alan Merson, EPA regional administrator for Region VIII, said the emissions polluting Denver's air are mainly from automobile traffic and that stationary source pollution control options are inapplicable. Merson says cleaning up Denver's air — making it a model for other cities — is his highest priority.

At least one study shows Denver's carbon monoxide problem to be the worst in the U.S. Denver ranks in the worst five to 10 cities in the U.S. for photochemical oxidants, and its particulate levels are more than 60 percent above the annual average primary standard. Carbon monoxide, oxidants, and particulates are caused primarily by automobiles.

The goal of the Denver air quality program is to improve human health conditions in the Denver area and to improve visibility by reducing automobile emissions of particulates, the work plan says.

The work plan proposes that an "Action Plan" executing the work plan be developed jointly by local, state, and federal agencies by January 31.

Action Plan Program

Merson said EPA immediately will try to reduce the vehicle miles traveled by its own employees of the regional office in Denver by encouraging bus and carpool commuting.

The second major step will involve implementing a simular program for other federal agencies in Denver. With about 45,000 federal workers, Denver has one of the largest federal work forces in the U.S. Merson says that if the federal workers use mass transit or carpools, Denver's dirty air may be cleaned up significantly.

Current plans call for extensive support by federal agencies, including assistance for effective carpool matching, identification of potential employer incentive programs, and other assistance as needed, Merson said.

EPA also will seek to develop consistent policies on state implementation plan revisions, construction grant applications in nonattainment air quality areas, and inclusion of EPA headquarters in the program.

EPA also will launch a joint state/local public involvement program on air quality, Merson said.

The public involvement program will involve gathering information, developing resources, investigating methods, and developing and monitoring specific activities. The program will identify and work with private and public organizations and individuals and will form advisory groups of health experts, citizens, and perhaps industry and local governments.

Regional Office Plan

Under the work plan, EPA will undertake a number of programs in the regional office to set an example for improving transit ridership and vehicle occupancy. As these internal programs take shape, EPA plans to involve other federal agencies in Denver, and finally move the program into the private sector.

The overall objective of the work plan will be to reduce emissions by reducing travel, increasing auto occupancy, and reducing emissions from individual automobiles.

EPA construction grants policy and an agreed-upon state/EPA state implementation plan (SIP) policy are essential ingredients of the Denver air program, because these policies must be consistent, the work plan says.

Motor Vehicles Program

At Denver's high altitude, emissions are approximately twice that at sea level. The higher ratio of fuel to air causes poor driveability and greatly increased emissions.

Four goals of the Motor Vehicle Emissions Control Program outlined in the work plan will be:

- Development of high-altitude emission standards for new vehicles, effective with the earliest possible model year;
- Development of regulations to require manufacturers to provide high-altitude performance adjustments for 1968-1983 vehicles not certified to meet emission standards at high altitudes;
- Federal vehicle inspection/maintenance to obtain early emission reductions from government-owned vehicles and additional experience for running an areawide I/M program; and,
- Inspection/maintenance of in-use vehicles to ensure that the new vehicle emission standards continue to be effective.

EPA STAFF DRAFT CONSIDERS CHANGES TO KEY REQUIREMENTS OF OFFSET POLICY

The Environmental Protection Agency is considering revising its emission offset policy to subject many more sources of air pollution to the stringent conditions for construction in heavily polluted areas.

The change is one of many outlined in a December 19 staff draft undergoing internal and regional EPA review. The draft had not been reviewed by David G. Hawkins, EPA assistant administrator for air and waste management and "does not necessarily reflect his views," Walter C. Barber, EPA deputy assistant administrator for air quality, planning and standards said in an accompanying memorandum. Barber said some positions are "tentative" and "subject to change before proposal."

EPA is revising the "Emission Offset Interpretative Ruling" (Current Developments, December 26, 1977, p. 1219) to reflect public comments and the Clean Air Act Amendments of 1977 (Environment Reporter — Federal Laws 71:1101). The agency hopes to make formal proposals in February.

Definition of Potential

The amendments apply the offset requirements to new or modified major stationary sources or those with potential emissions of 100 tons or more per year, but they leave "potential" undefined.

In the draft ruling, EPA would define "potential" as 100 tons per year without considering reductions from control equipment. The definition still in effect takes reductions into account. It applies to sources with allowable emissions of 100 tons or more per year.

"A 'major source,'" the draft ruling says, "is any source for which the potential emission rate is equal to or greater than 100 tons per year for any of the following pollutants: particulate matter, sulfur oxides, nitrogen oxides, nonmethane hydrocarbons (organics), or carbon monoxide." It would define major modification to "include a modification to any source which increases the potential emission rate by the amount set forth above."

EPA would define potential emission rate to mean "the emission rate expected to occur without control equipment unless such control equipment is (aside from air pollution control requirements) necessary for the source to produce its normal product or is integral to the normal operation of the source."

Consistent with PSD Proposals

As the draft preamble to the Federal Register proposal notes, the shift from 100 tons allowable to 100 tons before control is consistent with the definition proposed in revisions to EPA's prevention of significant deterioration (PSD) rules (November 11, 1977, p. 1034).

"However," it acknowledges, "based on the comments on the PSD regulations, there appears to be substantial concern over the workability of the proposed definition and what the congressional intent was in using the term."

Industry representatives commenting on the proposed PSD rules at a public hearing in January emphasized their opposition to such a change (January 13, p. 1373).

At a minimum, the revised definition would subject far more sources in clean and dirty-air areas to the newer, more strenuous environmental requirements of the amendments.

In resolving the issue, EPA is considered likely to settle on a consistent definition of potential for both the PSD and offset requirements, but it does not appear committed to the controversial change.

The draft preamble describes EPA as "fully open to suggested definitions of the term potential emissions other than the one proposed," and says that, until finally revised, the ruling will continue to apply to sources with allowable emissions of 100 tons per year (1000 tons per year for carbon monoxide)."

Exemptions for Fuel Conversions

EPA is considering allowing somewhat broader exemptions from the offset policy for sources switching to alternate or dirtier fuels.

The existing ruling exempts sources switching to more polluting fuel, such as coal, if the facilities as of December 21, 1976, were capable of burning different kinds of fuels. Fuel conversion by these types of sources are not considered modifications and consequently are not subject to the ruling.

EPA is weighing the possibility of expanding this exemption to include actual construction if the fuel conversion is required by a federal coal conversion order or natural gas curtailment plan.

EPA had sought public comment on whether the narrower exemption in the present ruling should apply in nonattainment areas. It did so through an advanced notice of proposed rulemaking published together with the offset policy (December 31, 1977, p. 1245).

EPA in the draft ruling would exclude the following two cases from being considered as modifications and thereby would exempt them from the offset requirements:

- "Use of an alternative fuel or raw material (unless limited by previous permit conditions), if prior to December 21, 1976, the source was designed to accommodate such alternative use," or
- "A conversion to coal (i) by reason of an order under Section 2(a) of the Energy Supply and Environmental Coordination Act of 1974 or any amendment thereto, or any subsequent enactment which supersedes such Act, or (ii) which qualifies under Section 113(d)(5)(A)(ii) of the Act."

Significance Levels

Under EPA policy, all major stationary sources, whether locating in clean or dirty-air areas, must be evaluated for their potential impact on air quality in neighboring areas (November 25, 1977, p. 1109).

As a result, sources locating in clean areas might be subject to offset requirements and facilities locating in dirty areas might be subject to PSD areas.

EPA is wrestling with the issue of excluding from the requirements sources whose effect might be considered insignificant.

In its proposed PSD rules, EPA said it "is considering a 'significance level' scheme for analyzing areas in which the allowable increment has already been consumed." Under this approach, a source would be reviewed for its impact in such an area only if its effect is considered significant according to some scheme, such as numerical increments.

The draft interpretive ruling would establish a significance level scheme for sources which are locating in clean-air areas or clean portions of nonattainment areas and

which have some impact on nonattainment areas. They would not apply to Class I situations.

The significance levels would be based generally on the Class I PSD increments in the Act.

According to the draft ruling, "a new or modified source will not be considered to cause or exacerbate a violation of the NAAQS if the air quality impact of the source is less than the following threshold levels:

Pollutant	Averaging Time				
	Annual	24-Hour	8-Hour	3-Hour	1-Hour
Sulfur Dioxide	1.0 μg/m³	5 μg/m³		25 μg/m³	
Total Suspended Particulates	1.0 μg/m³	5 μg/m³			
Nitrogen Dioxide	1.0 μg/m³				
Carbon Monoxide			0.5 mg/m³		2 mg/m³

The draft preamble says "the principal use of the significance levels will be in determining how far away from a new source air quality concentrations should be estimated (i.e. calculations should be made until the concentrations drop to the significance levels)."

It says "the significance levels, in conjunction with the stack height limitations in Section 123 of the Act are such that sources with actual emissions greater than 10-15 tons per year could not be constructed in an area that exceeds a NAAQS without also exceeding the significance levels."

EPA solicited comments on whether or not it should permit "*any* major source to construct in a nonattainment area without being subject to the ruling, even if the significance increments are not exceeded."

Case-by-Case Despite Designations

In general, for stable air pollutants, "the determination of whether a source will cause or exacerbate a violation of a NAAQS should be made on a case-by-case basis," according to the draft ruling. It should be done "independent of any determination of non-attainment made pursuant to Section 107(a)(1)."

Section 107 requires states to propose and EPA to promulgate lists of the air quality status of their areas (see related story, p. 1408).

EPA is including this approach, according to the draft ruling, "because the area affected by a determination of nonattainment usually conforms to established administrative boundaries such as counties or Air Quality Control Regions (AQCR's) rather than a precisely defined area where air quality problems exist."

Decisions Involving Nitrogen Oxides

"For major sources of nitrogen oxides," the draft ruling says "the initial determination of whether a source would cause or exacerbate a violation of the NAAQS for nitrogen dioxide should be made using an atmospheric simulation model assuming all the nitric oxide emitted is oxidized to nitrogen dioxide by the time the plume reaches ground level."

It says the initial concentration estimates could be adjusted "if adequate data are available to account for the expected oxidation rate."

Offsets in Rural Oxidant Areas

The draft ruling would modify the proposed geographic application of the offset policy for major volatile organic compound sources, requiring sources locating in rural areas with high oxidant levels to obtain offsets.

According to the draft preamble, "one of the issues not totally resolved in the December 21, 1976, ruling was whether offsets should be required for major sources of volatile organic compounds (VOC) locating in remote rural areas, given the widespread violations of the NAAQS for photochemical oxidant in such areas."

At the time, it "outlined a tentative policy which would have exempted remote rural areas from the offset requirements (even though such areas were exceeding the oxidant standard.)"

In response to public comments, EPA is considering a change in the ruling to "require offsets for VOC sources locating in any area classified as nonattainment oxidant pursuant to Section 107(d)(1)(A) of the Act, or is otherwise shown to be exceeding the national ambient air quality standard for oxidant, unless the source owner can show that the emissions for the proposed source would have virtually no effect on any area that exceeds the oxidant standard."

The ruling says that "sources locating in areas that are attaining the oxidant standard or cannot be classified are exempt from the offset requirements."

In general, the draft preamble says, "offsets will be acceptable if obtained from within the same ACCR as the new source or within a radius from the new source equivalent to 36 hours travel time under wind conditions associated with high oxidant concentrations."

It says "the 36 hours travel time translates to approximately 75 miles during normal light wind conditions associated with multi-days stagnation conditions which are most conducive to oxidant formation."

NATURAL RESOURCE REORGANIZATION DRAWS MIXED REVIEWS IN PUBLIC COMMENTS

President Carter's natural resources reorganization team is sifting through more than 1,400 responses to a December 19 request for public comment on reorganization alternatives for federal natural resources and environmental programs.

The responses reflect a cross-section of environmental interests and include suggestions from figures as diverse as oceanographer Jacques Yves Cousteau and Alabama Governor George Wallace. Most of the comments are from industry, environmental, and government entities more directly involved in shaping and working under federal environmental and natural resources policy.

A sampling of the comments reveals little support for a department of natural resources, department of the environment and public health or a department of natural resources and the environment.

Strong support came from state officials for expanding a Department of Agriculture to include renewable resource management and protection.

Reorganization Drawbacks Noted

The Environmental Protection Agency was the focus of many of the comments, with evaluations offered about the agency's successes and failures and suggestions offered about EPA's role in the future.

Throughout the 14 volumes of comments, however, were responses voicing doubt about the wisdom of a natural resources reorganization, and warnings about the disruption reorganization can cause.

William E. Towell, executive vice president of the American Forestry Association, voiced strong support for a department of agriculture and renewable natural resources, noting what he described as "a reasonable balance in management philosophy between (the) Interior and Agriculture" departments.

He warned that "consolidation could lose that balance and the healthy competition that now prevails."

Jim Tozzi, chief of the environment branch in the Office of Management and Budget's natural resources division, suggested considering of a strengthening of "interagency coordinating mechanisms" by modifying the procedures which govern agency actions as opposed to changing the basic structure" to "avoid the disruption of major change."

Oceanographer Jacques Y. Cousteau also questioned concentrating responsibility under one umbrella organization, saying that "overcentralization presents the danger that a proposed policy which might appear logical from the point of view of one agency might be harmful because the decision lacks input from another."

Rarely did those commenting suggest including EPA in a larger, more comprehensive organization. Strong support was voiced for retaining EPA's independent agency status.

Strong EPA, CEQ Suggested

EPA should stand alone in dealing with the effects of chemicals in the environment, said William J. Driver, president of the Manufacturing Chemists Association.

He said that while "environmental management has some limited relationship to public health, much of both areas are totally unrelated and their regulation deserves complete separation."

Also in favor of preserving EPA's authority was William K. Reilly, Conservation Foundation president, who pointed out the potential for conflict of interest within a consolidated agency.

"Many of the agencies within the Department of the Interior promote activities which result in pollution or which otherwise run contrary to the regulatory interests of EPA," he said, in comments signed by 23 environmental groups and two labor unions.

Richard Engelbrecht, president of the Water Pollution Control Federation, called for the strengthening of the Council on Environmental Quality "to resolve interagency environmental and natural resources conflicts."

Separate Agencies for Research, Regulation

H.E. Lansbery, professor emeritus of the University of Maryland's Institute for Physical Science and Technology, recommended creation of an environmental regulatory commission with no enforcement powers and a mission to focus on air and water monitoring and research and development on the effects of pollutants.

He also warned against linking scientific and engineering activities with enforcement and regulation.

Lansberg traced the problems of EPA to a failure to separate those two functions, describing EPA as "an organization top-heavy with lawyers and scientifically inadequately educated advocates of self-interpreted public interests."

EPA, he said, "has almost since inception looked for support of their regulations by their research and monitoring arms. This has tied the latter down to pursue ephemeral studies rather than find facts on which sound regulations could be based."

Carl Bagge, National Coal Association president, voiced similar comments, calling for a separation of public health and environmental research functions from the standards setting functions.

Any reorganization should result, he said, in placing research involving "important and controversial" matters in more than one agency "to assure debate among researchers with different points of view."

Secretary of Agriculture Bob Bergland called for consolidating all agriculture and land management activities in the Department of Agriculture, saying that such an arrangement would allow decisions to be made "that consider all renewable natural resources" and would "assure that Federal land and related water resources contribute effectively to the sustained yield of food and fiber supplies."

Also supportive of an expanded Agriculture Department, was Alabama Governor George Wallace who, in a letter to President Carter on the reorganization study, pointed to the "strong and direct ties" federal natural resources agencies should maintain with state and local agencies.

Litigation

COURT AGAIN SAYS EPA CANNOT ENFORCE TRANSPORTATION CONTROLS AGAINST STATES

The U.S. Court of Appeals for the Ninth Circuit December 23 affirmed its decision of two years ago that the Clean Air Act does not authorize the Environmental Protection Agency to impose sanctions against California for the state's failure to administer and enforce the transportation controls in its state implementation plan (SIP) (*Brown v. EPA*, Nos. 73-3306, 73-3305, 73-3307 and 77-2558).

EPA had promulgated an SIP for California after determining that the state's own plan did not provide for the attainment of the national ambient air quality standard (NAAQS) for photochemical oxidants.

The EPA plan included transportation controls, and required that the state adopt laws and regulations to implement the controls.

California objected to the federal requirement that it initiate state legislation, and challenged the EPA plan on both statutory and constitutional grounds.

The Ninth Circuit, in order to avoid "serious constitutional issues" under the Tenth Amendment, ruled only on California's statutory claim (*Brown I*, 8 ERC 1053).

Supreme Court Consideration

The case then was consolidated with three similar actions for Supreme Court review, and on January 12, 1977 the Court heard oral argument on both the statutory and constitutional issues (Current Developments, January 14, 1977, p. 1347).

While the case was before the Supreme Court, however, EPA conceded that its SIP regulations were invalid unless modified. It was not empowered, the agency admitted, to require states to enact legislation and adopt regulations.

The Supreme Court therefore vacated the decisions and remanded the cases to the appropriate appeals courts for consideration of mootness (Current Developments, May 5, 1977, p. 3).

On reconsideration of the case, the Ninth Circuit ruled that it was not mooted by EPA's admission that it lacked authority to compel state legislation.

EPA had modified its regulations since the Supreme Court action to remove requirements that states enact laws and adopt regulations, and had deleted certain details concerning enforcement of the programs.

But California argued that the agency's modifications amounted only to "cosmetic changes," and EPA said that it would enforce the revised regulations.

It followed, the appeals court said, "that the cases before us to the extent they concern these regulations are not moot and are ripe for decision."

The court therefore went on to decide the substantive issue, and ruled that EPA cannot enforce the SIP against California.

'Indirect Polluter' Analysis Rejected

EPA argued that it was authorized under the Air Act to enforce the SIP against California under the agency's "indirect polluter" concept.

Under the indirect polluter analysis, EPA contended, it could enforce an SIP against a state as owner-operator of pollution inducing transportation systems (i.e. indirect polluter) to the same extent that it could enforce the plan against the state as owner of municipal incinerators (i.e. direct polluter).

There was no statutory distinction between the two state functions, EPA said, and because enforcement of the SIP would be against the "state as a polluter and not as a sovereign exercising police power" there would be no constitutional problems either.

The Ninth Circuit again ruled only on the statutory issue in order to avoid the constitutional problem.

The Clean Air Act, the appeals court said, does not evidence a "clear intention on the part of Congress to adopt such an attenuated notion of pollution" as that offered by EPA's indirect polluter concept.

The 1970 Act, the court said, made no mention of indirect polluters, and the 1977 Amendments did not rectify that omission in EPA's favor.

In fact, the court said, EPA asked Congress for an amendment to overturn *Brown I* and the House prepared such an amendment (Section 208), but "the section . . . never existed in S. 252 . . . and was not enacted in the Clean Air Act Amendments of 1977."

"We construe this as an unwillingness on the part of Congress to overturn our refusal in *Brown I* to adopt EPA's 'indirect source' theory," the court concluded.

Outer Continental Shelf

AMENDED OCS BILL CLEARS HOUSE, HEADED FOR CONFERENCE COMMITTEE

Legislation (HR 1614) to amend the Outer Continental Shelf Lands Act was approved 291 to 91 in the House February 2, and now goes to a House-Senate conference committee.

The bill includes measures to broaden state involvement in offshore drilling plans and would provide up to $200 million in OCS revenues to coastal states affected by offshore development.

A House-Senate conference committee will iron out the differences between the House measure and Senate-passed S 9.

Committee Version Altered

However, the bill was amended during five days of consideration to delete several controversial provisions approved by the House Ad Hoc Select Committee on Outer Continental Shelf, of which Murphy is chairman.

Deleted were provisions to:

- Allow dual leasing (requiring separate leases for OCS exploration and production);
- Include the Santa Barbara, Calif. channel on the list of frontier areas for OCS development;
- Expand the Occupational Safety and Health Administration's jurisdiction to include offshore activities and make it the lead agency on diving regulations on the OCS; and
- Include core and test drilling in the Federal Government's authority to conduct geological and geophysical exploration on the Outer Continental Shelf.

In addition, the House altered the bill's provision for the use of new bidding systems to allow experimental types of bidding to be applied to between 20 per cent and 50 per cent of leases offered. The committee version would have required other than bonus bids for at least 50 per cent of the area offered for lease.

Congressman Hamilton Fish (R-NY), who attempted unsuccessfully, along with Congressman John B. Breaux (D-La), to gain House approval for substitute OCS measures (Current Developments, February 3, p. 1513), said the House-revised bill is "now much improved" over the earlier version of HR 1614.

He and Breaux were persistent critics of the committee version of the bill, saying that the measure would promote unneeded federal regulation, duplicate legal authority in existing regulations, and erode OCS revenues.

Environmental Provisions

The bill includes provisions that would require OCS lessees to comply with national ambient air quality standards of the Clean Air Act and would prohibit lease or pre-lease exploratory drilling on any tract within 15 miles of the boundaries of any existing National Wilderness area.

It also would require that new regulations on waste prevention and conservation of natural resources on the OCS would continue to be applied to existing and new operations. It would change environmental impact statement provisions to allow an environmental impact study to be based on any of several plans submitted by prospective lessees. However, language requiring environmental impact predictions to be included in baseline studies was removed from the committee-approved version of the bill.

The House also amended the bill to broaden the scope of a measure to require the Secretary of the Interior to apply the "best and safest technologies" in OCS operations instead of the committee-approved language for "best and safest technology."

Pollution Fund Established

The House also included in the bill measures from the Oil Spill Liability and Compensation Act to establish an $200 million offshore oil pollution compensation fund within the Department of Transportation that would be supported by a fee of up to three cents per barrel of oil produced on the OCS.

For coastal states, the House included in the bill measures to provide up to $200 million of OCS revenues to the states, with each coastal state eligible for at least two per cent of the funds. The House also voted to change the allocation formula to states to include offshore production as a 25 per cent factor and to reduce oil and gas landings to a 25 per cent factor (Special Report, January 20, p. 1425).

An Ad Hoc committee staff member said February 5 that "a short conference" is expected on the bill. Conferees have not yet been named.

The staff member said that among the key issues expected to surface during the House-Senate conference are federal oil and gas exploration, revenue sharing, OSHA jurisdiction in the OCS, types of bidding allowed in OCS lease sales, and the applicability of Federal regulations.

Fish warned that the House rejected a conference committee report on a similar bill two years ago and "if the will of this House is not adhered to in the conference with the Senate, we shall be back to seek instructions for the conferees, and if necessary, regrettably, we shall again return to seek recommital."

NATIONAL COAL POLICY PROJECT RELEASES RECOMMENDATIONS ON COAL MINING, ENERGY

The National Coal Policy Project, a coalition of industry officials and environmentalists, on February 9 released recommendations on the mining, burning, and transportation of coal, and energy pricing.

Those recommendations drew sharp criticism from environmentalists who contend that, although the positions are purported to reflect a consensus reached by industry and environmentalists, they do not represent the sentiment of the environmental community.

The coal project, sponsored by Georgetown University's Center for Strategic and International Studies, is an attempt at bridging the gap between industry and environmentalists concerned with coal issues.

The report released by the project was divided into five areas studied by individual task forces: mining, coal transportation, air pollution, fuel utilization and conservation, and energy pricing.

Mining

One of the more controversial positions taken by the mining task force is that the restoration of essential hydrologic functions of mined areas in the western United States might best be accomplished by leaving highwalls.

The mining task force's stance contradicts a provision of the Surface Mining Control and Reclamation Act of 1977, mandating the elimination of all highwalls.

The task force recommended issuing mine permits on a watershed basis. "In order to better control impacts of surface mining on water resources in Appalachia, mine permits should be issued on a watershed basis to minimize the amount of land disturbance and watershed impact by mining at any given time," it said.

Permits should be coordinated between affected states when watersheds cross state boundaries, the task force recommended.

The task force concluded that mining should be prohibited only where specific problems cannot be addressed by reclamation.

It cited as examples areas where acid is forming or toxic chemicals cannot be buried, where special wildlife or cultural values exist, and where an important aquifer cannot be replaced by a water source without additional cost to the users.

The task force recommended controlled mining on an experimental basis in areas where it is uncertain that coal can be mined in an environmentally sound way, but where it appears techniques can be developed to mine in an acceptable manner.

The report cites prime agricultural lands in the Midwest and sub-irrigated alluvial valley floors and Ponderosa pine forests in the Northern Great Plains as such areas.

Mining task force members agreed that mining in the Northern Great Plains would cause fewer problems in areas where coal seams are thickest and rangelands least productive.

Environmentalists and industry officials disagreed, however, on whether seam thickness and rangelands productivity should be criteria for limiting future mining.

Environmentalists favored concentrating mining in thick seam/least productive rangeland areas, such as the Gillette area in Wyoming and the Decker area in Montana.

Industry officials claimed that geographic limitation is unnecessary if operators comply with environmental requirements.

The group set specific reclamation goals for the Northern Great Plains, Midwest, and Appalachia.

"In the Northern Great Plains and all other arid areas, the ultimate goal of reclamation should be to establish a viable, progressive, self-regenerating ecosystem that can be sustained through a severe drought cycle."

The basic goal in the Midwest should be to return surface-mined land to its original or higher level of productivity, the task force concluded. In Appalachia, the short-term goal should be to establish vegetative cover, stabilize spoils, and prevent erosion, the report said. The long-term goal, according to the task force, should be to establish a native forest ecosystem.

The task force recommended that hydrogeologic characteristics of affected watersheds be considered when head of hollow fills are being designed and constructed.

"In areas with acid overburden, the construction of head of hollow fills (used with mountaintop removal mining) requires that special efforts be made to avoid acid water problems," the report says.

Environmentalists and industry officials disagreed, however, on how acid overburden problems should be resolved.

"The industrialists feel that the regulatory agencies can handle this situation upon receiving the detailed plans they require from mining companies prior to approving mining applications," the report says.

Environmentalists, on the other hand, recommended that mountaintop removal be permitted only on an experimental basis in areas troubled by acid overburden.

Both industry and environmentalists agreed that current and future mine operators should continue treating acid water as long as it persists after mining.

The group recommended a classification system comparing sulfur in coal on a uniform Btu basis.

According to the study, Appalachia, followed by the Gulf Coast and Midwest coal regions, appears best able to accommodate increased coal development with the least disruptive impact on existing socio-economic structure.

"Communities in the Northern Great Plains and the Rocky Mountain regions have the least ability to accommodate coal development," the task force said.

The task force supported development of a national coal leasing policy, saying "the mix of federal and nonfederal coal is such that little nonfederal coal in the West can be mined economically without the inclusion of federal coal in the mine tract."

Environmentalists recommended that:

- The Interior Department establish criteria for identifying on a site-by-site basis areas that are environmentally unsuitable for mining and where coal production should be encouraged from nonproducing federal leases;
- Preference right lease applications not be approved unless the courts determine that holders of legitimate applications have a right to lease;
- The Interior Secretary issue regulations discouraging speculation on coal leases;
- No new leasing be undertaken until an adequate federal coal leasing environmental impact statement is prepared and until regional statements are prepared.

Industry officials did not formulate recommendations because they lacked sufficient expertise in the area, according to the study.

Air Pollution

The task force on air pollution policies developed a consolidated procedure for siting permits which, they say should be used on the state level.

According to the study, "there would be a single application for all state permits and approvals pertaining to environmental, economic, and social considerations and a single hearing."

The task force agreed that, to the extent possible, coal-burning plants should be sited near the users of energy rather than at remote mine sites where pollution could be ignored.

The group recommended that standardized air quality models be required to predict the impact of a given source on ambient air quality before actual data from operation of the source is available."

Fuel Utilization and Conservation

The task force on conservation and utilization acknowledged that major environmental problems complicate the prospects of using coal, and "reluctantly endorsed the expansion of coal use as a practical midterm solution to the nation's energy shortage."

The group opposes federal subsidies for commercial application of new conservation methods, and it urges cash flow incentives to make returns on investments in new technologies look more appealing.

The task force said conversion by existing electric and industrial plants to coal should be paced to allow for the application for cogeneration and developing technologies.

"We agree that natural gas and oil must be phased out and gradually replaced by coal in the production of steam and electricity," the group said. "But this change must be accomplished primarily in expansion and new plant construction."

Transportation

The transportation task force recommended a total overhaul of the freight transportation systems to replace "the maze of conflicting federal subsidies and web of unneeded regulations."

The group recommended, with one dissenting vote, that barge operators pay for construction and maintenance of waterways through full cost recovery user charges.

The task force also recommended:

- Permitting long-term contracts for railroads;
- Temporarily subsidizing shippers;
- Raising the existing user fees for trucks;
- Giving coal slurry pipelines eminent domain as contract carriers;
- Setting as a goal the preservation of all remaining wetlands which may be threatened by waterway construction; and
- Enforcing noise abatement, water, and air pollution laws.

Energy Pricing

The energy pricing task force said that the pricing of electricity should be based on an analysis of each utility's cost for replacing its plant and for fuel.

The group gave highest priority to cogeneration, and agreed that coal conversion mandates should be modified to allow for development of alternate technologies.

Environmentalists' Criticisms

The major concerns of environmentalists not involved in the project are two-fold: first, that the recommendations will be viewed as a concensus of the entire environmental community; and second, that the positions taken by the participants are weaker than those included in recently enacted legislation.

Karl Englund, director of the Environmental Policy Institute's Citizen Coal Project, said four positions taken by the project's mining task force are weaker than those environmentalists took when lobbying for passage of the Surface Mining Control and Reclamation Act of 1977.

"Those four positions are weaker than the positions finally adopted in the language in the Act," Englund said. "The project stated that it is an environmental-industry concensus, and that's just not the case. We're still in favor of strengthening the Act."

Englund said the most active environmental lobbyists do not support the project's concensus on prime farmlands, alluvial valley floors, spoil over the side, and highwalls.

"Take highwalls as an example," Englund said. "They say there are places in the Midwest where you'd want to leave highwalls. First of all, that's not true because of the serious problems caused by acid drainage, but second, for five years, Congress has wrestled with this problem and decided to the contrary."

It could be harmless to leave highwalls in "one percent of the situations," according to Englund. "But how do you write legislation making an exception for that percentage?"

Englund said Congress included the provision mandating elimination of highwalls in its stripping law after hearing the testimony of Walter Heine, director of Interior's strip-mining office.

"Based on Heine's testimony, Congress decided it would be an administrative nightmare as far as enforcement goes to make such exceptions," Englund said. "And furthermore, the elimination of highwalls is not overly burdensome on the industry."

The project has "ripped open the whole debate all over again," Englund said, "without realizing the political situation or the technical aspects of enforcement procedures included in the Act."

Environmentalists who lobbied for passage of the Clean Air Act of 1977 also criticized positions taken by the project.

Specifically, they took issue with the group's recommendations on tall stacks, one-stop siting, air quality modeling, and standards for fine particulates.

Richard Ayres of the Natural Resources Defense Council, said his biggest gripe is that the project made recommendations without consulting others and called it a consensus.

"The law represents the real concensus," Ayres said. "People who lobbied for the Clean Air Act were in contact continually with people around the country."

Rafe Pomerance, conservation director of Friends of Earth and legislative coordinator for the National Clean Air Coalition, reiterated Ayres concerns. "Their recommendations and conclusions do not represent a concensus that Friends of Earth shares," he said.

NATURAL RESOURCE REORGANIZATION ALTERNATIVES OUTLINED IN OPTIONS PAPER

The Environmental Protection Agency would be expanded into a department of environment and public health under one of the "preliminary organizational alternatives" being circulated for public comment by President Carter's natural resources reorganization team.

Other major reorganization alternatives presented in the paper include creation of a department of natural resources, consolidation of natural resources and environmental regulations in a department of natural resources and the environment, creation of a department of agriculture and renewable resources, and combining ocean programs and environmental regulation in a department of ocean resources and the environment.

A sixth major reorganization alternative would create a department of resource development and a department of the environment and conservation. "Since this concept involves two advocacy-oriented departments, a third body might be needed to set overall policy and rule on unresolved conflicts short of the President," the paper says.

No decisions have been made on any of the options.

In additon to the major reorganization alternatives which call for creation of new departments, the paper contains an extensive list of less sweeping reorganization alternatives in three categories: changes in specific programs or activities; measures to strengthen the interagency coordinating process; and realignments and consolidations affecting single resources such as water, land, and oceans.

Environment-Public Health

The alternative of creating a department of environment and public health "would take all or most of EPA's functions and join them with selected functions of the Food and Drug Administration, Occupational Safety and Health Administration, Consumer Product Safety Commission, National Institutes of Health, National Institute of Occupational Safety and Health, and perhaps others," the paper says.

The paper acknowledges that this alternative overreaches the scope of the natural resources reorganization study.

"While the scope of our study is not designed to fully evaluate this alternative, it may conclude that the functions of environmental protection are more related to the protection of human health than to the management of natural resources," the paper says. "Further work would be needed to fully examine this possibility."

Combining environmental protection with public health "would recognize a strong and growing commonality of interest between EPA and several public health agencies in connection with harmful substances which come to us through the environment, the work place, products, and the food chain," the paper says. "In effect, this alternative would take environmental protection in a different direction from natural resources management and conclude, instead, that it needs to be more closely associated with public health regulation and administration."

Separate EPA

The department of natural resource alternative would bring together all resource management programs, but would leave environmental regulatory authority in a separate EPA "to void possible conflict" with resource management.

Under this alternative, the Department of the Interior would be expanded to include the following agencies: the U.S. Forest Service, all or parts of the Soil Conservation Service, the National Oceanic and Atmospheric Administration, the civil works program of the Army Corps of Engineers, and the Water Resources Council. "The concept might or might not extend to TVA, the wastewater treatment grants of EPA, and specific smaller functions of other agencies," the paper says.

EPA Merger

The department of natural resources and the environment alternative would merge EPA's regulatory functions with resource management into a single department.

"The need for independence in administering the environmental regulatory powers could be provided by 'insulating' this activity within the framework of the department in a manner similar to the regulatory program within the Department of Energy," the paper says.

The department of agriculture and renewable resources described in the paper would combine the farm-related functions of the Department of Agriculture with the land and renewable resource management functions of other agencies, including Agriculture and the Department of the Interior.

A department of ocean resources and the environment would combine the regulatory activities of EPA with the ocean resource activities of NOAA, the Department of the Interior, perhaps the U.S. Coast Guard, and other agencies.

"Again, in this case, the regulatory program could be 'insulated' to avoid conflict with the development responsibilities," the paper says.

Two Departments

The alternative of creating a department of resource development and a department of the environment and conservation "recognizes the continuing tension between developmental interests on the one hand and environmental quality and resource conservation values on the other hand," the paper says.

The development-oriented agency would include programs from the Bureau of Land Management, the Bureau of Reclamation, the Bureau of Mines, the Bureau of Outdoor Recreation, the Corps of Engineers, most of the U.S. Forest Service, and parts of NOAA.

The preservation-oriented agency would take in programs from EPA, the Fish and Wildlife Service, and parts of NOAA, the Soil Conservation Service, and the U.S. Forest Service.

If a third entity were created to arbitrate disputes between the two departments, it "might be a very small Executive Office unit confined to policy formulation and major case resolution," the paper says. "It could also be expanded to meet some needs common to both 'advocate' agencies in order to prevent duplication in research activities."

Resource Realignments

Some of the less comprehensive reorganization alternatives would transfer responsibilities among existing agencies to consolidate programs for specific resources such as water, land and oceans. Currently, a number of agencies have overlapping programs in these areas.

The reorganization paper was circulated to about 1,000 interest groups, agencies and congressmen and also is to be published in the *Federal Register* to elicit public comment.

"This document is not a report, nor the result of an analysis of current programs, nor does it provide recommendations," said William W. Harsch, head of the natural resources reorganization team. "It merely seeks your comments and views for use in our analysis, to help form the study's conclusions and to make recommendations to the President."

Responses are due by January 14, 1978, and should be sent to the Executive Office of the President, Office of Management and Budget, President's Reorganization Project, Natural Resources-Environment Division, Room 3203 New Executive Office Building, 726 Jackson Place N.W., Washington, D.C. 20503.

GOVERNORS SHOULD HAVE VETO POWER NEEDED IN NUCLEAR PLANT BILL, EPA SAYS

Reform of the nuclear plant siting and licensing process should assure that all issues are fully aired by the construction permit approval stage and should provide for a governor's veto of the project before construction is begun, according to the Environmental Protection Agency.

EPA Administrator Douglas M. Costle, while voicing strong support for the major objectives of the Carter Administration's attempt at streamlining the siting and licensing process, said the proposed legislation should enhance the Nuclear Regulatory Commission's credibility and assure a strong state role in the nuclear reactor approval process.

Costle also cautioned against submitting to Congress a bill that "unduly emphasizes nuclear over non-nuclear generating sources" and "invites that public perception of our policy."

His comments came in a letter November 25 to James T. McIntyre, Jr., director of the Office of Management and Budget.

Reform of the siting and licensing process has been a goal of the Carter Administration, but the Administration's thinking on the matter has undergone several changes, many of them encountering objections from within the Administration.

Costle was commenting on a November 11 draft bill, but Energy Department officials said December 13 that they are uncertain when the bill will be submitted to Congress (see related story, p. 1265).

To strengthen the bill, Costle said, "Nuclear power plant siting and licensing decisions should be approved prior to the start of construction by a state's governor after an open, well-informed public debate."

Preserve Federal NEPA Responsibility

However, the National Environmental Protection Act authority of the NRC should not be shifted to states, as provided for in earlier draft bills, Costle said.

He suggested safeguarding the federal NEPA responsibilities, along with intervenor rights — including funding — to "assure that unresolved issues or issues about which new information is available are fully at the construction permit approval stage" of administrative proceedings.

Noting that plant siting and design can, under the draft bill, proceed construction approval by as much as a decade, Costle said, "If a once-isolated site is now surrounded by new homes, if new studies indicate geological or other drawbacks to the site not previously recognized, or if it appears that a particular approved design will not mate properly with an approved site, the prior basis for approval may no longer be valid."

Costle said he supports the draft bill's provisions for standardized nuclear facilities "for safety as well as economic reasons." He also supported site banking and other measures designed to cut administrative and litigative delays in the siting and reactor safety review processes

EPA SEEKS TO CLARIFY PSD EFFECTIVE DATE; SEEKS PUBLIC COMMENTS ON TWO RELATED ISSUES

The Environmental Protection Agency is seeking to clarify the effective dates for sources not subject to the agency's current prevention of significant deterioration regulation (42 FR 62020).

The agency says in a proposed regulation that it created confusion when it said on November 3 that a source would be subject to new PSD rules immediately upon promulgation unless it had obtained a final PSD permit before March 1, 1978, and unless it began construction before December 1, 1978 (Current Developments, November 11, p. 1034).

Sources not in one of the 19 categories now covered by EAP's PSD regulations were confused because they are not now required to obtain a PSD permit, EPA said December 8.

"EPA's intent is that any source not covered by EPA's current PSD regulations would be subject to the new PSD rules beginning on March 1, 1978, unless such source both (a) obtains before March 1, 1978, all final preconstruction permits which are necessary under the applicable state implementation plan under the Clean Air Act, and (b) commences construction before December 1, 1978."

Sources not required by a state implementation plan to obtain a permit to commence construction before March 1, 1978, would be subject to the new PSD rules only if they do not commence construction before December 1, 1978.

Related Issues

In proposing the regulations, the agency also asked for public comment on two other issues:

Whether PSD "increments" are to be protected only through preconstruction review (December 9, p. 1171); and

Whether all 250-ton potential sources are "major" sources under Section 169(1) of the Air Act.

The agency also noted some technical amendments recently signed into law and potentially affecting the prevention of significant deterioration program and published notice of informal public hearings on its PSD proposals.

The agency's proposed rule is published in the Full Text section of this issue.

Land Use

PRIME FARMLAND SHOULD BE PRIORITY FOR USDA, AGRICULTURE OFFICIAL SAYS

Assistant Secretary of Agriculture for Conservation, Research and Education M. Rupert Cutler November 29 said he wants prime farmland to be a major thrust of the Department of Agriculture over the next few years.

Addressing the Iowa Association of Soil Conservation District Commissioners, Cutler said there are five reasons for prime farmland to be a major thrust of USDA:

- Prime farmland should be preserved to ensure a farmland base for long-term productivity;
- Prime farmlands should be maintained as an agricultural resource so that wetlands and other fragile environmental areas can be preserved;
- Prime farmland provides the best yields with the least energy and other resources;
- Prime farmland can withstand soil erosion. By substituting marginal land, Cutler said, water supplies throughout the U.S. would be affected by sediment pollution from soil erosion; and
- A strong agricultural economy, the base of most rural communities, assumes sustained quality yields from prime farmlands.

Reclamation of Surface-Mined Lands

According to Cutler, there are about 14,000 surface mined acres in Iowa which have not been restored to productive use. Reclamation costs, Cutler said, may average $4,000 or more per acre for regrading, topsoiling, engineering structures, and other steps to prevent soil slippage and control water flow.

Under the Surface Mining Control and Reclamation Act of 1977, Cutler said, fees will be set for every ton of coal mined over the next 15 years, and one-fifth of the fund may be allocated to USDA for sharing the reclamation costs on rural lands.

He said the law also requires mine operators to include reclamation in the mining process and to determine whether an area chosen for coal mining is prime farmland. If a soil survey shows it is, Cutler said, the state regulatory agency still can permit the area to be mined in accordance with special reclamation requirements.

Energy

AVOIDING ENVIRONMENTAL/ENERGY LAW SUITS GOAL OF INTERIOR GRANT TO ARBITRATION

The American Arbitration Association, long a highly respected labor/management arbitration group, is going to try to identify and resolve energy-environmental issues before they reach the courts.

The six-month research project, funded by an $87,900 Interior Department grant, is to be administered by the Council on Environmental Quality and the U.S. Geological Survey's Resource and Land Investigation program.

"Adversary proceedings have an important place in our system of government, but excessive litigation has detrimental effects," Interior Secretary Cecil D. Andrus has said. Adversary proceedings complicate and draw-out administrative programs and add costs, Andrus said, and "when the Government and the courts appear to bog down, citizens lose faith in the system."

Nonetheless, some persons speculate that the introduction of arbitration into environmental conflicts could merely add an additional step, thereby further drawing-out final decisionmaking.

Much Research, Little Actual Application

"There has been a great deal of dispute settlement research in this area, but little application of new technology where the issues are real and the tempers hot," said Donald B. Straus, president of the Research Institute of the American Arbitration Association in New York.

He said the Interior Department grant will provide a chance for developing and applying new mediation techniques to energy and environmental conflicts of "national importance."

"This project provides the means to draw upon new ideas that have been developed in universities and other research centers, to apply them to ongoing disputes, and to make those that are successful available to others," Straus said in a prepared statement.

"We are administering this project jointly with CEQ because of its role in improving federal resource plans and decisions through more effective use of public participation and the National Environmental Policy Act," said Ronald Jones, chief of the Geological Survey's Resource and Land Investigation Program.

The Arbitration Association's research team on the project is to identify five "prototypical environmental-energy disputes." Among potential policy areas that could be studied, the association listed: coastal zone management, mining development (coal and uranium), on-shore impace of Outer Continental Shelf leasing, air and water pollution, siting decisions, and land management issues concerning forestry, grazing land, or national parks.

The association is to prepare a handbook outlining ways to identify, manage, and resolve energy and environmental conflicts. It is to determine which organizations and individuals might have concerns with particular issues in order to see that they are involved in decisionmaking.

In a separate action, the board of directors of the Virginia Environmental Endowment said it is going to pay $25,000 for mediation of environmental disputes. The money is to be used for a mediator to try to resolve differences between business, environmental, and government interests, said an endowment official.

INTERIOR ISSUES INTERIM RULES GOVERNING SURFACE MINING OPERATIONS

Interim final regulations (30 CFR 700 *et seq.*) controlling surface mining operations and reclamation were issued by the Interior Department December 13 (42 FR 62639).

Effective immediately, the interim rules set performance standards and environmental protection requirements for surface mine operators. The regulations differ in many respects from the version proposed by Interior September 7 (Current Developments, September 9, p. 705).

Beginning February 3, 1978, new coal mine permits must incorporate initial minimum performance standards included in the interim rules. Operators of existing coal mines must comply with the standards by May 3, 1978.

The regulations also establish procedures for granting federal funds to help states enforce the interim regulations and to establish their own permanent enforcement program.

The interim rules' performance standards direct mine operators to:

- Restore mined land to its original or an improved use;
- Restore mined land to approximate original contours;
- Remove topsoil and save it for later use;
- Control spoil placement;
- Guard against damage to the hydrologic balance;
- Control mine waste embankments; and
- Provide permanent vegetation for restored mining sites.

In addition to setting the general performance standards, the interim rules establish special standards for steep slope mining, mountaintop removal, prime farmland mining, and surface effects of underground mining.

Small Operator Exemptions

Exemptions from the interim standards may be obtained by small operators who produce less than 100,000 tons of coal in a calendar year. The exemption, effective until January 1979, does not apply to rules governing mine spoil handling.

In response to the 300-plus comments on the proposed version of the rules, Interior modified the interim final rules by:

- Changing requirements for detention time, sedimentation storage, and volume specifications for sedimentation ponds;
- Increasing requirements for communications between permittees and neighboring communities during preblasting surveys;
- Controlling maximum lineal decibels of air blasts;
- Reducing the particle velocity test criterion from two inches per second to one inch per second;
- Setting general revegetation requirements rather than requiring compliance with more specific revegetation tables.
- Revising the grandfather clause provision applicable to prime farmlands to conform to the clause in the Surface Mining Control and Reclamation Act.
- Establishing separate specific performances standards for the surface effects of underground mining, rather than making that category subject to the same standards which apply to surface mining.

EPA ASKS WHETHER AIR ACT REQUIRES MORE CONTROLS TO PROTECT INCREMENTS

Does the amended Clean Air Act require state implementation plans to prescribe measures beyond preconstruction review to protect air quality increments set for clean-air areas?

This question is one of the issues the Environmental Protection Agency is raising for public comment as part of a supplement to notices of proposed rulemaking and public hearing signed by EPA Deputy Administrator Barbara Blum December 5 (Current Developments, November 11, p. 1034, p. 1052, and p. 1061).

The EPA supplement, to be published soon in the Federal Register, will be published in Environment Reporter.

Deciding that additional controls are required could trigger a major change in the federal approach to administering prevention of significant deterioration (PSD) rules. That policy now relies on preconstruction review of major stationary sources to protect the increments.

Revising that approach may lead to disapprovals of state plans if they would lead to violations of the increments, EPA said, or plans would need revision. EPA now takes this approach to protect the ambient air quality standards.

Air Act Sections 161, 163

EPA acknowledges in the December 5 preamble that reliance on preconstruction review might be inadequate to protect the PSD increments and cites new statutory language that could be interpreted as requiring additional measures. Triggering the issue, according to EPA, are Sections 161 and 163 of the Air Act (Environment Reporter — Federal laws 71: 1101).

Section 161 says each state plan "shall contain emission limitations and such other measures as may be necessary, as determined under regulations promulgated under this part, to prevent significant deterioration of air quality."

Section 163, which prescribes the allowable increments of sulfur dioxide and particulate matter for Class I, II, and III, says plans "shall contain measures assuring" that increments "shall not be exceeded."

EPA says the "only method for protecting the increments specified in any detail in the Act is the preconstruction review scheme outlined in new Section 165." This section requires that new major sources be reviewed before construction and denied if emissions would violate the increment. It also imposes stricter control requirements than EPA's court-ordered regulations.

However, for at least two reasons, EPA says, it is possible "for increments to be violated despite good-faith" efforts to carry out the preconstruction review section.

It says first that emissions from sources not subject to preconstruction review under both EPA's original PSD rules and the new Act could lead eventually to violations. It says secondly that actual monitoring data may show violations for sources which passed earlier review stages.

In light of these considerations, the agency is asking for comment on whether the new Sections 161 and 163 or "(any other statutory language or legislative history) require SIP's to contain measures in addition to the preconstruction requirements of new Section 165 to protect the increments." EPA is seeking public comment also on the types of additional measures which might be required."

'Basic Questions' Raised

EPA poses the issue of protecting the increment in terms of certain "basic questions." For example, it asks: "Are the increments in new Section 163 absolute statutory requirements to be protected by whatever combination of regulatory measures is necessary?"

If the answer is yes, EPA says it "would mean that the increments would be treated in basically the same regulatory manner as the ambient air quality standards set under Section 109. EPA would then apparently be obligated to disapprove SIP revisions (such as emission limitation regulations for existing sources) which would cause increment violations and to call for SIP revisions under revised Section 110(a)(2)(H)(ii) wherever substantial increment violations were found."

EPA then asks, "Alternatively, are the increments to be protected only through preconstruction review?"

If the answer is yes, EPA says it "would mean that an increment could legally be violated, but that no more major sources could be permitted in or near the area (unless and until the violation were corrected)."

It says the "latter approach reflects EPA's policy under the PSD regulation promulgated in 1974."

250-Ton Definition

Another issue raised in the December 5 preamble is whether all sources with the potential to emit 250 or more tons per year of a pollutant are major and therefore subject to PSD requirements.

Section 169(1) first identifies as major 28 specific sources which also have the potential to emit 100 or more tons per year of any air pollutant.

The section then includes in the term major "any other source" with the potential to emit 250 or more tons per year of any air pollutant.

Included in the list of 28 sources are size cutoffs for four types of sources: fossil-fuel fired steam electric plants of more than 250 million BTU per hour heat input, municipal incinerators capable of charging more than 250 tons of refuse per day, fossil-fuel boilers of more than 250 million BTU per hour heat input, and petroleum storage and transfer facilities with a capacity exceeding 300,000 barrels.

EPA is seeking comment "on the relationship between (1) the sentence in Section 169(1) conferring major source status on 'any other source' of 250-ton potential and (2) the specific size cutoffs for the four types of sources."

"For instance," EPA asks, "if a fossil-fuel boiler has less than 250 million BTU per hour heat input but the potential to emit 250 tons of a pollutant per year, is it a major source?"

Effective Dates Clarified

EPA also clarifies the effective dates of the proposed PSD rules for sources not covered in EPA's current regulations.

EPA said on November 3 that "a source would be subject to the new PSD rules immediately upon promulgation unless the source both (a)obtains a final PSD permit before March 1, 1978, and (b)commences construction before December 1, 1978."

Agency statements "created confusion for those sources not in one of the 19 categories covered by EPA's currently effective PSD regulation (40 CFR 52.21), because such sources are not now required to obtain a PSD permit," the agency says.

EPA says its "intent is that any source not covered by EPA's current PSD regulation would be subject to the new PSD rules beginning on March 1, 1978, unless such source both (a)obtains before March 1, 1978 all final preconstruction permits which are necessary under the applicable state implementation plan under the Clean Air Act, and (b) commences construction before December 1, 1978."

In cases where a "source is not required by a SIP to obtain a permit in order to commence construction before March 1, 1978, then such a source would be subject to the PSD rules only if it fails to commence construction before December 1, 1978," according to EPA.

STRATEGY FOR PUTTING RCRA INTO EFFECT OUTLINED IN PAPER FOR PUBLIC MEETING

A draft strategy for putting into effect the Resource Conservation and Recovery Act of 1976 is being circulated by the Environmental Protection Agency. The strategy paper is to be the subject of a public meeting January 19 in Arlington, Va.

Sections of the Act that would receive major emphasis under the draft strategy are:

- Subtitle C regulations and Section 1008 guidelines for identifying the characteristics of hazardous waste, and listing hazardous wastes, and for controlling generation, transportation, storage, treatment, and disposal of hazardous wastes;
- Subtitle D criteria and Section 1008 guidelines for determining acceptable and unacceptable disposal and for conducting the open dump inventory;
- Section 3006, 3011, 4002, 4008 guidelines and financial assistance to help states develop and put into effect hazardous and solid waste programs including resource recovery;
- Technical assistance panels to assist in development of state programs;
- Resource Conservation Committee recommendations to Congress for resource conservation; and
- Research, demonstration, and evaluation activities for management and recovery of hazardous wastes and solid wastes.

Receiving "medium emphasis" under the draft strategy would be Section 6002 guidelines for federal procurement of recovered materials, Section 8002 reports on special research and demonstration projects, Section 7004 public participation guidelines, Section 8003 public information dissemination, and Section 2003 technical assistance teams for local implementation.

No activity is foreseen on Section 1008 guidelines for agricultural and mining wastes, Section 2004 tire shredder grants, and Section 8003 solid waste management library and model accounting systems.

Highest Priority Activity

The draft strategy says that controlling waste disposal should be the highest priority under RCRA over the next five years because "this activity will have the most direct impact on the adverse public health effects of improper solid waste management."

Other reasons cited for assigning this priority to waste disposal control are that such control will provide an indirect stimulus for resource conservation and recovery by increasing the costs of disposal and that the act "contains very clear and strong mandates relating to disposal controls."

To establish resource conservation and recovery as "the preferred solid waste management options," certain programs also have high priority, the draft strategy says. These programs include development of economic incentives for fostering conservation and recovery, state and regional programs for resource conservation and recovery, and research on recycling and resource recovery technologies.

Outline of Problem

Outlining the problem that must be dealt with, the draft strategy says that mining and agricultural waste quantities "far outweigh all other types of solid waste."

Industrial wastes and sludges, though much smaller in quantity than the mining and agricultural wastes, are about 2 1/2 times the quantity of residential solid wastes and sludges, and about 10 percent of industrial wastes are hazardous, the draft strategy says.

"It is also important to point out that significant increases in waste generation rates can be expected over the next decade as environmental laws relating to air and water pollution are implemented," the draft strategy says. "Particular waste streams that are expected to be affected are the industrial waste, industrial sludge, and wastewater treatment sludge streams."

Other points the draft strategy mentions in its outline of the problem are the dangers of surface and groundwater contamination from land disposal sites and the growing drain on natural resources from current consumption patterns. U.S. consumption of most classes of raw materials "has been growing by 20 to 40 percent per decade in the 20th century, and typical projections by independent resource economists forecast at least a doubling in U.S. consumption of most raw materials by the year 2000," the draft strategy says. Only a small proportion of residential solid waste is recycled, it adds.

Constraints Cited

One chapter of the draft strategy deals with constraints on putting RCRA into effect.

A significant expansion of resource conservation and recovery could take place without major advances in technology, the draft strategy says. But for this to happen, the draft says, opportunities for conservation must be recognized, and it must be in the economic interest of a firm or industry to carry out the opportunities.

In two respects, the draft strategy says, public attitudes may be the major obstacles to putting the Act into effect. "The history of citizen resistance to the siting of solid waste facilities is extensive and consistent," the draft strategy says, adding that such resistance cannot be dismissed as based upon "erroneous or disputed data regarding the adequacy of the proposed facility with respect to public health or the environment."

The other point of public opposition to the Act may be cost. "Public willingness to pay for improved solid and hazardous waste management is difficult to predict, especially without precise data on the nature and scope of those increased costs," the draft strategy says.

The draft strategy, when completed, will not be law and will not have the status of a regulation or of official rulemaking, EPA says. "Rather it broadly describes how EPA plans to proceed implementing RCRA in light of its legislative mandates and the realities of existing federal, state and local capabilities and resources."

Copies of the draft strategy are available from Geraldine Wyer, (202) 755-9157. The public meeting will be held at the Ramada Inn (Rosslyn) in Arlington, Va., beginning at 9 a.m. in Rosslyn Room B.

EPA EXPECTED SOON TO RELEASE SECTION 311 CHEMICALS, REGULATIONS

Final regulations under Section 311 of the Federal Water Pollution Control Act are expected to be released shortly by the Environmental Protection Agency.

Agency sources said December 20 that the regulations for implementing the hazardous and toxic materials discharge provisions of the Water Act should be approved within days by EPA Administrator Douglas M. Costle.

They said the final regulations will be essentially the same as proposed regulations published December 29, 1975. The major difference, one source said, is that the agency has eliminated the gross negligence standard and substituted something "between a low and high discriminator."

He also said that a number of the original proposed toxic or hazardous substances have been removed from the final list, but the agency intends to propose additions. The final list will include about 271 hazardous substances. The agency expects to propose 28 additions to the list, he said.

Discharger Liability

Section 311 of the Water Act prohibits the discharge of toxic or hazardous substances and oil into the nation's waterways. The Water Act directs EPA to establish a list of toxic or hazardous substances and also to formulate procedures for removing chemical discharges. The provision also authorizes imposition of fines on persons found responsible for chemical discharges.

Although EPA has formulated procedures for dealing with oil spills, it has not issued regulations dealing with hazardous materials.

Congressman John J. LaFalce (D-NY) has asked EPA to adopt regulations to cope with hazardous substances buried by Hooker Chemical Company in Niagara County, N.Y. LaFalce has asked the agency and President Carter to put in force regulations that would prohibit chemical discharges and also provide for a revolving fund to remove toxic substances in cases where liability for improper chemical disposal cannot be ascertained.

The Niagara County site was used by Hooker some years ago to dispose of toxic chemicals. The land later was sold by Hooker to the county and private developers. Hooker disclaimed responsibility for the chemicals in the sales contract. In recent months the chemicals have been forced to the surface as containers dissolved and rising ground water tables forced the buried polychlorinated biphenyls up into a recently constructed schoolyard and several private residential properties.

Gravity-of-the-Offense Standard

In a letter to LaFalce December 13, EPA Administrator Costle said the agency's hazardous substances regulations have been delayed since December 1975 because of unresolved policy issues.

One issue, Costle said, concerns the liability for cleanup and mitigation following the discharge of a hazardous substance determined to be nonremovable. Costle said the other issue involves the discriminator that would differentiate between the lower or higher civil penalty rates for the discharge of a nonremovable substance.

Costle said in his letter that the removability issue has been resolved by proposed amendments to the Water Act. Specifically, he said amendments to Section 311 that authorize the Government to clean up chemical discharges determined to be nonremovable and then assess clean-up costs to the discharger resolve the removability issue.

The gross negligence issue has been resolved in favor of a "gravity of the offense" discriminator, Costle said. This new discriminator "provides maximum latitude of discretion for the administrator for each major discharge of a hazardous substance," he said, because the agency "may consider the nature and circumstances surrounding the discharge."

Costle told LaFalce that the new gravity-of-the-offense discriminator will enable the agency to consider such factors as culpability of the owner, operator or other persons charged, the toxicity, degradability, and dispersal characteristics of the discharged substance, and the discharger's cleanup or mitigation efforts.

Costle said the agency is preparing a monitoring program to determine what final action should be taken on the toxic chemicals surfacing in Niagara County.

Air Pollution

EPA DRAFT GUIDELINES REFLECT NEED FOR PUBLIC INVOLVEMENT IN URBAN CLEANUP

Transportation planning to clean up heavily polluted metropolitan areas should involve as wide a range of the public as possible in analyzing and deciding on reasonably available control measures.

This approach is the thrust of transportation planning guidelines being developed by the Environmental Protection Agency in response to the Clean Air Act Amendments of 1977. The current draft, dated November 28, is undergoing comment and revision.

Transportation planning reflects part of what EPA Assistant Administrator for Air and Waste Management David J. Hawkins calls the "unfinished agenda" of the Clean Air Act of 1970. (Current Developments, December 18, p. 1246) — the attainment of the ambient air quality standards set to protect public health.

In dirty metropolitan areas, measures generally must go beyond controls on tailpipe exhausts and stationary sources to include transportation control measures as conditions for extensions of attainment deadlines to 1982 and 1987.

In many areas, transportation controls have been controversial, fraught with litigation, and characterized by federal rather than local development. EPA cites a number of reasons for the failures, including the "extremely tight time constraints imposed" by the court-ordered deadline for plans to include transportation control measures.

However, the EPA draft says "perhaps the greatest deficiency was the lack of intergovernmental coordination and citizen participation." It says "a considerable amount of the opposition to the plans centered not so much on the measures but rather on the manner in which the measures were developed and imposed."

The guidelines deal with "these deficiencies," according to the EPA draft, "by requiring locally developed plans that result from a process containing the following major elements: extensive agency interaction at all government levels, involvement of local elected officials, effective public participation, and integration with the ongoing Department of Transportation planning process to the fullest extent possible."

The amendments inject into the planning process another new element, the EPA draft says, by including funding sanctions.

No longer is the threat of federal intervention the principal sanction. Under the revised Act, failure to submit to EPA an approvable plan by January 1, 1979, triggers a ban on new major sources in nonattainment and the withholding of certain highway and air pollution funds.

The guidelines EPA is developing are intended to describe a planning process adequate to correct earlier deficiencies and result in submission of approvable plans.

They would apply to all government agencies designated according to Section 174 and involved in revising or developing the transportation parts of the control plans.

They are said to recognize that "unique characteristics may exist in any specific area," and to be "designed to be flexibly applied and adapted to ongoing planning processes."

However, although each part is not to be viewed "as an inflexible mandatory requirement," the EPA draft says "the objective of each is considered to be a necessary part of an effective process," and any change would require "substitution by an equally effective approach."

The draft emphasizes that preparing the transportation part of the plan "is not merely the one time development of temporary or short-range tactics to improve air quality, but rather such planning includes the entire process of taking air quality needs into account in all transportation actions on a continuing basis."

For transportation sections of submittals in 1979, it says EPA's approval would be "primarily dependent on the establishment of an effective planning process" and "less dependent on actual emission reduction from the transportation system." But for submittals after 1979, it says "approval will be primarily dependent on demonstrable, incremental progress in reducing emissions from the transportation system."

Air Pollution

EPA ANTICIPATES NO MORE POLLUTANTS, EXCEPT LEAD, TO BE ADDED TO CRITERIA LIST

With the exception of lead, the Environmental Protection Agency does not anticipate adding any more pollutants to its Section 108 air pollutant list, according to EPA Administrator Douglas M. Costle.

EPA has issued criteria documents for sulfur oxides, particulates, hydrocarbons, carbon monoxide, oxidants and nitrogen oxides. The agency recently issued a criteria document for lead and proposed a lead standard of 1.5 micrograms per cubic meter based on a monthly average (Current Developments, December 16, p. 1235).

In a letter December 9 to Congressman George E. Brown, Jr. (R-Calif), Costle said that although there are no written standards for determining when criteria documents should be revised, the Clean Air Act specifies that "the Administrator shall from time to time review, and, as appropriate, modify, and reissue any criteria." Costle indicated that the next projected revisions are currently scheduled as follows:

- Sulfur oxides and particulate matter — May 1980;
- Hydrocarbons — September 1980;
- Carbon monoxide — December 1979;
- Oxidants — March 1978; and
- Nitrogen oxides — January 1979 with revision to areas specified in Section 104(b)(research relating to fuels and vehicles) by February 1978.

In addition, Costle said the Clean Air Act amendments of 1977 specify that such revisions occur no less than once every five years. Therefore, some changes will occur in the criteria revision schedules, particularly the February 1978 nitrogen oxide deadline, he said.

In advising Brown of methods used in revising the criteria documents, Costle said most of the existing documents were prepared by agency experts with little assistance from outside contractors. However, because of difficulty in meeting the deadline imposed by the 1977 amendments, Costle said, the agency will request assistance from outside contractors for most parts of the revision process except for internal staff review and overview.

Costle added that the "in-house" approach is being used in the pending oxidant revision and in preparation of the lead document, as well as for assessing reports prepared by the National Research Council under contract to EPA. These reports will be used for all other revisions, he said.

Atomic Energy

MAJOR RADIATION CONTROLS ROLE SHOULD GO TO EPA, SENATE REPORT SAYS

Government control of radiation should be the exclusive preserve of the Environmental Protection Agency, according to a two-year Senate Government Affairs Committee study of federal regulation.

"The field of radiation safety shows many deficiencies which typically mark a piecemeal approach to federal regulation," the report says.

To remedy the situation in which "numerous agencies. . . administer numerous statutes in the field of radiation health and safety," the report recommends, EPA should be authorized by Congress to:

- Request action from another agency if EPA determines that a hazard exists which could be addressed by the agency under separate statutory authority;
- Set "reasonable" timetables for the other agency's consideration; and
- Allow EPA to intervene if the other agency does not act on "a recognized hazard" and to set enforceable standards for the agency.

Currently, the report says, "Too many agencies are charged with administering too many laws. And nobody has the clear ability to overview the total situation, or the power to guide and coordinate the dispersed authority.

"As a result coordination is often less than systematic, the extent of the risk is not fully understood, and some potentially significant hazards are not subject to any federal controls at all," the report says.

The recommendations are included in a chapter from Volume V of the committee's two-year, six volume study of federal regulation and were released December 28.

"What is needed is not more agencies involved in radiation protection — but one agency with the resources, the mission, and the determination to see that the job gets done," said Committee Chairman Abraham A. Ribicoff (D-Conn).

Radiation Responsibility Scattered

EPA, he said, should be that agency since it is "charged with the responsibility to protect the environment. These are the people who have the expertise and the authority to coordinate federal efforts to regulate radiation levels." "EPA has perhaps the broadest claim of jurisdiction," the direct result of the 1970 consolidation which created EPA and transferred to it the radiation functions from other federal agencies, the report says.

EPA attempts to fill its coordinator role, however, "have often been resisted or ignored by other agencies and departments" and its use of that authority has been "unilateral rather than cooperative in nature."

The ranking minority member of the committee, Charles Percy (R-Ill) said, "If someone were to set out to devise a flawed, cumbersome, ineffective scheme to deal with harmful levels of radiation, he probably could not do better than what we have now."

Water Pollution

GAO REPORT SAYS DATA INADEQUATE ON EFFECTS OF NONPOINT POLLUTION CONTROLS

The General Accounting Office recommends that the Environmental Protection Agency gather additional data on the effects of nonpoint pollution control measures.

In a report released December 20, GAO said nonpoint pollution controls often are poorly defined and cause difficulties that restrict the scope of planning agencies forming comprehensive nonpoint control plans.

GAO said EPA information is available on pollution loadings that could be reduced because of certain nonpoint control measures. But data are lacking on the impact of control measures on overall water quality.

For example, GAO said no-till agricultural methods greatly reduce soil erosion and stream sedimentation. But no-till farming generally requires using additional fertilizers, herbicides, and insecticides. Information on the total effects of no-till farming is lacking, GAO said.

Data-Base Inadequate

"Comprehensive assessments of nonpoint pollution involve sampling numerous water quality parameters at various sites," GAO said. "Existing data is inadequate."

EPA's guidance to state and local agencies should be changed to require data on effects of nonpoint control measures, GAO said. Currently, the guidance instructs the agencies to identify major nonpoint pollution sources and their relative pollutant contributions.

GAO said most of the state and local planning agencies it visited "lacked the data necessary to develop an effective nonpoint source control program." Agencies in Pennsylvania, for example, identified stream miles degraded by mining activities but did not investigate other categories of nonpoint pollution.

GAO also said EPA should more actively involve other federal agencies in developing a nonpoint control program. The Soil Conservation Service has a $214 million nonpoint control program, but GAO said the Soil Conservation Service's approach to the program is "passive."

Copies of the report, "National Water Quality Goals Cannot Be Attained Without More Attention To Pollution From Diffused Or 'Nonpoint' Sources," are available for $1 from the General Accounting Office, Distribution Section, Room 4522, 441 G Street, NW, Washington, D.C. 20545.

AMENDED WATER ACT DELETES FUNDING FOR SEPARATE STORMWATER RUNOFF SEWERS

The recently enacted Federal Water Pollution Control Act amendments delete funding for separate stormwater runoff sewer systems from October 1977 through September 1982, leaving local governments to enforce best management practices to control urban stormwater runoff.

The major sources of urban runoff pollution are:

- Meteorological sources, such as particulates, dustfall, and other air pollutants above urban areas;
- Traffic-related pollutant residue, such as motor vehicle exhaust emissions of suspended solids, chemical oxygen-demanding materials, heavy metals, especially lead, and oil and gasoline spills;
- Urban litter; and,
- Urban construction causing sedimentary erosion from construction sites.

The Environmental Protection Agency estimates that the cost of treating urban stormwater runoff is $200 billion. Preventive measures instead of treatment measures, however, appear to carry a much smaller price tag, EPA says.

Best Management Practices

Best management practices (BMP) can help clean up stormwater runoff by redirecting existing controls to reduce or prevent pollution, EPA says.

Some nonstructural BMPS include extensive street sweeping based on the frequency of rainfall; disposal of street sweeping debris through sanitary landfills; proper solid waste management, including improved trash pickup; and catch basin cleaning on a regular, rather than on a demand, basis.

In developing areas, such as construction sites, sedimentary pollution may be reduced by:

- Detention basin facilities where particulates naturally settle and the cleaner water is released;
- Use of straw bales, which filter out particulates from the runoff;
- Diversion dikes, which channel stormwater to other areas; and,
- Vegetative cover, which holds down sediment and reduces erosion.

All control methods should be checked for maximum effectiveness, EPA says.

The agency says using BMP nonstructural techniques would require a national capital expenditure of close to $6 billion as opposed to the estimated $200 billion for treatment.

A U.S. Court of Appeals ruling (Current Developments, November 25, p. 1107) means that EPA may require use of BMP in the general permit program, the agency says.

Local Participation

EPA encourages local governments and planning agencies to work with the public to assess and devise solutions to the urban runoff problem.

EPA says it is up to local governments to enforce the general permit program area (GPPA) for separate stormwater sewers. The GPPA applies to areas with a population more than 50,000. EPA says there are approximately 200 such areas nationwide.

Joel Miltenberger, administrative environmental specialist for the Urban Runoff Program of the Nonpoint Source Branch, told Environment Reporter that little data exists to document the impact of urban stormwater runoff. He said EPA does not know what amount of heavy metals in the water will kill fish; how many heavy metals or toxics are indigenous to the water, or are dumped upstream; how much is in the rainfall; and how much builds up between rainfalls.

Miltenberger said, however, that EPA does know that use of BMP such as detention basin facilities, straw bales, and vegetative cover, will reduce sedimentation and erosion and will reduce the turbidity levels of silt in the water.

STANDARDS SOUGHT FOR OCS DRILLING SAFETY, POLLUTION CONTROL EQUIPMENT

The U.S. Geological Survey January 3 requested public comments on standards and certification procedures to be applied to safety and pollution control equipment used in Outer Continental Shelf oil and gas production (43 FR 39).

USGS said it intends to require "by National OCS order, that safety and pollution-prevention equipment used in OCS oil and gas operations comply with specific design-performance standards" which are to include standards and procedures developed by the American Society of Mechanical Engineers and the American National Standards Institute.

Acting on an earlier notice of USGS intention to develop these standards, ANSI and ASME developed provisions for:

Quality assurance and certification of safety and pollution-prevention equipment used in offshore oil and gas operations (ANSI/ASME OCS-1-1977);

- Accreditation of testing laboratories for safety and pollution-prevention equipment used in offshore oil and gas operations (ANSI/ASME OCS-2-1977); and
- ASME-certification and accreditation procedures.
- In addition, the USGS said, "in the near future, two documents will be accepted as meeting the criteria for specific equipment standards." The documents are:
- "API Specification for Wellhead Surface Safety Valves for Offshore Service" (API Spec 14D).

Survey Team Certification

Survey teams from ASME will be available, upon request, to certify or accredit manufacturers and test laboratories for subsurface and surface safety valves during visits to plants or laboratories. The visits — to be monitored by USES — are to begin in February and manufacturers will have until the end of January, 1979 to obtain certification for such valves.

The use of certified sub-surface and surface safety valves will be required for use in oil and gas production at OCS leased after July 1, 1979, the agency said.

Survey team certification of other equipment must await development of standards for other equipment, the agency said and invited "any standards writing organizations that have developed equipment standards" to submit them to the ASME Standards Committee.

Comments on the use of the ANSI/ASME standards OCS-1-1977 and OCS-2-1977 and the ASME certification and accreditation procedures and the suitability, addition, or deletion of equipment for which the standards are desired should be directed to the Acting Chief, Conservation Division, U.S. Geological Survey, Mail Stop 600, National Center, Reston, Va. 22092 no later than February 3.

GAO CRITICIZES WETLANDS PROGRAM ADMINISTERED BY CORPS OF ENGINEERS

Regional differences in wetlands programs administered by the Army Corps of Engineers lead to unequal enforcement of federal regulations, confusion, and the issuance of questionable wetlands permits, according to a December 23 report by the General Accounting Office.

Under Section 404 of the Clean Water Act and Section 10 of the River and Harbors Act of 1899, the corps administers permit programs to protect U.S. waterways from activities deemed contrary to the public interest. Inconsistencies among corps district offices in applying federal wetlands for different parts of the U.S., and restrict establishment of a national wetlands program, the report says.

The corps should evaluate its wetlands program, the report says, to determine whether local district offices are over-regulating or are approving activities contrary to national wetlands protection goals.

Geographical Boundaries

The corps, by law, must define the geographical boundaries of wetlands under its control and set procedures for district offices to achieve uniform objectives.

The report says current guidance is inadequate, and "has resulted in significant differences" in program results at various corps offices.

The lack of geographical definitions, for example, has led to violations because individuals were unaware of corps jurisdiction. And, in some instances, the GAO report says, federal officials issue contradictory opinions because they lack definitive guidance.

Corps regulations require consideration of a proposed project's cumulative impact — additional structures or activities that could be expected to occur in the permit area — but the report says guidance is not available on how cumulative effects should be evaluated.

According to the report, the district offices GAO analyzed "recognized that certain types of activities cause serious cumulative impacts." However, permit applications for these projects "are usually approved" because cumulative impacts are not evaluated.

Unauthorized Blanket Permits

The corps should re-examine its use of general and blanket permits to determine whether current procedures are administratively manageable and effective in protecting the public interest, the report says.

The corps should increase its use of general permits "to ensure uniform treatment of applicants" and to reduce workloads, the report says.

General permits are issued, after public comment, to several applicants wishing to engage in similar activities in a wetlands area. The permits may be issued only for activities that individually and cumulatively are determined to have minimal environmental impacts.

The general permits result in less time and paperwork for applicants and can be used more often, the GAO report says.

Blanket permits, however, are not specifically authorized by corps regulations and the continued use of such permits is "questionable," the report says.

Blanket permits allow an applicant to engage in a wide range of activities without identifying the specific location, nature, or type of activity to be undertaken. An applicant would, for example, apply for a permit to conduct a variety of oil and gas exploration and production activities within a large geographical area, the report says. Individual corps district offices determine blanket permit duration, sometimes authorizing activities for up to 10 years.

Although the corps does seek public comment before issuing blanket permits, the report says, the lack of information describing the type of activities covered by the permit and the apparent lack of regulatory authority for issuing blanket permits make their use questionable.

Guidance on Priorities

The GAO report also says the corps should provide district offices with additional guidance for setting priorities and making enforcement actions consistent.

Most violations examined by GAO involved activities undertaken by individuals without permits. Ultimately, the report says, most of these cases were settled by the issuance of after-the-fact permits. But sometimes similar cases were handled differently, it says.

For example, the report says, it found instances where district offices fined individuals for altering wetlands without permits, but in other cases after-the-fact permits were issued. "Districts are inconsistent in their treatment of violators," the report says. "These inconsistencies exist within as well as among districts."

Guidance regarding program emphasis also should be clarified, the report says, to determine whether program emphasis should be placed on permit processing, monitoring and enforcing, or whether each of these functions should be given equal emphasis.

The report says that "currently, the districts differ considerably in their interpretation of the importance of these functions," and guidance to identify proper program emphasis should be provided.

Public Notification

Guidance also should be issued to district offices to ensure adequate information is provided in public notices, the report recommends.

"The corps uses public participation as a key element in evaluating the interest of the public and as a basis for making decisions," but adequate evaluative information such as the type of area to be affected frequently is lacking in district office notices, the report says.

Generally, the report says the corps should clarify how district offices can achieve program results: the "protection, enhancement, and conservation of the Nation's waters." According to the report, the corps' regulations are unclear in many respects, lacking details on critical matters such as how to resolve conflicts involving navigation and water quality or energy development and wetlands protection.

Although corps management recognizes that differences exist among district offices, the report says, corps headquarters views the differences as a good way to regulate because offices are "fine-tuned" to their respective areas and interests.

"We recognize that local interests considerations are very important," the report says. "However, these interests may not always be synonymous with the overall interests of the nation."

MOORMAN SEEKS MORE CITIZEN SUITS, PREDICTS STEP-UP IN CRIMINAL PROBES

The chief of the Justice Department's land and natural resources division, puzzled by the small number of citizen lawsuits filed against polluters, February 21 said citizen lawsuits could help ease the federal burden of enforcing pollution laws.

Although congressional consideration of Clean Air Act and Clean Water Act amendments included sharp debate over citizen suit provisions, Assistant Attorney General James W. Moorman told a District of Columbia Bar Association gathering that the once-controversial concept "appears to be an unused, atrophying part of the law."

Fewer than 25 citizen lawsuits currently are on federal district court dockets throughout the U.S., Moorman said.

The low total is evidence, he said, that fears that the provisions would trigger a flood of frivolous lawsuits "were groundless."

He said he is "disturbed" by the figures and suggested that the "bar doesn't understand how easy it is to bring these suits."

Moorman then outlined the data needed for adequate preparation of a suit.

Under the air and water laws, anyone can file a lawsuit charging violation of a National Pollutant Discharge Elimination System permit, a state implementation plan, effluent or pretreatment standards, or an EPA compliance order. In addition, both laws allow the courts to award litigation costs to the plaintiffs.

Violation Detection Method

Moorman said that for suspected violations of an NPDES permit, the discharger's permit monitoring reports should be examined. For nonpermit dischargers, he said, water samples should be obtained from above and below the discharge point source.

Use of those methods, he said, "would allow citizens to make a substantial contribution to the enforcement of the Act."

For suspected Air Act violators, he said, opacity measurements should be taken with a Ringelmann chart. Evidence of less visible emissions is "more difficult" to gather and demands use of expert witnesses, he said.

Citizen lawsuits against polluters, he said, are "welcomed because of the size of the task facing the Justice Department," and he called for attorneys "to join Justice in seeing to it that the high goals set by Congress are met."

In response to a question about federal enforcement, Moorman said he is "not satisfied" with either the number of enforcement cases or the geographic distribution of the cases.

"It seems that some EPA regions have plenty of enforcement actions pending while other regions can't seem to find any problems in their areas," he said.

He also pointed out that EPA and Justice manpower in enforcing pollution control laws is "stretched very thin" and is concentrated on checking Water Act permit compliance.

Moorman said if more citizen lawsuits were filed, "just enough to be noticed," polluters would be deterred from violating environmental laws.

"Without the deterrent effect, you don't have any enforcement," he said. "You'd much rather deter than go to court after violators."

Tough Criminal Enforcement

But in an earlier address, Moorman spelled out a "policy of vigorous criminal enforcement" that, he said, "will be truly effective as a deterrent and will result in a higher degree of pollution control."

Justice is seeking indictments and convictions for "willful, substantial violations of the pollution control laws of a criminal nature" and has begun grand jury investigations against corporations and individuals, he told an American Law Institute-American Bar Association meeting February 10.

The prime candidates for grand jury investigation are surreptitious dumpings, he said, adding that the Justice Department also "views as extremely serious false reporting to the agencies that conceals or omits important information called for" by reporting requirements.

In addition, he said, the Justice Department will try to "identify the individuals responsible for corporate acts so that the law may be truly enforced and its real deterrent effect mobilized.

"The enforcement of the criminal laws is a serious matter," he said. "The Department of Justice will approach enforcement in the pollution control area with the same seriousness with which it must approach enforcement of the tax laws or the laws against bank robbers."

Although the Justice Department is taking a tougher pollution control enforcement stance, Moorman noted the massive dimensions of the task facing EPA and Justice, and he underlined the need for voluntary compliance.

He said EPA is responsible for the emissions of 22,000 major stationary sources of air pollution, 45,000 NPDES permits, and more than 30,000 registered pesticides.

"Clearly EPA and the Department of Justice cannot deal with these enforcement problems satisfactorily in the absence of widespread voluntary compliance," he said.

"It is illusory to believe that the Government can check every tax return or the effluent coming out of every pipe."

Air Pollution

INDUSTRY SAYS LEAD STANDARD LOWER THAN NEEDED TO MEET HEALTH GOALS

Industry representatives testifying at the Environmental Protection Agency's February 15 hearing on its proposed air quality standard for lead of 1.5 micrograms per cubic meter (ug/m3) said the standard is at least three times lower than needed to protect public health.

Using the same mathematical methods and data base as EPA used, Emmett S. Jacobs, head of environmental studies for Du Pont's Petroleum Chemicals Division, said the air quality standard should be no less than five ug/m3 as originally recommended by EPA in its first draft of the lead criteria document (Current Developments, February 4, 1977, p. 1486).

Citing two differences between EPA's calculations and DuPont's, Jacobs said EPA's assumption that the blood lead level increases two ug/dl (micrograms per deciliter of blood) for each unit increase in air lead exposure is too high. Based on the data, he said, a more appropriate relationship would be in the range of 1.2 to 1.4 ug/dl.

Secondly, Jacobs said the threshold level at which EPA said the potential for adverse health effects in children exists should be 20 ug/dl rather than 15 ug/dl.

Concurring with Jacobs, Jerome Cole, director for environmental health for the Lead Industries Association said, "proper analysis of the data supports a standard of five micrograms per cubic meter on a 90 day basis."

EPA December 12 announced that its proposed federal ambient air quality standard of 1.5 ug/m3, based on a monthly average, would provide a margin of safety to protect young children, who are most susceptible to adverse health effects from lead (Current Developments, December 16, 1977, p. 1235).

Subsequent to the announcement, Cole accused EPA of "caving into the environmental activists" (Current Developments, January 13, p. 1392).

Testifying at the hearing, Cole said, the trade group "objects to the proposed standard because it is designed to protect children from certain biological effects without a shred of evidence that such effects are in any way injurous to health." He said, "If we accept the proposition that children are especially sensitive to lead, the proper function of an ambient air standard should be designed to ensure that blood levels in children are kept below 40 micrograms per deciliter." Thus, he concluded, "a lead ambient air standard of at least five micrograms per cubic meter on a 90 day average will accomplish that goal."

Water Resources

INDUSTRY OFFICIALS CRITICIZE REVIEW OF NATIONAL WATER POLICY

NEW ORLEANS — (By an Environment Reporter staff correspondent) — Industrialists attending the annual Water Resources Congress convention here February 14-17 criticized the process used by federal officials reviewing national water policy and developing reform proposals for President Carter.

Convention participants contended that local influence on policy reform issues was inadequate, Congress should have been included and was by-passed, and the National Water Management Assessment should have been completed before the review was undertaken.

Officials from the Office of Management and Budget, the Council on Environmental Quality, and the Water Resources Council comprise the review committee.

The concerns of industry officials were addressed by Lewis D. Walker, acting deputy director of the Water Resources Council.

Walker assured industrialists that Congress will review the policy group's proposals before the President formulates a national water policy.

"Furthermore, Congress sets water policy," Walker said. "It seems at least the President could set an agenda for what this Administration is going to do with regard to water policy."

Walker said the comment period on water policy was intended to provide a forum for policy suggestions from the private sector.

He also told the group that the National Water Management Assessment was developed concurrently with the policy group's proposals. "There just wasn't sufficient time, but I did what I could to get the assessment out before we finalize the policy review," Walker said.

The review stresses water conservation and increased state responsibility in the financing of water projects, according to Walker.

EPA OBJECTS TO EIS REQUIREMENT IN STATES WITH NPDES AUTHORITY

The Environmental Protection Agency, fearing a threat to its delegation of authority under the Clean Water Act, is asking the Council on Environmental Quality to drop a proposed requirement that environmental impact statements be prepared for new source permits in states that have assumed National Pollutant Discharge Elimination System authority.

Currently, no impact statements are required in the 28 states (including territories and the District of Columbia) that have been delegated NPDES authority. Statements are required, however, for new source permits in states where EPA administers the NPDES program.

Draft regulations distributed by CEQ for interagency review in December (Current Developments, December 16, 1977, p. 1236) would define any federal program "delegated or otherwise transferred to a state or local government" as a "major federal action" requiring an environmental impact statement.

According to both EPA and CEQ sources, this definition means that statements would have to be completed for new source permits in states with NPDES authority, even though no direct federal action is involved.

"This would create inhibitions in terms of a state's assuming a program," an EPA source told Environment Reporter February 22. The inhibition would be there regardless of whether EPA or the state were responsible for preparing the EIS, he said.

The draft CEQ regulations are designed to streamline the environmental impact statement requirement of the National Environmental Policy Act. EPA's comments will be considered along with those of other federal agencies before the regulations are proposed in the Federal Register.

Rules Aimed At NRC

The CEQ source said the provision requiring environmental impact statements for actions delegated to states by the Federal Government was intended primarily to cover authority over energy facilities delegated by the Nuclear Regulatory Commission.

"What we're addressing is not the question of NPDES permits per se, but what happens when a federal program goes to states," the source said.

However, CEQ at this point believes that either states or EPA should prepare an environmental impact statement for new source permits in states with NPDES authority, the CEQ source said.

"We don't want to create a gap in NEPA unless Congress specifically authorizes it," he said.

EPA, in draft comments on the CEQ rules, contends that requiring impact statements in states with NPDES authority would violate NEPA and also would conflict with provisions and congressional intent of the Clean Water Act.

'Federal Taint'

"By its plain language and numerous court decisions, it is well established that NEPA's impact statement provisions are not applicable to state actions," EPA's draft comments say. "The current proposal goes far beyond this principle and establishes some concept of 'federal taint.' The regulations seem to provide that once a program has been administered by the U.S. Government it can never lose its character as a federal action."

Citing legislative history, EPA argues that assumption of authority by a state under the NPDES permit process "does extinguish the federal role, and although originally administered by the EPA, the issuance of new source permits becomes solely a state action."

Rules Said To Inhibit Delegation

Aside from the legal issue, EPA contends that the CEQ proposal "would frustrate the goal of state administration of the NPDES permit process.

"Not only would federal resources be consumed but that independence which is the major incentive to state assumption of NPDES authority would be removed," the draft comments say.

The CEQ source left open the possibility that the regulations would be revised in response to EPA's concerns.

"We are going to go over everything they say extraordinarily carefully," the source said. "We're open to being convinced that there's a different congressional intent."

EPA Supports Thrust of Rules

Aside from the NPDES issue and three other areas of concern, EPA's draft comments support the thrust of the CEQ draft regulations.

The three other areas of dispute revolve around EPA's contention that the rules:

- "Are insensitive to the practical problems associated with federal grant programs;"
- Are too strict and flexible in their criteria for referrals by reviewing agencies;
- Would create an "intolerable burden" on EPA through the new concept of a "cooperating agency" to work with lead agencies on EIS problems.

Foreign EISs

EPA's draft comments "generally support" the controversial proposal to require environmental impact statements for major federal actions outside the U.S., but the agency suggests a change in approach.

Instead of writing uniform procedures for all agencies, EPA suggests that CEQ "consider the simpler approach of a regulation requiring all agencies affected to submit for approval from CEQ procedures for handling international actions.

"This approach differs from the proposed language by allowing the agencies the flexibility to deal with the peculiar sensitivities of their mandates while the CEQ assures that federal agency procedures conform to the requirements of NEPA," EPA's draft comments say.

BILL TO EXPAND REDWOOD PARK GOES TO HOUSE-SENATE CONFERENCE

The House passed legislation (HR 3813) February 9 that would add 48,000 acres to California's Redwood National Park, and would authorize the Department of the Interior to acquire an additional 30,000 acres within a designated area if necessary to protect the park from physical damage.

The bill now goes to a House-Senate conference committee. The Senate version of the bill (S 1976) was passed January 31. The conferees have not yet been named.

Dislocation Benefits

The acreage totals for the proposed park expansion are the same in both versions.

The main issue to be resolved by the conference committee is whether to provide dislocation benefits to workers affected by the reduction in Redwood logging if the park is expanded. The House version would provide income protection and job programs for displaced workers, but the Senate bill contains no such provisions.

Another issue to be resolved is the amount of money alloted for rehabilitation of the added land to reduce the threat of sedimentation. The House version would authorize an appropriation of $12 million for this purpose. The Senate version would aurhorize $33 million.

Finally, the House and Senate versions differ on which court should have jurisdiction over actions taken against the U.S. Government to recover just compensation for lands and trees taken up by park expansion. The House version, favored by the timber industry, would place jurisdiction over contested compensation settlements in the Court of Claims. The Senate version, favored by the Interior Department, would give district courts jurisdiction.

Created in 1968

The 55,000-acre Redwood National Park was created by Congress in 1968 to protect the last great stands of Redwoods in the U.S.

The House National Parks Subcommittee reported last year that the 1968 Act does not adequately protect the Redwoods, and that timber harvesting is causing erosion in the lower Redwood Creek drainage.

The Carter Administration supports the proposed park expansion, but timber industry representatives are strongly opposed, contending that there already are enough trees protected and that any further expansion will depress the economy and eliminate jobs (Current Developments, April 8, 1977, p. 1871; April 15, 1977, p. 1911; and July 1, 1977, p. 351).

The legislation would authorize the Department of the Interior to acquire 48,000 acres adjacent to the existing park, affecting three corporate landowners and their employees.

The 1968 Act would be amended to allow the Interior Department to accept lands with existing title restrictions from the state.

Currently, the Interior Department is prohibited from accepting lands to which it cannot have clear title. That provision has kept California from donating land on which prior owners placed restrictions.

The bills would allow owners to remove any timber cut down between December 3, 1974 and February 1, 1978, unless the Interior Department determines that removal would result in excessive sedimentation or would damage future growth in the park.

Income Protection

The House version would provide benefits for workers laid off because of park expansion. Income benefits would be paid to employees who met the following criteria:

- Seniority under a collective bargaining agreement, and 12 months of employment for one or more affected employers since January 1, 1977; or
- At least 1,000 hours of work for an affected employer between January 1, 1977 and the enactment date, and continued employment with an affected employer.

Income benefits would be based on an employee's highest weekly wage between January 1, 1977 and date of enactment, and the annual average of all hours worked during three of the last five calendar years.

Employees who reach age 60 before September 30, 1984 would remain eligible for income protection benefits until the age of 65. Other employees would be allowed to accept a lump sum severance payment thereby terminating eligibility for benefits.

Job Programs

The bill would require the Interior Department to analyze and report to Congress by January 1, 1979 on steps the Federal Government should take to mitigate adverse effects caused by the expansion.

The Labor and Commerce Departments could use employment programs to provide jobs to dislocated workers. The Interior Department would be authorized to hire 41 fulltime and 91 temporary employees.

Land Rehabilitation

The House bill would authorize $12 million and the Senate version $33 million, for rehabilitation of areas both within and upstream from the park through timber removal, clearing streams, and replanting.

The Interior Department would be required to study erosion and sedimentation within the Redwood Creek basin and use the findings in drawing up its land management plans.

EPA: DRAFT NEW SOURCE STANDARDS COULD BLOCK NEW COAL TECHNOLOGY

Draft Environmental Protection Agency air pollution standards for new fossil fuel plants could block the use of solvent refined coal technology that changes coal into a refined solid fuel, according to a key EPA official.

Stephen J. Gage, EPA acting assistant administrator for research and development, February 9 said the agency's draft new source performance standards (NSPS) could prevent the use of the Solvent Refined Coal I (SRC-I) process.

EPA's standards would limit sulfur dioxide, particulate matter, and nitrogen oxides from electric utility steam generating units.

According to the draft regulations, which could be revised before they are proposed formally, sulfur dioxide emissions would be limited to 520 nanograms per Joule (ng/J) input or about 1.2 pounds per million Btu. Uncontrolled sulfur dioxide emissions would have to be reduced by 90 percent.

Particulate emissions would be limited to 13 ng/J heat input (0.03 pounds per million Btu), and uncontrolled particulates would have to be reduced by 99 percent.

The draft proposed nitrogen dioxide emission standards would limit emissions and require a percentage reduction in uncontrolled nitrogen oxide emissions on a fuel-specific basis.

Gage told the House Science Fossil and Nuclear Subcommittee: "Preliminary analysis indicates the draft NSPS will have only minimal impact on the cost and commercialization of emerging technologies. The only technology that will be severely adversely affected is SRC-I (solid) since it will not be able to meet the 90 percent sulfur dioxide removal requirement without excessive cost penalties."

Some Uses For SRC-I

The SRC-I process still could be used in existing facilities or in industrial boilers which have standards below 1.2 pounds per million Btu, Gage said.

The SRC-II process, which converts coal to a refined liquid fuel, "appears to be able to meet the draft standard without excessive cost penalty," he said.

Gage said EPA's findings indicate atmospheric fluidized bed combustion technology "should not experience any significant impact on cost or commercialization."

Low-Btu gasification processes, such as combined cycle, in-situ gasification, and above-ground low-Btu gasification "should be only minimally impacted by the sulfur removal standard," Gage said. Gage said "minimally impacted" means costs would rise by no more than 15 percent because of the new source performance standards.

Although development of shale oil and magneto-hydrodynamics technologies are "impacted significantly" by existing new source performance standards, Gage said, the draft new source standards would have little effect on these processes.

Congressman Walter Flowers (D-Ala) said the U.S. will "suffer" if environmental provisions block coal conversion technologies.

Flowers said the subcommittee members are "all hawks on energy development. My frustration, my concern — I don't see any enthusiasm on the part of EPA to enlarge the technological aspect. I think we ought to be loose as opposed to tight on what we should innovate, what we should try."

EPA, more than any other agency, "will set the pace" for energy technology through its regulations, Flowers said.

15 Percent Cost Increase

The subcommittee chairman particularly criticized EPA's conclusion that a 15 percent increase in cost because of environmental provisions was a minimal impact.

Considering that several billion dollars could be spent to bring new conversion technology on line, Flowers said, an additional 15 percent could raise the cost of a facility by $200 million to $300 million. Utilities already are being required to install flue gas desulfurization units at a cost of $150 million to $200 million per plant, he said.

Gage said EPA is "enthusiastic" about new conversion technologies being developed. EPA's findings indicate, he said, that only one technology may be blocked by the agency's regulations. And even that technology might not be totally precluded, he added.

"I want to respond very strongly that this time we don't think environmental laws are going to stand in the way of new coal-based technology," Gage said.

Walter C. Barber, EPA deputy assistant administrator, office of air quality planning and standards, said EPA's draft new source standards will allow use of higher-sulfur coal by electric utilities. Utilities would be required to install scrubbers to clean up emissions.

Because higher-sulfur coal would be used, lower-sulfur coal could be freed for smaller facilities, which cannot afford to purchase scrubbers, Barber said.

Frank Princiotta, EPA director of energy process development, said the draft new source standards would result in less mining and transportation of western coal to eastern utilities.

Drinking Water

EPA PROPOSES AMENDMENTS TO INTERIM DRINKING WATER REGULATIONS

The Environmental Protection Agency February 9 issued proposed revisions to the National Interim Primary Drinking Water Regulations (43 FR 5756).

The proposed regulations, intended to protect public water supplies from organic chemical contamination, establish maximum contaminant levels for trihalomethane compounds and also establish treatment standards. The proposed regulations are published in the Full Text section of this issue.

EPA is accepting comments on the proposed regulations until May 31, 1978. For further information contact Joseph A. Cotruvo, Director, Criteria and Standards Division, Office of Water Supply, (WH-550), Room 1111, WSME, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, 202-755-5643.

Air Pollution

ANDRUS RECOMMENDS SPECIAL PROTECTION AGAINST VISIBLE POLLUTION FOR 158 AREAS

Interior Secretary Cecil D. Andrus recommended February 10 that 156 federal parks and wilderness areas receive special protection against visible air pollution.

All but two of the 158 federal parks and wilderness areas for which protection against air quality deterioration is provided are included in Andrus's proposal (Current Developments, November 14, 1977, p. 932).

The two areas for which Andrus is not seeking the added protection, Bradwell Bay Wilderness in Florida, and Rainbow Lake Wilderness in Wisconsin, have dense vegetation making it impossible to see far.

"It was a little difficult to argue that the ability to see a great distance was a significant factor," an Interior Department spokesman said.

Andrus sent his recommendations to Environmental Protection Agency Administrator Douglas M. Costle, whose staff will review the list before developing a final list of "Class I" federal areas which merit special protection of scenic values.

Under the Clean Air Act amendments of 1977, EPA will develop procedures and regulations ensuring protection of those areas. The amendments, which established the prevention of significant deterioration provision, also requires studies to determine which areas merit special protection from visible air pollution.

Originally, an interagency federal task force recommended only 153 areas as warranting the added protection. As a result of public response, three additional areas were added to Andrus's list.

Coal

HEINE WILL GRANT A SECOND EXTENSION OF STRIP MINING COMPLIANCE DEADLINES

Walter J. Heine, director of the Office of Surface Mining, said February 14 that a second extension of a deadline for compliance with interim strip mining regulations is in the offing.

Heine's latest thought is to give operators until mid-April to submit plans for upgrading existing structures not in compliance with the Surface Mining Control and Reclamation Act of 1977.

The interim program originally required operators to submit those plans by February 3. Two weeks ago, Heine extended that deadline to March 1, claiming that the "lateness of the regulations" made it impossible to expect compliance from operators.

That lateness, coupled with Heine's plan to amend the sedimentation pond requirements, accounts for his latest decision to postpone the deadline again.

"We're going to propose rulemaking to modify some of the hydrologic aspects of the regulations," Heine said. "We would allow for a 30-day comment period, hold a hearing, and have final publication. For all that to happen, it would be around April 1 before the amended regulations would go into effect."

Given those conditions, Heine said, the March 1 deadline "starts not to make sense anymore."

Heine said the deadline extension and amended regulation may result in the withdrawal of some of the lawsuits challenging the regulations, which were filed by coal industry officials in late January (Current Developments, February 10, 1978, p. 1537).

"I have a feeling the time element and additional flexibility we're going to put into the hydrologic portion of the regulations may result in the withdrawal of some of the suits," Heine said. "We certainly hope so."

Environmentalists File Suit

Environmentalists joined the bandwagon of parties challenging the regulations and filed suit February 10 in the U.S. District Court for the District of Columbia.

Their action alleges that a regulation exempting certain pre-existing structures from a May 4, 1978, compliance deadline violates the strip mining law and the Administrative Procedure Act.

The environmental groups are requesting that the court enjoin Interior Secretary Cecil D. Andrus and federal regulators from enforcing or applying the regulation.

The suit was filed by the National Wildlife Federation, Appalachian Coalition, Northern Plains Resource Council, Virginia Citizens for Better Reclamation, Council of the Southern Mountains Inc., and Citizens League to Protect Surface Rights.

'Congressional Intent Fulfilled'

Heine responded to the environmentalists' action, saying that the regulations fulfill congressional intent.

"Because of the timing of passage and publication of the regulations, and winter and the coal strike, we quickly recognized that the vast majority of companies could not get their nonconforming structures into compliance by May 4," Heine said.

The regulations were written, Heine said, to give operators every opportunity to comply.

"If they are operating on a compliance schedule and start construction by May 4, we give them until November 4 to complete construction and bring structures into compliance," Heine said. "We think we are effectively interpreting what Congress intended."

Western States Resource Congress

~~Western States Conference~~

March 20, 1978

Reno, Nevada

I. Call To Order - Robert Dilger, President, WETA-Washington

II. Introductions

III. Summary of February 13th Meeting in Spokane - Charles T. Keenan, Executive Director, WETA-Washington

IV. Round Robin Discussion

A. Your Organization - description.
B. Issues of greatest concern.
C. Your thoughts regarding a Western States Conference.

V. Break

VI. Call To Order - Bob Fleming, President, Organization for the Management of Alaska Lands (OMAR)

VII. Structure - Jim Cook, Executive Vice President, California Business Properties Association

VIII. Name - Paula Easley, Executive Director, OMAR

IX. Issues - John Thompson, Corporate Liaison, Land Resources, Georgia-Pacific

X. Discussion of Structure, Name and Issues

XI. Break for Lunch

XII. Call To Order - Roger Blades, President, WETA-Idaho

XIII. Guest Speaker - John Thompson Introduce

XIV. "Think West Conference", "Great Western Debate" - Charles T. Keenan

XV. Discussion and approval of:

A. Structure
B. Bylaws
C. Projects
D. Membership
E. Other

XIV. Next Meeting - ~~April 27~~ May 2, 1978, Denver, Colorado

February 28, 1978

TO: Western States Conference Meeting Attendees

FROM: Judy Henry

Chuck and I were very pleased to see you in Spokane at the first organizational meeting of the Western States Conference. Find enclosed herewith the Minutes of the February 23rd meeting.

You will note from the Minutes that many aspects of this organization were left rather unstructured. That was done purposely, in order to encourage participation by others in its formation, and to allow for flexibility during the development stages.

As you recall, the next meeting will be held in Reno, March 20, 1978. Arrangements are being made at Harrah's, Center Street at Second, Box 10, Reno, Nevada. When you make your room reservations, please indicate that you are attending the Western States Conference. The rates range from $31.00 per day for a single, to $46.00 per day for a double. The toll free number for the States of California, Oregon, Utah, Idaho and Arizona is 800-648-3773. For Nevada and all other states, the number to call is (702) 329-4422.

An agenda and other proposals will be forthcoming from Chuck Keenan in the very near future. If you have any comments or suggestions, please contact us at your earliest convenience.

Please RSVP Chuck or me at the WETA-Washington office regarding your attendance at your very earliest convenience. Also, please contact us regarding any additional persons you feel should be invited to the March 20th meeting.

Yours truly,

Judy Henry

Western States Conference - Organizational Meeting

February 13, 1978, Spokane, Washington

MINUTES

The meeting was called to order at 8:45 A.M. by Robert Dilger, WETA-Washington President.

A roster of meeting attendees is attached to these minutes.

Mr. Dilger made a brief statement regarding the need for those with common concerns to join together to fight the no-growth trend in government regulations; to educate legislators throughout the nation; to promote sensible guidelines and sensible growth; and, at the same time, protect the environment.

Mr. Dilger then asked for comments from the Organization for the Management of Alaska's Resources (OMAR) representatives. Ms. Paula Easley, OMAR Executive Director, stated that one reason they are involved is to avoid another defeat such as the one Alaska experienced regarding the natural gas pipeline. Mr. Stringham, Administrative Assistant of the Alaska District Council of Laborers, related a similar concern regarding the Alaska d-2 lands situation.

Following these introductory remarks, was a "round robin" discussion, with attendees each describing their respective organization, discussing their areas of concern, and stating their feelings regarding the purpose, goals, etc., of a Western States Conference. Following is a summary of this portion of the meeting:

There is a need to address the problem of Eastern legislators (not fully realizing the impact of their actions) promoting legislation which locks up the vast resources of the west. A cohesive coalition could, via the grass roots strength of its varied membership, educate and influence these legislators on issues of common concern.

The concern was raised, and it was the consensus of the entire group, that the issues addressed must be limited to areas of interest which reflect the actual purpose and goals of this group. Any issue which could divide and/or hinder its effectiveness or credibility should be avoided.

One common problem is the adverse impact on employment caused by unreasonable legislation and delays. Another area of common concern is the use and regulation of public and private lands, including all types of land use regulation.

There is deep concern regarding oil and mineral exploration and development in Alaska and on the Outer Continental Shelf. Mr. J. A. Stransky of the Western Oil & Gas Association stated that there is not much about which they are not concerned; and basically would like to know what kind of direction and assistance this group would like from WOGA.

Mr. Charles Keenan, WETA-Washington Executive Director, expressed the need for an entity to work together to identify areas that need addressing, identify any possible roadblocks, and reach a consensus on such issues, which consensus can be advocated and strongly promoted by a unified western block. Some of the areas which he identified as possible targets are: the need for transportation; the need for timber policies; the need for land use regulations which do not downzone or slow responsible growth; the need for water policies; and the ability to develop mineral and energy generating capabilities.

Mr. Lynn Engdahl, WETA-Oregon Executive Director, made three basic points: (1) It is important to concentrate and cooperate on issues upon which all involved can agree; (2) Most have the same feelings on many issues, but we need to combine forces to accomplish our goals; and (3) It is very important to be able to communicate our story.

Mr. John Thompson, Georgia-Pacific Corporate Liaison, stated that it is not only the Eastern legislators that present a problem. He feels there is also a real need to educate and influence our Western legislators, citing the example of the Redwood National Park legislation. He suggests concentrating on our own legislators, then moving east, and, with the support of our congressmen, begin concentrating on the Eastern legislators. He also stated that the choice of persons to represent the Western States Conference on a particular issue is critical; and that we should not disregard the importance and influence of key legislative staff.

Mr. Bob Getts of Shell Oil Company indicated their concern with government leaders placing too much importance on energy conservation, and not enough on energy development and growth to provide employment and a continued good standard of living.

Mr. Joe Crosswhite, WETA-Montana President, stated that he had been sent to this meeting to observe and report to his Board before making an official commitment. He also stated that legislators in Montana need education, etc., and that he feels they should be addressed before considering the eastern state's legislators.

There was other discussion and comment expressing concern regarding the discretionary power of bureaucrats, etc.; and general agreement that it is important to educate and obtain the support of our Western states legislators first, and that an important in-road to any legislator is via key staff.

Mr. Bob Fleming, President of OMAR, stated a concern of Alaska interests is that Alaska is being used as an example, pitted against the rest of the United States and some of its environmental problems, of what not to do, environmentally. Individuals are determined that the same mistakes not be made there; therefore, its mineral and resource importance to the nation is being minimized.

Mr. James Cook, California Business Properties Association Executive Vice President, stated his concern about organizations in the East raising funds in the West, which funds are then used against the interests of the West. He feels that a Western States Conference is an excellent approach to this and other problems previously discussed. He also stressed the importance of addressing issues of common concern to all, not individual state's or organization's interests.

Senator Joe Orsini of Alaska stated his belief that a strong labor/business group, such as being discussed here, could be very effective and is very important. He feels that this group should be concerned about legislators' concerns also - such as state's rights. He cautioned against public funding.

After a short break, the meeting was reconvened and called to order by Bob Fleming, who stated the need for structure and unity within this group.

Mr. Keenan then presented, for discussion, the following summarization and proposed structure:

1. Name: Western States Conference.

2. Goals:

A. Form Western states group of laymen to advance legislation beneficial to the Western states;

B. Form a Western states conscious - an entity which formulates policy beneficial to the Western states.

C. Activate key persons within congressional districts to intercede with their representatives on issues of concern.

D. Attempt to coordinate in-place organization to facilitate and achieve broad-based support for our concerns.

3. Structure:

A. Thirteen Western states.

B. Five representatives from each state on Steering Committee.

C. Generate two representatives per congressional district in each state.

D. Staff be voluntary at first.

E. Dues - none.

F. Steering Committee and representatives be a mixture of labor and management.

4. Possible activities:

A. Conduct an annual "Think West" conference in Washington, D.C., for congressmen from Western states and their staff.

B. Develop rating system with which to measure voting of Western congressmen on issues of concern.

C. Conduct an annual conference, and on-going communications, for and among media.

D. Establish mechanism to identify and put into laymen's terms, data regarding specific issues.

4. Issues - Candidates for Action:

A. RARE II.

B. 160-acre water limitation issue.

C. Nuclear facility sitings, permits, construction, and initiatives.

D. Divestiture - affecting all companies - horizontal and vertical.

E. OCS legislation in the Gulf of Alaska and on the Western Coast.

F. Water reclamation projects - sites available and needed.

G. Federal highway appropriations.

H. Alaska d-2 legislation.

I. Coal mining legislation - exploration and extraction.

J. Stringent national air standards.

K. Chemical regulations for silvacultural and agricultural uses.

5. Establish a task force to identify, assess, and communicate with key legislative and administrative staff.

6. Promote recreation and access to public lands specifically as an on-going general policy.

At this point a motion was made to revise Item VIII on the agenda, which was to break into workshops, and continue the meeting as one group.

Mr. Cook stated that he felt the goal of this group should address the need to have our local state efforts stronger. He felt we should identify organizations and various interests in relation to each state who should be part of this organization, and explain what we might expect them to contribute. He identified the 13 Western states as Washington, California, Alaska, Oregon, Montana, Idaho, Hawaii, Utah, Arizona, New Mexico, Colorado, Nevada, and Wyoming. Mr. Cook stated that goals should be (1) at the federal level - (a) impact legislation, and (b) impact regulators; and (2) at the state level (a) influence federal western representatives; (b) influence federal eastern representatives; and (c) communicate problems within the states.

At this point the question of an office and staff was raised. After discussion, Mr. Dilger volunteered the WETA-Washington office and staff to coordinate and plan events prior to and including the next meeting.

Two additions were suggested to Mr. Keenan's proposal:

7. Influence federal legislation and regulations.

8. Circulate information on issues which occur in different states - don't take positions on them at this time.

Mr. Thompson stated that he felt the overall goal is to get the Western Congressional Delegation voting in our best interests, and then to do what we can to see that they have a strong coalition to depend on. He also suggested that specific delegates be appointed for the annual "Think West" conference - individuals who would have the most effective influence on their congressmen.

There was also discussion regarding the number and type of representatives from each state. Mr. Thompson suggested that there be three - one the Executive Director of the WETA-type group from each state, one from labor, and one from business. Mr. Cook indicated that this may be a problem in a larger state where several organizations would qualify as a WETA-type group.

At this point, Mr. Bolin suggested that an ad hoc committee of this group be formed to meet during lunch, discuss the points made during the morning session, and come back after lunch with some specific suggestions..

The following ad hoc committee was appointed: Jim Cook, Joe Crosswhite, Paula Easley, Lynn Engdahl, Judy Henry, Chuck Keenan, Kent Lamberson, and John Thompson.

At 1:30 P.M., Mr. Crosswhite reconvened the meeting of the entire group, and asked Mr. Cook to summarize the ad hoc committee's meeting.

It was decided to establish a steering committee of three members per state. Ultimately, there will also be a group of two representatives for each federal legislator (not decided if these would be Senate or House representatives).

At this time, there will be no election of officers or solicitation of members. The following persons will be responsible for appointing/selecting the Steering Committee representatives for the state indicated: Washington - Chuck Keenan; Montana -Joe Crosswhite; Oregon - Lynn Engdahl; Alaska - Paula Easley; California -Jim Cook; and Idaho - Kent Lamberson (pending approval by various state organizations involved). These appointments/selections are not unchangeable, and number of representatives and involvement by individuals from states will be flexible.

Structure:

1. Establish one group to work with issues.

2. Establish one group to deal with legislation.

3. Establish a Communications Committee which is responsible for getting material to the various organizations involved, which organization then would distribute the material to their members. The material would be generated by the group or interest which desires the material circulated. Also, establish a method to get the information to the audience we are trying to reach.

4. The "Think West" function would be first held in the West for Western legislators, and from that conference, use the expertise and knowledge generated to determine how to carry the message to the Eastern legislators.

5. Sponsoring a "Great Western Debate" was also suggested.

The next meeting was decided to be held March 20, 1978, in Reno, Nevada. Those in attendance today were asked to send in to the WETA-Washington office their suggestions of others from other states to be invited to the next meeting.

The following responsibilities were assigned relating to the next meeting:

Ms. Easley - brir ; suggestions for a name for this group.

Mr. Cook - finalize structure.

Mr. Thompson - chair committee to identify issues and legislation which could possibly be addressed.

Mr. Keenan - Communications Chairman - present proposals for "Think West" conference, "Great Western Debate", and other similar events.

Mr. Thompson - bring guest speaker to speak on the nature and structure of our adversary.

Mr. Cook - make meeting arrangements, etc., for the meeting in Reno.

There being no further business, the meeting was adjourned at 2:00 P.M.

Respectfully Submitted,

Judy Henry, Executive Assistant
WETA-Washington

The Honorable Joseph L. Orsini
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Joe:

It was a pleasure to talk with you at the Western States Conference meeting in Spokane, February 13th.

Find enclosed information regarding WETA-Washington's role in d-2 legislation. I have enclosed our letter to CMAL which describes our present affiliation with that organization.

I agree with you that a follow-up program is needed regarding previous contacts with members of the House Interior Committee. I would suggest that you contact Tony Motley or Clarence Kramer of CMAL regarding their activities in this area.

I look forward to working with you and others in Alaska on the Western States Coalition in the near future.

Best regards.

Yours truly,

Charles T. Keenan
Executive Director

Enclosures

January 9, 1978

Mr. James F. Clark
Robertson, Monagle,
Eastaugh & Bradley
Attorneys at Law
217 - 2nd Street
Juneua, Alaska 99801

Dear Jim:

I believe the meeting among Clarence Kramer, Jim Rynearson, Larry Keenan, you, and myself was worthwhile and will accomplish the coordination and leadership needed for the d-2 legislative efforts.

Pursuant to our conversation, WETA-Washington's activities will be as follows:

1. Responsibility for contact and coordination of overall efforts will be with Tony Motley and Citizens for the Management of Alaska Lands (CMAL).

2. Contacts, questions, etc., will be through the CMAL office in Washington, D.C. or as directed by CMAL.

3. WETA-Washington will conduct ARCTIC activities in conjunction with CMAL as follows:

   a. WETA-Washington will conduct in-district contacts, and will have primary responsibility for selected legislators in the Northwest.

   b. WETA-Washington will contact and be primary coordinator for selected Congressmen in other parts of the country, as assigned by CMAL.

   c. WETA-Washington will follow-up by telephone and mail, on those Congressmen previously contacted, for the purpose of introducing them to contacts selected by CMAL. CMAL selected contacts will have the primary responsibility for the selected congressional contact.

4. Regarding the Congressmen for whom WETA-Washington has primary responsibility, the following methods for maintaining contact and coordination will be utilized:

(11)

a. In-district visitation, including visual display, and in some instances, "response packet" distribution.

b. A follow-up from Seattle and Washington, D.C. to generate needed response.

Enclosed find a list of Congressmen, in priority-contact order, and a revised budget for ARCTIC II.

At the present time, WETA-Washington has been conducting fund-raising activities among three major groups. In the future, all budgets and invoices will be submitted to CMAL directly, who will conduct all fund-raising efforts. Organizations and firms previously contacted by WETA-Washington will be informed of the above, and will be referred to you for all future funding for ARCTIC II.

WETA-Washington requests that the current project deficit of approximately $6,000 retired by CMAL, and that funding, in approved increments, be forwarded to WETA-Washington in advance, based on an approved estimated budget.

Best regards.

Yours truly,

Charles T. Keenan
Executive Director

1/9/78

WETA-Washington Priority Contact List
House and Senate

Following is a list of House Interior Committee members and their Senate Energy and Natural Resources Committee counterparts listed by state and priority.

Priority I

Washington - House: Meeds Senate: Jackson
Expansion of WETA ARCTIC I with Seattle Chamber's Alaska Resource Committee (Blumenfeld)

Idaho - House: Symms Senate: McClure and Church
Through WETA-Idaho, Building Trades, and Laborers. Strong labor and business contacts.

Montana - House: Marlenee Senate: Metcalf
Marlenee is freshman Congressman. Metcalf sponsor of S1500 - expansion of HR39. WETA-Montana as nucleus. Strong labor and business contacts.

Colorado - House: James Johnson Senate: Haskell
Johnson is worthy of additional effort to assure his vote. No ARCTIC I activity. Mining to be nucleus of "in district" meetings.

Wyoming - House: Roncalio Senate: Hansen
Roncalio, as lame duck, is deserving of additional effort. ARCTIC I contact limited. Keys will be mining, oil, and Laborers and State Building Trades.

Oregon - House: Weaver Senate: Hatfield
WETA-Oregon and Eugene-Medford based labor will be key to "in district" involvement.

The above itinerary would involve a trip - Seattle to Boise to Helena (Billings) to Cheyene to Fort Collins (Colorado).

Washington and Oregon would be handled by auto from Seattle base.

For each stop (state) there would be allocated two days for "in-district" meetings and involvement motivation.

Priority II

California - House: Burton, G. Miller, Krebs, Clausen, Lagomarsino No Senate
All California representatives are members of full committee - no subcommittee members. ARCTIC I established good labor commitments from State Building Trades and State AFL-CIO. Forest product participation will be limited, due to Redwood espansion issue. Look to WOGA for help on oil and overall assistance.

Nevada - House: Santini Senate: Laxalt
ARCTIC I d-2 commitments from Building Trades. Look to industry help from Nevada miners.

New Mexico - House: Lujan and Runnels Senate: Domenici
No ARCTIC I contact. Delegation would appear supportive of Young. Listed as priority due to State Congressional delegation's d-2 committee positions.

Arizona - House: Udall and Rudd No Senate
ARCTIC I established good base for "in-district" involvement.

Utah - House: Marriott No Senate
Marriott is freshman Congressman and deserving of "in-district" effort. Good ARCTIC I labor contact.

Priority III

Minnesota - House: Vento No Senate
ARCTIC I "in-district" established good labor base. Vento is considered swing. WETA assessment: Vento can be brought into our column through additional "in-district" efforts.

Michigan - House: Ruppe No Senate
Ruppe, by voting analysis and present assessment, could be worthy of "in-district" efforts. ARCTIC I did not visit Ruppe's district.

Pennsylvania - House: Kostmayer and A. Murphy No Senate
ARCTIC I established good base with Penn. labor. Feel this has moved A. Murphy. Kostmayer, though a sponsor of HR39, could be moved to "compromise" legislation through intensified "in-district" effort.

New York - House: Bingham and McHugh
Bingham is a "lost cause". McHugh has been assessed as pivotal to subcommittee vote. ARCTIC I established good New York City based labor support. This could be extended to localize to McHugh's.

Priority IV

Meet and transfer rapport with assigned responsibility of individuals.

Massachusetts - House: Tsongas and Markey
ARCTIC I

West Virginia - House: Rahall
ARCTIC I

North Carolina - House: Gudger
ARCTIC I

Indiana - House: Sharp
ARCTIC I

Wisconsin - House: Kastenmeier
ARCTIC I

Texas - House: Eckhardt and Kazen
ARCTIC I Eckhardt worthy of additional effort

WETA-WASHINGTON
ARCTIC PROJECT ACTIVITIES

Formulation of Project

Following the June 18th Alaska d-2 lands hearing of the Alaska Subcommittee in Seattle, Washington, the Western Environmental Trade Association of Washington, Inc. (WETA-Washington) met with mining, oil, labor, and forest product representatives of Washington, Alaska, and national interests.

This group asked WETA to utilize its expertise with the House Interior Committee and to develope a project to limit the acreage, resource impact, and job losses of eventual Alaska National Interest Lands (d-2) legislation.

ARCTIC I - July 1st through October 15th, 1977

This portion of the project, the Alaska Resources Committee To Influence Congress (ARCTIC), entailed the establishment of local labor-business contact with supportive interests in 29 of the 46 House Interior Committee districts.

This was accomplished through in-district (within Congressional Districts) meetings conducted by WETA during August and September to familiarize local constituents with the economic and resource tradeoffs of the Alaska d-2 lands issue. These individuals were then urged to support the WETA guidelines utilizing model resolutions, position papers, etc., through their unions, chambers, AGC chapters, and industry associations.

Each of these ARCTIC meetings included representation from local and/or state Building and Construction Trades Councils as the catalyst for labor d-2 involvement. (See ARCTIC preliminary report)

WETA-Washington's strategy anticipated that Washington's Congressman Meeds, senior member of the House Interior Committee, and Senator Jackson, Chairman of the Senate Energy and Natural Resources Committee, would play key roles in Alaska d-2 lands legislation development.

ARCTIC's in-district campaign for Congressman Meeds, involved labor councils, chambers, and industry groups within the 2nd District. This led to letter campaigns, resolutions, and constituents/Meeds meetings within the Congressman's district.

ARCTIC I Influence

During ARCTIC I's timespan (July 1st through October 15th) the following occurred:

1. Washington, D.C. industry spokesmen reported that ARCTIC succeeded in establishing d-2 as an issue in selected Congressmen's local districts and further eliminated a vote for locking-up Alaska as a free environmental vote.
2. Interior Committee minority staff reported that activity suddenly occurred among Democratic Interior Committee Members for "some sort" of compromise legislation.
3. Congressman Meeds announced plans to introduce alternative d-2 legislation in January session.

ARCTIC II - November, 1977 through February, 1978

ARCTIC II includes activities already accomplished at the Building Trades Department and AFL-CIO National Conventions in Los Angeles in late November and early December, respectively.

ARCTIC II also provides for WETA involvement in Washington, D.C. during markup.

At the National labor conventions, WETA-Washington arranged to meet with national labor legislative staff in Washington, D.C. for briefing and strategy sessions regarding further lobbying efforts.

ARCTIC II (interim) Events

1. Building Trades Department Resolution
2. AFL-CIO Resolution
3. WETA-Washington Labor D.C. Coordination Arrangement
4. National AGC Resolution
5. Washington State WETA Labor/Meeds meeting
6. Political assessment of HR 39 demise. Present assessment of subcommittee members would project enough votes to support "compromise" d-2 legislation.

ARCTIC II Continuation

Funding of a continued WETA-Washington Alaska d-2 lands involvement will avail Washington, D.C. d-2 interests of ARCTIC I's in-district contacts, provide WETA-Washington in a continuing role with Congressman Meeds, and place WETA in a labor advisory and overall coordinating capacity to the d-2 labor-industry task force.

1977 ANNUAL MEETING

WESTERN CONFERENCE

Santa Fe, New Mexico

September 25-28

PROPOSED RESOLUTIONS & POLICY POSITIONS

I. ALCOHOL ABUSE

II. EDUCATION FOR HANDICAPPED

III. HEALTH CARE COST CONTAINMENT

IV. WELFARE REFORM

V. HYDROELECTRIC PRODUCTION AND ENERGY

VI. NATIONAL ENERGY ACT AND PUBLIC UTILITY REGULATION

VII. NATIONAL WATER POLICY STUDY

VIII. FEDERAL LAND MANAGEMENT

IX. FEDERAL PUBLIC LANDS

X. DEFINITION OF AN ECONOMIC UNIT FOR PURPOSES OF THE FEDERAL RECLAMATION ACT OF 1902

XI. RESOLUTION ON NATIONAL WILDERNESS PRESERVATION SYSTEM POLICY

XII. TRANSFER OF SELECTED IN-LIEU AND EXCHANGE LANDS

XIII. RESOLUTION ON INDIAN JURISDICTION

XIV. U.S. DEPARTMENT OF TRANSPORTATION PAPERWORK REDUCTION STUDY

XV. GASOLINE ALLOCATION

XVI. COMMUTER AIRLINE SERVICE

XVII. AMERICAN INDIAN POLICY REVIEW COMMISSION

XVIII. MECHANISM FOR THE DEVELOPMENT OF A WESTERN COALITION ON ENERGY, LAND, WATER, AND AGRICULTURE

XIX. PARTICIPATION IN THE WESTERN STATES WATER COUNCIL

XX. PROPOSED AMENDMENTS TO THE RULES OF THE WESTERN CONFERENCE

XXI. GUIDELINES FOR THE PROCESSING AND FOLLOW-UP ACTION ON POLICY POSITIONS APPROVED BY THE WESTERN CONFERENCE OF THE COUNCIL OF STATE GOVERNMENTS

XXII. APPOINTMENTS TO THE WESTERN CONFERENCE COMMITTEES

I. ALCOHOL ABUSE

WHEREAS, the abuse of the drug, alchol, is a problem common to every state and territory in the nation and,

WHEREAS, the abuse of alcohol affects children and adults alike, through welfare costs, police services, court costs, and disruptions of family life, and,

WHEREAS, alcohol related accidents drive up the cost of auto insurance for every automobile owner.

THEREFORE BE IT RESOLVED THAT:

1. Information on the harmful effects of alcohol be required in the entire educational process.

2, Attempts be made to require insurance companies to recognize alcoholism as a disease in dealing with the diseases caused by alcohol.

II. EDUCATION FOR HANDICAPPED

WHEREAS, the framers of our Constitution in their wisdom, left to the several states the right to provide education for the citizens within their jurisdiction; and

WHEREAS, each state and territory has different sociological, econmic, geogaphic needs and problems; and

WHEREAS, the Education for All Handicapped Children Act represents a significant expansion of requirements upon the states to provide services to students with handicapping conditions; and

WHEREAS, concurrent development of Vocational Rehabilitation and Vocational Education regulations place further requirements upon school districts and other providers of public services;and

WHEREAS, while we commend the goals and directions of the Act, and as states and citizens are anxious to extend the opportunity for quality education to all students, we must also act responsibly to guide the implementation of federally imposed standards and programs; and

WHEREAS, the Education Act requires designation of the State Educational Agency as the sole supervisory authority for all programs and services to the handicapped, a provision which conflicts with state law and practice in many jurisdictions; and

WHEREAS, the requirements for an Individual Education Program evaluation for each handicapped student are comprehensive and detailed, and seem in the view of some state officials to create a potential basis for legal adversary proceedings; and

WHEREAS, the provisions of these two federal programs are indicative of a continuing and expanding policy of encrochment upon traditional state and territorial policy areas and represent a trend which contradicts legitimate state and territory concern; and

WHEREAS, the federal funding commitment lags far behind the implementation dates imposed upon states, placing the primary financial burden upon school district state education systems, and state service providers.

NOW, THEREFORE BE IT RESOLVED by the Western Conference of the Council of State Governments, meeting in Santa Fe, that Congress instruct the Department of Health, Education and Welfare through its Office of Education to allow the various states and territories to assess their educational needs and goals and permit the states and territories to assist in designing the programs needed to resolve the special education needs as well as other educational requirements of their respective jurisdictions.

III. HEALTH CARE COST CONTAINMENT

WHEREAS, the rising costs of medical care represent a significant financial burden upon the states and our citizens without apparant increases in quality of services which warrant such costs; and

WHEREAS, federal intervention through mandated limits to increasing costs would not represent a viable solution to the legitimate concerns about health care cost containment; and

WHEREAS, systems of health care vary widely from state to state and any program of cost containment must respect the diversity represented; and

WHEREAS, each state and territory should be authorized and encouraged to develop innovative programs, demonstration projects, and feasibility studies in response to the unique needs of the state; and

WHEREAS, while developing systems of cost containment, policy makers should also be cognizant of the value of preventive health methods as a control on increasing costs.

NOW, THEREFORE BE IT RESOLVED by the Western Conference of the Council of State Governments, meeting in Santa Fe, that as Congress develops the federal approach to health care cost containment, we urge that the respective states be given the opportunity to develop state programs which are responsive to state needs. Unnecessary and duplicative federal mandates should be avoided and emphasis should be placed upon state program initiatives to achieve health care cost containment.

IV. WELFARE REFORM

WHEREAS, the President of the United States has undertaken and submitted to Congress a comprehensive program of welfare revision with impact upon all of the states and our citizens, and

WHEREAS, the President, through the Department of Health, Education, and Welfare, has held hearings throughout the nation, and has listened to the comments of state policy makers, state administrators, and citizens, and

WHEREAS,many features of the proposed welfare reform continue to be of concern to state legislators, including the role which the states will play in the administration of the program, the fiscal relief envisioned for states, the development of an alternative work and training program, the inclusion of medical coverage for those eligible, and others; and

WHEREAS, some specific problem areas of the proposal warrant careful consideration including the impact upon recipients and eligibility criteria, the inadequacies of provisions for emergency response, the intention to make eligibility determinations and payments through federal structures completely by-passing the states, and the cursory attention given to the subject of medical eligibility, and

WHEREAS, the on-going development of welfare reform as it progresses through the legislative process will continue to be of great interest and concern to state legislators;

BE IT RESOLVED by the Western Conference of the Council of State Governments, meeting in Santa Fe, that the Congress of the United States and the President, acting through the Secretary of the Department of Health, Education, and Welfare, be prepared to give specific response to concerns of the states and territories of the Western Conference in the continuing development of the welfare reform proposal.

V. HYDROELECTRIC PRODUCTION AND ENERGY

WHEREAS, there is created a new Federal Department of Energy, which will take over from the Bureau of Reclamation the marketing of Electric Energy and transmission related to Hydro projects,

WHEREAS, the Bureau of Reclamation has done a commendable job in administering this program; and

WHEREAS, these projects are almost all located in the Western part of the United States,

NOW THEREFORE BE IT RESOLVED by the We ern Conference Committee on Energy and Resources, that the new Departme . of Energy establish a Western office in some accessible city in the West to market and administer the Electric Energy and transmission serving the Bureau of Reclamation Hydro projects; and,

BE IT FURTHER RESOLVED that the Department of Energy draw heavily from the present Bureau of Reclamation staff, who are familiar with the needs of the western region to administer this portion of the Department's programs.

BE IT FURTHER RESOLVED that copies of this resolution be forwarded to the state legislatures of South Dakota, Nebraska, North Dakota, Minnesota, Iowa, Kansas, and the Bureau of Reclamation, Department of Energy, and the Congressional delegation of the western region.

VI. NATIONAL ENERGY ACT AND PUBLIC UTILITY REGULATION

States traditionally have been responsible for public utility electric and gas regulatory matters at the retail and intrastate level, including establishing consumer rates. Part E of the National Energy Act (S. 1469) would deprive the states of this traditional responsibility.

The Western Conference of the Council of State Governments opposes the federal preemption of the states' regulatory authority over electric and natural gas utility operations, including the right of the states to regulate consumer rates to be charged for these services.

The Western Conference of the Council of State Governments therefore urges the Congress to delete Part E from S. 1469 and preserve the right of the states to regulate public utilities within their borders.

VII. NATIONAL WATER POLICY STUDY

WHEREAS, a true National Water Policy should combine federal, state and local policies to form the overall strategy for guiding present and future water resource management and development;

WHEREAS, the Western Conference of the Council of State Governments believes that a National Water Resources Policy should respond to state goals and objectives, reflecting the diversity of economic, social and environmental problems of individual states and regions of the nation;

WHEREAS, the proposed options in the Natural Water Policy Study (Federal Register, July 15 and July 25, 1977) do not fully recognize the differing regional problems;

WHEREAS, formulation of the policy cannot be accomplished without the participation of water interests throughout the country; and

WHEREAS, most states have established or are improving their systems of water law to meet individual economic and environmental needs.

NOW, THEREFORE, be it resolved by the Western Conference of the Council of State Governments that it unequivocably opposes intrusion of the federal government into water resource areas traditionally managed by the states. In particular, the Western Conference opposes any attempt by the federal government to usurp the role of the states in allocating, distributing and adjudicating water rights;

BE IT FURTHER RESOLVED that the Western Conference of the Council of State Governments recognizes a need for clarification and improved coordination of federal water policy among federal agencies; this clarification, however, should recognize and strengthen the states' role in water administration;

BE IT FURTHER RESOLVED that because many of the options proposed by the National Water Resources Policy Study are unclear, unrealistic or unworkable, the Secretary of the Interior be requested, upon completion of additional public review, to provide state policymakers an adequate opportunity to review and comment on all water policy recommendations that the Secretary intends to present to the President.

BE IT FURTHER RESOLVED that all water rights be recognized as a property right as established by the laws of the various states and territories.

BE IT FURTHER RESOLVED that a copy of this resolution be forwarded to the President of the United States and the Secretary of the Interior.

VIII. FEDERAL LAND MANAGEMENT

WHEREAS, there is a continuing and increasing effort on the part of the federal government to designate vast acreages of federal lands in the West for use, conservation and management without regard for input from the State and local governments of the Western Region; and

WHEREAS, input to federal land classification and management decisions from Western State and local government has been ignored or overridden by administrative and Congressional actions; and

WHEREAS, recent federal land management decisions have tended to be overly restrictive and single-purpose use oriented rather than addressing the diverse needs of all the people; and

WHEREAS, pending federal legislation regarding federal lands in the West, such as H.R. 39, would have the effect of establishing dangerous precedents encroaching upon historical state and local government land, resource and wildlife management preogatives and violating the fundamental principles of States' rights; and

WHEREAS, federal land management decisions and regulatory authority frequently have unreasonable and confiscatory effects upon adjacent and nearby state, local government, and private lands; and

WHEREAS, the majority of all federal lands in the United States are located in the Western States and these same Western States have the capability to fulfill many of the renewable and non-renewable resource needs of the entire country but are being denied these opportunities by federal land use, conservation and management policies and regulatory controls;

NOW, THEREFORE, BE IT RESOLVED that the Western Conference of the Council of State Governments vigorously opposes H.R. 39 (the Alaska National Interest Lands Conservation Act) and any other pending or proposed federal legislation which usurps States' rights, revokes state management of state resources, ignores input from state and local governments, and revokes established state-federal land selection provisions; and

BE IT FURTHER RESOLVED that the Western Conference of the Council of State Governments urges the federal land management agencies of the U.S. Department of the Interior to join with the Western States to establish a more meaningful process of input from State and local governments to federal land management decisions and policy development; and

BE IT FURTHER RESOLVED that the Western Conference of The Council of State Governments urges federal land management agencies of the U.S. Department of the Interior and the U.S. Congress to be more mindful of their obligations to meet all the needs of the people consistent with the preservation of wilderness values.

IX. FEDERAL PUBLIC LANDS

WHEREAS, 93.5 percent of all federal public lands are contained within twelve western states;

WHEREAS, federal public lands comprise 63.6 percent of the total land area of the twelve states;

WHEREAS, the representation of these western public land states in the United States House of Representatives amounts to 17 percent of the total voting power;

WHEREAS, non-western states have representation in the United States House of Representatives amountin to 83 percent of the voting power, while only 6.5 percent of the federal public lands are located within their boundaries;

WHEREAS, this disparity between the amount of public land in the western states and their political power causes the following conditions to exist:

1. Land use policies made through such laws as the Mineral Leasing Act, Historic Preservation Act, the Endangered Species Act, the National Forest Management Act of 1976, the Federal Land Policy and Management Act and the Natural Environmental Policy Act, among others, control vast land areas of the western states with little regard for the knowledge, experience and needs of the western states and those who live on or near these lands.

2. In addition to that determined by law, much of the land use policy of the western states is developed by administrative rule and regulation through policy-making power residing outside of the states' boundaries.

3. Virtually all of the nation's energy reserves are in the West, but the federal government controls the power to develop those resources.

4. The federal government through Congressional action and administrative fiat controls not only the development of public lands but indirectly controls the development of state and private lands encircled by the federal public lands;

WHEREAS, the BLM Organic Act (P.L. 94-579) declares that it is the policy of the United States that the public lands be retained in federal ownership;

WHEREAS, the Western Conference of the Council of State Governments believes these facts to describe a situation reminiscent of colonialism that is contrary to the following constitutional and legal doctrines:

1. The doctrine of equal protection

2. The doctrine of equal footing

3. The Tenth Amendment reservation of residual power in the several states

4. The common law doctrine of fiduciary trust

5. The Fifth Amendment guarantee of just compensation for the taking of private property; and

WHEREAS, the inequities herein described interfere with the rightful exercise of sovereign power by western states and unduly restrict their citizenries in the control of their own destinies.

NOW, THEREFORE, BE IT RESOLVED by the Western Conference of the Council of State Governments that it adopt the position that the described disparities are intolerable to the Western United States; and,

BE IT FURTHER RESOLVED that the Western Conference of the Council of State Governments act to seek remedy through legislative action and at the same time prepare to seek redress through the courts from the flagrant inequities placed upon the West by past precedents and policies of the federal government and crystallized by the BLM Organic Act.

X. DEFINITION OF AN ECONOMIC UNIT FOR PURPOSES OF THE FEDERAL RECLAMATION ACT OF 1902

WHEREAS, the U. S. Department of the Interior intends to promulgate regulations within the 1902 Federal Reclamation Act which will limit the acreage farmers can reasonably expect to farm and make a living; and

WHEREAS, the promulgation of these regulations will fall under the law with the interpretation of an Act written in 1902; and

WHEREAS, the Act mandates a standard of 160 acre limitation for farmers using present irrigation methods; and

WHEREAS, farming conditions have changed significantly over the years;

THEREFORE BE IT RESOLVED by the Western Conference of The Council of State Governments that we would propose that the Administration and the U.S. Department of the Interior reconsider their definition of an "economic unit" for the purposes of the Act, in relationship to the 160 acre limitation.

XI. RESOLUTION ON NATIONAL WILDERNESS PRESERVATION SYSTEM POLICY

WHEREAS, additional acreage in the western states is being considered for inclusion in the National Wilderness Preservation System; and

WHEREAS, the designation of large areas of the western states as federal wilderness areas prohibits the harvesting of timber, prevents the development of needed mineral resources and makes difficult the improvement of range land by the reseeding of grasses, the eradication of brush and nonproductive vegetation, the control of forest fires and diseases and the development of water resources, thereby limiting the national food supply and decreasing the value of wildlife habitat; and

WHEREAS, by such designation, the multipleuse concept of federal lands is being undermined, thereby eliminating the utilization of those lands by the majority of our citizens for recreation, resource development and other beneficial use; and

WHEREAS, the largest amount of federal land is located within the western states whose economy and governments are handicapped by the consequent loss of tax revenue, employment opportunities and national resource development; and

WHEREAS, the Roadless Area Review Evaluation II Study has, as its purpose, the expansion of the wilderness system by the inclusion of additional large tracts of western lands, without sufficient consultation, communication or involvement with the state and local governments affected; and

WHEREAS, federal lands belong to the entire citizenry of our nation and should be managed under multiple-use concept for the benefit of all;

NOW, THEREFORE, BE IT RESOLVED BY THE WESTERN CONFERENCE OF THE COUNCIL OF STATE GOVERNMENTS that the United States Congress and the Secretaries of Agriculture and the Interior be requested to refrain from designating any additional federal lands west of the 100th meridian for inclusion in the National Wilderness Preservation System without express consent of the governor and the legislature of the affected state, and, further, that those areas in the American West presently included in the National Wilderness Preservation System be reevaluated for their possible return to multipleuse management; and

BE IT FURTHER RESOLVED, that, prior to the review of the suitability of any lands for inclusion in the National Wilderness Preservation System, the Congress of the United States through its appropriate committees, confer with and seek the cooperation and approval of the state and local governments affected by such inclusion; and

BE IT FURTHER RESOLVED, that copies of this resolution be delivered to the President of the United States, the President Pro Tempore of the United States Senate, the Speaker of the United States House of Representatives, the Secretaries of Agriculture and the Interior and to the Congressional Delegation of each of the member states of the Western Conference of the Council of State Governments and each of the six easterly adjoining states.

XII. TRANSFER OF SELECTED IN-LIEU AND EXCHANGE LANDS

WHEREAS, there exist in the Western States large tracts of the unappropriated and unreserved public domain to which the individual states are entitled by Acts of Congress, and

WHEREAS, the Bureau of Land Management has failed to act in a timely and properly manner of selected in-lieu lands and exchange lands which are due the individual states,

NOW, THEREFORE, BE IT RESOLVED that it is the sense of the Western Conference of The Council of State Governments that the Bureau of Land Management be encouraged and assisted to speedily and completely transfer all selected in-lieu lands and exchange lands to the respective states.

XIII. RESOLUTION ON INDIAN JURISDICTION

WHEREAS, the Western Conference Committee on Judiciary, having examined and studied Indian Jurisdiction, finds the matter to be of extreme import and complexity;

WHEREAS, Indian Jurisdiction will continue to be of major importance and concern to all states;

WHEREAS, even though a preliminary position paper has been prepared, further study and publication is necessary in order to properly deal with the questions evolving in the field of Indian Jurisdiction;

NOW, THEREFORE BE IT RESOLVED that the position paper presented to the Western Conference of The Council of State Governments be published as an article in the appropriate publication of CSG, and that this article be forwarded to all members of Congress and the President of the United States;

BE IT FURTHER RESOLVED that the Western Conference Committee on Judiciary proceed in further examination of Indian Jurisdiction and further present a position paper for the considerations of the members of the Western Conference of The Council of State Governments.

XIV. U.S. DEPARTMENT OF TRANSPORTATION PAPERWORK REDUCTION STUDY

WHEREAS: The State Highway and Transportation agencies of the several states have been increasingly burdened as a result of unnecessary Federal Rules and Regulations; and,

WHEREAS: the processes resulting from unnecessary rules and regulations have resulted in paper work and time delays on federally aided highway projects; and,

WHEREAS: these delays have resulted in increased cost of highway construction projects; and,

WHEREAS: a task force established by the Federal Highway Administrator has conducted an extensive study of federal procedures to identify how the red tape may be reduced; and,

WHEREAS: the members of the task force have recommended changes that could materially reduce the delays in processing federal aid projects;

NOW THEREFORE, BE IT RESOLVED: that the Western Conference of the Council of State Governments urge the Secretary of the Federal Department of Transportation and Federal Highway Administrator to adopt the recommendations of the task force as proposed in the Federal Register; and,

BE IT FURTHER RESOLVED: that the Secretary of the Federal Department of Transportation and the Federal Highway Administrator be commended for their outstanding effort in seeking to reduce the red tape and delays attendant in processing Federal Aid Highway Projects.

XV. GASOLINE ALLOCATION

WHEREAS, the new Department of Energy has been recently developed by the Carter Administration; and

WHEREAS, the legislation which will establish the new department will also drop the present gasoline allocation plan as established by the present Federal Energy Agency;

THEREFORE BE IT RESOLVED, that the Western Conference of the Council of State Governments would encourage that the Congress reconsider the plan to drop the present gasoline allocation plan.

XVI. COMMUTER AIRLINE SERVICE

WHEREAS, the Western Conference of The Council of State Governments, recognizing the need of the communities of the West for an adequate transportation system, and

WHEREAS, to make air transportation an effective and responsive force in achieving goals for social, economic, and environmental development, and conservation of entitled resources; and

WHEREAS, to provide for optimum and broader use of federal funds as they become available; and

WHEREAS, to promote the development and continuation of privately owned air commuter service;

BE IT THEREFORE RESOLVED that the Western Conference of The Council of State Governments urges the U.S. Congress to support legislation that would protect and promote air service to small communities; and,

BE IT FURTHER RESOLVED that copies of this resolution be distributed to the appropriate federal agencies, members of The Western Congressional delegation and appropriate state offices and agencies.

XVII. AMERICAN INDIAN POLICY REVIEW COMMISSION

WHEREAS, the American Indian Policy Review Commission has recently completed its report to Congress;

WHEREAS, the Commission Report has assumed as first principles that all policy and legal issues in contemporary Indian law should be resolved in favor of the Indians;

WHEREAS; the Western Conference of the Council of State Governments believes that the Commission Report fails to recognize the following facts:

1. That the Constitution of the United States provides for only two sovereign powers -- the United States and the several states within their shperes of influence.

2. Indian tribes are political subdivisions of the United States and are not sovereign in their own sphere.

3. Powers not specifically denied by treaty are not reserved to the tribes.

4. The intent of the Federal Congress in establishing Indian self-government was purposive in nature, to maintain tribal integrity and identity. Therefore, Congress did not intend Indian government to be general or territorial in nature.

5. There is no legal doctrine whereby one entering the land of another consents to general lawmaking and enforcing authority of the landowner.

6. The Commission Report fails to recognize that Indian tribes are no longer isolated communities; and

WHEREAS, the granting of sovereignty to Indian tribes and the necessary inclusion of non-Indians under their jurisdiction will destroy the ability of Indian peoples to make their own laws and be governed by them.

NOW THEREFORE, BE IT RESOLVED by the Western Conference of the Council of State Governments that it agree with the Minority Report of Congressman Lloyd Meeds, Vice Chairman of the American Indian Policy Review Commission, that Americans are justified in believing that 400 years have been sufficient to quiet title to the continent;

BE IT FURTHER RESOLVED that the Western Conference also agrees with the following recommendations and opinions of the Minority Report:

1. That Congress should enact comprehensive legislation defining the scope and nature of tribal self-government, making clear that tribal governmental powers are limited.

2. Legislation should be enacted directly prohibiting Indian courts from excercising criminal jurisdiction or civil jurisdiction over any non-Indian or Indian who is not a member of the tribe which operates the court.

3. Congress should enact legislation allowing civil jurisdiction in state courts against Indian defendants in all cases where states would have jurisdiction were it not for Indian status of the defendant, and tribal government does not provide a judicial forum. Tribal interests could be protected by providing that rules of decision must be given appropriate weight in state courts.

4. Congress should bar actions by Indians against non-Indians for claims arising on reservations where tribes have not provided forums for similar actions by non-Indians against Indians.

5. Congress should enact legislation confirming that states have the same power to levy taxes, the legal incidence of which falls upon non-Indian activities or property, on Indian reservations as they have off Indian reservations. The exemptions to this blanket state authority should come in instances where federal regulation of special subject matter would preempt state regulation.

6. Congress should expressly proscribe the authorization for tribal taxation of nonmembers or property of nonmembers.

7. With regard to the Indian Civil Right Act of 1968, if Indian governments are to excercise governmental powers as licensees of the United States, it is imperative that they be fully answerable for the improper excercise of those powers.

8. To the extent that chosen national Indian policy entails financial burdens on persons other than Indians, it is neither fair nor rational for those burdens to be cast disproportionately on the taxpayers of the states in which Indian reservations are situated.

9. Congress should undertake to define "Indian Country" for the various purposes for which the term is used.

10. In regard to the operation of Public Law 280, if withdrawal from state jurisdiction is to be done on grounds of federal policy, the policy choices should be made by Congress, which can weigh fairly the cost of balkanizing state jurisdictions as well as the advantages to Indians.

11. In the Absence of ultimate authority over Indian land use planning lying with federal officials, the fairest system would be to place final authority in state planning agencies in which Indians would participate equally with other affected citizens.

BE IT FURTHER RESOLVED, that copies of this resolution be delivered to the President of the United States, the President Pro Tempore of the United States Sentae, the Speaker of the United States House of Representatives, the Secretaries of Agriculture and the Interior and to the Congressional Delegation of each of the member states of the Western Conference of the Council of State Governments and each of the six easterly adjoining states.

XVIII. MECHANISM FOR THE DEVELOPMENT OF A WESTERN COALITION ON ENERGY, LAND, WATER, AND AGRICULTURE

Whereas, there is a need to balance the interests of western American into national/subnational policy, including law, rule, or regulation; relating to land, water, energy, and agriculture; and,

Whereas, at the present time there is no formal mechanism established wherein the voice of western Governors, legislatures, county officials or city officials can coalesce on issues of mutual concern; and,

Whereas, it is evident on many occasions that there is often expressed to officials in Washington, D.C. a variety of western feelings and policy statements on issues in land, water, energy, and agriculture; and,

Whereas, oftentimes this divergence of opinion can be detrimental to the West as a whole;

Therefore be it resolved that The Western Conference of The Council of State Governments do hereby acknowledge the need for Governors, legislatures, and city and county officials to join into a coalition effort and establish a mechanism with existing organizations in the western region, to, where possible, develop policies of mutual agreement and transmit those policies to the proper federal elected and appointed officials in Washington, D.C. and,

Be it further resolved that there be an appointment of equal membership from each western state to formalize the procedures for the coalition effort.

Senator Ernest Dean, Utah
Chairman, Committee on Energy and Resources

XIX. PARTICIPATION IN THE WESTERN STATES WATER COUNCIL

The Western Conference of the Council of State Governments, at its 1977 Annual Meeting in Santa Fe identifies that water and related issues are of major importance to states from the perspective of both the executive and legislative branches of governments.

The Western States Water Council, established by the governors of the West had proven to be a sucessful tool in assisting the governors in areas of water policy. Since the inception of the Western States Water Council in 1965, there has been a working relationship between WSWC and the Western Conference of the Council of State Governments. Invaluable information has been provided to assist the Conference in its efforts to speak to water issues.

The Western Conference, in its efforts to avoid conflict in water policy areas and duplication of services, and recognizing the importance of water and its related impact on all the Western States, desires to become more actively involved in activities of the Western States Water Council. It is therefore requested that each governor give serious consideration to appointing, as a member of his or her delegation to the Western States Water Council, a member of their state legislature.

It is urged that each member of the Western Conference Executive Committee, visiting with his or her governor to explain the reasoning behind this effort and that the members will report the results of the discussion at the next meeting of the Western Conference Executive Committee. The President of the Senate and the Speaker of the House of

Representatives from the State of Utah are urged to convey the sentiments and feelings of this resolution to the Council members at the next meeting of the Western States Water Council, which will be held in Salt Lake City, October 14.

XX. PROPOSED AMENDMENTS TO THE RULES OF THE WESTERN CONFERENCE

XIII. AMENDMENTS - The Rules of the Conference and any amendments thereto may be adopted, altered, amended, added to or repealed at any annual meeting of the Conference by a majority vote of all member states, voting by state, provided that a notice of such amendments be filed with the Director of the Western Office of The Council of State Governments at least thirty (30) days prior to the meeting. Upon receipt of a copy of the proposed amendments, the Director shall forward copies thereof to the presiding officers of each house of every member legislature and to the members of the Western Conference Executive Committee.

The following recommended amendments to the rules have been reviewed and approved by the Western Conference Executive Committee and the Western Conference Resolutions Committee; (language to be deleted is struck out; new language is in caps)

VI. OFFICERS fficers of the Conference are Chairman, Chairman-elec., ~~and Vice-Chairman.~~ The Chairman-elect shall be elected from anong the state delegates or alternate members of the Executive Committee who have been formally designated by the appropriate appointing authority in his or her State. THE CHAIRMAN-ELECT PRESIDES IN THE ABSENCE OF THE CHAIRMAN AND WILL SUCCEED TO THAT OFFICE IF THE CHAIRMAN RESIGNS OR LEAVES STATE SERVICE. The Executive Committee may fill an officer vacancy occuring between annual meetings in conformity with the qualifications stated in this rule.

VIII.a. Committee Membership. The Chairman of the Conference at the beginning of each biennium shall request the appointing authorities in each state to name, within 60 days, individuals to each study committee, on which it wishes representation -- the appointments to include at least one member from each house of the legislature, a legislative staff agency head or his designee, and at least one executive branch agency official appointed by the Governor whose position and competence would contribute to the work of the committee. MEMBERS OF THE STUDY COMMITTEE SHALL SERVE UNTIL REPLACED.

XXI. GUIDELINES FOR THE PROCESSING AND FOLLOW-UP ACTION ON POLICY POSITIONS APPROVED BY THE WESTERN CONFERENCE OF THE COUNCIL OF STATE GOVERNMENTS

The following guidelines shall be observed, in the name of the Western Conference of the Council of State Governments, regarding policy positions approved by the Western Conference of The Council of State Governments.

1) Policy positions, drafted in simple, clear and concise Terms are preferred in accordance with By-Law #2;

2) Policy positions shall be forwarded by the Executive Committee, through the actions of the Chairman of the Conference to the Governor, the President of the Senate and the Speaker of the House or Assembly of each of the member states and territories of the Western Conference;

3) Policy positions that urge action by the Congress of the United States will be forwarded to the President of the United States, the Vice President of the United States, the President Pro Tem of the Senate and the Speaker of the House of Representatives and to the Senators and Representatives representing the Western States and territories in Congress;

4) It shall be the responsibility of the Chairman of the Conference and the Executive Committee of the Conference to assure that all policy positions adopted by the Conference at its Annual Meeting and followed up to determine if responsive action had been taken and to each year review the positions taken in prior years to determine if further action is required. The review process shall be undertaken in cooperation with the standing committees of the Conference;

5) In concert with the afore mentioned point regarding the distribution process of policy positions to the appropriate members of the administration and the United States Congress, it is realized that the needs and desired goals of the Western Conference must be vigorously brought to the attention of Congress. Therefore it is the policy of the Western Conference that all committees of the Conference are authorized to travel to Washington, D.C. or to other appropriate locations (at the expense of the home state or territory of the committee member) to articulate the viewpoints of the Western States concerning the needs and goals which have been approved as policies of the Western Conference. Any travel in the name of the Western Conference must be done in consultation with both the Chairman of the Western Conference and the appropriate study committee chairman.

XXII. APPOINTMENTS TO THE WESTERN CONFERENCE COMMITTEES

The Western Conference and its Executive Committee recognize that a significant part of the total Western Conference activities revolve around the interim committee activities. It is further noted that in order to obtain the maximum benefit from the unique benefits of each state, it is important to receive appointments to all committees as soon as possible. Therefore it is the policy of the Western Conference to encourage member states and territories to make appointments as soon as is practical. Staff of the Western Conference shall, at the direction of the Chairman of the Conference, solicit appointments from the appropriate state and territorial appointing authority to all committees.

WESTERN STATES RESOURCE CONGRESS MEETING
March 20, 1978
Reno, Nevada

The meeting was called to order by Robert Dilger, President of WETA-Washington, at 9:05 A.M.

Charles T. Keenan, WETA-Washington Executive Director, summarized the February 13th meeting in Spokane. Mr. Keenan outlined the structure, scope, and procedures as discussed in the Spokane meeting, and as summarized in the minutes sent to the attendees and to the invitees.

During a round-robin, discussion the following comments, in summary form, were offered by the attendees.

John Thompson, Corporate Liaison, Georgia-Pacific: Lets not lose sight of the kitchen cabinet approach, nor of identifying key issues and key legislators. Gentlemen, we are getting "out-grass-rooted" by the preservationists. WSRC must address that fact.

Jim Craine, Executive Vice President, Federal Timber Purchasers Association (FTPA) suggested that we include South Dakota among the Western States targeted for the organization. His association has members in South Dakota.

Jim Cook, Executive Vice President, California Business Properties Association (CBPA) commenting on Mr. Craine's statement, suggested that we keep the organization loose, so that other organizations who want to belong to the WSRC will be able to join.

Paula Easley, Executive Director, Organization for the Management of Alaska Lands (OMAR), suggested that we may want to drop Hawaii because she felt they do not share the same issues as any other Western States.

John Thompson, responding to Paula Easley's statement, pointed out that Hawaii was the first state to develop a state-wide comprehensive land use plan; therefore, Hawaii not being considered for part of the Congress is certainly worth monitoring.

Lynn Engdahl, Executive Director of WETA-Oregon, stated that Hawaii has nuclear siting problems.

Patricia Wright, Executive Assitant, CBPA, described CBPA as an association of builders and commercial interests, with activities in many states other than California.

Roger Blades, President of WETA-Idaho, described Idaho as sharing most of the same problems that the other Western States experience; that the new organization is gearing up for a membership drive; and that WETA-Idaho would be a part of the WSRC. He stated that his members in Idaho are in favor of a strong WSRC, and he feels it would be beneficial to the citizens of Idaho.

Dave VanCamp, Chevron U.S.A., described the corporation as having operations in the nine Western States, and which is conducting its own grass-roots program as to trying to build a relationship with key legislators and regulators within those states.

Joe Stransky, Western Oil and Gas Association (WOGA), described WOGA as an 80-member organization of producers, refineries, and marketers of oil products. WOGA is also conducting a grass-roots program, and is very interested in the "kitchen cabinet" approach described earlier.

Joe Orsini, Senator, State of Alaska, reported on the latest session of the Western Council of State Governments (WCSG). Issues that the organization discussed at their quarterly meeting included a Western States Coalition similar to WSRC, and a concern with air, water, and Indian land issues.

Senator Orsini said that the WCSG, which is not as dynamic as it could be, hopes that the WSRC might coordinate activities with the WCSG organization. Senator Orsini also expressed the hope that the Council might consider supporting funds for WSRC, probably through individual state legislators.

Phillip Truluck, Heritage Foundation, described the foundation as a public policy research organization which distributes its research among the legislature and media.

Phil attended this meeting to discuss environmental legislation, nuclear issues, and the nature of selected environmental organizations.

Jim Craine, FTPA, described the organization as a 32-member group with 50 mills operating primarily in the Eastern/Western states. This group interfaces with legislators and agencies regarding federal timber policy.

Dick Pittenger, representing CMAL, described the statewide Alaska organization as a group which worked closely with WETA-Washington and OMAR, and which is addressing the d-2 lands legislation, operating out of three Alaska offices and one Washington, D.C. office.

John Thompson of Georgia-Pacific described the corporation as a basic forest products producer company managing 4½ million acres; highly concerned with legislation at the national level; and quite interested in the WSRC.

Paula Easley, OMAR, stated that the organization was established in 1975 at 6,000 members, including corporations, municiple groups, labor, educators, and others.

Jim Cook further described CBPA as a California association since 1972. Mr. Cook is concerned with the impact of Eastern influence in the West. He stated a keen interest in WSRC. CBPA members operate in 38 states, therefore, have a vested interest in most of the Western States. As restrictions grow in California, there is more pressure to operate in the other states, primarily in the West. CBPA's main concerns are: (1) Air Quality Act in California; (2) Coastal Zone Management Act; (3) NEPA; and (4) Seizing of agricultural lands.

CBPA conducts its work among legislative, regulatory, and judicial mediums.

The 200-member organization operates on approximately a $100,000 per year budget and conducts regular mailings up to 1,000 per mailing.

Charles T. Keenan described WETA-Washington as an 800-member statewide organization, including 80 association members, who, in its 52 months, has conducted several innovative projects of interest, including: (1) Creation of a layman's response form regarding federal timber withdrawals; (2) Formation of quasi-autonomous citizens groups called Citizens For Energy & Jobs; (3) Positive programs, such as Construction Obstacles Evaluation, which calls for solving major construction problems before they become an issue; and (4) constant grass-roots activities, primarily at the county level, addressing comprehensive plans and shoreline ordinances.

WETA-Washington operates on an approximate $150,000 per year budget, and generates approximately $60,000 per year on special projects.

Bob Dilger, WETA-Washington President, and Executive Secretary of the Washington State Building and Construction Trades Council suggested that "our side" has waited too long to take the offensive regarding promotion of common sense environmental/economic issues. He urged that we "get it together".

The Washington State Building and Construction Trades Council represents 45,000 members, 126 locals, and has played a leading role in WETA-Washington since its inception.

Dave VanCamp indicated strong support of the concept of a WSRC. He further stated that it is important that the organization be fully representative of both labor and business.

Joe Stransky suggested that the organization fully research federal and state lobbying laws before it embarks upon its contact with lawmakers and lawmakers' staff.

Senator Joe Orsini suggested that Alaska's legislator-to-legislator program regarding the d-2 lands issue could be a tool for WSRC to adapt.

Charles T. Keenan suggested that one of the functions of WSRC could be to see that the various lobbying rulings are applied equally to groups, such as the Council of Churches, the Sierra Club, etc., as are applied to corporation and labor activities.

Jim Cook, CBPA, circulated information regarding that organization's experience with the IRS regarding lobbying and other issues.

Bob Dilger suggested that WSRC could initially be an arm of another existing organization, such as WETA-Washington.

Jim Craine, FTPA, supported the concept of WSRC, and endorsed the concept that full use be made of in-place organizations, stating that many organizations are going down the "same path".

John Thompson stated that a greater legislative involvement is needed in WSRC initially, and perhaps a function of WSRC could be sponsorship of various state legislators participating in the Western States Legislative Coalition.

Paula Easley, OMAR, presented a map illustrating the impact of public lands and policies in the Western States. She cited the Alaska d-2 lands legislation as a prime example of a need for WSRC.

Guy Stringham, OMAR, indicated that Western States faced a common battle, and was enthusiastic about the fact that three months ago someone was talking about a Western States group, and at least now, we are on our way

Jim Craine expressed his opposition to the WSRC being an arm of existing organizations. He suggested that the WSRC be kept independent.

Mason Warren, National Vice President, Laborers' International, suggested that one function of the WSRC be to bring together Association Executives and Officers.

Charles T. Keenan presented the following items for consideration so that that organization could proceed. He suggested that activities be conducted immediately in the following areas: (1) Compose and file Articles of Incorporation; (2) Designate and activate a Steering Committee; (3) Compose and approve By-Laws; (4) Organize and conduct a "Think West Conference"; and (5) Elect five issues from which one or more issues could be addressed as a WSRC project.

At this point, Guy Stringham, representing OMAR, assumed chairmanship of the meeting.

Jim Cook was asked to report regarding his proposed structure.

Mr. Cook summarized some of the thoughts of the previous meeting in Spokane, including his conclusion that representation be limited to three or five per state, and that the organization not be highly structured.

It was decided in consensus among the group, that representation per state not be limited to three to five persons, and that the decision regarding specific numbers of representatives per state be made in the future.

Charles T. Keenan suggested that we agree to have a meeting in Denver, Colorado, and to propose for adoption Articles of Incorporation and By-Laws, and that we designate a Steering Committee.

Lynn Engdahl suggested that we address and resolve the following two major questions before the body: (1) Should WSRC be a separate structure; or (2) Should it be a part of another group?

Lynn went on to move that WSRC be a loose organization, coordinated from either WETA-Washington or OMAR for the time being. Upon discussion, the above motion was amended and seconded to state that WETA-Washignton and OMAR coordinate the formation of WSRC.

Mr. Pittenger further amended the motion to state that time for coordination and formation of WSRC be limited to a 120-day period.

The motion, as amended, passed by unanimous consent.

Charles T. Keenan added that it is the intention of WETA-Washington to "make or break" the formation of WSRC in 30 to 45 days; deadline being the Denver, Colorado meeting.

Paula Easley, OMAR, suggested that the name of the organization be Western States Resource Congress. John Thompson proposed that that name be adopted, and Lynn Engdahl seconded. The group passed the name without objection.

Following lunch, the meeting was called to order by Roger Blades, President of WETA-Idaho.

Phillip Truluck, Heritage Foundation, presented the Foundation's observations regarding preservationists, including their lobbying, funding tactics, and philosophies.

Phil stated that many believe that the preservationists growth has peaked, and present administration has given them a tremendous boost via key appointments. He stated that preservationist activists are now at many mid-level bureaucratic positions "on the inside".

Phil also pointed out that the major preservationists organizations might not exist if it were not for funding from "business-oriented" sources, especially major foundations, such as Rockefeller, Ford, Mellon, and others.

Phil also discussed the contents of the publications "Unfinished Agenda" and "A Time To Choose".

Phil stated that a grass-roots organization was needed to respond to the preservationist onslaught with "coalition politics" emphasizing jobs, and articulating the option for growth in various areas, such as options to nuclear energy, which Phil stated would create eight million jobs for Americans.

Following Mr. Truluck's presentation, Chuck Keenan proposed that the group conduct a "Think West" Conference. He further proposed that the conference be conducted June 15th and 16th in either San Francisco or Seattle.

The conference proposal is as follows:

DATE & TIME	PERSON OR EVENT	PERSON ASSIGNED TO BE RESPONSIBLE FOR CONTACTING OR ARRANGING FOR THAT EVENT OR PERSONS IN THE "THINK WEST" CONFERENCE
June 15, 1978		
9:15 A.M.	Governor Dixy Lee Ray	Bob Dilger
10:30 A.M.	Panel of State Legislators (California, Alaska, Utah, and Washington)	Senator Joe Orsini, Alaska
12:00 Noon	Lunch	
12:45 P.M.	Jack Henning, President, California, AFL-CIO or Andy Anderson, President, Western Conference of Teamsters	Mason Warren
1:30 P.M.	Panel: Western States Resource Congress (Subjects: Air, Water, Mining, and RARE II)	Air - Jim Cook Water - Lynn Engdahl Mining - Russ Babcock RARE II - Jim Craine
3:00 P.M.	Harry Merlo, President, Louisiana-Pacific	John Thompson
4:00 P.M.	Legislative Reception	_____
June 16th, 1978		
9:15 A.M.	Senator Paul Laxalt	John Thompson
10:30 A.M.	Western States Resource Congress Panel (Subjects: Nuclear, _____, Transportation, Agriculture)	_____
12:00 Noon	Lunch	
12:45 P.M.	Governor _____ Judge of Montana	Roger Blades
1:30 P.M.	Panel of Federal Legislators (Oregon, Colorado, New Mexico, and Arizona)	_____
3:00 P.M.	Speaker	_____
4:00 P.M.	Legislative Reception	_____

It was the consensus of the group that the "Think West" Conference be approved, based upon the availability of speakers, place, and commitments, all of which will be coordinated by Charles T. Keenan.

Charles T. Keenan recommended that the following subjects be researched; that presentations be made at the next meeting in Denver, Colorado; and that the WSRC could choose one or more of them to address.

1. Air - Jim Cook or John Thompson
2. RARE II - Jim Craine
3. Water - 160 acres - Lynn Engdahl
4. Mining - Gene Baker
5. Divestiture - Joe Stransky or Dave VanCamp
6. Nuclear - Max Warren via CCEEB

It was agreed that the next meeting will be held in Denver, Colorado, May 2, 1978, beginning at 9:00 A.M., at Stouffer's Denver Inn, 3203 Quebec Street, Denver.

There being no further business, the meeting adjourned at 2:45 P.M.

Respectfully submitted,

Charles T. Keenan/lfc

March 31, 1978

TO: Western States Resource Congress

FROM: Charles T. Keenan

SUBJECT: May 2, 1978 Meeting

Find enclosed herewith the Minutes of the March 20, 1978, meeting in Reno, Nevada.

The next meeting of the Western States Resource Congress will be Tuesday, May 2, 1978, beginning at 9:00 A.M., at Stouffer's Denver Inn, 3203 Quebec Street, Denver, Colorado. In the near future, you will receive a reservation card for accomodations at Stouffer's Denver Inn. Please use the card for your reservations, and also please RSVP the WETA-Washington office regarding your attendance at your very earliest convenience.

An agenda and proposals for events suggested in the Minutes will be forwarded to you prior to the May 2nd meeting.

We look forward to seeing you there.

Best regards.

Yours truly,

Charles T. Keenan
Executive Director

The Honorable Joseph L. Orsini
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

I believe the Western States Resource Congress (WSRC) meeting in Reno went well.

Although considerable time and effort must be invested in developing the organization, I firmly believe that there is solid enthusiasm and a compelling need for the Western States venture.

I am requesting that you advise me at your earliest convenience regarding the persons whom you have contacted to participate in the June 15th 10:30 A.M. Panel of State Legislators, in conjunction with the "Think West" Conference June 15th and 16th in San Francisco.

Because of scheduling complexities regarding several Governors and Senators, etc., we must know in the next few days of state legislators who can definitely be available June 15th.

While you are procuring commitments for the June 15th date, also inquire about your assigned legislators' availability June 22nd and 23rd, in the event that we move the date back one week to facilitate scheduling.

Enclosed find a more complete "Think West" Conference proposal, which updates the one included in the Minutes of the Reno meeting.

Please advise me regarding your actions at your earliest convenience.

Best regards.

Yours truly,

Charles T. Keenan
Executive Director

Dear Senator Orsini:

Do you have available to you a complete list, with addresses and telephone numbers, of state legislators in the 13 western states we have identified for our Western States Resource Congress (WSRC)? If so, please send us a copy so that we may inform all of them regarding activities of the WSRC.

We appreciate your interest and assistance regarding the WSRC.

TO: Western States Resource Congress Mailing List

FROM: Charles T. Keenan

Due to logistic problems, the Western States Resource Congress (WSRC) meeting previously scheduled for May 2nd in Denver is being rescheduled as follows:

Thursday, May 25, 1978

9:00 A.M. to Approximately 4:00 P.M.

Cosmopolitan Hotel

East 18th and Broadway

Denver, Colorado 80202

Registration cards for accommodations and a meeting agenda will be mailed prior to the meeting.

Please RSVP the WETA-Washington office by mail or telephone, (206) 623-5235, at your earliest convenience.

Best regards.

Yours truly,

Charles T. Keenan

Charles T. Keenan
Executive Director

Western States' Coalition Takes Shape At Meeting

Wednesday, Feb. 22, 1978, Anchorage Times

Business and lab aders from six western states – including Alaska — met in Spokane last week to lay the groundwork for a western states' coalition.

The organization will lobby for legislation and national policies favorable to western states' needs. States represented this week included Alaska, California, Idaho, Montana, Oregon and Washington.

Bob Fleming, president of the Organization for Manager. ent of Alaska's Resources, one of those attending the meeting, said the all-day meeting was devoted to "identifying issues of mutual concern to the western states."

Issues mentioned repeatedly, he said, were federal land use regulations and land withdrawals, mineral extraction policies and environmental restrictions to resource development.

Three persons from each state, including a coordinator and representatives from business and labor, will be members of the coalition's steering committee to direct the organization's activities.

Fleming, who has been named coordinator for Alaska, said a second meeting will be held in March. It will concentrate on selecting several key issues and setting up a communications system between the states. The states of Arizona, Colorado, Hawaii, Nevada, New Mexico, Utah and Wyoming will be invited to send representatives to that meeting.

Alaskans attending the Spokane meeting, in addition to Fleming, were state Sen. Joe Orsini, R-Anchorage; Guy Stringham, Paula Easley, executive director of Omar; and Dick Pittenger.

Orsini told Omar he was pleased to see the formation of the western states coalition for resource development "because of many high-handed actions" by the federal government in dealing with states and with resource development within states.

Joe, 2/9/78

Becky from the D-2 Steering Council called to confirm your flight to Spokane.

Travel Agency will send down an itenarary to your office here in Jun. and you will just take that to the airport where your pre-paid ticket will be.

FLIGHT SCHEDULE

	Sunday
Leave Juneau Flight 62	12:10 p.m.

OMAR RESOURCE REVIEW

Published Monthly by OMAR — The ORGANIZATION for the MANAGEMENT of ALASKA'S RESOURCES, Inc.

Box 516 Anchorage, Alaska 99510 January 1978

NEW YEAR'S RESOLUTIONS

Tom Kelly's weekly column (**Anchorage Times**, 1-15-78) suggested 1978 resolutions for legislators. Two we particularly liked: "Do something positive to encourage job opportunities other than in government by enacting or reenacting laws or policies that are an incentive to business and industry." The other would have the legislature uphold Article VIII of the State Constitution: "IT IS THE POLICY OF THE STATE TO ENCOURAGE THE SETTLEMENT OF ITS LAND AND THE DEVELOPMENT OF ITS RESOURCES BY MAKING THEM AVAILABLE FOR MAXIMUM USE CONSISTENT WITH THE PUBLIC INTEREST."

ALASKA— ENERGY CENTER OF THE WORLD

"The combination of Alaska's energy resources—oil, gas, coal, uranium, wood, hydro and geothermal power—and energy operations—such as TAPS, Cook Inlet, the Kenai and North Pole refineries, the Usibelli Coal Mine—makes Alaska the energy center of the world," said Dr. Gene Rutledge at OMAR's January 5 meeting. Rutledge is Project Leader of the Alaska Regional Energy Resource Planning Project.

With this combination Dr. Rutledge hopes to see Alaska become the "energy education center" of the world. Rutledge is working with Alaska Methodist University to assess interest in developing a "Pacific-Polar Rims Energy Institute." Rutledge sees the Institute as a center for research and planning projects related to Pacific-Polar Rims' energy resources.

A new course on Alaska's energy resources is being offered by Dr. Rutledge at AMU this semester. OMAR staff members Judy Rolle and Donna Dent are enrolled.

OMAR FORMS NEW DIVISIONS

Five divisions have been established in the statewide operation of the Organization for the Management of Alaska's Resources. In a January 19 release, Robert Fleming, OMAR President, announced formation of the divisions "to more effectively deal with the vast complexity of resource development issues facing Alaska."

The five divisions are: (1) Land, Minerals and Energy, (2) Forestry and Agriculture, (3) Fisheries, (4) Transportation and (5) Recreation and Tourism. Technical advisors are being selected for each division. Management of division activities will be the responsibility of five division directors.

Fleming stated the new management plan would enable statewide members to concentrate their activities in specific areas of interest and to develop information for the entire organization and public.

Fleming also announced that individuals, businesses and governments will now be able to earmark contributions to any of the five divisions.

OMAR was incorporated in April 1975 "to insure the wise management of Alaska's natural resources for the benefit to all Americans" and has a membership of over 6,000. Persons wishing to work for specific divisions are urged to contact OMAR headquarters in Anchorage.

SUSITNA/WATANA DAM PROJECT

Three million dollars of Corps of Engineers' funds have been given to the Corps' Alaska District to gather additional data to supplement its feasibility study of the power potential of the Upper Susitna River.

At Congressional direction, the Corps prepared a feasibility study of the possible construction of two dams on the river, some 110 miles north of Anchorage, to provide electrical energy for the "Rainbelt" area from Fairbanks to the Kenai Peninsula. The dams, which could supply more than 60% of Rainbelt power needs, would constitute the largest hydroelectric project in North America.

The Corps' environmental impact statement on the $2.1 billion project came under sharp criticism for not sufficiently addressing possible seismic problems. However, Colonel Greorge R. Robertson, Alaska District Engineer, told OMAR "the Corps recognizes that additional data must be obtained to evaluate the seismic conditions and to develop ways to insure the economic viabilities of constructing dams in that environment, and has included more than $1 million for these investigations in the plan of study covering Phase 1 work. Recommendation for a go or no-go decision will not be made until completion of this four-year effort costing about $25 million." Phase 1 will include more complete environmental study, cost-benefit analyses, advance engineering and design work.

The Alaska District was allocated the $3 million to expand the 1975 feasibility study of foundation conditions at the proposed Watana dam site, and to perform other technical and economic studies before Phase I investigations are initiated.

Senator Mike Gravel continues his efforts to amend the Water Resources Act of 1976 to make it possible for the state to proceed as rapidly as possible with this much-needed project to reduce power costs for Alaskan citizens.

George Easley has headed the Susitna Dam Project for OMAR since 1975.

NEW ESTIMATE ON COST OF ALCAN PIPELINE

A full-page **Wall Street Journal** ad on December 15 begins. "THE ALCAN PIPELINE. A project to be privately financed, that will cost more than the Apollo 11 Moonwalk, the Golden Gate Bridge, the Alaskan Pipeline and the movie Star Wars. Combined."

The ad was placed by the Bank of America's World Banking Division. Seems an odd way to promote a badly-needed project struggling to put together a financing package.

MEMBER OF THE MONTH (YEAR?) — DON HILL

It is with sadness we leave our favorite landlord, Don Hill, the end of January. Since July 1976 we have lived in comfortable luxury, compliments of the Wometco-Lathrop Company. The value of that generous firm's contribution of office space? No less than **$43,605.00!!**

Don also has participated in virtually every OMAR project, no matter how time-consuming. Wometco-Lathrop's management outside the state worked tirelessly on the gas line issue and is now planning a campaign to help us on D-2.

PETROCHEMICALS — NEW INDUSTRY FOR ALASKA?

Some 350 persons attended a December 10 petrochemicals symposium sponsored by OMAR, the Alaska State District Council of Laborers and the Anchorage Central Labor Council. Industry experts and state and community representatives discussed the technological, economic and social considerations of petrochemical development in Alaska.

Symposium participants were asked to complete a survey regarding the use of Alaska's oil and natural gas. Of 135 responses, 57% indicated a desire to see all royalty oil and gas used in Alaska for fuel and for petrochemical development, and 83% wanted the State to use investment or taxation policies to encourage instate use of all or part of producer-owned oil and gas.

Respondents identified specific policies to encourage a petrochemicals industry: 28% wanted incentive programs concerning loan guarantees or bond financing, 25% favored tax incentives, and 16% saw an advantage to making feedstocks available at reduced prices. 22% chose to let free market conditions decide the question.

Assuming such industry became a reality, participants were asked where it should be located. An overwhelming majority, 59%, responded: "Whichever region possesses the greatest economic and environmental advantages."

This response tells us Alaskans are moving to the conclusion that industry space benefits the entire state, regardless of its physical location.

Highlight of the meeting, in our opinion, was the valuable contribution made by community representatives John Carlson, Fairbanks North Star Borough; Don Gilman, Kenai Peninsula Borough; Vincent O'Reilly, City of Kenai; Carl Heinmiller, City of Haines; Raymond Menaker, Haines Borough; George Sullivan, Anchorage; and Lynn Chrystal, Valdez. Their comments were generally positive and supportive of development. Transcripts are available from OMAR.

TO SUBSIDIZE OR NOT TO SUBSIDIZE

On the subject of an oil and natural gas-based petrochemicals industry in Alaska, Governor Jay Hammond recently commented, "I'm not saying I will absolutely oppose any subsidy whatsoever," and "I am disinclined because I don't think it is necessary. But I am willing to take a look at a modest subsidy if it reflects a broad, collective public benefit that couldn't be met as well by using the money for something else."

OMAR, aware of political implications of the subsidy issue, is researching pros and cons of loan guarantees, capital loans, bond financing, tax holidays and other industrial incentives and exploring subsidy policies of other oil-producing states, with the assistance of A. Kermit Black, Vice President of the Pace Company consulting firm.

SEED MONEY FOR AGRICULTURE

Last issue reported on state administration efforts to develop export markets for Delta-area barley. On January 6 Governor Hammond announced plans to create the "Alaska Agriculture Action Group" to coordinate future agriculture development and recommend agricultural projects" in which the state can and should play a legitimate role of encouragement and front end assistance." The governor said some 8 million acres of Alaska land were suitable for cultivation and another 8-9 million suitable for livestock pasture. To help the industry become self-supporting, Hammond will request legislative funding of $5 million this year and another $8 to 10 million next year to place 50,000 acres of Delta land into production. He expressed confidence the venture could become profitable within a few years. Front end money would be used to clear land, divide it into farmable units and convey agricultural rights to farmers. Federal funds may be available to assist with land clearing and certain other costs.

OMAR, an advocate of this project for over a year, will support legislative funding.

VALDEZ GETS CLEAN BILL OF AIR

A Dames and Moore study of the Valdez airshed was presented to the Valdez Council January 19. Mayor Lynn Chrystal said he was "extremely happy to see the results of this particular study. We think this will once again open the door for serious consideration of Valdez as a site for the royalty refinery." The study concluded, in part, that the city could accommodate development equal to another oil terminal without violating clear air standards.

UPDATE— U.S. BORAX MOLYBDENUM PROJECT

Eleven organizations have appealed to the Forest Service to cancel a permit allowing construction of an access road to U. S. Borax and Chemical Company's molybdenum claim in Southeast Alaska.

U. S. Borax began exploratory drilling in 1974 and found what could be one of the world's major molybdenum deposits at Quartz Hill, 45 miles east of Ketchikan. Molybdenum is used as an alloying agent to give strength and corrosion resistance to steel, cast iron and non-ferrous metals. There are no competitive substitutes for molybdenum in these applications.

If brought into production, U. S. Borax would construct an open pit mine, a concentrating plant to process 30,000 tons of ore per day, a dock and other support facilities at an estimated cost of $250 million. The project would employ 700 to 1000 people during construction and 500 full-time workers during operation.

To facilitate the larger scale operations, U. S. Borax applied for approval to build an access road from tidewater to the site. On November 4, 1977, Ketchikan Forest Supervisor Jim Watson approved the Final Environmental Impact Statement (FEIS) on the road and issued a special use permit.

Notice of appeal was filed on December 7 by the following groups: Sierra Club, Alaska Conservation Society, Southeast Alaska Conservation Council, Tongass Conservation Society, Wilderness Society, National Audubon Society, United Fishermen of Alaska, Commercial Fisherman's Cooperative Association, Alaska Trollers Association, Southeast Alaska Seine Boat Owners and Operators, and the Ketchikan Indian Corporation.

Continued on page 4

They maintained the FEIS failed to adequately analyze alternative means of access and did not sufficiently address potential socio-environmental impacts of road construction or impacts of – or alternatives to – the developed mine. They also felt the decision jeopardized the proposed wilderness status of the Misty Fjords area.

Watson's decision will be reviewed by the regional forester in Juneau. If opponents are not satisfied, they may then appeal to the chief forester of the United States in Washington, D.C. After all administrative appeals are exhausted the final decision could be challenged in the courts.

Because of the importance of this decision to the Ketchikan area and the possible implications for future mineral development in the State, OMAR will keep you informed of developments and any action required.

COAL – A TRILLION TONS OF IT

The University of Alaska, Fairbanks, may be selected as one of ten coal research laboratories to be established in the United States under Title VIII of the Surface Mining Control and Reclamation Act of 1977.

The Act requires laboratories to be located at institutions of higher education in states having abundant coal reserves, with at least one facility established within each of the major coal provinces recognized by the Bureau of Mines, including Alaska. Title VIII further stipulates that selected universities must have currently active programs in coal research and the capacity to establish and operate the facility assisted under the Title.

The University of Alaska is active in coal research, stimulated several years ago by a Usibelli Coal Mine grant. An application for federal funds is being prepared for submission by the Univeristy. However, non-federal matching funds (50%) are limited, and according to Earl Beistline, Dean of the University's School of Mineral Industry, special legislation may be necessary.

While the amount of Alaska's coal deposits is not accurately known, some geologists estimate reserves of one trillion tons – nearly a 2,000 year supply at 1976 U. S. production rates.

To begin now to investigate the potential for productive use of Alaska's coal can only serve to facilitate economically and environmentally sound resource development.

RIGHT WORDS, WRONG SECTION

A letter enclosed with your December 1977 Resource Review stated "Business contributions are tax deductible as ordinary business expense under Sec. 506 (c) 3 of the Internal Revenue Code." The section referred to should have been 501 (c) 6.

WESTERN STATES TO UNITE ON RESOURCE ISSUES

A Western States Coalition is being formed to address regional and national resource management issues in the thirteen western states.

An organizational meeting of labor, industry and legislative representatives will be held in Spokane, Washington, February 12 and 13. Seven states will be involved in the first meeting Alaska, Washington, Oregon, California, Montana, Idaho and Utah. At that time the organization will be established that can then identify projects and procedures.

OMAR and the Western Environmental Trade Association based in Seattle are working together on organizational details.

Land use is certain to be a key issue, according to Paula Easley, OMAR executive director. "Regulations affecting national timber land, of which some 80% lies in the western states, coal and mineral extraction, agricultural reclamation, water, energy and transportation——these are areas in which the coalition may focus," said Easley. "By working as a strong coalition, the western states will have substantially more impact than would each state fighting its own battle."

OMAR executive committee member Guy Stringham stated: "The suggestion that Alaska become active in this type effort has been made numerous times over the years. It's exciting to have it finally under way."

HOUSEWARMING TO BE ANNOUNCED

OMAR's new home: 627 West Third, Anchorage, 99501.

Same box number: Box 516, Anchorage, 99510.

Open house will be held soon after moving day, January 30.

From: Jim Cook

TIME FOR REACTION TO ABAG EMP
(Association of Bay Area
Government's Environmental
Management Plan.)

Do what? : Communicate your reactions.

By when, to whom? :
Before March 14, to ABAG Executive Board members (green list)
Before April 4, to ABAG General Assembly (green list)

What is it? :
ABAG EMP (Assn of Bay Area Government's Environmental Management Plan.)
A comprehensive interrelated program controlling water quality, water supply, solid waste, and air quality.
Plan is mandated by federal legislation, particularly the recent amendments to the Clean Air Act.
In July 1979, if the regionally-developed plan doesn't demonstrate compliance with federal air quality standards by 1987, the federal government can withhold federal funds to areawide activities.

Who did it? What next? :
46-member Environmental Management Task Force received it from ABAG staf
Product of two-year's work and $4.3 million in EPA funding support.
169 other metropolitan regions nationwide involved in similar planning.
S.F. area plan to become one of 50 in national action program.
Expected to cost $620 million per pear in public & private expenditures.
Comply or suffer loss of federal funds after July 1, 1979 for sewage treatment plants, highway projects, airports, some housing, land use and transportation planning.
Bay area action will be significantly influential:
Within weeks, other California areas must also respond.
Within months, remaining national regions respond.

What happens? :
The EMP, of over 600 pages, encompasses 48 strategies, 16 policies, and 49 actions.
Issues of prime importance to CBPA members are attached in "EMP Plan Excerpts" (blue attachment)

Who is affected? :
First, existing developments & currently operating commercial establishments. One goal, among many, is the reduction of VMT (Vehicle Miles Travelled) in the greater Bay area by 11%.
Second, newly proposed developments. One goal, among many, is to achieve 100,000 more acres of open space in the area by the year 2000 than would otherwise have occurred.

What affects us? :

1. New concept of indirect source regulation: as a tool of growth management control.

   Special note: Leasing agents and developers appealing to tenants and financiers on basis of potential growth for developer's project may be establishing the very reason for denying permission to commence project. "The higher the rate of growth, the more stringent control measures generally would have to be applied for the region to meet the standards. A greater fraction of permits would be denied, off-set requirements would be increased, or an amended comprehensive strategy would be needed." Draft summary of EMP, Dec 77, page 13.

2. Use of indirect source regulation for pollution control. Aim is control of oxidant, but individual indirect source regulation for oxidant control is virtually unmeasurable. Consequently, use of ISR would be to control carbon monoxide; not the one-hour ppm standard which is not violated and for which ISR could be useful, but for the 8-hour ppm standard wherein ISR is less likely to be influential.

3. Transportation controls
   Limitation on number of parking spaces.
   Parking taxes, fees on otherwise free parking lots, restrictions on parking, raised bridge tolls.

4. Land use controls
   Compaction in-filling property development.

Say what? :

Communicate, both orally and written (so that name and company, on paper, are reminders to recipients).
Communicate with ABAG Executive Board and General Assembly members (green list) by March 14 and April 4.
Express it in your own words.
Attached are "Suggested comments" (pink attachment)

What's the time schedule, short and long-range? :

Feb 16 ABAG Exec Board, public hearing on plan & DEIR.
7:30-10:30 PM. Holiday Inn, Union Square, San Francisco

Feb 22 Envtl Mgmt Task Force adopts EMP recommendations.
9:30AM-5PM, Hotel Claremont, Berkeley

Mar 1 ABAG Regional Planning Committee reviews EMP recommendations.
Findings to ABAG Exec Bd., 2-5PM, Hotel Claremont, Berkeley

Mar 3 Last day for submitting proposed changes in EMP

Mar 14 Last, best opportunity for you to express your reactions to ABAG Exec Bd members before March 16.

Mar 16 ABAG Exec Bd debates & recommends to General Assembly.
7:30PM. Hotel Claremont, Berkeley

Apr 4 Last, best opportunity for you to express your reactions to ABAG General Assembly members April 6.

Apr 6 ABAG General Assembly final debate & action on EMP.
9:30AM-10PM., McCabe Hall, San Jose.

Time schedule (continued)

Sept ABAG EMP goes to California air, water resources, and solid waste management boards.
1978 Adopt indirect source review program, if required by EMP.
1979 Implement indirect source review, if required by EMP.
Jan 1,'79 EMP submitted to federal EPA.
Jul 1,'79 Possible ban on all new,major industrial pollution sources emitting 100 tons a year or more by EPA if region's plan is insufficient.
Jul 1,'79 SF-area EMP becomes one of 50 as a national action blueprint. After July 1,'79 federal government can apply sanctions if plan is insufficient. Freeze federal funds for:
- Sewage treatment plants
- Highway projects not related to mass transit, safety, or air quality
- Airports
- Land use and transportation planning
- Some housing projects

Nov 12,'82 Region must backup proposals with enforcement tools. If so, region retains local control of planning & development til '87.
1982 Deliver gains in oxidant control; 25% annual reduction in carbon monoxide, nitrogen oxides, particulate matter, and sulfur dioxide.
1987 Region's air quality in compliance with federal Clean Air Act.

The difference makes the difference.
CBPA represents your interests.

CBPA is evidently the only group contesting "indirect source regulation."

CBPA may also be the only organization questioning
Parking restrictions-taxes-fees, and
Transportation controls

Speak out! We have a legitimate need to cancel or defer these controls.

But, the ABAG Executive Board and General Assembly must hear from us to evaluate our concerns in comparison with other groups about different, offsetting, EMP regulations.

For instance:
A primary concern about controls on industrial sources is pursued by the S.F. Bay Area Council and CEEB.

Concern about land use restrictions on housing development is pursued by COLAB and BIA.

Be specific about your, and CBPA's, concerns, first:
Indirect source, Parking controls, Transportation control

Subsequently, we may also help other organizations as well.

Joe;

Presume you put this on my desk ??

How did you propose we use this ?

V.M.

The Council of State Governments

WESTERN OFFICE

85 POST STREET
SAN FRANCISCO, CALIFORNIA 94104
(415) 986-3760

October 17, 1977

Senator Joe Orsini

UNITED FISHERMEN OF ALASKA

Resolution on Wilderness Designations in Alaska

March 4, 1977

WHEREAS the protection of habitat quality is essential to wild stocks of salmon; and

WHEREAS the maintenance of high water quality is essential to hatchery production of fish; and

WHEREAS the salmon resource can and should be enhanced and increased;

THEREFORE BE IT RESOLVED that the United Fishermen of Alaska supports the position of wilderness designations in Alaska, providing that:

(1) Provisions are made allowing for identification and/or future establishment of aquaculture sites in areas proposed as wilderness before designation;

(2) Access for habitat maintenance and enhancement, including the use of mechanized equipment, is permitted;

(3) Motorized access is permitted on all navigable waters; and

(4) Existing use areas such as fish camps, set net sites, etc. are maintained.

RESOLUTIONS

of the

68th Pacific Logging Congress

concerning

Wilderness Issue

Timber Supply

Forest Land Management

Alaska Forest Land Designation

Adopted by majority vote of the Pacific Logging Congress membership convened at its 68th Sessions, Vancouver, British Columbia, November 10, 1977.

THE PACIFIC LOGGING CONGRESS is a voluntary membership, non-profit, incorporated association of individuals engaged in, or interested in the growing and harvesting of forest products.

It was founded in 1909 for the purpose of providing a forum where the logging industry could meet to discuss its operating problems, renew old friendships and to make new acquaintances. Its membership consists of representatives of both small and large logging firms, logging equipment manufacturers and distributors, public forestry officials and forestry educators.

The following resolutions, we believe, accurately reflect the thinking of the forest industries of the western states and British Columbia in regard to the specific matters of public concern referred to in each of the quoted resolutions.

PACIFIC LOGGING CONGRESS
217 American Bank Building
Portland, Oregon 97205
CARWIN A. WOOLLEY,
Executive Vice-President

RESOLUTION NO. I

Wilderness Issue

WHEREAS approximately '2 percent of the National Forest lands in the Pacific Northwest Region have been designated as Wilderness by the WILDERNESS ACT OF 1974 and subsequent additions thereto, and

WHEREAS there is ongoing Roadless Area Review and Evaluation process (RARE II) of potential areas for additional Wilderness designation. Now, therefore

BE IT RESOLVED the 68th Pacific Logging Congress endorses the RARE II program concept and requests the Secretary of Agriculture, subsequent to Forest Service study schedule compliance in the fall of 1978, to designate the maximum possible number of study areas acreage to Non Wilderness status and that he direct these lands to be promptly managed for multiple use with strong consideration for timber production.

BE IT FURTHER RESOLVED the Pacific Logging Congress requests the Secretary of Agriculture to require the Forest Service to complete final reports on all remaining RARE II study areas within a two year period following scheduled 1978 initial report date and the Secretary then promptly declare these areas as either Wilderness or Non Wilderness status and direct that Non Wilderness lands be managed for multiple use with strong consideration for timber production.

BE IT FURTHER RESOLVED the Pacific Logging Congress requests the Council of Environmental Quality, the Secretary of Agriculture and the Chief, US Forest Service, to require that all future Environmental Impact Statements shall include a separate section covering complete Economic Impact Analysis study findings.

RESOLUTION NO. II

Timber Supply

WHEREAS the FOREST & RANGELAND RENEWABLE RESOURCES PLANNING ACT (PL 93-378) was passed by the United States Congress in 1974, and

WHEREAS the NATIONAL FOREST MANAGEMENT ACT OF 1976 (PL 94-588) was passed by the same body last year, and

WHEREAS the Forest Service, US Department of Agriculture, is specifically charged in these Acts with the responsibility for management, protection and utilization of the natural resources on the Nation's forests and related rangelands. Now, therefore

BE IT RESOLVED that the 68th Pacific Logging Congress request the Secretary of Agriculture, through actions of the Forest Service, to expeditiously comply with Resources Planning Act goals by preparing stipulated plans for study areas.

BE IT FURTHER RESOLVED that the Pacific Logging Congress request of the U. S. Congress and the Carter administration their approval of funding and manpower to carry out goals of the Resources Planning Act and that Congress direct the Forest Service to sell the approved maximum volume of timber.

BE IT FURTHER RESOLVED that the Pacific Logging Congress request the Secretary of Agriculture to direct the Forest Service to effect timber management practices and policies that will produce maximum timber growth, including but not limited to the abandonment of even-flow non-declining yield policy in conversion of old growth forests, within the limits of Sec. 13 of the National Forest Management Act of 1976.

RESOLUTION NO. III

Forest Land Management

WHEREAS increased timber supply potential is available from Federal, State, industrial and non-industrial private forest lands by the use of improved land management practices, and

WHEREAS there are presently governmental considerations to programs funding that will provide incentives for the use of improved management practices on private forest lands. Now, therefore

BE IT RESOLVED that the 68th Pacific Logging Congress request of all governmental bodies who are now, or might be in the future, considering establishing improved land management practices

incentive programs that they consult with industrial and non-industrial private forest land owner representatives along with public timber agency and university forestry school representatives, both on the organization of such programs and also on subsequent program performance evaluations and modification considerations.

BE IT FURTHER RESOLVED that the Pacific Logging Congress request of those Federal and States' elected officials responsible for refo estation financing appropriations that they provide sufficient monies to permit needed reforestation work to be performed in an efficient and expeditious manner, including the use of herbicides.

RESOLUTION NO. IV

Alaska Forest Land Designation

WHEREAS Section 17 (d) (2) of the ALASKA NATIVE CLAIMS SETTLEMENT ACT authorized the Secretary of Interior to withdraw up to 80 million acres of vacant, unreserved and unappropriated federal public lands for study as potential additions to national parks, wildlife refuges, forests and wild and scenic river systems, and

WHEREAS these withdrawals are to be finalized by December 31, 1978, and

WHEREAS there exists innumerable pieces of legislation concerning proposed disposition of this land. Now, therefore

BE IT RESOLVED that the 68th Pacific Logging Congress request President Carter and the Congress of the United States to support legislation that offers the maximum amount of cooperative management possibilities between the Federal, State and Private land owners.

BE IT FURTHER RESOLVED that the Pacific Logging Congress supports the Federal land withdrawals in Alaska to have the maximum amount of multiple use designation possible and include those lands suitable to be used to create new National Forests in the interior of Alaska.

DRAFT DRAFT

POSITION STATEMENT

ON

ALASKA NATIONAL INTEREST LANDS
Section 17(d)(2) ANCSA

by the Planning Association
of
Alaska

PREFACE:

The Planning Association of Alaska (P.A.A.) is an organization of land use planning professionals, persons who are members of local, state and federal land planning commissions or other official groups, and persons interested in land use planning in Alaska. [Almost all] individuals who are engaged professionally in the public and private practice of urban, regional, state or rural land use planning in Alaska are members of P.A.A. Thus, the membership is widely representative of the geographic areas of the state and of the viewpoints held by public agency employees, private sector planners and lay persons active in land use planning in Alaska. [The P.A.A. membership totals ___.]

STATEMENT:

P.A.A. strongly believes that certain basic principals should govern the many decisions the Congress of the United States will make relative to National Interest Lands in Alaska under Section 17(d)(2) of the Alaska Native Claims Settlement Act. For the benefit of the Interior and Insular Affairs Committee of the U.S. House of Representatives, the Sub-Committee on General Oversite and Alaska Lands, and the Alaska Congressional Delegation, and Alaska Governor Hammond, P.A.A. offers the following:

1. It must be recognized that the so-called d-2 lands and their classification and eventual use is a matter of concern to all Americans and especially to Alaskans as those who will be most directly affected by their use and classification. It therefore is apparent that several national goals and policies related to environmental enhancement and protection, energy self-sufficiency, national security, and meeting national recreational-open space needs must be equally considered in reaching decisions on d-2 lands. No single national goal, need or desire, should be [either] ignored [or given unnecessary emphasis] than any other factor in evaluating this issue.

2. Sound and nationally recognized planning procedures should be followed in evaluating the extent of resources and ranges of proper uses for these National Interest Lands. Arbitrary and hasty decisions to classify millions of acres of land in wilderness or other single purpose use land classifications without first subjecting the lands to a logical planning process is contrary to National and State policy. P.A.A. urges all involved parties to adhere to established land use planning procedures as part of the process of classifying d-2 lands.

3. An exhaustive resource inventory of all lands in the National Interest Lands category should proceed their classification for use. Extent of natural resources, capability of the land to support the variety of uses in an environmentally safe and compatable manner should be determined and should guide decisions as to classification. Potential for recreation use, wilderness values and scenic and aesthetic values should be considered equally as resources along with minerals, oil and gas, timber, wildlife and agriculture in the inventory and subsequent evaluations.

4. Classification of National Interest Lands in Alaska should not interfere with or in any way negate the State of Alaska's selection rights under the Alaska Statehood Act or selection rights of Alaska Natives under the Alaska Native Claims Settlement Act. No existing State or Native selection should be revoked and both the State and the several Native Corporations should be allowed to complete their selection entitlements prior to any classification of Alaska National Interest Lands. The State of Alaska selection rights are part of a contract between Alaskans and the Congress of the United States, and Congress should not, by classification actions in this instance, unilaterally nulify that contract or any portion of it.

5. P.A.A. urges Congress to evaluate the merits of land classification schemes which digress from those traditionally applied to Federal lands in the other 49 states. There are significant differences in ecosystems, wildlife habitat, settlement patterns, land ownership patterns and use potentials in Alaska to warrant consideration of new and inovative land management approaches for public lands in Alaska.

6. P.A.A. urges Congress to be cognizant of the problems associated with access to and through these National Interest Lands as well as to State and Native lands. Arbitrary classification of d-2 lands without provisions for access to and through these lands will, in many cases, render State and Native selected lands as well as Federal lands valueless and severely restrict their use potential. No-access wilderness, refuge and park classifications

would be contrary to national interest and would serve to effectively deny use of the several resources and benefits thought to exist on lands in Alaska.

CONCLUSION:

The Planning Association of Alaska does not believe that Congressman Udal's proposed legislation, HR 39, is consistent with these principals. We therefore urge the House Interior Sub-Committee on General Oversight and Alaska Lands to reject HR 39 as the vehicle for dealing with Alaska National Interest Lands. P.A.A. further urges the Sub-Committee to consider utilizing the principals spelled out above in guiding the Committee's deliberations and decisions.

1977 ANNUAL MEETING
Santa Fe Hilton
Santa Fe, New Mexico
September 25-28

STATE OFFICIALS IN THE WEST:

The Executive Committee of the Western Conference of The Council of State Governments, its Chairman, Senator C. B. Trujillo of New Mexico, and the New Mexico Host State Committee are pleased to announce and to invite you to attend the Annual Meeting of the WESTERN CONFERENCE OF THE COUNCIL OF STATE GOVERNMENTS in Santa Fe this fall.

The program for the Annual Meeting has been formulated by the Executive Committee, the Program Advisory Committee, chaired by Representative Robert Marks, Chairman-elect of Montana, and the New Mexico Host State Committee, chaired by Representative Adele C. Hundley. It is hoped that the program will attract legislators, state administrators and their families to what promises to be a productive, educational and enjoyable meeting.

Registration will commence at 10:00 am on Sunday, September 25, and four committees will be meeting at 2:00 pm. Please check airline schedules to see if it might be necessary to arrive on Saturday in order to participate in the Sunday meetings. Space has been blocked for some Saturday arrivals at the several hotels. The opening social event will be a welcoming reception which will start at 5:30 pm and will include local entertainment. The evening has been set aside to allow conference attendees to enjoy Santa Fe's finest restaurants. A continental breakfast will be provided each morning of the conference. The opening General Session will start at 9:00 am on Monday, September 26. All attendees are encouraged to attend all general and individual committee sessions and to feel free to take part in discussions at any time. The remaining portions of the program, both business and social, are reviewed in the enclosed "preliminary" program. Members of the study committees will be contacted with the updated information prior to the conference. Some of the subjects to be covered in the individual committee sessions will include:

Privacy
Indian/Native American Jurisdictional Questions
Update on Actuarial Figures Regarding Medical Malpractice Insurance
International Registration Plan
Electronic Permit Issuance for Trucks
Quality Control and Design Standards
Hospital Cost Containment

SFO/A/7

Welfare Reform
School Financing Issues
160 Acres Limitation Question
Public Land Ownership and Management
Environmental Impact Statements
Energy Alternatives

Please indicate your hotel needs and other information on the enclosed conference and hotel reservation form. The registration fee, payable only at the meeting site, will be $10 per attendee and $20 for accompanying spouse. A registration fee of $75 will be charged for all other attendees. PLEASE RETURN THE RESERVATION FORM AS SOON AS POSSIBLE. We look forward to seeing you in Santa Fe.

Sincerely,

Jerry D. Morris
Director

THE COUNCIL OF STATE GOVERNMENTS

85 POST STREET, #400

SAN FRANCISCO, CA 94104

1977 Annual Meeting

WESTERN CONFERENCE
of The Council of State Governments

September 25-28
Santa Fe Hilton
Santa Fe, New Mexico

INFORMATION SHEET

DATES: September 25-28, 1977.

PLACE: The Conference headquarters will be the Santa Fe Hilton. Accommodations are also available at the Inn at Loretto, the Inn of the Governors, and the La Fonda Hotel. Registrants are asked to indicate a first (1) and a second (2) choice on the reservation forms. Reservations for hotel accommodations will be made on a first-come, first-serve basis, with every attempt being made to honor your first request. All hotels are within walking distance of the Santa Fe Hilton.

TRANSPORTATION: Commuter Air Carriers service Santa Fe from Albuquerque, Denver and several cities within New Mexico, to include Las Cruces, Silver City, and Taos. Carriers providing service are Trans-Western Airlines, Trans-American Airways, and Zia Airlines. Aircraft are Cessna 402 Twin Turbo Systems, and Ted Smith Aerostar 601.

The Host State Committee, operating on the premise that most attendees will be arriving at the Albuquerque International Airport, have made arrangements for bus travel to the city of Santa Fe for those arriving on Sunday, September 25. Transportation will also be provided for those desiring to return to Santa Fe on Wednesday, September 28, commencing at the conclusion of the closing general session. The schedules for bus transportation will depend on your providing the appropriate information as to flight numbers and arrival and departure times on the enclosed reservation form.

For those planning to arrive and/or depart on days other than Sunday and Wednesdays, there is a local transportation service which provides service directly from the Albuquerque International Airport to each hotel in Santa Fe. The service is called The Shuttle-Jack and operates periodically during the day. Reservations are necessary and when making reservations you are required to have your flight number and time. The cost for the round trip service (Albuquerque to Santa Fe and return) is $18.00. Reservations may be made by calling (505) 983-7435. Total shuttle time each way is 1 1/2 hours.

Budget Rent-A-Car has quoted attendees a commercial rate, which is described on the reservation form. Rental cars are also available from Avis, Hertz and National. You will have to make your own reservations for car rentals. All we are trying to do is to obtain information as to numbers, so that any of the rental outfits can stock additional cars as required.

WEATHER: 70-80°, but dry and very comfortable. Suggest a wrap or coat for evening activities (Santa Fe is 7000 feet above sea level).

LOCAL POINTS OF INTEREST:

Los Alamos Scientific Laboratories
Loretto Chapel - Santa Fe
Historic Palace of the Governors & The Plaza
Puye Cliff Dwellings
Canyon Road Arts & Crafts Area
Albuquerque Indian Pueblo Cultural Center and Old Town
Pecos National Monument
Bandelier National Monument
Taos and the Rio Grande Gorge
Various museums; nearby Indian pueblos

REGISTRATION FEE: $40 for official attendees; $20 for accompanying spouse and for children 16 years of age and older; $75 per person for other than official attendees. Please make checks payable to the Western Conference of CSG, and present them at the registration desk at Santa Fe.

Please note that several of the Western Conference committees will be meeting early on Sunday afternoon. To assure attendance at the meetings by members of the committees and other interested individuals, please check air arrival times and coordinate your efforts to assure attendance at these very important meetings.

SENATE C/RA COMMITTEE BILL FILES

FIRST DRAWER

1) All Senate Bills before C/RA, in numerical order
2) All House Bills before C/RA, in numerical order

SECOND DRAWER

1) All Senate Bills passed out of C/RA, in numerical order
2) All House Bills passed out of C/RA, in numerical order

THIRD DRAWER

1)All Senate Bills for which C/RA is second referral, in numerical order
2) All House Bills for which C/RA is second referral, in numerical order

STORAGE DRAWER

1) All Senate Bills passed out of C/RA and which have been approved by the House and Senate, in numerical order.
2) All House Bills passed out of C/RA and which have been approved by the Senate, in numerical order.

Also:

1) Once the C/RA committee has taken action on a bill, the file should immediately be transferred to the second drawer with an informal notation (until the minutes are done) that such and such a bill passed out of committee on such and such a date.

2) Whenever a committee substitute is introduced to a bill, or a bill is amended, a new folder should be made reflecting this change and the old folder discarded (but not its contents).

REPORT OF THE JOINT RULES COMMITTEE

Session Employee Compensation

January 21, 1977

The Rules Committees of the House of Representatives and the Senate, sitting as the Joint Rules Committee and acting under authority of AS 24.15.060, met on January 21, 1977 to adopt a uniform plan for the compensation of temporary session employees for the duration of the Tenth Legislature (1977-78). The compensation plan is submitted herewith for the approval of each house. Upon approval by both houses the compensation plan will be considered operative effective January 21, 1977. The compensation plan assumes the availability of all employees on a seven-day a week basis for as many hours as their assigned work may require.

Position Title	Daily Rate
Chief Clerk and Senate Secretary	$89.00
Assistants to Chief Clerk and Senate Secretary	59.00
Enrolling and Engrossing	59.00
Sergeant-at-Arms	68.00
Assistant Sergeant-at-Arms	63.00
Pages and Messengers	46.00
Administrative Assistant to Speaker and President	73.00
Secretary to Speaker and President	56.00
Administrative Assistant to Committee Chairmen	68.00
Secretary	52.00
Typists	49.00
Clerks	46.00
Senior Lounge Hostess	52.00
Lounge Hostess	46.00

52.00
46.00
2L98.
49

Machine Operators	56.00
Xerox Operator	52.00
Finance Committee Assistants	59.00
Chaplains	15.00

Longevity Pay - $2.00 per day extra for each year of previous experience (at least 70 days) up to a maximum of $10.00.

Cost of Living - For employees outside of Juneau and Anchorage, the same cost-of-living percentage differential as permanent state employees receive will be paid, rounded to the nearest dollar.

October 12, 1977

Ms. Lee McAnerey, Commissioner
Dept. of Community and Regional Affairs
Pouch B
Juneau, Ak. 99811

Dear Commissioner McAnerney,

Valdez city councilman Jerry Neeble was recently reported in the local press to have said the following about a Valdez proposal to expand a Valdez Borough into the Copper River Basin:

> The Boundary Commission rejected a Valdez proposal that would have put bobough boundaries at the present Valdez city limits. This boundary proposal was rejected ostensibly for the reason that current Valdez municipal boundaries do not encompass enough land for a borough.
>
> The current Valdez boundary proposal comes north along the Richardson Highway to mile 74 and includes Alyeska Pipeline pump station #12. This was done so that property tax revenue from the pump station would go to Valdez.
>
> The new borough would tax only for services rendered. If no services were requested by residents of the new borough in the Copper River Basin, then no property taxes would be levied.

If what has been reported about the Boundary Commission is correct, then I must vigorously protest the Valdez boundary proposals. The Boundary Commissions reasoning fails to consider other important aspects of the Valdez proposal and also fails to consider other important attributes of boroughs in general.

Physical size should not be a sole determinant of a boroughs boundaries. The inclusion of large areas of undeveloped land should not necessarily make Valdez's current proposal attractive, nor should a small area (the present Valdez municipal boundaries) necessarily be disqualified without taking into account other important considerations.

The Copper River Basin comprises an identifiable geographic unit that is separate and disinct from Valdez. Basin residents are more closely tied to Anchorage than to Valdez. Shopping trips are usually made to Anchorage, not Valdez. Ground transportation to Anchorage is more reliable than to Valdez since the Richardson Highway at Thompson Pass is frequently hazardous and/or closed during the winter. Television comes into the Basin from Fairbanks via Midnight Sun Broadcasting Co. headquartered in Anchorage. Two local newspapers, along with two papers from Anchorage, serve residents of the Basin as well as if not better than the Valdez Vanguard.

The preceding considerations not withstanding, it is immediately apparent

that the current Valdez Borough boundary proposal has been made for only one reason: to relieve Basin residents of the burden of collecting and spending potential property tax revenues from pump station #12. These revenues have been variously estimated to range from 2.4 to 4 million dollars annually.

Valdez does not plan to provide residents of the Copper River Basin with any services in return for these quite substantial revenues. Any services rendered to Basin residents apparently would be financed by additional property taxes. The property tax revenues accruing to Valdez then represent, in my opinion, a substantial unearned wind fall.

Please understand that the real property represented by pump station #12 would be the only substantial property tax revenue producer if there was an existing borough in the Copper River Basin. Valdez has become quite wealthy by annexing and then taxing the Alyeska Oil Terminal.

The elimination of pump station #12 as a source of property tax revenue (by including it in the Valdez Borough) would effectively doom any local government in the Basin to poverty. There are no other revenue sources comparable to the pump station. The role and importance of pump station #12 in the financing of potential local government in the Copper River Basin becomes even more important since all accessible and unappropriated land along the highway system between Chitina and Mentasta Pass has been selected by various native corporations under provisions of the Alaska Native Claims Settlement Act. Even land underlying the Glennallen High School has been selected.

It should be clear that if Valdez's current boundary proposal were to remain unchanged, any future borough government in the Copper River Basin would essentially be landless and poverty stricken.

I would submit that the north boundary for a Valdez Borough be drawn along more sensible and realistic lines. Those lines would put the north borough boundary along the crest of the Chugach Mountains.

Since the current Valdez borough proposal is vital to the interests of all residents of the Copper River Basin, I respectfully request that public hearings be held in the Basin prior to any final decision on the matter.

Sincerely,

Stuart Hirsh

Dear Senator Orsini,

Enclosed please find a copy of a letter I recently sent to the Commissioner of the Department of Community and Regional Affairs. It concerns a matter that is vital to the long term interests of all residents of the Copper River Basin.

Since the State Legislature sits as the Assembly for the State Wide Unorganized Borough, I request that you give the issues presented here in your valuable consideration. Thank you for your kink attention.

Sincerely,

Stuart Hirsh

July 12, 1977

The Honorable Joseph Orsini
Chairman
Community & Regional Affairs
2912 Alder Drive
Anchorage, Alaska 99504

Dear Senator Orsini:

We, here in the Copper River Basin, are concerned with the Resolution and Application to the Boundary Commission by the City Council of Valdez pertaining to an expansion of their boundaries into Regional Education Attendance Area #17 (Ahtna Region).

I feel quite confident that I am speaking for an overwhelming majority of the entire population of our area, when I state that we are opposed to any movement of any city or borough into our REAA boundaries.

You will recall that when the REAAs were being set up, the Boundary Commission tried to combine Ahtna with the Chugach region and that we were totally unified in our opposition. The Copper River School District Board will take any necessary action in hearings, elections or court proceedings to oppose this proposed movement into our area.

We would appreciate hearing your comments on this subject.

Very sincerely,

Paul Weir

January 27, 1978

The Honorable Joseph L. Orsini
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Mr. Orsini:

During the current legislative session, your committee will be dealing with a number of bills affecting public education.

Since the Anchorage School District enrolls one half of Alaska's public school students, we feel that many of these proposals are of vital importance to us.

Would it be possible for your staff to alert us to committee hearings on bills dealing with these matters? We are most interested in proposals on public employment practices affecting teachers and school employees, educational programs and school finance.

Your assistance in this matter would be appreciated.

For your information, we are enclosing copies of the Anchorage School District's Facts and Figures Digest. This booklet contains a summary of the District's financial activities and student enrollment patterns and may help you place some perspective on the size of our system.

Thank you in advance for your time and cooperation.

Sincerely,

John B. Peper

Robert Jenks
Municipal Lands Trustee
Department of Community &
Regional Affairs
511 West Fourth Avenue
Anchorage, Alaska 99501

Dear Mr. Jenks:

I appreciated having the opportunity to discuss with you recently the situation concerning the conveyance of village lands to municipalities under the provisions of Paragraph 14(c)(3) of the Alaska Native Claims Settlement Act.

I understand that presently most attention has focused on the situation between the Village Corporation of Eklutna and the Municipality of Anchorage. I would be interested in receiving your assessment as to where else in Alaska differences of opinion between municipality and village corporation regarding the conveyance of village land may occur; and where else, in your view, the State of Alaska should act as trustee for this land in place of a Borough government.

I would also appreciate any other comments you might have on this issue and how close it is to a satisfactory settlement.

Sincerely,

Joe Orsini

JAY S. HAMMOND, GOVERNOR

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

MANPOWER DIVISION

POUCH BC—JUNEAU, ALASKA 99811
PHONE 465-4890

February 8, 1978

Senator Joseph Orsini
Pouch V
Juneau. Alaska 99811

Dear Senator Orsini:

The Manpower Division, Department of Community and Regional Affairs has found it necessary to reduce public service employment under Title VI of CETA by 234 participants. Currently the Manpower Division is funding 740 participants.

The reduction, which will begin April 1, 1978, is necessary to adjust enrollment schedules to program dollars available. As you might know, CETA Prime Sponsors were directed by USDOL to develop enrollment schedules as a result of the passage of the President's Economic Stimulus Package. When previous enrollment schedules were negotiated with the Region X Employment and Training Administration our cost projections were ignored and an unrealistic cost of $875.00 per participant month was imposed upon the Prime Sponsor by the funding agency. This low participant cost artificially inflated our required enrollment schedule. When costs were computed through December 31, 1977, documented costs were $971.00 per participant month. When the Actual cost per participant was proved the Manpower Division requested additional funding from the Employment and Training Administration to support participants on board through September 30, 1978. The request has not been approved.

In order to give maximum notice of impending termination to those CETA participants involved and to afford sub-grantees opportunity to transition CETA participants to regular employment status it is essential we announce the reduction publicly and inform each sub-grantee individually as soon as possible.

The purpose of this letter is to inform you of the reasons we are reducing program activity. If you wish additional information please contact Fred Ali or Art Zillig of my staff.

Sincerely,

Lois A. Lind, Director
Manpower Division

May 6, 1977

Mr. Paul Conger
Administrative Assistant
Senate Community & Regional
Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Mr. Congor:

This is in response to your request for information about municipal detachment procedures.

Basically, there are two methods by which a territory may be detached from a municipality. The two methods are generally referred to as the "Legislative Review" method and the "Local Option" method.

Procedures for the Legislative Review method detachment go, generally, like this: A petition containing all information and signatures required by 19 AAC .10.010 (copy enclosed) is prepared and submitted to the Department of Community & Regional Affairs. Upon receipt the Department reviews the petition and determines whether or not it is sufficient. Assuming that it is determined sufficient, the petition is forwarded to the Local Boundary Commission for their consideration. Upon receipt, the Commission would schedule a public hearing on the proposal. At the public hearing all individuals, as well as the subject municipality and petitioners attorney, are allowed to present arguments and opinions with respect to the detachment proposal. Following the public hearing the Commission would convene a decisional meeting at which they would determine whether or not to accept the petition. If accepted, the Commission then prepares a recommendation to the legislature recommending that the subject territory be detached from the municipality. The Commission's recommendation is, as you are probably aware, submitted within the first 10 days of the session and is effective 45 days later unless earlier disapproved by a joint resolution concurred in by a majority of the members of each house.

The Local Option method is somewhat different. It is initiated by a petition too, but the petition is first submitted to the city council. If the city council approves of the detachment they adopt a resolution so stating and then forward that to the Boundary Commission. The Boundary Commission reviews it and makes a determination as to acceptability. If found acceptable (that is, it meets the requirements of 19 AAC 15.070) the city is so notified and directed to conduct an election on the question of detachment. Only those persons

residing within the area proposed to be detached are allowed to vote on the question of detachment. The majority vote decides the issue.

I have enclosed copies of administrative regulations that the Local Boundary Commission follows in deciding all detachment proceedings before it. The Legislative Review sections are contained in 19 AAC .05-10 while the Local Option provisions are contained at 19 AAC .15. I believe you will find the regulations quite specific and informative with respect to standards for detachment proceedings as well as procedures for such action.

Please contact me should you have additional questions.

Sincerely,

Patrick K. Poland
Local Government Specialist

Klawock, Alaska 99925

Dear Mr. Kato:

Enclosed please find a copy of the Local Boundary Commission recommendation for changing the corporate boundaries of the City of Craig. This recommendation includes a legal description of the annexed area which may help you to more clearly define the area in question.

I have also enclosed a copy of a rough outline map of the annexed area. (The annexed lands of the City of Craig are outlined in blue)

You are correct in observing that a portion of the new city limits of Craig lie within the core township of the Klawock-Heenya village corporation. However, this area does not include the total of 2670 acres that were annexed by Craig. Rather, Craig's area of municipal jurisdiction appears to include approximately 4 square miles of village corporation land. A close examination of the annexed area will reveal that if Klawock-Heenya were to initiate detachment proceedings, the area to be detached would include simply the annexed lands within the core township of Klawock-Heenya Corporation.

However, since the Craig sanitary land fill lies within this area, and it appears that control of this site may have constituted the main thrust for annexing this area, a suggestion is in order.

The rightful owner of the annexed lands within the core township-- Klawock-Heenya Corporation, could resolve to detach Craig lands within its core township. Upon approval by the legislature, Klawock-Heenya could offer Craig use of these lands for disposal purposes through use of a long-term lease or mutual use agreement.

I trust that this information may be of use to you.

Sincerely,

Carlton Smith
Local Government Specialist

April 3, 1975

City Council of Craig

Craig, Alaska 99921

Gentlemen:

Klawock Heenya Corporation has been corresponding with the Department of Community and Regional Affairs the past few weeks in regards to the following lands that wereannexed by the City of Craig some time after November 1972.

	Sec	Sub	Area
T73S	27	All	640 acres
R81E	28	"	640 "
	29	"	265 "
	32	"	325 "
	33	N½;SW¼	480 "
	34	N½	320 "

The reason Klawock Heenya Corporation is concerned about these lands is that they are in the corporation's primary township. We are aware that when these lands are turned over to this corporation that we will have full title to them and that any sales, leases, timber cuttings or even leaving the said lands as they stand will be to the sole discretion of this corporation.

We are also aware that if the said lands are developed, that they could be taxed by the city of Craig and in return the City of Craig will have some municipal service obligations to the developed area within the

city limits.

However, the Board of Directors feels that if there is any way that we could pursue a joint cooperative arrangement with the City Council of Craig to have these lands detached, then we should proceed in this manner.

What the Department of Community and Regional Affairs recommended was that, Klawock Heenya Corporation initiate a formal detachment procedure of the said lands that are involved. Procedurally, this would involve a letter from this corporation to the City Council of Craig. If the request is approved by the Council, a petition would then be forwarded to the Local Boundary Commission for review.

As this procedure would take place under the local option provision dealing with boundary adjustments, a minimal amount of processing would then be necessary.

In our correspondence with the dept. it was stated to us also that "on November 6, 1972, public notice of hearing for purposes of receiving public testimony on the Craig Annexation was sent to the City of Klawock and the City of Craig. I would like to point out that at that time our City Council in Klawock was very inactive and that there is no record of any correspondence in the files of the City of Klawock for the year 1972. The City council of Klawock has records starting in the year 1973 when Mr. William Woods was elected mayor.

I am pointing this out because the people I have talked to do not recall ever seeing a posted notice of the hearing and I am sure that with the passage and signing of the Alaska Native Claims Settlement Act on December 18, 1971, that these people knowing that they would be receiving land, would have expressed some concern as to this annexation.

I believe that the growth and economics of our area will weigh heavily on how well both the cities and both the village corporations could best stand and work together for the future.

This letter is not a formal request but rather a letter of inquiry into the general feelings of the council about this matter. If any of you have questions please feel free to call this office.

Sincerely yours,

Leonard Kato
President

Klawock, Alaska 99925

Dear Mr. Kato:

Your letter in reference to altering the City Limits of Craig was read at last nights Craig City Council meeting.

First - Your letter didn't state why you would like the Heenya Corporation land removed from the Craig City limits. Title, Control, etc. remains with the owner as you stated in your letter. What are the disadvantages of the land in question lying within the city limits of Craig?

Second - you stated that no-one you talked to knew about the annexation hearing held in Craig in 1972. I was at that meeting and remember a number of Klawock residents present...specifically Isaac Katas and Mr. & Mrs. Seltzer. I talked with Mr. Bippus who was Mayor here at the time, and he also remembers Byron Skinna being there, taping the whole hearing. So--I'm sure that Klawock was in fact notified of the hearing.

Third - It is the Councils' feeling that we could in no way justify either to ourselves or to our constituents the detachment of a large portion of taxable land in return for a possible improvement in the relationships between the two towns.

Sincerely,

Jim W. Paul

Juneau, Alaska 99811

Dear Senator Orsini:

Back in January 8, 1973 the Boundry Commission submitted a recomendation to the legislature for changes of the City of Craig's corporate boundries, which was passed the same year.

Enclosed is a series of letters on past communications with Community and Regional Affairs and the City of Craig.

As you review the letters, the concerns of Klawock Heenya Corporation will clearly spell themselves out, as well as, some miss information that was given to incorporate the northeast section of Craig's then present boundries.

Klawock Heenya Corporation would like to know if there is any help you and your committee could give us in this department.

If you have any questions, please feel free to call this office.

Sincerely yours,

Leonard Kato
President

Enclosure

April 8, 1975

City Council of Craig

Craig, Alaska 99921

Gentlemen:

In regards to the recent exchange of letters pertaining to Klawock Heenya Corporation's interest in detaching our land from the Craig City limits, I would like to request a meeting between this board of directors and the Craig City Council.

In re-reading both letters it seems there are numerous areas where unanswered questions have arisen. I am requesting this meeting in the hopes of resolving any differences of opinion and avoiding any future antagonisms that may arise.

Because of the inconvenient travel schedule during the week it might be best to consider a suitable time over any weekend, other than this weekend. However, this could be at your discression and convenience.

Thank you.

Sincerely yours,

Leonard Kato, President

Dear Mr. Kato:

In regards to you letter of April 8, 1975 pertaining to Klawock Heenya Corporation's interest in detaching land form the City of Craig, please be advised that the Officers of your Heenya Corporation are invited to the Craig City Council meeting to be held on Thursday May 1st, 1975, at the 1st National Bank of Ketchikan, POW Branch in Craig, Ak at 7:30 P. M.

Yours very truly,

Glen O Charles

Glen O Charles, Mayor

JC/c

April 28, 1975

Craig City Council
P.O. Box 23
Craig, Alaska 99921

Gentlemen:

I must apologize for not being present in person as other corporation committments have necessitated my being away at this time. However, Mr. Rudolph Smith, Sr., Chairman of the Board of Directors, and Mrs. Lee Perkins, Corporate Secretary, should be able to answer any questions posed by the council.

Under the somewhat complex U.S. Land Survey System, the City of Klawock lies in the northern half of T73S, R81E, projected Copper River Meridian. According to the Alaska Native Claims Settlement Act, Sec 16 (b), which in part reads, '...shall select in accordance with rules established by the Secretary (of Interior), an area equal to 23,040 acres, which must include the township or townships in which all or part of the Native village is located....' Thi- selection of land was made for Klawock Heenya Corporation by virtue of the ANCSA and not by any action of its board of directors. Similarly, the City of Craig lies within the northern half of T74S, R81E, and likewise Shaan-Seet's primary selected lands lie within this area. The city of Craig's choice of expansion could conceivably have gone in any other direction and not have had any effect on Klawock Heenya's mandated primary selection.

At the time of the hearing for expansion of Craig's Corporate boundaries, Klawock Heenya Corporation was not operating. In fact,

this corporation was not incorporated until November, 1973, which was almost a year since the hearing by the Local Boundary Commission. The interests and views of this corporation therefore could not have been fairly represented by anyone. The land area affected is in the neighborhood of 2700 acres as listed below:

Copper River Meridian, T73S, R81E

SEC	SUB	ACRES
27	All	640
28	"	640
29	"	265
32	"	325
33	N½;SW¼	480
34	N½	320

The petition by the City of Craig presented to the Local Boundary Commission states in part, 'territory northeast of the present corporate boundaries containing the Craig Sanitary Land Fill and Barge Off Loading Ramp...." In checking our files and re-checking with the U.S. Forest Service in Craig, wording in the petition seems to be incorrect. The special use permit for the Sanitary Land Fill was issued jointly to both the cities of Craig and Klawock, as signed by Alvin Young, Acting Mayor, Criag and Frank Peratrovich, Mayor, Klawock. The Barge Off Loading Ramp is under no special use permit and never has been. The ramp also lies within the primary selection made by this corporation. Granted, these errors may be insignificant, but if they had been made known at the hearing in Craig, who can guess what the result could have been.

Another aspect I have taken under consideration is to acknowledge the fact that the city of Craig needed to expand. I can not see any urgent need however. With this need in mind, the ANCSA provides for such a need for all municipal corporations, '...the amount of lands to be transferred to the municipal corporation, or in trust shall be no less than 1280 acres.' (Sec 14(c) (3)). Klawock Heenya Corporation has this obligation to the city of Klawock and likewise Shaan-Seet, Inc. has this obligation to the city of Craig. This land can be used for expansion or anyway the city seems fit to use it.

I also acknowledge the fact that this corporation holds substantial lands within the present expanded corporate boundaries of Craig. This under normal circumstances could represent a broad tax base for the city. Again, referring to the ANCSA, no taxation is allowed for 20 years unless prior to that time improvements, sales or leases on these land-holdings occur. (Sec 21 (c) & (d))

Without a doubt there are other views on the prior action taken by the City Council of Craig to justify the expansion that had been granted. As the views of this corporation were not heard than I feel I have expressed them now. The views and interpretations on an overall basis represent the views of Klawock Heenya Corporation and its Board of Directors.

In the event that detachment is approved, Klawock Heenya Corporation would be willing to meet with the cities of Craig and Klawock to draw up an agreement satisfactory to all parties involved on the now present sanitary land fill on which a special use permit now exists.

Respectfully yours,

Leonard Kato, President

File

February 3, 1976

City Council of Craig
P.O. Box 23
Craig, Alaska 99921

Gentlemen:

Enclosed are the correspondence that took place between Klawock Heenya Corporation and the past Craig Council Members.

I hope this will enlighten you on why the corporation had to select such lands.

The letters of April 8, 1975 requesting a meeting between the board of directors & Craig City Council was written when the Ferry had scheduled trips between Craig and Klawock and on week days the last trip would be a 7:00p.m. This is the reason the Corporation requested a meeting on a weekend.

However, the reply on April 18,1975 indicated that the request was accepted, but the inconvenience of the week day ferry schedule was not considered.

I hope this is of some help to you and that in the near future we could meet together to try and resolve this matter.

I firmly believe that the future of the two Village Corporations and the cities of Klawock and Craig will weigh heavily on how well we as, seperate entities could work together.

Sincerely,

Leonard Kato
President

Dear Mr. Yoder:

On a meeting held on November 10, 1976, the Klawock Heenya Corporation Board of Directors formed a committee to meet with the Craig Liason Committee. The intent, I believe, was to come up with a recommendation on how we could best work together to solve the present situation with Craig City limits and Klawock Heenya Corporation land selection.

As you will notice, the committee was formed some time ago. However, I fail to find in our files, a letter informing you of Klawock Heenya Corporation action.

If this is agreeable with you, we will wait for your answer on a possible meeting date.

Sincerely yours,

Leonard Katep

CITY OF CRAIG

P.O. Box 23

CRAIG, ALASKA 99921

Phone: 826-3232

February 4, 1977

Leonard Kato, President
Heenya Corporation
Klawock, Alaska 99925

Dear Leonard:

In reference to our recent meeting concerning adjustments to Craig's boundaries, we have discussed your proposal thoroughly. The Council did not feel they could defend this to the taxpayers of Craig.

One recurring objection is that without a land use plan for the area past East Craig, we really don't at this time have a clear idea of our future needs, such as water supplies or industrial sites. Further study will be essential before we can even discuss any lard transfer intelligently.

In any event, we found a great deal of opposition to the terms considered at our meeting. The strong feeling is that they were unfairly generous to Heenya Corporation at the expense of the City of Craig. I'm sure that before we could justify accepting any proposal we would have to be able to demonstrate a more tangible benefit to Craig.

I think we both realize that this was only the first step in negotiations, and that by rejecting the proposed terms, it isn't our intention to close the door to future discussions. We haven't heard what your Board of Director's reaction was to our discussion, but we will certainly be interested in any further comments you may have about this.

Sincerely,

Marvin L Yoder

Permission is hereby granted to City of Craig and Klawock

of Craig, and Klawock, Alaska

hereinafter called the permittee, to use subject to the conditions set out below, the following described lands or improvements:

Area accessible from Forest Service system road #6200 (Crab Creek), between the cities of Craig and Klawock, Alaska, as shown on the map attached hereto and made a part of this permit.

This permit covers 1 acres and/or 200' miles and is issued for the purpose of:

gravel, Alaska and access road

1 area for sanitary land fill, 200' x 200'
1 right-of-way for access road, 200' long

1. Construction or occupancy and use under this permit shall begin within 3 months, and construction, if any, shall be completed within 6 months, from the date of the permit. This use shall be actually exercised at least 365 days each year, unless otherwise authorized in writing. [illegible] LATION 6-11

2. In consideration for this use, the permittee shall pay to the Forest Service, U.S. Department of Agriculture, the sum of _____ Dollars ($_____) for the period from _____, 19__, to _____, 19__, and thereafter annually on _____ Dollars ($_____):

Provided, however, Charges for this use may be made or readjusted whenever necessary to place the charges on a basis commensurate with the value of use authorized by this permit.

3. This permit is accepted subject to the conditions set forth herein, and to conditions 1 to _____ attached hereto and made a part of this permit.

	NAME OF PERMITTEE	SIGNATURE OF AUTHORIZED OFFICER	DATE
PERMITTEE	City of Craig and Klawock	(Signed) ALLEN YOUNG, Acting Mayor	
		TITLE (Signed) FRANK PERATROVICH	10/7/70 DATE

forest officer in charge has approved, and has marked or otherwise designated, or destroyed. Timber cut or destroyed will be paid for by the permittee as follows: Merchantable timber at appraised value; young-growth timber below merchantable size at current damage appraisal value; *provided* that the Forest Service reserves the right to dispose of the merchantable timber to others than the permittee at no stumpage cost to the permittee. Trees, shrubs, and other plants may be planted in such manner and in such places about the premises as may be approved by the forest officer in charge.

5. The permittee shall maintain the improvements and premises to standards of repair, orderliness, neatness, sanitation, and safety acceptable to the forest officer in charge.

6. This permit is subject to all valid claims.

7. The permittee, in exercising the privileges granted by this permit, shall comply with the regulations of the Department of Agriculture and all Federal, State, county, and municipal laws, ordinances, or regulations which are applicable to the area or operations covered by this permit.

8. The permittee shall take all reasonable precautions to prevent and suppress forest fires. No material shall be disposed of by burning in open fires during the closed season established by law or regulation without a written permit from the forest officer in charge or his authorized agent.

9. The permittee shall exercise diligence in protecting from damage the land and property of the United States covered by and used in connection with this permit, and shall pay the United States for any damage resulting from negligence or from the violation of the terms of this permit or of any law or regulation applicable to the national forests by the permittee, or by any agents or employees of the permittee acting within the scope of their agency or employment.

10. The permittee shall fully repair all damage, other than ordinary wear and tear, to national forest roads and trails caused by the permittee in the exercise of the privilege granted by this permit.

11. No Member of or Delegate to Congress or Resident Commissioner shall be admitted to any share or part of this agreement or to any benefit that may arise herefrom unless it is made with a corporation for its general benefit.

12. Upon abandonment, termination, revocation, or cancellation of this permit, the permittee shall remove within a reasonable time all structures and improvements except those owned by the United States, and shall restore the site, unless otherwise agreed upon in writing or in this permit. If the permittee fails to remove all such structures or improvements within a reasonable period, they shall become the property of the United States, but that will not relieve the permittee of liability for the cost of their removal and restoration of the site.

13. This permit is not transferable. If the permittee through voluntary sale or transfer, or through enforcement of contract, foreclosure, tax sale, or other valid legal proceeding shall cease to be the owner of the physical improvements other than those owned by the United States situated on the land described in this permit and is unable to furnish adequate proof of ability to redeem or otherwise reestablish title to said improvements, this permit shall be subject to cancellation. But if the person to whom title to said improvements shall have been transferred in either manner provided is qualified as a permittee and is willing that his future occupancy of the premises shall be subject to such new conditions and stipulations as existing or prospective circumstances may warrant, his continued occupancy of the premises may be authorized by permit to him if, in the opinion of the issuing officer or his successor, issuance of a permit is desirable and in the public interest.

14. In case of change of address, the permittee shall immediately notify the forest supervisor.

15. The temporary use and occupancy of the premises and improvements herein described may be sublet by the permittee to third parties only with the prior written approval of the forest supervisor but the permittee shall continue to be responsible for compliance with all conditions of this permit by persons to whom such premises may be sublet.

16. This permit may be terminated upon breach of any of the conditions herein or at the discretion of the regional forester or the Chief, Forest Service.

17. In the event of any conflict between any of the preceding printed clauses or any provisions thereof and any of the following clauses or any provisions thereof, the following clauses will control.

GPO 886-132

18. The permittee will designate in writing to the Forest Supervisor, the name and title of the person or persons who is authorized to act in all matters connected with the privileges authorized by this permit. In the event the designated representative is to be changed for any reason, the Forest Supervisor will be notified of his replacement as soon as possible.

19. Should this permit fall within the boundaries of a present or future State selection area, the permit will terminate on the date the selection received tentative approval for transfer and patent to the State of Alaska.

20. Compliance With Title VI of Civil Rights Act of 1964. The permittee does by the acceptance of this document covenant and agree for itself, its assign, and its successors in interest to the property herein leased or any part thereof, that the covenants set forth below shall attach to and run with the land:

(1) That the described property, and its appurtenant areas and its building and facilities, whether or not on the land herein leased, will be operated as a disposal area in full compliance with Title VI of the Civil Rights Act of 1964 and all requirements imposed by or pursuant to the regulations issued thereunder by the Department of Agriculture and in effect on the date of this document to the end that no person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits or, be subjected to discrimination under any programs or activities provided thereon; and

(2) That the United States shall have the right to judicial enforcement of these covenants not only as to the permittee, its successors and assigns, but also as to lessees and licensees doing business or extending services under contractual or other arrangements on the land herein conveyed.

In the event of a breach of any of the conditions set forth above, all right, title, and interest in and to the above described property shall, at the option of the Grantor, revert to and become the property of the United States of America, which shall have an immediate right of entry thereon, and the permittee, its successors or assigns, shall forfeit all right, title, and interest in and to the above described property and in any and all of the tenements, hereditaments and appurtenances thereunto belonging; provided, however, that the failure of the Grantor to

insist in any one or more instances upon complete performance of any of the said conditions shall not be construed as a waiver or a relinquishment of the future performance of any such conditions, but the obligations of the permittee with respect to such future performance shall continue in full force and effect.

21. Garbage or Solid Waste Disposal. The disposal area covered by this permit shall be operated as a sanitary landfill. No burning and no salvage operations will be permitted at the site. Refuse shall be spread, compacted, and covered on the day it is deposited at the site.

Specific Disposal Standards. The depth of refuse in each cell, which is refuse covered on the day of deposit, shall not exceed 6 feet. The depth of compacted earth over each cell shall not be less than 6 inches. The final elevation shall be attained when 2.5 feet of compacted earth has been placed over the uppermost deposit. Drainage shall be provided where necessary to intercept and/or divert surface runoff from the entire fill area.

Borrow pits, if used, shall be regularly smoothed and revegetated to the satisfaction of the Forest Service. (X-13)

22. Nondiscrimination, Services. During the performance of this permit, the permittee agrees:

a. In connection with the performance of work under this permit, including construction, maintenance, and operation of the facility, the permittee shall not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin.

b. The permittee and his employees shall not discriminate by segregation or otherwise against any person on the basis of race, color, religion, sex, or national origin by curtailing or refusing to furnish accommodations, facilities, services, or use privileges offered to the public generally.

c. The permittee shall include and require compliance with the above nondiscrimination provisions in any subcontract made with respect to the operations under this permit.

d. Signs setting forth this policy of nondiscrimination to be furnished by the Forest Service will be conspicuously displayed at the public entrance to the premises, and at other exterior or interior locations as directed by the Forest Service. (R-2)

23. Indemnification of United States. The permittee shall indemnify the United States against any liability for damage to life or property arising from the occupancy or use of National Forest lands under this permit. (B-8)

24. Erosion Control. The permittee shall be responsible for the prevention and control of soil erosion and gullying on the area covered by this permit and lands adjacent thereto, and shall provide preventive measures as required by specifications attached to and made a part of this permit. (D-7)

25. Water Pollution. No waste or byproducts shall be discharged if it contains any substances in concentrations which will result in substantial harm to fish and wildlife, or to human water supplies.

Storage facilities for materials capable of causing water pollution, if accidentally discharged, shall be located so as to prevent any spillage into waters, or channels leading into water, that would result in substantial harm to fish and wildlife or to human water supplies. (D-2)

26. Esthetics. The permittee shall protect the scenic esthetic values of the area under this permit, and the adjacent land, as far as possible with the authorized use, during construction, operation, and maintenance of the improvements. (D-3)

27. Permit Termination. Unless sooner terminated or revoked by the Regional Forester in accordance with the provisions of the permit, this permit shall expire and become void on 12/31/90, but a new permit to occupy and use the same National Forest land may be granted provided the permittee will comply with the then existing laws and regulations governing the occupancy and use of National Forest lands and shall have notified the Regional Forester not less than 6 months prior to said date that such new permit is desired. (D-4)

28. Revegetation, Surface Restoration of Ground Cover. All earth cut or fill slopes favorable to revegetation or other areas on which ground cover is destroyed in the course of construction, will be revegetated to grasses or other suitable vegetation as required by the Forest Supervisor. (D-9)

29. Revegetation, Surface Restoration, Seeding or Planting. Seeding or planting will be done at a time of the year, in a manner, and with species which the District Ranger considers offer the best chance of success and will be repeated annually until such areas are accepted in writing by the District Ranger as satisfactorily revegetated and stabilized. (D-11)

30. Pollution. The permittee shall take reasonable precautions to prevent pollution of or deterioration of lands or waters which may result from the exercise of the privileges extended by this permit. (B-13)

31. Firebreaks. The permittee shall construct and maintain such firebreaks as required by the Forest Service. (F-12)

32. Fire Prevention and Suppression. Use in place of printed clauses pertaining to payment of damages resulting from fire in permits to States, counties, municipalities, and other Government agencies, when officials do not have authority to accept permits containing the printed clause. (F-24)

33. Live Trees and Fencing. All fences constructed under this permit will be attached to posts "H" in no case will the fence wire be fastened to live trees. (H-1)

34. Archeological-Paleontological Discoveries. If, during excavation work, items of substantial archeological or paleontological value are discovered, or a known deposit of such items is disturbed, the permittee will cease excavation in the area so affected. He will then notify the Forest Service and will not resume excavation until written approval is given. (X-17)

JUNEAU, ALASKA

RECOMMENDATION FOR CHANGING THE CORPORATE BOUNDARIES OF THE CITY OF CRAIG, ALASKA

SUBMITTED TO THE EIGHTH STATE LEGISLATURE
FIRST SESSION ASSEMBLED

SUBMITTED JANUARY 8, 1973

RECORD COPY

RECOMMENDATION FOR CHANGING THE CORPORATE
BOUNDARIES OF THE CITY OF CRAIG, ALASKA

WHEREAS, Petitioner, the City of Craig, has requested certain territory to be annexed to the City of Craig, to wit: territory east of the present corporate boundaries containing the Craig small boat harbor, the Craig Cold Storage, and a residential area; territory northeast of the present corporate boundaries containing the Craig Sanitary Land Fill and barge off-loading ramp; territory southeast of the present corporate boundaries containing the Craig Cementery and city park, all of which areas are contiguous to the present corporate limits of the City of Craig; and

WHEREAS, subsequent to giving properrnotice, the Local Boundary Commission conducted a public hearing in Craig on Friday, December 1, 1972, to consider whether the territory for which the City of Craig petitioned, as well as other areas contiguous and adjacent to the city, should be annexed to the City of Craig; and

WHEREAS, the Local Boundary Commission, at a public meeting held in Anchorage on Monday, December 4, 1972, reviewed the City of Craig's petition, supporting brief and all testimony advanced at the public hearing; and

WHEREAS, no answer or other written objections to the petition had been filed; and

WHEREAS, after having adjusted the boundaries, the area proposed for annexation did meet the standards for annexation of territory to a municipality as established by the Local Boundary Commission; and

WHEREAS, it appeared to the Commission that the extension of municipal jurisdiction in the territory to be annexed would enable the city to provide for planned orderly development of the territory and provide fire and police protection as well as other municipal services;

NOW, THEREFORE, the Local Boundary Commission recommends that pursuant to

Constitution, Alaska Statutes

44.19.260, and Alaska Administrative Code regulations 19 AAC 05.010 (a) (3), (4), (5) and (7), that the corporate boundaries of the City of Craig be changed to read as follows:

CITY OF CRAIG

Beginning at the NE corner of Section 27 Unsurveyed T73S, R81E, projected Copper River Meridian, Alaska; thence west to the NW corner of the NE 1/4 of Section 29, T73S, R81E; thence south to the SW corner of the NE 1/4 of Section 32, T73S, R81E; thence west to the SW corner of the NE 1/4 of Section 31, T73S, R81E; thence southeasterly to the SE corner of Section 31, T73S, R81E; thence southwest to the SW corner of the NE 1/4 of Section 6, T74S, R81E; thence south to the SW corner of the NE 1/4 of Section 18, T74S, R81E; thence east to the SE corner of the NW 1/4 of Section 16, T74S, R81E; thence north to the SW corner of the NE 1/4 of Section 33, T73S, R81E; thence east to the SE corner of the NE 1/4 of Section 34, T73S, R81E; thence north to the point of beginning containing 9.5 square miles more or less.

In accordance with the Constitution, this recommendation shall become effective forty-five days after its presentation to the Legislature or at the end of the session, whichever is earlier, unless disapproved by a resolution concurred in by a majority of the members of each house.

February 26, 1975

Attention: Local Boundary Commission

Dear Sir:

It is to our understanding that the City of Craig's future city limits expansion runs into our primary land selection, with this fact in mind, the Board of Directors of Klawock Heenya Corporation has expressed some concern on how many acres are directly involved, why wasn't the area patented, and is there any time limit to the City of Craig on development in this area. What obligations would the City of Craig and this corporation have, if any, to each other and is there any office besides the City of Craig's that this corporation has to deal with to come up with a neutral understanding.

We would appreciate the above questions answered as well as receive any information you could give us on this matter.

This corporation's primary townsite is located on T73S; R81E, Copper River Meridian. To our knowledge the acres involved are:

T73S R81E	Sec	Sub	Total Area
	27	All	640 Acres
	28	"	640 "
	29	"	265 "
	32	"	325 "
	33	N½;SW¼	480 "
	34	N½	320 "
		TOTAL	2670 ACRES

Sincerely yours,

Copy to Bob Mullendore

March 6, 1975

Mr. Leonard Kato, President
Klawock - Heenya Corporation
P.O. Box 74
Klawock, Alaska 99925

Dear Mr. Kato:

This correspondence is in response to your letter of February 26, wherein you requested opinions concerning the annexation of Klawock-Heenya lands to the City of Craig.

First, the description of lands annexed by the City of Craig which you indicated is correct. By law, the City of Craig now has essentially the same powers to exercise its authority within the 2,670 acres of Heenya corporate land holdings as the City of Klawock now exercises over lands within its corporate boundaries. However, it should be made clear that municipal authority exercised by the City of Craig by annexation does not concern title to the Heenya properties to which you referred in your letter.

Further, the lands annexed to the City of Craig cannot be patented to the City of Craig as they are the property of Heenya corporation. The patent to be received by the Heenya Corporation is being processed by the Bureau of Land Management. By law, village corporations must receive "interim" patents to selected lands. The Bureau of Land Management will then issue final patent to approved selected lands, which usually takes place after a period of two to four years.

Regarding development of the area, the City of Craig may not tax Klawock Heenya lands until December 18, 1991 unless these lands are improved through commercial or residential development.

At this time, it would be advisable for the board members of Klawock Heenya corporation to meet jointly with the city council of Craig in order to review possible plans of the City of Craig for the annexed lands. If after a joint review of the annexed area, Klawock Heenya Corporation and the City of Craig wish to adjust the existing boundaries, the Local Boundary Commission would hold a public hearing to accept testimony on the issue once a petition was received by the Department.

In 1972 the Department conducted a public hearing on the annexation of the City of Craig. Our records indicate that notices of these hearings were sent to the City of Klawock. However, no testimony from Klawock was received on this matter.

In closing, I would recommend that Klawock - Heenya Corporation pursue active co - operation with the City of Craig to arrive at a swift and reasonable conclusion to this matter. If further boundary adjustments are to be made, it would be in the best interest of both parties to initiate these proceedings as soon as possible.

I trust that these points may be helpful in your consideration of the situation.

Sincerely,

Carl Smith

CS: dt

March 21, 1975

Mr. Carl Smith, Local Government Specialist
State of Alaska
Department of Community & Regional Affairs
Division of Local Government Assistance
Pouch B
Juneau, Alaska 99801

Dear Mr. Smith:

Thank you for your reply to my letter of February 26, 1975.

Some of the things mentioned such as the possibility of Klawock Heenya Corporation having private lands in the city limits of Craig was already understood by the board of directors of this corporation. I mentioned the 'possibility of having private lands within the city limits of Craig', for the reason that the Bureau of Land Management has not made a final decision on these lands.

For our records we would like to have copies of all correspondence relating to this matter for our own review and study.

In addition, there are questions raised that we definitely need answers for:

1) Why the department did not send notices to other local organizations such as the local Alaska Native Brotherhood & Sisterhood, Tlinget & Haida as well as the city council of Klawock. This corporation was not chartered until November 1973 and the city council of Klawock during 1972 was inactive, therefore the possibility of fair representation at any such hearing was virtually nil. I can see that this idea could have easily been overlooked.

2) In your reply of March 6, 1975, you mention that 'the land annexed to the city of Craig cannot be patented to the city of Craig as they are the property of Klawock Heenya Corporation.' First of all thethe

time that that the annexation hearing took place the lands were not the property of Klawock Heenya Corporation and this corporation is still waiting for a final decision from BLM on these lands. My question is: Why were the annexed lands not patented at that time, so that Klawock Heenya Corporation could have choosen other lands? The reason for this question is that in September 1973, this corporation received a land resources book that was done for Sealaska Regional Corporation by Wilsey & Ham, Inc. and McGaughan & Johnson. This book contained information on withdrawal lands; patented lands; land encumbrances, etc. and under patented land this book did not show the 2770 acres that was annexed by the City of Craig.

3) The City of Craig will have some obligations to this corporation as private land owners when we choose to build a building for business, such as giving obewater; sewage and electricity. To What extend could a private owner demand such services from a municipal government in that event.

4) What alternatives does a private home owner or business owner have, if any, when such services are not provided?

Klawock Heenya Corporation would appreciate the answere to these questions brought up and any other information that a private land owner and builder has a right to ask for from a municipal government.

We are presently looking forward to a joint review with the City of Craig and any information from your department on matters such as expressed in this letter will greatly help our corporation. We are looking forward to a speedy reply so as to get started on a joint review.

Thank you for your department's co-operation.

Sincerely yours,

Leonard Kato

DIVISION OF LOCAL GOVERNMENT ASSISTANCE

POUCH B - JUNEAU 99811

March 27, 1975

Mr. Leonard Kato, President
Klawodk-Heenya Corporation
P.O. Box 74
Klawock, Alaska 99925

Dear Mr. Kato:

I will respond to your questions as put forth in your letter of March 21.
(1) Under Alaska law, proper notice of public hearing includes the forwarding of legal notices to municipal corporations affected by the proposed boundary adjustment. On November 6, 1972 public notice of hearing for purposes of receiving public testimony on the Craig Annexation was sent to the City of Klawock and the City of Craig. While the Department respects your observation that "fair" representation was minimal under the circumstances, it is the clear responsibility of the City of Klawock to note legal notices, regardless of its action or inaction at the time. Further, since the record leading to the hearing and to the Local Boundary Commission's decisional meeting did not reflect correspondence from any Klawock residents in protest of the annexation, the majority of the Commission accepted the petition and submitted its recommendation for the Craig annexation to the Alaska Legislature.

(2) The Sealaska Corporation publication to which you refer did not reflect the 2,670 acre area annexed by Craig because extension of municipal jurisdiction does not enter the concern of the BLM in its consideration of withdrawal lands; patented lands; and land encumberances. Again, BLM is the only agency which can answer your question regarding the timing of patents. We have no information at this office that could satisfy this question. As I am sure you are aware, the BLM is burdened with informational requests of this nature. I would suggest that you pursue this matter further through the BLM office in Anchorage phone 277-1561.

(3) The City of Craig currently is receiving state shared revenue for providing the following municipal services:

Police and Fire protection
Parks and Recreation
Transportation
Road Maintenance
Pollution control (water/sewer)

As a general rule, a municipality is obligated to make services available to residents where the service can be implemented without undue burden on the municipality and on the individual parties served. In any event, determinations on the extension of services are a clear consideration of the local municipality and of those who reside within the municipal boundaries.

The Alaska Public Utilities Commission (APUC) has the authority to review services of municipal utilities. This agency reports that services may be extended to an area not previously served by the municipal utility if (1) the utility has the resources with which to expand its services to a reasonable number of users within reasonable proximity to existing service lines and (2) the extension of service would not enter an area where a competing utility might operate.

If and when residents of Craig petition to receive municipal services and are refused, the legal recourse is again through the APUC. When a complaint is received, the Commission will proceed with an investigation to determine the "reasonableness" or "unreasonableness" of the request/denial for services. For further information, please write the Alaska Public Utilities Commission, McKay Building Anchorage, Alaska 99501.

The Klawock-Heenya Corporation could initiate a formal detachment procedure of the lands annexed by the City of Craig if your board can agree on this arrangement. Procedurally, this would involve a letter or request from the Heenya Corporation (with lands to be detached from the City of Craig described) to the City Council of Craig. If the idea is approved by the City Council, a petition would be then forwarded by the City to the Local Boundary Commission for review. As this procedure would take place under the local option provision dealing with boundary adjustments, a minimal amount of processing would be necessary. If you have any specific questions concerning this procedure, please contact this office directly.

Sincerely,

Carlton Smith
Local Government Specialist

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

IAY S. HAMMOND, Governor

DIVISION OF LOCAL GOVERNMENT ASSISTANCE / *POUCH B - JUNEAU 99811*

April 2, 1975

Mr. Leonard Kato, President
Klawock/Heenya Corporation
Post Office Box 74
Klawock, Alaska 99925

Dear Mr. Kato:

Enclosed please find a copy of the Local Boundary Commission recommendation for changing the corporate boundaries of the City of Craig. This recommendation includes a legal description of the annexed area which may help you to more clearly define the area in question.

I have also enclosed a copy of a rough outline map of the annexed area. (The annexed lands of the City of Craig are outlined in blue)

You are correct in observing that a portion of the new city limits of Craig lie within the core township of the Klawock-Heenya village corporation. However, this area does not include the total of 2670 acres that were annexed by Craig. Rather, Craig's area of municipal jurisdiction appears to include approximately 4 square miles of village corporation land. A close examination of the annexed area will reveal that if Klawock-Heenya were to initiate detachment proceedings, the area to be detached would include simply the annexed lands within the core township of Klawock-Heenya Corporation.

However, since the Craig sanitary land fill lies within this area, and it appears that control of this site may have constituted the main thrust for annexing this area, a suggestion is in order.

The rightful owner of the annexed lands within the core township-- Klawock-Heenya Corporation, could resolve to detach Craig lands within its core township. Upon approval by the legislature, Klawock-Heenya could offer Craig use of these lands for disposal purposes through use of a long-term lease or mutual use agreement.

I trust that this information may be of use to you.

Sincerely,

Carlton Smith
Local Government Specialist

Dear Senator Orsini:

At the present time the community and regional affairs is administrating state RDA grants in the amount of $20,000.00. Several of the villages in our region are currently receiving these grants. These have been greatly instrumental increasing the capacity of village councils of our area.

We would request your support with the increase in these grants from $20,000.00 to $40,000.00 as is contained Senate Bill 213. By increasing the amount of the grant from $20,000.00 to $40,000.00 it will greatly offset increased costs of construction due to inflation and other factors.

Your support is appreciated.

Senator Orsini, Chairman
Community & Regional Affairs Comm.
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

Our Office wishes to express our strong support for CS House Bill 193am. We are heavily involved in the Day Care program as we act as coordinators and administrators for the program here in Kodiak and in the villages of Kodiak Island. And, as such, have a strong interest in the progress of this Bill.

Under Section 1 b., we feel it is extremely important to create the 90 day limit. This will insure timely establishment of day care centers within the villages.

Section 2 also will have an extremely beneficial effect on our Day Care programs. By increasing the age limit of those who may be eligible for assistance, it will allow much needed day care for children during after school hours. It also can allow for assistance for children 7 to 11 years of age during the summer when school is not in session.

And finally an increased age limit can eliminate many of the inequities of the system. As it is now AFDC recipients are eligible to receive day care assistance for children through age 11 and non AFDC recipients are cut off at age 7. By equalizing or standardizing the age limit we can begin to reduce the partiality of the program to Welfare recipients.

We have discussed these proposed changes with the Day Care Center people here in Kodiak and at the Coast Guard Base. They are in strong support of these measures.

We hope that you will expediate the speedy passage of CS for House Bill 193am. through your committee.

Sincerely,

Wayne E. Marshall

Anchorage, Alaska 99504

Dear Mr. Courtis:

Thank you for your letter of February 22, 1977. Your points regarding Richard Nygaard's report were very well taken. In my opinion, others would benefit greatly from your comments, and I would recommend your writing a "Letter to the Editor" to both the Anchorage Daily News and the Anchorage Times, so as to share your observations with the general public. Your article could generate a good deal of interesting information regarding state oil and gas leasing policies, particularly with respect to Prudhoe Bay.

If you have any more comments or suggestions, I would be very interested in hearing them.

Very truly yours,

Senator Joe Orsini

JO/js

February 22, 1977

2913 Wentworth
Anchorage, Alaska 99504

Senator Joseph Orsini
Pouch V
Juneau, Alaska 99811

Dear Mr. Orsini:

I am very concerned with the account of Norgaard and Gaffney's report on state oil and gas leasing policy which appeared in the Anchorage Daily News last week. I definitely do not agree with a number of their quoted opinions. I think it is extremely unfortunate that my tax dollars went to pay for such an unrealistic analysis. In addition, I hope that the legislature in the future will hire consultants who live in the real world and not in dream-land.

The following items indicate to me that Norgaard isn't being realistic in his analysis.

1. "Clearly if the state had known about the Prudhoe Bay field in advance, between $5 billion and $10 billion more would have been collected in bonus bids."

   I don't deny that statement, but absolutely NO ONE knew the Prudhoe Bay field was there before the discovery well was drilled. In addition, by analogy with Norgaard's analysis, I would be a millionaire today if I had purchased 2000 shares of IBM stock thirty years ago when it was selling at a few dollars a share. So what. I, like most people, did not recognize the potential of IBM at that time. Likewise, the true potential of the North Slope wasn't recognized prior to 1968 either.

2. Even if the bonus bid system were continued, state revenues would increase if there were exploratory drilling before lease sales, and the information from the exploration was publicly disseminated.

What foolishness. What oil company is going to pay $2 million to $12 million to drill a well and then give the information free to the state and the public before leasing occurs? No company that I know of. Also, suppose such a well were drilled and it found the prospect to be unproductive. How much bonus money do you think would be bid for that area? I suspect 2¢ would be a generous offer.

3. The state should seriously consider...establishment of a system to reject bids that are too low for a particular tract.

In order to do this, the state would need to have extensive geologic and geophysical data to analyze all the tracts in a sale. Does Norgaard realize the cost involved? I think not. In the Cook Inlet basin, onshore seismic data costs a minimum of $10,000/mile and there are thousands of square miles to cover. The cost becomes astronomical when the rest of Alaska is also included for evaluation.

Sincerely,

Dave Courtis

Dave Courtis

Report calls Prudhoe 'tough luck' story

Billions lost on oil, gas?

By ROSEMARY SHINOHARA
Daily News Staff Writer

The State of Alaska lost out on at least $5 billion to $10 billion, and possibly an additional $15 billion to $30 billion, on its Prudhoe Bay oil and gas leases because of an ineffective leasing policy, a state consultant said in a report obtained by The Daily News Wednesday.

"Prudhoe Bay is clearly a 'tough luck' story for the state," said Richard B. Norgaard, a member of the Energy and Resources Group at the University of California, Berkeley.

THE NORGAARD paper is an appendix to a report on alternatives to improve state oil and gas leasing policy done for the state administration and the legislature by Mason Gaffney, professor of economics at the University of California, Riverside, and former executive director of the British Columbia Institute of Analysis of Economic Policy.

Both consultants say the bonus bid system that earned Alaska $900 million for Prudhoe Bay leases in 1969 should be tossed out in favor of one or a combination of several different systems.

A report prepared independently within the Department of Natural Resources reached much the same conclusions, The Daily News learned, but that report has not yet been made public.

THE CONCLUSIONS of all three studies are to be presented to legislative committees in Juneau Thursday and Friday.

Norgaard said in his paper that even if the bonus bid system were continued, state revenues would increase if there were exploratory drilling before lease sales, and the information from the exploration was publicly disseminated.

On the North Slope, 90 per cent of the Prudhoe Bay field was acquired in the mid-60s by Atlantic - Richfield Co. and British Petroleum when $10.5 million in bonus bids were received from leased acreage.

AFTER OIL was discovered, the famous 1969 North Slope lease sale brought in $900 million in bonus bids for the remaining acreage.

"Clearly, had the state known about the Prudhoe Bay field in advance, between $5 billion and $10 billion more would have been collected in bonus bids," Norgaard said.

Petroleum prices increased three-fold several years after the sale. "Presuming that industry had not predicted this increase at the time of the sale, then the state probably 'lost out' on perhaps an additional $15 billion to $30 billion."

IN THE CASE of offshore Cook Inlet sales through 1968, lease bonus bids would have increased five times over, assuming exploratory drilling increased the effectiveness of the bonus bid from 16 per cent to 80 per cent as a means of collection rent, Norgaard said.

"The increased revenues to the state would have been equivalent to nearly $300 million (in 1975 dollars) received in 1961," he said.

Norgaard concluded the lease bonus bid system "appears to have been between five and 20 per cent effective as a means of collecting rent over and above that collected through royalties."

HE SAID THE state should seriously consider alternative leasing systems, presale exploration, and establishment of a system to reject bids that are too low for a particular tract.

Norgaard did not address leasing alternatives, but Gaffney did.

Gaffney said he would "screen out" systems such as the high front-end bonus plan for oil and gas leasing, and place "greatest emphasis" on a system called the ad valorem charge, which he said could be described as "a low signature bonus paid on the installment plan followed by a high production bonus or discovery bonus whose size depends on the flow of production."

THE BONUS BID system required bidders to pay in an advance for an unknown possibility. It essentially substitutes wealth for productivity as the basis for awarding bids, Gaffney said.

The ad valorem charge is similar to a property tax, Gaffney said. The charge would be a percentage rate of the current appraised value of the resource, which might range from zero to "very high values for superior deposits."

RESOLUTION NO. 248

A RESOLUTION OF THE ASSEMBLY OF THE KETCHIKAN GATEWAY BOROUGH, ALASKA, EXPRESSING TO THE LEGISLATURE OF THE STATE OF ALASKA, THE ASSEMBLY'S SUPPORT OF HOUSE BILL NO. 134, RELATING TO PENALTIES FOR VIOLATION OF A MUNICIPAL ORDINANCE; DIRECTING THE CLERK TO SEND COPIES OF THIS RESOLUTION TO THE MEMBERS OF THE ALASKA LEGISLATURE; AND ESTABLISHING AN EFFECTIVE DATE.

THE ASSEMBLY OF THE KETCHIKAN GATEWAY BOROUGH, ALASKA, RESOLVES, as follows:

Section 1. The Alaska Legislature is requested to adopt House Bill 134, "An Act relating to penalties for violation of a municipal ordinance." The Assembly fully supports increasing penalties for knowing and willful violation of ordinances.

Section 2. The Clerk is directed to send copies of this resolution to the members of the Alaska Legislature.

Section 3. This resolution is effective immediately.

ADOPTED this 22nd day of February, 1977.

Dr. John Lindauer
Chancellor
University of Alaska, Anchorage
3221 Providence Drive
Anchorage, Alaska 99504

Dear Dr. Lindauer:

It has come to my attention that you are seeking a Dean for the School of Business and Public Administration. While you may be looking nationwide for suitable candidates, I feel very strongly that where there is an Alaskan "available and qualified", that he (or she) be given preference over an "outsider".

It seems that we do have such an Alaskan in the person of Dr. Garth Jones, and he has my wholehearted support for the position. I have known Dr. Jones since shortly after he came to Alaska, and have every confidence he can admirably do the job.

My first meeting with Dr. Jones was in the course of researching a bill of mine pertaining to agricultural land in Alaska. His xpertise and willingness to take sufficient time to provide the information needed to serve as backup to the bill was instrumental in its passage. That bill is, to date, the most significant piece of legislation passed with respect to the eventual promotion of a true agricultural industry in the state.

Again, I hope you will give favorable consideration to his candidacy for Dean.

Sincerely,

Senator Joe Orsini

cc: Dr. Richard Ender

SCHOOL OF BUSINESS
AND PUBLIC ADMINISTRATION

February 23, 1977

The Hon. Joseph L. Orsini
Alaska State Senate
Pouch V
Juneau, AK 99811

Dear Senator Orsini:

Could you write a letter of recommendation in support of my candidacy for the position of Dean of the School of Business and Public Administration at UAA? Under the University's reorganization scheme and Chancellor Lindauer's guidelines, all top positions shall be filled on the basis of a nationwide search. I feel that I have a reputation in my academic field as well as a proven track record in Alaska.

For awhile I was reluctant to become a candidate, particularly in light of the turbulence in the University system. However, a number of Alaskans have requested that I become a candidate and feel that it would be a mistake to bring in an "outsider." I feel pleased that I'm now deemed an "insider." I've now been here almost four years and have managed to build a reputable program with only modest budgetary support.

If you can support my candidacy, please address a letter to Chancellor John Lindauer with a copy to:

Richard L. Ender, Chairman
Search Committee
University of Alaska, Anchorage
3221 Providence Drive
Anchorage, AK 99504

Thanks for a copy of your recent legislative newsletter, I enjoyed reading it immensely.

Best regards.

Sincerely,

Garth N. Jones, Head
School of Business and Public Administration

BIOGRAPHIC DATA

NAME: Garth N. Jones

January 1977

BIOGRAPHIC DATA:

DOB: February 25, 1925; Salt Lake C. Utah. Married, three sons.

EDUCATION:

1943-47 Utah State University - B.S., Political Science and Economics
1947-48 University of Utah - M.A., Political Science and Economics
1948-49 Pennsylvania State University
1950-51 University of Utah - Ph.D. (1954) Political Science and Economics
University of Utah, Special Certificate Public Administration (1948)

CAREER:

September, 1972 to Present
Professor, Public Policy and Administration
Head of School of Business and Public Administration
Senior College, University of Alaska, Anchorage

Primary responsibility to develop a professional education program in business and public management. Also taught courses in the areas of organizational theory and behavior, urban administration, political dynamics, and public finance administration.

October, 1972 to August, 1973
Senior Consultant, Population Programme, Public Administration Division, Economic and Social Council, United Nations

Responsible for developing a comprehensive programme in the organization and administration aspects of population programmes. This includes preparing background papers for the 1974 World Population Conference, organizing symposia and seminars, writing a major study on the organization and administration of family planning programmes, consulting with national and international agencies, arranging special training and management development programs.

August, 1970 to October, 1972
Professor, Department of Political Science
Colorado State University, Fort Collins.

Primary activity in research and writing on the development process in the lesser developed countries and the United States. Principal frame of reference socio-technical systems for human and natural resource development. Emphasis placed on environment impacts, particularly in relationship to water needs. Considerable publication on the Indus basin irrigation systems. Also major work in organizational theory and behavior issues in the LDC's.

Also served as a member of an interdisciplinary research team to study the environmental impact of oil shale development in Western Colorado. Project sponsored by Thorne Ecological Institute, Boulder, Colorado.

September, 1969 to July, 1970
Senior Specialist, East-West Center, Honolulu, Hawaii

Invited as one of twenty-four Asian, European, and American scholars to spend nine months at the East-West Center researching and writing upon particularly the two following topics:

1. "Role of Bureaucracy in Planned Development: A Comparative Study of Indonesia and Pakistan."
2. "Planned Organizational Change: A Study of the Change Process through Marginal Utility and Social Exchange Analyses."

June, 1967 to August, 1969
Chief, Public Administration Division, FSRO-2, Pakistan

Responsible for supervising a broadly-designed technical assistance in public administration which centered on three development goals: (a) strengthening economic decision-making, (b) strengthening key development agencies, and (c) strengthening local government. Supervised five contract operations as well as direct agency activities. These included 25 - 30 professionals.

October, 1964 to June, 1967
Chief of Party, University of Southern California Contract in Pakistan
Associate Professor

From October 1964 to June 1965 USC Party Representative in Lahore with the primary responsibility of developing an academic program at the Department of Administrative Science, University of the Punjab. On July 1, 1965 appointed Chief of Party of the Contract. The contract provided for assistance to three National Institutes of Public Administration located at Karachi, Dacca, and Lahore; Department of Administrative Science at the University of the Punjab, and the Civil Service Academy at Lahore.

September, 1961 to October, 1964
Associate Professor, School of Public Administration, University of Southern California, Los Angeles

Position equally divided between teaching and administrative activities. Subjects of instruction were Finance Administration, Local Government Administration, Modernization of Administration in Emerging Countries, and Organizational Theory and Behavior. Faculty Student Advisor for the Pakistan Project. Also served as Peace Corps Liaison Coordinator.

December, 1956 to February, 1962
Public Administration Advisor, FSRO-3, US/AID, Indonesia, Djakarta

Planned and implemented an administrative management educational and training program; initiated and assisted in carrying out management improvement projects for more efficient operation of provincial and local governments. Projects were undertaken to establish a bureau of reconstruction and development, bureau of statistics and planning, and an integrated department of finance. In the absence of the Chief, assumed his responsibilities; prepared and implemented necessary program and related documents; and undertook reconnaisance and research type activities as to the nature and scope of the Indonesian Public Administration, particularly in the field of fiscal and financial management.

August, 1953 to December, 1956
Assistant Professor, Brigham Young University, Provo, Utah

Delivered lectures in Public Administration, Municipal Administration, American Heritage and related subjects. During 1955-56 taught a Personnel Management course to Air Force Reserve Officers at Clearfield, Utah. Also served as Research Associate, Local Government Survey Commission. Acted as consultant to Utah Municipal League and Utah State Association of County Officials.

April, 1953 to September, 1954
Research Consultant - Utah Foundation, Salt Lake City

Utah Foundation is a private research organization concerned with government problems. Prepared studies on public finance, tax administration, and state and local government organization and administration.

December, 1951 to April, 1953
Food and Drug Inspector - Dept. of Agriculture, Salt Lake City, Utah

Responsible for enforcement of pure food and drug laws of State of Utah entailing review of written reports from seven regional food and drug inspectors; determination of measures to be taken against business concerns or persons who violated the law; inspection of food and drug processing plants; and preparation of monthly and periodic reports for submission to Board of Agriculture and special advisory bodi

May, 1951 to December, 1951
Administrave Assistant to the District Administrator, Ponape District, Eastern Carolines, Department of Interior.

Responsible for establishment of records and record keeping systems; gathering data, doing research and performing other related activities for preparation of economic and other reports; assisting heads of other units in developing necessary report forms; routing of all income mail;

preparation and review of correspondence relating to administrative matters. Handled all necessary local personnel action and served as reviewing officer for efficiency-rating system. Assisted in preparation of budgets; made field trips; and in absence of District Administrator, supervised the district.

May, 1950 to April, 1951
Research Specialist and Consultant, Utah Municipal Leage and Utah State Association of County Officers and Officials, Salt Lake City, Utah

Periodically called upon to make studies and advise on various legal and administrative problems confronting local governments.

September, 1949 to June, 1950
Research and Teaching Assistant at the University of Utah

September, 1948 to June, 1949
Teaching and Research Assistant in Political Science Department, Pennsylvania State College

September, 1947 to June, 1948
Research Assistant, Political Science Department, University of Utah

April, 1947 to August, 1948
Research Specialist, Internship, County of Salt Lake City, Salt Lake City, Utah

HONORS AND FELLOWSHIPS:

A. Utah State University, Logan, Utah
   1. Sears Scholarship, 1943-44
   2. Selected for Who's Who in American Colleges and Universities, 1947
   3. Elected Blue Key Fraternity, 1946

B. University of Utah
   1. Graduate Research Fellowship in Political Science, 1947-48
   2. Graduate and Teaching Fellowships, 1949-50

C. Pennsylvania State University
   Graduate Teaching Fellowship in Political Science, 1948-49

D. University of Southern California
   Professor of the Year, School of Public Administration, 1962

E. East West Center, Honolulu, Hawaii
   Senior Specialist, September, 1969 to July, 1970.

F. Other Honors:
   Listed in American Men of Science, American Women and Men of Science, Who's Who in America, and Who's Who in the West.

Professional Associations:

A. American Society of Public Administration
B. American Political Science Association
C. Western Political Science Association
D. Society for Applied Anthropology
E. Comparative and International Administration Group of the American Society for Public Administration

Teaching and Research Interests:

A. Teaching:

Public Policy and Administration, Organizational Theory and Behavior, Comparative and Development Administration, Public Finance Administration, Local Government Administration

B. Research:

Planned Organizational Change with emphasis on the empirical approach.
Financial Management with emphasis on the integration of planning and budgeting institutions and processes.
Environmental Policy and Management with emphasis on Water and Population.

Recent Grants:

A. Comparative Administration Group of the American Society for Public Administration, Grant of $3,000 to study planned organizational change, 1964.

B. Research Committee, University of Southern California, Grant of $500 to study planned organizational change, 1964.

C. East-West Center, Honolulu, Hawaii. Provides assistance in services valued $5,000 beside a grant equivalent to $24,000 year salary, 1969-70.

D. Colorado State University, Water Management studies. 75% salary, four graduate assistants, and related aid for three years. AID financing. Total grant over $60,000: 1970-73.

E. Columbia University, Pakistan Program, Grant of $1,000 to prepare volume IV of Pakistan Bibliography. Also $500 from Colorado State University to complete this study, 1974-75.

F. Urban Observatory, National League of Cities and HUD. Supervised preparation of proposal. Funded for $300,000, 1975-77. Assisted in the preparation and securing of grant.

G. Urban Education, ICMA/NASPAA Grant of $9,000, 1975-76.

RECENT PUBLICATIONS:

I have published over 100 articles, monographs and books. My most recent book is Planned Organizational Change: A Study Using an Empirical Approach, London: Routledge and Kegan Paul (1968) and Praeger (1969). Prentice-Hall Publishers, as well as the English Publisher, have approached me to write an updated version.

Recent University Activities:

A. Senior College Representative - Southcentral Regional Council 1973-74 and 1974-75.

B. Criminal Justice Center
   1. Senior College Representative 1974-75, 1975 to date
   2. Member Bachelor Curriculum Committee

Recent Public Service Activities:

A. Second Annual Western Governors' Conference, Billings, Montana. March 31 to April 3, 1975 - Member of Alaska's delegation.

B. Alaska Council of World Affairs - Member of Board of Directors.

C. Chairman, Mayor's Ad Hoc Governmental Review Committee, Municipality of Anchorage, 1976-77.

Miscellaneous:

A. Guest lecturer, University of North Carolina, Chapel Hill. Delivered the opening address on population lecture series: "Populational Policy in this Age of Dissonance."

B. Consulted with United National and Agency of International Development on problem of development administration.

In fiscal year '77, the state spent between $3.5 and $4.0 million on the non-Federal Highway System maintenance outside of municipalities. This is the type of maintenance that is done on local roads and paid for by municipal taxpayer when those roads are within municipalities.

Since state motor fuel tax pays about half of maintenance costs, this amounts to an annual state subsidy of almost $2 million to those areas outside of municipalities. Why should municipal residents pay for a service that non-municipal residents receive free?

There are over 4000 registered motor vehicles outside of municipalities. Assuming that these are taxed at an average rate equal to a 3 year old auto, this amendment would raise approximately $160,000; certainly not enough to completely pay for the subsidy, but at least it will help.

KENAI PENINSULA BOROUGH

BOX 850 • SOLDOTNA, ALASKA 99669
PHONE 262-4441

DON GILMAN
MAYOR

April 7, 1977

Honorable Joseph Orsini
Alaska State Senate
Pouch V
Juneau, Alaska 99801

Dear Senator Orsini:

In reviewing the numerous bills that have been introduced in order to distribute the expected large oil revenues and to alleviate the tax burdens of the residents of the state, our assembly committee has noted some disturbing similarities.

While removing from the municipalities the burde· of taxing residents and property taxpayers these bills also remove from the local governments, borough and municipality, the burden of deciding on the use of the revenues which will replace the present taxes.

We find this inconsistent with the intent of the Constitution of the state, with the Governor's "grass-roots" level of involvement and extremely detrimental to the local governments. We cannot believe that it is in the best interest of the state or the people to dictate to them and to their locally elected and responsible government units what uses they should ultimately make of such revenues.

For example, HB 163, which we adamantly oppose, would place the Commissioner of Education in charge of designing, assigning priorities and approving local school construction. In our borough we have 16 assemblymembers and 7 school board members who are directly elected by the residents of the Kenai Peninsula and we feel that they are more aware of the problems, needs and priorities of the Peninsula than any state agency, and if they prove not to be, the voters will amend their thinking.

Public Law 94-565
94th Congress

An Act

Oct. 20, 1976
[H.R. 9719]

To provide for certain payments to be made to local governments by the Secretary of the Interior based upon the amount of certain public lands within the boundaries of such locality.

Local government units.
Public lands, payments.
31 USC 1601.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That effective for fiscal years beginning on and after October 1, 1976, the Secretary is authorized and directed to make payments on a fiscal year basis to each unit of local government in which entitlement lands (as defined in section 6) are located. Such payments may be used by such unit for any governmental purpose. The amount of such payments shall be computed as provided in section 2.

Amounts, determination.
31USC 1602.

SEC. 2. (a) The amount of any payment made for any fiscal year to a unit of local government under section 1 shall be equal to the greater of the following amounts—

(1) 75 cents for each acre of entitlement land located within the boundaries of such unit of local government (but not in excess of the population limitation determined under subsection (b)), reduced (but not below 0) by the aggregate amount of payments, if any, received by such unit of local government during the preceding fiscal year under all of the provisions specified in section 4, or

(2) 10 cents for each acre of entitlement land located within the boundaries of such unit of local government (but not in excess of the population limitation determined under subsection (b)).

In the case of any payment under a provision specified in section 4 which is received by a State, the Governor (or his delegate) shall submit to the Secretary a statement respecting the amount of such payment which is transferred to each unit of local government within the State.

(b) (1) In the case of any unit of local government having a population of less than five thousand, the population limitation applicable to such unit of local government shall not exceed an amount equal to $50 multiplied by the population within the jurisdiction of such unit of local government.

(2) In the case of any unit of local government having a population of five thousand or more, the population limitation applicable to such unit of local government shall not exceed the amount computed under the following table (using a population figure rounded off to the nearest thousand):

If population equals—	Payment shall not exceed the amount computed by multiplying such population by—
5,000	$50.00
6,000	47.00
7,000	44.00
8,000	41.00
9,000	38.00
10,000	35.00
11,000	34.00
12,000	33.00
13,000	

If population equals—	Payment shall not exceed the amount computed by multiplying such population by—
14,000	31.00
15,000	30.00
16,000	29.50
17,000	29.00
18,000	28.50
19,000	28.00
20,000	27.50
21,000	27.20
22,000	26.90
23,000	26.60
24,000	26.30
25,000	26.00
26,000	25.80
27,000	25.60
28,000	25.40
29,000	25.20
30,000	25.00
31,000	24.75
32,000	24.50
33,000	24.25
34,000	24.00
35,000	23.75
36,000	23.50
37,000	23.25
38,000	23.00
39,000	22.75
40,000	22.50
41,000	22.25
42,000	22.00
43,000	21.75
44,000	21.50
45,000	21.25
46,000	21.00
47,000	20.75
48,000	20.50
49,000	20.25
50,000	20.00

For the purpose of this computation no unit of local government shall be credited with a population greater than fifty thousand.

(c) For purposes of this section, "population" shall be determined on the same basis as resident population is determined by the Bureau of the Census for general statistical purposes.

(d) In the case of a smaller unit of local government all or part of which is located within another unit of local government, entitlement lands which are within the jurisdiction of both such units shall be treated for purposes of this section as only within the jurisdiction of such smaller unit.

Payments to counties.
31 USC 1602.

SEC. 3. In the case of any land or interest therein, acquired by the United States (i) for the Redwood National Park pursuant to the Act of October 2, 1968 (82 Stat. 931) or (ii) acquired for addition to the National Park System or National Forest Wilderness Areas after December 31, 1970, which was subject to local real property taxes within the five years preceding such acquisition, the Secretary is authorized and directed to make payments to counties within the jurisdiction of which such lands or interests therein are located, in addition to payments under section 1. The counties, under guidelines established by the Secretary, shall distribute the payments on a proportional basis to those units of local government and affected school districts which have incurred losses of real property taxes due to the

Distribution guidelines.

than the county acts as the collecting and distributing agency for real property taxes, the payments shall be made to such unit of local government, which shall distribute such payments as provided in this subsection. The Secretary may prescribe regulations under which payments may be made to units of local government in any case in which the preceding provisions will not carry out the purposes of this subsection.

Regulations.

(b) Payments authorized under this section shall be made on a fiscal year basis beginning with the later of—

(1) the fiscal year beginning October 1, 1976, or

(2) the first full fiscal year beginning after the fiscal year in which such lands or interests therein are acquired by the United States.

Such payments may be used by the affected local governmental unit for any governmental purpose.

(c) (1) The amount of any payment made for any fiscal year to any unit of local government and affected school districts under subsection (a) shall be an amount equal to 1 per centum of the fair market value of such lands and interests therein on the date on which acquired by the United States. If, after the date of enactment of legislation authorizing any unit of the National Park System or National Forest Wilderness Areas as to which a payment is authorized under subsection (a), rezoning increases the value of the land or any interest therein, the fair market value for the purpose of such payments shall be computed as if such land had not been rezoned.

Rezoned land.

(2) Notwithstanding paragraph (1), the payment made for any fiscal year to a unit of local government under subsection (a) shall not exceed the amount of real property taxes assessed and levied on such property during the last full fiscal year before the fiscal year in which such land or interest was acquired for addition to the National Park System or National Forest Wilderness Areas.

Payment limitation.

(d) No payment shall be made under this section with respect to any land or interest therein after the fifth full fiscal year beginning after the first fiscal year in which such a payment was made with respect to such land or interest therein.

31 USC 1604.

SEC. 4. The provisions of law referred to in section 2 are as follows:

(1) the Act of May 23, 1908, entitled "An Act making appropriations for the Department of Agriculture for the fiscal year ending June thirtieth, nineteen hundred and nine" (35 Stat. 251; 16 U.S.C. 500);

(2) the Act of June 20, 1910, entitled "An Act to enable the people of New Mexico to form a constitution and State government and be admitted into the Union on an equal footing with the original States, and to enable the people of Arizona to form a constitution and State government and be admitted into the Union on an equal footing with the original States" (36 Stat. 557);

(3) section 35 of the Act of February 25, 1920, entitled "An Act to promote the mining of coal, phosphate, oil, oil shale, gas, and sodium on the public domain", commonly known as the "Mineral Lands Leasing Act" (41 Stat. 450; 30 U.S.C. 191);

Re: CS for House Bill No. 403, amending ch. 59, SLA 1975 - Juneau Indemnification Act.

Dear Senator Orsini:

Attached are two proposed amendments to CS for House Bill No. 403 which if adopted will correct obvious inconsistancies in terminology and if not corrected before the program is activated may result in an adverse state court interpretation of legislative intent.

Amendment No. 1: Section 8 (3) of ch. 59, SLA 1975, defines rental real property as a business capital asset. The fair market value of business capital assets as stated in section 11 (c) of that Act is computed on the basis of replacement cost in the year of sale less depreciation. In our opinion legislative intent was that the fair market value of real property, (single family, multifamily, multipurpose, business and commercial), whether rented or not should be computed by adjustments to the base year assessment as stated in section 11 (a) of the Act.

Amendment No. 2: Section 8 (5) states that mobile homes and business inventories are the only classes of personal property eligible for indemnification under the Act. This section is in conflict with paragraph (3) which states that business capital assets include major items of fixed equipment and machinery which produces income but are not bought or sold in the ordinary course of the proprietor's business.

In Summary: The two suggested amendments would result in equal treatment to all owners of real property and stipulate that business inventories are not eligible for indemnification under the Act.

Sincerely,

Lee McAnerney
Commissioner

Attachment: Proposed Amendments
to CS HB No. 403

PROPOSED AMENDMENTS

CS FOR HOUSE BILL NO. 403

Section 4. Section 8, (3) and (5) ch. 59, SLA 1975 are amended to read:

(3) Business capital assets include [RENTAL REAL PROPERTY AND] major items of fixed equipment and machinery which produce income but are not bought or sold in the ordinary course of the proprietor's business. Business capital assets must be in use in an ongoing business which has been carried on for at least one year before the application is submitted.

(5) Personal property other than mobile homes and business capital assets [INVENTORIES] are not eligible for indemnification under this program.

Senator Joseph L. Orsini
Juneau, Alaska 99801

Dear Senator Orsini:

The enclosed statement, in my opinion, is a blatant lie. It appears Commissioner Burton is allowing some very strong tendencies to show through.

No one should be allowed to make racist statements and get away with it. It is sufficiently difficult already to get the two major ethnic groups to work together, without making obviously falacious statements that are aimed at derision and division.

It is my feeling that Commissioner Burton has ended his effectiveness as the Commissioner of Public Safety and I would like your support in voicing this position to the Governor.

Sincerely,

Clifford A. Black
Executive Director

The Non Profit Corporation Serving The People of the Chugach Native Region

'Agents' on pipeline workforce

WASHINGTON (AP) - Alaska Public Safety Commissioner Richard Burton told a congressional committee that foreign powers probably placed agents within the workforce on the trans-Alaska oil pipeline.

The state official also told the Senate Judiciary Committee' internal security subcommittee that Native militants pose a threat to the security of the 800mile pipeline.

Burton made his comments during a closed meeting of the now-defunct Senate panel last February. The transcript was released on Monday.

The transcript quotes Burton as telling the subcommittee: "I am confident there were a number of people working up there as construction workers who probably have associations with other countries, if you know what I mean.

"If I were in a position of some of the foreign powers and had an opportunity to put a truckdriver in there to tell me what is going on, I would do it."

Burton also told the subcommittee hearing on pipeline security that members of the militant American Indian Movement (AIM) were traveling throughout Alaska.

He said the Alaska State Troopers had noticed a change in areas of Alaska with large Native populations in recent years.

"The younger Native populations, age 30 and down, have become extremely vocal and militant, where we enjoyed an excellent relationship with them in the past. AIM members have moved through . . . these villages," Burton said.

Burton also told the subcommittee that a number of bullets have been fired at the nearly completed pipeline, but he said none penetrated the line.

He said tests by the Alaska State Troopers showed, however, that a high-power bullet fired directly at the pipeline would puncture it.

The Senate also released testimony by another witness who said that if the pipeline were forced to close by terrorists in midwinter, the oil in it could congeal and become the "longest candle in the world."

Leonard O. LeShack, president of Development and Resources Transportation Co., denied, however, that the Alaska line was indefensible from acts of terrorism.

Juneau. Alaska. 99811

Dear Senator Orsini:

Reference to your letter of January 15. to Mayor Bradford and our recent visit regarding the interpretation by the Department of Community and Regional Affairs of AS44.47.150.

As we discussed with you we fully agree with the opinions expressed by the Municipality of Anchorage on this subject.

Should the Department of Community and Regional Affairs interpretation prevail it will prevent the Bristol Bay Borough from receiving land from Village Corporations. The Borough is the smallest Borough in the State and there are no other municipal governments within its boundries.

The Bristol Bay Borough has the legal responsibility to provide area wide services such as solid waste disposal, cemeteries, Parks and Recreation etc.

It is our opinion that AS44.47.150 is contrary to the intent of ANSCA 14 (c).

Therefore we support your efforts to correct this oversite.

Sincerely,

Stuart H. Bowdoin
Borough Manager

Regional Affairs
Pouch V
State Capitol
Juneau, Alaska 99811

Dear Senator Orsini:

Thank you for your letter concerning Village Corporation trust lands under ANSCA 14 (c) provisions. The Kenai Peninsula Borough has taken the position that these lands are best administered through the Community and Regional Affairs authority. We have arrived at this conclusion because this agency will have in place all the necessary administrative detail for villages located within the unorganized boroughs. If this borough were to become the trust agency we would be required to initiate additional administrative procedures which would surely duplicate the efforts of DCRA.

The concern of a detrimental effect on second class boroughs is somewhat confusing. As far as I can tell, there are no over-lapping claims of borough selection and what might become village municipal lands. Since CRA is the lead agency in assisting both the boroughs and villages at the time of incorporation into municipalities, it would seem that that department could easily be the adjudicator in case of some unforeseen conflict.

Frankly, we would rather see the program proceed as it is now outlined. If I can be of further assistance please feel free to call on me at any time.

Sincerely,

Lelyde Bayley per

Re: Comments on Departmental Publication entitled "Municipal Lands Trust Program a Preliminary Statement of Trust Philosophy and Assessment of Principles and Primary Policy Issues".

Dear Mrs. McAnerney:

The departmental publication authored by Robert L. Hanks was referred to my office for study and comment. A thorough legal analysis by my staff has uncovered several fundamental and very disturbing misapplications of state and federal legislation which will be the subject of this letter.

On the broadest level the most serious defect in the document is the erroneous assumption that the Municipal Lands Trust Program has any authority whatsoever over 14(c) reconveyances involving existing municipal corporations exercising jurisdiction over a certified native village. A more specific error of law (which seemingly stems from the general error referenced above) is contained in the stated position that AS 44.47.150 limits the reconveyance entitlement established in section 14(C) to existing first and second class cities.

It is quite clear that under pertinent federal and state law any existing municipal corporation that exercises town-like jurisdiction within a native village with ANCSA selection rights shall be the recipient of a reconveyance from that village corporation "... to the ... surface state of the improved land on which the Native Village is located and as

much additional land as is necessary for community expansion, and appropriate rights-of-way for public use, and other foreseeable community needs; ..." of an area no less than 1,280 acres. Only in situations where no existing municipal corporation exercises territorial jurisdiction within a native village is the State of Alaska to receive land in trust for a future municipal corporation. This principal is made abundantly clear by the plain language of section 14(c)(3) which provides "The village corporation shall then convey to any municipal corporation in the native village or to the State in trust for any municipal corporation established in the native village in the future..." and by reference to ANCSA section 3(i) which defines municipal corporation as "... any general unit of municipal government under the laws of the State of Alaska;". Reference to Title 29 of Alaska Statutes will confirm that all classes of boroughs and cities are defined as a "municipal corporation" and each is a "unit of municipal government". That title also establishes that all classes of municipalities are granted the power to receive property in their own name from the federal government which property is thereafter held in its name and under its exclusive control the same manner as any "person" whether individual or corporate.

The analytical error contained in the publication seems to stem from a lack of familiarity with Alaska municipal law together with a misreading of AS 44.47.134. Subsection (a) of AS 44.47.130 provides:

> The Commissioner of [illegible] and Regional Affairs is designated as trustee, administer trust claims of land conveyed to the state in trust by village corporations under sec. 14(c)(3) of the Alaska Native Claims Settlement Act for the purposes specified in that section. (emphasis added)

Legislative history supports a limited construction of AS 44.47.130(a). The bill enacting the provision was entitled "An Act relating to land to be conveyed to the State in trust for future claims under the Alaska Native Claims Settlement Act" (emphasis added). Plainly, by the above emphasized portion of the bill title and of the statute itself, the section does not have any effect on lands conveyed directly to municipal corporations under the terms of 14(c). The federal act mandates a transfer directly from a village corporation to a municipal corporation whenever "any municipal corporation" exists. The powers of municipal corporations

in this state are such that no involvement of the State is necessary in a direct transfer to a municipality from a third party. In fact, under Alaska law the state legislature could not prevent a municipality from receiving an entitlement from a third party unless the legislature were to make a clear and express exception to the general powers of a municipality under title 29. In short, the statement set forth in your publication to the effect that the state as sovereign may affect municipal corporations is too simplistic as does not take into account the municipal law of this State.

Subsection (g) of AS 44.47.150 limits the application of the chapter to first and second class cities. From this it is apparently inferred by Mr. Fuhs that the subsection also limits direct conveyances under § 14(c) of the federal act. The explicit terms of subsection (g), however, clearly limit its application to Chapter 47.

> (g) For the purposes of this chapter, the term municipality includes only first and second class cities incorporated under the laws of the State. (emphasis added)

The effect then, is only to provide that the state, in accepting conveyances in trust for future municipalities, has chosen to encourage the formation of first and second class cities by villages that desire incorporation as a municipality. Indicated by the express terms of AS 44.47.150 and by the legislative history of Section 2 Chapter 150 / 175 may it be argued that the statute does, or was intended to, modify the power of various classes of municipal corporations.

The Municipality of Anchorage is not directly adversely affected by the position taken by the Municipal Land Trustee. Anchorage, being a home rule municipality, is afforded the powers of a first class city under the laws of Title 29. It would therefore be eligible for 14(c) conveyances from the Eklutna Native Village Corporation irrespective of the department's interpretation of AS 44.47.150. The municipality, however, is disturbed for two reasons. First, the municipality is generally concerned that the municipal land trust program operated by your department does not overstep its jurisdiction on the basis of a close misapplication of the law. While Anchorage definitely welcomes the assistance of the department on the 14(c) reconveyance issue, we insist that the state recognize that its role with respect to municipalities is advisory only. Second, the municipality does not wish to see an injustice done to minor municipalities, such as second class boroughs, which are clearly entitled to 14(c) reconveyances from a Village Corporation under ANCSA.

We strongly urge that the department expressly reverse its position on the issues discussed in this letter. We would further urge that the department, in its promulgation of any administrative regulations to administer the trust, recognize the trustees lack of jurisdiction over existing municipalities. Consultation with your own legal staff will, I am sure, lead to that result. While I am unaware that the Attorney General's office has taken an official position on this matter, our staff has discussed the issues in depth with several of the state's attorneys who have been involved in both municipal law and ANCSA matters and have found their opinions to coincide with ours.

Because this matter is of such great importance I have been very emphatic. This should clearly not be interpreted to mean that the publication has created any antagonisms. I fully recognize that the publication states only preliminary positions and was intended to invite comment and critical analysis. I hope our response has been constructive and will lead to a productive results. Notwithstanding, our position on your department's jurisdiction over the 14(c) trust issue, we appreciate and encourage the department's effort to disseminate information and otherwise help in the resolution of this very complex matter. In this regard, I would very much appreciate your keeping this office informed as to further action on this matter.

The Honorable Senator Joseph Orsini
Pouch V
Juneau, Alaska 99811

Re: Department of Community & Regional Affairs - Promulgation of Regulations Pertaining to AS §44.47.150

Dear Senator Orsini:

On or about August 29, 1977, municipal lands trustee, Robert L. Jenkins issued a publication under the signature of Commissioner Lee McAnerney entitled, "Municipal Lands Trust Program, A Preliminary Statement of Trust Philosophy and an Assessment of Principles and Primary Policy Issues". The publication was thoroughly analyzed by the Municipal Attorney in consultation with staff members of the Attorney General's Office. It was the announced opinion of those attorneys consulted that certain portions of the publication contained evidence of misapprehension and misconstruction of AS §44.47.150. That section, adopted by §1, Chapter 119 SLA 1975, provides for the state's acceptance of land conveyed to the state in trust by village corporations under §14.C.3 of the Alaska Native Claims Settlement Act. The Municipality's objection to the Department's treatment of §44.47.150 is fully set forth in the letter to Lee McAnerney, attached. In brief, the Municipality objects to the Department taking a position that only first and second class cities are entitled to direct conveyances from village corporations as clearly provided by the federal and state acts.

It is the Municipality's contention that AS 44.47.150 applies only to conveyances from village corporations to the state under §14.C.3, which conveyances result only when no municipal corporation exercises jurisdiction within the village corporation. This interpretation is supported by the specific terms of the statute, which in pertinent part provides:

> The commissioner of the Department of Community & Regional Affairs is designated to accept, administer,

> and dispose of land conveyed to the state in trust by village corporations under §14.C.3 of the Alaska Native Claims Settlement Act for the purposes specified in that section. [emphasis added]

While the strict terms of both the federal and state statutes support the Municipality's position, that position may be bolstered by a compilation of legislative history on the subject. For that reason, the Municipality is seeking assistance in obtaining any documentation of legislative intent behind the enactment of §44.47.170 (§1, Chapter 113, 1975). In that regard, the Municipality would greatly appreciate your assistance as Chairman of the Community & Regional Affairs Committee. To date the Municipality has only been able to compile the barest legislative history as contained in the Senate and House Journals. If the Committee records or the other Senate records contain committee reports or records of debate, those items may greatly aid our effort.

The Municipality sincerely appreciates any help that you or the Senate staff may be able to offer in compiling the legislative history. In aid of this effort I have listed below the record of the progress of the bill as reflected in the Journals:

> Senate Bill No. 358 introduced by Senator Sackett entitled, "An Act Relating to Land to be Conveyed to the State in Trust for Future Cities under the Alaska Native Claims Settlement Act; and Providing for an Effective Date." was read the first time and referred to the Community & Regional Affairs Committee on April 10, 1975.
>
> SB 358 was recommended for passage by the Community & Regional Affairs Committee on April 21, 1975. The report was signed by Senator Rody, Chairman, and concurred in by Senators Tillion and Willis.
>
> Senate Bill No. 358 was read a second time on April 23, 1975. The bill was advanced for a third reading at that time. The question was called and adopted by the Senate by 19-0. Senate Bill 358 was referred to the secretary for engrossment.
>
> On April 24, 1975, Senate Bill No. 358 was read for the first time before the House and was referred to the committee on Resources and Judiciary.
>
> On April 29, 1975, the Speaker of the House stated that Senate Bill No. 358 had been referred to the Committee on Community & Regional Affairs. That Committee recommended that Senate Bill 358 be replaced with the House Committee substitute for Senate Bill No. 358 (same title) and that it pass.

On May 5, 1975, the House Resource Committee recommended passage of SB 358.

On May 19, 1975, the House Judiciary Committee recommended the substitution of SB 358 with House Committee substitute for Senate Bill No. 358 and recommended that it pass with an amendment.

On May 22, 1975, SB 358 was read a second time with the Community & Regional Affairs Committee report, the Resources Committee report, and the Judiciary Committee report. With the unanimous consent of the House, committee substitute for Senate Bill No. 358 was adopted in lieu of SB 358.

On May 23, 1975, the Senate received a message from the House on SB 358 regarding House committee substitute for Senate Bill No. 358 amended by the House, and transmitting same for consideration. The Senate thereafter adopted House committee substitute for Senate Bill No. 358, and was referred to the Secretary for enrollment.

Re: Our File 101-30

Dear Joe:

Your letter of January 16, 1978, to the Mayor of the Kodiak Island Borough has been referred to me by the Borough for response. Our firm represents the Borough on many land matters.

In November, 1977, I wrote Commissioner McAnerney of the Department of Community and Regional Affairs regarding my interpretation of § 14(c)(3) of the Alaska Native Claims Settlement Act. I agree with the Municipality of Anchorage that boroughs are not to be excluded from receiving village corporation lands. A copy of my letter and her response is attached for your information.

While AS 44.47.150(g) limits trust lands to only first and second class cities, in the case of established municipalities such as Kodiak and Anchorage I would maintain that there is no need to be guided by AS 44.47.150, as the lands can be transferred directly to those municipal entities.

The commissioner feels that somehow AS 44.47.150 is controlling and interprets § 14(c)(3) of the Act as limiting municipalities to first and second class cities. If one were to look at the definition of "municipality" in the Act (§ 3(i)) it would become obvious that the State Legislature could not preclude the borough from receiving the land directly under § 14(c)(3).

Please keep me informed of any action which is taken regarding this matter, and if I can be of assistance I would be happy to do so.

Yours truly,

COLE, HARTIG, RHODES,
NORMAN & MAHONEY
Counsel for Kodiak Island Borough

Anchorage, Alaska 99501

Dear Mr. Jenks:

I appreciated having the opportunity to discuss with you recently the situation concerning the conveyance of village lands to municipalities under the provisions of Paragraph 14(c)(3) of the Alaska Native Claims Settlement Act.

I understand that presently most attention has focused on the situation between the Village Corporation of Eklutna and the Municipality of Anchorage. I would be interested in receiving your assessment as to where else in Alaska differences of opinion between municipality and village corporation regarding the conveyance of village land may occur; and where else, in your view, the State of Alaska should act as trustee for this land in place of a Borough government.

I would also appreciate any other comments you might have on this issue and how close it is to a satisfactory settlement.

Sincerely,

Joe Orsini

To: Senator Orsini, Chairman
and members of the 1977 Interim Committee
on Village Land Reconveyances

From: Katherine Brown, A.A.
to the Bush Caucus

Subject: 14 C (3) of the Alaska Native Claims Settlement Act
Village Lands Reconveyances

Date: March 14, 1978

On Friday, February 17th, I travelled to Anchorage (at my own expense) and met with several people with regard to their various perspectives on the issues and problems surrounding the 14 C (3) reconveyance of lands to village corporations.

At 9 a.m I met with Byron Mallott, President of the Alaska Federation of Natives and members of his staff. Mr. Mallott had just talked to the Governor relevant to the status of the land bills currently before Congress. He told me at that time, that since few easement agreements had been reached with the Secretary of the Interior, the Interior and the State would eliminate the core township language thus allowing conveyance of core townships without easements.

On signing of HR 39, title passes to the "appropriate municipal corporation or to the state in trust." Although they may have title, 14 C (3) reconveyances cannot occur until the patents have been received. BLM is reorganizing and Mr. Mallott feels that they will be prepared to convey the lands quickly upon passage of the bill.

With regard to reconveyance, Mr. Mallott felt that most village corporations are viewing the 1,280 acre community expansion entitlements as a maximum. The municipality must justify a need for the land. Lands held in trust by the state are to be managed as state lands. Mr. Mallott was concerned that sufficient channels be established for village input as to the use of state lands held in trust. The Regional Corporations in this regard have maintained a "hands off" policy.

Mr. Mallott suggested that I talk to Mr. Jenks about the Department of Community and Regional Affair's plan to administer these lands and planned provisions for village input. He also suggested that I talk to Lydia Hayes of the Alaska Native Foundation who may have additional material on the subject as well as Dan Alex of the Eklutna Corporation in Chugiak and Agnes Brown of Tyonek Corporation.

Later that morning, I talked with Bob Arnold and Gordon Jackson at the Alaska Native Foundation. Lydia Hayes was out of town and so I was unable to talk with her. Mr. Arnold gave me the status of conveyances thus far which is also contained in the introduction to the 1978 edition of Alaska Native Land Claims which he authored.

In this introduction which he gave me, he states that "six years after the Settlement Act, only ten percent of the land selected by Native

Corporations had been conveyed to them and most of that had been conveyed in a single region." (The Arctic Slope Region) "Only 22 village corporations in ten regions had received any conveyance of land by late 1977." And the amounts of land that has been conveyed has been very small. Mr. Arnold and Mr. Jackson agreed to keep me informed of any new developments and to send copies of whatever relevant materials they could find.

At 3 p.m. I talked briefly with Susan Wolf at the Anchorage office of BLM. who explained some of the problems associated with interim conveyance of native lands. They can't survey until they know what selections have been made. Once selections have been made, the surveys can begin however the surveyors have to be able to physically see the ground. In many areas, long winters and snow cover prevents this for the greater part of the year, further slowing the process. Some regional corporations are contracting with private field surveyors in an attempt to accelerate surveys. Bristol Bay Regional Corporation is one such corporation and is currently writing guidelines for villages who wish to do this. Ms. Wolf suggested that I contact them for further information.

From four to six p.m. I talked with Bob Jenks, the Municipal Lands Trustee with the Department of Community and Regional Affairs. AS 44.47.150 authorizes the Department of Community and Regional Affairs to assume the role of trustee for approximately one hundred unincorporated villages and gives direction for the administration of these lands.

Mr. Jenks thinks that any potential problems that may develop will occur between cities and village corporations. He strongly believes that since it is in the best interest of both parties to come to agreement with each other as soon as that is possible, within an atmosphere of open communication, good faith negotiation will lead to agreements satisfactory to both parties. In this light, the Department, without being a party to the agreement, seeks to provide the needed technical expertise and a forum for airing conflicts and developing a consensus.

The Department is currently working on regulations to accomplish this end. While I was in the office, Mr. Jenks received a phone call notifying him that Mr. Jim Reeves, an Assistant Attorney General in the Anchorage Office, had been appointed to work on drafting these regs. The regulations at this time are in rough draft form. Mr. Jenks told me that they were attempting to build into these regs appropriate due process provisions as well as conformance to the Administrative Procedures Act.

They hope to uphold the people's right to decide for themselves what lands they will offer to the municipal corporations. They will not dictate what kinds of lands should be included; there will be no "checklist" of land classes. Only land which is clearly essential to community expansion (as determined by the villages) will be offered. It is hoped that decisions made at this level will not adversely affect the general welfare of the village. Key land in the billage area is not necessarily includable.

Mr Jenks emphasized that they will be dealing with approximately one hundred very different villages and therefore the regs must be flexible yet balanced with controls; they must withstand possible changes in the Administration

and any other attempts at political manipulation. Mechanisms must be established to allow the village itself to identify and offer the lands to go into trust. The trust duties would begin when accepted by the appropriate trustee.

There will be one hearing per region on the proposed regulations. These hearings will take place this summer and fall.

STATE OF ALASKA
DEPT. OF COMMUNITY & REGIONAL AFFAIRS
DIVISION OF COMMUNITY PLANNING
JAY S. HAMMOND, GOVERNOR
511 WEST 4TH AVENUE
ANCHORAGE 99501

March 6, 1978

Honorable Joseph Orsini
Chairman, Senate
Community and Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

Thank you for your time last month. I, too, appreciate having had an opportunity to chat briefly on the Municipal Trust Lands Program, but regret not being able to complete our discussion on the substance of the trust program.

Your understanding concerning the Municipal Lands Trustee Program, as stated in your letter of February 1, "that presently most attention has focused on the situation between the Village Corporation of Eklutna and the Municipality of Anchorage," is not one which I share. You may recall that you brought up this subject during the course of our general background discussion of regulations and program development pertaining to Municipal Trust lands. Just as we were stating that we believe we have a clear duty to preserve the option that the "State in trust" may be a potential recipient of a portion or all of Eklutna's conveyances under ANCSA 14(c)(3), our conversation was interrupted when you left for a call of the Senate.

This interruption is unfortunate, as it prevented us from fully discussing the scope of our fiduciary duties in this matter. I completed this discussion as you requested with your aide, Ben Harding. Perhaps your understanding of trust program priorities suffered by the necessity of going through a third party.

As I indicated to Mr. Harding (and recently to Mr. Ferguson's aide, Cathy Brown), we are delighted that Eklutna, Inc. and the Municipality appear to be progressing towards a mutually satisfactory agreement concerning 14(c)(3) lands. We initially sponsored and participated in these negotiations. They are fully consistent with public and private statements of Commissioner McAnerney and myself with respect to Eklutna and Anchorage.

Notwithstanding our interest and participation in Eklutna-Anchorage negotiations, this issue has by no stretch of the imagination occupied "most" of our attention. Eklutna is only one of some 100 villages for which the State has a potential trust duty. Two dozen others during

the past 11 months since I was hired have commanded an equal or greater amount of our attention in providing land interests for highly urgent and critical community needs such as schools, airports, clinics, housing, and electrification systems.

I was explaining as our conversation was interrupted, that our major attention to date has been devoted to program and regulation development. A comprehensive report on this activity recently was given by the Commissioner to the sub-committee chaired by Senator Ferguson.

In response to one of your questions, I am unable to assess which municipalities and village corporations may have differences of opinion concerning 14(c)(3) land reconveyances, since the Municipal Trust Lands Program with which I am associated has no program responsibilities in villages where first or second class cities exist. Our statutory and functional trust responsibilities relate only to those where there is no municipal corporation in the Native village.

In my personal view, what may appear at first blush to be potential differences of opinion between cities and village corporations are merely preliminary assessments of position options each party is studying prior to entering negotiations. For the most part, actual negotiations are premature at this time, since only 3% of the total village corporation land entitlement has been processed by BLM. It is not all together certain in many villages which lands will be conveyed to the village corporations by BLM and thus be available for consideration for reconveyance under Sec. 14(c)(3).

I'd like to re-emphasize my often stated belief that settlement of 14(c)(3) land transfers is fully in the mutual self-interest of both village corporations and the entities which will receive titles thereto. Thus, good faith, arms-length negotiations between those parties are expected to resolve any 14(c)(3) questions without the necessity of serious confrontation or litigation.

The Executive and Legislative branches of state government, I believe, can constructively assist cities and village corporations by providing a climate of unhurried and impartial technical assistance which encourages good-faith dialog between the parties. In contrast, "assistance" which advocates one party's position in opposition to the other may not only inhibit amicable resolution of 14(c)(3) conveyances, but generates a substantial risk in the event of impasse, that the State of Alaska could involuntarily become a plaintiff or defendant in future litigation initiated by the actual parties as they attempt to resolve 14(c)(3) issues. The law does not designate the State as an adjudicator or a party to 14(c)(3) land transfers involving municipalities and village corporations.

In response to your final question concerning the identification of villages where the State "should" act as trustee "in place of" a borough government, it would be appropriate, I believe, to rephase the question to read, "For which villages did Congress and the State Legislature establish a fiduciary trust duty for the State to accept and administer trust lands on behalf of future municipal corporations established in the Native villages in the future?"

Obviously, this question cannot be answered as your question implies, in terms of a policy opinion designating those villages for which the state "should" be a trustee. Since the Legislature defined "municipality" with respect to the Municipal Trust Lands Program as "only first or second class cities incorporated under the laws of the State" (A.S. 44.47.150(g)), it seems apparent that we have a clear and unequivical duty and obligation to accept and administer appropriate trust lands offered for conveyance by village corporations in those villages which do not have a first or second class city therein. At the very least, we have a present and obvious duty to keep open the option that such lands may be received from any village corporation so situated which does not enter into a lawful settlement of 14(c)(3) lands with a Borough, at least until all legal issues surrounding this matter are finally and completely settled. This, of course, is our position with respect to Eklutna; i.e., that the Municipality of Anchorage is not necessarily ineligible to receive land from Eklutna, Inc., but for the present, until the legal issues are resolved, the trustee has a clear duty to stand available as a potential trustee for at least a portion of the settlement. (Eklutna's land lies mostly outside of the Municipality of Anchorage.)

Your final question prompts another observation. It may not be the State which would act as a trustee "in place" of a borough government as you suggest, but more likely, just the reverse would occur if a borough receives a conveyance under 14(c)(3) from a village corporation. Apparently well-reasoned opinions have been expressed, that because donation of the so-called 1,280 acres is for the benefit and expansion of the donating community, (and not for the State, itself), a borough receiving lands under the same circumstances should be a comparable "trustee" over the lands. Thus, a borough would administer the lands for the benefit and expansion of the donating community, and not for the benefit or gain of the borough as a whole. No borough has yet, to my knowledge, willingly expressed a desire to assume the administrative and financial burdens that such a trusteeship would entail. Since the Legislature has accepted and funded these trust duties on behalf of the State, I think acceptance of such lands by Boroughs, to be administered on behalf of unincorporated villages, will be quite limited.

The regulations of the Municipal Trust Lands Program now being drafted will, of course, provide the standards upon which lands offered by any village corporation into the trust can be judged for acceptability. These regulations will go through an extensive public review process

considerably exceeding minimum standards set by the Legislature in the Administrative Procedures Act. Since the drafting, publication, and review process is now evolving, it seems inappropriate to enumerate further concerning this sensitive issue prior to completion of legal interpretations and statements of departmental policy. Proposed regulations probably will be published within the next 90 days.

Sincerely,

Robert L. Jenks
Municipal Lands Trustee

SERVING ALASKA SINCE 1934

IMPORTERS AND WHOLESALERS OF LIQUORS, WINES AND BEERS

March 29, 1978

The Honorable Glenn Hackney
Alaska State Senate
Pouch "V" State Capitol Building
Juneau, Alaska 99811

Dear Senator Hackney:

Believing that it is our Corporate responsibility to help educate the public as to the proper use of our products, Alaska Distributors Co. is embarking on a Moderation Campaign based upon the underlying assumption that alcohol abuse is a people problem, not a product problem.

Moderation and responsibility will be the theme of this campaign. Messages, such as the one that is included with this letter which will run during the week of April 3rd, will appear approximately five times during 1978 in the following publications:

Anchorage News
Anchorage Times
Fairbanks News-Miner
Juneau Southeast Alaska Empire
Ketchikan News
Sitka Sentinel
Kodiak Mirror
Tundra Times
Alaska Advocate

A copy of the "Know Your Limits" pamphlet will be provided to anyone upon request. This pamphlet will let that individual know the impact different amounts of consumption can have on one's system.

Our objective is the healthy and responsible enjoyment of our products. The Moderation Campaign will be our contribution towards achieving that goal.

Very truly yours,

ALASKA DISTRIBUTORS CO.

Richard Loeb

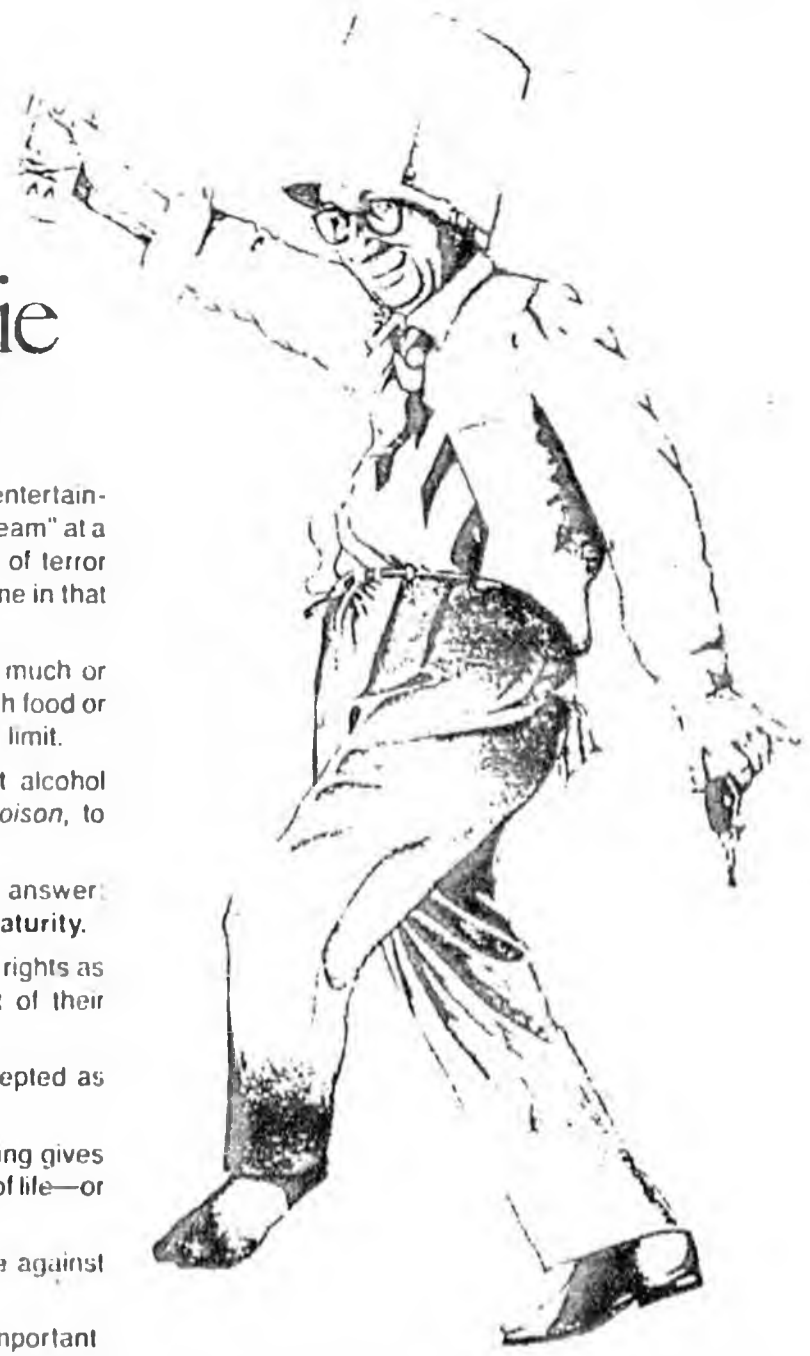
Ain't Charlie a scream?



The fat man with a lampshade on his head entertaining his friends and their wives may be a "scream" at a party. But the scream could turn into one of terror should good, ol' Charlie decide to drive home in that condition.

There is nothing funny about drinking too much or any kind of excess for that matter—be it with food or exercise, smoking, or exceeding the speed limit.

A poll asking people how they felt about alcohol yielded opinions ranging from *alcohol is poison*, to *the more you drink the better the party*.

Somewhere in between lies a sensible answer: moderation. **Moderation is the mark of maturity.**

Those who abuse alcohol are abusing their rights as members of a free society. And the cost of their misbehavior falls on you and me.

Fun is fun, and an occasional drink is accepted as part of the traditional American scene.

But that doesn't mean that excessive drinking gives you the right to interfere with my enjoyment of life—or to injure me for life—or to take my life.

There is a role for each of us in this battle against alcohol abuse.

That's why education on moderation is so important.

We can begin by adopting a responsible attitude toward the use of beverage alcohol and promoting that attitude among others.

We can respect the rights of abstainers and demand that respect of others if we do not drink.

We can learn and teach that there is a point in time when pleasure turns into punishment.

That's why we're offering a pamphlet, "Know Your Limits." It may be of help to you—or someone you know. Send for it today.

If you can think of anyone who could use a little guidance on moderation, send for our booklet, "Know Your Limits." It includes the latest information on this subject, and it's free for the writing. Alaska Distributors Co., P.O. Box 4-1598, Anchorage, Alaska 99509.

You will find it a valuable guide. But it is *not* a guarantee. There are many variables, such as when you've last had a meal or eaten snacks, fatigue, your mood, etc.

This chart also indicates the relationship between number of drinks and other factors to the legal limits (.10 as defined by law in most states and prescribed officially as a Federal standard).

The vast majority of people don't know what "legal limits" means. This chart tells you in precise detail.

Naturally, the distilled spirits industry is NOT urging you to drink up to the legal limit or anywhere near it, before driving or otherwise.

Liquor is part of the good life. Having a drink with friends is a long-time American tradition. Most people don't overdo it. Most adults who choose to drink, drink sensibly.

We urge you to know and stay within your own personal, safe limits. And, if you can't stop drinking, don't start driving. For your sake. And for the safety of others on the road.

Subtract .01% for each 40 minutes of drinking

One drink is 1 oz. of 100 proof liquor, 12 oz. of beer, or 4 oz. of table wine.

SUREST POLICY IS: DON'T DRIVE AFTER DRINKING!

The safest policy is not to drive after drinking. If you do drink and then drive, then know and stay safely within your own personal limits. Even this chart is only a guide, not a guarantee.

Driving after excessive drinking is dangerous and punishable by law. The operator of a motor vehicle is presumed by law to be impaired when the percent of alcohol in his blood is above the .10 level. The table on the reverse side indicates the relationship between number of drinks (taken by normal adults) and the legal limits. If your weight is between two of those shown, use the lower weight.

The legal limit is not the same as your own personal, safe limit.

Endorsed by Distilled Spirits Council of [illegible]

KNOW YOUR LIMITS

You're probably a licensed driver. And, statistically, you may be one of the millions of normal adults who choose to consume beverage alcohol in moderation, without harm to yourself or others.

Ideally, of course, the safest policy is *not* to drink before driving. But, common observation and experience tell us that millions of Americans drink and then drive on occasion. This is a fact of life.

Also confirmed is the fact that slogans like "If you drink, don't drive" have proved unrealistic and unsuccessful. Why? Because the motoring public simply pays little or no attention to them. Because many adults have had a drink before and a cordial after dinner in a restaurant and then driven home safely.

The Know Your Limits approach to responsible drinking and safe driving recognizes these facts of life and applies them to safety education.

This approach does NOT apply to alcoholics or problem drinkers. They should not drink at all. They require treatment or counselling. The distilled spirits industry certainly does *not* condone drunk driving by anyone, any time.

No two adults are exactly alike. Thus it is impossible to make absolute statements about personal drinking limits that would be equally accurate when applied to the entire adult population. And even an individual's safe limits can vary from time to time, depending upon his state of health and mental outlook. But we do urge you to know and stay safely within your own personal limits beyond which you tend to become impaired. So, know when to say when.

Experts specializing in the drinking and driving field, however, have related number of drinks, body weight and frequency of consumption to risk probabilities.

This information is contained in the Know Your Limits chart pictured above in this publication.

THE CITY AND BOROUGH OF JUNEAU
CAPITAL OF ALASKA
155 SOUTH SEWARD ST. JUNEAU, ALASKA 99801

DATE April 5, 1978

FILE NO. Legislature-1978 Session

SUBJECT SB 183

Honorable Joseph Orsini, Chairman
Senate Community & Regional Affairs Committee
Pouch V, State Capitol Building
Juneau, Alaska 99811

Dear Senator Orsini:

I have reviewed Senate Bill 183 relating to alcoholic beverages. On page 6 of the Bill, it is proposed that the Alcoholic Beverage Control Board be given the authority to determine which debts and taxes must be paid before transfer of ownership of an existing license may be made.

Often, when a license is being transferred, the only thing of value which the transferring entity has is the license itself. For that reason, allowing the Board to decide whether or not local taxes owing by the transferring licensee should be paid is a little like setting the Board up as a bankruptcy court for its licensees. I would suggest that the Board be given no authority to transfer a license where local taxes are still owing unless the licensee has made satisfactory arrangements with the municipality for their payment. I would suggest that the following changes be made on page 6 of SB 183:

On line 11, change the word "and" to "other than".

Change line 15 to read, "debts [AND TAXES] which it determines must be paid and taxes owing or in fact paid, or".

We would appreciate your consideration of the above change which would insure that liquor establishments are not allowed to escape paying taxes owed when licenses are transferred. Thank you.

Very truly yours,

GERALD L. SHARP
Attorney

Dear Mr. Mann:

Thank you for your letter of April 11 stating the opinion of the Anchorage Associated Broadcasters regarding the advertising provisions of HB 240/SB183.

The members of the Special Committee on Alcohol which I chair, do not intend to deal with this bill this session. During the interim we are planning an indepth study of the alcohol package complete with public hearing. The dates have not yet been set, but we hope to hear more from you at that time.

Again, thanks for your concern.

Sincerely,

Mike Colletta
Senate Floor Leader

dsf

ANCHORAGE ASSOCIATED BROADCASTERS

April 11, 1977

The Honorable Jay Hammond
Governor, State of Alaska
Pouch A
Juneau, Alaska 99811

Dear Governor Hammond,

Contained herein are the collective thoughts of the Anchorage Associated Broadcasters outlining our opposition to a proposed portion of legislation, currently in committee in the State Senate. Specifically, that portion of HB-240 that would ban all but "competitive brand" advertising of alcoholic beverages in the State of Alaska. SB 183

1. We do not feel such prohibition of advertising would have any appreciable effect in solving the problem of alcoholism. Prohibition of cigarette advertising (discriminatively effective, incidentally, to the electric media, but not to print) has had little significant effect or none at all, on the problem of cigarette smoking. Indeed, Federal HEW statistics indicate that cigarette smoking has increased steadily, since the electric media cigarette advertising ban has been if effect. This did have the effect, however, of depriving the electric media of advertising revenues.

2. Such legislation as an advertising ban as outlined in HB-240 constitutes an infringement of the rights of private citizens to be informed and jeapordizes the economic viability of both advertising alcohol beverage licensees and the advertising media. Such legislation also may be an infringement of first amendment constitutional guarantees and certainly constitutes a "blatant" restraint of trade. Further, electric media facilities are federally, not state, licensed and it is valid to question whether the state government may enact legislation that would restrict what a federal licensee may or may not broadcast. Even the FCC is having difficulties in this area (re: US Court of Appeals 1977 decision, FCC versus WBAI/New York).

3. There is a questionable intelligence behind the logic of allowing, for example, 86 proof whiskies such as "Johnnie Walker" to extoll their virtues as a competitive brand advertiser, while prohibiting businesses such as the Ramada Inn, the Captain Cook Hotel, etcetera, to advertise the

P.O. BOX 2200, ANCHORAGE, ALASKA 99510

price of 7 or 8 proof beer. This, in essence, is what the advertising prohibition in HB-240 does.

4. Enforcement also could constitute a problem. Does the State of Alaska propose to intercept US Mails to clip out offending advertisements, or, is this bill directed only at the electric media? That's not the way we read it, but if so, does the State of Alaska propose to tamper with national commercial continuity, beamed in via satellite, or, make the individual stations liable? That's a real "double bind". In many network affiliate contracts, the affiliate station is prohibited from overriding or deleting network advertising. Their choice would be a contract violation with possible loss of network service versus a State law violation. Not much of a choice, is it?

5. In other sections of HB-240, it is proposed that "bush" communities that vote to go "dry" be compensated by the State (meaning the taxpayers in the "wet" communities) for lost liquor tax revenues. Yet, the same "Rube Goldberg" logic behind this inequity is not carried over into any form of recompensation for lost revenues that will be edgendered by a ban on advertising alcoholic beverages. Does this stand the test of "reasonableness"?

In summation, nobody has shown conclusively that an advertising ban of alcoholic beverages would have a significant effect on the problem of alcoholism. Those who want to purchase or consume alcohol will do so, regardless of the existence or lack of advertising. An advertising ban would constitute a restraint of trade...would have an adverse economic effect of private enterprise...could be a violation of interstate commerce, interstate mail service, and constitutionally guaranteed first ammendment rights. The proposal to ban the advertising of alcoholic beverages is the product of "fuzzy thinking" by a special interest study committee with much broader adverse impact than any good it might accomplish.

Please remember also, that the consumption of alcohol is not, in itself, bad, if done in moderation. Recent clinical tests have shown that regular consumption of small amounts of alcohol is frequently beneficial, both psychologically and physiologically. The problem is alcoholic consumption to excess. I doubt you could show me one radio or television

station that would accept a commercial advertisement that advocates drinking to excess. However, almost all of them cooperate extensively with the Departments of Health & Social Services and Public Safety in public service advertising...at no cost to the taxpayer...pointing out the dangers of drinking to excess. But remember, in order to be able to make public service advertising available to state agencies free, we have to be able to sell other forms of advertising and HB-240 makes that job harder.

With all this in mind, the thirteen radio and television member stations of the Anchorage Associated Broadcasters strongly urge, that should HB-240 ever reach your desk with a prohibition of advertising s ill contained it it, that you exercise your gubernatorial power of veto.... unhesitatingly and unconditionally!

Thank you for your attention.

TO: COMMUNITY & REGIONAL AFFAIRS COMMITTEE

ATTENTION: Honorable Joseph Orsini,
Chairman, and Committee
Members

From: Gertrude B. Lyons
P. O. Box 1128
Petersburg, AK 99833

Date: February 8, 1978

I am on the Board of Directors of the Petersburg Indian Association and have been a resident of the City of Petersburg all my life and have been authorized by unanimous vote of the Board to appear and protest to the Legislature any extension of the boundaries of Petersburg. The members of the Petersburg Indian Association are strongly opposed to the recommendations of the Local Boundary Commission to the Legislature of the State of Alaska concerning the extension of the boundaries of the City of Petersburg.

The Petersburg Indian Association was formed because of the various Alaska native groups, including the Tlingit-Haida Central Council, the Alaska Native Brotherhood, the Alaska Native Sisterhood, and Sealaska Corporation, which had programs to be administered within the Petersburg area. The Petersburg Indian Association is a combination and serves and represents all Alaska native programs administered in the Petersburg area. There are approximately one hundred eighty-five (185) adult members in the Petersburg Indian Association, all of whom are residents residing in the existing City of Petersburg.

The Petersburg Indian Association has reviewed the petition submitted by the City of Petersburg to the Department of Community and Regional Affairs for the annexation or expansion of the existing city limits of Petersburg and the recommendations of the Local Boundary Commission to the Legislature. The Petersburg Indian Association is strongly opposed to any expansion of the existing city limits of Petersburg.

The existing tax base for the City of Petersburg, including real property taxes, sales taxes, and utility charges is extremely high and before any of the existing utilities are expanded to additional areas, and before any additional police and fire protection services are expanded to additional areas, it appears to the Petersburg Indian Association that steps should be made to improve and reduce the charges to the existing residents within the present city limits of the City of Petersburg. The cost of expanding utilities and services to any additional areas could only be met by additional taxes far and above those which would be generated through the annexation of the additional area.

I was employed for eight (8) years as a dispatcher for the City of Petersburg Police Department, having left that position approximately one (1) year ago. In reviewing the petition of the City of Petersburg for additional areas to be annexed I noted the number of emergency medical treatment calls that they attributed to

areas outside the existing city limits. Based upon my own observations and experience, by far the vast majority of these calls would have been to the Petersburg Municipal Airport or to the float plane charter services operated in and out of Petersburg, bringing injured or sick persons from other areas to receive treatment at the Petersburg hospital.

The existing fire equipment is inadequate to serve outlying areas without the addition of water lines and hydrants as the present tank trucks or pumper trucks would not be sufficient to fight any major fire without fire hydrants being located in the immediate vicinity.

If police protection is to be afforded in the additional annexed area it will require that at least one additional squad car be added to the existing police force and at least four (4) officers, one for each shift and one as a relief officer. The existing bonded indebtedness of the City of Petersburg is the highest per capita in the State of Alaska. It would seem apparent that if additional services and utilities are afforded to areas outside the existing city limits, that the only way this could be accomplished would be by incurring additional bonded indebtedness which would place an undue burden and hardhip on the taxpayers and residents of the City of Petersburg. This is particularly true of our native residents who for the most part are employed on a seasonal basis, which severely limits their income and ability to pay any additional taxes or utility charges.

Before any additional areas are added to the City of Petersburg, the Petersburg Indian Association and myself feel that definite steps and improvements should be made within the city limits to reduce the taxes and improve existing services and utilities, particularly the electric utility services which, in my opinion, are the highest in the State. Presently people outside of the existing city limits of Petersburg pay a surcharge on top of their electric service charges for being rendered that service by the city; however, if these areas are included in the city this surcharge would be lost, and the only way that this could be made up is by adding to the already high electric service charges being taxed on the residents of the City of Petersburg.

For these reasons, the Petersburg Indian Association respectfully requests that the Senate and the House of Representatives pass a concurrent resolution rejecting the recommendation of the Local Boundary Commission.

Respectfully,

Gertrude B. Lyons

Gertrude B. Lyons

SB223

March 7, 1977

The Honorable John L. Rader
President of the Senate
Alaska State Legislature
Juneau, Alaska 99811

Dear Mr. President:

Under the authority of art. III, sec. 18 of the Alaska Constitution, and in accordance with AS 24.30.060(b) and the Uniform Rules of the Alaska State Legislature, I am transmitting proposed legislation to amend Title 29 to allow areas to incorporate as first class, home rule boroughs. Currently, areas desiring to incorporate as home rule boroughs must first incorporate as a first class borough and then proceed to hold still another election on whether to frame a home rule charter and submit it for adoption to the borough residents. The proposed amendment to Title 29 would eliminate this two-step process, allowing residents of an area the opportunity to vote on the question of home rule status at the same time they vote on the question of incorporation. The option of being able to begin drafting a home rule charter immediately upon incorporation will encourage the development of borough government in Alaska.

Sincerely,

Jay S. Hammond
Governor

F Sen Willis

John E. Longworth
Petersburg, Alaska 99833
February 14, 1978

Senator Edward Willis, Vice Chairman
Community & Regional Affairs Committee
Room 614, Court Building
Juneau, Alaska 99811

Re: Local Boundary Commission's Recommendations
Re Area To Be Annexed To Petersburg

Dear Senator Willis:

I am most aware of the tremendous and perplexing problems facing this second session of the Tenth Legislature; therefore, it is somewhat embarrassing for me to have to write to you and request that you take the time to aid and assist us in settling what should be a very local problem in our island community of Petersburg. This is a problem that could have been settled, and should have been settled, without any fanfare, and I have no doubt that it would have been settled had it been presented to the people of the Petersburg area on a timely and reasonable basis.

I have been a resident of Alaska since December of 1940, and a resident residing within the existing boundaries of Petersburg since September of 1941. I served on the local city council at various times and I also served in the first, second, and third sessions of the Alaska Legislature, so I am not totally unfamiliar with government and governmental processes.

As is the case with the great majority of Alaskans, I am violently opposed to the treatment that our state is receiving on the D2 Land issue. Alaskans are being given no opportunity to have any say in determining the settlement of a problem which is purely one involving our own state.

A parallel situation, however in reverse, exists in reference to the petition presented by the city council to the Local Boundary Commission and the Local Boundary Commission's recommendation to the legislature regarding the annexation of land outside of the existing city limits of Petersburg. These things were all accomplished without giving the people of Mitkof Island, and particularly in Petersburg, a chance to express their concerns and views, not even in that most democratic manner--the ballot box.

The city administration and the city council have refused to respond to direct questions as to what the residents, either inside or outside the city, may expect in the way of increased costs of operation of municipal government, increased services, including utilities, and any other impact that this proposed annexation may have upon our community.

The petition prepared by the city administration and under the direction of the city council did have several points which they alleged were the basis for their requesting that all of Mitkof Island be annexed to the City of Petersburg. These were such things as, coastal zone management of the whole area; recreational areas, such as the Three Lakes Recreation Area and the Blind Slough Recreation Areas, the Crystal Lake Hydroelectric Watershed, and several other allegations which would supposedly be beneficial to the community. The recommendations of the Local Boundary Commission to the legislature, however, basically eliminated these things that the City of Petersburg was allegedly seeking by petitioning for this annextion.

I happened to be in Juneau on the 16th of January and stopped by the Department of Community and Regional Affairs office and made inquiry of what decisions the Local Boundary Commission had made. Mr. Pritchard of that office informed me that the Local Boundary Commission had not yet made a decision; however, they were going to have a telephonic conference that afternoon and they would make a decision at that time. He informed me that it would be on a speaker phone in their conference room and I was most welcome to listen in to the decisional meeting as all meetings of the Local Boundary Commission were open to the public. I informed him that I would be happy to listen in on that meeting. I arrived at the appointed time and heard the telephonic conference of the Local Boundary Commission's decisional meeting on the Petersburg matter. When the Local Boundary Commission had held their public meeting on January 9 in Petersburg, they had informed the public, both by the notices posted and at the meeting itself that all written statements or information pertaining to the annexation question had to be submitted by January 5 and that all testimony would be taken on January 9 and then based upon this information, they would arrive at a decision. As it developed in the telephone conference meeting, the city had submitted additional documentation contrary to the notices and public announcement in a lengthy letter from the city attorney. This letter was read in its entirety to the members of the Commission. Apparently this letter and other materials had been sent by Gold Streak by the Department of Community and Regional Affairs to the five commissioners; however, it came out during the conference that two

of the commissioners had not received the material and did not have any of the material in front of them at the time of the telephone conference. The credibility and insufficiency of the information supplied to them was discussed, then by a motion of one of the commissioners, they arbitrarily chopped off seventy-five percent of what the city had requested in their petition and then had a lengthy discussion upon the boundaries of this area, and moved for a vote on the annexation as amended by that motion. Commissioner Gallagher was not in on this conference call and did not partake in the deliberations. Commissioner Anderson from Wrangell and Commissioner Strandberg from Anchorage voted in favor of the annexation, Commissioner Hobson said he really did not know too much about it but would go along with Anderson and Strandberg, and Commissioner Dobson from Fairbanks stated that he thought they had rushed into this matter too quickly and that they had not been supplied adequate or sufficient information upon which they could make a rational decision regarding this petition and voted "No"; so the motion was carried by three of the five commissioners voting in favor of the motion Needless to say, I was shocked and appalled at the casualness of this meeting which basically was in utter disregard to whatever impact their decision might have upon the community of Petersburg.

The Constitution of the State of Alaska expresses great faith in the area of local government. The residents of the Petersburg area and Mitkof Island are not looking for any exceptions in either state law or regulations. We desire to have our local matters decided through the medium of majority voting, in so doing we are in no way infringing upon others. The city administration and city council of Petersburg suddenly decided that they were going to present an annexation petition to the Local Boundary Commission and to the legislature, and took the attitude that the people of the Petersburg area did not know what was good for them, and that "Big Brother" knows best and that they would ram their decision down our throats.

For the foregoing reasons, I and my fellow Petersburg residents respectfully request that the House and Senate take appropriate action and pass a concurrent resolution rejecting the recommendations of the Local Boundary Commission in reference to the Petersburg annexation. Let me take this opportunity to thank you for taking the time to review my letter, and I know that I express the concerns of the vast majority of the Petersburg residents in making this request to you. Your consideration of preserving the democratic method of conducting government would be appreciated. Thank you.

Yours very truly,

John E. Longworth

Dear Mr. Black:

On January 18, the Local Boundary Commission of the State of Alaska submitted recommendations to the Legislature concerning the annexation of land by your Borough.

The Senate Community and Regional Affairs Committee will shortly be reviewing these recommendations before they are taken up for possible action by the Legislature as a whole.

As you are aware, if the Legislature does not act to disapprove the regulations, they automatically take effect within forty-five days of their submittal. Accordingly, I would appreciate receiving as soon as possible your comments on the Boundary Commission's recommendation so that the Committee will have the benefit of your views when it considers these measures.

see Alaska Coastal Management file for all addresses sent to

Jack Wick, President
Koniag, Incorporated
P. O. Box 746
Kodiak, Alaska 99615

Dear Mr. Wick:

The Senate Community and Regional Affairs Committee is planning an extensive review of the regulatory Guidelines and Standards being drafted to implement the Alaska Coastal Management Act of 1976.

As you are aware and have indicated by your participation in Coastal Managment Program hearings, the impact of coastal management will profoundly affect almost every aspect of life in Alaska. The Legislature will want to insure, when the Coastal Management Program is submitted for its approval, that all segments of Alaskan society have been able to participate in the preparation of the program and that, to the maximum extent possible, it incorporates their views. The Legislature will also wish to examine the program in order to insure that it adequately carries out the legislative intent of the Alaska Coastal Management Act and fully embodies the specific objectives set forth in the Act.

I would therefore appreciate receiving your assessment of the work accomplished to date on the Guidelines and Standards. It would also be useful for the Committee to have the benefit of your views of the adequacy of these regulations in achieving the goals you support. Additionally, I would hope that you will feel free to make any suggestions which, in your judgement, could result in a more effective coastal management program.

Sincerely,

March 8, 1978

Roger W. Allington
Co-Chairman
Alaska Coastal Policy Council
One Sealaska Plaza, Suite 400
Juneau, Alaska 99801

Dear Mr. Allington: Roger

The Senate Community and Regional Affairs Committee is continuing its review of the draft Guidelines and Standards prepared by the Alaska Coastal Policy Council. As a result of that review, I have attached a list of questions and concerns on which the Committee would appreciate your response before it resumes consideration of the draft regulations.

The Committee is also interested in receiving as early as possible copies of conveniently sized maps outlining boundaries of the interim local coastal management districts. In particular, Representative Phillip Guy has drawn our attention to the desire of the Association of Village Council Presidents in the lower Yukon region to create a coastal management district with boundaries co-terminous with those of the Calista Regional Corporation. Representative Guy's concern, which is shared by the Committee, is to insure that the boundaries of coastal management districts be determined, to the greatest extent possible, at the local level by the people most directly affected by the program.

In reading the draft regulations, Committee members have noticed 6AAC 80.010(d) which provides for adequate translation of coastal management hearings into the appropriate language of the locality. It is the Committee's view that the issue of language translation should not be addressed as one of the number of coastal management regulations. The Committee believes instead that it should be addressed and resolved by a standard, statewide policy covering all such governmental activities throughout Alaska. If standard procedures are not already provided by state statute, it is the Committee's belief that specific legislation should be drawn up separately.

I would like also to convey the Committee's strongly held view that the regulations of the Coastal Management Program should not serve as a vehicle to stifle the development of new economic activity along Alaska's coasts. It was the intent of the Legislature when it passed the Coastal Management Act last year that coastal resources not only be protected but used and developed as well to meet the present and future needs of Alaskans. Any proposed coastal program whose regulations did not clearly carry out this legislative policy would find its passage by the Legislature seriously jeopardized.

On behalf of the Committee, I would like to reiterate our deep interest in reviewing the final draft of the Guidelines and Standards before they are adopted by the Council. I would also like to express our appreciation for the Council's hard work to date on the Coastal Management Program and our best wishes for the task lying ahead.

Sincerely,

JOE ORSINI
Chairman, Senate
Community and Regional
Affairs Committee

JO:gd

cc: Senator Kay Poland
Representative Phillip Guy

Enclosure(s)

SENATE C&RA QUESTIONS ON
DRAFT GUIDELINE AND STANDARDS

6AAC 80.020(a)(1) - what are the staffing requirements?
(4) - this is unclear. Does the staff action become subject to the Coastal Policy Council only if requested by a Council member?

.020(c)(3) - should add "among coastal resource districts and..."

.030(a) - use of phrase "to greatest extent practicable" sounds like an open invitation to appeal to the courts for an interpretation; this section has conflicting subsections:
(a)(3) - in essence restricts waterfront development to only those activities that must be located on the shoreline, e.g. a dock.

.030(b) - this gives the Fish and Game a complete veto power over all coastal management, since it subordinates all other uses to Fish and Game priorities and review. It thus violates the whole concept of planning and the intent of the coastal management act.
(c) - how is "minimizes" defined and what is the determination of cost?

.040(b) - by use of language "shall be prohibited", this could give rise to the interpretation that no development in hazardous areas could take place if potential loss of life and property would be minimal, not necessarily minimized. This would rule out significant activity that, for example, has already occured in Valdez, without other factors being taken into account.

.050(a)(2) - what constitutes "significant use" or "major"?
(3) - are there any large or significant parts of Alaska that do not fall into this category? i.e., this definition could well encompass the whole state.
(6) - same as for (3). Also who make the determination?
(7) - what about locally important historic places?

The essence of this section seems to be that a number of entities could prevent use of development of coastal area by means of the language "shall have...". The section makes tourism and recreation the predominant use and value for coastal resources.

.050(b) - however this says that "natural and cultural values are more important than toursim and recreation.

.070(a) - Language "greatest extent practicable" is an invitation to a lawsuit. Paragraph (5) is particularly open-ended.

.070(b)(c)(d) - These are also open invitations to lawsuits ("no feasible...alternative" and "minimize")

.080(a) - "maintain and enhance...fishery" - this reserves for fishing the priority for water use--what happens to other uses such as energy development, recreation, scenic, etc?

(b)(4) - if proposed use is not compatible with "adjacent use", does that adjacent use always prohibit development?

.090 - This section was at one time specifically written in such a way as to prohibit virtually all timber harvesting from most of Alaska's coastal areas. Are you satisfied now that the revised language avoids such violations of the Coastal Management Act?)

.090(b) - "not adversely impact" could easily be interpreted as banning all timber harvest.

(b)(4)&(5) - what does "put to bed" mean? Prohibited? And/or dismantled?

.100 - This section on mining is essentially negative and prohibitory in concept. It puts mining into light of least desirable resource use.

.100(a)(1) - "avoid adverse impacts..." What if impacts are unavoidable, or there are valid needs elsewhere to be met?

(2) - are all these " compatibilities" required? Is it reasonable to expect that an activity will readily be compatible with all of these interests?

.100(c)(1) - what is the definition of "feasible"? Again this invites an appeal to courts.

(2) - "extraction takes place only...when...least harmful" - how is "least harmful" defined? Who determines the length of time when "least harmful"? What if the length of time is too short, say, one week or one day a year? Are other factors also considered?

(3) - How is "significant" defined? Who defines it?

.120 - "shall recognize and assure subsistence" - Does this assign priority of subsistence over any other uses? Does it in any way restrict local districts from setting their own priorities, either subsistence or other? Is is possible, for example, for Anchorage to assure subsistence in the upper Cook Inlet district?

.130 - In this section, no definition is given of coastal resources, although biological habitats are extensively described. Does this mean that coastal resources are defined only in terms of their use for biological resources?

.130(b) - this says that fish and game must be maintained at current levels. Would this (paragraph 8) have ever allowed the creation of Anchorage or Juneau if it had been in effect at the time?

.140(d) - by this definition, do "special attention" areas become single use areas?

£5.010(4) - how is "adjacent to" defined?

(5)(b) - this should be more fully defined, or it could be taken for an EIS. Or is it meant to be an EIS?

(8) - is this the official and formal definition of allowability of various uses?

.020(c) - can the Council review an amendment once the staff has allowed it and put it into effect?

Dear Mayor Poor:

Senate Bill 507 ("An Act authorizing state aid to municipalities for the construction and development of cultural facilities") and Senate Bill 508 ("An Act providing for the issuance of general obligation bonds...for the purpose of paying the cost of cultural facilities") have been referred to this Committee for review and action.

In order to provide the background needed by Committee members for their consideration of this legislation, I would appreciate it if you could make the following information available on the projects proposed for your community:

1) What specifically would be the use of the facility and what kinds of functions would be undertaken there which could not be accommodated by existing facilities?

2) What is the total cost of the facility? How much would be locally funded?

3) What do you anticipate the annual operation costs of the facility (maintenance, lights, heat, etc.) to be? How will funds be obtained to meet these costs?

4) Do you have a specific site located for this facility? What is the land value of this site? Who currently owns the site? If not municipally owned, how will the site be obtained?

5) Is this facility included in the community development plan adopted by your community? Is this facility included in your community's adopted capital improvements program?

6) What additional infrastructure support will be required (roads, sewers, power, etc.) for the site? How much will this additional infrastructure cost for construction be? How will funds be obtained for these costs?

I would also hope that you can inform me of any additional needs and projections which you believe may develop in your community for cultural facilities over the next decade.

Sincerely,

JOE ORSINI

Dear Billy:

The Senate Community and Regional Affairs Committee will be holding hearings on Senate Bill 501 ("An Act relating to municipal labor relations") which explores new concepts and approaches in the field of collective bargaining at the municipal level. These hearings will be video-broadcast from Juneau to the communities of Ketchikan, Anchorage, Bethel, Fairbanks and Nome on March 30th.

For your background information, I have enclosed a copy of the letter sent by the Committee to mayors and interested parties in those communities notifying them of the video-hearings and providing details of the arrangements.

If you are interested in following the public testimony on new directions in resolving public collective bargaining impasse disputes, I would like to invite you or members of your staff to attend these hearings.

Sincerely,

Joe

March 10, 1978

Leo Rasmussen, Mayor
City of Nome
P. O. Box 281
Nome, Alaska 99762

Dear Mayor Rasmussen:

The Senate Community and Regional Affairs Committee has scheduled a video-conference hearing on March 30th for Senate Bill 501 ("An Act relating to municipal labor relations") which is intended to explore new concepts and approaches in the field of collective bargaining at the municipal level.

SB 501 was drawn up to allow local government or the appropriate administrative body the option of adopting either, or neither, of the procedures outlined in the attached legislation as a means of resolving local public collective bargaining impasses. It was not my intent to mandate any of these forms of arbitration to local government bodies, but to permit them to select the most flexible and most responsive approach to the needs of the local situation.

Because of the increasing public interest in collective bargaining in the public sector, I would like to invite representatives from your organization to present your views on the proposed legislation at the hearing. The video-conference will be broadcast from Juneau to the communities of Ketchikan, Anchorage, Fairbanks, Bethel and Nome at 12:30 p.m. (Juneau time) on March 30th. Persons are welcome to attend the meeting in Juneau, but I would ask that only participants in the other communities testify. If time permits and all the participants outside Juneau who wish have testified, Juneau participants may present testimony. If there is inadequate time to hear all those desiring to testify, further hearings may be scheduled.

Mr. Peter Fromuth of the Legislative Affairs Agency in Juneau will be handling the technical and organizational arrangements for the video-conference. Either he or video-conference moderators in communities outside Juneau may be contacted for details involving these matters. (names attached)

In order to provide the Committee with a better idea of the extent of possible testimony, I would appreciate your informing me if you or your representatives wish to speak at the March 30th hearing.

Sincerely,

Joe Orsini

Frank Benson, Mayor
City of Galena
Box 149
Galena, Alaska 99741

Dear Mayor Benson:

I am writing further to my letter of February 15, 1978, in which I asked your assessment of Senate Bill 501 regarding collective bargaining for municipal employees.

A number of local government bodies have expressed their concern to me that SB 501 could force binding arbitration on municipal governments and school districts. As such, they stated that they opposed this kind of legislation which, in a case of school boards in particular, would remove a significant portion of the authority of legally constituted governing bodies to carry out their responsibilities.

It was not my intent or that of the legislation to create such a situation. I am concerned, however, that local governments may find themselves compelled in the future to accept binding arbitration from an outside arbitrator. The purpose of SB 501 was to allow local governments the option of selecting other forms of collective bargaining. Such options included taking the last best offer from both sides of a deadlocked negotiation process to a vote of the people, the election of local arbitrators who would be part of the community and, at election time, answerable to it, as well as a suggestion made recently from Anchorage that the municipal assembly sit as final arbitrator.

I believe conditions in the Legislature and elsewhere are such that major efforts will soon be made to extend binding arbitration throughout local government in Alaska. I would hope that SB 501 could serve as a conceptual framework to develop new approaches and new ideas so that the initiative, direction and accountability in collective bargaining can be maintained and enhanced at the local level.

In this respect, it is my hope that you will be able to use SB 501 as a vehicle to work out new concepts, and that you will feel free to provide me with your thinking on how it can be shaped to meet local needs.

Sincerely,

Joe Orsini

Dear Mr. Berrier, Bill

In early April the Alaska Coastal Policy Council plans to submit for legislative approval the Council's proposed Guidelines and Standards to implement the Alaska Coastal Management Act of 1976.

I would appreciate your assessment of the extent of the Legislature's legal authority to approve these regulations. For example, it has been my understanding that the Legislature would be required either to accept or reject the proposed Guidelines and Standards as a package. The questions has been raised, however, if the Legislature could not in fact approve or reject the Council's submission section by section.

In your review of this issue, it would also be useful to have your comments on the authority of the Legislature to amend or rewrite portions of the proposed Guidelines and Standards during the legislative review process. Additionally, I would like your opinion if legislative approval of the Council's submission would preclude later administrative review by the Legislature of the promulgated regulations.

The Coastal Policy Council will meet in Juneau on March 30 to begin its final drafting of the Guidelines and Standards before their transmittal to the Legislature. I would appreciate your replies to the questions I have raised before that date so that the issue may be discussed in Committee before the Council adjourns.

Sincerely,

Joe

March 29, 1978

Dear Mayor:

The Senate Community and Regional Affairs Committee has so far this session attempted to keep you informed of all pending legislation that would affect your municipality and to solicit your views on the adequacy of legislative proposals before this Committee.

The Legislature has now reached, presumably, the latter part of the session, and the growing press of legislation will make it increasingly difficult for this Committee to request your comments on legislation before scheduling and holding hearings on bills. I would urge that you use the time remaining before the legislative pace intensifies to review your legislative priorities and to contact this and other committees regarding your requirements.

I will take all possible steps to notify you of pending legislation, but personnel of your municipality should follow legislative activity in Juneau as closely as possible. Larger municipalities with more extensive staffs and access to legislative information offices will find this considerably easier to do than smaller, more isolated communities, but I hope that all municipalities will make every effort to keep themselves abreast of legislation having potential impact in their areas.

Sincerely,

Joe Orsini

Management District
821 L Street
Anchorage, Alaska 99501

Dear Mr. Davis:

The Senate Community and Regional Affairs Committee has discussed at some length with Commissioner of Environmental Conservation Ernst Mueller and his Deputy Jerry Reinwand the provisions of the proposed committee substitute you have submitted for House Bill 190.

The Department of Environmental Conservation has informed us that it supports in principle the concept of delegating state air pollution control responsibilities to local bodies. It has noted, however, that the State itself is legally responsible to the federal government for meeting many of the provisions of the Federal Clean Air Act and numerous EPA regulations. An inadvertent action by a local air control body could jeopardize a number of federally funded programs throughout the State of Alaska.

Mr. Reinwand did point out that under current state statutes the Department of Environmental Conservation may delegate most, if not all, the responsibilities which the Cook Inlet Air Management District is seeking under CSHB 190. We would encourage you to pursue this possibility with the Department.

In the meantime, the Committee has asked the Department to submit in writing its proposed amendments to CSHB 190. We expect to receive them this week and will contact you regarding your comments to them.

Sincerely,

Joe Orsini

Anchorage, Alaska 99501

Dear Ted:

As we discussed today by telephone, I would appreciate your comments regarding some additional aspects of Senate Bill 374 relating to the transfer of tide lands to the City of Skagway.

Since this bill was introduced, a number of other municipalities have also expressed an interest in obtaining title to tide lands in their area if the Legislature approves the transfer of the lands designated in SB 374 to Skagway.

In this regard, it would be useful for the Committee to know whether the Department of Natural Resources would object to: (1) legislation allowing other municipalities in Alaska to select tide land adjacent to recreational and park areas at the Federal, state and local level; and (2) if you would object to legislation conveying to interested municipalities all tide lands lying within municipal boundaries.

Your response to these points will be helpful to the Committee in clarifying some of the constitutional and technical questions raised by the bill.

Mayor George M. Sullivan
Municipality of Anchorage
Pouch 6-650
Anchorage, Alaska 99502

Dear Mayor Sullivan:

The Senate Community and Regional Affairs Committee passed out of Committee CSSB 599 ("An Act relating to regulation of the sale of alcoholic beverages by municipalities") on May 2. This bill would allow a municipality, if it chose to exercise the option, to disapprove liquor license applications before the applications could be considered by the Alcoholic Beverage Control Board.

If a municipality did not wish to become involved in the regulation of liquor licensing, the present situation of direct licensing by the Alcoholic Beverage Control Board would continue.

A second section of CSSB 599 provides for communities, if they desire, to exercise a third option regarding the sale of alcohol in their areas. CSSB 599's provision would allow residents of a community to vote on an intermediate option of prohibiting the sale of distilled (i.e. "hard") liquor but allowing the sale of low alcoholic, non-distilled beverages (i.e. beer and wine).

CSSB 599 has no further committees of referral, except for review by the Rules Committee, before it goes to the Senate floor for a full vote.

Members of the Senate welcome at all times your comments on this legislation and your views on how these options could strengthen the effectiveness of local government. I would like to draw your attention to the fact, however, that CSSB 599 is likely to be scheduled for Senate floor action shortly and that your comments will be most useful if they can be submitted as soon as possible to the Legislature.

Sincerely,

MEMORANDUM

To: Mr. Larry Vavra

From: JOE ORSINI, Chairman, Senate Community and Regional Affairs Committee

RE: COASTAL MANAGEMENT REGULATIONS

On April 7, 1978, the Alaska Coastal Policy Council submitted to the Legislature the final draft of the Guidelines and Standards for the state's Coastal Management Program. These regulations had been revised by the Council during its meeting in Juneau at the end of March.

The Senate Community and Regional Affairs Committee will be reviewing these regulations, as adopted by the Council, in the near future. Unless persons and organizations affected by the regulations indicate specific problem areas in the Guidelines and Standards, the general feeling within the Legislature will be to approve them, thereby giving them the effect of law.

I would urge you to review the attached regulations, if you have not already done so, and present any comments or suggestions you may have directly to this Committee. The Community and Regional Affairs Committees in the House and Senate are the only committees to which the Guidelines and Standards have been referred for hearings, and the press of legislative business requires that action be taken on them as soon as possible.

State Capitol
Juneau, Alaska 99811

May 4, 1978

Avrum M. Gross
Attorney General
Pouch K
Juneau, Alaska 99811

Dear Mr. Gross:

Since the introduction by this Committee of Senate Concurrent Resolution 103 approving the regulations adopted by the Alaska Coastal Policy Council, a number of questions have been raised regarding the Legislature's approval of the Coastal Management Program's Guidelines and Standards.

Recently, legal testimony was given to the Committee that there was no need for the Legislature to approve the Coastal Management Program regulations. The argument was made that these regulations were, in fact, no different from other administrative regulations and need no action by the Legislature to put them into effect.

A second question was also raised. It has been the Committee's understanding that legislative approval of the Guidelines and Standards, by means of SCR 103 or its House counterpart, would not preclude later review of the regulations by the Legislature if the need arose. This procedural flexibility, as well as the responsiveness shown by the Coastal Policy Council, has done much to dispel concern in the Legislature that the regulations of the Coastal Management Program could impose unchangeable and authoritarian zoning restrictions on Alaska's coastline.

In this regard, a legal view was presented to the Committee that the Legislature's approval, through these concurrent resolutions, could possibly preclude the Legislature from repealing the regulations through the regulation review process at a later date. The opinion reasoned that, once the Legislature gave approval by resolution, it could not later repeal the coastal management regulations unless the statutes on which they were based had themselves been changed.

In view of the importance of the Coastal Management Program, I would approciate your assessment of these legal views and your comments regarding the Legislature's legal authority to act.

Sincerely,

Joe Orsini

LEGISLATIVE AFFAIRS AGENCY

MEMORANDUM

March 28, 1978

SUBJECT: Opinion request: Review and approval of coastal management regulations

TO: Senator Joseph L. Orsini

FROM: John B. Chenoweth
Legislative Counsel

Your March 27th request of Bill Berrier with respect to the scope of legislative review of pending coastal management regulations has been referred to me for reply.

The scope of legislative review of regulations embodying guidelines and standards applicable to the adoption and implementation of coastal management programs by municipalities and service areas does not appear to me to differ from the scope of review authorized for other agency regulations under AS 44.62.320: the Legislature may, by concurrent resolution, annul an agency-adopted regulation. Nothing requires the Legislature to act on this body of regulations as a single unit, though that is, of course, one means by which the Legislature may proceed.

I am aware of the contention that the regulations required to be adopted by the Coastal Policy Council are ineffective until approved by adoption of a concurrent resolution or by vote of the members at a joint session of the Legislature. The argument presumably rests on AS 46.40.080.

> The Alaska coastal management program adopted by the council, and any additions, revisions, or amendments of the program, take effect upon adoption of a concurrent resolution by a majority of the members of each house of the legislature or by a vote of the majority of the members of each house at the time the houses are convened in joint session to confirm executive appointments submitted by the governor.

I cannot say that the section cited requires prior affirmative action of the council's regulations. Prior approval is mandated for "the coastal management program" and for "additions, revisions, and amendments of the [coastal management] program," which, in the context of the legislation (absent a definition of the term "program"), appears to include only the individual planning elements prepared by the municipalities and service areas. As AS 46.40 now reads, it is not certain that approval by the Legislature is a requisite to having the regulations take effect.

The Legislature may not directly rewrite or repromulgate administrative regulations. It may amend or repeal the underlying statutory authority, thereby necessitating review and repeal or revision of affected regulations.

Because prior legislative approval of the council submission is not required under the interpretation offered herein, your question regarding the propriety of approval followed by later legislative review (presumably for purposes of annulment of the regulation) is moot.

Dear Commissioner LeResche:

I am writing further in regard to SB 374 which would transfer tide lands currently owned by the State into the ownership of the City of Skagway.

Representative Mike Miller has recently suggested that SB 374/HB 657 might be redrafted to avoid raising the constitutional questions which the Attorney General believes are contained in the legislation.

I have enclosed a copy of his suggested committee substitute and I would appreciate your comments regarding the effects of this legislation on your Department.

Sincerely,

Joe Orsini

FROM: Mike Milden

Joe--

You will recall that you've been hesitant to bring up House Bill 657--relating to tidelands near Skagway--because of adverse ruling from the Attorney General. I've taken the liberty of having the bill redrafted as a suggested committee substitute. The Attorney General himself assures me that the redrafted legislation no longer has Constitutional problems. Your consideration of this legislation would be greatly appreciated.

IN THE HOUSE

SENATE CS FOR HOUSE BILL NO. 657

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to transferral of tide and submerged lands; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. A home rule city or city of the first class may apply for a conveyance of all tide and submerged land contiguous to land owned by the city if the land owned by the city is used as a public park and it was granted to the city by the United States for the purpose of use as a public park. Applications made within one year after the effective date of this Act shall be processed by the director of the division of lands of the Department of Natural Resources or his designee. The director shall convey the tide and submerged land to the city. The city shall use the land in a manner which is compatible with the use of the contiguous land as a public park. The director shall prescribe the manner for filing applications and may promulgate regulations to implement this Act.

* Sec. 2. This Act takes effect immediately in accordance with AS 01.10.-070(c).

May 10, 1978

The Honorable Ted Stevens
United States Senate
260 Russell Building
Washington, D. C. 20510

Dear Senator Stevens: Ted

I have enclosed for your information and background use a copy of a letter recently submitted to this Committee by the U.S. Coast Guard regarding the implementation of the Alaska Coastal Management Act.

My reason for bringing this letter to your attention involves its implicit questioning of the concept underlining the Coastal Management Act passed by the Alaska Legislature in 1976. Specifically, Rear Admiral J.B. Hayes believes that when the Alaska Legislature authorized the creation of local management districts it violated the intent of the federal Coastal Zone Management Act:

> "b. Section 923.12(a) requires the State to 'develop policies and procedures by which uses determine to be subject to the management program will be permitted conditioned, modified and/or prohibited. These policies and procedures regarding management of uses and/or their impacts must be capable of effective implementation at the time of program approval'. Alaska's section 6 AAC 85.070 and 6 AAC 85.080 delegates these functions to the districts. This creates a situation where each district's uses and policies may differ and is therefore not authorized under the federal regulations."

I believe that Admiral Hayes' concerns overlook two underlying elements. First, local district programs must be consistent with the statewide Guidelines and Standards adopted by the Alaska Coastal Policy Council and these regulations, in turn, guarantee priority of action to matters of national concern. Secondly, regulations to be effective and equitable, must accurately reflect local circumstances. The differences in topography, climate, biota and human activity between such areas as southeast Alaska, upper Cook Inlet or the Bering Sea coast are more fundamental than those separating Washington State from Oregon, or New Jersey from North Carolina. Yet these states all have individual, essentially uncoordinated coastal programs for the Coast Guard to deal with.

These regional disparities were the basis for the Alaska Legislature's decision to authorize local management districts. I seriously doubt that a monolithic set of regulations would well serve coastal management in this state or treat equitably the diversity of Alaska's peoples and regions.

I hope that the concerns expressed by Admiral Hayes can be satisfactorily settled here in Alaska. While I can sympathize with the Coast Guard's irritation at being asked to comment on six separate drafts of the proposed regualtions within a six month period, these requests should also be seen as evidence of the State's good faith efforts to involve federal agencies in each step of the preparation of the regulations.

If, however, the differences with the Coast Guard escalate beyond the state level and the legality of Alaska's Coastal Management Act is challenged or jeopardized in Washington, D.C., I would hope that you would be able to explain to the federal government the compelling reasons for the structure of Alaska's Coastal Management Act, and to work towards preventing its dilution at the federal level. I have a great deal of personal apprehension that failure to have Alaska's Act adopted by the federal government would lead to an increase in Federal control in Alaska's coastal area. I hope this apprehension is not justified.

Sincerely,

Joe Orsini

1 MAY 1978

Honorable Joseph L. Orsini
State of Alaska Senate
Pouch V
Juneau, AK 99811

Dear Mr. Orsini:

The Coast Guard appreciates the opportunity to correspond with your committee concerning the 13 April 1978 Standards and Guidelines for Alaska's Coastal Management Program (ACMP). These Standards and Guidelines represent a considerable departure from the previous drafts on which the Coast Guard was allowed to comment. The Coast Guard feels that this version of the Standards and Guidelines is severely deficient in the areas of participation, specificity, and priority of uses.

Participation. The Office of Coastal Zone Management in Alaska has attempted to provide federal agencies with the opportunity to participate in the development of Alaska's program. Section 923.51 of the federal regulations requires, however, that the State "provide for federal agency input on a timely basis." The Coast Guard feels that the State has been deficient in this regard due to the shortness of time allowed for agency comments between successive drafts of the Standards and Guidelines. This is the sixth occasion in the last six months that the Coast Guard has commented on a different draft of this document. This rapidity of drafts has not allowed sufficient time for coordination between the various agencies of the Department of Transportation, nor the opportunity to carefully evaluate the content of the Program. Furthermore, this "final" version of the Standards and Guidelines was approved by the Council and submitted to the legislature without an opportunity for federal review, even though it differed substantially from previous drafts. Written comments have yet to be received by the Coast Guard addressing our stated concerns. The Coast Guard feels therefore that this past history of short lead times for response combined with the lack of formal feedback from the State does not meet the federal requirements for participation.

Section 306(c)(1) of the Coastal Zone Management Act requires federal agency participation in the development of the Program at an early stage in the process. The Coast Guard recommends that a provision for this participation be included in section 6 AAC 80.020 of the Standards.

The Coast Guard has commented on several occasions that a mechanism is needed for government participation at the district level in the development of the local plans. The Coast Guard is concerned that each district may develop its own mechanism for government participation and then cite compliance or non-compliance with this mechanism as evidence of government participation. Because the actual decision concerning adequacy of participation will be made at the State level by the Council, the Coast Guard feels that it is very important that a well developed State mechanism for participation be defined as part of the ACMP. If this accomplished, the process will not vary from district to district and all parties will have a clear understanding of their responsibilities and opportunities. It is therefore recommended that Section 85.100 be expanded to detail exactly when, where, and how government agencies will be allowed to participate in the development process.

Priority of Uses.

Section 923.13 of the federal regulations requires that the State must: "(1) Identify what constitute uses of regional benefit; and (2) identify those methods that shall be used to assure that unreasonable restrictions or exclusions of such uses by local land and water use regulations shall not occur." The Coast Guard finds no mention of regional benefit, national interest, or defense considerations in the Guidelines and Standards. National Defense, including Coast Guard functions and responsibilities such as search and rescue and fisheries enforcement, should be identified in Chapter 80, Article 2 of the Standards as an important priority use of the Coastal Zone. This priority provides the basis for regulating future land and water use, provides a common reference point for resolving potential conflicts, and is important for future acquisition of areas not presently controlled by the Coast Guard.

Section 6 AAC 80.080 of the Standards addresses water based transportation routes. Under the Ports and Waterways Safety Act of 1972, the Coast Guard is authorized to establish vessel traffic services in ports, harbors, and other waters subject to congested vessel traffic. Any district plans dealing with the management and control of vessel traffic should be coordinated with the Coast Guard to insure such plans are compatible with Coast Guard traffic control responsibilities. There is also considerable regional and national interest connected with transportation and these considerations should be mentioned in this section.

Specificity. The present Standards and Guidelines are lacking in specificity and substance and, as a result, the plans developed and implemented by the Alaska Coastal Resource Districts may vary so widely that the Coast Guard may be compelled to operate under as many as 50 different

plans within Alaska rather than under one plan which is implemented by various local government units. This situation would present an unacceptable burden on the Coast Guard and other federal agencies and is therefore considered a serious defect which must be remedied.

The Coast Guard feels that the Standards and Guidelines are deficient in the following areas concerning specificity:

a. The standards and criteria upon which decisions pursuant to the program will be based are not sufficiently specific to provide "(i) a clear understanding of the content of the program, especially in identifying who will be affected by the program and how, and (ii) a clear sense of direction and predictability for decision makers who must take actions pursuant to or consistent with the management program." These provisions are required by section 923.3(a)(2) of the Federal Coastal Zone Management Approval Regulations.

b. Section 923.12(a) requires the States to "develop policies and procedures by which uses determined to be subject to the management program will be permitted, conditioned, modified, and/or prohibited. These policies and procedures regarding management of uses and/or their impacts must be capable of effective implementation at the time of program approval." Alaska's section 6 AAC 85.070 and 6 AAC 85.080 delegates these functions to the districts. This creates a situation where each district's uses and policies may differ and is therefore not authorized under the federal regulations.

The effective implementation required under this section can not occur under Alaska's present Standards and Guidelines. If the State delegates the responsibilities of establishing uses and policies to the individual districts (85.070 and 85.080), and the district policies and uses are not submitted to NOAA with the ACMP (district plans will be developed later), it is impossible to implement meaningful management procedures regarding unknown uses and policies. It is therefore not clear what status the Program will have before the district plans are in place.

c. Section 923.12(e) of the Federal regulations states that "to the extent a state's government program policies are generalized, performance standards that will be used to enforce these policies will need to be sufficiently explicit and specific that persons affected by the management program will have a reasonable understanding of what uses would be permitted in which locations of the Coastal Zone and under what condition." The Coast Guard feels that the Standards are neither explicit nor specific and do not provide the required clear understanding as to what uses are permitted in any location.

The Coast Guard is very interested in coastal zone management and desires to work closely with the State of Alaska in implementing the ACMP. However, the mere opportunity to comment on the various stages of combined plan development when with the lack of response received concerning these comments, can not be considered real participation. The continued failure of the State to react to the concerns expressed herein is viewed as a matter of concern and is considered a serious continuing deficiency under the federal regulations. I am hopeful that these defects can be corrected before the ACMP is sent to NOAA, and am looking forward to continuing interaction with the State in coastal zone matters.

ncerely,

J. B. HAYES

RE: SCS CSHB 133

I would appreciate your opinion of the Legislature's authority to mandate the transfer of school, university and mental health trust lands from their present ownership to municipalities, provided the trusts are reimbursed with state lands of equal assessed value.

Currently under SCS CSHB 133, the concurrence of the trust boards would first have to be obtained before a municipality could select trust land. Some concern has been expressed that trustees would be reluctant to approve the transfer of land whose value is known and steadily appreciating for land more remotely situated in the state. Since the provision for the transfer of centrally-located trust lands is a key element in enabling land-short municipalities to obtain their land entitlement under SCS CSHB 133, any indication that these transfers might be blocked or held up for extensive periods of time would have serious consequences for the legislation.

In that regard, we have noted with interest a March 28, 1978, memorandum by Mr. Kenneth Rosenstein, Legislative Affairs Agency, which concludes that as long as the State maintains the purpose for which the trust lands were created in may authorize the sale of these lands. Given Mr. Rosenstein's conclusion, it would be useful for the Committee's consideration of SCS CSHB 133 whether you believe the Legislature could authorize the transfer of these lands on the basis of compensation of land of equal value elsewhere in the state.

Dear Mayor Poor:

House Bill 781 ("An Act authorizing state aid to municipalities for the construction and development of cultural facilities") has been referred to this Committee for review and action. A copy of the bill is attached for your information and review.

House Bill 781 is the House version of Senate Bill 507, in which we have had previous correspondence with your office. HB 781 has been amended by the House Finance Committee, with additions not previously included in the other proposed legislation.

In the Committee Substitute version, two additions have drawn our attention:

(1) Page 6, lines 10 and 11: "for purposes of this section, a cultural facility may be considered an educational facility"
This inclusion of educational facilities appears to greatly broaden the scope of the legislation. Your input and proposals concerning educational facilities to be included would be appreciated.

(2) Page 6, lines 22 through 29; and page 7, lines 1 through 20: establishing an Advisory Commission on Cultural Facilities, membership as recommended by the State Council on the Arts.
This new commission would assume design and financing responsibility and authority. Because of the range of responsibilities of the proposed commission, this Committee would very much appreciate your comments.

Due to this late date in which the legislation has been referred to this Committee, it is very necessary that we receive your input and comments quickly. There is great interest in passing the legislation out of Committee, but we are also concerned that your community's needs are met.

We would also appreciate any other comments or suggestions you might have on the proposed legislation.

Sincerely,

Joe Orsini

June 6, 1978

Edward J. Hoffman, Manager
U. S. Department of the Interior
Alaska Outer Continental Shelf Office
P. O. Box 1159
Anchorage, Alaska 99510

Dear Mr. Hoffman:

I appreciate your response to my letter of April 27, 1978, requesting your comments on the Guidelines and Standards as adopted by the Alaska Coastal Policy Council on April 7, 1978.

I can understand the concerns which you and other federal agency representatives have expressed. These concerns appear chiefly to be that the Guidelines and Standards are too vague and general, that they provide for a non-uniform development of local district programs, and that they provide little or no formal mechanism for federal participation or consideration of national interests, at the state or local level.

Please bear in mind that the Guidelines and Standards were drawn up to implement the provisions of the Alaska Coastal Management Act of 1977, and that the regulations must be read in the context of that Act. Members of the State Legislature were very conscious, at the time of the passage of the Act, that Alaska's coastline is longer than the rest of the nation's coast combined and that the geographic, cultural, and climatic diversity of Alaska's coastal areas equalled or surpassed divergences in the US as a whole. These realities required that as flexible an approach as possible be taken and that rigid or simplistic classifications be avoided.

Since the lives and livelihood of the eighty percent of Alaska's population living in coastal areas would be significantly affected by the coastal management program, the legislators also wished to insure that the problems which Alaskans have previously experienced from inflexible attempts to apply uniform regulations, throughout the state regardless of local conditions or circumstances, would not be repeated.

In regard to federal participation in the Alaska Coastal Management Program, it was never the intention of either the Legislature or, to the best of my knowledge the Office of Coastal Management, to exclude

federal agencies from areas of national concern. The reason why the state Act and the Guidelines and Standards did not address in detail issues of national defense, navigable waters, and other issues of national concern is the fact that they are areas of national interest over which neither the state nor local districts can claim jurisdiction.

The state Act does in fact recognize the overriding importance of national concerns by providing in Section 46.35.210(6) of the Act for "uses of state concern" which supercede local programs. These "uses of state concern" include "uses of national interest" which are further defined as national energy needs, resource development of federal land, navigation, and national defense. By including this provision in the Act, the Legislature wished to make clear that the State did not intend to become involved in areas of national concern nor attempt to place legal or procedural restrictions in the path of federal agencies carrying out their regular functions.

I also appreciate the concerns you have expressed regarding a number of technical points in the drafting of the Guidelines and Standards. Frankly, it had been our hope that such questions could have been resolved before the regulations reached the Legislature for approval. The Tenth Legislature is now in its last days of session before adjournment and new elections. If we do not act on the regulations now, and state law allows us only to approve or delete regulations but not amend them, we will have made it impossible for NOAA to approve the Alaska program this year. The Legislature will be reluctant to create this situation unless major structural problems are found in the Guidelines and Standards or unless NOAA is willing to extend its support program to Alaska for another year.

Since we have no indication that either of these situations are likely, we feel constrained to take action this year on the state regulations. I would hope that the questions you have raised with this Committee could be taken before the Alaska Coastal Policy Council when it meets later this year to begin the implementation of the coastal management program. We believe that, as the Council and the local districts gain experience, numerous changes will be required at the working level of the program to reflect accurately the vast disparities of conditions in Alaska. It may also be that a number of the technical or procedural questions you have raised will turn out not to be significant but that the implementation of the program will reveal more serious problems in other areas where no difficulties had been foreseen.

It has been the State's intention to cooperate fully at all levels with federal agencies in carrying out the Alaska Coastal Management Program. We hope, in turn, that you will continue the same coopera-

tion with us at the state and local areas. I firmly believe that without this kind of cooperation between federal agencies and the State it will not be possible to implement successfully a program for the unprecedentedly complex conditions of Alaska's coastal areas.

Sincerely,

Joe Orsini

Sen. Orsini Hires Californians For His Staff

JUNEAU (AP) — State Sen. Joe Orsini of Anchorage has hired two non-residents to work for the 1978 Legislature.

A check of Legislative Affairs Agency records shows that the two are apparently the only out-of-state residents among the 153 staffers hired by lawmakers this year.

The two are Steve Mizeria, a former monthly newspaper publisher and Amtrak train conductor from Pollock Pines, Calif., and Terri Ann Brest, a secretary from North Highlands, Calif.

Mizeria was hired by Orsini, a Republican, to serve as administrative assistant to the Senate GOP caucus. Ms. Brest was hired as a secretary to the Senate Community and Regional Affairs Committee, which Orsini chairs.

Orsini, a former Californian, said he hired Mizera because he was a long-time friend and asked him to bring along a good secretary if he knew of one.

Mizera will be paid $68 a day while Ms. Brest will earn $52 a day. Legislative staffers are paid for seven days a week even if they only work five.

THE BOTTOMLINE

By Representative Bob Bradley

Thomas Jefferson, father of the democratic party, who places his trust in the yoeman farmer, would like the idea. Alexander Hamilton, who called the people "that great beast" and labled democracy "our real disease" would oppose it - right along with Jay Hammond, our Governor.

The idea is contained in House Bill 188, a bill passed last session by the legislature and arrogantly vetoed in June by Governor Hammond. Among other things, HB 188 would allow voters to register and vote on election day. Currently, if you fail to register at least 31 days before an election, you summarily lose your right to vote in that contest.

The amendment was introduced to eliminate an unworthy administration impediment to suffrage which constitutes one of the last patent interferences with the peoples sacred right to participate in a democracy. It succeeds women's suffrage and the abolition of literacy tests and poll taxes, as the next logical step in a 200 year struggle to maximize the franchise.

Why would anyone want to tamper with an American citizen's birthright? Jay Hammond offered two reasons in his June 9, 1978 veto message which merit discussion.

First, he advanced a curious version of the so-called Informed Voter Argument which holds that arbitrary registration requirements are legitimate because people who fail to meet registration deadlines are automatically irresponsible and uninformed. Excluding these voters from the polls is practically a public service. They don't deserve to vote. Hamilton would live this one.

Hammond goes one more and gives it an Alaska twist by concentrating on the infamous "new resident". These folks he assumes, do not understand Alaska and probably won't stay here anyway. It is therefore, "questionable public policy" to allow them to vote at all; especially if they "consider it too burdensome to register 30 days in advance of an election."

Of course, other residents will be excluded as well. But so what, he might respond. Everyone should be punished for tardiness. It's a sign of ignorance and bad faith. After all, you can almost hear him say, voting is a privilage and not a right.

Shame on you, Governor. Registration defaults can be inadvertent or unavoidable. More importantly, literacy test are out. The Supreme Court has declared that in our system you don't have to be informed or sincere to vote. You need only be 18 years old and a resident - even new residency is protected. Voting is a right and not a privilege. It should take more than a missed deadline to lose it.

So much for the informed voter argument.

Let's try the other one. Hammond also suggests that election registration would "result in voter confusion and increase the opportunity and probability of fraud." Why? He doesn't tell us, but let me guess.

Under existing law, it could be argued, the Lieutenant Governor has at least 30 days before an election to verify voter qualifications. If voters are allowed to register on the day of the election, this safeguard would be jeopardized.

On the contrary. The anti-fraud procedures outlined in HB 188 are just as effective, if not more so. For example, they provide that those who register at the time of voting must execute an affidavit of voter qualification and submit a driver's license "or other document which proves identification and residence." Right now, all you have to do is walk in and sign up. No affidavit or proof of identification is required.

HB 188 also mandates that the ballots of those registering on election day be treated as "questioned ballots." They cannot be counted until all qualifying information has been verified by the Lieutenant Governor. This issue is merely when and not whether the information is authenticated. No vote is deemed valid without the Lieutenant Governor's seal of approval.

If you do break the law, and it's possible under either version, you must pay the price; a price which is significantly inflated under HB 188. Current law gets you up to one year and/or $1,000. HB 188 threatens up to 5 years and/or $3,000 for first convictions; up to 10 years and $15,000 the second time around. If punishment and deterrance are your concerns, HB 188 is a better mousetrap.

So much for voter fraud.

There may be another possible reason for his surprising veto of HB 188 - an ulterior one. Republicans are afraid of election day registration. They think it will benefit Democrats who are more in tune with the apathetic masses. Maybe. As far as I'm concerned, it could go either way. Besides, that's not the point.

In any case, Hammond, a maverick republican who makes a lot of other republicans mad, could have vetoed HB 188 in the spirit of Republican friendship and cooperation; a cynical giveaway, tendered by a transparent "leader" who talks like a populist and acts like Alexander Hamilton.

So much for HB 188? Not quite. We have one more shot. If 40 Legislators vote to override the Governor's veto by Friday, January 13, 1978, HB 188 becomes law.

This is a serious matter unfairly confused by the Hammond Administration. The vote, the very essence of democracy, is sacrosanct - not voter registration as vote, the very essence of democracy, is sacrosanct - not voter registration as Jay Hammond would like you to believe. The right to vote necessarily includes the right to unfettered access to the polls; potential costs, delays, and confusion not withstanding.

The people, all the people, must come first. Obstacles which unjustifiably limit voter participation inexcusably deny our democratic idea. We have a solemn duty to remove them.

I will vote to override the Governor's misplaced veto. And that vote is the bottom line.

Bob Bradley is a rural business developer and state representative from East Anchorage (Mountain View, Muldoon, Eagle River and Chugiak). He is presently chairman of the House State Affairs Committee.

Constituent Criticizes Sen. Orsini

By DANA JONES

A resident of Anchorage Sen. Joe Orsini's district has charged the lawmaker overlooked him in favor of non-Alaskans when hiring his staff.

Brent Kalou Garber, a 22-year-old lifetime resident of Alaska, applied to work with Orsini in December, he said.

"I sent him my resume and talked with him (Orsini) on the phone in late December," Garber said. "He said he wasn't ready to make a decision on the job and that he was going out of town and I wouldn't see him again until the session started."

Orsini considered hiring Garber but decided on an individual with more experience, he said. Orsini denied Garber had applied for the position filled by Californian Steve Mizera.

"The position for which Garber applied (aide to the Senate Community and Regional Affairs Committee) I filled with a better qualified Alaskan," Orsini said. Mizera is administrative assistant to the Senate GOP caucus.

Ben Harding [illegible]ks was hired for the post for whi[illegible]plied, Orsini said.

"He (Har[illegible] wealth of experience as a reporter," Orsini said. "He covered the local government in Fairbanks."

Garber is a 1977 graduate of the University of Oregon with a bachelor's degree in economics. He is unemployed.

Orsini did not consider Garber for the administrative assistant post, the senator said.

"I didn't think it would be very practical for a Democrat to be involved in the Republican caucus," Orsini said of Garber who has been active in the Democratic party, serving as a delegate to the Southcentral Democratic Convention last year.

Garber understands Orsini's reluctance to hire him for the GOP caucus position but believes an Alaskan should have been hired for the slot, he said.

"By hiring out-of-state people he kind of showed us where his loyalties lie," Garber said. "They're not with his district and you'd question if they're with the state at all. If his input is from California his legislation is going to reflect California and not what his district wants."

Orsini agreed Mizera is not yet familiar with Alaska.

"Initially he is doing directed research only because obviously he doesn't have a feel for Alaskans yet," Orsini said. "He's not going to develop policy positions; that's my job."

Orsini has no idea of Harding's political affiliation and did not consider them in hiring the Fairbanks man, he added.

Harding most recently worked for the Organization for the Management of Alaska's Resources (OMAR) for one year in Anchorage.

In searching for assistants Orsini contacted the University of Alaska to see if any students were interested in the positions, he said. However, he chose to hire the Californian because he knew him and had confidence in his ability, the senator said.

"There are probably Alaskans equally qualified but I didn't know of any," Orsini said. "I asked around in Anchorage but didn't find anyone. I wanted someone I had confidence in or one of the staff members had confidence in."

In addition to Mizera, Orsini hired Terri Ann Brest, a secretary from North Highlands, Calif., to work with the Senate Community and Regional Affairs Committee, which Orsini chairs.

He attempted to find an Alaskan for that post but was unable, he said.

"There's a real dearth of people in Anchorage who want to come down to Juneau just for the session," he said. "They have to give up full-time jobs."

Since arriving in Juneau, Orsini has been contacted by several secretaries looking for work, he said.

"I could give him a qualified secretary on a flash of notice," Garber said noting in his search for a legislative position he has met several attorneys who have taken secretarial posts just to get work with the Legislature.

Mizera is paid $68 a day and Brest $52; legislative staffers are paid for seven days a week.

Orsini has been an Alaskan resident for 14 years, he said.

ew Judges Named

By The Associated Press

Hammond today picked a trial
rom Kodiak and a public defender
chikan to fill two vacant judgeships
rage and Fairbanks.
Stouter, 35, of Kodiak was named to
court bench in Anchorage to fill a
created by the retirement of Judge
C.J. Occhipinti.

Stephen Cline, 35, of Ketchikan was appointed to a Fairbanks district court judgeship which had been authorized but never filled before.

Stouter has been in private practice in Kodiak since 1976, specializing in general trial, administrative, appellate and business law.

MEMORANDUM January 20, 1977

SUBJECT: Handling of Committee Mail

TO: All Committee Staff Assistants

FROM: M. R. Charney, Director
Administrative Services M.R.C.

A question has come up with regard to the handling of Committee mail. The following is an excerpt from Legislator's Handbook - January 1977:

> "Outgoing Mail. Mail originating from committees should be placed in pickup baskets which are provided at designated places on each floor in each building occupied by the legislature. Postage for this mail is a responsibility of the State. This mail will be picked up twice a day by a mail clerk and taken to the mail room for processing. Only envelopes indicating a return address of a committee may be processed this way."

Please note that the State pays the postage for committee mail but unless all envelopes are clearly marked as committee mail, they will not be processed in this manner, and may be returned to sender.

March 24, 1978

Mr. Joseph Orsini
Senate
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Subject: Hydroelectric Project Funding

Dear Senator Orsini:

The City of Ketchikan dba Ketchikan Public Utilities (KPU) and other Utilities and communities are vitally concerned with the future well being of Alaskan citizens and the State's economic growth. We, and others, have addressed and stressed our views regarding the Permanent Fund revenues, and the other revenues which will accrue to the State through mineral lease rentals, royalty sale proceeds, Federal mineral revenue sharing payments, and bonuses, all of which will be derived from non-renewable resources.

We strongly feel that the investment of certain of the aforementioned revenues in hydroelectric generating projects which are captive enterprises to the State, and which use a renewable resource, is most environmentally sound, can forestall the energy crisis, and will yet provide the lowest possible electric rates to the citizens of the State, and is the one most wise investment.

We, and those communities, Utilities and citizens represented by the enclosed resolutions and letters respectfully urge the legislature and administration to make the No. 1 priority of their deliberations and actions the funding of hydroelectric and potable water projects currently in progress, and providing for long term adequate funding for these and such future projects to the advantage of the people of our State.

We most specifically solicit your support for House Bill No. 906 introduced by the House Finance Committee on March 22, 1978, copy enclosed.

Very truly yours,

Donald D Bowey

THE
LAKE AND PENINSULA
SCHOOL DISTRICT
P. O. Box 119
Naknek, Alaska 99633

CHARLES R. WHITE, Supt.

March 27, 1978

The Honorable Joseph Orsini
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

The Lake and Peninusla School Board recently considered several items of legislation. At the last official Board meeting they acted to endorse or discourage passage of the following bills, which affect public schools of the state. As elected school officials, representing the parents of this district, they ask your careful consideration of this collective judgement.

Strongly Favor Passage

Senate Bill #447 (We are for)
Passage of this $72,000,000 BOND ISSUE bill is essential for operation of mandated high schools next year. It is really a minimal amount.

Senate Bill #469 (We are for)
This bill makes RECALL of school board members more objective, and prevents arbitrary acts of recall.

Senate Bill #485 (We are for)
Let's finally get the bottleneck out of SCHOOL CONSTRUCTION. Let REAA School Boards assume responsibility for their own building, as in other districts. We're grown up now!

Senate Bill #464 a m (We are for)
This straightens up some needed housekeeping for SCHOOL BOARD ELECTIONS.

Senate Bill #468 (We are for)
JUDICIAL REVIEW regarding due process is desirable in in cases where Boards have ruled unfavorably toward teachers.

WE STRONGLY DISCOURAGE PASSAGE OF THE FOLLOWING:

Senate Bill #482 (We are AGAINST)
This is a rediculous bill, full of regulations, which should not be in bill form. Mandating this SPECIAL EDUCATION LEGISLATION would cost over $40 million, and create another educational hierarchy outside of the Department of Education. PLEASE defeat this bill!

Senate Bill #526 (We are AGAINST)
We firmly believe that the functions of PTPC have changed, and that present grievance procedures and due process provisions have made that organization obsolete. We oppose spending tax dollars on something whose time has passed.

Be it known that we are adamantly against any bill that provides for collective bargaining in the school sector. It is not in the public interest.

We are grateful for your action on our behalf.

Juneau, Alaska 99811

Dear Sir:

The Copper River School District Board, by unanimous vote, has directed me to write the entire Alaska legislature of our total opposition to SB 482 and HB 848. An act relating to special education by Sumner, Croft, Ferguson, Huber and Rodey in the Senate and Meekins in the House. This is a 37 page blue print for the destruction of all education in Alaska. If you intend to, or if it is possible you may vote for this legislation, please read it. If you cannot take the time to wade through all 37 pages, at the very least you should read paragraph B under non-discrimination on page 28 starting on line 25 which contains the words "If a report made under sec. 233(c) of this chapter shows a substantial discrepancy in the occurrence of the characteristics of sex, national origin, race, and religion between children in special education classes in contrast to the remainder of the children in a city or borough school district or rural educational attendance area, the department shall file a complaint with the State Commission for Human Rights alleging discriminatory conduct prohibited by AS 18.80.255."

If you need more information, I have prepared a critical assessment of the entire bill which will be sent to you if you desire.

Sincerely,

Joseph A. Roche, Legislative Chairman
Copper River School District Board

Chief Engineer, Tlingit-Haida REA

RESOLUTION 78-5

A RESOLUTION URGING THE SUPPORT OF THE STATE LEGISLATURE AND EXECUTIVE BRANCH OF GOVERNMENT OF THE STATE OF ALASKA TO USE THE STATE FINANCIAL RESOURCES TO DEVELOP HYDRO-ELECTRIC POWER

WHEREAS, the City of Cordova's electrical energy is supplied by diesel driven generators and

WHEREAS, said generaters are expensive to operate and are subject to mechanical failure such as occurred on December 17-20, 1977 when Cordova was on emergency power, and

WHEREAS, there is abundant hydro-electric resource potential within the State of Alaska,

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Cordova, Alaska that the following Resolution be recommended for adoption by the Legislature of the State of Alaska and be supported by the Executive Branch of Government.

RESOLUTION

WHEREAS, the State of Alaska has growing energy problems and energy shortages which are of deep concern to Alaskan electric power utilities, and the Citizens of Alaska; and

WHEREAS, the State of Alaska has abundant undeveloped hydroelectric resources that may be developed to satisfy many of these energy problems and energy shortages; and

WHEREAS, the State of Alaska has the financial resources in the form of the Permanent Fund and its earnings, the Renewable Resources Development Fund, and the General Fund; and

WHEREAS, financial assistance is needed by Alaskan utilities to build hydroelectric projects;

NOW, THEREFORE, BE IT RESOLVED that we, the undersigned, urge the Alaska State Legislature and the Executive Branch to provide the financial means and support from the Permanent Fund through the Alaska Power Authority, Water Resources Revolving Loan Fund or other existing government agencies to develop the hydroelectric resources of the State of Alaska.

BE IT FURTHER RESOLVED that the agency designated shall evaluate every means to provide long-term capital on sufficient terms to permit the Citizens of Alaska the advantages of hydroelectric power development.

PASSED AND APPROVED THIS 16-th DAY OF January, 1978.

Attest:

RESOLUTION No. 1089

WHEREAS, the City of Ketchikan and other communities in Alaska have growing energy problems and future energy shortages; and

WHEREAS, to meet future electrical energy demands the City of Ketchikan (City) dba Ketchikan Public Utilities (KPU) must presently rely on high cost, fossil fired generating means, using a non-renewable resource; and

WHEREAS, the City/KPU, in company with other communities and Utilities, are unable to carry the burden of financing new hydroelectric projects while also carrying the burden of alternate high cost generation, or the time period from inception of a hydroelectric project to the project being placed in service; and

WHEREAS, the State of Alaska has abundant undeveloped hydroelectric, renewable resources, as for example, the City/KPU Swan Lake hydroelectric project; and

WHEREAS, financial assistance is needed by the City/KPU to build its Swan Lake hydroelectric project; and

WHEREAS, other communities and Utilities are in the same financial plight as evidenced by the Resolution of the Concerned Alaska Electric Power Utilities Committee (CAEPUC).

NOW, THEREFORE, BE IT RESOLVED that the Council of the City of Ketchikan, Alaska hereby endorses by reference the attached Resolution of the Concerned Alaska Electric Power Utilities Committee (CAEPUC).

Be it further resolved, that the Legislative and Administrative branches of the Alaska State Government assure continuity of loan funding to those municipalities and Utilities presently embarked on hydroelectric projects and whose present source of loan funding is the Water Resources Revolving Loan Fund.

PASSED AND APPROVED this 2nd day of February, 1978.

William G. Moran, Mayor

ATTEST:

GOLDEN VALLEY ELECTRIC ASSOCIATION, INC.

Fairbanks, Alaska

RESOLUTION

WHEREAS, the State of Alaska has growing energy problems and energy shortages which are of deep concern to Alaskan Electric Power utilities, and the Citizens of Alaska; and

WHEREAS, the State of Alaska has abundant undeveloped hydroelectric resources that may be developed to satisfy many of these energy problems and energy shortages; and

WHEREAS, the State of Alaska has the financial resources in the form of the Permanent Fund and its earnings, the Renewable Resources Development Fund, and the General Fund; and

WHEREAS, financial assistance is needed by Alaskan utilities to build hydroelectric projects.

NOW, THEREFORE, BE IT RESOLVED that Golden Valley Electric Association, Inc. urges the Alaska State Legislature and the Executive Branch to provide the financial means and support from the Permanent Fund through the Alaska Power Authority, Water Resources Revolving Loan Fund or other existing government agencies to develop the hydroelectric resources of the State of Alaska.

BE IT FURTHER RESOLVED that the agency designated shall evaluate every means to provide long-term capital on sufficient terms to permit the Citizens of Alaska the advantages of hydroelectric power development.

CERTIFICATION

I, Sandra Rosenberg, do hereby certify that I am the Secretary of Golden Valley Electric Association, Inc., an electric non-profit cooperative membership corporation organized and existing under the laws of the State of Alaska; that the foregoing is a complete and correct copy of a resolution adopted at a meeting of the Board of Directors of this corporation, duly and properly called and held on the 27th day of February, 1978, that a quorum was present at the meeting; that the resolution is set forth in the minutes of the meeting and has not been rescinded or modified.

IN WITNESS WHEREOF, I have hereunto subscribed my name and affixed the seal of this corporation this 27th day of February, 1978.

RESOLUTION # 163

WHEREAS: Nushagak Electric Cooperative, Inc. has promoted the concept of developing local hydro facilities since 1961 and

WHEREAS: utilization of a renewable resource such as water power would help to lessen dependence on rapidly depleting high cost middle distillate fuels and

WHEREAS: costs of funding potential hydro projects exceed financial capabilities of most Alaskan electric utilities including Nushagak Electric Cooperative, Inc. and

WHEREAS: Federal and State assistance to date in the development of renewable resource utilization has had only limited effectiveness

BE IT THEREFORE RESOLVED: that the Board of Directors of Nushagak Electric Cooperative, Inc. hereby endorses by reference the attached Resolution of the Concerned Alaska Electric Power Utilities Committee (CAEPUC).

BE IT FURTHER RESOLVED: that the Legislative and Administrative branches of the Alaska State Government assure continuation of loan funding to those municipalities and Utilities presently embarked on hydroelectric projects and whose present source of loan funding is the Water Resource Revolving Loan Fund.

CERTIFICATION

I, Ward I. Jones, Secretary of Nushagak Electric Cooperative, Inc., do hereby certify that this resolution is a true and correct copy of the resolution adopted at the regular meeting of the Board of Directors of Nushagak Electric Cooperative, Inc. of Dillingham, Alaska, held this 13th day of February, 1978, as the resolution appears in the minutes book of the corporation, and that it has not been rescinded or modified.

E:1) Speech
2) UofA

MR. PRESIDENT, I WOULD LIKE TO SPEAK THIS MORNING CONCERNING THE UNIVERSITY OF ALASKA. THERE...SERIOUS BUDGETARY AND ADMINISTRATIVE PROBLEMS HAVE RESULTED IN THE UNIVERSITY'S BOARD OF REGENTS DISMISSING A NUMBER OF SCHOOL OFFICIALS.

NO ONE IN ALASKA...MUCH LESS MEMBERS OF THE LEGISLATORS...CAN VIEW THE UNIVERSITY'S DEEPLY DISTURBED SITUATION WITHOUT GREAT CONCERN. OBVIOUSLY SERIOUS MISTAKES HAVE BEEN MADE. THE UNIVERSITY'S REPUTATION HAS BEEN IMPAIRED. ITS FINANCIAL STANDING HAS BEEN PUT INTO QUESTION, AND THE CAREERS OF MANY OF ITS ADMINISTRATIVE PERSONNEL DAMAGED.

INSTITUTIONS ARE BASICALLY FRAGILE CREATIONS THAT REQUIRE TIME AND PATIENT WORK TO GROW INTO VIGOROUS AND SELF-SUSTAINING BODIES. IN TIMES OF STRESS AND CRISIS, THEY CAN EASILY BE SHATTERED BY WELL-MEANING...IF INAPPROPRIATE...EFFORTS BY OUTSIDE ORGANIZATIONS TO SET THINGS STRAIGHT.

IN THIS CASE I AM REFERRING TO THE RECOMMENDATION MADE BY A MEMBER OF THIS BODY THAT THE LEGISLATIVE BUDGET AND AUDIT COMMITTEE STAFF BE INSTRUCTED TO INVESTIGATE THE CONDITIONS SURROUNDING THE DISMISSAL OF THE CHANCELLOR OF THE UNIVERSITY'S JUNEAU CAMPUS BY THE BOARD OF REGENTS.

I UNDERSTAND AND SYMPATHIZE WITH THE CONCERN WHICH HAS MOTIVATED THIS RECOMMENDATION. RECENT EVENTS AT THE ANCHORAGE AND FAIRBANKS CAMPUSES.. AS WELL AS AT JUNEAU...HAVE BEEN PAINFUL TO ALL OF US.

HOWEVER...THE BOARD OF REGENTS IS ESTABLISHED BY THE CONSTITUTION OF THE STATE OF ALASKA... AND FULLY EMPOWERED BY STATE STATUTE...TO EXERCISE THE POWER TO DISMISS UNIVERSITY OFFICIALS.

THIS AUTHORITY IS SPECIFICALLY GRANTED IN ALASKA STATUTE SECTION 14.40.230 WHICH STATES: "THE BOARD OF REGENTS MAY REMOVE FROM OFFICE ANY OFFICER OF THE INSTITUTION BY A MAJORITY VOTE OF THE WHOLE BOARD WHEN IN ITS JUDGEMENT THE GOOD OF THE UNIVERSITY REQUIRES IT."

THE UNIVERSITY OF ALASKA IS CLEARLY UNDERGOING THE MOST SERIOUS CRISIS IN ITS HISTORY AND IS BEING SHAKEN TO ITS ROOTS. BUT WE MUST RECOGNIZE THAT IF THESE ROOTS ARE RIPPED OUT...THE INSTITUTION WILL DIE.

THE LEGISLATIVE BUDGET AND AUDIT COMMITTEE HAS WORKED DILIGENTLY IN REVIEWING AND AUDITING THE UNIVERSITY'S FINANCIAL AND OPERATIONAL STRUCTURE. IT IS NOT...HOWEVER...THE APPROPRIATE AGENCY TO UNDERTAKE AN INVESTIGATION OF THE DISMISSAL OF ONE OF THE UNIVERSITY'S CHANCELLORS.

NOR...FOR THAT MATTER...IS THE LEGISLATURE ITSELF THE APPROPRIATE BODY TO ADMINISTER AND MANAGE THE UNIVERSITY. WE ARE A POLICY-MAKING AND BUDGET-SETTING GROUP. WE CANNOT ATTEMPT TO APPOINT OR FIRE THE UNIVERSITY'S OFFICERS... OR RUN ITS ADMINISTRATIVE AFFAIRS.

I FEAR THAT IF WE IN THE LEGISLATURE INTERVENE.. OR CALL ON NON-UNIVERSITY ORGANIZATIONS TO INTERVENE IN THE MANAGEMENT OF THE UNIVERSITY... WE RUN THE RISK OF CRIPPLING AN ALREADY BELEAGUERED INSTITUTION.

THE BOARD OF REGENTS IS ACTING VIGOROUSLY TO CORRECT THE PROBLEMS AT THE UNIVERSITY...AS IN LAW THE BOARD IS REQUIRED TO DO. AS BAD AS THE SITUATION MAY BE, I BELIEVE WE CAN ONLY MAKE IT WORSE IF WE ATTEMPT TO CIRCUMVENT THE BODIES WHICH ARE LEGALLY DESIGNATED TO CARRY OUT THE ADMINISTRATION OF THE UNIVERSITY.

ACCORDINGLY, I AM FORMALLY AND OFFICIALLY REQUESTING THAT THE LEGISLATIVE BUDGET AND AUDIT COMMITTEE NOT INVESTIGATE THE DISMISSAL OF THE CHANCELLOR OF THE JUNEAU CAMPUS AS REQUESTED EARLIER BY A MEMBER OF THIS BODY.

SUMMARY OF QUALIFICATIONS

Nature of Background: Over 12 years of progressive assignments in private and public accounting sectors.

Capabilities: Highlights of experience and qualifications:

...Budgets and forecasts...Accounting & Business Systems Development...Accounting Control...Management Reports & Advisory Services...Consolidations...Tax Preparation... Credit & Collection Management...Personnel Supervision... Data Processing Applications...Cost Accounting...Cash Flow Control...Financial Statements...Financial Planning... Commercial Real Estate Management and Development...

Personal Characteristics: Ability to effectively plan and direct the work of support personnel, communicate effectively with management at all levels and establish well-structured financial and business controls to assure profit return.

Employment Experience: Property Manager and Trust C.P.A. for Alaska Electrical Trust Funds 1977-1978. Presently employed with Alaska Electrical Trust Funds, the Taft Hartley multiemployer pension, health and welfare, legal aid and apprenticeship programs jointly sponsored and managed by IBEW Local 1547 and National Electrical Contractors Association.
Responsible for management of Real Estate ventures of Pension Trust including 40,000 square foot office building and proposed 125,000 square foot office building. Also responsible for supervision of accounting and financial activities.

Vice-President-Finance for NANA Corporation 1974-1977. Recently resigned as Vice-President, Finance of Corporation with over $30,000,000 in assets and revenues of approximately $30,000,000. Corporation was profitable during all three years of employment.

Responsible for total supervision of all accounting activities and procedures. During period of employment centralized all accounting functions and substantially converted them to a real-time computerized system. Company revenues during this period of time grew from approximately $700,000 to the current

$30,000,000 plus and accounting staff which grew from four to twenty-five.

Collateral activities included establishment of financial policies, determination of investment objectives, development of banking and auditing relationships and providing counseling to key executives regarding new commercial ventures.

Manager-Tax Department- Peat, Marwick, Mitchell & Co.
1971-1974

Employed three years in the tax department of Peat, Marwick, Mitchell & Co. in Anchorage. Entered tax department under PMM accelerated tax training program. Responsibilities included account tax supervision for many accounts including:

Alaska International Industries, Inc.
Reeve Aleutian Airways, Inc.
Alaska Mutual Savings Bank
Yukon Office Supply, Inc.

Other activities included responsibility for Kodiak practice of PM&M, estate tax returns, and in-house tax training program.

Supervisor-Audit Department- Peat, Marwick, Mitchell & Co.
1965-1971

Joined PM&M in August of 1965 and was promoted to supervisor in July, 1968. Responsibilities included management supervision of audit clients including direct responsibility for field work. Audit client responsibilities included the following clients:

Alaska Mutual Savings Bank
Alaska State Bank
First National Bank of Fairbanks
B&B Fisheries, Inc.
Automotive Parts and Equipment, Inc.
Alaska Federation of Natives

Also participated in management group activities including business development, staff evaluation and long-range planning.

Education: Graduate of West Anchorage High School in 1962 and the University of Washington in 1965 with a major in accounting and a minor in finance. Attended numerous PM&M training courses as well as courses offered by the Alaska Society of CPA's several of which I also taught. Awarded a CPA certificate in 1967 and am a member of the Alaska Society of CPA's and the American Institute of CPA's.

Personal Data: Age: 34; Married, three children - ages 6, 10 and 13. Lifelong resident of Anchorage.

GEN.

MANAGE-

MENT

Jenks Named Lands Trustee

The former president of the Interior Village Association, Robert L. Jenks of Fairbanks, has been appointed to the position of Municipal Lands Trustee in the Alaska Department of Community and Regional Affairs.

Under the terms of the Alaska Native Claims Settlement Act, the municipal lands trustee is in charge of village corporation conveyance to the state or local municipality of land for future community expansion and public uses.

Presently, there are about 90 unincorporated villages which must convey lands to the state. Approximately 100,000 acres of municipal trust lands are involved, according to the Department of Community and Regional Affairs.

Jenks is a former Land Office Manager and Chief Land Adjudicator for the U.S. Bureau of Land Management's Fairbanks District Office, a former land director for the Tanana Chiefs Conference and a former vice-president for lands with Doyon, Ltd., a native corporation.

"His years of experience in all aspects of land management in Alaska, his close working knowledge of the (Alaska Native Claims) Settlement Act and, most important, his personal familiarity with rural communities ideally equip him to manage the trust program," according to Community and Regional Affairs Commissioner Lee McAnerney.

April Mild And Wet

At Juneau International Airport two new daily maximum temperatures were set in April, according to the National Weather Service Forecast Office here. On the 22nd the high temperature was 62 degrees. The previous high for that date was 56, set in 1956. The highest temperature for the month was 64 degrees on the 25th. This was also a new high for that date.

The lowest temperature was 31 degrees on the 21st.

The extreme temperatures for April vary from 6 above, set in 1963, to 71, set in 1958.

Raintall for the month was 4.02 inches. This is 1.03 inches above normal.

Only a trace of snow was recorded at the airport during April. Normal snowfall for the month is 5.2 inches.

COMMITTEES

RESOURCES
COMMERCE
COMMUNITY & REGIONAL AFFAIRS

TO: Rep. Mike Miller
Chairman, Legislative Council

DATE: March 28, 1977

FROM: Sen. Joe Orsini
Chairman, Senate CRA Committee

RE: Interim Extension of the Senate CRA Committee, Subcommittee on Section 14(c)(3) of the ANCSA (AS 44.47.150)

One of the less active sections of the Alaska Native Claims Settlement ACT (ANCSA) has been those provisions of Section 14(c)(3) and (4), relating to the reconveyance of Village land to governmental agencies (see enclosed copy of this Section). However, as the land conveyance process approaches completion, this reconveyance portion of the ANCSA will undoubtedly become more of an issue.

The language of Section 14(c)(3) was notably vague in two respects: defining specifically who should do the selection; and defining criteria for the type of land selected. The provisions of state law pertaining to the subject, contained in AS 44.47.150 (enclosed), are similarly vague in these two respects.

The Department of Community and Regional Affairs, (DCRA), in their FY '78 budget, has an administrative position designated to supervise the reconveyance program; they are also in the process of drafting policies on the subject and beginning their municipal/village contact program. A rather thoughtful but brief analysis of the situation, prepared by Mr. Robert Dupere (enclosed), indicates some of the problems that may be encountered by improper selection and some possible recommendations regarding the selection process.

In an effort to develop a Legislative policy position on the issue, the Senate Community and Regional Affairs Committee requests to be allowed to have an interim three man subcommittee, composed of Senators Orsini, Hackney, Ferguson/Sumner (depending on their respective availabilities).

The approach would be to rely heavily on correspondence to serve as a means of assuring awareness and understanding of the issue at hand on the part of the 221 Village Corporations and 111 municipalities involved.

After assurance is received of a general awareness of the issue, the subcommittee would conduct public hearings in the Southeast, Southwest and Interior/Northwest portions of the state. Particular locations would be chosen based on Village Corporations' size and location, and municipal size and location. Villages both within municipal boundaries and outside of municipal boundaries would be included. Liaison would be maintained with the DCRA, and hearings would be coordinated where appropriate.

It should be noted that this issue concerns approximately a quarter of a million acres of the potentially most valuable land in the state, land where future generations of Alaskans will have their homes, schools and businesses. The economic and social viability of a great many of our present and future municipalities will be heavily dependent on the 14(c)(3) reconveyances, and the state will be spending sizable sums of money on this issue in the future, one way or another. It is important that both the selection process and selection criteria be defined as soon as possible, before adamant and possibly antagonistic decisions are made by those concerned.

Upon discussion with Mr. Myrt Charney, the following interim subcommittee budget figures are proposed:

Per diem - 60 man-days	$ 3,870
Travel	$ 6,230
Secretarial, mailing, phone	$ 1,500
	$11,600

The budget total is an outside figure and hopefully, by using on-going LAA staff and coordinating travel schedules, a portion of this total will not be expended.

February 25, 1977

MEMORANDUM

To: Senator Joe Orsini, Chairman
Community and Regional Affairs Committee

From: Robert J. Dupere

Subject: Statutory Guidelines Concerning Conveyance of Lands Under Public Law 92-203 (Alaska Native Claims Settlement Act, December 18, 1971)

Background

Under Section 14(c) of the Act, two sections pertain to conveyance of lands to the public sector in order that the normal governmental infrastructure and services may be provided on an orderly, planned, and, I assume, cost effective basis. Thus the Federal government in the Act was making an in-kind contribution to provide public services in the areas outlined in the Act. These are quoted:

14. (c) "Each patent issued pursuant to subsections (a) and (b) shall be subject to the requirements of this subsection. Upon receipt of a patent or patents:

. . .

(3) "the Village Corporation shall then convey to any Municipal Corporation in the Native village or to the State in trust for any Municipal Corporation established in the Native village in the future, title to the remaining surface estate of the improved land on which the Native village is located and as much additional land as is necessary for community expansion, and appropriate rights-of-way for public use, and other foreseeable community needs: Provided, That the amount of lands to be transferred to the Municipal Corporation or in trust shall be no less than 1,280 acres;

(4) "the Village Corporation shall convey to the Federal Government, State or to the appropriate Municipal Corporation, title to the surface estate for existing airport sites, airway beacons, and other navigation aids, together with such additional acreage and/or easements as are necessary to provide related services and to insure safe approaches to airport runways; and"

Section 17 of the Act established a Joint Federal-State Land Use Planning Commission for Alaska which was to cease to exist according to the Act as of December 31, 1976. It is assumed that its near final report due January 31 as of each year is now available to the Legislature.

Community Plans Required

It would appear to comply with the intent generally outlined in the Federal statutes that the first item of planning for each community would be a "Comprehensive Community Plan." The various elements of a Comprehensive Community Plan, if performed correctly, would be a guide as to the location and amount of acreage required for the various functions of local government [identified as powers in AS 29.48.030 (1) - (22)] and those functions and services provided directly by the State; i.e., Court facilities, airports, general services and those by the Federal government; i.e., hospitals, fish and wildlife, regulatory and research.

Of course, a competent plan allocates areas and acreage for the private sector to include commercial enterprise, heavy and light industry after considering the present and future economic base.

However, in both the Federal Statute and the State law, Chapter 119 LA 1975, (AS 44.47.150) there are no guidelines provided for:

1. A requirement that the acreage outlined in the Comprehensive Plan be transferred in either location or amount of needs.

2. In the absence of a competent Comprehensive Community Plan, no guidelines allocating the acreage for the functions of government outlined in AS 29.48.030 (1) - (22) which, in turn, would allocate between the municipality responsible for providing the service; i.e. ---

   ...Boroughs -- education and other areawide powers
   ...Cities within the Borough -- the nonareawide powers

Unguided and poor allocations can lead to costly corrective actions when the construction of public facilities becomes necessary and can lead to poorly located facilities in regards to serving the community.

Example: Assume an elementary school according to the State guideline should have for this purpose 10 acres. While originally there was 10 acres available and the initially available site was centrally located, it could lose 8 acres due to poor planning guidelines to a "commercial site." Three years later when either the State agency or the Borough is ready for construction of this school, it must either: (a) Buy the 8 acres which could now be in private hands through sale or long-term lease; or (b) Locate in an area not centrally located involving costly busing for the remaining life of the school.

This State has a warehouse of examples of blind land disposal which then resulted in nonconforming use and encroachments on public areas. An example: the many airports which due to the lack of advance land acquisition or early erroneous disposal required reacquisition of the land at inflated prices.

Recommendations

1. The Department of Community and Regional Affairs be given, by statute, planning review of all village transfers required by Section 14 (c) (3) and (4).

2. That Community and Regional Affairs either approve or disapprove the subsequent community plats and/or land allocations which will be presented the Bureau of Land Management for allocation or transfer of the 1,280 acres.

3. That in the absence of an approved plan, guidelines be provided which allocates the 1,280 acres to various functions possible on a percentage basis. (Input here should be from the Community Planning Division of Community and Regional Affairs and other agencies involved.)

4. That in the event a plan is disapproved the municipalities involved, be it cities or borough, are prohibited from investing public funds in potentially inefficient and ineffective facilities without a specific objective review by Community and Regional Affairs which shall base its approval upon a suggestion of revisions to the Community Plan.

5. That where there is a substantial disagreement as to what is a competent Community Comprehensive Plan by the Village Corporation, a three-man mediation committee resolve the differences. The committee appointed be one person selected by the Village Corporation, one by Community and Regional Affairs and the third by the two so appointed.

6. When borough and city planning staffs exist, then services should be available to the Village Corporation in providing the resources for a competent Comprehensive Plan.

7. Where no local planning staff exists, Community and Regional Affairs should be responsible to provide the "local" staff planning by in-house or contract in order to competently administer its trust responsibilities per AS 44.47.

8. That the transfer of the 1,280 acres be to the cities and boroughs according to the Plan or a percentage guideline according to the powers exercised per AS 29.48.030 (1) - (22).

Conclusion

While the above does appear to be a broad-brush approach, it is hoped that it is enough to stimulate a more aggressive approach in recognizing that poor planning and delivery of public facilities and services in rural Alaska will result in hindering private investment therein. Indeed, private investment by the Village Corporation will be more costly and less profitable. The inefficiencies built into the government sector will thereafter have to be paid -- from property taxes on the huge acreage received from the Settlement Act.

RJD

finds is qualified for land benefits under this Act, the Secretary shall issue to the Village Corporation a patent to the surface estate in the number of acres shown in the following table:

If the village had on the 1970 census enumeration date a Native population between—	It shall be entitled to a patent to an area of public lands equal to—
25 and 99	69,120 acres.
100 and 199	92,160 acres.
200 and 399	115,200 acres.
400 and 599	138,240 acres.
600 or more	161,280 acres.

The lands patented shall be those selected by the Village Corporation pursuant to subsection 12(a). In addition, the Secretary shall issue to the Village Corporation a patent to the surface estate in the lands selected pursuant to subsection 12(b).

(b) Immediately after selection by any Village Corporation for a Native village listed in section 16 which the Secretary finds is qualified for land benefits under this Act, the Secretary shall issue to the Village Corporation a patent to the surface estate to 23,040 acres. The lands patented shall be the lands within the township or townships that enclose the Native village, and any additional lands selected by the Village Corporation from the surrounding townships withdrawn for the Native village by subsection 16(a).

Patent requirements.

(c) Each patent issued pursuant to subsections (a) and (b) shall be subject to the requirements of this subsection. Upon receipt of a patent or patents:

(1) the Village Corporation shall first convey to any Native or non-Native occupant, without consideration, title to the surface estate in the tract occupied as a primary place of residence, or as a primary place of business, or as a subsistence campsite, or as headquarters for reindeer husbandry;

(2) the Village Corporation shall then convey to the occupant, either without consideration or upon payment of an amount not in excess of fair market value, determined as of the date of initial occupancy and without regard to any improvements thereon, title to the surface estate in any tract occupied by a nonprofit organization;

(3) the Village Corporation shall then convey to any Municipal Corporation in the Native village or to the State in trust for any Municipal Corporation established in the Native village in the future, title to the remaining surface estate of the improved land on which the Native village is located and as much additional land as is necessary for community expansion, and appropriate rights-of-way for public use, and other foreseeable community needs: *Provided*, That the amount of lands to be transferred to the Municipal Corporation or in trust shall be no less than 1,280 acres;

(4) the Village Corporation shall convey to the Federal Government, State or to the appropriate Municipal Corporation, title to the surface estate for existing airport sites, airway beacons, and other navigation aids, together with such additional acreage and/or easements as are necessary to provide related services and to insure safe approaches to airport runways; and

(5) for a period of ten years after the date of enactment of this Act, the Regional Corporation shall be afforded the opportunity to review and render advice to the Village Corporations on all land sales, leases or other transactions prior to any final commitment.

Sec. 44.47.150. Village land conveyed in trust. (a) The commissioner of the Department of Community and Regional Affairs is designated to accept, administer, and dispose of land conveyed to the state in trust by village corporations under § 14(c)(3) of the Alaska Native Claims Settlement Act (P.L. 92-203, 85 Stat. 703) for the purposes specified in that section.

(b) Transfer of land by sale, lease, right-of-way, easement, or permit, including transfer of surface resources, may be made by the commissioner only after approval of an appropriate village entity such as the traditional council, a village meeting, or a village referendum. Such approval shall be by resolution filed with the department.

(c) Within one complete state fiscal year after the incorporation of a municipality in the village or of a municipality which includes all or part of the village, land acquired under this section shall be conveyed without cost to the municipality, and the municipality shall succeed to all the entrusted interest in the land.

(d) Separate accounts shall be maintained in the name of each village for the land, including the revenues from the land, acquired from each village corporation under this section, and within 90 days of the close of each state fiscal year a statement of the account for each municipality shall be prepared by the commissioner and be made available to the village and to the public upon request.

(e) Upon the conveyance of land to a municipality under this section, the commissioner shall account to the municipality for all profits including interest from the land, and the municipality may then request that the governor submit a request to the legislature for an appropriation for the amount due it.

(f) No title or interest to lands acquired by the department under this section may be acquired by adverse possession or prescription.

(g) For the purposes of this chapter, the term municipality includes only first and second class cities incorporated under the laws of the state. (§ 1 ch 119 SLA 1975)

1. In the unorganized borough only.
2. This service is optional. If planning, platting and zoning functions are not assumed by the borough, the State Division of Lands shall act on platting requests.
3. This service is optional for second class cities in the unorganized borough and in third class boroughs not exercising this service.
4. Some statutory ambiguity.

revised August 10, 1977

	Definition	Involves	Initiated By	Voter Approval	Sales Tax Limitation	Home Rule
Unification	"An organized borough and all cities within the borough may unite to form a single unit of home rule local government" (AS 29.68.240).	A borough and all cities within that borough.	Assembly resolution or by petition (AS 29.68.250).	Majority of all voters residing in first class and home rule cities, and a majority of voters in the remaining area of the borough must approve the creation of a charter commission and at a later date the charter (AS 29.68.330 and AS 29.68.390).	No statutory limitation, but the charter may limit the sales tax rate (AS 29.13.100).	Yes
Consolidation	"Consolidation means dissolution of two or more municipalities and their incorporation as a new municipality" (AS 29.78.010(4)).*	Two or more municipalities.*	Petition only (AS 29.68.030).	Majority of voters residing in the municipalities (AS 29.68.090).	Three percent (AS 29.53.415 and AS 29.53.440).	No**
Merger	"Merger means dissolution of a municipality and its absorption by another municipality" (AS 29.78.010(6)).*	Two or more municipalities.*	Petition only (AS 29.68.030).	Majority of voters residing in the municipalities (AS 29.68.090).	Three percent (AS 29.53.415 and AS 29.53.440).	No***

*"Municipality means a general law municipal corporation and political subdivision, which is a first or second class borough or city, or a third class borough, incorporated under the laws of the state" (AS 29.78.010(8)).

**A municipality incorporates first as a general law municipality and if it is a first class municipality it may adopt a home rule charter (see AS 29.13.010).

***Unless the absorbing municipality is a home rule municipality.

December, 1977

shall prepare another proposed charter to be submitted to the voters at a regular or special election to be held within one year after the date of the first charter election. If the second proposed charter is also rejected, the charter commission shall be dissolved and the question of adoption of a charter shall be treated as if it had never been proposed or approved. (§ 2 ch 118 SLA 1972; am § 9 ch 200 SLA 1972)

Effect of amendment. — The 1972 amendment, effective July 1, 1972, substituted "Department of Community and Regional Affairs" for "Local Affairs Agency" in paragraph (2) of subsection (a).

Sec. 29.13.080. Charter amendment. A municipal charter may be amended as provided in the charter or by initiative referendum as provided in AS 29.28.060—29.28.110, except that no amendment shall be effective unless ratified by the voters. (§ 2 ch 118 SLA 1972)

Article 2. Home Rule Limitations.

Section
100. Limitation of home rule powers

Sec. 29.13.100. Limitation of home rule powers. Only the following provisions of this title apply to home rule municipalities as prohibitions on acting otherwise than as provided. They supersede existing and prohibit future home rule enactments which provide otherwise:

(1) AS 29.13.080 (charter amendment)
(2) AS 29.18.140 (borough transition)
(3) AS 29.23.020—29.23.050 (city representation and vote on borough assembly)
(4) AS 29.23.250(a) (election and term of mayor)
(5) As 29.23.540 (prohibitions respecting appointment and removal of personnel)
(6) AS 29.23.560 (municipal reports)
(7) AS 29.23.580 (meetings public)
(8) AS 29.28.010, 29.28.020(b) — 29.28.030 (municipal elections)
(9) AS 29.28.130—29.28.250 (recall)
(10) AS 29.33.010(b) (areawide borough powers)
(11) AS 29.33.290(c) (acquisition of additional areawide powers)
(12) AS 29.43.020—29.43.040 (powers of cities outside boroughs)
(13) AS 29.48.033 (garbage and solid waste services)
(14) AS 29.48.035(b) (effect of areawide exercise of borough power)

(15) AS 29.48.035(c) (borough taxing power jurisdiction within cities)
(16) AS 29.48.037 (extraterritorial jurisdiction)
(17) AS 29.48.040—29.48.100 (utilities)
(18) AS 29.48.180 (codification)
(19) Repealed by § 8 ch 147 SLA 1972, effective September 10, 1972.
(20) AS 29.48.210 (expenditure of borough revenue)
(21) AS 29.48.220 (post audit)
(22) AS 29.53.010—29.53.350, 29.53.400 (borough and city property tax)
(23) AS 29.53.415(d) (interest on sales tax)
(24) AS 29.58.180(b) (security for bonds)
(25) AS 29.58.315 (bond attorneys, bond and financial consultants)
(26) AS 29.68.010 (annexation and exclusion)
(27) AS 29.68.030—29.68.110 (merger and consolidation)
(28) AS 29.68.500—29.68.580 (dissolution)
(29) AS 29.73.020 (eminent domain)
(30) AS 29.73.030 (adverse possession)
(31) AS 29.73.040 (taxation of municipalities)
(32) AS 29.73.050 (municipal name changes)
(33) AS 29.23.555 (conflict of interest). (§ 2 ch 1[illegible] SLA 1972; am §§ 2, 8 ch 147 SLA 1972)

Revisor's note (1972).—In ch. 118, SLA 1972, AS 29.48.035(b) was omitted from the list in AS 29.13.100. Since, by its own terms, it applies to home rule municipalities, it has been included here as AS 29.13.100(14); succeeding paragraphs (including the one added by § 2, ch. 147 SLA 1972) have been renumbered. For specific discussion of AS 29.13.100, see 1972 House Journal, p. 1720 or 1972 Senate Journal Supplement No. 3, p. 3.

Effect of amendment. — The 1972 amendment, effective September 10, 1972, added paragraph (33) and repealed paragraph (19).

Chapter 18. Incorporation.

Article
1. Requirements (§§ 29.18.010—29.18.030)
2. Procedures (§§ 29.18.050—29.18.150)
3. Transitional Assistance (§§ 29.18.180—29.18.200)

Article 2. Home Rule Limitations.

Section
100. Limitation of home rule powers

Sec. 29.13.100. Limitation of home rule powers. Only the following provisions of this title apply to home rule municipalities as prohibitions on acting otherwise than as provided. They supersede existing and prohibit future home rule enactments which provide otherwise:

(3) AS 29.23.020 — 29.23.050 (borough assembly representation)

(34) AS 29.33.050, AS 29.41.010(a), AS 14.12.020(a) (responsibility for education on military reservations)

(35) AS 29.58.345 — 29.58.350 (bonded debt for school construction)

(36) AS 29.63.065 (exemption from special assessment)

(37) AS 29.33.090(c) (zoning of state land for homesite entry)

(am § 2 ch 32 SLA 1973; am § 43 ch 53 SLA 1973; am § 2 ch 137 SLA 1975; am § 2 ch 114 SLA 1975; am § 3 ch 218 SLA 1976; am § 4 ch 142 SLA 1977)

Effect of amendments.

The first 1973 amendment added paragraph (34).

The second 1973 amendment deleted "city representation and vote on" preceding "borough assembly" and added "representation" to the end of paragraph (3).

The 1974 amendment added paragraph (35).

The 1975 amendment added paragraph (36).

The 1976 amendment substituted "AS 29.58.345" for "AS 29.58.340" at the beginning of paragraph (35).

The 1977 amendment added paragraph (37).

As the rest of the section was not affected by the amendments, it is not set out.

Editor's note. — Section 1, ch. 142, SLA 1977, provides: "PURPOSE OF ACT. The longstanding policy of the state, declared in the Constitution of the State of Alaska (art. VIII, sec. 1) and the Alaska Land Act (AS 38.05.350), has been to encourage the settlement of the state's land and the development of its resources by making them available for maximum use consistent with the public interest. In authorizing the classification of land for settlement as homesites, this Act is intended to further that policy explicitly, by recognizing that the immediate production of revenues to the state through the auction of land to the highest bidder, virtually the only method by which state land has been made available to the public for residential use, is secondary in importance to the primary, and ultimately more beneficial and productive, goal of providing land for Alaskans to settle at a cost reasonably within their means, and that the highest and best use of some land may clearly be for habitation."

Legislative committee report. — For report on ch. 53, SLA 1973 (CSHB 382), see 1973 House Journal, pp. 793, 885.

For discussion of constitutional limitation on home-rule powers, see Jefferson v. State, Sup. Ct. Op. No. 1084 (File No. 2000), 527 P.2d 37 (1974).

Applied in Roderick v. Sullivan, Sup. Ct. Op. No. 1099 (File No. 2243), 528 P.2d 450 (1974).

FISCAL YEAR 1978

STATE AID TO LOCAL GOVERNMENTS

MUNICIPAL SERVICES REVENUE SHARING PROGRAM

(AS 43.18.010 - 045)

STATE OF ALASKA
DEPARTMENT OF COMMUNITY AND REGIONAL AFFAIRS
DIVISION OF LOCAL GOVERNMENT ASSISTANCE
POUCH B
JUNEAU, ALASKA 99811
MAY 1978

Expenditures for the State Aid to Local Governments Municipal Services Revenue Sharing Program during the period July 1, 1977 to June 30, 1978 are as follows:

GRANT ENTITLEMENTS BY CLASSIFICATION OF MUNICIPAL SERVICES

	Applicants Participating	Approved Entitlements
Police Protection	86	$ 3,012,546
Fire Protection	127	2,659,798
Air/Water Pollution	49	745,616
Land Use Planning	29	737,622
Parks and Recreation	104	1,883,097
Transportation Facilities	39	2,179,793
Road Maintenance		
Public Roads	77	1,856,273
Ice Roads	6	106,389
Health Services	11	545,622
Hospitals	13	1,522,000
Health Facilities	62	1,009,000
Construction Aid Matching Funds	3	947,500
Entitlements		$17,205,256
Cost-of-Living Allowance (COLA)		1,178,573
Total Entitlements		$18,383,829

GRANT ENTITLEMENTS BY CLASSIFICATION OF RECIPIENT

	Applicants Participating	Approved Entitlements
Organized Boroughs	7	$ 2,300,982
Unified Governments	3	9,499,734
Home Rule Cities	11	3,000,872
First Class Cities	20	940,869
Second Class Cities	85	1,414,698
Unorganized Borough Fire Protection Groups	19	48,101
Entitlements	145	$17,205,256
Cost-of-Living Allowance (COLA)		1,178,573
Total Entitlements		$18,383,829

RATES USED TO COMPUTE GRANT ENTITLEMENTS
UNDER THE STATE AID TO LOCAL GOVERNMENTS
MUNICIPAL SERVICES REVENUE SHARING PROGRAM

Municipal Services	Rates
Police Protection	$12 per capita
Military	6 per capita
Fire Protection	$7.50 per capita

Anchorage CENTRAL LABOR COUNCIL

AFL-CIO

P. O. BOX 3187 • ANCHORAGE, ALASKA 99501

January 25, 1978

The Honorable Joseph Orsini
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

At the election held last Thursday by the Anchorage Central Labor Council, AFL-CIO, the following officers were elected for the coming year:

President	Guy Stringham	Laborers Local 71
Vice-President	John Aexander	IBEW 1547
Secretary	Dee Fincher	Retail Clerks 1496
Treasurer	Richard Kleoep	IUOE 302
Trustees	Darryl Berkley	Machinist
	Darrel Smith	Plumbers
	Lamar Wells	Ironworkers
Sgt. At Arms	Bill Steward	Laborers 341

The Anchorage Central Labor Council meets the first and third Thursda, of the month at 8:00 P.M. at the Hotel & Restaurant Workers Hall, 610 W. 6th Avenue, Anchorage, Alaska. We hope you will join us at any meeting. We will also be happy to arrange schedules for you to report to any of our Local Affiliate's Union meetings as well.

Sincerely yours,

Guy Stringham

Guy Stringham
President

SUBJECT: Legislative Teleconferencing

TO : House and Senate Leadership, Chairmen - Standing and Special Committees

FROM : Jack Doyle, Executive Director

During the 1978 Session, this Agency will implement a Legislative Teleconferencing Network pursuant to Legislative Resolve 93. This is a closed circuit communication system joining the capital to centrally located teleconferencing centers in Fairbanks, Anchorage, Nome, Bethel and Ketchikan. Its mainstay is a 24-hour dedicated audio circuit which will provide Alaskans able to travel to a teleconferencing center, a way of participating in committee hearings or in less formal meetings such as those arranged by legislators for small groups of constituents.

To assure flexibility in scheduling and seating capacity, the following five rooms have been equipped with wall-mounted terminating jacks to the dedicated circuit:

House Judiciary - - - - - Room 124
House State Affairs - - - Room 123-A
House HESS- - - - - - - - Room 112
Senate Resources- - - - - Room 126
Sen. Meland's Office- - - Room 205

Of course, no sound can be transmitted to or from these rooms unless an audioconference is scheduled, in which event the audio terminal will be installed, microphones arranged and electricity supplied the equipment. All such equipment will be kept in the possession of the Legislative Affairs Agency and shall be installed for legislative use by the Teleconferencing Network Coordinator at the request of a legislator.

In addition to the audioconferencing plan, the Legislative Teleconferencing Network Task Force has scheduled three two-way videoconferences for February 16, March 16, and April 13, using the Governor's Conference Room as the Juneau transmission site.

A full description of the teleconference network and a detailed explanation of its use is the subject of a report presented to the Legislative Council by the Legislative Teleconferencing Network Task Force.

The system should be operational by the first week of February. Prior to that time, Peter Fromuth, the Teleconferencing Network Coordinator, will contact you and your staff to discuss its use and methods of operation.

SUBJECT: Request for Videoconferencing Proposals

TO : Committee Chairman and House and Senate Leadership

FROM : John C. Doyle, Executive Director J. Doyle

The Legislative Teleconferencing Network has scheduled nine videoconferences for this session, of which three conferences are two-way and six are one-way. Videoconferences will be televised via the State leased satellite and may be watched in communities receiving television as part of the State Television Demonstration Project.

Subjects of high general interest are sought for each conference. Your early selection (no matter how tentative) of pending legislation, or subjects of broad public appeal for teleconferencing, both now and as the session progresses, will help this Agency assure public interest and participation.

Please make your choices known to Peter Fromuth, Network Coordinator, Room 505 - Capitol, at 465-4980.

Enclosure: Videoconference schedule

TABLE 6-1

LEGISLATIVE TELECONFERENCE NETWORK

VIDEOCONFERENCE SCHEDULE FOR 1978
(Videoconference circuits will be available from Noon until 3:25 PM Juneau time)

DATE	COMMUNITIES	CONFIGURATION	MODE	TRANSPONDER #23	OCCASIONAL USE TRANSPONDER
Feb. 16 *1	any except Nome	one-way	-----	yes	----
Feb. 23	Bethel, Anchorage, Juneau	TWO-WAY	TWO FULL CHANNELS	yes	odd numbered transponder
March 2	any except Nome	one-way	-----	yes	----
March 16 *2,*3	Anchorage, Fbx, Juneau	TWO-WAY	Two 1/2 channels	yes	
			or		
			Two Full Channels	yes	even numbered transponder
March 30 *3,*4	any including Nome	one-way	-----	yes	----
April 6 *4	any including Nome	one-way	-----	yes	----
April 13 *3,*5	Nome, Fbx., Juneau	TWO-WAY	Two 1/2 channels	yes	
			or		
			Two Full Channels	yes	odd numbered transponder
April 27	any except Nome	one-way	-----	yes	----
May 11 *6	any except Nome	one-way	-----	yes	----

*1 Optional date, to be decided based upon anticipated overall work load for coordinator prior to this date; does not require special preparations by RCA; utilizes TV Demo. Project transponder #23

*2 After March 1, 1978 Eagle River earth station comes on line; previously available odd numbered "occasional use" transponder will no longer be guaranteed available. However, even numbered (opposite polarization) transponders will be available. Only Eagle River, Bartlett and Lena Pt. are equipped to uplink and downlink these even numbered transponders.

*3 By March 1 RCA will have conducted tests of the feasibility of ½ channel video between all participating communities. If results are positive then subsequent videoconferences can be ½ channel duplex (March 16 and April 13)

*4 Equipment necessary for Nome's participation in both one-way and two-way videoconferencing must be installed on a temporary basis by RCA. Some of this will have to be moved from Bethel. One month transportation and installation time has been allowed. The equipment will be left in Nome for approximately 2 weeks during which time one or two additional one-way videoconferences could be held.

*5 In the event of a negative ½ channel duplex test, use of two full channels remains the only means for two-way videoconferencing for Nome. Nome cannot uplink or down link an even numbered transponder for full channel video. Therefore MTS traffic will have to be temporarily rerouted by RCA to free up an odd numbered occasional use transponder; this is an administrative, not a technical matter.

*6 Optional
