On November 2, 1976, the voters of Alaska approved a Constitutional amendment providing for the establishment of the Alaska Permanent Fund. The amendment provides, in part, that: "At least 25% of all mineral lease rentals, royalties, royalty sale proceeds, federal mineral revenue sharing payments and bonuses received by the State shall be placed in a Permanent Fund, the principal of which shall be used only for those income-producing investments specifically designated by law as eligible for Permanent Fund investments.

INITIATIVE PETITION

The undersigned qualified voters of the State of Alaska petition that Proposition #10, Entitled: "The Alaska Homestead Act."

Impartial Summary of the Proposed Bill to be Initiated

Proposition #10

This proposal would make all vacant, unappropriated, and unreserved State general grant land (except trust land and 500,000 acres selected by the State for public purposes) available for homesteading until 30% of the land or 30,000,000 acres, whichever comes first, has passed into private ownership. A three-year resident would be eligible for one grant of 40 acres (20 acres in Southeast Alaska); a five-year resident would be eligible for two grants; a ten-year resident would be eligible for four grants. However, only one grant could be received per year.

(See inside of this page for text of bill)

WARNING

A person who signs a name other than his own on the petition or who knowingly signs his name more than once for the same proposition at one election or who signs the petition knowing he is not a qualified voter, upon conviction is punishable by a fine of not more than $1,000 or by imprisonment for not more than one year, or by both. (AS 15.45.100)

AN INITIATIVE

For An Act Entitled: "The Alaska Homestead Act."

BE IT ENACTED BY THE PEOPLE OF THE STATE OF ALASKA:

* Section 1. The people find that only approximately one million acres of the 363 million total land acreage of Alaska is in private ownership on the effective date of this Act. The people further find that individual land ownership is integral to the material well-being of the people and encourages more citizen awareness and involvement in the affairs of the state. Further, the people are cognizant that all land was privately owned at the time of the nation's founding and believes that private land ownership is integral to the American system. In addition, the people are aware that the Constitution of the State of Alaska declares that it is the policy of the state to encourage the settlement of its land and the development of its resources by making them available for maximum use consistent with the public interest (art. VIII, sec. 1), and further that the constitution permits the people to implement this policy by providing for the grant of state land (art. VIII, sec. 9). The people find that of the approximately 104 million acres to which the state is entitled under the Statehood Act, less than 75,000 acres have been made available by the state to citizens for settlement and development purposes, and that the failure to make more land available is a failure to implement the policy of art. VIII, sec. 1 of the Alaska Constitution. The people declare their purpose to make available to its citizens at least 30 per cent or 30,000,000 acres of state land for settlement and development, and further declares that a policy of private land ownership is in the best interests of the people of the state.

* Section 2. AS 38.05 is amended by adding new sections to read:

ARTICLE 13. HOMESTEAD GRANTS OF STATE LAND.

Sec. 38.05.410. LAND AVAILABLE FOR HOMESTEAD ENTRY. (a) All vacant, unappropriated, and unreserved general grant land is classified

and available as homestead entry land except trust land. The land shall remain classified as homestead entry land until 30 per cent or 30,000,000 acres, whichever comes first, of the state general grant land has passed into private ownership through the homestead program established in secs. 410 - 540 of this chapter. The director may reclassify for public purposes up to 500,000 acres of land classified as homestead entry land under this section.

(b) The director or his designee, within 30 days after the effective date of this Act and annually thereafter, shall publish notice in at least three newspapers of general circulation in the state and shall make available to the public information relating to the general availability of land for homestead entry under this section.

Sec. 38.05.420. ELIGIBILITY AND APPLICATION. (a) A person who has been a resident of the state, as defined in sec. 530 of this chapter, continuously for the three years preceding application, shall receive a homestead grant upon

(1) recording a written application in the form prescribed by AS 34.15.045 in the recording district in which the homestead entry land is located; and

(2) filing with the director the following materials:

(A) a copy of the recorded application,

(B) proof of residency,

(C) a $100 filing fee, unless the applicant submits a a title search as provided in (b) of this section, in which case the filing fee is $75.

(b) An applicant for a homestead grant may submit to the director a title search conducted by a title insurance company authorized to do business in the state under AS 21.66.100.

(c) A person who has been a resident of the state for at least three years is eligible to receive, subject to (d) of this section, one grant of not more than 40 acres. A person who has been a resident of the state for at least five years is eligible to receive, subject to (d) of this section, two grants not to exceed a combined total of 80 acres. A person who has been a resident of the state for at least 10 years is eligible to receive, subject to (d) of this section, four grants not to exceed a combined total of 160 acres.

(d) No homestead grant may be issued for an area of homestead entry land less than 40 acres in area except (1) when a loss of acreage is caused by inclusion of waters in the applicant's parcel; or (2) when the parcel is located in Southeast Alaska entirely east of the 141st meridian extrapolated to the sea. No person may receive more than one grant per year regardless of size, and in no event may any person accumulate more than 160 acres under secs. 410 - 540 of this chapter or more than 20 acres in Southeast Alaska east of the 141st meridian extrapolated to the sea.

(e) Within any 90-day period established in sec. 440 of this chapter, a person who is eligible for a homestead grant may file one application for a grant. If within a 90-day period more than one person applies and qualifies for the same homestead entry land, priority shall be established by the earliest date of recording. If more than one person applies for the same land at the same time, priority shall be established by lot.

(f) It is the responsibility of the applicant to publish notice once a week for three consecutive weeks in at least one newspaper of general circulation in the vicinity of the land to which he seeks a homestead grant. Where there is no newspaper in the general vicinity, notices shall be posted in three public places near the land. The notice shall contain a description of the land and shall state that the application for the homestead grant was made in accordance with the Alaska Homestead Act (AS 38.05.410 - 38.05.540). Title to the homestead entry land may not pass to the applicant unless preceded by notice as required in this section. The provisions of secs. 305 - 345 of this chapter are not applicable to secs. 410 - 540 of this chapter.

(g) Parcel boundaries shall conform to the township and section aliquot parts system according to the Manual of Instructions for the Survey of the Public Lands of the United States, 1973 edition, Bureau of Land Management, Technical Bulletin 6, and boundaries shall be described by reference to either surveyed or protracted sections and portions of sections.

Sec. 38.05.430. NOTIFICATION OF RIGHT TO POSSESSION. (a) Ninety days after the effective date of this Act and every 90 days thereafter, the director or his designee shall notify successful applicants for

homestead grants during the previous 90-day period of their right to enter on the land. The applicant is entitled to take possession of the land 90 days after the close of the 90-day period in which he submitted his application if the director fails to inform him of his right to enter unless the director has notified the applicant by registered mail that the applicant is ineligible for the grant and includes the basis for that finding.

(b) Notwithstanding the provisions of (a) of this section, a person who has submitted a copy of a title search to the director with his application as provided in sec. 420 (b) of this chapter is entitled to possession of the homestead entry for which he has applied 30 days after his application if the title search shows no prior claims on the land.

Sec. 38.05.440. SURVEY. It is the responsibility of the applicant to provide for a survey by a land surveyor registered in the state under AS 08.01 of the land for which he seeks a homestead grant. Surveys shall conform to regulations adopted by the division of lands, and in force on the effective date of this Act. The survey shall be performed within five years after the right to possession provided in sec. 430 of this chapter, with extensions granted at the discretion of the director. Failure to have a survey done shall result in forfeiture of the homestead grant. Subject to secs. 125 and 127 of this chapter, title to the land passes in fee simple to the grantee upon completion and recording of the survey in the recording district in which the homestead entry land is located. A copy of the survey shall be sent to the director.

Sec. 38.05.450. IMPROVEMENTS AND RESTRICTIONS. (a) Subject to (b) of this section, no improvements may be required or restrictions imposed on homestead entry land, except as required by general law or home rule municipalities.

(b) No grantee of homestead entry land may extract timber or materials on a commercial basis, sell, subdivide, or otherwise dispose of the land until one year after a grant of patent under secs. 410 - 540 of this chapter.

Sec. 38.05.460. TAXES. Land aquired under the homestead grant program is exempt from municipal property tax for a period of one year

from the date of the grant of patent.

Sec. 38.05.470. BOROUGH AND CITY SELECTIONS. Notwithstanding any other provisions of law, land subject to borough and city selection under AS 29.18.190 which is classified as homestead entry land under sec. 420 of this chapter is available for homestead entry as well as borough and city selection.

Sec. 38.05.480. DEDICATION OF LAND FOR ACCESS TO PUBLIC AND NAVIGABLE WATER. A tract of 100 feet wide between each section of land aquired from the state under secs. 410 - 540 of this chapter is dedicated for public access to public and navigable water. The section line is the center of the dedicated access route.

Sec. 38.05.490. STATE SERVICES. Nothing in secs. 410 - 540 of this chapter obligates the state to provide services to land which is the subject of homestead entry for 15 years after it is open to entry.

Sec. 38.05.500. EXECUTION FOR SATISFACTION OF DEBTS. Homestead entry land under secs. 410 - 540 of this chapter is exempt from execution upon a judgment to enforce a judicial lien, process, or proceeding to collect an unsecured debt.

Sec. 38.05.520. FALSE INFORMATION. (a) Intentionally filing false information for the purpose of obtaining a homestead grant under secs. 410 - 540 of this chapter is a felony punishable as prescribed in AS. 11.05.145 and upon conviction shall result in loss of all right, title, and interest to any land obtained under the provisions of secs. 410 - 540 of this chapter.

(b) The filing of false information in connection with an application, survey, proof of residency, or title search under secs. 410 - 540 of this chapter may result in forfeiture of the homestead grant or grant of patent at the discretion of the director but does not affect the right, title, or interest of a bona fide purchaser for value from the applicant or assignees of the applicant.

Sec. 38.05.530. DEFINITIONS. In secs. 410 - 540 of this chapter,

(1) "director" means the director of the division of lands;

(2) "general grant land" means land patented or tentatively approved to the state from the United States under sec. 6 (a) or (b) of the Alaska Statehood Act (72 Stat. 339, et seq.);

(3) "homestead grant" means the right of an applicant for homestead entry land to enter upon the land for which he has applied;

(4) "resident" means a person who is a least 18 years of age and

(A) except for brief intervals, military service, attendance at an educational or training institution, or for absences for good cause, is physically present in the state for the required period;

(B) maintains a place of residence in the state;

(C) has established residency for voting purposes in the state and is a registered voter;

(D) has not, within the period of required residency, claimed residency in another state; and

(E) shows by all attending circumstances that his intent is to make Alaska his permanent residence;

(5) "trust land" includes all the land received by grant of the federal government for the purposes of supporting schools, the University of Alaska, and the state's mental health program;

(6) "vacant, unappropriated, and unreserved land" means the surface estate of general grant land as defined in (2) of this section, exclusive of tideland and submerged land, which

(A) has not been set aside by statute for one or more particular uses or purposes;

(B) is unclassified or, if classified under sec. 300 of this chapter, is classified for agricultural, grazing, commercial, industrial, private recreation, residential, utility, or open-to-entry purposes; or

(C) has not been disposed of through lease, sale or other administrative action.

Sec. 38.05.540. SHORT TITLE. Sections 410 - 540 of this chapter may be cited as the Alaska Homestead Act.

*Sec. 3. AS 34.15 is amended by adding a new section to read:

Sec. 34.15.045. FORM OF HOMESTEAD APPLICATION. (a) A homestead application may be substantially in the following form:

"The applicant (here insert the name and place of residence) has been a resident of Alaska, as defined in AS 38.05.530, for _____ years and hereby applies for a homestead grant for the following described

real estate (here insert description), located in the State of Alaska.

Dated this _____ day of _____, 19_____."

(b) The application shall be signed and sealed by the applicant and shall be recorded as directed in this chapter.

*Sec. 4. AS 34.15.340(a) is amended by adding a new paragraph to read:

(7) applications for homestead grants.

*Sec. 5. This Act take effect ninety (90) days after its passage.

Joe
FI SB 562

SENATE BILL 562 "An Act relating to Alaska land policy"

Background

SB 562 was introduced by the Senate Resources Committee, chaired by Senator Poland. The bill's counterpart in the House is HB 904, introduced by the Governor. According to Reed Stoops, Sen. Poland's AA, the basic data for SB 562 was prepared by the Land Use Planning Commission. Senator Poland, who had been interested in this subject, used the LUPC material and, in conjunction with the Governor, got the two bills introduced, one in the House and the other in the Senate. There is, however, no counterpart in the Senate to HB 905, the companion bill to HB 904. HB 905 provides for a resident of Alaska to have $1,000 reduced from the price of the land he obtains for each year's residence in the state. Senator Poland apparently did not like this provision and is reportedly looking into a means whereby a purchaser could obtain "sweat equity" in the land.

Purpose

In FY 79, the director of lands would make available to the public not less than 50,000 acres. Not more than ten percent of this figure could be used for leasing. For each year thereafter, the director will present three options to the Legislature: 1) an increased-level land disposal program, 2) a current-level program, and 3) a reduced-level program. One of these options must include at least 50,000 acres.

Criteria

1) To cover costs to public, the land must be conveyed to private ownership at fair market value.
2) Land readily accessible to community centers or where it has a high commercial value should be either leased or sold to private owners.
3) Lease programs should be used:
   a) for special public needs to control specific land use
   b) when intended use is temporary
   c) in commercial or industrial uses where leases would generate high cash flow
   d) unique location with special public values
   e) where public demand use is high, such as waterfront recreation

4) Limited or conditional title to the land where the state determines this to be in the public interest (e.g. agriculture).

Policy

1) Choice of lands to be conveyed shall be determined through the inventory, planning, and classification processes of the bill.
2) The director of lands shall make adequate provision for public open spaces accessible to communities for public recreation.
3) The requirement for future generations must be considered and adequate state land retained for their needs.
4) Involvement of municipalities and local residents is essential in determining conveyance of state land to private ownership.

Other

In addition to the disposal of land, the bill also calls for the director of lands to develop, maintain, and revise land use plans for state-owned land, according to a set of criteria.

The bill also sets up (Sec.38.04.070) a series of Management Systems for state lands retained in public ownership. They include: State Public Reserve System, State Park System, State Trails System, Wild and Scenic River Systems, and State Public Domain.

Dear Mayor:

Attached is a copy of Senate Bill 562 ("An Act relating to Alaska land policy") recently introduced by the Senate Resources Committee and now before the Senate Community and Regional Affairs Committee for consideration.

Since the disposition of state land to both municipalities and private citizens in Alaska is one of the most fundamental issues facing government and the public at this time, I would appreciate your careful review of the legislation proposed in SB 562 and your assessment on the effects the enactment into law of such a measure would affect your municipality's financial, social and land use planning.

It is the Committee's intention to schedule hearings on SB 562 as quickly as possible. I would therefore appreciate receiving your comments as soon as you are able to review the legislation. I hope you will also feel free to contact me directly if you have additional questions on this issue.

Sincerely,

Joe Orsini

S/RESOURCES COMMENTS ON SB 562 3-27-78

Reed Stoops this morning confirmed that SB 562 was the Governor's land policy bill which had been introduced in the House as HB 904. However, a further House Bill (905) which provides for land equity by length of residence was not introduced on the Senate side, since Poland apparently has some problems with it. (The newspapers have indicated that she is considering some form of "sweat-equity".)

Stoops also said that SB 562 had been based on material and proposals prepared by the Land Use Planning Commission which had dove-tailed with Poland's own interest. This in turn supposedly sparked the Governor's interest.

According to Stoops, Land Use Planning Commission members will be inJuneau April 5 and 7 to discuss land use policies and land disposition proposals with Senate Resources.

Committee on Resources

Pouch V
State Capitol
Juneau, Alaska 99811

MARCH 21, 1978

THE HONORABLE JOHN RADER
PRESIDENT OF THE SENATE
ALASKA STATE LEGISLATURE
JUNEAU, ALASKA 99811

DEAR MR. PRESIDENT:

THE PURPOSE FOR INTRODUCTION BY THE RESOURCES COMMITTEE OF "AN ACT RELATING TO ALASKA LAND POLICY" IS TO IMPLEMENT BROAD CONSTITUTIONAL GOALS FOR THE USE OF STATE LANDS FOR BOTH PRIVATE AND PUBLIC PURPOSES. THE APPROACH SUGGESTED IS THE ESTABLISHMENT OF LAND POLICIES SUFFICIENTLY DETAILED TO GUIDE ADMINISTRATIVE DECISION MAKING AND THROUGH ANNUAL LEGISLATIVE APPROVAL OF A STATE LAND DISPOSAL PROGRAM. CURRENTLY, IN SPITE OF IMPENDING LAND TRANSFERS TO THE STATE, A COMPREHENSIVE POLICY FOR THE USE OF STATE LANDS DOES NOT EXIST.

THE ACT IS BASED UPON RECOMMENDATIONS DEVELOPED AFTER LONG TERM STUDY BY THE FEDERAL-STATE LAND USE PLANNING COMMISSION AND REFINED THROUGH DISCUSSIONS WITH THE ADMINISTRATION. IT IS A JOINT EFFORT TO SET FORTH A RATIONAL PLAN FOR LAND DISPOSAL AND RETENTION, IN WHICH A NEED OF ALASKA'S RESIDENTS MAY BE SATISFIED IN A RESPONSIBLE MANNER.

THE BILL CONTAINS THREE MAJOR ELEMENTS:

(1) POLICY FOR USE AND CLASSIFICATION OF STATE LAND SURFACE. THIS INSURES THAT THE STATE'S LAND POLICY AS CONSTITUTIONALY MANDATED IN ARTICLE VIII IS TO PROVIDE FOR A BALANCED COMBINATION OF PRIVATE AND PUBLIC LAND USE AND TO ALLOCATE SUITABLE LAND FOR SUCH USE.

AS BALANCED LAND USE IS ESPECIALLY IMPORTANT IN LANDS ADJACENT TO COMMUNITIES, SPECIAL EMPHASIS IS PROVIDED INCLUDING A REQUIREMENT FOR LOCAL INVOLVEMENT IN LAND CLASSIFICATION PRIOR TO DISPOSAL.

(2) LAND AVAILABILITY FOR PRIVATE USE. THIS SECTION MANDATES THAT STATE LAND BE MADE AVAILABLE TO INDIVIDUALS ON AN ANNUAL BASIS IN LOCATIONS AND PARCEL SIZES THAT BEST MEET DIFFERING NEEDS IN DIFFERENT PARTS OF THE STATE. A MINIMUM OF 50,000 ACRES SHALL BE MADE AVAILABLE DURING THE FIRST YEAR AFTER ENACTMENT, NO MORE THAN 10% OF WHICH SHALL BE FOR LEASES. THEREAFTER, THE ADMINISTRATION SHALL PRESENT TO THE LEGISLATURE ANNUALLY FOR ITS APPROVAL, THREE OPTIONS FOR LAND DISPOSAL PROGRAMS.

THE OPTIONS MAY INCLUDE FEE SIMPLE TRANSFER, CONVEYANCE OF AGRICULTURAL RIGHTS, LEASING, OPEN-TO-ENTRY; HOMESITING, HOMESTEADING, AND REMOTE CABIN PERMITS.

FURTHER PROVISIONS ESTABLISH GUIDELINES FOR SURVEY AND SUBDIVISION, PUBLIC ACCESS, AND EASEMENTS.

(3) INVENTORY, PLANNING, AND CLASSIFICATION. THE BILL REQUIRES THE TIMELY COMPLETION OF AN INVENTORY OF THE RESOURCE VALUES OF ALL STATE LANDS. THROUGH USE OF THE INVENTORY, LAND NEEDS MAY BE MET WITH THE BEST POSSIBLE LANDS DESIGNATED FOR THE PURPOSE INTENDED. THE DESIGNATION OF LAND USE SHALL BE ACCOMPLISHED IN COOPERATION WITH LOCAL GOVERNMENTS AND THE PUBLIC.

IN ADDITION TO EXISTING STATE LAND MANAGEMENT SYSTEMS, A NEW CLASSIFICATION CALLED THE STATE PUBLIC RESERVE SYSTEM IS ESTABLISHED FOR LANDS TO BE DESIGNATED FOR MULTIPLE USES. THE LEGISLATURE WOULD RETAIN ITS EXISTING AUTHORITY TO APPROVE ANY DESIGNATION OF MORE THAN 640 ACRES WHICH WOULD CLOSE LAND TO MULTIPLE USE.

IT IS NOT THE INTENT OF THIS LEGISLATION TO OFFER A SIMILAR LAND DISPOSAL PROGRAM AS PROPOSED BY THE HOMESTEAD INITIATIVE. IT IS NOT A FREE LAND PROGRAM; IT WOULD NOT DISPOSE OF LAND IN SUCH VAST QUANTITY AS PROPOSED BY THE INITIATIVE; AND IT IS NOT INTENDED TO ENCOURAGE SPECULATION.

IT IS, HOWEVER, A RESPONSIBLE LAND DISPOSAL METHOD WHICH SHOULD BE CONSIDERED IRRESPECTIVE OF THE HOMESTEAD INITIATIVE.

SINCERELY,

Kay Poland

KAY POLAND, CHAIRMAN
SENATE RESOURCES COMMITTEE

KP:SS

		HAMMOND	BIERNE[redacted]
ACREAGE AVAILABLE		Set annually by Legislature new lands must be made available each year.	30 million up to 160 acres per applicant. Best land claimed in first program year.
LIKELY LOCATION OF LAND		Determined by need and availability. A mixture of remote, community and commercial.	Generally remote.
PURPOSE FOR WHICH LAND CAN BE USED		According to owner's desires.	Due to remoteness, most likely is homesteading.
ACQUISITION METHOD		Use of land credits to purchase or lease or through normal methods. No land rush.	On-the-ground staking and filing of claim.
ELIGIBILITY		All over 18 years. Credits accrue according to length of residency.	All over 18 years and who have lived in Alaska more than 3 years.
COST	To applicant:	Determined by length of residency and location and size of parcel.	Free to first qualified applicant.
	To State:	Cost of government administration minimal.	Large additional administrative costs and personnel.

The Honorable Hugh Malone
Speaker of the House
Alaska State Legislature
Juneau, Alaska 99811

Dear Mr. Speaker:

Under the authority of Article III, Section 18 of the Alaska Constitution, and in accordance with AS 24.30.060(b) and the Uniform Rules of the Alaska State Legislature, I am transmitting two bills related to the disposal of land. This legislation, in conjunction with existing law, will constitute a comprehensive long-term state land management policy and will mandate a rational process to make state land available for private ownership and use.

The first bill, called the Alaska Land Credit Act, will establish a new program by which state land would be made available at a minimal cost. The second measure, the Alaska Land Plicy Act, clarifies and supplements the broad multiple land use mandates set out in Article VIII of the Alaska Constitution.

We who live in this state should be able to secure land for private use. Twenty-two thousand people have underscored that desire for land by signing the Beirne/Kerttula initiative. But that initiative has real problems. It would require that up to thirty million acres be made available on a first-come, first-served basis. Each three-year resident would be entitled to stake 40 acres of public land wherever vacant state land exists. Land would be issued, free, to the first claimant without regard to their needs or public needs. No improvement or residence on the land would be required to gain title.

This is no plan to give people needed sites for cabins or other use. It is, plainly and simply, a vast land give-away which could create an Oklahoma land rush in Alaska.

Although many Alaskans recognize the problems of this approach, they support it because there is no permanent

policy established in the law to get even needed public lands into private ownership. An alternative method must be provided which creates a land policy that is reasonable, consistent, useable and stable.

I am introducing two bills into the Legislature today to provide that alternative. The bills accomplish the following:

Land Credit Bill - SB 568

1. Make a minimum 50,000 acres of land available to the public in the first year, in addition to that already being conveyed. Thereafter the amount made available each year is determined by the Legislature, but more land might be opened each year.

2. Establish a Land Credit of $1,000 for each year of residency. These credits may be used for up to 90% of the purchase or rental price of public land.

3. Land credits may be applied to all means of land disposal: Open to Entry, direct sales, lease sale of agricultural rights, and homesite programs.

Land Policy Bill SB 562

1. Establish a land and resource inventory program for analyzing the value and use potential of state land.

2. Establish a clear legislative statement of land disposal policy.

3. Establish a means for balancing private and public land uses and allocating lands for each purpose.

4. Establish a logical system to ensure useable and safe land is conveyed to the public.

These bills, I believe, meet the legitimate needs of the people of Alaska for land, but do so in a responsible manner. The bills accept the basic concept of the land disposal from the Beirne/Kerttula initiative but take it several logical steps further. I feel these bills are wider in application and more far-sighted in that they

provide for a continuation of desirable public uses on public lands while making land available to the citizens of Alaska for their needs.

Sincerely,

Jay S. Hammond
Governor

SENATE BILL 562 "An Act relating to Alaska land policy"

Background

SB 562 was introduced by the Senate Resources Committee, chaired by Senator Poland. The bill's counterpart in the House is HB 904, introduced by the Governor. According to Senator Poland's AA, the basic data for SB 562 was prepared by the Land Use Planning Commission. Senator Poland, who had been interested in this subject, used the LUPC material and, in conjunction with the Governor, got the two bills introduced, one in the House and the other in the Senate. (SB 568, introduced by Senate Rulles at the Governor's request, allows a state resident a land credit of $1,000 for each year's continuous residence in Alaska. SB 568 has not been referred to Senate Community and Regional Affairs)

Purpose (Sec. 38.04.020)

In FY 79, the director of lands would make available to the public not less than 50,000 acres. Not more than ten percent of this figure could be used for leasing. For each year thereafter, the director will present three options to the Legislature: 1) an increased-level land dispoal program, 2) a current-level program and 3) a reduced-level program. One of these options must include at least 50,000 acres.

Criteria (Sec. 38.04.035)

1) To cover costs to public, the land must be conveyed to private ownership at fair market value.

2) Land readily accessible to community centers or where it has a high commercial value should be either leased or sold to private owners.

3) Lease programs should be used:

   a) for special public needs to control specific land use
   b) when intended use is temporary
   c) in commercial or industrial uses where leases would generate high cash flow
   d) unique location with special public values
   e) where public demand use is high, such as waterfront recreation

4) Limited or conditional title to the land where the state determines this to be in the public interest (e.g. agriculture).

Policy (Sec. 38.04.005)

1) Choice of lands to be conveyed shall be determined through the inventory, planning and classification process of the bill.

2) The director of lands shall make adequate provision for public open spaces accessible to communities for public recreation.

3) The requirement for future generations must be considered and adequate state land retained for their needs.

4) Involvement of municipalities and local residents is essential in determining conveyance of state land to private ownership.

Other

In addition to the disposal of land, the bill also calls for the director of lands to develop, maintain and revise land use plans for state-owned land, according to a set of criteria. (Sec. 38.04.065)

The bill also sets up (Sec. 38.04.070) a series of Management Systems for state lands retained in public ownership. They include: State Public Reserve System, State Park System, State Trails System, Wild and Scenic River Systems and State Public Domain.

In addition it outlines criteria for the retention of state land (Sec. 38.04.015)

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MEETING

May 23, 1978

Present: Senators Orsini, Hackney, Willis and Ferguson; Tom Singer, House Permanent Fund; Pat Conheady, DNR; Annette Smith, House C&RA; Jack Chenoweth, Legislative Affairs Agency, Royce Weller, Hugh Malone's Staff; Representative Dick Eliason, Richard Engen, Division of State Libraries and Museums.

Absent: Senator Sumner

The bills before the Committee were CSHB 133, HB 766 and SB 580. The meeting was called to order at 3:08.

SENATE BILL 580

Richard Engen, Division of State Libraries and Museums, stated that this bill would increase the present grant and aid program for assistance to the Public Libraries Association throughout the state from $250 a year on a reimbursable basis to a $500 grant for purchase of library materials.

He stated that it eliminates much of the paper work now required by statute. He explained that his office has to submit invoices on a reimbursable basis and this would be eliminated through the grant provision of the bill. He also stated that the bill removes the restriction from purchasing religious materials which is in the original statutes.

Senator Hackney moved to increase the $500 grant amount to $1,000. There were no objections. Senator Hackney then moved to pass the bill out with a "DO PASS" recommendation.

HOUSE BILL 766

Chairman Orsini went through the proposed recommendations for the bill. He stated that there was a CS for increasing the $250,000 to $400,000 and adding certain conditions to the increase.

Representative Eliason stated that the bill was introduced at the request of the borough Administrator of Sitka. He stated that small contractors in rural areas and smaller communities of the state who have ample equipment and the experience to handle a number of municipal jobs are falling short of other contractors from out of the community and even out of te state because of the difficulty in establishing a bond.

Senator Ferguson moved that the Committee adopt a CS for HB 766 including the recommendations by Chairman Orsini and pass it out with "INDIVIDUAL RECOMMENDATIONS".

CS FOR HOUSE BILL 133

Jack Chenoweth, Legislative Affairs Agency, went over the proposed committee substitute for CSHB 133 and explained section by section

changes in the bill and new language that had been put into it. As a result of committee discussion, a revised work draft of the proposed committee substitute was requested.

Chairman Orsini stated that CSHB 133 would be scheduled for Committee action Thursday.

The meeting was adjourned at 4:00.

FI: SB 599

Nome May Compromise On Liquor Ban

NOME (AP) — More than enough signatures have been gathered on that petition to shut down the bars in this historic Bering Sea goldmining town. But townspeople say a compromise may be in the works.

Supporters of a petition that would make it illegal to sell liquor in Nome met with businessmen Thursday to discuss the situation.

The liquor business employs 99 persons on a full-or parttime basis in Nome, a city with 2,500 residents. The industry also provides a healthy chunk of city revenues.

All those attending the meeting agreed that there is a problem with excessive alcohol abuse in the community. But they also seemed to agree that elimination of liquor was unacceptable for economic reasons.

Members of the newly formed Nome Business Owners Association plan to work on the problem with bar owners, law enforcement officers, judges and members of the Nome Ministerial Association.

The citizens plan to form a nine-member committee, the Nome Alcohol Control Board, to help resolve the problem.

Under a draft proposal, the Nome City Council would empower the board to effectively enforce liquor regulations, such as those making it illegal to serve inebriated persons. Shorter bar hours also are contemplated. And those in the liquor business would be called upon to police their own activities and help limit alcohol abuse.

Another meeting was planned later this month to firm up the proposal and to select members of the board.

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MINUTES

May 2, 1978

Present: Senators Hackney, Willis Sumner and Orsini; Pat Conheady, Department of Natural Resources; Jack Chenoweth, Legislative Affairs Agency; Ben Marsh, Cook Inlet Air Resources; Janet Pursley, Cook Inlet Air Resources; Karla Pursley, Cook Inlet Air Resources.

Absent: Senator Ferguson

Senate Bill 599, SCR 103 and CSHB 133 were before the Committee.

SENATE BILL 599

Jack Chenoweth, Legislative Affairs Agency, stated that since the coastal management regulations are prepared by the Coastal Policy Council and are not defined by the Coastal Management Act as part of the program, they need not be presented to the Legislature for approval. He also stated that, if the Legislature were not required to approve them, they are no more or less than any other set of regulations that are adopted by any other state agency and are therefore subject to any resolution put in by a member or by the Administrative Regulation Review Board.

Chairman Orsini stated that his interpretation of a conversation with Jack Chenoweth earlier lead him to believe that there were possible legal ramifications to adopting the resolution that formally approves the regualtions, and thereby not being able to disapprove them in the future.

Mr. Chenoweth stated that he could not say that there were no legal ramifications but the regulations are not obligated to come before the legislature for approval.

The Committee concluded that either with or without Legislative endorsement the regulations would take effect. The Committee agreed to see the Federal Coastal Zone Officials at Tursday's C&RA meeting if they were available.

CS FOR HOUSE BILL 133

Chairman Orsini stated that since other committees have insufficiently addressed the Anchorage land situation involving this bill that this Committee would have to go more deeply into it. He also stated that this version of the bill is roughly comparable to the version that came out of House C&RA with the exception of monetary possibilities and slightly changed acreages. Pat Conheady, Department of Natural Resources stated that some additions added from the House Finance Committee were still in the bill and that the most important of those was the availability of trust lands for selection. He also stated that the Department thinks this is a good provision. Mr. Conheady, stated that trust lands would enable the state in those communities which do not have suitable land to obtain their entitlement. Senator

Sumner stated that Anchorage had selected 20,000 acres of land on the basis that trust lands were not available for selection, and it wound up, in terms of usable land, with around 14,000. He expressed concern as to whether Anchorage was facing a situation similar to Kodiak's. He stated that he felt Mr. Hartig who has represented Kodiak, should come and talk to the Committee. Chairman Orsini asked Mr. Conheady if it would make any difference if the state had a law like this if the Beirne Initiative passes. Mr. Conheady replied that it would be good to have one to protect the municipalities' rights to selection land first before the Beirne Initiative.

Mr. Conheady stated that the fiscal note would be different from that of the House version of this bill because DNR is involved in the selection process in the Senate version and is not in the House version.

He also stated that the Department probably would not have the lands transferred by November but would have identified what lands they were looking at.

Chairman Orsini asked Mr. Conheady if the letter sent to Senator Tillion on April 19 outlining certain acreages available was still valid. Mr. Conheady replied that it was. Chairman Orsini stated to Mr. Conheady that if the Committee finds reasons to believe that those figures are not valid that his credibility with this Committee will have suffered. Mr. Conheady replied that he believed the letter to be valid to the extent of his knowledge.

The meeting was adjourned at 4:00.

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MINUTES

April 25, 1978

Present: Senators Orsini, Sumner, Willis and Ferguson; Roger Allington, Co-Chairman of the Alaska Coastal Management Council; Murray Walsh, Office of Coastal Management; Bruce Aronson, Department of C&RA; Pat Sharrock, ABC Board; Jim Rolle, Alaska Municipal League.

Absent: Senator Hackney came latter part of meeting.

The meeting was called to order at 3:10.

SB 533, SB 208, SB 599 and SCR 103 were the bills before the Committee.

SENATE BILL 533

Senator Sumner moved and asked unanimous consent that the Committee pass out CSSB 533 with individual recommendations.

SENATE BILL 208

Bruce Aronson, Dept. of C&RA, testified that the Department supports SB 208. Senator Sumner moved and asked unanimous consent that the Committee pass out SB 208 with individual recommendations.

SENATE BILL 599

Chairman Orsini stated that SB 599 is an outgrowth from discussions on SB 183, which is part of the Governor's Alcohol package. The bill does essentially two things -- first, it allows a municipality to adopt ordinances by which either new, renewel or transferred liquor licenses could be rejected by a municipality. If a municipality does not act to reject the license request within 30 days the application is automatically placed before the ABC Board.

Senator Sumner questioned the need to transfer a state level function, such as liquor licensing, to the local government level.

Chairman Orsini stated that Section 1 and 2 both deal with municipalities but were separate from each other. Section 2 gives an intermediate means of municipal alcoholic control if the municipality votes to do this. It would limit sales to nondistilled alcoholic beverages, such as beer and wine.

Chairman Orsini stated that he had spoken with CHAR Lobbyist, Dorothea MacDonald, and she initially had no objection to the bill but stated that the CHAR executive committee later decided to oppose it.

Pat Sharrock, Director of the Alcohol Beverage Control Board, stated that one provision of the bill that he does like is the requirement for a municipality to place a license application on its agenda for a public hearing. He stated that one are of the bill seemed to be a conflict or a duplication, which is where the applicant and the ABC

Board both would be required to send a copy of the application to the governing body involved. In regards to the 30 day waiting period provided for a municipality to disapprove an application he asked that it be specified when the 30 day count-down would begin.

Mr. Sharrock had no comments on Section 2 of the bill.

Jim Rolle, Alaska Municipal League, in response to the concern that the municipalities may be given too much power by being able to reject applications, stated that now the only protest to the ABC Board is generally in the area of health and zoning. He stated that this bill would give municipalities an option. Then if they chose not to adopt appropriate ordinances the ABC Board would continue to make the decisions. He stated that the municipal officials are, in his opinion, as effective as the ABC Board in judging what is good for their community and what isn't.

He also stated that he agreed with Mr. Sharrock that the 30 day period is confusing. He also had no comment on Section 2.

COASTAL MANAGEMENT GUIDELINES AND STANDARDS

Chairman Orsini stated that the Committee now has SCR 103 before the Committee approving the regulations.

Roger Allington, Co-Chairman of the Alaska Coastal Policy Council, stated that the Coastal Management regulations are slightly different from other regulations. For one, he pointed out that they are being promulgated by a specially-organized body, the Alaska Coastal Policy Council, composed of government and public members. He also noted that the intent of the regulations was to establish broad policy principles and allow local municipalities and district to draw up their own management programs essentially on a zoning basis. Furthermore, the areas themselves would draw their own boundaries for coastal management jurisdiction, providing certain criteria were met.

Although the Council extensively revised the final version of the regulations, Allingtion stated that on the last part of Section 85, concerning council review, was new. He also stated that there was a major change in the Timber Harvest Section of the regulations which was requested by the timber industry. There was also work done on the subsistence section. The question was raised of what would happen if local or state agency regulations conflicted with the Coastal Regulations. Mr. Allington replied that the agencies or local governments must bring their regulations into conformity with the coastal management program.

Murray Walsh, Coastal Zone Management Office, stated that the critical time would be the next six or seven months which would bring out the flaws and problems of the regulations. He also stated that the Legislature should consider an increase in state funding of this program just to give the coastal management more flexibility and eliminate some of that federal dependence.

The meeting was adjourned at 4:35.

Alaska State Legislature

Senate

Committee on Community & Regional Affairs

Pouch V
State Capitol
Juneau, Alaska 99811

Official Business

May 3, 1978

Mayor George M. Sullivan
Municipality of Anchorage
Pouch 6-650
Anchorage, Alaska 99502

Dear Mayor Sullivan:

The Senate Community and Regional Affairs Committee passed out of Committee CSSB 599 ("An Act relating to regulation of the sale of alcoholic beverages by municipalities") on May 2. This bill would allow a municipality, if it chose to exercise the option, to disapprove liquor license applications before the applications could be considered by the Alcoholic Beverage Control Board.

If a municipality did not wish to become involved in the regulation of liquor licensing, the present situation of direct licensing by the Alcoholic Beverage Control Board would continue.

A second section of CSSB 599 provides for communities, if they desire, to exercise a third option regarding the sale of alcohol in their areas. CSSB 599's provision would allow residents of a community to vote on an intermediate option of prohibiting the sale of distilled (i.e. "hard") liquor but allowing the sale of low alcoholic, non-distilled beverages (i.e. beer and wine).

CSSB 599 has no further committees of referral, except for review by the Rules Committee, before it goes to the Senate floor for a full vote.

Members of the Senate welcome at all times your comments on this legislation and your views on how these options could strengthen the effectiveness of local government. I would like to draw your attention to the fact, however, that CSSB 599 is likely to be scheduled for Senate floor action shortly and that your comments will be most useful if they can be submitted as soon as possible to the Legislature.

Sincerely,

Joe Orsini

SUBJECT: Judicial "review" of decisions of municipalities with respect to liquor license applications reviewed and disapproved under CSSB 599

TO: Senator Joseph L. Orsini

FROM: John B. Chenoweth
Legislative Counsel

As drafted, CSSB 599 makes no specific provision for appeal of a decision by the governing body of a municipality disapproving a new license or a license renewal or transfer application under AS 04.10.265 added by the bill. The absence of specific language does not preclude judicial review of the decision of a city council or borough assembly. The general jurisdiction of the superior court encompasses civil actions, including actions based upon constitutional requirements of due process. Section 1 of the referenced bill, adding AS 04.10.265, would require, first, a general municipal ordinance describing standards for review of liquor license applications in the community and, second, review and disapproval of licenses based upon the standards. Protection against arbitrary interference with rights in a liquor license by a municipality making a decision under the section cited could be reached by an action commenced in superior court contesting the validity of the underlying municipal ordinance, challenging the compliance by the municipality with its own requirements respecting notice, opportunity for hearing and presentation of evidence, and manner of making a decision, and consistency of decision by the governing body of the municipality with the provisions of its own ordinance. The scope of "review" based upon the constitutional requirements of due process may be somewhat narrower than the general review afforded under the state's Administrative Procedure Act (AS 44.62.570), but the opportunity for an aggrieved license applicant to "test" the decision of the municipal council or assembly is not lost by the failure to provide a specific appellate procedure.

FAIRBANKS DAILY NEWS MINER

Wareham picked to fill Weldon's vacant seat

4-28-78

Lee Wareham, general manager for RCA Alascom in Fairbanks, was appointed to the Borough Assembly at the group's meeting Thursday night.

Wareham was one of 11 candidates applying for the seat, which became vacant when Assemblyman Don Weldon left Fairbanks at the beginning of April. After reviewing candidates at an informal session last Saturday, the assembly conducted a vote.

On the first ballot, Geraldine Benshoof, Leslye Korvola, Steve Van Sant, and Wareham were top vote-getters. Wareham was chosen on the second ballot.

His term will expire in October.

In other business Thursday, Assemblyman Dave Brennen said the ad hoc sales tax committee had recommended that the assembly continue to exempt the sales tax on food and drug items for at least a year, when adequate information on results can be obtained.

Brennen said the committee had been asked to consider re-establishing the tax, but there has not been time to gather data on the effect of the exemption.

He also said the committee soon will present the assembly with an ordinance to halt the expeditor's exemption, which allows expeditors to avoid sales taxes on items bought for use outside Fairbanks.

Brennen said there are few expeditors in town who use the exemption, but it is subject to abuse by many other people. The only requirement for obtaining an exemption card is proof of residence outside the borough.

The assembly unanimously approved a resolution requesting the state Department of Transportation to declare rural access roads closed to truck traffic, and to establish and mark truck routes through Fairbanks.

A request to consider rezoning Small Tracts subdivision from Rural Residential to General Residential will be placed on the next assembly agenda if the borough attorney says it is legal, the assembly agreed. Bill Sexton applied to rezone his lots in the subdivision, and was turned down. The request now before the assembly would request the same rezoning for 15 lots, including Sexton's.

In another move, the assembly established the Fairbanks Metropolitan Air Quality Planning Organization, which would allow the borough, Fairbanks and North Pole governments to form a plan to bring Fairbanks under federal air quality standards.

The assembly also:

- Unanimously voted to support Senate Bill 599, which allows local control in approving or disapproving alcholic beverage licenses;
- Denied a rezoning sought by College Utilities to build a residential office building over a proposed water storage reservoir and fire pumping station on University Avenue;
- Approved a rezoning to allow construction of a University of Alaska microwave reflector for radio waves on Ester Dome;
- Approved Hamilton Acres Park and the Jaycees Park near the state building;
- And requested a proposal from Tanana Valley Community College to contract for instructional and recreational operations at the borough swimming pools.

SUBJECT: Proposed CSSB 599, relating to liquor licenses

TO: Senator Joseph L. Orsini

FROM: John B. Chenoweth, Legislative Counsel

One additional amendment should be considered by the Committee before this bill is reported out. That would be a change to conform provisions of AS 04.10.350(a), relating to automatic renewal of outstanding licenses.

In this regard, I would suggest the following:

* Sec. 3. AS 04.10.350(a) is repealed and reenacted to read:

(a) A license issued under this chapter is renewable automatically if the fee is paid in accordance with secs. 40 - 140 of this chapter. A license is not automatically renewable under this section if

(1) the license application is disapproved by the governing body of the municipality under sec. 265 of this chapter;

(2) the license application is protested in the manner provided in sec. 300 of this chapter;

(3) the licensee has been convicted under AS 04.15.100 and the board or a court of competent jurisdiction is considering suspension or revocation of the license; or

(4) the license has been lawfully revoked.

ESTIMATED COSTS

Capital Recovery Costs

Capital recovery costs for the proposed offshore barge terminal facilities are based on:

- The sale of municipal bonds by the City of Nome to provide the funds, not available from the State of Alaska, for the construction of the proposed barge terminal facilities plus the purchase of the portable hydraulic dredge and support equipment.

- Repayment of the municipal bonds will be extended over a 25 year period using a 7-1/2 percent interest rate.

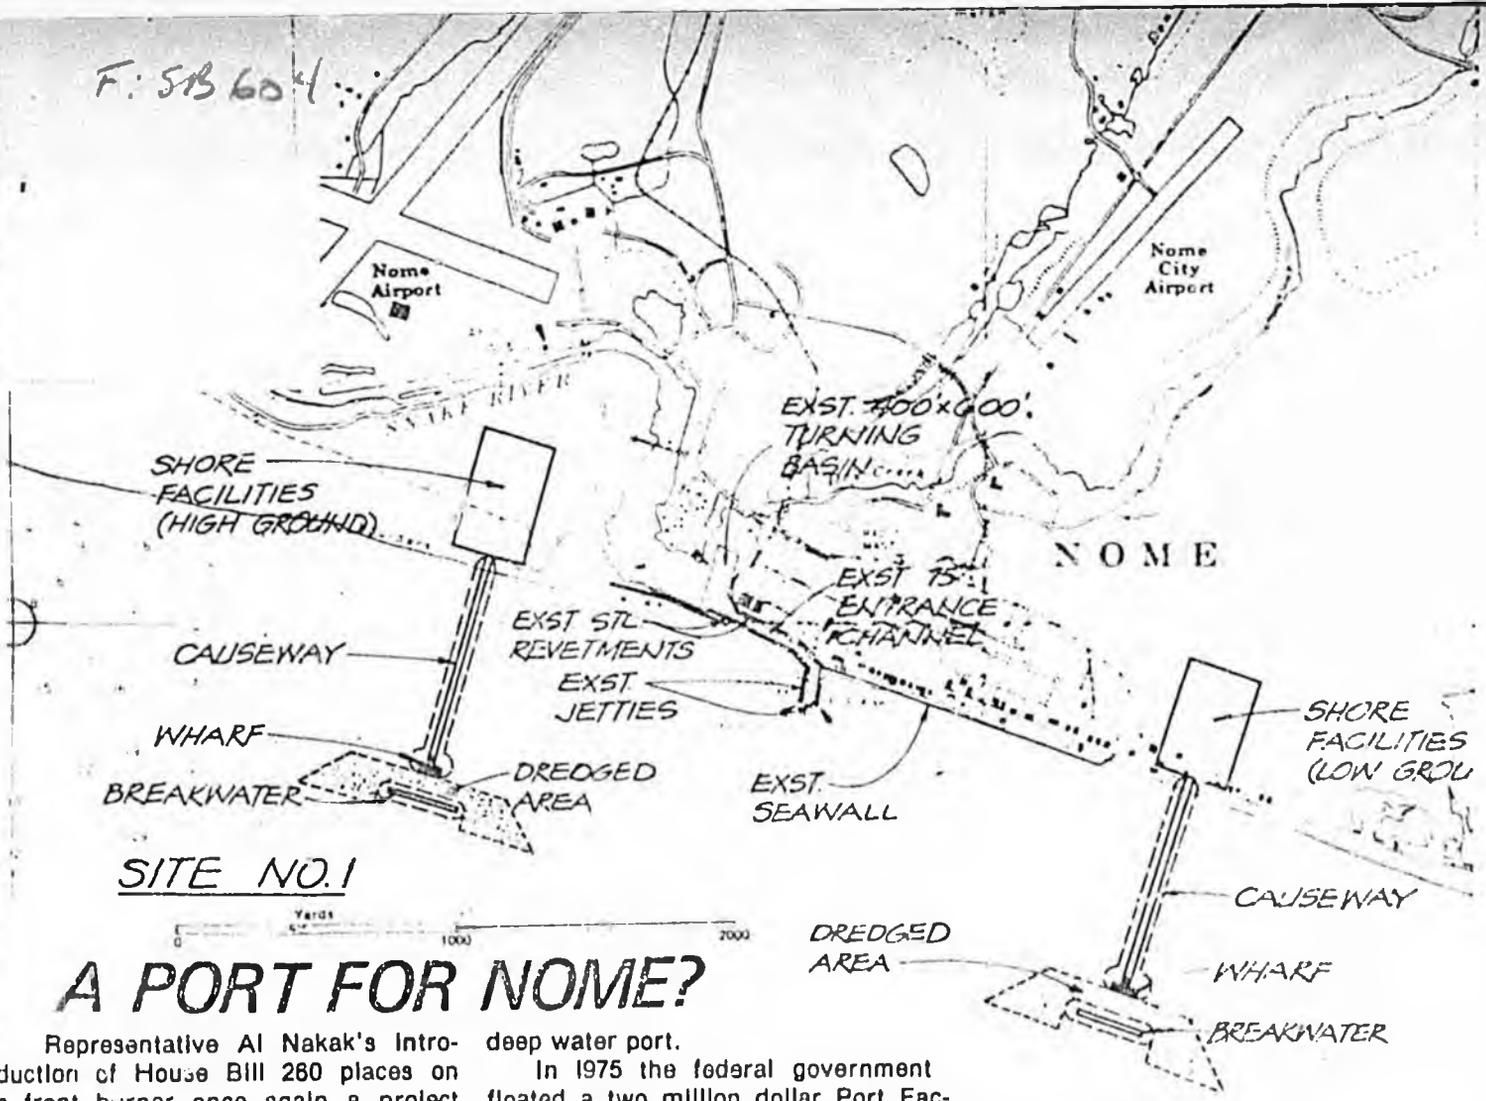
Capital costs requirements to cover development of the proposed barge facilities are shown in Table 6.

Table 6
CAPITAL COSTS
PROPOSED OFFSHORE BARGE FACILITIES
NOME, ALASKA
(Estimated 1976 Costs)

Item	Amount
Total Project Cost (Table 2)	$8,540,000
Portable Hydraulic Dredge and Floating Breakwater	750,000
Total Project Capital Cost	$9,290,000
1974 Port Facilities Development Fund, State of Alaska	(-)2,000,000
Total Project Capital Costs To Be Funded By The City Of Nome	$7,290,000

Nome Barge Facility Study
CH2M Hill July 1976

F: SB 604



A PORT FOR NOME?

Representative Al Nakak's introduction of House Bill 260 places on a front burner once again a project that has long intrigued Nomites - a deep water port.

In 1975 the federal government floated a two million dollar Port Facilities Development Fund for the construction of a port, but it required a ten per cent matching grant from Nome. With city coffers then as now empty, and no local monies in sight, Nakak is asking the state of Alaska to cough up Nome's share of $200,000.

If Nome's deep water port never leaves the drawing table, it won't be through lack of doodling. Most recent study for a deep water port was done by CH2M Hill in 1975, at the request of the City Council. It follows three earlier studies done by the U.S. Corps of Engineers, the State of Alaska, and an engineering team from Oregon.

Army Engineers came up with six options, costing in 1975 from six to twelve million, and the State compared sites at Nome proper and Cape Nome. Clark and Graff Engineers site possibilities included Port Clarence and Teller.

CH2M Hill's imaginative effort in 1975 discussed helicopter literage, the use of balloons, tramways and air-cushion vehicles to offload ships - all the latest wrinkles. But the report settled on an "ocean-going barge facility," that extended from the city's breakwater 2200 feet offshore, out to a minimum water depth of sixteen feet. At the end of the causeway stood a T - shaped wharf, to which Seattle-based barges could tie wharf. A twenty foot wide roadway the length of the causeway would connect the wharf with the shore.

All rock for the project would come from Cape Nome thirteen miles to the east. Construction would be in three phases, and the entire project would take a minimum of four years to build; this includes the search for funds, city council action, and additional studies and surveys. CH2M Hill projected in 1976 a cost of $8,540,000. The engineers also called for dredging, to take care of littoral drift accumulation on the west side of the causeway.

It is an expensive undertaking. The dredge alone would cost $750,000. And CH2M Hill's report does raise the preliminary question - can Nome afford to pay for such a port?

A major consideration was whether oil suppliers would use more shallow-draft barges to offload liquid petroleum products directly to the new facility, or whether they would continue to use tankers and literage oil in small barges AS HAPPENS TODAY. According to the report's figures, nearly 73 per cent of total shippingdelivered at Nome in the last five years was oil products or its derivatives.

Nearly 30,000 tons of sea-going freight are delivered annually here, and CH2M Hill claimed that literage costs would be considerably reduced and simplified,

The Bering Straights News
Nome, Alaska March 31, 1978

PORT FROM PAGE 3

would be less cargo damage due to direct offloading.

Offsetting this would be the cost of the facility itself, dredging and maintenance costs and trucked cargo handling.

The report argues but not convincingly that Nome could spend ten million dollars in hopes of reducing its shipping costs. But more intriguing than this dubious prospect are theprospects that a deep water port might unlock for the future.

Following their own dynamics, oil companies will surely take a close look at Norton Sound offshore prospects. But if they do decide to drill in earnest, will they necessarily build a port here for us in Nome? Or might they pick a site of their own choosing, and develop their own staging areas perhaps far from Nome, with the result that Nome might miss the revenues that could accrue from oil development here.

Concerning mineral development, there are known and marketable minerals in the Seward Peninsula that presently lack only a means of getting them stateside for their commercial development. What effect would a deep water port have on mineral development, in future years?

And with the marketing problems faced by the Norton Sound King Crab Fisherman's Association fresh in mind, how can Nome ever really develop a fishing industry here for bottomfish, herring, crabs, and even salmon witholut a deep water port, without a base wherefishermen can tie up their boats and weather storms, and witho ut the canning and procesing facilities that must precede and accompany the development of a commercial fishery here.

With House Bill 260 up for consideration in Juneau, and the prospects for the future as glimmering as ever, it is time for another look at a deep water port for Nome. WHETHOR OR NOT HB 260 prevails in Juneau relates to a question that Nome must ask itself and answer affirmatively, "Do we want a deep water port for Nome?"

The BERING STRAIGHTSrecommends a definitive YES and we should make it felt in Juneau. RR

LETTER OF INTENT TO SCR 12

The intent of the Senate Community and Regional Affairs Committee, in the approval of SCR 12, is that the language of 19 AAC 38.020 is repugnant to the concerns of Alaskans, and should be annulled.

However, the Committee felt that the implementation of the regulations was inoffensive and reasonable, and well served the intent of the statutes. Therefore, while the Committee believes the regulation itself should be annulled, it could see no reason to change the existing procedures, and recommends the adoption of a new regulation which more closely describes these procedures.

LAII 1843 12.20 JA01 0021 12.20 04/27/77

TO CINDY JNU
FROM CHARITY ANCH

THIS MESSAGE IS FROM THE ANCH ASSEMBLY TO THE SEN FINANCE COMMITTEE. THIS RESOLUTION WAS ADOPTED 4/26.

"A RESOLUTION OPPOSING SCR 13 AND SCR 14 RELATING TO REVENUE SHARING FOR HOSPITAL CONSTRUCTION"

THE ANCHORAGE ASSEMBLY RESOLVES:

WHEREAS, SCR 13 WOULD PREVENT THE DEPARTMENT OF COMMUNITY AND REGIONAL AFFAIRS FROM LIMITING TOTAL HOSPITAL CONSTRUCTION COSTS TO THOSE ALLOWED UNDER FEDERAL LAW, FOR THE PURPOSE OF COMPUTING REVENUE SHARING FOR LOCAL HOSPITAL CONSTRUCTION,; AND

WHEREAS, PASSAGE FOR SCR 13 WOULD PROHIBIT THE STATE FROM ADMINISTERING GRANTS-IN-AID PROGRAMS HARMONIOUSLY WITH FEDERAL REGULATIONS AND WOULD CREATE INCONSISTENCIES THROUGHOUT THE ENTIRE MEDICAL REIMBURSEMENT SYSTEM INCLUDING MEDICARE, MEDICAID, AND GENERAL RELIEF MEDICAL ASSISTANCE; AND

CONT'D / EOM

LAII 1902 12.23 JA01 0022 12.23 04/27/77

TO CINDY JNU
FR CHARITY ANCH

CONTUATION.....

WHEREAS, SCR 14 WOULD REPEAL AN ADMINISTRATIVE REGULATION OF THE DEPARTMENT OF COMMUNITY AND REGIONAL AFFAIRS THAT PRESENTLY REQUIRES NON-GOVERNMENTAL SPONSORS OF HOSPITAL CONSTRUCTION PROGRAMS TO APPLY THROUGH THEIR LOCAL GOVERNMENT; AND

WHEREAS, PASSAGE OF SCR 14 WOULD PROHIBIT THE STATE FROM ADMINISTERING REGULATIONS DESIGNED TO GIVE LOCAL COMMUNITIES MEANINGFUL SELF DETERMINATION IN THE ALLOCATION OF HEALTH CARE RESOURCES AND FACILITIES;

NOW, THEREFORE, BE IT RESOLVED THAT THE ANCHORAGE ASSEMBLY OPPOSES PASSAGE OF SCR 13 AND SCR 14 NOW BEFORE THE TENTH LEGISLATURE.

PASSED AND APPROVED BY THE ANCHORAGE ASSEMBLY THIS 26TH DAY OF APRIL, 1977

ERNIE BRANNON, CHAIRMAN

SCR

13

March 24, 1977

The Municipal Health Commission, at their regular meeting of March 23, 1977, emphatically endorses the DEFEAT of SCR 13, SCR 14 for the following reasons:

1. The removal of such regulations would create inconsistencies through out the entire reimbursement system, particularly with regard to Medicare, Medicaid and General Relief Medical Assistance.
2. The mandate of the people for cost-consciousness and cost-containment in the provision of health services would be directly violated if these resolutions were to be adopted.
3. Existing regulations clearly define allowable and non-allowable construction costs under Hill-Burton on the basis of their legitimate and direct relationship to facility construction costs. Adding to the list of allowable costs adds to the dollar amount that the taxpayer will pay TWICE: first in general taxes to support construction under revenue sharing, and secondly as a part of the amortized costs built into the daily bed rate thru depreciation (NOTE: the daily bed rate is paid a THIRD time under Medicare, Medicaid and General Relief Assistance by the taxpayers.)
4. Local determination of applicable beds and properly certified construction efforts is necessary if planning is to have any effect on cost containment.

Position paper to follow.

	FILE	

August 28, 1972

Office of the Commissioner
SEP 11 1972
RECEIVED

The Honorable Frederick McGinnis
Commissioner
Department of Health and Social
Services
Juneau, Alaska 99801

Dear Commissioner McGinnis:

You have asked our opinion of whether your present method of determining "total project costs" of eligible medical construction by relying on promulgations of the Department of Health, Education and Welfare pursuant to Title VI of the Public Health Services Act as amended, meets the requirements of AS 43.18.010(j). It is our opinion that the use of these promulgations is within the scope of your discretion in the administration of this program.

AS 43.18.010(j) states as follows:

> If construction of a facility began after January 1, 1968 and state matching aid for construction approved for payment to the local government or other facility sponsor constitutes less than 25 per cent of the total project cost, the state shall pay to the local goverment or other facility sponsor each fiscal year a sum equal to $2,500 a bed for the maximum number of beds provided for in the construction design of the facility. State aid provided for in this subsection shall continue until the local government or other facility sponsor has received an amount which, combined with state matching money for construction of the facility, equals 25 per cent of the total project cost. No funds received for construction shall be used for any other purpose. (Emphasis added)

RECEIVED
SEP 1 - 1972
Comprehensive Health Planning Office

As AS 43.18.010(j) is the state counterpart of Title VI of the Public Health Services Act, 42 USCA 201 et seq., it is appropriate that you may follow standards promulgated in interpretation of that Act. To read the term "total project costs"

as used in AS 43.18.010(j) literally would mean allowing all costs even if lavish, wasteful or illegal. Since clearly that could not have been what was intended when the legislature enacted this section, your department has the implied duty to allow only those costs which are in line with the statutory purpose of this section. In this case, since no statutory guidelines are set out, you have broad discretion to define the meaning of such terms in accordance with the statutory purpose. Naturally then, these rules of the Department of Health, Education and Welfare, interpreting 42 USCA 201 et seq., may be used to assist you in defining the meaning of these statutory terms. In this case, however even more evidence of the legislature's intention in passing AS 43.18.010(j) can be seen by looking at similar state grants for other purposes.

AS 43.18.100 granting aid for school construction goes into great detail to specifically provide for the meaning of "costs of school construction." AS 43.18.100(f)(2). Since no mention of these items is made in AS 43.18.010(j) it is reasonable to assume that they were not intended to be included in the computation of "total cost" under that section and this is the general effect of following the Federal regulations.

Similarly in AS 43.18.300 providing grants for the construction of Community Facilities, express allowance is made for the cost of "feasibility studies". This term is unnecessary if "cost of construction" were to be read literally. Again, since no similar language is included in AS 43.18.010(j) it can be assumed that these costs were also not to be included.

Finally, in AS 46.03.030(b) providing funds for the cost of water systems, it is provided that the amount received is computed on the basis of those costs "not borne by the federal government". In this case, the regulations you are relying on in effect specifies those costs which will not be borne by the federal government. If it were the legislature's intention in passing AS 43.18.010(j) to pick up those costs not borne by the federal government, it would have added a similar phrase to that in AS 46.03.030(b), particularly as these two sections were before the legislature during the same session and were passed within a few days of one another.

In conclusion, it is within the scope of your administrative discretion to utilize the guidelines promulgated by the Department of Health, Education and Welfare in defining the term "total project cost" of eligible medical facilities under the provisions of AS 43.18.010(j).

Very truly yours,

JOHN E. HAVELOCK
ATTORNEY GENERAL

Senate C&RA

RE: SCR 13, SCR 14
19AAC 30.020(9)(C)
19AAC 30.020(9)(D)
19AAC 30.140(3)

The concept to provide revenue sharing money to those constructing hospital facilities formally emanated in SB42, 1971. The following is a history of that bill and subsequent amendments to it.

SB 42 (See Attachment 1)
The Bill was originally intended to create a loan/grant fund to be established and administered in the Department of Health. It would create a revolving loan (5% interest) and grant funds to make payments to local governments, non profit corporations and non profit sponsors for the acquisition, construction, modernization, and other capital improvements of hospitals and related health facilities. A grant would be provided if it had been determined by the commissioner of health that a local government, non profit corporation, or non profit sponsor would have difficulty in paying back a loan.

CSSB 42 (See Attachment 2)
Local Government Committee dropped the original bill's suggestion of establishing a loan/grant fund to be administered by the Dept. of Health and transferred the issue of providing state assistance for hospital construction cost to Community and Regional Affairs. In their version of this bill, they adopted language that reflects section (j) which is currently at issue here.

At this stage, the provision dealing with revenue sharing for construction of hospitals was an "in addition" clause to section (h) which treats revenue sharing dollars for hospitals already in operation.

In this initial stage of the bill, only local governments were to be recipients of this revenue sharing money pertaining to construction cost assistance as indicated by the following:

AS 43.18.010(h) During each fiscal year the state shall pay to an organized borough or a city outside an organized borough, in which a health facility is operated.....

In addition, if construction of a facility was begun by a local government after January 1, 1968 and state matching aid for construction approved for payment to the local government constitutes less than 25 per cent of the total project cost, the state shall pay to the local government during each fiscal year a sum equal to $5,000 per bed for the maximum number of beds provided for in the construction design of the facility, until the local government has received from this aid an amount which, combined with state matching money for construction of the facility, equals 25 per cent of the total project cost. Sums received by a local government under this subsection shall be used for expenses of operation, maintenance or health services or facilities, as the local government determines.

As the language indicates, the key component thus far is local government. (Note that the next version of this bill (CSSB 42 HEW) which creates a section (j) which address the issue of revenue sharing for hospital construction, extends potential recipients of section (j) beyond local government to include "other sponsor facility". So we start moving away from the notion that this money is to be available only for local governments early in the makeup of this bill.

Attention should also be directed towards the term "total project cost". This phrase sustained itself through all the stages of revision and the word "total" was not substituted with any language that would suggest less than total project cost in computing the revenue sharing allowance to be provided. The only restraining language in this bill regarding construction cost states: "No funds received for construction shall be used for any other purpose."

CSSB 42 (HEW) 1971 (See Attachment 3)
HEW, recognizing that they were dealing with two separate issues, viz. hospitals in operation and hospitals under construction, amended this bill creating section (j) as a subsequent section to section (h). Section (h) continues to deal with providing revenue sharing money to an organized borough or a city outside an organized borough that has hospitals in operation. Then section (j) treats the issue of rendering revenue sharing money to offset cost relative to the construction of hospitals. The salient disparity between section (h) and section (j) (for our purposes) is that the committee did not rely on the same language that was used in sec (h) i.e. "during each fiscal year the state shall pay to an organized borough or a city outside an organized borough in which a health facility is operated"; or they did not limit the recipient of this money solely to a local government as was proposed in CSSB 42, but broadened the language in section (j) to state "If construction of a

facility began after Jan 1, 1968, and state matching aid for construction approved for payment to the local government or other facility sponsor ... of the total project cost ... the state shall pay to the local government or other facility sponsor ... State aid provided for in this subsection shall continue until the local government or other facility sponsor has received an amount which ... equals 25% of the total project cost.

It would appear that if the committee wanted the petitioner for construction money to be limited to an organized borough or a city outside an organized borough, they would have adopted this language and made it applicable to sec (j) as well as sec (h). However, the committee did not limit sec (j) (dealing with hospital construction) to these recipients but broadened it to include "local government or other facility sponsor." It was this language that remained through the life of the bill and became law.

Also section (j) retains the language "total project cost" and does not qualify this term by inserting any limitations on what "total project cost" entails. The only restrictive language in this section is "no funds received for construction shall be used for any other purpose".

The remainder of this bill amends section (i) (defining a health facility) to include sections(h) and (j) indicating that this meant a hospital (or facility) owned or operated or both by a local government or by a nonprofit corporation or other nonprofit sponsor.

CSSB 42 (Finance) (See Attachment 4)
Finance drops section (h) from this bill and just concentrates on section (j). The salient feature in this version of the bill is that the Senate Finance Committee approved the language that expanded those permitted to reap the benefits of the bill beyond local government to include other facility sponsor. (Remember in the first CSSB 42 only local governments were included to receive assistance with hospital construction cost, then in HEW's version, they included "other facility sponsor" in contrast to "an organized borough or a city outside an organized borough "that was used in sec (h). The Senate Finance Committee retained "other facility sponsor".)

In addition, the "total project cost" term is still retained in the bill. This has existed throughout the tenure of this bill and has not been diluted or pared at all.

The Senate Finance Committee dropped sec (i) dealing with the definition of a hospital facility but it is picked up again in HCS CSSB 42 discussed below:

HCS CSSB 42 (See Attachment 5)
No change was adopted in this revision that applies to "other facility sponsor" or "total project cost".

In the House HEW and Local Government Committees deliberations, sec (2) is brought back into this bill as sec (i) to include both secs (h) and (j).

CSSB 42 (Finance) amH (CH 127 SLA 1971)
This final version of the bill does not change the language referring to "other facility sponsor" or "total project costs" and is enclosed herewith as Attachment 6.

Subsequent amendments were made to this section, however, subsection (j) was untouched.

Nevertheless, section (h) and (i) became subjects of revision, and pertinent modifications in subsequent years regarding section (j) are listed below:

HCSSB 383 am H (Ch 71, SLA 72) (See Attachment 7)
Inserted the following language into sec (i) which became law: "(1) In (h) and (j) of this section "health facility" or "facility" includes hospitals ... which are licensed, when required by the state under AS 18.20.010 - 18.20.130 (Department of Health and Social Services dealing with hospital regulations) and are owned or operated or both by a local government or by a nonprofit corporation or other non profit sponsor; the term excludes facilities operated or wholly supported by the state or the federal government, and excludes nonprofit facilities leased from private profit-making groups or corporations". This became law in 1972 but was extracted in 1973 by CSHB 42 (Finance) am S discussed next:

HB 42 (Introduced 1973), (Attachment 8, p.2, line 14)
A bill designed to repeal and re-enact sec (h) and (i) of AS 43.18.010. In its original form, the bill omitted the language that became law in 1972 viz. "and excludes non-profit facilities leased from private profit-making groups or corporations". However, in the Local Government Committee's version of CSHB 42, (see Attachment 9, p.2, line 11), reinserts the above mentioned language. Subsequently, in CSHB 42 (HESS) affixed as Attachment 10, on p.2., line 13, they revised this section to read:

(B) excludes nonprofit facilities leased from private profit-making groups or corporations only as to use of shared revenue for capital improvements under (j) of this section, but not as to use of shared revenue for operating expenses under (h) of this section;

The Finance Committee (CSHB 42-Finance), (affixed as Attachment 11, p.2, line 8) in their version eliminated the above mentioned language and other language regarding "excludes nonprofit facilities leased from private, profit-making groups or corporations."

The bill was in this form, deleting the above language, when it passed the Senate as CSHB 42 (Finance) am S,(affixed hereto as Attachment 12, p.2, line 11) and became law, Ch 87, SLA 73.

Other provisions of Ch 87, SLA 73 of significance:

AS 43.18 is amended by adding new sections to read:

Sec. 43.18.040 REGULATIONS. The Department of Community and Regional Affairs shall adopt regulations necessary to carry out the purposes of this chapter.

Sec. 43.18.050 SPECIFIC EXPENDITURES. A municipality shall expend funds received for the operation and maintenance of hospitals and health facilities and services.

Subsequent changes to this bill are listed below. However none of the revisions pertain to AS 43.18.010(j).

Ch 127, SLA 1974 (Attachment 13)
Sec 44. AS 43.18.010(h)(4) is amended to read:

(4) funds received by a local government under (1), (2) or (3) of this subsection shall be used for expenses of operation maintenance, or health services or facilities, as the local government or hospital outside a municipality determines;

*Sec. 45. AS 43.18.040 is amended to read:

Sec. 43.18.040 REGULATIONS. The Department of Community and Regional Affairs shall adopt regulations necessary to carry out the purposes of secs. 10 - 99 of this chapter.

*Sec. 46 AS 43.18.050 SPECIFIC EXPENDITURES. A municipality shall expend funds received for the operation and maintenance of hospitals and health facilities and services under secs. 10 - 99 of this chapter only for those specific facilities and services.

Ch 265 SLA 1976 (See Attachment 14)
*Sec. 2 AS 43.18.010(h)(1), (2) and (4) are repealed and reenacted to read:

(1) $2 per capita to a municipality which has the power to provide health facilities and services and in which a hospital is located;

(2) in addition to the payment made under (1) of this subsection

(A) The state shall make payments to a municipality which has the power to provide hospital facilities and services and which exercises the power on the basis of $1,000 per bed for each bed actually used for patient care limited to the number of beds provided for in the construction design of the hospital, or $75,000 for those hospitals with 10 or more beds, or $25,000 a hospital for those hospitals with less than 10 beds, as the municipality may elect; funds received under this subparagraph may be used only for hospitals and shall be apportioned among qualifying hospitals as the muncipality determines;

(B) the state shall make payments on the basis set out in (A) of this paragraph to a municipality for non profit hospitals not operated by a municipality if the municipality first certifies to the department that the hospital is in compliance with all standards for hospitals which have been adopted by the municipality; in the absence of this certification the funds which would have gone to the hospital lapse into the state general fund; payments to the municipality shall be transferred to the hospital in accor with the basis by which the entitlement was generated by the hospital and shall be applied to the annual cost of operation and maintenance of the hospital or for the provision of health care service at the hospital as the directors of the hospital determine;

(C) a hospital may not receive payment under both (A) and (B) of this paragraph;

(4) funds received by a municipality under (1) or (3) of this subsection shall be used for expenses of health services or operation and maintenance of facilities as the municipality determines;

*Sec. 3 AS 43.18.050 is repealed

*Sec 4 This act takes effect July 1, 1976.

The Honorable Joseph Orsini
Senator, Alaska State Senate
Pouch V
Juneau, AK 99811

Dear Senator Orsini:

You have in your possession Senate Concurrent Resolutions 13 and 14 which void sections of certain regulations promulgated last year by the Department of Community and Regional Affairs.

For your information, Mr. Jack Chenoweth of Legislative Affairs has reviewed these resolutions as well as regulations and I think would be a substantial witness when the committee takes up these resolutions.

Also, and perhaps equally as important a witness, Mike Bradner of Fairbanks advised me that he was the prime sponsor of this original hospital grant revenue sharing program back in 1969, and the intent of the law is as the law states: "Total project costs". He volunteered to be a witness and recommended that the financial records of revenue sharing by the Fairbanks Community Hospital be procured to demonstrate that, in fact, everything from the kitchen sink to the grass in the front yard was included in the total project costs, and that was the intent of the law.

As you know, my position with the State has been that I want the same treatment for my hospital that the other hospital sponsors received for their hospitals -- nothing more, nothing less.

Also, Mr. Chenoweth suggests that perhaps the definition of "cost of school

construction" might be a reasonable substitute for the definition of "cost of hospital construction". He refers to Alaska Statute 43.18.100(g)(2) for a definition.

Sincerely,

Dr. Mike Beirne

Honorable Joseph Orsini, Senator
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

Representative Beirne has asked us to provide you with an analysis of the legality of Senate concurrent resolutions Nos. 13 and 14 which have been introduced in the legislature of the State of Alaska. In our opinion, it would be both legal and proper for the legislature of the State of Alaska to annul administrative regulation 19 AAC 30.020(9)(C) and (D). 19 AAC 30.020(9)(C) is intended to import the criteria used in the administration of the federal Hilburton Construction Program into A.S. 43.18.010(j).

A.S. 43.18.010(j) provides:

> "If construction of the facility began after January 1, 1968 and state matching aid for construction approved for payment to the local government or other facility sponsor constitutes less than 25% of the total project cost, the state shall pay to the local government or other facility sponsor each fiscal year a sum equal to $2,500 a bed for the maximum number of beds provided for in the construction design of the facility. State aid provided for in this subsection shall continue till the local government or other facility sponsor has received an amount which combined with the state matching money for construction of the facility equals 25% of the total project cost. No funds received for construction shall be used for any other purpose."

The Lake Otis Clinic, a non profit corporation, applied for funds under the provisions of this section. Its appli-

cation was approved after January 1, 1968. Some of the funds which are required to be transmitted to the Lake Otis Clinic pursuant to the provisions of this section were transmitted to the clinic. The majority of the funds have not yet been transmitted to the clinic. In addition, the creators of the Lake Otis Clinic have in reliance upon the provisions of this statute and the approval of their application for funds expended considerable amounts of their own funds in an effort to acquire and pay the financing costs for the property necessary to complete the proposed medical facility. The Department of Community and Regional Affairs has, after the fact, promulgated regulations which prohibit the state from expending money under this section for site acquisition costs. The exclusion of site acquisition costs is explicitly noted in the regulation 19 AAC 30.020(9)(C) as being based on a similar requirement of the federal Hilburton Construction Program. A brief review of the federal statutes in question shows that it would be totally inappropriate to take these federal criteria and apply them to the state statute.

The federal criteria are set out in the definition of the tern "construction" in 42 U.S.C. 291(o)(i). In this section the term "construction" is defined to specifically exclude the cost of the acquisition of land. Alaska law is quite different, however. A.S. 43.18.010(j) refers not to construction costs, but to "total project cost". The tern "total project cost" is not defined further in the statute nor does the Department of Community and Regional Affairs make any attempt to define it in the regulations. Nevertheless, a review of the way in which the term "construction cost" has been used in related sections of the statute is instructive. A.S. 43.18.100 and A.S. 43.18.460 provide for reimbursement to municipalities within the state of Alaska for school construction costs and sports facilities construction costs. In both cases statutory definitions are provided for the term "cost of construction". In both cases, this term is defined specifically to include the cost of site acquisition. Even though the term "total project cost" in A.S. 43.18.010(j) is not defined, it would be very strange if these words which appear a few short pages from the other terms previously defined could be read to embody a legislative intent to narrow the broad definition of construction costs used in the other sections.

In 19 AAC 30.020(9)(D) the Department has attempted to limit the eligibility of the "other facility sponsors" to those situations in which the facility lies outside the boundaries of a municipality. The statute is equally bare of any basis for this interpretation.

A.S. 43.18.010(j) uses the clause "local government or other facility sponsor" three times to refer to the eligible recipient of the funds. The use of the word "or" indicates that both local governments and "other facility sponsors" would be proper recipients of the funds. The statute does not define "other facility sponsors" further or mention any special condition which other facility sponsors have to meet. It certainly does not contain any words which even imply that an "other facility sponsor" within the boundaries of a municipality would not be eligible for aid under this section. In this regard it is significant that sections A.S. 43.18.010(i)(1) and (2) which define the terms "hospital" and "health facility" also make absolutely no mention of the distinction which the Department has imported into its regulations. As the Attorney General's office noted in a legal opinion issued on December 20, 1974, one of the problems contained in the statute was the fact that "it fails to distinguish between the governmental sponsors and the non-governmental sponsors". The opinion was ended with the suggestion that the Department seek legislative amendment. The Department has failed to do so and instead has attempted to amend the statute through the regulations process.

The purpose of permitting administrative agencies to adopt regulations is quite simple. The legislature recognizes that it cannot deal explicitly in every statute with every problem that may occur some time in the future and that it is necessary to explain the general provisions of legislative enactments, to provide procedures for implementing those enactments, and to make more specific the sometimes general language included in the statutes. This statute certainly cannot be broadened to allow the regulation making process to be used for the purpose of changing the scope or intent of a statute to accord with the desires of the executive branch of the government. The administrative regulation in question goes beyond the scope allowed to regulations and represents an attempt to amend a clear requirement of the statute. If the Department of Community

and Regional Affairs believes it desirable to remove the term "total project cost" from A.S. 43.18.010(j), or differentiate between government and non-government sponsors, it should follow the suggestion of the Attorney General's office and request the legislature to amend the statute to eliminate this provision and include the definition of cost used in the federal act. It cannot proceed to do this through the regulations process on its own.

The propriety of the legislature's acting to annul administration regulations which are not in compliance with the intent of the legislature cannot be doubted at this state. As Congressman Elliot Levitas of Georgia noted in remarks to the section of administrative law of the American Bar Association during their 1976 Bicentennial Institute on the Oversight in Review of Agency Decision-Making, "We have identified in my office approximately one hundred thirty different acts of the congress, almost two hundred separate provisions of this type which have been cast heretofore mandating or authorizing some type of congressional review of contemplated or pending executive actions." The Congressman also noted that provisions requiring or permitting the legislative review of administrative regulations are found in the laws of the states of Connecticut, Nebraska, Alaska, Kansas, Virginia, Michigan, and Oregon, as well as such foreign nations as Great Britain, Australia, and New Zealand. Speaking in regard to proposed legislation providing for congressional review of certain administrative regulations, he said, "It seems to me that the basic proposition is the one I started off with. Who has the ultimate responsibility for the laws of this nation, whether they are acts of congress or laws which masquerade as administrative rules. I think the answer under our Constitution is it is the elected congress of the United States." Here, it is the elected representatives of the State of Alaska who have the responsibility to annul regulations which do not conform to the requirements of the statutes on which they are based. As Justice White noted in the case of Buckley vs. Valeo, 424 U.S. 1, "In the light of history and modern reality, the provision of congressional disapproval of agency regulation does not appear to transgress the constitutional design ... "

We would conclude in line with this that it would be both legal and proper to annul 19 AAC 30.020(9)(C) and (D). This regulation is by its own terms contrary to the specific provisions included in the statute upon which it is based.

It is, therefore, invalid and should be annuled by the legislature. Finally, we would like to note that the terms of the statute seem mandatory in requiring that the full amount of the entitlement be paid to the Lake Otis Clinic. This seems not only clear but equitable considering the fact that the sponsors of the project, whether governmental or non-governmental, put up a substantial amount of the financing. Certainly, hospitals would never be built if the sponsors had to operate subject to the possibility that shifts in administration policies subsequent to the commencement of a project could endanger a portion of the financing needed for completing the project. The Lake Otis Clinic project was scrutinized by the administration at the time of its initiation. Substantial amounts of money and effort have been expended in reliance upon the state's obligation to fulfill the terms set out in the statute. The administration should certainly not be able to back out of the project at this late date.

Very truly yours,

MILES S. SCHLOSBERG, INC.

JAY S. HAMMOND, GOVERNOR

DEPT. OF HEALTH AND SOCIAL SERVICES

OFFICE OF THE COMMISSIONER / POUCH H-01 – JUNEAU 99811

March 17, 1977

Document# Senate CRA #1

The Honorable Joseph L. Orsini
Chairman, Community & Regional
Affairs Committee
Pouch V
Assembly Building - Room 101
Juneau, Alaska 99811

Dear Senator Orsini:

I am writing this letter to clarify for the Community and Regional Affairs Committee the Department of Health and Social Services involvement in hospital and health facilities construction.

The Office of Planning and Research, within the Department, is responsible for administering Alaska Statutes, Sec. 18.20.080. This statute (attachment #1) is implemented through 7AAC 12.020 Regulations for Hospital Construction and Equipment (attachment #2). These regulations contain the same requirements as for Federal Hill-Burton construction. These regulations are updated as Hill-Burton requirements change. A current revision to conform to new Hill-Burton requirements is presently in the Attorney General's office. Thus, all hospitals built in the State of Alaska must meet Hill-Burton standards.

The Office of Planning and Research also administers Chapter 25, Assistance to Hospitals and Health Facilities (attachment #3) Hospitals, in most instances, are built utilizing local, state, and federal funds. The same criteria of allowable and non-allowable costs are applied to state funds as are applied to federal funds in hospital construction. Hence, state funds would not be expended for such items as site acquisition (except for public health centers), interest costs, off-site improvements, etc.

I hope the above information is helpful.

Sincerely,

Lois M. Judd

Lois M. Judd
Acting Commissioner

Re: Senate Concurrent Resolutions 13 and 14

Dear Senator Orsini:

The purpose of this brief letter is to clarify some issues raised at the committee meeting on Tuesday, March 15. There was much discussion regarding related matters, but the question before the committee only concerns the legality of the regulations. I believe it is obvious that the regulations do change the law. If the Department wishes to change the intent of the law, it should come to the Legislature for that.

1. The Department of Community and Regional Affairs expressed confusion as to whether or not the 1975 application for grant funds was made through the Municipality or directly to the Department. This was the application that resulted in the payment of grant funds in the amount of $312,000.00.

CLARIFICATION:

A. This application was made directly to the Department under the law and the funds were paid by the Department directly to the Hospital Corporation.

B. At that time, the Borough Mayor was Jack Roderick, and he advised me in his office that if the Department sent the grant funds through the Borough,

that he would not cooperate, and that he would not transfer the funds to the Hospital. Therefore, the application was made directly.

C. This is a good example of local political interference with the orderly process of law, and is precisely why the legislature, in its wisdom, gave the local health facility the right to apply directly. Borough Mayor Jack Roderick acted improperly and contrary to the law.

D. The Department researched the project at that time and determined that by law the Hospital Corporation was indeed entitled to apply and receive grant funds directly from the State. Therefore, their new regulation attempts to frustrate the intent of the law.

2. Mr. McCarter, Departmental Division Director of Revenue Sharing, volunteered the information that there were no funds now being held for the hospital.

There is a letter of encumbrance in the Department files showing that in December of 1976, $200,000 was encumbered by the Department pending review of the question. To the best of my knowledge, these funds are still encumbered. They rightfully belong to the Hospital Corporation.

3. Mr. McCarter also noted that the audit showed no checks for some expenses claimed. That is only a nasty half-truth and I resent it.

Some expenses claimed include telephone, rent, secretarial services, etc., all routine and ordinary expenses which were paid out of other accounts since the Hospital had very limited funds of its own.

But all the major expenses, much more than sufficient to satisfy the matching fund requirements, were paid from the Hospital checking account, and they were double signature checks with one signature being that of an officer of the California company which was assisting us on the project at that time.

Further, the books and records of the corporation are perfectly clean and clear. The accountants from Peat, Marwick, Mitchell & Co. have always been the accountants and auditors of record for the hospital corporation, since inception, and I am sure under oath would testify to the records.

4. The Department expressed lack of knowledge as regards the Fairbanks and Soldotna hospital projects and their cost accounting records. This is ridiculous.

The administrator of the Soldotna hospital, at the time of receipt of State grant funds in 1972, told me personally of that project history and application. All costs were included and were accepted by the Department. No questions

were asked. The Department knows this, but it is just being coy. If they don't, or won't, produce the records, I think it speaks for itself.

5. Testimony clearly showed, I believe, that the regulations were developed by the Department solely to apply to this hospital project. I believe that they are not only unfair and improper but that they are illegal as well. The Department's efforts to make these regulations apply two years retroactively are further evidence of the personalized character of the attack against me.

Prompt action on the part of the committee would indeed be appreciated.

Very truly yours,

Dr. Mike Beirne
State Representative

Dept. of Health & Social Services

SUBJECT: Construction Revenue Sharing

Construction funds authorized by AS43.18.010(j) were disbursed to the Fairbanks Memorial Hospital and the Central Peninsula Hospital at Soldotna in accordance with the Hill-Burton construction program allowable and non-allowable cost regulations. Use of the Hill-Burton regulations was authorized by the Attorney General in his opinion of August 29, 1972.

LWS:sy

STATE of ALASKA

MEMORANDUM

TO: Palmer McCarter, Director
Division of Local Government Assistance
Department of Community & Regional Affairs

DATE : April 8, 1977

FROM: Richard A. Smith RA
State Internal Auditor
Department of Administration

SUBJECT: Comments to Senator Joseph Orsini, Chairman Senate Community & Regional Affairs Committee. Dated March 21, 1977, From Representative M. F. "Mike" Beirne

(Point 3, Paragraph 1)

"Mr. McCarter also noted that the audit showed no checks for some expenses claimed. That is only a nasty half-truth and I resent it."

Reply

Mr. McCarter's statement is completely factual. In numerous instances, as indicated in our report of 7/26/76, the documentation to support reported expenditures was non-existent. This includes checks, invoices or other supportive evidence.

(Point 3, Paragraph 2)

"Some expenses claimed include telephone, rent, secretarial services, etc., all routine and ordinary expense which were paid out of other accounts since the hospital had very limited funds of its own."

Reply

These costs were excluded due to the lack of supporting documentation. Costs were reportedly paid by companies controlled by M. F. Beirne. However, the financial records of LOC did not reflect these expenditures nor did they recognize a liability to the companies which reportedly paid these expenditures on LOC's behalf.

As An Example:

The total support for telephone expenses consisted of one invoice, for one months time, paid by Raypath, Inc.. There was no break down of the billing which would indicate that part of the bill related to the construction of the Lake Otis Hospital..

(Point 3, Paragraph 3)

"But all major expenses, much more than sufficient to satisfy the matching fund requirements, were paid from the hospital checking account, and they were double signature checks with one signature being that of an officer of the California company which was assisting us on the project at that time."

Reply

We examined all checks written from the hospital checking account presented to us by representatives of LOC. The total being $930,215.49 of which $861,843.87 reasonably appeared to be related to the construction of the hospital. Eligible construction costs are to be reimbursed at a rate of 25%. That amount determined by us as allowable for reimbursement was $215,460.97. LOC has received $312,500 making an over-payment to LOC of $97,039.03. However, our examination of 2/14/77 recommends that LOC pay back the entire $312,500.

(Point 4, Paragraph 4)

"Further, the books and records of the corporation are perfectly clean and clear. The accountants from Peat, Marwick, Mitchell & Co. have always been the accountants and auditors of record for the hospital corporation since inception, and I am sure under oath would testify to the records."

Reply

Supported by review of reports and direct discussion with staff of Peat, Marwick, Mitchell & Co., that firm has not performed any services for Lake Otis Clinic, Inc. since December 31, 1974 when they released an unaudited financial report for Lake Otis Clinic, Inc.

The accountant for LOC is Don Taylor, a private CPA who has worked with our Department on this examination for some time and as recently as March, 1977 telephoned and informed us that he is still trying to assemble LOC's records.

Taylor's address is:

Don Taylor
Room 104, Suite 201
3201 C Street
Anchorage, AK 99502

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

DIVISION OF LOCAL GOVERNMENT ASSISTANCE

POUCH B – JUNEAU 99811

April 11, 1977

The Honorable Joseph Orsini
Chairman
Senate Community and Regional
Affairs Committee
Assembly Building, Room 101
Juneau, Alaska 99801

Dear Senator Orsini:

RE: Senate Concurrent Resolutions 13 and 14

Although the Senate Community and Regional Affairs Committee has already taken action on the subject resolutions, I feel it necessary to respond to a letter dated March 21, 1977, from Dr. Michael Beirne, concerning the Lake Otis Clinic application and its relationship to the subject resolutions.

Prior to discussion on the statements made in Dr. Beirne's letter, I will apologize in advance for not being more fully prepared to answer the specific questions raised by Senator Bill Sumner and other committee members regarding the LOC project. It was my understanding that the committee was to discuss the resolutions before it and I hope that I did adequately testify to the satisfaction of committee members regarding the historical background and the current application of the hospital construction regulations which are proposed to be anulled by the two resolutions.

Since Dr. Beirne did, in his March 21 letter, attempt to "clarify" several points brought out in testimony before the committee and at one point accused me personally of having stated "nasty half-truths", I feel it incumbent upon me to respond to certain parts of that letter.

Since his point number one primarily deals with former Borough Mayor Jack Roderick and the position that the Greater Anchorage Area Borough took with respect to the LOC application, I will not attempt to provide other statements concerning the issue.

Regarding his second clarification, I did indicate that there were no funds being held for Lake Otis Hospital. Dr. Byrne is correct that an amount of $200,000 was encumbered , and is currently encumbered; however, this amount was encumbered only if

the internal audit of the State should indicate that the State owed additional funds to Lake Otis Clinic. As you are aware, the results of that audit by the State Internal Auditor indicated that not only were no additional funds due to LOC but, in fact, the report recommended that the State attempt to retrieve funds formerly paid to the Lake Otis Clinic project. Certainly we take the position that the $200,000 does not "rightfully belong to the Hospital Corporation".

Rather than respond directly to the concerns raised in Dr. Beirne's point number three, I have attached a letter from the State Internal Auditor which more adequately responds than I could ever hope to. I would hope that when and if the subject resolution should come before the Senate Finance Committee that the committee accept Dr. Beirne's suggestion that Peat, Marwick, Mitchell and Company be called upon to testify, under oath, as to the records of LOC.

With respect to the concerns raised in item number four of Dr. Beirne's memo, I again refer you to the attached statement from Lowell Swartz of the Department of Health and Social Services who, since the inception of the Municipal Revenue Sharing Program, has been the person who has reviewed all applications for construction aid under the program. I feel his statements, although brief, answer to the contradiction of Dr. Beirne's statements, as to what actually took place with respect to the Fairbanks and Soldotna hospital projects.

Finally, the regulations which are currently being considered by SCR 13 and 14 were the result of a mandate from the Legislature last year for the Department to adopt "minimum standards" concerning all aspects of the Municipal Revenue Sharing. The regulations do just that and as earlier stated in testimony, with the exception of Dr. Michael Beirne, were not the subject of criticism by any other hospital or municipality.

Sincerely,

LEE McANERNEY
COMMISSIONER

Beirne says he won't return funds to state

By PAUL NUSSBAUM
Our Juneau Bureau Chief

JUNEAU — Rep. Mike Beirne, R-Anchorage, will not return $312,000 in state revenue sharing funds, he said Wednesday. He was given the funds for a hospital he plans to build, but state auditors say the clinic may never be completed.

Legislative leaders said Wednesday they are concerned about a possible conflict of interest as a result of two resolutions introduced in the Senate which would remove legal barriers that are blocking Beirne's efforts to collect more state revenue sharing money for the Lake Otis Clinic. The resolutions were introduced in the Senate at Beirne's request.

THE STATE'S internal auditor Wednesday formally recommended that the state recover all $312,000 given Beirne "and that no subsequent payments be made until such time as LOC (Lake Otis Clinic Inc.) provides an accurate accounting of construction costs, obtains permanent financing and has title to the land for the hospital site dedicated irrevocably to a public purpose."

None of those conditions are met now, auditors say.

Beirne was asked last year to return about $97,000 of the $312,000 he was given in 1975 for hospital construction. The Anchorage pathologist is battling to retain that money.

"I'M NOT GOING to consider giving any of those funds back," Beirne said of the revenue sharing money Wednesday. "The Hammond administration is picking on small businesses in Alaska, and this is just another example."

Two resolutions introduced in the Senate at Beirne's request through the Administrative Regulations Review Committee would allow Beirne — or any other hospital

persuade federal officials to approve an all-Alaska natural gas line.

THE OMAR delegation came to Juneau to try to convince the legislators to speed their review of both houses. Gruening has expressed reservations about the weight the state action may carry with the Federal Power Commission or the Congress.

•Beirne won't repay

(Continued from Page 1)

costs involved in hospital construction. Under current regulations, only allowable costs are subject to state revenue sharing grants.

If Beirne collected 25 per cent of the projected $10 million cost of the 125-bed hospital, he would collect $2.5 million from the state.

THE AUDIT released Wednesday by the internal auditor says the state "may find that its revenue sharing money has gone to pay a past debt and no hospital will ever be fully constructed and in use by the people of Alaska. There must be good faith on the part of (Beirne) to fulfill his stated goals. (Beirne) in this case has voluntarily jeopardized the interest of the state . . ."

Lake Otis Clinic, at the intersection of Lake Otis Drive and 42nd Avenue, was started in 1973, but only foundation work has been completed so far. Beirne says construction will resume this spring and that the clinic will take about 18 months to complete.

The state attorney general's office says it has reached no decision on whether it should examine possible conflict of interest involved in the resolutions introduced at Beirne's request.

HOUSE Speaker Hugh Malone said that "probably the best course" would be to hold hearings with Beirne, the Dept. of Law and the Dept. of Community and Regional Affairs. But the House will take no action, as the bills were not introduced on that side.

The resolutions were referred first to the Senate Community and Regional Affairs Committee, chaired by Sen. Joe Orsini, R-Anchorage. Orsini said Wednesday he is "trying to get information about the resolutions," but has not scheduled any action on the resolutions in the near future.

"I'm not all that concerned with his individual case," Orsini said. "If they are bad regulations, they ought to be repealed, regardless of who is hurt or benefitted. I don't even plan to look at his individual situation unless maybe as an example of how the laws are unjust."

THE DEPT. of Law will sue if necessary to collect the $312,000 Asst. Atty. Gen. Rodger Pegues said Wednesday. But Beirne is immune from a suit until the legislative session is over.

Beirne says the efforts to block more revenue sharing money for the Lake Otis Clinic are spawned by the Hammond administration and the two hospitals already operating in Anchorage, Providence Hospital and Alaska Hospital and Medical Center.

"Those hospitals make millions of dollars a year . . . they know they'd lose several million a year if we open, and that would come right off the top — that would be part of their profits.

"The state has never audited those hospitals — they're just picking on the little guy."

Beirne said he asked Sen. Jalmar Kerttula, D-Palmer, to introduce the resolutions in the Senate rather than introducing them himself in the House because "I didn't want to put pressure on my fellow members . . . I got it as far away from myself as possible."

AG Aware Of Beirne

By The Associated Press

Atty. Gen. Avrum Gross said Tuesday that a conflict of interest allegation against state Rep. Mike Beirne, R-Anchorage, has been "brought to our attention," but no decisions has been made on whether to conduct an investigation.

"There has been an allegation of conflict of interest," Gross said. "I don't know what we're going to do. We've made no decision of what, if any, action we plan to take."

Gross made the statement in the wake of a disclosure by the Anchorage Daily News that doctor-lawmaker Beirne is pushing legislative proposals which could earn him as much as $2.5 million in taxpayers' money.

Alaska's conflict of interest law provides that "no public official may use his official position or office for the primary purpose of obtaining financial gain for himself, or his spouse, child, mother, or father, or business with which he is associated or owns stock."

At issue are two Senate resolutions introduced at Beirne's request to change Department of Community and Regional Affairs' regulations which are thwarting Beirne's efforts to collect state revenue sharing money for a $10 million, 125-bed hospital he is trying to build in Anchorage.

One resolution would allow Beirne to collect state revenue sharing funds for 25 per cent of total costs of the project as opposed to the currently-allowable reimbursement for "allowable costs."

Based on Beirne's estimate that the hospital will cost $10 million, a 25 per cent state grant would earn him $2.5 million.

Another resolution would eliminate existing requirements that applicants for state revenue sharing money submit applictions through a local municipality.

Beirne already has collected $312,000 for the project from the state, but the payment was made under protest of then-mayor of the Greater Anchorage Area Borough, Jack Roderick, who said delays in the start of construction on the hospital "has given us cause for conern about the appropriateness of revenue sharing funds for this purpose."

Beirne said he was pushing for the legislation because the Department of Community and Regional Affairs "is violating the intent of the law" which established revenue sharing by limiting costs which are eligible in calculating the awards.

Beirne acknowledged that conflict of interest questions "did bother me at first." But he added that "my speciality is health...I was very familiar with the law and spotted the inconsistencies immediately."

"I don't have anyy reservations about it..," he said. "It was my duty to respond."

In a dispatch from its capitol bureau, the Daily News also reported that a soon-to-be-released state audit on the hospital project will recommend that Beirne be forced to pay back the entire $312,000 he received on 1975.

According to auditors, the newspaper said, Beirne no longer even holds title to the land on which he hopes to build the Lake Otis Clinic.

The audit also charges that Beirne did not act in good faith in charing unreasonable costs to the project, the Daily News said.

Based on another audit conducted last year, state officials disallowed $2.3 million of the $3 million in costs claimed by Beirne in his revenue sharing calculations, and ordered him to repay $97,000 of the $312,000 total.

Beirne said he has contested the repayment order and will sue the state if it tires to take back the entire $312,000.

In the forthcoming audit, the Daily News said, auditors claim that the title to land for the hospital site is held by General Health Services of Culver City,

Charges

Calif., a profit-making company which owns a string of clinics.

Beirne, however, disputed the claim. He said General Health Services holds a lien against the property, but he still holds the title.

But state officials, the Daily News added, say they are concerned that the involvement of General Health Services could be in violation of requirements that revenue sharing money be used in the public interest.

Beirne originally borrowed about $1 million from People's Bank and Trust in Anchorage for the hospital project. However, time delays and climbing interest charges increased his debt to more than $1.5 million, and Beirne was forced to borrow $150,000 from the National Bank of Alaska last November to stave off default.

The loan was made one day before Beirne was re-elected to the seat to which he originally was appointed by Gov Hammond

SCR 13

Memo Says Beirne 'Covered'

JUNEAU (AP) — A state lawmaker cannot be prosecuted under Alaska's conflict of interest law for sponsoring self-serving legislation, the attorney general's office says.

In a memorandum released yesterday, Attorney General Avrum Gross said the Alaska Constitution insulates lawmakers from prosecution in connection with legislative actions despite provisions of the state's conflict of interest law.

The decision ruled out any prospect for charges being brought against Rep. Mike Beirne, R-Anchorage, in connection with two resolutions he is sponsoring to repeal regulations which are causing him financial problems.

But in concluding that Beirne couldn't be prosecuted, the attorney general's office emphasized it wasn't ruling on whether Beirne was involved in a conflict of interest and threw the simmering issue into the lap of the House leadership.

"If the legislature itself were to determine that a member was involved in improper conduct of any nature, it is free to take such action as it deems proper, including the possibility of censure," the memo said.

The 11-page memorandum was prepared by Assistant Attorney General Pat Gullufsen at the request of Dan Hickey, chief of the Department of Law's criminal division.

Hickey said he wanted an "assessment of the actions of Representative M. F. Beirne in sponsoring Senate Concurrent Resolutions 13 and 14 as they relate to possible criminal prosecution under" the state's conflict of interest law.

The resolutions in question would repeal Department of Community and Regional Affairs (CRA) regulations under which the state has challenged $312,000 in revenue sharing paid to Beirne for a financially troubled project, the Lake Otis Clinic, he is trying to build in Anchorage.

The memorandum said it was clear that the resolutions both originated with Beirne and would benefit him directly.

It said Berne has "publicly acknowledged that the resolutions are his," and concluded that they "would go a long way, if not all the way, towards resolving the dispute between CRA and Lake Otis Clinic — Beirne in favor of Beirne — and as a consequence entitle Lake Otis Clinic to just about all it wants..."

But in researching the case, Gullufsen wrote that the state conflict of interest law, which would appear to prohibit such acts, was in conflict with the state Constitution.

The conflict of interest law provides that "no public official may use his official position or office for the primary purpose of obtaining financial gain for himself...or business whith which he is associated or owns stock."

But the memorandum added that "the statute, if applied to acts by legislators including the introduction of bills or resolutions, creates immediate and difficult problems of proof."

"The key phrase in the act is 'primary purpose,'" the memorandum said, noting many lawmakers rightly introduce legislation in connection with their own fields of business.

The memorandum said it is assumed that the term primary purpose was used in the act in "an effort to distinguish the slutation where the real purpose of a legislator is purely to benefit himself as opposed to the situation where he will only incidentally benefit from an official action."

Concluding that the issue boiled down to the-always-difficult-to-prove question of motive, the memorandum said application of the conflict of interest law to the sponsorship of legislation would create "a vast grey area in which legislators are going to be afraid to tread."

"The result will be that, whether prosecution is intiated or not, legislators will be very loath to get involved in areas which may affect them, which is going to mean that out of fear of prosecution the public may lose the benefit of those most knowledgeable in particular legislative fields," the memorandum said.

Probably because of such fears, the memorandum added, the constitution was drafted to include language that "legislators may not be held to answer before any other tribunal for any statement made in the exercise of their duties while the legislature is in session..."

The memorandum acknowledged that "arguably, a resolution (like Beirne is sponsoring) would not be a protected statement," and also conceded that the state Supreme Court never has not ruled on the question.

However, the memorandum said a similarly worded provision in the U.S. Constitution has been interpreted by the courts to mean that "Beirne would be immune from questioning, indictment or prosecution under the circumstances of this case."

"This is not an easy question," the memorandum concluded "There are two competing public policies at work, the first avoiding conflicts by legislators and the second insuring that legislators feel free to act in what they believe to be the public interest, free of the fear of criminal prosecutions for their actions.

"We believe the Alaska Constitution has clearly struck the balance in favor of the second value, at least when the action takes place in the legislature itself through the means of debate or legislative action."

JOE

TO: Joe Orsini DATE: March 14, 1977

FROM: Paul Conger RE: SCR 13 & SCR 14

In an effort to gather information that was requested by the Committee at the last hearing regarding SCR 13 and SCR 14, I have completed the following:

1) I have contacted CRA and Lee McAnerney and Palmer will be here to testify. Palmer also mentioned that Rod Peques, Assistant A.G. will probably accompany them to make sure no sensitive information is released since this issue will no doubt reach litigation after the session has adjourned.

2) I contacted Lois Jund, Deputy Commissioner for Program Management, Dept. of HESS, and she said she will attend the hearing tomorrow to testify in behalf of HESS.

3) I have secured a copy of the earlier CRA Regulations, dated Oct. '74, per Senator Sumner's request. Subsequent revisions to the regulations have certainly expanded the portion pertaining to eligibility (19AAC 30.020) because in the earlier regulations, it reads as follows:

> 1^ AAC 30.020 ELIGIBILITY Eligibility for receipt of state aid to local governments provided by AS 43.18.010 shall be predicated upon the possession and exercise of a power set out in those statutory provisions by a unit of local government or volunteer fire department located in the unorganized borough. (Eff. 7/8/73, Register 47)

4) In response to the request to acquire a copy of the minutes regarding public input at the time these reguations ~~regarding public input at the time these regulations~~ were adopted, CRA says that the only public input regarding section (j) "construction" was a letter forwarded to the Dept. by Dr. Beirne. Palmer said that a copy of this letter should be in the A.G.'s office. I checked with Rod Peques and he doesn't have it in the "Lake Otis file" but he said he would secure it by hearing time.

5) I got Berrier's opinion regarding section (j). I had requested that he comment regarding the Asst. A.G.'s letter giving the go ahead to the Dept. of HESS to use Hill-Burton Regulations. He skirted this particular issue but addressed the question of the propriety of CRA adopting Hill-Burton Regulations as a standard for determining total project cost. Regarding the regulation he stated:

"Since discretion was left to the department and the department exercised that discretion in a reasonable manner apparently consistent with legislative intent, in my opinion the regulation is legally proper."

6) Additionally, I'm having copies of the audits that were conducted on the Anchorage and Fairbanks hospitals for the past two years forwarded to the Committee.

Senate C&RA

RE: SCR 13, SCR 14
19AAC 30.020(9)(C)
19AAC 30.020(9)(D)
19AAC 30.140(3)

The concept to provide revenue sharing money to those constructing hospital facilities formally emanated in SB42, 1971. The following is a history of that bill and subsequent amendments to it.

SB 42 (See Attachment 1)
The Bill was originally intended to create a loan/grant fund to be established and administered in the Department of Health. It would create a revolving loan (5% interest) and grant funds to make payments to local governments, non profit corporations and non profit sponsors for the acquisition, construction, modernization, and other capital improvements of hospitals and related health facilities. A grant would be provided if it had been determined by the commissioner of health that a local government, non profit corporation, or non profit sponsor would have difficulty in paying back a loan.

CSSB 42 (See Attachment 2)
Local Government Committee dropped the original bill's suggestion of establishing a loan/grant fund to be administered by the Dept. of Health and transferred the issue of providing state assistance for hospital construction cost to Community and Regional Affairs. In their version of this bill, they adopted language that reflects section (j) which is currently at issue here.

At this stage, the provision dealing with revenue sharing for construction of hospitals was an "in addition" clause to section (h) which treats revenue sharing dollars for hospitals already in operation.

In this initial stage of the bill, only local governments were to be recipients of this revenue sharing money pertaining to construction cost assistance as indicated by the following:

AS 43.18.010(h) During each fiscal year the state shall pay to an organized borough or a city outside an organized borough, in which a health facility is operated.....

In addition, if construction of a facility was begun by a local government after January 1, 1968 and state matching aid for construction approved for payment to the local government constitutes less than 25 per cent of the total project cost, the state shall pay to the local government during each fiscal year a sum equal to $5,000 per bed for the maximum number of beds provided for in the construction design of the facility, until the local government has received from this aid an amount which, combined with state matching money for construction of the facility, equals 25 per cent of the total project cost. Sums received by a local government under this subsection shall be used for expenses of operation, maintenance or health services or facilities, as the local government determines.

As the language indicates, the key component thus far is local government. (Note that the next version of this bill (CSSB 42 HEW) which creates a section (j) which address the issue of revenue sharing for hospital construction, extends potential recipients of section (j) beyond local government to include "other sponsor facility". So we start moving away from the notion that this money is to be available only for local governments early in the makeup of this bill.

Attention should also be directed towards the term "total project cost". This phrase sustained itself through all the stages of revision and the word "total" was not substituted with any language that would suggest less than total project cost in computing the revenue sharing allowance to be provided. The only restraining language in this bill regarding construction cost states: "No funds received for construction shall be used for any other purpose."

CSSB 42 (HEW) 1971 (See Attachment 3)
HEW, recognizing that they were dealing with two separate issues, viz. hospitals in operation and hospitals under construction, amended this bill creating section (j) as a subsequent section to section (h). Section (h) continues to deal with providing revenue sharing money to an organized borough or a city outside an organized borough that has hospitals in operation. Then section (j) treats the issue of rendering revenue sharing money to offset cost relative to the construction of hospitals. The salient disparity between section (h) and section (j) (for our purposes) is that the committee did not rely on the same language that was used in sec (h) i.e. "during each fiscal year the state shall pay to an organized borough or a city outside an organized borough in which a health facility is operated"; or they did not limit the recipient of this money solely to a local government as was proposed in CSSB 42, but broadened the language in section (j) to state "If construction of a

facility began after Jan 1, 1968, and state matching aid for construction approved for payment to the local government or other facility sponsor ... of the total project cost ... the state shall pay to the local government or other facility sponsor ... State aid provided for in this subsection shall continue until the local government or other facility sponsor has received an amount which ... equals 25% of the total project cost.

It would appear that if the committee wanted the petitioner for construction money to be limited to an organized borough or a city outside an organized borough, they would have adopted this language and made it applicable to sec (j) as well as sec (h). However, the committee did not limit sec (j) (dealing with hospital construction) to these recipients but broadened it to include "local government or other facility sponsor." It was this language that remained through the life of the bill and became law.

Also section (j) retains the language "total project cost" and does not qualify this term by inserting any limitations on what "total project cost" entails. The only restrictive language in this section is "no funds received for construction shall be used for any other purpose".

The remainder of this bill amends section (i) (defining a health facility) to include sections(h) and (j) indicating that this meant a hospital (or facility) owned or operated or both by a local government or by a nonprofit corporation or other nonprofit sponsor.

CSSB 42 (Finance) (See Attachment 4)
Finance drops section (h) from this bill and just concentrates on section (j). The salient feature in this version of the bill is that the Senate Finance Committee approved the language that expanded those permitted to reap the benefits of the bill beyond local government to include other facility sponsor. (Remember in the first CSSB 42 only local governments were included to receive assistance with hospital construction cost, then in HEW's version, they included "other facility sponsor" in contrast to "an organized borough or a city outside an organized borough "that was used in sec (h). The Senate Finance Committee retained "other facility sponsor".)

In addition, the "total project cost" term is still retained in the bill. This has existed throughout the tenure of this bill and has not been diluted or pared at all.

The Senate Finance Committee dropped sec (i) dealing with the definition of a hospital facility but it is picked up again in HCS CSSB 42 discussed below:

HCS CSSB 42 (See Attachment 5)
No change was adopted in this revision that applies to "other facility sponsor" or "total project cost".

In the House HEW and Local Government Committees deliberations, sec (2) is brought back into this bill as sec (i) to include both secs (h) and (j).

CSSB 42 (Finance) amH (CH 127 SLA 1971)
This final version of the bill does not change the language referring to "other facility sponsor" or "total project costs" and is enclosed herewith as Attachment 6.

Subsequent amendments were made to this section, however, subsection (j) was untouched.

Nevertheless, section (h) and (i) became subjects of revision, and pertinent modifications in subsequent years regarding section (j) are listed below:

HCSSB 383 am H (Ch 71, SLA 72) (See Attachment 7)
Inserted the following language into sec (i) which became law: "(1) In (h) and (j) of this section "health facility" or "facility" includes hospitals ... which are licensed, when required by the state under AS 18.20.010 - 18.20.130 (Department of Health and Social Services dealing with hospital regulations) and are owned or operated or both by a local government or by a nonprofit corporation or other non profit sponsor; the term excludes facilities operated or wholly supported by the state or the federal government, and excludes nonprofit facilities leased from private profit-making groups or corporations". This became law in 1972 but was extracted in 1973 by CSHB 42 (Finance) am S discussed next:

HB 42 (Introduced 1973), (Attachment 8, p.2, line 14)
A bill designed to repeal and re-enact sec (h) and (i) of AS 43.18.010. In its original form, the bill omitted the language that became law in 1972 viz. "and excludes non-profit facilities leased from private profit-making groups or corporations". However, in the Local Government Committee's version of CSHB 42, (see Attachment 9, p.2, line 11), reinserts the above mentioned language. Subsequently, in CSHB 42 (HESS) affixed as Attachment 10, on p.2., line 13, they revised this section to read:

(B) excludes nonprofit facilities leased from private profit-making groups or corporations only as to use of shared revenue for capital improvements under (j) of this section, but not as to use of shared revenue for operating expenses under (h) of this section;

The Finance Committee (CSHB 42-Finance), (affixed as Attachment 11, p.2, line 8) in their version eliminated the above mentioned language and other language regarding "excludes nonprofit facilities leased from private, profit-making groups or corporations."

The bill was in this form, deleting the above language, when it passed the Senate as CSHB 42 (Finance) am S,(affixed hereto as Attachment 12, p.2, line 11) and became law, Ch 87, SLA 73.

Other provisions of Ch 87, SLA 73 of significance:

AS 43.18 is amended by adding new sections to read:

Sec. 43.18.040 REGULATIONS. The Department of Community and Regional Affairs shall adopt regulations necessary to carry out the purposes of this chapter.

Sec. 43.18.050 SPECIFIC EXPENDITURES. A municipality shall expend funds received for the operation and maintenance of hospitals and health facilities and services.

Subsequent changes to this bill are listed below. However none of the revisions pertain to AS 43.18.010(j).

Ch 127, SLA 1974 (Attachment 13)
Sec 44. AS 43.18.010(h)(4) is amended to read:

(4) funds received by a local government under (1), (2) or (3) of this subsection shall be used for expenses of operation maintenance, or health services or facilities, as the local government or hospital outside a municipality determines;

*Sec. 45. AS 43.18.040 is amended to read:

Sec. 43.18.040 REGULATIONS. The Department of Community and Regional Affairs shall adopt regulations necessary to carry out the purposes of secs. 10 - 99 of this chapter.

*Sec. 46 AS 43.18.050 SPECIFIC EXPENDITURES. A municipality shall expend funds received for the operation and maintenance of hospitals and health facilities and services under secs. 10 - 99 of this chapter only for those specific facilities and services.

Ch 265 SLA 1976 (See Attachment 14)
*Sec. 2 AS 43.18.010(h)(1), (2) and (4) are repealed and re-enacted to read:

(1) $2 per capita to a municipality which has the power to provide health facilities and services and in which a hospital is located;

(2) in addition to the payment made under (1) of this subsection

(A) The state shall make payments to a municipality which has the power to provide hospital facilities and services and which exercises the power on the basis of $1,000 per bed for each bed actually used for patient care limited to the number of beds provided for in the construction design of the hospital, or $75,000 for those hospitals with 10 or more beds, or $25,000 a hospital for those hospitals with less than 10 beds, as the municipality may elect; funds received under this subparagraph may be used only for hospitals and shall be apportioned among qualifying hospitals as the muncipality determines;

(B) the state shall make payments on the basis set out in (A) of this paragraph to a municipality for non profit hospitals not operated by a municipality if the municipality first certifies to the department that the hospital is in compliance with all standards for hospitals which have been adopted by the municipality; in the absence of this certification the funds which would have gone to the hospital lapse into the state general fund; payments to the municipality shall be transferred to the hospital in accord with the basis by which the entitlement was generated by the hospital and shall be applied to the annual cost of operation and maintenance of the hospital or for the provision of health care service at the hospital as the directors of the hospital determine;

(C) a hospital may not receive payment under both (A) and (B) of this paragraph;

(4) funds received by a municipality under (1) or (3) of this subsection shall be used for expenses of health services or operation and maintenance of facilities as the municipality determines;

*Sec. 3 AS 43.18.050 is repealed

*Sec 4 This act takes effect July 1, 1976.

MILES S. SCHLOSBERG, INC.
ATTORNEYS AT LAW
425 G STREET, SUITE 500, ANCHORAGE, ALASKA 99501
(907) 276-3125

MARK A. ERTISCHEK
MILES S. SCHLOSBERG

March 14, 1977

Honorable Joseph Orsini, Senator
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

Representative Beirne has asked us to provide you with an analysis of the legality of Senate concurrent resolutions Nos. 13 and 14 which have been introduced in the legislature of the State of Alaska. In our opinion, it would be both legal and proper for the legislature of the State of Alaska to annul administrative regulation 19 AAC 30.020(9)(C) and (D). 19 AAC 30.020(9)(C) is intended to import the criteria used in the administration of the federal Hilburton Construction Program into A.S. 43.18.010(j).

A.S. 43.18.010(j) provides:

> "If construction of the facility began after January 1, 1968 and state matching aid for construction approved for payment to the local government or other facility sponsor constitutes less than 25% of the total project cost, the state shall pay to the local government or other facility sponsor each fiscal year a sum equal to $2,500 a bed for the maximum number of beds provided for in the construction design of the facility. State aid provided for in this subsection shall continue till the local government or other facility sponsor has received an amount which combined with the state matching money for construction of the facility equals 25% of the total project cost. No funds received for construction shall be used for any other purpose."

The Lake Otis Clinic, a non profit corporation, applied for funds under the provisions of this section. Its appli-

cation was approved after January 1, 1968. Some of the funds which are required to be transmitted to the Lake Otis Clinic pursuant to the provisions of this section were transmitted to the clinic. The majority of the funds have not yet been transmitted to the clinic. In addition, the creators of the Lake Otis Clinic have in reliance upon the provisions of this statute and the approval of their application for funds expended considerable amounts of their own funds in an effort to acquire and pay the financing costs for the property necessary to complete the proposed medical facility. The Department of Community and Regional Affairs has, after the fact, promulgated regulations which prohibit the state from expending money under this section for site acquisition costs. The exclusion of site acquisition costs is explicitly noted in the regulation 19 AAC 30.020(9)(C) as being based on a similar requirement of the federal Hilburton Construction Program. A brief review of the federal statutes in question shows that it would be totally inappropriate to take these federal criteria and apply them to the state statute.

The federal criteria are set out in the definition of the term "construction" in 42 U.S.C. 291(o)(i). In this section the term "construction" is defined to specifically exclude the cost of the acquisition of land. Alaska law is quite different, however. A.S. 43.18.010(j) refers not to construction costs, but to "total project cost". The term "total project cost" is not defined further in the statute nor does the Department of Community and Regional Affairs make any attempt to define it in the regulations. Nevertheless, a review of the way in which the term "construction cost" has been used in related sections of the statute is instructive. A.S. 43.18.100 and A.S. 43.18.460 provide for reimbursement to municipalities within the state of Alaska for school construction costs and sports facilities construction costs. In both cases statutory definitions are provided for the term "cost of construction". In both cases, this term is defined specifically to include the cost of site acquisition. Even though the term "total project cost" in A.S. 43.18.010(j) is not defined, it would be very strange if these words which appear a few short pages from the other terms previously defined could be read to embody a legislative intent to narrow the broad definition of construction costs used in the other sections.

In 19 AAC 30.020(9)(D) the Department has attempted to limit the eligibility of the "other facility sponsors" to those situations in which the facility lies outside the boundaries of a municipality. The statute is equally bare of any basis for this interpretation.

A.S. 43.18.010(j) uses the clause "local government or other facility sponsor" three times to refer to the eligible recipient of the funds. The use of the word "or" indicates that both local governments and "other facility sponsors" would be proper recipients of the funds. The statute does not define "other facility sponsors" further or mention any special condition which other facility sponsors have to meet. It certainly does not contain any words which even imply that an "other facility sponsor" within the boundaries of a municipality would not be eligible for aid under this section. In this regard it is significant that sections A.S. 43.18.010(i)(1) and (2) which define the terms "hospital" and "health facility" also make absolutely no mention of the distinction which the Department has imported into its regulations. As the Attorney General's office noted in a legal opinion issued on December 20, 1974, one of the problems contained in the statute was the fact that "it fails to distinguish between the governmental sponsors and the non-governmental sponsors". The opinion was ended with the suggestion that the Department seek legislative amendment. The Department has failed to do so and instead has attempted to amend the statute through the regulations process.

The purpose of permitting administrative agencies to adopt regulations is quite simple. The legislature recognizes that it cannot deal explicitly in every statute with every problem that may occur some time in the future and that it is necessary to explain the general provisions of legislative enactments, to provide procedures for implementing those enactments, and to make more specific the sometimes general language included in the statutes. This statute certainly cannot be broadened to allow the regulation making process to be used for the purpose of changing the scope or intent of a statute to accord with the desires of the executive branch of the government. The administrative regulation in question goes beyond the scope allowed to regulations and represents an attempt to amend a clear requirement of the statute. If the Department of Community

and Regional Affairs believes it desirable to remove the term "total project cost" from A.S. 43.18.010(j), or differentiate between government and non-government sponsors, it should follow the suggestion of the Attorney General's office and request the legislature to amend the statute to eliminate this provision and include the definition of cost used in the federal act. It cannot proceed to do this through the regulations process on its own.

The propriety of the legislature's acting to annul administration regulations which are not in compliance with the intent of the legislature cannot be doubted at this state. As Congressman Elliot Levitas of Georgia noted in remarks to the section of administrative law of the American Bar Association during their 1976 Bicentennial Institute on the Oversight in Review of Agency Decision-Making, "We have identified in my office approximately one hundred thirty different acts of the congress, almost two hundred separate provisions of this type which have been cast heretofore mandating or authorizing some type of congressional review of contemplated or pending executive actions." The Congressman also noted that provisions requiring or permitting the legislative review of administrative regulations are found in the laws of the states of Connecticut, Nebraska, Alaska, Kansas, Virginia, Michigan, and Oregon, as well as such foreign nations as Great Britain, Australia, and New Zealand. Speaking in regard to proposed legislation providing for congressional review of certain administrative regulations, he said, "It seems to me that the basic proposition is the one I started off with. Who has the ultimate responsibility for the laws of this nation, whether they are acts of congress or laws which masquerade as administrative rules. I think the answer under our Constitution is it is the elected congress of the United States." Here, it is the elected representatives of the State of Alaska who have the responsibility to annul regulations which do not conform to the requirements of the statutes on which they are based. As Justice White noted in the case of Buckley vs. Valeo, 424 U.S. 1, "In the light of history and modern reality, the provision of congressional disapproval of agency regulation does not appear to transgress the constitutional design ... "

We would conclude in line with this that it would be both legal and proper to annul 19 AAC 30.020(9)(C) and (D). This regulation is by its own terms contrary to the specific provisions included in the statute upon which it is based.

It is, therefore, invalid and should be annuled by the legislature. Finally, we would like to note that the terms of the statute seem mandatory in requiring that the full amount of the entitlement be paid to the Lake Otis Clinic. This seems not only clear but equitable considering the fact that the sponsors of the project, whether governmental or non-governmental, put up a substantial amount of the financing. Certainly, hospitals would never be built if the sponsors had to operate subject to the possibility that shifts in administration policies subsequent to the commencement of a project could endanger a portion of the financing needed for completing the project. The Lake Otis Clinic project was scrutinized by the administration at the time of its initiation. Substantial amounts of money and effort have been expended in reliance upon the state's obligation to fulfill the terms set out in the statute. The administration should certainly not be able to back out of the project at this late date.

Very truly yours,

MILES S. SCHLOSBERG, INC.

Re: State Aid to Local Government Municipal
Revenue Sharing for Hospital Construction
Matching Funds

Dear Senator Orsini:

Attached are copies of each annual report since 1972 with a summary sheet showing the hospital construction matching funds paid to applicants. Our records show that Lake Otis Clinic, Inc. is the only nonmunicipal sponsor to ever receive hospital construction matching funds since the enactment of the legislation in 1972.

Also attached is the correspondence pertaining to the denial of FY '75 redirected Revenue Sharing grant in the amount $100,000 for Lake Otis Hospital. You may be interested in reading the Attorney General's opinion dated January 27, 1976 which could relate the question whether the legislative intent written in the FY '75 Free Conference Committee Budget Report after adjournment could be construed to be legally binding.

Sincerely,

Lee McAnerney

MEMORANDUM State of Alaska

DEPARTMENT OF COMMUNITY AND REGIONAL AFFAIRS

TO: Lee McA rney
Commissioner

DATE: July 8, 1975

FILE NO:

TELEPHONE NO:

FROM: Jack Chenowe th
Director

SUBJECT:

Yesterday, in your absence, I took a call from Dr. Michael Beirne concerning the denial of $100,000 of redirected FY 75 shared revenue for the Lake Otis Hospital. Dr. Beirne is seeking to reverse the decision, as expeditiously as possible. He contends that the language of the statement of intent is sufficient to override the statute and Department-adopted regulations, the question of eligibility being eliminated by the legislative finding. He also thinks AS 37.25 inapplicable to the Lake Otis Hospital for the Legislature only determined that the amount "shall be considered applicable" to FY 74.

I explained that the matter had been reviewed with you and with Kent Dawson of Budget and Management.

Beirne will probably be in Juneau today and will likely contact you and officials of the Department of Administration to solicit review by the Attorney General.

cc: Andy Warwick, Dept. of Administration
Avrum Gross, Dept. of Law

June 30, 1975

Dr. Michael Beirne
P.O. Box 4-1539
Anchorage, Alaska 99509

Dear Dr. Beirne:

The First Session of the Ninth Alaska Legislature adopted a statement of intent applicable to construction of the Lake Otis Hospital. The statement reads:

> It is the intent of the Legislature that an amount not to exceed $100,000 (the amount to be determined by eligibility standards established in law/regulations for payment of construction grants to hospitals) be paid as a grant to the Lake Otis Hospital facility from the FY-75 Municipal Service Revenue sharing account. This grant shall be considered applicable to the FY-74 entitlement for Municipal Service Revenue sharing.

The quoted statement was added to the FY-76 appropriation Free Conference Committee Report on the motion of Representative Keith Specking, a member of the second Free Conference Committee on that act, following my letter to you of June 5 and an explanation offered by Jay Hogan, Director of Legislative Finance, during the Committee's deliberations.

Subsequent review has led to a determination that no portion of the amount intended by the legislative statement for the Lake Otis Hospital facilities for FY-74 from the balance of the appropriation for the FY-75 Municipal Service Revenue Sharing program shall be paid.

The legislative statement sets an upper limit of $100,000 on the amount to be allocated adding, parenthetically, that the actual amount payable is "to be determined by eligibility standards established in law/regulations for payment of construction grants to hospital." You will well recall our discussions during the spring of 1974 when, in March, you transmitted a letter application requesting payment for the FY-74 appropriation for the Lake Otis Hospital. At that time, I advised that your application could not be honored for payment because (1) it was filed after the date established in Department-adopted regulations for timely filing of applications and (2) at the time your application was submitted, the FY-74 appropriation had been expended or encumbered to meet valid claims. At that time

(early spring of 1974), if memory serves, you indicated that construction of the facility had not been initiated by July 1, 1973, the first day of FY-74 and the index or benchmark date for all FY-74 applications. Because the legislative statement directs that the Department determine the amount payable, to the maximum limit of $100,000, with reference to applicable law and regulations, I find that the amount properly payable, applying 19 AAC 30.030, "Date for Determination," is $0.

A provision of state law relating to public finance appears to preclude payment of an FY-74 entitlement from the balance of the FY-75 appropriation. By AS 37.25.010(b)

> An indebtedness arising from a prior year for which the appropriation has lapsed shall be paid from the current year's appropriations, if (1) the expenditure does not exceed the balance lapsed and (2) the original obligation date is not more than two years from the regular date of disbursement.

Regrettably, the amount projected to be paid--a maximum of $100,000--exceeds the amount lapsed in FY-74--$3,700. The quoted statutory provision takes precedent over the statement of intent and no entitlement is, therefore, payable.

Though the construction project is to be denied the grant intended by the Legislature, please understand that, assuming no change of the current statute, AS 43.18.010(j) and continued construction of the facility over the anticipated time frame, the Lake Otis Hospital may reasonably expect to receive its share of funds appropriated for construction to the limit established in the general law provision. Our decision to override the statement of legislative assistant in the payment of FY-74 payment of construction support is, in one sense, not so much a denial of payment as it is a postponent.

Please advise if further information concerning disposition of the matter by the Department is required.

Sincerely,

Lee McAnerney
Commissioner

Free Conference Committee on the Budget
Intent, Municipal Services Revenue Sharing

It is the intent of the Legislature that an amount not to exceed $300,000 (the amount to be determined by eligibility standards established in law/regulations for payment of construction grants to hospitals) be paid as a grant to the Anchorage Community Hospital from the FY 75 Municipal Services Revenue Sharing Account. It is the intent of the Legislature that an amount not to exceed $100,000 (the amount to be determined by eligibility standards established in law/regulations for payment of construction grants to hospitals) be paid as a grant to the Lake Otis Hospital facility from the FY 75 Municipal Services Revenue Sharing account. This grant shall be considered applicable to the FY 1974 entitlement for Municipal Services Revenue Sharing.

Senator Sackett moved to add intent to General Relief Medical that hospitals will absorb 20% of unpaid services as charity care. No objection, so ordered. Leg. Inten

Referring to a May 28, 1975 memo to Rep. Haughton from Jay Hogan, Representative Specking called attention to the fact that there is $400,000 in hospital construction revenue sharing money that will lapse unless otherwise appropriated. He explained that $300,000 of the FY 75 Municipal Services Revenue Sharing account was earmarked for the Anchorage Community Hospital; however, Anchorage failed to file an application for their share since they thought the grant would automatically be paid. Representative Specking moved to adopt legislative intent that an amount not to exceed $300.0 be paid as a grant to the Anchorage Community Hospital, and the remaining $100.0 be appropriated to the Lake Otis Hospital facility. Leg. Inte

Representative Bowman objected.. He asked if there are other hospitals that are available to receive these funds. Senator Kerttula remarked that he knows that GAAP has two facilities; however, they are fully funded. Jay Hogan explained that in the past it was the intent of the Legislature to include a sum of money for Lake Otis for reimbursement for construction costs, but this never took place; and last year it was the same thing for the community hospital in Anchorage--it never took place. This is an attempt to take money that will lapse and pay off these two past legislative intents.

Representative Bowman then removed his objection to the motion, and it was adopted.

Referring to the General Government category, Department of Law, Natural Gas FPC Representation, Senator Croft proposed that the following legislative intent be added to the existing intent which appears on page 122 of the computer run (The department shall not retain any legal firm where there appears to exist a conflict-of-interest situation. Information developed by the contract firm shall be made readily available to the legislative pipeline impact committee).

Legislative Intent: The department shall coordinate its activities in this regard with and cooperate with the legislative committee created by HB 258. Leg. Intent

No objection, this intent was adopted.

Referring to University of Alaska, Statewide Administration, Senator Croft stated that $300.0 was added by the previous FCC for management systems development. Senator Croft moved that prior to entering into a contract with the University, the firm that will be doing the work be approved by the Legislative Budget & Audit Committee.

19 AAC 30.010. SCOPE OF REGULATIONS. The regulations in this chapter are prescribed for implementing, interpreting, and making specific the act providing state aid to local governments, AS 43.18.010 - 43.18.050. (Eff. 7/8/73, Register 47)

Authority: AS 43.18.040
44.47.050(14)
44.47.160

19 AAC 30.020. ELIGIBILITY. Eligibility for receipt of state aid to local governments provided by AS 43.18.010 - 43.18.050 shall be predicated upon the possession and exercise of a power set out in those statutory provisions by a unit of local government or volunteer fire department located in the unorganized borough. (Eff. 7/8/73, Register 47)

Authority: AS 43.18.040
44.47.050(14)
44.47.160

19 AAC 30.030. DATE FOR DETERMINATION. For the first entitlement period, determination of eligibility for receipt of state aid to local governments provided by AS 43.18.010 - 43.18.050 is July 1, 1973.

In subsequent entitlement periods, the annual date for determination of eligibility is July 1. (Eff. 7/8/73, Register 47)

Authority: AS 43.18.040
44.47.050(14)
44.47.160

19 AAC 30.040. APPLICATION. (a) Application for state aid to local governments under AS 43.18.010 - 43.18.050 shall be made on forms prescribed by the commissioner.

(b) Not later than July 10 of the entitlement period the department will forward application forms to each unit of local government and volunteer fire department located in the unorganized borough that received state aid to local governments in the previous entitlement period and to every other unit of local government incorporated before July 1 of the entitlement period.

(c) As a condition to participation in the program of state aid to local governments, applications for state aid to local governments under AS 43.18.010 - 43.18.050 shall be returned to the department postmarked not later than October 15 of the entitlement period. Based on information contained in the application submitted, the commissioner will prepare a determination of entitlements not later than the following November 30 and will mail notice of the amount of entitlement to each unit of local government and volunteer fire department located in the unorganized borough. (Eff. 7/8/73, Register 47; am 8/7/74, Register 51)

Authority: AS 43.18.040
44.47.050(14)
44.47.160

19 AAC 30.050. APPEAL. (a) Within 20 days of the date of mailing of notice of entitlement by the department, a unit of local government or volunteer fire department located in the unorganized borough may appeal a determination of final entitlement to the commissioner. The appeal shall be in writing and shall identify the particular category or categories for which application for state aid to local governments has been submitted, the determination of entitlement to which the unit of local government takes exception, and the reasons for its exception. The appeal shall include all relevant supporting evidence.

(b) The commissioner will review the record of appeal and enter the final determination of entitlement. The commissioner may affirm or modify the determination of entitlement previously entered, and will notify the unit of local government or volunteer fire department located in the unorganized borough of his decision.

(c) If the unit of local government or volunteer fire department located in the unorganized borough fails to file an exception within the

time set forth in subsection (a) of this section, the determination of entitlement entered pursuant to section 040(c) constitutes the final determination of the department.

(d) The manner of computation of population may not be made the subject of an appeal. (Eff. 7/8/73, Register 47)

Authority: AS 43.18.040
44.47.050(14)
44.47.160

19 AAC 30.060. POPULATION DATA. (a) The population data used in determination of allocations of state aid to local governments and adjustments to those allocations will be the official report of the United States Bureau of the Census. However, a unit of local government may substitute for the official report of the United States Bureau of the Census:

(1) an enumeration, certified as true and correct by the governing body of the unit of local government or chief administrative officer of a volunteer fire department located in the unorganized borough, specifying the names of residents of the unit of local government, service area, or area served by a fire department, prepared according to criteria established by the department;

(2) an estimate of population based upon other reliable data such as public school enrollment figures, public utility connection, registered voters, and certified employment payrolls; or

(3) the latest available population estimate prepared by the division of employment security, Alaska Department of Labor.

(b) The commissioner may require each unit of local government or volunteer fire department located in the unorganized borough which offers an estimate of its population to submit such evidence as may be necessary to review computation of the population estimate. He may notify the unit of local government or volunteer fire department located in the unorganized borough that if it fails to take action in response to the request within 30 days of the date of receipt of his notification, the estimate may be rejected and allocations will be made on the best data available to the department.

(c) Repealed, August 7, 1974. (Eff. 7/8/73, Register 47; am 8/7/74, Register 51)

Authority: AS 43.18.010(c)
43.18.040
44.47.050(14)
44.47.160

19 AAC 30.070. AUDIT OR STATEMENT OF INCOME AND

EXPENDITURES. (a) Each unified municipality, organized borough, home rule city, or city of the first class shall submit one copy of its annual audit prepared pursuant to AS 29.48.220 for the fiscal year preceding the entitlement period. Preparation of the audit shall be by a public accountant licensed under the provisions of AS 08.04.270 - 08.04.320.

(b) Each city of the second class shall submit an audit or statement of income and expenditures of the accounts and financial transactions of the second class city for the fiscal year of the second class city preceding the entitlement period on a form approved by the commissioner.

(c) Payment of the final entitlement of a unit of local government will not be made until an audit or statement of income and expenditures is filed with the department. (Eff. 7/8/73, Register 47; am 8/7/74, Register 51)

Authority: AS 43.18.010(c)
43.18.040
44.47.050(14)
44.47.160

19 AAC 30.080. FAILURE TO COMPLY WITH REQUIREMENTS. If the commissioner determines that a unit of local government or volunteer fire department located in the unorganized borough has failed to comply substantially with a provision of this chapter, after giving reasonable notice to the chief executive officer or chief administrative officer of the unit of local government or volunteer fire department located in the unorganized borough, he will notify the unit of local government or volunteer fire department located in the unorganized borough that if it fails to take action in response to the request within 30 days of the date of receipt of notification, further payments will be withheld for the entitlement period until the request for further information is fully complied with. (Eff. 7/8/73, Register 47)

Authority: AS 43.18.040
44.47.050(14)
44.47.160

19 AAC 30.090. PREPAYMENTS. (a) The commissioner may provide for prepayment to a unit of local government or volunteer fire department located in the unorganized borough of a sum not to exceed 50 percent of the entitlement computed without regard to any proration for the previous entitlement period.

(b) Prepayments will be allowed to a unit of local government or volunteer fire department located in the unorganized borough upon receipt by the department of a completed application.

(c) Repealed, August 7, 1974.

(d) Prepayments shall be deducted from the entitlement prior to transmittal of the balance of the entitlement due to a unit of local government or vol-

unteer fire department located in the unorganized borough determined to be eligible for receipt of state aid to local governments. (Eff. 7/8/73, Register 47; am 8/7/74, Register 51)

Authority: AS 43.18.040
44.47.050(14)
44.47.160

19 AAC 30.100. BOUNDARY ADJUSTMENTS. A unit of local government effecting a boundary change under AS 44.19.260 or through the local action process provided by 19 AAC 15 during the preceding entitlement period shall return with its application the following information:

(1) one copy of an ordinance or resolution effecting the boundary change;

(2) a map clearly showing areas annexed to or detached from the unit of local government submitting the application; and,

(3) an estimate of the population residing within the area annexed or detached and a detailed statement indicating the method used in determining the estimate. (Eff. 7/8/73, Register 47)

Authority: AS 43.18.040
44.47.050(14)
44.47.160

19 AAC 30.110. INCORPORATION OR DISSOLUTION OF UNITS OF LOCAL GOVERNMENT. (a) A unit of local government which is incorporated pursuant to AS 29.18.010 - 29.18.120 during the entitlement period is not eligible to receive state aid to local governments for the entitlement period during which it was incorporated.

(b) The department will pay to a unit of local government established by unification pursuant to AS 29.68.390 an entitlement prorated over the number of days in the entitlement period following the date of unification.

(c) The department will pay to a unit of local government established by consolidation pursuant to AS 29.68.090 an entitlement prorated over the number of days in the entitlement period following the date of consolidation.

(d) The department will pay to a unit of local government into which a city or borough is merged pursuant to AS 29.68.090 an entitlement prorated over the number of days in the entitlement period following the date of the merger.

(e) A unit of local government which is to be dissolved pursuant to AS 29.68.500 during the entitlement period will receive an entitlement payment prorated over the number of days in the entitlement period during which it has been in existence if that unit of local government has authority to expend

revenues. (Eff. 7/8/73, Register 47)

Authority: AS 43.18.040
44.47.050(14)
44.47.160

19 AAC 30.120. OVERPAYMENT AND ADJUSTMENT. (a) After mailing of prepayments, if the commissioner determines that the prepayment mailed to a unit of local government or volunteer fire department located in the unorganized borough exceeds the entitlement payable to a unit of local government or volunteer fire department located in the unorganized borough during the entitlement period, he may

(1) demand that the difference between the amount of prepayment and the proper entitlement be repaid to the department; or

(2) reduce, in the next entitlement period, the entitlement to the unit of local government or volunteer fire department located in the unorganized borough by the difference between the amount of prepayment and the proper entitlement.

(b) After mailing of the balance of the entitlement due to a unit of local government or a volunteer fire department located in the unorganized borough, if the commissioner determines that the sum of the prepayment and final payment exceeds the entitlement payable to the unit of local government or volunteer fire department located in the unorganized borough during an entitlement period, he may

(1) demand that the difference between the sum of the payments and the proper entitlement be repaid to the department; or

(2) reduce, in the next entitlement period, the entitlement to the unit of local government or volunteer fire department located in the unorganized borough by the difference between the sum of the payments and the proper entitlement. (Eff. 7/8/73, Register 47)

Authority: AS 43.18.040
44.47.050(14)
44.47.160

19 AAC 30.130. VIOLATION OF STATUTE GOVERNING EMPLOYMENT PREFERENCE. (a) Notwithstanding other provisions of this chapter, when there has been a finding of a violation by a unit of local government of the provisions of AS 36.10, the unit of local government may be denied state aid to local governments for a period not to exceed one year following the date of the final determination.

(b) Where denial of state aid to local governments under subsection (a) of this section is for less than one entitlement period, the entitlement will be prorated for the period during which the unit of local government is other-

wise qualified. (Eff. 7/8/73, Register 47)

Authority: AS 36.10.090(b)
43.18.040

44.47.160

19 AAC 30.140. UNIFIED MUNICIPALITIES. For purposes of administration of the act providing state aid to local governments, a unified municipality shall be treated as an organized borough. (Eff. 7/8/73, Register 47)

Authority: AS 43.18.040
44.47.050(14)
44.47.160

19 AAC 30.150. DEFINITIONS OF TERMS IN AS 43.18.010. Unless the context indicates otherwise, in AS 43.18.010

(1) "airport" means a facility operated by a unit of local government at which aircraft arrive and depart on a regular basis; airports maintained exclusively by an agency of the state or federal government or by a private party, airports maintained by a unit of local government under agreement or contract with the Alaska Division of Aviation, airports maintained on a seasonal basis, heliports, sea dromes, and beach landing strips are excluded;

(2) "financial support" means

(A) a transfer of funds from a city, borough or unified municipality to a fire department;

(B) providing in-kind services, including but not necessarily limited to providing a building or other facility for the use of the fire department; utilities, including electricity, heat, water; labor to construct or maintain facilities or other equipment used by the fire department; or other services provided by the unit of local government for the fire department at no cost or at a reduced rate; and,

(C) the full faith and credit pledge of the unit of local government for bonded indebtedness incurred for the purpose of providing funds for the fire department;

(3) "parks and recreation" means a park or recreational facility owned and maintained by a unit of local government or recreation program operated and financially supported by a unit of local government; facilities and programs must be available to the general public;

(4) "port" means a permanent facility operated by a unit of local government which has the capability of receiving cargo from and discharging cargo to commercial vessels;

(5) "road" means a right-of-way across the land dedicated to public use and constructed and maintained for the use of automotive equipment; specifically excluded are

(A) roads maintained within a unit of local government by an agency of the federal or state governments or maintained by the unit of local government pursuant to an agreement with a federal or state agency;

(B) public ways on the surface of a river, lake or other body of water; and,

(C) trails;

(6) "small boat harbor" means a permanent facility operated by a unit of local government which provides deep water shelter, either natural or artificial, on the coast of a sea, lake or other body of water;

(7) "staff planner" means a full-time employee of a unit of local government whose primary responsibility is land use planning and plan implementation;

(8) "transit system" means the transportation of people over regular routes at specified times in accordance with fixed tariffs; the term is limited to transportation by rail and monorail or buses, specifically designed and constructed to accommodate the general public; and,

(9) "work program outline" shall include but is not necessarily limited to

(A) the name and address of the planning firm with which the unit of local government has an annual contract;

(B) a copy of the annual contract; and,

(C) an explanation of the planning tasks presently being undertaken.

(10) "police protection" means provision of police protection services made available by a unit of local government during the previous entitlement year with one or more police officers on duty or on call daily. (Eff. 7/8/73, Register 47; am 8/7/74, Register 51)

44.47.160

19 AAC 30.160. DEFINITIONS. Unless the context indicates otherwise, in this chapter

(1) "chief administrative officer or chief executive officer" means the official who has primary responsibility for the conduct of the governmental or financial affairs of the unit of local government or volunteer fire department;

(2) "commissioner" means the Commissioner of the Department of Community and Regional Affairs;

(3) "department" means the Department of Community and Regional Affairs;

(4) "entitlement" means the amount of payment of state aid to local governments to which a unit of local government is entitled as determined by the commissioner pursuant to the allocation specified in AS 43.18.010 - 43.18.050 providing state aid to local governments or established by these regulations;

(5) "entitlement period" means the calendar period beginning July 1 and ending June 30 of the following year;

(6) "facility" means a permanent improvement constructed, operated or maintained for the convenience of the public;

(7) "unit of local government" means a city, organized borough, or unified municipality incorporated under the laws of the State of Alaska.
(Eff. 7/8/73, Register 47)

STATE OF ALASKA
THE LEGISLATURE

LEGISLATIVE AFFAIRS AGENCY

POUCH Y - STATE CAPITOL
JUNEAU, ALASKA 99811
907-465-3800

M E M O R A N D U M

March 14, 1977

SUBJECT: SCR 13

TO: Senate Community and Regional Affairs Committee

FROM: Billy G. Berrier BGB
Director
Division of Legal Services

You have asked whether the regulation adopted by the Department of Community and Regional Affairs as 19 AAC 30.020(9)(c) to determine project cost for hospital construction aid under AS 43.18.010(j) is a legally proper exercise of the power granted to the department to adopt regulations necessary to carry out the purposes of the program. In my opinion the regulation is legally proper.

AS 43.18.010(j) provides:

> "(j) If construction of a facility began after January 1968 and state matching aid for construction approved for payment to the local government or other facility sponsor constitutes less than 25 per cent of the total project cost, the state shall pay to the local government or other facility sponsor each fiscal year a sum equal to $2,500 a bed for the maximum number of beds provided for in the construction design of the facility. State aid provided for in this subsection shall continue until the local government or other facility sponsor has received an amount which, combined with state matching money for construction of the facility, equals 25 per cent of the total project cost. No funds received for construction shall be used for any other purpose."

The regulation under consideration, 19 AAC 30.020(a)(c) provides:

> "(C) project or construction costs shall be those contracted costs that are eligible for financial participation under the Hill-Burton Construction Program for construction of new buildings, including, but not limited

> to, the expansion, replacement and modernization of existing buildings and initial equipment of any such buildings; including architect and consultant fees, but not including the cost of land acquisition and off-site improvements;"

In this statute the term "total project cost" is very significant. A determination of the total project cost is necessary to initially determine eligibility for aid and to determine the total amount of aid to be given. The term is not free from ambiguity. Implementing regulations are therefore proper. Of course the regulations must in themselves be reasonable and must be in accord with the legislative intent since the power to adopt regulations confers only an authority or discretion as to execution of a law to be exercised under and in pursuance of the law. (Cinncinnati v. Clinton Co. 10 Ohio 77 at 88, 1852, which has been followed with approval in numerous cases).

The Hill-Burton program, (Title VI of the Public Health Service Act as amended, 42 USC 291 et seq.) is the program providing federal aid for hospital construction. This program has been used in Alaska and the state agency required under that program has been established under AS 18.25. It is reasonable to assume that in 1971 when the legislature enacted CSSB 42 am H which as Ch. 127 SLA 1971 became the law under consideration here, both the legislature and the executive branch were aware of the Hill-Burton Act and the fact that state matching aid for hospital construction was being granted as a partial match for Hill-Burton funds.

The Hill-Burton program had been functioning for many years and had dealt extensively with the question of what project costs were allowable. With no specific direction in the statute as to how the term "project cost" was to be defined, it was not unreasonable for the department to use a well-recognized definition in a directly parallel program

There is no evidence of legislative intent to use either this or another definition. The use of the term "total" as a modifier of project cost may evidence an intent that the term project cost be used broadly but a somewhat more persuasive case can be made that the intent of the modifier "total" was to establish that the project cost referred to was not to be construed as referring only to the non-federal share of the costs. It would not appear reasonable to assume the intent of the phrase "total project cost" was to allow any cost attributed to the project by the sponsor regardless of the remoteness of the connection or the propriety of the cost.

Since discretion was left to the department and the department exercised that discretion in a reasonable manner apparently consistent with legislative intent, in my opinion the regulation is legally proper.

Unlike a court, the legislature in its determination of whether to annul a regulation may consider the wisdom as well as the legality of the regulation. The question of whether a regulation is desirable or wise is not a legal question and is not addressed in this memorandum.

Joseph L. Orsini, Chairman
Community and Regional Affairs
Pouch V
Juneau, Alaska 99811
Mail Stop 3100

Dear Mr. Orsini:

The Executive Committee of South Central Health Planning and Development Inc reviewed SCR 13 and SCR 14 at their regular meeting on March 11, 1977. It was their position that the regulations requiring application through municipalities and restricting matching are appropriate. They therefore wish to inform the committee that they reaffirm their position supporting such regulations and therefore recommend against annullment.

Sincerely,

Ron Hammett

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF LAW

OFFICE OF THE ATTORNEY GENERAL

POUCH K – STATE CAPITOL
JUNEAU 99811

January 27, 1976

Catherine M. Lloyd
Deputy Commissioner
Department of Health &
Social Services

Dear Ms. Lloyd:

You have requested an opinion from the Department of Law concerning the following fact situation:

1. By Chapter 209, SLA 1975, the legislature appropriated from the general fund the sum of $3,210,400 to the General Relief Medical Program (GR-Med) administered by the Department of Health and Social Services (DHSS).

2. Section 16(a) of the above appropriation bill states in part:

> . . . The expenditure of funds appropriated/ allocated by this Act shall be in accordance with the conditions and intent set out in the "Free Conference Committee Report, FY 76, Operating and Capitol Budget" as published by the legislative finance division.

3. At page 114 of the "Free Conference Committee Report, FY '76, Health Operating Budget," the following statement is found:

> Legislative Intent: Hospitals will absorb 20% of unpaid services as charity care.

With respect to the facts presented above, the question you have asked may be stated as follows:

1. Does the language quoted above of the Free Conference Committee Report have the effect of legally limiting the manner by which reimbursement can be made by DHSS to hospitals

providing medical assistance covered by the GR-Med program?

2. If a limitation has not been established, how can DHSS implement the quoted legislative intent statement?

The short answers to these questions are: (1) the statement of legislative intent in the Free Conference Committee Report does not have the force of law in limiting payments to hospitals; (2) DHSS must adopt regulations pursuant to the Administrative Procedure Act in order to give legal effect to the statement of legislative intent in question.

I. FACTUAL BACKGROUND

The statutory authority for the GR-Med program is found in AS 47.25.120 et seq.

The mechanics of the program are quite simple. A person seeking GR-Med assistance completes an application provided by DHSS. If the applicant is found eligible for GR-Med assistance, the applicant is issued a coupon card. If that person should thereafter require hospital care, he/she need only present this card upon admission. The hospital then completes a medical invoice showing the services provided to the patient and sends the invoice and a copy of the person's GR-Med card to DHSS for payment.

To finance the GR-Med program in FY '76, DHSS, Division of Medical Assistance, initially submitted to the Department of Administration, Division of Budget and Management (DBM), a budget request for FY '76 in the amount of $3,533,200. Indications at the time were that this amount would be necessary to maintain the 1975 level of GR-Med care in 1976. DBM then suggested that DHSS reconsider its budget request. After doing so, DHSS raised its request to $3.6 million and resubmitted it to DBM. In the interim, DBM had reduced the original budget request to $3,210,400.

In response to that reduction, the Division of Medical Assistance sent a memorandum to DBM explaining and documenting the necessity for funding GR-Med at the $3.6 million figure. DBM concurred with the contents of the memorandum and agreed to the $3.6 million figure. However, prior to the receipt and consideration of these memoranda, the Governor's official budget document was printed and sent to the legislature, showing the $3,210,400 figure.

By letter of April 8, 1975 to Representative Malone, Chairman of the House Finance Committee, Commissioner Andrew Warwick, Chairman of the Governor's Budget Review Committee, requested, inter alia, that the proposed GR-Med budget figure be changed to read $3,640,400.

On May 22, 1975, Governor Hammond sent a letter to both Senator Ray, Chairman of the Senate Finance Committee, and Representative Malone, Chairman of the House Finance Committee. Attached to this letter was another request by DHSS that the $3.6 million budget figure requested for the GR-Med program be substituted for the $3,210,400 figure.

Following the adoption by the Senate and House of their respective finance committee reports, each containing the $3,210,400 figure, a free conference committee was appointed. At its meeting of May 25, 1975, the first Free Conference Committee (FCC) on the budget adopted the House and Senate figure of $3,210,400 for the GR-Med program. (Page 38, First Free Conference Committee Minutes, 1975). At the same time, on the motion of Representative Malone, the statement of legislative intent in question was also adopted. (Page 38, First Free Conference Committee Minutes, 1975).

When the first FCC was unable to resolve differences between the Senate and House versions of the budget bill, the committee disbanded and a second FCC was appointed. This committee, upon the explanation and motion of Senator Sackett, chose to adopt the same statement of legislative intent. (Pages 143-144, Second Free Conference Committee Minutes, 1975). In addition, in "an attempt to formalize the legislative intent that the FCC adopts," the second FCC adopted what is now section 16(a) of the general budget bill for 1975. (Page 140, Second Free Conference Committee Minutes, 1975). This section reads in part:

> . . . [T]he expenditure of funds appropriated/ allocated by this Act shall be in accordance with the conditions and intent set out in the "Free Conference Committee Report, FY '76, Operating and Capitol Budget" as published by the legislative finance division. (Chapter 209, SLA 1975, sec. 16(a)).

Shortly after the second FCC completed its business Lawrence Sullivan, Director of the Division of Medical Assistance,

DHSS, verbally requested of the Legislative Finance Division a clarification of the meaning of the intent statement incorporated by reference into the appropriation for the GR-Med program.

The answer to Mr. Sullivan's inquiry stated that the "legislative intent" statement in question "means that the Division's reimbursement to hospitals is to be reduced 20% from the level that would otherwise prevail." (Letter of 6/16/75 from Milton Barker, Fiscal Analyst, to Larry Sullivan). This answer further stated that "the Intent (sic) was stated to signal a change in [the legislature's] policy."

Upon receipt of this clarification, DHSS proceeded to carry out the stated intent of the second FCC. Hospitals were notified by DHSS that, henceforth, reimbursement or GR-Med services would be at the rate of 80%. The response of the hospitals was predictable. Objections were voiced, discussions ensued and finally litigation against DHSS was threatened. In response to this threat, DHSS requested this opinion from the Department of Law.

II. LEGAL ANALYSIS

A. "Legislative Intent"

The statement which has given rise to this opinion is labeled "Legislative Intent" in the second FCC's report on the budget. In fact, this statement is not one of "legislative intent", but rather a statement of a condition attached to the GR-Med appropriation.

"Legislative intent" is a term of art in law. It refers to the meaning of a statute as intended by the legislature and is discerned by an examination of the statute's terms and the context within which it was enacted, i.e., committee reports, studies, and debates, collectively referred to as the legislative history, involving the questioned legislation. The examination of the context becomes a factor, however, only when the meaning of a statute cannot be discovered by an examination of the statute's terms and the application of intrinsic interpretation aids. The general rule is that when a statute is found to be clear and unambiguous by an examination of its contents, resort will not be had to extrinsic evidence of the legislature's intent. United States v. Donruss Co., 393 U.S. 297 (1969). Though the circumstances of a case may lead to a different result, United States v. Kelley, 328 F.2d 227 (CA 6th, 1964); Willmeth v. Harris, 195 Kan. 322, 403 P.2d 973 (1965), it is the general rule that when the terms of a statute are clear,

its meaning must be derived therefrom, notwithstanding that the meaning therein conflicts with the purpose of the statute as set forth in committee reports. Helvering v. City Bank Farmers Trust Co., 296 U.S. 85 (1935).

With regard to the Health-Operating budget (Ch 209, SLA 1975), the specificity of its terms makes it inconceivable that an ambiguity in its provisions could be argued to exist. The provision of that budget to which the statement at issue applies reads:

General Relief Medical	3,210,400	3,210,400

The first figure refers to the amount appropriated to the GR-Med program, and the second figure refers to the amount of the appropriation which is to be taken from the General Fund. It would be quite difficult to conjure up a more unambiguous provision. Therefore, if the free conference committee report was wholly separate from the budget bill, the absence of any ambiguity in the GR-Med provision of the bill would probably preclude giving any legal effect to the "legislative intent" statement in question. 1/

In the present case, however, we are not actually faced with a "legislative intent" problem, as that phrase is used in law. The reason we are not is that in section 16(a) of the budget bill, the legislature made the free conference committee report "intent" statements a part of the law by incorporating them by reference into the budget bill. As a result, these statements are not "legislative intent" at all, but would, if valid, be conditions on or additional terms of, the particular appropriations to which they apply. The question then is may the legislature attach these conditions or terms to appropriations by incorporating them by reference into the budget bill.

1/ Were an ambiguity to be found in the GR-Med provision of the budget bill, the "legislative intent" statements in the final second FCC report prepared by the Legislative Finance Division would still be of no legal effect.

The documents to which a court may refer for legal legislative intent are those which can reasonably be presumed to contain or indicate the legislature's understanding of a particular provision of a statute at the time the vote on its passage was taken. Statements clarified, edited, and even added, by non-legislators and contained in a document prepared subsequent to the passage of an ambiguous statute do not conform to this requirement. They therefore would not be a part of the legal legislative history to which a court would turn for interpretive assistance.

B. Ambiguous Conditions

An initial difficulty with the "legislative intent" statement in question is its inherent ambiguity. It is phrased in terms of a directive to hospitals to absorb 20% of unpaid services rather than as a limitation on DHSS's rate of reimbursement to hospitals under GR-Med. Clearly, the legislature cannot mandate action on the part of hospitals in a bill appropriating funds for the operation of state government. Alaska Const., art II, §13.

In defense of the "intent" statement, one might argue that its meaning is that DHSS is to reimburse hospitals for GR-Med assistance at the rate of 80% of costs incurred. This interpretation does not, however, logically follow from the language used. "Unpaid services" would include not only services rendered to GR-Med enrollees, but also services rendered to anyone unable or unwilling to pay. As a result, it is conceivable that hospitals could absorb 20% of "unpaid services" and yet leave 100% of GR-Med costs to be reimbursed by DHSS.

We view this problem of ambiguity as being of a serious and substantial nature. However, because of the existence of factors permitting a more conclusive answer to the question presented here, we assume for purposes of this opinion only that the statement in question means DHSS is to reimburse hospitals providing GR-Med assistance at the rate of 80% of costs incurred in providing such assistance. We turn now to the three factors we consider decisive of the question presented.

C. Incorporation by Reference

The statement of "legislative intent" in question did not appear in the budget bill passed by the legislature. Instead, the legislature chose to incorporate by reference the "intent" statement of the second FCC report into the budget bill. (Sec. 16(a), Ch. 209, SLA 1975, quoted supra.)

Research into the question of whether an incorporation by reference of non-statutory material into a budget bill is legally permissible indicates that it may be. Courts have held that state statutes may incorporate by reference federal law "now in effect," Alaska S.S. Co. v. Mullaney, 180 F.2d 805 (9th Cir. 1950); prior statutes of that jurisdiction, Young v. United States, 178 F.2d 78 (9th Cir. 1950); existing statutes, rules or regulations of another state, and publications of United States boards and commissions, People v. International Steel Corp. et al., 226 P.2d 587, 590 (Cal. App. 1951) and cases cited

therein; existing ordinances of that or another state and provisions of a treaty, Palermo v. Stockton Theaters, 172 P.2d 103 (Cal. 1946), subs opinion 195 P.2d 1, 32 Cal. 2d 55 (1948); existing federal rules or regulations, People v. Urban, 206 N.W.2d 511, 45 Mich. App. 255 (1973); and future statutes of the incorporating jurisdication, Robertson v. Langford, 273 P. 150 (Cal. App. 1928).

The paramount consideration in the area of incorporation by reference appears to be not so much what the document to be incorporated is, but rather whether it is in existence at the time the incorporating act is passed. In re Forsstrum et ux., 38 P.2d 878 (Ariz. 1934). As shown by the following facts, we are faced here with a situation in which the material to be incorporated by reference was not in existence at the time the incorporating act was passed.

Shortly after the start of the 1975 legislative session, a computer printout of the Governor's proposed budget for fiscal year 1976 was prepared. This document did not contain "legislative intent" statements and was used as a workbook by the finance committees and the legislature as a whole.

Upon the completion of its review of the Governor's proposed budget, the House Finance Committee prepared a second computer printout of the proposed budget, containing the "intent" statements of that committee. A limited number of copies of this report were placed in the offices of key members of the House for use by them and other interested members. Approximately two weeks after this "distribution", the House voted to adopt the finance committee's report and "intent" statements and the finance committee's substitute for House Bill No. 70 (budget bill). (1975 H. Jour., p. 1227)

During the time, or shortly thereafter, that the Governor's proposed budget was moving through the House, the same procedure was taking place in the Senate. When both the House and Senate had voted to adopt the report of their respective finance committees, a free conference committee was appointed to resolve the differences between them. A second free conference committee was appointed when the first FCC was unable to reach a compromise.

The report of the second FCC was adopted by the Senate on June 6, 1975, (1975 S. Jour., p. 1518). However, we have been informed by the Director of the Legislative Finance Division

that the second FCC met for the final time at noon on June 7, the last day of the 1975 legislative session. This meeting resulted in the addition of a number of statements of "legislative intent" which had not appeared in prior computer printouts. As a result of computer breakdowns and the normal exigencies that existed as the end of the session approached, these later statements of "intent", along with those inadvertently omitted from prior computer printouts, were typed onto the most recent printout then available. Apparently, one copy of this final report was then sent to each house sometime during the late afternoon of the final day of the session. (Neither the Department of Law nor the Legislative Finance Division have located either copy of this report.) A few hours after the arrival of this final report in the House, the House adopted the second FCC substitute for the Governor's original budget bill. (1975 H. Jour., p. 1688) It appears that the Senate never voted to adopt the statements of "intent" that were added during the last day of the session in as much as the Senate Journal indicates the Senate adopted the second FCC report on June 6, 1975, and the last meeting of the second FCC, at which "intent" statements were added to the report, occurred on June 7, 1975.

Following the adjournment of the legislature on June 7, the legislature's support staff began editing and clarifying the "intent" statements of the second FCC report. This process was completed in mid-June. During the week of June 23, a portion of the final version of the second FCC report was prepared by the Legislative Finance Division and sent to each legislator. This first portion contained the DHSS Health-Operating budget. On June 30, the remainder of the final report was sent. (Memo of 6/30/75 from Jay Hogan to Members of the Legislature) Some parts of this final report were the same as the report that emerged from the second FCC. Other portions did not appear in any version of the report but the final one. (See for example, "intent" statements at p. 169 of final FCC report, FY '76, Education-Operating Budget.)

It is these "intent" statements -- statements that were contained in some printouts and omitted from others, statements in documents containing hundreds of pages and available for perusal by legislators for but a matter of hours prior to voting thereon, statements that were subject to editing and clarification by staff members subsequent to the adjournment of the legislature, statements that apparently were not a part of the report passed by the Senate -- that are purported to have the force of law.

The document containing the intent statements which the legislature incorporated by reference into Chapter 209 is described in Section 16(a) of the law as ". . . the 'Free Conference Committee Report, FY '76, Operating and Capitol Budget' as published by the legislative finance division". Since there were a number of different FCC reports on the budget bill, the contents of which were not uniform, we must first ascertain to which report the quoted language refers.

The term "published" means to make known to people in general, to place in general circulation or to distribute or make available to the general public. Planned Parenthood Committee of Phoenix, Inc. v. Maricopa County, 375 P.2d 719, 722 (Ariz. 1962). It has been held to have the same significance as "circulate", State v. Elder, 143 P. 482 (N.M. 1914), and to possess connotations of wider distribution than that implied by words such as "communicate", "make known", or "divulge". U.S. v. Baltimore Post Co., 2 F.2d 761, 764 (D.C. Md. 1924).

It seems likely that the legislature did not have reference to the "final" report which was limited to a single copy for each house and furnished to them during the closing hours of the session. While this "final" report was prepared by the Legislative Finance Division, it was not, in fact, the final report which was subsequently published, after editing and clarification, and widely distributed. This latter report is what is generally known as and understood to be, the ". . . 'Free Conference Committee Report, FY '76, Operating and Capitol Budget' . . . ." This interpretation of the legislature's reference is consistent both with apparent legislative intent and also with common understanding. Whether this incorporation by reference of future non-statutory material is lawful is the subject of the next section of this opinion.

D. Delegation of Legislative Powers

The primary legal question concerning the incorporation by reference of future non-statutory materials into present law is whether such a procedure constitutes an unlawful delegation of a legislative power.

Because of the complexity of the issues a legislature must address, the delegation of legislative powers has become a common tool for the implementation of the legislature's will. Probably the most common type of delegation is that which occurs

when the legislature authorizes the promulgation of rules and regulations by an agency charged with the administration of a law. (See for example, AS 16.43.110, a section of Alaska's Limited Entry Act.) Courts have had little difficulty in upholding such delegations, so long as the legislature provides adequate standards for the agency's exercise of the delegated authority. See generally, Cooper, State Administration Law, vol. 1 ch. III, sec. 3.

A second common type of legislative delegation is a delegation of the authority to determine when a fact exists which is necessary to bring a law into effect. Some courts have approved such a delegation. Field v. Clark, 143 U.S. 649, 12 S. Ct. 495 (1891) (delegation by Congress to the President of power to determine when it is in the public interest to suspend provisions of law allowing free imports); Natural Milk Producer's Assn. v. City and County of San Francisco, 124 P.2d 25 (Cal. 1942) (standards for certified milk to be set by national and local dairy assoc's); Ex Parte Gerino, 77 P. 166 (Cal. 1904) (state medical school standards to be those set by an association of Medical colleges). Foeller v. Housing Authority of Portland, 256 P.2d 752 (Oregon, 1953) (authority to determine what areas are "blighted" given to housing authority). Other courts have not been so inclined. Agnew v. City of Culver, 304 P.2d 788 (Cal. App. 1957) (incorporation by reference of National Electrical Code held to be unlawful delegation); State v. Crawford, 177 P 360 (Kan. 1919) (to same effect). The only meaningful difference between the cases upholding this type of delegation and those in which the delegation was declared unlawful appears to be in the philosophy of the courts rendering the decisions.

A third type of lawful delegation by the legislature is a delegation of the authority to carry out activities ancillary to the legislative function, such as the ascertainment of facts and the making of recommendations to the legislature. Vita-Pharmacals, Inc. v. Board of Pharmacy, 243 P.2d 890 (Cal. App. 1952).

The drawing of a distinction between lawful and unlawful delegation of authority by the legislature is not always an easy task. The most-often-quoted statement of the distinction is found in Field v. Clark, supra, in which the United States Supreme Court, quoting the Supreme Court of Ohio, stated:

> The true distinction . . . is between the delegation of power to make the law, which necessarily involves a discretion as to what it shall be, and conferring authority or discretion as to its execution, to be exercised under and in pursuance of the law. The first cannot be done; to the latter no valid objection can be made. Id. at 693, 694.

Subsequent cases have reaffirmed the proposition that a legislature may not delegate its constitutional power to legislate i.e., the power to determine what the law shall be. Peters v. Frye, 223 P.2d 176 (Ariz. 1950); Tillotson v. Frohmiller, 271 P. 867 (Ariz. 1928); Dixon v. Zick, 500 P.2d 130 (Colo. 1972); Smithberger v. Banning, 262 N.W. 493 (Neb. 1935); State v. Davis, 296 P.2d 240 (Oregon, 1956); Foeller v. Housing Authority of Portland, 256 P.2d 752 (Oregon, 1953); State ex rel O'Connell v. Yelle, 320 P.2d 1086 (Wash. 1958).

In the present case, the legislature passed a bill which provides that all "intent" statements that may appear in the final second FCC report on the budget are to be a part of the law. (Ch. 209, sec. 16(a), SLA 1975). The legislature then adjourned, leaving to its support staff the task of preparing these statements with no subsequent review by the legislature. This procedure amounts to the legislature passing a law stating "contents to follow", and then turning over to its staff, without legislative review, the function of preparing the contents.

It is our opinion that this procedure for giving legal effect to "legislative intent" statements constitutes a delegation of the legislature's power to legislate in violation of Alaska Const., art. II, sec. 1.

As a further indication of the invalidity of the legislature's action here, the following very real possibility is presented. The final budget bill was sent to the Governor on June 12, 1975 (1975 H. Jour., p. 1690). The Governor then had 20 days within which to veto the bill or it would become law without his signature. (Alaska Const., art. II, §17) Yet, there was no assurance that the FCC report containing a part of that bill would be completed prior to the end of the 20 day period. The Governor's alternatives could well have been: (1) allow to become law or sign into law a bill, some of the contents of which were unknown to him; or (2) veto the entire appropriation for state government to avoid the risk.

In fact, the Legislative Finance Division's report was not sent out until June 30, the day the Governor chose to sign the bill and only two days before the bill would have become law without his signature. (1975 H. Jour., p. 1707) The Governor's constitutional powers are hollow indeed if he is to be expected to sign or veto laws before their contents are presented to him.

E. Amendment of Existing Law

To this point, this opinion has addressed the legality of the procedure by which the legislature attempted to give legal effect to statements of "legislative intent". Assuming, however, that the legislature had proceeded (or were to proceed) in the manner required to incorporate by reference, the result would still be the same, because whether or not there was a proper incorporation by reference, the legislature still may not use an appropriations bill to make or amend substantive law.

AS 47.25.130 and AS 47.25.170 provide that DHSS is to determine the amount of assistance to be granted eligible persons under the GR-Med program. This statutory authority necessarily requires that DHSS make the determination of reimbursement rates for hospitals providing GR-Med care.

The legislative intent statement in question is in conflict with the provisions of AS 47.25.130 and AS 47.25.170 insofar as it purports to affect the power to determine rates which it had delegated by statute to DHSS. By the standard cannons of statutory construction, this later expression of the will of the legislature, were it valid, would constitute an implied repeal of the above statutory provisions to the extent that they conflict with the "legislative intent" statement in question.

The question that arises is, can the legislature amend statutory law by incorporating into the general appropriations bill an as yet unpublished committee report containing the amending language?

There is no doubt that the legislature could amend the two statutory provisions cited above, either in accordance with the amending rules of the Uniform Rules of the Alaska State Legislature or by enacting legislation containing the terms of the intent statement and thereby amend by implication. The legislature cannot, however, amend substantive law by an appropriations bill.

Article II, section 13 of the Alaska Constitution provides that appropriation bills "shall be confined to appropriations". The Alaska Supreme Court has never addressed the question of what elements constitute "appropriations". Courts of other jurisdictions having similar constitutional provisions have held that certain conditions or limitations may properly be attached to appropriations in a budget bill. State ex rel. Sego v. Kirkpatrick, 524 P.2d 975 (N.M. 1974); State ex rel. Holmes v. State Board of Finance, 367 P.2d 925 (N.M. 1961); State ex rel. Lucero v. Marron, 128 P. 480 (N.M., 1912). The holding of each of these cases is that such conditions or limitations are acceptable so long as they are germane to the appropriation to which they are attached. There is, however, a limit to such conditions. Faced with an appropriation bill containing a condition fixing salaries, the Missouri Supreme Court stated:

> An appropriation bill is just what the terminology imports, and no more. Its sole purpose is to set aside moneys for specified purposes, and the lawmaker is not directed to expect or look for anything else in an appropriation bill except appropriations. As to these he is charged by the Constitution to look and watch for two things: (a) The various subjects of the bill; and (b) the account or accounts for which the payment of the State's moneys are being set apart . . . Here we have an appropriation act which not only appropriates money for the various subjects embraced therein, but which attempts to fix and regulate all salaries affected by the act which either have not been fixed by any statute, or not definitely fixed, which would include all salaries where the maximum alone was named. That the legislature has the right by general statute to fix salaries is beyond question, but has it the right to do so by means of an appropriation act? We think not. State ex rel. Hueller v. Thompson, 289 S.W. 338, 340-41 (Mo., 1926).

Article 4, section 25 of the Missouri Constitution is substantially the same as article II, section 13 of the Alaska Constitution, quoted supra, in that it limits appropriation bills to appropriations. The reason for such a provision was succinctly addressed by the Thompson court:

> As has been observed in well-reasoned cases, if the practice of incorporating legislation of general character in an appropriation bill should be allowed, then all sorts of ill conceived, questionable, if not viscious, legislation could be proposed with the threat, too, that, if not assented to and passed, the appropriations would be defeated. Id., at 341.

A second factor, present in the instant case but not in Thompson, lends additional support to the result reached by the Missouri Supreme Court. By incorporating the "intent" statement of the FCC report into the budget bill, the legislature has in effect amended AS 47.25.130 and AS 47.25.170, and changed DHSS policy of 100% reimbursement to hospitals, without any notice to the institutions which are affected by such a change. In the absence of such notice, required as to subject in the title to each bill, Alaska Const., art II, §13, hospitals were given no opportunity to express their position or to present to their representatives in the legislature their views as to the wisdom of such legislation. This notice, both to members and the affected public, is, of course, the very purpose of the requirement contained in article II, section 13, of the Alaska Constitution. United States v. Hardcastle, 10 Alaska 254 (1942); Industrial Development Authority of Pinal County v. Nelson, 509 P.2d 705 (Ariz. 1973); Bensakey Tp. School Dist. v. County Com'rs of Bucks County, 303 A.2d 258 (Pa. 1973).

F. Effect on Governor's Veto Powers

We believe that the above more than suffices to answer the question you have presented. Should any doubts remain, we raise an additional problem engendered by the legislature's action in this matter.

Article II, section 15 of the Alaska Constitution provides:

> The governor may veto bills passed by the legislature. He may, by veto, strike or reduce items in appropriation bills. He shall return any vetoed bill, with a statement of his objections, to the house of origin.

Prior case law has established that the Governor cannot veto conditions attached to an appropriation and leave only

the appropriation standing. Weldon et al. v. Ray et al., Op. No. 202-57321 (Iowa, May 12, 1975); State ex rel. Sego v. Kirkpatrick, supra at 981. In the normal situation, the Governor must decide whether the conditions attached to a particular appropriation are so onerous as to necessitate a veto of the entire appropriation. Given such a situation, the Governor is most apt to allow an appropriation to stand, notwithstanding attached conditions with which he disagrees, in order to assure the funding of the subject of the appropriation. The situation in the present case is somewhat different.

The Governor is here presented with two alternatives: (1) veto the appropriation and thereby jeopardize the existence of the GR-Med program; or (2) allow existing law to be amended by a provision which, were it in a separate bill, he would veto. This presents the very situation which the single-subject rule, Alaska Const. art. II, §13, was intended to prevent, that is, where a legislator or governor is compelled to accept a provision he does not favor in order to get one that he does favor. It is also, unquestionably, one of the reasons for the rule that an appropriations bill may include only appropriations. Alaska Const., art. II, §13. See, Suber v. Alaska State Bond Comm., 414 P.2d 548 (Alaska, 1966); Washington State School Director's Ass'n v. Department of Labor and Industries, 510 P.2d 818 (Wash. 1973).

We are, therefore, of the opinion that the "legislative intent" statement in question, as well as all other such statements of the second FCC report on the budget bill, do not possess any legal force or effect. The court's statement in State v. Culver, supra, involving the attempted incorporation by reference of the National Electrical Code, is equally applicable to the incorporation by reference of "legislative intent" statements.

> . . . If the Legislature desires to adopt a rule of the National Electrical Code as a law of this state, it should copy that rule, and give it a title and an enacting clause, and pass it through the Senate and the House of Representatives by a constitutional majority, and give the Governor a chance to approve or veto it, and then hand it over to the secretary of state for publication. Id. at 361.

The purpose of this opinion has been to examine the legal force of a statement of "legislative intent" and thereby

assist your department in assessing the strength of its position in the face of a threatened law suit. Though it is our opinion that the statement in question has no legal force, we do not mean to imply, nor should it be inferred, that your department should not comply with it. Because the "legislative intent" statement is not legally cognizable as an expression of the legislature's will, it does not mean that the statement is not in fact an expression of that will.

Should you choose to implement a policy of 80% reimbursement to hospitals providing GR-Med assistance, you must adopt a regulation to that effect pursuant to the Administrative Procedure Act. You may also wish to resolve the matter by asking the legislature to set the policy by amending the basic GR-Med statute. We will be pleased to have such legislation drafted and introduced if that is your wish.

Sincerely,

AVRUM M. GROSS

Re: Revenue Sharing Regulations

Dear Mr. McCarter:

The material you forwarded to me concerning the Revenue Sharing regulations proposed was received on June 24, and I thank you for it.

Comments concerning the regulations are as follows:

(9) HOSPITAL CONSTRUCTION AID:

(9) - (C) : The law calls for total project costs, but this regulation (C) would change that to some project costs. I don't think this is the legislative intent, nor would it appear from reading the statute that the Department was authorized to change the law. We would of course appreciate attention to this point.

(9) - (D) : On reading the statute , there certainly is no lack of clarity that the Revenue Sharing funds could flow directly to a facility sponsor whether in municipality or outside a municipality . The statute appears to very clearly permit a choice. The regulation proposed would eliminate that choice and require all revenue sharing funds to go to the municipality. That would not appear to be legislative intent.

It would please me a great deal if the Department would take these observations into consideration prior to adopting the regulations.

Sincerely,

mfb:bp

STATE OF ALASKA

DEPARTMENT OF LAW

OFFICE OF THE ATTORNEY GENERAL

WILLIAM A. EGAN, GOVERNOR

POUCH K — STATE CAPITOL
JUNEAU 99801

DATE	ROUTE TO:	✓
	JF	✓
	FILE	

August 28, 1972

The Honorable Frederick McGinnis
Commissioner
Department of Health and Social
Services
Juneau, Alaska 99801

Office of the Commissioner
SEP 11 1972
RECEIVED

Dear Commissioner McGinnis:

You have asked our opinion of whether your present method of determining "total project costs" of eligible medical construction by relying on promulgations of the Department of Health, Education and Welfare pursuant to Title VI of the Public Health Services Act as amended, meets the requirements of AS 43.18.010(j). It is our opinion that the use of these promulgations is within the scope of your discretion in the administration of this program.

AS 43.18.010(j) states as follows:

> If construction of a facility began after January 1, 1968 and state matching aid for construction approved for payment to the local government or other facility sponsor constitutes less than 25 per cent of the total project cost, the state shall pay to the local goverment or other facility sponsor each fiscal year a sum equal to $2,500 a bed for the maximum number of beds provided for in the construction design of the facility. State aid provided for in this subsection shall continue until the local government or other facility sponsor has received an amount which, combined with state matching money for construction of the facility, equals 25 per cent of the total project cost. No funds received for construction shall be used for any other purpose. (Emphasis added)

RECEIVED
SEP 1 1 1972
Comprehensive Health Planning Office

As AS 43.18.010(j) is the state counterpart of Title VI of the Public Health Services Act, 42 USCA 201 et seq., it is appropriate that you may follow standards promulgated in interpretation of that Act. To read the term "total project costs"

as used in AS 43.18.010(j) literally would mean allowing all costs even if lavish, wasteful or illegal. Since clearly that could not have been what was intended when the legislature enacted this section, your department has the implied duty to allow only those costs which are in line with the statutory purpose of this section. In this case, since no statutory guidelines are set out, you have broad discretion to define the meaning of such terms in accordance with the statutory purpose. Naturally then, these rules of the Department of Health, Education and Welfare, interpreting 42 USCA 201 et seq., may be used to assist you in defining the meaning of these statutory terms. In this case, however even more evidence of the legislature's intention in passing AS 43.18.010(j) can be seen by looking at similar state grants for other purposes.

AS 43.18.100 granting aid for school construction goes into great detail to specifically provide for the meaning of "costs of school construction." AS 43.18.100(f)(2). Since no mention of these items is made in AS 43.18.010(j) it is reasonable to assume that they were not intended to be included in the computation of "total cost" under that section and this is the general effect of following the Federal regulations.

Similarly in AS 43.18.300 providing grants for the construction of Community Facilities, express allowance is made for the cost of "feasibility studies". This term is unnecessary if "cost of construction" were to be read literally. Again, since no similar language is included in AS 43.18.010(j) it can be assumed that these costs were also not to be included.

Finally, in AS 46.03.030(b) providing funds for the cost of water systems, it is provided that the amount received is computed on the basis of those costs "not borne by the federal government". In this case, the regulations you are relying on in effect specifies those costs which will not be borne by the federal government. If it were the legislature's intention in passing AS 43.18.010(j) to pick up those costs not borne by the federal government, it would have added a similar phrase to that in AS 46.03.030(b), particularly as these two sections were before the legislature during the same session and were passed within a few days of one another.

In conclusion, it is within the scope of your administrative discretion to utilize the guidelines promulgated by the Department of Health, Education and Welfare in defining the term "total project cost" of eligible medical facilities under the provisions of AS 43.18.010(j).

Very truly yours,

JOHN E. HAVELOCK
ATTORNEY GENERAL

DEPARTMENT OF
HEALTH, EDUCATION, AND WELFARE
Public Health Service
Rockville, Maryland 20852

August 12, 1971

HEALTH GRANTS MANUAL NOTICE
S-110 FOR TITLE 2, CONSTRUCTION AND MODERNIZATION
OF HOSPITALS AND MEDICAL FACILITIES

To: Department of Health, Education, and Welfare Regional Offices and State Agencies Concerned with the Administration of Title VI of the Public Health Service Act, as amended

Subject: Transmittal of Part 24-2, Project Costs in Which the Federal Government Can and Cannot Participate

Attached is Part 24-2 of the Health Grants Manual. This revision supersedes Part 24-2 dated April 11, 1967.

Filing Suggestion

Remove Part 24-2 dated April 11, 1967 and replace it with the attached Part 24-2 dated August 12, 1971.

Harold M. Graning, M.D.
Assistant Surgeon General
Director, Health Care
Facilities Service

24-2.1 Purpose
24-2.2 Definitions
24-2.3 Costs Allowable and Nonallowable for Federal Participation
24-2.4 Costs Allowable and Nonallowable in Guaranteed Loan and Direct Loan Projects

24-2.1
Purpose

The purpose of this Part is to define necessary costs and establish principles for determining costs which are and are not allowable for Federal participation or which may or may not be included in guaranteed loans or direct loans in the construction and modernization of projects under Title VI of the Public Health Service Act, as amended. This Part does not treat other factors which affect the approvability of applications.

24-2.2
Definitions

Necessary Costs

A. Only costs which are determined to be necessary costs of construction or modernization can be approved for Federal participation. Costs resulting from construction or modernization which are excessive, elaborate, or not appropriate to the specific needs of the facility are not allowable.

Pick-up Projects

B. For pick-up projects, Federal participation is limited to the cost of completing the facility. (Phased construction does not connote a pick-up project). The uncompleted portion consists of the following:

1. Actual construction work to be completed which includes building materials and fixed equipment delivered to the site but not yet incorporated in the building;

24-2.2 Definitions (cont'd)

Pick-up Projects (cont'd)

2. Movable equipment to be delivered;

3. Services to be rendered in connection with the uncompleted construction and equipping of the project.

Incurrence of Costs

4. Project construction costs have been incurred when there is an unconditional obligation to pay for work which has been performed or services rendered. An unconditional obligation to pay arises when work has been performed or services have been rendered in accordance with the terms of the contract. In the case of equipment costs, fixed equipment costs are incurred when such equipment has been installed, and movable equipment costs are incurred when such equipment has been delivered to the possession and control of the applicant.

24-2.3
Costs Allowable and Not Allowable for Federal Participation

The following are project costs in which Federal participation may and may not be allowed. This list is not exhaustive but includes costs which will be most frequently encountered:

Definition of Site

A. Site is the tract or plot of land on which the facility is or will be located and which is required for the construction and operation of the facility and which is defined in the approved application.

24-2.3 Costs Allowable and Not Allowable for Federal Participation (cont'd)

Acquisition of Site

B. The cost of the site, including acquisition costs such as title search, title clearance and settlement fees, is not allowable, except that the portion of the site on which a public health center is located is allowable. (The cost of the site survey and soil investigation for a public health center or other project is allowable).

Site Clearance

C. It will not be necessary to clear the site of encumbrances, such as easements and rights-of-way, provided they do not interfere with the building or its appurtenances. If the site is to be cleared of existing buildings and improvements, such as overhead power transmission lines and underground water, gas or sewerage lines, the cost is allowable, provided an allowance for salvage is reflected in the bid of the contractor who performs the work.

Relocation of Utilities

D. The cost of relocating utilities and services including acquiring rights-of-way, easements or other interest in land at either the new or old location of the utilities is not allowable.

Sidewalks

E. The cost of sidewalks necessary for the use and operation of the facility and those necessary to connect sidewalks on the site with adjacent public facilities, such as roads and sidewalks, is allowable even though such connecting links extend beyond the site line.

Driveways

F. The cost of driveways located on the site and those necessary to connect with public roads which are contiguous to the site is allowable. (See "J" below)

24-2.3 Costs Allowable and Not Allowable for Federal Participation (cont'd)

Parking Areas

G. The cost of constructing parking areas on the site, including multistory and subterranean parking which is essential to the operation of the facility, is allowable. In the case of multistory and subterreanean parking, the sponsor must clearly indicate in the application (1) that the size and the nature of the area are necessary to serve the project under construction, and (2) that other suitable parking areas are not available or that the cost of acquiring such areas is prohibitive.

Landscaping

H. The cost of landscaping, including architectural service, seeding, sprigging or sodding of the site and the planting of trees and shrubs is allowable to the extent that the cost is reasonable. The cost of such service is to be reviewed on an individual basis.

Underground Sprinkler System

I. The cost of installing an underground lawn sprinkler system is allowable.

Connections to Utilities

J. The cost of connecting to utilities is allowable, provided such utilities are located in streets, roads, or alleys contiguous to the site. If the building site is distantly located with respect to public roads or streets so that excessively long utility and driveway connections are required between the building site and the public road, the cost of the excessive utility and driveway connections will not be allowable for Federal participation.

24-2.3 Costs Allowable and Not Allowable for Federal Participation (cont'd)

Off-Site Improvements

K. The cost of off-site improvements such as roads, sidewalks, and utilities including sewer lines extending beyond the public streets immediately adjacent to the project, is not allowable.

Advertising

L. Advertising costs incurred in obtaining competitive bids are allowable.

Insurance Coverage

M. The cost to the project sponsor of insurance coverage during construction is allowable.

Allowable insurance costs include the following:

1. The cost of the sponsor's liability insurance.

2. The cost of insurance covering construction in the event the insurance is carried by the sponsor rather than the contractor.

3. The cost of insurance carried by the sponsor to protect equipment purchased by the sponsor against loss or damage.

Architects' Fees

N. The cost of architectural services rendered in connection with the project as approved is allowable. This includes the cost of plans and specifications prepared by State or political subdivisions in cases where such agencies are the sponsors of approved projects.

The architect's fee may be based on a contract between the architect and the sponsor setting forth the services to be provided and the manner in

24-2.3 Costs Allowable and Not Allowable for Federal Participation (cont'd)

Architects' Fees (cont'd)

which the total fee will be determined. The architect may also be engaged on a payroll basis. In those cases where plans and specifications are prepared by a public agency, the cost may be established by fee or by computation of actual cost to the agency concerned.

Regardless of the manner in which the fee is determined, Federal participation is limited to an amount which is commensurate with accepted fees within the area.

Payments to the architect for work which is not a part of the approved project, abandoned work, or work not put under contract and any payment to the architect which is not provided for in the architectural contract are not allowable.

Consultant Fees

O. Consultant fees are allowable for financial feasibility studies and to the extent that they relate to the construction or equipping of the project. The cost of conducting feasibility studies to determine need for construction or modernization of a facility is not allowable.

Any portion of a consultant's fee which involves services performed in developing operational procedures, staffing the facility, or other functions not related to the construction and equipping of the facility is not allowable.

24-2.3 Costs Allowable and Not Allowable for Federal Participation (cont'd)

Inspection

P. The cost of supervision and inspection provided by the architect or an employee of the applicant at the site to insure that the completed work conforms with approved plans and specifications is allowable.

In those cases where the State or political subdivision is the approved applicant and supervision and inspection services are performed by such State or political subdivision, reasonable costs of such services are allowable.

Equipment

Q. The actual cost of all essential initial equipment, and equipment for the purpose of providing a service not previously provided in the community, purchased (delivered to the control of the applicant) for the approved project after the filing of the initial part of the application with the regional office is allowable. Such costs include the cost of transportation, storage and placement of equipment. The cost of reconditioning equipment which will be used in the project is allowable. The cost of donated equipment is not allowable.

24-2.3 Costs Allowable and Not Allowable for Federal Participation (cont'd)

Equipment (cont'd)

Essential initial equipment may include equipment made necessary by the expansion, remodeling, alteration, and modernization of an existing building, even though the equipment may not be located in expanded, remodeled, altered or modernized areas, except that equipment may not be located in areas that do not comply with the safety requirements of Appendix A of the Regulations.

The cost of equipment which is being purchased through a conditional sales contract is not allowable. If the hospital can demonstrate that the contract has been completed and title transferred to the applicant, the cost of the equipment is allowable. Purchases under other installment sales contracts where the applicant is owner of the equipment including those in which there is a chattel mortgage are allowable. The determining factor is whether the applicant owns the equipment or whether the vendor owns the equipment.

Surplus Property

R. Costs incurred by the sponsor in packing, handling, and transporting Federal surplus equipment are allowable.

24-2.3 Costs Allowable and Not Allowable for Federal Participation (cont'd)

Donated Land, Equipment, Services	S.	The value of donated land, material, equipment, or services including donated labor is not allowable. If a rebate or refund is received from a firm or individual from whom the material, equipment, land or service was purchased, only the net cost to the sponsor may be allowed. This does not mean that individuals, business firms, or other organizations from whom a sponsor makes purchases may not make a donation to the building fund. However, such a donation may not be related to the sale or rendering of a service if the sponsor claims such costs for Federal participation.
Bonus Payments to Contractor	T.	Bonus payments made by the sponsor to the contractor for completing work in advance of a specified time are not allowable.
Liquidated Damages	U.	Any amounts collected by sponsors on bid bonds of defaulting bidders or as liquidated damages for failure of a contractor to complete the work on time shall be disregarded in determining the cost of construction for the purpose of calculating the Federal share.
Damage Judgments Against Sponsor	V.	Expenses incurred as damages arising out of the construction or equipping of the project, whether established by judicial determination, arbitration, negotiation, or otherwise, are not allowable.

24-2.3 Costs Allowable and Not Allowable for Federal Participation (cont'd)

Maintenance of Records	W.	Costs incurred by the project sponsor in the preparation and maintenance of administrative, technical, fiscal and accounting records in connection with the approved project are allowable.
Sales Tax	X.	The nonrefundable sales tax and Federal excise tax which a project sponsor pays in connection with constructing and equipping an approved project are allowable.
Space for the Private Practice of Medicine	Y.	The cost of office space intended solely for the conduct of the private practice of medicine or dentistry is not allowable.
Space to be Leased to Radiologist or Pathologist	Z.	The cost of space to house the radiology and pathology services of the hospital and the equipment therein which is to be leased for operation to a radiologist or pathologist is allowable provided the hospital retains authority to control the purposes for which the space is utilized in order to insure that services to be provided in such space are consistent with the needs and requirements of the hospital and the community which it serves.
Space for Revenue Purposes	AA.	Costs for office and other space constructed solely for revenue purposes or for the convenience of the occupants as contrasted with the operation of the facility are not allowable.
Space and Equipment for Religious Activities	BB.	The cost of space and equipment for the provision of spiritual or religious services to patients and staff in eligible medical facilities is allowable where appropriate to the type of facility involved and reasonable in amount.

24-2.3 Costs Allowable and Not Allowable for Federal Participation (cont'd)

Space and Equipment for Religious Activities (cont'd)

Costs of any distinctly sectarian or denominational features of construction or the cost of equipment characteristic of, or peculiar to, any sect or denomination are not allowable.

Fund Raising Expenses -- Memorial Plaques

CC. Costs incurred by the sponsor in raising the non-Federal share of the cost of the project are not allowable. This includes memorial plaques inscribed with the names of persons, business firms or other organizations, or book of remembrances used to give recognition to contributors.

Public Health Facilities in Private Nonprofit Hospitals

DD. The cost of constructing and equipping facilities in a private nonprofit hospital which are intended for the provision of public health services by State or local health departments is not allowable. (Comptroller General's opinion).

Legal Counsel's Fees

EE. Costs of legal services are not allowable other than those incidental to the acquisition of sites for public health centers. (See 24-2.3B).

Gift Shops
Flower Shops
Snack Bars

FF. The cost of space and equipment providing gift shop, flower shop, and snack bar services is allowable. The need for and size of such space is to be reviewed in the light of patient needs and operation of the facility.

Unfinished Space

GG. The cost of any unfinished or partially finished space is not allowable. This does not include space in a basement, unfinished or partially finished, resulting from excavation work necessary for the construction of the building in conformance with the approved plans and specifications.

24-2.3 Costs Allowable and Not Allowable for Federal Participation (cont'd)

Books	HH.	The cost of reference books to be used by the professional and technical staff is allowable. Purchase of these books is restricted to those which are essential and necessary to the need and operation of the facility. The cost of other books, periodicals and subscriptions to journals and magazines for either patients or staff is not allowable.
Television	II	The cost of purchasing and installing television systems, including the antenna system, is allowable. A closed television system is allowable where the program of the facility justifies such a system.
Short-term Care Facilities		1. Federal participation may be allowed in the cost of television sets for day rooms and patient rooms.
Long-term Care Facilities		2. Federal participation may be allowed in the cost of television sets for day rooms and patient rooms.
Nurses' Dormitory		3. Federal participation may be allowed in the cost of a television set for the main lounge.
Fallout Protection	JJ.	Costs in providing reasonable radiation fallout protection including the cost of space necessary to the establishment of a radiation monitoring station are allowable.
Housing Staff for Nursing Home	KK.	The cost of quarters to house staff of a nursing home is not allowable. The cost of limited quarters for a nurse on 24-hour duty may be allowed in an approved project.

24-2.3 Costs Allowable and Not Allowable for Federal Participation (cont'd)

Pictures and Murals

LL. The cost of the painting of murals is not allowable. The cost of pictures is allowable to the extent that the number and cost are reasonable.

Floor Finish Materials

MM. The cost of only one type of floor finish material is allowable in any room or area. Thus the cost of carpeting installed on a bare concrete slab is allowable while the cost of carpeting installed on a resilient tile surface is not allowable. Decorative rugs of less than room size are exempted from this requirement. (Soft flooring material such as carpeting and resilient tile must have a flame spread rating as required by Public Health Service publication No. 930A-7).

Quarters for Residents and Interns

NN. The cost of quarters for residents and interns whether located in the hospital building or in a separate building is allowable. The cost of quarters to house families of residents and interns is not allowable. (Housing for the nursing staff of a hospital is also allowable. See Part 24-1).

24-2.4 Costs Allowable and Not Allowable in Guaranteed Loan and Direct Loan Projects

A. The guidelines set forth in 24-2.1 through 24-2.3 of this Part apply to projects involving guaranteed loans or direct loans.

B. Costs incident to the loan such as legal fees, financing fees, or interest during construction are not allowable.

C. Loans guaranteed by HEW or direct loans made by HEW cannot be used to refinance an existing indebtedness.

24-2.4 Costs Allowable and Not Allowable in Guaranteed Loan and Direct Loan Projects (cont'd)

NOTE:

Applicants who seek guaranteed loans or direct loans must arrange for financing during construction (short term financing including interest). While a commitment will be made by HEW upon initial approval of an application to guarantee a loan or to make a direct loan, as the case may be, the actual guarantee or purchase of bonds with payment of interest subsidy will not be effected until construction of the project is completed.

Title 42—PUBLIC HEALTH

Chapter I—Public Health Service, Department of Health, Education, and Welfare

SUBCHAPTER D—GRANTS

PART 53—GRANTS, LOANS AND LOAN GUARANTEES FOR CONSTRUCTION AND MODERNIZATION OF HOSPITALS AND MEDICAL FACILITIES

On July 29, 1971, a notice of proposed rule making was published in the FEDERAL REGISTER (36 F.R. 14016) proposing a revision of 42 CFR Part 53, relating to grants, loans and loan guarantees for the construction and modernization of hospitals and medical facilities under Title VI of the Public Health Service Act (42 U.S.C. 291 et seq.).

Interested persons were invited to submit, within 30 days, written comments, suggestions or objections regarding the proposed regulations.

A number of responses were received. The substance of these comments, and the Department's response thereto, is summarized below.

Changes have been made in the final regulations as a result of the following comments on the proposal:

1. *Allotment of direct loan and loan guarantee funds.* It was pointed out that the proposed formula for allotment of loan and loan guarantee funds to States did not include the element "need for construction", which is required by statute (sec. 622(a), Public Health Service Act).

The omission of the element "need for construction" was inadvertent. It has now been included in the formula (§ 53.92).

2. *Size criteria for mental and tuberculosis hospitals.* It was suggested that the 3,000-bed maximum size for mental hospital projects is contrary to the Federal policy of encouraging a trend away from large State or municipal "warehouses" for the mentally ill; and that the 100-bed minimum size for tuberculosis hospitals is contrary to the policy of the program to include necessary TB beds as units of general hospitals, rather than as separate entities.

The size criteria for both mental health and TB hospitals (§§ 53.102 and 53.103 of the proposal) have been deleted.

3. *Review of State plans by areawide health planning agencies.* It was suggested that, in addition to the review of individual projects by areawide health planning agencies required by statute, the State plan itself should be submitted in draft form to such agencies for review and comment.

Although this suggested addition has been program policy since January 1971, it constitutes a step in the plan review process which should more logically be included in the regulations. Accordingly, a provision has been added (§ 53.121(b)) requiring that the State Hill-Burton agency submit the State plan and any modifications thereof in final draft, before submission to the Secretary, to each agency which has developed an areawide health plan pursuant to section 314(b) of the Public Health Service Act with respect to an area in the State and, with respect to any area in which there is no such agency, to the agency administering the State plan under section 314(a) of the Act.

4. *Assurance of reasonable volume of services to persons unable to pay therefor.* Several comments related to the assurance which has been authorized by statute (section 603(e)(2), PHS Act) and required by regulation since the program's inception, and which was restated in § 53.111(b) of the proposal, with respect to the provision of a reasonable volume of services for persons unable to pay therefor.

That assurance is currently the subject of litigation in a number of suits in which the Secretary has been named or joined as a defendant. A new regulation designed to define the scope of the assurance more clearly and to govern its enforcement is under preparation in the Department and will be published separately in the near future as a notice of proposed rule making with invitation for public comment. In the interim, the assurance of a reasonable volume of services for persons unable to pay therefor has been revised so as to restate the statutory language, and has been placed in a separate section (§ 53.111). In addition, the provisions relating to community service (§ 53.111(a) of the proposal), nondiscrimination on account of creed (§ 53.111(c)), Title VI of the Civil Rights Act of 1964 (§ 53.112), and nondiscrimination in construction contracts (§ 53.113) have been placed in a new § 53.112, as paragraphs (a)(1), (a)(2), (c), and (b), respectively.

5. *Use of 1960 data in determining poverty areas.* Objection was raised to the fact that "the latest available published data from the Bureau of the Census", which State agencies are required to use in determining rural and urban poverty areas under § 53.129 of the proposal, is currently the data from the 1960 census—1970 census data will not be available until at least February 1972.

To alleviate this problem, a paragraph has been added providing that if States can demonstrate to the satisfaction of the Secretary that the income levels of families in particular areas have changed sufficiently since the date of the latest available census data to justify changes in the ranking of such areas, they may qualify as rural or urban poverty areas.

In addition, the following comments were received:

6. *Fifty-year title requirement.* Objection was raised to the requirement that an applicant provide assurance that he has or will have a fee simple or other interest in the construction site sufficient to assure undisturbed use of the facility for a period of 50 years (§ 53.128(a) of the proposal).

The 50-year title requirement is statutory (see section 15(1), PHS Act).

7. *Services in outpatient facilities.* It was suggested that a more specific list of minimum services to be provided in outpatient facilities be developed (§ 53.1(j) of the proposal).

It is the Department's judgment that no inclusion of specific types of outpatient services is necessary, since the emphasis is on the comprehensiveness of such facilities. Policy guidelines specify that single purpose outpatient facilities such as alcoholic or narcotic addiction centers are eligible where they serve one or more general hospitals within the same service area under formal written agreements. This same arrangement has been made for other types of single purpose facilities eligible in the past, such as laboratory or laundry facilities to be used by a number of general hospitals. Maintaining this concept strengthens the emphasis on shared services and reduction of duplication of functions.

8. *"Comprehensive health care".* It was suggested that the term "comprehensive" as used in § 53.81(a) of the proposal is too general, and that a list of basic minimum services should be included by way of definition.

"Comprehensive health care" is deliberately left undefined, since it is to be construed in relation to the need of a community/service area. To spell out a list of services invites duplication of those services by applicants in order to qualify for assistance. Priority judgment will be applied in favor of the applicant who presents the best program to meet the largest share of the defined needs.

In addition to the changes described in paragraphs 1–5 above, a number of editorial and technical changes have been included.

After consideration of all the comments and suggestions received, the revision as proposed is hereby adopted, subject to the following changes:

1. The first sentence of § 53.42 is revised to read as set forth below.

2. Paragraph (c) of § 53.84 is changed by inserting ")" immediately after the word "section".

3. Subparagraph (2) of § 53.92(a) is revised to read as set forth below.

4. Paragraph (b) of § 53.94 is revised to read as set forth below.

5. Sections 53.102 and 53.103 are deleted, and § 53.104 is renumbered as § 53.102.

6. Subpart L is revised to read as set forth below.

7. Section 53.121 is revised to read as set forth below.

8. Subdivision (1) of § 53.128(1)(2) is revised to read as set forth below.

9. Paragraph (c) of § 53.129 is redesignated as paragraph (d) of such section, and a new paragraph (c) is inserted.

Effective date. These regulations shall be effective upon publication in the FEDERAL REGISTER (1-6-72).

Dated: December 6, 1971.

VERNON E. WILSON,
Administrator, Health Services and Mental Health Administration.

Approved: December 30, 1971.

ELLIOT L. RICHARDSON,
Secretary.

Subpart A—Definitions

Sec.
53.1 Definitions.

Subpart B—Distribution of Beds for Acute and Long-Term Illness (Excluding Mental and Tuberculosis)

53.11 State need (standards of adequacy).
53.12 Service areas.
53.13 Existing general hospital beds and long-term care beds.

Subpart C—Distribution of Tuberculosis Hospital Beds

53.21 State need (standards of adequacy).
53.22 Distribution.
53.23 Existing tuberculosis hospital beds.

Subpart D—Eligibility, Distribution and Priority of Beds for the Mentally Ill

53.31 Mental health services principally for persons residing in the community.
53.32 Mental health services not principally for persons residing in the community.
53.33 Distribution.
53.34 Existing mental hospital beds.

Subpart E—Distribution of Public Health Centers

53.41 State need (standards of adequacy).
53.42 Distribution.
53.43 Existing public health centers.

Subpart F—Distribution of Outpatient Facilities

53.51 State need (standards of adequacy).
53.52 Distribution (service areas).
53.53 Existing outpatient facilities.

Subpart G—Distribution of Rehabilitation Facilities

53.61 State need (standards of adequacy).
53.62 Distribution.
53.63 Existing rehabilitation facilities.

Subpart H—Distribution of Modernization Projects for All Categories of Facilities

53.71 Determination of need.
53.72 Distribution.

Subpart I—Priority of Projects

53.81 General.
53.82 Hospitals (new construction).
53.83 Facilities for long-term care (new construction).
53.84 Outpatient facilities (new construction and modernization).
53.85 Rehabilitation facilities (new construction).
53.86 Public health centers (new construction).
53.87 Modernization.

Subpart J—Allotments for Modernization Grants and for Loans and Loan Guarantees, and Transfer of State Allotments

53.91 Allotments for modernization grants.
53.92 Allotments for direct loans and loan guarantees.
53.93 Transfer of allotments to another State.
53.94 Transfer of grant allotments to another category within a State.

Subpart K—General Standards of Construction and Equipment

53.101 General.
53.102 Size of facilities for long-term care.

Subpart L—Services for Persons Unable to Pay; Community Service; Nondiscrimination

53.111 Services for persons unable to pay.
53.112 Community service; nondiscrimination.

Subpart M—Methods of Administration of the State Plan

Sec.
53.121 General; review and comment by areawide health planning agencies.
53.122 Construction program.
53.123 Personnel administration.
53.124 Fair hearings.
53.125 Construction standards.
53.126 Minimum standards of maintenance and operation.
53.127 Application; submittal; amendment; processing.
53.128 Assurances from applicant.
53.129 Determination of rural or urban poverty areas.
53.130 Certification to the Secretary.
53.131 Requests for construction payments for grants.
53.132 Fiscal and accounting requirements.
53.133 Access by Comptroller General.
53.134 Notice of change of status of facility.
53.135 Good cause for other use of facility.

Subpart N—Loan Guarantees and Direct Loans

53.141 Applicability.
53.142 Definitions.
53.143 Eligibility for loan guarantees and direct loans.
53.144 Approval of applications.
53.145 Maximum amount of direct loan or guaranteed loan.
53.146 Forms of evidence of indebtedness.
53.147 Security for loans.
53.148 Opinion of legal counsel.
53.149 Length and maturity of loans.
53.150 Interest on direct loans.
53.151 Repayment.
53.152 Loan Guarantee Agreement and Direct Loan Agreement.
53.153 Loan closing.
53.154 Waiver of right of recovery.

AUTHORITY: The provisions of this Part 53 issued under secs. 215, 603, 623(b), Public Health Service Act as amended, 58 Stat. 690, 78 Stat. 451, 84 Stat. 340; 42 U.S.C. 216, 291o, 291j-3(b).

Subpart A—Definitions

§ 53.1 Definitions.

All terms not defined herein shall have the same meanings as given them in the Act. As used in this part:

(a) "Act" means title VI of the Public Health Service Act, as amended (42 U.S.C. 291 et seq.).

(b) "Secretary" means the Secretary of Health, Education, and Welfare and any other officer or employee of the Department of Health, Education, and Welfare to whom the authority involved has been delegated.

(c) "State agency" means the agency designated by a State pursuant to section 604(a)(1) of the Act.

(d) "Service area" means the geographic territory from which patients come or are expected to come to existing or proposed hospitals or existing or proposed public health centers, or existing or proposed medical facilities (i.e., facilities for long-term care, outpatient facilities, rehabilitation facilities), the delineation of which is based on such factors as population distributon, natural geographic boundaries, and transportation and trade patterns, and all parts of which are reasonably accessible to existing or proposed hospitals, public health centers, or medical facilities. When appropriate, interstate areas may be formed with the mutual agreement of the States concerned.

(e) "Hospital" means general, tuberculosis, mental, and other types of hospitals, and related facilities such as laboratories, outpatient departments, nurses' home facilities, extended care facilities, facilities related to programs for home health services, self-care units, education or training facilities for health professions personnel operated as an integral part of a hospital, and central service facilities operated in connection with hospitals, but does not include any hospital providing primarily domiciliary care.

(f) "General hospital" means any hospital for short-term inpatient medical or surgical care of illness or injury, which may include obstetrical care.

(g) "Mental hospital" means a hospital (including long-term care, intensive care, or both) for the diagnosis and treatment of mental illness.

(h) "Tuberculosis hospital" means a hospital for the diagnosis and treatment of tuberculosis.

(i) "Facility for long-term care" means a facility (including an extended care facility) providing community service for inpatient care for convalescent or chronic disease patients who require skilled nursing care and related medical services

(1) Which is a hospital (other than a hospital primarily for the care and treatment of mentally ill or tuberculosis patients) or is operated in connection with a hospital, or

(2) In which such nursing care and medical services are prescribed by, or are performed under the general direction of, persons licensed to practice medicine or surgery in the State. Institutions furnishing primarily domiciliary care are not included.

"Chronic disease hospitals" and "nursing homes" as used in the document "General Standards of Construction and Equipment for Hospital and Medical Facilities," incorporated by reference in § 53.101(a), constitute "facilities for long-term care."

(j) "Outpatient facility" means a facility, located in or apart from a hospital, providing community service for the diagnosis or diagnosis and treatment of ambulatory patients (including ambulatory inpatients) in need of physical and/or mental care

(1) Which is operated in connection with a hospital; or

(2) In which patient care is under the professional supervision of persons licensed to practice medicine or surgery in the State or, in the case of dental diagnosis or treatment, under the professional supervision of persons licensed to practice dentistry in the State; or

(3) Which offers to patients not requiring hospitalization the services of licensed physicians in various medical specialities, and which makes provision for its patients to receive a reasonably full range of diagnostic and treatment services.

(k) "Rehabilitation facility" means a facility providing community service which is operated for the primary purpose of assisting in the rehabilitation of disabled persons through an integrated program under competent professional supervision of: Medical evaluation and services; and psychological, social, or vocational evaluation and services. The major portion of the required evaluation and services must be furnished within the facility; and the facility must be operated either in connection with a hospital or as a facility in which all medical and related health services are prescribed by, or are under the general direction of, persons licensed to practice medicine or surgery in the State. For purposes of this paragraph:

(1) An integrated program brings together as a team specialized personnel from the (i) medical, and (ii) psychological, social, or vocational areas for the purpose of pooling information, interpretations and opinions for the development of a rehabilitation plan of services in which the disabled individual is viewed as a whole. When members of the team contribute to the diagnosis and treatment of illness, their contributions must be coordinated under medical responsibility.

(2) A disabled person is an individual who has a physical or mental condition which, to a material degree, limits, contributes to limiting, or if not corrected, will probably result in limiting, the individual's performance or activities to the extent of constituting a substantial physical, mental, or vocational handicap.

(3) Medical service, in the case of a rehabilitation facility operated in connection with a hospital, means a service under the direct personal supervision of a medical director, varied and extensive availability of specialized consultants, physical and occupational therapy department and occupation therapy services, and medical evaluation.

(4) Medical service, in the case of a rehabilitation facility not operated in connection with a hospital, means medical supervision, availability by agreement of medical consultants, and evaluation and services suitable to the needs of the disabled persons to be served.

(5) Social service means evaluation and services by a qualified social worker in amounts and variety appropriate to the rehabilitation needs of the disabled persons to be served.

(6) Psychological service means evaluation and services by a qualified psychologist in amounts and variety appropriate to the rehabilitation needs of the disabled persons to be served.

(7) Vocational service, in the case of a rehabilitation facility operated in connection with a hospital, means evaluation and services by a qualified vocational rehabilitation counselor in amounts and variety appropriate to the rehabilitation needs of the disabled persons to be served.

(8) Vocational service, in the case of a rehabilitation facility not operated in connection with a hospital, means those vocational services required in hospitals, plus a variety of vocational services appropriate to the program and the persons to be served, such as prevocational exploration, work evaluation and vocational training.

(l) "Public health center" means a publicly owned facility utilized by a local health unit for the provision of public health services, including related publicly owned facilities such as laboratories, clinics, and administrative offices operated in connection with public health centers.

(m) "Local health unit" means a single county, city, county-city, or local district health unit, as well as a State health district unit where the primary function of the State district unit is the direct provision of public health services to the population under its jurisdiction.

(n) "Public health services" means services provided through organized community effort in the endeavor to prevent disease, prolong life, and maintain a high degree of physical and mental efficiency.

(o) "Hospital bed" means a bed for an adult or child patient. Bassinets for the newborn in a maternity unit nursery, beds in labor rooms, recovery rooms, and other beds used exclusively for emergency purposes are not included in this definition.

(p) "Population", with respect to any State or any area thereof, means the latest figures of civilian population certified by the U.S. Department of Commerce.

(q) "Projected population" means the projected State population estimates obtained from the U.S. Department of Commerce and provided to the State agency by the Secretary. The State agency shall distribute such population among the various areas, provided that the sum of the projected populations distributed among the various areas shall not exceed the figures provided by the Secretary.

(r) "Nonprofit hospital," "nonprofit outpatient facility," "nonprofit rehabilitation facility," and "nonprofit facility for long-term care" means any hospital, outpatient facility, rehabilitation facility, or facility for long-term care, as the case may be, owned and operated by one or more nonprofit corporations or associations, no part of the net earnings of which inures, or may lawfully inure, to the benefit of any private shareholder or individual.

(s) "Community service", when applied to any facility, means that (1) the services furnished are available to the general public, or (2) admission is limited only on the basis of age, medical indigency, or type or kind of medical or mental disability, or (3) the facility constitutes a medical or nursing care unit of a home or other institution which home or other institution is available in accordance with subparagraph (1) or (2) of this paragraph.

(t) "Modernization" includes alteration, major repair, remodeling, replacement, and renovation of existing buildings (including initial equipment thereof), and replacement of obsolete, built-in equipment of existing buildings. It does not include the replacement of a facility or a portion of a facility to an inpatient capacity greater than the capacity of the existing facility.

(u) "Equipment" includes those items which are necessary for the functioning of the facility but does not include items of current operating expense such as food, fuel, drugs, dressings, paper, printed forms, and soap.

(v) "Built-in equipment" means that equipment which is affixed to the facility, and usually included in the construction contract.

(w) "Major repair" means those repairs to an existing building excluding routine maintenance which restore the building to a sound state, the cost of which is no less than $100,000.

(x) "State" means the 50 States, Puerto Rico, Guam, the Virgin Islands, American Samoa, the District of Columbia, and the Trust Territories of the Pacific Islands.

Subpart B—Distribution of Beds for Acute and Long-Term Illness (Excluding Mental and Tuberculosis)

§ 53.11 State need (standards of adequacy).

The total number of beds for acute and long-term illness required to provide adequate service to the people residing an any State shall be the total of such beds required for individual service areas within the State. The number of beds required for each service area shall be determined by the State agency as follows:

(a) For general hospitals,

(1) Step (i): Multiply the current area use rate (area patient days per 1,000 current area population per year) by the projected area population (in thousands) and divide by 365 to obtain a projected area average daily census; Step (ii): Divide the projected area average daily census by 0.85 (occupancy factor) and add 10 to obtain the number of beds needed in the area, or

(2) By a different method which shall (i) incorporate, as a minimum, area utilization experience, projected area population and a desirable occupancy factor, and (ii) be submitted to the Secretary for approval prior to its use in the State plan.

(3) State agencies may adjust the bed need, as determined by one of the above methods, for specific areas with unusual circumstances or conditions; any such adjustment must be fully explained and justified in the State plan.

(b) For facilities for long-term care,

(1) Step (i): Multiply the current area use rate (area patient days per 1,000 current area population per year) by the projected area population (in thousands) and divide by 365 to obtain a projected area average daily census; Step (ii) Divide the projected area average daily census by 0.90 (occupancy factor) and add 10 to obtain the number of beds needed in the area, or

(2) By a different method which shall (i) incorporate, as a minimum, area utilization experience, projected area population and a desirable occupancy factor, and (ii) be submitted to the Secretary for approval prior to its use in the State plan.

(3) State agencies shall take into consideration (i) adjustment of bed need, as determined by one of the above methods, for areas in which a change in use rate is anticipated, and (ii) the use of area population age 65 and over, where appropriate, in place of total area population in determining bed need for long-term care.

§ 53.12 Service areas.

(a) The same service areas shall be used for planning general hospital facilities and facilities for long-term care, except that State agencies may use different areas for planning facilities for long-term care when this is consistent with effective relationships between the location of facilities and the need for services.

(b) Each service area shall have sufficient population that it may have general hospital or long-term care services appropriately planned in one or more facilities.

(c) The State agency shall describe in the State plan the population characteristics of each service area and outline a program for the distribution of beds and facilities for general hospital and long-term care.

§ 53.13 Existing general hospital beds and long-term care beds.

(a) The count of existing general hospital beds shall include the beds in the hospitals of this category as defined in Subpart A, which are not included in the count of beds for any other category under this part, and beds in any mental hospital, tuberculosis hospital or facility for long-term care which are specifically assigned for general hospital care, provided the beds so assigned in any such facility number 10 or more.

(b) The count of existing beds in facilities for long-term care shall include the beds in the facilities of this category as defined in Subpart A, which are not included in the count of beds in any other category under this part, and beds in any general, mental or tuberculosis hospital which are specifically assigned to long-term care other than mental or tuberculosis, provided the beds so assigned to any such facility number 10 or more.

(c) The count of existing beds described in paragraphs (a) and (b) of this section shall: (1) Include beds in all nursing units, including those currently closed or assigned to easily convertible nonpatient use, and bed space under construction, and (2) exclude beds in labor rooms, recovery rooms, emergency rooms, beds used intermittently for diagnosis or treatment, beds set up for temporary use, bassinets in new-born nurseries in maternity units, and unfinished bed space not under construction.

(d) The number of existing facilities in each category referred to in this subpart shall be counted.

(e) Existing beds described in paragraphs (a) and (b) of this section shall be classified as conforming or nonconforming according to specific standards of plant evaluation. Such standards shall include:

(1) Fire-resistivity of each building;

(2) Fire and other safety factors of each building;

(3) Design and structural factors affecting the function of nursing units;

(4) Design and structural factors affecting the function of service departments.

Subpart C—Distribution of Tuberculosis Hospital Beds

§ 53.21 State need (standards of adequacy).

The number of beds required to provide adequate hospital services for tuberculosis patients in any State or service area shall be determined by the following method: Divide the current average daily census of each hospital by 0.90 (occupancy factor).

§ 53.22 Distribution.

Tuberculosis hospitals receiving grants under the Act shall be built in centers of population, in proximity to general hospitals, with a view to developing community based inpatient and outpatient programs rather than isolated inpatient programs.

§ 53.23 Existing tuberculosis hospital beds.

(a) The count of existing tuberculosis hospital beds shall include the beds in tuberculosis hospitals, which are not included in the count of beds for any other category, and also beds in any general hospital which are specifically assigned for the care of patients with tuberculosis, provided the beds so assigned in any such general hospital number 10 or more.

(b) Existing tuberculosis hospital beds shall be classified as conforming or nonconforming according to plant evaluation standards as set forth in Subpart B of this part.

Subpart D—Eligibility, Distribution and Priority of Beds for the Mentally Ill

§ 53.31 Mental health services principally for persons residing in the community.

(a) For the purpose of determining need and priority, the State plan approved or approvable under the Community Mental Health Centers Act (42 U.S.C. 2681 et seq.) shall constitute that portion of the plan under the Act for construction of facilities for providing services principally for persons residing in a particular community or communities in or near which the facility is situated for the prevention or diagnosis of mental illness, or care and treatment of mentally ill patients, or rehabilitation of such persons.

(b) Special consideration shall be given to those projects for which the applicant sets forth in his application a reasonable and feasible proposal for the development, within a reasonable period of time, of a program for the provision of those essential elements of comprehensive mental health services prescribed in § 54.212 of this chapter relating to community mental health centers.

(c) An application for the construction of facilities specified in paragraph (a) of this section may be approved under this part only if the Secretary determines that funds are not available under the Community Mental Health Centers construction grant program (Part 54, Subpart C, of this chapter).

§ 53.32 Mental health services not principally for persons residing in the community.

(a) With respect to facilities for the mentally ill which do not provide services principally for persons residing in a particular community in or near which the facility is situated, special consideration shall be given to those projects for remodeling or replacing services and facilities which do not increase bed capacity, or if services are being expanded, the applicant demonstrates that no alternative plan for provision of such expanded services is feasible.

(b) An application for construction of facilities specified in paragraph (a) of this section may be approved only if it conforms with the State plan approved under the Act.

§ 53.33 Distribution.

Mental hospitals receiving grants under the Act shall be built in centers of population, as a part of or in proximity to general hospitals, with a view to developing community based inpatient and outpatient programs rather than isolated inpatient programs.

§ 53.34 Existing mental hospital beds.

(a) The count of existing mental hospital beds shall include the beds in mental hospitals, which are not included in the count of beds in any other category, and also beds in any general hospital which are specifically assigned for the comprehensive inpatient care of patients with mental illness.

(b) Existing mental hospital beds shall be classified as conforming or nonconforming according to plant evaluation standards as set forth in Subpart B of this part.

Subpart E—Distribution of Public Health Centers

§ 53.41 State need (standards of adequacy).

(a) The number of public health centers to be planned in a State shall be adequate to meet the needs of the people of that State.

(b) The need shall be determined after consultation with the State health authority (where the State agency is not the State health authority) and with local health departments where such departments are independent operating units.

§ 53.42 Distribution.

The general method of distribution of public health centers throughout the State shall conform to the plan of organization of local health units within the State. In instances where the State agency is not the State health authority, the method of distribution shall be determined after consultation with the State health authority.

§ 53.43 Existing public health centers.

(a) Where the State agency is not the State health authority, the number of existing public health centers shall be determined after consultation with the State health authority.

(b) Existing public health centers shall be classified as conforming or nonconforming according to plant evaluation standards, which shall include:

(1) Fire-resistivity of each building;

(2) Fire and other safety factors of each building;

(3) Design and structural factors affecting the function of the center.

Subpart F—Distribution of Outpatient Facilities

§ 53.51 State need (standards of adequacy).

Outpatient facilities shall be planned in sufficient number to make at least the basic minimum services readily available to all persons in the State. Provision of the basic minimum services requires facilities for examination of patients by a physician or a dentist, and the provision of clinical laboratory and diagnostic X-ray services.

§ 53.52 Distribution (service areas).

In determining the need for additional outpatient facilities in an area as a basis for distribution of such facilities, special consideration shall be given to areas in which there is a shortage of services provided by private physicians and dentists. Outpatient facilities should be planned in the same service areas used for planning hospitals except that more than one outpatient facility service area may be planned in such hospital service area, resulting in a subdivision of the hospital service area into a number of outpatient facility service areas.

§ 53.53 Existing outpatient facilities.

(a) The count of existing outpatient facilities shall exclude:

(1) Offices of private physicians and dentists, whether for individual or group practice;

(2) Industrial clinics for employees only, first aid clinics, and similar facilities not furnishing a community service.

(b) Existing outpatient facilities shall be classified as conforming or nonconforming according to plant evaluation standards as set forth in Subpart E of this part.

Subpart G—Distribution of Rehabilitation Facilities

§ 53.61 State need (standards of adequacy).

Rehabilitation facilities shall be planned by each State so that all persons in the State shall have access to integrated rehabilitation services for all types of disabilities. The facility or facilities may be programmed in the State or by joint planning with one or more other States to serve the residents of such States. In determining the number of rehabilitation facilities and services needed, the State shall consider such factors as the particular needs of the population to be served and the scope and nature of service of the existing and proposed facilities.

§ 53.62 Distribution.

In determining the need for additional rehabilitation services as a basis for distribution of rehabilitation facilities, consideration shall be given to (a) rehabilitation services provided in existing facilities, avoiding duplication and overlapping of services; and (b) availability of rehabilitation services to people in all geographical areas.

§ 53.63 Existing rehabilitation facilities.

The count of existing rehabilitation facilities shall include existing beds in such facilities. Such beds shall be classified in accordance with the procedures set forth in Subpart B of this part.

Subpart H—Distribution of Modernization Projects for All Categories of Facilities

§ 53.71 Determination of need.

(a) The need for modernization shall be determined for each category of facilities by evaluation of existing facilities and with initial consideration being given to the most densely populated areas of the State. The evaluation shall be based on specific standards of plant evaluation, which shall include:

(1) Fire-resistivity of each building;

(2) Fire and other safety factors of each building;

(3) Design and structural factors affecting the function of the facility.

(b) Based on the evaluation, beds or facilities shall be classified as conforming or nonconforming. Those beds or facilities which are classified as nonconforming shall represent the beds and facilities in need of modernization.

(c) In the event that a service area has a total of existing conforming beds or facilities and existing nonconforming beds or facilities needing modernization which exceeds the total need for the service area, the number of beds or facilities to be modernized shall be reduced accordingly. At no time shall the beds or facilities to be modernized, when added to the existing conforming beds or facilities, be greater than the total beds or facilities needed in any one category.

§ 53.72 Distribution.

Modernization shall be planned for general hospitals, facilities for long-term care, and outpatient facilities in the service areas used for planning new construction. For other categories of facilities, modernization may be planned on a statewide basis.

Subpart I—Priority of Projects

§ 53.81 General.

The general manner in which the State agency shall determine the priority of projects included in the State construction program shall be based on the relative need of different service areas lacking adequate facilities and shall conform to the principles set out in this subpart. In addition to the specific considerations set forth in this subpart with respect to particular types of projects, special consideration shall be given.

(a) To facilities which, alone or in conjunction with other facilities, will provide comprehensive health care, including outpatient and preventive care as well as hospitalization;

(b) To facilities which will provide training in health or allied health professions; and

(c) To facilities which will provide to a significant extent for the treatment of alcoholism.

§ 53.82 Hospitals (new construction).

In determining the priority of projects for new construction of hospitals, special consideration shall be given to hospitals serving areas with relatively small financial resources and, at the option of each State, to hospitals serving rural communities. Relative need for new construction of hospitals shall be expressed in terms of the ratio of existing beds to total beds needed in the service area.

§ 53.83 Facilities for long-term care (new construction).

Priority shall be determined on the basis of the relative need for beds in facilities for long-term care in the area to be served by the project taking into account the utilization of existing beds and giving special consideration to projects operated by or affiliated with hospitals. Relative need for new construction shall be expressed in terms of the ratio of existing beds to total beds needed in each service area.

§ 53.84 Outpatient facilities (new construction and modernization).

(a) In determining the priority of projects for construction or modernization of outpatient facilities, special consideration shall be given to any outpatient facility that will be located in, and provide services for residents of, an area determined by the Secretary pursuant to § 53.120 to be a rural or urban poverty area.

(b) Subject to the provisions of paragraph (a) of this section priority of projects for new construction of outpatient facilities shall be determined on the basis of the relative need for additional outpatient facilities in the area to be served by the facility, taking into account existing services available and their utilization.

(c) In determining the priority of projects for modernization of outpatient facilities, special consideration shall be given (in addition to that specified in paragraph (a) of this section) to facilities serving areas of high population density.

§ 53.85 Rehabilitation facilities (new construction).

Priority shall be given to rehabilitation facility projects in the order of importance as given below, taking into consideration existing rehabilitation services in the community and the need for additional services in the community.

(a) Facilities operated in connection with a university teaching hospital which will provide an integrated program of medical, psychological, social, and vocational evaluation and services under competent supervision.

(b) Facilities offering rehabilitation services for multiple disabilities in hospitals and medical facilities capable of sustaining an organized department of physical medicine and rehabilitation.

(c) All other rehabilitation facilities.

§ 53.86 Public health centers (new construction).

Highest priority in this category shall be given to the provision of facilities for local health units serving rural communities and communities with relatively small financial resources. Where the State agency is not the State health authority, the State agency shall determine the relative priorities to be established after consultation with the State health authority.

§ 53.87 Modernization.

In determining the priority of projects for modernization, special consideration shall be given to facilities serving areas of high population density. With respect to each category, relative need shall be expressed

(a) For facilities for inpatient care, in terms of the ratio of existing conforming beds in each service area to (1) total existing beds in such area or (2) total beds needed in such area, whichever is less; and

(b) For facilities for outpatient care, in terms of the ratio of existing conforming facilities for outpatient care in each service area to (1) total existing facilities for outpatient care in such area or (2) total facilities for outpatient care needed in such area, whichever is less.

Subpart J—Allotments for Modernization Grants and for Loans and Loan Guarantees, and Transfer of State Allotments

§ 53.91 Allotments for modernization grants.

The allotments to the several States under section 602(a)(2) of the Act for grants for modernization shall be computed as follows:

(a) 33⅓ percent will be allotted to each State on the basis of population weighted by per capita income; and

(b) 66⅔ percent will be allotted to each State on the basis of the extent of the need for modernization of the facilities.

§ 53.92 Allotments for direct loans and loan guarantees.

(a) *Allotment formula.* The total of the amount of principal of loans to nonprofit private agencies which may be guaranteed and loans to public agencies which may be directly made under Part B of the Act with respect to any fiscal year shall be allotted among the several States as follows:

(1) A portion of such total which bears the same ratio to such total as the number of general hospital beds which the Secretary determines will be modernized in all States bears to the sum of the general hospital beds in all States which the Secretary determines will be modernized and added through new construction will be allotted to the States on the basis of the formula set forth in § 53.91 for allotments for modernization grants. The Secretary's determinations under this paragraph will be made on the basis of State plans for the latest year for which all States desiring to participate under Part B of the Act have submitted approved State plans.

(2) The remainder of such total will be allotted to the States on the basis of each State's relative population weighted by (i) the square of such State's allotment percentage, as determined in accordance with sec. 602(c) of the Act, and (ii) the relative need of such State for construction of general hospital beds.

(b) *Period of availability.* Subject to the provisions of § 53.93(b) (relating to transfers of allotments to another State), any amount allotted under paragraph (a) of this section to a State for a fiscal year ending before July 1, 1973, and remaining unobligated at the end of such fiscal year shall remain available to such State, for the purpose for which made, for the next 2 fiscal years, and any such amount shall be in addition to the amounts allotted to such State for such purpose for each of such next 2 fiscal years.

§ 53.93 Transfer of allotments to another State.

(a) With respect to allotments under Part A of the Act, a State may submit a request in writing to the Secretary that a specified portion of its allotment for the construction of hospitals and public health centers, facilities for long-term care, outpatient facilities, rehabilitation facilities, or for modernization, be added to the corresponding allotment of another State for the purpose of meeting a portion of the Federal share of the cost of a project for the construction or modernization of a facility of the type authorized under the allotments in such other State. In determining whether the facility with respect to which the request is made will meet the needs of the State making the request and that use of the specified portion of such State's allotment as requested by it will assist in carrying out the purposes of the Act, the Secretary shall consider the accessibility of the facility and the extent to which services will be made available to the residents of the State making the request for the transfer.

(b) With respect to allotments under Part B of the Act, any such allotment to a State for a fiscal year ending before July 1, 1973, and remaining unobligated at the end of such year may, with the consent of such State, be reallotted by the Secretary to other States which the Secretary determines have need therefor. Such reallotment shall be on such basis as the Secretary finds consistent with the purposes of Part B of the Act, and any amount so reallotted to another State shall be available for the purposes for which made until the close of the second fiscal year after the fiscal year for which such funds were initially allotted and shall be in addition to the amount allotted and available to such State for the same period.

§ 53.94 Transfer of grant allotments to another category within a State.

(a) For the purpose of transfer of allotments as authorized by section 602(e)(2) of the Act, the State agency shall, together with the certification required by that subsection, set forth the method by which a reasonable opportunity has been afforded applicants to submit applications for projects from the portion of the allotment to be transferred.

(b) A determination under section 602(e)(3) of the Act that the need for new public or other nonprofit hospitals and public health centers is substantially greater than the need for modernization projects shall be made only after completion of the determination of the State's need for modernization projects pursuant to Subpart H of this part and in accordance with the approved State plan.

Subpart K—General Standards of Construction and Equipment

§ 53.101 General.

(a) Plans and specifications for each project submitted to the Secretary for approval shall be prepared in accordance with "General Standards of Construction and Equipment for Hospital and Medical Facilities" (PHS No. 930-A-7), and any amendments or revisions thereof, which document is hereby incorporated by reference and deemed published herein. Said document will be provided to all applicants for assistance under this part, and is available to any interested person, whether or not affected by the provisions of this part, upon request to the Health Care Facilities Service,[1] Health Services and Mental Health Administration, Department of Health, Education, and Welfare, or to the Health Services and Mental Health Information Center or Regional Office Information Center as listed in 45 CFR 5.31. The Secretary may approve plans and specifications which contain deviations from the requirements prescribed if he is satisfied that the purposes of such requirements have been fulfilled.

(b) The design and construction covered by the plans and specifications must conform with the applicable State and local laws, codes, and ordinances and with the approved State plan. The plans

[1] The Health Care Facilities Service also maintains an official historic file of PHS No. 930-A-7.

and specifications must be complete and adequate for contract purposes and have the approval and recommendation of the State agency.

(c) Equipment shall be provided in the kind and to the extent necessary for the proper functioning of the facility as planned.

§ 53.102 Size of facilities for long-term care.

No application shall be approved for construction of a facility for long-term care, not an addition to a hospital, with a capacity of less than 10 beds.

Subpart L—Services for Persons Unable To Pay; Community Service; Nondiscrimination

§ 53.111 Services for persons unable to pay.

Before an application under this part is recommended by a State agency to the Secretary for approval, the State agency shall obtain an assurance from the applicant that there will be made available in the facility or portion thereof to be constructed or modernized a reasonable volume of services to persons unable to pay therefor. The requirement of an assurance from an applicant shall be waived if the applicant demonstrates to the satisfaction of the State agency, subject to subsequent approval by the Secretary, that such a requirement is not feasible from a financial viewpoint.

§ 53.112 Community service; nondiscrimination.

(a) Before an application under this part is recommended by a State agency to the Secretary for approval, the State agency shall obtain assurances from the applicant that:

(1) The facility will furnish a community service; and

(2) All portions and services of the entire facility for the construction or modernization of which, or in connection with which, aid under the Act is sought will be made available without discrimination on account of creed, and no professionally qualified person will be discriminated against on account of creed with respect to the privilege of professional practice in the facility.

(b) Each construction contract is subject to the condition that the applicant shall comply with the requirements of Executive Order 11246, September 24, 1965 (30 F.R. 12319), relating to nondiscrimination in construction contract employment, and the applicable rules, regulations, and procedures prescribed pursuant thereto.

(c) Attention is called to the requirements of title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d; 78 Stat. 252) which provides that no person in the United States shall, on the ground of race, color, or national origin be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. A regulation implementing such title VI, applicable to assistance under this part for construction and modernization of hospitals and medical facilities, has been issued by the Secretary of Health, Education, and Welfare with the approval of the President (45 CFR Part 80).

§ 53.121 General; review and comment by areawide health planning agencies.

(a) The State plan shall provide for general methods of administration which are in accord with the principles set out in this subpart.

(b) Prior to submission of the State plan or any modifications thereof to the Secretary, the State agency shall submit such plan or modifications for review and comment to each agency or organization which has developed an areawide health plan pursuant to section 314(b) of the Public Health Service Act with respect to any area in such State for which there is no such agency or organization, to the State agency administering or supervising the administration of the State plan approved under section 314(a) of the Public Health Service Act. Comments from any such agency received by the State agency within 30 days after such submission shall be considered by the State agency prior to submission of the State plan to the Secretary.

Subpart M—Methods of Administration of the State Plan

§ 53.122 Construction program.

The State programs for hospitals, facilities for long-term care, outpatient facilities, rehabilitation facilities, public health centers, and modernization shall be developed in the following manner:

(a) The State agency shall determine the need for additional hospital facilities of all types, facilities for long-term care, outpatient facilities, rehabilitation facilities, public health centers, and for modernization of such facilities in accordance with the provisions of Subpart B through Subpart H.

(b) The State agency shall determine through field investigation, and otherwise, the approximate locations in each area in which the various types of health facilities identified in paragraph (a) of this section should most appropriately be built and the locations at which modernization projects are needed.

(c) After having determined the hospital, long-term care facilities, outpatient facility, rehabilitation facilities, public health center and modernization needs, the State agency shall establish an overall construction program. This program shall set forth all such needs in accordance with the standards specified in Subpart B through Subpart H and shall show the relative need for each project included, irrespective of the availability of funds for construction and for maintenance and operation of such project.

(d) The State agency shall from time to time as necessary, but not less often than annually, review the State plan, including the overall program for the construction of hospitals, long-term care facilities, outpatient facilities, rehabilitation facilities, public health centers and for modernization, and shall submit to the Secretary any modifications of the plan and the construction program as the State agency considers necessary to administer the plan and the annual allotment.

(e) At least 30 days prior to the submission of the State plan or any modification thereof to the Secretary, the State agency shall publish in newspapers having general circulation throughout the State a general description of the proposed plan or any such modification, and the State plan shall be available for examination and comment by interested persons prior to submission to the Secretary.

(f) The State agency shall establish a separate construction schedule on such forms and for such periods as the Secretary may prescribe. Insofar as funds are available for construction and for maintenance and operation, construction shall be scheduled in the order of relative need.

§ 53.123 Personnel administration.

(a) *Merit system.* The State plan shall provide for the establishment and maintenance of personnel standards on a merit basis for persons employed in the administration of the State plan. Conformity with the Standards for a Merit System of Personnel Administration, 45 CFR Part 70, including any amendments thereto, and any standards prescribed by the U.S. Civil Service Commission pursuant to section 208 of the Intergovernmental Personnel Act of 1970 (Public Law 91-648; 84 Stat. 1915) modifying or superseding such Standards, will be deemed to meet this requirement as determined by said Commission.

(b) *Conflict of interest.* No full-time officer or employee of the State agency, or any firm, organization, corporation, or partnership which such officer or employee owns, controls, or directs, shall receive funds from the applicant, directly or indirectly, in payment for services provided in connection with the planning, design, construction or equipping of the project.

§ 53.124 Fair hearings.

The State agency shall establish such rules and regulations as will provide an opportunity for an appeal to and a fair hearing before the State agency to every applicant for a construction project who is dissatisfied with any action of the State agency regarding its application.

§ 53.125 Construction standards.

The State agency shall adopt general standards of construction and equipment for the various types of hospitals, facilities for long-term care, outpatient facilities, rehabilitation facilities, and public health centers assisted under this program. The standards adopted shall not be less than the general standards prescribed by the Public Health Service and set forth in the document "General Standards of Construction and Equipment for Hospital and Medical Facilities", as incorporated by reference in § 53.101(a).

§ 53.126 Minimum standards of maintenance and operation.

The State plan shall provide for minimum standards of maintenance and operation of facilities providing inpatient care which receive aid under the Act, and shall provide for enforcement of such standards.

§ 53.127 Application; submittal; amendment; processing.

(a) *Submittal of application.* Applications for grants, loan guarantees, and direct loans under the Act, including both detailed narrative descriptions and detailed estimates of the cost of the respective projects, shall be submitted to the Secretary through the State agency in such form as the Secretary may prescribe.

(b) *Amendment to application.* An amendment to any application approved by the Secretary shall be processed in the same manner as an original application, except that the original application's conformity with the priority regulations shall suffice for an amendment which does not modify the factors on which the priority was granted.

(c) *Processing of application.* The State agency shall approve, recommend, and forward applications received in the order of priority, except that the State agency may approve, recommend, and forward to the Secretary applications out of the order of priority if:

(1) The State agency has afforded reasonable opportunity for development and presentation of projects in the order of priority; and

(2) The State agency certifies to the Secretary that financial resources for the construction, maintenance, and operation of projects of higher priority are not then available.

§ 53.128 Assurances from applicant.

In addition to any other requirements imposed by law, each construction grant, loan guarantee, and direct loan shall be subject to the condition that the applicant will furnish and comply with the following assurances. The Secretary may at any time approve exceptions to those conditions and assurances where he finds that such exceptions are not inconsistent with the Act and the purposes of the program:

(a) That the applicant (or other public or nonprofit agency which is to operate the facility) has or will have a fee simple or such other estate or interest in the site, including necessary easements and rights-of-way, sufficient to assure for a period of not less than 50 years undisturbed use and possession for the purpose of the construction and operation of the facility;

(b) That the Secretary's approval of the final working drawings and specifications, which conform to the general standards of construction and equipment, will be obtained before the project is advertised or placed on the market for bidding;

(c) That applicant will perform actual construction work by the lump sum (fixed price) contract method; employ adequate methods of obtaining competitive bidding prior to awarding the construction contract, either by public advertising or circularizing three or more bidders, and award the contract to the responsible bidder submitting the lowest acceptable bid; and will purchase all fixed equipment by adequate methods of competitive bidding (including such fixed equipment as is not purchased through the construction contract) and award the contract to the responsible bidder submitting the lowest acceptable bid, except that competitive bidding procedures need not be employed for the purchase of specific fixed equipment items which are not included in the construction contract where such action is found by the State agency and the Secretary, upon written justification by the applicant, to be required by the needs of the program;

(d) That applicant will enter into no construction contract or contracts for the project or a part thereof, the cost of which is in excess of the estimated cost approved in the application for that portion of the work covered by the plans and specifications, without the prior approval of the Secretary;

(e) That applicant will submit to the Secretary for prior approval changes that substantially alter the scope of work, function, utilities, or safety of the facility;

(f) That applicant will construct the project, or cause it to be constructed, to final completion in accordance with the application and approved plans and specifications;

(g) That applicant will maintain adequate and separate accounting and fiscal records and accounts for all funds provided from any source to pay the cost of the project, and permit audit of such records and accounts at any reasonable times. All records shall be retained for 3 years after the close of the fiscal year in which construction is completed. Such records may be destroyed at the end of such 3-year period if the applicant has been notified of the completion of the Federal audit by such time. If the applicant has not been so notified by the end of such 3-year period, such records shall be retained (1) for 5 years after the close of the fiscal year in which construction is completed or (2) until the grantee is notified of the completion of the Federal audit, whichever comes first. In all cases where audit questions have arisen before the expiration of such 5-year period, records shall be retained until resolution of all such questions;

(h) That applicant will furnish progress reports and such other information as the Secretary may require;

(i) That applicant will provide and maintain competent and adequate architectural or engineering supervision and inspection at the construction site to insure that the completed work conforms with the approved plans and specifications;

(j) That sufficient funds will be available to meet the non-Federal share of the cost constructing the facility;

(k) That sufficient funds will be available when construction is completed for effective use of the facility for the purposes for which it is being constructed;

(l) (1) That any laborer or mechanic employed by any contractor or subcontractor in the performance of work on the construction of the facility will be paid wages at rates not less than those prevailing on similar construction in the locality as determined under the Davis-Bacon Act (40 U.S.C. 276 et seq.) and will receive compensation at a rate not less than one and one-half times his basic rate of pay for all hours worked in any workweek in excess of 8 hours in any calendar day or 40 hours in the workweek (40 U.S.C. 327–332); and

(2) That the following conditions and provisions will be included in all construction contracts:

(i) The provisions set forth in "DHEW Requirements for Federally Assisted Construction Contracts Regarding Labor Standards and Equal Employment Opportunities," Form DHEW 514 (April 1969) (issued by the Office of Grants Administration Policy, U.S. Department of Health, Education, and Welfare) pertaining to the Davis-Bacon Act, the Contract Work Hours Standards Act, and the Copeland Act (Anti-Kickback) Regulations, except in the case of contracts in the amount of $2,000 or less; and pertaining to Executive Order 11246, September 24, 1965 (30 F.R. 12319), relating to nondiscrimination in construction contract employment, except in the case of contracts in the amount of $10,000 or less;

(ii) The contractor shall furnish performance and payment bonds, each of which shall be in the full amount of the contract price, and shall maintain, during the life of the contract, adequate fire, workmen's compensation, public liability and property damage insurance;

(iii) Representatives of the Secretary and State agency will have access at all reasonable times to work wherever it is in preparation or progress, and the contractor shall provide proper facilities for such access and inspection;

(m) That a facility providing inpatient care will be operated and maintained in accordance with minimum standards prescribed by the State agency for the maintenance and operation of such facilities;

(n) (1) That, in the case of any project for construction or modernization of a general hospital, there will be adequate provision for extended care services to patients of such hospital when such services are medically appropriate for them. Subject to the provisions of subparagraph (2) of this paragraph, such services must be provided in facilities which—

(i) Are structurally part of, physically connected with, or in immediate proximity to, such hospital; and

(ii) Either are under the supervision of the professional staff of such hospital or have organized medical staffs and have in effect written transfer agreements with such hospital which provide for:

(a) The transfer of patients between the hospital and the long-term care facility(s) whenever such transfer is determined to be medically appropriate;

(b) The exchange between the facilities of appropriate medical and other information relating to the care and treatment of patients;

(c) Prompt initiation of transfer of the patient to the hospital for acute care should there be a reversal in the patient's medical condition requiring more intensive medical and nursing care;

(d) The amount and types of services offered in the long-term care facility(s) which correspond to those specified for reimbursement eligibility for the skilled nursing home care category under titles XVIII and XIX of the Social Security Act, as amended; and

(e) The general availability of the medical, diagnostic, and rehabilitative services of the hospital to any patient of the long-term care facility(s) who requires them.

(2) The Secretary may, at the request of the State agency, waive compliance with the requirements of subparagraph (1)(i) or (ii), or both of this paragraph, in the case of any project if the State agency has determined that compliance with such subsection or subsections would be inadvisable;

(o) That, in the case of any project for construction or modernization of an outpatient facility, the services of a general hospital will be available to patients of such outpatient facility who are in need of hospital care. Such assurance may be provided by a written transfer agreement with one or more general hospitals which provides for

(1) The transfer of patients from the outpatient facility to the general hospital where such transfer is determined to be medically appropriate;

(2) The exchange of appropriate medical and other information relating to the care and treatment of patients between the facilities; and

(3) The amount and types of services offered in the general hospital which correspond to those specified for reimbursement eligibility under Titles XVIII and XIX of the Social Security Act, as amended;

(p) That, in the case of any project solely for the purpose of the acquisition of equipment, other than initial equipment for new buildings or for existing buildings which are expanded, remodeled or altered, such project will help to provide a service not previously provided in the community. For purposes of this paragraph, "community" shall mean a geographic area encompassing one or more neighborhoods having a population and geographic size sufficiently large as normally to be served by and support the particular service to be provided;

(q) That the applicant will file at least annually with the State agency a statement, in such form and containing such information as the Secretary may require to show (1) the financial operations of the facility, and (2) the costs to the facility of providing health services in the facility and the charges made by the facility for providing such services during the period with respect to which the statement is filed;

(r) That the applicant will conform to all the applicable requirements of the State plan and the regulations of this part.

§ 53.129 Determination of rural or urban poverty areas.

For purposes of determining the priority of projects for construction or modernization of outpatient facilities pursuant to section 603(a)(4) of the Act and of establishing a Federal share of any project (not to exceed 90 per centum of the cost of construction) pursuant to section 645(b)(4) of the Act, the State plan shall include a designation of areas in the State which are proposed by the State agency, in accordance with this section, to be rural or urban poverty areas. For purposes of this section, "area" means a service area (or the nearest approximation thereto for which current census data are available, based on geographic boundaries such as counties or census tracts) or a subservice area which is designated in the State plan as providing the basis for the provision of outpatient services.

(a) The Secretary will determine to be a rural or urban poverty area any area which has been found by the State agency, on the basis of the latest available published data from the Bureau of the Census, to be an area in which the median annual family income ranks in or below the 20th percentile of the median family incomes for all areas in the State.

(b) The Secretary may determine to be a rural or urban poverty area any area which

(1) has been found by the State agency to be an area in which the median family income ranks above the 20th percentile of the median family incomes for all areas in the State but in or below the 30th percentile of the median family incomes for all areas in the State;

(2) has been designated by the State agency as a rural or urban poverty area, and

(3) has been determined by the Secretary, on the basis of information set forth in the State plan, to have special characteristics related to poverty which are not adequately reflected in its median family income percentile rank, such as (i) subareas of extreme poverty or (ii) high costs of obtaining hospital services when compared to other areas in the State.

(c) The Secretary may also determine to be a rural or urban poverty area any area in which, on the basis of the latest available published data from the Bureau of the Census, the median family income ranks above the 30th percentile of median family incomes for all areas in the State but with respect to which the State agency demonstrates to the satisfaction of the Secretary that the income level of families in such area has changed sufficiently since the date of such latest available published data to justify classification of the area as a rural or urban poverty area under the criteria set forth in paragraph (a) or (b) of this section.

(d) The State agency shall reevaluate its designation of proposed rural or urban poverty areas every 2 years, and will make such revisions in such designation as it finds necessary in accordance with the provisions of this section.

§ 53.130 Certification to the Secretary.

After the State agency has approved an application for a construction grant, it shall recommend it to the Secretary for approval and shall certify:

(a) That the application contains reasonable assurance as to the availability of funds for the cost of construction and the entire cost of maintenance and operation when completed:

(1) Availability of funds for the non-Federal share of construction costs shall mean (i) funds immediately available, placed in escrow, or acceptably pledged, or (ii) funds or fund sources specifically earmarked in a sum sufficient for that purpose, or (iii) other assurances acceptable to the Secretary;

(2) To assure the availability of funds for maintenance and operation the application for the construction of a new project must include a proposed operating budget, on a form prescribed by the Secretary, for the 2-year period immediately following its completion. In the case of an addition to an existing facility, the application must include a statement showing that funds are or will be available to meet any excess of proposed expenditures over anticipated income from the operation of the constructed addition for the 2-year period immediately following its completion.

(b) That the application is in conformity with and contains the assurances required by the State plan and these regulations.

§ 53.131 Requests for construction payments for grants.

(a) *Certification by State agency.* The State agency shall certify to the Secretary the amount of payments due an applicant for a construction grant under Part A of the Act for the cost of work performed and materials and equipment furnished.

(b) *Inspection by State agency.* As a basis for certification by the State agency in accordance with paragraph (a) of this section that payment of an installment is due an applicant, the State agency shall make adequate inspections to determine that the work has been performed upon a project, or purchases

have been made, in accordance with the approved plans and specifications.

§ 53.132 Fiscal and accounting requirements.

(a) *Construction allotments.* (1) The State agency shall be responsible for establishing and maintaining accounts and fiscal controls of all Federal and State funds allotted for construction projects. Federal and State funds shall be separately identified by maintaining separate fund accounts for this purpose.

(2) The fiscal records shall be so designed as to show at any given time the Federal funds allotted, encumbered, and unencumbered balances. If State contributions are made for construction, separate accounts, reflecting similar information, shall be maintained for State funds.

(b) *Construction payments.* (1) Where the State may receive Federal funds for applicants for construction project grants, or the State itself is an applicant, adequate records of account and fiscal controls shall be established and maintained by the State to assure proper accounting of all funds received and disbursed. Similar suitable accounts shall be maintained to show the receipt and disbursement of State, local or other funds used for matching purposes.

(2) The State agency shall require that applicants receiving Federal funds establish and maintain adequate accounting and fiscal records to reflect the receipt and expenditure of funds allotted and paid for construction projects.

(3) The States which by law are authorized to make payments to applicants shall promptly pay such applicants funds certified for payment by the Secretary for approved construction projects.

§ 53.133 Access by Comptroller General.

The State plan shall provide that the Comptroller General of the United States or his duly authorized representatives will have access for purposes of audit and examination to such records of the State agency as are required to be maintained by the Secretary.

§ 53.134 Notice of change of status of facility.

The State agency shall promptly notify the Secretary in writing if, at any time within 20 years after completion of construction, any facility which received funds under the Act is transferred to any person, agency or organization, not qualified to file an application under the Federal Act or not approved as a transferee by the State agency; or ceases to be a public health center or a public or other nonprofit hospital, outpatient facility, facility for long-term care or rehabilitation facility, as defined in the Federal Act.

§ 53.135 Good cause for other use of facility.

If within 20 years after completion of any construction for which a construction grant has been made the facility shall cease to be a public health center or a public or other nonprofit hospital, outpatient facility, facility for long-term care, or rehabilitation facility the Secretary, in determining whether there is good cause for releasing the applicant or other owner of the facility from its obligation shall take into consideration the extent to which:

(a) The facility will be devoted by the applicant or other owner to use for another public or nonprofit purpose which will promote the purpose of the Act;

(b) There are reasonable assurances that for the remainder of the 20-year period other public or nonprofit facilities not previously utilized for the purpose for which the facility was constructed will be so utilized and are substantially equivalent in nature and extent for such purposes; or

(c) The facility has been acquired from an agency of the United States (e.g., the Federal Housing Administration under its mortgage insurance commitment program) which has made a reasonable effort to dispose of it for operation as a public or nonprofit facility.

Subpart N—Loan Guarantees and Direct Loans

§ 53.141 Applicability.

In addition to the other provisions of this part, the following provisions of this Subpart N are also applicable to loans to public agencies and loan guarantees to nonprofit private agencies under part B of the Act.

§ 53.142 Definitions.

(a) All terms used in this subpart and defined in the Act or in § 53.1 shall have the same meaning as there given them.

(b) When used in this subpart, the term "public agency" shall include any private organization the income from whose bonds or other obligations issued as security for a loan with respect to a project under part B of the Act is exempt from Federal income taxation.

§ 53.143 Eligibility for loan guarantees and direct loans.

(a) *Loan guarantees.* The Secretary may, in accordance with part B of the Act and these regulations, guarantee to non-Federal lenders payment of principal of and interest on loans made to nonprofit private agencies to carry out projects for the construction or modernization of nonprofit private hospitals, facilities for long-term care, outpatient facilities and rehabilitation facilities.

(b) *Direct loans.* The Secretary may, in accordance with Part B of the Act and these regulations, make direct loans to public agencies to carry out projects for the construction or modernization of public health centers and public hospitals, facilities for long-term care, outpatient facilities, and rehabilitation facilities.

§ 53.144 Approval of applications.

(a) *Applications for loan guarantees.* An application for a loan guarantee submitted through the State agency and in accordance with the requirements of § 53.127 may be approved by the Secretary only if he makes each of the findings required pursuant to section 623(b) of the Act, and determines:

(1) That the applicant will have sufficient financial resources to enable him to comply with the terms and conditions of the loan with respect to which the guarantee is sought;

(2) That the applicant has the necessary legal authority to finance, construct, and maintain the proposed project, to apply for and receive the loan with respect to which the guarantee is sought, and to pledge or mortgage any assets or revenues to be given as security for such loan or against other satisfactory security specified in § 53.147;

(3) That the loan with respect to which the guarantee is sought will be secured by a first lien against the facility to be constructed or against other security satisfactory to the Secretary specified in § 53.147.

(4) That the loan with respect to which the guarantee is sought will be made only with respect to the initial permanent financing of the project;

(5) That the rate of interest on the loan with respect to which a guarantee is sought does not exceed such per centum per annum as the Secretary determines to be reasonable, taking into account the range of interest rates prevailing in the private market for similar loans and the risks assumed by the United States; and

(6) Such additional determinations as the Secretary finds necessary with respect to particular applications in order to protect the financial interests of the United States.

(b) *Applications for direct loans.* An application for a direct loan submitted through the State agency and in accordance with the requirements of § 53.127 may be approved by the Secretary only if he makes each of the applicable findings required pursuant to sections 623(b) and 627(a)(2) of the Act, and determines:

(1) That the applicant will have sufficient financial resources to enable him to comply with the terms and conditions of the direct loan;

(2) That the applicant has the necessary legal authority to finance, construct, and maintain the proposed project, to apply for and receive the direct loan, and to pledge or mortgage any assets or reserves to be given as security for such direct loan;

(3) That the direct loan will be secured by a first lien against the facility to be constructed or against other security satisfactory to the Secretary specified in § 53.147;

(4) That the direct loan will be made only with respect to the initial permanent financing of the project; and

(5) Such additional determinations as the Secretary finds necessary with respect to the particular application in order to protect the financial interests of the United States.

§ 53.145 Maximum amount of direct loan or guaranteed loan.

No direct loan or loan with respect to which a guarantee is made for any project under Part B of the Act may be in an amount which, when added to the amount of any grant or loan under Part A of the Act with respect to such project, exceeds 90 per centum of the cost of such project: *Provided*, That, in determining the actual cost of the construction of the project, there shall be excluded from such cost all fees, interest, and other charges relating or attributable to the financing of the project.

§ 53.146 Forms of evidence of indebtedness.

The evidence of indebtedness with respect to direct loans with respect to which a guarantee is made shall be in such form as may be acceptable to the Secretary.

§ 53.147 Security for loans.

All direct loans and loans with respect to which a guarantee is made shall be secured in a manner which the Secretary finds reasonably sufficient to insure repayment. The security may be one or a combination of the following:

(a) A first mortgage on the facility and site thereof.

(b) Negotiable stocks or bonds of a quality and value acceptable to the Secretary.

(c) A pledge of unrestricted and unencumbered income from an endowment or other trust funds acceptable to the Secretary.

(d) A pledge of a specified portion of annual general or special revenues of the applicant, acceptable to the Secretary.

(e) Full faith and credit (tax supported) obligations of a State or local public body.

(f) Such other security as the Secretary may find acceptable in specific instances.

§ 53.148 Opinion of legal counsel.

At appropriate stages in the application and approval procedure for direct loans and loan guarantees, the applicant shall furnish to the Secretary a memorandum or opinion of legal counsel with respect to the legality of any proposed bond or note issue, the legal authority of the applicant to offer the issue and secure it by the proposed collateral, and the legality of the issue upon delivery. "Legal counsel" means either a law firm or individual lawyer, thoroughly experienced in the long-term financing of construction projects, and whose approving opinions have previously been accepted by lenders or lending institutions. In addition, in the case of a direct loan to a public agency, the legal counsel shall be a recognized bond counsel in the municipal field. The legal memorandum or opinion to be provided by legal counsel in each case shall be as follows:

(a) A memorandum, submitted with the application for a direct loan or loan guarantee, stating that there is or will be authority to finance, construct and maintain the project, and to issue the proposed obligations and to pledge or mortgage the assets and/or revenues offered to secure the direct loan or the loan with respect to which a guarantee is sought, as the case may be, citing the basis for such authority; and

(b) A final approving opinion, delivered to the Secretary at the same time as the delivery of the bonds to the Secretary (in the case of a direct loan) or to the lender (in the case of a loan guarantee), stating that the indebtedness of the applicant is duly authorized, sold, and delivered, and that such indebtedness is valid, binding and payable in accordance with the terms on which the direct loan or loan guarantee was approved by the Secretary.

§ 53.149 Length and maturity of loans.

The repayment period for direct loans and loans with respect to which a guarantee is made shall be limited to 25 years: *Provided*, That—

(a) The Secretary may, in particular cases where he determines that a repayment period of less than 25 years is more appropriate to an applicant's total financial plan, approve such shorter repayment period; and

(b) In no case shall a loan repayment period exceed the estimated useful life of the facility to be constructed with the assistance of the loan.

§ 53.150 Interest on direct loans.

Each direct loan shall require the borrower to pay to the Secretary, or as directed by him, interest thereon at a rate determined by the Secretary to be comparable to the current rate of interest prevailing with respect to loans to nonprofit private agencies which are guaranteed under part B of the Act, for the modernization on construction of similar facilities in the same or similar areas, minus 3 per centum per annum.

§ 53.151 Repayment.

Unless otherwise specifically authorized by the Secretary, each direct loan and loan with respect to which a guarantee is made shall be repayable in substantially level total annual installments of principal and interest, sufficient to amortize the loan through the final year of the life of the loan.

§ 53.152 Loan Guarantee Agreement and Direct Loan Agreement.

(a) *Loan Guarantee Agreement.* (1) For each application for a loan guarantee which is approved by the Secretary, an offer of a loan guarantee will be sent to the applicant, setting forth the pertinent terms and conditions for the loan guarantee, and will be conditioned upon the fulfillment of those terms and conditions. The accepted loan guarantee offer will constitute the Loan Guarantee Agreement between the Secretary and the applicant.

(2) Each Loan Guarantee Agreement shall include the following provisions:

(i) That the loan guarantee evidenced by the Agreement shall be incontestable (a) in the hands of the applicant on whose behalf such loan guarantee is made except for fraud or misrepresentation on the part of such applicant, and (b) as to any person who makes or contracts to make a loan to such applicant in reliance on such loan guarantee, except for fraud or misrepresentation on the part of such other person.

(ii) That if the applicant shall default in making payment, when due, of the principal and interest on the loan with respect to which the guarantee is made, and such default is not cured within 90 days after the happening thereof, the holder of such loan shall have the right to make demand in writing upon the Secretary for the purchase by the Secretary of such loan.

(iii) That each holder of a loan to an applicant on whose behalf the loan guarantee evidenced by such Agreement is made shall have a contractual right to receive from the United States interest payments in an amount sufficient to reduce by 3 per centum per annum the net effective interest rate determined by the Secretary to be otherwise payable on the loan with respect to which such guarantee is made.

(iv) That payments of interest pursuant to subdivision (iii) of this subparagraph will be made by the Secretary, in accordance with the terms of the loan with respect to which the guarantee is made, directly to the holder of such loan or to a trustee or agent designated in writing to the Secretary by such holder until such time as the Secretary is notified in writing by the holder that such loan has been transferred. Pursuant to such written notification of transfer, the Secretary will make such interest payments directly to the new holder (transferee) of the loan.

(v) That the applicant shall be permitted to prepay up to 15 per centum of the original principal amount of such loan in any calendar year without additional charge.

(vi) Such other provisions as the Secretary finds necessary in order to protect the financial interests of the United States.

(b) *Direct Loan Agreement.* (1) For each application for a direct loan which is approved by the Secretary, an offer of a direct loan will be sent to the applicant, setting forth the pertinent terms and conditions for the direct loan, and will be conditioned upon the fulfillment of those terms and conditions. The accepted direct loan offer will constitute the Direct Loan Agreement between the Secretary and the applicant.

(2) Each Direct Loan Agreement shall include such provisions as the Secretary finds necessary in order to protect the financial interests of the United States.

§ 53.153 Loan closing.

(a) *Loan guarantees.* Closing for any loan with respect to which a guarantee is made shall be accomplished at such time

as may be agreed upon by the parties to such loan and found acceptable by the Secretary.

(b) *Direct loans.* Closing for any direct loan shall be accomplished at such time as may be determined by the Secretary.

§ 53.154 Waiver of right of recovery.

In determining whether there is good cause for waiver of any right of recovery which he may have against a nonprofit private agency by reason of any payments made pursuant to a loan guarantee, or against a public agency by reason of the failure of such agency to make payments of principal and interest on a direct loan to such agency, the Secretary shall take into consideration the extent to which:

(a) The facility with respect to which the loan guarantee or direct loan was made will continue to be devoted by the applicant or other owner to use for the purpose for which it was constructed or another public or nonprofit purpose which will promote the purposes of the Act;

(b) There are reasonable assurances that for the remainder of the repayment period of the loan other public or nonprofit facilities not previously utilized for the purpose for which the facility was constructed will be so utilized and are substantially equivalent in nature and extent for such purposes; and

(c) Such recovery would seriously curtail the provision of medical services to persons in need of such services in the area.

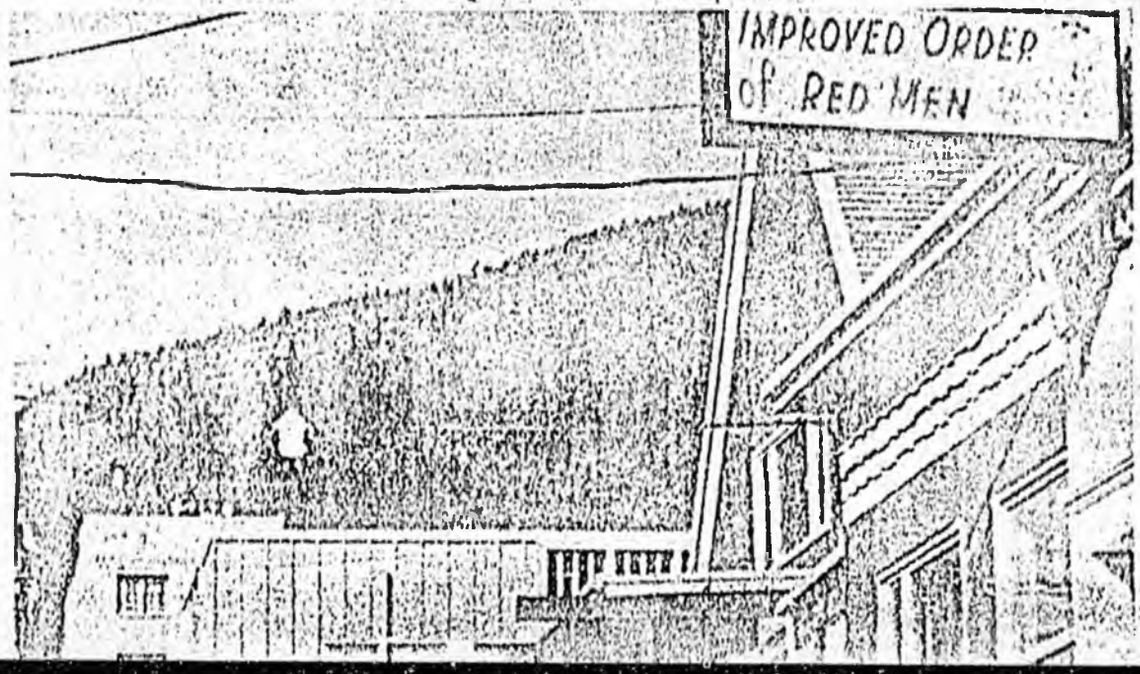
State May File Civil Suit Against Anchorage Legislator

$97,039 Overpaid Revenue-Sharing Funds Sought



Audit Focuses On Rep. Beirne, Lake Otis Clinic

By Brian Rogers

The State of Alaska may go to court against an Anchorage legislator to recover almost $100,000 in state revenue-sharing funds allegedly overpaid to the legislator's hospital corporation.

Assistant Attorney General Rodger Pegues said Friday that his office would go to court against Representative Michael F. Beirne (R-Anch.) and the Lake Otis Clinic, Inc. (LOC) unless Beirne repays $97,039 he was overpaid in 1975.

The funds in question are a part of $312,000 given by the state Department of Community and Regional Affairs (C&RA) to LOC in February 1975. LOC is a non-profit corporation, headed by Beirne, which is involved in the construction of an Anchorage acute-care hospital. Other directors of LOC are Corinne A. Beirne and Beverley L. Beirne.

In July of this year, a state audit of the funds was made

Gov. Hammond Announces Sale of State Royalty Gas

By Joe LaRocca

Andy Warwick of Fairbanks, a newly-appointed member of the state's Royalty Oil and Gas Development Advisory Board told the All-Alaska Weekly Wednesday he hasn't had an opportunity to study the governor's recently announced proposal to sell the state's Prudhoe Bay royalty gas in depth yet, but said that at first blush it looks "very attractive."

Warwick said State Commissioner of Natural Resources Guy Martin, who negotiated the proposed agreements with three prospective purchasers, came to Fairbanks late Tuesday to brief him on their provisions.

Martin is also chairman of the five member Royalty Board which must approve the sale before it's submitted to the legislature for consideration.

Warwick said he'll want to take a closer look at the proposed agreements to determine what adverse effects, if any, the state might suffer if the agreements are finalized, and whether the advantages would outweigh them.

SUCCESSFUL BIDDERS

The governor's announcement of the agreements late last week climaxed months of negotiations with four major gas transmission companies, one of which — United Gas Transmission — was eliminated in the final stages.

The successful bidders are

—Continued on page 15

by State Internal Auditor George Elgee. The audit showed that of more than $3.1 million in costs claimed by LOC, almost $2.3 million were not allowable under applicable revenue-sharing standards, leaving only $861,843.89 in allowable costs. The state share, 25 per cent of the costs, came to only $. 15,460.97, leaving $97,039 unaccounted for.

The audit raised serious questions about several of the expenditures claimed by LOC. The report said "many costs were paid for by companies not directly related to the construction of the hospital. It would appear that at present these expenses are being claimed by both LOC and the facility that actually paid the expense."

"In every instance these other entities are tied closely to M.F. Beirne, Director of LOC," the report says. These corporations include:

—Kelly Supply Inc., Michael F. Beirne, Corinne Beirne and Beverley Beirne, directors.

—Raypath, Inc., Michael F. Beirne, Corinne Beirne and Beverley Beirne, directors.

—SPADA Feed and Seed Store, Inc., Michael F. Beirne, Corinne Beirne and Georgina Perritt, directors.

—Alaska Medical Laboratories, a professional corporation. Directors are Micheal F. Beirne and L.W. Mauman.

According to the audit report, "it appears that the expenses being claimed have been used for tax purposes by these corporations and are now being used to justify state revenue sharing funds."

'CAN'T WAIT FOREVER'

Pegues said Beirne was contesting the method of accounting done in the audit and was "trying to get more of the work accountable."

The audit was done using one of three currently acceptable standards of revenue sharing funds. Pegues said "there isn't any standard for those items to be accountable expenditures."

He said he had been expecting Beirne or Beirne's attorney, Miles Schlossberg, to contact

NUGGETEER

ALL WEEK LONG OUR PHONES HAVE REALLY BEEN BUZZING — It appears that the local Borough Assembly has a heated controversy on its hands — over a new zoning ordinance that comes up for public hearing and final passage on Thursday evening shortly after our issue comes off the press.

Homesteaders and property owners outside the city in the borough are hopping mad about the ordinance which they say would have catastrophic consequences should it pass. They say the ordinance would impose such untenable restriction on the land they have worked and slaved and struggled so hard to hold onto, that they

him, since Schlossberg had asked him to delay filing the suit until they could meet on the case. He said Schlossberg was supposed to call him last Wednesday, but had not called as of Friday afternoon.

"You can't wait forever," Pegues noted, "we'll just start preparing the case." He added, "Beirne obviously won't leave the state."

According to Pegues, his office is planning a civil action only, since "you have to show criminal intent for a fraud conviction."

The audit disallowed $537,111 due to lack of supporting documentation and $1,752,432 in costs not allowable under federal guidelines for revenue sharing, but the auditor "accepted $251,951 of expenditures supported by incomplete data . . . which reasonably appeared valid."

COSTS DISALLOWED

Expenditures disallowed by the state included:

–$722,500 claimed for land and land taxes, which the auditor said were not allowable under the guidelines. Though these costs were claimed by LOC, the 1975 annual report of LOC showed no land owned by the corporation. A statement filed by Beirne in May, 1976 said "title to property has been transferred to facility sponsor", but no record of the transfer was found in state files.

–$693,788.90 claimed for "interest on collateralized property – plus – salary of coordinator," which the auditor said was not allowable under the guidelines. The salary for the project director was $30,000 per year for a half-time position, while the assistant project director received a salary of $20,000 per year for a half-time position. Beirne claims the costs were "paid in part by M.F. Beirne, et al, and LOC/FHC" for a six-year period.

–$270,173 claimed for financing and interest fees, which are not allowable under the guidelines.

–$354,000 claimed for salaries and wages disallowed due to "lack of supporting documentation." Elgee said Monday "the expenditures that he was claiming appeared to be SPADA payroll, for people working for SPADA." He said the SPADA books showed no accounts receivable from LOC, which would indicate an apparent double-billing. According to the State Department of Commerce, SPADA was not incorporated until June 22, 1976, just eight days before the end of the audit period.

FAIRBANKS NORTH STAR BOROUGH
REQUEST FOR PROPOSAL
PUBLIC TRANSIT SYSTEM

Notice is hereby given that the Fairbanks North Star Borough will receive bid proposals for a contractor to operate the Borough Public Transit System.

The proposed contract requires the contractor to provide all supervisory, clerical, operating, and maintenance personnel necessary for the proper and efficient operation of the public transit system.

The Borough intends to provide to the contractor all necessary properties and facilities of such a system, including (a) passenger and service vehicles, (b) gasoline, diesel, and other fuels, oils and lubricants, (c) tires and tubes, (d) repair and replacement parts and materials, (e) shop and repair facilities

State May File Suit . . .

--$100,000 claimed for a 1976 design construction agreement, which was disallowed for lack of supporting documentation.

–$65,971.56 claimed for legal expenses, which are not allowable under the guidelines.

–$25,000 claimed for travel expenses, disallowed for lack of supporting documentation. According to Beirne's May 30 statement, the travel was during the period of 1969 through 1976, including $16,805 disallowed by HEW for years 1972-74, which he said was paid for by LOC/FIIC. Also included were trips by Beirne to Washington, D.C., Los Angeles, Seattle and San Francisco.

–$21,600 claimed for office rent, disallowed for lack of supporting documentation. Beirne claims that one of his other corporations, Raypath, provided $3600 per year in office and utility expense for six years of LOC.

–$14,400 claimed for telephone costs disallowed for lack of supporting documentation. Beirne claimed $200 per month in telephone costs for a period of six years.

–$10,000 in miscellaneous expenses disallowed for lack of supporting documentation. Beirne claimed that figure for "miscellaneous office supplies, entertainment, promotion, etc." for the years 1970-76.

NO FURTHER FUNDING

Community and Regional Affairs Commissioner Lee McAnerney, who originally approved the LOC revenue-sharing funds, said Beirne has twice approached her department for further spending. She said she would not approve any further funding for the project.

The Department of Revenue's field audit supervisor said he was "completely unaware" of the LOC audit. According to one source, who declined to be identified, a copy of the audit was given to a Department official late last month. The field audit supervisor appeared

under certain guidelines. Previously, Congress had to expressly authorize the sale of mineral lands.

–Requires the owner of an unpatented lode or placer mining claim to file those claims with the BLM.

–Provides for loans to Alaska of 55 per cent of the mineral funds the state is entitled to receive, in advance of mineral development. Alaska gets 90 per cent of the mineral revenues derived by the federal government from sales, bonuses, royalties and rentals on public lands in the state. The loans made against these funds would be for the purpose of preparing for the impact of mineral development.

surprised that he had not yet seen the audit and said he would investigate the matter.

BACKGROUND OF LOC

The background of LOC and its hospital is a long and tangled web of paperwork in state files. LOC was formed in 1970. Beirne began construction on the hospital in mid-1973, as a private project.

In April of 1974, Frederick McGinnis, then Commissioner of Health and Social Services, wrote to Bryon Mallot, then Commissioner of C&RA that the clinic might not be qualified to receive state funds since statutory provisions "specify that a health facility must be permanent and in operation by July 1 of any entitlement year." He noted that "it is highly unlikely that the Lake Otis Hospital will meet these requirements any earlier than July 1, 1975."

In July, 1974, construction was halted when additional financing became impossible, Beirne told the Anchorage Times last week. In 1974, though he denied that construction had stopped permanently, saying construction would resume later that month. He said the completion date would be no later than September 1975.

In December 1974, McGinnis certified the project for revenue sharing, just before he left office, following an opinion from the Attorney General.

A month later, Anchorage Borough Mayor Jack Roderick wrote to McAnerney, who had just been appointed C&RA Commissioner, protesting the granting of any revenue sharing funds for LOC. He wrote, "the cessation of construction activity at the site . . . has given us cause for concern about the appropriateness of revenue sharing funds for this purpose."

Roderick noted that the Borough's Comprehensive Health Planning Council (CHP) had "opposed the project for some time" because their projections showed that another acute health care facility was not needed. He said CHP felt the increased cost to the general public to support the "surplus acute care hospital" would be about $3.5 million annually.

PRONOUNCED RELUCTANCE

In her reply to Roderick on Jan. 31, 1975, McAnerney said that despite the objections of the Borough and the "pronounced reluctance" of the Department of Health and Social Services, she had determined that her department "cannot withhold payment . . . due the Lake Otis Hospital."

In a letter to Beirne the same say, McAnerney said the $312,500 revenue sharing grant had been issued. She noted the borough opposition, saying their objections were "beyond the scope of inquiry" of her department. She asked Beirne to provide C&RA with an accounting of the entitlement funds transmitted.

A 1974 financial statement for LOC, prepared by the CPA firm of Peat, Marwick, Mitchell and Co., showed liabilities on Dec. 31, 1974 of $1.2 million in excess of LOC's current assets, along with a $419,000 fund deficit. It noted the subsequent receipt of the revenue sharing grant, with the notation that "these funds were used to reduce the Company's current liabilities."

In April, 1975, Beirne was appointed to the State House of Representatives, replacing Tom Fink, who resigned at that time.

In June, 1975, Health and Social Services Commissioner Francis S.L. Williamson wrote a letter to D.D. Emmal, who was identified as vice president of LOC. He said LOC was not eligible to receive federal Hill-Burton funds, since the construction of LOC was disapproved by the Anchorage CHP in Feburary 1972 and since the Hill-Burton State Construction Plan showed a potential excess of hospital beds in Anchorage if Lake Otis Hospital were built.

"Until such time as the excess beds are utilized and a bed need exists," he wrote, "no Hill-Burton funds can be used for construction of additional beds in the Anchorage area.

Emmal's name has not appeared on any other paperwork connected with LOC. However, Emmal is a director of Lake Otis, Inc., a profit-making corporation. The other directors of Lake Otis, Inc. are Michael Beirne and Corinne Beirne. The All-Alaska Weekly has been unable to determine what relationship, if any, exists between Lake Otis, Inc. and Lake Otis Clinic, Inc.

AUDIT CONDUCTED

An October 1975 meeting between state officials concerning the Lake Otis project showed considerable discussion of the problems associated with its construction. The participants, including representatives from Health and Social Services, C&RA, the Department of Law and Anchorage CHP, agreed that an audit should be conducted.

Beirne told the Anchorage Times last week that he requested the July audit "to clear the record."

In February, 1976, Beirne testified before the House Community and Regional Affairs Committee when the committee was marking up a bill concerning revenue sharing for hospital. He asked for a change in dates in a section of the bill, which he said would save his corporation additional expenses associated with surety bonding. Beirne claimed his hospital was being "squeezed out by the big corporations."

In May, Beirne wrote to U.S. Sen. Ted Stevens that he "was able to prevail upon the (State Health) Department to revise its analysis of bed need in the Anchorage area." He said LOC would submit an application for federal funds under HEW, writing that "any assistance that

State May File Suit . . .

—Continued from page 22

Audit was released, which disallowed most of Beirne's claimed expenditures. In a cover letter, Commissioner of Administration Andy Warwick said the claimed expenditures had been measured in compliance with Hill-Burton regulations. He said he expected LOC would pursue the matter, both on the overpayment and C&RA's refusal to grant further funds.

"Our support of the Hill-Burton position is that it is consistent with like sharing,' Warwick wrote, adding it "is authorized and confirmed in a 1972 Attorney General's position, and recognizes reasonableness."

On Sept. 21, Beirne was told the overpayment would have to be returned if his accountant was unable to satisfy the auditor that sufficient expenses had been incurred.

On Sept. 30, Beirne wrote to Pegues, stating "my understanding is that at this particular moment the State auditor has indicated that the records submitted by our accountant do reflect that more than sufficient funds were expended to qualify for the entire state grant."

Beirne said the law provides for matching funds for "total costs of the project, not certain costs."

FUNDS NOT REPAID

Since that time, the funds have not been repaid, nor has a satisfactory accounting been made, according to Pegues. A memo from Pegues to Attorney General Avrum Gross states that "Beirne has financial problems and has not proceeded. He has already received $97,039 more than he should have, and he has incurred no new eligible costs to make up the difference, let alone qualify for more funds."

The memo continues, "C&RA says that the transaction as entered into was not technically authorized by the law and that it was not open-ended. Beirne was to perform within a given period of time and has not . . . While these issues have yet to be explored, there may be something to them."

The All-Alaska Weekly repeatedly attempted to contact Beirne for comment on the LOC controversy, but Beirne failed to return any calls.

REPORT ON EXAMINATION OF

DEPARTMENT OF COMMUNITY AND REGIONAL AFFAIRS

STATE REVENUE SHARING

LAKE OTIS HOSPITAL

We have examined the costs of land, interest and financing as reported by Lake Otis Clinic, Inc., (LOC), a nonprofit corporation presumably building a hospital in Anchorage, Alaska. By prior report, we previously examined costs as reported by LOC, using State imposed Hill-Burton Regulations. (Schedule A) Those regulations exclude expenditures for land, interest and financing, consequently, our initial report did not address those costs for validity or authenticity since they would have been disallowed by governing rules regardless of the findings. However, LOC expressed concern that those costs for land, interest and financing disallowed by Hill-Burton Regulations are reasonable and necessary costs of construction. This review was encouraged by the Department of Community and Regional Affairs and the Department of Law and applies to costs not reviewed earlier, and to events occurring subsequent to our prior examination, that measure the reasonableness of claimed expenditures and the probability of actual physical construction given current circumstances.

We remain firm in our belief that Hill-Burton Regulations are reasonable and that certain costs are disallowed for sound reasons.

We examined all supporting documentation presented by LOC as representing costs for land, interest and financing. In addition, we have consulted outside experts in certain areas of complexity.

INTEREST AND FINANCING

Interest and financing expenses charged to the hospital project as of June 30, 1976 amounted to $963,961.96. (Schedule B) These expenses were derived from two notes totaling $900,000. (Schedule D) The first note, for $750,000, was borrowed in installments over an eight month period from November 1, 1973 to June 17, 1974. (Schedule D) These funds were borrowed basically upon the strength of credit of a guarantor. LOC obtained the guarantor to the notes based upon the security of certain properties held by LOC and M. F. Beirne, the company's president.

The property used as security came from Raypath Inc., Kelly Supply Co., and Lake Otis Inc. These companies have the same corporate structure as LOC. The companies have the same board members and the president of each is M. F. Beirne.

LOC borrowed an additional $150,000 (Schedule D) on June 17, 1974, again based upon the credit strength of the guarantor. The first note became due on August 29, 1974 but LOC had no funds to make either the interest or principal payments and on September 16, 1974 the guarantor was forced to pay the interest to date on both the first and second notes. LOC received an extension at this time to correspond with the due date of the second note, November 28, 1974. But again LOC could not pay the notes and the guarantor was again forced to pay the interest to date. LOC received another extension to March 17, 1975 but again could not make payment and on that date the guarantor was forced to pay the full amount due on both the principal and interest.

LOC is currently trying to repay the $1,021,294.23 (See Schedule G) obligation to the guarantor of the notes by selling those properties which were used to secure the notes and turning over the net proceeds to the guarantor.

In addition to the obligation to the guarantor, LOC is also being charged by M. F. Beirne, 6% interest on the appraised value of the property used to secure the notes. The amount claimed for the use of this collateralized property, including interest, as of June 30, 1976 was $693,788.90. (See Schedule B)

The interest being charged to the costs of construction of the hospital all stem from the initial obligation of $900,000. (Schedule E) If the loans had been honored on the original due date there would have only been $61,617.19 (see Schedule E) in finance charges. Instead LOC has claimed as of June 30, 1976, $963,961.96 (Schedule B) in interest and financing expenses associated with these loans, and interest is still continuing to accummulate. (Schedule F)

INTEREST SUMMARY

LOC has claimed over $963,961.96 in financing expenses based upon loans of only $900,000. These costs claimed by LOC for interest and financing appear to us to be unreasonable. If LOC had paid those notes when originally due there would have been $61,617.19 in interest expenses. The State of Alaska is being asked to reimburse LOC's finance charges which were allowed to accumulate due to their own fiscal insolvency. In addition, the State has been asked to reimburse LOC for interest expenses due on the use of the collateralized property being used to secure the debt. These collateralized properties were supplied by M. F. Beirne, the president of

LOC. We believe Hill-Burton Regulations were created to specifically protect the government from situations of this type. We do not believe that the State should modify its position for the use of Hill-Burton Regulations, and we think it would be unwise for the State to set a precedent by reimbursing these expenses.

LAND

During our examination of the $710,500 claimed by LOC as the cost of land, a question of ownership arose. The Certified Public Accountant for LOC, produced a Statutory Warranty Deed and Quitclaim Deed dated September 28, 1973 showing the transfer of Tract 3 Medical Park Subdivision to Lake Otis Clinic, Inc. He also presented us with a document representing taxes paid on this property. The property description and legal owner of record was, however, omitted from the xerox copy.

Our inquiries to the borough assessor as to the legal owner of record, showed that GHS-Anchorage Hospital, Inc. is listed as the legal owner. In view of this apparent descrepancy regarding ownership of the property, we requested a title search from Transamerica Title Insurance Company. Their findings indicate that title is indeed vested in GHS-Anchorage Hospital, Inc., an Alaskan corporation. The corporation is wholly owned by General Health Services, Inc., (GHS), a Delaware registered corporation, with headquarters in Culver City, California.

GHS has been associated with LOC since early 1972, when an agreement was reached in which LOC would lease the hospital to GHS. GHS was to operate it on a 25 year lease and operating contract. The 25 year lease would provide for 100% amortization of the mortgage debt and all expenses associated with the construction and operation of the hospital. The land was to have been leased to LOC by M. F. Beirne.

Before construction began, GHS required an indemnification agreement from LOC which would protect GHS from any liability it might incurr in the construction of the hospital. Under this agreement construction was to begin immediately by using borrowed funds up to a maximum of $750,000. Further construction was to await permanent financing.

The $750,000 (Schedule D) was borrowed from Peoples Bank and Trust (PBT) and obtained basically on the strength of GHS credit. CHS was in turn, indeminified against any loss, by M. F. Beirne, should permanent financing not be available. Beirne secured the loan with various real estate properties including the hospital site and land adjacent thereto. PBT recorded Deeds of Trust on all properties used as security, as did GHS. During the same period, M. F. and

Corine A. Beirne, conveyed their ownership of Tract 3 Medical Park Subdivision to LOC. There was evidence to indicate that the land may have been given to LOC with an agreement to either Purchase or lease it from the Beirnes' at a later date. No sales price was established at the time of transfer. In May of 1975 the Board of LOC voted to pay $710,500 for the land. The Board, at that time, comprised of M. F. and Corine A. Beirne and Donald D. Emmal proceeded to draw up an 8% interest note to M. F. Beirne in the amount of $710,500. We found no indication of any payments being made by LOC on this note.

LOC expended the full $750,000 borrowed from PBT without obtaining permanent financing. Construction on the project was halted in Febraury of 1974. However, In June of 1974, LOC obtained another loan from PBT under the same conditions as the previous note, in the amount of $150,000. (Schedule D) This appears to have been to pay the costs prior to the halt of construction incurred over and above the $750,000. PBT recorded another deed of trust, as did GHS, in the amount of $150,000. LOC also obtained an extension of the due date on their first note. Permanent financing again was not obtained and consequently LOC asked for an extension on the due date of their notes. PBT granted the extension, but increased their interest rates on both notes.

During this time LOC applied for an in February of 1975, received $312,500, in hospital construction aid, from State revenue sharing funds. However, this did not remedy LOC's immediate financial situation. In March, 1975, PBT would no longer grant an extension on the notes. The guarantor, GHS, on March 17, 1975 paid off the notes obtaining from PBT through assignment their Deeds of Trust on the property. Shortly thereafter, GHS-Anchorage Hospital, Inc. obtained from LOC a Statuatory Warranty Deed, on Tract 3 Medical Park Subdivision, conveying title from LOC to GHS-Anchorage Hospital, Inc. LOC was initially given until May 31, 1975 to pay what then amounted to $900,000 payment on guarantee and $121,294.23 interest, payable to GHS, or GHS would foreclose on the secured property and sell it at public auction. It appears that LOC received an extension to the May 31, 1975 dead line, and on October 27, 1975 recorded a caveat on the secured property which claimed that the Warranty Deed was no more than a security arrangement and did not convey title.

On November 12, 1975, there was recorded a "Notice of Default and Sale" stating that the trustee of the Deed of Trust elects to sell the secured property." The property was to be sold on February 25, 1976. LOC obtained an extension of the foreclosure by giving additional collateral to GHS to secure LOC's promise to pay. It appears that M. F. Beirne, President of LOC, has been selling the collateralized properties and turning over the net proceeds to GHS. He has

tried repeatedly to sell the properties to interested parties and has incurred large expenses related to this activity. He is claiming these expenses as part of the construction costs, together with all interest accummulated on the original debt and subsequent financing arrangements. The amount owed as of December 31, 1976, was $675,815.37 comprised of $525,815.37 due GHS and $150,000 due National Bank of Alaska borrowed and paid by M. F. Beirne, to forestall foreclosure. (Schedule H and F)

LAND SUMMARY

The land was transferred to LOC by M. F. and Corine A. Beirne, both of whom sit on the Board of LOC, of which there are only three members. Two years after the transfer of the land to LOC, the Board voted to pay M. F. Beirne the current appraisal price for the land. M. F. Beirne, President of LOC drew up a note to himself for $710,500.

To date we have not been provided with any evidence that payments have been made by LOC for the land. Yet, LOC has claimed as eligible construction costs $710,500. (Schedule C) The dollar amount is arbritrary and questionable since M. F. Beirne is in a position to dictate corporate policy. The Certified Public Accountant for LOC asked reimbursement for only $400,000, the appraisal price at the time of transfer. The fact that both LOC's CPA and M. F. Beirne disagree upon the price to be reimbursed for the land, indicates that the price was not derived from an arms length transaction. The price for which LOC is claiming reimbursement could just have easily been lower, higher or somewhere in between.

LOC no longer has title to the land for which they claimed reimbursement, and on which the present construction rests. The State of Alaska gave money to LOC in the belief that a hospital would be built for public purpose. However, there now appears to be great doubt as to whether this will happen. The State of Alaska has paid $312,500 to LOC, supposedly for construction purposes. AS 43.18.010(j) is silent as to the legal protection to the State of Alaska to insure that construction will take place, or that in the event construction does not, or cannot take place, that the State will be returned those funds it has contributed toward the project.

CONCLUSION

LOC received State revenue sharing monies under AS 43.18.010. The intent of this statute is to provide funding support to local governments and other facility sponsors for the purpose of constructing facilities which will be utilized for a public purpose. This coincides with Article IX, Section 6 of the Alaska Constitution, which clearly states that no appropriation of public money shall be made except for a public purpose.

At the time Health and Social Services, (HSS) certified LOC to receive State revenue sharing monies, they did so under the premise that indeed a hospital would be built. However, at the time they certified LOC, construction had been halted for almost one year, LOC could not repay its notes from PBT, and there appeared to be no permanent financing available for the construction to continue. HSS was aware of the halt in construction but felt that it was bound by that part of AS 43.18.010(j) which states: If construction of a facility began after January 1, 1968....

Construction had begun in 1973, therefore this prerequisite of the statute had been met. The statute does not require that construction activity be continuing at the time of the application.

Construction of the facility has not continued since it stopped in early 1974. Financing for the project still appears to be unobtainable. The site of the construction has been conveyed to a party which at any time could foreclose on the notes due. The present wording of AS 43.18.010(j), when applied to a non-governmental facility sponsor does not address the protection to the State as far as getting a finished product for its revenue sharing dollars. As we have discussed, nothing assures the continued vitality of the construction project. The State may find that its revenue sharing money has gone to pay a past debt and no hospital will ever be fully constructed and in use by the people of Alaska. There must be good faith on the part of the grantee to fulfill his stated goals. The grantee in this case has voluntarily jeopardized the interest of the State as intended by AS 43.18.010(j).

We recommend that CRA ask for the return of those funds given to LOC, and that no subsequent payments be made until such time as LOC provides an accurate accounting of construction costs, obtains permanent financing, and has title to the land for the hospital site dedicated irrevocably to a public purpose.

21-05

George Elgee

SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

Senator Joe Orsini
Chairman

_____ Bill No. _____ Patrick Rodey
Prime Sponsor

Senate
Concurrent Resolution No. 21

This Bill is currently in the Senate Community and Regional Affairs Committee for consideration. Your response, as prime sponsor, to the following questions will serve to hasten Committee action on this Bill.

1. What is the need for your proposed legislation; what is the goal you are trying to accomplish?

retain local control of Zoning

2. Are there any other viable ways of accomplishing this same goal?

electing a new governor.

3. Persons or groups you know of who are supporting the legislation.

Rural Anchorage legislators

4. Persons or groups you know of who are opposing the legislation.

5. Can you foresee any new problems that might be caused as a result of enactment of your bill?

irritating the governor

6. What is the earliest time you would like the Senate Community and Regional Affairs Committee to consider your bill?

JAY S. [redacted]MMOND
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

February 23, 1977

The Honorable Pat Rodey
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Rodey:

I understand you objected on the floor of the Senate to my recent action providing temporary female detention facilities in Anchorage. I regret you did not have an opportunity to discuss this action with officials of my Administration prior to your floor action because I feel that if you had been apprised of the facts in this matter, I suspect you would have supported my action. Although I was hesitant to exercise my legal authority in this manner, it was necessary that I do so in order to relieve a serious condition occasioned by the unavailability of adequate correctional facilities in Anchorage. The situation has reached emergency proportions and public interest demanded that action be taken now.

Let me provide you with information which convinced me to act.

1. My Administration requested a zoning variance from the Anchorage Municipal Assembly in order to provide a female detention center. By a 7 - 2 favorable vote the assembly granted the zoning variance. However, municipal rules require a two-thirds majority to override zoning; since there are eleven assembly members, the municipal attorney ruled that a 7 - 2 favorable vote was not sufficient. This matter is now being taken up in litigation. However, attorneys on both sides feel the court will not rule for many months.

2. The Human Rights Commission and Alaska Legal Services has filed a suit against the State charging discrimination in regard to detention facilities for female prisoners.

3. I have been assured by the Division of Corrections and the Department of Health and Social Services that there are no alternative structures available which, at a reasonable price, could be modified to meet the requirements of local and federal regulations for detention facilities.

4. The department has assured me that the correctional situation in Anchorage is at emergency proportions and further requested in writing assurance that Ridgeview Manor would only be temporarily used as a facility. (Note the attached letter from Commissioner Williamson.)

Based on the above information, I decided to exercise the authority vested in me under the Alaska Statutes and have ordered that alternations immediately begin to provide for a temporary correctional facility for women prisoners. In arriving at this decision, members of my Administration contacted the legislators from the effected district, Anchorage municipal officials including the Mayor's Office, Municipal Assembly, and the Zoning Commission. All those we talked to apparently understood the need for my action and all apparently agreed that it was truly in the State's best interest to provide for these facilities. I think the key element in this decision was the fact that the municipal assembly voted 7 - 2 in favor of the zoning variance and that attorneys on both sides agree that the court is very apt to rule in favor of upholding this vote. The problem has been that we cannot expect court action on this low priority case in the near future. Therefore, I felt it imperative I take immediate action.

I hope this information has provided you with a better understanding of the Ridgeview situation and gives you an idea of what prompted me to take this action.

Sincerely,

Jay S. Hammond
Governor

Rose Anticipates No Jail Challenge

Gov. Jay Hammond's order to open Ridgeview Manor as a women's jail over an Anchorage zoning ruling probably won't be challenged by the municipality.

Assembly Chairman Dave Rose said yesterday he does not expect the municipality to seek a court test of Hammond's action because most assemblymen are in favor of the Ridgeview jail proposal anyway.

"I don't expect there will be a negative reaction" from the assembly, Rose said, "partly in light of the fact that a majority of the assembly approved the rezoning but mostly because the governor has assured us (Ridgeview) will be only a temporary facility and that the state will pursue long-range planning" for other correctional facilities.

Mayor George Sullivan, who returned to work yesterday after a two-week vacation, refused comment until he has had time to discuss the Ridgeview issue with municipal attorneys.

Meanwhile, Assemblyman Dave Walsh has prepared a resolution for assembly action tonight asking Hammond to delay moving the women's prison until municipal officials have been consulted.

Walsh said this morning he is uncertain whether he will introduce the resolution. "The original reason (for the resolution) was that it appeared there was no communication with local officials" before Hammond's action Friday, he said. Walsh said he has since learned that Hammond's aides were in contact with Rose and other top local officials prior to the order.

Hammond's Ridgeview declaration is based on a 1974 statute allowing the governor to override local zoning laws when the state can show a compelling need to do so. The Ridgeview case apparently marks the first time the statute has been used.

A request for a special exception to allow a jail at the Ridgeview site failed in September because the assembly could not muster the necessary eight votes. A protest petition filed by neighbors of the Ridgeview facility activated a municipal ordinance requiring the two thirds vote for approval of the exception.

Of the nine assemblymen present at that September meeting, seven supported the jail, with only Assemblyman Don Smith and former assemblymun George Dickson opposing.

Dickson and Smith, whose district includes the former nursing home, cited the overwhelming opposition to the proposal presented at the public hearing as one reason for their opposition. The two also criticized the Ridgeview proposal as a stop-gap measure, a contention readily admitted by corrections officials.

Smith yesterday refused to speculate on the possibility of a municipal court appeal of Hammond's action. "I know the legal office is looking into it, whether he (Hammond) can do that, but I really don't know yet whether there's a chance of appeal or not," Smith said.

Smith said he is disappointed in Hammond's order.

"I thought that (the Ridgeview proposal) was over with and the state would be forced to do more long-range planning," he said. "But there's apparently not a lot anybody can do except grin and bear it."

Smith, who is going to Juneau this week, said he planned to request meetings with corrections officials and Hammond's staff to discuss the Ridgeview jail.

Ultimatum Plays Part In Decision

An ultimatum from the state Human Rights Commission played at least some part in the timing of Gov. Jay Hammond's decision to override an Anchorage zoning ordinance to house a women's jail at Ridgeview Manor.

In a letter sent to Bill Huston, director of the state division of corrections, earlier this month, the commission announced its intent to reopen administrative hearings into the alleged discriminatory treatment received by women prisoners held in Anchorage's Sixth Avenue state jail annex unless the state came up with a solution to the problem by today.

The commission had suspended that action a year ago when the division originally announced the Ridgeview jail proposal. Commission Director Niel Thomas said yesterday the Ridgeview facility, which commissioners toured last year, is an adequate physical plant but that a judgement on whether corrections now will provide adequate rehabilitative programs for women inmates will have to wait until the Ridgeview jail actually opens.

Thomas confirmed that he sent a letter to Huston about Feb. 10. Huston said he didn't know whether Hammond was aware of the letter's contents when he made the declaration but the governor's executive assistant, Bill Gordon, said it "was at least part of" the timing of Hammond's order.

"But that (the letter) certainly wasn't the overriding factor," Gordon said, noting that Hammond and corrections officials have been concerned about inadequate facilities for women prisoners for some time.

"We've known that something would have to be done one way or another to alleviate the pressure," he said. "The attorney general's office did notify us that the Human Rights Commission was considering or had filed a suit."

Huston stressed that Ridgeview isn't a permanent solution to the division's problems. "All we're doing is relieving some of the pressure," he said. While Ridgeview may solve the problem of housing women prisoners it won't cure the overpopulation of male inmates.

LETTER OF INTENT

Information received by the Senate Community and Regional Affairs Committee has identified six sections of the coastal zone regulations submitted by the Alaska Coastal Policy Council which, in the opinion of the Committee, warrants change. These appear in the standards for timber harvest (6AAC 80.100). Three of these sections, namely 6AAC 80.100 (a),(b)(3), and (d) were deleted entirely by the House of Representatives. We concur in this result.

There are three other sections which are also of concern. Section (b)(2) of the regulations, as submitted by the Policy Council, requires that timber harvest activities in the coastal area be conducted so as to "assure unrestricted fish movement in coastal waters". The word "unrestricted" as appears in this section is absolute in its requirement, therefore placing an unreasonable burden upon the timber industry. On the other hand, the Committee does desire that fish movement in coastal waters be assured. Since we cannot amend this section and therefore have a choice only between adopting it entirely or deleting it entirely, we wish to pass the section without change. However, we strongly urge the Alaska Coastal Policy Council to delete the word "unrestricted" as it appears in this section for the reason given.

For the same reason we also urge the Alaska Coastal Policy Council to delete the word "unrestricted" as it appears in Section (c)(4). Again, we will pass this section as written, but believe that the word "unrestricted" places an unreasonable burden upon the timber industry.

Finally, we urge the Alaska Coastal Policy Council to delete the words "potential for" in Section (b)(1) as submitted by the Council. As presently written, that section requires that timber harvest activities in coastal areas be conducted so that "the location of facilities and the layout of logging systems shall be managed so as to minimize potential for adverse environmental impacts". Industry should minimize adverse environmental impacts. However, the words "potential for" add an open-ended burden, the meaning of which we are uncertain; we therefore strongly urge that these words be deleted by the Alaska Coastal Policy Council.

It is the intent of the Committee with respect to the timber harvesting process section under review that, for the reasons stated above, the Alaska Coastal Policy Council review the sections discussed above and resubmit them with the recommended changes.

JOE ORSINI, Chairman

Alaska State Legislature

May 10, 1978

The Honorable Ted Stevens
United States Senate
260 Russell Building
Washington, D. C. 20510

Dear Senator Stevens: Ted

I have enclosed for your information and background use a copy of a letter recently submitted to this Committee by the U.S. Coast Guard regarding the implementation of the Alaska Coastal Management Act.

My reason for bringing this letter to your attention involves its implicit questioning of the concept underlining the Coastal Management Act passed by the Alaska Legislature in 1976. Specifically, Rear Admiral J.B. Hayes believes that when the Alaska Legislature authorized the creation of local management districts it violated the intent of the federal Coastal Zone Management Act:

> "b. Section 923.12(a) requires the State to 'develop policies and procedures by which uses determine to be subject to the management program will be permitted conditioned, modified and/or prohibited. These policies and procedures regarding management of uses and/or their impacts must be capable of effective implementation at the time of program approval'. Alaska's section 6 AAC 85.070 and 6 AAC 85.080 delegates these functions to the districts. This creates a situation where each district's uses and policies may differ and is therefore not authorized under the federal regulations."

I believe that Admiral Hayes' concerns overlook two underlying elements. First, local district programs must be consistent with the statewide Guidelines and Standards adopted by the Alaska Coastal Policy Council and these regulations, in turn, guarantee priority of action to matters of national concern. Secondly, regulations to be effective and equitable, must accurately reflect local circumstances. The differences in topography, climate, biota and human activity between such areas as southeast Alaska, upper Cook Inlet or the Bering Sea coast are more fundamental than those separating Washington State from Oregon, or New Jersey from North Carolina. Yet these states all have individual, essentially uncoordinated coastal programs for the Coast Guard to deal with.

These regional disparities were the basis for the Alaska Legislature's decision to authorize local management districts. I seriously doubt that a monolithic set of regulations would well serve coastal management in this state or treat equitably the diversity of Alaska's peoples and regions.

I hope that the concerns expressed by Admiral Hayes can be satisfactorily settled here in Alaska. While I can sympathize with the Coast Guard's irritation at being asked to comment on six separate drafts of the proposed regualtions within a six month period, these requests should also be seen as evidence of the State's good faith efforts to involve federal agencies in each step of the preparation of the regulations.

If, however, the differences with the Coast Guard escalate beyond the state level and the legality of Alaska's Coastal Management Act is challenged or jeopardized in Washington, D.C., I would hope that you would be able to explain to the federal government the compelling reasons for the structure of Alaska's Coastal Management Act, and to work towards preventing its dilution at the federal level. I have a great deal of personal apprehension that failure to have Alaska's Act adopted by the federal government would lead to an increase in Federal control in Alaska's coastal area. I hope this apprehension is not justified.

Sincerely,

Joe Orsini

1 MAY 1978

Honorable Joseph L. Orsini
State of Alaska Senate
Pouch V
Juneau, AK 99811

Dear Mr. Orsini:

The Coast Guard appreciates the opportunity to correspond with you. committee concerning the 13 April 1978 Standards and Guidelines for Alaska's Coastal Management Program (ACMP). These Standards and Guidelines represent a considerable departure from the previous drafts on which the Coast Guard was allowed to comment. The Coast Guard feels that this version of the Standards and Guidelines is severely deficient in the areas of participation, specificity, and priority of uses.

Participation. The Office of Coastal Zone Management in Alaska has attempted to provide federal agencies with the opportunity to participate in the development of Alaska's program. Section 923.51 of the federal regulations requires, however, that the State "provide for federal agency input on a timely basis." The Coast Guard feels that the State has been deficient in this regard due to the shortness of time allowed for agency comments between successive drafts of the Standards and Guidelines. This is the sixth occasion in the last six months that the Coast Guard has commented on a different draft of this document. This rapidity of drafts has not allowed sufficient time for coordination between the various agencies of the Department of Transportation, nor the opportunity to carefully evaluate the content of the Program. Furthermore, this "final" version of the Standards and Guidelines was approved by the Council and submitted to the legislature without an opportunity for federal review, even though it differed substantially from previous drafts. Written comments have yet to be received by the Coast Guard addressing our stated concerns. The Coast Guard feels therefore that this past history of short lead times for response combined with the lack of formal feedback from the State does not meet the federal requirements for participation.

Section 306(c)(1) of the Coastal Zone Management Act requires federal agency participation in the development of the Program at an early stage in the process. The Coast Guard recommends that a provision for this participation be included in section 6 AAC 80.020 of the Standards.

The Coast Guard has commented on several occasions that a mechanism is needed for government participation at the district level in the development of the local plans. The Coast Guard is concerned that each district may develop its own mechanism for government participation and then cite compliance or non-compliance with this mechanism as evidence of government participation. Because the actual decision concerning adequacy of participation will be made at the State level by the Council, the Coast Guard feels that it is very important that a well developed State mechanism for participation be defined as part of the ACMP. If this accomplished, the process will not vary from district to district and all parties will have a clear understanding of their responsibilities and opportunities. It is therefore recommended that Section 85.100 be expanded to detail exactly when, where, and how government agencies will be allowed to participate in the development process.

Priority of Uses.

Section 923.13 of the federal regulations requires that the State must: "(1) Identify what constitute uses of regional benefit; and (2) identify those methods that shall be used to assure that unreasonable restrictions or exclusions of such uses by local land and water use regulations shall not occur." The Coast Guard finds no mention of regional benefit, national interest, or defense considerations in the Guidelines and Standards. National Defense, including Coast Guard functions and responsibilities such as search and rescue and fisheries enforcement, should be identified in Chapter 80, Article 2 of the Standards as an important priority use of the Coastal Zone. This priority provides the basis for regulating future land and water use, provides a common reference point for resolving potential conflicts, and is important for future acquisition of areas not presently controlled by the Coast Guard.

Section 6 AAC 80.080 of the Standards addresses water based transportation routes. Under the Ports and Waterways Safety Act of 1972, the Coast Guard is authorized to establish vessel traffic services in ports, harbors, and other waters subject to congested vessel traffic. Any district plans dealing with the management and control of vessel traffic should be coordinated with the Coast Guard to insure such plans are compatible with Coast Guard traffic control responsibilities. There is also considerable regional and national interest connected with transportation and these considerations should be mentioned in this section.

Specificity. The present Standards and Guidelines are lacking in specificity and substance and, as a result, the plans developed and implemented by the Alaska Coastal Resource Districts may vary so widely that the Coast Guard may be compelled to operate under as many as 50 different

plans within Alaska rather than under one plan which is implemented by various local government units. This situation would present an unacceptable burden on the Coast Guard and other federal agencies and is therefore considered a serious defect which must be remedied.

The Coast Guard feels that the Standards and Guidelines are deficient in the following areas concerning specificity:

a. The standards and criteria upon which decisions pursuant to the program will be based are not sufficiently specific to provide "(i) a clear understanding of the content of the program, especially in identifying who will be affected by the program and how, and (ii) a clear sense of direction and predictability for decision makers who must take actions pursuant to or consistent with the management program." These provisions are required by section 923.3(a)(2) of the Federal Coastal Zone Management Approval Regulations.

b. Section 923.12(a) requires the States to "develop policies and procedures by which uses determined to be subject to the management program will be permitted, conditioned, modified, and/or prohibited. These policies and procedures regarding management of uses and/or their impacts must be capable of effective implementation at the time of program approval." Alaska's section 6 AAC 85.070 and 6 AAC 85.080 delegates these functions to the districts. This creates a situation where each district's uses and policies may differ and is therefore not authorized under the federal regulations.

The effective implementation required under this section can not occur under Alaska's present Standards and Guidelines. If the State delegates the responsibilities of establishing uses and policies to the individual districts (85.070 and 85.080), and the district policies and uses are not submitted to NOAA with the ACMP (district plans will be developed later), it is impossible to implement meaningful management procedures regarding unknown uses and policies. It is therefore not clear what status the Program will have before the district plans are in place.

c. Section 923.12(e) of the Federal regulations states that "to the extent a state's government program policies are generalized, performance standards that will be used to enforce these policies will need to be sufficiently explicit and specific that persons affected by the management program will have a reasonable understanding of what uses would be permitted in which locations of the Coastal Zone and under what condition." The Coast Guard feels that the Standards are neither explicit nor specific and do not provide the required clear understanding as to what uses are permitted in any location.

The Coast Guard is very interested in coastal zone management and desires to work closely with the State of Alaska in implementing the ACMP. However, the mere opportunity to comment on the various stages of combined plan development when with the lack of response received concerning these comments, can not be considered real participation. The continued failure of the State to react to the concerns expressed herein is viewed as a matter of concern and is considered a serious continuing deficiency under the federal regulations. I am hopeful that these defects can be corrected before the ACMP is sent to NOAA, and am looking forward to continuing interaction with the State in coastal zone matters.

Sincerely,

J. B. HAYES
Rear Admiral, U. S. Coast Guard
Commander Seventeenth Coast Guard District

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MINUTES

April 25, 1978

Present: Senators Orsini, Sumner, Willis and Ferguson; Roger Allington, Co-Chairman of the Alaska Coastal Management Council; Murray Walsh, Office of Coastal Management; Bruce Aronson, Department of C&RA; Pat Sharrock, ABC Board; Jim Rolle, Alaska Municipal League.

Absent: Senator Hackney came latter part of meeting.

The meeting was called to order at 3:10.

SB 533, SB 208, SB 599 and SCR 103 were the bills before the Committee.

SENATE BILL 533

Senator Sumner moved and asked unanimous consent that the Committee pass out CSSB 533 with individual recommendations.

SENATE BILL 208

Bruce Aronson, Dept. of C&RA, testified that the Department supports SB 208. Senator Sumner moved and asked unanimous consent that the Committee pass out SB 208 with individual recommendations.

SENATE BILL 599

Chairman Orsini stated that SB 599 is an outgrowth from discussions on SB 183, which is part of the Governor's Alcohol package. The bill does essentially two things -- first, it allows a municipality to adopt ordinances by which either new, renewel or transferred liquor licenses could be rejected by a municipality. If a municipality does not act to reject the license request within 30 days the application is automatically placed before the ABC Board.

Senator Sumner questioned the need to transfer a state level function, such as liquor licensing, to the local government level.

Chairman Orsini stated that Section 1 and 2 both deal with municipalities but were separate from each other. Section 2 gives an intermediate means of municipal alcoholic control if the municipality votes to do this. It would limit sales to nondistilled alcoholic beverages, such as beer and wine.

Chairman Orsini stated that he had spoken with CHAR Lobbyist, Dorothea MacDonald, and she initially had no objection to the bill but stated that the CHAR executive committee later decided to oppose it.

Pat Sharrock, Director of the Alcohol Beverage Control Board, stated that one provision of the bill that he does like is the requirement for a municipality to place a license application on its agenda for a public hearing. He stated that one are of the bill seemed to be a conflict or a duplication, which is where the applicant and the ABC

Board both would be required to send a copy of the application to the governing body involved. In regards to the 30 day waiting period provided for a municipality to disapprove an application he asked that it be specified when the 30 day count-down would begin.

Mr. Sharrock had no comments on Section 2 of the bill.

Jim Rolle, Alaska Municipal League, in response to the concern that the municipalities may be given too much power by being able to reject applications, stated that now the only protest to the ABC Board is generally in the area of health and zoning. He stated that this bill would give municipalities an option. Then if they chose not to adopt appropriate ordinances the ABC Board would continue to make the decisions. He stated that the municipal officials are, in his opinion, as effective as the ABC Board in judging what is good for their community and what isn't.

He also stated that he agreed with Mr. Sharrock that the 30 day period is confusing. He also had no comment on Section 2.

COASTAL MANAGEMENT GUIDELINES AND STANDARDS

Chairman Orsini stated that the Committee now has SCR 103 before the Committee approving the regulations.

Roger Allington, Co-Chairman of the Alaska Coastal Policy Council, stated that the Coastal Management regulations are slightly different from other regulations. For one, he pointed out that they are being promulgated by a specially-organized body, the Alaska Coastal Policy Council, composed of government and public members. He also noted that the intent of the regulations was to establish broad policy principles and allow local municipalities and district to draw up their own management programs essentially on a zoning basis. Furthermore, the areas themselves would draw their own boundaries for coastal management jurisdiction, providing certain criteria were met.

Although the Council extensively revised the final version of the regulations, Allingtion stated that on the last part of Section 85, concerning council review, was new. He also stated that there was a major change in the Timber Harvest Section of the regulations which was requested by the timber industry. There was also work done on the subsistence section. The question was raised of what would happen if local or state agency regulations conflicted with the Coastal Regulations. Mr. Allington replied that the agencies or local governments must bring their regulations into conformity with the coastal management program.

Murray Walsh, Coastal Zone Management Office, stated that the critical time would be the next six or seven months which would bring out the flaws and problems of the regulations. He also stated that the Legislature should consider an increase in state funding of this program just to give the coastal management more flexibility and eliminate some of that federal dependence.

The meeting was adjourned at 4:35.

Coast Policy Regs

Roger Allington

munis use these regs to set up zoning

desire for max flexibility by local districts

~~nothing~~ Sec 80.010(b) — intent re st. regs the intent is that local dist plans override st regs, if dist plans in conformance w/ coast pol guide

funding - Fed CZM ($700K FY79)
CEIP funds may also be used

~~Boroughs~~ NSB - need boundaries of Beaufort Sea habitat (ocean to mountains) - i.e. use entire borough as "coastal zone"

possible for council to "cause planning to be done" if munis do not act

20 FEBRUARY, 1977

SENATOR JOE ORSINI
POUCH V
JUNEAU, ALASKA 99811

RE: Senate Joint Resolution #9

Dear Mr. Orsini:

Your letter of 2-18-77 requesting additional information on the Seward annexation attempt has been heartily received. I believe the deadline for both houses to vote on this would be February 28th, so I hope you will act quickly upon the following information, if you think it prudent to do so.

My original petition apparently did confuse some people who signed, since the City's counter petition succeeded in removing about 1/3 of the names from it. When that petition was circulated (Nov.-Dec., 1976) there were two annexations still under consideration locally. The Boundary Commission hearing on the step 2 (Lowell Point) annexation was not cancelled until 1-6-77, three hours before it was scheduled to happen.

In late January, 1977, when it was abundantly clear that only the 4th of July Creek annexation was to be considered by this session of the legislature, another petition was circulated to support the one which I had done earlier. To insure that no one became confused about the scope of their petition, Mr. Willard Midby & Mr. Edward Zimmerman, longtime Sewardites, even took a map of the 4th of July Creek area with them as they gathered signatures. Within a few days they succeeded in gathering an additional 175 signatures in opposition to the 4th of July Creek annexation proposal. Mr. Zimmerman has informed me that his petition contained the signatures of eight (8) Seward school teachers, among others. Mr. Midby is at present circulating yet another petition among the Seward business community with the same objective.....to negate this annexation attempt. What I am attempting to impress upon you is the fact that widespread opposition to this annexation exists, from within as well as without the Seward City limits. Mr. Midby's

The reasons that approximately 250 Sewardites are now on record opposing this annexation are many and varied. I believe I speak for the majority of petitioners by saying that I do not want the City of Seward to exercise an undue influence over the growth patterns of any of the outlying areas surrounding this town. It is the quality of our lives which will be affected by the City Administration's plans, and we should be able to exert an influence over those plans. When the City went ahead and scheduled hearings on the step 2 annexation proposal after 69% of the electorate asked them not to last Nov. 2nd, many people here were outraged that the City Administration had so little regard for the voter's opinion.

Apparently the conclusion was drawn at the February 3rd hearing that the 4th of July Creek area is the most likely place for O.C.S. development to occur. I don't believe that is a very sound conclusion. The Seward city limits already encompass the entire northern end of Resurrection Bay where very little develpment has yet taken place. It is in this general area that future development will occur due to the ARR and Seward Highway access into the area. Exxon and Dresser have leased small tracts in this area north or town, rather than out on the Bay.

There are eight (8) permanent residents in the area to be annexed. I believe the McNutt's wrote a letter to you this past week, and Ms. Ernst of the other household sent a letter to Representative Smith for inclusion in the Feb. 3rd hearing record. All of these people have been there for approximately 2 years and are opposed to the annexation attempt. McNutt's address is Box 864, Seward, Ak. 99664. I am not sure of the mailing address for the Ernst-McKinnon household, but they are well known in Seward and could probably be reached through a general delivery address. All of the adults in the annexation area signed my original petition except John McKinnon who was out of state.

The McNutt's live on the property of E. W. Hundley, President of Continental Van Lines of Seattle, Anchorage and Fairbanks. I talked with Mr. Hundley on 2-15-77 and he indicated that he had only recently become aware of the annexation attempt, and that he did not think it to be a very good idea. He further indicated that he would contact you that very day via phone and telegram from his Seattle office. I understand that he did contact a business acquaintance of his in Anchorage, Mr. Ted Meining of Nikiski Marine Company, who subsequently phoned Rep. Rudd and the Senate CRA Committee about the issue. Mr. Meining expected the Senate CRA Committee to return his call, which apparently was not done. Mr. Hundley's Seattle number is 937-2261, and Mr. Meining's Anchorage number is 279-0227. You could also contact Mr. Edward Zimmerman of Seward at 224-3647 or 224-5720. Mr. Zimmerman is the elected leader of the Seward anti-annexation element and could probably give you more extensive information than I could.

If any development does occur within the annexation area, it will likely be on Mr. Hundley's property since it is much more accesible than property farther out at 4th of July Valley, and because Hundley's property has an existing pier. Conversely, not only is 4th of July Creek proper undeveloped, access is barred by one mile of sheer cliffs.

Mr. Paul Conger has informed me that the Senate CRA Committee did not actually obtain a copy of the 3rd petition until this past week, after I called him, and 2 full weeks after the Feb. 3rd hearing. As previously stated, that petition was expressly drawn up to negate the 4th of July Creek annexation, and I believe considerable emphasis shoud be given to the views of these petitioners. According to the minutes of the hearing, only passing mention was made of this petition, and it was certainly not understood that it was aimed at the 4th of July Creek annexation only.

At the public hearing on May 21st, 1976, nine people including three local government representatives gave testimony on this proposal. Five (5) persons were opposed. They were: Penny Hardy, Warren Huss, DDS, Mary Fackler, Ardene LaCaze, and myself. I have attempted to obtain a transcript of that hearing from Patrick Poland of the Department of Community & Regional Affairs for corraboration. Mr. Poland informed me that no such transcript was available and I would have to pay for it myself, although he did say I could get a copy of a tape. This all transpired 1-2 months ago and I have not heard anything further about the offer of a tape recording of that hearing, although I did indicate a desire to receive the tape.

I hope you can help us with this matter. Our own elected representatives, Specking, and to a lesser extent Kerttula, have been unresponsive to our petitions. At the very least, disapproval of this annexation would only delay it by one year, and that delay would not be injurious to the Seward area.

Sincerely,

Tom Taggart

PS: The following corrections should be made in the minutes of the Joint CRA hearing on 2-3-77:
1) The annexation area contains 6400 total acres, not 6400 private acres.
2) Reference is made to a Boundary Commission member called Sheila Gallagher; whose last name is purported to be "Jones" in State files.
3) The names of the Boundary Commission Chairman and myself are misspelled.
4) The statement attributed to the Seward City Manager on page 3, paragraph 6 is confusing, and if accurate, indicates that he himself is quite confused.
5) Mr. Schaefermeyer's contention on page 3 that the children had to climb a mountain to get to school is absurd. They do walk 1½ miles along the beach to catch a bus.

CC: Representative Lisa Rudd

Honorable Joseph Orsini
Chairman
Senate Committee on Community
and Regional Affairs
Pouch V
Juneau, Alaska 99811

Dear Mr. Chairman:

Following the hearing on February 3 regarding Seward's annexation petition for the Fourth of July Creek area, you requested that we provide you with additional information concerning the residents of the annexation area.

We have identified eight people who are residing at the present time within the boundaries of the proposed annexation. There is a family by the name of McNutt living in an old building owned by Mr. Eugene Hundley of Everett, Washington, one of the two private property owners in the annexation area. We were able to make contact with Mrs. McNutt and she advised that the family has verbal permission from Mr. Hundley to reside on his land. The McNutt's have four children, three of which attend Seward public schools. This was verified by the Assistant Principal of William H. Seward Elementary School. A check with the Kenai Peninsula Borough Assessor's Office revealed only Mr. Hundley's name on the property tax rolls. (He owns approximately ten acres in the annexation area). The Borough has not assessed any property tax on the building now resided in by the McNutt's because it was heretofore vacant and determined to be of no value for taxation purposes.

Two other residents of the proposed annexation area, a Fredricka Ann Ernst and a Jussi Mackinen, have taken over an old cabin built several years ago by a man who homesteaded the area. This man died and his family failed to obtain patent to his homestead. The land has since been nominated for state selection under provisions of the Alaska Statehood Act.

In addition to the eight people above, we have been informed of one other man living in the Fourth of July Creek area, however we have not been able to identify him other than by his first name, Peter.

We feel it is significant to note that none of the above residents own any real property in the area. None, it appears, can produce any documented proof of lawful entry on the property where they reside. Only the McNutt family claims a verbal agreement with the lawful owner of the property. This has not been substantiated by the City.

Finally, we can find no provision of the law regarding local annexation that has not been complied fully with by the City of Seward and Local Boundary Commission. Section 10.100 of Title 19 of the Alaska Administrative Code provides for the proper filing of an Answering Brief to a Petition for Annexation. To our knowledge, no such Brief's have been filed by an residents or property owners in the Fourth of July Creek annexation area. In fact, the largest private property owner, Mr. Dale Lindsey, has openly supported the annexation in the Local Boundary Commission hearing on May 21, 1976, and in a letter submitted to Chairman Rudd on February 3.

The majority of those residents who have signed petitions opposing the Fourth of July Creek annexation reside outside the present corporate boundaries of Seward and, with the exception of the individuals identified above, none reside in the annexation area.

We trust that this has provided further clarification concerning Seward's petition for annexation. If there is additional information you wish to have from the City, please don't hesitate to let me know.

Sincerely yours,

Clarence E. Johnson
City Manager

2 February, 1977

Representative Charlie Parr
Pouch V
Juneau, Alaska 99811

RE: Senate Joint Resolution 9

Dear Mr. Parr:

A vote on SJR9 will likely come before the Legislature soon.

In your recent correspondence to me concerning this matter, you indicated that you may rely heavily upon the Local Boundary Commission recommendation and the opinion of the Seward Legislators. I ask that you do not, for the following reasons....

1) The LBC recommendation was contrary to the public sentiment expressed at the hearing, and was rendered in haste.

2) Since I sent the petition to you a few weeks ago, yet another petition with an additional 175 signatures has been sent to the House Community & Regional Affairs Committee. Nearly half of Seward's electorate have now signed the two petitions opposing this annexation.

3) Unlike yourself and many of your colleagues, the Seward Legislators have thus far been totally unresponsive to this issue.

Please vote to disapprove the LBC recommendation.

Sincerely,

Thomas Taggart

CC: Representatives Miller, Malone, Smith, Rudd, Osterback, Guy, Hocking, Buchholdt, Duncan, McKinnon, Kelly, Snider, Bradley, Severnson, Phillips, Miles, Cotten, Gardiner, Akers, Haugen, Brown, Swanson, Nakek, Schaeffer; Senators Huber, Ferguson, Rader, Willis, Sackett, Meland, Orsini, Holman.

MS. SMITH: PLEASE EXCUSE THIS COPY, BUT TIME IS SHORT AND I HAD TO GET THIS OUT IN A HURRY.

TOM Taggart

copy of petition in file in Smith's office —

Seward, Alaska
Feb 1, 1977

Re: Petitions relative to legislative action on Fourth of July Creek

Representative Sally Smith

Dear Ms. Smith:

This envelope contains signature petitions from over 170 Seward citizens requesting that the recommendations of the Boundary Commission which convened here in May be completely annulled, rejected, and set aside.

It is only fair that you do this because the first boundary commission hearing held here, caught the Community off guard. I am told there was a very small attendance, and I know that I was not even aware it had taken place until I read of it in the local paper.

There has been a lot of agitation, in Seward, for and against annexation, during the past year, but the conflict seems to be primarily between City Hall and the people, rather than a real division among the people themselves.

If the city's failure to reach the people is due to their policy of Futuristics, or to stereotyped bureaucratic approach, ~~we will never~~ or to the sheer reality of a rather depressed economy we will never know, and it is of small import <u>now</u>. I emphasize the here and now because as of this present date Feb. 1, 1977 the people have spoken, and after all is said and done, democratic government still remains; essentially, a process, from, through, and for the common people.

Respectfully yours,

Willard Nidbr

THOMAS TAGGART
BOX 1195
SEWARD, ALASKA 99664

13 JANUARY, 1977

Dear Alaska State Legislator:

The most volatile issue in the Seward area this past year has been the attempt at annexation of state lands by the City of Seward.

The city administration justifies their piecemeal annexation plan upon the premise of preparing for O. C. S. development. They refer the people to the study which they contracted (The Seward Concept Plan) as supportive of their position that annexation is desirable and/or necessary.

The facts do not support the city's contention that annexation is necessary for orderly development in the Seward area. Some of the more important arguments againest these annexation proposals are:

1) The "Seward Concept Plan" has been adjudged by state and federal authorities as inadequate for O. C. S. planning and subsequent funding.

2) Exxon and Dresser, which have selected Seward as their base, have chosen small tracts of less than 5 acres each in close proximity to the Alaska Railroad. Their choices would seem to indicate a precedent for any companies which may follow. There is much land already within city limits and extending along the ARR with good transportation access. These are the logical places for growth to occur, rather than in a wilderness setting with all the attendent expense involved in developing such a site.

3) Most of the proposed annexation areas are rugged terrain with slopes in excess of 30° which would preclude any sort of tax base from developing there. Verily, in any direction from Seward except north, rugged wilderness is encountered within a few miles of town.

This issue was brought before the local electorate on November 2nd, 1976 in a straw poll conducted at City Hall, Seward. At that time nearly 75% of the total voters rejected the city's annexation proposals which were put before them.

The signers of the attached petition ask the legislators to override any recommendations from the Local Boundary Commission for annexation of lands in the Seward area.

Sincerely,

Thomas Taggart

PS: Please note that page 3 of the petition contains about 15 signatures which are duplicated on pages 1 & 2. The petition was revised to a condensed form, thus accounting for a few duplicate signatures from the original petition.

Representative Sally Smith
Pouch V
Juneau, Alaska 99811

RE: SENATE JOINT RESOLUTION 79

Dear Ms. Smith:

I again apologize for my abrasive letter and phone call. Tact is not one of my virtues. However insignificant this issue may be in the general context of your duties in Juneau, you must understand that it is very important to Sewardites.

I became involved with this issue because I live adjacent to the area which is proposed for annexation. Your statement that our case was full of "untruths," and that the residents in the annexation area were "squatters" was a bit much for me to take. I will make this as short as possible....

My petition was conceived and circulated last November & December to stop the 4th of July Creek annexation attempt and also Step 2 of the City's annexation plan. That step was still very much alive when the petition was circulated, although 69% of Seward's voters asked the City to drop it at the last general election. It was only cancelled at the last moment (1-6-77), and not by the City.

After mailing my petition with 109 signatures to all Legislators on 1-13-77, I was publicly castigated by the Seward Mayor for exercising my right to petition the government. The Mayor and his cohorts disapproved of my objectives, so they interpretted my efforts as being detrimental to society, when in fact the exact opposite was the case.

The City's next step was an attempt to discredit my petition by circulating a counter petition asking people to remove their names from mine. I believe they succeeded in removing up to 40 names from my petition.

The City's counter petition inspired the leaders of the Bear Creek Anti-annexation League to circulate yet another petition, which purportedly was worded exactly like mine, and which was intended to show support for my petition. Their petition added 175 additional signatures in opposition to the 4th of July Creek annexation. IT MUST BE NOTED, THAT WHEN THE THIRD PETITION WAS CIRCULATED, IT WAS CLEARLY UNDERSTOOD THAT THE ONLY ANNEXATION BEING CONSIDERED BY THE LEGISLATURE WAS THE 4TH OF JULY CREEK AREA. If there was any misunderstanding as to the scope of my petition, there was certainly none concerning the third petition.

By my reckoning there are now about 244 people within and without the Seward City Limits who are on record as being opposed to the annexation of 4th of July Creek. This is a sizable portion of the 728 voters who turned out here in the last general election. These petitioners do not all live outside the city limits, own no property, or reside here only a few months at a time, as the Seward City Manager was quoted in the minutes of the February 3rd hearing. Among other signers were the following city residents: 1) Virginia Darling, owner of Brown & Hawkins' store who has resided here since about 1925. 2) Bob & Eddie Wilson, who own one of Seward's three grocery stores. 3) Rosa Lemas who owns property near the airport and who has been here about 25 years. 4) Earl Duncan, who was at one time general foreman at Seward Fisheries. 5) Frank Diekgreeff, ex-city councilmember who owns the Letco Construction Co. 6) Joann Hoogland, who is a schoolteacher and property owner who has been here since 1963. 7) Willard Midby, property owner and city resident who has lived here 20 years. 8) Phil Hardy who homesteaded Lowell Point about 30 years ago.

Contrast these people and the other petitioners to Mr. Johnson, the City Manager who has lived here about one month, and the credibility of his statement at the hearing is somewhat wanting, to say the least.

The people whose presence you summarily dismissed as "squatters" are the McNutts, who live on the property of Mr. E. W. Hundley. The City recently attempted a "witchhunt" against these people, not realizing that they lived there with Mr. Hundley's blessing. Apparently the McNutt's crime in the City's eyes, was the fact that they had the audacity to sign an anti-annexation petition. Three of their children do indeed walk 1½ miles to catch a school-bus each day, and their mother walks at least twice that far each day to get to her nursing job at the hospital. I hope you can be objective enough to recognize the similarity between the entrenched Sewardites who label these people as squatters, and the entrenched Juneauites who castigate you for your unique lifestyle in the Juneau small boat harbor.

I spoke with Mr. Hundley of Continental Van Lines on 2-15-77, and he was not even aware of the annexation attempt until recently. A business acquaintance of his representing Nikiski Marine Company of Anchorage has recently contacted Rep. Rudd about the annexation attempt. Since Mr. Hundley is probably the biggest taxpayer in the annexation area, I would suggest you contact him in Seattle at 937-2261. If any industrialization does occur within the annexation area, it is likely to be on Mr. Hundley's property, because it is much more accessible than 4th of July Valley proper. Mr. Hundley owns a pier which is probably of great value.

During our phone conversation on 2-15-77 you stated that the 3rd petition was received in time for consideration at the February 3rd hearing. You went on to say that all such relevant material was duly copied and passed out to Committee members. Your statement is not consistent with the information given me by Paul Conner of the Senate CRA committee on the same day, and also when I talked to him on 2-14-77. He stated that the Senate Committee had only become aware of the 3rd petition this week, since I called him about it. His views are supported by the minutes of the February 3rd hearing, page 4, paragraph 5, where it is clearly implied that the 3rd petition was not materially present at the hearing. Since the 3rd petition was expressly drawn up to negate the 4th of July annexation, great emphasis should be placed upon it...And soon. If we, the people, cannot reach the legislators by petition, how else can we reach you?

There have been over 100 responses from legislators to the people who signed the original petition which I mailed out. Distressingly, none of those responses came from Specking or Kerttula who we elected to represent us. There apparently exists here a buffer zone between the petitioners and the lawmakers. It is comprised of people who have very well-defined and narrow interests, and their actions are contrary to the public sentiment.

The way I understand democracy, we have voiced enough opposition to this annexation to have it disapproved.

Sincerely,

Thomas Taggart

Dear Senator Orsini:

Thank you for taking time to send us a copy of Senate Bill No. 50 and for soliciting our comments.

We have reviewed this proposed legislation and believe that it is in the best interest of our company as well as our customers. We would support the passage of such legislation. If we can be of any service to you in this respect, we would be pleased to do so.

Thank you again for considering our views.

Sincerely yours,

Vern R. Chesbro

George H. Byer
P.O. Box 445
Hemet, California 92343

Dear Mr. Byer:

I am awfully sorry that we - by mistake - have not answered your letter to the Ambassador dated November 28th.

./. The Swedish participation in the U.S. Bicentennial celebrations includes various activities as you can see on the list of Swedish plans for the American Bicentennial year which is enclosed. The activities are to a large extent concentrated on Swedish-American relations. None of them, however, deals with issues which are of mutual interest to arctic countries.

As we think that your idea of a meeting in Alaska is very interesting, we are looking forward to an invitation from the State of Alaska, and we would do our best to promote Swedish participation.

Yours sincerely,

Ove Svensson
Cultural Attaché

JCE..THIS IS WHAT THE EMBASSIES ASK FOR SO TH GOV. OUGHT TO PROMPTLY WRITE THEM EXPRESSING HIS WRLCOME, SUPPORT & COOPERATION AS WELL AS TO THE MAYOR & CITY ASSEMBLY, STATE DEPT, MRS CARTER & PRES. CARTER. WHAT'S THE HOLD UP: WE NEED SOME FORWARD MOVEMENT SO WE CAN GET ON WITH THE JOB.

PS. THIS IS WHAT THEY ARE LOOKING FOR THAT PERSONAL INVITATION FROM THE GOVERNOR OF ALASKA.

Dear George,

The Arctic-Alaska International Conference sounds like a great idea and I'm willing to work for an appropriation.

I wonder if you would work up a more detailed budget of what this money is to be used for. Also, do you intend to be the executive director, or who will continue to carry the ball?

I am enclosing SB 63, and plan to introduce one on the House side.

Cordially,

Clark

President Bradshaw of ARCO...

I had a very nice letter from Mr. Slack in Anchorage in the response from my two letters to you. And why I am again now writing to you is because of the "Take Stock In America", ad that appeared in the Los Angeles Times. I liked what I read and it is understandable why you have long been interested in the Arctic for your vision and imagination is beyond the horizon.

Perhaps, to help clarify any reasons why I am a conference coordinator living in Hemet, my roots of 25 years in Alaska, an ex-mayor of Anchorage and a candidate for governor, are deep and of a perspective interest.

You believe in Alaska, I believe in Alaska so let us take stock in Alaska as well as America. NOW'S THE TIME, you say and this 77 conference is only a front runner of things to come and a good step toward a 78 or 79 economic conference of oil producers. So this year is very important in laying the ground work and to participate in the energy subject of the conference. TOO, we feel it an appropriate time for ARCO or under your name to establish an Energy Foundation grant for the University of Alaska at Anchorage for the studies of energy on the Alaska scene and to help formulate the pending conference of oil producers.

I would like nothing better than to have lunch with you in Los Angeles and share ideas relative to the above.

Sincerely,

George H. Byer

Dear Mrs. Carter...

In prayer Sunday past, I asked that a new meaning and purpose be given the international conference for 77. Then today, almost like a revelation, I read of your "Friendship Force" and the people-to-people exchange.

It is of the same philosophy as the no-red-tape people to people presentation. This has been an Arctic dream of mine ever since the over-the-pole flights began, with a stop in Anchorage between Europe and the Far East, bringing ordinary people to Alaska from the arctic countries to join in a mutual exchange of ideas and suggestions that are common to all. A plan, by Alaskans, without government involvement but with its approval and encouragement.

So I can get excited about the many potentials and benefits of the "Friendship Force" and what an appropriate opportunity to incorporate it into the international program for 77 and bring your dream into reality.

I have already written Mr. Powell in Plains and Mr. Watson in D.C. hopeful of getting the President to Alaska, tour the energy field, pipe line and give international importance to Alaska's people-to-people program. And I wrote..."Jimmy will be one of the "greats"...Alaska will be one of the "greats" and they ought to meet. The First Lady is "great" also for her vision andplans for a better tomorrow. It would be a fulfilling realization, in the fall of 77, to all join in a common bond of dedication for what"the interest in others program" can do for the betterment cause.

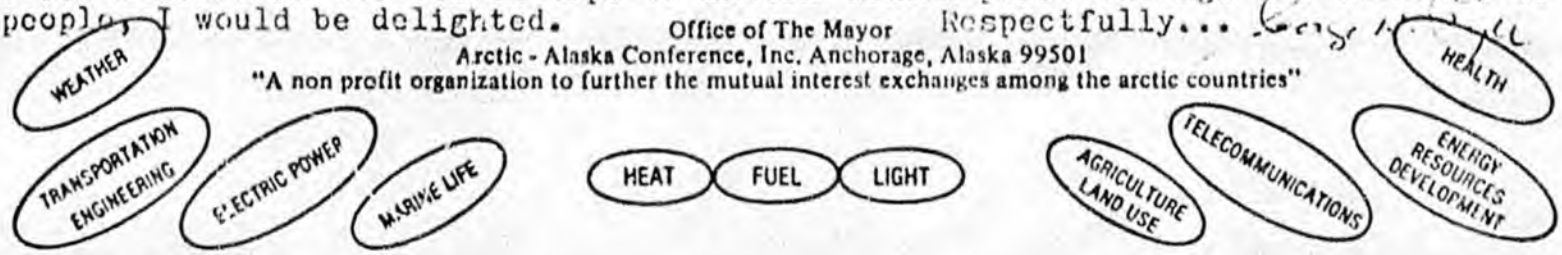
Your visionary plans and the willingness to go forth with it has renewed my spirit But like all worthwhile endeavors, it can use some added interest and encouragement for vision is not always understood nor is it something people are easily enthused about. After 25 years in Alaska as city councilman, borough assemblyman, mayor and candidate for governor, my roots are deep, my interest and efforts for this international purpose anxiously given as coordinator.

Plans for coming to D.C. are being coordinated and should your busy schedule permit a few moments in the common hope of international peace through the exchange of people, I would be delighted.

Respectfully...

Office of The Mayor
Arctic - Alaska Conference, Inc. Anchorage, Alaska 99501

"A non profit organization to further the mutual interest exchanges among the arctic countries"



Rosalynn Carter's Ambitious Plan for World Peace

By TOM SMITH

Rosalynn Carter, America's new First Lady, is busily laying the groundwork for an ambitious plan to promote world peace — a people-to-people exchange between the U.S. and other nations around the world.

Under this program, dubbed "Friendship Force," which is still in the early, formative stage, planeloads of people, ordinary citizens from every state in the union, would be shuttled to "sister states" around the globe.

These grass-roots goodwill ambassadors would then invite people from the other countries to pay a return visit to their homes in America.

Friends of Rosalynn say she's "very excited" by the prospect of bringing people of the world closer together through these no-red-tape exchanges — and they say President Jimmy Carter is solidly behind her plan.

Mrs. Carter has already held one meeting with the man who helped her organize a similar exchange program between the people of Georgia and their sister state in Brazil, Pernambuco, while Carter was governor.

"She and I have agreed we will work on this together," said the Rev. Wayne Smith of Decatur, Ga., who met with Mrs. Carter in September to discuss the Friendship Force program. "She is very interested in helping to promote world peace.

"She thought that these citizen exchanges might be a way — something without government involvement, but with its approval and encouragement."

NEW FIRST LADY Rosalynn Carter foresees planeloads of grass-roots ambassadors from the U.S.

It's not yet known who will pay for the Friendship Force, or how much it will cost. The visits between the people of Georgia and Brazil were paid for by those involved.

In Washington, Rosalynn's transition staff says the Friendship Force plan is one of her top three priorities.

"It's an idea that she is very interested in and wants to pursue as First Lady," said Kathy Cade, 29, transition projects coordinator. "She has said it is something she really wants to do."

Mrs. Carter has also written to the Partners of the Americas organization, which conducts similar people exchanges among Latin-American countries, asking for help in launching the Friendship Force, according to David Luria, associate director of the Partners organization.

Luria, who's based in Washington, D.C., told The ENQUIRER: "The Carters first got involved in the exchange program when Jimmy, as governor of Georgia, was honorary president for the Partners organization in Georgia. He and Rosalynn took deep interest in the Brazilian-Georgian partnership, both officially and unofficially."

A longtime close friend of the Carter family, John Pope, 56, of Americus, said Rosalynn had discussed her Friendship Force program with him and his wife in November.

"She said she was anxious to get it going internationally, and got very excited talking about it," Pope said. "I think it's her baby, but Jimmy is right behind it and very much in favor of it.

"I am sure you will find that she is going to play a bigger part in trying to achieve things on an international level than any other First Lady," Pope added.

RE: Senate Joint Resolution 9

Dear Mr. Parr:

A vote on SJR9 will likely come before the Legislature soon.

In your recent correspondence to me concerning this matter, you indicated that you may rely heavily upon the Local Boundary Commission recommendation and the opinions of the Seward Legislators. I ask that you do not, for the following reasons....

1) The LBC recommendation was contrary to the public sentiment expressed at the hearing, and was rendered in haste.

2) Since I sent the petition to you a few weeks ago, yet another petition with an additional 175 signatures has been sent to the House Community & Regional Affairs Committee. Nearly half of Seward's electorate have now signed the two petitions opposing the annexation.

3) Unlike yourself and many of your colleagues, the Seward Legislators have thus far been totally unresponsive to this issue.

Please vote to disapprove the LBC recommendation.

Sincerely,

Thomas Taggart

Senator Joseph Orsini
Alaska State Senate
Juneau, Alaska

Dear Senator Orsini:

I am the owner and builder of the dock and terminal located on ten acres of land on the Eastern Shore of Resurrection Bay opposite the town of Seward. I feel you should be advised that I am opposed to the City of Seward's proposed annexation of this and other properties North and East of Nash Road.

I already have a substantial investment in this property and arrangements have been completed for immediate and extensive further development to accommodate oil drilling related industry. These developments are being accomplished by private enterprise and the City's annexation can be harmful to the future of this Eastern Shore Area.

It is important to note that I have never been contacted or advised by the City of Seward of their efforts or intent although the City Manager knows my address.

It is only through the efforts of all of the other property owners in the Nash Road Area who strongly oppose this annexation attempt that I have recently learned of the City's maneauver.

I wish to request your assistance in defeating this annexation proposal. There are no benefits for this area that would derive from annexation. The results would be harmful and would discourage development by private enterprise. These lands are now under the Kenai Burrough and there should be no change in the "status quo" at this time.

Your assistance will be greatly appreciated.

Sincerely,

E. W. Hundley

STATEMENT OF CLARENCE E. JOHNSON BEFORE THE HOUSE COMMITTEE ON COMMUNITY AND REGIONAL AFFAIRS REGARDING ANNEXATION OF TERRITORY TO THE CITY OF SEWARD - FEBRUARY 3, 1977

MADAM CHAIRMAN AND MEMBERS OF THE COMMITTEE. MY NAME IS ~~CLARENCE~~ JOHNNY JOHNSON AND I AM CITY MANAGER FOR THE CITY OF SEWARD. I AM PLEASED TO HAVE THE OPPORTUNITY TO APPEAR TODAY TO EXPRESS THE POSITION OF THE CITY OF SEWARD AND THAT OF THE VAST MAJORITY OF ITS RESIDENTS ON THE PROPOSED FOURTH OF JULY CREEK ANNEXATION.

IN DECEMBER 1975, THE CITY PURSUANT TO TITLES 29 AND 44 OF THE ALASKA STATUES AND TITLE 19 OF THE ALASKA ADMINISTRATIVE CODE, FILED A PETITION WITH THE DEPARTMENT OF COMMUNITY AND REGIONAL AFFAIRS REQUESTING THE ANNEXATION OF 6,400 ACRES OF TERRITORY ADJACENT TO THE PRESENT CORPORATE BOUNDARIES OF SEWARD, IN AN AREA COMMONLY REFERRED TO AS FOURTH OF JULY CREEK. THE PETITION WAS MADE ONLY AFTER CAREFUL REVIEW BY THE CITY ADMINISTRATION, COUNCIL, AND PUBLIC.

ON MAY 21, 1976 THE LOCAL BOUNDARY COMMISSION HELD A PUBLIC MEETING IN SEWARD TO HEAR TESTIMONY ON THE PROPOSED ANNEXATION. AT THIS HEARING, THE MAJORITY OF TESTIMONY GIVEN EXPRESSED SUPPORT FOR THE FOURTH OF JULY CREEK ANNEXATION. NO PRIVATE PROPERTY

OWNERS IN THE ANNEXATION AREA VOICED ANY OPPOSITION TO THE PROPOSAL, IN FACT, THE LARGEST SUCH OWNER SUBMITTED TESTIMONY IN SUPPORT OF THE ANNEXATION.

THE LOCAL BOUNDARY COMMISSION HAS ISSUED A STATEMENT OF DECISION APPROVING WITHOUT RESERVATION THE CITY'S PETITION, CITING THE FACT THAT THE ANNEXATION IS A POSITIVE APPROACH TOWARDS RESPONDING TO GROWTH AND DEVELOPMENT IN AND AROUND THE CITY.

MANY OF YOU ARE FAMILIAR WITH THE NATURAL AND POLITICAL BOUNDARIES THAT SURROUND SEWARD. TO THE SOUTH IS SITUATED RESURRECTION BAY, TO THE WEST MOUNTAINS AND HARDING ICEFIELD, TO THE EAST MOUNTAINS, AND TO THE NORTH MOUNTAINS AND THE CHUGACH NATIONAL FOREST. THIS IS NOT TO SAY THAT SEWARD IS TOTALLY DEVOID OF ANY AREA FOR GROWTH AND EXPANSION, HOWEVER SUCH AREA IS SEVERELY LIMITED BY NATURAL AND POLITICAL BOUNDARIES WHICH NECESSITATES THE ANNEXATION BY THE CITY OF THOSE LANDS THAT WILL BE DEVELOPED NOW AND IN THE FUTURE IF THE CITY CAN EVER HOPE TO MEET DEMANDS FOR SERVICES AND AT THE SAME TIME

MAINTAIN A SOUND FINANCIAL FOOTING. ALREADY THE CITY IS FACED WITH AN UPHILL CLIMB FINANCIALLY. WITH A CURRENT TAX BASE OF ROUGHLY $11,000,000 THE CITY IS VERY HARD PRESSED TO MEET THE SERVICES THAT ARE INCREASING ALREADY DUE TO OCS AND RELATED DEVELOPMENT. IT IS ABSOLUTELY IMPERATIVE THAT THE C[illegible]AVE THE TAX BASE NECESSARY TO SUPPORT THE DEMANDS FOR SERVICES BROUGHT ABOUT BY NEW GROWTH AND DEVELOPMENT.

SEWARD CANNOT POSSIBLY AVOID THE IMPACTS THAT HAVE COME AND WILL BE COMING FROM OCS DEVELOPMENT. ALREADY EXXON, TEXACO, GULF, SHELL, AND ATLANTIC RICHFIELD HAVE SELECTED SEWARD AS A PRIMARY OR SECONDARY STAGING AREA FOR EXPLORITORY DRILLING IN THE GULF. ACCOMPANING THESE MAJOR OIL COMPANIES ARE A HOST OF SMALLER FIRMS SUCH AS BARIOD, HALLIBURTON SERVICES AND SEVERAL OTHERS. THE CITY HAS RECENTLY NEGOTIATED A LONG TERM LEASE WITH DRESSER INDUSTRIES AND THIS COMPANY PLANS TO INITIATE DOCK CONSTRUCTION ADJACENT TO THE SMALL BOAT HARBOR BREAKWATER THIS SUMMER. THIS IS JUST THE TIP OF THE ICEBERG. AHEAD OF US REMAINS OIL EXPLORATION OF FUTURE LEASES OFF KODIAK ISLAND AND EVENTUALLY OIL PRODUCTION FROM THE

SHELF. I AM CONVINCED THAT SEWARD'S PROXIMITY TO ANCHORAGE, THE LOCATION OF THE ALASKA RAILROAD TERMINUS, THE ALL-WEATHER STATE HIGHWAY TO THE INTERIOR, AND AN ALL-WEATHER PORT WHICH COMPARES WITH ANY IN THE UNITED STATES WILL PLACE TREMENDOUS DEMANDS ON THE COMMUNITY ONCE FULL SCALE OIL DRILLING AND PRODUCTION ARE UNDERWAY.

HAVING RESIDED IN KENAI THE PAST EIGHT YEARS, I AM INTIMATELY ACQUAINTED WITH THE IMPACTS OF OIL DEVELOPMENT ON A SMALL COMMUNITY WITH A LIMITED TAX BASE. THE INABILITY OF THE CITY OF KENAI TO ACQUIRE AN ADEQUATE TAX BASE HAS RESULTED IN SEVERE LONG TERM PROBLEMS FOR THAT COMMUNITY AND THE KENAI PENINSULA BOROUGH. THE RESULT HAS BEEN A TERRIBLE TAX BURDEN FOR KENAI RESIDENTS AND SEVERAL ABORTED ATTEMPTS TO ANNEX THE DEVELOPED AREAS OR CREATE A NEW BOROUGH. THE ONLY SOLUTION REMAINING FOR KENAI APPEARS TO BE THE DEVLOPMENT OF A UNIFIED GOVERNMENT FOR THE AREA WITH AREA-WIDE POWERS. THIS HAS MET WITH STRONG RESISTANCE BECAUSE OF THE LOSS OF CITY IDENTITY THAT WOULD OCCUR.

IT IS SEWARD'S WISH TO AVOID THE PROBLEMS THAT HAVE PLAGUED KENAI AND I URGE THE COMMITTEE TO APPROVE THE ANNEXATION PETITION FOR THE FOURTH OF JULY CREEK AREA.

I APPRECIATE THIS OPPORTUNITY TO TESTIFY AND WILL BE HAPPY TO ADDRESS ANY QUESTIONS THE COMMITTEE MIGHT HAVE ON THE PROPOSED ANNEXATION.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

STATE OF ALASKA

LOCAL BOUNDARY COMMISSION

JUNEAU, ALASKA

RECOMMENDATIONS OF THE LOCAL BOUNDARY COMMISSION

SUBMITTED TO THE TENTH STATE LEGISLATURE

FIRST SESSION ASSEMBLED

SUBMITTED JANUARY 14, 1977

RECOMMENDATIONS

I. *Recommendation for annexation of territory to the City of Palmer*

II. *Recommendation for annexation of territory to the City of Seward*

STATE OF ALASKA

LOCAL BOUNDARY COMMISSION

JUNEAU, ALASKA

RECOMMENDATION FOR ANNEXATION OF TERRITORY TO THE CITY OF PALMER, ALASKA

SUBMITTED TO THE TENTH STATE LEGISLATURE, FIRST SESSION ASSEMBLED

SUBMITTED JANUARY 14, 1977

RECOMMENDATION FOR ANNEXATION OF TERRITORY

to the

CITY OF PALMER

WHEREAS, petitioner, the Matanuska-Susitna Borough has requested that certain territory be annexed to the City of Palmer, to wit: an area contiguous to and north and east of the City of Palmer including residential, commercial and municipal school properties; and

WHEREAS, subsequent to giving proper notice, the Local Boundary Commission conducted a public hearing in Palmer on Saturday, April 3, 1976, to consider whether the territory for which the Matanuska-Susitna Borough petitioned should be annexed to the City of Palmer; and

WHEREAS, the Local Boundary Commission at a public meeting held in Palmer on Saturday, April 3, 1976, reviewed the Matanuska-Susitna Borough's petition, supporting brief and all testimony received prior to and during the April 3, 1976, public hearing; and

WHEREAS, the Local Boundary Commission has determined that the territory sought to be annexed meets the standards for annexation in that the Palmer High School which has been constructed in the territory is in need of municipal water, sewer, police and road maintenance services; and

WHEREAS, the City of Palmer is the only local government located proximate to the territory which has the capability of providing the needed services; and

WHEREAS, the annexation of the territory would further accomplish a valid public purpose by placing a major public facility under the police protection services of the City of Palmer;

NOW, THEREFORE, the Local Boundary Commission recommends that pursuant to Article X, Section 12, of the Alaska Constitution, Alaska Statutes 44. 19. 260, and Alaska Administrative Code 19 AAC 05.010 (a)(4)(5) and (9), that the petition to annex territory to the City of Palmer be approved and that the following described property be incorporated within the corporate limits of the City of Palmer:

> *The NE¼SW¼, N½N½SE¼SW¼, W½SE¼, the South fifty (50) feet of SE¼NW¼, and the South fifty (50) feet of the NE¼, all in section 32, Township 18 North, Range 2 East, S.M.*

In accordance with Article X, Section 12 of the Alaska Constitution, this recommendation shall become effective forty-five days after presentation to the Legislature or at the end of the Session, whichever is earlier, unless disapproved by a resolution concurred in by a majority of the members of each House.

STATE OF ALASKA

LOCAL BOUNDARY COMMISSION

JUNEAU, ALASKA

RECOMMENDATION FOR ANNEXATION OF TERRITORY TO THE

CITY OF SEWARD, ALASKA

SUBMITTED TO THE TENTH STATE LEGISLATURE, FIRST SESSION ASSEMBLED

SUBMITTED JANUARY 14, 1977

RECOMMENDATION FOR ANNEXATION OF TERRITORY

to the

CITY OF SEWARD

WHEREAS, petitioner, the City of Seward, has requested that certain territory be annexed to the City of Seward, to wit: territory located south and ~~west~~ EAST *of the present corporate boundaries of the City of Seward; and*

WHEREAS, subsequent to giving proper notice, the Local Boundary Commission conducted a public hearing in Seward on Friday, May 21, 1976, to consider whether the territory for which the City of Seward petitioned, as well as other areas contiguous and adjacent to the City, should be annexed to the City of Seward; and

WHEREAS, the Local Boundary Commission, at a public meeting held in Seward Friday, May 31, 1976, reviewed the City of Seward's petition, supporting brief and all testimony submitted prior to and during the May 21, 1976, public hearing; and

WHEREAS, the territory sought to be annexed by the City of Seward meets the standards for annexation in that the territory will be subject to future growth and development and annexation will enable the City to assist in and receive benefits from that development;

NOW, THEREFORE, the Local Boundary Commission recommends that pursuant to Article X, Section 12, of the Alaska Constitution, Alaska Statutes 44.19.260, and Alaska Administrative Code 19 AAC 05.010(a)(4), that the petition seeking annexation of territory to the City of Seward be approved and the corporate boundaries of the City of Seward be amended to read as follows:

> *Beginning at the N.E. corner of Sec. 28, T1N,R1W (projected), Seward Meridian, State of Alaska; thence S45°00'00"E to the N.W. Corner of Sec. 1, T1S,R1W; thence East to the N.E. Corner of Sec. 1, T1S,R1W; thence South to the S.E. Corner of Sec. 1, T1S,R1W; thence East to the N.E. Corner of Sec. 9, T1S,R1W (projected); thence South to the S.E. Corner of Sec. 16, T1S,R1W (projected); thence West to the S.W. Corner of Sec. 16; T1S,R1W (projected); thence North to the N.W. Corner of Sec. 28, T1N,R1W (projected); thence East to the N.E. Corner of Sec. 28, T1N,R1W (projected), being the place of beginning, containing 22 square miles more or less.*

In accordance with Article X, Section 12, of the Alaska Constitution, this recommendation becomes effective forty-five days after its presentation to the Legislature or at the end of the Session, whichever is earlier, unless disapproved by a resolution concurred in by a majority of the members of each house.

31 JAN, 1977

REPRESENTATIVE SALLY SMITH
POUCH V, JUNEAU, AK 99811

DEAR MS. SMITH:

ATTACHED FIND A COPY OF MY COMMENTS ON THE SEWARD LAND ANNEXATION PROPOSAL; THE ORIGINAL WAS SENT TO THE SENATE COMMUNITY + REGIONAL AFFAIRS COMMITTEE.

I DO HAVE AN ADDITIONAL BIT OF INFORMATION OF GREAT IMPORTANCE WHICH I ASK YOU TO INCLUDE IN THE HEARING RECORD. ---- AS NOTED ON PAGE 2, PARAGRAPH 4 OF THE ATTACHMENT, MR. WILLARD MIDBY OF SEWARD HAS CIRCULATED A PETITION ASKING PEOPLE TO REAFFIRM THAT THEY ARE OPPOSED TO THE 4TH OF JULY CREEK ANNEXATION. OVER THE PAST FEW DAYS, MR. MIDBY AND MR. ED ZIMMERMAN HAVE COLLECTED APPROXIMATELY 200 SIGNATURES ON THAT PETITION. THEY WILL HOPEFULLY HAVE MAILED IT TO YOU IN TIME FOR CONSIDERATION AT THE HEARINGS ON FEBRUARY 3RD. I BELIEVE THAT THEIR PETITION SPEAKS VOLUMES ABOUT THE PUBLIC OUTRAGE CONCERNING THIS ISSUE.

SINCERELY,

Thomas Taggart

RE: Proposed Annexation of State Lands to the City of Seward

Dear Chairman Orsini:

Thank you for informing me of the forthcoming hearing in Juneau pertaining to Seward's attempt at annexation of State lands. I do have additional information which should be considered at that hearing.

The City Manager of Seward indicated to me that he had notice of the February 3rd hearing as early as Thursday, January 27th. Despite that, there have been no announcements via the local media informing the general citizenry that they could input testimony at that hearing. I believe this nonaction by the City Administration indicates that they are hoping to keep testimony at the hearing to a low key, and should be duly noted as an act contrary to the public interest.

The City of Seward has a 3 step plan to annex up to 65 square miles of State property. The Local Boundary Commission has twice scheduled & cancelled public hearings on step 2, the latest instance being on 1-6-77. Because of this, it is now apparent that only step 1 of the City's plan will be considered this year by the Legislature. I shall consequently attempt to limit my comments to step 1, or 4th of July Creek, as much as possible.

I have recently learned that the City Administration has sent a telegram to all State Legislators urging approval of this annexation proposal. Among other things, the telegram purportedly states that: 1) there are zero residents in the area to be annexed; 2) the majority opinion at the public hearing was in favor of the proposal. Both of these statements are patently false. There are eight (8) permanent residents in the area to be annexed, including four children, three of which attend Seward schools. Three of the adults of that area signed the petition which I sent to Legislators on 1-13-77, and the other one was vacationing "outside" when it was circulated.

At the public hearing on May 21st, 1976, six (6) private citizens gave testimony on the 4th of July Creek annexation proposal. The one citizen who spoke in favor of the proposal was a man who owns 128 acres of land there, although he does not live on that land. Also favoring the proposal were representatives of three local governmental bodies, i.e. Kenai Peninsula Borough Planning & Zoning Commission, Seward Planning & Zoning Commission, and the Kenai Peninsula Borough Mayor. The five citizens who expressed displeasure or outright opposition to the proposal lived on adjacent Resurrection Bay Road or within the area encompassed by step 2 of the City's piecemeal annexation plan. In rendering their decision immediately after the hearing (without playing back the tape recording), the Local Boundary Commission in section (2)(c) of their statement said that "The majority of the testimony at the public hearing was in favor of the annexation..." That was an untrue statement. Furthermore, "...the City's long range annexation plans..." as mentioned in section (2)(b) of the statement have become a moot point since the November 2nd election pertaining to this issue. That, of course, is providing that the City fathers honor the results of the straw poll which indicated that 72.1% of the total voters opposed implementation of steps 2 & 3 of the City's plan. Had the people been given a chance to vote on step 1 at that time, it is likely that it too would've suffered an ignominious setback. Most of us here believed that the LBC recommendation was binding and that step 1 was a lost cause.

These are the attachments from the Alaska Division of Lands, Alaska Conservation Society, and Friends of the Earth. These letters raise the important issue of 4th of July Creek as a potential critical habitat area. This position is supported by the ADF&G's authoritative publication entitled "Alaska's Wildlife & Habitat," and is a very serious consideration in light of the City's desire to annex the area. That publication has been used extensively by the Corps of Engineers, BLM, and others in preparing Environmental Impact Statements. On page 79, column 1 of that publication the area in question is clearly defined as "critical habitat" for black bear, although it has not yet been formally designated as such by the Legislature. The area is also one of the best places for goat & bear hunting by local as well as non-local residents. That status would be denied the area if it were within the Seward City limits.

Attached also is a copy of a letter from Councilmember Vincent to the local paper outlining some reasons why the City should not proceed with the step 2 annexation proposal. Some of his reasons, such as road maintenance along a vertical coastline would apply to step 1 as well as step 2. This position is elaborated upon in a recent (10-76) study done for the Department of Community & Regional Affairs by the Division of Geological & Geophysical Surveys. Their report is entitled "Preliminary Evaluation of Geologic Factors Bearing on Development in Upper Resurrection Bay." Among other negative factors which would discourage development at 4th of July Creek is the stated opinion that the present gravel road which extends in that direction would be impossible to maintain, thus effectively barring land access to the area unless a prohibitively expensive road was constructed at the 700 foot elevation of the mountain. Due to tidal erosion the existing road is now about 1½ miles shorter than depicted on the most recent topographic map, which is 27 years out of date. That road now effectively terminates in Section 1, T.1S, R.1W.

This same report describes the extent of Exxon's involvement here at 2.6 acres. This parcel is near the Alaska Railroad and Seward Highway where Exxon expedites pipe for their oil rig which will drill near Yakataga. The other company interested in Seward as an O. C. S. base has leased 3 acres within the existing City limits. These are very logical site selections and would certainly indicate a precedent for any future companies. The one thing which Seward has going for it is its highly accessible existing transportation facilities. What we are dealing with here is a blatant land grab attempt by the City of Seward, with little or no justification whatever. The people of this area recognized this land grab for what it was on November 2nd and resoundingly said No! We ask that the Legislature echo our sentiments by passing a joint resolution overriding the Local Boundary Commission recommendation.

In closing I make note that Mr. Oscar Bailey has asked to have his name withdrawn from the petition which I circulated, due to a misunderstanding on his part as to the scope of it. It should also be noted that Mr. Herman Leirer of the Seward Planning & Zoning Commission is now circulating his own petition asking people to support the 4th of July Creek annexation proposal. Furthermore, Mr. Willard Midby of Seward is circulating yet another petition asking people to reaffirm that they are supportive of the petition which I mailed to Legislators on 1-13-77.

Whatever the outcome of all these petitions, it should be obvious that grassroots democracy is presently flourishing in the Seward area, and a very healthy climate now exists for a Local Boundary Commission hearing on any proposed annexation attempts by the City of Seward. This climate did not exist last May 21st when the LBC was here, as witnessed by the very small turnout for that hearing. At the very least we are entitled to another public hearing on this highly controversial matter. The Local Boundary Commission recommendation should be overturned.

Sincerely,

Thomas Taggart

Dear Mr. Conger:

I am sending herein copies of those pages from the 1976 DGGS report which address the issue of constructing overland access from the head of Resurrection Bay to the flats at the mouth of Fouth of July Creek.

The purpose of the report, I believe, is adequately set forth in the first three pages of the report (copies included). As you will see, nowhere does the report state that construction and maintenance of a road to Fourth of July Creek would be impossible.

Because the report is mainly a synthesis of the literature, it is not given open-file status. Consequently, only a limited number of copies were made. I think that Kevin Waring's office may have a copy, and a copy is available for public inspection at the Mining Information Office in Juneau (465-2414).

Please do not hesitate to contact me if I can be of further assistance.

Best regards,

J R Riehle

I. INTRODUCTION

This report is an attempt to identify the geologic factors which should be considered in planning for potential on-shore facilities in upper Resurrection Bay. The report is based on a review of the available literature and a brief inspection of sites near the head of Resurrection Bay by DGGS personnel.

The essence of this report is that significant geologic constraints, in particular submarine slope stability and potential for inundation by seawaves, are present at 4 of the 5 sites considered here. As indicated by the tables in Section VI, there are presently not adequate data available for many of the geologic factors upon which to base site-specific conclusions regarding potential effects of the geologic factors on construction and operations at the sites. However, it is not the intent of this report to recommend or imply that planning for utilization of lands adjacent to upper Resurrection Bay cannot be undertaken due to geologic factors. Rather, the purpose of the report is to list the geologic factors which should be considered during planning, and to suggest where additional data are required for a more complete evaluation of each factor.

II. SCOPE AND PURPOSE OF REPORT

Two Division of Geological and Geophysical Surveys personnel visited upper Resurrection Bay to inspect potential sites of on-shore facilities for three days in October of 1976. The investigation was undertaken at the request of the Department of Community and Regional Affairs, State of Alaska. The Survey team drove to Seward; site inspections were carried out on foot, and an overflight of the coastline was made by air charter. Due to limitations of time and of legal access, most inspections were confined to the beaches and to existing roads.

Available data on geologic conditions in upper Resurrection Bay are primarily those in a report on subsurface conditions in and near the city of Seward by the consulting firm of Shannon and Wilson, Inc. (1964), and a subsequent report by Lemke (U.S.G.S. Prof. Paper 542-E, 1967) which is based in part on data and conslusions presented by Shannon and Wilson, Inc. Both reports were written as a result of extensive damage generated by the major earthquake of March 27, 1964. The report by Shannon and Wilson, Inc. is mainly an engineering evaluation of stability conditions along the Seward waterfront and at the head of Resurrection Bay. Lemke provides a comprehensive description of the sequence of events at Seward during and immediately after the earthquake, and describes the geology of an area at the head of Resurrection Bay of about 25 square miles. Lemke's report was used extensively in preparation of the data tables (Section VI) for this report.

Specific sites considered in this report are shown on Plate 1 and in order of presentation in Section VI are as follows:

1) Center, head of Resurrection Bay
2) Fourth of July Creek alluvial fan
3) Lowell Point alluvial fan
4) Thumb Cove
5) Northeast corner, head of Resurrection Bay

Sites 1 through 4 are those suggested by the Department of Community and Regional Affairs. Site 4 at Thumb Cove was not visited by DGGS personnel, due to limitations of time and weather.

The purpose of this report is to list those geologic factors at the five sites in upper Resurrection Bay which, in the opinion of the DGGS, should be adequately

considered in order to design, construct, and operate potential facilities with a resonable degree of safety. All factors of potential significance considered in this report are presented for individual sites in tabular form in Section VI. Where site-specific data on any factor are not available, the entry "unknown" or "data are not available" is made. Where the available data are limited in scope or specificity, the entry "uncertain" or otner qualifying remarks are made. Where adequate data are not available, suggestions as to the type or specificity of data required for more complete evaluation of the geologic factor are made in the column "Interpretation or comment." Such suggestions are not meant to be exhaustive, but are intended only as an example of the scope of further study which is necessary.

Section V is a summary of the geologic factors which, in the opinion of the DGGS based on available information, are potentially of greatest significance at each site. Section V also contains a summary of the suggestions for future studies which the DGGS believes are necessary to more fully assess the main geologic factors.

III. LOCATION, LAND OWNERSHIP, WATER PERMITS, AND PRESENT OCS - RELATED DEVELOPMENT

Upper Resurrection Bay is on the southeastern coast of the Kenai Peninsula at 60°5'N latitude, 149°24'W longitude (Fig. 1), about 75 airmiles SSE of Anchorage. Resurrection Bay extends north for about 16 miles from Cape Resurrection; it is about 2 miles wide near the head.

The city of Seward is located at the northwest corner of Resurrection Bay. Development in and adjacent to the city of Seward extends into the alluvial valley of the Resurrection River, north of Resurrection Bay. Small settlements, presently or recently inhabited, are located on some of the alluvial fans at the mouths of rivers which enter Resurrection Bay south of Seward. (See U.S.G.S. quadrangle Seward (A7), minor revisions 1975).

Recommendations for additional studies

1) Stability of the steep submarine slopes at the site should be evaluted; such a study should include detailed bathymetric contouring and bottom sampling on the slopes.

2) In conjunction with the first recommended study, identification of subsurface deposits beneath the intertidal and subtidal flats at the site should be carried out by detailed sampling and logging of bore holes or drill holes. Factors to be evaluated in such a study should include porewater pressures, strengths of the various unconsolidated deposits, and presence of sediments which might be prone to liquefaction.

3) Any design plans for facilities at the site should address the potential for damage by seawave inundation, potential effects of flooding by the Resurrection River on operations at the site, and the potential for contamination of the bay due to continuous or periodic submergence of the site.

4) Currents and rates of sediment transport across the site should be determined, so that potential effects of structures on sediment erosion/deposition patterns on the intertidal and subtidal flats can be assessed.

B. Fourth of July Creek fan-delta (Site 2)

1) Submarine landsliding is reported to have occurred off Fourth of July Point in the 1964 earthquake; submarine slopes at any place around the seaward edge of the fan-delta may be prone to landsliding in future large earthquakes.

2) Overland access to the site could be costly to construct and maintain, due to steep slopes along most of the coastline between the site and the head of Resurrection Bay. Relatively flat ground is available along the mountainside at about 700' elevation, however.

3) Relatively steep slopes along the southern margin of the site appear to experience snow avalanches and locally channelized runoff during heavy rains.

4) Much of the site is within 30' of mean higher high water, and is thus subject to potential inundation by seawaves of the magnitude experienced after the 1964 earthquake.

Recommendations for additional studies

1) Stability of the steep submarine slopes at the seaward margin of the fan-delta should be evaluated; such a study should include detailed bathymetric contouring and bottom sampling on the slopes.

2) In conjunction with the first recommended study, identification of subsurface deposits beneath the intertidal and subtidal flats at the site should be carried out by detailed sampling and logging of bore holes or drill holes. Factors to be evaluated in such a study should include porewater pressures, strengths of the various unconsolidated deposits, and presence of sediments which might be prone to liquefaction.

3) On-land studies should include evaluation of the bearing capacity and stability of fan deposits by borings or drillings and strength determinations, evaluation of the maximum probable flood discharge and flooded

area on Fourth of July Creek, and evaluation of slope stability on the mountain slope adjacent to the site.

4) Any design plans for facilities at the site should address the potential for damage by seawave inundation, and the feasibility of constructing and maintaining physical access to the site from the head of Resurrection Bay if such access is required.

C) Lowell Point fan-delta (Site 3)

1) Submarine landsliding is reported to have occurred off Lowell Point during the 1964 earthquake; presumably the submarine slopes at any place around the seaward edge of the fan-delta may be prone to landsliding in the event of future large earthquakes.

2) Overland access to the site from Seward would be difficult to maintain, owing to the high probability of landslides along the present road and to the frequency of snow avalanches.

3) Much of the site is within 30' of mean nigher high water and is thus subject to potential inundation by seawaves of the magnitude experienced after the 1964 earthquake.

Recommendations for additional studies

1) The four recommended studies for Fourth of July Creek fan-delta (above) apply also to the Lowell Point fan-delta.

2) In particular, if access to the site is to be by overland road

B. Fourth of July Creek, Resurrection Bay (Site 2).

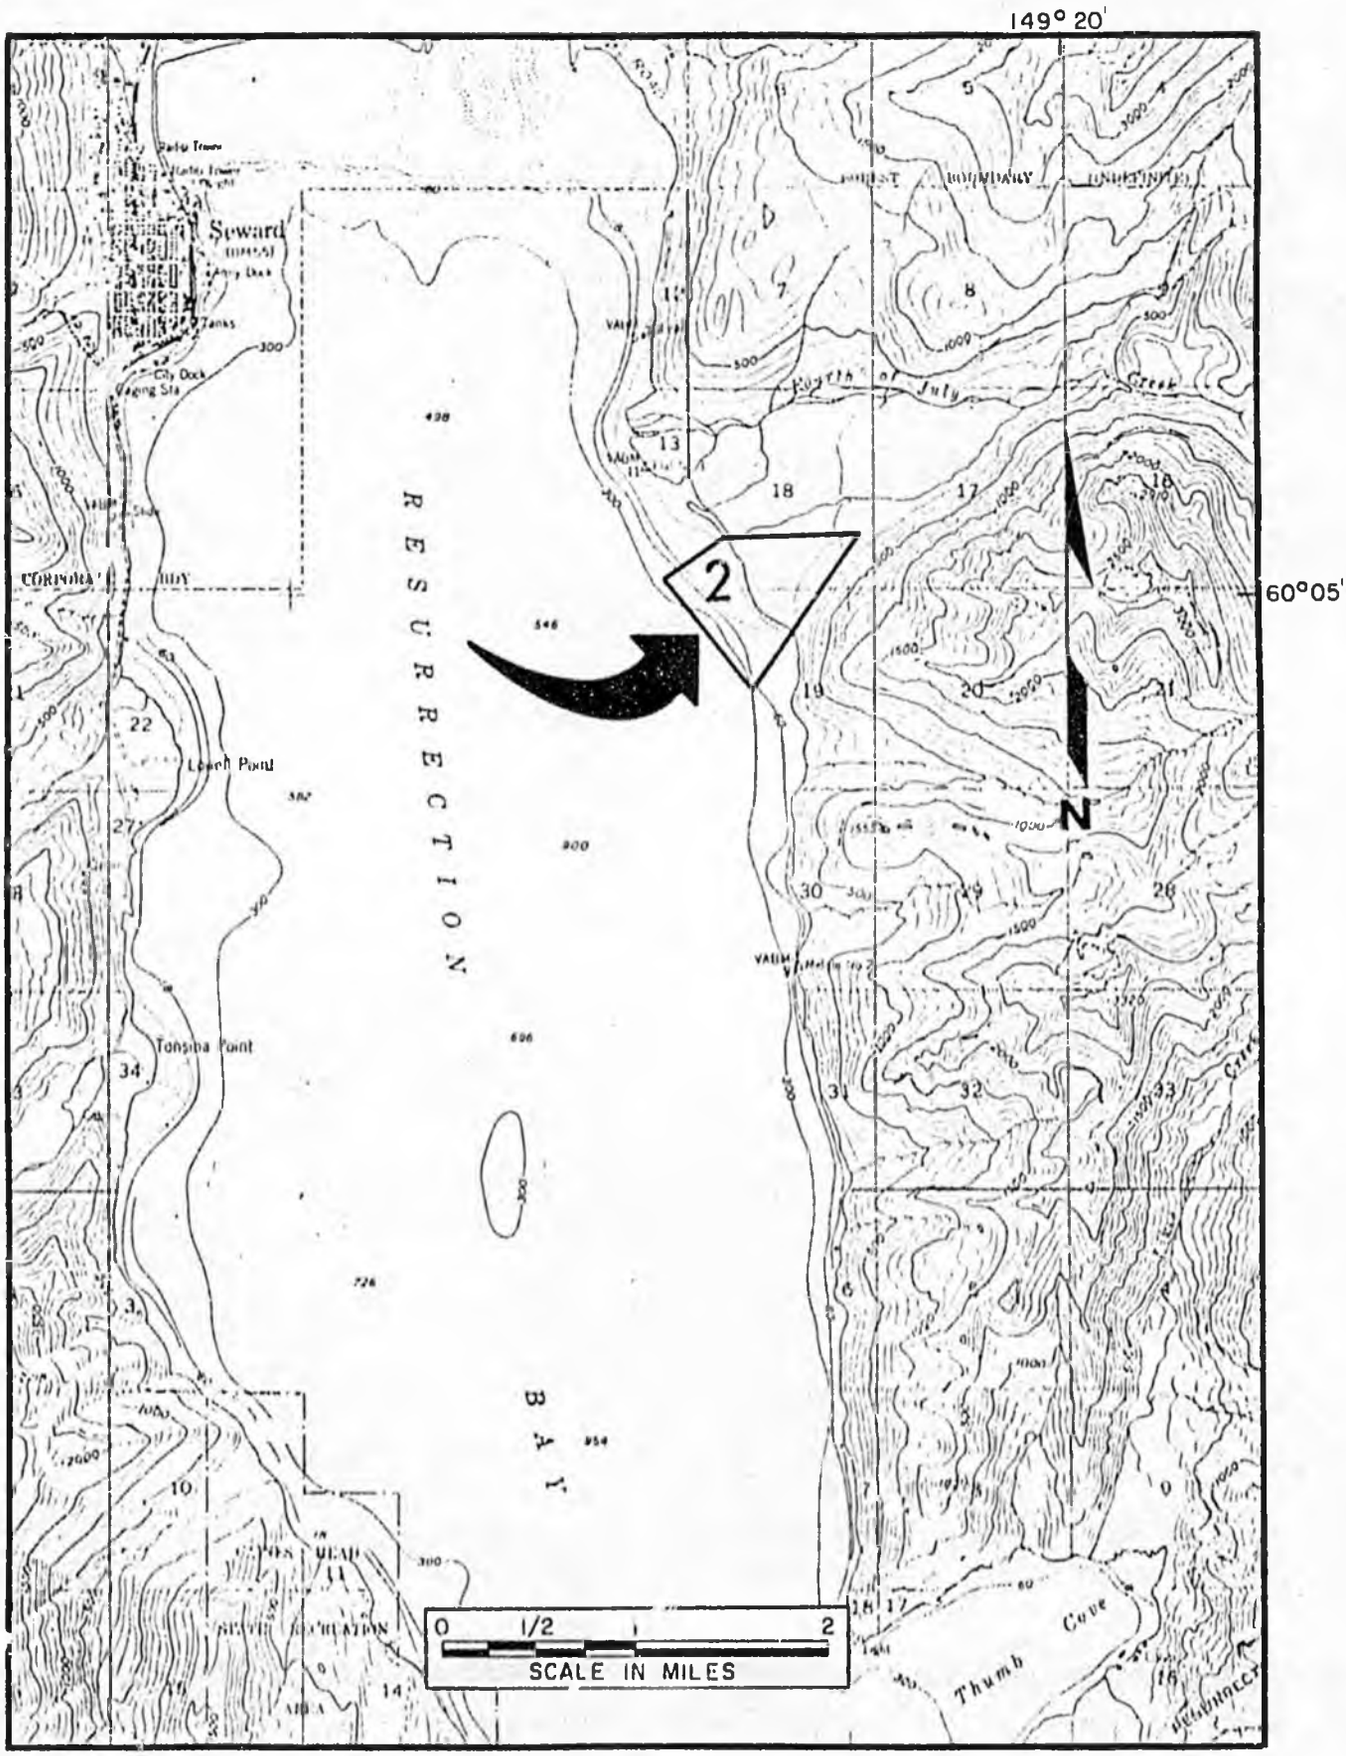

Figure 3. Location of Site 2.

SITE: Fourth of July Creek, Resurrection Bay

		FACTOR	FACTUAL DATA	INTERPRETATION OR COMMENT
B. CONSTRUCTION MATERIALS (CONT.)	3. Riprap	Locations of deposits	No data on physical properties of the bedrock adjacent to Fourth of July Creek are available. Armor rock for breakwaters at the Seward harbor was obtain from a quarry at the N end of Lowell Point (U.S.G.S. Prof. Paper 543-E, 1967, pg. E17).	The Lowell Point quarry site was chosen after testing of rock samples by the Corps of Engineers. It is likely that suitable rock (greywacke) can be found near to Fourth of July Creek, but a detailed site investigation and probably some testing of samples will be needed first.
		Estimated volumes of deposits	Detailed site investigation is required, to outline the volumes of suitable rock.	
		Potential problems of development	Speculative until specific deposits are outlined.	Steep bedrock slopes at the site may pose problems, due to potential rockfalls and landslides.
C. LAND CHARACTERISTICS	1. Mass movement	Areas of steep slopes	Bedrock slopes along the south margin of the site are variable, but may average 30° over distances of several hundred yards and may locally be nearly vertical.	See U.S.G.S. Seward (A-7) quadrangle. (Note: the average slopes along the coast between the site and the Resurrection River alluvial plain are 20° to 30° to elevations of 700'; any overland road access to the site would need to pass along or above such slopes.)
		Nature of materials underlying the steep slopes	Bedrock with local deposits of glacial drift, and mappable deposits of glacial drift above 600' elevation (U.S.G.S. Prof. Paper 542-E, 1967, Plate I).	At least one long "chute", tentatively identified as talus and/or an avalanche chute, was seen by DGGS personnel along the slopes immediately S of the site, emerging on the valley floor about 1/2 mi. inland from the coast.
		Types of mass movement on the slopes	Probably snow avalanches and rockfalls; possibly slides or flows, and/or slow movement of talus or alluvium in alluvial channels. Site specific data are not available to DGGS.

THE ORGINAL FILE CONTAINS AN OVERSIZED DOCUMENT THAT IS UNSUITABLE FOR FILMING. PLEASE REFER TO THE ALASKA STATE ARCHIVES TO VIEW THE ORIGINAL.

DESCRIPTION:

ECOLOGIC MAP OF THE SEWARD AREA, ALASKA (XEROX COPY)

ALASKA DGGS PRELIMINARY EVALUATION, GEOLOGICAL FACTORS BEARING ON DEVELOPMENT AT FIVE SITES IN UPPER RESURECTION BAY
OCTOBER 1976

TO: Senator Orsini DATE: Feb. 3, 1977

FROM: Paul Conger RE: SJR9

The following is an account of Thomas Taggart's, citizen of Seward, opposition to SJR9.

1) He maintains that there is opposition to this annexation by Seward citizens. He supports this claim by the petition forwarded to this office and straw poll vote taken at one of the local hearings where 72.1% expressed opposition.

2) There are 8 permanent residents that reside on the proposed area to be annexed. (I mention this because the telegram forwarded by the City of Seward requesting support of SJR9 states that there are 0 residents in this area. Also, the city states there is no opposition to the Resolution which Taggart is ostensibly challenging.)

3) Taggart also brings to light that the environmentalists have expressed disfavor with the annexation because the area has been designated a critical habitat area (due to black bears) by the ADF&G. However, it should be noted that this area has not been formally classified by our legislature as a critical area. The "Friends of the Earth" are particularly opposed to the annexation.

4) He states that this area cannot be considered a viable tax base because most of the area is very rugged terrain and any kind of development would be prohibited.

5) Another claim regarding opposition, according to Taggart, dealing with development, is that roads presently constructed that would feed into the area if annexed, are considered almost impossible to maintain (supported by a report by the Division of Geological & Geophysical Surveys). Therefore, Taggart is claiming that this in itself would bar any access to the area.

6) Taggart, in referring to oil companies that have picked Seward as their base for O.C.S. operations, says they have not expressed an interest in this land but have selected small parcels next to the railroad which is already in the city limits. He feels that if any further oil companies take an interest in the Seward area, they will follow this precedent and choose not to situate in a wilderness area and incur the expenses of developing this area, especially since they would not be in the proximity of the railroad.

PC/js

TO: Senator Orsini DATE: Feb. 3, 1977

FROM: Paul Conger RE: SJR9

In response to Mr. Taggart's remarks regarding the report conducted by the Dept. of Natural Resources Geological and Geophysical Surveys, regarding construction of roads into the proposed area to be annexed. I contacted Jim Riley, geologist for the State, who did the report and asked him if there was any basis to the statements made by Mr. Taggart.

He commented that the work done was a preliminary study to determine what geological constraints should be taken into consideration if roads were constructed in the proposed area. He said the essence of his report regarding the above is as follows:

"Overland access to the site, could be costly to construct and maintain due to deep slopes along most of the coastline between the site and the head of Resurrection Bay. Relatively flat ground is available along the mountainside at about the 700' level, however" (this refers to the 4th of July Creek area that is to be annexed).

Riley stated that this report was requested by the Dept. of Natural Resources and did not infer that roads could not be built. The above was provided simply for them to consider. The expense of constructing the road could be subdued somewhat by going above the 700' level. However, you would have to incur the additional cost of constructing the road to that elevation.

PC/js

RE: Proposed Annexation of State Lands to the City of Seward

Dear Representative Smith:

Thank you for informing me of the forthcoming hearing in Juneau pertaining to Seward's attempt at annexation of State lands. I do have additional information which should be considered at that hearing.

The City Manager of Seward indicated to me that he had notice of the February 3rd hearing as early as Thursday, January 27th. Despite that, there have been no announcements via the local media informing the general citizenry that they could input testimony at that hearing. I believe this nonaction by the City Administration indicates that they are hoping to keep testimony at the hearing to a low key, and should be duly noted as an act contrary to the public interest.

The City of Seward has a 3 step plan to annex up to 65 square miles of State property. The Local Boundary Commission has twice scheduled & cancelled public hearings on step 2, the latest instance being on 1-6-77. Because of this, it is now apparent that only step 1 of the City's plan will be considered this year by the Legislature. I shall consequently attempt to limit my comments to step 1, or 4th of July Creek, as much as possible.

I have recently learned that the City Administration has sent a telegram to all State Legislators urging approval of this annexation proposal. Among other things, the telegram purportedly states that: 1) there are zero residents in the area to be annexed; 2) the majority opinion at the public hearing was in favor of the proposal. Both of those statements are patently false. There are eight (8) permanent residents in the area to be annexed, including four children, three of which attend Seward schools. Three of the adults of that area signed the petition which I sent to Legislators on 1-13-77, and the other one was vacationing "ou[illegible]side" when it was circulated.

At the public hearing on May 21st, 1976, six (6) private citizens gave testimony on the 4th of July Creek annexation proposal. The one citizen who spoke in favor of the proposal was a man who owns 120 acres of land there, although he does not live on that land. Also favoring the proposal were representatives of three local governmental bodies, i.e. Kenai Peninsula Borough Planning & Zoning Commission, Seward Planning & Zoning Commission, and the Kenai Peninsula Borough Mayor. The five citizens who expressed displeasure or outright opposition to the proposal lived on adjacent Resurrection Bay Road or within the area encompassed by step 2 of the City's piecemeal annexation plan. In rendering their decision immeaditely after the hearing (without playing back the tape recording), the Local Boundary Commission in section (2)(c) of their statement said that "The majority of the testimony at the public hearing was in favor of the annexation..." That was an untrue statement. Furthermore, "...the City's long range annexation plans..." as mentioned in section (2)(b) of the statement have become a moot point since the November 2nd election pertaining to this issue. That, of course, is providing that the City fathers honor the results of the straw poll which indicated that 72.1% of the total voters opposed annexation of steps 2 and 3 of the City's plan. Had the people been given a chance to vote on step 1 at that time, it is likely that it too would've suffered an ignominious setback. Most of us here believed that the LBC recommendation was binding and that step 1 was a lost cause.

Please note the attachments from the Alaska Division of Lands, Alaska Conservation Society, and Friends of the Earth. These letters raise the important issue of 4th of July Creek as a potential critical habitat area. This position is supported by the ADF&G's authoratative publication entitled "Alaska's Wildlife & Habitat," and is a very serious consideration in light of the City's desire to annex the area. That publication has been used extensively by the Corps of Engineers, BLM, and others in preparing Environmental Impact Statements. On page 60, column 1 of that publication the area in question is clearly defined as "critical habitat" for black bear, although it has not yet been formally designated as such by the Legislature. The area is also one of the best places for goat & bear hunting by local as well as non-local Alaskans. That status would be denied the area if it were within the Seward City limits.

Attached also is a copy of a letter from Councilmember Vincent to the local paper outlining some reasons why the City should not proceed with the step 2 annexation proposal. Some of his reasons, such as road maintenance along a vertical coastline would apply to step 1 as well as step 2. This position is elaborated upon in a recent (10-76) study done for the Department of Community & Regional Affairs by the Division of Geological & Geophysical Surveys. Their report is entitled "Preliminary Evaluation of Geologic Factors Bearing on Development in Upper Resurrection Bay." Among other negative factors which would discourage development at 4th of July Creek is the stated opinion that the present gravel road which extends in that direction would be impossible to maintain, thus effectively barring land access to the area unless a prohibitively expensive road was constructed at the 700 foot elevation of the mountain. Due to tidal erosion the existing road is now about 1½ miles shorter than depicted on the most recent topographic map, which is 27 years out of date. That road now effectively terminates in Section 1, T.1S, R.1W.

This same report describes the extent of Exxon's involvement here at 2.6 acres. This parcel is near the Alaska Railroad and Seward Highway where Exxon expedites pipe for their oil rig which will drill near Yakataga. The other company interested in Seward as an O. C. S. base has leased 3 acres within the existing City limits. These are very logical site selections and would certainly indicate a precedent for any future companies. The one thing which Seward has going for it is its highly accessible existing transportation facilities. What we are dealing with here is a blatant land grab attempt by the City of Seward, with little or no justification whatever. The people of this area recognized this land grab for what it was on November 2nd and resoundingly said No! We ask that the Legislature echo our sentiments by passing a joint resolution overriding the Local Boundary Commission recommendation.

In closing I make note that Mr. Oscar Bailey has asked to have his name withdrawn from the petition which I circulated, due to a misunderstanding on his part as to the scope of it. It should also be noted that Mr. Herman Leirer of the Seward Planning & Zoning Commission is now circulating his own petition asking people to support the 4th of July Creek annexation proposal. Furthermore, Mr. Willard Midby of Seward is circulating yet another petition asking people to reaffirm that they are supportive of the petition which I mailed to Legislators on 1-13-77.

Whatever the outcome of all these petitions, it should be obvious that grassroots democracy is presently flourishing in the Seward area, and a very healthy climate now exists for a Local Boundary Commission hearing on any proposed annexation attempts by the City of Seward. This climate did not exist last May 21st when the LBC was here, as witnessed by the very small turnout for that hearing. At the very least we are entitled to another public hearing on this highly controversial matter. The Local Boundary Commission recommendation should be overturned.

Sincerely,

Thomas Taggart

PS. I SPOKE WITH MR. MIDBY TODAY AND HIS PETITION WHICH WAS SENT IN ON 1.31.77 HAD ABOUT 175-180 SIGNATURES OPPOSING THE 4TH OF JULY CREEK ANNEXATION.

FRIENDS OF THE EARTH

1895 PIONEER WAY

FAIRBANKS, ALASKA 99701

(907) 479-3684

JIM KOWALSKY, *Alaska Representative*

January 25, 1977

Testimony regarding Seward land annexation

To be submitted in a hearing, January 31, 1977:

Friends of the Earth opposes annexation of the area known as "Fourth of July Creek" by the City of Seward.

The Alaska Department of Fish and Game, in its publication "Alaska's Wildlife and Habitat" has recommended this area and similar landforms within the game management unit as essential habitat for black bear. Also, the offshore waters provide habitat for several species of marine mammals.

We oppose the change in land status because the wildlife values in the area are best protected by leaving the land in a natural state.

FROM: Paul Conger RE: SJR9

I talked to Ronald Skoog, Chief Habitat Protection Service, Dept. of Fish and Game, and he said that the Fish and Game's position in reference to the annexation of territory in the Seward area is as follows:

1) The Fish and Game Dept. has no objection to the above referenced annexation.

2) The Fish and Game Dept. has no intention of declaring the area at issue a "critical habitat area".

DEAR MS. SMITH:

ATTACHED FIND A COPY OF MY COMMENTS ON THE SEWARD LAND ANNEXATION PROPOSAL; THE ORIGINAL WAS SENT TO THE SENATE COMMUNITY + REGIONAL AFFAIRS COMMITTEE.

I DO HAVE AN ADDITIONAL BIT OF INFORMATION OF GREAT IMPORTANCE WHICH I ASK YOU TO INCLUDE IN THE HEARING RECORD. ---- AS NOTED ON PAGE 2, PARAGRAPH 4 OF THE ATTACHMENT, MR. WILLARD MIDBY OF SEWARD HAS CIRCULATED A PETITION ASKING PEOPLE TO REAFFIRM THAT THEY ARE OPPOSED TO THE 4TH OF JULY CREEK ANNEXATION. OVER THE PAST FEW DAYS, MR. MIDBY AND MR. ED ZIMMERMAN HAVE COLLECTED APPROXIMATELY 200 SIGNATURES ON THAT PETITION. THEY WILL HOPEFULLY HAVE MAILED IT TO YOU IN TIME FOR CONSIDERATION AT THE HEARING ON FEBRUARY 3RD. I BELIEVE THAT THEIR PETITION SPEAKS VOLUMES ABOUT THE PUBLIC OUTRAGE CONCERNING THIS ISSUE.

SINCERELY,

Thomas Taggart

RE: Proposed Annexation of State Lands to the City of Seward

Dear Chairman Orsini:

Thank you for informing me of the forthcoming hearing in Juneau pertaining to Seward's attempt at annexation of State lands. I do have additional information which should be considered at that hearing.

The City Manager of Seward indicated to me that he had notice of the February 3rd hearing as early as Thursday, January 27th. Despite that, there have been no announcements via the local media informing the general citizenry that they could input testimony at that hearing. I believe this nonaction by the City Administration indicates that they are hoping to keep testimony at the hearing to a low key, and should be duly noted as an act contrary to the public interest.

The City of Seward has a 3 step plan to annex up to 65 square miles of State property. The Local Boundary Commission has twice scheduled & cancelled public hearings on step 2, the latest instance being on 1-6-77. Because of this, it is now apparent that only step 1 of the City's plan will be considered this year by the Legislature. I shall consequently attempt to limit my comments to step 1, or 4th of July Creek, as much as possible.

I have recently learned that the City Administration has sent a telegram to all State Legislators urging approval of this annexation proposal. Among other things, the telegram purportedly states that: 1) there are zero residents in the area to be annexed; 2) the majority opinion at the public hearing was in favor of the proposal. Both of these statements are patently false. There are eight (8) permanent residents in the area to be annexed, including four children, three of which attend Seward schools. Three of the adults of that area signed the petition which I sent to Legislators on 1-13-77, and the other one was vacationing "outside" when it was circulated.

At the public hearing on May 21st, 1976, six (6) private citizens gave testimony on the 4th of July Creek annexation proposal. The one citizen who spoke in favor of the proposal was a man who owns 120 acres of land there, although he does not live on that land. Also favoring the proposal were representatives of three local governmental bodies, i.e. Kenai Peninsula Borough Planning & Zoning Commission, Seward Planning & Zoning Commission, and the Kenai Peninsula Borough Mayor. The five citizens who expressed displeasure or outright opposition to the proposal lived on adjacent Resurrection Bay Road or within the area encompassed by step 2 of the City's piecemeal annexation plan. In rendering their decision immediately after the hearing (without playing back the tape recording), the Local Boundary Commission in section (2)(c) of their statement said that "The majority of the testimony at the public hearing was in favor of the annexation..." That was an untrue statement. Furthermore, "...the City's long range annexation plans..." as mentioned in section (2)(b) of the statement have become a moot point since the November 2nd election pertaining to this issue. That, of course, is providing that the City Fathers honor the results of the straw poll which indicated that 72.1% of the total voters opposed implementation of steps 2 & 3 of the City's plan. Had the people been given a chance to vote on step 1 at that time, it is likely that it too would have suffered an ignominious setback. Most of us here believed that the LBC recommendation was blinding and that step 1 was a lost cause.

Please note the attachments from the Alaska Division of Lands, Alaska Conservation Society, [illegible] of the Earth. These letters raise the important issue of 4th of July Creek as a [illegible] critical habitat area. This position is supported by the ADF&G's authoritative publication entitled "Alaska's Wildlife & Habitat," and is a very serious consideration in light of the City's desire to annex the area. That publication has been used extensively by the Corps of Engineers, BLM, and others in preparing Environmental Impact Statements. On page [illegible], column 1 of that publication the area in question is clearly defined as "critical habitat" for black bear, although it has not yet been formally designated as such by the Legislature. The area is also one of the best places for goat & bear hunting by local as well as non-local Alaskans. That status would be denied the area if it were within the Seward City limits.

Attached also is a copy of a letter from Councilmember Vincent to the local paper outlining some reasons why the City should not proceed with the step 2 annexation proposal. Some of his reasons, such as road maintenance along a vertical coastline would apply to step 1 as well as step 2. This position is elaborated upon in a recent (10-76) study done for the Department of Community & Regional Affairs by the Division of Geological & Geophysical Surveys. Their report is entitled "Preliminary Evaluation of Geologic Factors Bearing on Development in Upper Resurrection Bay." Among other negative factors which would discourage development at 4th of July Creek is the stated opinion that the present gravel road which extends in that direction would be impossible to maintain, thus effectively barring land access to the area unless a prohibitively expensive road was constructed at the 700 foot elevation of the mountain. Due to tidal erosion the existing road is now about 1½ miles shorter than depicted on the most recent topographic map, which is 27 years out of date. That road now effectively terminates in Section 1, T.1S, R.1W.

This same report describes the extent of Exxon's involvement here at 2.6 acres. This parcel is near the Alaska Railroad and Seward Highway where Exxon expedites pipe for their oil rig which will drill near Yakataga. The other company interested in Seward as an O. C. S. base has leased 3 acres within the existing City limits. These are very logical site selections and would certainly indicate a precedent for any future companies. The one thing which Seward has going for it is its highly accessible existing transportation facilities. What we are dealing with here is a blatant land grab attempt by the City of Seward, with little or no justification whatever. The people of this area recognized this land grab for what it was on November 2nd and resoundingly said No! We ask that the Legislature echo our sentiments by passing a joint resolution overriding the Local Boundary Commission recommendation.

In closing I make note that Mr. Oscar Bailey has asked to have his name withdrawn from the petition which I circulated, due to a misunderstanding on his part as to the scope of it. It should also be noted that Mr. Herman Leirer of the Seward Planning & Zoning Commission is now circulating his own petition asking people to support the 4th of July Creek annexation proposal. Furthermore, Mr. Willard Hidby of Seward is circulating yet another petition asking people to reaffirm that they are supportive of the petition which I mailed to Legislators on 1-10-77.

Whatever the outcome of all these petitions, it should be obvious that grassroots democracy is presently flourishing in the Seward area, and a very healthy climate now exists for a Local Boundary Commission hearing on any proposed annexation attempts by the City of Seward. This climate did not exist last May 21st when the LBC was here, as witnessed by the very small turnout for that hearing. At the very least we are entitled to another public hearing on this highly controversial matter. The Local Boundary Commission recommendation should be overturned.

Sincerely,

Thomas Taggart

"Don't annex" say voters

THE SEWARD PHOENIX LOG

Vol. XI, No. 7 * Thursday, November 4, 1976 * Seward, Alaska 99664 * Price: 20 Cents

Results of an annexation straw poll taken during the state and federal election Tuesday showed conclusively that people both inside and outside the city limits of Seward reject annexation of both the Lowell Point area (south portion), and the Bear Creek, Salmon Creek area (north portion). Annexation of the two areas was considered by the City to help bring about planned and orderly growth of the entire Seward area. Mayor Neve, some members of Council and the city administration feel that the Gulf of Alaska oil exploration and drilling will greatly impact the community and fear that unplanned growth might be dangerous to the entire area.

The people, however, expressed definitely negative feelings about annexation--at least at this time. The vote was not a formal one, but conducted in conjunction with the election in progress and drew "poll watchers" from the outlying areas where residents are adamently opposed to annexation.

Seward Precinct 1 voted 71 yes to 115 no on annexation of the Lowell Point area, and 63 yes and 124 no on the north portion annexation. Seward Precinct 2 voted 119 yes to 215 no on Lowell Point, 102 yes and 234 no on annexation of the Bear Creek, Salmon Creek area. As might be expected, Bear Creek Precinct voters turned out in force and expressed more disfavor toward annexation than their neighbors inside the city. Bear Creek tallies were 35 yes to 164 no for Lowell Point annexation and 13 yes to 192 no on the Bear Creek, Salmon Creek proposal.

The vote followed two months of controversy and meetings between the Council and representatives of the people residing outside the city limits. An aggressive anti-annexation campaign had been waged the last week by the Bear Creek League, as some [illegible] residents call

Area follows statewide trend in balloting

Fifty four percent of the registered voters turned out in Seward Precincts 1 and 2 to vote in the federal and state election held Tuesday. Area voters followed closely the state trends, supporting President Ford and Congressman Don Young and voting along state lines for the various bonds and propositions on the ballot.

The two Seward precincts and Bear Creek precinct gave President Ford 403 votes to 289 for Jimmy Carter. Libertarian candidate MacBride received 52 votes.

Area voters gave Congressman Don Young 556 votes to 196 for Eben Hobson in Hobson's bid to unseat Young.

State Senator Jalmar Kerttula got a healthy 547 votes to Jean Marsh's 191. Running unopposed to retain his seat as this District's representative in the Legislature, Keith Specking received 626 votes.

Area voters gave Willow the most votes for the capital relocation site with 420 votes to 124 for Larson Lake and 96 for Mount Yenlo.

[illegible] No. 1 "Action on

Teachers to vote bargaining agent

by Katherine Parker

With the Board in the middle, and the Kenai Peninsula Education Association and Kenai Peninsula Federation of Teachers vying to represent the teachers as bargaining agent, the Board's arrangements for an election November 4 left nobody happy at the School Board meeting Monday night.

An executive session to consider a grievance from KPEA brought a protest from attorney Ted Carson, representing the KPFT, who asked that the KPFT join the session since the grievance pertained to the election. Though the grievance concerned neither borough finances or personalities, the contract agreement

Tom Murphy, KPEA president, first asked the Board to hold off on setting an election until July 1977 "as per the negotiations agreement with KPEA." After a motion was passed for the election, he then asked that the election be held in abeyance until "adequate appeal of the grievance and resolution is accomplished," referring to a third-party appeal and resolution.

The Board, however, also rejected this request.

As set up the teachers would vote from 3 p.m. to 6 p.m. with Borough Clerk Frances Brymer in charge of the election.

All principals and administrators would be voting with a yellow ballot, as their right to be part of the election as KPEA members has been challenged by the KPFT. This would make it handy to discount these ballots should this legal technicality later be decided in favor of the KPFT. On

teacher-of-the-year was selected.

By reducing the hallway area including the foyer, and providing an elevator rather than ramps for handicapped use of the second floor, the $650,000 was subtracted from the $2.8 million plan for expanding the school.

Though the administration felt the original plan was legitimate as the first phase for the 9-classroom project, allowing for later additions, the reduced cost "could make a difference in whether the project passes the bond issue," said Supt. Paul Gallaher. "The savings could be translated into additional construction in the Homer area," he added.

A Mr. Hackett, architect on the Homer Hospital, said, "There is a lot of sentiment in Homer about completion of the middle school."

Keith Simons, a teacher at the Bob Bartlett school in Tyonek for the past seven years, was named

Dear Mr. Taggart:

Please excuse our tardiness in answering your inquiry.

After researching the land records of the area known as Fourth of July Valley, it is found that it has not yet been classified as a critical habitat area. The area has been suggested to the legislature as a critical habitat area by the Department of Fish & Game.

Therefore, there are at this time no stipulations other than our classifications as to its use.

Again we apologize for any inconvenience this delay may have caused you.

If we may be of further service please contact us.

JIM KOWALSKY, *Alaska Representative*

January 25, 1977

Testimony regarding Seward land annexation

To be submitted in a hearing, January 31, 1977:

Friends of the Earth opposes annexation of the area known as "Fourth of July Creek" by the City of Seward.

The Alaska Department of Fish and Game, in its publication "Alaska's Wildlife and Habitat" has recommended this area and similar landforms within the game management unit as essential habitat for black bear. Also, the offshore waters provide habitat for several species of marine manmals.

We oppose the change in land status because the wildlife values in the area are best protected by leaving the land in a natural state.

January 17, 1977

Representative Hugh Malone
Pouch V
Juneau, Ak. 99811

Dear Hugh:

The Boundary Commission has recommended that the City of Seward be allowed to annex an area known as 4th of July Creek. This matter goes to the legislature to be either approved or disapproved.

The members of the Kachemak Bay Conservation Society recognize that the 4th of July Creek area is highly valuable for ~~salmon spawning~~, black bear habitat, and recreational use, and that it is being considered for critical habitat status. We do not believe that its best use is for annexation and industrial development.

In addition, the Boundary Commission's decision apparently contains some erroneous statements regarding testimony at a public hearing, and we believe that its recommendations are contrary to the will of the citizens of Seward and the surrounding area.

To disapprove this boundary change, a resolution passed by both houses is necessary. We ask that you sponsor such a resolution and give it your strong support.

Sincerely,

Nancy Lord

Letters TO THE EDITOR

Letter to Editor

The citizens of Seward will be given the opportunity to voice their opinion via the ballot box on November 2 showing how they feel about the city's present plans on annexation.

As a member of the City Council I would of neccessity weigh the outcome very seriously if the citizens were properly informed on this issue. At the moment I'm convinced they are not, because I do not believe the city has addressed itself to all the pro's and con's of this most ambitious move on the part of the city of Seward since its founding.

The proposed annexation to the south of the city, if successful, represents an area at least three times as large as our present boundaries; a large part of which is vertical coastline. Very little of this can be utilized by industry or residents.

I shudder to think of a school bus full of children traveling over the present road during the spring because of snowslides. What would be the city's legal position if a severe accident did happen? Heck! I wouldn't permit a child of mine to travel the present road come next spring. If we assume responsibility and attempt to bring it up to first class status, it could be a severe financial drain that would threaten the city's bonding position. At present, we have other problem of a much higher priority.

The city may be successful in annexing this area because there are few residents to oppose it; however, I feel we will impoverish the city for years to come if we do.

The area to the north upon which the city has been slathering for as long as ten years is a potential powder keg of dissent. When they raise the oft repeated question; what's in it for us, there seems to be no reasonable answers.

At present I don't believe the city can tell these prospective new citizens what their taxes might be. Will they have additional fire protection? Will trailers still be permitted? How about the city's present ordinance on animals; will it apply equally? Will the electric surcharge be dropped? Who will maintain the roads in the area? How much additional revenue will be generated for the city? Will it purchase additional street maintenance equipment? Can it support more police officers? Can our present ordinances have a double standard? I don't think they can nor should they.

Until it was recently agreed upon to give the citizens of Seward a chance to vote on this issue I felt we were holding every citizen in contempt, they may not favor this power play.

I feel our present course is not based upon sound reasoning and business sense. It can do nothing but self destruct if finalized. We have failed to get our facts up front. Our desire to complete this move is based entirely upon what a few think or hope will happen. At present there are no firm commitments in hand. The negative side of this issue is right up front. We cannot afford it at this time. We have not convinced many that we can, nor have we established a critical need to do so.

If at this late date annexation is not the topic of the day we had better turn off the T.V. and get turned on about what's happening here in town. I admit the city may acquire a few more assets, but frankly it's our added liabilities that scare me to death. If you are not up to date on annexation I suggest you pick up the phone and call your Council people. Call anyone except me. Shucks, I'm still trying to find something out myself.

Respectfully,
Bill Vincent

URGE YOUR SUPPORT OF PETITION FROM THE CITY OF SEWARD REQUESTING ANNEXATION OF A TERRITORY KNOWN LOCALLY AS FOURTH OF JULY CREEK AREA TO THE CITY OF SEWARD THAT WAS FILED WITH THE COMMISSIONER OF THE DEPARTMENT OF COMMUNITY AND REGIONAL AFFAIRS IN ACCORDANCE WITH TITLE 29 AND 44 OF THE ALASKA STATUES AND TITLE 19 ALASKA ADMINISTRATIVE CODE. THIS AREA SPECIFICALLY UNDER CONSIDERATION HAS BEEN IDENTIFIED BY THE DEPARTMENT OF COMMUNITY AND REGIONAL AFFAIRS AS AN AREA THAT MEETS ALL THE PERTINENT CRITERIA FOR DEVELOPMENT OF A SERVICE BASE THAT COULD SUPPORT THE GULF OF ALASKA OIL AND GAS DEVELOPMENT. THIS ANNEXATION IS A POSITIVE APPROACH TOWARDS RESPONDING TO GROWTH AND DEVELOPMENT IN AND AROUND THE CITY OF SEWARD. THE MAJORITY OF THE TESTIMONY AT PUBLIC HEARING WAS IN FAVOR OF ANNEXATION WITH NO OWNERS OF PROPERTY WITHIN THE ANNEXATION AREA REGISTERING OPPOSTIION. THE NUMBER OF RESIDENTS IN THE TERRITORY TO BE ANNEXED IS PRESENTLY ZERO. THANK YOU FOR YOUR SUPPORT.

CITY COUNCIL

CITY OF SEWARD

February 2, 1977

The Honorable Lisa Rudd
Chairman
Committee on Community and Regional Affairs
Alaska House of Representatives
Juneau, Alaska 99811

Dear Madam Chairman:

The matter of the Fourth of July Creek annexation is tremendously important to the future welfare and development of Seward. Attempts have been made to dismiss the importance of this area as it relates to the OCS impact this community is experiencing, and I am confidnt will continue to experience over the next several years. As the owner of by far the largest tract of private property within the annexation area, let me assure you that nothing could be further from the truth.

Alaska OCS oil exploration is already underway, and with this country's very serious energy crisis, the full and complete development of this source of petroleum and natural gas will occur. Ports with the benefits of Seward's are hard to find most places and this is particularly true in Alaska. Accordingly, it doesn't take very much foresight to realize that Seward in not going to be able to avoid sizeable OCS impact.

The Fourth of July Creek area is going to be developed. Seward is going to be called on to provide services for the area, but without having the area for a tax base this will be an insurmountable burden. I can see no purpose that would be served by denying annexation of this area. I urge the Committee's full support and approval of the City's petition.

Sincerely,

Dale Lindsey

Memo to: Members of C & R A

Re: Statements made on the black bear critical habitat subject during deliberations on Seward annexation

From: Sally Smith

A call was placed to Tom Trent, at Dept. of Fish and Game, Anchorage, to get his comments on the classification of Fourth of July Creek. (This in response to the Friends of the Earth letter on the subject). Mr. Trent states that although the Dept. of Fish and Game "Blue Book" refers to the area as critical habitat, it is not done so in a manner that would intend that the area be officially designated by the Legislature as a "Critical Habitat"

Continuing, Trent stated that Fish and Game had never, to his knowledge verbally referred to the Fourth of July Creek area as a critical habitat either during the background of the timber industry in the area or the OCS site research.

When asked whether he would please send a memo to my office with the above information, Trent referred me to Mr. Ron Scoug (sp.?) Chief of Habitat Protection, here in Juneau. Mr. Scoug was contacted, and is preparing a statement, which will first be sent to the Governor's office--via Mike Whitehead. A copy will then be turned over to the committee.

Additional pertinent information is attached.

Memo to: Committee Members, C. and R. A.

From: Office of Sally Smith

Date: Feb. 2, 1977

Re: Conversation with Dr. Richard Neve, Mayor of Seward, on January 25, 1977, on the annexation of lands to Seward.

Dr. Neve said that only Fourth of July Creek was to be annexed, but that many who signed the Taggart petition were under the impression that areas to the north and south were also being annexed.

Each land owner in the FJ area has been polled and is pro-annexation, according to Neve. Because of the furor, a straw poll was taken within the community on the north-south possibilities and annexation there went down 2 to 1. He said no one opposed the current FJ annexation. Further, he said that a couple of people are sorry they signed the petition, saying the issue had been misrepresented.

Oil companies are already coming into Seward and Neve believes one to already be locating in the proposed annexed area. He states that regardless of community and special interest response, development will occur and it is important that Seward be able to tax.

Recommended reading--SEWARD CONCEPT PLAN by Kramer, Chin and Mayo.

Neve says that an attempt will be made to have a representative present at the hearings.

Memo to: Committee Members, C. and R. A.

From: Office of Sally Smith

Date: Feb. 2, 1977

Re: Interpretation of "essential habitat" as used in the "Alaska's Wildlife and Habitat" book, put out by the Alaska Dept. of Fish and Game.

Pg. 56--- SPECIFIC HABITAT CONSIDERATIONS

"A few critical areas of spring concentrations are shown on the maps because of their size and traditional use by bears. In addition, many other south facing slopes are important early spring use areas due to early emerging grasses, sedges, horsetails, false hellebore, and herbs. Horsetails and foliage of salmonberry, cranberry and blueberry are used extensively in some areas. During summer and fall, bears switch to diets of mostly salmon and berries.

Black bear population levels in this area fluctuate a great deal year to year. This is probably because severe winters or late springs have serious effects on denning success, cub survival, and post-denning adult survival in areas where good habitat is limited.

The overlap of critical habitat for both brown and black bears in the unit demonstrates the two species do tolerate each other in some instances.

More likely, denning periods are similar to those of brown bears in the same areas. Denning usually begins by late October and lasts through April. Males and single bears seem to den later and emerge earlier than do sows with cubs.

RECOMMENDATIONS

Protection of habitat in spring concentration areas, maintenance of salmon stocks and preservation of alpine and subalpine zones are necessary to proper black bear management. When logging occurs, small clearings are more beneficial to black bears than are larger ones. The release of berry-producing plants by the selective removal of mature timber should be considered when timber cuts are designed. "

Under the Brown Bear Section,
LAND USE CONSIDERATIONS AND RECOMMENDATIONS

" If care is taken to protect the critical high use areas, protect water quality and the salmon resource, and guard against extensive damage to the alpine and subalpine zones, and if direct human conflicts are kept to a minimum, little or no permanent damage to brown bear populations will occur. Given a minimum of protection, brown bears can coexist with human activities under most circumstances."

Upon interpretation, it appears that 'critical" and "essential" must be taken in context. No mention is made of designating the areas as "Critical Habitat", as has been suggested by some. The terms are used to define the type of habitat available--i.e.--"essential" habitat refers to an area that contains all of the elements necessary for existence of bears. "Critical" basically refers to an area where large numbers of bear are present. It does NOT necessarily refer to a problem in the existence of bear.

Please refer to map 53 C of the "Alaska's Wildlife and Habitat" book for analysis of the relatively small area referred to as Fourth of July Creek habitat, compared to the multitude of areas in Game Management Unit 6 and 7.

JIM KOWALSKY, *Alaska Representative*

January 7, 1977

The Honorable Sally Smith
Pouch V
Juneau, Alaska 99801

The City of Seward is proposing to annex an area known as 4th of July Creek. There is considerable local opposition and the area has been recommended to the legislature by ADF&G as a critical habitat area for black bear. The area contains many other species of wildlife, including nesting eagles and mountain goats. The adjacent waters, also to be annexed, is heavily populated with sea otters, harbor seals, and sea lions.

Given the relatively pristine nature of this area, Friends of the Earth opposes the change in land status. We urge the adoption of a joint resolution of both houses of the state legislature to override the local boundary commission recommendation for annexation.

Thank you for your attention to this issue.

Sincerely,

Marilyn Sigman

Tom Taggert, Seward

Seward, Alaska
Jan 27, 1977

Re: The proposed annexation, by Seward, of a large area called the Fourth of July Creek lands.

Representative Sally Smith

Dear Ms. Smith

I protest the annexation of the Fourth of July Creek area to Seward on the basis of two categories of reasoning, one, what we might call technical. is the mistake the city made in appiying for many whole sections of land. It would have been more reasonable if they had outlined the specific area they could have used for industrial development. Their "block unit" approach reveals that they are thinking only as bureaucrats instead of realstically evaluating their move.

The second consideration follows from the first, but is a matter of principle that should be used in all public planning and that in a city such as Seward which has its dynamic center, which is its port and harbour facilities. Development should proceed under these circumstances from the center outward. But

with its annexation policies the city is doing the reverse. It is putting primary emphasis upon the external periphery, while neglecting the lifeline of Seward, its heart, which is shiping.

I should inform you that the people of this community have been subjected to a rather heavy drumfire of propaganda for the past year through the media of the newspaper and city council meetings. What this propaganda boils down to is premonitions of doom if we do not quickly conform to the "New Reality". This new situation, or environment, is pictured as being laden with portents of both opportunity and chaos.

The point is that the Seward City Council under an umbrella of vague terms has taken it upon themselves to point a way whereby we can escape the perils and dangers of what is insistently called "impact" The way out, the path of salvation is extremely simple - merely follow the implications of the prestigious

"Seward Concept Plan

This so called easy route is a mistake. Sensible delay has proven that, as of this present date, Jan. 27 1977 the impending "impact" has already largely passed by Seward.

Consider the implications of the two agreements recently signed by the oil companies with native councils and corporations concerning substantial onshore base support for offshore oil development. I refer to Yakutat and the Monti Bay site, and the Chiniak airstrip on Kodiak island. If Seward is ever "impacted" it can now come, reasonably speaking, from Northern Gulf development and that is at least two years away.

As for the "Seward Concept Plan" it is a hollow shell, and the reason why this is so is because, aside from speculation there is no basic economic thrust to implement it. Seward is actually a depressed area. A look at the local longshore and lumber industry at the present time is proof of this

The anti-annexation petition, with about two hundred signatures, presented by Mr. Taggert should be allowed to stand. I know of only one person, Mr. Oscar Bailey, who freely changed his mind. All other withdrawals can be considered as the result of political manuevering.

Yours truly,

Willard Muby

SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

February 1, 1977

Present: Chairman Orsini, Ed Willis and Frank Ferguson.

Absent: Bill Sumner and Glen Hackney

At 3:45 Mr. Leo Rhode, Representative and Author of Senate Joint Resolution No. 9 presented his testimony to the members of the Senate Community and Regional Affairs Committee.

Mr. Rhode testified that the Bradley Lake hydroelectric plant project has been studied extensively as to the results of such a project, and has been approved by Congress although no appropriations have been made to start the construction of the plant.

An Environmental Impact Study was conducted and as a result, it has been decided that there will be no adverse environmental effects on fishing or other natural resources.

Mr. Rhode stated that if the Resolution is passed, the plant could be operating within 5 years. By 1980, a transmission line from Soldotna could provide power to Anchorage, if necessary, and relieve the demand for natural gas, of which the supply is limited.

Chairman Orsini noted that the Alaska Power Administration and the Alaska Public Utilities Commission were in favor of the Resolution. Also, no environmental agencies or groups had notified him of any objections to the project.

Mr. Rhode said that this was a good project, and that it would relieve the rising gas problems throughout Alaska.

Senator Ferguson moved that the Resolution be passed and Chairman Orsini and Senator Willis voted "Do Pass" on HJR No. 5.

The meeting was adjourned at 3:55 p.m.

SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

January 25, 1977

Present: Chairman Joe Orsini, Glen Hackney, Ed Willis and Bill Sumner

Absent: Frank Ferguson

The meeting was called to order at 3:05 P.M. by Senate Community and Regional Affairs Chairman, Joe Orsini. He introduced the Committee staff, and offered Paul Conger's (A.A.) assistance for any research or data gathering the Committee members might need in regards to Community and Regional Affairs.

Chairman Orsini asked if there was any preference among the Committee members as to the order in which the bills are discussed. None were expressed. Additionally, he stated that copies of the bills, with a request for input, had been sent to the Boroughs and Municipalities. No responses have yet been received.

A short discussion followed in regards to a Committee meeting being held in the HESS Committee Room, February 3, 1977. SJR8 and SJR9 have been referred to the the House and Senate Community and Regional Affairs Committees and members of the Boundary Commission in Anchorage will attend.

Chairman Orsini stated that they would discuss the content of Bill #34, with testimonies from Palmer McCarter, Director, Community and Regional Affairs; and Sam Cooxon, Sr. Administrative Assistant for Mayor Sullivan in Anchorage. Boundary Commission.

He stated that his basic reason for submitting the Bill was that parts of Municipalities wishing to secede may be doing so due to economic interests, and did not wish to share their economic base. Areas who may be interested in forming their own Boroughs, for instance, are Kenai, North Pole and Prudhoe Bay. The Chairman explained that if both parties involved, meaning those wanting to secede and those in the municipality being left, voted in favor of the secession, no problems should arise, although he felt that others could be affected by the secession. The Chairman expressed the desire to make as little change as possible in the law and solve the problem.

Senator Hackney then asked how the vote would take place and the Chairman stated that that decision would have to be made by the Boundary Commission.

Palmer McCarter asked who would conduct the election. He felt the State should pay for the election only in the area affected by the secession. He added that the regulations for the local Boundary Commission were being rewritten and would have to wait until they were available in order to determine how much responsibility they will have in this regard.

Senator Willis referred to a previous situation in Eagle River where special legislation took place which was later declared unconstitutional and as a result felt that the government should have as little control as possible in this secession issue due to the politics involved. He said that the Boundary Commission should have full responsibility as it is not politically affiliated.

Chairman Orsini stated that it was his understanding that the area wanting to secede would do the ground work then petition the Boundary Commission who would then decide if an election was warranted and who should pay the expenses of an election.

Mr. McCarter said the procedure for secession would include public hearings and the State would pay the expenses of the municipality being seceded from.

Senator Sumner asked Mr. McCarter if the State should pay expenses for the area petitioning to secede. Senator Sumner expressed the opinion that he thought they would be obligated to pay their own expenses.

Palmer McCarter responded that there is no current structure at this time, but when the new regulations were received about February 1, 1977, a decision could be made.

Senator Hackney asked if for example, the North Pole wanted to secede, would the election take place in Fairbanks?

Mr. McCarter answered that that was up to the Legislature.

Chairman Orsini added that it would be the North Pole versus the Fairbanks North Star Borough and the City of Fairbanks. He then asked if under the existing regulations if the city seceding would be included in the second vote since the city is part of the municipality. Palmer McCarter stated that he did not know, but would inquire into this possibility.

Senator Sumner expressed the opionion that they would be included in the second election and Senator Hackney agreed with him.

The Chairman asked Sam Coxon for his testimony.

Mr. Coxon stated that his interests were in protecting those affected by separation from a municipality. Fragmenting an area could have an adverse effect in a metropolitan area where services could no longer be provided on an area-wide level. A municipality could lose large tax-based services, and therefore disrupt the economic structure of that municipality.

Mr. Coxon testified that a question of fragmentation, at issue in SB34, should be treated in the following manner "We want to protect all those that would be affected by detachment," rather than "we want to break away."

He suggested that a two-tiered government, that this Bill seeks to prevent, would disrupt services provided for a general-wide area.

Chairman Orsini staed that the Bill #34 could not prevent fragmentation, but was intended to protect the rights of all those involved.

Senator Sumner then asked if it was possible if a borough which is supported by a municipality, for instance, discovers oil and wants to secede without committment to the municipality, and use the oil industry as their tax base. If this was possible, he felt that the municipalities would eventually be faced with serious disruption.

Chairman Orsini then stated that he had heard these arguments before, and that this Bill #34 was referred to the Senate Community and Regional Affairs only and that they must make some headway on the Bill.

Senator Willis stated that he had spent ten years intertwined with this problem and that he would prefer to "let the sleeping dog lie". He wants to leave the situation in the hands of the Boundary Commission. He does not feel that the Legislature should dictate to the Boundary Commission, and they should be given latitude to make the decisions and determine the procedures concerning secession. The Boundary Commission is not a political organization and can act without political influences.

Chairman Orsini asked Senator Willis if he would like to see Sections 1, 2 and 3 repealed and leave it all up to the Boundary Commission, and Senator Willis responded that he knew that the provisions are Legislatively mandated, and had no objections although he wanted the Boundary Commission to be given some latitude in the decision-making process.

Chairman Orsini noted that this is a "hot issue" and it would be preferable to resolve it before a real problem arises.

Chairman Orsini adjourned the meeting at 3:50 p.m.

RE: Proposed Annexation of State Lands to the City of Seward

Dear Chairman Orsini:

Thank you for informing me of the forthcoming hearing in Juneau pertaining to Seward's attempt at annexation of State lands. I do have additional information which should be considered at that hearing.

The City Manager of Seward indicated to me that he had notice of the February 3rd hearing as early as Thursday, January 27th. Despite that, there have been no announcements via the local media informing the general citizenry that they could input testimony at that hearing. I believe this nonaction by the City Administration indicates that they are hoping to keep testimony at the hearing to a low key, and should be duly noted as an act contrary to the public interest.

The City of Seward has a 3 step plan to annex up to 65 square miles of State property. The Local Boundary Commission has twice scheduled & cancelled public hearings on step 2, the latest instance being on 1-6-77. Because of this, it is now apparent that only step 1 of the City's plan will be considered this year by the Legislature. I shall consequently attempt to limit my comments to step 1, or 4th of July Creek, as much as possible.

I have recently learned that the City Administration has sent a telegram to all State Legislators urging approval of this annexation proposal. Among other things, the telegram purportedly states that: 1) there are zero residents in the area to be annexed; 2) the majority opinion at the public hearing was in favor of the proposal. Both of those statements are patently false. There are eight (8) permanent residents in the area to be annexed, including four children, three of which attend Seward schools. Three of the adults of that area signed the petition which I sent to Legislators on 1-13-77, and the other one was vacationing "outside" when it was circulated.

At the public hearing on May 21st, 1976, six (6) private citizens gave testimony on the 4th of July Creek annexation proposal. The one citizen who spoke in favor of the proposal was a man who owns 128 acres of land there, although he does not live on that land. Also favoring the proposal were representatives of three local governmental bodies, i.e. Kenai Peninsula Borough Planning & Zoning Commission, Seward Planning & Zoning Commission, and the Kenai Peninsula Borough Mayor. The five citizens who expressed displeasure or outright opposition to the proposal lived on adjacent Resurrection Bay Road or within the area encompassed by step.2 of the City's piecemeal annexation plan. In rendering their decision immeaditely after the hearing (without playing back the tape recording), the Local Boundary Commission in section (2)(c) of their statement said that "The majority of the testimony at the public hearing was in favor of the annexation..." That was an untrue statement. Furthermore, "...the City's long range annexation plans..." as mentioned in section (2)(b) of the statement have become a moot point since the November 2nd election pertaining to this issue. That, of course, is providing that the City fathers honor the results of the straw poll which indicated that 72.1% of the total voters opposed implementation of steps 2 & 3 of the City's plan. Had the people been given a chance to vote on step 1 at that time, it is likely that it too would've suffered an ignominious setback. Most of us here believed that the LBC recommendation was binding and that step 1 was a lost cause.

Please note the attachments from the Alaska Division of Lands, Alaska Conservation Society, and Friends of the Earth. These letters raise the important issue of 4th of July Creek as a potential critical habitat area. This position is supported by the ADF&G's authoratative publication entitled "Alaska's Wildlife & Habitat," and is a very serious consideration in light of the City's desire to annex the area. That publication has been used extensively by the Corps of Engineers, BLM, and others in preparing Environmental Impact Statements. On page 60, column 1 of that publication the area in question is clearly defined as "critical habitat" for black bear, although it has not yet been formally designated as such by the Legislature. The area is also one of the best places for goat & bear hunting by local as well as non-local Alaskans. That status would be denied the area if it were within the Seward City limits.

Attached also is a copy of a letter from Councilmember Vincent to the local paper outlining some reasons why the City should not proceed with the step 2 annexation proposal. Some of his reasons, such as road maintenance along a vertical coastline would apply to step 1 as well as step 2. This position is elaborated upon in a recent (10-76) study done for the Department of Community & Regional Affairs by the Division of Geological & Geophysical Surveys. Their report is entitled "Preliminary Evaluation of Geologic Factors Bearing on Development in Upper Resurrection Bay." Among other negative factors which would discourage development at 4th of July Creek is the stated opinion that the present gravel road which extends in that direction would be impossible to maintain, thus effectively barring land access to the area unless a prohibitively expensive road was constructed at the 700 foot elevation of the mountain. Due to tidal erosion the existing road is now about 1½ miles shorter than depicted on the most recent topographic map, which is 27 years out of date. That road now effectively terminates in Section 1, T.1S, R.1W.

This same report describes the extent of Exxon's involvement here at 2.6 acres. This parcel is near the Alaska Railroad and Seward Highway where Exxon expedites pipe for their oil rig which will drill near Yakataga. The other company interested in Seward as an O. C. S. base has leased 3 acres within the existing City limits. These are very logical site selections and would certainly indicate a precedent for any future companies. The one thing which Seward has going for it is its highly accessible existing transportation facilities. What we are dealing with here is a blatant land grab attempt by the City of Seward, with little or no justification whatever. The people of this area recognized this land grab for what it was on November 2nd and resoundingly said No! We ask that the Legislature echo our sentiments by passing a joint resolution overriding the Local Boundary Commission recommendation.

In closing I make note that Mr. Oscar Bailey has asked to have his name withdrawn from the petition which I circulated, due to a misunderstanding on his part as to the scope of it. It should also be noted that Mr. Herman Leirer of the Seward Planning & Zoning Commission is now circulating his own petition asking people to support the 4th of July Creek annexation proposal. Furthermore, Mr. Willard Midby of Seward is circulating yet another petition asking people to reaffirm that they are supportive of the petition which I mailed to Legislators on 1-13-77.

Whatever the outcome of all these petitions, it should be obvious that grassroots democracy is presently flourishing in the Seward area, and a very healthy climate now exists for a Local Boundary Commission hearing on any proposed annexation attempts by the City of Seward. This climate did not exist last May 21st when the LBC was here, as witnessed by the very small turnout for that hearing. At the very least we are entitled to another public hearing on this highly controversial matter. The Local Boundary Commission recommendation should be overturned.

PS: THE ABOVE MENTIONED PETITION BY WILLARD MIDBY (AND ED ZIMMERMAN) IN SUPPORT OF MY PETITION ALREADY HAS NEARLY 200 SIGNATURES. 1/31/77

Sincerely,

Thomas Taggart

"Don't annex" say voters

THE SEWARD PHOENIX LOG

Vol. XI. No. 7 * Thursday, November 4, 1976 * Seward, Alaska 99664 * Price: 20 Cents

Results of an annexation straw poll taken during the state and federal election Tuesday showed conclusively that people both inside and outside the city limits of Seward reject annexation of both the Lowell Point area (south portion), and the Bear Creek, Salmon Creek area (north portion). Annexation of the two areas was considered by the City to help bring about planned and orderly growth of the entire Seward area. Mayor Neve, some members of Council and the city administration feel that the Gulf of Alaska oil exploration and drilling will greatly impact the community and fear that unplanned growth might be dangerous to the entire area.

The people, however, expressed definitely negative feelings about annexation--at least at this time. The vote was not a formal one, but conducted in conjunction with the election in progress and drew "poll watchers" from the outlying areas where residents are adamently opposed to annexation.

Seward Precinct 1 voted 71 yes to 115 no on annexation of the Lowell Point area, and 63 yes and 124 no on the north portion annexation. Seward Precinct 2 voted 119 yes to 215 no on Lowell Point, 102 yes and 234 no on annexation of the Bear Creek, Salmon Creek area. As might be expected, Bear Creek Precinct voters turned out in force and expressed more disfavor toward annexation than their neighbors inside the city. Bear Creek tallies were 35 yes to 164 no for Lowell Point annexation and 13 yes to 192 no on the Bear Creek, Salmon Creek proposal.

The vote followed two months of controversy and meetings between the Council and representatives of the people residing outside the city limits. An aggressive anti-annexation campaign had been waged the last week by the Bear Creek League, as some of the outside city residents call

Area follows statewide trend in balloting

Fifty four percent of the registered voters turned out in Seward Precincts 1 and 2 to vote in the federal and state election held Tuesday. Area voters followed closely the state trends, supporting President Ford and Congressman Don Young and voting along state lines for the various bonds and propositions on the ballot.

The two Seward precincts and Bear Creek precinct gave President Ford 403 votes to 289 for Jimmy Carter. Libertarian candidate MacBride received 52 votes.

Area voters gave Congressman Don Young 556 votes to 196 for Eben Hobson in Hobson's bid to unseat Young.

State Senator Jalmar Kerttula got a healthy 547 votes to Jean Marsh's 191. Running unopposed to retain his seat as this District's representative in the Legislature, Keith Specking received 626 votes.

Area voters gave Willow the most votes for the capital relocation site with 420 votes to 124 for Larson Lake and 96 for Mount Yenlo.

Proposition No. 1, "Action on

Teachers to vote bargaining agent

by Katherine Parker

With the Board in the middle, and the Kenai Peninsula Education Association and Kenai Peninsula Federation of Teachers vying to represent the teachers as bargaining agent, the Board's arrangements for an election November 4 left nobody happy at the School Board meeting Monday night.

An executive session to consider a grievance from KPEA brought a protest from attorney Ted Carson, representing the KPFT, who asked that the KPFT join the session since the grievance pertained to the election. Though the grievance concerned neither borough finances or personalities, the contract agreement with KPEA provides for closed- in matters of

Tom Murphy, KPEA president, first asked the Board to hold off on setting an election until July 1977 "as per the negotiations agreement with KPEA." After a motion was passed for the election, he then asked that the election be held in abeyance until "adequate appeal of the grievance and resolution is accomplished," referring to a third-party appeal and resolution.

The Board, however, also rejected this request.

As set up the teachers would vote from 3 p.m. to 6 p.m. with Borough Clerk Frances Brymer in charge of the election.

All principals and administrators would be voting with a yellow ballot, as their right to be part of the election as KPEA members has been challenged by the KPFT. This would make it handy to discount these ballots should this legal technicality later be decided in favor of the KPFT. On the other hand, the KPEA has

teacher-of-the-year was selected.

By reducing the hallway area including the foyer, and providing an elevator rather than ramps for handicapped use of the second floor, the $650,000 was subtracted from the $2.8 million plan for expanding the school.

Though the administration felt the original plan was legitimate as the first phase for the 9-classroom project, allowing for later additions, the reduced cost "could make a difference in whether the project passes the bond issue," said Supt. Paul Gallaher. "The savings could be translated into additional construction in the Homer area," he added.

A Mr. Hackett, architect on the Homer Hospital, said, "There is a lot of sentiment in Homer about completion of the middle school."

Keith Simons, a teacher at the Bob Bartlett school in Tyonek for the past seven years, was named the Borough's teacher of the year

Testimony regarding Seward land annexation

To be submitted in a hearing, January 31, 1977:

Friends of the Earth opposes annexation of the area known as "Fourth of July Creek" by the City of Seward.

The Alaska Department of Fish and Game, in its publication "Alaska's Wildlife and Habitat" has recommended this area and similar landforms within the game management unit as essential habitat for black bear. Also, the offshore waters provide habitat for several species of marine mammals.

We oppose the change in land status because the wildlife values in the area are best protected by leaving the land in a natural state.

Juneau, Ak. 99811

Dear Hugh:

The Boundary Commission has recommended that the City of Seward be allowed to annex an area known as 4th of July Creek. This matter goes to the legislature to be either approved or disapproved.

The members of the Kachemak Bay Conservation Society recognize that the 4th of July Creek area is highly valuable for ~~salmon spawning~~, black bear habitat, and recreational use, and that it is being considered for critical habitat status. We do not believe that its best use is for annexation and industrial development.

In addition, the Boundary Commission's decision apparently contains some erroneous statements regarding testimony at a public hearing, and we believe that its recommendations are contrary to the will of the citizens of Seward and the surrounding area.

To disapprove this boundary change, a resolution passed by both houses is necessary. We ask that you sponsor such a resolution and give it your strong support.

Sincerely,

Nancy Lord
President

Letter to Editor

The citizens of Seward will be given the opportunity to voice their opinion via the ballot box on November 2 showing how they feel about the city's present plans on annexation..

As a member of the City Council I would of neccessity weigh the outcome very seriously if the citizens were properly informed on this issue. At the moment I'm convinced they are not, because I do not believe the city has addressed itself to all the pro's and con's of this most ambitious move on the part of the city of Seward since its founding.

The proposed annexation to the south of the city, if successful, represents an area at least three times as large as our present boundaries; a large part of which is vertical coastline. Very little of this can be utilized by industry or residents.

I shudder to think of a school bus full of children traveling over the present road during the spring because of snowslides. What would be the city's legal position if a severe accident did happen? Heck! I wouldn't permit a child of mine to travel the present road come next spring. If we assume responsibility and attempt to bring it up to first class status, it could be a severe financial drain that would threaten the city's bonding position. At present, we have other problem of a much higher priority.

The city may be successful in annexing this area because there are few residents to oppose it; however, I feel we will impoverish the city for years to come if we do.

The area to the north upon which the city has been slathering for as long as ten years is a potential powder keg of dissent. When they raise the oft repeated question; what's in it for us, there seems to be no reasonable answers.

At present I don't believe the city can tell these prospective new citizens what their taxes might be. Will they have additional fire protection? Will trailers still be permitted? How about the city's present ordinance on animals; will it apply equally? Will the electric surcharge be dropped? Who will maintain the roads in the area? How much additional revenue will be generated for the city? Will it purchase additional street maintenance equipment? Can it support more police officers? Can our present ordinances have a double standard? I don't think they can nor should they.

Until it was recently agreed upon to give the citizens of Seward a chance to vote on this issue I felt we were holding every citizen in contempt, they may not favor this power play.

I feel our present course is not based upon sound reasoning and business sense. It can do nothing but self destruct if finalized. We have failed to get our facts up front. Our desire to complete this move is based entirely upon what a few think or hope will happen. At present there are no firm commitments in hand. The negative side of this issue is right up front. We cannot afford it at this time. We have not convinced many that we can, nor have we established a critical need to do so.

If at this late date annexation is not the topic of the day we had better turn off the T.V. and get turned on about what's happening here in town. I admit the city may acquire a few more assets, but frankly it's our added liabilities that scare me to death. If you are not up to date on annexation I suggest you pick up the phone and call your Council people. Call anyone except me. Shucks, I'm still trying to find something out myself.

Respectfully,
Bill Vincent

I. INTRODUCTION

This report is an attempt to identify the geologic factors which should be considered in planning for potential on-shore facilities in upper Resurrection Bay. The report is based on a review of the available literature and a brief inspection of sites near the head of Resurrection Bay by DGGS personnel.

THE 4 SITES ARE: (1) 4TH OF JULY (2) T... (3) L. HELL PT (4) END OF BAY

The essence of this report is that significant geologic constraints, in particular submarine slope stability and potential for inundation by seawaves, are present at 4 of the 5 sites considered here. As indicated by the tables in Section VI, there are presently not adequate data available for many of the geologic factors upon which to base site-specific conclusions regarding potential effects of the geologic factors on construction and operations at the sites. However, it is not the intent of this report to recommend or imply that planning for utilization of lands adjacent to upper Resurrection Bay cannot be undertaken due to geologic factors. Rather, the purpose of the report is to list the geologic factors which should be considered during planning, and to suggest where additional data are required for a more complete evaluation of each factor.

II. SCOPE AND PURPOSE OF REPORT

Two Division of Geological and Geophysical Surveys personnel visited upper Resurrection Bay to inspect potential sites of on-shore facilities for three days in October of 1976. The investigation was undertaken at the request of the Department of Community and Regional Affairs, State of Alaska. The Survey team drove to Seward; site inspections were carried out on foot, and an overflight of the coastline was made by air charter. Due to limitations of time and of legal access, most inspections were confined to the beaches and to existing roads.

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MINUTES

February 7, 1978

Present: Chairman Orsini, Senators Willis, Hackney and Sumner. Wm. K. Mearig; J.R. Floden; Frances G. Westre; David A. Moffat; Gene Owens; Sigvald J. Strandberg; Erick J. Simpson; Sunny A. Hick; Gertrude Lyons; Lars Eide; Ed Lapeyri; James F. Petersen; Annette Smith; Bruce Aronson.

Absent: Senator Ferguson

Chairman Orsini convened the hearings at 3:15 PM. He announced that the Committee would take testimony on SJR 38, 39 &40 but would take no action on the resolutions that day.

SJR 39 (Proposed Annexation by Haines Borough):

Chairman Orsini asked Sigvald Strandberg, Chairman of the Boundary Commission, to give the circumstances behind the proposed annexation of land on which stood fuel tanks formerly operated by the military. Mr. Strandberg described the action as pro forma in nature to allow the Haines Borough to eliminate a pocket of non-borough land inside its borders. He explained that the final disposition of tank farm property, which would be handled by the General Services Administration, would not be affected by the Borough's action and that the military had not objected to the proposed annexation. Mr. Strandberg also stated that no objections had been made by members of the public during the Boundary Commission's hearings in Haines. No one else wished to testify on SJR 39 and Chairman Orsini closed the hearings on the resolution.

SJR 38 (Proposed Annexation by the City of Skagway):

Mr. Strandberg noted that the City of Skagway originally requested [illegible] to extend its boundary to the Canadian border and that of the Haines Borough. He noted that this raised the question in the Boundary Commission's opinion of what properly constituted city government versus that of a borough. The Commission therefore recommended a smaller extention of the City's boundaries and informed the City that it could, if conditions warrented, petition the Commission in the future to move its jurisdiction to the Canadian border. The City of Skagway supported this action by the Commission and agreed with the recommendation. Strandberg acknowledged that public testimony by persons residing outside the present City boundaries was opposed to annexations since they believed that they were already paying for municipal services through the sales tax. In response to questions from Committee members, he said that the Commission had not considered the inclusion of the Dyea area into the City of Skagway and that such an action would require ~~that it~~ SEPARATE Commission action.

William Ruddy, an attorney representing the City of Skagway, said that public opposition had been expressed to the proposed annexation but that it was not organized.

jointly. Mr. Mearig stated that the 1975 annexation vote concerned the proposed annexation of West Petersburg, which has now incorporated separately as the City of Kupreanof, and did not pertain to the present recommendation. He noted that the Environmental Protection Agency was requiring the extension of sewer and water facilities to outlying areas. Either the City of Petersburg would provide these services or they would be mandated at the state or federal level. In response to questions from the Committee members, Mearig concurred that Petersburg's economic future lay with fishing and stated that any expansion of fishing facilities would probably occur at the four plants currently within the City's boundaries. Because of environmental and esthetic concerns, little or no development is likely to take place in the Narrows. He commented that strictly speaking it was illegal for the City to provide municipal services to the outlying area.

James Petersen, the attorney representing the plaintiffs in the court suit opposing the proposed annexation, testified that his clients opposed the annexation on the grounds that insufficient study had been given to the revenue, tax burden, and expense of the action. He stated that the original petition requesting annexation had been hastily put together and that the municipal ordinance had had its first reading with no public input. The second and third readings took place on the same night. Studies were lacking on population density, cost of police protection, cost of water and sewer facilities, and cost of electric power extension. Petersen said that his clients were not opposed to annexation per se and believed that the establishment of a service district (outside of the municipal boundary) could provide a viable solution. He emphasized that it was not only residents of outlying areas who opposed annexation but the residents of the City as well.

Frances Westre testified, as a member of the Petersburg City Council, that the Council had unanimously approved the proposed annexation as being in the best interests of the community of Petersburg and its environs. She said that the apparent haste in acting upon the petition was due to the legal requirement to submit all annexation recommendations to the Legislature by the tenth day of session. She pointed out that Petersburg and Wrangel were jointly studying a proposal for hydroelectric development in the Thomas Bay area that would provide relatively inexpensive power for economic development ~~in the area~~. Ms. Westre said that Bruce Aronson of the Department of Community and Regional Affairs had originally raised the annexation question in Petersburg several years ago.

Lars Eide read to the Committee a letter he sent on December 12, 1977, to Commissioner of Community and Regional Affairs Lee McAnerney protesting the proposed annexation as contrary to the wishes of the majority of the people of Petersburg. He stated he was part owner of Mitkof Lumber Company which employes approximately 23 persons about 75% of whom lived in the City and 90% of the company's production was exported.

THAT ABOUT

David Moffat, City Manager of Petersburg, said that the impetus for annexation had originated from residents in the outlying areas and that he had heard of little opposition to the proposal from within the City. He noted that, without the existence of the City of Petersburg, it would be unlikely that industries outside city limits would have located in the area. Moffat pointed out that the City has a

In the absence of further public testimony, Chairman Orsini closed the hearings on the resolution.

SJR 40 (Proposed Annexation by the City of Petersburg):

Mr. Strandberg said that public hearings had been held by the Commission in Petersburg January 9 before an overflow crowd with the testimony being broadcast live over the local radio station. On January 16 the commissioners held a telephonic conference and approved a recommendation for the extension of the City of Petersburg boundary.

He explained that the Commission's recommendation called for the city boundary to be extended only over the northern portion of Mitkof Island, an area of approximately 45 square miles. The City had originally petitioned for the annexation of all Mitkof Island, an area of approximately 211 square miles. Mr. Strandberg said that the Commission respected the City's reasons for the larger request, which included concerns about Coastal Management and municipal selection of state lands. He said that this again raised the question of borough versus city government and that the Commission had recommended an area for annexation that would take in almost all residents, but not all the territory, of Mitkof Island. He noted that, in the Commission's view, the natural development of the City of Petersburg lay along Mitkof Highway and that the outlying areas did benefit from municipal services. The incorporation of this area would remove the present tax inequity between the residents of the City and the outlying district. Mr. Strandberg pointed out that the City of Petersburg has a narrow tax base, but a fairly heavy bonded indebtedness. The 2,126 City residents have a bonded indebtedness of $3.7 million against a property valuation of $34 million. This gives the City a debt/valuation ratio of approximately 11% as opposed to a 5.4% ratio for the City and Borough of Juneau and 3% for the City of Ketchikan. He noted that there were considerable private land holdings south of Peterburg along the Mitkof Highway.

In response to questions from Committee members, Mr. Strandberg made the following comments: The City indicated that it would assess one-half, or 7 mills, of the present City mill rate against the residents of the outlying area for the first year after annexation. Petersburg City Councilmen run at large and therefore there would be no Council seat per se representing the annexed outlying area. During the public hearings in Petersburg, public sentiment ran about four to one against annexation. The August 26, 1975, election during which City voters rejected annexation was a straw vote on another proposed annexation and for which sketchy data had been gathered in regard to potential tax revenues. Service areas in the Unorganized Borough could be established by the Legislature only if the same services could not be provided by annexation to existing local governments.

The vote of the Commission had been three to one for the proposed annexation. Children in the outlying area presently attend City schools which receive tuition payments from the State. The economic future of Petersburg lies fishing and some logging. Industry would find it attractive to locate in the outlying area following annexation.

William Ruddy, the attorney representing the City of Petersburg, and William Mearig, representing the Petersburg city government, testified

of Petersburg currently lives outside the city limits. This means that those inside the city pay 19% more for municipal services than their just share, while those outside pay 19% less. Mr. Floden said that without the extension of planning and zoning powers to the present outlying areas they were likely to develop in a haphazard manner leading to severe water and sewage problems in the future. There were instances in the outlying area where land was being subdivided into ~~very small~~ lots too small handle on-site sewage and water. Mr. Floden said that the City's goal in the annexed area would be to maintain large lots so as to prevent the need to establish sewer and water lines to high density residential and commercial dwellings. Additionally the projected linkage of Mitkof Highway with a proposed Stikine Highway could result in unrestrained commercial development of gas stations, drive-ins, etc. along the way unless proper planning and zoning authority existed to control it. In response to Committee members' questions, he said he believed a comprehensive community development plan for Petersburg had been prepared in 1965/66.

Gertrude Lyons, a plaintiff in the court suit against the proposed annexation and a member of the Board of Directors of the Petersburg Indian Association, testified that the increased costs association with the extension of services to outlying areas would work an undue hardship on Native residents of Petersburg who were primarily dependent upon seasonal employment. Ms. Lyons said that the membership of the Petersburg Indian Association was approximately 185 adult persons and that the Association was the combined organization for the Tlingit-Haida Central Council, the Alaska Native Brotherhood, the Alaska Native Sisterhood, and Sealaska Corporation.

Sunny Hicks, a resident of the Petersburg area and opponent of the proposed annexation, characterized the community atmosphere of Petersburg as a "local Watergate situation" where neighbors were divided against one another and conversations were surreptitiously recorded. She believed that local animosities had been inflamed by the City's handling of the annexation petition. She stressed that the residents of the outlying area considered themselves to be members of the general Petersburg community and were willing to assume their share for local services. She questioned whether the City was capable of efficiently carrying out its present obligations, much less undertake more extensive ones without the compensation of major new revenues.

William Mearig requested to testify a second time to present his views as a private citizen in addition to his capacity as a city official. He said that the proposed annexation offered outlying residents their first chance to participate in the political decisions affecting them locally, even in the absence of a separate election district for the area. He stated that participation in local government in such matters as Coastal Management offered residents more protection than if they remained unorganized and allowed either the State or federal government to impose regulations on them.

In the absence of further public testimony on SJR 40, Chairman Orsini concluded public hearings on the resolution and adjourned the Committee at 6:28 PM.

significant interest in exercising planning for Coastal Management for Mitkof Island as well as achieving a wider basis for future municipal selection of state land. He also noted that the possibility of a deep water port had been studied for the southern tip of Mitkof Island.

Ed Lapeyri, a resident and General Manager of Mitkoff Lumber Company, a plaintiff in a court suit against the annexation, testified that outlying residents did not receive municipal services for wohich they did not pay. He stated that residents outside city limits paid a 15% surcharge for electricity and a 50% surcharge for water. As for fire protection, the State paid the City $7.50 per capita for residents outside City limits. He submitted to the Committee the following petition signed by 543 residents of the general Petersburg area:

"WE, THE UNDERSIGNED, BEING CITIZENS OF MITKOF ISLAND, BOTH INSIDE AND OUTSIDE THE PRESENT CITY LIMITS OF PETERSBURG, ARE STRONGLY OPPOSED TO THE PROPOSED ANNEXATION TO PETERSBURG AT THIS TIME DUE TO THE METHODS USED BY THE CITY IN DIRECT OPPOSITION TO THE DESIRES OF THE MAJORITY OF THE CITIZENS AND BECAUSE OF ERRORS IN THE FIGURES PRESENTED TO THE LOCAL BOUNDARY COMMISSION AND THE FAILURE BY THE CITY TO PROPERLY RESEARCH AND DOCUMENT THE ECONOMIC CHANGES SUCH ANNEXATION WOULD PRESENT TO THE CITY RESIDENTS AND THOSE IN THE ADJOINING PROPOSED AREAS. WE ARE EXTREMELY CONCERNED IN THE MANNER IN WHICH THE CITY HAS PRESENTED THIS ANNEXATION WITHOUT PROPER PUBLIC INPUT. WE ALSO PETITION THE HOUSE AND SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEES TO HOLD A JOINT HEARING IN PETERSBURG IN ORDER TO OBTAIN THE TRUE FACTS AND PUBLIC INPUT REGARDING THIS PROPOSED ANNEXATION."

Mr. Lapeyri said that these signatures were obtained within three days last week and that every reasonable effort was made to insure that resident adults were the only persons who signed. He told the Committee that of the 543 petition signers, 193 lived outside the City and 350 lived within the City limits.

Mr. Lapeyri charged that during the City Council deliberations on the annexation petition, a show of hands indicated that only 11 of the 98 persons present supported annexation and that, of the 6 who testified in favor of the measure, four were city employees or relatives of Council members. He said that real property valuation for the 1975 proposed annexation was $6.3 million and in 1977 only $6.7 million for a slightly different area. He also cited an unidentified study undertaken by a local private firm that indicated no significant economic development in Petersburg in the future. In response to Committee members' questions he acknowledged that fishing was considerably more important economically to Petersburg than logging which he characterized as "shakey".

Gene Owens, a resident of Petersburg, testified in support of the proposed annexation . He stressed that the State had consistently urged localities to assume local government control in the Unorganized Borough in such matters as Coastal Management planning. Mr. Owens said that the annexation of land on Mitkof Island by Petersburg was consistent with that objective.

John Floden, city engineer for Petersburg, spoke in favor of the annexation recommendation and pointed out that the City had basically proposed a service area concept. He noted that 19% of the population

said that public hearings had been held by the Commission in Petersburg January 9 before an overflow crowd with the testimony being broadcast live over the local radio station. On January 16 the commisioners held a telephonic conference and approved a recommendation for the extension of the City of Petersburg boundary.

He explained that the Commission's recommendation called for the city boundary to be extended only over the northern portion of Mitkof Island an area of approximately 45 square miles. The City had originally petitioned for the annexation of all Mitkof Island, an area of approximately 211 square miles. Mr. Strandberg said that the Commission

AMENDMENT

SENATE JOINT RESOLUTION NO. 30

BY ORSINI

To page 1 line 13, after the second period add the following:

Regular sessions are limited to ninety days. The legislature may extend the session for a period not to exceed twenty days by a concurrent resolution approved by a majority vote of the membership of each house; and an additional period not to exceed ten days by a concurrent resolution approved by a two-thirds majority vote of the membership of each house.

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MINUTES

FEBRUARY 7, 1978

Present: Chairman Orsini, Senators Willis, Hackney and Sumner. Wm. K. Mearig; J. R. Floden; Frances G. Westre; David A. Moffat; Gene Owens; Sigvald J. Strandberg; Erick J. Simpson; Sunny A. Hick; Gertrude Lyons; Lars Eide; Ed Lapeyri; James F. Petersen; Annette Smith; Bruce Aronson.

Absent: Senator Ferguson

Chairman Orsini convened the hearings at 3:15 PM. He announced that the Committee would take testimony on SJR 38, 29 & 40 but would take no action on the resolutions that day.

SJR 39 (Proposed Annexation by Haines Borough):

Chairman Orsini asked Sigvald Strandberg, Chairman of the Boundary Commission, to give the circumstances behind the proposed annexation of land on which stood fuel tankds formerly operated by the military. Mr. Strandberg described the action as pro forma in nature to allow the Haines Borough to eliminate a pocket of non-borough land inside its borders. He explained that the final disposition of tank farm property, which would be handled by the General Services Administration, would not be affected by the Borough's action and that the military had not objected to the proposed annexation. Mr. Strandberg also stated that no objections had been made by members of the public during the Boundary Commission's hearings in Haines. No one else wished to testify on SJR 39 and Chairman Orsini closed the hearings on the resolution.

SJR 38 (Proposed Annexation by the City of Skagway):

Mr. Strandberg noted that the City of Skagway originally requested to extend its boundary to the Canadian border and that of the Haines Borough. He noted that this raised the question in the Boundary Commission's opinion of what properly constituted city government versus that of a borough. The Commission therefore recommended a smaller extention of the City's boundaries and informed the City that it could, if conditions warrented, petition the Commission in the future to move its jurisdiction to the Canadian border. The City of Skagway supported this action by the Commission and agreed with the recommendation. Strandberg acknowledged that public testimony by persons residing outside the present City boundaries was opposed to annexations since they believed that they were already paying for municipal services through the sales tax. In response to questions from Committee members, he said that the Commission had not considered the inclusion of the Dyea area into the City of Skagway and that such an action would require separate Commission action.

William Ruddy, an attorney representing the City of Skagway, said that public opposition had been expressed to the proposed annexation but that it was not organized.

In the absence of further public testimony, Chairman Orsini closed the hearings on the resolution.

SJR 40 (Proposed Annexation by the City of Petersburg):

Mr. Strandberg said that public hearings had been held by the Commission in Petersburg January 9 before an overflow crowd with the testimony being broadcast live over the local radio station. On January 16 the commissioners held a telephonic conference and approved a recommendation for the extension of the City of Petersburg boundary.

He explained that the Commission's recommendation called for the city boundary to be extended only over the northern portion of Mitkof Island, an area of approximately 45 square miles. The City had originally petitioned for the annexation of all Mitkof Island, an area of approximately 211 square miles. Mr. Strandberg said that the Commission respected the City's reasons for the larger request, which included concerns about Coastal Management and municipal selection of state lands. He said that this again raised the question of borough versus city government and that the Commission had recommended an area for annexation that would take in almost all residents, but not all the territory, of Mitkof Island. He noted that, in the Commission's view, the natural development of the City of Petersburg lay along Mitkof Highway and that the outlying areas did benefit from municipal services. The incorporation of this area would remove the present tax inequity between the residents of the City and the outlying district. Mr. Strandberg pointed out that the City of Petersburg has a narrow tax base, but a fairly heavy bonded indebtedness. The 2,126 City residents have a bonded indebtedness of $3.7 million against a property valuation of $34 million. Thsi gives the City a debt/valuation ratio of approximately 11% as opposed to a 5.4% ratio for the City and Borough of Juneau and 3% for the City of Ketchikan. He noted that there were considerable private land holdings south of Petersburg along the Mitkof Highway.

In response to questions from Committee members, Mr. Strandberg made the following comments: The City indicated that it would assess one-half, or 7 mills, of the present City mill rate against the residents of the outlying area for the first year after annexation. Petersburg City Councilmen run at large and therefore there would be no council seat per se representing the annexed outlying area. During the public hearings in Petersburg, public sentiment ran about four to one against annexation. The August 26, 1975, election during which City voters rejected annexation was a straw vote on another proposed annexation and for which sketchy data had been gathered in regard to potential tax revenues. Service areas in the unorganized Borough could be established by the Legislature only if the same services could not be provided by annexation to existing local governments.

The vote of the Commission had been three to one for the proposed annexation. Children in the outlying area presently attend City schools which receive tuition payments from the State. The economic future of Petersburg lies fishing and some logging. Industry would find it attractive to locate in the outlying area following annexation.

William Ruddy, the attorney representing the City of Petersburg, and William Mearig, representing the Petersburg city government, testified

jointly. Mr. Mearig stated that the 1975 annexation vote concerned the proposed annexation of West Petersburg, which has now incorporated separately as the City of Kupreanof, and did not pertain to the present recommendation. He noted that the Environmental Protection Agency was requiring the extension of sewer and water facilities to outlying areas. Either the City of Petersburg would provide these services or they would be mandated at the state or federal level. In response to questions from the Committee members, Mearig concurred that Petersburg's economic future lay with fishing and stated that any expansion of fishing facilities would probably occur at the four plants currently within the City's boundaries. Because of environmental and esthetic concerns, little or no development is likely to take place in the Narrows. He commented that strictly speaking it was illegal for the City to provide municipal services to the outlying area.

James Petersen, the attorney representing the plaintiffs in the court suit opposing the proposed annexation, testified that his clients opposed the annexation on the grounds that insufficient study had been given to the revenue, tax burden, and expense of the action. He stated that the original petition requesting annexation had been hastily put together and that the municipal ordinance had had its first reading with no public input. The second and third readings took place on the same night. Studies were lacking on population density, cost of police protection, cost of water and sewer facilities, and cost of electric power extension. Peterson said that his clients were not opposed to annexation per se and believed that the establishment of a service district (outside of the municipal boundary) could provide a viable solution. He emphasized that it was not only residents of outlying areas who opposed annexation but the residents of the City as well.

Frances Westre testified, as a member of the Petersburg City Council, that the Council had unanimously approved the proposed annexation as being in the best interests of the community of Petersburg and its environs. She said that the apparent haste in acting upon the petition was due to the legal requirement to submit all annexation recommendations to the Legislature by the tenth day of session. She pointed out that Petersburg and Wrangel were jointly studying a proposal for hydroelectric development in the Thomas Bay area that would provide relatively inexpensive power for economic development in the area. Ms. Westre said that Bruce Aronson of the Department of Community and Regional Affairs had originally raised the annexation question in Petersburg several years ago.

Lars Eide read to the Committee a letter he sent on December 12, 1977, to Commissioner of Community and Regional Affairs Lee McAnerney protesting the proposed annexation as contrary to the wishes of the majority of the people of Petersburg. He stated he was part owner of Mitkof Lumber Company which employes approximately 23 persons about 75% of whom lived in the City and 90% of the company's production was exported.

David Moffat, City Manager of Petersburg, said that the impetus for annexation had originated from residents in the outlying areas and that he had heard of little opposition to the proposal from within the City. He noted that, without the existence of the City of Petersburg, it would be unlikely that industries outside city limits would have located in the area. Moffat pointed out that the City has a

significant interest in exercising planning for Coastal Management for Mitkof Island as well as achieving a wider basis for future municipal selection of state land. He also noted that the possibility of a deep water port had been studied for the southern tip of Mitkof Island.

Ed Lapeyri, a resident and General Manager of Mitkoff Lumber Company, a plaintiff in a court suit against the annexation, testified that outlying residents did not receive municipal services for wohich they did not pay. He stated that residents outside city limits paid a 15% surcharge for electricity and a 50% surcharge for water. As for fire protection, the State paid the City $7.50 per capita for residents outside City limits. He submitted to the Committee the following petition signed by 543 residents of the general Petersburg area:

"WE, THE UNDERSIGNED, BEING CITIZENS OF MITKOF ISLAND, BOTH INSIDE AND OUTSIDE THE PRESENT CITY LIMITS OF PETERSBURG, ARE STRONGLY OPPOSED TO THE PROPOSED ANNEXATION TO PETERSBURG AT THIS TIME DUE TO THE METHODS USED BY THE CITY IN DIRECT OPPOSITION TO THE DESIRES OF THE MAJORITY OF THE CITIZENS AND BECAUSE OF ERRORS IN THE FIGURES PRESENTED TO THE LOCAL BOUNDARY COMMISSION AND THE FAILURE BY THE CITY TO PROPERLY RESEARCH AND DOCUMENT THE ECONOMIC CHANGES SUCH ANNEXATION WOULD PRESENT TO THE CITY RESIDENTS AND THOSE IN THE ADJOINING PROPOSED AREAS. WE ARE EXTREMELY CONCERNED IN THE MANNER IN WHICH THE CITY HAS PRESENTED THIS ANNEXATION WITHOUT PROPER PUBLIC INPUT. WE ALSO PETITION THE HOUSE AND SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEES TO HOLD A JOINT HEARING IN PETERSBURG IN ORDER TO OBTAIN THE TRUE FACTS AND PUBLIC INPUT REGARDING THIS PROPOSED ANNEXATION."

Mr. Lapeyri said that these signatures were obtained within three days last week and that every reasonable effort was made to insure that resident adults were the only persons who signed. He told the Committee that of the 543 petition signers, 193 lived outside the City and 350 lived within the City limits.

Mr. Lapeyri charged that during the City Council deliberations on the annexation petition, a show of hands indicated that only 11 of the 98 persons present supported annexation and that, of the 6 who testified in favor of the measure, four were city employees or relatives of Council members. He said that real property valuation for the 1975 proposed annexation was $6.3 million and in 1977 only $6.7 million for a slightly different area. He also cited an unidentified study undertaken by a local private firm that indicated no significant economic development in Petersburg in the future. In response to Committee members' questions he acknowledged that fishing was considerably more important economically to Petersburg than logging which he characterized as "shakey".

Gene Owens, a resident of Petersburg, testified in support of the proposed annexation . He stressed that the State had consistently urged localities to assume local government control in the Unorganized Borough in such matters as Coastal Management planning. Mr. Owens said that the annexation of land on Mitkof Island by Petersburg was consistent with that objective.

John Floden, city engineer for Petersburg, spoke in favor of the annexation recommendation and pointed out that the City had basically proposed a service area concept. He noted that 19% of the population

of Petersburg currently lives outside the city limits. This meant that those inside the city pay 19% more for municipal services than thier just share, while those outside pay 19% less. Mr. Floden said that without the extension of planning and zoning powers to the present outlying areas they were likely to develop in a haphazard manner leading to severe water and sewage problems in the future. There were instances in the outlying area where land was being subdivided into lots too small handle onsite sewage and water. Mr. Floden said that the City's goal in the annexed area would be to maintain large lots so as to prevent the need to establish sewer and water lines to high density residential and commercial dwellings. Additionally the projected linkage of Mitkof Highway with a proposed Stikine Highway could result in unrestrained commercial development of gas stations, drive-ins, etc. along the way unless proper planning and zoning authority existed to control it. In response to Committee members' questions, he said he believed a comprehensive community development plan for Petersburg had been prepared in 1965/66.

Gertrude Lyons, a plaintiff in the court suite against the proposed annexation and a member of the Board of Directors of the Petersburg Indian Association, testified that the increased costs association with the extension of services to outlying areas would work an undue hardship on Native residents of Petersburg who were primarily dependent upon seasonal employment. Ms. Lyons said that the membership of the Petersburg Indian Association was approximately 185 adult persons and that the Association was the combined organization for the Tlingit-Haida Central Council, the Alaska Native Brotherhood, the Alaska Native Sisterhood, and Sealaska Corporation.

Sunny Hicks, a resident of the Petersburg area and opponent of the proposed annexation, characterized the community atmosphere of Petersburg as a "local Watergate situation" where neighbors were divided against one another and conversations were surreptitiously recorded. She believed that local animosities had been inflamed by the City's handling of the annexation petition. She stressed that the residents of the outlying area considered themselves to be members of the general Petersburg community and were willing to assume their share for local services. She questioned whether the City was capable of efficiently carrying out its present obligations, much less undertake more extensive ones without the compensation of major new revenues.

William Mearig requested to testify a second time to present his views as a private citizen in addition to his capacity as a city official. He said that the proposed annexation offered outlying residents their first chance to participate in the political decisions affecting them locally, even in the absence of a separate election district for the area. He stated that participation in local government in such matters as Coastal Management offered residents more protection than if they remained unorganized and allowed either the State or federal government to impose regulations on them.

In the absence of further public testimony on SJR 40, Chairman Orsini concluded public hearings on the resolution and adjourned the Committee at 6:28 PM.

AN OPEN LETTER TO

THE STATE LEGISLATURE

SKAGWAY IS AN IMPORTANT GATEWAY & RICH IN HISTORICAL AND OTHER POTENTIALITIES - PAST, PRESENT AND FUTURE.

UNFORTUNATELY IT IS IN AN UNORGANIZED BOROUGH, WITH BUT A SMALL PORTION OF THE AREA BEING AN ORGANIZED CITY.

THE PROBLEMS ARE SO COMPLEX THAT THE PRESENT RECOMMENDATIONS FOR ANNEXING A SMALL PORTION OF THE AREA INTO THE CITY DOESN'T GO FAR ENOUGH; THE NUMBER OF PERSONS LIVING OUTSIDE THE CITY MAKES IT A GROWING PROBLEM TO GET TOGETHER WITH THE CITY AND AGREE ON AN APPROVED PLAN FOR COMMERCIAL AND PERSONAL USE OF THE VALUABLE & NEEDED WATERFRONT OUTSIDE OF THE CITY; PLUS OTHER PROBLEMS OF: MORE VISITORS; A NEW HIGHWAY TO ALASKA HIGHWAY; THE NEW NATIONAL PARK; A SUBSTANTIAL GROWTH AND DEVELOPMENT OF OIL & OTHER MINERALS IN YUKON AND NORTHWESTERN BRITISH COLUMBIA PORTIONS OF CANADA.

IT WOULD PRESENTLY APPEAR IMPOSSIBLE FOR THE STATE GOVERNMENT TO RESOLVE IMPORTANT MATTERS FOR THE COMMON GOOD OF THE AREA & ALASKA, WITH THE GROWING, DIVERGENT VIEWS OF PERSONS BOTH WITHIN AND WITHOUT THE CITY.

IT IS, THEREFORE, RECOMMENDED THAT THE LEGISLATURE APPOINT A TASK FORCE COMMITTEE TO INVESTIGATE THIS UNFORTUNATE SITUATION TO ENDEAVOR TO COME UP WITH RECOMMENDATIONS WHICH WOULD BE TO THE BEST INTERESTS OF THE AREA, THE STATE AND THAT OF OUR CANADIAN NEIGHBORS.

IN SHORT: PLEASE DO NOT LET US BE LOCKED UP IN SUCH A WAY THAT WOULD HINDER THE GREATEST AND BEST USE FOR VISITOR AND COMMERCIAL PURPOSES KEEPING MIND THAT SKAGWAY HAS BEEN AN IMPORTANT GATEWAY FOR CANADIAN VISITORS AND OTHER BUSINESS FOR 79 YEARS, AND THE IMMEDIATE FUTURE PROSPECTS FOR GREATLY IMPROVED VISITOR & BUSINESS USE FROM THIS SOURCE ARE A. THE NEW HIGHWAY, THE EXISTING RAILWAY & INCREASED AIR SERVICE IS SIGNIFICANT AND SHOULDN'T BE TAKEN LIGHTLY.

HAPPY NEW YEAR

We extend warm greetings for a happy,healthy and prosperous New Year!

We trust you can live with an irregular issue, or so, being a bit on the tardy side, as a business & vacation trip is mandatory.

May is feeling much better after her operation and appreciates the good wishes, flowers and cards.

We hope to increase our editions this year; give better local coverage; and present a better paper.

EDITORIAL WITH A PLEA! - - - - - - -

AN OPEN LETTER TO

THE STATE LEGISLATURE:

SKAGWAY IS AN IMPORTANT GATEWAY & RICH IN HISTORICAL AND OTHER POTENTIALITIES - PAST, PRESENT AND FUTURE.

UNFORTUNATELY IT IS IN AN UNORGANIZED BOROUGH, WITH BUT A SMALL PORTION OF THE AREA BEING AN ORGANIZED CITY.

GOODBYE "PRINCESS PATRICIA"

C.P.Rail announces that this will be the last year of the Alaska Cruise liner PRINCESS PATRICIA along the Inside Passage to Skagway as the ship's economic prospects make required major modifications prohibitive.

It is a sad day for the Yukon and Skagway to learn of this decision.

The PRINCESS LINES served the Inside Passage before, during and since the KLONDIKE GOLD RUSH of 1898. It was later named the B.C.C.S(British Columbia Coastal Service) of the Canadi

STAN. PATTY SAID SO!

Stan. Patty is a feature writer for The Seattle Times and is an authority on Alaska and adjacent Canada. He should be as his father was a former President of the University of Alaska and mining operator in Yukon.

He wrote a special article on Alaska in the Seattle Times, Sunday, January 8, 1978 and concluded with:

"CITIES(Alaskan) TO WATCH this year: Skagway, for one, with completion of the new highway soon into Carcross and the Yukon Territory, plus growth of the new Klondike Gold Rush National Park, Skagway will blossom."

Mr. Patty stated to this publisher that he expected to be in Skagway this summer and note how the Park Development was doing and ride across the new Highway.

SHOWS MERGE

The Day's of '98 Variety Show & the Soapy Show expect to merge for the summer season of 1978, according to recent reports. The '98 Show is sponsored by the Eagles and Eagles Auxiliarry, and has been off and on for over 50 years, while the "Soapy" Shows is about 5 years old, but which gave a realistic resume' of "Soapy" Smith, Skagway's most famous Gold Rush Character.

The Mighty Moose show is expected to operate agin this year, which will make two star attractions in 1978.

THE PROBLEMS ARE SO COMPLEX THAT THE PRESENT RECOMMENDATIONS FOR ANNEXING A SMALL PORTION OF THE AREA INTO THE CITY DOESN'T GO FAR ENOUGH; THE NUMBER OF PERSONS LIVING OUTSIDE THE CITY MAKES IT A GROWING PROBLEM TO GET TOGETHER WITH THE CITY AND AGREE ON AN APPROVED PLAN FOR COMMERCIAL AND PERSONAL USE OF THE VALUABLE & NEEDED WATERFRONT OUTSIDE OF THE CITY; PLUS OTHER PROBLEMS OF: MORE VISITORS; A NEW HIGHWAY TO ALASKA HIGHWAY; THE NEW NATIONAL PARK; A SUBSTANTIAL GROWTH AND DEVELOPMENT OF OIL & OTHER MINERALS IN YUKON AND NORTHWESTERN BRITISH COLUMBIA PORTIONS OF CANADA.

IT WOULD PRESENTLY APPEAR IMPOSSIBLE FOR THE STATE GOVERNMENT TO RESOLVE IMPORTANT MATTERS FOR THE COMMON GOOD OF THE AREA & ALASKA, WITH THE GROWING, DIVERGENT VIEWS OF PERSONS BOTH WITHIN AND WITHOUT THE CITY.

IT IS, THEREFORE, RECOMMENDED THAT THE LEGISLATURE APPOINT A TASK FORCE COMMITTEE TO INVESTIGATE THIS UNFORTUNATE SITUATION TO ENDEAVOR TO COME UP WITH RECOMMENDATIONS WHICH WOULD BE TO THE BEST INTERESTS OF THE AREA, THE STATE AND THAT OF OUR CANADIAN NEIGHBORS.

IN SHORT: PLEASE DO NOT LET US BE LOCKED UP IN SUCH A WAY THAT WOULD HINDER THE GREATEST AND BEST USE FOR VISITOR AND COMMERCIAL PURPOSES KEEPING MIND THAT SKAGWAY HAS BEEN AN IMPORTANT GATEWAY FOR CANADIAN VISITORS AND OTHER BUSINESS FOR 79 YEARS, AND THE IMMEDIATE FUTURE PROSPECTS FOR GREATLY IMPROVED VISITOR & BUSINESS USE FROM THIS SOURCE VIA. THE NEW HIGHWAY, THE EXISTING RAILWAY & INCREASED AIR SERVICE IS SIGNIFICANT AND SHOULDN'T BE TAKEN LIGHTLY.

Pacific Railway. (Reference: THE PRINCESS (Lines) STORY on sale in various Canadian Book Stores).

It is regretted that the Canadian Pacific will sacrifice the awakening Yukon missionary work that resulted in an attractive mineral and visitor appeal in the last frontier in Northwestern America.

We will miss the officers and other Ships' Personnel as well as the officials of the great Canadian Pacific Railway.

PRINCESS PATRICIA: Built 1949 at Govan, Scotland; Gross Tons-6,062; Speed-23.5, Crusing 18 knots; 374 feet long & 56 feet wide; 320 passengers & 90 crew; 152 cabins; Canadian Registry and Crew; Launched 10/5/48 by Princess Patricia (Lady Patricia Ramsay), daughter of Duke of Connaught; 6/16/49 Day ship on Tri-Caity service handling 2,000 passengers & 60 Cars; 5/31/63 Converted to Alaska Cruise Service; 1965-66 & 1966-67 under charter to Princess Cruises, Inc., for winter season Los Angeles-Acapulco.

HEALTH CARE

We were supposed to run a story showing what health care changes should be proposed for Skagway, but, the lateness of this edition precluded doing much about it. Contact Carl Mulvihill, local director of S.E. Alaska Health Systems Agency, who may be able to assist, although next meeting was (or is) at Ketchikan Jan. 21 & 22nd.

MOVE THE CAPITOL

A majority of Alaska's voters said move the Capitol between Anchorage & Fairbanks beeause Juneau is 2 time zones away, foggy most of the time,etc

While applyin-g the principal of using the constitutional convention as reason to buck the move, not enough people give a dam.

An effort is being made to vote on the cost of moving same. Maybe it will make it and maybe it won't.

Recent papers and other media carry stories that it will cost 2½ billion to effect such a move.

Governor Hammond is reported as stating he would set up shop in a tent, if necessary,to affect an early move.

MAYBE THE REAL ANSWER IS MAKE SOUTHEASTERN ALASKA the 51st State.

- - - - - - - - - - - - - - - - - - - -

WHAT'S DOING IN 1978!

1978 is expected to be a big Year in the North with more visitors, business development, more persons riding the Railway, more persons walking over Chilkoot Pass, more freight and more jobs.

The Gram Mine in Yukon,near Anvil, hopes to have a complete feasibility study finalized by April 1st: Millions are reported to have been spent so far

The White Pass & Yukon Railway is reported to have 57,600 advanced passenger reservations.

Hotels should be stocked; Carcross Road section of Klondike International Highway should be completed in late summer; more persons are expected to hike over Chilkoot Pass; more building should be seen and the proposed State & Local port development should be

Juliette Meville returned from Maine & Vermont.

Neila & Pat McNamara dropped into hospital to see May.

May(Coyne) is out of hospital & hopes to have continued on her originally scheduled trip, (by the time you read this).

D E D I C A T I O N

The Pioneer Square in Seattle symbolizes the area where many persons took off from headed for the Klondike Gold Fields at Dawson City, Yukon, Canada, via the Skagway and nearby Dyea gateways, from 1897 onward.

It is part of the Klondike Gold Rush Historical National Park.

The National Park Service is making arrangements to dedicate this important take-off spot and hope to finalize arrangements this year, according to Russell E. Dickensen, Regional Director of the National Park Service, Seattle.

Dick Larkin and Bill Feero dropped by and said hello(In Seattle).

Art. Tunley left Anchorage for Los Gatos, CA., and Phoenix.

The Donald Buttles were due to leave for Portland, Ore.

Ms. Elsie Buttles said the Assembly of God Church would like to thank local people for Hallowe'en Trick or Treat contributions for Alaska Youth Village in Juneau which was $130.39 of $250.00 sent that facility.

Peter Herpst of Skagway Band & Chorus has been nominated to "Who's Who in Music", a national organization Bx 2 29, Tuscaloosa, Alabama 35401.

IMPORTANT CITY BUSINESS SINCE JAN. 1st

The Chamber of Commerce is greatly concerned with the impact the pipeline through Canada will have on the City of Skagway.

On January 17, there was a Public HEW (Health, Education & Welfare) meeting. The purpose was to determine interest in establishing a Health Council for Skagway and area. The Health Council would consist of a group of people not actively involved in the medical profession, but attuned to local health needs and priorities.

Sewer and water projects are holding due to the cold weather. Streets and roads are being sanded as the wind permits. The City is aware of the slippery conditions, but the high winds make sanding difficult at times.

N E W C I T Y C L E R K

The Above Pix shows Jim.Arrington, new City Cker, City of Skagway suceeding Dee.Bolton, (who resigned to go into business).

Jim is former projects manager on newly constructed sewer and water projects and has a handle on local problems.

BIRTHS:

Sue & Robert Messegee produced a new voter, Emily Ann, at 1:10 a.m. on January 15th. The Mayor's new daughter weighed in at 9 lbs. 5 oz.

Let's talk...

about state property taxes.

P.S. PARKS-CANADA is expected to carry on the trails from U.S./Canadian Borders at Chilkot and White Passes near Skagway, and, have permanent commemorations at Bennett, B.C., on the White Pass & Yukon Railway, Whitehorse, and Dawson, where it all began, and where the Canadian Government is restoring historical buildings, sites, etc.

P.S. # 2. We are unoficially informed that the Province of British Columbia has taken a step towards co-operating in this permanent Klondike Gold Rush Historical Effort.

Q *I read where the owners of the trans-Alaska pipeline made the highest property tax payment to the State of Alaska that has ever been made to any taxing jurisdiction. Do all businesses in Alaska pay a State property tax?*

A No. Only oil and gas related property in Alaska is subject to property taxes at the State level. Until recent years, property taxes in Alaska were assessed and collected only at the local (municipal) level. This system still applies to all property except petroleum industry properties. The 1973 Special Session of the Legislature enacted what is commonly referred to as the "20-Mill Hardware Tax," which became effective January 1, 1974. Properties taxable under this law include virtually all facilities and equipment used in Alaska for oil and gas exploration, production and pipeline transportation. This special law enabled the State to begin taxing the oil industry for its Prudhoe Bay and pipeline facilities three years before production began.

Q *Are cities and boroughs also allowed to tax oil and gas property?*

A Yes. State and local governments share in taxation and in tax revenues. The municipality in which the property is located levies and collects its own taxes, based on the State assessed value, at the same tax rate as applied to other locally assessed property. Taxes paid to municipalities may be credited against the 20-mill State levy.

Q *How significant is this tax as a source of State and local revenues?*

A With the rapid pace of construction and final completion of the pipeline and the Prudhoe Bay Production facilities, the 20-mill tax, which is 2 percent of value, has quickly become a major revenue source for both the State and the municipalities. For fiscal 1977, the tax amounted to about $169 million, of which approximately $139 million went to the State and about $30 million to local governments. For the 1978 fiscal year, this tax is expected to be the State's largest single source of tax revenue, providing about $200 million to State and local governments.

Q *What effect does the sharing of oil and gas property tax revenue have on local tax rates?*

A When the value of oil and gas property is added to the tax base of a municipality, it permits the municipality to raise a given amount of revenue at a lower tax rate. This tax reduction benefits homeowners and local businesses but does not benefit oil companies since any reduction in municipal tax is offset by a corresponding increase in state taxes. The corresponding increase is due to oil companies being required to pay a combined total state and municipal property tax of 20 mills.

Q *Are there other State taxes that apply only to the Petroleum industry?*

A Yes. Alaska has four taxes which are levied only on oil and gas operations. The oldest of these is the Oil and Gas Properties Production Tax (severance tax). This tax has been increased several times since the discovery of Prudhoe Bay, and in 1977 the legislature increased the tax rate again by approximately 50% for oil and by 150% for gas. The other three taxes—the 20-mill property tax, the Oil and Gas Regulation and Conservation Tax and the Oil and Gas Reserves Tax (which applies only for 1976 and 1977)—were enacted in the past four years. Such a proliferation of state tax legislation on a single industry is unprecedented in this nation's history.

EXXON

MARK LEE RETIRES

Story and photos by Carl Mulvihill
(From: White Pass CONTACT)

Locomotive Engineer Mark H. Lee has recently retired from the railroad after 43 year of service.

Mark began his railroad career in April 1934 working on the maintenance-of-way track crews until he entered

MARK LEE

engine service in July 1937. He was promoted to engineer status effective September 1942. Except for World War II, when Mark served in the U.S. Army, he spent his entire adult life railroading on the White Pass

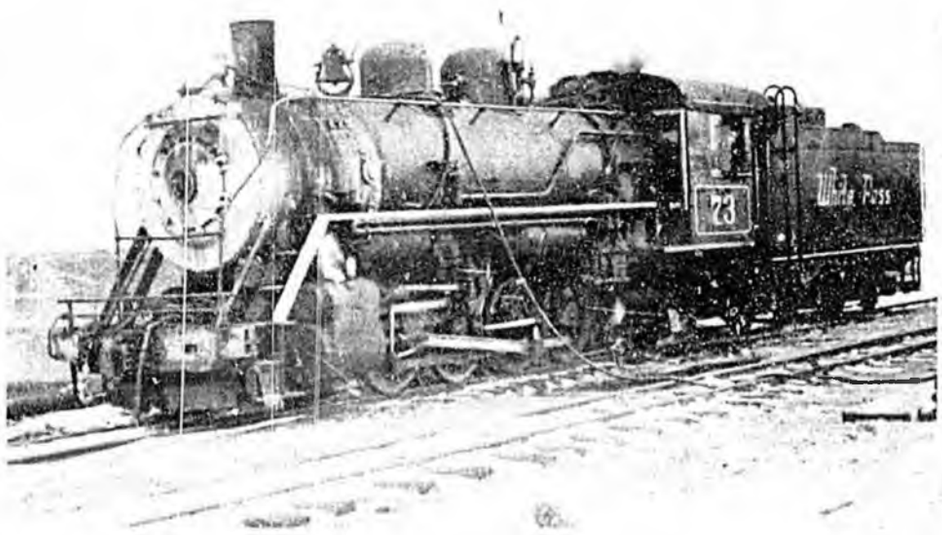
Mark has seen many changes over the years with White Pass as it has grown to meet the demands of the times. Possibly the most dramatic is with the locomotive power itself. When Mark started, the principle road power were the 59-class steam locomotives which could pull a 115 ton train up the "Big Hill" from Skagway. 1938 saw the arrival of the first Mikado which could haul 160 tons [illegible]

more hauling capacity than the 70-class engine, has its biggest advantage in its ability to have several diesel locomotives coupled in tandem and operated by only one engine crew.

Before Mark retired, it wasn't uncommon to see him hiballing up the track, at the head of 5 or 6 diesel locomotive units, which in themselves were probably longer in overall length than some of the entire prewar trains, pulling some 75 cars up the hill with a gross tonnage in excess of 1400 tons.

Mark vividly remembers the old steam engines, particularly after constantly shoveling scoopful after scoopful of coal into the firebox, hour after hour, just to maintain enough steam pressure to climb up the mountain grades. The steam engine cabs were never as comfortable as the modern diesel and Lee recalls during the "Good old days" in the winter, "you froze your butt on one side and roasted it on the other." Mark prefers riding the diesel - but fondly reminices about the steam days.

Mark plans to take it easy for a while, getting lots of rest, and adjusting to a regular life - a real change from the irregular hours of a railroader who can be called for a run any time of the day or night. Mark figures that he is finally going to be able to finish some of his many projects, one of which is his "Liarsville" homestead just north of Skagway.



THOSE WERE THE DAYS

. . . . .

(The author and photographer Carl Mulvihill is a train dispatcher at Skagway and has been acknowledged by many authors as their source of historical information about Skagway and White Pass. Ed.)

grades. The "70's" were the mainstay of the White Pass motive power until the advent of the diesel locomotive in 1954. During this period, when the trains were long and heavy, it was common practice to couple in the train one or more "helper engines" to assist it up the steep grades. Each of the helper engines had its own crew consisting of an engineer and a fireman. The 90-class diesel locomotive, rate at 200 tons, or only 40 tons

The links of the chain

As the successor to the rugged Trail of '98, White Pass has forged communication and transportation links for Northern Canada using ships, trains and trucks. Each link is strong, independent and self-sufficient. Yet, each link looks to the others to complete the chain

The water link between Vancouver and Skagway is provided by two modern container-tanker ships, the M.V. Frank H. Brown and M.V. Klondike. Each week a ship departs from Vancouver for Skagway, to move your freight into the North, and returns with mineral concentrates. The rail link operates up to three trains daily in each direction, hauling freight between Skagway and Whitehorse and returning with minerals destined for markets throughout the world

The highway link utilizes heavy duty trucks specially designed to handle efficiently all types of freight including general supplies, petroleum, bulk chemicals and mineral products

Whether your goods are inbound to the North or outbound for southern Canada you can move them more efficiently and at lower cost through the White Pass chain. We forged these links to serve you and they grow stronger every year.

White Pass

N O R T H W I N D E R S (A Column)

Looks like hot race for Governor; with Hickel-Find & Gov.Hammond on Rep. side--and Croft,Merdes & possibly Bill Egan on the Demo side.

HELP FOR THE BOY SCOUTS:Usually it's the Boy Scouts who help,but, help is needed in properly organizing same.

ALSO, YOUR HELP IS NEEDED to keep the Roller Skating bit going in the Recreation Hall next to the Presby terian Church-the Liability cost floor ed them(and many others)-send your donation to ROLLER SKATING,Box 296, Skagway 99840.

Federal Bureau of Land Management may be able to sell you mineral rights under your property under certain conditions, providing,you don't have them already.Contact them 555 Cordova, Anchorage 99501.

Jesse Carr told state meeting that Labor and Business should have joint committee to resolve common problems such as economic development, Native co-operation;and set realistis goals.

We wonder if City Hall settled on whether to employ outside help to set sewer and water rates,or do it themselves (Any outside firm would not only be costly,but, would have to come to the city for most of the material).

ALASKA MAGAZINE_December issue,has a nice Christmas Story about Skagway.

ELMER RASMUSSEN, former resident and prominent Banker, received the Royal Order of the Northern Star from King Karl of Swedon in San Francisco recently.

Mike Ferrante hopes to wind up local contracts soon.

Food stamps to be increased.

We hear that Bill Sheffield could manage Klondike Hotel via. his Alaska

NOTICE OF UTILITY APPLICATION

The ALASKA PUBLIC UTILITIES COMMISSION hereby gives notice of the filing of an application (Docket U-77-80) for transfer of Certificate of Public Convenience and Necessity No.181, which authorizes the furnishing of cable television telecommunications service at Skagway, Alaska, from Jack Brown d/b/a SKAGWAY NETWORK TELEVISION to RICHARD G. DEDITUS d/b/a SKAGWAY NETWORK TELEVISION.

The transferee (Deditus)has been granted authority conditionally to furnish similar services at Craig, Klawock, Kake and Hydaburg. The application indicates that the transferee has had 7 years experience with cable television service and that no changes are proposed at present in the existing cable television rates in the transferor's tariff which is on file with the Commission.

More detailed information may be obtained from the transferee whose address is Box 2459, Juneau, Alaska 99803 or from Jack Brown, Box 233, Skagway, Alaska 99840. The complete filing is available for inspection also at the offices of the Alaska Public Utilities Commission, 1100 MacKay Building, 338 Denali Street, Anchorage, Alaska 99501.

Any interested person may file with the Commission by 4:30 P.M. January 30, 1978, a statement of views and specific reasons in favor of, or in opposition to, the transfer of Certificate of Public Convenience and Necessity No. 181 together with written confirmation that the same statement has been mailed or delivered to Jack Brown or Richard G. Deditus.

DATED at Anchorage, Alaska, this 29th day of December,1977.

TED STEVENS

United States Senator For Alaska

ALASKA EXCLUDED FROM COAL CONVERSION REQUIREMENT

The House-Senate Conference Committee is continuing to hammer out the differences between the Senate and House versions of the National Energy Policy package. Work is now proceeding on two fronts. One group is working on the non-tax aspects of the package, while a second group just took up the tax-related portions last week.

The second of four non-tax parts, the Coal Conversion bill, was completed last week. The conferees agreed to prohibit new electric power plants and new major fuel-burning installations from burning oil or natural gas. New facilities are defined as those which were not under construction before April 20, 1977. Existing electric power plants and major fuel-burning installations will be prohibited from burning gas after January 1, 1990, and in some cases the Secretary of Energy is authorized to order existing facilities to convert to coal before that date. The Secretary may order existing oil-burning facilities to convert, either in catagories or on a case-by-case basis.

Exemptions from these prohibitions are provided for many cases, including the unavailability of coal or alternate fuel source at reasonable costs, inadequate transportation capacity to bring the coal to the user, process requirements and technical infeasibility of burning coal, incompatibility with environmental regulations, and electric utility reliability factors.

Existing facilities in Alaska were excluded from the conversion requirements in the Senate version. Coal, although plentiful in Alaska, is not yet developed sufficiently to handle the demand if existing facilities are forced to convert. Existing transportation links would be inadequate and the cost of converting the facilities would be extremely high. The impact on consumer costs in Alaska would be severe.

M.V. FAIRWEATHER

The pix shown above shows Westours' new passenger vessel being placed in the Juneau-Skagway service from May 20th., to September 28th, 1978. It will sail from Yankee Cove, 34.5 miles notth of Juneau at 1:30 PM daily for Skagway, and Leave Skagway at 8:00 A.M for Juneau.

The new vessel is 102 foot lo g and will carry 149 passengers; cruising speed-18 knots; 1-way trip about 5½ hours; it will have 747 type seating and 4 stewardesses to make custimers comfortable.

Power is 3 diesel engines generating 2,500 horsepower. Beam is 22 ft.

Skagway School Basket Ball Scores:

Christmas Tournament hosted here December 28-30. Wrangell, Haines and White Horse participated. Skagway played Wrangell for the championship and lost a close one by only three points, 51-48. Wrangell is a Class A school and Skagway is Class B.

January 6 & 7 found the Skagway Cagers at Hoona, where they won both games. The scores were 76-25 & 103-491

Yakatat was here January 16 & 17. Once again, Skagway was victorious in both games - 60-44 on Monday and 56-45 on Tuesday.

THE KLONDIKE HOTEL

Skiing isn't just fun, glamour and excitement.
It's health, fitness and happiness too.

Skiers really know how to live. And knowing how to live is one of the secrets of a long life. To live better . . . to live longer, means taking the simple care to exercise well. Because regular exercise is the only way to keep all of your 600 muscles in shape. Especially the most important one — your heart.

So, check into skiing at a ski area or shop near you. Or hike, or bike or play squash or swing a tennis racket. Join the people going for the good life.

'TAX LOSS' IS REAL GAIN HERE

by Barbara D. Kalen

Following the somewhat sensational news story of a couple of months ago concerning possible adverse effects financially on Skagway due to the tax loss of property purchased by the Park, the National Park staff, with help from Skagway's City Hall, have worked up an accurate estimate of the tax loss, plus a rundown of income to Skagway due to National Park spending.

The six properties acquired so far, would have paid taxes of $2,178.60. Eight more, expected to be purchased in 1978, will make an additional tax loss of $2,794.49. Another four are planned for purchase in 1979, with a present tax revenue of $2,389.28. The total potential loss by 1980 will come to $7,362.37, which Skagway will not have really lost, as the Federal Grants in lieu of taxes will cover the first five years of ownership, and our Park people still firmly expect to be able to return most of the property to private ownership once it has been restored.

On the plus side, the National Park Service spent, not including land acquisition, $109,600.00 in fiscal 1977. Estimating that half of this (mostly salaries) was spent locally, sales tax revenue would have been $822.00. Indirect tax revenue, calculated on a multiplier effect, estimating that the locally spent money changes hands 3½ times, gives an estimate of another $5,754.00 in local taxes.

So for the year of 1977,

Skagway landmark goes up in flames

—photos by Dedman's Photo Shop, Skagway

by Barbara D. Kalen

Skagway lost a living landmark when an early morning fire gutted the famed "White House" hotel on Dec. 20. The alarm sounded at 4:20 a.m., and the Skagway Volunteer Fire Dept., plus a couple dozen or more helpers, battled for more than four hours before the last ember was out.

Built in the early 1900's by gambler Lee Guthrie, the White House was the finest built home in Skagway, and had the most lavish furnishings. It was also owned by early day druggist Britt, and in the late teens a Mr. Dickensen added a second story to the house. In the 1920's and 30's the White House was owned and operated by Mr. and Mrs. Frank Suffecool, who maintained showplace gardens. Mr. Suffecool was owner of the Alaska Transfer Co.

During World War II, the U.S. Army took over the White House, adding a barracks wing, which was equipped to be used as an emergency hospital, though fortunately it was not need for this purpose. After the war, Nova Warner bought the White House, and he and his wife Wanda lived there, using it as both a family home and a small apartment-hotel complex.

The White House proper contained nine very large rooms, and the barracks had 12 more, plus two small apartments, and there were nine bathrooms.

The fire started in the north end of the barracks building, which was vacant and unheated for the winter. Warners smelled the smoke, located the fire and called in alarm while the fire was still quite small. It spread quickly through the one-story army building, and thence to the big house, and finally burned through nearly all of the roof, gutting the entire second floor of the house, and half the downstairs.

The Warner family lived in the farthest end from the fire, and with help, did manage to remove most of their furniture and personal belongings before the fire and water damaged them. No one was hurt, and only the youngest Warner child, Stewart, was still living at home. They have moved to Joe Herpst's rental house at the end of State St., and are still working at picking up the pieces. Nova works as a longshoreman, and is the local propane gas dealer; his wife Wanda is our postmistress. We all join in extending our sympathy for their loss, and many have helped with the difficult and discouraging salvage job.

The building was uninsured.

was an estimated new money spent in Skagway of $54,800.00, creating a direct tax gain of $822.00 plus an indirect gain of $5,754.00. 1978 appropriations have not yet passed Congress, but it is expected that spending will be considerably more than 1977, which was just a partial year, getting our new National Park established.

NEW FIREFIGHTER HELMETS

Three new style Cairns protective helmets have just been purchased by the Volunteer Firefighters. The new polycarbonate helmets have several features which make them superior to the older style "standard" plastic helmets.

Most prominent is their appearance, which closely resembles a football helmet and gives the firefighter better head protection from falling objects. The new helmet also has a snap-down face shield for added protection , especially for the eyes. One feature the the firefighters really appreciate is the much higher meting point of the new helmets of 450° F. This is more than twice that of the older helmets, thus giving better protection in the high fire temperatures, which are usually in excess of 1000° in a fully involved building.

The winter liner, made from Nomex, a fire-retardant material, contributes by protecting the ears and neck from the intense heat.

The older helmets will gradually be replaced on the first run apparatus, as funds become available from the firefighter benefit programs and donations.

PERSONAL Personal Personal

Dear Norman (wherever you are),

We miss you! Please come home! I guess you're mad at me because I sold your rifle to pay for that last ad. Norman, dear, the children need you. Even Mamma misses you. Just the other day she said, "Where's Norman?" Please come home, Norman, it's been almost six months. Mamma says she'll give you back your bowling ball. She doesn't need it anymore for her wig since she wears it all the time now. You must admit dear, you weren't very nice to laugh at Mamma's wig. Noone else thinks she looks like George Washington.

Surprise, Norman, I bought a new rifle for you and it didn't cost us any money. I saveso much money and time doing our laundry and dry cleaning at the KLOTHES RUSH coin drycleaning and laundry store on 5th and Broadway right next to the Skagway Artist's Co-op. The other day while I did my shopping I had those heavy living room draperies cleaned. It's much cheaper than buying new drapes this year.

Oh, you'll never guess who I saw at the KLOTHES RUSH the other day - Carlton! He's single and doesn't have anyone to take care of him. He just found out about the Bundle Drop Service the KLOTHES RUSH has. He takes all his laundry there, even his bedspreads, blankets, towels, and rugs. They wash it, dry it, and fold it for him and he picks it up the next day. He says they do such a nice job. He even lets them launder his favorite blanket. He has to get that back the same day though since he can't sleep without it.

I'll be saving more time and money as soon as I can quit taking a taxi. Don't worry dear, none of us were hurt when I ran into the Chief of Police's car.

Your loving wife,

Eloise

(Adv.)

CHAMBER OF COMMERCE

met at Klondike Dining Room Dec.7th., with M.P.Taylor presiding. Newly elected president, John O'Daniel,was unable to be present and take office. Hope to install Dec.26th. Treasurer's report was good; more brochures was discussed as was local brochure for visitors after arrival;Gary Danielsom reported on Alaska Visitors Ass'n local efforts indicating 42 members; Information Center-6,000 persons signed register in 1977;Volunteer Fire Dept. was thanked for many things;Bank to expand;Boy Scout to organize;Annexation; and other subjects;Cy.Coyne resigned from Exacutive Board account of absence,and,recommended that Richard Hoffman be considered as he was Sup't of National Park Service and there should be a strong liason situation between the Service and the Chamber.

BANK TO EXPAND

The National Bank of Alaska is planning to expand their local facilities here by taking over the space rented to Chilkoot Agencies; Chilkoot Real Estate & former auto supply & clothing store,which will provide 6 teller windows, new furniture & equipment and what have you.

The local bank is part of a state-wide change,and, it is a pleasure to note that this said state-wide banking system began here in Skagway.

Hugh Hall is local manager and cashier.

ALASKA VISITORS ASS'N

THANKS!

The Publisher wishes to thank the National Park Service for the many Certificates of Appreciation issued locally to the persons and organizations which assisted in the Dedication of the Klondike Gold Rush National Historical Park here June 4,1977, and for other purposes.

THE NORTH WIND and the Publisher received one each,and a glamorous Pix of said publisher taken June 4th.

THE NORTH WIND

Next issue,or two, may be a bit off schedule. We plan on 12 plus issues this year beginning with Volume 15, plus a special summer edition for visitors.

We have had offers to sell this paper,and a new owner may do better with same;but, our view is that it will take a few years to be self-sustaining as we have had to dig in our pocket over the years.

However, we are trying to give more local news and will keep on trying.

February 2, 1978

Senator Joseph L. Orsini
Chairman, Community & Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

Please reference your letter of 23 January 1978 concerning the recommendations of the Local Boundary Commission for annexation of land by the City of Skagway.

The views of all interested citizens of the Skagway community were considered by the City Council in the development of its annexation petition. Similarly, in the development of its recommendation, the Local Boundary Commission offered an opportunity for public participation and all views expressed by the City Council and concerned citizens were given full consideration. Although the boundary descriptions contained in the L.B.C. recommendations differ from those proposed in the City's petition, it is considered that they reflect an equitable compromise. Accordingly, the City Council recommends that the lands as described in the L.B.C. recommendation be annexed to the City of Skagway.

Sincerely,

G.D. Acker

Lisa--

I have advised the city of Skagway that unless they hear otherwise from you or from me, it should not be necessary for them to attend the hearings on the resolutions annulling Skagway's annexation. My understanding is that there is no opposition to the annexation and that the boundary commission will be explaining its annexation recommendations to you. If for any reason you feel my advice to the city was not correct, or if you know of some objection that I'm unaware of, I would appreciate your letting me know.

COMMENTS BY SKAGWAY CITY MANAGER G.D. AKER RE SKAGWAY

BOUNDARY ANNEXATION RECOMMENDATION (SJR ~~40~~ 38 2-2-78

Aker said that the City had mailed today a letter to the Committee expressing its support of the Boundary Commission's recommendation.

Aker said that this recommendation was an "equitable compromise" between two views which had not been satisfactorily settled at the time of the commission's meetings. Apparently the original petition was drawn up requesting the maximum area last year. The City Council then in office pared down the request to a smaller area but maintained the documentation which supported the larger request. New city elections occured last year and a new City Council was elected which wanted the larger area annexed. It was explained to them that the petition could not be amended by the Commission or the Legislature but only rejected. The Council then agreed to go ahead with the petition as the first City Council had approved. If further land was desired, it was agreed that a new petition would be drawn up. In the meantime, the City was eager to extend its boundaries to the extent outlined in SJR ~~40~~ 38

Aker said that the Boundary Commission was very cooperative with the City in light of the confusion between the two boundary limits. As a result, the City fully supported the Commission's recommendation as presented in SJR ~~40~~ 38

According to Aker, the City does not plan to send a representative to Juneau to testify at the hearings unless we believe that their presence is necessary.

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MINUTES

FEBRUARY 7, 1978

Present: Chairman Orsini, Senators Willis, Hackney and Sumner. Wm. K. Mearig; J. R. Floden; Frances G. Westre; David A. Moffat; Gene Owens; Sigvald J. Strandberg; Erick J. Simpson; Sunny A. Hick; Gertrude Lyons; Lars Eide; Ed Lapeyri; James F. Petersen; Annette Smith; Bruce Aronson.

Absent: Senator Ferguson

Chairman Orsini convened the hearings at 3:15 PM. He announced that the Committee would take testimony on SJR 38, 29 & 40 but would take no action on the resolutions that day.

SJR 39 (Proposed Annexation by Haines Borough):

Chairman Orsini asked Sigvald Strandberg, Chairman of the Boundary Commission, to give the circumstances behind the proposed annexation of land on which stood fuel tankds formerly operated by the military. Mr. Strandberg described the action as pro forma in nature to allow the Haines Borough to eliminate a pocket of non-borough land inside its borders. He explained that the final disposition of tank farm property, which would be handled by the General Services Administration, would not be affected by the Borough's action and that the military had not objected to the proposed annexation. Mr. Strandberg also stated that no objections had been made by members of the public during the Boundary Commission's hearings in Haines. No one else wished to testify on SJR 39 and Chairman Orsini closed the hearings on the resolution.

SJR 38 (Proposed Annexation by the City of Skagway):

Mr. Strandberg noted that the City of Skagway originally requested to extend its boundary to the Canadian border and that of the Haines Borough. He noted that this raised the question in the Boundary Commission's opinion of what properly constituted city government versus that of a borough. The Commission therefore recommended a smaller extention of the City's boundaries and informed the City that it could, if conditions warrented, petition the Commission in the future to move its jurisdiction to the Canadian border. The City of Skagway supported this action by the Commission and agreed with the recommendation. Strandberg acknowledged that public testimony by persons residing outside the present City boundaries was opposed to annexations since they believed that they were already paying for municipal services through the sales tax. In response to questions from Committee members, he said that the Commission had not considered the inclusion of the Dyea area into the City of Skagway and that such an action would require separate Commission action.

William Ruddy, an attorney representing the City of Skagway, said that public opposition had been expressed to the proposed annexation but that it was not organized.

In the absence of further public testimony, Chairman Orsini closed the hearings on the resolution.

SJR 40 (Proposed Annexation by the City of Petersburg):

Mr. Strandberg said that public hearings had been held by the Commission in Petersburg January 9 before an overflow crowd with the testimony being broadcast live over the local radio station. On January 16 the commissioners held a telephonic conference and approved a recommendation for the extension of the City of Petersburg boundary.

He explained that the Commission's recommendation called for the city boundary to be extended only over the northern portion of Mitkof Island, an area of approximately 45 square miles. The City had originally petitioned for the annexation of all Mitkof Island, an area of approximately 211 square miles. Mr. Strandberg said that the Commission respected the City's reasons for the larger request, which included concerns about Coastal Management and municipal selection of state lands. He said that this again raised the question of borough versus city government and that the Commission had recommended an area for annexation that would take in almost all residents, but not all the territory, of Mitkof Island. He noted that, in the Commission's view, the natural development of the City of Petersburg lay along Mitkof Highway and that the outlying areas did benefit from municipal services. The incorporation of this area would remove the present tax inequity between the residents of the City and the outlying district. Mr. Strandberg pointed out that the City of Petersburg has a narrow tax base, but a fairly heavy bonded indebtedness. The 2,126 City residents have a bonded indebtedness of $3.7 million against a property valuation of $34 million. Thsi gives the City a debt/valuation ratio of approximately 11% as opposed to a 5.4% ratio for the City and Borough of Juneau and 3% for the City of Ketchikan. He noted that there were considerable private land holdings south of Petersburg along the Mitkof Highway.

In response to questions from Committee members, Mr. Strandberg made the following comments: The City indicated that it would assess one-half, or 7 mills, of the present City mill rate against the residents of the outlying area for the first year after annexation. Petersburg City Councilmen run at large and therefore there would be no council seat per se representing the annexed outlying area. During the public hearings in Petersburg, public sentiment ran about four to one against annexation. The August 26, 1975, election during which City voters rejected annexation was a straw vote on another proposed annexation and for which sketchy data had been gathered in regard to potential tax revenues. Service areas in the unorganized Borough could be established by the Legislature only if the same services could not be provided by annexation to existing local governments.

The vote of the Commission had been three to one for the proposed annexation. Children in the outlying area presently attend City schools which receive tuition payments from the State. The economic future of Petersburg lies fishing and some logging. Industry would find it attractive to locate in the outlying area following annexation.

William Ruddy, the attorney representing the City of Petersburg, and William Mearig, representing the Petersburg city government, testified

jointly. Mr. Mearig stated that the 1975 annexation vote concerned the proposed annexation of West Petersburg, which has now incorporated separately as the City of Kupreanof, and did not pertain to the present recommendation. He noted that the Environmental Protection Agency was requiring the extension of sewer and water facilities to outlying areas. Either the City of Petersburg would provide these services or they would be mandated at the state or federal level. In response to questions from the Committee members, Mearig concurred that Petersburg's economic future lay with fishing and stated that any expansion of fishing facilities would probably occur at the four plants currently within the City's boundaries. Because of environmental and esthetic concerns, little or no development is likely to take place in the Narrows. He commented that strictly speaking it was illegal for the City to provide municipal services to the outlying area.

James Petersen, the attorney representing the plaintiffs in the court suit opposing the proposed anrexation, testified that his clients opposed the annexation on the grounds that insufficient study had been given to the revenue, tax burden, and expense of the action. He stated that the original petition requesting annexation had been hastily put together and that the municipal ordinance had had its first reading with no public input. The second and third readings took place on the same night. Studies were lacking on population density, cost of police protection, cost of water and sewer facilities, and cost of electric power extension. Peterson said that his clients were not opposed to annexation per se and believed that the establishment of a service district (outside of the municipal boundary) could provide a viable solution. He emphasized that it was not only residents of outlying areas who opposed annexation but the residents of the City as well.

Frances Westre testified, as a member of the Petersburg City Council, that the Council had unanimously approved the proposed annexation as being in the best interests of the community of Petersburg and its environs. She said that the apparent haste in acting upon the petition was due to the legal requirement to submit all annexation recommendations to the Legislature by the tenth day of session. She pointed out that Petersburg and Wrangel were jointly studying a proposal for hydroelectric development in the Thomas Bay area that would provide relatively inexpensive power for economic development in the area. Ms. Westre said that Bruce Aronson of the Department of Community and Regional Affairs had originally raised the annexation question in Petersburg several years ago.

Lars Eide read to the Committee a letter he sent on December 12, 1977, to Commissioner of Community and Regional Affairs Lee McAnerney protesting the proposed annexation as contrary to the wishes of the majority of the people of Petersburg. He stated he was part owner of Mitkof Lumber Company which employes approximately 23 persons about 75% of whom lived in the City and 90% of the company's production was exported.

David Moffat, City Manager of Petersburg, said that the impetus for annexation had originated from residents in the outlying areas and that he had heard of little opposition to the proposal from within the City. He noted that, without the existence of the City of Petersburg, it would be unlikely that industries outside city limits would have located in the area. Moffat pointed out that the City has a

significant interest in exercising planning for Coastal Management for Mitkof Island as well as achieving a wider basis for future municipal selection of state land. He also noted that the possibility of a deep water port had been studied for the southern tip of Mitkof Island.

Ed Lapeyri, a resident and General Manager of Mitkoff Lumber Company, a plaintiff in a court suit against the annexation, testified that outlying residents did not receive municipal services for wohich they did not pay. He stated that residents outside city limits paid a 15% surcharge for electricity and a 50% surcharge for water. As for fire protection, the State paid the City $7.50 per capita for residents outside City limits. He submitted to the Committee the following petition signed by 543 residents of the general Petersburg area:

"WE, THE UNDERSIGNED, BEING CITIZENS OF MITKOF ISLAND, BOTH INSIDE AND OUTSIDE THE PRESENT CITY LIMITS OF PETERSBURG, ARE STRONGLY OPPOSED TO THE PROPOSED ANNEXATION TO PETERSBURG AT THIS TIME DUE TO THE METHODS USED BY THE CITY IN DIRECT OPPOSITION TO THE DESIRES OF THE MAJORITY OF THE CITIZENS AND BECAUSE OF ERRORS IN THE FIGURES PRESENTED TO THE LOCAL BOUNDARY COMMISSION AND THE FAILURE BY THE CITY TO PROPERLY RESEARCH AND DOCUMENT THE ECONOMIC CHANGES SUCH ANNEXATION WOULD PRESENT TO THE CITY RESIDENTS AND THOSE IN THE ADJOINING PROPOSED AREAS. WE ARE EXTREMELY CONCERNED IN THE MANNER IN WHICH THE CITY HAS PRESENTED THIS ANNEXATION WITHOUT PROPER PUBLIC INPUT. WE ALSO PETITION THE HOUSE AND SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEES TO HOLD A JOINT HEARING IN PETERSBURG IN ORDER TO OBTAIN THE TRUE FACTS AND PUBLIC INPUT REGARDING THIS PROPOSED ANNEXATION."

Mr. Lapeyri said that these signatures were obtained within three days last week and that every reasonable effort was made to insure that resident adults were the only persons who signed. He told the Committee that of the 543 petition signers, 193 lived outside the City and 350 lived within the City limits.

Mr. Lapeyri charged that during the City Council deliberations on the annexation petition, a show of hands indicated that only 11 of the 98 persons present supported annexation and that, of the 6 who testified in favor of the measure, four were city employees or relatives of Council members. He said that real property valuation for the 1975 proposed annexation was $6.3 million and in 1977 only $6.7 million for a slightly different area. He also cited an unidentified study undertaken by a local private firm that indicated no significant economic development in Petersburg in the future. In response to Committee members' questions he acknowledged that fishing was considerably more important economically to Petersburg than logging which he characterized as "shakey".

Gene Owens, a resident of Petersburg, testified in support of the proposed annexation . He stressed that the State had consistently urged localities to assume local government control in the Unorganized Borough in such matters as Coastal Management planning. Mr. Owens said that the annexation of land on Mitkof Island by Petersburg was consistent with that objective.

John Floden, city engineer for Petersburg, spoke in favor of the annexation recommendation and pointed out that the City had basically proposed a service area concept. He noted that 19% of the population

of Petersburg currently lives outside the city limits. This meant that those inside the city pay 19% more for municipal services than thier just share, while those outside pay 19% less. Mr. Floden said that without the extension of planning and zoning powers to the present outlying areas they were likely to develop in a haphazard manner leading to severe water and sewage problems in the future. There were instances in the outlying area where land was being subdivided into lots too small handle onsite sewage and water. Mr. Floden said that the City's goal in the annexed area would be to maintain large lots so as to prevent the need to establish sewer and water lines to high density residential and commercial dwellings. Additionally the projected linkage of Mitkof Highway with a proposed Stikine Highway could result in unrestrained commercial development of gas stations, drive-ins, etc. along the way unless proper planning and zoning authority existed to control it. In response to Committee members' questions, he said he believed a comprehensive community development plan for Petersburg had been prepared in 1965/66.

Gertrude Lyons, a plaintiff in the court suite against the proposed annexation and a member of the Board of Directors of the Petersburg Indian Association, testified that the increased costs association with the extension of services to outlying areas would work an undue hardship on Native residents of Petersburg who were primarily dependent upon seasonal employment. Ms. Lyons said that the membership of the Petersburg Indian Association was approximately 185 adult persons and that the Association was the combined organization for the Tlingit-Haida Central Council, the Alaska Native Brotherhood, the Alaska Native Sisterhood, and Sealaska Corporation.

Sunny Hicks, a resident of the Petersburg area and opponent of the proposed annexation, characterized the community atmosphere of Petersburg as a "local Watergate situation" where neighbors were divided against one another and conversations were surreptitiously recorded. She believed that local animosities had been inflamed by the City's handling of the annexation petition. She stressed that the residents of the outlying area considered themselves to be members of the general Petersburg community and were willing to assume their share for local services. She questioned whether the City was capable of efficiently carrying out its present obligations, much less undertake more extensive ones without the compensation of major new revenues.

William Mearig requested to testify a second time to present his views as a private citizen in addition to his capacity as a city official. He said that the proposed annexation offered outlying residents their first chance to participate in the political decisions affecting them locally, even in the absence of a separate election district for the area. He stated that participation in local government in such matters as Coastal Management offered residents more protection than if they remained unorganized and allowed either the State or federal government to impose regulations on them.

In the absence of further public testimony on SJR 40, Chairman Orsini concluded public hearings on the resolution and adjourned the Committee at 6:28 PM.

LETTER TO MAYORS OF: HAINES BOROUGH

CITY OF PETERSBURG

CITY OF SKAGWAY

(cc: CITY OF HAINES)

Dear _____:

On February 7, the Senate Community and Regional Affairs Committee will hold hearings on the recommendations made by the Local Boundary Commission regarding the annexation of land by the Haines Borough (SJR 39) and the Cities of Petersburg (SJR 40) and Skagway. SJR 38

The Senate C &RA meetings are scheduled for 3:00 PM in Room ~~100~~ 106 of the Assembly Building and public testimony will be taken prior to Committee action on the recommendations. Comments may also be submitted in writing prior to February 7 by those who wish to testify but are unable to travel to Juneau.

In the event that the hearings are not completed on ~~the~~ Frebruary 7, further hearings will be held at the same time and place on February 9.

Sincerely,

Joe Orsini

Chariman, etc.

Dear Mr. Black:

On February 7, the Senate Community and Regional Affairs Committee will hold hearings on the recommendations made by the Local Boundary Commission regarding the annexation of land by the Haines Borough SJR 39 and the Cities of Petersburg SJR 40 and Skagway SJR 38.

The Senate C&RA meetings are scheduled for 3:00 P.M. in Room 106 of the Assembly Building and public testimony will be taken prior to Committee action on the recommendations. Comments may also be submitted in writing prior to February 7 by those who wish to testify but are unable to travel to Juneau.

In the event that the hearings are not completed on February 7, further hearings will be held at the same time and place on February 9.

Sincerely,

Joe Orsini

F: SJR 40

The Honorable Joe Ossini, Senator
Pouch V
Juneau Alaska

Dear Senator,

This letter is to let you know my opinion on a certain portion of your news letter which you sent to me. It is in regards to a certain sentence of para. 1, page 3, VIZ. "No one guaranteed it would be easy, but with — — — — — — ".

This last sentence states that elected officials should be removed from office if they flout the collective opinion of the the public. I heartily agree with you on this statement.

As you well remember, there were public hearings before the Senate and House Community and Regional Affairs Committees

Concerning the annexation of certain lands to the city of Petersburg. There was testimony that showed that the public was against the annexation by a margin of almost 3½ to 1. The resolution was allowed to die in committee and was not let out on the floor to be voted on by the legislature as a whole. Now, is that a way to preserve a democracy as you so nobely state in the fore part of the same paragraph.

Because of the stand taken by the above mentioned Committees and the flouting of the will of the Majority, the Community of Petersburg is suffering from animosities and divisions created by the inaction of the afore-mentioned Committees. Irreparable harm has been done to the community and it will years for the wounds of this dissension to heal. And, all of this was caused by the flouting

of the opinions of the majority of the electorate by the elected and appointed officials from the city level to the legislative level.

Again, let me state, that I concur wholeheartedly with your statement that elected officials should not flout the opinions of the majority of the electorate. Let us hope that this will not happen again.

Sincerely

Lars Eide

PREPARED BY: Ben Harding, Senate C/RA Committee Staff

DATE: February 16, 1978

SUMMARY OF ECONOMIC AFFECTS OF PETERSBURG ANNEXATION

GENERAL

Revenue Gains

High estimate:	$238,600 *
Low estimate:	$138,600 **

(*using sales tax estimate of $150,000 annually)
(**using sales tax estimate of $50,000 annually)

Revenue Losses or Added Expenses

High estimate:	$182,000 *
Low estimate:	$157,000 **

These estimates are based on the following assumptions:

a) No added water and power services to annexed areas (per City policy).
b) No added police, ambulance, or fire services (per City statements that these services are already funded through State revenues sharing).

(*using high estimate for increased administrative costs)
(**using low estimate for increased administrative costs)

FINANCIAL BREAK-DOWN BY CATEGORIES

Revenue Gains

1. Sales Tax Revenues:

High estimate:	$150,000
Low estimate:	$ 50,000

The City has estimated that a sales tax could raise approximately $150,000 annually in new revenues from the annexed area. Annexation opponents contend that this figure is greatly inflated and that a more realistic estimate is closer to $50,000. The City has acknowledged that its estimate is very rough and that it was not able to obtain firm data on which to base its figures.

2) Electricity Rate Increases

$1 a month for residential and commercial users

$2 a month for industrial users

Estimated revenue: $19,000

It is the City's intent that electricity rate increases will equal and offset revenue losses from the elimination of surcharges on water and electricity to users in the previously outlying areas.

3) State Revenue Sharing (using a population increase of 500)

Police	$6,000
Air and Water Pollution	1,000
Parks and Recreation	2,500
Transportation	2,500
Roads (est. 3 miles)	4,500
Health Service	1,000
Regular*	850
Liquor*	1,100
Amusement and games*	150
Gross receipts tax**	1,000
Total Revenue:	$20,600

(*from Department of Revenue estimates)
(**Department of Revenue estimates $2,000 in revenue sharing from gross receipts. However over $1,000 annually appears already to have been inadvertently shared with the City)

4) Property Tax Revenue

7 mills on an estimated $7 million in real and personal property $49,000

Revenue losses of Increased Expenses:

1) New Administrative Costs

High estimate: $50,000 *
Low estimate: $25,000 **

This figure is derived from the assumption that increased administrative responsibilities, such as Planning and Zoning, for the annexed area will require an increase in City administrative personnel.

(*using high estimate of 1 officer and 1 secretary plus office start up costs)

(**using low estimate of 1 secretary/clerk plus office start u costs)

2) Elimination of State Tuition Payments

$97,700

This figure is based on the calculation that 100 students will come from the annexed area. For 1977/78 payments, the Department of Education is using $976.74 per pupil. Currently 115 students from outlying areas (including 5 from Kupreanof) attend Petersburg schools. The City's own loss projection was $47,000 which was calculated on the Department of Education payments per pupil of $443.61. That was the rate of payment used by the State last year. These payments will more than double this year.

3) Other Expenses

a)	Electricity and water extension costs	$ 0 *
b)	Police, ambulance and fire service costs	$ 0 **

(*City plans no extension of power and water service beyond present level)

(**City plans to maintain these services at present level using existing State revenue sharing funds)

BACKGROUND

In its original annexation petition, the City of Petersburg requested the annexation of all Mitkof Island, an area of approximately 211 square miles.

The Local Boundary Commission recommended instead the annexation of the northern end of Mitkof Island, or about 45 square miles. The Commission's rationale was that 211 square miles would have created a territory calling for a borough organization without Petersburg having gone through the borough government process. The Commission believed that a city government provides essentially direct services to its citizens whereas a borough exercises regional responsibilities. As a result, its recommendation provided for the City of Petersburg to annex areas containing virtually all the population of Mitkof Island, but excluded uninhabited or yet-to-be-developed areas.

Following annexation, the City has said that it would increase electricity rate charges by $1 a month for residential and commercial users and be $2 a month for industrial customers. The present surcharges to outlying residents for City water and electricity would then be dropped. The City's intent is that the rate increases would equal the loss of revenue resulting from the elimination of the surcharges.

The City has no plans to extend water or electricity, beyond its present service level, to the annexed area. Police, fire and ambulance services to these areas are projected to remain unchanged and funded through State revenue sharing. (Confirmed in telephone conversation with Petersburg City Manager by Staff)

Other revenue-raising means the City plans to use include: a 7 mill tax levy on approximately $7 million in real and personal property located in the annexed area, a sales tax on transactions under $1,000, and the receipt of increased State revenue sharing funds.

Major revenue losses or increased expenses resulting from annexation include the dropping of State tuition payments, surcharge elimination, and the cost of probable added administrative services.

The proposed annexation has been strongly opposed by plaintiffs in a court suit who charge that inadequate study and planning have gone into the proposal. They cite poor or expensive municipal services and a high bonded indebtedness as evidence of the City's inability to take on added municipal obligations. A petition containing the signatures of 543 Petersburg residents in opposition to the annexation was presented to the Senate Community and Regional Affairs Committee February 7.

ANALYSIS

A major charge made by opponents of annexation is that the City is presently overextended financially and could under no circumstances assume additional financial obligations without the assurance of at least matching revenues. The annexation opponents contend that any new sources of revenue in the outlying area are minor and would be more than off-set by increased expenses.

The City acknowledges that its data on the economic impact of annexation

are fragmentary and based on rough estimates open to challenge. In fact, the attorney for the City wrote to the Boundary Commission that "I am strongly inclined to agree with that assessment about a short-term negative cash flow but similarly inclined to discount its magnitude predicated on the knowledge that many of the general services... have been provided heretofore." The attorney, L.B. Jacobson, further noted, "...nor was I of the opinion that financial viability of an annexation proposal was one of the standards promulgated in (state regulations) or the Alaska Constitution."

A summary economic analysis indicates, however, that the City has a fair chance of breaking even financially in the event of annexation, provided it does not extend to the annexed area any services it is presently not making available. The annexation would reduce somewhat, the City's unusually high (11%) bonded indebtedness to property valuation ratio. It would also increase City valuation by an estimated $7 million in real and personal property from the annexed area. (See attached table to compare Petersburg population and bonded indebtedness with similar Alaskan communities.)

It would appear from testimony presented by a number of city officials at the Senate hearings, however, that the proposed annexation does not directly address the real reasons which impelled the City to request the annexation of Mitkof Island in the first place.

Those reasons are threefold: 1) the desire to plan for the Coastal Management of Mitkof Island, 2) the desire to obtain an adequate land base for later municipal selection of state lands, and 3) the desire to plan for the rational and orderly development of Mitkof Island. None of these objectives is significantly met by the proposed annexation of the northern quarter of Mitkof Island. In fact, from one viewpoint, the recommended annexation only adds to the City's problems without providing any of the benefits which the incorporation of the entire island would entail.

Nevertheless, the Boundary Commission's question, i.e. would the annexation of the 211 square miles of Mitkof Island create a de facto borough government rather than a city?, appears valid.

The implementation of the proposed annexation would not however settle the issue. The City of Petersburg supports the Boundary Commission's recommendation for the smaller area annexation despite its desire to annex all of Mitkof Island. But the City has also expressed the intention to renew its petition next year for the incorporation of all Mitkof Island under the City's jurisdiction. At that time, the same issues and the same arguments of city versus borough government and the need for local regional control will have to be addressed again.

(Issued January, 1978)

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE

FEBRUARY 16, 1978

Present: Chairman Orsini, Senators Willis and Hackney. Bruce Aronson; Doug Griffin.

Absent: Senator Sumner and Senator Ferguson

The meeting was called to order by Chairman Orsini at 3:10 PM.

STRANDBERG CONFIRMATION

Chairman Orsini asked if Committee members wished to hold separate confirmation hearings on the reappointment of Sigvald Strandberg to the Local Boundary Commission. Committee members expressed the view that they were familiar with Mr. Strandberg's work on the commission and did not believe that separate hearings would be necessary.

PETERSBURG ANNEXATION (SJR - 40)

Chairman Orsini drew the members' attention to a SC/RA staff study analyzing the economic effects of the recommended annexation of land by the City of Petersburg. He noted that the figures indicated the probability of the City's expenses and new revenue form annexation balancing out, provided the City maintained its present level of services to the annexed area.

Senator Willis noted that the Boundary Commission could have held an advisory election in Petersburg to determine local support for the annexation but that the legislature had no authority to instruct the Commission.

Pending action by the House CRA Committee, Committee members agreed to hold action on SJR 40 unless the members wished the issue to be brought up again for discussion.

COASTAL ZONE MANAGEMENT

Chairman Orsini said that the Guidelines and Standards for the Alaska Coastal Management Program would require a detailed review if the Committee wished to deal specifically with the many points being raised regarding the implementation of the Coastal Management Program.

Senator Hackney said that he was impressed by the Petersburg situation where one of the motivations for annexation was a desire to secure local control over the coastal management of Mitkof Island.

The Committee members expressed their desire to undertake a sectional review of the draft Guidelines and Standards.

OTHER

Chairman Orsini discussed with Committee members the status of CSHB 133 before the House Finance Committee and its Senate counterpart,

CSSB 241.

The Chairman also informed members about the provisions of SB 501 pertaining to binding arbitration and stated that he intended to schedule hearings on the bill within two to three weeks.

Chairman Orsini called an executive session of the Committee to discuss Budget and Audit Committee actions with respect to Coastal Management.

The meeting was adjourned at 4:00 PM.

Honorable Senator Joseph L. Orsine
Pouch V
Juneau, Ak. 99811

Dear Mr. Orsine;

I would like you and your committee to know that I am against the annexation proposal that has been put forth by the City of Petersburg.

I am a 54 year old resident of Petersburg and a property owner.

The City can not tell me what the annexation will cost me or the people they want to annex now living outside the City.

They say that the election held in 1975 does not mean anything since we were "Voting out of are pocketbooks" and the annexation of Kupreanof were the main issues. If that is so I think the City should get their facts together and hold another election without the fog factor of my Pocketbook and Kupreanof.

The City Manager testified in Juneau that despite the fact that 90% of the people at a recent hearing in Petersburg were against annexation he felt that the City Council speaks for the people. Is that the way to run a Democratic Government?

Sincerely,

Erling W. Husvik

Dear Senator Orsini:

On Tuesday of this past week the Petersburg School Board was advised that the amount they will receive from the State of Alaska for payment of non-resident student tuition is $120,400.00. I would specifically call your attnetion to the city attorney's letter of January 11, 1978, where he stated that "the $47,000.00 figure submitted by the City of Petersburg as revenue lost from the state for payment of non-resident student tuition is accurate". As you may recall, the figure that was in their petition was $53,000.00. The present figure is better than 2-1/2 times that which the city estimated in the information they submitted to the Local Boundary Commission.

For your information, I have attached a copy of a letter addressed from the Superintendent of Petersburg Public Schools to the mayor and city council members of Petersburg relating this information.

Yours very truly,

James F. Petersen

Dear Mayor Smith & Council Members:

The Nonresident Pupil Tuition Reports for the 1977-78 fiscal year were received on Monday, February 20, 1978. These reports illustrate an abrupt change in the tuition rate and the total entitlement to the school district. Previously we have discussed the annual loss of $53,000 to the district due to annexation. The annual tuition loss with the new tuition rate is $120,400. These reports are attached for your information and consideration.

Thank you.

Sincerely,

D. W. Schultz

Dear John:

I appreciate very much your very good letter of February 14 concerning the Petersburg annexation.

The only other communication I have received on this was from Ed Lapeyri--I am sure you are aware of his position. Enclosed is a copy of my letter to him.

I have contacted Senator Orsini, who tells me that you were unable to testify before his committee. I am, therefore, sending him a copy of the letter you sent to me. Senator Orsini informed me that he had received some information from you--but I suppose receiving some more would be desirable.

It was nice to see you in Juneau. Give me a call when you're next in town.

Best wishes.

Sincerely,

John L. Rader, President
Alaska State Senate

Re: Local Boundary Commission's Recommendations
Re Area To Be Annexed To Petersburg

Dear Senator Rader:

I am most aware of the tremendous and perplexing problems facing this second session of the Tenth Legislature; therefore, it is somewhat embarrassing for me to have to write to you and request that you take the time to aid and assist us in settling what should be a very local problem in our island community of Petersburg. This is a problem that could have been settled, and should have been settled, without any fanfare, and I have no doubt that it would have been settled had it been presented to the people of the Petersburg area on a timely and reasonable basis.

I have been a resident of Alaska since December of 1940, and a resident residing within the existing boundaries of Petersburg since September of 1941. I served on the local city council at various times and I also served in the first, second, and third sessions of the Alaska Legislature, so I am not totally unfamiliar with government and governmental processes.

As is the case with the great majority of Alaskans, I am violently opposed to the treatment that our state is receiving on the D2 Land issue. Alaskans are being given no opportunity to have any say in determining the settlement of a problem which is purely one involving our own state.

A parallel situation, however in reverse, exists in reference to the petition presented by the city council to the Local Boundary Commission and the Local Boundary Commission's recommendation to the legislature regarding the annexation of land outside of the existing city limits of Petersburg. These things were all accomplished without giving the people of Mitkof Island, and particularly in Petersburg, a chance to express their concerns and views, not even in that most democratic manner--the ballot box.

The city administration and the city council have refused to respond to direct questions as to what the residents, either inside or outside the city, may expect in the way of increased costs of operation of municipal government, increased services, including utilities, and any other impact that this proposed annexation may have upon our community.

The petition prepared by the city administration and under the direction of the city council did have several points which they alleged were the basis for their requesting that all of Mitkof Island be annexed to the City of Petersburg. These were such things as, coastal zone management of the whole area; recreational areas, such as the Three Lakes Recreation Area and the Blind Slough Recreation Areas, the Crystal Lake Hydroelectric Watershed, and several other allegations which would supposedly be beneficial to the community. The recommendations of the Local Boundary Commission to the legislature, however, basically eliminated these things that the City of Petersburg was allegedly seeking by petitioning for this annextion.

I happened to be in Juneau on the 16th of January and stopped by the Department of Community and Regional Affairs office and made inquiry of what decisions the Local Boundary Commission had made. Mr. Pritchard of that office informed me that the Local Boundary Commission had not yet made a decision; however, they were going to have a telephonic conference that afternoon and they would make a decision at that time. He informed me that it would be on a speaker phone in their conference room and I was most welcome to listen in to the decisional meeting as all meetings of the Local Boundary Commission were open to the public. I informed him that I would be happy to listen in on that meeting. I arrived at the appointed time and heard the telephonic conference of the Local Boundary Commission's decisional meeting on the Petersburg matter. When the Local Boundary Commission had held their public meeting on January 9 in Petersburg, they had informed the public, both by the notices posted and at the meeting itself that all written statements or information pertaining to the annexation question had to be submitted by January 5 and that all testimony would be taken on January 9 and then based upon this information, they would arrive at a decision. As it developed in the telephone conference meeting, the city had submitted additional documentation contrary to the notices and public announcement in a lengthy letter from the city attorney. This letter was read in its entirety to the members of the Commission. Apparently this letter and other materials had been sent by Gold Streak by the Department of Community and Regional Affairs to the five commissioners; however, it came out during the conference that two

of the commissioners had not received the material and did not have any of the material in front of them at the time of the telephone conference. The credibility and insufficiency of the information supplied to them was discussed, then by a motion of one of the commissioners, they arbitrarily chopped off seventy-five percent of what the city had requested in their petition and then had a lengthy discussion upon the boundaries of this area, and moved for a vote on the annexation as amended by that motion. Commissioner Gallagher was not in on this conference call and did not partake in the deliberations. Commissioner Anderson from Wrangell and Commissioner Strandberg from Anchorage voted in favor of the annexation, Commissioner Hobson said he really did not know too much about it but would go along with Anderson and Strandberg, and Commissioner Dobson from Fairbanks stated that he thought they had rushed into this matter too quickly and that they had not been supplied adequate or sufficient information upon which they could make a rational decision regarding this petition and voted "No"; so the motion was carried by three of the five commissioners voting in favor of the motion. Needless to say, I was shocked and appalled at the casualness of this meeting which basically was in utter disregard to whatever impact their decision might have upon the community of Petersburg.

The Constitution of the State of Alaska expresses great faith in the area of local government. The residents of the Petersburg area and Mitkof Island are not looking for any exceptions in either state law or regulations. We desire to have our local matters decided through the medium of majority voting, in so doing we are in no way infringing upon others. The city administration and city council of Petersburg suddenly decided that they were going to present an annexation petition to the Local Boundary Commission and to the legislature, and took the attitude that the people of the Petersburg area did not know what was good for them, and that "Big Brother" knows best and that they would ram their decision down our throats.

For the foregoing reasons, I and my fellow Petersburg residents respectfully request that the House and Senate take appropriate action and pass a concurrent resolution rejecting the recommendations of the Local Boundary Commission in reference to the Petersburg annexation. Let me take this opportunity to thank you for taking the time to review my letter, and I know that I express the concerns of the vast majority of the Petersburg residents in making this request to you. Your consideration of preserving the democratic method of conducting government would be appreciated. Thank you.

Yours very truly,

John E. Longworth

Re: Petersburg Annexation
Decisional Meeting of Local Boundary Commission

Dear Senator Orsini:

If you will recall, at the public hearing that you conducted on the Local Boundary Commission's recommendations for the annexation to the City of Petersburg, I requested that each of you review the telephone conference call of the Local Boundary Commission which constituted their decisional meeting on the Petersburg annexation matter. It is recognized that all of you have very busy schedules and may not have had an opportunity to review the tapes of that telephone conference call. For your convenience, I have had my secretary transcribe that tape to facilitate your review of the same. A copy of that transcript is attached hereto, together with two letters which were read into the record, but for ease of transcribing the same we have attached the copies of the letters.

There are several important factors which I believe the Committee on Community and Regional Affairs should consider in reviewing this transcript. Commissioner, Sheila Graham, was not in on this decisional meeting; Commissioner Jim Dobson of Fairbanks did not have the material which had been "Goldstreaked" to him; and likewise Commissioner Edwin Hopson of Nome did not have the materials which had been "Goldstreaked" to him by the Department of Community and Regional Affairs.

I would specifically call your attention to the discussion by Commissioner Dobson beginning on the bottom of page 8 and continuing on page 9 to the effect that the city provided inadequate information and had made inadequate preparation and because of that inadequate preparation and lack of information, any decision at this time by the Local Boundary Commission would be premature, and immediately after

that Commissioner Jo Anderson of Wrangell agreed with Commissioner Dobson in that assessment. At that point, it is interesting to note that a staff member of the Department of Community and Regional Affairs then started participating in the conversation and more-or-less directed the commissioners to approve the annexation, even before they had thoroughly discussed the matter. From page 9 through page 12 there is a lengthy discussion in which this staff member participates, trying to direct a decision upon a description for the annexation, even before the commision members had made a decision as to whether or not they were in favor of any type of annexation. I would call your attention to Mr. Pritchard's statement on page 12 where he states that they (Department of Community and Regional Affairs) are in a "rush to get it in" (to the legislature).

I would also like to direct your attention to the comments by Commissioner Dobson and Commissioner Strandberg appearing on the bottom of page 12 regarding the availability of utilities and services to those areas outside of the existing city limits. From their comments, it is obvious that they anticipate that services and utilities will be provided to these newly-annexed areas; however, this is entirely contrary to the testimony given by the city engineer when he testified at your hearing. The city engineer testified that there would be no expansion of existing services or utilities unless the people in the newly-annexed area paid for them, either by an increase in the general mill levy by the City of Petersburg on real property, or by the creation of local improvement districts and the resulting special assessments.

The concerns of Commissioner Dobson commencing at the bottom of page 8 and continuing on page 9 express the concerns of my clients, that the decision of the city and of the Local Boundary Commission, and the recommended annexation, are based entirely upon inadequate information and preparation, and any decision at this time is premature. For these reasons, the residents of the Petersburg area respectfully request that the legislature pass a concurrent resolution rejecting the recommendations of the Local Boundary Commission in reference to the proposed Petersburg annexation, until such time as addquate information and adequate preparation have been developed to determine the feasibility of such an ambitious annexation. My clients and I express our appreciation for your taking the time to review this letter and the attachments hereto. We feel that they are vital to your decision and, likewise, they should be read in light of the requirements of the Alaska Statutes and the Administrative Code regarding the requirements and the information that should go into making an annexation recommendation. Thank you.

Yours very truly,

James F. Petersen

K1

DECISIONAL MEETING

LOCAL BOUNDARY COMMISSION

Petersburg Annexation
January 16, 1978

Conference telephone call
Commissioners present:

Sigvald Strandberg
Edwin Hopson
Jim Dobson
Josephine Anderson

Community & Regional Affairs personnel:

Eric Simpson -- assistant
Bill Pritchard -- assistant
Bruce Aronson
Doug Griffin

STRANDBERG: Have you all received the updating information from the City of Petersburg attorneys?

ANDERSON: Yes

HOPSON: I have not, Sig. I have not received that.

STRANDBERG: I see. The mails are a little slow getting over the Brooks Range, I guess, Edwin.

HOPSON: Yea, the Brooks Range is quite high, you know.

STRANDBERG: At any rate, let me, because you don't have it, let me go over what was submitted at our request. It's addressed to Eric Simpson, our staff member. (See attached)

(Two comments were made in the context of reading the letter.)

"...and listening to the tapes of the proceedings at the hearings." Comment: Sheila is not back in Anchorage yet. I tried to contact her this morning, and her secretary said she is returning imminently but not as yet. OK, continuing with the letter.

"...City may issue bond anticipation notes at the time of incurring the deficit according to AS 29.58.070."
Comment: Let me state to my fellow Commissioners he does not mean bond anticipation notes. He means revenue anticipation notes.

So, what is your reaction, fellow Commissioners? Starting with you, Edwin.

SIMPSON: Sig, may we ask a question, please?

STRANDBERG: Most certainly.

SIMPSON: Okay, we have some correspondence here from Lars Eide, Petersburg, postmarked January 10. Sig, the question we have is whether this should be appropriately entered in the record. As you know, we set the date for terminating any correspondence as January 5, the hearing was on the 9th, and this is postmarked the 10th. Do you think this should be entered?

STRANDBERG: Well, I don't see any harm. We're once again for the record quasi-legislative in nature, and we can fact find all we want up until the point we make our decision, so I don't think it will do any harm. I think my fellow Commissioners can handle a letter at this point and balance it against the factual record that we have on hand. Go ahead. Any objections, fellow Commissioners?

? No objection.

STRANDBERG: Good, let's hear it.

SIMPSON: (Letter attached. It was read verbatim.)

STRANDBERG: What is this gentleman's name again?

SIMPSON: Lars Eide E-I-D-E

STRANDBERG: Okay, real good.

PRITCHARD: Mr. Chairman?

STRANDBERG: Yes, who is it?

HOPSON: Sig?

PRITCHARD: No, Bill Pritchard.

STRANDBERG: Go ahead, Bill.

PRITCHARD: I would like to call to your attention and have it on the tape that the following people are present in our conference room this afternoon. Mr. Longworth, a citizen of Petersburg; Mr. Stanley R. Edwards, a legal investigator for James F. Petersen; and Mr. James F. Petersen, an attorney. These people are present this afternoon.

STRANDBERG: Okay, Mr. Longworth. Stanley who?

PRITCHARD: Stanley R. Edwards E-D-W-A-R-D-S

STRANDBERG: All right. RCA isn't coming through very well from the capitol today. And the third gentleman?

PRITCHARD: James F. Petersen P-E-T-E-R-S-E-N

STRANDBERG: Fine, very good. Nice to know who's in the audience.

PRITCHARD: And Mr. Longworth is Mr. John Longworth.

STRANDBERG: John Longworth, yes. Okay, Commissioners, we have before us the record of the City of Petersburg annexation petition...

DOBSON: Sig?

STRANDBERG: Yes, is that you Edwin?

DOBSON: No, Jim Dobson.

STRANDBERG: Oh, Jim. Good, I'm glad you're on the line.

DOBSON: Okay, I've been on the line for some time. What is the deal with the audience?

STRANDBERG: They are sitting in, Jim, as if this were our ordinary public decisional meeting, and they are sitting by a conference phone in Juneau.

DOBSON: I see.

STRANDBERG: For the information of the audience, the remainder of the audience here in Anchorage, Community and Regional Affairs Office is composed of Mr. Palmer McCarter, Director of Local Government Assistance, and Mr. Pat Poland, who is running our tape machine.

DOBSON: One more thing, Sig. I didn't receive...I have not received the Gold Streak from Alaska.

STRANDBERG: I'm surprised. They should have had yours there at the counter. In any event, Jim, it is in hands, and I have just received my copy having been too busy to pick mine up at Alaska Airlines here in Anchorage, and we read it over to Commissioners Anderson in Wrangell and Hopson in Barrow.

DOBSON: How long is it, Sig?

STRANDBERG: It four pages, and I would put you to sleep with it, but let me incapsulate what it states.

DOBSON: Sig, don't bother. I've heard the last part of it, and also it came in today at 11:40. It's over there, and, of course, I didn't have a chance to pick it up yet.

STRANDBERG: I see. What it does, in essence, I still want to go over very briefly, Jim. It affirms the $47,000 figure and differentiates from the $53,000 figure mentioned at the hearing by virtue of the non-resident students that attend Petersburg schools, from Kupreanof across the Narrows. Sales tax revenue--the City is

standing on its estimate having attempted to acquire more refined information from the business sources that would generate retail sales. On short notice many of the business people were unable to respond; others considered the information proprietory in nature and refused to give any more detailed information, and the City reaffirmed the standing policy of the Department of Revenue not to reveal information from individual accounts, of course, which makes sense. We business people appreciate that confidentiality and would understand it even under these circumstances.

Property valuation--the rationale or the basis used by the City, the 1975 estimate by Mr. Earl Simmons, who is the fee appraiser resident here in Anchorage, increased by an inflation factor of 5% per year, that's compounded 5% per year, and then the indication of the personal property valuation. I would say that the City has done the best that it could on these two questions.

The bonded indebtedness--they stand on that figure. Start-up costs--there's a brief discussion of the mechanics of how the City would transition the area insofar as covering the cost incurred in providing the services. And indicates the Petersburg charter (changing tapes) provision authorizing the issuance of revenue anticipation notes to cover any gap until an area proposed for annexation falls into line with the City budgeting time frame. And then, another discussion as to why the utilities were deleted from that levy. They are self-sustaining utilities.

So, basically, what it does is affirm the figures that they have submitted to us already, Jim.

DOBSON: Nothing on the differential factors, taxation.

STRANDBERG: Let me read you that particular paragraph, Jim. (Paragraph #7 of Jacobson letter read.)

Response, please?

ANDERSON: I have none on this particular part.

STRANDBERG: Jim?

DOBSON: No, I don't have any particular response to that.

STRANDBERG: Okay. Edwin?

HOPSON: No, I don't either, Sig.

STRANDBERG: Okay, at this point, let's take a look at the record itself. I'm satisfied with what is before us that the public hearing was--that the petition was in the proper form and the procedures were adequately noted as evidenced by the hearing notice itself and the posting affadivit, and more over by a very well-attended public

hearing in which we received a lot of very intelligent commentary on the part of the City of Petersburg and affected residents. The petition as a whole, of course, seems to indicate a novel, well not really novel, but a comprehensive approach to municipal government in the Petersburg area in that the petition proposes the accommodation of the entire balance of Mitkof Island, portions of which are obviously remote from the road systems, and it's in that context that we look at the petition in terms of a motion on the matter. Are we at this point, Commissioners, ready to take a vote on this petition? Starting with you, Edwin. Do you feel you're ready to vote on this matter today?

HOPSON: I'm undecided.

STRANDBERG: But you are ready to vote on a motion, is that right, Edwin?

HOPSON: Yes, I'm ready to vote on the motion.

STRANDBERG: Okay, Jo, at this point are you content ...

ANDERSON: Are you talking about the entirety of the petition; I mean, the area that is the petition, the entire island?

STRANDBERG: And Jim?

DOBSON: Jo asked a question.

STRANDBERG: I'm sorry.

ANDERSON: Are we speaking of voting on the entire island as being annexed?

STRANDBERG: We're speaking on our readiness to look at the entire proposal at this point.

DOBSON: Well, I think, Sig, what you're really looking at is any motion concerning the annexing of any portion of the entire island. Right?

STRANDBERG: That's correct, Jim. As long as we're content that we have a full record here and have given that the careful contention that is warranted, we can proceed with an idea and invite a motion at this time from the floor. If I might trace on the nature of the motion, let us do it positively. Make a motion in favor of accepting the City of Petersburg's petition with or without any changes. And, again, the floor is open, Commissioners. Do I hear a motion?

DOBSON: I'm waiting for Jo to make a motion.

ANDERSON: Okay, I'm just trying to decide how to make this motion. I would move that we approve the petition for annexation by the City of Petersburg with these reservations--perhaps I'm not wording this right--if the annex be to the fur farm.

STRANDBERG: And I presume, then, what you would propose is an east-west line at that point? Traversing the island, Jo?

ANDERSON: I'm sorry. I didn't understand what you said.

STRANDBERG: Well, If we went out the Mitkof Highway to the fur farm, and stopped then we would draw a line east and west across the Mitkof Island. Is that the sense of your motion?

ANDERSON: Yes, more or less. The map that I have, I don't have good section lines; I can't give you any real definite section lines on this.

STRANDBERG: Okay, it would be the south boundary of that Section 35 in which the fur farm is. Is that correct, Jo?

ANDERSON: Yes, I believe so. I think that the fur farm is included. It would be across from, from what my map, across a little bit above the green point mark. This is on Exhibit C.

STRANDBERG: All right, you're clear. Is there a second to that motion?

DOBSON: I'll second.

STRANDBERG: Okay, of course the floor is open during the course of discussion to any amendment to that motion, and I think we must bring up the point, fellow Commissioners, on the total City proposal to identify why we might on vote limit our attention to the areas outlined by Jo Anderson. And, Jim, would you like to lead forth on this point?

DOBSON: Sure. I would be opposed to the motion on the basis that both the City and the residents in the city and the residents outside the city each of which are not in favor of that particular motion. The city is interested in annexing the entirety of Mitkof Island for reasons this is coastal management and the people outside the city are opposed to the annexation-- some basically because they don't want to be in the city; some primarily because they didn't like, that there wasn't enough information presented to them in a timely fashion. Similarly, the people, most of which testified to the extent they felt like the information wasn't accurate and wasn't timely. From that, it seems that nobody would be in favor of that annexation as proposed except maybe a few Boundary Commissioners.

STRANDBERG: Ed, up in Barrow. How do you feel?

HOPSON: I don't have the map before me, but visualizing on the map, the only question that I have is are you going northeast on the coast there? That's the motion that covers the

STRANDBERG: It's a little less than half the island which it contains in Jo's motion at this point. What is left out of her motion is the remainder of the highway link portion of the island down to the summer recreational area starting on Sumner Straits.

(Tape was changed here. Some words were not audible.)

...and drive straight. It excludes, for instance, the City of Petersburg's hydro plant down on Blind Slough, which is about three

miles beyond where we drove the car when we were down there in Petersburg last week. Ed, any further comments at this point from your prospective?

HOPSON: You asking me?

STRANDBERG: Yes, Ed.

HOPSON: No, I don't have any other comments. That's the only question I have is what the motion covers.

STRANDBERG: Okay, fine.

HOPSON: I think I'm clarified on that point.

STRANDBERG: Right. Now, Jo, I should have let you go first since you made the motion, but let's

ANDERSON: No, there's no second on this motion, so it's dead by lack of a second, is it not?

STRANDBERG: I think, Jo, that Jim seconded it ( ) the conversation, did you not, Jim?

DOBSON: Yes, I did.

STRANDBERG: Yes, okay, so it's properly before us, and go ahead, Jo.

ANDERSON: I'm sorry, I'm not hearing you very well. It's not coming through too clearly. Would you please repeat what you...

STRANDBERG: Jo, if you would go ahead now and speak to your emotions and then I'll follow up as a Commission member myself...my own thoughts.

ANDERSON: All right, fine. My feeling on the motion...the road to the property approximately to the fur farm is about as near urban an area as we can find any place on this island out to the fur farm. We saw the houses were slightly on the...they were getting quite scarce, but there was some housing there. People that I have talked to that were in favor of the annexation and were not necessarily in favor of the whole island felt that this area was more or less urban to this point and that was the reason for my motion.

STRANDBERG: Okay, as chairman, let me take my turn here as a Commissioner, and introduce my thoughts. The southeastern area of Alaska as a whole is largely composed of unorganized borough territory, with city jurisdictions, at least in the smaller communities, assuming most of the local government powers; of course, we have exceptions... the exceptions being the Ketchikan Gateway Borough, the unified Sitka Borough, the unified City and Borough of Juneau, and the Haines Borough. What the City has brought before us here is what at first blush would appear to be a rather ambitious city-type

annexation proposal tempered with a very important provision that a differential taxation in order to attempt to preserve the equities of an annexation so that taxpayers would pay for services reasonably considered to be rendered. The point brought up by the City in support of the larger annexation seems to stem from the fact that the state is finally getting along to the Statehood Act selections of forest lands to which the state has long been entitled. The City, of course, wants to be in line for making some community development related selections from these lands which they are patented to the state to the extent that the state classifies the land as vacant, unappropriated and unreserved or directly identifies them as community development lands.

Secondly, this whole question of coastal zone management which to many of us has appeared for the last year and a half or so is somewhat of a mystery stemming from what the Congress itself is contemplating in terms of coastal zone management. Consequently, some logical spokeman for what happens along the coastal areas in the Petersburg vicinity. I would say that a fundamental problem in Southeastern Alaska is that there are an insufficient number of borough jurisdictions to bond on behalf of interests of communities in relation to prospective entry uses on the coastline. Consequently, the extension of a City jurisdiction coupled with differential taxation may be the best way to go at this juncture because we don't know what the future portends insofar as governmental acitivity on the federal/state level regarding uses of coastal zones.

At this point I'm going to stop and let you other Commissioners respond to what I've just said.

DOBSON: I'll go ahead, Sig.

STRANDBERG: Yea, Jim.

DOBSON: As I understand what you said, you think at the present time possibly this strip annexation along the road leading out of town down Mitkof Island would be the proper thing to do. Is that correct?

STRANDBERG: Jim, I'm thinking that we ought to be careful in this case limiting our scope of attention to an area such as Jo's outlined. In view of the need to have a community such as Petersburg maintain a strong enough voice and what happens in terms of development along the coastline. I know that sounds kind of nebulous at this particular point, but I think there's enough on the record to indicate the good faith of the City to which, incidentally, the citizens themselves in failing that the Boundary Commission in the future can hold them to would warrant our taking a look at expanding this proposal and voting on the entire balance of the island.

DOBSON: Well, I certainly think that the City has done inadequate preparation for us to consider the entire island, but if we were going to vote on anything I think Jo's proposal would be the proper proposal. I

think that the City is going to have to come to the realization that the entire Mitkof Island probably should not follow the same ordinances undoubtedly should not follow the same ordinances that the present City boundaries do. If they selected under another terminology--maybe a borough with a new set of ordinances that are designed to take care of the wilderness areas rather than in terms of planning and zoning, things concerned about coastal zone management and selection of State lands. I don't think that we can realistically at this time given the information that we have in keeping in mind that we're still not sure from the information that the City has been able to provide us whether or not the residents both inside the City and outside the City, are going to financially benefit from this annexation. I think that they're just premature in looking at the whole island.

STRANDBERG: Thank you, Jim. Edwin, comments?

HOPSON: No, no other comments.

STRANDBERG: Okay. Jo, follow up on that discussion?

ANDERSON: Well, what Jim said just furthered my feelings on the whole thing. I agree with the things Jim said. That is my feeling also.

STRANDBERG: Okay. I want to make sure that our record reflects, and it does now, our concern and attentive ear to what the City is proposing in terms of going for the entire island. I know we Commissioners are concerned that the Petersburg community is a whole which I feel takes in all the residents within reach of that road system. These people are finally concerned about their governmental activity that might act to stimulate or discourage development that has to do with their economic position and viability as a community. Consequently, I felt it important that we look at the fact that there is no other local government jurisdiction other than a City of Petersburg in that vicinity right now, and, of course, a City of Kupreanof across the Narrows. Of course, that same situation holds forth down in Wrangell. I think at this point that you are probably right that a further justification would have to be submitted by the City in order to persuade the Commission on the merits of extending the City boundaries that far out ' the balance of the island.

We have before us the motion to make sure now, Jo, th : we have it correctly, and I have the map right in front of me, the master map, and looking on yours, we see the fur farm, and then as you go just below it there's a section line, is that correct?

ANDERSON: My map does not show the fur farm, but I'm sure that you are correct.

STRANDBERG: Fine. Now, the line I'm drawing across the map then on the south section line of 35 and Township 59 South, range 80 East.

PRITCHARD: No, 79 East, aren't we?

STRANDBERG: 1-2-3-4-5-6-7 You're right. 79 East. Range 79 East. What is that--Copper River Mining?

PRITCHARD: Right.

STRANDBERG: All right, now, Bill, are you following me on the map?

PRITCHARD: Yea.

STRANDBERG: All right, now the essence of your motion, Jo, is for the Petersburg City boundary to include all of Mitkof Island north of that southerly section line, the section line just below the fur farm?

ANDERSON: Yes.

STRANDBERG: Okay. Now are there any other problems with the Petersburg boundary in the Wrangell Narrows or Frederick Sound vicinity? Any ambiguities in the legal description? And I'll direct this to Mr. Pritchard.

PRITCHARD: Well, Sig, we have two questions down here. First, let's go west. Are we coming out to the center--is that where you want to come as the original one went of the Narrows, and then following the center of the Narrows?

STRANDBERG: Yes, that's where the City petition goes out to. Is that correct, center of the Narrows?

PRITCHARD: Now on your west side, your extension. What are you going to do on your extension on your west side of the south boundary of T59 S. You're going to extend it how far? It has to be protracted out there.

STRANDBERG: Out to--what would be appropriate? Out to mean low water, I would guess.

PRITCHARD: All right, we're going to mean low water on that then? The extension out to mean low water extends following the mean low water which would be in a northwesterly direction until we come its intersection with the projected center line of Wrangell Narrows.

STRANDBERG: That is correct.

PRITCHARD: Okay. And also note here, Sig, between Sections 31 and 36 we will also put in that little change in there. You see it on the map? 31 and 36?

STRANDBERG: Yes, I do. The range change, William?

PRITCHARD: Yea. Look between 36 and 31 there on 59 South. You see the correction line in there? Don't forget that's in there so we want to be sure to have that in the boundary description. Right?

STRANDBERG: Because you're going to a different range...correct?

PRITCHARD: No, it's just a change that's made. You have some surveyed and unsurveyed territory there...see the little jog there?

STRANDBERG: Okay, I'm following it now.

PRITCHARD: There seems to be a problem up in the north corner, Sig. I was coming along the center line of the Narrows and then coming along to the mean low tide, and the extension of that tide until it intersected the mean low water of the center of the Narrows. Some don't like that description here at all.

STRANDBERG: Well, what would be better?

PRITCHARD: We've got to come ov[illegible]r...You have the maps up there, and I haven't got the Petersburg maps here. You'd better look at it there and give me the boundary up there. I'm getting the boundary description book now.

All right. And I'm trying to see what point along the water the current description utilizes. And I see

DOBSON: Sig?

STRANDBERG: Yes, go ahead.

DOBSON: If I may make a suggestion on this deal. It's very difficult for all of us to agree on an exact boundary over the phone.

STRANDBERG: Nevertheless, Jim, I think we're pretty close, and that's what we'll have to do, so it's clear that we're all voting on the same thing. So that nobody can dispute us.

DOBSON: I think you don't want an exact boundary description. What we need is to vote on the concept of the motion and we're going to have to approve...we should approve the thing in writing. This thing over the phone is very, very difficult.

STRANDBERG: Yea, well, we're facing a time frame problem. We have this answer. And we're going to get quickly to that substance, and I wanted to clear this up while we're on the subject without changing it. I think we're going to have to be careful of Kupreanof boundaries, Bill.

PRITCHARD: Yes, but Kupreanof is not going to bother this at all because we measured that completely out. Don't you remember at the time Kupreanof vs. the boundaries of Petersburg, Sig?

STRANDBERG: Fine. Okay, we're going to go along Wrangell Narrows, what the center line of it? Would that be all right?

PRITCHARD: Okay.

STRANDBERG: I think that would suffice and it wouldn't...and mean low water on Frederick Sound, and I think that the facts of the problem.

PRITCHARD: All right. Sig, are you saying that, of course, we're on a rush on this thing, you see, to the extent of getting it in. We'll write a description. Eric will write a description, bringing it up to that point there. We may have to use along the Narrows, along Frederick Sound, ...

STRANDBERG: A protraction?

PRITCHARD: We may have to use from the old one there going along the mean low water of Frederick Sound in a northwesterly direction to the mouth to the center of the mouth of the Wrangell Narrows.

STRANDBERG: That's adequate. That's perfect. Okay. Very good. I think we have before us then the description and now to the meat of it. Any other comments on the motion, please?

DOBSON: Sig? Jim.

STRANDBERG: Yea, Jim.

DOBSON: When you get ready to call the roll, would you have the clerk call the roll alphabetically?

STRANDBERG: Let me get all your names in front of me. I'm getting the file out here so that I have everybody's in front of me. Okay. Now the other item that we should do is look at our annexation standards and I think that the sense of the motion is that the territory included does meet contiguous to the City, important portions of it, of course, all of the area can benefit from municipal services and important portions of it will benefit specifically from the whole range of services provided by the City of Petersburg. There is likelihood of future growth and development of the City in this territory, I think that's satisfactory. I think it shows that the City in its petition has met those specific tests, so are we ready to vote?

DOBSON: One thing before you vote, Sig. I think we need to really analyze what the City has asked for. They did not ask for this annexation that we're about ready to vote on, and also we do have any financial information to be certain that this is going to benefit the people inside and outside the city, and you also said something about the utilities in the area. We need to really understand that until the utilities themselves are a function of the City, that they do sell these services to the people outside the City and they are available on a pay-as-you-go basis. That certainly would be important even if it was annexed.

STRANDBERG: I'm reading on what you're saying Jim. The utilities services of the City of Petersburg are available to any resident and the utility services we're talking about are those that are fully self-sustaining in nature from the user charges as opposed to any mill rate, and should be distinguished from

DOBSON: What you have to realize is that they are not just available to the City residents...they are available to non-city residents on a 100% basis.

STRANDBERG: That's correct. As to the question of the financial aspects of the proposed annexation...the City has, I think, and I'm just going to say in my judgment, made a fair examination of the financial implications short of actually doing a very extensive fee appraisal of the property in a proposed annexation area. In advance of any kind of an assurance to recover that kind of a cost, which would be obviously several thousands of dollars.

DOBSON: Well, I disagree with that, Sig. I think they did a rushed appraisal of cost benefit ratios and that both of the figures were thrown together. We ask that they come back with some more figures that they gave us very little substantiation to support it.

STRANDBERG: Well, again, Jim, and I don't want to appear that I'm going to debate the thing to death. But, there's only so much that a City can produce in terms of information on that sales tax. I doubt whether they could extract it out of the proprietors even in a court proceeding.

DOBSON: I don't think it's just a question of sales tax. I think it's also a question of lost revenue the City just chose to ignore.

STRANDBERG: Well, we go back to the petition, Jim and we look at their figures, and they reaffirm their $47,000 figure on the school district, and I don't know how they can refine that any better than they have. Or, how we could. ... Are we ready to vote?

Mrs. Anderson

ANDERSON: I vote yes.

STRANDBERG: Mr. Dobson

DOBSON: No

STRANDBERG: Mr. Hopson

HOPSON: I vote yes.

STRANDBERG: Chair votes yes. The motion passes by a vote of 3 in favor, 1 against. Missing and excused, Commissioner Sheila Gallagher, who has been out of town during the month of January.

Anything else, fellow Commissioners? Our direction to our staff is to prepare the recommendations to be presented to the current session of the Legislature to be submitted no later than 9:30a.m. Wednesday of this week.

SIMPSON: Okay, Sig, this is Eric. We don't have to have it in until 4:30p.m. on Thursday.

DOBSON: Right, that's the 19th.

STRANDBERG: All right, fine. Let's modify that then to be sure that the recommendation is logged in by that time that you stated.

SIMPSON: Fine, thank you.

DOBSON: Would you give me a call when you get a chance?

STRANDBERG: Call you? What's your number?

DOBSON: 452-1014

STRANDBERG: 452-1014. Okay, fine Jim. And thank you all. This meeting is now adjourned at 1:50 p.m.

Re: Petersburg Annexation Proposal
L.B.C. Supplemental Information

Dear Mr. Simpson:

This office as legal counsel for the City of Petersburg has been requested by members of the Local Boundary Commission to furnish additional data to supplement the hearing record. This letter constitutes a best efforts basis to furnish that information and it should be mentioned that since a quorum of members were physically present for the hearing, the City of Petersburg waives any objection to the participation in the deliberations by absent member Sheila Gallagher conditioned on her reading of the documentation and listening to the tapes of proceedings at the hearing.

1. Lost School Revenue. The $47,000 figure submitted by the City of Petersburg as revenue lost from the State for payment of non-resident student tuition is accurate. The figure of $53,000 mentioned by the protestants at the hearing is based on the last school year (when enrollment was slightly up), coupled with failure to consider that five of the non-resident students are from Kupreanof in which case the non-resident payment from the State would continue in any event. Miss Curtiss Attorney 5 Jan

2. Sales Tax Revenues. The afternoon of January 10, I resolved to follow through the best I could on the request for additional sales tax data. Unfortunately, I report that my worst suspicions about obtaining hard information were confirmed. I instructed Patty Curtiss, secretary to

the City Manager, to call out to all of the businesses and ascertain an estimate of gross sales tax revenues from each of them assuming that they were subject to the City's jurisdiction and imposing a 5% sales tax with a $1,000 transactional ceiling. She reported back to me mid-morning of January 11, 1978 and advised that her responses fell into three categories. The first category was the "no contacts" where she was unable to contact the proprietor. The second and largest category was composed of those businesses who said they would call back later and one who requested that Patty call them back later. The third category, including the liquor store, flatly refused to divulge any information The City of Petersburg is not in a position to obtain from the Alaska Department of Revenue the gross revenue figures reported by the various enterprises since that is privileged information. I am not sure that that would do too much good anyway, because I doubt if all of them file business license returns. For example, and the only enterprise on which I can furnish concrete data, specifically the Petersburg Consumer's Co-op, does not file a business license return notwithstanding that our litigation with them over the sales tax revealed that they order four or five shipments per year varying in range from $14,000 to $24,000 each. The lumber mill reported that it had no retail sales. The proprietors of the building stores were in the "call-back" category, and Sonny Hicks the owner of the Beachcomber could not be located by Patty. We are unable to furnish any meaningful data on the volume of business in the territory outside of the City to justify either an upward or downward adjustment in the original sales tax revenue estimate of $149,000.

3. Property Valuation. Taxes on the total real property were calculated at a 7 mill levy against $6,790,000 on real property and $250,000 on personal property. As indicated in the earlier submitted "Affidavit re Information Sources", the real property was estimated by the City Clerk's taking and updating an appraisal submitted by Mr. Erroll Simmons in 1975. She used an inflation factor of 5% per year. The personal property valuation was predicated on an estimate of equipment owned by the two major logging companies, Reed Brothers and Olsen & Sons, Ltd. The personal property valuation is conservative. No attempt was made to adjust the real property valuation for senior citizen exemptions and leases of government property which would now be subject to tax.

4. Bonded Indebtedness. The City of Petersburg's figures submitted on a separate sheet reciting the general obligation and revenue bond indebtedness are accurate. There have been no bond issues of either kind since June, 1977.

5. Financial Data Generally. To the extent that the City of Petersburg is remiss in submitting financial data to the Commission respecting the fiscal repercussions of the proposed annexation, the broad brush can be attributed to the fact that the City of Petersburg does not have a finance director, and secondly and more importantly, to me as the City's attorney who did not instruct the City Administratio to be prepared on that issue any further than the documentation submitted. The reasoning for that was in the three annexation matters which I have previously participated or followed, such data was not requested, nor was I of the opinion that the financial viability of an annexation proposal was one of the standards promulgated in 19 AAC 05.010 or the Alaska Constitution. Inasmuch, however, as an annexation proceeding is a quasi-legislative or political act in contrast to a judicial proceeding, the Commission's concern on that issue is at least understandable.

6. Start-up Costs. The Commission is apparently concerned about the possibility that cost of extending general services circa March 1978 when the Alaska Legislature would approve any proposal would create a financial drain on the City of Petersburg's general fund which was unforeseen, unbudgeted, and could not be made up until the 1979 tax levy. I am strongly inclined to agree with that assessment about a short-term negative cash flow but similarly inclined to discount its magnitude predicated on the knowledge that many of the general services, including extra-territorial fire, police protection and ambulance service have been provided heretofore. In the event of annexation approval and the incurrence of a deficit later in calendar year 1978 and the first part of 1979, the City may issue bond anticipation notes at the time of incurring the deficit according to AS 29.58.070. Alternatively, the City of Petersburg, being a home-rule municipality is not limited to the conventional financing procedures enumerated in the statutes and Sec. 14.1(a)(3) of the City Charter expressly authorizes the issuance of revenue or tax anticipation notes. Moreover, that might not even be necessary since the Legislature's prospective approval of the annexation would be known by the end of February 1978, there is ample time for the City to accomodate any additional expenses foreseen as stemming from the additional services in the annexed area prior to formulation of its budget and adoption of such budget by the June 15 date mandated by Statute.

7. Fifty Percent Tax Levy. The differential tax zones as originally proposed drew a close parallel to those utilized in Wrangell's annexation. Subsequently the Council at a meeting on January 3, 1978 determined that it did not want the tax levy pegged to the utility services afforded since they were at least in theory financially self-sustaining. The City accordingly submitted an Addendum dated January 6, 1978 deleting the tie-in of the tax levy to the utility services, and keeping the 50% tax levy for basic general services and administration. This seemingly comports with the question raised in the January 4, 1978 report to the Local Boundary Commission by the Department of Community & Regional Affairs Local Government Assistance Section wherein it stated:

> "The Department raises the question of whether it would be appropriate for the City to collect property tax for the utility functions. The utilities would normally be considered an enterprise function which would be self-supportive from the user rates or surcharges associated with the particular utility."

The first year 50% figure is admittedly somewhat arbitrary and would invoke some isolated cases of unfairness. Working from the general 50% zone as a starting point, it was felt by the Council that it would be appropriate for the newly-enfranchised taxpayers to participate in the adjustments and fine tuning respecting the establishment of differential zones in tax year #2 (1980).

I apologize for not being able to furnish you with better data respecting the projected sales tax revenues, but please advise if you think I may be of further assistance.

Respectfully submitted,

ROBERTSON, MONAGLE, EASTAUGH & BRADLEY

City Manager

Statement on Annexation - 1977-78

There are many aspects to be considered on annexation of the balance of Mitkof Island to the City of Petersburg before a final decision is made. As the ordinance now reads, if I understand it, I'm absolutely opposed to it.

Firstly, I'm opposed to annexation on a moral basis in that the residents of the area in question do not have any say-so in the process. In fact, even the citizens of the town itself, have no direct vote on the issue. It is a decision of six people on the council controlling the destiny of not only the epople now living inside the present city limits, but also those living without. I am quite sure that if a poll were to be taken, those people living outside of the present city would vote 90% to 95% against annexation. To be not able to control your own destiny, is not the democratic way of life as we have known it in this great land of ours.

Now for the hard facts of the cost of this monstrosity, I'm quite sure that in the final analysis, it will actually cost the present residents of Petersburg more than if the area in question is not annexed.

As I understand it, the schools would lose about $53,000.00 in state funds, which is paid to the schools for those children living outside the city. This is a considerable amount, and if the grapevine telegraph is correct, the present school administration is opposed to the move because of the loss of such a sum.

If we were to be annexed, there are services that must be provided. The two main services involved are water and sewer. Looking at the present high cost of construction, I'm quite sure that these two services can not be provided for less than $7,000,000. And these are the two main services of any city!

Another service that must be provided is fire protection and there is not any way under the sun to give fire protection without an adequate water system, with hydrants located within reasonable distances of all homes. Also there must be a fire engine located within the area involved. Even though the City of Petersburg has the best volunteer fire department in the state, it is impossible to get true protection where the fire engines are located 1½ to 38 miles from the areas to be protected.

While on the subject of protection, let us go into police protection. To be properly policed and patrolled in the area that we are talking about, another police car would be needed, as well as three or four patrolmen. I'm sure that all we could get in the line of patrol, would be one or two tours per night if the police force were not increased and another police car not added to the fleet. Then also, while this area was being patrolled, the City itself would not be having any protection what-so-ever. Now all of these so-called services would be costing you and I, the tax payer, more money.

Now if this business of annexation is to increase the tax base in order for the city to go in debt farther through bond issues, then I'm very much opposed to

annexation which I'm sure all clear thinking citizens of Petersburg would also be. It must be realized that all bond issues must be re-paid and the only way to repay those debts is by higher taxation. It must be very clear that the residents of Petersburg are hgghly incensed and opposed to paying more taxes.

In another area of services that are rendered, let us take the hospital for instance. From what I've been made to believe, it is on a paying basis. Perhaps it is not making a huge profit but nevertheless it is paying its own way. I'm quite sure that the Scow Bay residents who use this facility pay for the care given them and that because of the added revenue that is brought in, they help support and make this a going and profitable operation.

Now we will go into the operation of the power and light department. If we are to be annexed, the city will lose the surcharge that is added to our monthly bill. This alone will amount to a considerable amount of monies when added up at the end of the year. It must be remembered that the power lines from the Blind Slough hydroplant go through this area. Also if the area is annexed, I would presume that the city would put in street lighting of sufficient luminosity that we would have a well lighted street at all times. Personally, I would hate to pay for the capital expenditure plus the cost of energy on this operation.

It has been noted by some people that we would not receive all of the services and that we would be taxed only in proportion to the services that we receive. If so, what services will we receive? And also, will the taxes be arbitrarily set on these services? And will the taxes to pay for the administration and clerical work of these services be in proportion to the taxes paid by the city residents. If, for instance, we do not receive sewer or water, will we be taxed for administration of those services within the present city?

As another item of interest, it might be well to remember that the businesses that are bringing <u>new</u> monies into the area at all times, are the businesses that would be hardest hit by these taxes. With the timber industry in its present unsettled state, it would be almost criminal to saddle an industry with new taxes. Something like this might be the "straw that broke the camel's back" and there would be 40 to 50 men on unemployment rolls. And if that should happen there would be no monies coming in with which to pay taxes.

Again let me impress upon your the loss of state school funds, the added capital costs and maintenance of the services if and when provided. Also bear in mind that those people living outside of the present city limits did so at their own choosing, which is the great Americam way of life. Let us have a democracy where people control their own destiny and way of life. This is a moral issue concerning the very roots of democracy.

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE

FEBRUARY 16, 1978

Present: Chairman Orsini, Senators Willis and Hackney. Bruce Aronson; Doug Griffin.

Absent: Senator Sumner and Senator Ferguson

The meeting was called to order by Chairman Orsini at 3:10 PM.

STRANDBERG CONFIRMATION

Chairman Orsini asked if Committee members wished to hold separate confirmation hearings on the reappointment of Sigvald Strandberg to the Local Boundary Commission. Committee members expressed the view that they were familiar with Mr. Strandberg's work on the commission and did not believe that separate hearings would be necessary.

PETERSBURG ANNEXATION (SJR - 40)

Chairman Orsini drew the members' attention to a SC/RA staff study analyzing the economic effects of the recommended annexation of land by the City of Petersburg. He noted that the figures indicated the probability of the City's expenses and new revenue form annexation balancing out, provided the City maintained its present level of services to the annexed area.

Senator Willis noted that the Boundary Commission could have held an advisory election in Petersburg to determine local support for the annexation but that the legislature had no authority to instruct the Commission.

Pending action by the House CRA Committee, Committee members agreed to hold action on SJR 40 unless the members wished the issue to be brought up again for discussion.

COASTAL ZONE MANAGEMENT

Chairman Orsini said that the Guidelines and Standards for the Alaska Coastal Management Program would require a detailed review if the Committee wished to deal specifically with the many points being raised regarding the implementation of the Coastal Management Program.

Senator Hackney said that he was impressed by the Petersburg situation where one of the motivations for annexation was a desire to secure local control over the coastal management of Mitkof Island.

The Committee members expressed their desire to undertake a sectional review of the draft Guidelines and Standards.

OTHER

Chairman Orsini discussed with Committee members the status of CSHB 133 before the House Finance Committee and its Senate counterpart,

CSSB 241.

The Chairman also informed members about the provisions of SB 501 pertaining to binding arbitration and stated that he intended to schedule hearings on the bill within two to three weeks.

Chairman Orsini called an executive session of the Committee to discuss Budget and Audit Committee actions with respect to Coastal Management.

The meeting was adjourned at 4:00 PM.

Minutes S/CRA 2-16-78

Strandberg Confirmation

Chairman Orsini asked if Committee members wished to hold separate confirmation hearings on the reappointment of Sigvald Strandberg to the Local Boundary Commission. Committee members expressed the view that they were familiar with Mr. Strandberg's work on the commission and did not believe that separate hearings would be necessary.

Petersburg Annexation (SJR-40)

Chairman Orsini drew the members' attention to a SC/RA staff study analyzing the economic effects of the recommended annexation of land by the City of Petersburg. He noted that the figures indicated the probability of the City's expenses and new revenue balancing out, provided the City maintained its present level of services to the annexed area.

drop ?

Senator Hackney made reference to mail from the Petersburg area and questioned whether Committee members would be able to obtain a clearer view of the situation by holding hearings locally.

Senator Willis noted that the Boundary Commission could have held an advisory election in Petersburg to determine local support for the annexation. that the elected representatives from the Petersburg area strong supported annexation and he respected their position ns.

Pending action by the House CRA Committee,
/the Committee members agreed to hold action on SJR 40 unless a member wished the issue to be brought up again for discussion.

Coastal Zone Management

Chairman Orsini said that the Guidelines and Standards for the Alaska Coastal Management Program would require a detailed review if the Committee wished to deal specifically with the many points being raised regarding the implementation of the Coastal Management Program.

Senator Hackney said that he was impressed by the Petersburg a situation where one of the motivations for annexation was a desire to secure local control over the coastal management of Mitkof Island.

The Committee members expressed their desire to undertake a sectional review of the draft Guidelines and Standards.

Other

Chairman Orsini discussed with Committee members ~~on~~ the status of ~~H~~ CSHB 133 before the House Finance Committee and ~~of~~ its Senate counterpart, CSSB 241.

The Chairman also informed members about the provisions of SB 501 pertaining to binding arbitration and stated that he intended to schedule hearings on the bill within two to three weeks.

The meeting was adjourned at 4:00 PM ~~and~~ Chairman Orsini called an executive session of the Committee to discuss coastal management.

Re: Local Boundary Commission's Recommendations
Re Area To Be Annexed To Petersburg

Dear Senator Orsini:

I am a resident, registered voter, taxpayer, property owner and citizen of the City of Petersburg.

The City of Petersburg petitioned the Local Boundary Commission of the State of Alaska to annex to said City of Petersburg all of Mitkof Island, an additional area of approximately two hundred eleven square miles, an area one hundred times larger than the existing area of said city. The Local Boundary Commission in turn recommended to you that a portion of the area petitioned for be annexed to the City of Petersburg. I have reviewed the petition and all exhibits attached to the petition as a concerned citizen and taxpayer of the City of Petersburg. The recommendations of the Local Boundary Commission, based upon the information contained in said petitions and exhibits and the testimony in favor of the annexation or any expansion of the existing boundaries of the City of Petersburg would be ill-founded and based on substantially erroneous information and projections which will cause irreparable harm and injury to the City of Petersburg and its citizens.

I have spent a considerable amount of time reviewing, analyzing and verifying the information and projections contained in the petition, exhibits and the presentation made by the five people speaking in favor of the annexation at the public hearing held by the Local Boundary Commission in Petersburg on January 9, 1978. That data in brief summary is erroneous and misleading in the following particulars:

1) House-to-house survey of the population to be annexed is 437. The city utilized a figure of 514, which is 15% off. This figure has been further reduced by the change of boundary recommended by the Local Boundary Commission to 402, this figure is now 20% off.

2) City figures given at the public hearing indicated a $1.00 per month increase in power rates after annexation takes place. The actual figures show the increase will be $2.26 per month. The city's figure is 126% in error.

3) It would take approximately three million dollars in retail sales under $1,000 each to generate the $150,000 in sales tax revenue as the city engineer stated at the public hearing. City ordinance stipulates that sales tax can be charged only on sales up to $1,000 on any one sale. Any amount above $1,000 on any single sale is tax exempt.

4) I personally interviewed the business establishments outside the existing city limits who would be subject to sales tax in the event of annexation, I find that the amount collected would not exceed $50,000. Again, the city's figures are off by 300%

It was obvious to the public that the city's facts and figures as presented at the public hearing were erroneous to the extent that the Local Boundary Commission requested the city for more accurate figures. I have tried to obtain these new figures but have been denied access to this information. In fact, the city attorney instructed city employees not to discuss any matters pertaining to annexation with the public.

On the 26th day of August, 1975, an election was held in the City of Petersburg and included in said election was an annexation proposal to expand the existing boundaries of the City of Petersburg. Said proposition was strongly defeated by the voters of the City of Petersburg with 279 voting <u>against</u> annexation and only 73 voting <u>for</u> annexation.

I attended the public hearing on the 9th of January, 1978, and the participants, by a show of hands, indicated that they were clearly opposed to any proposed annexation. I personally counted the people in the council chamber, excluding Boundary Commission members, and there were 98 people in the council chamber and additional people in the hallway who were coming and going. Of the 98 people in the chamber room, 11 indicated approval of the proposed annexation or expansion of the city boundaries and the remainder indicated disapproval. Of the 11 people indicating approval, at least 5 were city employees and council members. The majority of the people who testified <u>against</u> annexation at this meeting were residents from <u>within</u> the city limits.

The notice of the public hearing given by the Local Boundary Commission stated that all written materials were to be submitted by January 5, 1978; however, the proponents of the boundary change submitted additional written materials on

the night of the hearing and, as stated previously, continued to submit undisclosed materials after that time. At the conclusion of the hearing, the chairman announced that the evidence was all in and that the Commission would make its decision on the evidence which had been submitted. The additional information submitted to the Commission since that time is contrary to that announcement and deprives the citizens of Petersburg of substantial rights.

I also attended the hearing on the ordinance pertaining to the petition to be submitted to the Local Boundary Commission. There were 75 people who attended that hearing, which was held on November 21, 1977. To the best of my recollection, of the 75 people who attended the hearing on the ordinance, only one person, a city employee, testified in favor of the ordinance. The public input on the annexation question before the city council, the Local Boundary Commission, and the actual election returns, all make it clear that the overwhelming majority of the citizens of Petersburg are presently opposed to any expansion of the existing boundaries of the City of Petersburg. Any recommendation for such expansion of the boundary would make a mockery of the public hearings and the public input on said issue and, as previously stated, will cause irreparable harm and injury to the residents and citizens of the City of Petersburg.

The two remaining required readings and the public hearing of the proposed ordinance, Ordinance #381 of the City of Petersburg, without any public notice, were all accomplished on the same night, November 21, 1977. The whole thing was accomplished within hours, including "Goldstreaking" the petition to the Department of Community and Regional Affairs.

After we learned of the recommendation of the Local Boundary Commission, we circulated petitions in Petersburg and in three days time we obtained 543 signatures of the adult residents of Petersburg. For your information, the normal voter turnout in Petersburg for a general election is approximately 500 people.

I respectfully request that you and your fellow legislators show to the people of Petersburg that the wishes of the people should not and cannot be ignored, and that you pass a Concurrent Resolution rejecting the recommendations of the Local Boundary Commission on the Petersburg annexation.

Very truly yours

Ed Lapeyri

Re Local Boundary Commission's Recommendations
Re Area To Be Annexed To Petersburg

Dear Senator Orsini:

I am most aware of the tremendous and perplexing problems facing this second session of the Tenth Legislature; therefore, it is somewhat embarrassing for me to have to write to you and request that you take the time to aid and assist us in settling what should be a very local problem in our island community of Petersburg. This is a problem that could have been settled, and should have been settled, without any fanfare, and I have no doubt that it would have been settled had it been presented to the people of the Petersburg area on a timely and reasonable basis.

I have been a resident of Alaska since December of 1940, and a resident residing within the existing boundaries of Petersburg since September of 1941. I served on the local city council at various times and I also served in the first, second, and third sessions of the Alaska Legislature, so I am not totally unfamiliar with government and governmental processes.

As is the case with the great majority of Alaskans, I am violently opposed to the treatment that our state is receiving on the D2 Land issue. Alaskans are being given no opportunity to have any say in determining the settlement of a problem which is purely one involving our own state.

A parallel situation, however in reverse, exists in reference to the petition presented by the city council to the Local Boundary Commission and the Local Boundary Commission's recommendation to the legislature regarding the annexation of land outside of the existing city limits of Petersburg. These things were all accomplished without giving the people of Mitkof Island, and particularly in Petersburg, a chance to express their concerns and views, not even in that most democratic manner--the ballot box.

The city administration and the city council have refused to respond to direct questions as to what the residents, either inside or outside the city, may expect in the way of increased costs of operation of municipal government, increased services, including utilities, and any other impact that this proposed annexation may have upon our community.

The petition prepared by the city administration and under the direction of the city council did have several points which they alleged were the basis for their requesting that all of Mitkof Island be annexed to the City of Petersburg. These were such things as, coastal zone management of the whole area; recreational areas, such as the Three Lakes Recreation Area and the Blind Slough Recreation Areas, the Crystal Lake Hydroelectric Watershed, and several other allegations which would supposedly be beneficial to the community. The recommendations of the Local Boundary Commission to the legislature, however, basically eliminated these things that the City of Petersburg was allegedly seeking by petitioning for this annextion.

I happened to be in Juneau on the 16th of January and stopped by the Department of Community and Regional Affairs office and made inquiry of what decisions the Local Boundary Commission had made. Mr. Pritchard of that office informed me that the Local Boundary Commission had not yet made a decision; however, they were going to have a telephonic conference that afternoon and they would make a decision at that time. He informed me that it would be on a speaker phone in their conference room and I was most welcome to listen in to the decisional meeting as all meetings of the Local Boundary Commission were open to the public. I informed him that I would be happy to listen in on that meeting. I arrived at the appointed time and heard the telephonic conference of the Local Boundary Commission's decisional meeting on the Petersburg matter. When the Local Boundary Commission had held their public meeting on January 9 in Petersburg, they had informed the public, both by the notices posted and at the meeting itself that all written statements or information pertaining to the annexation question had to be submitted by January 5 and that all testimony would be taken on January 9 and then based upon this information, they would arrive at a decision. As it developed in the telephone conference meeting, the city had submitted additional documentation contrary to the notices and public announcement in a lengthy letter from the city attorney. This letter was read in its entirety to the members of the Commission. Apparently this letter and other materials had been sent by Gold Streak by the Department of Community and Regional Affairs to the five commissioners; however, it came out during the conference that two

of the commissioners had not received the material and did not have any of the material in front of them at the time of the telephone conference. The credibility and insufficiency of the information supplied to them was discussed, then by a motion of one of the commissioners, they arbitrarily chopped off seventy-five percent of what the city had requested in their petition and then had a lengthy discussion upon the boundaries of this area, and moved for a vote on the annexation as amended by that motion. Commissioner Gallagher was not in on this conference call and did not partake in the deliberations. Commissioner Anderson from Wrangell and Commissioner Strandberg from Anchorage voted in favor of the annexation, Commissioner Hobson said he really did not know too much about it but would go along with Anderson and Strandberg, and Commissioner Dobson from Fairbanks stated that he thought they had rushed into this matter too quickly and that they had not been supplied adequate or sufficient information upon which they could make a rational decision regarding this petition and voted "No"; so the motion was carried by three of the five commissioners voting in favor of the motion. Needless to say, I was shocked and appalled at the casualness of this meeting which basically was in utter disregard to whatever impact their decision might have upon the community of Petersburg.

The Constitution of the State of Alaska expresses great faith in the area of local government. The residents of the Petersburg area and Mitkof Island are not looking for any exceptions in either state law or regulations. We desire to have our local matters decided through the medium of majority voting, in so doing we are in no way infringing upon others. The city administration and city council of Petersburg suddenly decided that they were going to present an annexation petition to the Local Boundary Commission and to the legislature, and took the attitude that the people of the Petersburg area did not know what was good for them, and that "Big Brother" knows best and that they would ram their decision down our throats.

For the foregoing reasons, I and my fellow Petersburg residents respectfully request that the House and Senate take appropriate action and pass a concurrent resolution rejecting the recommendations of the Local Boundary Commission in reference to the Petersburg annexation. Let me take this opportunity to thank you for taking the time to review my letter, and I know that I express the concerns of the vast majority of the Petersburg residents in making this request to you. Your consideration of preserving the democratic method of conducting government would be appreciated. Thank you.

Yours very truly,

John E. Longworth

PETERSBURG INDIAN ASSOCIATION, Petersburg, Alaska
February 8, 1978

Dear Senator Rader:

I am on the Board of Directors of the Petersburg Indian Association and have been a resident of the City of Petersburg all my life and have been authorized by unanimous vote of the Board to appear and protest to the Legislature any extension of the boundaries of Petersburg. The members of the Petersburg Indian Association are strongly opposed to the recommendations of the Local Boundary Commission to the Legislature of the State of Alaska concerning the extension of the boundaries of the City of Petersburg.

The Petersburg Indian Association was formed because of the various Alaska native groups, including the Tlingit-Haida Central Council, the Alaska Native Brotherhood, the Alaska Native Sisterhood, and Sealaska Corporation, which had programs to be administered within the Petersburg area. The Petersburg Indian Association is a combination and serves and represents all Alaska native programs administered in the Petersburg area. There are approximately one hundred eighty-five (185) adult members in the Petersburg Indian Association, all of whom are residents residing in the existing City of Petersburg.

The Petersburg Indian Association has reviewed the petition submitted by the City of Petersburg to the Department of Community and Regional Affairs for the annexation or expansion of the existing city limits of Petersburg and the recommendations of the Local Boundary Commission to the Legislature. The Petersburg Indian Association is strongly opposed to any expansion of the existing city limits of Petersburg.

The existing tax base for the City of Petersburg, including real property taxes, sales taxes, and utility charges is extremely high and before any of the existing utilities are expanded to additional areas, and before any additional police and fire protection services are expanded to additional areas, it appears to the Petersburg Indian Association that steps should be made to improve and reduce the charges to the existing residents within the present city limits of the City of Petersburg. The cost of expanding utilities and services to any additional areas could only be met by additional taxes far and above these which would be generated through the annexation of the additional area.

I was employed for eight (8) years as a dispatcher for the City of Petersburg Police Department, having left that position approximately one (1) year ago. In reviewing the petition of the City of Petersburg for additional areas to be annexed I noted the number of emergency medical treatment calls that they attributed to

areas outside the existing city limits. Based upon my own observations and experience, by far the vast majority of these calls would have been to the Petersburg Municipal Airport or to the float plane charter services operated in and out of Petersburg, bringing injured or sick persons from other areas to receive treatment at the Petersburg hospital.

The existing fire equipment is inadequate to serve outlying areas without the addition of water lines and hydrants as the present tank trucks or pumper trucks would not be sufficient to fight any major fire without fire hydrants being located in the immediate vicinity.

If police protection is to be afforded in the additional annexed area it will require that at least one additional squad car be added to the existing police force and at least four (4) officers, one for each shift and one as a relief officer. The existing bonded indebtedness of the City of Petersburg is the highest per capita in the State of Alaska. It would seem apparent that if additional services and utilities are afforded to areas outside the existing city limits, that the only way this could be accomplished would be by incurring additional bonded indebtedness which would place an undue burden and hardhip on the taxpayers and residents of the City of Petersburg. This is particularly true of our native residents who for the most part are employed on a seasonal basis, which severely limits their income and ability to pay any additional taxes or utility charges.

Before any additional areas are added to the City of Petersburg, the Petersburg Indian Association and myself feel that definite steps and improvements should be made within the city limits to reduce the taxes and improve existing services and utilities, particularly the electric utility services which, in my opinion, are the highest in the State. Presently people outside of the existing city limits of Petersburg pay a surcharge on top of their electric service charges for being rendered that service by the city; however, if these areas are included in the city this surcharge would be lost, and the only way that this could be made up is by adding to the already high electric service charges being taxed on the residents of the City of Petersburg.

For these reasons, the Petersburg Indian Association respectfully requests that the Senate and the House of Representatives pass a concurrent resolution rejecting the recommendation of the Local Boundary Commission.

Respectfully,

Gertrude B. Lyons

Gertrude B. Lyons

SENATOR JOE ORSINI
SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE
ALASKA STATE SENATE
CAPITOL BUILDING
JUNEAU, ALASKA 99811

DEAR SENATOR ORSINI,

PLEASE ACCEPT THIS ENCLOSED XEROX COPY OF A LETTER TO REPRESENTATIVE LISA RUDIS FOR TESTIMONY CONCERNING THE ANNEXATION PETITION FOR THE CITY OF PETERSBURG, WHICH IS BEFORE YOUR COMMITTEE.

I HOPE THIS LETTER IS RECEIVED IN SUFFICIENT TIME TO BE ENTERED ON THE PUBLIC RECORD AND THANK YOU FOR YOUR CONSIDERATION.

RESPECTFULLY,

Timothy Koeneman

TIMOTHY KOENEMAN
P.O. BOX 1324

REPRESENTATIVE LISA RUDD
HOUSE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE
ALASKA STATE LEGISLATURE
POUCH V
JUNEAU, ALASKA 99811

REF: CITY OF PETERSBURG ANNEXATION PETITION.

DEAR REPRESENTATIVE RUDD,

PRIOR TO PRESENTING MY VIEWS ON THE CITY OF PETERSBURG ANNEXATION PETITION I DESIRE TO PRESENT SOME COMMENTS CONCERNING MY RESIDENTIAL STATUS. FROM JUNE 1971 THROUGH SEPTEMBER 1973 I RESIDED WITHIN THE PRESENT PETERSBURG CITY LIMITS. FROM OCTOBER 1973 THROUGH SEPTEMBER 1974 I WAS ATTENDING SCHOOL IN OREGON (OCT- APR) AND WORKING IN KETCHIKAN (APR-AUG). FROM NOVEMBER 1974 TO THE PRESENT I HAVE RESIDED ON PROPERTY ADJACENT TO SANDY BEACH ROAD WHICH IS APPROXIMATELY 500 FEET OUTSIDE THE PETERSBURG CITY LIMITS. MY FAMILY UTILIZES CITY AND STATE ROADWAYS; THE SCHOOL SYSTEM SWIMMING POOL, FOR WHICH WE PAY ENTRY CHARGES; LOCAL BUSINESSES, AND PAY SALES TAXES; SUPPORT THE COMMUNITY WITH VOLUNTEER HELP, IN THE LITTLE NORWAY FESTIVAL AND PETERSBURG VOLUNTEER FIRE DEPARTMENT; AND DO NOT BELONG TO THE GROCERY COOPERATIVE, WHICH CONTAINS MANY PETERSBURG CITY RESIDENTS AND DOES NOT

PROVIDE SALES TAXES TO THE CITY.

I CONCUR WITH THE CONCEPT OF ANNEXATION, PARTICULARLY ANNEXATION OF THE SANDY BEACH AREA. IT IS NOT LOGICAL THAT TWO GOVERNMENTAL UNITS (CITY AND STATE) SHOULD EXIST IS SUCH A CLOSE KNIT COMMUNITY. HOWEVER, THE MEANS THE CITY ADMINISTRATION HAS UTILIZED TO REALIZE ANNEXATION IS NOT, IN MY VIEW, IN THE BEST INTEREST OF RESIDENTS OR "NON-RESIDENTS." MY PRIMARY CONCERN IS THE APPARENT LACK OF FISCAL RESPONSIBILITY EXUDED BY THE CITY ADMINISTRATION. I AM AWARE OF NUMEROUS UNSUBSTANTIATED RUMORS ELUDING TO FISCAL RESPONSIBILITY AND OFFER ONLY THE ENCLOSED HEADLINES OF THE PETERSBURG PILOT, VOL 5., NO. 5, 1/1/78 FOR SUPPORT "AD HOC COMMITTEE HEARS ITS FIRST TESTIMONY - CITY LOAN DELINQUENT". MANY INDIVIDUALS MAINTAIN THE CITY IS ATTEMPTING TO EXPAND ITS BONDING BASE IN AN ATTEMPT TO RECTIFY EXISTING FISCAL PROBLEMS. I HAVE NO WAY EVALUATE THE TRUTH OR THAT STATEMENT. I DO NOT HAVE TOTAL TRUST IN WHAT SOME CITY OFFICIALS ARE PRESENTING, AND IT IS BECOMING MORE APPARENT THAT CITY RESIDENTS EXPRESS SIMILAR DISTRUST (SEE PETERSBURG PILOT, PAGE 2 - LETTER TO EDITOR BY REV. BATEMAN-COOPER; PAGE 4 - AD HOC COMMITTEE EXPLAINS PURPOSE; PAGE 7 - COUNCIL FUMBLES BALL AGAIN; PAGE 9 - COUNCIL APPROVES FORMATION OF AD HOC COMMITTEE). IT IS INTERESTING

TO NOTE THAT THE (PREVIOUS) CITY MANAGER DAVID MOFFAT HAS BEEN ASKED TO RESIGN, AND THE CITY COUNCIL IS APPARENTLY NOT REPRESENTING THE VOTING CONSTITUENT IN SOME ACTIONS. ESPECIALLY IN PETITIONING ANNEXATION IS SUCH A MANNER THAT THE ELECTORATE, AND THOSE INDIVIDUALS BEING ANNEXED, HAS BEEN DENIED THE OPPORTUNITY TO EXPRESS THEIR VIEWS THROUGH THE VOTING PROCESS.

MY PERSONAL DISTRUST HAS OCCURRED FROM SPECIFIC INTERACTIONS WITH CITY OFFICIALS. I REQUESTED, AND WAS GRANTED, WATER AND ELECTRICAL SERVICES FROM THE CITY. MY WATER RATES ARE TWICE THOSE CHARGED FOR LIKE IN-CITY SERVICE. MY ELECTRICAL RATE INCLUDES AN APPARENTLY ARBITRARY (MY VIEW) "SURCHARGE" WHICH IS NOT APPLIED FOR LIKE IN-CITY SERVICE. THE ELECTRICAL LINES SERVICING MY RESIDENCE AND ADJACENT "OUTSIDE" NEIGHBORS ARE TECHNOLOGICALLY INFERIOR TO THOSE UTILIZED WITHIN THE CITY LIMITS. DURING THE PAST YEAR THESE LINES HAVE BEEN RESPONSIBLE FOR THE DESTRUCTION OF THE ELECTRIC MOTOR AND COMPRESSOR OF MY CHEST FREEZER (REPLACEMENT COST $467.00) PLUS TWO OTHER FREEZERS AND ONE FURNACE MOTOR OF MY NEIGHBORS. NEITHER MYSELF OR MY NEIGHBORS RECEIVED RESTITUTION FOR REPLACEMENT OF DESTROYED APPLIANCES WHEN WE COLLECTIVELY PETITIONED THE CITY. THE CITIES POLICIES ARE SUFFICIENTLY VAGUE TO FACILITATE PLACEMENT

OF RESPONSIBILITY AS EXTERNAL TO THE CITY. THE ELECTRICAL LINES REMAIN IN PLACE, EVEN THOUGH THE CITY REALIZES THE INFERIORITY OF THE LINES (WM. MEARIG, ELECTRICAL SUPERVISOR, PERSONAL CONVERSATION), THUS THE "OUTSIDE" RESIDENTS ACTUALLY PAY MORE FOR INFERIOR SERVICES. THE CITY ADMINISTRATION HAS NOT PRESENTED SHORT OR LONG TERM PLANNING DOCUMENTS (TO INCLUDE FISCAL ESTIMATES) TO INFORM THE "OUTSIDE" RESIDENTS OF FACILITIES OR SERVICE IMPROVEMENTS THEY MIGHT EXPECT TO RECEIVE FROM ANNEXATION --AND THE ASSOCIATED PROPERTY TAXES. NEITHER HAVE DOCUMENTS ESTIMATING ADDITIONAL COSTS TO CITY RESIDENTS BEEN PRESENTED.

IN CLOSING, I AGREE WITH THE CONCEPT OF ANNEXATION BUT DISAGREE WITH THE MEANS EMPLOYED IN THE PETITION IN QUESTION. IT IS APPARENT TO ME THAT THE CITY ADMINISTRATION HAS NOT DEMONSTRATED FISCAL RESPONSIBILITY, OR ELECTORATE RESPONSIBILITIES. IT IS DIFFICULT TO SUPPORT ANNEXATION WHICH HAS BEEN PRESENTED BY AN ADMINISTRATION WHICH ITSELF IS IN A HIGH STATE OF UNREST. IT IS DIFFICULT TO SUPPORT ANNEXATION WITHOUT THE OPPORTUNITY TO VOTE ON THE ISSUE ITSELF. IT IS DIFFICULT TO SUPPORT ANNEXATION WITHOUT A PLANNING DOCUMENT IDENTIFYING THE IMPACTS OF THE ISSUE WITH PARTICULAR EMPHASIS ON FISCAL

ISSUES.

THANK YOU FOR THE OPPORTUNITY TO PRESENT MY THOUGHTS. I TRUST THIS COMMUNICATION WILL ARRIVE IN SUFFICIENT TIME TO BE INCLUDED IN THE PUBLIC RECORD.

RESPECTFULLY,

Timothy Koeneman

TIMOTHY KOENEMAN

C.C: SENATOR JOE ORSINI, CHAIRMAN
SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE
JUNEAU.

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MINUTES

FEBRUARY 7, 1978

Present: Chairman Orsini, Senators Willis, Hackney and Sumner. Wm. K. Mearig; J. R. Floden; Frances G. Westre; David A. Moffat; Gene Owens; Sigvald J. Strandberg; Erick J. Simpson; Sunny A. Hick; Gertrude Lyons; Lars Eide; Ed Lapeyri; James F. Petersen; Annette Smith; Bruce Aronson.

Absent: Senator Ferguson

Chairman Orsini convened the hearings at 3:15 PM. He announced that the Committee would take testimony on SJR 38, 29 & 40 but would take no action on the resolutions that day.

SJR 39 (Proposed Annexation by Haines Borough):

Chairman Orsini asked Sigvald Strandberg, Chairman of the Boundary Commission, to give the circumstances behind the proposed annexation of land on which stood fuel tankds formerly operated by the military. Mr. Strandberg described the action as pro forma in nature to allow the Haines Borough to eliminate a pocket of non-borough land inside its borders. He explained that the final disposition of tank farm property, which would be handled by the General Services Administration, would not be affected by the Borough's action and that the military had not objected to the proposed annexation. Mr. Strandberg also stated that no objections had been made by members of the public during the Boundary Commission's hearings in Haines. No one else wished to testify on SJR 39 and Chairman Orsini closed the hearings on the resolution.

SJR 38 (Proposed Annexation by the City of Skagway):

Mr. Strandberg noted that the City of Skagway originally requested to extend its boundary to the Canadian border and that of the Haines Borough. He noted that this raised the question in the Boundary Commission's opinion of what properly constituted city government versus that of a borough. The Commission therefore recommended a smaller extention of the City's boundaries and informed the City that it could, if conditions warrented, petition the Commission in the future to move its jurisdiction to the Canadian border. The City of Skagway supported this action by the Commission and agreed with the recommendation. Strandberg acknowledged that public testimony by persons residing outside the present City boundaries was opposed to annexations since they believed that they were already paying for municipal services through the sales tax. In response to questions from Committee members, he said that the Commission had not considered the inclusion of the Dyea area into the City of Skagway and that such an action would require separate Commission action.

William Ruddy, an attorney representing the City of Skagway, said that public opposition had been expressed to the proposed annexation but that it was not organized.

In the absence of further public testimony, Chairman Orsini closed the hearings on the resolution.

SJR 40 (Proposed Annexation by the City of Petersburg):

Mr. Strandberg said that public hearings had been held by the Commission in Petersburg January 9 before an overflow crowd with the testimony being broadcast live over the local radio station. On January 16 the commissioners held a telephonic conference and approved a recommendation for the extension of the City of Petersburg boundary.

He explained that the Commission's recommendation called for the city boundary to be extended only over the northern portion of Mitkof Island, an area of approximately 45 square miles. The City had originally petitioned for the annexation of all Mitkof Island, an area of approximately 211 square miles. Mr. Strandberg said that the Commission respected the City's reasons for the larger request, which included concerns about Coastal Management and municipal selection of state lands. He said that this again raised the question of borough versus city government and that the Commission had recommended an area for annexation that would take in almost all residents, but not all the territory, of Mitkof Island. He noted that, in the Commission's view, the natural development of the City of Petersburg lay along Mitkof Highway and that the outlying areas did benefit from municipal services. The incorporation of this area would remove the present tax inequity between the residents of the City and the outlying district. Mr. Strandberg pointed out that the City of Petersburg has a narrow tax base, but a fairly heavy bonded indebtedness. The 2,126 City residents have a bonded indebtedness of $3.7 million against a property valuation of $34 million. Thsi gives the City a debt/valuation ratio of approximately 11% as opposed to a 5.4% ratio for the City and Borough of Juneau and 3% for the City of Ketchikan. He noted that there were considerable private land holdings south of Petersburg along the Mitkof Highway.

In response to questions from Committee members, Mr. Strandberg made the following comments: The City indicated that it would assess one-half, or 7 mills, of the present City mill rate against the residents of the outlying area for the first year after annexation. Petersburg City Councilmen run at large and therefore there would be no council seat per se representing the annexed outlying area. During the public hearings in Petersburg, public sentiment ran about four to one against annexation. The August 26, 1975, election during which City voters rejected annexatio was a straw vote on another proposed annexation and for which sketchy data had been gathered in regard to potential tax revenues. Service areas in the unorganized Borough could be established by the Legislature only if the same services could not be provided by annexation to existing local governments.

The vote of the Commission had been three to one for the proposed annexation. Children in the outlying area presently attend City schools which receive tuition payments from the State. The economic future of Petersburg lies fishing and some logging. Industry would find it attractive to locate in the outlying area following annexation.

William Ruddy, the attorney representing the City of Petersburg, and William Mearig, representing the Petersburg city government, testified

jointly. Mr. Mearig stated that the 1975 annexation vote concerned the proposed annexation of West Petersburg, which has now incorporated separately as the City of Kupreanof, and did not pertain to the present recommendation. He noted that the Environmental Protection Agency was requiring the extension of sewer and water facilities to outlying areas. Either the City of Petersburg would provide these services or they would be mandated at the state or federal level. In response to questions from the Committee members, Mearig concurred that Petersburg's economic future lay with fishing and stated that any expansion of fishing facilities would probably occur at the four plants currently within the City's boundaries. Because of environmental and esthetic concerns, little or no development is likely to take place in the Narrows. He commented that strictly speaking it was illegal for the City to provide municipal services to the outlying area.

James Petersen, the attorney representing the plaintiffs in the court suit opposing the proposed annexation, testified that his clients opposed the annexation on the grounds that insufficient study had been given to the revenue, tax burden, and expense of the action. He stated that the original petition requesting annexation had been hastily put together and that the municipal ordinance had had its first reading with no public input. The second and third readings took place on the same night. Studies were lacking on population density, cost of police protection, cost of water and sewer facilities, and cost of electric power extension. Peterson said that his clients were not opposed to annexation per se and believed that the establishment of a service district (outside of the municipal boundary) could provide a viable solution. He emphasized that it was not only residents of outlying areas who opposed annexation but the residents of the City as well.

Frances Westre testified, as a member of the Petersburg City Council, that the Council had unanimously approved the proposed annexation as being in the best interests of the community of Petersburg and its environs. She said that the apparent haste in acting upon the petition was due to the legal requirement to submit all annexation recommendations to the Legislature by the tenth day of session. She pointed out that Petersburg and Wrangel were jointly studying a proposal for hydroelectric development in the Thomas Bay area that would provide relatively inexpensive power for economic development in the area. Ms. Westre said that Bruce Aronson of the Department of Community and Regional Affairs had originally raised the annexation question in Petersburg several years ago.

Lars Eide read to the Committee a letter he sent on December 12, 1977, to Commissioner of Community and Regional Affairs Lee McAnerney protesting the proposed annexation as contrary to the wishes of the majority of the people of Petersburg. He stated he was part owner of Mitkof Lumber Company which employes approximately 23 persons about 75% of whom lived in the City and 90% of the company's production was exported.

David Moffat, City Manager of Petersburg, said that the impetus for annexation had originated from residents in the outlying areas and that he had heard of little opposition to the proposal from within the City. He noted that, without the existence of the City of Petersburg, it would be unlikely that industries outside city limits would have located in the area. Moffat pointed out that the City has a

significant interest in exercising planning for Coastal Management for Mitkof Island as well as achieving a wider basis for future municipal selection of state land. He also noted that the possibility of a deep water port had been studied for the southern tip of Mitkof Island.

Ed Lapeyri, a resident and General Manager of Mitkoff Lumber Company, a plaintiff in a court suit against the annexation, testified that outlying residents did not receive municipal services for wohich they did not pay. He stated that residents outside city limits paid a 15% surcharge for electricity and a 50% surcharge for water. As for fire protection, the State paid the City $7.50 per capita for residents outside City limits. He submitted to the Committee the following petition signed by 543 residents of the general Petersburg area:

"WE, THE UNDERSIGNED, BEING CITIZENS OF MITKOF ISLAND, BOTH INSIDE AND OUTSIDE THE PRESENT CITY LIMITS OF PETERSBURG, ARE STRONGLY OPPOSED TO THE PROPOSED ANNEXATION TO PETERSBURG AT THIS TIME DUE TO THE METHODS USED BY THE CITY IN DIRECT OPPOSITION TO THE DESIRES OF THE MAJORITY OF THE CITIZENS AND BECAUSE OF ERRORS IN THE FIGURES PRESENTED TO THE LOCAL BOUNDARY COMMISSION AND THE FAILURE BY THE CITY TO PROPERLY RESEARCH AND DOCUMENT THE ECONOMIC CHANGES SUCH ANNEXATION WOULD PRESENT TO THE CITY RESIDENTS AND THOSE IN THE ADJOINING PROPOSED AREAS. WE ARE EXTREMELY CONCERNED IN THE MANNER IN WHICH THE CITY HAS PRESENTED THIS ANNEXATION WITHOUT PROPER PUBLIC INPUT. WE ALSO PETITION THE HOUSE AND SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEES TO HOLD A JOINT HEARING IN PETERSBURG IN ORDER TO OBTAIN THE TRUE FACTS AND PUBLIC INPUT REGARDING THIS PROPOSED ANNEXATION."

Mr. Lapeyri said that these signatures were obtained within three days last week and that every reasonable effort was made to insure that resident adults were the only persons who signed. He told the Committee that of the 543 petition signers, 193 lived outside the City and 350 lived within the City limits.

Mr. Lapeyri charged that during the City Council deliberations on the annexation petition, a show of hands indicated that only 11 of the 98 persons present supported annexation and that, of the 6 who testified in favor of the measure, four were city employees or relatives of Council members. He said that real property valuation for the 1975 proposed annexation was $6.3 million and in 1977 only $6.7 million for a slightly different area. He also cited an unidentified study undertaken by a local private firm that indicated no significant economic development in Petersburg in the future. In response to Committee members' questions he acknowledged that fishing was considerably more important economically to Petersburg than logging which he characterized as "shakey".

Gene Owens, a resident of Petersburg, testified in support of the proposed annexation . He stressed that the State had consistently urged localities to assume local government control in the Unorganized Borough in such matters as Coastal Management planning. Mr. Owens said that the annexation of land on Mitkof Island by Petersburg was consistent with that objective.

John Floden, city engineer for Petersburg, spoke in favor of the annexation recommendation and pointed out that the City had basically proposed a service area concept. He noted that 19% of the population

of Petersburg currently lives outside the city limits. This meant that those inside the city pay 19% more for municipal services than thier just share, while those outside pay 19% less. Mr. Floden said that without the extension of planning and zoning powers to the present outlying areas they were likely to develop in a haphazard manner leading to severe water and sewage problems in the future. There were instances in the outlying area where land was being subdivided into lots too small handle onsite sewage and water. Mr. Floden said that the City's goal in the annexed area would be to maintain large lots so as to prevent the need to establish sewer and water lines to high density residential and commercial dwellings. Additionally the projected linkage of Mitkof Highway with a proposed Stikine Highway could result in unrestrained commercial development of gas stations, drive-ins, etc. along the way unless proper planning and zoning authority existed to control it. In response to Committee members' questions, he said he believed a comprehensive community development plan for Petersburg had been prepared in 1965/66.

Gertrude Lyons, a plaintiff in the court suite against the proposed annexation and a member of the Board of Directors of the Petersburg Indian Association, testified that the increased costs association with the extension of services to outlying areas would work an undue hardship on Native residents of Petersburg who were primarily dependent upon seasonal employment. Ms. Lyons said that the membership of the Petersburg Indian Association was approximately 185 adult persons and that the Association was the combined organization for the Tlingit-Haida Central Council, the Alaska Native Brotherhood, the Alaska Native Sisterhood, and Sealaska Corporation.

Sunny Hicks, a resident of the Petersburg area and opponent of the proposed annexation, characterized the community atmosphere of Petersburg as a "local Watergate situation" where neighbors were divided against one another and conversations were surreptitiously recorded. She believed that local animosities had been inflamed by the City's handling of the annexation petition. She stressed that the residents of the outlying area considered themselves to be members of the general Petersburg community and were willing to assume their share for local services. She questioned whether the City was capable of efficiently carrying out its present obligations, much less undertake more extensive ones without the compensation of major new revenues.

William Mearig requested to testify a second time to present his views as a private citizen in addition to his capacity as a city official. He said that the proposed annexation offered outlying residents their first chance to participate in the political decisions affecting them locally, even in the absence of a separate election district for the area. He stated that participation in local government in such matters as Coastal Management offered residents more protection than if they remained unorganized and allowed either the State or federal government to impose regulations on them.

In the absence of further public testimony on SJR 40, Chairman Orsini concluded public hearings on the resolution and adjourned the Committee at 6:28 PM.

Dear Mr. Strandberg Sig

Further to your telephone conversation this morning with my Administrative Assistant, I would like to invite you and any other members of the Local Boundary Commission to attend the hearings which the Senate Community and Regional Affairs Committee will be holding in regard to your recommendations on the proposed annexations by the Cities of Skagway and Petersburg and the Haines Borough.

The committee meeting is scheduled for 3:00 P.M. in Room 100 of the Assembly Building Tuesday, February 7, 1978.

I look forward to seeing you and any other Commission members who wish to attend at that time.

Sincerely,

Joe Orsini

Dear Mr. Edwards:

On February 7, the Senate Community and Regional Affairs Committee will hold hearings on the recommendations made by the Local Boundary Commission regarding the annexation of land by the Haines Borough SJR 39 and the Cities of Petersburg SJR 40 and Skagway SJR 38.

The Senate C&RA meetings are scheduled for 3:00 P.M. in Room 106 of the Assembly Building and public testimony will be taken prior to Committee action on the recommendations. Comments may also be submitted in writing prior to February 7 by those who wish to testify but are unable to travel to Juneau.

In the event that the hearings are not completed on February 7, further hearings will be held at the same time and place on February 9.

Sincerely,

Joe Orsini

HB
72

Testimony of Russell Cahill
State Historic Preservation Officer
H.B. 72
February 14, 1977

House Bill 72 is good legislation. It complements and implements existing heritage and cultural laws which have evolved since the Alaska Legislative Council, Legislative Affairs Agency, issued its important study in January, 1970: Historic Preservation In Alaska. It fills a needed gap in the legislation which has followed since that time.

To date only seven municipalities--Anchorage, Eagle, Ketchikan, Klukwan, Nome, Skagway and Sitka, on their own initiative, have created "local frameworks" for historical districts. H.B. 72 would make this a reality for every municipality in Alaska; a very positive forward step.

This is pragmatic legislation because it provides a method of funding through State loans. The National Trust for Historic Preservation has stated that preservation in Alaska and Hawaii is a virtual impossibility without substantial public subsidy. This critical consideration is recognized in H.B. 72.

In addition to the obvious merits of preserving our historic past and unique cultural roots as stated in Section 1 (Intent) there are some pragmatic considerations which are becoming more and more evident. We have learned much of the necessity to slow down depletion of energy and nonrenewable resources. Saving and recycling old neighborhoods is an important conservation measure. Utilization of historic buildings, structures and districts is not only wise conservation, eliminating waste and unnecessary duplication, but it will enhance pride of ownership, and broaden, rather than diminish the tax base. Historic District planners now give early attention not only to the aesthetic, historic and social values but to the beneficial economic components. Usually they find that restoration, and certainly stabilization, are not only less expensive, but are more viable than destruction and rebuilding. In a recent statement on Pioneer Square in Seattle, it was pointed out that historic preservation there, in an area so blighted that it was first considered for mass demolition, "has benefitted all the citizens of Seattle. It is sound economics. . . instead of being a wasting liability to the City and a tax write-off for a few landholders, is now a real benefit to the economy. New stores and businesses spring up overnight, all creating jobs and paying taxes. Tourists, once warned to avoid this district, come to Seattle just to see it." Indeed, soon this will be the interpretation center for tourists coming to restored Skagway and the Klondike Gold Rush National Park.

The great recent increase in public interest in historic preservation has probably been motivated more by the economic and conservation sense than by the esoteric. It is important, too, to realize that of 12,000 historic properties now on the National Register--1,000 are historic districts. Yet, of the 65 National Register properties in Alaska only Eagle, Hope and Skagway are municipal historic districts.

With passage of House Bill 72, Alaska would have a State program for municipal historic districts equaled by only a few states.

Municipality of Anchorage

POUCH 6-650

GEORGE M. SULLIVAN, MAYOR

PLANNING DEPARTMENT

March 7, 1977

Senator Joseph L. Orsini
M/S 3100, Pouch V
Juneau, Alaska 99811

Dear Senator,

The Historical Landmarks Preservation Commission, created in November 1975, was asked to assist the Municipality in the identification of buildings, sites, objects and structures associated with the history and pre-history of Anchorage. Our Commission concurs wholeheartedly with House Bill #72 and urges its adoption.

House Bill #72 is a most purposeful piece of legislation. First, it recognizes that there are historic districts within Alaska's cities and that such districts are extraordinary in sense of the historic fabric of a community. Second, it provides financial incentives through the Revolving Fund Loan concept which would be of great assistance to Anchorage and other communities across the State. The definition of a historical district as conceived in House Bill Number 72 (i.e., structures of "the early territorial period before 1920") would definitely encompass areas of the Municipality of Anchorage, including sections within and outside the townsite of which dates from 1915.

In addition, we also ask your support for Senate Bill #10 which will provide funding for the purpose of cataloging the photograph collection and developing a guide on location and providing access to Alaska photographs.

As these bills come before you for action, please give them your most serious consideration.

Sincerely,

Katharine C. Crittenden

Regarding House Bill No. 72: Historical Districts

Dear Representative Rudd:

It was recently brought to our attention that along with others you are sponsoring the subject bill on establishment of Historical Districts. I have also been informed that the Anchorage Historical Landmarks Preservation Commission has reviewed the bill and endorses it.

Our community is under tremendous pressure for development in areas where some of our older buildings are located. We are very much interested in trying to preserve these landmarks of our past. Just last week, the Municipality entered into a contract with an historic preservation specialist, Mr. Michael Carberry, to conduct a survey of our older structures. Your bill should help us considerably in attempting to establish an historic district encompassing these treasures of our past.

The Municipal Administration endorses the proposed bill and would like to support any efforts you are making to get it approved by the legislature.

Sincerely,

D. J. Weiford

Regarding House Bill No. 72: Historical Districts

Dear Representative Rudd: Lisa!

The Municipality of Anchorage Historical Landmarks Preservation Commission is pleased to announce that in their regular meeting of January 25, 1977 House Bill Number 72 pertaining to creation of Historical Districts was formally and unanimously endorsed.

As you may be aware, our community is currently struggling to preserve some of our older landmarks and attempting to establish a district. These efforts are being conducted under dynamic circumstances where development pressures are forcing the replacement of older homes and buildings by high rise structures on a daily basis.

It is gratifying to the Commission that our State legislators are cognizant of our situation. We deeply appreciate your support. Your proposed Bill will aid us immeasurably in our activities in Anchorage.

As a result of your efforts, the lives of countless future residents and visitors of Alaska should be enriched through experiencing the fascinating historical and cultural foundations of our community.

Sincerely,

Katharine C. Crittenden

NOTICE OF PROPOSED CHANGES IN THE REGULATIONS

OF THE DEPARTMENT OF NATURAL RESOURCES

Notice is hereby given that the Department of Natural Resources, Division of Parks, under authority vested by AS 41.20.020, proposes to adopt regulations in Title 11, the Alaska Administrative Code, and implement requirements of 36 CFR 60.1[illegible] by adding Chapter 16.200-300.

The National Historic Preservation Act of 1966 directed the Secretary of the Interior in cooperation with the various states to expand and maintain a National Register of Historic Places in which are listed districts, sites, buildings, structures, and objects important in local, state, and national history. By letter of January 24, 1967, the Governor of Alaska directed state participation in this program. Entry in the National Register does not affect a property's ownership or owner's rights, but does provide recognition of historical significance, basic eligibility for federal grants, and certain tax incentives, and insures that any federally funded or licensed action which may affect property listed in the National Register is reviewed for its impact on the historical values. The properties are nominated to the National Register by the states directly for private and non-federal properties, and by federal agencies for properties on federal lands. 36 CFR 60 requires state historic preservation officers to notify property owners at least once in writing when the state intends to nominate their property to the National Register of Historic Places and to afford owners reasonable opportunities to review nominations prior to presentation of the nomination to state review boards.

The Department of Natural Resources proposes to adopt regulations as part of the Alaska Administrative Code, 11 AAC 16.200-300, which will establish procedures for notifying property owners that the state intends to nominate their property to the National Register.

These regulations will provide that: (1) a property owner will be notified in writing as soon as it has been determined that his property may be a candidate for the National Register and request permission to visit the site under study; (2) a statement of all intended nominations will be sent to the Clearinghouse, Office of the Governor, for circulation to concerned public agencies; (3) no later than thirty days prior to the date it is anticipated the nomination will be presented to the state review board, the completed nomination will be forwarded to the property owner by certified mail and that an accompanying letter will request the owner's comments as to the historical significance of the property proposed for nomination; (4) responses to request for comments described in (2) and (3) be presented to the state review board prior to the time revelant nominations are considered; (5) property owners will be notified by certified mail of the action the state review board takes with respect to their properties; and (6) in the case of historic districts with multiple ownerships nominated to the National Register of Historic Places, the requirements of (1), (3), and (5) above for notice to individual property owners may be met by published notice and at least one public information meeting held within or immediately adjacent to the proposed historic district.

Notice is also given that any person interested may present written statements or arguments relevant to the action proposed to the Division of Parks, 619 Warehouse Avenue, Suite 210, Anchorage, Alaska 99501, before 4:30 p.m. on May 19, 1977.

Copies of the proposed regulations may be obtained by writing to the Division of Parks, 610 Warehouse Avenue, Suite 210, Anchorage, Alaska 99501.

The Division of Parks, upon its own motion or at the instance of any interested person, may thereafter adopt proposals substantially as described above without further notice or may decide to take no action on them.

NOTE FOR HB 83 FILE

Boundary Commission does not like the advisory vote concept since the members believe that annexation proposals bring out opponents, not supporters, of the measures.

Shiela Gallagher pointed out in H C/RA that the Commission already does prepare written reports and that the additional information required by the bill could lead to a greater, not lesser, possibility for law suits.

NOTE FOR CSHB 87 am FILE

Jodine Reposa, Department of Revenue, Petroleum Division, (276-1363) gave me the following data on the state's revenue from the 20 mill oil and gas property tax:

In 1978, the gross, statewide 20 mill tax will come to $221,544,476.30. However, many boroughs have not yet set their mill rates, so from that figure will have to be subtracted the municipal credits when they're determined. Of the $221.5 million, $141.3 lies within organized boroughs and $79.8 million in the unorganized borough.

In 1977, the statewide gross 20 mill tax was $169.8 million. $107.8 was within boroughs and $62.0 million lay in the unorganized borough. There were $30.3 million in municipal credits which gives a $139.5 million net tax.

Comments on CS for House Bill 87

Currently, under AS 29.63.030(a) a home rule or general law borough may establish a service area to provide a special service (e.g., fire protection). Such services are services not provided on an areawide basis within the borough or within the borough area outside cities; but they may also be services that are at a higher or different level than the services provided on an areawide basis or in the borough outside cities. Under subsection (b), the borough assembly may levy taxes and assessments in service areas to finance the special services.

A home rule or general law borough presently may, under Sec. 29.53.010, levy:

(1) An areawide property tax to provide for functions carried out areawide, which area may include cities as well as the area outside of cities, and

(2) a property tax limited to the area outside cities to pay for functions which are limited to areas outside cities.

Section 29.48.210 provides that revenue collected by the borough on an areawide basis is to be spent on general administrative costs and on areawide functions. Any revenue

collected in the area outside cities can only be expended on general administrative costs and functions which render service to the area outside cities.

These taxing powers and what is to be done with the revenues might be restated as follows:

(1) A borough assembly can establish a special district and can cause property taxes to be paid on property in that special district, but the tax revenue must be spent on the special service provided for that special district. For example, if it is a fire district, then the revenue has to be spent for providing fire protection in that special district area.

(2) A borough assembly can levy a property tax boroughwide to pay for functions that are boroughwide (and it makes no difference whether property is in or outside of a city) so long as the function is boroughwide.

(3) A borough assembly can levy a property tax limited to the area outside cities, but the tax revenue has to be spent for functions limited to the area outside cities.

There is equity, logic and sense to these present taxing powers and limitations on spending: the party being taxed gets the benefit of the service because the tax money collected can only be spent on services which apply to and benefit the one paying the tax.

CS for HB 87 would seek to radically change this by providing the mechanism to upset the fundamental principle that the one who pays the tax ought to obtain the benefit. Section 2 of the bill adds new section AS 29.73.070 and would permit taxes imposed and collected on a boroughwide basis to be appropriated by the borough assembly as "grants" to special districts and to cities to pay for the functions that a special district or a city provide. The amendment to AS 29.63.090(b) (which is section 1 of the bill) blatently goes so far as to provide that the borough assembly may even finance by "appropriations" all of the cost of special service in the special district with revenue from boroughwide revenue, thus making it possible to set up a special district to provide a special service but pay for that service with boroughwide revenue instead of tax money from property in that district.

To carry out this scheme, Section 29.53.010 (section 5 of the bill) is amended to permit a borough to impose an areawide (i.e., boroughwide) property tax for (appropriations" to special districts and for "grants" to cities and special districts

in addition to the present power which is limited to the imposition of an areawide (i.e., boroughwide) property tax to pay for areawide functions.

It is rather obvious that the Kenai Peninsula Borough is one which has the fact pattern which most closely could apply this radical and patently inequitable tax scheme. A very large part of the property tax value in the Borough belongs to oil companies in the form of industrial plants lying in the Borough but outside cities and some of the special districts. The platforms and much of the equipment are either in the Inlet itself or on the west side which is relatively inaccessible. Union Oil has just completed construction of a large new plant at the present site of its existing plant.

The values of oil industry properties have always been a very high percentage of the total Borough valuation and, indeed, this valuation has jumped significantly in 1978 as the result of Union's new plant and it will jump significantly in 1979 and 1980 as other oil company property comes onto the tax rolls. Just recently, there was an announcement by Pacific Alaska LNG of its plans to begin construction in July 1979 for a large gas liquefaction plant in the industrial area of the Kenai Borough.

With oil industry valuation in the Borough, but lying outside cities, being so great and to become even greater in the near future it takes little imagination to see how the tax scheme contained in this bill could cause the oil industry property to become a major financing vehicle for cities and special districts which could not be accomplished under present law.

For example, assume that the total value in the Borough is $1 billion of which the oil industry's share is $800 million which lies outside cities. Assume the boroughwide tax rate is 5 mills, which produces $5,000,000 of revenue from all taxpayers to the Borough. Assume further that City X in the Borough has a city tax rate of 15 mills (in addition to the Borough rate of 5 mills) which provides City X directly with $750,000 based on $50 million of value in the city ($50 million X 15 mills).

If the Borough rate is raised to 6 mills, an additional $1,000,000 will be received, but $800,000 of it will be mainly from the oil industry. Taxpayers in City X will have paid $50,000 of the $200,000 paid by non-oil company taxpayers. However, this bill would provide the means whereby City X could get a "grant" of money from the Borough. Suppose that "grant" was $200,000. The result would be that taxpayers in City X would have paid an extra $50,000 to the Borough when

the rate went from 5 mills to 6 mills, but it would receive $200,000 for a net gain of $150,000. The city tax rate could thus be reduced to 12 mills to provide for receipt of $500,000 ($50 million X 12 mills) and City X still would end up with a total of $750,000. Under such a scheme, the oil industry and other Borough area taxpayers would have financed tax reduction for City X taxpayers but without receiving any benefit for it.

This same type of scheme could work for special districts too. Here, a borough assembly could set up a special district but not endow it with taxing powers which is the method under present law to pay for the service. Rather, the assembly could give the special district a "grant" which might come from the $1,000,000 referred to above, or the assembly could even establish a special areawide tax rate to cover the "appropriation" to the special district, as provided for in this bill.

The tax scheme in this bill blatently violates the fundamental tax principle that the taxpayer is entitled to benefit from the tax he pays. This scheme is simply designed to tax industry property and, through "grants" and "appropriations", finance city and special district functions which provide no benefit to the party supplying the tax funds.

To permit such a scheme in the law would be a tax inequity of the highest order and would be inconsistent with efforts by

the State of Alaska to attract industry to the state. This is a good example of a tax proposal which, in conjunction with a lot of others proposed in the past few years, has made investors wary of investment in Alaska. The bill would once again change the "rules of the game" from normal, equitable tax rules to specially contrived rules.

DATE : 5/29/78

FROM: Hugh Malone

SUBJECT:

I would appreciate any help you could give in scheduling HB 83 and 87 before your committee.

Thank you.

Hugh

5-9-78

NOTE FOR HB 87 FILE

1. This bill would enable the Kenai Peninsula Borough to tax oil properties, or to receive revenue from oil taxes, ~~within~~ FOR the City of Kenai.

It is strongly supported by Malone and the Kenai Borough. The City of Kenai may oppose it.

The Municipality of Anchorage is concerned about it since Ted Berns believes that the language involving "special uses" in service areas could be construed to mean almost anything, which could result in the Municipality being forced into holding referendums on a number of issues, such as roads, parks & rec, or a civic center.

Bruce Aronson in D C/RA opposed to the bill.

5-11-78

NOTE FOR CSHB 87 am FILE

BRUCE ARONSON, D C/RA, said yesterday that his department views the bill as the worst piece of municipal legislation this session.

It would do the following: it would allow the Kenai Peninsula Borough to institute an area wide property tax, the proceeds of which would be funneled to the City of Kenai to cover various city service expenses associated with its proximity to the oil and gas industries, but which lie outside the city's boundary.

Bruce called this a "dirty" procedure for taxation. He said the obvious way to resolve Kenai's problem, i.e. through the city annexing the area, had been rejected since the outlying residents were opposed. However, what the legislation would create would be a system whereby residents of a borough would be taxed to provide a specific service to a specific area or city and from which the taxed areawide residents would receive no benefits. For this reason, the bill has been dubbed "borough revenue sharing."

Malone is personally very interested in the bill and testified extensively at the H C/RA hearings on it.

Bruce said that D C/RA would strongly oppose the bill when it came before this committee for hearings.

(Question: would the enactment of this legislation cut the ground from the idea of service areas, since the bill would tax areawide to provide for local services? Thus, a populous urban area could outvote the rural area in a borough and thereby set up areawide wide taxes that would be allocated only to the urban area.)

THE SOLDOTNA CITY COUNCIL STRONGLY URGES FAVORABLE CONSIDERATION OF HB87

LORRAINE KNIGHT MAYOR

F: HB 87

In short, this is a nice, neat way to impose a large borough tax on the remaining commercial and oil industry property with all functions of government (i.e., city, special district and borough) being paid for by the borough taxes. Such a plan also effectively gets around an annexation problem to reach the large industry properties in the borough.

One of the problems with this whole scheme, from a political standpoint, is that if the borough tax is raised significantly (for example, suppose it went from 5-mills to 12-mills), the amount of tax paid to Kenai borough becomes a credit against the 20-mill "hardware" tax imposed at the state level on oil and gas producing equipment and pipelines. Thus, as the Kenai borough takes more in taxes with respect to property taxable under the 20-mill hardware tax, the less revenue the state receives.

Politically, it is difficult to see how anyone outside the Kenai Borough would agree to such a scheme, because the people outside Kenai have everything to lose and nothing to gain by permitting the state, in effect, to subsidize homeowners at the expense of state revenue. This is probably one of the strongest arguments why such a scheme as this would not be acceptable.

The foregoing discussion perhaps cynically assumes that voters in Kenai would agree to take property taxes off their homes. This may or may not be what the author has in mind but it certainly would be a rather powerful force to reckon with if these changes ever became a law.

SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

Senator Joe Orsini
Chairman

House Bill No. 94 — Miles
Prime Sponsor

Resolution No. ____

This Bill is currently in the Senate Community and Regional Affairs Committee for consideration. Your response, as prime sponsor, to the following questions will serve to hasten Committee action on this Bill.

1. What is the need for your proposed legislation; what is the goal you are trying to accomplish?

Avoid future problems between ASHA & Regional Housing Authorities by giving decisional jurisdiction to local govt.

2. Are there any other viable ways of accomplishing this same goal?

Mandate the supremacy of one or the other agency ... but then this limits local input.

3. Persons or groups you know of who are supporting the legislation.

- ASHA
- Dept. Commerce & Econ. Dev.
- Roger Lange

4. Persons or groups you know of who are opposing the legislation.

None (passed House unanimously)

5. Can you foresee any new problems that might be caused as a result of enactment of your bill?

No ... save a possible resolution occasionally presented to a local govt, putting local decision makers on the spot.

6. What is the earliest time you would like the Senate Community and Regional Affairs Committee to consider your bill?

As soon as possible.

SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

Senator Joe Orsini
Chairman

House Bill No. 116 am — Rudd, Prime Sponsor

Resolution No. _____

This Bill is currently in the Senate Community and Regional Affairs Committee for consideration. Your response, as prime sponsor, to the following questions will serve to hasten Committee action on this Bill.

1. What is the need for your proposed legislation; what is the goal you are trying to accomplish?

   The goal of HB 116 am is to insure that the classification of state lands for recreational trails conforms with municipal planning.

2. Are there any other viable ways of accomplishing this same goal?

   Not that I can think of.

3. Persons or groups you know of who are supporting the legislation.

   Municipality of Anchorage and Alaska Conservation Society

4. Persons or groups you know of who are opposing the legislation.

   Department of Natural Resources represented by Pat Conheady do not oppose the bill but neither do they feel it is necessary.

5. Can you foresee any new problems that might be caused as a result of enactment of your bill?

   No, it will only help to clarify the law mandating coordination between the state and the municipality regarding classification of state land for recreational trails..

6. What is the earliest time you would like the Senate Community and Regional Affairs Committee to consider your bill?

   as soon as possible.

5/6/77

Joe

Talked to Jed Smith regarding HB1160M + asked him if he had any problems with this bill. He said the only reason he objected to this bill was because it was totally unnecessary. He commented that it provided nothing new because the State already checks with municipalities before they classify recreational trail land.

He said if we wanted to move on it fine — no real harm done.

Paul

(A) has not been set aside by statute for one or more particular uses or purposes; or

(B) has not been approved for patent to a municipality under AS 29.18.190-200; or

(C) is unclassified or, if classified under AS 38.05.3 is classified for agricultural, grazing, commercia industrial, private recreation, residential, utility, or open-to-entry purposes.

Alaska Division of Lands 5/1/80

Alaska Advocate F: CSHB 133

Washington:

In a decision that could dramatically affect Native land ownership on Kodiak and nearby islands, the U.S. Circuit Court of Appeals in Washington, D.C., has overturned a lower court ruling that 11 challenged villages are eligible for land benefits, under the Native Claims Settlement Act.

Initially the U.S. Bureau of Indian Affairs found the villages eligible, but that decision was overturned by the secretary of the interior after a hearing before an appeals board.

The Natives sued in district court in Washington and Judge Gerhard Gesson found that congressional hearings critical of the implementation of the act had an unfair influence on the secretary's decision. Granting a summary judgment, he ruled all the challenged villages eligible.

Officials at the U.S. Department of Interior and the state attorney general's office were reluctant to discuss the details of the circuit court's recent decision overturning Gessell's ruling, since a copy of the decision had not arrived yet in Alaska.

However, they said they understood that essentially the circuit court sent the case back to the district court for consideration of each village's claim for eligibility.

Seven of the 11 challenged villages are in the Koniag region. Two are in Cook Inlet, and one in the Bering Straits and Aleut regions. Together, the villages would be eligible for more than 750,000 acres of land.

Anchorage Daily News, Wednesday, April 26, 1978—17

Land grant legislation in 5th version

JUNEAU (AP) — The fifth version of a so-called "compromise" bill to grant Alaska municipalities nearly one million acres of state land has won Senate Resource Committee approval.

But the legislation still has two committees to go through before reaching the floor, and if the bill's history is any indication, it is likely to undergo further changes there.

Four different versions of the legislation were drafted during consideration by House lawmakers. And before passing the bill out of committee Monday, the Senate Resources panel approved substantial changes in the House bill. The changes almost assure that the bill will end up in a free conference committee.

The biggest change was to delete a formula drafted by Rep. Russ Meekins, D-Anchorage, which gave several municipalities, including Anchorage, considerably more land.

The Resources panel rejected the formula and the resulting acreage allotments in the House bill. Instead, the committee decided to return to an earlier version which at one time reportedly had the approval of all municipalities except the North Slope Borough.

However, the Resources panel voted to stick with the House allotment for the North Slope Borough — 89,850 acres — and at the urging of Resources Chairwoman Kay Poland, D-Kodiak, agreed to hike Kodiak's acreage from 45,200 in the House bill to 56,000 acres.

Under the Resources bill several of the municipalities would get less land than under the House bill.

Anchorage Times Friday, May 12, 1978

Senate Panel Identifies Acreage For Anchorage

By DON HUNTER
Times Staff Writer

A state Senate committee has identified some 10,000 to 16,000 acres of state land available for selection by Anchorage under a years-old promise, says an Anchorage legislator.

Sen. Joe Orsini, R-Anchorage, Thursday said the Senate Community and Regional Affairs Committee arrived at the figure during a hearing earlier this week.

A bill to accomplish the land transfers is now in Orsini's committee.

Under legislation approved several years ago, boroughs and cities across the state are entitled to select 10 percent of the vacant, unrestricted and unappropriated state land within their boundaries.

Under the 10 percent formula, Anchorage is entitled to some 20,865 acres.

The regional affairs committee is working to resolve disputes between some local governments, including Anchorage, and the state administration over the amount of suitable state land available for selection within their boundaries. Anchorage earlier had contended that only about 8,400 acres of appropriate state lands are available here.

State officials, said Orsini, had contradicted that claim, contending that up to a quarter-million acres of land was available for selection to meet Anchorage's 20,000-acre entitlement.

Municipal and state officials faced off on the issue before the committee Tuesday, Orsini said.

The committee had the two sides "go over it item by item and concept by concept," he said.

The 10,000 to 16,000 acres of available land identified by the committee Tuesday includes some 5,000 to 8,000 acres of trust land, but not the 5,000-acre Campbell tract, Orsini said.

The Campbell tract is federal land scheduled for joint management by the federal, state and local governments under restrictions that limit its use to a specific park plan. Earlier, the tract was included in Anchorage's entitlement by the Senate natural resources committee, an action strongly protested by the municipality.

Orsini said the regional affairs committee determined that the tract "has fairly severe restrictions" and that it "wouldn't be suitable to include it with the generally more suitable land."

Another question integral to resolution of the lands issue is whether municipalities that are unable to select their entitlements should receive cash in lieu of lands.

So far, the committee has conducted hearings on land in Anchorage and Kodiak, Orsini said. Next week, the body will take up questions over land selections in Southeast.

After the measure leaves the regional affairs committee, it will be considered by the senate finance committee before reaching the Senate floor. There, a floor fight may develop over differing versions of the measure.

"We're trying to get a bill out of this committee that will be acceptable to everybody," Orsini said.

IN THE HOUSE BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

SENATE CS FOR CS FOR HOUSE BILL NO. 133 (C&RA)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE SECOND SESSION

A BILL

For an Act entitled: "An Act relating to selection and transfer of state land to municipalities; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. STATEMENT OF PURPOSE. The purposes of this Act are to remove uncertainties in the existing municipal land selection law of the state; to provide for an immediate, final determination and settlement of municipal land entitlement; to provide for the completion of rational ownership patterns for sound land management; to provide for expeditious patent of land to municipalities to fulfill their respective entitlements; and to provide payment for land within certain municipalities which are unable to receive full entitlement rights in appropriate vacant, unappropriated, unreserved land.

* Sec. 2. AS 29.18 is amended by adding new sections to read:

ARTICLE 3A. GENERAL GRANT LAND.

Sec. 29.18.201. DETERMINATION OF ENTITLEMENT OF BOROUGHS AND UNIFIED MUNICIPALITIES. The general grant land entitlement of each of the municipalities in this section is the amount set out opposite each:

(1) Municipality of Anchorage -- 44,893 acres;

(2) City and Borough of Juneau -- 13,600 acres;

(3) City and Borough of Sitka -- 9,200 acres;

(4) Bristol Bay Borough -- 1,940 acres;

(5) Fairbanks-North Star Borough -- 112,000 acres;

(6) Haines Borough -- 1,080 acres;

(7) Kenai Peninsula Borough -- 155,780 acres;

(8) Ketchikan Gateway Borough -- 9,200 acres;

(9) Kodiak Island Borough -- 50,600 acres;

(10) Matanuska-Susitna Borough -- 355,210 acres;

(11) North Slope Borough -- 89,850 acres.

Sec. 29.18.202. DETERMINATION OF ENTITLEMENT FOR CITIES. (a) The general grant land entitlement of a city eligible to receive general grant land under the former provisions of secs. 190 - 200 of this chapter repealed by this Act is 10 per cent of the maximum total acreage of vacant, unappropriated, unreserved land within the boundaries of each city at any time between the initial date of eligibility under former secs. 190 - 200 of this chapter and the effective date of this Act.

(b) Within six months of the effective date of this Act, the director shall determine the entitlement for each city eligible to receive general grant land under (a) of this section and certify that entitlement to the city.

Sec. 29.18.203. STATUS OF ENTITLEMENTS. (a) General grant land entitlements provided in secs. 201 and 202 of this chapter constitute vested property rights which shall be fulfilled as provided in sec. 204 or sec. 207 of this chapter, but no municipal selection vests any interest in or right to receive a particular tract of land except as provided by sec. 204 of this chapter.

(b) General grant land entitlements vested under secs. 201 and 202 of this chapter may be exercised at any time before the date which is two years after the expiration of the state's right to make selections under secs. 6(a) or (b) of the Alaska Statehood Act (P.L. 85-508); however, the time limitation imposed by this subsection does not apply

(1) to payments in lieu of land under sec. 207 of this chapter; or

(2) to the portion of an entitlement which cannot be satisfied by that date because of a shortage of appropriate available land.

Sec. 29.18.204. FULFILLMENT OF LAND ENTITLEMENTS. (a) The acreage of each municipality's land selections under former secs. 190 - 200 of this chapter for which patent has been issued before the effective date of this Act shall be credited toward fulfillment of the entitlement of that municipality.

(b) All approved selections under former secs. 190 - 200 of this chapter for which patent has not been issued to a municipality on the effective date of this Act shall be reviewed by the director within nine months of the effective date of this Act. Any approved selection of land which was vacant, unappropriated or unreserved on the date of selection is valid as of the date of the approval under the former secs. 190 - 200 of this chapter, and a patent shall be issued to the municipality within three months after approval by the director of a plat of survey. The acreage shall be credited toward fulfillment of the municipality's entitlement. No municipality is entitled to receive patent under this chapter to more than its entitlement determined under sec. 201 or 202 of this chapter. Any prior approval by the director of municipal selections for land which was not vacant, unappropriated or unreserved on the date of selection shall be rescinded, and patent may not be issued except when disposal to a third party by sale or lease has occurred. Transfers of land to municipalities under this chapter are subject to AS 38.05.321. Classification actions as reflected upon the land status records of the Department of Natural Resources are determinative of land classification status for purposes of this chapter.

(c) All municipal land selections under former secs. 190 - 200 of this chapter not approved as of the effective date of this Act shall be recognized by the director as representing the priority interests of the

municipalities, and the selections shall be given first consideration under (e) of this section unless the municipality indicates different priorities.

(d) On the effective date of this Act and for five years thereafter, no classification of a parcel of general grant land in excess of 3,200 acres under AS 38.05.300 shall be effective, unless otherwise required by law, if the municipality in which the parcel is located, within 30 days after receipt of notice of the proposed classification, advises the director in writing that it does not consent to the classification and indicates the reasons for its nonconsent.

(e) Each eligible municipality and the director shall jointly consider which vacant, unappropriated, unreserved land, including federal land of interest to a municipality which may be selected by the state as general grant land, located within the boundaries of the municipality, is appropriate for municipal selection and approval by the director to fulfill any remaining municipal general grant land entitlement. The joint consideration made by the parties shall include a cooperative land planning process which will, in addition to the normal objectives of such a process, seek to identify both local and state interests in tracts of vacant, unappropriated and unreserved land remaining within the municipality. Adjacent tracts shall be considered simultaneously except when such simultaneous consideration would cause significant delay or expense. Once a tract has been jointly considered, it may be selected by a municipality.

(f) Each selection shall be approved or disapproved for patent by the director under (g) of this section within nine months of its selection by a municipality, and a patent shall be issued to the municipality within three months after approval by the director of a plat of survey.

(g) In reviewing a municipal selection, the director shall consi-

der the state's responsibilities for developing and protecting values which are of greater than local concern, including development which will have statewide impact, and critical environmental concerns. Land considered appropriate for municipal selection is land that is suitable and appropriate for an identifiable present or future municipal use or for disposal to private use by the municipality by sale or other means. A selection by a municipality of land which is primarily of local concern shall be approved. When the interests of the state may be protected through the conveyance of title that is less than a fee title, the municipality, at its option, may accept the title in acre-for-acre fulfillment of its entitlement. Specific state responsibilities to be considered, if those responsibilities have not been authorized or delegated by the state to a municipality, include air quality; water, minerals and energy; timber; agriculture; fish and wildlife and their habitat which is of greater than local concern; public recreation, natural, historical, and archaeological areas of greater than local concern; transportation facilities of greater than local concern; communications; and public safety. Specific municipal interests to be considered include

(1) [land suitable for] residential, commercial and industrial needs; and

(2) other responsibilities of the local government, including but not limited to, support of municipal services; education; local transportation; private recreation; public recreation, natural, historical and archaeological areas of local concern; and other responsibilities authorized or delegated by the state to the municipality.

(h) Every decision of approval or disapproval of a municipal selection by the director under (f) of this section shall include a written explanation of the decision based upon the criteria of (g) of

this section. Before issuing any decision to disapprove a selection, the director shall notify the affected municipality in writing, by certified mail, of his reasons for the proposed decision. The municipality shall have 30 days from receipt of the proposed decision to respond to the director in writing enumerating the reasons for which the municipality believes the proposed decision to be in error. After receipt of the municipality's statement of reasons, or after expiration of the period in which the municipality may respond to the proposed decision, the director shall, within 30 days, affirm, modify or reverse his proposed decision in writing and give written notice of his decision to the municipality. The decision of the director constitutes final administrative action in the matter.

(i) A municipality may appeal an adverse decision by the director to the superior court in accordance with AS 44.62.560 - 44.62.570.

Sec. 29.18.205. SCHOOL, UNIVERSITY AND MENTAL HEALTH LAND. (a) If the entitlement determined in sec. 201 of this chapter [or certified by the director under sec. 202(b) of this chapter] results in a per capita entitlement for the municipality of less than one-half acre, the municipality may select vacant school, university or mental health land within the municipality in partial fulfillment of its land entitlement under this chapter. School, university or mental health land may be selected notwithstanding the fact that these lands are not unappropriated and unreserved within the meaning of this chapter and secs. 190 and 200 of this chapter, repealed by this Act, but each selection of school, university or mental health land by a municipality must be vacant, unappropriated, or unreserved land as defined in this chapter, except that it need not be general grant land.

(b) The acreage of school, university or mental health land, if any, within a municipality may not be included in the determination of

entitlement under sec. 201 or 202 of this chapter.

(c) Land conveyed under this section will be credited against a municipality's remaining land entitlement under this chapter.

(d) Within six months after a request by a municipality for selection of school, university, or mental health land, the director shall identify state general grant land of approximately equal value to the land requested by the municipality, and shall propose the replacement land for the concurrence of the appropriate board. If a proposal by the director is rejected by the board, the director shall meet with the board as often as necessary to determine the type and amount of equal value replacement land that would be required to obtain the board's concurrence, and shall propose the replacement land for consideration by the board. The replacement land shall thereafter be managed for the purposes for which the land selected by the municipality was acquired by the Territory and State of Alaska.

(e) The notice and review provisions of AS 38.05.305 and 38.05.345 are applicable to the designation of other state land as school, university or mental health land in replacement of land selected under this section. The provisions of AS 38.50 and AS 38.05.032 do not apply to such designations under this section. The provisions of AS 38.05.-030(a), 38.05.030(e), and 38.05.035(a)(13) which require the approval of the respective trust board before disposal of lands by the director do not apply to selections of school, university or mental health land by a municipality under this section.

(f) For purposes of determining the per capita entitlement under (a) of this section, the resident population of the municipality shall be determined as of the effective date of this Act by the commissioner of the Department of Community and Regional Affairs and reported to the director.

Sec. 29.18.206. SELECTION AND CONVEYANCE PROCEDURE. (a) All municipal selections shall, whenever possible, be made in reasonably compact tracts, taking into account the use capabilities of a tract and its relationship to surrounding land uses. A selection filed by a municipality which has not been approved by the director may be relinquished at any time. An approved selection may be relinquished by a municipality if the relinquishment is approved by the director. An approved selection relinquished by a municipality increases the remaining entitlement of the municipality on an acre-for-acre basis.

(b) By August 1 of each year the director shall certify to each municipality having an entitlement under secs. 201 and 202 of this chapter the acreage of patented selections, approved selections not yet patented, pending municipal land selections neither approved nor disapproved by the director, and the remaining entitlement of the municipality.

(c) If land selected by a municipality is unsurveyed at the time of approval, the director shall survey, or may approve the municipality's survey of, the exterior boundaries of an approved selection without interior subdivision, and shall issue patent in terms of the exterior boundary survey. The cost of the survey shall be borne by the municipality. If land selected by a municipality has been surveyed at the time of its selection, the boundaries shall conform to the public land subdivisions established by the approved survey.

(d) The director may approve municipal selections of land which has been tentatively approved or patented to the state by the federal government, but he may not issue patent to a municipality until the land has first been patented to the state. After approval of a selection by the director, but before patent to a municipality, the municipality may execute conditional leases and make conditional sales only with the

Sec. 29.18.207. PAYMENT ~~IN LIEU OF~~ for land DEFICIENCY [LAND]. (a) There is established within the general fund the Alaska municipal land account for the following purposes:

(1) providing payment to municipalities for a deficiency of land [which it has selected and which is not] physically suitable for the purposes described in sec. 204(g)(1) of this chapter; or

(2) providing payment to municipalities for certain lands selected by the state and conveyed to a Native corporation under the provisions of the Alaska Native Claims Settlement Act.

(b) A municipality shall receive payment for its deficiency land from the account established in (a) of this section. A municipality is eligible to receive payment for deficiency land [land] if, on January 1, 1981, the amount of land which it has selected and for which approval has been given by the director constitutes approval of an entitlement that amounts to less than one-third acre per capita of appropriate vacant, unappropriated, unreserved land [which meets the standard of] sec. 204(g)(1) of this chapter. A municipality entitled to payment under this subsection may receive an amount not to exceed $ 1000 per acre for a number of acres equal to one-third acre per capita for the number of residents of the municipality on July 1, 1978, less any appropriate vacant, unappropriate, unreserved land selected by the municipality before January 1, 1981, which is physically suitable for the purposes described in sec. 204(g)(1) of this chapter. No payment may be made to a municipality under this subsection in excess of $9,000,000 or of three-quarters of all sums appropriated by the legislature to meet the requirements of this subsection, whichever is lower.

(c) If a municipality selected vacant, unappropriated, unreserved land on or before December 18, 1971, to which the state had received tentative approval or patent, and such land was also selected by a Native corporation organized under the Alaska Native Claims Settlement Act (P.L. 92-203), and title to that land is ultimately vested in that Native corporation, the municipality may, at its option, request payment [in lieu of] for land from the account established in (a) of this section. The acceptance of payment under this subsection by a municipality con

stitutes a relinquishment of any other right, title or claim to the land by that municipality. The total payment to a municipality under this section may not exceed $1,000 per capita for each person resident in the municipality on July 1, 1978, ~~as determined by the Department of Community and Regional Affairs and reported to the director. An annual payment to a municipality under this subsection may not exceed payment in satisfaction of an entitlement of 1,000 acres per year.~~

(d) The governor shall annually submit to the legislature a request for an appropriation to the account for the municipalities which are eligible to receive payments under (b) of this section or which have elected to receive payments under (a) of this section. The request for appropriation shall distinguish between amounts necessary to make payments for deficiency land under (b) of this section and those required to make payments in lieu of land under (c) of this section.

(e) For purposes of fulfilling entitlements under this section, the legislature is authorized to appropriate

(1) not more than $4,000,000 per fiscal year, and not more than $12,000,000 in total, for the purpose of paying entitlements under (b) of this section;

(2) not more than $1,000,000 per fiscal year, and not more than $8,000,000 in total, for the purpose of paying entitlements under (a) of this section.

(f) If an annual appropriation is not sufficient to meet the amount due to all municipalities which have elected to accept payment in lieu of land under (b) or (a) of this section, the governor shall apportion the appropriation among the municipalities in proportion to the payment calculated for each municipality for that year. When a distribution of payments is made under (a) of this section, the remaining entitlement of a municipality to which payment is made shall be reduced in an amount equal to the number of acres for which payment was received. An appropriation made under this section is in addition to other grants and entitlements authorized to municipalities.

consent of the director. Conditional sales and conditional leases made before the effective date of this Act do not require the consent of the director.

(e) Nothing in this chapter affects a valid existing claim, location or entry under the laws of the state or the United States whether for homestead, mineral, right-of-way or other purposes. Nothing in this chapter affects the rights of an owner, claimant, locater or entryman to the full use and enjoyment of the land so occupied.

Sec. 29.18.207. PAYMENT IN LIEU OF DEFICIENCY LAND. (a) There is established within the general fund the Alaska municipal land account for the purpose of allowing eligible municipalities to receive payment in lieu of deficiency land for entitlements provided in secs. 201 and 202 of this chapter.

(b) A municipality may obtain payment in lieu of deficiency land only in accordance with (c) or (d) of this section.

(c) If on January 1, 1981 the amount of land selected by a municipality for which approval has been given by the director constitutes an approval of an entitlement which is less than one-third acre per capita of appropriate vacant, unappropriated, unreserved land which is physically suitable for residential, commercial or industrial development in accordance with sec. 204(g)(1) of this chapter, the municipality shall receive payment in lieu of the deficiency land from the account established in (a) of this section. A municipality receiving payment under this subsection is entitled to an amount not to exceed a payment of $1,000 per acre for a number of acres equal to one-third acre per capita of land multiplied by the number of residents of the municipality on July 1, 1978 as determined by the Department of Community and Regional Affairs and reported to the director, less any appropriate vacant, unappropriated, unreserved land selected by the municipality

before January 1, 1981, which is physically suitable for the purposes described in sec. 204(g)(1) of this chapter. No payment may be made to a municipality under this subsection in excess of $9,000,000 or of three-quarters of all sums appropriated by the legislature to meet the requirements of this subsection, whichever is lower.

(d) If a municipality selected vacant, unappropriated, unreserved land on or before December 18, 1971, to which the state had received tentative approval or patent, and such land was also selected by a Native corporation organized under the Alaska Native Claims Settlement Act (P.L. 92-203), and title to that land is ultimately vested in that Native corporation, the municipality may, at its option, request payment in lieu of land from the account established in (a) of this section. The acceptance of payment under this subsection by a municipality constitutes a relinquishment of any other right, title or claim to the land by that municipality. The total payment to a municipality under this section may not exceed $1,000 per capita for each person resident in the municipality on July 1, 1978, as determined by the Department of Community and Regional Affairs and reported to the director. [An annual payment to a municipality under this subsection may not exceed payment in satisfaction of an entitlement of 1,000 acres per year.]

(e) The governor shall annually submit to the legislature a request for an appropriation to the account for the municipalities which are eligible to receive payments under (c) of this section or which have elected to receive payments under (d) of this section. The request for appropriation shall distinguish between amounts necessary to make payments for deficiency land under (c) of this section and those required to make payments in lieu of land under (d) of this section.

(f) For purposes of fulfilling entitlements under this section, the legislature is authorized to appropriate

(1) not more than $4,000,000 per fiscal year, and not more than $12,000,000 in total, for the purpose of paying entitlements under (c) of this section;

(2) not more than $1,000,000 per fiscal year, and not more than $8,000,000 in total, for the purpose of paying entitlements under (d) of this section.

(g) If an annual appropriation is not sufficient to meet the amount due to all municipalities which have elected to accept payment in lieu of land under (c) or (d) of this section, the governor shall apportion the appropriation among the municipalities in proportion to the payment calculated for each municipality for that year. When a distribution of payments is made under (d) of this section, the remaining entitlement of a municipality to which payment is made shall be reduced in an amount equal to the number of acres for which payment was received. An appropriation made under this section is in addition to other grants and entitlements authorized to municipalities.

Sec. 29.18 208. AUTHORIZATION FOR LAND EXCHANGES. The director, with the concurrence of the commissioner, and any municipality are authorized to exchange land or interests in land when it is in the public interest. Land or interests in land exchanged under this section must be of approximately equal value, including the non-monetary value of public benefits. Exchange procedures shall comply with applicable law and municipal ordinances. The notice and review provisions of AS 38.05.305 and 38.05.345 are applicable to exchanges of land under this section. The provisions of AS 38.50 do not apply to exchanges of land under this section.

Sec. 29.18.209. PUBLIC PURPOSE AND EXPANSION NEEDS. (a) Consistent with the best interests of the state, if a municipality does not contain and cannot reasonably acquire sufficient nonfederal land within

its boundaries to meet its legitimate needs for public or private settlement or development, it shall be the policy of the state to selec federal land reasonably necessary to meet the needs of the municipality and to make the land selected available to the municipality under AS 38.05.315 or (b) of this section.

(b) Where state land is the most logical location for demonstrated municipal expansion for nonpublic settlement and development purposes, and when an exchange of land under sec. 208 of this chapter is not possible or is not in the public interest, it is the policy of the state to sell or lease the land at public auction. The state may contract with a municipality to act as its agent in an auction of state land under applicable statutes. When a municipality acts as the agent of the state in an auction, the municipality may retain from the proceeds of the auction the expenses which the director determines to be necessary and reasonable.

(c) Nothing in this chapter limits or impairs the authority of the director to transfer land to municipalities, without limit or consideration, for public purposes in accordance with AS 38.05.315. If there is a remaining entitlement of the municipality, land transferred under AS 38.05.315 shall be credited toward fulfillment of the entitlement.

Sec. 29.18.210. ELECTION OF BENEFITS. (a) A municipality which on the effective date of this Act is engaged in litigation, or which becomes engaged in litigation, regarding a claim to state land under former secs. 190 - 200 of this chapter shall elect either to obtain the benefits provided in secs. 201 - 212 of this chapter or to pursue the litigation and thereby waive any claim to entitlement under secs. 201 - 212 of this chapter. An election shall be made by filing a motion for dismissal with prejudice in the court in which the litigation is pending. If the claim involves a municipality identified in sec. 201 of

this chapter, the municipality shall file its motion for dismissal within 60 days of the effective date of this Act. If the claim involves a municipality not listed in sec. 201 of this chapter, the municipality shall file its motion for dismissal within 60 days after receiving the certificate of entitlement provided by the director under sec. 202(b) of this chapter. Failure of the municipality to file a motion for dismissal during the time period provided in this subsection shall be considered a waiver of entitlement under secs. 201 - 212 of this chapter.

(b) A municipality which was eligible to file land selections under the former secs. 190 - 200 of this chapter and which does not enter into litigation over a claim to rights under those sections before the expiration of the time period within which it could make an election under (a) of this section shall be considered to have elected to receive benefits under secs. 201 - 212 of this chapter and to have waived any claim which might have been raised under former secs. 190 - 200 of this chapter.

(c) The provisions of secs. 201 - 212 of this chapter do not affect the rights, if any, of any party to litigation regarding the former AS 29.18.190 - 29.18.200 or 29.18.420, which litigation is maintained by a municipality that has elected not to obtain the benefits provided by secs. 201 - 212 of this chapter.

Sec. 29.18.211. ADMINISTRATION. The commissioner may adopt regulations in accordance with the Administrative Procedure Act (AS 44.62) necessary to carry out the purposes of secs. 201 - 212 of this chapter.

Sec. 29.18.212. DEFINITIONS. In secs. 201 - 212 of this chapter, unless the context otherwise requires,

(1) "appropriate vacant, unappropriated, unreserved land" means vacant, unappropriated, unreserved land which meets the criteria for municipal selection under sec. 204(g) of this chapter;

(2) "approved selection" means a municipal land selection which has been approved in writing by the director for transfer of patent to a municipality;

(3) "director" means the director of the division of lands, Department of Natural Resources, or his designee;

(4) "general grant land" means land patented or tentatively approved to the state from the United States under secs. 6(a) or (b) of the Alaska Statehood Act;

(5) "mental health land" means land granted under Title II, sec. 202 of P.L. 84-830, as amended before or after the effective date of this Act;

(6) "municipal land selection" means a request by a municipality, filed in writing with the director under authority of secs. 190 - 200 of this chapter repealed by this Act or under secs. 201 - 212 of this chapter for vacant, unappropriated, unreserved general grant land within its municipal boundaries in partial fulfillment of its municipal entitlement;

(7) "municipality" means a home rule or general law city or organized borough of any class, and includes unified municipalities established under AS 29.68.240 - 29.68.440;

(8) "patent" means a document, issued by the director to a municipality for a previously approved selection, which conveys and quitclaims all the right, title and interest of the state without reservation or condition except as may be required by law;

(9) "remaining entitlement" means the general grant land entitlement determined in accordance with sec. 201 or 202 of this chapter, reduced by the total acreage of approved selections, including both patented and unpatented parcels;

(10) "school land" means those rectangular sections 16 and 36

within each township surveyed on or before January 3, 1959, and confirmed and transferred to the State of Alaska upon its admission under sec. 6(k), Alaska Statehood Act, 72 Stat. 339, and any other land designated solely for school revenues;

(11) "university land" means all sections 33 reserved to the university under 38 Stat. 1214, as amended (48 U.S.C. 353) and all land granted to or reserved for the benefit of the university;

(12) "vacant, unappropriated, unreserved land" means general grant land as defined in (4) of this section, excluding minerals as required by sec. 6(i) of the Alaska Statehood Act, which

(A) has not been set aside by statute for one or more particular uses or purposes;

(B) has not been approved for patent to a municipality under secs. 201 - 212 of this chapter or former secs. 190 - 200 of this chapter repealed by this Act; or

(C) is unclassified or, if classified under AS 38.05.-300, is classified for agricultural, grazing, commercial, industrial, private recreational, residential, utility or open-to-entry purposes, or where classified in accordance with an agreement between a municipality and the state providing for state management of land of the municipality.

* Sec. 3. AS 38.05.321 is repealed and reenacted to read:

Sec. 38.05.321. RESTRICTION ON SALE, LEASE OR OTHER DISPOSAL OF AGRICULTURAL LAND. (a) The sale, lease or other disposal of state land classified as agricultural land transfers only rights for agricultural purposes, and all other interests in the land remain with the state unless otherwise required by law.

(b) State land classified as agricultural land which has been selected by a municipality under AS 29.18.190 - 29.18.200 or 29.18.204-

(e) may be approved by the director for patent under AS 29.18.204(f); however, only rights in the land for agricultural purposes may be transferred and all other interests in the land will remain with the state. Agricultural land approved for patent to a municipality under AS 29.18.-204(f) shall be credited, acre for acre, toward fulfillment of that municipality's entitlement under AS 29.18.201 or 29.18.202. If the director later determines it to be in the best interests of the state to transfer some or all of the additional rights in that approved or patented agricultural land, those rights shall pass without consideration to the municipality in which the land is located. The provisions of sec. 69(c) of this chapter apply to transfer of rights, other than agricultural rights, transferred by the director under this section.

(c) The provisions of this section do not apply to state land classified as agricultural land which has been selected by a municipality under the provisions of AS 29.18.190 - 29.18.200 if the selection is an approved selection before April 1, 1978 and is otherwise valid under AS 29.18.204(b).

* Sec. 4. (a) The general grant land entitlement of a municipality incorporated after the effective date of this Act is 10 per cent of the total acreage of vacant, unappropriated, unreserved land within the boundaries of the municipality on the date of incorporation of that municipality.

(b) Within six months of the date of incorporation of a municipality which is incorporated after the effective date of this Act, the director shall determine the entitlement of each municipality eligible to receive general grant land under (a) of this section and certify the entitlement to the municipality.

* Sec. 5. Consistent with the best interests of the state, in the selection of general grant land it is the policy of the state to make available the maximum land area from which municipalities may fulfill land entitlements

under AS 29.18.201 - 29.18.212.

* Sec. 6. AS 29.18.190, 29.18.200, and 29.18.420 are repealed.

* Sec. 7. REPORT. Within 30 days after the convening of each regular session of the Eleventh and Twelfth Legislatures and the first regular session of the Thirteenth Legislature, the director of the division of lands shall report to the legislature on the implementation of AS 29.18.201 - 29.18.212 in sec. 2 of this Act.

* Sec. 8. This Act takes effect July 1, 1978, except that AS 29.18.207, added by sec. 2 of this Act, takes effect January 1, 1981.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF NATURAL RESOURCES

OFFICE OF THE COMMISSIONER / 323 E. 4TH AVENUE – ANCHORAGE 99501

May 19, 1978

The Honorable Joesph Orsini
Chairman
Senate Community and Regional Affairs Committee
Pouch V
Juneau, AK 99811

Dear Joe:

Following the completion of testimony before your committee on the Municipal Land Selection Bill (SCS CSHB 133), I felt it appropriate to forward some comments from the Administration based upon information brought out at the hearings, as well as discussions with the representatives of individual municipalities.

As I suggested at the hearings, and as has been echoed by several of the municipalities, we feel that it is important that the Senate Resources Committee Bill be used as the "mark-up vehicle." While your committee may wish to make several amendments to the legislation, the Resources Committee Substitute represents the most finely honed version to date and is certainly the most suitable version upon which to build at this time.

In reviewing the May 5, 1978 letter to you from Theodore D. Berns of the Anchorage Municipality, I believe several comments on the suggested amendments in Exhibit D of that letter are appropriate. With respect to suggested amendments nos. 3 and 5, Ted is addressing the need to clarify the difference between land that is merely "vacant, unappropriated, unreserved," and land which is vacant, unappropriated, unreserved which is actually appropriate for municipal ownership. In other words, there might be mountaintops, glaciers, and coastlines which are by definition vacant, unappropriated, unreserved, yet are clearly not appropriate for municipal ownership. The State supports a clarification of this issue, but we would do so in a slightly different manner than the language suggested in Exhibit D of Ted's letter.

10-J2LH

We suggest that the definitions section (29.18.212) be amended by the addition of a new definition no. (1) which would read:

> (1) "Appropriate vacant, unappropriated, unreserved land" means vacant, unappropriated, unreserved land which meets the criteria for municipal selection under Section 204(g) of this chapter;

In referring to Section 204(g) the definition incorporates the specific municipal criteria found in that subsection and therefore clearly differentiates between all vacant, unappropriated, unreserved land and land in that category which is actually appropriate for municipal ownership. By using this new definition, the suggested amendments nos. 3 and 5 in Exhibit D of Ted's letter may be changed to merely refer to this definition. Specifically, with respect to suggested amendment no. 3 on page 2, line 28 (SCS CSHB 133) the language would read:

> "or to that portion of an entitlement that cannot be satisfied by such date due to a lack of appropriate vacant, unappropriated, unreserved land."

The intent of suggested amendment no. 5 may then be manifested by adding on page 9, line 1, between the words "the" and "vacant," the word "appropriate."

Ted's suggested Amendment no. 4 on page five, at line 12, is acceptable to the State and we would not object to its inclusion in the bill. Likewise, with respect to suggested amendment no. 1 on page 1, at line 17-18, the State would not object to this deletion.

Suggested amendment no. 2 on page 1, at line 24, which would increase Anchorage's entitlement by 115 percent, causes us concern. While we again question, as has Senator Hackney, when the continual spiral of increases for municipal entitlements in this legislation will end, our specific concern here is that the 240,280 acres of selected land cited as being within the Anchorage Municipality is incorrect. That figure, as brought before your committee, includes substantial "double filed" acreage--land which has been filed on for selection by the State at different times or under different selection entitlements. While an exact determination of the degree of double filing would be a very time consuming effort, our best estimate of this double filing, giving Anchorage the benefit of any doubt, is approximately 72,000 acres. Reducing the 240,000 figure by 72,000 acres leaves approximately 168,000 acres of state

selected land. Ten percent of this total yields a figure of 16,800 acres. When added to Anchorage's existing entitlement of 20,865 acres, a more correct total of 37,665 acres is obtained.

Although not listed in Exhibit D of Ted's May 5 letter, Anchorage has requested that language found in Section 29.18.210(c) of the House bill (CSHB 133 (Finance) am) be reinserted in the Senate version (page 12, lines 8-11). This language, which refers to land conveyed to the State under Section 12(d)(2) of Public Law 94-204 is acceptable to the State provided that the ultimate entitlement for Anchorage is not in excess of the 37,665 acre figure addressed above.

With respect to Section 29.18.207, concerning payments in lieu of land, I have indicated several times that the Administration feels that the cumulative total of payments to all communities under this section should not total more than 20 million dollars. At present it appears that only the municipalities of Anchorage and perhaps Kodiak will qualify for payments under this section. I also understand that these municipalities are amenable to amendatory language, probably in Subsection (f), which would limit the total amount of in lieu revenue payments any one municipality could receive to a maximum of 10 million dollars. If language is included in that subsection which limits the total cumulative payments to all municipalities under this act to a total of 20 million dollars, and limits the total cumulative payments any one municipality can receive under this act to 10 million dollars, the Administration can support this section. Our suggested language is as follows:

> Once the total of cumulative in lieu revenue payments to a municipality under this section has reached 10 million dollars, there exists no obligation on the part of the State to provide further in lieu revenue payments to that municipality for any of its remaining entitlement. Once the total accumulative in lieu revenue payments to all municipalities under this section has reached 20 million dollars, there exists no obligation on the part of the State to provide further in lieu revenue payments for any remaining entitlement of any municipality.

The purpose of this language is to ensure that the artificially inflated entitlements of communities, where appropriate state land for municipal selection may not exist, do not return to haunt the State for additional revenue payment in the future. The remaining entitlements would, however, remain effective should additional appropriate land be received by the State within a municipality.

A major problem which we have all wrestled with throughout consideration of this legislation has been that of the trust lands. Your suggestion that appropriate trust lands be made available for municipal selection without the need for concurrence of the respective trust board has considerable merit in that it would significantly speed up the conveyance process. There are, however, two corollary considerations which must be addressed. First, if the trust boards are not to be formally approached for their approval, trust land selected by a municipality should be treated no differently than general selection lands selected by a municipality. That is, they should be subject to the same processes found in subsections (e) through (i) of Section 204. Second, while there may be a requirement to identify other lands of equal value for exchange with the municipally-selected trust lands, no specific time limit for identification or culmination of an exchange should be given. If the trust boards do not have approval authority, the rapidity of the conveyance process would simply outstrip the capability of the Department of Natural Resources to formally execute exchanges. Specific identification and accounting of all trust lands conveyed to municipalities would of course be kept for the execution of exchanges at a later time.

I would like to take this opportunity to thank you for your diligent and detailed review of this legislation. If I can supply any further information please do not hesitate to let me know.

Sincerely,

Mike

ANCHORAGE, ALASKA 99502
(907) 274-2525

GEORGE M. SULLIVAN, MAYOR

OFFICE OF THE MUNICIPAL ATTORNEY

May 5, 1978

Senator Joseph Orsini, Chairman
Senate Community & Regional
Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

On May 2, 1978, the Anchorage Assembly adopted Resolution AR 78-61 (copy attached as Exhibit A) dealing with SCS CS HB 133, presently before your Committee. In this resolution, the Assembly, together with the Municipal Administration, point to the inequitable treatment received by Anchorage under the present version of HB 133. The following is a brief summary of the major points:

With respect to land entitlement figures, at least seven, and probably more, of the municipalities listed on pages 1-2 of the bill have had their entitlements substantially increased over a literal application of the 10% VUU formula contemplated by existing law. For example, one municipality has been increased from 25 acres to 9,200, another has gone from 440 acres to 13,600 acres, and another has been adjusted from 645 acres to 89,850 acres. Anchorage, on the other hand, has remained at its 10% figure of 20,865 acres even though this entitlement results in by far the lowest per capita entitlement of any local government in the state.

SCS CS HB 133 also deleted language that would have prevented the area known as the "Campbell Tract" (approximately 5,000 acres) from being deducted from the Anchorage entitlement if that land eventually is transferred to the Municipality. Use of the Campbell Tract is restricted, by federal act, to a specific park plan that contemplates management by the state and federal governments as well as the Municipality. Any change in use from that listed in the federally recognized plan, even for such things as necessary expansion of local roads, may well require approval by the Congress. To my knowledge, no other municipality has had

land that is so restricted and encumbered counted against its land selection entitlement. Anchorage should not be forced to decide whether to reject a transfer of the Campbell Tract in order to prevent using a major part of its remaining entitlement for land that is subject to severe use restrictions.

In the Senate Resources Committee, a great deal of rhetoric was addressed to the point that Anchorage should not be entitled to receive any payments in lieu of land under A.S. 29.18.207 in the proposed legislation. The Committee reviewed figures from the Alaska Division of Lands (ADL) attempting to create the impression that there is ample available land to meet the Anchorage entitlement of 20,865 acres. As discussed later in this letter, subsequent investigation has revealed that these figures are, at best, misleading, and in fact, have been acknowledged to be in error by ADL staff. The figures presented by the State speak in large part to land for which the State does not even have tentative approval or lands that are otherwise clearly not presently available for local selection. Of the small amount of land that might be available for selection by Anchorage, most is clearly inappropriate and therefore unavailable for municipal use under the criteria advanced by the State on pages 4-5 of SCS CS HB 133. (See Exhibit B)

The figures advanced by ADL to the Senate Resources Committee are an attempt to create the illusion of adequate, appropriate state land in Anchorage that would, I can assure you, disappear once the bill is enacted into law. The simple fact is, as anyone who is even remotely familiar with Anchorage land clearly knows, the Municipality cannot expect with any assurance to obtain any appreciable amount of its entitlement in the form of land in the forseeable future. It is, however, the Municipality's position, as stated in the Assembly's Resolution, to accept any appropriate state land within the Municipality in partial satisfaction of its entitlement.

It is the position of the Municipality that Anchorage be entitled to payment in lieu of land for any portion of its entitlement that cannot be satisfied through a timely transfer of appropriate state land. Hollow promises concerning various types of land that "might" be available "sometime" for use by the Municipality are unacceptable. It is my belief that a majority, if not all, municipalities in the state support the in lieu payment schedule in SCS CS HB 133 as at least a small attempt to achieve equity for Anchorage taxpayers in a final settlement of the land selection program.

Based on the attached analysis (Exhibit B) of appropriate state land in Anchorage, it is anticipated that Anchorage might eventually request payment in lieu of land for up to 12,500 acres of entitlement. This would mean that Anchorage would receive approximately $16,875,000 in payments over approximately four

years under the present entitlement figure of 20,865 acres. In the Resources Committee, great concern was expressed over any payment to Anchorage. However, that Committee added language to the bill that may result in payment to Kodiak Island Borough of up to $26,000,000 based on a legal argument concerning the Native Claims Act (ANCSA) which is tenuous at best. The logic of such action is difficult to fathom.

The State Administration has indicated that it will not accept an in lieu payment system that would commit the State to payment of over approximately $20,000,000. Apparently this figure is advanced as the Administration's "bottom line" regardless of the time period over which municipalities are willing to accept payment. Again, the logic of this position is difficult to understand when the value of state land to be transferred to other municipalities under the bill could be over one billion dollars ($1,000,000,000.). (See attached analysis, Exhibit C). The Administration apparently either believes that Alaska land does not readily translate into money (a position so naive it cannot be accepted) or (more likely) that by attempts to frighten the Legislature with large dollar figures and veiled threats of veto, it can force Anchorage legislators to accept less than an equitable settlement for their municipality.

One other alternative that has received some discussion is to force Anchorage to select state land in other boroughs or in the unorganized borough in satisfaction of its entitlement. Although it is conceivable that such a plan could have merit, it would clearly force the Municipality into a speculative gamble on the availability of suitable land not already subject to selection by other boroughs or native claims. The potential administrative expense and land management problems that such a proposal would entail are substantial. The Municipality could not know beyond mere speculation what land it might receive or what the costs associated with such land might be. Although the Assembly's resolution did not specifically address this option, as the Municipal Attorney, I would be forced to advise against such an uncertain solution to an equitable settlement for Anchorage.

Attached to this letter as Exhibit D, are suggested specific amendments to SCS CS HB 133 together with brief explanations of the reasons for such amendments. It should be noted that Anchorage has not and does not begrudge other boroughs their relatively large entitlements under the proposed bill. Certainly no one would argue that all of the circumstances existing when the land selection program was started exist today. Consequently, it could be argued that it would be in the best interests of Anchorage to propose a simple repeal of the old program. The sale of state land could then be used to fund local government programs on some sort of equitable, per capita basis. The Municipality has not taken such a position and has instead agreed to work toward an equitable settlement of the old land selection program. With this

in mind, I urge your committee and all Anchorage legislators to adopt the attached amendments to SCS CS HB 133.

If you have any questions concerning the above, please contact me at 264-4237. Thank you for the opportunity to comment on this legislation.

Sincerely yours,

ANCHORAGE, ALASKA
AR NO. 78-61

A RESOLUTION REQUESTING EQUITABLE TREATMENT OF ANCHORAGE IN SETTLEMENT OF THE MUNICIPAL LAND SELECTION PROGRAM.

WHEREAS, the Alaska Legislature has had House Bill 133 entitled, "An Act relating to selection and transfer of state land to municipalities; and providing for an effective date" under consideration, and the Senate Resources Committee has recently reported out SCS CSHB 133 for further consideration by the Senate Community and Regional Affairs Committee; and

WHEREAS, the intent of the present version of HB 133 is to provide for an immediate, equitable settlement of municipal land entitlements under the municipal land selection program existing pursuant to AS 29.18.190 - .200; and

WHEREAS, land entitlements confirmed under HB 133 have been substantially adjusted upward for several municipalities other than Anchorage from the actual figure of ten percent (10%) of state vacant, unappropriated and unreserved land within local boundaries as contemplated by AS 29.18.190 - .200; and

WHEREAS, Anchorage has been denied any similar adjustment of its land entitlement notwithstanding the fact that the Municipality is already scheduled to receive by far the lowest per capita land entitlement of any local government in the state; and

WHEREAS, there exists no justification in law or fact for such inequitable and discriminatory treatment of Anchorage in the settlement of disputes over the municipal land selection program; and

WHEREAS, there is a serious shortage of appropriate and available state land for municipal selection in the Anchorage area as well as a shortage of funds available for land acquisition and other land related needs of municipal residents; and

WHEREAS, HB 133 provides for payment in lieu of land to municipalities such as Anchorage that are unable to obtain sufficient, appropriate state land to meet their entitlements; and

WHEREAS, such in-lieu payments are desperately needed to assist in meeting the land related needs of the Municipality but are threatened by the discriminatory and inequitable treatment of the land entitlement established for Anchorage in HB 133;

NOW, THEREFORE, the Anchorage Assembly in conjunction with the Municipal Administration hereby resolves:

Section 1. That the position of Anchorage with respect to HB 133 is to accept every available acre of appropriate state land within the Municipality in partial satisfaction of its land entitlement; and

Section 2. That Anchorage residents are entitled to equitable, nondiscriminatory treatment with respect to other municipalities in the upward adjustment of land entitlement figures under HB 133 over the entitlements authorized by a strict application of AS 29.18.190 - .200; and

Section 3. That land, such as the area commonly known as the Campbell tract, that is subject to preexisting federal or state restrictions on use or management not be counted toward the Municipality's land entitlement, and that the Municipality

be required to count against its entitlement only land that is appropriate for municipal selection, and subject exclusively to municipal control.

Section 4. That Anchorage be entitled to payment in-lieu of land for any portion of its land entitlement that cannot be satisfied through a timely transfer of appropriate state land, and that such payment, as a minimum, follow the payment scale and other payment provisions expressed in SCS CSHB 133; and

Section 5. That the Governor and Legislature be reminded that both the total and per capita dollar value of state lands to be transferred to many other municipalities under HB 133 far exceeds the amount that could possibly be awarded to Anchorage as payment in-lieu of land, and that equity demands the Administration's support for funding any in-lieu payment system established by HB 133.

Section 6. That the Senate Community and Regional Affairs Committee address the inequities and discriminatory treatment of Anchorage under the present SCS CSHB 133 and that all Anchorage legislators make the expeditious passage of an acceptable version of HB 133 a matter of highest priority for the present legislative session.

Passed and approved by the Anchorage Assembly, this _____ day of _____, 1978.

"A"

EXHIBIT B

ANCHORAGE LAND STATUS

It should be noted that the following figures are the result of a cooperative effort between municipal staff and ADL personnel to determine the status of government owned land in Anchorage. Data and records at both the State and local level is at best imprecise. However, the figures below represent the best possible estimates to date.

State Land

Trust Lands
(not presently available
for selection)

Mental Health	1,806 acres
School	2,294
University	6,200
TOTAL:	10,300

It should be noted that a great deal of these trust lands would probably not be suitable for land exchanges under the proposal contained in SCS CS HB 133.

Vacant, Unappropriated,
Unreserved Lands 6,720 acres

Of the 6,720 acres identified by the State as VUU on maps presented to the Municipality, analysis has shown that probably no more than 1,700 acres that would meet the criteria for local selection and use outlined on pages 4-5 of the proposed bill.

Selected from the Federal
Government (No Tentative Approval) 240,280 acres

Virtually all of these lands are located east of Chugach State Park. There is presently no way of knowing for certain whether all or part of this land would be available or appropriate for local selection under the proposed bill.

Municipal Land

Patented or Approved	4,253 patent
To Anchorage	2,475 TA
	6,728 acres

Under AS 29.18.204(b) of the proposed bill, some or all of the 2,475 acres of TA land could be rejected as inappropriate for local selection. There is no way to know at this time precisely how many acres could be affected.

It should also be noted that state records show another 9,770 acres of municipal selections for which TA has not been received. This figure, however, includes over 5,000 acres of Campbell Tract and other lands that apparently do not meet VUU criteria. As noted above, from data supplied by the State and from working with ADL staff, it appears that only up to 1,700 acres of VUU land would be available to Anchorage in addition to land for which TA or Patent has been received.

Summary Of Lands
Available To Anchorage

Patent	4,253
TA	2,475
To be selected	1,700
	8,428 acres
Entitlement under SCS CS HB 133	20,865
-	8,428
Remaining Entitlement	12,437 acres

EXHIBIT C

ANALYSIS OF SCS CS HB 133

Assume: Average land values equal $1,500 per acre

Population figures are from revenue sharing data

Value of Land Transferred to
Municipalities Under SCS CS HB 133

1. Kenai Peninsula Borough

Entitlement	=	155,780 acres
Land value	=	$233,670,000
Population	=	24,611

Per capita value = $9,495

2. Fairbanks North Star Borough

Entitlement	=	112,000 acres
Land value	=	$168,000,000
Population	=	60,227

Per capita value = $2,789

3. Mat-Su Borough

Entitlement	=	355,210 acres
Land value	=	$532,815,000
Population	=	16,724

Per capita value = $31,859

4. Ketchikan Gateway Borough

Entitlement	=	9,200
Land value	=	$13,800,000
Population	=	11,490

Per capita value = $1,201

5. Kodiak Borough

Entitlement = 56,500
Land value = $84,750,000
Population = 7,901

Per capita value = $10,726

6. Bristol Bay Borough

Entitlement = 1,940
Land value = $2,910,000
Population = 1,311

Per capita value = $2,219

7. City and Borough of Juneau

Entitlement = 13,600
Land value = $20,400,000
Population = 20,465

Per capita value = $997.

8. Haines Borough

Entitlement = 1,080
Land value = $1,620,000
Population = 1,924

Per capita value = $842.

EXHIBIT D

SUGGESTED AMENDMENTS TO SCS CS HB 133

1. Page 1, lines 17-18: Delete "to assist in meeting costs of acquisition of land to meet public needs."

   Although this would no doubt be a legitimate use of in lieu payments, actual expenditures of funds should be left to the decision of local elected officials. Other boroughs have for years sold land received from the state and have used the proceeds for public purposes without restrictions. Anchorage should be allowed the same flexibility with respect to any in-lieu payments received under HB 133.

2. Page 1, line 24: Delete "20,865" and insert "44,893."

   The state has selected 240,280 acres of land in Anchorage but has not yet received tentative approval. Consequently, the figure was not included in the 20,865 acres listed in SCS CS HB 133. Since the bill fixes and thereby cuts off entitlements, it is only fair for Anchorage to be credited with at least 10% of the above-described state selected land.

3. Page 2, line 28: Add "or to that portion of an entitlement that cannot be satisfied by such date due to a shortage of appropriate available state land."

   This amendment would allow municipalities such as Anchorage more time to fill their entitlements with appropriate state land should it become available in the future. In Anchorage, for example, it is possible that land controlled by the Army or Air Force could become available in the future and be used to fill part of any remaining entitlement for which in lieu payment had not been reviewed.

4. Page 5, line 12: Add after the period-

   "Land deemed appropriate for municipal selection shall be land that is suitable and appropriate for an identifiable present or future municipal use or for disposal to private use by the municipality by sale or other means."

   This language would protect municipalities from possible abuse of the broad criteria expressed in subsections (g) and (h) on pages 4 and 5. The intent of the language is to minimize disputes with the state over the type of land that is appropriate for local selection and management.

5. Page 9, line 10: Add after the period-

"In certifying a municipality's remaining entitlement and available vacant, unappropriated, unreserved land under this subsection, only land meeting the criteria for local selection and use under 204(g) of this chapter shall be considered."

The purpose of this amendment is to eliminate ambiguity in applying the payment in lieu of land formula. Since only VUU land meeting the criteria of 204(g) can be approved for transfer to municipalities, it is only consistent to use these lands in applying the in lieu payment formula.

6. Page 10, Line 13: "Except as provided in (g) of this section," (Comment)

This language has the effect of possibly allowing Kodiak Island Borough to receive up to $26,000,000 in in lieu payments. Kodiak's claim is based on a legal theory concerning lands selected under the Native Claims Act (ANCSA) over which there is no doubt considerable disagreement. It is by no means clear that Kodiak will not be able to obtain many of the disputed lands for which payment might be claimed under this section. If, as the State Administration indicates, the dollar impact of the bill must be limited to less than full compensation for all municipalities entitled to in lieu payment, any per capita limit should be applied evenly to all municipalities.

Juneau, AK 99811

Re: Municipal Land Selection Bill
CSCSHB 133
Our File 101-28

Dear Senator Orsini:

The Kodiak Island Borough, in its consideration of the subject legislation, is of the opinion that the bill, properly presented, could offer a fair and equitable solution to the Borough's unique dilemma. It was with the assurances that the Kodiak Island Borough's problems would be resolved that support was forthcoming for the bill, both last term and again this term of the legislature.

The Borough has received some criticism from the Department of Natural Resources, Division of Lands, and individual legislative members claiming that the Borough had agreed to certain provisions; i.e., 1) on the amount of the land entitlement; and 2) the manner and method by which the Borough would be compensated for its land entitlements.

As you are aware, the Borough could only support the general concept envisioned in the legislation. At such time as it might be determined that the bill was not fair or equitable to the Kodiak Island Borough residents, the Borough would necessarily need to obtain amendments or even oppose the bill if it would be detrimental to the Borough's interests.

With regard to the amount of land entitlement, the Borough accepted the entitlement as prepared by the Division of Lands, subject, however, to the opportunity to review the State's maps and figures. After review, the Borough claimed over 60,000 acres, whereas the State only authorized 45,200 acres. By the Division of Lands' own figures, the Borough was able to convince the State that the entitlement was at least 50,600 acres, and it has since been agreed in the Senate Resources Committee that 56,500 acres was a satisfactory compromise.

In addition, the Borough was led to believe that the State administration was supportive of in-lieu payments when it could be shown that satisfactory land was not available. More than anywhere else within the State, the State administration was aware of the land conflict problems present in Kodiak. They are also aware that it could be argued morally, if not legally, that the State was responsible in part for that problem.

All this is to say, as you and your fellow legislators know, that, as more facts are developed and the legislation advanced, every party must review its position to determine whether it can continue to support particular legislation. The Kodiak Island Borough has acted, and continues to act, in an atmosphere of openness and fairness, and is desirous of the passage of legislation this term which would not only protect its citizens, but provide fair compensation for those lands which, because of land selection conflicts, may not be available to the Borough. Short of these assurances, the Borough would recommend that the legislation <u>not be passed</u>.

COMMENTS

From the beginning, the Borough has stressed the unique problem of Kodiak with regard to the land selection conflicts brought about in part by the State's failure to adjudicate Borough selections at the time they were received and, secondly, because of the problems raised by the Alaska Native Claims Settlement Act. Prior to the passage of the Claims Act in December, 1971, the Borough had made some 27 land selections, encompassing 38,187.70 acres. Of this amount, 9,807.5 acres were tentatively approved to the Borough and 2,120.67 acres were patented to the Borough. It should be noted that all the land selected by the Borough had been previously tentatively approved to the State by the federal government.

Of further note is the fact that some 25,966.45 acres of the remaining land selected by the Borough from the total 38,187.70 acres have been top-filed by individual native groups under the Alaska Native Claims Settlement Act. Some 7,459 acres of land were selected in the Bells Flats area, a portion of which has since been quit-claimed to individual residents of Kodiak and on which homes have been constructed. Also, some 6,440 acres of land were selected in the Monashka Bay area for the purposes of developing the water supply for the residents of Kodiak. Tens of thousands of dollars have been expended on that particular tract of land in planning and developing that watershed.

As you are aware, the individual native groups have been authorized, under the Alaska Native Claims Settlement Act, to select tentatively approved lands in their areas. As a result, and in order to satisfy their entitlements, the native groups have top-filed on those selections previously made by the Borough and from recent communications with the Bureau of Land Management, it appears that most, if not all, of those native selected lands will be transferred to the individual native groups. As a result, and in order to protect its third party interests, the Borough has determined that it is necessary to file administrative appeals in these conflict areas. To date, none of the appeals has extended beyond the administrative level; however, at such time as an adverse administrative decision is received, the Borough must then consider whether an appeal to the appropriate Court is required. If such a decision is made by the Borough to file an appeal, it is submitted that the question of legality of particular provisions of the Alaska Native Claims Settlement Act might arise, which could place a cloud on any land transferred to the native corporations by the Bureau of Land Management or an injunction to prevent such transfer.

The Borough has consistently stated that it would do everything in its power to avoid the necessity of litigating these problems. It fully repects the native groups' needs and rights and wishes to assist in the implementation of the Alaska Native Claims Settlement Act. The Assembly does, however, recognize its fiduciary obligation to all of its citizens, and when faced with the reality of what it feels are established third party interests in the tentatively approved lands, and the fact that these lands and interests may be thwarted, it must act to ensure that its interests are protected.

AS 29.18.207(g)

For those lands selected by the Borough prior to the Native Claims Settlement Act and in which title is ultimately placed in the native groups, the Borough has recommended that § 29.18.207(g) be adopted. For the total 25,966.45 acres of land and utilizing the formula under § 29.18.207(c), the fiscal note would be approximately $24 million. However, the Borough is attempting to resolve the issue of the Monashka Bay lands which would release some 4-6,000 acres from that figure. You will note that, under § 29.18.207(f) we have made an exception of our (g) paragraph in order that the $250 per capita would not limit recovery under that particular paragraph.

AS 29.18.210

In our testimony before the Senate Resources Committe, we requested that § 29.18.211 be amended to reflect that the lands under .208(g) would not apply. I note that .211 in the Senate Resources Bill is now .210 in the final version, and that that particular language is not present. In the event that Kodiak does not receive a fair and equitable amount for the lands which it loses under .208(g), the Borough would require that those particular lands be exempted under the election of benefits clause. There is some question whether, in the event the Borough would be required to litigate the individual land conflicts against the native corporations, former AS 29.18.190-29.18.200 would be an issue.

State Compensation

Some questions have been raised by individual legislators and the administration as to why the State should compensate the Borough for those lands which the Borough had selected and to which, ultimately, title is received by the native corporations. It should be noted that these lands were selected prior to the Alaska Native Claims Settlement Act and were obvious lands which were needed by the Borough and which were given great priority. Because of the State's failure to adjudicate the Borough selections, and because

the State's offer to Congress permitting the native groups to select tentatively approved lands, the whole problem of land selection conflicts arose. Again, the Borough does not fault the administration in its actions to resolve the Alaska Native Claims Settlement Bill which was then stalemated in Congress. Certainly, the action by the administration helped to resolve a serious problem, resulting in a break in the logjam and the final passage of the bill. However, it should be further noted that the Borough and the State had entered into a management agreement, whereby the State was acting as a trustee for those lands selected by the Borough. In fact, the State classified lands, at the request of the Borough, and also held timber and land sales at its request. It could be argued that the State owed a moral, if not a legal, duty to protect the Borough's interests with regard to those lands.

As the Borough argued in the Resources Committee, in the event satisfactory legislation is not passed by the legislature this term, the Borough must consider filing a lawsuit against the State under a contract theory for compensation for those lands which were lost by virtue of the native selections. That suit would bring in issue the Borough-State agreement, rights under AS 29.18.190-29.18.200, and the Alaska Native Claims Settlement Act. Assuming that the Borough does have a legal argument and would be successful in that litigation, the measure of damages would probably be in the form of money, based upon the value of the lands lost. Therefore, it would seem that, if the legislature agrees that the State does have a moral or legal obligation to the Borough, and recognizing the need to resolve the land conflict problems, and in order not to cause hardship to the native corporations, who obviously must receive their lands, compensation to the Borough in money for those particular lands would seem to be an equitable solution.

It is noted that the bill, as passed by the Senate Resources Committee, contains, in Section 7 on page 16, that AS 29.18.207 enacted in Section 2 of the Act would not take place until July 1, 1982. The Borough would express its concern regarding this section. If the Borough is to agree to withhold its rights of litigation, it can be argued that it should be compensated immediately or within a reasonable time for this forbearance.

Mr. Tubbs, land consultant for the Kodiak Island Borough, and I will be present at the Community and Regional Affairs Committee meeting on May 11th and will be happy to provide facts regarding the Borough's position and to answer any questions which you may have regarding the Borough's position on the bill.

Yours truly,

COLE, HARTIG, RHODES,
NORMAN & MAHONEY
Counsel for Kodiak Island Borough

MANAGEMENT AGREEMENT

This agreement made and entered into this 17 day of [illegible], 1965 between the State of Alaska, Department of Natural Resources, Division of Lands, hereinafter referred to as the State and the Kodiak Island Borough, organized and existing pursuant to the laws of the State of Alaska, hereinafter referred to as the Borough.

WITNESSETH:

WHEREAS, Title 7 - Article 2 - Sec. 07.10.150, Alaska Statutes vests the Borough with the authority to select certain of those state-owned lands which lie within the Borough boundaries, and,

WHEREAS, the aforementioned statute further provides that the Borough is vested with the authority to manage, lease or sell the lands so selected, and,

WHEREAS, the Borough does not at this time have the financial ability nor the manpower to initiate and maintain an efficient land management program, and,

WHEREAS, the State, through the Division of Lands, does maintain the staff capability and is willing to enter into an agreement for the management of Borough selected lands, NOW THEREFORE,

The Borough does by these presents delegate to the State the authority to manage Borough selected lands and the State, through the Division of Lands, agrees to accept management authority over said lands upon the following terms and conditions to wit:

1. All lands disposed of by the State, pursuant to this agreement, shall first be subjected to a land use plan and such plan shall, prior to becoming final, be reviewed jointly and agreed upon by the Borough and the State.

2. Prior to disposal by the State of any lands selected pursuant to Section 6(b) Public Law 85-503, General Grant lands, the Borough shall first be afforded the opportunity to select the same for its use or disposal in accordance with the terms of this agreement.

3. Upon selection of eligible lands by the Borough, the State shall, without delay, note the same on the records to be maintained by the Division of Lands, and the State shall periodically thereafter make an accounting to the Borough revealing acreage entitlement, acreage selected, acreage disposed of and such other information as shall be deemed necessary for the purpose of keeping the Borough properly informed.

4. All leases, sales or other disposals which are made by the State on behalf of the Borough pursuant to this agreement shall be made only with consent of the Borough and shall be conducted in accordance with the Alaska Land Act (Title 38, A.S.) and the regulations promulgated by the State pursuant thereto. All lands which have been selected by the Borough, as herein provided, and which the Borough may wish to sell, lease or otherwise dispose of shall be sold, leased or disposed of in accordance with the provisions of this agreement for so long as the agreement shall remain in full force and effect.

5. All monies received by the State from the sale, lease or other disposal of Borough lands shall be deposited with the Department of Revenue, State of Alaska. Upon request of Borough Assembly and certification by the Director that payment is in order, the monies so deposited shall be transferred to the Borough. The State shall, during the month of January of each year that this agreement is in effect, render an accounting of all monies received from disposals conducted during the course of the year. Concurrent with the final accounting the State shall withhold survey, appraisal and other appropriate direct management costs, exclusive of overhead costs, from the total receipts.

6. To preserve the principle and integrity of sustained yield forest management and protection, those forest and grazing lands selected by the Borough shall remain under the direct management of the Division of Lands with all revenues from such forest and grazing lands or forest products being transferred to the Borough at the same time and in the same manner as stipulated in Item #5 of this agreement.

Nothing in this agreement shall prevent, through mutual agreement, the reclassification of any lands subject to this contract as provided in the Classification regulations of the Division of Lands, State of Alaska.

This agreement shall remain in full force and effect until such time as it may be cancelled or modified by mutual agreement between the parties. This agreement may also be cancelled by one party provided it gives the other party one (1) year notice of such cancellation.

ADDENDUM TO
LAND MANAGEMENT AGREEMENT

WHEREAS, the Kodiak Island Borough and the State of Alaska Department of Natural Resources Division of Lands entered into a Land Management Agreement dated June 17, 1965, and

WHEREAS, the parties hereto desire to amend said Agreement by adding thereto a new paragraph to be entitled Paragraph 7.

NOW, THEREFORE, it is hereby agreed by and between the parties hereto that the Land Management Agreement be and the same is hereby amended by adding thereto Paragraph 7 to read as follows:

"7. In the event that specific parcels of Borough selected lands, adjudicated by the Alaska Division of Lands to be eligible for patent to the Borough, are desired by the Borough for exclusive Borough use and/or management, the same, upon proper notice to the Division shall be patented to the Borough and the management thereof, including subsequent disposal, shall no longer be subject to this Agreement.

When lands have been patented to the Borough as provided in this Section, the Borough agrees that, prior to any disposal of such borough lands, where the same lie adjacent to or are interspersed with State-owned lands, the proposed program of disposal will be subject to joint review between the Borough and the Division, and likewise, State-owned land disposals will be subject to such joint review."

In all other respects the original agreement will remain the same.

May 9, 1978

Members of the
Alaska State Legislature

Reference is made to the Chugach Natives, Inc. proposal of March 13, 1978 (enclosed) to select-exchange 150-200 thousand acres of the Chugach and Tongass National Forests.

Because of the pending State and local community land selections totaling 247,596 acres and the remaining 100,000 acres of land which could be selected for community development, expansion, and recreation purposes, the Forest Service Environmental Analysis Report concluded that all selection and exchange proposals that can significantly affect these selections of National Forest areas must be discussed with the State and local community leaders affected. Similarly, I believe it is essential that recreation, aquaculture, timber, mining, and other user or interest groups which could be affected by this proposal should also have the opportunity to review and comment on the proposed selections and exchanges.

The Forest Service response to the Chugach Natives, Inc. proposal and our suggestions for achieving the necessary public involvement in accord with the requirements of the National Forest Management Act, National Environmental Policy Act, and other laws, are embodied in the enclosed May 3 letter to Mr. G.R. Andersen, Jr. and May 5 letter to the Federal-State Land Use Planning Commissions for Alaska (LUPC).

In our May 5 meeting in Anchorage, convened by the LUPC and including representatives of the Chugach Natives, Inc., State of Alaska, Forest Service, and other parties, we agreed to proceed with the Environmental Impact Statement processes described in the May 3 and May 5 letters. Additionally, the LUPC, Chugach Natives, Inc., and State of Alaska will explore other alternatives for selection-exchange outside the

Chugach and Tongass National Forests. The Forest Service has also agreed to provide at any time the best available information on the impacts of the proposed selections-exchanges for State, LUPC, Congressional or other hearings which may be convened in advance of the issuance of the June and July Environmental Impact Statements.

As the Environmental Impact Statement processes move forward, the Forest Service will keep State/community leaders and other interested parties informed and involved. If you have any questions or suggestions regarding our planned actions relating to the Chugach Natives, Inc. proposals, Forest Supervisor Clay Beal, Chugach National Forest, Pouch 6606, Anchorage, Alaska 99502, or I would appreciate receiving them. I am sure the LUPC, State, and Chugach Natives, Inc. also would welcome your suggestions.

Your interest in this matter is appreciated.

Sincerely,

JOHN A. SANDOR
Regional Forester

May 5, 1978

Ms. Esther Wunnicke and Mr. Walt Parker
Joint State Federal Land Use Planning Comm.
of Alaska
733 W. Fourth Ave.
Anchorage, AK 99501

Dear Chairpersons:

This is in follow-up to the April 25 meeting in the Federal-State Land Use Planning Commission (LUPC) offices in Anchorage concerning the Chugach Natives March 13, 1978 12(c) land exchange and the related 12(b) and 14(h) 8 selection proposals. Forest Supervisor Clay Beal and Jim Calvin of my office participated in that meeting. It was agreed to meet again on May 5 at which time the Forest Service and other agency positions on these selection and exchange proposals would be discussed.

In view of the pending State and local community land selections totaling 247,596 acres and the remaining 100,000 acres of land still to be selected for community development, expansion and recreation purposes all selection and exchange proposals that can significantly effect these selections must be discussed with the State and local community leaders. Similarly, recreation, aquaculture, timber, mining and other users or interest groups should have the opportunity to consider the environmental, social, economic and other impacts of the proposals made. Accordingly, full public disclosure and discussion of the proposals (and alternatives) is essential. The enclosed April 7 letter from Mr. D. L. Finney of Louisiana-Pacific Corporation indicates potential contractual violations may also be involved. I understand SEALASKA and other native communities and corporations are concerned with the proposals and would want to be informed and involved in further discussion of these proposals.

Our suggestion for achieving the necessary public involvement is outlined in my enclosed May 3 letter to Mr. G. R. Andersen, Jr., President of Chugach Natives, Inc. Because of our prior commitments on processing the pending State selections I could not agree to delaying approval of State of Alaska Land Selections (my Feb. 8, 1978 letter also enclosed). Our position remains the same on this point.

We would be pleased to discuss alternative actions for resolution of the issues and dealing with the proposals Chugach Natives, Inc. have made. As to the possibility of an out-of-court settlement, reference to that is included in the March 13, 1978 proposal by Chugach Natives, Inc. and I understand discussions have been held with Guy Martin and others of the U.S. Department of Interior. Insofar as National Forest lands become involved in such negotiations, I believe it is essential Forest Service and the office of General Counsel at the Washington and Regional levels be involved. Similarly the State, local communities and user-interest groups should be given the opportunity to study and react to actions which will effect them.

We recognize the time requirements involved with the Environmental Impact Statement process. However, with the status of our land management planning on both the Tongass and Chugach National Forests, draft statements covering the proposals can be completed in June and July. We are reordering manpower and funding priorities insofar as possible to process the Chugach Natives, Inc. proposal. If two or three of your staff would be available for work with our Chugach and Alaska Planning Team Staffs we could cover salary costs during the May - July period.

We look forward to working with you on this and related matters.

Sincerely,

JOHN A. SANDOR
Regional Forester

April 7, 1978

Mr. John Sandor, Regional Forester
U. S. Forest Service
Box 1628
Juneau, Alaska 99801

Dear John:

We have just recently learned that the Chugach Natives, Inc. have asked for withdrawals to be made in the Tongass National Forest as a possible solution to their land selection problems under A.N.C.S.A.

We wish to put the Forest Service on notice that we protest any further native selections on any area in the Tongass that would cause a reduction in the annual allowable cut.

We also wish to put you on notice that we view any withdrawals in the Ketchikan working circle as a possible violation of our Long Term Timber Sale Agreement No. A10fs-1042. We are undertaking an investigation of our legal position concerning this possible violation.

We also wish to go on record as viewing the Chugach Natives, Inc. proposal to enter the Tongass as one which is highly controversial, will have a large and lasting effect on the environment, and for which there needs to be an environmental impact statement written.

As we are able to further investigate our legal rights under our timber sale agreement we will notify you of any further action on our part.

Sincerely,

D. L. Finney, Manager
Forestry & Government Affairs

Mr. G. R. "Bob" Andersen, Jr.
President
Chugach Natives, Inc.
912 East 15th Avenue
Anchorage, Alaska 99501

Dear Mr. Andersen:

Thank you for your letter of January 23, regarding the Chugach Natives, Inc. land selection needs.

Your letter specifically requests that we delay approval of State of Alaska land selections until final markup and related Congressional action by both Houses of Congress. We received the State of Alaska's land selection proposals on December 23, 1977, and have a commitment to act on those adjacent to established communities where the need for land is the greatest by February 23 - 60 days following receipt of those proposals. Other outlying selections are to be addressed shortly thereafter and approvals or disapprovals transmitted to the State by mid-March. Because of this commitment and the fact that the Alaska Native Claims Settlement Act does not specify Chugach Natives, Inc. selection rights on the Chugach National Forest, I have decided that I cannot comply with your request. You may appeal my decision in accord with the administrative appeal regulations (copy enclosed). If you wish to discuss this with me and my staff and representatives of the State of Alaska, I will be pleased to do so.

Because of the interest of the Congressional Delegation in this matter as well as that of the State, I have provided copies of this exchange of correspondence to them.

Sincerely,

JOHN A. SANDOR

Mr. John Sandor, Regional Forester
U. S. Forest Service
P. O. Box 1628
Juneau, Alaska 99801

Dear Mr. Sandor,

In December the State of Alaska filed for a large portion of its entitlement under section 6(a) of the Alaska Statehood Act. Prior to this submission staff from our office met with Commissioner LeResche and his Forest Selection Team in an attempt to persuade them to delay making certain of these selections until the land ownership pattern in some areas was closer to finalization.

Although this specific request was refused, the Commissioner was appreciative of our position. He understands well that during final mark-up on D-2 and even afterwards major decisions on land ownership and implementation of the ANCSA will be made. Some of these could radically alter the existing and anticipated patterns in the Chugach National Forest.

Therefore, Chugach requests that you delay your approval of any of the State's December land selections within the Chugach National Forest until final mark-up on D-2 and any other ANCSA-related amendments is completed by both houses of Congress. At that time we would like to confer with you on the impacts of the State's selections upon our land holdings.

Respectfully yours,

G. R. Andersen

Chugach

G. R. "Bob" Andersen, Jr.

May 3, 1978

Mr. G. R. Andersen, Jr.
President
Chugach Natives, Inc.
912 East 15th Avenue
Anchorage, Alaska 99501

Dear Bob:

This is in follow up to the April 25 meeting in the Joint Federal-State Land Use Planning Commission (LUPC) offices in Anchorage concerning your March 13, 1978 section 12(c) land exchange and the related 12(b) and 14(h)8 selection proposals. Forest Supervisor Clay Beal and Jim Calvin of my office participated in that meeting.

It was agreed to meet again on May 5 at the same location, and we were asked to present at that time our agency's position on these selection and exchange proposals.

In the light of pending State land selections totaling 247,596 acres and the remaining 100,000 acres of land still to be selected for community development, expansion and recreation purposes, all selection and exchange proposals that can significantly affect these selections must be discussed with the State and local community leaders. Similarly recreation, timber, aquaculture, mining, and other users or interest groups also should have the opportunity to consider the environmental, social, economic and other impacts of the proposals made.

There are also other Native land selections and exchange proposals under consideration which must be taken into account. For example, your proposals for selections on the Tongass National Forest could significantly affect pending and proposed urban and Regional corporation exchanges. Also, although we have not yet confirmed this, your suggestions of possibly selecting lands on Prince of Wales Island could be of concern to the Native villages on that island, as well as the Louisiana Pacific Corporation, which has the long-term timber sale contract that includes timber on that island. As to other areas that could be considered for selection on the Tongass National Forest by the Chugach Natives, Inc., Goldbelt, Inc., Shee Atika, Inc., and Kootznoowoo, Inc. (Angoon), are also looking at alternative opportunities for selection-exchange off Admiralty Island. Thus, proposals for selections on the Tongass National Forest must, in all fairness, be referred to these and other communities and corporations for comment.

Although you report general support of the Sierra Club and other members of the Alaska Coalition for your selection-exchange proposal on the Tongass and Chugach National Forests (providing you do not export the timber to be harvested), not all conservation or environmental groups may do so. Accordingly, we are obligated to contact these organizations for their reactions to these proposals.

Fortunately, the Tongass Land Management Plan is at a stage where your proposal can be promptly incorporated into the Tongass Draft Environmental Impact Statement to be issued in June. Similarly, the development of the Southcentral Area Guide is well underway and the Chugach National Forest Land Management Plan is also in the process of being updated. The available information from these processes and the previously completed Wrangell Mountains Area Guide, along with information available from the Land Use Planning Commission and other agencies, will enable us to issue a draft environmental impact statement on the Chugach National Forest proposals in July.

We and our counsel have concluded that the 1976 National Forest Management Act and the National Environmental Policy Act clearly requires public involvement and the applications of the environmental statement process on decisions of this magnitude. It is our finding that decisions on the proposal submitted constitute major Federal actions and are likely to be controversial. Alternatives to the proposals must be identified and addressed with full public participation before approval or disapproval can be recommended or taken. We clearly recognize the need for prompt action on your March 13, 1978 proposals. As noted above, the Tongass Land Management Plan Draft Environmental Impact Statement to be issued in June will incorporate your proposals covering that Forest. Also, the Chugach National Forest, Alaska Planning Team and other personnel can complete the Draft Environmental Impact Statement for the Chugach National Forest proposals in July. We see an excellent opportunity for strong involvement of the LUPC staff, State of Alaska departments, University of Alaska personnel and other public and private agencies in this effort.

As noted in my letter of April 20, we would appreciate receiving as soon as possible, the specific areas of the Tongass you propose for selection or exchange. These could then be addressed in the draft environmental statement being prepared for the Tongass Land Management Plan. Meanwhile, as we pointed out in our February 8, 1978 letter, we are obligated to proceed with the process of approving State and local community land selections.

We would be pleased to respond to further questions regarding our position or our proposed course of action in this matter.

Sincerely,

JOHN A. SANDOR
Regional Forester

March 13, 1978

PROPOSAL FOR A LAND EXCHANGE

I. Background:

1. Chugach was unable to select any of its section 12(c) entitlement of approximately 350,000 acres from the statutory section 11 withdrawals within its region. Two of our five villages were totally on state selected and tentatively-approved lands, while the other three villages are located within the Chugach National Forest. Therefore, from the very beginning Chugach realized that all of its lands would have to be selected from so-called "deficiency" areas.

2. Prior land appropriations to the state of Alaska and the reservation of the C hugach National Forest, along with the withdrawal of proposed D-2 system lands, virtually exempted the rest of the coastline in the Chugach Region from selection by the regional corporation. Nearly all of the Secretary's deficiency withdrawals for Chugach therefore had to come from inland areas.

3. The Chugach Region is perhaps the smallest in the state of Alaska, with less than 10 million acres within its boundaries. Yet it has without question the most rugged terrain and the highest percentage of snow and ice cover of any region in Alaska. Thus, it was lands of thisscharacter which were eventually withdrawn by the Secretary of the Interior for Chugach's deficiency.

4. Chugach's deficiency withdrawals clearly did not meet the requirement of section 11(a)(1)(A) of the Act, in that they were not"of a character similar to those on which the village is located". Incidentally, all of the five Chugach villages are located on the coastline around the Gulf of Alaska, and the Chugach people have always had a direct dependence on the sea for their dependence and their culture.

Chugach

5. In 1975 Chugach filed litigation against the Secretary, charging, among other things, that the deficiency withdrawals made for the Region were inadequate and in violation of the Secretary's statutory mandate.

6. On January 18, 1977, Chugach withdrew this claim against the Secretary in order to reach an out-of-court settlement of the requirements for compactness and contiguity pertaining to its land selections.

7. Therefore, although the litigation over this issue has ended, it is widely acknowledged that Chugach received both a poor land settlement, when compared with that of the other corporations, and an unjust land settlement with respect to the law.

II. Specific Selection Problems:

A land area equivalent to that in 55 whole townships was withdrawn for selection by the Chugach Regional Corporation. Chugach's 12(c) entitlement is roughly the equivalent of 15 whole townships, or about 350,000 acres.

Of all the lands withdrawn, the approximate equivalent of 30 whole townships, or in excess of 46% of the entire withdrawn area, was covered by either glaciers or ice fields. Of the 35 townships remaining, 14 ice-free ones were within a "dual" D-2/regional deficiency withdrawal in the southern part of the proposed Wrangell Mountains National Park. This left only 21 townships from which "reasonable" land selections could be made. Of these, Chugach wasn't informed that three of them were available for regional deficiency selection until after the selection deadline had expired. Of the 18 townships remaining for possible selection, 2.25 not covered by ice in the Nellie Juan area were discovered to be improperly withdrawn, as they were included in a wilderness study area pursuant to PLO 3665 in 1964.

This left only 15.75 townships, approximately, which were still available for filing on by Chugach, or roughly the equivalent of the Corporation's 12(c) entitlement. By not selecting, or rather not identifying as priority selections, most of the lands within the so-called Ice Worm Peak withdrawal area, Chugach forfeited its earlier "blanket" selection thereon. This reduced the number of townships not covered by ice which were still available for priority selection by Chugach by two more, or now down to 13.75. Finally, I would venture that no more than six or seven of these remaining withdrawal areas which are suitable for selection consist of lands which are not entirely impassable because of their precipitous terrain.

III. Proposal:

We are approaching all possible parties of interest at this time for their support in principle of Chugach's proposed exchange of lands in the Bremner River withdrawal area for alternate selections elsewhere. Additionally, we are seeking comments on the "in-lieu" areas proposed below, and suggestions for other areas. Legislation pending before the Congress to implement section 17(d)(2) of the ANCSA offers an appropriate vehicle into which we can incorporate the terms and conditions of the proposed exchange.

IV. General Areas Where Chugach has an Interest in Acquiring In Lieu Lan

A. Chugach National Forest lands-
1. western Prince William Sound copper belt (ie. Latouche, Knight and Naked Islands). - max. 90,000 acres

2. Bering River coal fields - max. 54,000 acres

B. Yakataga Forelands - max. 75,000 acres
Chugach would be quite interested in obtaining coastal lands between Cape Yakataga and Icy Bay which are now selected by or tentatively approved to the state. This would mean that other federal lands would have to be made available for state selection which the state rates more desirable than the Yakataga lands. Any 3-way trade would also have to be exempt from the section 6(i) restriction in the Statehood against deeding subsurface estate to other parties.

C. Tongass National Forest lands-

D. Cash payment in lieu of some acreage

E. Surplus or Excess federal holdings

F. Others

V. Chugach Concessions:

A. Receive no conveyance of lands in the Ice Worm Peak, Nellie Juan and Keystone Glacier regional deficiency areas.

B. Receive no conveyance of lands within the Controller Bay regional deficiency area (would involve amending CNI/DOI Agreement in CNI v. Andrus (No. 75-2113 Dist of Columbia).

C. Receive no conveyance of lands within the Bremner River watershed, and possibly only along the Copper River in the entire Bremner River regional deficiency area.

VI. Special Terms and Conditions:

A. Amend the partial agreement reached by Chugach and DOI in CNI v. Andrus to allow Chugach to receive conveyance to less than all of the priority selection area which it has identified in the past in the Icy Bay Withdrawal.

B. Amend the same Agreement to allow Chugach to take conveyance to none of its priority selections in the Controller Bay withdrawal area.

C. Include a special provision allowing Chugach to reinstate its now relinquished 12(c) selections in all of the Carbon Mountain withdrawal area. This would only be done after we are assured of obtaining 14(h)(8) lands from the Chugach National Forest. As it stands we were forced to relinquish some of our 12(c) filings in order to make valid 14(h)(8) selections on unappropriated lands.

KETCHIKAN GATEWAY BOROUGH
344 FRONT STREET
KETCHIKAN, ALASKA 99901

May 15, 1978

The Honorable Joseph Orsini, Chairman
Senate Community & Regional Affairs Committee
Alaska State Senate
Pouch V
Juneau, Alaska 99801

Re: Municipa' Entitlement Legislation

Dear Senator Orsini:

Your committee office has advised me that the Committee will be accepting testimony from Southeast Alaska municipal officials on the municipal entitlement bill this Tuesday afternoon. Our meeting schedule precludes my being in Juneau for this hearing, therefore; I am hoping that you will accept and consider this written statement.

The Ketchikan Gateway Borough is extremely anxious to have the municipal entitlement question resolved as rapidly as possible. The bill before you now is very similar to the bill agreed upon early last legislative session. Ketchikan was a party to that agreement and remains firm to our basic support of the legislation.

Ketchikan has a land problem; a problem of land for community expansion. Ketchikan has the highest density use of land of any community within the entire State as we are virtually landlocked, surrounded entirely by National Forest Lands. The State is making a selection of approximately 23,000 acres within our Borough, the majority of which is adjacent or near the present roaded system. These forest selections and the Mental Health lands bounding the City limits are those lands into which the community must expand. If these lands are available for community expansion, they will be so utilized without regard to suitability for such purposes because this is all the land there is and all the land there ever will be in the future.

The "magic acreage" municipal entitlement figure to be included in this legislation simply will be arbitrary in Southeast. A figure of 9,200 or 11,000 acres of community expansion lands for eternity is just a guess. It may be necessary to select 30,000 acres to have 9,200 acres of usable land or there may not be 9,200 acres of usable land in eventual State ownership from which to make our municipal selections. This is information we just don't have today and will take years and be very costly to determine.

There must be an entitlement figure listed at some point and the Southeast boroughs should have entry into the difference (lands in State ownership) if through a legitimate determination process, additional land is needed for community expansion purposes. This flexibility must be written into the legislation. Basically, the State should not be in the land ownership business in Southeast as there are virtually no large State interests in land in Southeast other than to hold land for community needs. This is supported by the State's acceptance of the Borough's recommendation for withdrawal of forest lands with only very minor changes by the State. Therefore, it would be in the best interests of the State and the Ketchikan Gateway Borough that language be included in the municipal entitlement legislation to insure the entry of our Borough into the remaining State lands at such a time in the future that there is an identified need for additional land for community expansion purposes.

I hope these comments will be helpful in your deliberations. Your endeavors toward passage of this legislation are appreciated.

Sincerely yours,

KETCHIKAN GATEWAY BOROUGH

THE CITY AND BOROUGH OF JUNEAU

CAPITAL OF ALASKA
155 SOUTH SEWARD ST. JUNEAU, ALASKA 99801

DATE: May 23, 1978

FILE NO. CSHB 133

SUBJECT: Land Availability in the Juneau Area

Joseph Orsini, Chairman
Senate Community and Regional Affairs Committee
Pouch V - State Capitol Building
Juneau, Alaska 99803

Dear Senator Orsini,

The following is in response to your request for the municipality's estimation of acreage which is or could be made available in the City and Borough of Juneau and how much is developable. After reviewing the matter with our planning staff, we have concluded that the differences between the figures which were ultimately developed at the hearing on May 16, 1978 are not so significantly at variance from our estimates as to warrant pursuit of the differences. Below is a table which sets forth the figures as I understood them at the hearing and with which our plainning staff has only insignificant differences.

Type	Total Acreage	Developable Acreage	
		Inc. Goldbelt Topfiling	Exc. Goldbelt Topfiling
Mental Health	11,480 (to 12,690)	5,700	5,700
Prior 6(a) selections TA	2,925	1,650	1,650
University	440	200	200
6(b) patented or TA	4,160	780	780
6(b) not TA	9,000 (aprox)		
New 6(a) selections (not TA)	23,618	12,650	8,650
Total: selected, TA, patented	51,623		
Total developable: selected, TA, patented		20,980	
Total developable: selected, TA, patented, less Goldbelt topfiled			16,980

FORM NO. CBJ 7

Of the approximately 4 000 developable acres which have been topfiled by Goldbelt, we estimate that well over 2,000 of those would become available to the state for selection if Goldbelt receives its first priority choices in other areas outside the City and Borough of Juneau. This would increase the 16,980 acres to over 19,000 acres.

As was mentioned at the hearing, the City and Borough withdrew its selection of an area in the Eagle River area. It is estimated that there were well over 2,000 developable acreas in that selection. The withdrawal came after the State National Forest selection team suggested to the City and Borough that it consider whether it wanted to withdraw its Eagle River nomination. Shortly after the state's suggestion, the assembly received a substantial amount of input from conservation oriented groups to drop the nomination. Pursuant to an assembly decision, the nomination was dropped; however, it was fully understood that the parcel could be nominated in the future after more study and planning. Thus, while the state has not counted this particular nomination as part of its developable acreage, it nevertheless does have potential for future selection and would raise each of the developable acreage figures by something in excess of 2,000 acres each.

Please bear in mind that the City and Borough of Juneau is interested not only in developable land but in land which will serve community recreation needs and will provide protection for our watershed. Part of the approximately 9,000 acres of unapproved 6(b) selection may be of interest to the municipality either for recreation or for watershed protection purposes. Also, the Eaglecrest selection of almost 4,000 acres is classified as undevelopable yet it is obvious the community has a great interest in acquiring this "undevelopable" land.

The concept of allowing municipalities to satisfy their entitlement out of developable land is one which has been recently suggested. The City and Borough of Juneau has never taken the position that its entitlement should be satisfied only from developable land. We have always anticipated that if we receive a fair entitlement under the bill, part of the entitlement would be met with land which was not developable. We believe that 28,000 acres is a fair entitlement and that certainly nothing less thant 24,000 should be placed in the bill for Juneau considering its population, area and the special position it occupies, along with some other southeast communities, under section 6(a) of the Statehood Act. We would not expect a "developable lands only" restriction to apply to the City and Borough of Juneau

under the conditions of the more reasonable entitlement suggested. We would, under such circumstances, be looking at well in excess of 50,000 acres out of which to satisfy our entitlement.

I realize that there is some feeling that there must be an end to communities coming in and asking for more land. Please consider the following. When Senate Bill 241 was first introduced, it was the product of all the large communities involved except the North Slope Borough and the three large southeast boroughs. Juneau, Ketchikan and Sitka were not even invited to discuss the land settlement problem, and in fact, to my knowledge, were not even aware that discussions were taking place which would affect them as adversely as was proposed in SB 241. By the time the southeast communities became aware of the discussions and "agreements" the die had been pretty well cast. As you will recall, the state gave the three southeast communities 32,000 acres to divide among themselves and the three communities were told to take it or leave it. Those can hardly be called the conditions under which an "agreement" was reached. Juneau has consistantly requested acreage greater than the 13,600 acres proposed except last year when it agreed to such acreage if the bill could be passed during the last session. Since last year, both Anchorage and Kodiak who were parties to the original agreement, have come in asking for substantially increased entitlements in either acres or dollars. If these communities are given increases, why should a reasonable entitlement be denied to the City and Borough of Juneau which has been requesting an increase all along and which is not asking for an entitlement which will permit it to go into the in lien fund or otherwise receive dollars as with Kodiak and Anchorage.

I should also point out that the Meekins formula has not been entirely taken out of the bill. The acreage for the North Slope Borough is what was produced by the Meekins formula. If some form of equity is being done for the North Slope Borough I strongly suggest that the same can be done for the City and Borough of Juneau. I urge you to increase Juneau's entitlement as requested above.

Very truly yours,

Gerald L. Sharp
City/Borough Attorney

Office of the Speaker

Official Business

Pouch V
State Capitol
Juneau, Alaska 99811

M E M O R A N D U M

TO: Senator Joe Orsini

FROM: Hugh Malone

DATE: June 1, 1978

As you are well aware, there has recently been considerable interest concerning the state's "trust lands."

The need to resolve, or reconcile, complex state land management programs, provide municipalities with valuable and accessible local lands, and to help insure a more adequate return of revenue from state lands - to support those services as designated by the trusts - is most crucial.

The future of our "trust lands": mental health, school and university; lands granted to territorial Alaska by the Federal government; will be profoundly shaped by a variety of pending legislation, if enacted. Presently, a number of bills, i.e., HB 133 (state land selections by municipalities), HB 720 (homesites), and SB 159 (an act relating to state land) deal, to differing degrees, with the "trust lands" issue. HB 477 and SB 562 may become involved in this as well.

Like youself, I agree that fundamental changes are needed in our "trust lands" program, but, because of the burgeoning number of approaches to this problem, coupled with the complexity fc the issue, I'm deeply concerned with the prospect of passing confusing, if not contradictory legislation.

I would urge you to review all pertinent bills; its necessary that all concerned parties be aware of the differing proposals. The need to pass comparable, or uniform legislation - as it pertains to this issue - is no less important than solving the issue itself - if long run legal and administrative complications are to be avoided.

P.O. BOX 89

OUZINKIE, ALASKA 99644

June 2, 1978

RE: Senate CS for CS for House Bill No. 133

Dear Senators:

We have just been informed of the miniciple land selection Bill CSCS HB # 133 that has been introduced by Parr, Brown, and Cowper. This action, we believe, is one of the most logical pieces of legislature proposed by the State since the passage of the Alaska Native Claims Act.

It is the Ouzinkie Native Corporation's position that we support State Compensation to municipalities for lands which had been tentatively approved to the State of Alaska, and of which lands have been selected and will eventually be conveyed to Village Corporations, under the Alaska Native Claims Settlement Act.

Compensation to the municiple government by the State, would, in our opinion, resolve much of the friction that has been created between the municiple governments and Village Corporations on the legalities of ownership of land.

Re: Municipal Land Selection Regulations

Dear Joe:

As you know, despite agreement last year by the State and almost all municipalities concerning the municipal land selection question, manifested originally in CSHB 133, that legislation has had a very checkered and sporadic history. Because settlement of this issue is of critical importance to both the State and the municipalities with respect to future land and resource management, particularly land disposals, both the State and the municipalities are concerned that the issue be settled in the very near future. While we would still prefer that appropriate legislation be enacted, the State is looking at the alternative of individual settlements with each municipality under existing law to address this matter if legislation presently before the Senate Resources Committee is not adopted this session.

Attached is a copy of draft regulations, as sent to each municipality, which would serve as the basis for any such settlements. These regulations will be needed whether or not the present legislation is enacted and, as discussed in the attached cover letter to each municipality, we are requesting a review of these regulations at this time to ensure that they meet with municipal approval and can serve as the basis for individual settlements should pending legislation not be enacted.

10-J2LH

If you have any questions concerning these regulations, please do not hesitate to ask.

Sincerely,

Mike

Michael C. T. Smith
Assistant Commissioner

DRAFT REGULATIONS
IMPLEMENTING
AS 29.18.190 - .200

11 AAC _____. DETERMINATION OF ENTITLEMENT FOR MUNICIPALITIES. (a) The general grant land entitlement of a municipality in existence on January 1, 1978 and which is eligible to receive general grant land under the provisions of AS 29.18.190 - .200 is 10 per cent of the maximum total acreage of vacant, unappropriated, unreserved land within the boundaries of each such municipality at any time between the initial date of eligibility under AS 29.18.190 - .200 and January 1, 1978.

(b) The general grant land entitlement of a municipality created subsequent to January 1, 1978 and which is eligible to receive general grant land under the provisions of AS 29.18.190 - .200 is 10 per cent of the total acreage of vacant, unappropriated, unreserved land within the boundaries of each such municipality on the date such municipality first becomes eligible for a land entitlement under AS 29.18.190 - .200.

(c) The general grant land entitlement of a municipality which enlarges its boundaries by annexation shall, upon the effective date of such annexation, be increased by an amount equal to 10 per cent of the vacant, unappropriated, unreserved land within such annexed area on the effective date of annexation.

(d) The general grant land entitlement of a municipality which is created by the unification, merger or consolidation of two or more municipalities pursuant to AS 29.68.030-.440 shall be the sum of the entitlements of each of the constituent municipalities at the time of such unification, merger, or consolidation.

(e) The general grant land entitlement of a borough containing one or more cities of any class within its boundaries shall be 10 per cent of only that vacant, unappropriated, unreserved land within the borough but outside the boundaries of each city within the borough.

(f) The general grant land entitlement of a city which is subsequently formed within a borough shall be 10 per cent of the vacant, unappropriated, unreserved land

within the boundaries of the city, and the borough's land entitlement shall be reduced by such amount.

(g) The director shall annually determine the entitlement for each municipality eligible to receive general grant land under (a) and (b) of this section and certify that entitlement to the municipality.

Authority: AS 29.18.190
AS 29.18.200
AS 38.05.035

11 AAC _____. STATUS OF ENTITLEMENTS. (a) No municipal selection vests any interest in or right to receive a particular tract of land except as provided by sec. ___ of this chapter.

(b) General grant land entitlements determined under secs. _____ of this chapter may be exercised at any time before the date which is two years after the expiration of the State's right to make selections under secs. 6(a) or (b) of the Alaska Statehood Act (P.L. 85-508).

Authority: AS 29.18.190
AS 29.18.200
AS 38.05.035

11 AAC _____. FULFILLMENT OF LAND ENTITLEMENTS.

(a) The acreage of each municipality's land selections under AS 29.18.190 - .200 for which patent has been issued before the effective date of these regulations shall be credited toward fulfillment of the entitlement of that municipality.

(b) All approved selections under AS 29.18.190 - .200 for which patent has not been issued to a municipality on the effective date of these regulations shall be reviewed by the director within nine months after the effective date of these regulations. Any approved selection of land which was vacant, unappropriated or unreserved on the date of selection is valid as of the date of the approval, and a patent shall be issued to the municipality within three months after approval by the director of a plat of survey. The acreage shall be credited toward fulfillment of the municipality's entitlement.

(c) Any prior approval by the director of municipal selections for land which was not vacant, unappropriated or unreserved on the date of selection shall be rescinded, and patent

may not be issued except when disposal to a third party by sale or lease has occurred.

(d) Transfers of land to municipalities under AS 29.18.190 - .200 are subject to AS 38.05.321 regarding the preservation of the State's agricultural land base. Classification actions as reflected upon the land status records of the Department of Natural Resources are determinative of land classification status under this chapter.

(e) All municipal land selections under AS 29.18.190-200 not approved as of the effective date of these regulations shall be recognized by the director as representing the priority selection interests of the municipalities, and such selections shall be given first consideration under (f) of this section unless the municipality indicates different priorities.

(f) Each eligible municipality and the director shall jointly consider which vacant, unappropriated, unreserved land, including federal land of interest to the municipality which may be selected by the state as general grant land, located within the boundaries of the municipality, is appropriate for municipal selection and approval by the director to fulfill any remaining municipal general grant land entitlement.

(1) The joint consideration made by the parties may include a cooperative land planning process which will, in addition to the normal objectives of such a process, seek to identify both local and state interests in tracts of vacant, unappropriated and unreserved land remaining within the municipality.

(2) Adjacent tracts shall be considered simultaneously except when such simultaneous consideration would cause significant delay or expense.

(3) Once a tract has been jointly considered, it may be selected by a municipality.

(g) Each selection must be approved or disapproved for patent by the director under (h) of this section within nine months of its selection by a municipality, and a patent shall be

issued to the municipality within three months after approval by the director of a plat of survey.

(h) In reviewing a municipal selection for approval or disapproval, the director shall consider the state's responsibilities for developing and protecting values which are of greater than local concern, including development which will have statewide impact, and critical environmental concerns.

(1) Specific state responsibilities to be considered, if such responsibilities have not been authorized or delegated by the state to a municipality, include air quality; water; minerals and energy; timber; agriculture; grazing; fish and wildlife and their habitat; public recreation, natural, historical, and archaeological areas of greater than local concern; access to public land and water; transportation; communications; and public safety.

(2) Specific municipal responsibilities to be considered by the director include residential, commercial and industrial needs; support of municipal services; education; local transportation; private recreation; public recreation, natural, historical and archeaological areas of local concern; and other responsibilities authorized or delegated by the state to a municipality.

(3) A selection by a municipality of land which is primarily of local concern shall be approved.

(4) When the interests of the state may be protected through the conveyance of title that is less than a fee title, the municipality, at its option, may accept the title in acre-for-acre fulfillment of its entitlement.

(i) Every decision of approval or disapproval of a municipal selection by the director under of this section shall include a written explanation of the decision based upon the criteria of (h) of this section.

(1) Before any decision to disapprove a selection becomes effective, the director shall notify the affected municipality in writing, by certified mail, of his reasons for the proposed decision.

(2) The municipality shall have 30 days from receipt of the proposed decision to respond to the director in writing enumerating the reasons for which the municipality believes the proposed decision to be in error. Any decision disapproving a selection to which the municipality makes no timely response to the director shall automatically become final on the thirty-first day after receipt by the municipality of THE PROPOSED DECISION.

(3) Upon timely receipt of the municipality's statement of reasons, the director shall, within 30 days, affirm, modify or reverse his proposed decision in writing and give written notice of his decision to the municipality. The decision of the director, or the failure of THE MUNICIPALITY to respond to the director within 30 days after receipt of the proposed decision, constitute final administrative action in the matter.

(h) A municipality may appeal an adverse decision by the director to the superior court under AS 44.62.560-44.62.570.

(k) No municipality is entitled to receive patent pursuant to this chapter to more than its entitlement as determined under sections _____(a) or (b) of this chapter.

Authority: AS 29.18.190
AS 29.18.200
AS 38.05.035
AS _____

11 AAC _____. SELECTION AND CONVEYANCE OF AGRICULTURAL OR GRAZING LANDS. (a) State land classified as agricultural or grazing land which has been selected by a municipality under AS 29.18.190 - 29.18.200 may be approved by the director for patent; however, only rights in the land for agricultural or grazing purposes may be transferred, and all other interests in the land will remain with the state. Agricultural or grazing land approved for patent to a municipality shall be credited, acre for acre, toward fulfillment of that municipality's entitlement under AS 29.18.190 - .200. If the director later determines it to be in the best interests of the state to transfer some or all of the additional rights in that approved or patented agricultural or grazing land, those rights shall be conveyed without

consideration to the municipality in which the land is located.

(b) The provisions of this section do not apply to state land classified as agricultural or grazing land which has been selected by a municipality under the provisions of AS 29.18.190-29.18.200 if the selection is an approved selection before the effective date of these regulations.

Authority: AS 29.18.190
AS 29.18.200
AS 38.05.035
AS _____

11 AAC _____. SCHOOL, UNIVERSITY AND MENTAL HEALTH LAND. (a) A municipality may select vacant school, university or mental health land within the municipality in partial fulfillment of its land entitlement under AS 29.18.190 - .200. School, university or mental health land may be selected notwithstanding the fact that these lands are not unappropriated and unreserved within the meaning of this chapter and secs. 190 and 200 of AS 29.18.190 - .200. Each selection of school, univeristy or mental health land by a municipality must be of vacant, unappropriated, or unreserved land as defined in this chapter, except that it need not be general grant land.

(b) The acreage of school, university or mental health land, if any, within a municipality shall not be included in the determination of entitlement under secs. ___ - ___ of this chapter.

(c) Upon receipt of a selection by a municipality of school, university or mental health land, the director shall determine whether the land selection should be approved. The decision of the director shall be based upon the criteria of sec. _____ of this chapter, and shall follow the procedures set out in sec. _____ of this chapter. Land approved for selection under this section will be credited against a municipality's remaining land entitlement under this chapter.

(d) No selection of school, university or mental health land may be approved by the director under this section without the concurrence of

(1) the state Board of Education, for school land;

(2) the Board of Regents of the University of Alaska, for university land; or

(3) the members of the Mental Health Land Board specified in AS 38.05.035(13), for mental health land.

(e) Prior to the approval under (d) of this section of a municipal selection of school, university or mental health land, the director, with the concurrence of the respective board, shall designate appropriate state general grant land of approximately equal value as school, university or mental health replacement land, and shall remove the trust classification from the selected MUNICIPAL land. The replacement land shall thereafter be managed for the purposes for which the land selected by the municipality was acquired by the Territory and State of Alaska.

Authority: AS _____

11 AAC _____. SELECTION AND CONVEYANCE PROCEDURE.

(a) All municipal selections of state land pursuant to this chapter shall be made by submission of a form approved by the director for this purpose, and shall be signed by a municipal officer whose authority to sign such selection forms on behalf of the municipality shall be on file with the director.

(b) All municipal selections shall be made in reasonably compact tracts, taking into account the use capabilities of a tract and its relationship to surrounding land uses.

(1) A selection filed by a municipality which has not been approved by the director may be relinquished at any time.

(2) An approved selection may be relinquished by a municipality if the relinquishment is approved by the director.

(3) An approved selection relinquished by a municipality shall increase the remaining entitlement of the municipality on an acre-for-acre basis.

(c) A municipality may maintain selections for not more than 110 per cent of its remaining entitlement. Municipal selections for general grant land which was withdrawn under sec. 11(a)(2) and selected under sec. 12 of the Alaska Native Claims

Settlement Act (43 U.S.C. 1601 et seq., P.L. 92-203) is not included in the limitation of this subsection.

(d) Municipal selections may be filed only upon lands patented or tentatively approved from the United States to the State.

(e) If land selected by a municipality is unsurveyed at the time of approval, the director shall survey, or may approve the municipality's survey of, the exterior boundaries of an approved selection without interior subdivision, and shall issue patent in terms of the exterior boundary survey. The cost of the survey shall be borne by the municipality. If land selected by a municipality has been surveyed at the time of its selection, the boundaries shall conform to the public land subdivisions established by the approved survey.

(f) The director may approve municipal selections of land which had been tentatively approved or patented to the state by the federal government, but he shall not issue patent to a municipality until the land has first been patented to the state.

(g) Borough selections of state land inside the boundaries of any city contained within the borough shall not be approved until each such city has received approval or patent to its entire general grant land entitlement, unless such city shall approve in writing of the borough's selection.

(h) Prior to approval of a municipal land selection, the director shall give public notice of his proposed action pursuant to AS 38.05.305 and AS 38.05.345.

(i) After approval of a selection by the director, but before patent to the municipality, the municipality may execute conditional leases and make conditional sales only with the consent of the director. Conditional sales and conditional leases made before the effective date of these regulations do not require the consent of the director.

(j) Nothing in this chapter shall affect a valid existing claim, location or entry under the laws of the state or the United States, whether for homestead, mineral, right-of-way or other purposes. Nothing in this chapter shall affect the

rights of an owner, claimant, locater or entryman to the full use and enjoyment of the land so occupied.

11 AAC _____. LAND EXCHANGES. (a) The director, with the concurrence of the commissioner, and any municipality may exchange land or interests in land when it is in the public interest.

(b) Land or interests in land exchanged under this section must be of approximately equal value, including the non-monetary value of public benefits. Exchange procedures shall comply with applicable law and municipal ordinances.

Authority: AS _____
AS _____

11 AAC _____. OTHER LAND TRANSFERS. Nothing in this chapter limits or impairs the authority of the director to transfer land to municipalities, without limit or consideration, for public purposes in accordance with AS 38.05.315. If there is a remaining entitlement of the municipality, land transferred under AS 38.05.315 shall be credited toward fulfillment of that entitlement.

Authority: AS 38.05.315
AS 38.05.035

11 AAC _____. DEFINITIONS. In secs. ___ - ___ of this chapter, unless the context otherwise requires,

(1) "approved selection" means a municipal land selection which has been approved in writing by the director for transfer by patent to a municipality;

(2) "commissioner" means the Commissioner in the Department of Natural Resources, or his designee.

(3) "director" means the director of the division of lands, Department of Natural Resources, or his designee;

(4) "eligible municipality" means a municipality which on the date of eligibility contains vacant, unappropriated unreserved state general grant land within its boundaries.

(5) "general grant land" means land patented or tentatively approved to the state from the United States under secs. 6(a) or (b) of the Alaska Statehood Act;

(6) "mental health land" means land granted under Title II, sec. 202 of P.L. 84-830, as amended;

(7) "municipal land selection" means a request by a municipality, filed in writing with the director under authority of AS 29.18.190 - .200, for vacant, unappropriated, unreserved general grant land within its municipal boundaries in partial fulfillment of its municipal entitlement;

(8) "municipality" means a home rule or general law city or organized borough of any class, and includes unified municipalities established under AS 29.68.240 - 29.78.440;

(9) "patent" means a document, issued by the director to a municipality for a previously-approved selection, which conveys the quitclaims all the right, title and interest of the state without reservation or condition except as may be required by law;

(10) "remaining entitlement" means the general grant land entitlement determined in accordance with secs. ___-___ of this chapter, reduced by the total acreage of approved selections, including both patented and unpatented parcels;

(11) "school land" means those rectangular sections 16 and 36 within each township surveyed on or before January 3, 1959, and confirmed and transferred to the State of Alaska upon its admission under sec. 6(k), Alaska Statehood Act, 72 Stat. 339; lands selected in lieu thereof; and any other land designated solely for school]ir]pses pr revenues;

(12) "university land" means all sections 33 reserved to the university under 38 Stat. 1214, as amended (48 U.S.C. 353) and all land granted to or reserved for the benefit of the university;

(13) "vacant, unappropriated, unreserved land" means general grant land as defined in (5) of this section, excluding minerals as required by sec. 6(i) of the Alaska Statehood Act, which

(A) has not been set aside by statute for one or more particular uses or purposes;

(B) has not been approved for patent to a municipality under secs. ___ - ___ of this chapter or previously under AS 29.18.190 - .200; or

(C) is unclassified or, if classified under AS 38.05.300, is classified for agricultural, grazing, commercial, industrial, private recreational, residential, utility or open-to-entry purposes.

Authority: AS 38.05.035
AS 29.18.190
AS 29.18.200

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MINUTES

May 2, 1978

Present: Senators Hackney, Willis Sumner and Orsini; Pat Conheady, Department of Natural Resources; Jack Chenoweth, Legislative Affairs Agency; Ben Marsh, Cook Inlet Air Resources; Janet Pursley, Cook Inlet Air Resources; Karla Pursley, Cook Inlet Air Resources.

Absent: Senator Ferguson

Senate Bill 599, SCR 103 and CSHB 133 were before the Committee.

SENATE BILL 599

Jack Chenoweth, Legislative Affairs Agency, stated that since the coastal management regulations are prepared by the Coastal Policy Council and are not defined by the Coastal Management Act as part of the program, they need not be presented to the Legislature for approval. He also stated that, if the Legislature were not required to approve them, they are no more or less than any other set of regulations that are adopted by any other state agency and are therefore subject to any resolution put in by a member or by the Administrative Regulation Review Board.

Chairman Orsini stated that his interpretation of a conversation with Jack Chenoweth earlier lead him to believe that there were possible legal ramifications to adopting the resolution that formally approves the regualtions, and thereby not being able to disapprove them in the future.

Mr. Chenoweth stated that he could not say that there were no legal ramifications but the regulations are not obligated to come before the legislature for approval.

The Committee concluded that either with or without Legislative endorsement the regulations would take effect. The Committee agreed to see the Federal Coastal Zone Officials at Tursday's C&RA meeting if they were available.

CS FOR HOUSE BILL 133

Chairman Orsini stated that since other committees have insufficiently addressed the Anchorage land situation involving this bill that this Committee would have to go more deeply into it. He also stated that this version of the bill is roughly comparable to the version that came out of House C&RA with the exception of monetary possibilities and slightly changed acreages. Pat Conheady, Department of Natural Resources stated that some additions added from the House Finance Committee were still in the bill and that the most important of those was the availability of trust lands for selection. He also stated that the Department thinks this is a good provision. Mr. Conheady, stated that trust lands would enable the state in those communities which do not have suitable land to obtain their entitlement. Senator

Sumner stated that Anchorage had selected 20,000 acres of land on the basis that trust lands were not available for selection, and it wound up, in terms of usable land, with around 14,000. He expressed concern as to whether Anchorage was facing a situation similar to Kodiak's. He stated that he felt Mr. Hartig who has represented Kodiak, should come and talk to the Committee. Chairman Orsini asked Mr. Conheady if it would make any difference if the state had a law like this if the Beirne Initiative passes. Mr. Conheady replied that it would be good to have one to protect the municipalities' rights to selection land first before the Beirne Initiative.

Mr. Conheady stated that the fiscal note would be different from that of the House version of this bill because DNR is involved in the selection process in the Senate version and is not in the House version.

He also stated that the Department probably would not have the lands transferred by November but would have identified what lands they were looking at.

Chairman Orsini asked Mr. Conheady if the letter sent to Senator Tillion on April 19 outlining certain acreagea available was still valid. Mr. Conheady replied that it was. Chairman Orsini stated to Mr. Conheady that if the Committee finds reasons to believe that those figures are not valid that his credibility with this Committee will have suffered. Mr. Conheady replied that he believed the letter to be valid to the extent of his knowledge.

The meeting was adjourned at 4:00.

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MINUTES

May 9, 1978

Present: Senators Orsini, Willis, Ferguson and Hackney; Jim Rolle, Alaska Municipal League, Mike Smith, Department of Natural Resources; Mitch Gravo, Municipality of Anchorage, Ted Berns, Municipality of Anchorage; B.A. "Bud" Dowling, Municipality of Anchorage; Ron Swanson, Department of Natural Resources; Royce Weller, Hugh Malone's Staff; Lee Sharp, City and Borough of Juneau.

Absent: Senator Sumner

The meeting was called to order at 3:15. SCS CSHB 133 was the bill before the Committee.

SCS FOR CS FOR HOUSE BILL 133

Chairman Orsini stated that the meeting was to get the correct data about land availability to make a policy decision on the bill. There was, for example, a dispute over how much acreage was available to the Municipality of Anchorage. One provision of the bill would allow, a municipality to select trust land where general land was not available. Chairman Orsini stated that he wanted to determine specifically to everyones satisfaction just what land was available and suitable for municipal expansion and utilization and also meet the various criteria involved in municipal land selection.

Chairman Orsini stated that in a letter to Senator Clem Tillion dated April 19 and a letter to Senator Orsini dated May 5 there was substantially a large difference in the total acreages available. Mike Smith, Department of Natural Resources explained that the letter of April 19 was hurriedly put together and that he basically agreed with the Municipality of Anchorage on the figure of 10,300. Acres of state-owned trust lands lying within the municipality.

Ted Berns and Bud Dowling, Municipality of Anchorage, gave a presentation with maps showing the Committee how they derived the 1,700 acres from 6,720 with the selection of being for municipal purposes. This is land they felt was appropriate for local management and control.

Mr. Berns brought out that there is presently approximately 9,000 acres that had been identified for municipal selection and stated that records indicate another 9,700 acres as available for selections on top of the TA'd and patented that the municipality already has. He state, however, that from what the municipality has been able to determine most would be land that would either not meet VUU criteria under the present bill and therefore would have to be rejected or is in the area known as the Campbell Tract (which is 5,000 of the 9,000 acres). The Municipality does not feel would be appriate to count the Campbell tract against the Anchorage entitlement, since much of the tract is under strict federal use conditions. The Municipality was also concerned that the land designated for municipal selection at Point Woronzoff was also in fact under restricted use conditions since it lay within the landing path of the Anchorage International Airport. Mr. Smith disagreed but concurred

in the need for both the State and the Municipality to look further into the matter.

Mr. Berns stated that Anchorage has, or could receive patent to about 8,400 acres under the present land selections. Mr. Smith agreed with this.

Chairman Orsini asked Mr. Berns and Mr. Smith if they agreed that construction such as the University and other types of public facilities could take place on all or part of Campbell tract. They both agreed that only about 1200/1500 acres along Tudor Road could be developed in such a way.

Chairman Orsini asked Mr. Berns if any of the 10,300 acres trust lands available would not be desirable. Mr. Berns stated that it was fair to say that most of the mental health land, or about 8,000 acres, was going to be highly desirable land. He mentioned, however, that some of this acreage was tied up in legal suits with the Eklutna Natives. He believed that about 3-4,000 acres would ultimately be available.

The outcome of acreages agreed upon by the Municipality and the Department of Natural Resources:

1,700 - VUU
4,200 - Patented Now
2,450 - TA
4 to 5,000 - Trust Land
3 to 4,000 - Tied up in Court Decisions

16,400 acres

As Anchorage reviewed it's land entitlement, Mr. Smith asked that it keep in mind that a major portion of Fort Richardson and Elmendorf AFB lands are likely to be turned over to the State sometime in the future. These lands would be extremely valuable and very suitable for municipal purposes.

Chairman Orsini stated that CSHB 133 would be brought up again Thursday and that the Committee would go into detail on the Kodiak situation.

The meeting was adjourned at 4:40 p.m.

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MINUTES

May 11, 1978

Present: Senators Orsini, Willis and Hackney; Ronald Kuczek, Cook Inlet Air Resources Management District; Dale P. Tubbs, Kodiak Island Borough; Bob Hartig, Kodiak Island Borough; Ron Swanson, Department of Natural Resources; Mike Smith, Department of Natural Resources; Tom Hanna, Department of Environmental Conservation; Jerry Reinwand, Department of Environmental Conservation.

Absent: Senators Ferguson and Sumner

The meeting was called to order at 3:05 with CSHB 133 and CSHB 190 before the Committee.

SCS FOR CS FOR HOUSE BILL 133 (KODIAK)

Chairman Orsini summarized the land situation in Kodiak. He stated that Kodiak contends the State was negligent in transferring land to the Borough, which the Borough had received as tentatively approved land. When ANCSA was enacted, the State allowed the transfer of the tentatively approved borough land to Native corporations as part of the settlement. These lands were of prime quality and the Borough states that no other comparable lands are now available to the Borough in exchange for those it lost under ANCSA.

Bob Hartig, Representing the Kodiak Island Borough, stressed that Kodiak's concern did not center around the amount of its land entitlement, since there was sufficient acreage available, but around its quality. Kodiak would be willing to take these lands of lesser quality if it could be compensated monetarily for the prime lands the State took from it. Otherwise the Kodiak Borough would be forced to exercise its fiduciary responsibility and file suit in court challenging the State's action and ultimately calling into question not only the present municipal land selection bill but also ANCSA.

Mr. Hartig and Dale Tubbs, Kodiak Island Borough, went over maps of Kodiak island and outer islands and explained to the Committee members what lands were selected, which were top-filed and where were involved in court suits involving village selections under ANCSA.

Mr. Hartig stated that Kodiak is confident that it can obtain at least 10,000 additional acres and possibly as much as 26,000. He summed up Kodiak's land possibly land entitlement break-down as follows: 4,000 acres already in hand; 18.000 acres tied up in village selection litigation; 32,000 acres that could be selected from state-owned lands; and possibly 15,000 acres currently under Coast Guard ownership. This would bring Kodiak's maximum selection possibility to 76,000 acres.

Mr. Hartig stated that he could not over-emphasize the importance of financial compensation for the land taken by the State since it would eliminate the need to initiate litigation between Natives and non-Natives on Kodiak. He also stated that, without the provision of payment in lieu of land, Kodiak would see no need for the land selection bill.

Mike Smith, Division of Lands, Department of Natural Resources, replied that the State had no control over the enactment of ANCSA and noted that without ANCSA there would actually be 26,000 fewer acres available to Kodiak for selection. Yet Kodiak is requesting, in effect compensation for 26,000 acres when there was no guarantee that Kodiak would have received these acres if there had been no ANCSA. Mr. Smith stressed that the Governor will only agree to a maximum payment of $20 million under HB 133, and that there still remains one community in Alaska where there is not enough land, physically, to meet its municipal entitlement.

Chairman Orsini stated that the Committee would look at the bill again Tuesday on the Southeastern situation.

CS FOR HOUSE BILL 190

Jerry Reinwand, Department of Environmental Conservation, stated that the bill does two things: it gives the districts a method for seeking approval with definite time restraints and if the Department rejects it the Department would give them the reasons why the program was rejected and the districts could make the adjustments to meet the approval of the State. He stated that the Department does not have any problem with delegating authority or approving the Cook Inlet Air Resources District program but has never received an application to do this. He stated that he would be very happy to have the CIARMD run the permanent program up in the Cook Inlet area. But he stressed that he did want to make sure that the CIARMD not give away more than 50% of the air quality increment than it already has to so to allow for additional growth to take place in the Kenai area. He wanted to make sure that in issuing industry permits that the CIARMD apply tougher standards so that the 50% air quality increment could be reserved for future industrial use.

Mr. Reinwand stated that he does not see any need for the bill personally but if it is the desire of the Committee the Department would not oppose it as long as the amendments that are suggested in the letter that Commissioner Mueller sent on April 15 are incorporated.

Ronald Kuczek, Cook Inlet Air Resources Management District, stated that the district hadn't applied because it has repeatedly tried to find out what we needed in seeking approval to run its resources control program and the information that was returned to the CIARMD was never satisfactory. He also stated that the Department said on an informal basis that approval probably would not be granted because of certain programs that the district had not implemented, but neither which the state intended to carry out.

Mr. Reinwand agreed that in the past CIARMD probably had been discouraged for approval but now the Department would accept an application.

The Committee took up a proposed draft committee substitute for HB 190 which had been prepared by the CIARMD and reviewed by DEC Commissioner

Ernst Mueller in a letter to the Committee dated April 13, 1978. The proposed committee substitute was discussed in detail with Mr. Kuszek and the DEC representatives, and final language was agreed to by the DEC and the CIARMD.

Chairman Orsini stated that the bill would be drafted with the revised amendments as agreed by both the Department and CIARMD and it would then be brought back to the Committee for signature and passed out.

The meeting was adjourned at 5:20 p.m.

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MINUTES

May 16, 1978

Present: Senators Orsini, Willis, Hackney and Sumner; Ron Swanson, Dept. of Natural Resources; Mike Smith, DNR, Division of Lands; Jack Chenoweth, Legislative Affairs Agency; Natalie Alton, Senator Rader's Staff; Royce Weller, Hugh Malone's Staff; Gerald L. Sharp, City and Borough of Juneau.

Absent: Senator Ferguson

The meeting was called to order at 3:08.

SCS FOR CS FOR HOUSE BILL 133 (SOUTHEAST)

Chairman Orsini stated that the Committee had received a letter from the Ketchikan Gateway Borough, and had not heard from Sitka, apparantly because Sitka felt satisfied with its pending entitlement.

Chairman Orsini stated that today's meeting was to try and identify what kind of land is available in the Southeast portion of the state, where severe terrain problems existed. He said that much of the land available was not suitable for development.

The members of the Committee received a hand-out from the Department of Natural Resources indicating what type of land to be selected, as well as total acreages and developable acreages for Juneau and Ketchikan. Mr. Smith explained that the hand-out was put together hastily to fill a request by Chairman Orsini for a break-down of the acreages of developable land in Southeast Alaska. He noted that only the second column of the hand-out should be used.

Lee Sharp, City Attorney for C&B of Juneau, stated that he did not concur with the figures in the hand-out. He stated that the City and Borough's inventory shows that there are approximately 12,690 acres of mental health lands in the borough but the Department's figure is 11,500, which had recently been increased from an earlier figure of just over ?,000 acres.

The Committee, Mr. Smith and Mr. Swanson reviewed the land situation in Ketchikan and Sitka. Mr. Sharp stated that Juneau would be very interested in receiving non-developable land for recreational purposes, such as Eagle Crest, in addition to developable or community settlement land. He pointed out that this could mean a substantially higher entitlement for land available.

Mr. Sharp stated that Juneau submitted to the state a suggested 65,000 acres either for local or state ownership and for local purposes. He stated that the Borough felt that about 20 to 30,000 would be high priority. Mr. Sharp also stated that Juneau had not prioritized their selection of land as of yet.

Mr. Sharp gave a brief background of how the state lands were to be divided in the three Southeastern communities. In the original version of the bill the State gave the 3 southeastern communities a total of

32,000 acres to be divided among them. At that time it was decided that 9,200 acres could go to Sitka, 9,200 to Ketchikan and 13,600 to Juneau. He stated that two things have changed since last year. The National Forest selections have been made in the Southeast, and the State has selected significantly larger acreages in the region than had been expected last year. In Wrangell and Petersburg, both much smaller communities than Juneau, Mr. Sharp noted that the State had selected 16,500 and 12,000 acres respectively. On the basis of population and future need, Mr. Sharp estimated that Juneau would require 60,000 acres but would request 24-28,000. In that respect, he noted that the 24,000 acres currently available for Juneau selection. included 6,000 top-filed acres by the Goldbelt Native Corporation. Mr. Sharp stated that there was another selection pending of approximately 15,000 acres on Gold Creek Road. He though, however, only about 9,000 would be approved. He said that most of this land is probably not developable yet it would be an additional 9,000 acres that would be available for Juneau to meet its entitlement. He stated that it is land of Borough concern because of its recreation potential and its water shed. Mr. Smith stated that the State was not sure Juneau could get this land.

Jack Chenoweth and the Committee discussed the possibility of mandating various trust lands in the bill to go directly to a municipality in trade for other equal value land as opposed to the current bill which says that the concurrence of the trust boards must be obtained before a land exchange could take place.

Chairman Orsini noted that state-owned trust lands might be made available only to those municipalities which could not fulfill their entitlements through vacant, unappropriate, unreserved state land.

Mr. Smith expressed concern that the North Slope has yet to indicate what acreage it would like. He stated that the only formal comments the North Slope has made to his knowledge was by Senator Ferguson before the Senate Resources Committee that "89,000 acres is enough for now". Chairman Orsini stated that he discussed this with Senator Ferguson and Kim Hutchinson, representing the North Slope Borough. He had asked Mr. Hutchinson if the 89,000 acres would be sufficient for the North Slope. Chairman Orsini said Mr. Hutchinson replied in Senator Ferguson's presence that 89,000 was sufficient and if the North Slope got that amount it would be satisfied.

Mr. Smith also commented that there were two sections of the bill, 201 and 202 that set out entitlement for boroughs and cities respectively. A municipality receives its land entitlement under either 201 or 202, not both. He stated that some of the language later on it the bill refers to "Sec. 201" AND "202" and suggested that it should say, "Sec. 201" OR "202".

Mr. Smith stated that the Department would like to see the Committee use the SCS for CSHB 133 as the mark-up bill.

The meeting was adjourned at 4:30.

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MEETING

May 23, 1978

Present: Senators Orsini, Hackney, Willis and Ferguson; Tom Singer, House Permanent Fund; Pat Conheady, DNR; Annette Smith, House C&RA; Jack Chenoweth, Legislative Affairs Agency, Royce Weller, Hugh Malone's Staff; Representative Dick Eliason, Richard Engen, Division of State Libraries and Museums.

Absent: Senator Sumner

The bills before the Committee were CSHB 133, HB 766 and SB 580. The meeting was called to order at 3:08.

SENATE BILL 580

Richard Engen, Division of State Libraries and Museums, stated that this bill would increase the present grant and aid program for assistance to the Public Libraries Association throughout the state from $250 a year on a reimbursable basis to a $500 grant for purchase of library materials.

He stated that it eliminates much of the paper work now required by statute. He explained that his office has to submit invoices on a reimbursable basis and this would be eliminated through the grant provision of the bill. He also stated that the bill removes the restriction from purchasing religious materials which is in the original statutes.

Senator Hackney moved to increase the $500 grant amount to $1,000. There were no objections. Senator Hackney then moved to pass the bill out with a "DO PASS" recommendation.

HOUSE BILL 766

Chairman Orsini went through the proposed recommendations for the bill. He stated that there was a CS for increasing the $250,000 to $400,000 and adding certain conditions to the increase.

Representative Eliason stated that the bill was introduced at the request of the borough Administrator of Sitka. He stated that small contractors in rural areas and smaller communities of the state who have ample equipment and the experience to handle a number of municipal jobs are falling short of other contractors from out of the community and even out of te state because of the difficulty in establishing a bond.

Senator Ferguson moved that the Committee adopt a CS for HB 766 including the recommendations by Chairman Orsini and pass it out with "INDIVIDUAL RECOMMENDATIONS".

CS FOR HOUSE BILL 133

Jack Chenoweth, Legislative Affairs Agency, went over the proposed committee substitute for CSHB 133 and explained section by section

changes in the bill and new language that had been put into it. As a result of committee discussion, a revised work draft of the proposed committee substitute was requested.

Chairman Orsini stated that CSHB 133 would be scheduled for Committee action Thursday.

The meeting was adjourned at 4:00.

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MEETING

May 25, 1978

Present: Senators Orsini, Willis, Hackney and Sumner; Roger Allington, City and Borough of Juneau; Stuart H. Bowdoin, Bristol Bay Borough; Phil R. Holdsworth, S.E. Conference; Richard M. Burnham, Attorney, General's Office; Floyd Johnson, Division of Emergency Services, Jim Rolle, AML; Pat Conheady, Department of Natural Resources; Jack Chenoweth, LAA; Don Berry, Municipality of Anchorage; Annette Smith, H/C&RA; Royce Weller, Hugh Malone's Staff

Absent: Senator Ferguson

The meeting was called to order at 3:04. The bills before the Committee were HB 941 and CSHB 133.

HOUSE BILL 941

Richard Burnham, Assistant Attorney General representing the State in the litigation over the Highway complex in Anchorage, stated that that agreement may not have been entered into in good faith. He moved that there was an affidavit form filed in the AG's office giving the Municipality of Anchorage notice that it was doubtful that the Commissioner of the Department of Highways had the authority to dispose of the land on which the complex is located. He also stated that the Department of Administration appraised the land in 1973 at 3 1/2 million dollars. The next spring an appraiser, presumably hired by the Municipality and approved by the Commissioner, appraised the property at 1 million dollars. It was on the second appraisal that the lease purchase agreement was made. He stated that he did not feel that this was in the best interest of the state to lose 2 1/2 million dollars between two appraisals. Senator Orsini pointed out that he was assuming the first appraisal was correct and the second appraisal incorrect.

Floyd Johnson, Division of Emergency Services, Department of Military Affairs, stated that the division would need a supplemental appropriation for rent due to the Municipality of Anchorage if this bill were to pass. He stated that the supplemental would require $92,467 and asked that the bill be amended to require the Municipality and his agency to sit down in good faith and negotiate a new 3 year rental sublease agreement. He told the Committee that his agency can get 50/50 matching monies from the federal government for construction of emergency operation center, that it would take about 2 to 3 years to get this money committed, and any relocation of his office would be complicated by the need to move the division's complex communication system. He stated that it would take around $100,000 to make a move to another location, preferably to another downtown location, even if one were available.

Don Berry, Municipality of Anchorage, supplied the Committee with a letter from the Assistant Municipal Attorney.

Senator Willis moved to pass out HB 941 with "INDIVIDUAL RECOMMENDATIONS".

CS FOR HOUSE BILL 133

Roger Allington, City and Borough of Juneau, asked the Committee to take a second look at the 13,600 acreage allotment for Juneau and restore at least the amount of 19,584 acres which came out of the Senate Resources version. He stated that the city was in need of the land specifically in Juneau because of the need to relocate persons now living in hazardous downtown slide areas. Mr. Allington noted that an allotment of 24,000 acres for Juneau would be more appropriate for the Municipality's needs.

Stuart Bowdoin, Bristol Bay Borough, stated that his borough was in support of the bill. He stated that the Borough was in dire need of the land and would take about anything that becomes available.

Phil Holdsworth, Southeastern Conference, stressed the need for Southeastern communities such as Petersburg, Wrangell and Skagway to have access to trust lands which now hem them in and restrict any future growth.

Jim Rolle, Alaska Municipal League, stated that the League does not feel that access to trust lands should be based on population and urged that cities, as well as boroughs, also be eligible for trsut lands and deficiency payments.

Pat Conheady, Department of Natural Resources, opposed the increase of the Anchorage allotment to 44,893 and referred to a letter of May 19 from the Director of the Division of Lands, Mike Smith. According to Mr. Conheady, a correct allotment figure for Anchorage would be 37,665 acres. He discussed the section of payment for land deficiency and supported the need for cities to have access to trust lands, particularly in Southeastern.

Mr. Conheady expressed concern regarding the January 1, 1980 deadline for determining land deficiency payments, the State was not sure when the 6A selections would be made and available for municipal selection.

Senator Sumner moved that the amendments be passed and pass out SCS for CSHB 133 with "INDIVIDUAL RECOMMENDATIONS".

The meeting was adjourned at 4:10 p.m.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF NATURAL RESOURCES

OFFICE OF THE COMMISSIONER / 323 E. 4TH AVENUE – ANCHORAGE 99501

May 8, 1978

Senator Joe Orsini
Pouch V
Juneau, AK 99811

Dear Joe:

In response to your request the following is a list by Municipality of the amount of vacant, unappropriated, unreserved state land that existed at the time each municipality became eligible. This date is the date of incorporation or January 1, 1964, which is the date of the original passage of the Mandatory Borough Act, whichever is later.

Municipality	Date	VUU	10% VUU
Bristol Bay Borough	1/1/64	0	0
City & Borough of Juneau	1/1/64	4,148.	415
City & Borough of Sitka	1/1/64	180.	20
Fairbanks North Star Borough	1/1/64	470,136.	47,015
Haines Borough	8/29/68	1,097.	110
Kenai Peninsula Borough	1/1/64	1,402,614.	140,260
Ketchikan Gateway Borough	1/1/64	4.	0
Kodiak Island Borough	1/1/64	218,828.	21,885
Matanuska-Susitna Borough	1/1/64	3,129,271.	312,930
Municipality of Anchorage	1/1/64	16,346.	16 35
North Slope Borough	7/1/72	6,007.	605

Hopefully this information will be useful to you.

Sincerely,

Mike

MICHAEL C. T. SMITH
Assistant Commissioner

10-J2LH

WHAT SENATE RESOURCES DID TO CSHB 133 (FINANCE) am

The following municipalities had their land allotments decreased:

Municipality of Anchorage	20,865 acres (from 90,863 acres)
City and Borough of Juneau	13,600 acres (from 19,584 acres)
City and Borough of Sitka	9,200 acres (from 11,593 acres)
Bristol Bay Borough	1,940 acres (from 2,898 acres)
Haines Borough	1,080 acres (from 3,985 acres)

The following municipality had its land allotment increased:

Kodiak Island Borough	56,500 acres (from 45,200 acres)

The land allotments of the remaining municipalities were left unchanged.

Senate Resources restored paragraphs (g) and (h) of AS 29.18.204, which were stripped from the House Finance Committee version of the bill on the House floor. These two paragraphs restored to the director of the Division of Lands the authority to "consider the state's responsibilities for developing and protecting values which are of greater than local concern" and requiring the director to provide written explanation for his approval or disapproval of a municipal selection

Sec. 29.18.207 PAYMENT IN LIEU OF LAND goes into effect July 1, 1982, whereas the rest of SCS CSHB 133 would take effect immediately. This three year delay was intended to give the State the time to clear up title of ownership to presently contested lands, allowing in principle the municipalities a greater land pool to select from.

HB
134

Alaska State Legislature

House

JUNEAU ALASKA

MEMORANDUM

TO: Chairman, Judicial Committee

FROM: Rep. Charles Parr

RE: HB 134

DATE: February 2, 1977

This bill was introduced by me. The Fairbanks North Star Borough reported difficulty in enforcing ordinances, particularly zoning ordinances. The maximum fine of $500 in the present statute proved inadequate for violations. A statement from Borough Attorney, James Nordale this date is as follows:

> John Carlson, Borough Mayor and I discussed HB 134. We would be pleased to have the whole bill passed. We are especially interested in seeing the fine increased to $1000. This should enable us the opportunity to make people adhere to the ordinances. We are not as concerned about increasing the jail sentence from 30 days to 60 days. The city might (BE INTERESTED IN INCREASING THE NUMBER OF DAYS FROM 30 TO 60) We are in support of HB 134 as it is now written.

ab

House Judiciary Committee
February 2, 1977

The meeting was called to order at 3 p.m. by Chairman, Gardiner. Members present were Gardiner, Dankworth, Eliason, Specking and Brown. Members absent were Miles and Rudd.

HB 35 Relating to Construction Contractors HB 35

Mr. Duncan testified as to the intent of this bill for which he is a sponsor. Discussion, during which questions were asked of Mr. Duncan, followed.

Sharon Andrew, Director of Occupational Licensing from the Department of Commerce, and Richard Dunham from the Alaska Dump-truckers Association, testified in support of the bill.

Mr. Specking moved that HB 35 be moved out of committee. There was no objection, so this was done.

HB 134 Penalties for Violation of a Municipal Ordinance HB 134

Mr. Parr, who is sponsor for this bill, was not here to testify, but he had provided written testimony for the committee members.

As discussion on this bill began, it became apparent that the committee did not feel that they had the necessary information to come to a decision on this bill. Mr. Specking desired to obtain information as to what types of ordinances would carry a fine of $1,000 if they were violated, i.e. "Who's going to get fined $1,000 vs. $500 and for what? Mr. Dankworth felt that it was necessary for the committee to get an opinion as to how the various municipalities feel about this bill.

It was decided that any further consideration of this bill would wait until further input had been provided to the committee.

The meeting was adjoured at 3:45.

House Judiciary
February 10, 1977

The meeting was called to order at 3 p.m. by Chairman, Gardiner. Members present were Gardiner, Miles, Rudd, Brown, Eliason and Specking. Mr. Dankworth was absent.

HB 134 Penalties for violation of a municipal ordinance HB 134

Marilyn Miller from the Municipal League was here to present a letter from Lee Sharp, Juneau City and Borough Attorney.

Several amendments were agreed upon for the bill. (Line 10: delete "knowing and willful"; Line 12: change imprisonment from "60" to "30" days.)

There was a motion to move the bill out of committee. There was no objection, so this was done.

HB 90 Estrays HB 90

Rep. Ose, who is sponsor for this bill, was here to explain the intent of the bill.

Dr. F.S. Honsinger who is the State Vetenarian with the Division of Agriculture for the Department of Natural Resources came to speak in support of the bill.

Rick Barrier testified that the Court System is basically in favor of the bill, but that it needed some "cleaning up".

The committee felt that the intent of this bill is good. However, they objected to the way the bill was written and felt that a mojor redrafting was necessary. Mr. Specking agreed to meet with Mr. Ose and a drafter to make this bill more workable.

The meeting was adjourned at 4 p.m.

THE CITY AND BOROUGH OF JUNEAU

FILE NO.

SUBJECT: Comments on House Bill 134

Don Berry, Executive Director
Alaska Municipal League
204 Franklin Street
Juneau, Alaska 99801

Dear Don:

You had previously asked that I provide you with comments on the implications of House Bill 134 or to present my comments to the committee. I'd intended to do the latter, however, it appears now that I have a conflicting engagement. Following are off the cuff comments on the bill.

The bill makes two changes in the present statutory language. First, it raises the maximum penalty from the current $500 and/or 30 days imprisonment to $1,000 and/or 60 days imprisonment. This change needs no comment. The second change is the new requirement that would have the effect of preventing a municipality from imposing a penalty for the violation of an ordinance unless the violation were both knowing and willful. Presently, it is up to the local legislative body in adopting an ordinance to determine the level of culpability required to constitute a violation of the ordinance. The proposed bill would withdraw this authority from municipalities.

Courts very often divide punishable offenses into two basic catagories. First are those which are malum in se, that is, wrong in themselves. The second category is labeled malum prohibitum and constitutes those offenses which are statutory in origin. This latter category includes such things as parking, zoning, sanitation, and tax code violations. In the former category are the crimes involving moral turpitude, crimes which have been recognized as common law crimes or the traditional crimes which are deemed infamous and which have always included guilty knowledge as an element of the offense. Larceny and assault and battery are examples. When a statute or ordinance is silent as to whether guilty knowledge required for a conviction under a statute which prohibits acts which are malum in se, the courts impose the common law requirement of guilty knowledge which is often cast in terms of "knowing and willful." Thus, the courts have already worked out a system which requires the presence of the "knowing and willful" element for those violations

which have traditionally required such guilty knowledge. The courts also recognize that there are many violations of statutes and ordinances which are regulatory in nature and for which the state must be able to prosecute on the mere fact that the acts constituting the violation have been committed without reference to whether the person committing the violation intended to violate the law. For example, it is necessary for the municipality to be able to prosecute people who park automobiles in such a manner as to block traffic. This is not a malum in se violation but rather is one which is statutory in origin. If a person parks a vehicle in such a manner as to block traffic but does so without the knowledge that it is a violation of the ordinance or if he does so not realizing that the vehicle will be blocking traffic, such a person could not be punished under the proposed bill as it could not be shown that there was a "knowing and willful" violation of the ordinance. While a substantial part of the prosecutorial effort of some municipalities may be in the traditionally criminal area in which knowing and willful violation is an essential condition of the offense, the greater portion of the ordinances adopted by a municipality are of the malum prohibitum type which have traditionally never required the level of guilty knowledge which is an element of the traditional or common law crime. One of the effects of this bill would be to make ignorance of the law an excuse. The bill would make the prosecution of the violation of most ordinances extremely difficult, if not impossible. The bill would not change the present court-made law as it relates to prosecutions for acts which are malum in se.

There are numerous state statutes which deal with malum prohibitum acts and which do not require a "knowing and willful" violation before such acts can be punished. I am not able to discern why the state should be able to enforce its sanitation regulations without having to prove a knowing and willful violation while a municipality must prove a knowing and willful violation of its sanitation code before it can be enforced.

As to the crimes which are malum in se, many communities have adopted the Model Penal Code language. The Model Penal Code defines four different levels of culpability which are acting purposely, knowingly, recklessly, or negligently. The Model Penal Code was promulgated to overcome many of the ambiguities and outmoded concepts of the common law. Thus, a community which has turned to the Model Penal Code for guidance may have to engage in a substantial revision of its

code inasmuch as its code is based on concepts and definitions of levels of culpability which do not include "willfully."

The "knowing and willful" language in the bill will not add anything to the law as it commonly exists in the malum in se arena. It will, however, impose such a burden on municipalities and the prosecution of malum prohibitum type ordinances as to practically eliminate their enforcement. It would seem that so long as the local elected legislative body is authorized to declare what acts shall not be permissible in its community, it should not be denied the authority to establish the level of culpability required. A state mandated heart full of malice should not be the touchstone of a violation of a municipal regulatory ordinance.

MEMORANDUM

TO: Senator Orsini

FROM: Representative Charles Parr CP

RE: HB 134

DATE: January 30, 1978

I introduced this bill to help solve a problem reported by the Fairbanks North Star Borough Assembly, i.e., that the existing maximum penalty for violation of a borough ordinance is insufficient deterrent. The problem is especially acute in planning and zoning areas, as a violator can make more profit than he can lose in fines.

A statement by the Borough Attorney on February 2, 1977 follows:

> John Carlson, Borough Mayor, and I discussed HB 134. We would be pleased to have the whole bill passed. We are especially interested in seeing the fine increased to $1000. This should enable us the opportunity to make people adhere to the ordinances. We are not as concerned about increasing the jail sentence from 30 days to 60 days. The city might. We are in support of HB 134 as it is now written.

The Ketchikan Gareway Borough Assembly has also endorsed the bill. A copy of the resolution is enclosed.

Senator Joseph Orsini, Chairman
Community and Regional Affairs Committee
Alaska State Senate

Dear Senator Orsini:

We would like to take this opportunity to support CSHB 134.

It is our belief that this act would allow more flexibility to a municipality in determining its local law enforcement programs.

Sincerely,

Tim Rolle
Executive Director

Joe:

Rep. Parris A.A called & wanted to know the status on CSHB 134 (Increase the fine from $500 to $1000 for violation of a municipal ordinance).

I told him we had this bill up for consideration once already but Rep Parr did not show up to testify on the bill, so we tabled it.

He asked if we were going to take it up again & I said I would check with you.

RESOLUTION NO. 248

A RESOLUTION OF THE ASSEMBLY OF THE KETCHIKAN GATEWAY BOROUGH, ALASKA, EXPRESSING TO THE LEGISLATURE OF THE STATE OF ALASKA, THE ASSEMBLY'S SUPPORT OF HOUSE BILL NO. 134, RELATING TO PENALTIES FOR VIOLATION OF A MUNICIPAL ORDINANCE; DIRECTING THE CLERK TO SEND COPIES OF THIS RESOLUTION TO THE MEMBERS OF THE ALASKA LEGISLATURE; AND ESTABLISHING AN EFFECTIVE DATE.

THE ASSEMBLY OF THE KETCHIKAN GATEWAY BOROUGH, ALASKA, RESOLVES, as follows:

Section 1. The Alaska Legislature is requested to adopt House Bill 134, "An Act relating to penalties for violation of a municipal ordinance." The Assembly fully supports increasing penalties for knowing and willful violation of ordinances.

Section 2. The Clerk is directed to send copies of this resolution to the members of the Alaska Legislature.

Section 3. This resolution is effective immediately.

ADOPTED this 22nd day of February, 1977.

BOROUGH CLERK

Approved as to form:

Borough Attorney

SB 63, HB 110 & CSHB 134

SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTTEE

March 22, 1977

Present: Senators Willis, Hackney, Ferguson and Sumner

Absent: Chairman Orsini

At 3:05 the hearing was begun by Vice-Chairman Willis. He asked for comments on SB 63, and Senator Ferguson moved that the bill be passed on "individual recommendation". The motion was approved and was passed out.

Vice-Chairman Willis asked for comments on HB 110, and Senator Ferguson moved that the bill be passed. There was no objection and the bill was passed out with the unanimous "do pass" vote.

CSHB 134

Committee Substitute for House Bill 134 was introduced and the Committee felt that Representative Parr, sponsor of the bill should be present to testify. Senator Sumner suggested that the bill be tabled until Rep. Parr is present. Senator Ferguson moved that the bill be tabled, and there were no objections.

Senator Sumner asked if the Committee had any objection to acting on SCR 13 and SCR 14 which was tabled after the hearing of March 15, 1977. Senator Willis stated that he felt more information was needed before action should be taken, and that it was agreed among Committee members to wait until March 29th when requested information had been received. Vice-Chairman Willis stated that he desired a better understanding of the issue.

Senator Sumner concurred with the Vice-Chairman.

The meeting was adjourned at 3:25 p.m.

SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

January 31, 1978

Present: Chairman Orsini, Senators Willis, Hackney and Sumner; Jim Christopher, Alaska Wreckers Assoc. and Alaska Towers Conference; Gerald Sharp, City Borough of Juneau; Bruce Aronson, Community and Regional Affairs; Steve A. Mizera, Republican Caucus.

Absent: Senator Ferguson

The meeting was called to order by Chairman Orsini at 3:00 P.M.

CSHB 187:

Chairman Orsini noted that CSHB 187 had been before the committee last year.

James Christopher, Chairman of the Alaska Towers Conference, President of the Alaska Wreckers Association, and co-owner of Alaska Towing and Wrecking in Anchorage, testified in support of CSHB 187. Mr. Christopher pointed out that currently wrecking operators had asked the State Attorney General's Office for an opinion as to which law should be complied with and were told that it would be preferable to have the statutes changed along the lines of CSHB 187. Mr. Christopher also noted that the $1.50 daily storage fee was sent in the late 1950's and was unrealistic in view of cost increases since that time. He said that current storage charges for vehicles in Seattle were $5.00, in Portland $4.50, and in Spokane $4.00. Although no court cases have resulted so far from this situation, Mr. Christopher said that wrecking operators in Alaska were concerned that without the enactment of CSHB 187 they could be held in violation of either the statutory storage fee or the tariff set by the Alaka Transportation Commission.

Mr. Christopher asked whether language could be added to the bill that would include the contents as well as the vehicle itself as subject to liens. He stated that this was another area of legal ambiguity. Senator Hackney suggested that appropriate language to cover this situation could be added. To prevent delay, Chairman Orsini recommended that the bill be considered as written and that separate legislation be drawn up if necessary to deal with the other issues raised by Mr. Christopher. Senator Sumner commented that the hearings so far indicated to him that CSHB 187 was more properly a bill for the Commerce Committee to take up than Community and Regional Affairs. The other Committee members agreed.

Lee Sharp, representing the City and Borough of Juneau, spoke in support of CSHB 187 as drafted. He said that discussion so far had tended to confuse the statutory issue of the amount

a wrecking operator could recover on his lien with the regulatory question of the amount the public could be charged for the towing and storage of motor vehicles. CSHB 187 rightfully addressed the statutory issue and not the regulatory. He said the City and Borough of Juneau was concerned that wrecking operators were reluctant to tow and store abandoned vehicles, as requested by the municipality, because they could not statutorily recover more than $1.50 a day in storage charges from their liens. Since this resulted in a loss of money to the wreckers, the municipality was encountering difficulties in having wrecked and abandoned vehicles removed from public view.

This completed public testimony. Chairman Orsini called for a vote. CSHB 187 received 1 Do Pass and 3 No Recommendations.

CSHB 134

Chairman Orsini asked for a motion to bring CSHB 134, which had been tabled by the Committee last year, back before the Committee members. In the absence of the bill's sponsor, Representative Charles Parr, to explain the provisions and purpose of the bill, no motion was forthcoming. CSHB 134 remained tabled.

SENATE COMMUNITY & REGIONAL AFFAIRS
COMMITTEE MEETING

June 9, 1978

Present: Senators Orsini, Ferguson, Sumner and Willis

Absent: Senator Hackney

The Senate Community and Regional Affairs Committee met directly after session this day and passed out CSHB 134 with "INDIVIDUAL RECOMMENDATIONS" and CSHCR 125 am (C&RA) with a 'Letter of Intent' that passed out with "INDIVIDUAL RECOMMENDATIONS".

SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

Senator Joe Orsini
Chairman

CS House Bill No. 134 — Judiciary Committee-Hohman
Prime Sponsor

_____ Resolution No. ___ _

This Bill is currently in the Senate Community and Regional Affairs Committee for consideration. Your response, as prime sponsor, to the following questions will serve to hasten Committee action on this Bill.

1. What is the need for your proposed legislation; what is the goal you are trying to accomplish?

2. Are there any other viable ways of accomplishing this same goal?

3. Persons or groups you know of who are supporting the legislation.

4. Persons or groups you know of who are opposing the legislation.

5. Can you foresee any new problems that might be caused as a result of enactment of your bill?

6. What is the earliest time you would like the Senate Community and Regional Affairs Committee to consider your bill?

HB
147

CSHB 147, CSHB 188 & CSHB 84

SENATE COMMUNITY AND REGIONAL AFFAIRS COMMUNITY

April 28, 1977

Present: Chairman Orsini, Senators Hackney, Sumner and Willis; Bruce Erinson, Dept. of C&RA; Marge Gorsuch, League of Women Voters; Patty Ann Polley, Division of Elections; and Ed Hildebrand, Elections Official.

Absent: Senator Ferguson

Chairman Orsini began the hearing with an explanation of the proposed CS for HB 147. He stated that the difference between the Committee substitute and the original bill is the clarification of the discrepancy with respect to villages having disapproving authority regarding the construction of a public project by the state as manifested in the bill. The villages do not have the authority to disapprove a public project because they are unincorporated communities. Otherwise, Senator Orsini stated, Section 1 of the bill is the same.

With regard to Sec. 2, Senator Orsini pointed out that this section pertains to the hiring of Alaska residents for construction and pre-construction projects, including engineering studies, surveys and consulting.

To emphasize the problem with the practice of hiring "outside" professionals, Senator Orsini made referen e to a memo dated Sept. 9, 1975, from the Governor to the Department Commissioners stressing his concern over the hiring of outside agencies when there are agencies within the state who can do the job.

Chairman Orsini added that he wrote to all the Commissioners a year ago asking them what their position was regarding Alaska hire, and the response was not very supportive. The Department of C&RA did provide the committee with a list of outside agencies who had entered into a contract with the Department of C&RA, the contracts consisting primarily of impact studies on the state.

Senator Orsini stated that it was his contention that the 1972 amendments to AS 36.10.010 were intended to be broader than has been interpreted by the Attorney General's Office. The intent of Sec. 2 of the SCS CSHB 147 was to insure that

contracts for services that may eventually lead to public construction, such as planning studies, impact assessments, and feasibility studies, would also be covered by the resident preference concept.

Bruce Erinson, Dept. of C&RA, provided the following for the committee to consider. He asked who would provide review of a proposed public project in a borough or city that did not have a planning commission. Chairman Orsini understood this to mean that the municipality should have some sort of review and approval if they don't have a planning commission that perhaps the Council or Assembly could act as a planning commission. Mr. Erinson suggested deleting the words "the planning commission of" on page 1, line 15. The members agreed on this change to the proposed SCS for CCHB 147. Senator Sumner moved that SCS CSHB 147 as amended pass with a "do pass". There were no objections.

Chairman Orsini then explained that HB 84 is not in the Senate CRA Committee, but in the Finance Committee. His intention is to divide the "housekeeping" changes of the election code from the controversial issue of registering on election day.

Senator Orsini asked Ed Hildebrand, Elections Official, Juneau, to testify on CSHB 188 and CSHB 84. He stated that he objected to registering and voting on the same day due to the additional cost for extra people working at the polls and because of the added confusion that would be inevitable at the polls. Senator Sumner asked how residency would be determined at the polls if registration did occur on election day. Mr. Hildebrand stated that the only way would be a challenge or question ballot, which would later be investigated before the final canvass was conducted. Senator Orsini asked how registration takes place at this time, and Mr. Hildebrand explained that when a person signs the registration certificate they are attesting to the fact that they are residents of the state. He added that the form requires the residence and mailing address of the voter, then the registration goes back to the state and goes through the registrations listing which then goes down for each precinct and is distributed out to the precinct workers. That is one of the reasons why the poll workers are chosen from the precinct so they can tell whether a person resides in that place or not.

Senator Orsini then asked for comments. He asked Mr. Hildebrand what he thought of the polls being open for another hour. He added that he had called the municipal clerk in Anchorage, and she had stated that the Municipal Association

is opposed because no matter how long the polls are open there are always people who wait until the last minute. Senator Sumner stated that whoever wants to vote can get there by 8:00.

Mr. Hildebrand also commented in regards to AS 15.13.060(c). He suggested that each candidate for municipal office file the name and address of the campaign treasurer with the commission not later than the date of filing the declaration of candidacy or his nominating petition and shall file a duplicate of the commission's filing with the municipal clerk not later than the last day on which he would file the declaration of candidacy and nominating petition. He stated that he would like to see this filing in the hands of the municipal clerk in addition to the commission.

Marge Gorsuch from the League of Women Voters then testified in regards to Section 10. She stated that the issue is not whether the name of the campaign treasurer is filed but rather if the candidate is filing his campaign financing report. The League believes there should be some mechanism for making the public aware of the non-compliance of candidates before they vote. She offered wording to this effect, but Senator Orsini stated that at this time, the Committee would not address this issue.

Ms. Gorsuch stated that she had no objection to HB 84. She felt that there should be a standard time that the polls are open throughout the state so the voter wouldn't be confused. She added that an additional hour probably wouldn't increase voter turnout, and the League of Women Voters doesn't take a strong position on this issue, but they did not want to leave the decision up to the discretion of the municipality.

The League supports the election day registration. According to Ms. Gorsuch, the voter registration system will encourage maximum voter participation. Ms. Gorsuch referred to other states who have election day registration, and used the following statistics to support the League's position: Minnesota, 68%-75% voter increase: Wisconsin, 62%-65%; and Maine, 61%-65% voter increase. She added that many people don't get around to registering otherwise.

She stated that the major critisizm against this concept is fraud. There has been no fraud in the states of Minnesota, Wisconsin, Maine or North Dakota documented. She added that there was some confusion because of heavy voter turn-out, but no fraud reported. She stated that if there was concern over fraud, then those who registered and voted on election day, could have their ballots designated as question ballots and the question ballot would be put in a separate category

to be checked and counted later. Some concern exists that this would hold up the returns of the election, but the League feels it is more important to give the people a chance to vote. She also stated that when a person registers to vote, they swear under oath that they live at their address, and could perhaps also sign an additional statement that they are voting only once and are subject to penalty if violating that statement.

She stated that in answer to Mr. Hildebrand's concerns regarding the extra cost, that a bill has been introduced, providing a subsidy which would initiate the system. The League does not feel that the extra expense is a valid objection, but that the issue is whether or not people have a right to vote.

In regards to the confusion at the polls expressed by Mr. Hildebrand, Ms. Gorsuch pointed out that at the present time, registration is going on during an election although the voter registration is not effective until 30 days hence.

Her final statement was in regards to the fraud which might occur, and she stated that they would question the validity of this argument, as opposed to the democratic right to vote.

Senator Orsini then asked Ms. Gorsuch if she attributed the percentage of voter increase in those other states totally to registration at the polls and for no other reason, and Ms. Gorsuch said she would find out for sure if there were any other possibilities for the voter increase. She added that she feels this is a very effective method and that she has been very impressed with the number of people who register at the polls even though at the present time, they cannot vote.

Senator Hackney then stated that he is not opposed to people voting but that it is so easy for people to register now, that all they have to do is exert themselves a little ahead of time, and that's not an imposition on the voter.

Regarding HB 188 and HB 84, Senator Orsini pointed out that the intent was to incorporate those proposed amendments by the Lt. Governor's Office into CSHB 188, take out the issue of the registration on election day and put that into CSHB 84.

Patty Ann Polley, Director of the Division of Elections stated that Sec. 6 of CSHB 188 could be changed by making a "sliding scale" in regards to the number of registration

officials per number of voters. She suggested perhaps three officials per 250-500 voters. She concurred with Sections 7, 8, 9 and 10 and stated that sec. 11 could perhaps state that both the voter and official could drop the ballot into the ballot box.

In regards to CSHB 84, she stated that they are opposed to registration on election day. She stated that people will put off registering until then and then confusion will certainly result at the polls. People have enough trouble now finding out which precinct to vote in, and often end up at the wrong places. They would have no way to cancel a registration from another state, so a voter could have an absentee ballot from a previous state, walk into the polls with an Alaskan drivers license that they've had for 30 days and vote. She went on to give instances of fraud and dual registration, and the time involved in investigating registration. She stated that if people register on election day, they would probably never be checked out.

Senator Orsini asked how often fraud occurs and she answered that about 100 occur per year.

OFFICE OF THE GOVERNOR

TO: All Commissioners

DATE : September 9, 1975

FROM: Jay S. Hammond
Governor

SUBJECT: State Contracts

I have been receiving disturbing communications from the business community indicating a distress with what some believe to be a flagrant disregard for utilization of talent to be found within Alaska. There, of course, have been instances of contracts going to "outsiders". The current headliner is the Tourism Advertising Contract.

While there may well be justification in most if not all such instances for utilizing the services of outside agencies, I want this Administration to bend every effort to improve upon the utilization of Alaskan agencies for such contractual activities.

Specifically, this Administration is being criticized for failure of State agencies to respond to letters of inquiry regarding such contracts without even calling for bids or proposals from Alaskans.

While aware that little can be done regarding contracts already tendered, a number of members of the business community want to know how to approach the problem and "make the bureaucratics at least consider the spectrum of services that are located around the State." I am advised that some members of the business community have considered forming an association in order to combat what they feel to be a severe deficiency on the part of the State Administration.

Henceforth, I would ask that all agencies increase their diligence in responding to inquiries from within the State and bend every effort possible to utilize Alaskan talent when such is available.

AGO-Juneau

DATE: March 24, 1977

FILE NO:

TELEPHONE NO:

FROM: Hal P. Gazaway HPG
Assistant Attorney General
AGO-Anchorage

SUBJECT: CSHB No. 147
Coordination of Public
Projects With
Municipalities

The Division of Aviation has informally expressed some concern as to the applicability of CSHB No. 147. The concern expressed has been whether or not proposed AS 35.30.020 would require formal subdivision plats for the Division of Aviation lands included in state airports.

In an attempt to resolve that question I have reviewed the bill and have certain questions of my own. They are as follows:

1. The definition "public project" appears to be out of order. That definition goes from the specific to the general to the specific. Furthermore, that definition does not indicate whether or not airports are to be included in the definition of public projects. Generally they would be considered public projects.

2. This is an amendment of the title dealing with public works. But the majority of the provisions involve coordination by the Department of Highways. I would suggest a section governing coordination by the Department of Highways and a second section dealing with coordination by the Department of Public Works. Although this would be duplication of effort, it would clarify what appears to in its present form to be an incomplete amendment of the statutes. However, with the impending consolidation of the two agencies this problem might soon be mute.

3. As far as the Division of Aviation is concerned to the extent projects are constructed under the aid to developing airports program administered by the Federal Aviation Administration coordination with the municipality is presently required. See 49 U.S.C.A. 1716(c)(1), (3); (d)(1); (f)(2). The proposed bill, however, would require such coordination in those instances where the airport is not one covered by the ADAP program. However, those non ADAP projects are in

communities that do not have planning commissions and in many instances are not municipalities as such but are no more than settlements or unincorporated villages. Therefore, there would be a considerable question in those instances with whom the Division of Aviation would be required to coordinate.

4. In its present form the bill is so vague as to be meaningless as to what constitutes a public project. In the instance of airports, would a pulbic project be where (a) new airport is designed and constructed, (b) construction of a taxiway, (c) the addition of an apron, (d) the addition of a runway extension, and (e) the resurfacing of a runway. In its present form the bill does not provide guidelines as to when a project is a public project requiring such coordination. In its present form the bill would require coordination with the municipality for any project. The question is should coordination be required for example when a runway extension project or resurfacing project of the runway at Emmonuk is contemplated. The necessity of the supplemental project would far exceed any technical knowledge or expertise on the part of any municipal entity that might be in existence in that community. The requirement might well be imposed due to factors totally unknown to such community. Yet as I read the proposed bill such coordination would be mandated and possibly subject to veto by the municipality.

In practice some aspects of the statute could very well be unenforceable due to federal preemption of aviation. Were they to be applicable to airports the proposed AS 35.30.010(a) and AS 35.30.020 could be unenforceable due to federal pre-emption. The standards for airport construction are set forth in detail in 14 C.F.R. To the extent the review of a municipal planning commission or zoning ordinance conflicts with these requirements the federal regulation would probably govern. I base my conclusion on the following line of cases:

1. Federal preemption of airspace Alleghany Airlines, Inc. v. Village of Cedarhurst, 132 F.Supp. 871 (1955), 238 F.2d 812 (1956).

2. Invalidated maximum altitude ordinance American Airlines, Inc. v. City of Auborn, 297 F.Supp. 207, aff'd. 407 F.2d 1306 (969) cert. denied 396 U.S. 845 (1969).

3. Invalidated noise abatement ordiance American Airlines, Inc. v. Town of Hempstead, 272 F.Supp. 226, aff'd. 398 F.2d 369, cert. denied 393 U.S. 1017. Burbank v. Lockhead, 411 U.S. 624 (1973).

4. Regulation of navigable airspace U.S. v. New Haven, 367 F.Supp. 1338 (1973) aff'd 469 F.2d 452 (1974).

However, the issue is not that clear inasmuch as some aspects of aviation have not been preempted:

1. Entire field of air commerce not preempted Braniff Airways v. Nebraska, 347 U.S. 590; Colorado v. Continental Airlines, 372 U.S. 714.

2. Airport regulation Aircraft Owners Asso. v. New York, 305 F.Supp. 93 (1969).

3. Airport construction Windsor v. Ronan, 329 F.Supp. 1286, 1290-91 aff'd. 481 F.2d 450; Boston v. Volpe, 464 F.2d 254, 259.

4. Authority of municipality to enact ordinace banning taxing-off and landing of aircraft reorganized and not preempted by federal and state control of airspace. Garden State Farms, Inc. v. Boublis, 136 N.J. Super. 1, 343 A.2d 832 (1975).

This is not meant as an objection to the desirability of encouraging public agencies, in particular, the Department of Highways and Division of Aviation, from holding public hearings to gain input as to their projects effect upon any given community. But, merely to point out in the present form the bill does not adequately address certain problems raised by imposing such requirements upon an agency which constructs projects in communities so small as to not even have post offices. An agency whose projects are subject to detailed federal regulation. Furthermore, so many of the airport projects requiring substantial expenditures of public funds are ones which have little if any impact upon the municipality or the inhabitants of that community off of the airport. If such a bill is to be passed by the legislature, I would suggest that these questions and issues be clarified and guidelines established.

MEMORANDUM

DATE: February 7, 1977

TO: Ted Berns, Legal — 274-2525

FROM: Tom Nelson, Planning

SUBJECT: House Bill No. 147

This is just a brief outline of our concern over actions taken by the Alaska State Highway Department that do not comply with Municipal land use regulations such as the Zoning Ordinance and Subdivision Regulations which everyone else must and do comply with. Specific cases of Highway Department actions that have created problems and conflicts will be presented at a later date when more time is available to gather the information together.

The primary cause of most land use problems created by the Highway Department is the creation of non-conforming lots following land acquisition for additional right-of-way. In several instances the Highway Department acquired a portion of a lot or tract and left the owner with a relatively useless parcel. In doing so, resulting land use patterns are ignored. Thus, access problems develop; either normal access is shut off on the front of the lot and thence, alleys become thoroughfares, or every little non-conforming lot remaining has its own access onto the arterial being up-graded. The end result is additional traffic circulation and safety problems.

In several instances the Highway Department has split lots, but filed no plat, thus leaving no record after land was taken. Land is subdivided without filing a plat. The Highway Department may know better, but as long as they can ignore local land use regulations they'll try to get by with it.

These types of actions present problems to land owners and developers. Tax inequities result when owners are taxed for useless land, and Municipal government loses tax revenue when relief is given to the owner because of the non-conformity--all or most of which could have been prevented through adherence to local regulations. In addition, developers are severely limited by problems with access and setbacks for structures.

Another problem that has arisen in regard to highway projects is the Highway Department's source of gravel materials. They have had a practice to buy gravel from private landholders. The private landholder in that case is responsible for getting a Special Exception to extract gravel. However, the Highway Department may not always inform the landholder of that when entering an agreement for the gravel. If the Highway Department decides to extract gravel itself, it can presently do so, without any regulations on such operations. This may be a possibility in the Eagle River/Chugiak area where the Highway Department plans to utilize gravel resources for the construction of Minnesota Drive Extension. In such an instance there is no way the neighboring residents could be protected from noise, dust, traffic, or hazards from such activity.

The purpose of having Special Exceptions, platting procedures, along with all the other land use regulations is to "protect the health, safety and welfare of the public." This responsibility is entailed to the Anchorage Municipality, yet little protection can be offered from actions taken by the Highway Department.

These problems also create unnecessary and costly administration problems with requests for zone changes and variances, not to mention the litigation that has been leveled against the Municipality.

These problems will continue until the Highway Department is forced to abide by the same rules as everyone else. It is this department's firm belief that the Highway Department does not deserve to have any privilege status in regard to local land use regulations. As with other State agencies, if there is a clearly demonstrated over-riding State interest, a waiver from the local compliance requirements may be granted by the governor.

Dave Doris, a member of the Platting Board, is quite familiar with the practices of the Highway Department here in Alaska and similar problems in other states. I would suggest having him testify on this Bill. He would strongly support our stand and has indicated a willingness to help.

PUBLIC WORKS/HIGHWAY PROJECTS--PLANNING

Current Law

AS 35.10.020, as amended by the Ninth Legislature, requires that the construction of a "public works" be commenced only after consultation with municipal planning and zoning authorities and compliance with local planning and zoning ordinances. However, this statute is ambiguous in terms of its affect on highway construction projects and the Department of Highways. The construction or modification of a state highway often poses serious problems for municipal planning programs and should therefore be commenced only after consultation with local planning authorities. Of course, if an overriding state interest in a highway project is demonstrated, a state agency should possess the ability to override local planning and zoning ordinances. This, however, does not detract from the need to incorporate local planning and zoning review into the design and construction of state highway projects.

Proposed Bill

The proposed legislation would clarify the scope of AS 35.10.020 to require consultation with municipal planning authorities and compliance with local planning and zoning ordinances prior to the construction of "any building,

structure, public works, or highway project and prior to commencement of extraction activities in a municipality". In addition, the bill would maintain the state's present authority to override local planning and zoning ordinances to serve overriding state interests in construction projects.

Regional Affairs

Re: CSHB No. 147 am - Coordination of Public Projects with Municipalities

Dear Chairman Orsini:

Enclosed is a memorandum sent to us by Hal Gazaway, the Assistant Attorney General who handles the legal work for the Division of Aviation, Department of Public Works.

We have compared CSHB 147 and CSHB 147 am and see that Mr. Gazaway's comments apply as well to the amended version of the bill, except the amended bill clarifies what local body need be contacted in rural locations.

Please note Mr. Gazaway's comment that the bill may be unconstitutional in part as it applies to aviation facilities.

Very truly yours,

cc: Bud Saylors
Dept. of Public Works

TO: Joe Orsini DATE: April 13, 1977

FROM: Paul Conger RE: CSHB 147 am

Guess who I saw again, and wants us to move on a bill in our Committee, Ted Berns. Ted is quite interested in CSHB 147 am, basically because it would eliminate alot of potential lawsuits. He stated that this bill would provide that before the State could come in and start condemning alot of property for the purpose of constructing a highway, ~~that~~ they would have to check with the local planning authority to determine if this construction would cause any hardship on the municipality.

Ted relayed the following example which has prompted this bill. Approximately eight years ago when the Spenard Highway was widened in the Anchorage area, the state was condeming property right and left to provide for the expanded highway. The state condemned a substantial amount of this one property owner's land and paid him for this land. However, this individual retained a strip of property that is currently situated along the highway. The State did pay him a "remainder compensation" because this "strip" of property would be worth less because of the highway running by it.

Now, apparently, this guy wants to develop this strip adjoining the highway for commercial purposes. He applied to the city and the city rejected his request because this area in question is zoned as a residential area. Now the individual is suing the city to a tune of 1/2 million, because the city is depriving him of utilizing this land for commercial purposes.

Ted's point is that if the state would have checked with the city before they initiated buying the land, then they would have been informed that this abutting area was "residential" and they could have just gone ahead and purchased this additional strip of land from the property owner and they, the city, could have certified that this "strip" could not be used for commercial purposes and would have avoided the litigation that has arisen.

HB
187

Ben Harding / Senate C&RA

House Judiciary
February 23, 1977

The meeting was called to order at 7 p.m. by Chairman, Gardiner. Members present were Gardiner, Dankworth, Miles, Specking, Rudd and Brown. Mr. Elaison was absent.

HB 67 Uniform Land Sale Act HB 67

Mr. Dankworth mentioned that he had heard from the Anchorage realtors that they don't necessarily go along with the offered amendments #1 and #2. In protecting them, these amendments don't really change the bill. There was some discussion about this, after which the two amendments were adopted by the committee.(Amendments proposed by the Dept. of Commerce and Econ.Dev.)

Mr. Specking moved that the bill be moved out of committee. There was one objection, but the motion carried and the bill was moved out of committee

HB 187 Liens for towing and storage of motor vehicles HB 187

Larry Veneble, from the Alaska Carriers Association, was here to testify in favor of the bill. He suggested that the committee amend the bill to illiminate the fixed charge of $1.50 per day. He also suggested that section 2 be deleted.

Following a brief discussion, Mrs. Rudd moved that sections 2 and 3 be deleted. The motion carried.

Mr. Brown moved that the bill be moved out of committee. The bill will be moved out after the committee substitute has been drafted.

HB 112 Appropriation for capital improvements within the court system HB 112

Mr. Brown suggested that the amount on line 14 be reduced to $60,000. He felt that the Finanace Committee would then reduce this figure even further. There was a motion made to this effect.

Mrs. Rudd requested that the bill include a committee report to explain that it is the committee's intent that the site selection committee's funds come out of the $60,000.

Mr. Brown moved that the bill be moved out of committee. The motion did not carry. Mr. Dankworth was especially highly opposed to the bill. A somewhat heated discussion followed. The bill was tabled until further notice.

F: CSHB 187

TO: Senator Orsini DATE: April 22, 1977

FROM: Paul Conger RE: CSHB 187

Ben Benediktsson, Managering Director, Alaska Carriers Association, Anchorage, recently came into the office to discuss CSHB 187, "An Act relating to liens for towing and storage of motor vehicles". He stated that this bill is attempting to remove a conflict that currently exists in the law.

The conflict is as follows: Presently, AS 28.10.515(a) (Towing and Storing Lien) provides that a person who is in the business of towing and storing motor vehicles can charge no more than $1.50 a day for the storage of a vehicle. In 42.10.310(a) (deals with ATC and adherence to tariffs) states that the "carrier cannot receive a greater or lesser rate for a service provided... than those specified in the tariff..." Currently the tariff that the ATC has deemed reasonable is $3 a day.

So Title 42, in compliance with the tariff ok'd by the ATC, says they cannot charge a storage fee that is any more or less than $3 a day. At the same time, Title 28 says they can charge no more than $1.50 a day.

So what this bill is doing is removing the $1.50 provision in Title 28 and making the storage fee subject to the tariff that is filed by the Carrier with the ATC. In other words, increasing the storage fee to $3 a day, an amount that the ATC says is reasonable.

Also, Benedicksson, said he would be in Juneau next week, and would check with me upon arrival, in the event that you wanted to take up this bill next week.

PC/js

1-25-78

RE CSHB 187

Ben Benediktsson, Managing Director for the Alaska Trucking Association came by to discuss CSHB 187 this morning. He gave the following background:

Alaska statutes are currently contradictory on towing and storage charges and put the wrecking operator in a Catch 22 situation.

AS 28.10.515 (a) currently allows a storage charge of $1.50 a day. This is insufficient. Washington State, for example, charges $3.50. However, the Alaska tariff schedule calls for $3.00 storage charge. When the wrecking operator attempts to sell impounded vehicles he must swear a statement out at the Division of Motor Vehicles that he followed state laws. Yet no matter which law he follows he has technically committed perjury. Benediktsson said that DMV told him the other day that they had 128 potential perjury cases on their hands.

DMV has never attempted to press perjury charges because they understand the problem, but the Alaska Trucking Association would like to clear up the ambiguity in the law by removing the reference to $1.50 storage charges and allowing the $3.50 tariff rate to stand.

According to Benediktsson, CSHB 187 is essentially a housekeeping measure to remove a potential source of vexation. (He noted in that regard that approximately 10,000 vehicles a year a towed and stored by wrecking operators in Alaska.)

He asked that when the bill comes up before the CRA committee that he be notified enough in advance to allow him to bring Jim Christopher of Alaska Towing and Wrecking in Anchorage to the committee meeting to testify as an expert witness.

Ben Harding

2. F: CSHB 187

DMV COMMENTS REGARDING CSHB 187

I spoke to Vern Roberts, Director of the Division of Motor Vehicles, regarding CSHB 187. Roberts said that DMV supported CSHB 187 since the present statutory ceiling of $1.50 per day for vehicle storage was unrealistic.

Roberts said that he had spoken with the Attorney General's Office and with the Alaska Trucking Association regarding the bill and they all supported the measure.

He pointed out that the $1.50 a day storage charge worked a genuine hardship on wrecking operators who were forced to charge less than commercial rates for automobile parking.

The removal of the statutory ceiling would allow the tariff rate to determine the charge. Roberts believed that this would mean the rate would go to around $3 a day.

He commented, however, that some objection might be raised by those who feared that large storage charges could possibly accumulate on vehicles whose owners were absent for long periods of time. As an example he cited a pipeline worker who left for a six-week assignment. Roberts believed though that such instances would constitute a very small percentage of the towing and storage operations.

CSHB 187 & CSHB 134

SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

January 31, 1978

Present: Chairman Orsini, Senators Willis, Hackney and Sumner; Jim Christopher, Alaska Wreckers Assoc. and Alaska Towers Conference; Gerald Sharp, City Borough of Juneau; Bruce Aronson, Community and Regional Affairs; Steve A. Mizera, Republican Caucus.

Absent: Senator Ferguson

The meeting was called to order by Chairman Orsini at 3:00 P.M.

CSHB 187:

Chairman Orsini noted that CSHB 187 had been before the committee last year.

James Christopher, Chairman of the Alaska Towers Conference, President of the Alaska Wreckers Association, and co-owner of Alaska Towing and Wrecking in Anchorage, testified in support of CSHB 187. Mr. Christopher pointed out that currently wrecking operators had asked the State Attorney General's Office for an opinion as to which law should be complied with and were told that it would be preferable to have the statutes changed along the lines of CSHB 187. Mr. Christopher also noted that the $1.50 daily storage fee was sent in the late 1950's and was unrealistic in view of cost increases since that time. He said that current storage charges for vehicles in Seattle were $5.00, in Portland $4.50, and in Spokane $4.00. Although no court cases have resulted so far from this situation, Mr. Christopher said that wrecking operators in Alaska were concerned that without the enactment of CSHB 187 they could be held in violation of either the statutory storage fee or the tariff set by the Alaka Transportation Commission.

Mr. Christopher asked whether anguage could be added to the bill that would include the contents as well as the vehicle itself as subject to liens. He stated that this was another area of legal ambiguity. Senator Hackney suggested that appropriate language to cover this situation could be added. To prevent delay, Chairman Orsini recommended that the bill be considered as written and that separate legislation be drawn up if necessary to deal with the other issues raised by Mr. Christopher. Senator Sumner commented that the hearings so far indicated to him that CSHB 187 was more properly a bill for the Commerce Committee to take up than Community and Regional Affairs. The other Committee members agreed.

Lee Sharp, representing the City and Borough of Juneau, spoke in support of CSHB 187 as drafted. He said that discussion so far had tended to confuse the statutory issue of the amount

a wrecking operator could recover on his lien with the regulatory question of the amount the public could be charged for the towing and storage of motor vehicles. CSHB 187 rightfully addressed the statutory issue and not the regulatory. He said the City and Borough of Juneau was concerned that wrecking operators were reluctant to tow and store abandoned vehicles, as requested by the municipality, because they could not statutorily recover more than $1.50 a day in storage charges from their liens. Since this resulted in a loss of money to the wreckers, the municipality was encountering difficulties in having wrecked and abandoned vehicles removed from public view.

This completed public testimony. Chairman Orsini called for a vote. CSHB 187 received 1 Do Pass and 3 No Recommendations.

CSHB 134

Chairman Orsini asked for a motion to bring CSHB 134, which had been tabled by the Committee last year, back before the Committee members. In the absence of the bill's sponsor, Representative Charles Parr, to explain the provisions and purpose of the bill, no motion was forthcoming. CSHB 134 remained tabled.

STATEMENT

OF

THE HONORABLE GRIFFIN B. BELL
ATTORNEY GENERAL OF THE UNITED STATES

BEFORE

THE HOUSE ADMINISTRATION COMMITTEE

ON

THE VOTER REGISTRATION ACT
H.R. 5400

10:00 A.M.
WEDNESDAY, APRIL 6, 1977
2318 RAYBURN HOUSE OFFICE BUILDING
WASHINGTON, D. C.

Mr. Chairman and Members of the Committee. Thank you for allowing me to appear before you today to discuss H.R. 5400, the Universal Voter Registration Act of 1977.

As you know, this piece of legislation has been introduced by the distinguished chairman of this committee and other members of the House. It is the cornerstone of the President's message to Congress on election reform which was presented on March 22nd.

The bill which is before you would provide that any person who is qualified to vote under the law of his home state could register to vote in federal general elections on election day at the polling place. The object of the legislation is to increase participation in the democratic process by making the opportunity to vote more available to all eligible citizens.

EXPANDED VOTING RIGHTS

In his message to the Congress, the President emphasized that the right to vote is the fundamental basis of our entire democratic system. He pointed out that, while our nation has greatly expanded the opportunity to vote to wider groups of Americans, we have also observed in recent years a disturbing trend toward lower levels of participation in national elections.

While voter apathy and alienation are certainly major causes of this decline, there is strong evidence that legal barriers to voter registration are also a significant source of the problem.

The restoration of citizen confidence in our system of government is a long-term task which all of us in public life have a responsibility to pursue. But removal of outmoded and unnecessary barriers to voter participation is one step we can take immediately.

I may say at this point that in my view, from the standpoint of the citizen, that is the governed against those who govern us, our greatest rights are the right to vote and the right to assemble and petition for our grievances. Today we are only addressing the right to vote.

The Department of Justice has had the responsibility of enforcing the Voting Rights Act for nearly twelve years. In that time, we have made substantial progress in extending the franchise more fairly to members of minority races, to non-English speaking Americans, to the young and to those who change their place of residence just prior to Presidential elections.

In my view, the voter registration proposal now before you is very much in the spirit of the Voting Rights Act. It is the logical next step in the historic trend toward greater democracy in America -- a trend which dates from the ratification of the 15th Amendment in 1870 and which continued with women's suffrage in 1920, the 24th Amendment on the poll tax in 1964, the original Voting Rights Act of 1965, its amendments in 1970 and 1975, the 26th Amendment in 1971 providing for the 18-year-old vote, and the Overseas Citizens Voting Rights Act of 1975.

Studies by political scientists show that the more than 70 million non-voters in our nation include disproportionment numbers of those who are less educated, less affluent, more urban, and non-white. These surveys have found that difficulties in registration are the primary problem for 20% to 25% of this huge number of non-voters.*

The most invidious result of the present voter registration system is that it imposes an extra, unnecessary obstacle which affects some segments of our population more adversely than others. We have eliminated many such obstacles in the past, and we have found that expanded opportunities for voting substantially increases the likelihood that the decisions of our leaders will be just and fair to all parts of our citizenry. The enactment of H.R. 5400 would be a major step toward removing the discrimination which still exists in our democratic system.

PROTECTION AGAINST FRAUD

Protecting the integrity of the electoral process is one the most important concerns addressed in the legislation proposed by the President and Chairman Thompson. The bill makes fraudulent registration on election day a federal felony.

---

* Peter D. Hart Research Associates, Inc., Committee for the Study of the American Electorate, Curtis B. Gans, Director

It parallels the Voting Rights Act in providing a penalty of five years imprisonment, a $10,000 fine, or both, for such activity. It further provides that second and subsequent convictions are punishable by ten years imprisonment, a fine of $25,000, or both.

I want to emphasize to the committee that it would be the policy of the Department of Justice to vigorously investigate and prosecute any cases of fraudulent registration arising under the Universal Voter Registration Act. However, the experience of several states has shown that voter fraud does not increase with election day registration. Minnesota, Wisconsin, Maine, Oregon, and North Dakota all permit voting without prior registration, and none have had any convictions or otherwise verified cases of fraud.

Under the legislation before you, state and local officials would continue to maintain voter registration records as they do now. They would be able to verify registrations following election day using the methods they already employ for registrations prior to election day. They could require every registrant to show proper identification, such as a drivers license, or to provide an affidavit of a person already registered, attesting to the registrant's identity and place of residence. And, they could require each person seeking to register to sign an affidavit himself, attesting to his qualifications under criminal penalty.

No system of voting which is truly open to full and equal participation can be completely foolproof against fraud. It occurs under the present system, and some would undoubtedly take place under this approach as well. It is not a crime which is always easy to detect or prosecute. But, the question we have to address is where to strike the balance between protecting the system on the one hand and making it open to equal participation on the other. The President's bill reflects the belief that declining voter participation is a very serious national problem which calls for immediate attention. H.R. 5400 contains strong safeguards, and the record in states which use its approach is very good. I believe we can safely take this positive step to extend equally to all Americans the right and opportunity to vote.

# # #

THE DEPUTY ATTORNEY GENERAL
WASHINGTON, D.C. 20530

May 5, 1977

Honorable Howard W. Cannon
Chairman
Senate Rules & Administration Committee
United States Senate
Washington, D. C. 20510

Dear Mr. Chairman:

During my testimony yesterday before your Committee on S. 1072, Senator Griffin requested a copy of an internal April 1 memorandum commenting on the proposed testimony of Attorney General Bell on the subject of the House bill on voter registration. I was unaware of the memorandum at the time of the hearing and requested an opportunity to read the memorandum and review it before making a decision on its release.

The memorandum has been reviewed and a copy is attached for you and the members of your Committee.

I want to emphasize the strong support of the Carter Administration, the Attorney General and myself for the Voter Registration Bill, S. 1072. The attached memorandum reflects the views of one staff attorney in the Criminal Division. We do not believe that the potential for fraud in the proposed legislation is any greater than under existing laws. I believe that the greater turnout that will be encouraged by the bill and the face-to-face registration safeguards built into the bill may actually reduce the amount of fraud in Federal General Elections.

The Attorney General and I strongly support the voter registration legislation and wish to emphasize the overwhelming importance of enfranchising minorities, the poor and others with more progressive voter registration procedures for Federal General Elections.

Very truly yours,

Peter F. Flaherty

REMARKS

Attached are the comments you requested on H.R. 5400. While Mr. Civiletti has not personally read the memorandum, he is aware that it emphasizes the need for the Attorney General to be aware that enactment of this legislation will probably create substantial enforcement problems for the Criminal Division. It may be that the Attorney General will consider it appropriate to make some recognition of these potential enforcement problems during the course of his testimony. Accordingly, it is suggested that a copy of the attached memorandum be made available to the staff of the Attorney General in connection with any revision of the Attorney General's proposed testimony.

SUBJECT: Comments on H.R. 5400 Testimony by Attorney General

At your request, we have reviewed the testimony which the White House has apparently suggested that the Attorney General give before the House Administration Committee on April 6 during hearings on H.R. 5400. This bill is the Administration's proposal to do away with pre-election registration requirements which the vast majority of the 50 states presently impose as a prerequisite to the exercise of the federal franchise, and substitute in their place a system permitting otherwise locally-eligible electors to register at the polls on the day of an election.

I. THE BILL

We emphasize at the outset that this Division has not had any input into this bill. We have not even seen a copy of the * bill, and our comments thereon have never been sought.

The proposed legislation, from sources available to us, would appear to supercede state and local voter registration procedures with a uniform procedure applicable to all contests for Federal office. The Federal procedure under H.R. 5400 would permit an individual who is otherwise qualified to vote under the state law to register to vote at the polls on the day of an election. To prevent abuses of this relaxed registration procedure, H.R. 5400 would create a new Federal felony to punish those who wilfully or fraudulently cast ballots under its provisions, add a level of administrative sanctions to be enforced by the Federal Election Commission, and permit local poll officials to require electors seeking the franchise by virtue of these relaxed provisions either to produce some identification before being permitted to vote, or to execute affidavits attesting to the fact that they meet local voting

*A copy of the bill was provided along with the proposed testimony. BRC 4/1

Buy U.S. Savings Bonds Regularly on the Payroll Savings Plan

requirements.

If these preconditions are met, H.R. 5400 would require local voting officials to extend the federal franchise notwithstanding an elector's failure to comply with state registration laws.

II. THE PROPOSED TESTIMONY

The testimony which it is suggested the Attorney General give on this bill is highly comendatory of its purpose of facilitating the exercise of the franchise, critical of present state registration laws as "outmoded and unnecessary", and strongly in favor of H.R. 5400's enactment.

III. DISCUSSION

Personally, based on our enforcement experience in the election law field, I do not share these observations and conclusions. I oppose the concept embodied in H.R. 5400 as a dangerous relaxation of what precious few safeguards presently exist against abuse of the franchise. Most certainly, I would not recommend that the Attorney General support this legislation in the proposed glowing terms without expressing some caveats based on enforcement experience.

A. Function of Pre-registration

Voter registration statutes presently on the books of the vast majority of the states usually require that a prospective voter present himself at the appropriate registration office at least 30 days prior to the election in which he wishes to vote, and there provide pertinent data concerning himself and his residence in the election district. He is also customarily required to provide information about where he may have been registered to vote previously to enable the prior registration to be purged before the new one becomes effective, and to provide a sample of his signature which can be used at the polls during the election as a control to assure that the registrant and the person who seeks to vote in his name are the same person.

These requirements serve at least two critical functions in preserving the integrity of our elective system:

First, the fact that a prospective voter is required to appear in person and to provide pertinent information about his qualification to vote at least 30 days before an election provides local election officials with ample time to check the veracity of his claim to the franchise, to assure that previous registrations he may have had are voided before the election takes place. This in turn insures that a registrant is indeed qualified to vote in the place where he is seeking the franchise, and that he is permitted only to vote in that one place. Secondly, by providing for a "control" sample of the registrant's signature, registration laws enable many states to protect themselves against vote fraud by additionally requiring a voter to sign a roster at the polling station itself. The signature which the registrant executes on election day at the polls can easily be checked against the control on his permanent voter registration card, which in many places is the sole viable method of insuring that the person seeking to vote is indeed the same person whose registration the local election board has previously approved and accepted.

B. Effect of Repeal of Pre-registration Laws

Abolition of pre-election registration will, for all intents and purposes, prevent the states from protecting themselves against individuals who may seek to vote at several locations where they are known (a factor which becomes all the more critical with the continuing increase in the mobility of our population), as well as prevent them from assuring that a voter is indeed qualified to vote before he casts his ballot. At the same time, the elimination of the "control" signature which usually appears on a voter registration card will deprive precinct officials of an objective standard by which to judge the qualifications of persons presenting themselves to vote, while at the same time making proof of election fraud in a criminal case substantially more difficult.

In this latter regard, this Division has had substantial experience over the years in prosecuting election fraud cases under applicable Federal statutes presently on the books. This in turn has demonstrated to us graphically the importance of having a pre-registration and verified "control" signature against which to compare the signature of individuals presenting themselves to vote at the polls on election day. On the basis of such comparisons, 25 election officials have been indicted during the past few weeks in the Eastern District of Louisiana for forging the signatures of "no-shows" on the election day rosters which Louisiana law requires voters sign before they obtain a ballot. Similar comparisons between "controls" and the signatures appearing on election day rosters have long been used as the principal method of proving election fraud cases in Chicago, Illinois.

C. H.R. 5400's Alternative Safeguards

In the place of the protection which pre-election registration provides as a guard against election fraud, H.R. 5400 offers four purported safeguards. We feel that all are inadequate.

The requirement that persons seeking to vote without prior registration, produce some form of identification at the polls, or perhaps swear to the factual predicate for the franchise under local law, is essentially meaningless. Even with the pre-election registration which most states require today, election fraud is widespread in both State and Federal elections. With the stakes as high as the power of the elective offices in dispute, it would not be unreasonable that those bent on corrupting the system would be able to find false identification, and would be willing to lie on whatever affidavits they are asked to sign. Moreover, once possessed with what we suggest is easily obtained false identification, a person could successfully wander from precinct to precinct and cast as many ballots as he dares on election day, with election officials being powerless to stop him provided he was willing to execute the required affidavit. Even assuming that subsequent inquiry was able to establish that such an individual used the relaxed procedures accorded by H.R. 5400 to defraud his fellow citizens of an election fairly conducted on the "one man-one vote" principle,

the fraudulent votes would have already have been cast and the damage done, to the detriment of the precious balance on which our democratic elective system is based.

The addition of a new Federal felony which specifically provides for fairly serious penalties for those persons who would seek to abuse the lenient provisions of H.R. 5400 are of little foreseeable help. Federal law presently contains numerous statutes, most of which are felonies, directed at protecting the system against voter fraud. Under 18 U.S.C. 241, it is a ten year felony to conspire to stuff ballot boxes or to commit other varieties of election frauds directed at depriving the public of a fair and impartial election, U.S. v. Classic, 313 U.S. 299 (1941). This Section has recently been extended to include election frauds directed at corrupting only State or local elections, where the defendants involved are themselves election officials of some sort, U.S. v. Anderson, 481 F.2d 685 (4th Cir., 1974). Under 18 U.S.C. 242 it is a misdemeanor to deprive the electorate of a fairly-conducted election under color of official right; under 42 U.S.C. 1973(i)(c), it is a 5 year felony to provide certain types of false information concerning one's residence to a voter registrar for the purpose of qualifying to vote in an election where Federal candidates will be on the ballot; and under 42 U.S.C. 1973(i)(e), which was enacted last year, it is a 5 year felony to vote more than once in an election where there are Federal candidates on the ballot. This impressive stable of statutes has been the source of numerous prosecutions lately, especially in states like Illinois and Louisiana where State laws require voters not only to pre-register but also to sign rosters at the polls. At the present time, the Criminal Division has active investigations involving this sort of offense before grand juries in Tennessee, Illinois, Louisiana, and Virginia. Complaints involving isolated instances of fraudulent registrations and multiple votes have been so numerous since 42 U.S.C. 1973(i)(c) and 1973(i)(e) were enacted that the Division has had to routinely defer such matters to the States, all of which to our knowledge have their own extensive and intricate network of criminal statutes which seek to protect against election irregularities. Clearly, if all of these statutes, many of which carry substantial penalties, have been unsuccessful in deterring those bent on corrupting the elective system through vote fraud, one more such statute will

not help much. Quite the contrary, our not insubstantial experience in this area has demonstrated that the type of person who is most apt to commit election fraud feels that he is "above" the system, that he will not be caught or punished, and is thus not deterred in the slightest by the presence on the books of facially awesome criminal statutes.

IV. THE FEDERAL ELECTION COMMISSION DOES NOT BELONG IN THE ENFORCEMENT MACHINERY OF LEGISLATION UNDER H.R. 5400

I feel that anyone who seeks to corrupt our democratic system in this manner should be subject to anything short of criminal prosecution. Also, I have reservations as to whether the subject of ballot security and election fraud falls logically within the FEC's present mandate over the financial disclosure provisions of the Federal Election Campaign Act. Moreover, the FEC's small and underfinanced staff is singularly ill-equipped to take on the awesome responsibilities for the preservation of ballot security which H.R. 5400 contemplates for it. And finally, the parallel civil and criminal proceedings which are bound to arise from the efforts of FEC and this Division to simultaneously fulfill our respective enforcement mandates under the Act are bound to create conflicts which will prove detrimental to overall law enforcement in this critical area.

V. CONCLUSION

While we naturally support the fundamental objective of making it easier for citizens to exercise their federal franchise, we would have preferred that a method be devised which would minimize the opportunity for electoral fraud while at the same time maximizing the opportunity for citizen participation in the electoral process. If we had more opportunity for consideration of the general concept and, particularly H.R. 5400, presumably we could make some more constructive comments. Having received this package yesterday afternoon without even a copy of the bill, we have done our best to indicate some of our concerns. I assume that the Administration as a matter of policy is going to support the concept embodied in H.R. 5400. However, if the Attorney General testifies on this bill, he should, in my judgment, qualify his support thereof with the caveat that despite the favorable experience in several states, the experience of the Criminal Division in enforcing the federal election laws indicates that there is a tremendous potential for fraud in H.R. 5400.

Terry - FYI
Maybe you could
draft some response
for LT? KEW 4/12

The Honorable Lowell Thomas, Jr.
Lt. Governor
State Capitol
Juneau, Alaska 99802

Dear Secretary Thomas:

I recently received a letter from Secretary of State James Kirkpatrick of Missouri, in which he asked for information regarding Minnesota's experience with election day registration. Anticipating that you might find the facts I sent to Secretary Kirkpatrick useful in your consideration of the proposed federal election registration legislation, I am taking the liberty of sending you some information about our voter registration process.

The Minnesota system functions in the following way: There is a registration deadline of twenty days before each election, giving the registration office time to process the registration cards and to prepare the card files for delivery to the polling places. On election day, however, any eligible voter may register at the polling place by offering an authorized proof of residence.

In the Minnesota Statewide election of 1974, twenty percent of those who voted registered on election day. Last November Minnesota ranked first in the nation with over seventy-four percent voter turnout. Of those 1,978,590 voters, twenty-three percent registered on election day.

Our philosophy in Minnesota is that voting is a right, and that the government should assist the voter to guarantee that right. The present voter registration system in Minnesota has been working since it was enacted in 1973. I believe that it can and will work at the federal level.

I am enclosing information about our voter registration system. Also enclosed are a copy of the Minnesota Voter Registration Manual 1976, a copy of the Rules of the Secretary of State for Voter Registration, and a voter registration card.

My office will be happy to answer any questions you might have and to work with you on the federal registration proposal.

Sincerely yours,

Joan Anderson Growe
Secretary Of State

JAG:pak

1. What proofs of residence are authorized on election day?

1. Minnesota Driver's License
2. Minnesota State-Issued Identification Card, which we call a Nonqualification Certificate which is issued to people who don't drive
3. A form we call Notice of Incomplete Registration which is mailed from the registration office
4. A registration in the same precinct, but at a different address, for the same person
5. And by having another registered voter in the same precinct vouch for the voter who is registering

2. What happens during the 20 days between the postcard-registration cutoff and election day?

The mandatory cutoff is 20 days prior to the election. During the time between the cutoff date and election day, new applications are checked and card files brought up to date in preparation for their delivery to the polling places. Applicants who attempt to register in person are informed of the location of their polling place and told they may register there on election day. The law does not specify that practice, but my office recommends it. The Rules of the Secretary of State deal with applicants who attempt to register by mail during that time. The registration office is to mail the applicant a notice of ineffective registration explaining that the deadline prevented the registration from being accepted, giving the location of the applicant's polling place and election day registration procedures, and instructing the voter that the notice of ineffective registration serves as a means of identification for registering on election day (Sec Stat 505).

3. How is election day registration handled by election judges?

Minnesota has approximately 4,000 precincts. State law has long required a minimum of three election judges per precinct.

In the 1974 state-wide elections, extra judges were used in many precincts throughout Minnesota. The State of Minnesota reimbursed local election jurisdictions for the expenses incurred to implement the 1973 voter registration law, which included provision for reimbursement of the cost of additional judges. Before that date, many counties had no system of permanent registration; almost half of Minnesota's voters in effect registered on election day by stating their names and addresses to the election judges at the polling place.

By 1976, there was no longer a provision for reimbursement, but many jurisdictions continued to use one or two supplementary judges to facilitate the election day registration process. Minnesota Law provides that the judge who registers a voter on election day shall not also hand to or receive from, that voter his or her ballot. According to election law, judges may rotate in performance of the required tasks during their hours of service (M.S. 201.061 subdivision 4)

4. Have there been instances of duplicate registrations or fraudulent voting?

Of the nearly 2,000,000 voters who cast their ballots on election day, only one or two instances of duplicate registration have been called to our attention, and they are currently under investigation.

No cases of fraudulent registration have been proven since the enactment of the 1973 Minnesota Voter Registration Act.

ANCHORAGE, ALASKA 99502
(907) 274-2525

OFFICE OF THE CLERK

April 29, 1977

Senator Joseph L. Orsini
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

You asked for comment on HB 84, Polling Place Hours and on CSCSHB188, Pertaining to Voter Registration and Procedures, and I offer those comments here.

HB 84, Polling Place Hours

I am in support of this bill, as is the Alaska Association of Municipal Clerks, although past experience says that it will not cure the voter apathy problem in Alaska. Polling place hours are not the reason for the apathy. The bill provides for local option on closure of the polls but what will happen, as a matter of fact, is that the majority of municipalities in the State will keep the same poll hours as the State. To do otherwise, particularly in State election years, would be total confusion for the voter. The local option should remain in the bill, however, because there are municipalities in the State which are very, very small and can make good use of the shorter polling hours.

If you are interested, past performance of voters and surveys conducted indicate that the heaviest voting hours are from 5:00 p. m. to 7:00 p. m. on election day. Voting is extremely light thoughout the morning and even into the noon hour. It begins to increase in the late afternoon, peaking from 5 to 7. The vast majority of voters go to the polls on their way home from work. Once home and having eaten dinner, they generally do not go out to vote. The comment received from the voters is that they try to take care of all business type of errands (which includes voting) prior to going home for the evening. Working husbands with non-working wives will generally go home, pick up the family, go to the polls and then return home for supper and bedding down of the children.

Neither AAMC nor myself have any real problem with this bill; but we definitely feel that it is a false attempt to increase voter turnout. If the bill passes, you can be assured that we will once again start charting voter turnout and questioning voters so that we may have more information for you at a later date.

CSCSHB 188, Voter Registration and Procedures

I would first like to address some of the smaller issues, or housekeeping amendments of the bill:

AS 15.05.020(10) - (page 1, beginning on line 24) "Upon furnishing evidence of change of address . . ."

The voter should be able to change his address by telephone; after all, you can change your utilities, subscriptions, etc. by phone. The problem arises with a prankster calling in to the State office and changing the address of someone other than himself - perhaps a potential candidate. That puts the candidate, when he goes to file for office and is unaware of the prank, in a very questionable (and angry?) position. It also puts those of us who must administer elections in a very untenable position. I have had occassion in the past, as have almost all election administrators, to question the residence of a candidate. With nothing in writing, no signature by the person involved under any kind of oath, there is no evidence for a case by the administrator and it leaves things rather nebulous for the candidate. If I had my druthers, I would allow change of address by telephone, but for protection of all involved, public and administrators, I would require that that change be backed up in writing - either a change of address form, or a letter - both of which are now accepted by the State.

Sec. 10, AS 15.07.090(d) - (page 3, beginning on line 22) "Before counting the ballot the Lt. Gov. or his representative . . ."

I am speaking to this sentence, but to (2) "has resided in the election district for 30 days" in particular. This ties into the question of election day registration somewhat. There is no way that this can be ascertained by any election official without delaying the canvass and certification of an election for a long period of time. The only way to prove that a voter has lived in his election district for 30 days when you allow voter registration and voting at the polls is by pulling utility records for the address given or requiring rent receipts for the previous 30 days to be presented at the polls. How many voters will bring rent receipts or cancelled house payment checks to the polls? With pre-registration 30 days before an election there is some assurance that the voter is indeed living at that address and will continue to do so for 30 days. And where there is doubt, there is enough time prior to the election for the election official to request rent receipts or have utility records pulled. No so with election day registration and voting.

Section 11, AS 15.07.100 (page 4, beginning on line 6) "The Lt. Gov. shall grant requests . . . "

My comment would be, and you'll have to pardon it, that this is ridiculous. If each party is entitled to 5 registrars and a precinct has 300 voters, the appointment of 10 registrars for that precinct would be one registrar for every 30 voters. They would be tripping all over themselves and the State would be receiving double and triple registrations on the same people - all the while paying the registrars 50¢ for each of these unnecessary registrations. The State now has double and triple registrations in precincts where there are only 2 or 3 registrars, much less 10.

A secondary problem in this section is the mandatory "Lt. Governor shall". This should be permissive and should be changed to "may". From a municipal standpoint, we watch registrars come and go. They get involved in party disputes in the precinct and register everything in sight, including the telephone polls. It does nothing for cleanness of the rolls. I have seen incompetent registrars who do not complete registration forms correctly, mail them in too late to get on the rolls for the election even though they were registered in plenty of time, etc. This is where the Lt. Governor

should have discretion not to appoint. The people who are registering voters should be able to do the job and do it correctly - the same as anyone else who works at anything. If they are not doing to job, they should not be appointed or their appointment should be revoked because the damage they do is not to the voter registration system or to us who administer elections - but to the individual voter - the guy that is interested in going to the polls and voting but because of an incompetent finds that his vote is not counted or finds he must vote a challenge ballot even though he signed his voter registration form six months previously. Give the Lt. Governor the discretion not to appoint and raise the precinct voter level, if you insist on keeping this provision in, to a minimum of 500 voters. If you will read the existing 15.07.100 I think you will find this is more than adequate as it permits the Lt. Governor to appoint as many registrars as there are voters in a precinct.

Now, relative to the major question of registration and voting at the polls on election day, may I offer the following:

1.) If passed, registration and voting on election day will increase the number of questioned ballots in an election. This, in turn will mean a longer time for canvass of the election and certification of those elected.

2.) Expenses will increase for the greater number of materials that will have to be provided for each precinct.

3.) Voting will slow down as there will be more persons, presumably, that will have to fill out the questioned ballot. During heavy voting hours you are talking about a definite clog in the precinct and angry voters.

4.) Election day registration means no incentive for registration at any other time of the year. If one is allowed to register and vote at the polls and have his vote counted, there is no reason for him to take any time or effort during any other part of the year to register ahead of time.

5.) By allowing someone to register and vote on election day in a precinct or district other than his own (page 3, beginning on line 26) you are providing no incentive for anyone to vote in his correct precinct. If I get off work at 5:00 p. m. and want to do some shopping downtown or go to a show; rather than going all the way out to my correct precinct and casting my ballot, I will trot right outside my office door and vote a challenged ballot in the precinct that uses this building as its polling place. My areawide candidates and propositions will be counted, unless I am unduly concerned about by own area candidates, what the hell?

This, however, does not remain true for municipal elections. Our elections are much more sectionalized - with service areas, Assembly candidates, sectional issues - much more so than the State. In some instances, we would not be able to count the ballot of the voter who votes in other thar his correct precinct. We would not be able to count <u>any</u> part of that ballot because in order to do so we would have to identify the voter, look at his particular ballots to decide what he was entitled to vote on and then separate those from the ones he was not entitled to. That's voter identification and

ballot identification and that's not legal.

6.) Voter fraud would be much easier. I could vote in my own precinct under my own name, unquestioned. Then I can drive to any other precinct in town, register under a slightly different name and vote a questioned ballot. The State will never catch me because between the time of the election and canvass of the election it will be impossible for them to determine if Mary R. Swank does live at that second address - unless they pull utility records and they don't have the time to do that. The same holds true for me voting at least once in Anchorage and then driving to Palmer or any other election district and casting another ballot. All of my ballots will be counted because there is no way for the election office to determine that I do not live wherever I say I live.

7.) Not only is #6 above possible, what's to stop me from this situation? I am registered in my own precinct. But I know that the candidate I favor, in a municipal or state election, is going to win by a landslide, so I'm not really concerned about the race. But I am very much concerned about the Assembly or State House race in another district - it's much more hotly contested and much closer. I support one of those candidates. Since I can register and vote on election day, I choose not to vote in my own precinct, but I again trot across town and register (saying, if necessary (and it's not necessary), that I have moved and haven't filed a change of address. I register, vote for the candidate I'm concerned about and my ballot is counted. If I'm really smart, I get a whole group of friends to do the same thing. My candidate wins or at least picks up enough votes to get him through the primary. No way will I be caught.

8.) In order to avoid #6 and #7 above, you are talking about requiring rent receipts. A driver's license is not sufficient. Most people do not change their address on their driver's license when they move. They change only those things which immediately affect them, i.e. mail. I, at least, in administering municipal elections and because of the sectionalized nature of my ballot issues, would require something other than a driver's license. And I would have one hell of a lot of mad voters on my neck - but it would be the only way I could protect the integrity of my election. And it would be the only way that I could ever certify that that election was valid. To require no proof or just a driver's license would most certainly mean that I could not and would not certify that election as valid.

9.) The purpose of the bill, as I see it, is to increase voter participation and make it as easy as possible to vote. This I see nothing wrong with. I think the method, however, is incorrect. If you look at some of the states which have this voter registration system you will find that Wisconsin voter participation increased only 3%. Maine increased only 4%. And when you talk about the increase in voter turnout, keep in mind that with that 3 or 4% increase you are also talking bout increased costs - of materials, of women to canvass, of staff time.

10.) I have spoken with officials (municipal) in Wisconsin and Minnesota. They have experienced voter fraud. They have experienced attempted voter fraud. In smaller communities, it is much easier to catch because everyone knows everyone else. In large communities it is

much harder to catch and even more difficult to document with the allowance of registration and voting on election day.

11.) Most of the small communities in Alaska, from discussions at Municipal League meetings, would probably not favor this legislation. They still want 3 year residency requirements for their candidates - and in some cases, even though its unconstitutional, they have maintained that residency requirement. At least 3 communities do not want to let 18 year olds run for municipal office - they want an age limit of 20 or 21. Sound impossible? Maybe so, but it's true. From discussions on subjects like these, I really doubt if this bill has much support from the smaller areas.

As you can see, I am not in support of the concept of voter registration and voting on election day. I see a multitude of problems. Neither, however, do I wished to be classed as an obstructionist. In thinking this bill over, what appeals to me most is a trial run if the bill is indeed going to be passed. If Anchorage could be used as a test for this procedure we (the Legislature, public and election officials) would at least have some idea of how it would work, what the impact would be, what the cost would be. I would be willing to volunteer Anchorage as a test for our fall election, but have a question as to the legality of Anchorage, for only that time, having different registration and voter requirements than the rest of the State. If the idea appeals to you, however, perhaps you could inquire about it of the Attorney General. That at least would give us some idea of what we are dealing with.

In closing I can only add one comment, and I mean no slight: You (the Legislature) only see elections from the point of the candidate and the public official - getting as many constituents and supporters out to vote as possible. Those of us dealing with elections on a daily basis know what goes into an election; what takes place between the legislative body placing an issue on the ballot and certification of that election - and what takes place is a myriad of detailed and arduous work, all of which must conform to the law. You, or the public, are the people who sue us, the election officials. We are the people who must deal with those suits. We must bring the democratic election process to fruition and we must be absolutely sure, in every detail, that we are complying with the law. It is not nearly as easy as it sounds - most people who go to work in any kind of an office which administers election are amazed at the process and their general comment is that they had not idea, before, how the ballots got from the legislative body to the polling place - they had just taken it for granted that God, or someone, sent them down on election day. Please take the mechanics into consideration.

I apologize for the length of this letter - but it's a subject near and dear to my heart. I do appreciate the opportunity to comment and, even more, appreciate the request for comment from a member of the Legislature instead of me providing the unsolicited comment. If I can be of help in answering questions, on policy or procedure as concerns this bill, or in clarifying any of my comments, please let me know. I would be most happy to do so . I do not, nor would not, intend to answer those questions in an adversary manner - but simply to provide information from someone who has some expertise in the election process and knows the ins and outs of the mechanics of the system.

Again, my thanks for your concern.

Mary Coffey
Municipal Clerk

STATE
of ALASKA

MEMORANDUM

OFFICE OF THE LIEUTENANT GOVERNOR

TO: Senator Joe Orsini
Chairman
Community and Regional Affairs
Committee

DATE : May 2, 1977

FROM: Lowell Thomas, Jr.
Lieutenant Governor

SUBJECT: Bill Analysis of SCS CSHB 188
(C & RA)

As you requested the following is a section by section analysis of Senate CS for CS for House Bill No. 188 (C&RA):

Sec. 1 AS 15.05.015 The U.S. Congress provided that overseas voters may register and vote in their last state of residence prior to their departure for overseas. The overseas citizen must meet all statutory requirements to register to vote. This section is added to bring Alaska into compliance with the Federal law. (Senate Rules version has this)

General Comment

Sec. 2-5 The reason for the changes in these sections is to allow persons to register at any time throughout the year. Currently registration is closed thirty days prior to the election. The voter will not be able to vote unless 30 days have passed after registering though he will be able to register within the 30 day period just before the election.

Sec. 2 AS 15.15.020(10)--Specific Comment: This section permits a person who is already a registered voter and has a card with his signature on file to change his address over the phone. Elections personnel can authenticate if the caller is the person requesting the change by obtaining the caller's voter number, birth date, time of residence in the State, etc. Any person who could not provide satisfactory information would not have their voter registration records changed through the phone call. If there was any doubt, a signed card would have to be submitted. (Senate Rules version has this)

Sec. 3 AS 15.07.030--Specific Comment: This section adds the words "subsequent" for "succeeding" and includes "special" elections. (Also in Senate Rules version with language permitting registration and voting on election day)

Sec. 4 AS 15.07.040 --Specific Comment: This language maintains that a voter can not vote until 30 days after registering. (Senate Rules provides for registering and voting on election day)

Sec. 5 AS 15.07.070(d)--Specific Comment: Allows registration throughout the year. (Senate Rules version would allow registration and voting on election day)

Sec. 6 AS 15.07.100 This proposed language provides for appointment of additional registration officials for precincts. It also provides that the number of officials be related to the number of registered voters. (Senate Rules version provides slightly different approach)

Sec. 7 AS 15.07.115 This new section provides for the appointment of temporary registrars beginning 150 days prior to a general election. These registrars will be compensated at the same pay rate as other registration officials. (Senate Rules version has this)

Sec. 8 AS 15.07.130(b) This section changes the length of time from four to two years for retaining a voter on the master voter list if he has not voted. If a person does not vote once every two years, elections personnel notifies him/her of their intent to remove his/her name from the list of registered voters. If the notification is not returned by the voter within 90 days, his/her voter registration is cancelled. This procedure works well as voters do respond to the notification they receive. This would also assist in keeping voter lists up to date. (The change from a 4 to a 2 year purge is not in Senate Rules bill)

Sec. 9 AS 15.07.140 This section contains housekeeping revision as it adds the words "special election" and clarifies who makes a request to the lieutenant governor for lists of registered voters in a municipality.

Sec. 10 AS 15.13.060(c) This section extends the time of filing a campaign treasurer's name and address. It requires that the name and address of the campaign treasurer be filed with the lieutenant governor by candidates for state elective office within 15 days after the date for filing a declaration of candidacy or nominating petition. In 1976 problems occurred with three candidates whose campaign treasurers' names and addresses were not received as required by law. This conforms with the proposal to allow extra time for candidates to file conflict of interest statements. Legal action followed in all three cases.

Some municipal clerks believe that problems may arise with allowing 7 days for the treasurer's name to be filed by candidates for municipal elections. (Senate Rules version contains this also)

Sec. 11 AS 15.13.100 This provision permits candidates to receive and expend contributions prior to filing for nomination and requires that such expenditures be included in the first report required. (Requested by Executive Director of APOC. Not in Senate Rules version)

Sec. 13 AS 15.15.260 The changes in this section allow for either the voter or the election judge to deposit the ballot in the ballot box after removal of the numbered stub. (Senate Rules version has different approach)

Sec. 14 AS 15.15.330 This section is revised to allow for an early count of the punch card ballots. In particular, we hope to use this procedure in the Anchorage area (Election Districts 7 - 12) for the 1978 election. Unless this section is changed, we would be unable to allow the early pick up and counting of the ballots. This change is requested as a result of the experiences of the 1976 general election. There was a large turn-out of registered voters on election day and voters had several ballot cards to punch. Ballot pick-up after 2:00 PM would allow a portion of the ballots to be counted prior to the closing of the polls. At that time the remaining ballots would be brought into the computer centers and counted. Language is included so that those voters in line when the polls close would not learn election results. (Senate Rules version has indentical language)

Secs. 15 & 16 AS 15.20.140 & 150 These sections have been rewritten in SB 207 in order to differentiate between marking an absentee ballot and returning the ballot. Under current law (15.20.150) a technical problem exists in that a person who requests and receives an absentee ballot by personal representative or by mail has to return it by personal representative or by mail. This language (originally from SB 207) allows the absentee voter to return the ballot in person. Under current law this option does not exist if the ballot is received by mail or personal representative. Problems have occurred relating to postmarks on ballots. Many places--pipeline camps, isolated villages logging camps, etc.--do not have post offices, therefore, voters are unable to postmark their ballots on election day. With this change in the law, an affidavit can be provided so that a voter will not have to have the envelope postmarked. A provision is also included that any ballot that is received before 4:00 PM of the eighth day following the election must be counted. Any received after that time will not be counted as the Absentee Canvass Boards complete their work on the eight day following the election.

The language in 140 & 150 conforms to changes already made in Chapter 16 SLA 1977 allowing for a single attesting witness. (Senate Rules version untilizes slightly different approach)

Sec. 17 AS 15.20.620(c) This change is requested due to problems which occurred during the 1976 general election. The AJIS system which is run off the computer that is used for vote counting in Anchorage cannot be completely shut down because of Federal requirements. As AJIS is federally funded, there

is a possibility that by pulling the computer off completely for the vote counting process the Federal funds would be cut. Our amended language requires that a portion of the computer be designated for the vote counting system. (Senate Rules version has this)

Sec. 18 AS 15.20.620(d) This section retains the manual count for the different candidates and allows flexibility in accomplishing this necessary task. (Senate Rules version has this)

Sec. 19 AS 15.20.650 Delivery of the ballots to the computer counting center is revised to allow for the early pick up of ballots from the polling places. (Sec. 14) The teams would consist of two persons, one from each major political party or a licensed security guard. In some instances, it is more convenient for a security guard rather than the pick up team to bring the ballots to the computer center. (Senate Rules version has this)

Sec. 20 AS 15.25.040(a) and (b) This section changes the filing deadline for candidates representing a political party for the primary election. The deadline is changed from June 1 to the third Tuesday in May. This change is requested as problems have occurred with the deadline near the Memorial Day weekend. Telegraph offices are closed on Memorial Day so no telegrams are delivered nor are persons able to send telegrams. Post Offices are closed so prospective candidates are unable to have declarations postmarked. In addition, as the filing deadline occurs after a long weekend, mail service is slow and we have encountered difficulties in receiving the declarations. This section also reduces the amount of information required of a person sending telegram notification of filing to the lieutenant governor. Previously, the person had to include in the telegram a copy of almost everything in the declaration. With the new language the telegram would include only the very pertinent information. (Senate Rules version has this)

Secs. 21 & 22 AS 15.25.056(a) & 15.25.150 These sections are housekeeping changes to bring this section into conformance with AS 15.25.040(a) and (b) change the filing date.

The change from certified to registered mail will insure that the candidate has a receipt for sending material and that the lieutenant governor's office has evidence that material was received. (Senate Rules version has this)

Sec. 23--36 AS 15.45.020--AS 15.45.410 These sections cover the initiative and referendum procedures. The Department of Law would be required to assist the members of an initiative committee in drafting a proposed bill to be enacted by initiative if the initiative committee requests this assistance. This would obviate any post-election challenges to the form of an initiative measure. Also, the ballot title and impartial summary of an initiative or referendum measure would be drafted earlier in the initiative or referendum process and submitted

to the sponsoring committee. The committee could register their concurrence with or objection to the proposed wording and provide an alternative prior to the preparation of the petition booklets. The same ballot title and impartial summary as printed in the petition booklets would appear on the election ballot and in the official election pamphlet. Other revisions are housekeeping. (Senate Rules version has this)

Sec. 37 AS 15.57.011--AS 15.57.180 This section covers the official election pamphlet. The revisions to and expansion of the initial legislation are designed to make procedures more explicit and resolve objections made to the publication in the past. Information relating to propositions and bond questions is specified, costs to candidates and parties for space is outlined, and the procedure for preparation and selection of arguments advocating approval and rejection of measures and rebuttals is detailed. (Senate Rules version has this)

Sec. 38 AS 39.50.020 Section (a) deals with the filing of conflict of interest statements by candidates for state and municipal elective offices. It is revised to resolve the problems which occurred with the 1976 filings. After filing as a candidate, state candidates have fifteen days and municipal candidates have a seven-day grace period for submitting their conflict of interest statements. Candidates with current conflict of interest statements on file are not required to submit another one.

Changes in subsection (b) allow an option for candidates for state office to submit their conflict of interest statements to the lieutenant governor's office for filing with APOC. This practice has been used and is of assistance to candidates. (Senate Rules Committee has same language as in SB 207)

Sec. 39 AS 15.20.260--AS 15.20.420 Repeals unnecessary provisions dealing with voting machines which are no longer used. If these machines were needed, existing law provides authorization for their use.

15.57.010--15.57.060 Repeals existing provision for Election Pamphlet to allow rewriting of pamphlet provisions.

15.07.070(c) Repeals language requiring that applications for registration must be postmarked 30 days prior to election. This is no longer necessary as we are allowing persons to register throughout the year.

cc: Patty Ann Polley

TO: Senator Orsini DATE: April 28, 1977

FROM: Paul Conger RE: SCS CSHB 188

The following amendments are suggested by the Administration regarding SCS CSHB 188. Initially they seek to remove the provisions that pertain to allowing the voter the option of registering on election day. This is found in Secs. 1, 4, 6, 7, 10(d) and portions of 5 and 9.

A. Page 4, Line 24:

This suggested revision provides that if a person hasn't voted for 2 consecutive years, his resignation will be cancelled. The law currently allows for four years before an individual's registration is cancelled. Administration feels this will assist in maintaining an accurate Master Voter List of qualified voters.

B. Sec, 16 - AS 15.15.260 Page 6, Line 1:

In the bill this provision states that after the voter has voted the election official could then, if not already done, remove the numerical stub from the bill and then the ballot must be handed back to the voter and the voter deposit it in the ballot box. What the Administration's revision would do is allow the election official to deposit the ballot. According to the Administration, "in general the voter is agreeable to having his ballot placed in the ballot box by the Election Judge".

C. Sec. 18 - AS 15.20.140 (Chapter 20 deals w/absentee voting)

Currently, the law only speaks to the situation where an absentee ballot can be returned by mail or through personal representation and does not state that the absentee voter can return it in person. The Administration leans toward the provision addressing this issue in SB 307 (affixed as Attachment 1). They prefer the language found in SB 307 because it delineates the procedure for marking the ballot as well as provisions for returning the ballot.

Sec. 42 - AS 29.50.020 Report of Financial and Business Interest

This section deals with public disclosure. SCS CSHB 188 says that all candidates, except for those who have a financial statement on file, no later than 15 days after:

1) filing a declaration of candidacy (instead of AT THE TIME OF)
2) the filing of any nominating petition (instead of within 30 days of)
3) becoming a candidate by any other means (instead of within 30 days of).

must furnish a financial disclosure statement.

Also, this allows that the financial statement can be submitted to the Lt. Governor's office for filing with Alaska Public Offices Commissions. This statement has to be filed in compliance with the above time schedule.

The Administration however feels that the financial provisions expressed in HB 400 are more lucid and feel that SCS CSHB 188 should conform to the language in this bill.

(HB400)

In essence what this bill states is as follows:

Judicial officers and those that work in the Administration who have to disclose, would have to disclose their finances and business interest within 30 days after he takes office.

Candidates for state elective office would have to provide a financial statement in the same manner as described above in SCS CSHB 188. A similar allowance is provided in HB 400 permitting those individuals who already have a current statement on file not to have to reapply.

In respect to municipally elected officials candidates would have to file a financial statement within 7 days after filing a nomination petition, declaration of candidacy or other required filing for the elective municipal office (instead of AT THE TIME OF). Also, if the municipal officer has a current financial statement on file he does not have to reapply. HB 400 is affixed as Attachment II.

JACKSON COUNTY
BOARD OF ELECTION COMMISSIONERS

April 11, 1977

JAMES F. WOLFE, SECRETARY
AMY T. JONES, MEMBER
SANDRA L. ROLF, MEMBER

INDEPENDENCE SQUARE COURTHOUSE
INDEPENDENCE, MISSOURI 64050
Phone: (816) 881-4600

RESOLUTION BY THE JACKSON COUNTY (MISSOURI)
BOARD OF ELECTION COMMISSIONERS

WHEREAS, this board has become aware of legislation entitled "Universal Voter Registration Act of 1977," and

WHEREAS, this legislation has many dangers which far outweigh any merits, to-wit:

(1) It would be conducive to fraud, since there would be no opportunity to check on the residence or eligibility of voter applicants;

(2) It would be confusing, since there would be little opportunity to assign voter names to the proper precincts and political subdivisions, such as cities, wards, school districts, fire districts, and others; and many persons would not show up at the proper precinct on election day;

(3) It would allow felons, ghosts, and aliens (both those in the U.S. legally and those in the U.S. illegally) to vote, since it would be easy for them to obtain the identification required by the act;

(4) It would be expensive, since it would become difficult to predict the number of polling officials and the number of voting machines and the amount of supplies to be sent

Resolution by the Jackson County (Missouri)
Board of Election Commissioners Continued

to the various polls:

AND WHEREAS, in summary, the legislation would in effect repeal and cancel voter registration, preserving only the appearance and the expense,

AND WHEREAS, as the bipartisan officials charged with conducting honest elections in the county where Harry S. Truman was a registered voter and where his brother, Vivian Truman, was one of our predecessor commissioners, this Board of Election Commissioners has a duty to call attention to this insidious legislation,

THEREFORE, BE IT RESOLVED, that the Jackson County Board of Election Commissioners does urge the Congress of the United States to reject the so-called "Universal Voter Registration Act of 1977."

STATE of ALASKA

MEMORANDUM

RECEIVED
MAY 7
Lieutenant Governor

TO: Lowell Thomas, Jr.
Lieutenant Governor
Office of the Lt. Governor

DATE : May 2, 1977

FROM: Patty Ann Polley
Director
Division of Elections

SUBJECT: House Bill No. 84

Alaska's voter registration system is a statewide on-going program. In only three or four other states is voter registration set up on a statewide basis (Kentucky and Delaware). Alaska's system with registrars in every precinct throughout the State provides easy access to voter registration. In addition, registration drives are conducted in supermarkets, fairs, high schools, etc. The system is an out-reach program in that the registrars go to where the people are. In many states prospective voters must go to a registrar's office located in the county seat.

In 1976 82.9% of eligible persons were registered to vote and 64.1% of those registered voted in the 1976 general election. Based on these percentages, Alaska has one of the best records for people registering to vote and going to the polls to vote.

Based on the above information, we do not feel that voter registration on election day is necessary. We know that many people will procrastinate until election day. This occurs prior to the close of voter registration before every election. Voter registration drives are planned prior to the close of registration, however, drives which are held two to three weeks prior to the close do not bring out nearly as many people to register. Confusion will reign on election day as unregistered voters hunt the polling place for their residence. Even though maps would have to be provided in the newspaper, people will still go to the wrong polling place and will have to be sent on to the correct polling place. Additional ballots and envelopes will have to be provided to each precinct as there will be no way to determine how many people will show up at the polls. The people coming to the polls on election day will not have received the election pamphlet on bond issues, ballot propositions, etc.

The following additional expenses will occur as a result of registration on election day:

1. Additional people at the polls. One person per precinct - 450 precircts x 12 hours x $4.50 per hour = $24,300 for each election.

2. Printing of additional ballots and other supplies - $3,000.

3. Hiring of additional people to spot verify election day registrations - $3,000.

If voter registration on election day should become a requirement as a result of the proposed federal law, may I suggest that the proposed HB 84 be amended to make the bill effective of the passage of federal law. The following language is suggested; page 3, line 20; add a new section to read: "This Act takes effect upon the effective date of a version of the federal "Universal Voter Registration Act of 1977," S. 1072, currently pending in the 1st Session of the 95th United State Congress."

HR5400

Consideration should probably be given to allowing municipalities to determine if they wish to have registration on election day.

This proposed bill has removed all reference to any sort of a closure for 30 days prior to an election. As this bill is currently written, registration will not be closed at all. This presents real problems in trying to prepare lists of registered voters for the election.

The section by section analysis of the proposed HB 84 follows:

Section 1. Page 1, line 8. This section amends the voter qualifications to allow for voter registration at the polls on election day. There is one possible problem in that a person registering to vote on election day may very well be registered in another state.

Section 2. Page 1, line 12. The changes in this section allow for a person to register and vote on election day.

Section 3. Page 1, line 18. This section sets out those persons who may register to vote - those who have the qualificatios and those who will have the qualifications by election day. There is a possible conflict between Sections 2 and 3 in that Section 2 (Page 1, line 16) refers to "election district" and Section 3 (Page 1, line 22) refers to "precinct". Perhaps the term "precinct" should be used.

Section 4. Page 1, line 24. This section provides that the prospective voter must go to the polling place for his or her precinct of residence in order to vote. The voter must provide all necessary information plus prove his or her residence. If the language on page 2, lines 3 and 4 is left in the bill, the 30 day closure is left along with the registration on election day provision.

Section 5. Page 2, line 5. This section sets out the information which can be required to prove residence. The driver's license or other document approved by the lieutenant governor may be required. The discretion for other pieces of identification is left to the lieutenant governor.

Section 6. Page 2, line 11. This provides for the registration of voters by a registration official or election judge. To provide for the closure of registration 30 days prior to the election, the language on page 2, lines 14 and 15 should be left in.

Section 7. Page 2 line 21. This section sets out that any voter coming to the polls on election day to vote must vote a questioned ballot. I believe language as follows should be added at the end of page 3, line 2: "the election district in which he resides but who is unable to cast a ballot in that district may cast a ballot in another election district;"

FORM 02-0018C

MAY BE HANDWRITTEN

MEMORANDUM

State of Alaska

DEPT. Office of Lt. Governor
DIV.
SEC.

TO: Senator Orsini
Chairman, Senate Community and
Regional Affairs Committee

DATE: 5/3/76

FROM: Terry Dale

SUBJECT: Proposed amendments to Senate Rules version (4/21/77) of SCSCSHB 188

I am preparing amendments as suggested to the Rules substitute which will use the following sections of the CRA substitute.

p.2 sec 6; p. 3 sec. 8; p. 4 sec. 11; p. 5 sec.12;

p. 5 sec. 15; p. 6 sec. 16; ps. 20-22 sec. 38

MEMORANDUM
LEAGUE OF WOMEN VOTERS OF ALASKA

TO: Sen. J. Orsini and Members of Senate Community and Regional Affairs
FROM: Marjorie Gorsuch, Lobbyist
SUBJECT: SCS CSHB84

DATE: May 2, 1977

In testimony delivered on Thursday, April 28, L.W.V. was asked for some clarifying information by the Committee pertaining to the quoted percentage of increases in voters participating in elections in the states which have election day registration. The League indicated the effectiveness of the procedure by which one may register and vote on election day with the following statistics:
Minnesota's voter turnout rate rose from 68% in 1972 to 75% in 1976.
Wisconsin adopted election-day registration for 1976 and had an an increase from 62% in 1972 to 65% in 1976.
Maine's turnout increased from 61% in 1972 to 65% in 1976 after election day registration.

We were able to determine from a call to the League's Washington, D.C. office that in fact, Wisconsin did not purge their registration lists until AFTER the '76 election. The office did not have purging dates for the other states.

In answer to some other questions posed by opponents of this bill, the League offers the following:

*How could election-day registrations be verified as to qualifications?
A follow-up, nonforwardable postcard could be sent to election-day registrants at the address given, as is done in Wisconsin. In Madison, Wisconsin, out of 12,416 cards sent in Sept. and NOv., 1976, only 1.2% were returned as non-deliverable.

*Would this bill dissuade people from registering before election day under the usual practice?
The Universal Registration Act of 1977 (HR 5400, S 1072) now before the U.S. Congress would encourage a variety of registration outreach programs to voters to get them registered before election day. States that develop an approved plan for encouraging early registration will be eligible for the Section 7 (b) (1) (B) money. Part of such an outreach plan could be mail registration.

*Wouldn't this bill let people vote who are not involved in the process, who are not informed or interested enough to register beforehand ? Wouldn't these people be open to manipulation by last-minute emotional appeals?
Citizen interest in an election increases as election day draws near, particularly in the last 30 days. That, after all, is the purpose of campaigns--to interest voters and stimulate

MEMORANDUM

OFFICE OF THE LIEUTENANT GOVERNOR

OR 3

TO: Senator Robert Ziegler
Senator Clem Tillion
Senator Mike Colletta
Senator John Rader

DATE : April 26, 1977

FROM: Lowell Thomas, Jr.
Lieutenant Governor
by: Terry Dale T.D.
Research Analyst

SUBJECT: Amendments to SCS CSHB 188

The followi g amendments are offered to SCS CSHB 188 after review of the bill. Also, I have attached my reasons for objecting to the inclusion of registration and voting on election day in sections 1,4,5,6,7,9 and 10(d) of this legislation.

The amendments are:

A. Sec. 13. AS 15.07.130(b) page 4 line 24

change one in (FOUR) consecutive calendar to two

A biennial purge of voters who failed to vote in the prior 2 years will assist in maintaining an accurate Master Voter List of qualified Alaskan voters.

B. Sec. 16. AS 15.15.260 page 6

I prefer the language in SB 207 Sec. 10 which is permissive. In general the voter is agreeable to having his ballot placed in the ballot box by the Election Judge.

C. Sec. 18. page 6 and 7

AS 15.20.140 and 150 in SB 207 are revised to rectify an unintended technical flaw. If a person receives an absentee ballot either by personal representative or by mail, it appears in AS 15.20.150 that the voter is prevented from returning the ballot in person. In these two sections, SB 207 differentiates between marking the ballot and returning the ballot. Therefore, I recommend the use of AS 15.20.140 and 150 as contained in SB 206 as it will allow the voter to return the ballot in the manner most convenient to him.

D. Sec. 42 39.50.020(a) page 21 and 22

I support the changes proposed in HB 400 with the exception of amendments in lines 14 and 15. These two revisions are separate items from those proposed in SB 207. The language in HB 400 is clear and accomplishes the purpose of my legislation. (Sec. 1 HB 400)

E. Secs. 1,4,5,6,7,9,10(d) pages 1-3

With due respect to the sponsors, I ask that you delete secs. 1,4,6,7,10(d) and the portions of 5 and 9 concerning regis-

FROM: Terry Dale
Research Analyst

SUBJECT:

tration and voting on election day. My reasons which are stated below are similar to those outlined by Governor Hammond in his veto of HCS SB 206 am H in 1976.

1. it will increase the cost of administering elections to both the state and municipalities and cause inconvenience to the voter as it will be difficult to assure adequate numbers of ballots, voting facilities, and personnel at the polls on election day. The estimated additional costs for each state sponsored election is around $4.0:

   a. extra registrars to handle load in larger precincts:
   200 precincts x 1 person x $4.50/hr = .9

   b. extra personnel to assist district canvass boards in counting unknown numbers of questioned ballots.
   12 persons x 10 hrs x $4.50/hr = .7

   c. election supervisors and staff overtime
   11 full time--5 part time x 10 hrs x $12/hr average = 2.0

   d. cost of providing additional ballots (very difficult to estimate with any accuracy).

2. it may result in voter confusion and may increase the opportunity and probability of fraud;

3. it will delay the results of elections because of new and complicated questioned ballot procedures; a large number of questioned ballots could leave an election undecided for many days;

4. arguably, it is contrary to policy articulated in court decisions upholding durational residency requirements for the purposes of preparing and providing adequate and up-to-date voter registration lists for election purposes;

5. it will be easy for persons to cast ballots in two states; when a person registers to vote in Alaska, a cancellation of previous registration is returned to the new registrant's former state of residence. No cancellation opportunity exists without preregistration;

6. in a state with an exceedingly high mobility rate and large influx of new residents, it is questionable public policy to facilitate voting by persons who have no familiarity with Alaskan conditions and no intention of

permanent residency within the state;

7. the people of Alaska adopted the current preregistration law by initiative in 1968. Without extensive public review I am reluctant to change the law adopted by that process, as I do not feel that circumstances have changed in such a way as to justify diluting preregistration requirements.

8. before each general election, the lieutenant Governor's Office sends to each registered voter a pamphlet containing information on the candidates, election districts and the ballot issues. Under this bill, persons who registered to vote on election day would not have received this pamphlet at their residence address.

cc: Fran Ulmer
Tom Koester

MEMORANDUM
LEAGUE OF WOMEN VOTERS OF ALASKA

OR 3

TO: Members of the Senate DATE: April 26, 1977

FROM: Marjorie Gorsuch & Janice Cates, Lobbyists

SUBJECT: SCS CS HB 188 "Act relating to Amendments to Alaska Election Code"

The League of Women Voters of Alaska believes that every person's right to vote should be protected and that a voter registration system should encourage maximum interest and participation in the electoral process and be simple and efficient to administer. The League finds tht the provisions for registration and voting at the polls, as contained in SCS CSHB188 meet these objectives.

We believe the election system should operate as simply as possible with the least possible bureaucratic "hassle" for the voter. We know that voter interest increases as elections draw near. We strongly endorse the concept of election day registration as a way of putting the government on record that it wants citizens to vote and will take measures to facilitate that basic democratic act.

Election day registration and voting is not an untried procedure and it has already proven effective. The system of election day registration has worked in Minnesota since 1974. Minnesota's voter turnout rate rose from 68% in 1972 to 75% in 1976 after the state adopted election day and mail registration. Of 1,978,590 Minnesota voters in 1976, 23% or 454,147 of them registered at the polls on election day. Wisconsin adopted election-day registration for 1976 and had an increase from 62% in 1972 to 65% in 1976. In Wisconsin, 216,000 voters registered on election day, persons who would otherwise presumably not have been able to vote. Maine's turnout increased from 61% in 1972 to 65% in 1976 arter election day registration.

Those opposed to this bill levy the criticism that fraud will increase and in fact be encouraged by the election-day registration method. The League of Women Voters rejects this claim.

Again, the record speaks for itself. No fraud was documented in Wisconsin, Maine, Minnesota or North Dakota (which has never required registration), according to a recent report to the New York Times (April 1,1977). State election officials in Wisconsin are quoted as saying charges of fraud were investigated and not substantiated. Problems did occur but they were the result of confusion and heavy turnout. The Minnesota League reports that as of April 4, 1977, according to the Secretary of State's office in Minnesota, only one or two instances of duplicate registration in the 1976 election have been referred to that office. Further, the Secretary of State knows of no persons reported as voting in more than one precinct.

As a deterrent to fraud, SCS CSHB188 requires that those who register on election day shall cast a "questioned ballot". Before counting the ballot the Lt. Gov. or his representative shall determine that the voter is, in fact, a qualified voter. (AS 15.07.090 (d)) Also, those who make a false statement while registering are guilty of a misdemeanor punishable by $1000 fine or one year imprisonment.

There are other provisions of the bill we also commend. Of special interest to the League are the amendments proposed by the Lt. Governor's office dealing with the election pamphlet. These provisons contain many important housekeeping amendments as well as substantive improvements in the procedures for preparation of the arguments for approval and rejection of propositons.

In short, the League of Women Voters of Alaska believes the law proposed in SCS CSHB188 is workable and will facilitate voting. We urge your support.

CRA Hearing 4/28

CBJ – oppose registration on election day
additional cost in regis + ballots
confusion involved with >1 function @ same time

note challenge/ques ballot, then investigate prior to counting ballot (delay election)

prior regis allows same organization, petitions, etc

Ground – LWV – no objection to separating issues
support Lt Gov's amendments
Support pg Comm. publishing names of non-compliance candidates

Time of polls – support same time for closing of all polls
neutral on issue of extra hour open

Support same day regis – protect persons right to vote
Other states going to same day regis should help increase

Ques ballot provide separate – add language
to oath of true voting + not voting previously
Fed bill has state subsidy (but not much)

consider how regis & polls

consider "other" factors – need, cons of ops;
partic elec. years; prior regis period requirements
elec. comm. would be helpful

Ann Mann(?) Patty Ann Polley - HB 188

cleaner list -- reduced costs for pamphlets; candidates are main beneficiaries of "clean" list

Regis

$24,000 extra cost for people @ polls per election verifying ques. ballots would also raise costs

HB 84

Oppose regis on elec day - will cause people to put off regis until then - problem w/ deciding correct pct @ last minute

regis to vote to get A-K res card - 3 mo ~~for~~ delay did who were not even citizens (took 3-4 weeks)

Several people in last few years have voted 2x (e.g. Howard (Beaver)), turn up ~ 100/yr w/dual regis & may few actually seem to vote 2x (3-4) that have been found

Hours of polls - oppose extra open hours - no benefits, extra costs of ~ $16K/election

~~pols~~ election boards strongly oppose extra hour

~~Other~~ In many other states only place to register (cost - this is inconvenient

TO: SENATE CS FOR CS FOR HOUSE BILL NO. 188

Page 4, lines 6 - 12:

Delete all of subsection (b) and insert the following in its place:

(b) The lieutenant governor shall appoint additional registration officials upon the request of a major political party. The number of appointments made under this subsection shall be

(1) three for a precinct containing 250 - 499 registered voters;

(2) four for a precinct containing 500 - 999 registered voters; or

(3) five for a precinct containing 1,000 or more registered voters.

Page 4, line 24:

After "in" delete "four" and insert "two [FOUR]".

Page 5, after line 28:

Add the following new sections and renumber the existing sections:

* Sec. 16. AS 15.13.100 is amended to read:

Sec. 15.13.100. CONTRIBUTIONS, EXPENDITURES BEFORE FILING. Political [NO POLITICAL] campaign contributions or

expenditures, or obligations for those expenditures, may be received or accepted and [EXPENDITURE MAY BE] made or incurred by a person in an election or by a person or group with his knowledge and on his behalf before the date upon which he or she files for nomination for the office which the person seeks. However, these contributions or [, EXCEPT FOR PERSONAL TRAVEL EXPENSES OR FOR OPINION SURVEYS OR POLLS. THESE] expenditures [SHALL BE CHARGED AGAINST THE SPENDING LIMITATION THAT APPLIES TO THE OFFICE FOR WHICH HE SUBSEQUENTLY FILES, AND] shall be included in the first report required under this chapter [AFTER FILING FOR OFFICE].

* Sec. 17. AS 15.13.110(a)(4) is amended to read:

(4) December 31 [OF EACH YEAR] for expenditures made and contributions received after the report required in (3) of this section and in a non-election year those expenditures made and contributions received which ~~which~~ were not reported that year.

Page 6, line 22 to page 7, line 8:

Delete all of sec. 18 and insert the following new material in its place:

* Sec. 18. AS 15.20.140 is repealed and re-enacted to read:

Sec. 15.20.140. MARKING ABSENTEE BALLOT. Upon receipt of an absentee ballot, the voter, whether in or outside the state, in the presence of an attesting witness, who is at least 18 years of age, may proceed to mark the ballot in secret, to place the ballot in the small blank envelope, to place the small envelope in the larger envelope,

d to sign the voter's certificate on the back of the larger envelope in the presence of the witness who shall sign as an attesting witness.

* Sec. 19. AS 15.20.150 is repealed and re-enacted to read:

Sec. 15.20.150. RETURN OF ABSENTEE BALLOT. (a) Upon marking an absentee ballot as provided in sec. 140 of this chapter, a voter may

(1) return the ballot properly enclosed in the envelopes, in person or by personal representative, to the election official who provided the ballot no later than 8:00 p.m. on the day of the election; or

(2) return the ballot properly enclosed in the envelopes by the most expeditious mail service available, postmarked not later than the day of the election, to the election supervisor in the voter's district.

passed

(b) If the ballot cannot be delivered to the election official who provided the ballot by 8:00 p.m. on the day of the election due to events beyond the control of the voter or the personal representative, or cannot be postmarked on or before the day of the election due to the absence of a post office, an affidavit signed and dated by the attesting witness described in sec. 140 of this chapter verifying that the ballot was voted on or before the date of the election is sufficient. An absentee ballot not actually delivered to the election official who provided the ballot or the election supervisor in the voter's district by 4:00 p.m. of the eighth day following the election will not be counted.

Page 21, line 2 to page 22, line 16:

Delete all of sec. 020 and add the following in its place:

Sec. 39.50.020. REPORT OF FINANCIAL AND BUSINESS INTERESTS. (a) A judicial officer, commissioner, chairman or member of a state commission or board specified in sec. 200(9) of this chapter, person hired or appointed as head or deputy head of, or director of a division within, a department in the executive branch, person appointed as assistant to the governor, and a municipal officer, shall file a statement giving his income sources and business interests, under oath and on penalty of perjury, within 30 days after he takes office as a public official. Candidates for state elective office shall file such a statement within 15 days after [AT THE TIME OF] filing a declaration of candidacy or within 15 [30] days of the filing of any nominating petition, or within 15 [30] days of becoming a candidate by any other means, except that if the candidate has a current statement on file with the commission this requirement does not apply. Candidates for elective municipal office shall file such a statement within seven days after [AT THE TIME OF] filing a nominating petition, declaration of candidacy, or other required filing for the elective municipal office, except that if the candidate has a current statement on file with the municipality this requirement does not apply. Refusal or failure to file within the time prescribed shall require that the candidate's filing fees, if any, and filing for office be refused or that his previously accepted filing

fee be returned and his name removed from the filing records. A statement shall also be filed by public officials no later than April 15 [OR 15 DAYS AFTER THE PERSON FILES HIS FEDERAL INCOME TAX RETURN] in each following year [, WHICHEVER SHALL COME [FIRST]. PERSONS WHO, ON OR AFTER DECEMBER 11, 1974, WERE MEMBERS OF BOARDS OR COMMISSIONS NOT NAMED IN SEC. 200(9) OF THIS CHAPTER ARE NOT REQUIRED TO FILE FINANCIAL STATEMENTS].

(b) The governor, lieutenant governor, members of the legislature, [AND CANDIDATES FOR THESE OFFICES,] judicial officers, each commissioner, head or deputy head of, or director of a division within, a department in the executive branch, assistant to the governor or chairman or member of a commission or board required to report under this chapter, shall file the statement with the Alaska Public Offices Commission. Municipal officers, and candidates for elective municipal office, shall file with the municipal clerk or other municipal official designated to receive their filing for office. All statements required to be filed under this chapter are public records.

(c) Candidates for state elective office may submit the statement to the lieutenant governor for filing with the commission. A statement is filed or submitted as required by this subsection by actual physical delivery no later than 5:00 p.m. on the day specified in (a) of this section, or by actual physical delivery by registered mail which is postmarked no later than the day specified in (a) of this section and received not more than 15 days after that time.

02-001B

STATE
of ALASKA

MEMORANDUM

OFFICE OF THE LIEUTENANT GOVERNOR

TO: Senator Joe Orsini
Chairman
Community and Regional Affairs
Committee

DATE : May 4, 1977

FROM: Lowell Thomas, Jr. L.T.
Lieutenant Governor

SUBJECT: Amendments to SCS CSHB 188
(Rules)

The attached amendments with comments should resolve differences between the Senate Community and Regional Affairs Committee version and Senate Rules Committee (offered 4/21/77) version of SCS CSHB 188.

Amendment to page 4 lines 6-12 of Senate Rules version (4/21/77) to read:

(b) The lieutenant governor shall appoint additional registration officials upon the request of a major political party. The number of appointments made under this subsection shall be

(1) three for a precinct containing 250 - 499 registered voters;

(2) four for a precinct containing 500 - 999 registered voters; or

(3) five for a precinct containing 1,000 or more registered voters.

Explanation:

This proposed language provides for appointment of additional registration officials for precincts. It also provides that the number of officials be related to the number of registered voters. This language is similar to Rules version but allows for smaller number of officials for small precincts.

Amendment to page 4 line 23 of Senate Rules version (4/21/77) to read:

(b) When a registered voter has not voted in either a primary, special or general election at least once in two (FOUR) consecutive calendar years, the voter shall be advised by mail sent to his last known address that his registration will be cancelled unless he indicates within 90 days on forms furnished by the lieutenant governor his desire to remain registered.

Explanation:

This section changes the length of time from four to two years for retaining a voter on the master voter list if he has not voted. If a person does not vote once every two years, elections personnel notifies him/her of their intent to remove his/her name from the list of registered voters. If the notification is not returned by the voter within 90 days, his/her voter registration is cancelled. This procedure works well as voters do respond to the notification they receive. This would also assist in keeping voter lists up to date.

Amendment to page 5 line 28 of Senate Rules version (4/21/77).

AS 15.13.100 is amended to read:

Sec. 15.13.100. CONTRIBUTIONS, EXPENDITURES BEFORE FILING. Political (NO POLITICAL) campaign contributions or expenditures, or obiligations for those expenditures, may be received or accepted and (EXPENDITURE MAY BE) made or incurred by a person in an election or by a person or group with his knowledge and on his behalf before the date upon which he or she files for nomination for the office which the person seeks. However, these contributions or (, EXCEPT FOR PERSONAL TRAVEL EXPENSES OR FOR OPINION SURVEYS OR POLLS. THESE) expenditures (SHALL BE CHARGED AGAINST THE SPENDING LIMITATION THAT APPLIES TO THE OFFICE FOR WHICH HE SUBSEQUENTLY FILES, AND) shall be included in the first report required under this chapter (AFTER FILING FOR OFFICE).

AS 15.13.110(a)(4) is amended to read:

(4) December 31 (OF EACH YEAR) for expenditures made and contributions received after the report required in (3) of this section and in a non-election year those expenditures made and contributions received which were not reported that year.

Explanation:

This will be provided by Senator Orsini. These amendments offered at his request.

Amendment to page 6 line 22 of Senate Rules version (4/21/77).

AS 15.20.140 & 150 are repealed and re-enacted to read:

Sec. 15.20.140. MARKING ABSENTEE BALLOT. Upon receipt of an absentee ballot, the voter, whether in or outside the state, in the presence of an attesting witness, who is at least 18 years of age, may proceed to mark the ballot in secret, to place the ballot in the small blank envelope, to place the small envelope in the larger envelope, and to sign the voter's certificate on the back of the larger envelope in the presence of the witness who shall sign as an attesting witness.

Sec. 15.20.150. RETURN OF ABSENTEE BALLOT. (a) Upon marking an absentee ballot as provided in sec. 140 of this chapter, a voter may

(1) return the ballot properly enclosed in the envelopes, in person or by personal representative, to the election official who provided the ballot no later than 8:00 PM on the day of the election; or

(2) return the ballot properly enclosed in the envelopes by the most expeditious mail service available, postmarked not later than the day of the election, to the election supervisor in the voter's district.

(b) If the ballot cannot be delivered to the election official who provided the ballot by 8:00 PM on the day of the election due to events beyond the control of the voter or the personal representative, or cannot be postmarked on or before the day of the election due to the absence of a post office, an affidavit signed and dated by the attesting witness described in sec. 140 of this chapter verifying that the ballot was voted on or before the date of the election is sufficient. An absentee ballot not actually delivered to the election official who provided the ballot or the election supervisor in the voter's district by 4:00 PM of the eighth day following the election will not be counted.

Explanation:

The purpose in rewriting secs. 15.20.140 and 150 in SB 207 was to correct a technical flaw under current law. That problem, as identified be the Department of Law, occurs when a voter gets an absentee ballot by mail or personal representative. It appears that the voter is not allowed to return the ballot in person.

In our view there is no reason to prevent the voter from returning an absentee ballot in person. Therefore, the sections have been rewritten to differentiate between marking the absentee ballot and returning it. Also this amendment reflects the changes made by Chapter 16, SLA 1977 to 15.20.150.

Attached amendment to page 21 line 1 of Senate Rules version of SCS CSHB 188.

Explanation:

CRA subsection (a) contains basically the same language as Rules version with regard to extra time for filing statements. The deletions in the last two sentences are offered by APOC in HB 400.

CRA subsection (b) is changed to make clear that candidates for state office have option of submitting Conflict of Interest statements to lieutenant governor for filing with APOC. This will clarify in the law what has been past practice.

Sec. 39.50.020. REPORT OF FINANCIAL AND BUSINESS INTERESTS. (a) A judicial officer, commissioner, chairman or member of a state commission or board specified in sec. 200(9) of this chapter, person hired or appointed as head or deputy head of, or director of a division within, a department in the executive branch, person appointed as assistant to the governor, and a municipal officer, shall file a statement giving his income sources and business interests, under oath and on penalty of perjury, within 30 days after he takes office as a public official. Candidates for state elective office shall file such a statement within 15 days after [AT THE TIME OF] filing a declaration of candidacy or within 15 [30] days of the filing of any nominating petition, or within 15 [30] days of becoming a candidate by any other means, except that if the candidate has a current statement on file with the commission this requirement does not apply. Candidates for elective municipal office shall file such a statement within seven days after [AT THE TIME OF] filing a nominating petition, declaration of candidacy, or other required filing for the elective municipal office, except that if the candidate has a current statement on file with the municipality this requirement does not apply. Refusal or failure to file within the time prescribed shall require that the candidate's filing fees, if any, and filing for office be refused or that his previously accepted filing fee be returned and his name removed from the filing records. A statement shall also be filed by public officials no later

than April 15 [OR 15 DAYS AFTER THE PERSON FILES HIS FEDERAL INCOME TAX RETURN] in each following year [, WHICHEVER SHALL COME FIRST. PERSONS WHO, ON OR AFTER DECEMBER 11, 1974, WERE MEMBERS OF BOARDS OR COMMISSIONS NOT NAMED IN SEC. 200(9) OF THIS CHAPTER ARE NOT REQUIRED TO FILE FINANCIAL STATEMENTS].

(b) The governor, lieutenant governor, members of the legislature, [AND CANDIDATES FOR THESE OFFICES,] judicial officers, each commissioner, head or deputy head of, or director of a division within, a department in the executive branch, assistant to the governor or chairman or member of a commission or board required to report under this chapter, shall file the statement with the Alaska Public Offices Commission. Municipal officers, and candidates for elective municipal office, shall file with the municipal clerk or other municipal official designated to receive their filing for office. All statements required to be filed under this chapter are public records.

(c) Candidates for state elective office may submit the statement to the lieutenant governor for filing with the commission. A statement is filed or submitted as required by this subsection by actual physical delivery no later than 5:00 p.m. on the day specified in (a) of this section, or by actual physical delivery by registered mail which is postmarked no later than the day specified in (a) of this section and received not more than 15 days after that time.

02-001B

STATE
of ALASKA

MEMORANDUM

OFFICE OF THE LIEUTENANT GOVERNOR

TO: Senator Joe Orsini
Chairman
Community and Regional Affairs
Committee

DATE : May 4, 1977

FROM: Lowell Thomas, Jr. L.T.
Lieutenant Governor

SUBJECT: Registration on Election Day

Generally the concept of increasing voter participation is a noble one. As you are aware, the federal government is even considering legislation which would establish registration and voting on election day in the national election.

There are some practical problems with this idea, as noted below. I have also included several comments from the Director of Elections that are pertinent to this legislation.

(1) it will increase the cost of administering elections to both the state and municipalities and cause inconvenience to the voter as there will be no way to assure adequate numbers of ballots, voting facilities, and personnel at the polls on election day;

(2) it may result in voter confusion and may increase the opportunity and probability of fraud;

(3) it will delay the result of elections because of new and complicated questioned ballot procedures; a large number of questioned ballots could leave an election in doubt for many days;

(4) arguably, it is contrary to policy articulated in court decisions upholding durational residency requirements for the purposes of preparing and providing adequate and up-to-date voter registration lists for election purposes;

(5) it will be easy for persons to cast ballots in two states; when a person registers to vote in Alaska, a cancellation of previous registration is returned to the new registrant's former state of residence. No cancellation opportunity exists without preregistration;

(6) in a state with an exceedingly high mobility rate and large influx of new residents, it is questionable public policy to facilitate voting by persons who have no familiarity with Alaskan conditions and no intention of permanent residency within the state:

(7) before each general election, the lieutenant governor's office sends to each registered voter a pamphlet containing information on the candidates, election districts and the ballot issues. Under this bill, persons who registered to vote on election day would not have received this pamphlet at their residence address.

Comments by the Director of Elections:

(1) Alaska's voter registration system is a statewide on-going program. In only three or four other states is voter registration set up on a statewide basis (Kentucky and Delaware). Alaska's system with registrars in every precinct throughout the State provides easy access to voter registration. In addition, registration drives are conducted in supermarkets, fairs, high schools, etc. The system is an out-reach program in that the registrars go to where the people are. In many states prospective voters must go to a registrar's office located in the county seat.

(2) In 1976 82.9% of eligible persons were registered to vote and 64.1% of those registered voted in the 1976 general election. Based on these percentages, Alaska has one of the better records for people registering to vote and going to the polls to vote.

(3) The following additional expenses will occur as a result of registration on election day:

1. Additional people at the polls. One person per precinct - 450 precincts x 12 hours x $4.50 per hour = $24,300 for each election.

2. Printing of additional ballots and other supplies - $3,000.

3. Hiring of additional people to spot verify election day registrations - $3,000.

(4) If voter registration on election day should become a requirement of the proposed federal law an alternative is to tie the application of this concept in Alaska to the effective date of the federal law.

proposed language:

> Sections 1, 4, 5, 6, 7, 9, 10(d) of this Act take effect upon the effective date of a version of the Federal Universal Voter Registration Act of 1977, S 1072, or HR 5400, currently pending in 1st Session of the 95th United States Congress.

(5)

TO: MEMBERS OF AAMC LEGISLATIVE REPORT April 20, 1977

Compiled below are brief summaries of several bills now pending in the Legislature and, also, the AAMC's position worked out by the Clerks attending the Clerks Education program in Juneau, March 28-April 1. All members are encouraged and requested to read the various bills, review the AAMC's position, and write your own legislators of your & AAMC's position.

HOUSE BILL 24 - Compensation of Election Officers (referrals: House Finance)

Description - Increases pay of Judges from $4.50 to $5 and Canvass Board from $5 to $5.50

AAMC's Position - Oppose. Board members received a raise last year which increased our election costs as much as 25% for the boards, which is the largest cost in any election. Part of the reason they serve is a sense of civic duty and volunteer effort. They are not serving in this capacity to make a living wage at it - there aren't enough elections each year to do so. The idea behind payment is compensation for expenses like gas, transportation, babysitting, etc.

HOUSE BILL 131 (CSHB 131 Judiciary) - Freedom of Information (referral: Senate Judiciary - has passed House)

Description - provides State Policy for privacy and public information, makes certain exceptions of records to be open to inspection, provides procedure for requests for records, establishes enforcement procedures, covers mishandling of records and obstruction of access to records and lists definitions.

AAMC's Position - Oppose in its present form. Amend to include local option - that would satisfy us. 1. Bill is tailored for State records. Municipalities have different types of records from State and from each other. 2. Bill leaves determination of definitions of what's confidential and what isn't to the Clerk since she is the custodian of the records. Interpretation differs from Clerk to Clerk. 3. Definitions are vague - it would appear that complainants in perhaps a health violation would have to be disclosed. It is also unclear whether the complainants to the Ombudsman would have to be disclosed. Cost to small municipalities would increase. They do not have staff attorneys and would need to retain or at least check with an attorney fairly frequently for verification of their decision on confidentiality. Six municipalities have a public information ordinance adopted or in progress.

HOUSE BILL 188 (CSHB 188) - Voter Registration (referral: Senate Rules)

Description - increases number of registrars per precinct

AAMC's Position - Amend "shall appoint" to "may appoint" and raise precinct size criteria to 500 (this bill may have been amended to satisfy the Election Supervisor since 4/1)

HOUSE BILL 218 (CSHB 218) - Voter Registration (referral: House Judiciary)

Description - Amends Title 15 (State Election Code) to provide that a voter may register at the time of voting, changes provision that voter may vote in precinct in which he is registered to "election district", provides a voter may register before an election judge at any time throughout the year including election day, provides same procedure for re-registering, rewords procedure on manner questioned ballots may be counted and adds State special election to those elections which will determine purging.

AAMC's Position - Opposed. If it passes, voters could vote on election day and not by questioned ballot. If this is the idea, then do away with State registration entirely as Municipalities would have to institute their own systems for voter registration if this becomes law (and they were allowed by State law to do so.) State's position on this bill is that Legislature should wait and see what happens with the Federal registration bill - if that's passed, then there is little at the local (State) level that can be done.

HOUSE BILL 243 - Public Meetings (referral: House State Affairs)

Description - 2/3rds vote required for executive session, added reasons for executive session, covers chance or social meetings and what can and cannot be done; lists requirements for public notice of meetings, written records of all meetings; time period for suits to contest action of public body, etc.

HB
190

ADEC. DRAFT

SECTION 3; Delete after the end of the second sentence the phrase,

"and shall itself take such corrective action within ninety days."

This phrase has no meaning, since it is the obligation of the state to carry out the provisions of the federally approved State Implementation Plan as it applies within a local program jurisdiction. If a local program fails to carry out its responsibilities, then the department will automatically take whatever remedial actions are necessary to keep the plan from being disapproved and potential sanctions applied by the federal government.

The last sentence in Section 3 is inconsistent with the earlier stated intent to get any defined deficiencies corrected within 180 days. To correct this inconsistency we suggest the last sentence in Section 3 be modified as follows:

"The department shall, during the 180 days specified, work actively with the municipality or district furnishing financial, technical and manpower resources to assist in correcting any deficiencies identified through Section 220(b)."

SECTION 6: As written, approval of the State Implementation Plan by the federal Environmental Protection Agency would be jeopardized by allowing a local program to carry out the permitting function for large new emission sources, unless the state has some recourse to reviewing and enforcing those permits which are delegated. To remove this doubt, and to insure that a local permit program consistently meets the requirements of the federal Clean Air Act Amendments of 1977, we suggest that

1. After the words "if the municipality or district has established" add:

"and the department has approved," regulations and procedures...."

2. After the end of Section 6 add the following:

"Prior to the issuance of a permit for a source which would require the same issuance of a permit under 18 AAC 50 if a local program were not approved, the district or municipality shall forward its proposed permit together with all supporting documentation. If, within 30 days of receipt of the proposed permits and supporting material the department objects to the issuance of the permit on the ground that granting the permit is likely to result in a violation of ambient air or emission standards, the district or municipality may not issue the permit. The district or municipality may not issue a permit within the review period provided by this section."

"Nothing in this section, or in any approval of a district or municipal program may be construed as deminishing the department's authority with regard to any violation of any ambient air or emission standard established by the department by any source within a district or municipality with an approved program. A violation of an ambient air or emission standard established by the department by a source within a district or municipality with a program approved under this section remains a violation of this chapter notwithstanding department approval, and a violation of a permit issued by a district or municipality with an approved program shall be deemed a violation of a permit issued by the department for purposed of this chapter."

AMENDMENT # 3

OFFERED IN THE SENATE: BY: ORSINI

TO: _____ SENATE BILL No. CS HB 622 (Finance)

HOUSE BILL No. _____

PAGE: 1 LINE: 12 through 24 Delete

Add the following:

*Section 1. The sum of $9,700,000 is appropriated to the Department of Transportation and Public Facilities for the purpose of constructing a North/South runway at the Anchorage International Airport. The sources of this appropriation are as follows:

International Airport Revenue Fund	$ 700,000
Federal receipts	9,000,000

*Section 2. In the event that legal action precludes the use of Federal funds for the project then the sum of $5,000,000 is appropriated from the Alaska International Airports Revenue Fund to the Department of Transportation and Public Facilities for the purpose of continuing construction of the North-South runway at the Anchorage International Airport.

*Section 3. The allocation of funds under sec. 2 of this Act is subject to reimbursement to the Alaska International Airports Revenue Fund by the Department of Transportation and Public Facilities upon receipt of funds designated for this project from the Federal Aviation Administration.

*Section 4. The unexpended and unobligated portion of the appropriation made by sec. 2 of this Act lapses December 31, 1978 into the Alaska International Airports Revenue Fund.

*Section 5. This act takes effect immediately in accordance with AS 01.10.070(c).

IN THE HOUSE

BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

CS FOR HOUSE BILL NO. 190

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to municipal air control programs; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*Section 1. AS 46.03.220(a) is amended to read:

(a) If a municipality or district authorized to establish or participate in an air pollution control program under secs. 210(a) or (d) of this chapter fails to establish a program within the time specified, or if the department has reason to believe that an air pollution control program in force under that section is inadequate to prevent and control air pollution in the jurisdiction to which the program applies, or that the program is being administered in a manner inconsistent with the requirements of this chapter , the department shall, within 45 days after giving written [FOLLOWING 45 DAYS]

notice setting out its reasons, conduct a hearing on the matter.

*Section 2. AS 46.03.220(b) is repealed and reenacted to read:

(b) If, after the hearing, the department determines that any of the deficiencies enumerated in (a) of this section exist, it shall provide the municipality or district a written statement setting out the nature of the deficiencies and describing the necessary action to be taken. The determination of the department shall be provided to the municipality or district within 45 days of the hearing, and the municipality or district shall have a reasonable period of time to initiate corrective action. Once initiated, corrective action must be completed within 180 days.

*Section 3. AS 46.03.220(c) is amended to read:

(c) If the municipality or the district set up under sec. 210(a) or (d) of this chapter remedies the deficiencies described in the statement provided by the department under (b) of this section, the department shall immediately approve the program or partially approve such program to the extent such deficiencies have been remedied. If the municipality or the district fails to initiate [TAKE] the necessary corrective action within the time specified the department shall administer in the municipality or district all of the

regulatory provisions of this chapter and shall itself take such corrective action within ninety days. The department shall work directly with the municipality or district furnishing financial, technical, and manpower resources until such time the deficiencies described in the statement have been corrected and the department approves the pollution control program of such municipality or district." [THE DEPARTMENT'S AIR POLLUTION CONTROL PROGRAM SHALL THEN SUPERSEDE MUNICIPAL AIR POLLUTION ORDINANCES, REGULATIONS, AND REQUIREMENTS IN THE AFFECTED JURISDICTION.]

*Section 4. AS 46.03.220 is amended by adding new subsections to read:

(g) The provisions of (a) - (c) and (h) of this section are applicable to an application for program approval submitted by a municipality or district under section 210(a)(4) of this chapter.

(h) If action by the department is unlawfully withheld or unreasonably withheld under this section, the superior court may compel the department to initiate action.

*Section 5. The department shall review applications for approval of an air pollution control program submitted by a municipality or district and pending on the effective date of this Act. It shall, within 45 days of the receipt of application for approval, provide written notice to the

municipality or district of the deficiencies in the application submitted or grant approval to the program. The provisions of AS 46.03.220 as hereby amended, are applicable to review of applications submitted and subject to review by the department under this section.

*Section 6. AS 46.03.160 shall be amended by adding a new subsection (6) to read as follows:

(6) Notwithstanding other provisions of sections 140-170 of this chapter, no air contaminant source shall be required to obtain a permit to operate from both the department and a municipality or district established under section 210(a) if the municipality or district has established regulations equal to or more stringent than the department applicable to such air contaminant source, in which case such source shall be required to obtain a permit to operate from only the municipality or district.

*Section 7. This Act takes effect immediately in accordance with AS 01.10.070(c).

BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

CS FOR HOUSE BILL NO. 190

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: An Act relating to municipal air control programs; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*Section 1. AS 46.03.220(a) is amended to read:

(a) If a municipality or district authorized to establish or participate in an air pollution control program under secs. 210(a) or (d) of this chapter fails to establish a program within the time specified, or if the department has reason to believe that an air pollution control program in force under that section is inadequate to prevent and control air pollution in the jurisdiction to which the program applies, or that the program is being administered in a manner inconsistent with the requirements of this chapter , the department shall, within 45 days after giving written [FOLLOWING 45 DAYS]

notice setting out its reasons, conduct a hearing on the matter.

*Section 2. AS 46.03.220(b) is repealed and reenacted to read:

(b) If, after the hearing, the department determines that any of the deficiencies enumerated in (a) of this section exist, it shall provide the municipality or district a written statement setting out the nature of the deficiencies and describing the necessary action to be taken. The determination of the department shall be provided to the municipality or district within 45 days of the hearing, and the municipality or district shall have a reasonable period of time to initiate corrective action. Once initiated, corrective action must be completed within 180 days.

*Section 3. AS 46.03.220(c) is amended to read:

(c) If the municipality or the district set up under sec. 210(a) or (d) of this chapter remedies the deficiencies described in the statement provided by the department under (b) of this section, the department shall immediately approve the program or partially approve such program to the extent such deficiencies have been remedied. If the municipality or the district fails to initiate [TAKE] the necessary corrective action within the time specified the department shall administer in the municipality or district all of the

regulatory provisions of this chapter and shall itself take such corrective action within ninety days. The department shall work directly with the municipality or district furnishing financial, technical, and manpower resources until such time the deficiencies described in the statement have been corrected and the department approves the pollution control program of such municipality or district." [THE DEPARTMENT'S AIR POLLUTION CONTROL PROGRAM SHALL THEN SUPERSEDE MUNICIPAL AIR POLLUTION ORDINANCES, REGULATIONS, AND REQUIREMENTS IN THE AFFECTED JURISDICTION.]

*Section 4. AS 46.03.220 is amended by adding new subsections to read:

(g) The provisions of (a) - (c) and (h) of this section are applicable to an application for program approval submitted by a municipality or district under section 210(a)(4) of this chapter.

(h) If action by the department is unlawfully withheld or unreasonably withheld under this section, the superior court may compel the department to initiate action.

*Section 5. The department shall review applications for approval of an air pollution control program submitted by a municipality or district and pending on the effective date of this Act. It shall, within 45 days of the receipt of application for approval, provide written notice to the

municipality or district of the deficiencies in the application submitted or grant approval to the program. The provisions of AS 46.03.220 as hereby amended, are applicable to review of applications submitted and subject to review by the department under this section.

*Section 6. AS 46.03.160 shall be amended by adding a new subsection (6) to read as follows:

(6) Notwithstanding other provisions of sections 140-170 of this chapter, no air contaminant source shall be required to obtain a permit to operate from both the department and a municipality or district established under section 210(a) if the municipality or district has established regulations equal to or more stringent than the department applicable to such air contaminant source, in which case such source shall be required to obtain a permit to operate from only the municipality or district.

*Section 7. This Act takes effect immediately in accordance with AS 01.10.070(c).

CS FOR HOUSE BILL NO. 190

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to municipal air control programs; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*Section 1. AS 46.03.220(a) is amended to read:

(a) If a municipality or district authorized to establish or participate in an air pollution control program under secs. 210(a) or (d) of this chapter fails to establish a program within the time specified, or if the department has reason to believe that an air pollution control program in force under that section is inadequate to prevent and control air pollution in the jurisdiction to which the program applies, or that the program is being administered in a manner inconsistent with the requirements of this chapter, the department shall, within 45 days after giving written [FOLLOWING 45 DAYS]

notice setting out its reasons, conduct a hearing on the matter.

*Section 2. AS 46.03.220(b) is repealed and reenacted to read:

(b) If, after the hearing, the department determines that any of the deficiencies enumerated in (a) of this section exist, it shall provide the municipality or district a written statement setting out the nature of the deficiencies and describing the necessary action to be taken. The determination of the department shall be provided to the municipality or district within 45 days of the hearing, and the municipality or district shall have a reasonable period of time to initiate corrective action.

*Section 3. AS 46.03.220(c) is amended to read:

(c) If the municipality or the district set up under sec. 210(a) or (d) of this chapter remedies the deficiencies described in the statement provided by the department under subsection (b), the department shall immediately approve the program or partially approve such program to the extent such deficiencies have been remedied. If the municipality or the district fails to take the necessary corrective action within 180 days after receipt of the written statement referred to in subsection (b), [THE TIME SPECIFIED] the department shall administer in the municipality or district all of

the regulatory provisions of this chapter [and shall itself take such corrective action within ninety days.] The department shall work actively with the municipality or district furnishing financial, technical, and manpower resources until such time the deficiencies described in the statement have been corrected and the department approves the pollution control program of such municipality or district." [THE DEPARTMENT'S AIR POLLUTION CONTROL PROGRAM SHALL THEN SUPERSEDE MUNICIPAL AIR POLLUTION ORDINANCES, REGULATIONS, AND REQUIREMENTS IN THE AFFECTED JURISDICTION.]

Add strike thru Mueller language

*Section 4. AS 46.03.220 is amended by repealing subsection (f) and by adding new subsections to read:

(f) The provisions of (a)--(g) of this section are applicable to an application for program approval submitted by a municipality or district under section 210(a)(4) of this chapter.

(g) If action by the department is unlawfully withheld or unreasonably withheld under this section, the superior court may compel the department to initiate action.

*Section 5. The department shall review applications for approval of an air pollution control program submitted by a municipality or district after the effective date of this Act or pending on the effective date of this Act. It shall, within 45 days of the receipt of application for

approval, provide written notice to the municipality or district of the deficiencies in the application submitted or grant approval to the program. The provisions of AS 46.03.220 as hereby amended, are applicable to review of applications submitted and subject to review by the department under this section.

*Section 6. AS 46.03.160 shall be amended by adding a new subsection (i) to read as follows:

(i) Notwithstanding other provisions of sections 46.03.140--.230 of this chapter, no air contaminant source shall be required to obtain a permit to operate from both the department and a municipality or district having an approved air pollution control program under section 210(a) or (d) if the municipality or district has established and the Department has approved regulations equal to or more stringent than the department applicable to such air contaminant source, in which case such source shall be required to obtain a permit to operate from only the municipality or district.

*Section 7. This Act takes effect immediately in accordance with AS 01.10.070(c).

SENATE COMMUNITY AND REGIONAL
AFFAIRS COMMITTEE MEETING

March 28, 1978

Present: Senators Orsini, Ferguson, Willis and Hackney. Lynn Wegener, Department of Community and Regional Affairs; Oren Pomer[illegible]Department of Community and Regional Affairs; Tom Hanna[illegible]partment of Environmental Conservation; Jerry Re[illegible]nd, Department of Environmental Conservation.

Absent: Senator Sumner

SENATE BILL 430

The proposed draft for SB 430 was discussed in last week's committee meeting. Chairman Orsini stated the only difference in the proposed draft is that it puts a $150 million ceiling on the revenue bonds which is the same as the ceiling on the general obligation bonds. Chairman Orsini stated that the Committee was acting conservatively by putting a ceiling on revenue bonds. He explained that the reason was to see how the program works with respect to revenue bonds for which the state and municipalities had no prior experience. Senator Ferguson moved that the committee adopt the CS for SB 430. There was no objection. Senator Ferguson then moved that the committee move out SB 430 with a DO PASS recommendation. There was no objection.

SENATE BILL 426

Lynn Wegener, Administrative Director for the Department of Community and Regional Affairs, explained the necessity of the bill. He stated that the bill takes funds from the FY 78 senior citizens renters program and puts it to cover short-falls in the senior citizens property tax exemption program, the senior citizens special assessment program and the National Forest receipts. At that time, the committee questioned whether the action by the Department in seeking an appropriation adjustment was the proper procedure and asked instead if a Revised Program request would not have been more appropriate. Mr. Wegener replied that his department had been advised by the Office of Budget and Management to seek the transfer of funds to the senior citizens tax exemption program by means of an appropriation adjustment. It was also brought out in testimony that the transfer of $25,000 to the agricultural land exemption account was no longer necessary and that Section 4 of the bill should therefore be deleted. This action would accordingly reduce the general fund figure in Section 7 from $42,661,500 to $42,636,500. Senator Ferguson moved that the committee pass the bill out with a NO RECOMMENDATION. Chairman Orsini suggested the committee send a letter to the Judiciary committee advising them of the facts brought out by the testimony and suggest the amendments to the language of the bill. There was no objection.

CS for HOUSE BILL 190

Chairman Orsini stated that the intent was to have a discussion on the

bill before the committee passed it out because of the confusing developments regarding this bill.

Jerry Reinwand, Deputy Commissioner of the Department of Environmental Conservation and Tom Hanna, also from the Department of Environmental Conservation, presented testimony. Mr. Reinwand commented on some potential problems that may be caused by the bill. He noted that the basic reason behind the bill was that Cook Inlet Air Resource Management District wanted to get rid of overlapping programs and duplication of authority. The CIARMD would like to have the authority to issue prevention of significant deterioration permits instead of the state issuing them. Mr. Reinwant stated that there probably would not be any problem authorizing the permit program to be transferred to them. He also stated that the reason it had not been done to date was because the Department had not received an application from the CIARMD requesting this. Mr. Reinwand stated that the Department did have some drawbacks about doing this. He stated that if the CIARMD was to issue a permit that would violate the state's regulations, EPA could impose sanctions taking away all planning money and cutting off program grant money. He explained that the state has an interest to make sure that in a situation such as this there should be some kind of state oversight responsibility. The Department had submitted some rough draft amendments for the bill to provide for state oversight.

Chairman Orsini asked if Mr. Reinwand would review the bill and get his comments back to the committee by Monday, April 3, 1978. Chairman Orsini suggested that the committee would have those comments incorporated into a draft bill before another committee hearing. He also said that a letter be sent to Cook Inlet Board explaining to them that under existing law they may be able to apply for the authority to issue permits and encouraging them to pursue this possibility.

The meeting was adjourned at 3:30 p.m.

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MINUTES

May 11, 1978

Present: Senators Orsini, Willis and Hackney; Ronald Kuczek, Cook Inlet Air Resources Management District; Dale P. Tubbs, Kodiak Island Borough; Bob Hartig, Kodiak Island Borough; Ron Swanson, Department of Natural Resources; Mike Smith, Department of Natural Resources; Tom Hanna, Department of Environmental Conservation; Jerry Reinwand, Department of Environmental Conservation.

Absent: Senators Ferguson and Sumner

The meeting was called to order at 3:05 with CSHB 133 and CSHB 190 before the Committee.

SCS FOR CS FOR HOUSE BILL 133 (KODIAK)

Chairman Orsini summarized the land situation in Kodiak. He stated that Kodiak contends the State was negligent in transferring land to the Borough, which the Borough had received as tentatively approved land. When ANCSA was enacted, the State allowed the transfer of the tentatively approved borough land to Native corporations as part of the settlement. These lands were of prime quality and the Borough states that no other comparable lands are now available to the Borough in exchange for those it lost under ANCSA.

Bob Hartig, Representing the Kodiak Island Borough, stressed that Kodiak's concern did not center around the amount of its land entitlement, since there was sufficient acreage available, but around its quality. Kodiak would be willing to take these lands of lesser quality if it could be compensated monetarily for the prime lands the State took from it. Otherwise the Kodiak Borough would be forced to exercise its fiduciary responsibility and file suit in court challenging the State's action and ultimately calling into question not only the present municipal land selection bill but also ANCSA.

Mr. Hartig and Dale Tubbs, Kodiak Island Borough, went over maps of Kodiak island and outer islands and explained to the Committee members what lands were selected, which were top-filed and where were involved in court suits involving village selections under ANCSA.

Mr. Hartig stated that Kodiak is confident that it can obtain at least 10,000 additional acres and possibly as much as 20,000. He summed up Kodiak's land possibly land entitlement break-down as follows: 4,000 acres already in hand; 18.000 acres tied up in village selection litigation; 32,000 acres that could be selected from state-owned lands; and possibly 15,000 acres currently under Coast Guard ownership. This would bring Kodiak's maximum selection possibility to 76,000 acres.

Mr. Hartig stated that he could not over-emphasize the importance of financial compensation for the land taken by the State since it would eliminate the need to initiate litigation between Natives and non-Natives on Kodiak. He also stated that, without the provision of payment in lieu of land, Kodiak would see no need for the land selection bill.

Mike Smith, Division of Lands, Department of Natural Resources, replied that the State had no control over the enactment of ANCSA and noted that without ANCSA there would actually be 26,000 fewer acres available to Kodiak for selection. Yet Kodiak is requesting, in effect compensation for 26,000 acres when there was no guarantee that Kodiak would have received these acres if there had been no ANCSA. Mr. Smith stressed that the Governor will only agree to a maximum payment of $20 million under HB 133, and that there still remains one community in Alaska where there is not enough land, physically, to meet its municipal entitlement.

Chairman Orsini stated that the Committee would look at the bill again Tuesday on the Southeastern situation.

CS FOR HOUSE BILL 190

Jerry Reinwand, Department of Environmental Conservation, stated that the bill does two things: it gives the districts a method for seeking approval with definite time restraints and if the Department rejects it the Department would give them the reasons why the program was rejected and the districts could make the adjustments to meet the approval of the State. He stated that the Department does not have any problem with delegating authority or approving the Cook Inlet Air Resources District program but has never received an application to do this He stated that he would be very happy to have the CIARMD run the permanent program up in the Cook Inlet area. But he stressed that he did want to make sure that the CIARMD not give away more than 50% of the air quality increment than it already has to so to allow for additional growth to take place in the Kenai area. He wanted to make sure that in issuing industry permits that the CIARMD apply tougher standards so that the 50% air quality increment could be reserved for future industrial use.

Mr. Reinwand stated that he does not see any need for the bill personally but if it is the desire of the Committee the Department would not oppose it as long as the amendments that are suggested in the letter that Commissioner Mueller sent on April 15 are incorporated.

Ronald Kuczek, Cook Inlet Air Resources Management District, stated that the district hadn't applied because it has repeatedly tried to find out what we needed in seeking approval to run its resources control program and the information that was returned to the CIARMD was never satisfactory. He also stated that the Department said on an informal basis that approval probably would not be granted because of certain programs that the district had not implemented, but neither which the state intended to carry out.

Mr. Reinwand agreed that in the past CIARMD probably had been discouraged for approval but now the Department would accept an application.

The Committee took up a proposed draft committee substitute for HB 190 which had been prepared by the CIARMD and reviewed by DEC Commissioner

Ernst Mueller in a letter to the Committee dated April 13, 1978. The proposed committee substitute was discussed in detail with Mr. Kuszek and the DEC representatives, and final language was agreed to by the DEC and the CIARMD.

Chairman Orsini stated that the bill would be drafted with the revised amendments as agreed by both the Department and CIARMD and it would then be brought back to the Committee for signature and passed out.

The meeting was adjourned at 5:20 p.m.

Dear Commissioner Mueller:

Mr. John Davis, the Chairman of the Cook Inlet Air Resource Management District (CIARMD), has presented to the Senate Community and Regional Affairs Committee a revision of CSHB 190 ("An Act relating to municipal air pollution control programs") for consideration by the Committee. A copy of this proposal is attached for your review.

This Committee has taken no position on the CIARMD's proposal at this time. It would, however, be highly useful for the Committee to receive your assessment of the CIARMD draft. I would also appreciate your assessment of the possible impact of recently enacted federal clean air regulations on state statutes incorporating these proposals as well as how the revision of existing state law in this area could affect your Department's air pollution programs.

Sincerely,

Joe Orsini

JUNEAU, ALASKA

Memorandum

TO: Representative Hugh Malone
Speaker of the House

DATE: March 8, 1978

RE: CSHB 190

FROM: Joe Orsini JO

Regarding your inquiry of March 7 on CSHB 190, committee letters were sent out February 24 to the Commissioner of Environmental Conservation and to the Kenai Peninsula Borough, the Municipality of Anchorage, the Matanuska-Susitna Borough and the Fairbanks North Star Borough for their assessment of the revision of CSHB 190 proposed by Mr. John Davis of the Cook Inlet Air Resource Management District. Since no comments have yet been received, no date has been scheduled for a committee hearing at this time.

Similarly, for HB 214 (SB 179), municipal officers from Fairbanks and Anchorage have commented verbally on the proposed legislation and have indicated that they would provide statements in writing. We have not yet received their statements, or statements from any other municipality on the issue.

I would appreciate, however, any background material you could supply me from your own files regarding HB 214 which could be used for the Committee's information.

COOK INLET AIR RESOURCES MANAGEMENT DISTRICT

825 L Street - Fourth Floor - Anchorage, Alaska 99501

Clean Air — Healthful Living

April 12, 1977 File No.: 5-1-1

The Honorable Hugh S. Malone
State of Alaska Legislature
House of Representatives
Pouch V
Juneau, Alaska 99801

APR 18 1977

Dear Mr. Malone:

The Cook Inlet Air Resources Management District thanks you for the introduction of HB 190. However, we find one provision of Section 5 of the modified bill to present a serious problem to local agencies. This provision concerns itself with the time an application must be submitted to the Alaska Department of Environmental Conservation. In its present form the bill would require the Cook Inlet District to prepare an application to Alaska Department of Environmental Conservation without knowing what is required. It would require us to hastily prepare the application and then wait for the State's reply and re-do the application at an additional expenditure of time, manpower, and money.

To prevent this needless duplication of effort, the CIARMD would like the following change made in the bill:

Change the 4th line of Sec. 5 to read as follows:

"date of application under the provisions of this Act, provide written notice to the Municipality or district of"

The insertion of these words will allow local agencies ample time to prepare complete correct and meaningful applications to the State of Alaska Department of Environmental Conservation once guidelines have been promulgated concerning the requirements for applications. Additionally, this change will address any future application for approval for any other local air pollution control program or portion of a program.

Sincerely,

John C. Davis
Chairman

April 3, 1978

John C. Davis
Chairman
Cook Inlet Air Resources
Management District
821 L Street
Anchorage, Alaska 99501

Dear Mr. Davis:

The Senate Community and Regional Affairs Committee has discussed at some length with Commissioner of Environmental Conservation Ernst Mueller and his Deputy Jerry Reinwand the provisions of the proposed committee substitute you have submitted for House Bill 190.

The Department of Environmental Conservation has informed us that it supports in principle the concept of delegating state air pollution control responsibilities to local bodies. It has noted, however, that the State itself is legally responsible to the federal government for meeting many of the provisions of the Federal Clean Air Act and numerous EPA regulations. An inadvertent action by a local air control body could jeopardize a number of federally funded programs throughout the State of Alaska.

Mr. Reinwand did point out that under current state statutes the Department of Environmental Conservation may delegate most, if not all, the responsibilities which the Cook Inlet Air Management District is seeking under CSHB 190. We would encourage you to pursue this possibility with the Department.

In the meantime, the Committee has asked the Department to submit in writing its proposed amendments to CSHB 190. We expect to receive them this week and will contact you regarding your comments to them.

Sincerely,

Joe Orsini

STATE OF ALASKA

DEPT. OF ENVIRONMENTAL CONSERVATION

JAY S. HAMMOND, GOVERNOR

POUCH O — JUNEAU 99811

April 13, 1978

The Honorable Joe Orsini
Chairman
Community & Regional Affairs Committee
Alaska State Senate
Pouch V
Juneau, Alaska 99801

Dear Chairman Orsini:

In response to your request for the Department's review of Committee Substitute for House Bill 190, we would like to present an initial overview of what we feel this bill will accomplish over existing statutes and then present our specific comments and recommendations.

AS 46.03.210 allows municipalities to establish and administer local air pollution control programs, provided that certain specified conditions are met. One of these conditions requires approval by the Department. AS 46.03.220 specifies the conditions under which any review of a local program would be conducted.

By comparison, CSHB 190 does not change any of the conditions for approval under AS 46.03.210 but primarily modifies the conditions under which any review will take place. In particular, it lengthens the amount of time allowed for any local program deficiencies to be corrected, provides for partial program approval and specifically requires the Department to review any applications for approval. The bill also proposes modifying AS 46.03.160 to provide for a single local permitting authority for large emission sources.

The Department has no basic disagreement with the intent of the bill and would find it acceptable provided that the changes presented in this letter are included. We would like to point out, however, that many of the things explicitly stated in the bill can be accomplished under existing statute. Thus far the Department has not received an application for approval from either local program, even though AS 46.03.210 requires this as a condition for fully acceptable programs. According to the Attorney General's office, there is nothing in the existing statutes which precludes a local program from submitting a local application today, and if received we would be obligated to review its acceptability under the criteria of AS 46.03.210(a).

The Department has already agreed with the Cook Inlet Air Resources Management District that overlapping and duplicative permitting of air contaminant sources is not desirable. We have also indicated to the Cook Inlet Commission that local programs should be the logical place to carry out this control function as long as they have the appropriate regulations, the resources and show they have the capability of handling this function. These conditions are also the requirements of AS 46.03.210 for an approvable local program. In effect, we have already agreed to and intend to carry out the intent of Section 6 of CSHB 190 even if the bill does not pass.

If the bill is further considered for passage, there are several changes we would like to request to clarify its meaning and also to insure that reasonable economic growth will not jeopardize our ability to meet the requirements in the Clean Air Act Amendments of 1977. We suggest the following changes:

SECTION 3: Delete after the end of the second sentence the phrase,

"and shall itself take such corrective action within ninety days."

This phrase has no meaning, since it is the obligation of the State to carry out the provisions of the federally approved State Implementation Plan. If a local program fails to carry out its responsibilities, then the Department will automatically take whatever remedial actions are necessary to keep the plan from being disapproved and potential sanctions applied by the federal government.

The last sentence in Section 3 is inconsistent with the earlier stated intent to get any defined deficiencies corrected within 180 days. To correct this inconsistency we suggest the last sentence in Section 3 be modified as follows:

> "The Department shall, during the 180 days specified, work actively with the municipality or district furnishing financial, technical and manpower resources to assist in correcting any deficiencies identified through Section 220(b)."

SECTION 6: The Department is intending to reduce the number of Alaska air contaminant sources presently requiring permits by about 50 percent (or elimination of about 100 permits). This will allow the Department to concentrate on the new sources which will have to comply with the substantial requirements of the "Prevention of Significant Deterioration" requirements of the Clean Air Act Amendments of 1977.

As Section 6 is presently written, approval of the State Implementation Plan may be jeopardized by allowing a local program to carry out the permitting function for large new emission sources, unless the State has some recourse to reviewing and enforcing those permits which are delegated. To remove this doubt, and to insure that a local permit program consistently meets the requirements of the federal Clean Air Act Amendments of 1977, we suggest that:

1. After the words "if the municipality or district has established" add:

   "and the Department has approved," regulations and procedures...."

2. After the end of Section 6 add the following:

   "Prior to the issuance of a permit for a source which would require the same issuance of a permit under 18 AAC 50 if a local program were not approved, the district or municipality shall forward its proposed permit together with all supporting documentation. If, within 30 days of receipt of the proposed permits and supporting material the department objects to the issuance of the permit on the ground that granting the permit is likely to result in a violation of ambient air or emission standards, the district or municipality may not issue the permit. The district or municipality may not issue a permit within the review period provided by this section."

   "Nothing in this section, or in any approval of a district or municipal program may be construed as diminishing the Department's authority with regard to any violation of any ambient air or emission standard, established by the department, by any source within a district or municipality with an approved program. A violation of an ambient air or emission standard, established by the department, by a source within a district or municipality with a program approved under this section remains a violation of this chapter notwithstanding department approval, and a violation of a permit issued by a district or municipality with an approved program shall be deemed a violation of a permit issued by the department for purposes of this chapter."

Sincerely yours,

Ernst W. Mueller
Commissioner

PROCEEDINGS AND DEBATES OF THE 95th CONGRESS, SECOND SESSION

Vol. 124 WASHINGTON, THURSDAY, FEBRUARY 2, 1978 No. 11

Senate

PREVENTION OF SIGNIFICANT DETERIORATION

Mr. GRAVEL. Mr. President, last year this body approved comprehensive amendments to the Clean Air Act. One of the most difficult issues addressed in the amendments was prevention of significant deterioration (PSD) of pristine air. PSD has an interesting history. A recent case study of this issue has been written and I believe it is an important contribution to the literature in the air pollution control field. The study was conducted by Jerry Reinwand, Deputy Commissioner of the Alaska Department of Environmental Conservation. Mr. Reinwand has a long-standing interest in air pollution control matters and years of experience in implementing pollution control programs. He served as a policy advisor to me during Clean Air Act mark-ups which were conducted by the Committee on Environment and Public Works in 1976 and 1977. In addition, he served as the chief policy advisor to Alaska Gov. Jay S. Hammond on Clean Air Act matters. Mr. Reinwand also served as chairman of the staff advisory task force of the National Governors' Association, which provided policy analyses and recommendations to 15 Governors who served on NGA's Subcommittee on Clean Air Management.

I ask unanimous consent that this important case study be printed in the RECORD so that my colleagues—and other interested parties—may review it. I think the conclusions of the study are particularly significant and I direct your attention to them.

There being no objection, the case study was ordered to be printed in the RECORD, as follows:

THE SHAPING OF NATIONAL POLICY ON PREVENTION OF SIGNIFICANT DETERIORATION

(By Jerry Reinwand)

INTRODUCTION

The Clean Air Act Amendments of 1970[1] (CAA) were passed when the environmental movement was at its crest. Environmental protection was at the forefront of the Congressional legislative agenda and on center stage in the public limelight. A relatively strong economy, the looming "wind-down" of the Vietnam war and deep public concern with environmental problems created a favorable legislative climate for the passage of tough environment-related legislation.[2] The CAA was undoubtedly one of the strongest environmental laws ever passed by Congress. At the time of its passage, Senator John Sherman Cooper, a ranking member of the Committee which had written the bill, stated that the legislation "may have a larger impact upon the social and economic life and health of this nation than any bill I have observed during my service in the Senate."[3]

In the CAA, Congress dramatically changed its past policy stance in regard to Federal-State relations. Senator Edmund S. Muskie, a driving force behind this nation's air quality laws, noted that previously-passed air pollution control legislation established a State-Federal partnership in which "protection of the public health and welfare" was the responsibility of state and local government, "with the Federal responsibility being exercised where there is transportation in interstate commerce."[4]

The CAA changed that long-standing concept by vesting far-reaching power with the U.S. Environmental Protection Agency (EPA), which was responsible for administering the law.[5] In fact, the State-Federal relationship was so substantially altered by the CAA, that one commentator noted the carry-over language from previous clean air laws, which stated that air pollution control "is the primary responsibility of state and local governments" had been rendered obsolete, making it simply a "vestigial remainder . . . and is now an anomaly vis-a-vis the nearly total Federal supervisory and approval authority contained in the Act as amended through 1970."[6]

However, this dramatic policy shift by Congress did not alleviate programmatic and policy problems. Bitter and lengthy disputes erupted between the states and EPA as implementation of the new law moved forward.

One of the most important and protracted policy battles arose over the issue of molding programs to protect the nation's pristine air. The focal point of the controversy was whether EPA had the authority under the CAA to require states to implement a program which had as its goal "prevention of significant deterioration" (PSD) of unpolluted air. The controversy was marked by years of administrative and legal struggles. The battle began with EPA's sudden abandonment of previously held administration policy on PSD. This policy shift triggered a round of successful lawsuits by the Sierra Club. Even after the Supreme Court had decided that the CAA mandated a national PSD policy, litigation continued over the substantive requirements of the regulations which EPA promulgated to carry out the courts' mandate. Eventually 23 states[7] joined in the litigation, as well as industry, which had at the forefront of its legal efforts petroleum

Footnotes at end of article.

and electric utility interests.[8] The continuing litigation turned EPA's prevention of significant deterioration regulations into a legal minefield, and caused most states to shun administration of the program.[9] The reluctance of the states to assume administration of the PSD program, and the uncertainty that accompanied the perpetual Sierra Club-EPA litigation, ultimately led to a rising clamor for Congress to be the final forum for establishing national plicy on the issue. After several years of study, debate and intense lobbying by industry groups and environmentalists alike, Congress—with the passage of the Clean Air Act Amendments of 1977 [10]—established national policy on PSD.

This note traces the origins of the concept of prevention of significant deterioration and the divergent policy decisions which were made by two executive branch agencies which ultimately led to the lengthy court battle. It also discusses the role the courts played in shaping PSD policy. Finally, this note discusses how the protracted litigation, and the virtual standstill in program implementation that accompanied the lawsuits, caused pressure to be placed on Congress to be the final policy arbiter of this important issue.

HISTORY OF THE CLEAN AIR ACTS

The nation's first national air polution control legislation was passed in 1955.[11] The prime thrust of the law was authorization of Federal research and technical assistance to the cities and states. Federal authority was broadened under the 1963 Clean Air Act [12] by a provision which created a Federal enforcement program for abatement of air pollution. In addition, funding was provided for additional research and technical assistance to state and municipal governments. In the 1955 Clean Air Act,[13] controls on vehicle-related pollutants were enacted. The Air quality Act of 1967 [14] consolidated existing air pollution control legislation and "provided a system for the establishment of air quality standards within air quality regions.[15] Although some progress in combating air pollution was made, most commentators agree that the 1955, 1963, 1965 and 1967 statutes were largely ineffective in solving the nation's growing air quality problems.[16] As a result of the shortcoming of the laws, and increasing Congressional frustration with the lack of progress by the states in controlling air pollution, the nation's lawmakers passed the Clean Air Act Amendments of 1970.

THE 1970 CLEAN AIR ACT: CONGRESS GETS TOUGH

In the CAA, Congress kept intact the basic purposes provision [17] which was contained in preceding legislation. This decision would play a key role in the PSD litigation. However, the remainder of the new law differed markedly from prior air pollution control laws. The CAA required EPA to establish national primary and secondary standards for the pollutants sulfur dioxide, total suspended particulate matter, carbon monoxide, photochemical oxidants, nitrogen dioxide and hydrocarbons. This requirement has been hailed as one of the key policy innovations of the CAA,[18] but this view is not universally held.[19]

The primary ambient standards establish a nationwide ceiling for pollutants and are health-related standards, designed to provide "an adequate margin of safety" [20] to protect the most susceptible groups in the nation's population—those suffering from respiratory ailments, those with cardio-vascular disease, as well as the very old and the very young. These groups total one-fifth of the nation's population.[21] Secondary standards are designed to protect the "public welfare," [22] and are generally more stringent than the primary standards. Secondary standards protect against adverse effects "on soils, water, vegetation, man-made materials, animals, wildlife, visibility, climate, and economic values." [23] The CAA mandated each state to submit an implementation plan which to submit an implementation plan primary and secondary standards would be attained and maintained.[24] Generally, the states which had areas with polluted air had until mid-1975 to attain the primary standard. The implementation plan also had to demonstrate how the state planned to attain the secondary standards, although the states were given a "reasonable time" to meet the the attainment date.[25] The implementation plan is the driving force behind the states' pollution control efforts, and it was recognized by Congress as perhaps the most important factor in meeting the goals of the CAA. In its report, the Senate Public Works Committee stated that it:

". . . recognizes that the implementation plan is the principal component of control efforts for pollution agents for which the national standards are established. It is this program which must be effective if the nation is to achieve the quality of air which the bill mandates in a relatively short period of time." [26]

To obtain the administrator's approval of the plan, states had to meet eight requirements.[27] Specifically, an approvable plan must:

1. provide for a deadline of not more than three years if meeting a national primary ambient air quality standard; specify a "reasonable" time if complying with a secondary standard;
2. include emission limitations, schedules, and time tables for compliance;
3. include provisions for the monitoring, compilation, and analysis of ambient air quality data and for dissemination of such data;
4. include a procedure for review of new sources;
5. contain adequate provision for intergovernmental cooperation;
6. provide adequately for personnel, funding, installation of monitoring equipment and periodic reports;
7. provide for periodic inspection and testing of motor vehicles to enforce emission standards;
8. provide procedures for review of the plan itself.[28]

There was no requirement for inclusion of a prevention of signficant deterioration provision. This legislative vacuum in the law would figure prominently in the argument of the anti-PSD forces that Congress had not mandated such a policy.

There were other key provisions in the law, but for purposes of this note the most important provisions center on ambient standards and the states' implementation plans. It is clear that the CAA required the states to substantially "upgrade" polluted air by mid-1975, or at the latest, by mid-1977. However, it soon became evident that a public policy no-man's-land existed in regard to so-called "clean air areas." The unanswered question was: does EPA have the authority to prevent a state which has air cleaner than secondary standards from

Footnotes at end of article.

polluting that pristine air "downward" to the level of the standards? Since "the majority of the land mass of the United States has air quality cleaner than these ambient standards," [29] and since "a large portion, if not the majority, of new development is occurring in such areas," [30] PSD quickly became one of the most controversial aspects of the law.

THE HEW-EPA-OMB POLICY SHUFFLE

The PSD controversy began with EPA's publication of proposed implementation plan guidelines [31] on April 7, 1971. The purpose of the guidelines was to provide a blueprint for the states to follow in preparing their implementation plans. After reviewing the more than 400 written comments received during the five-week comment period, Dr. John T. Middleton, Deputy Assistant Administrator for air programs, forwarded revised guidelines to Administrator William D. Ruckelshaus on June 28, 1971, for his review.[32] Comments received from environmental groups strongly urged EPA to include a PSD provision in the guidelines which would require states to address this issue in their implementation plans. Responding to the environmentalists' suggestions, the revised guidelines contained the following provision:

"Approval of a plan shall not be considered in any manner to allow significant deterioration of existing air quality in any portion of any state." [33]

At this juncture, the Executive Office of Management and Budget (OMB) entered the picture, causing EPA to delay final publication of the guidelines until other Federal agencies had an opportunity to review them.[34] OMB intrusion into the rulemaking process,[35] and its apparent impact on the final form of the guidelines, resulted in allegations that OMB had forced EPA to significantly weaken the final guidelines, which were published on August 14, 1971.[36] EPA's top officials strongly denied these changes. Administrator Ruckelhaus, testifying before the Senate Subcommittee on Air and Water Pollution, stated:

"OMB did not get an final crack at the regulations. OMB is nothing more than a conduit to insure that other Federal agencies who want to comment on any regulation that we might issue are given that right to comment. The final determination as to what ought to be in the guidelines is mine." [37]

For whatever reason, the final EPA guidelines dropped the requirement that states must include a PSD provision in their implementation plans. This decision would prove to be of crucial importance as it constituted a total retreat by EPA from prior policy stances taken by the U.S. Department of Health, Education and Welfare (HEW). HEW was originally given the authority by Congress to implement the CAA; but under President Nixon's 1970 reorganization plan [38] this authority was transferred to EPA. Statements by top-ranking HEW officials before Congressional committees committed the agency to a strong PSD policy. One of the strongest statements was made by Secretary Robert Finch, testifying before the Senate Subcommittee on Air and Water Pollution on pending clean air legislation, when he stated that:

"One of the express purposes of the Clean Air Act is 'to protect and enhance the quality of the Nation's air resources.' It will continue to be our view that implementation plans that would permit significant deterioration of air quality in any area would be in conflict with provisions of the act. We do not intend to condone 'backsliding.' If an area has air quality which is better than the national standard, they would be required to stay there and not pollute the air even further, even though they may be below national standards." [39]

This statement, and others by top HEW officials, would play a key role during the ensuing litigation in assisting the courts to decide that prevention of significant deterioration was mandated by the CAA.

PSD—CONGRESSIONAL MANDATE OR MIRAGE: THE COURTS SPEAK

EPA's decision to jettison the PSD requirement in state implementation plans, in effect, shifted the locus of the policy debate from the executive to the judicial branch of government. The Sierra Club and three other environmental groups, after determining that EPA's August, 1971, guidelines would allow states to deteriorate air quality to secondary standards, moved to block the agency's approval of any portion of a state's implementation plan which would allow such deterioration to occur. The lawsuit was filed on May 24, 1972—six days before EPA was required to approve or disapprove the states' implementation plans—against Administrator Ruckelhaus in the United States District Court for the District of Columbia.[40]

Administrator Ruckelshaus and EPA argued that the agency's hands were tied by Section 110 of the CAA: if the state submitted a plan which provided for "implementation, maintenance, and enforcement" of the primary and secondary standards and if the plan provided for attainment of the standards, EPA simply had no choice—it must approve the plan, even if it meant that significant deterioration of air quality could occur.

The Sierra Club, however, argued that EPA had the authority—indeed the duty—to prevent significant deterioration of air quality.[41] The Sierra Club claimed that the provision of EPA's guidelines which allowed deterioration of air quality to the level of the ambient standards violated the purposes provision of the CAA, making them invalid.[42] The Sierra Club vested its prime legal challenge on Section 101(b) of the law which stated that one of its purposes was to "protect and enhance the quality of the nation's air resources." The basis of the Sierra Club's argument was simple and straightforward: regardless of any other provision in the law, Section 101(b) prevented the administrator from approving any plan which would permit significant deterioration of air quality.

On May 30, the District Court ruled in favor of the Sierra Club, stating:

"Having considered the stated purpose of the Clean Air Act of 1970, the legislative history of the Act and its predecessors—it is our judgment that the Clean Air Act is based in important part on a policy of non-degradation of existing clean air and that . . . permitting the states to submit plans which allow pollution levels of clean air to rise to the secondary standard level of pollution, is contrary to the legislative policy of the Act and is, therefore, invalid." [43]

The court also granted the Sierra Club's request for a preliminary injunction. In addition, the court ordered the administrator to review all state implementation plans within four months, and to "approve any portion of a state plan which effectively prevents the significant deterioration of air

Footnotes at end of article.

quality in any portion of any state, and disapprove any portion of a state plan which fails to effectively prevent the significant deterioration of existing air quality in any portion of any state." [44] The court did not define what constituted "significant deterioration," thus setting EPA adrift on choppy policy seas without any direction regarding what amount of pollution might be considered "significant" in clean air regions.

EPA appealed to the Court of Appeals for the District of Columbia, but that court declined to reverse the lower court's decision.[45] EPA then appealed to the Supreme Court. In a nine word statement released on June 11, 1973, the Supreme Court affirmed the judgment of the Court of Appeals by tersely stating that: "The judgment is affirmed by an equally divided court." [46]

Although the courts had decided the CAA mandated EPA to define by regulation a national PSD policy, the agency faced substantial problems in sketching that policy. On one hand, the environmentalists—buoyed by the court's decisions—wanted a tough PSD program, while development interests did not. Nowhere is that fact better illustrated than in testimony of the opposing parties on this issue, which was presented to Senate Subcommittee on Air and Water Pollution on July 24, 1973. Stating the environmentalists' case was Laurence I. Moss, President of the Sierra Club:

"The large majority of the country—virtually all of the areas outside large cities and inner suburbs—has air quality which is better than the national secondary standards for one or more of the six pollutants. If EPA's policy of allowing and indeed encouraging significant deterioration had been permitted to stand, the air quality of this entire area could have deteriorated to secondary standards. This would mean, for example, that the level of sulfur oxides and particulates in the Rocky Mountains and the Blue Ridge could be allowed to increase to the level of Boston, Akron, Detroit and Pittsburgh. What we are discussing and what is at stake here is the 'graying' of America." [47]

The concerns of industry were presented by Carl E. Bagge, President of the National Coal Association, when he stated:

"The nondegradation decision has thrown the nation into an unforeseen, and we believe untended, Instant no-growth policy. The lack of a legal definition of what constitutes significant deterioration of air quality means that no industry can build any plant which emits any air pollutants whatever unless it is willing to gamble on the ultimate definition of significant—and there are no facts upon which to calculate the odds." [48]

EPA was caught in the middle of this philosophic crossfire. Following the Supreme Court's decision, EPA began drafting regulations to comply with the District Court's order. On July 16, 1973, the agency proposed four basic plans to implement a national PSD program and asked for public comments on them.[49] After receiving more than 300 written comments on the initial proposals, EPA issued revised regulations on August 24, 1974, in order to "properly explore all aspects of this issue and to focus more clearly on procedural and technical issues." [50] On December 5, 1974, after several months of legal badgering by the Sierra Club, EPA promulgated final PSD regulations.[51]

A new round of litigation followed promulgation of the final regulations; environmentalists and industry filed fifteen separate petitions for review in six Circuit Courts of Appeal.[52] The challenges were eventually consolidated before the District of Columbia Circuit Court. If EPA held hopes that the final PSD regulations would remove the legal cloud which had hovered over the agency for four years, they were dashed by the renewed legal challenges.

EPA'S REGULATIONS: FIRST CUT AT A NATIONAL POLICY

After the initial court order, it took EPA nearly two and one-half years to promulgate its final PSD regulations. The most important aspect of the regulations focused on a classification scheme for air which was cleaner than secondary standards. Three classes were established: in Class I areas, virtually any pollution would be "significant" and therefore prohibited; in Class II areas "moderate well-controlled growth" could be accommodated without causing "significant deterioration"; in Class III areas, deterioration to the secondary standards would be allowed.[53]

Two pollutants—sulfur dioxide and total suspended particulate matter—were to be used in the classification scheme as yardsticks by which deterioration would be measured. In effect, EPA's Class I and Class II increments were nothing more than new tertiary and quaternary standards. The increments were not to be exceeded, but areas could be redesignated to a different classification to accommodate more pollution. All "clean air areas" were initially designated Class II.[54]

An important feature of the regulations was a new source review process for eighteen point source categories.[55] Two criteria had to be met before the administrator, or the state if it had been delegated new source performance standard review by EPA, could approve construction or modification of a new source covered by the regulations. First, the source had to limit sulfur dioxide and particulate matter emissions by applying pollution control equipment which was equivalent to "best available control technology." Second, emissions from the new source could not cause the increments to be exceeded.

The regulations were generally attacked by environmentalists as violating the court's order for the following reasons: no Class I areas were mandated, the four vehicle-related pollutants were excluded from PSD review, the Class III designation would in effect permit "significant deterioration" by allowing pollution levels to rise to secondary standards, hazardous air pollutants were excluded from PSD review, and point sources other than the eighteen source categories in the regulations were not subject to preconstruction review. Industry generally attacked the regulations as being too stringent, and the power utilities were concerned that the Class I and Class II increments would pose a substantial hurdle to construction of coal-fired powerplants in clean air areas.

The problem of "intrusion" or "buffer zones" also surfaced in the regulations. In the preamble to the final PSD regulations, EPA described this potential problem by stating:

"Calculations have shown that because of the small air quality increments specified for Class I areas, these levels can be violated by a source located many miles inside an adjacent Class II or III area. For example, a power plant which must meet the Class II increment for SO_2 would, under some conditions, violate the Class I increment for SO_2 60 or more miles away. Under the regulations

---

Footnotes at end of article.

promulgated below, a source could not be allowed to construct if it would violate an air quality increment either in the area where the source is to be located, or in any neighboring area in the State. Therefore, wherever a Class I area adjoins a Class II or III area, the potential growth restriction, especially for power plant development, extends well beyond the Class I boundaries into the adjacent areas."

Although later studies demonstrated that large sources could be located closer than 60 miles to a Class I area without violating the sulfur dioxide and particulate matter increments, industry seized upon this statement, claiming development would be restricted by buffer zones surrounding Class I areas. Put simply, the buffer zone controversy became the policy "tar baby" of the regulations, and EPA's statement would haunt it throughout the ensuing debate.

On August 2, 1976, more than a year and one-half after EPA had promulgated the PSD regulations, the District of Columbia Circuit Court of Appeals ruled in favor of the agency by concluding:

"We find no ground on which to disturb the regulations under review, and we therefore affirm the EPA 'Prevention of Significant Air Quality Deterioration' Regulations. Our review of *Sierra Club v. Ruckelshaus* and subsequent events revealed no substantial reason for rejection of that decision, and we hold that the non-deterioration regulations promulgated pursuant to that decision are both rational and in accordance with law." [56]

However, by the time the Court had reached its decision, pressure had been building on Congress for nearly three years to take legislative actions to resolve this policy issue. In fact the Court's decision came at a time when a bill containing comprehensive amendments to the Clean Air Act was being debated on the Senate floor. Congress had received the message: after five years of acrimonious debate and litigation, the time had come for the nation's lawmakers to establish national PSD policy through legislative action. Throughout 1975 and 1976 pressure mounted on Congress to amend the CAA and address the issue by passing legislation which would carefully delineate a national PSD policy. The reason for the pressure was clear: by 1975 PSD had become a stepchild of the courts. Due to the quagmire of litigation most states had adopted a "wait and see" attitude, shunning the option of implementing a program under EPA's regulations, waiting instead for Congress to pass legislation which would establish PSD policy.[57] By January 1976, a year after EPA's prevention of significant deterioration regulations had been promulgated, only four states—Washington, Nebraska, New York and Virginia—had requested EPA to delegate them authority to conduct a PSD program. By July 1, 1976, neither EPA nor the states had taken action to reclassify any Class II areas, which led the agency to conclude that "most states are waiting for explicit Congressional direction before they expend resources to take action." [58]

Senator Howard Baker, ranking Republican member of the Senate Public Works Committee, perhaps best summarized the situation facing Congress when he said:

". . . the Supreme Court affirmed the Judicial interpretation of an ambiguous policy statement in the Clean Air Act and created the concept of significant deterioration. The Court's decision set in motion regulatory machinery at EPA and the situation has been in litigation and confusion ever since. In frustration environmentalists, industry and public officials turned to Congress demanding clarification of the situation." [59]

Although there was general agreement among Senate and House members that action was needed, there was sharp disagreement as to what that action should be. In addition, there were differences of opinion over the need for a national PSD policy. Also, members of Congress continued to hold varying interpretations of what the lawmakers had indeed mandated in the CAA. To Senator Muskie, chief legislative architect of the nation's air pollution control legislation, there was no question of Congress's intent regarding PSD:

"This policy was first articulated in the Federal Water Pollution Law in 1965 and was incorporated into the 1967 Air Quality Act. It was not altered in the 1970 clean air act amendments . . . the courts have upheld the intent of the act. Non-degradation is national policy." [60]

In the 1976 Senate report on the Clean Air Act amendments, Senators James L. Buckley and Robert T. Stafford echoed this viewpoint by stating:

"When the Congress established national ambient air quality standards in 1970, the Congress imposed the need to determine the impact of a new plant on the air quality in the area of the plant. The prevention of significant deterioration (provision) in this bill defines that direction. Significant deterioration is a definition, stated in concentrations of ambient pollutants. It is not a new approach or a new philosophy." [61]

However, two other fellow Republicans on the Senate Public Works Committee did not fully share their views. Senator Pete V. Domenici questioned whether the "protect and enhance" language of the law clearly established a national PSD policy, calling the phrase a "slender statutory reed" [62] upon which to base such a far-reaching program. However, in subcommittee and committee deliberations, Senator Domenici played a key role in writing the Public Works Committee's strong PSD provisions in the 1976 and 1977 clean air legislation.

To Senator James A. McClure, those who subscribed to the interpretation that PSD was mandated by the CAA were mistaken:

"The concept of 'significant deterioration' is not contained in the present (1970) Clean Air Act." [63]

Members of the House who participated in drafting the 1976 and 1977 bills had equally divergent views of the origins of and necessity for a national PSD policy.[64] It was against this backdrop of controversy, litigation and frustration that Congress began to mold new legislation to address the issue.

Congressional action on amendments to the CAA began in earnest when President Ford submitted his omnibus energy bill—the Energy Independence Act of 1975— to Congress on January 30, 1975. As part of that comprehensive energy proposal, the President recommended changes in the CAA, including deletion of the concept of prevention of significant deterioration from the law.[65] In addition to garnering support from industry for this amendment, the President's proposals were initially supported in spirit by the National Governors' Conference [66] and in substance by the State and Territorial Air Pollution Program Administrators.[67] Environmentalists opposed the President's PSD amendment—as did EPA—and they lobbied for a stringent provision to be included in the Senate and House bills.

Footnotes at end of article.

During 1975, the Senate Subcommittee on Environmental Pollution held fourteen days of hearings on the CAA and began "marking-up" a bill in mid-June. After more than 20 mark-up sessions, the Subcommittee reported a bill to the Public Works Committee on November 3, 1975. The Committee completed its work on the bill, after 24 mark-up sessions, and reported it to the Senate on February 5, 1976. Six months later the Senate passed the 1976 Clean Air Act Amendments [68] by a 78–13 vote.

During March, 1975, the House Subcommittee on Health and the Environment held two weeks of hearings on the Clean Air Act Amendments. On October 23, 1975, the Subcommittee reported a "legislative proposal" and three days later the Subcommittee bill was referred to the Committee on Interstate and Foreign Commerce. On March 18, 1976, a bill was reported from the Committee to the House. However, it was not until September 15—two weeks before Congress was scheduled to recess—that the House version of the 1976 Clean Air Act Amendments [69] was passed by a 324 to 68 vote.

The Senate-House Conference Committee was faced with the monumental task of writing a compromise bill by October 1, the scheduled Congressional adjournment date. By putting some long hours, the Conference Committee was able to report a bill. However, before the Senate could vote on the conference report, a filibuster by Senators opposed to the PSD provision killed it.

Hoping to avoid another lengthy battle over the Clean Air Act Amendments in 1977, both the House and Senate move rapidly to pass legislation. With much of the legislative groundwork laid in 1975 and 1976, the bills moved rapidly through the House and Senate.

On June 10, 1977, the Senate passed a slightly modified version [70] of its 1976 bill by a 73 to 7 vote. The House passed its version of the 1977 Clean Air Act Amendments [71] on May 26, 1977, by a 326–49 vote. Under pressure from the auto industry (which needed statutory relief from the 1970 Clean Air Act auto emission standards before it could ship its 1978 model vehicles) and President Carter, a Senate-House Conference Committee reported a compromise bill which was approved by Congress on August 4, 1977. Three days later, President Carter signed the bill into law. Embodied in the bill is a PSD provision which was patterned after EPA regulations, except the Class III increment does not allow for deterioration of air quality to the secondary standards. Instead half that amount of pollution is allowed. Also, the six criteria pollutants are required to be included in the national PSD program, instead of just two as required by EPA's regulations. The national interest in "clean air areas" is protected by the mandatory Class I designation of large national parks, wilderness areas, memorial and international parks, and by prohibiting Class III designations for many Federal land categories. The states are given a much greater role in the PSD program than was permitted under EPA's regulations. The classification process, with certain limited exceptions, is controlled by the governor of each state. The governor's classification decision is not subject to a substantive review by EPA; the agency's role is limited only to a procedural review. In general, the new law's PSD provision represents a reasoned approach to balance the need for economic growth and the need for clean air and places responsibility for determining that balance with the governors.

Footnotes at end of article.

CONCLUSION

This note has attempted to record the problems that are created by implementing a statute which is ambiguous and vague on key policy issues. It may be, as one commentator has suggested, that "perhaps the politics of making major change are such that more battles can be won by the significant use of silence and vagueness than by the explicit statement of intentions." [72] And it may be, as another writer has hinted, that in the CAA the Senate proponents of a strong PSD policy purposefully passed a vaguely-worded bill, but buttressed it with legislative history that could be interpreted by the courts as a Congressional mandate for a national PSD policy.[73] However, inherent in such an approach is the fact that vagueness in a statute gives the implementing agency wide-ranging authority to make administrative decisions which, in effect, set national policy. Such unfettered discretion, as one commentator has noted, allows the agency to make "essentially lawless" decisions on public policy questions.[74] In addition, statutory vagueness encourages litigation which ultimately results in the grinding halt of program implementation.

We have attempted to demonstrate in this note that in the CAA Congress either abdicated or simply overlooked its policymaking responsibilities on prevention of significant deterioration. Instead of addressing this issue in 1970, when public support for strong environmental laws was at its apex, Congress—for whatever reason—did not clearly speak to the issue and years later had to pick up the pieces of a national policy which had been patched together by the courts and EPA. No rational person would argue with the contention of Senators Buckley and Stafford that "under the Constitution, the Congress has the responsibility to define national policy." [75] Therefore, before it became a hostage of the courts, our nation's lawmakers should have spoken on the prevention of significant deterioration issue through timely legislative amendments. Such action would have allowed the states to implement the PSD program without fear of stagnation which accompanied the seemingly endless litigation.

Finally, now that Congress has established a national PSD policy, it will be incumbent upon local and State agencies and EPA to insure that it is implemented vigorously, but wisely.

[17] The prior major air pollution control legislation contained the same basic language as the Clean Air Act Amendments of 1970. Those purposes are:

(1) to protect and enhance the quality of the Nation's air resources so as to promote the public health and welfare and the productive capacity of its population;

(2) to initiate and accelerate a national research and development program to achieve the prevention and control of air pollution;

(3) to provide technical and financial assistance to State and local governments in connection with the development and execution of their air pollution prevention and control programs; and

(4) to encourage and assist the development and operation of regional air pollution control programs.

CS HB 190

Rinaldo / Hanna

Support general thrust of elim. overlapping permits - have problems w/wording.

Present statutes allow delegation to a region

Willis - want 'em stop 'stopping

DEC has had no applic request to delg permitting authority to CIARB

(Branch discouraged this action)

New fed law has higher stds -

Ques. of state ability to delg. authority - can't violate state regs - sanctions could be imposed by feds (cut off state & local EPA grants)

no grandfathering function

natl stds do not take into account regional differences - Alt has poten problems

New d-2 areas are Class II ; older parks etc. are Class I (no degradation) (Class III is half exist stds)

✓ F: HB-150

TOM HANNA'S (DEC) COMMENTS RE CSHB 190 (3rd) - 3-24-78

Hanna said this morning that the third revision submitted by the CIARMD had in fact been rewritten to incorporate DEC's technical and legal (but not necessarily substantive) problems with the first and second drafts from the Cook Inlet district.

(Ernie Mueller yesterday called and commented that the third draft still contained ambiguities of language that could later cause misunderstandings and confusion)

Hanna said that he would try to get a DEC position letter out to us next week. He pointed out, however, that the enactment of the bill would require DEC to draw up regulations for reviewing and approving local programs. This would also require, he said, DEC to review existing local programs for their adequacy. He doubted whether most people involved in preparing the bill were aware of these implications.

Hanna concurred that the Fairbanks North Star Borough should comment on the bill since it has the only other active air pollution program in the state. He has talked to Don Moore (Environmental Director in Fairbanks) about the bill and will ask him to respond to us.

Ben Harding

FAIRBANKS BOROUGH COMMENTS RE CSHB 190 - 3-28-78

I spoke to Don Moore, the Environmental Director for the Fairbanks North Star Borough, this morning. He told me that it was his understanding, based on discussions with Tom Hanna of DEC that the passage of CSHB 190 into law would not affect the borough in Fairbanks since Fairbanks did not at this point desire to set up an autonomous air pollution program.

He said that he would ask the borough attorney to go over the legislation to insure that the borough's program would not be inadvertently affected by CSHB 190. He asked that no final committee action be taken until the borough could make the legal review...which would be done as soon as possible.

Ben Harding

2. F: CSHB-190

CSHB 190 (Relating to municipal air control programs)

John Davis, Chairman of the Cook Inlet Air Resources Management District, dropped off a second revision of what the CIARMD would like to see in CSHB 190 on 2-24-78.

Davis said the CIARMD, which is composed of the Kenai Peninsula Borough and the Municipality of Anchorage, wanted to achieve two basic points with the proposed legislation: to determine whether or not the CIARMD would have the sole permiting authority (subject to state override) or whether there would be two layers of government requiring permits. (He said in the latter case the CIARMD would probably close shop and the Kenai Borough would pull out).

Davis said that he had had numerous discussions with DEC Commissioner Mueller and that general agreement on the bill had been worked out, although possibly some disagreement on specific details could still exist. He said that the CIARMD had not contacted other municipalities with active air control problems and programs, such as the Fairbanks North Star Borough, for their comments on the legislation nor were industrial organizations in the district specifically aware of the proposed legislation.

Davis said that he was facing no deadline in regard to passage of CSHB 190 but that obviously he would like to see legislative approval this session.

In other areas: The CIARMD's governing board is composed of two Kenai Peninsula Borough assemblymen and two from Anchorage. The two municipalities fund the district and handle State revenue sharing funds for the district's programs. Mat-Su at one time belonged, but withdrew. Contact with Mat-Su is being maintained and it will probably rejoin the CIARMD, especially in view of the capital relocation to Willow. At this time, most of the funds and time of the CIARMD are devoted to Anchorage and its problems.

Ben Harding

F: HB 190

DEC COMMENTS RE THIRD REVISION OF CSHB 190 3-22-78

I spoke to Hungerford at DEC in the absence of Tom Hanna who's handling DEC comments on CSHB 190.

Hungerford said that he was reviewing the third draft revision of CSHB 190 submitted by the CIARMD (received in SC/RA 3-20-78). According to the transmittal letter, the third revision had been written to accomodate DEC objections to the second draft. Hungerford said that DEC problems had centered on the problems of drafting language that would legally enable the CIARMD to carry out local air pollution controls in conformity with EPA provisions. He stated that DEC was happy to shift some of this effort to local air control districts but that it was not a question of DEC being able to transfer all authority to the local district and create a body autonomous of the state. He also noted that whoever managed the local air program, either state or local group, would have to comply with federal statutes and EPA regulations.

Ben Harding

Joe-

RE- Mueller's Comments on CSHB 190

I ran into Ernie Mueller last night at the airport and I asked him informally what his reaction was to the revision prepared by John Davis of the CIARMD on CSHB 190.

Mueller said that he was aware of, and approved of in principle, the original rewrite of HB 190, but that he had not seen previously Davis' submission. After looking over the copy we had sent him, he said his impression was that a lot of the draft's language would have to be cleaned up and cleared up.

He said he would be back in the office Tuesday and would like to talk about it more at that time. In the meantime, he had given the bill to Tom Hannah in his department.

Senator Orsini, Chairman
Community & Regional Affairs Comm.
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

Our Office wishes to express our strong support for CS House Bill 193am. We are heavily involved in the Day Care program as we act as coordinators and administrators for the program here in Kodiak and in the villages of Kodiak Island. And, as such, have a strong interest in the progress of this Bill.

Under Section 1 b., we feel it is extremely important to create the 90 day limit. This will insure timely establishment of day care centers within the villages.

Section 2 also will have an extremely beneficial effect on our Day Care programs. By increasing the age limit of those who may be eligible for assistance, it will allow much needed day care for children during after school hours. It also can allow for assistance for children 7 to 11 years of age during the summer when school is not in session.

And finally an increased age limit can eliminate many of the inequities of the system. As it is now AFDC recipients are eligible to receive day care assistance for children through age 11 and non AFDC recipients are cut off at age 7. By equalizing or standardizing the age limit we can begin to reduce the partiality of the program to Welfare recipients.

We have discussed these proposed changes with the Day Care Center people here in Kodiak and at the Coast Guard Base. They are in strong support of these measures.

We hope that you will expediate the speedy passage of CS for House Bill 193am. through your committee.

Sincerely,

Wayne E. Marshall

Wayne E. Marshall
Regional Director

TO: Senator Orsini DATE: May 6, 1977

FROM: Paul Conger RE: CSHB 193 am

I discussed CSHB 193 am with the House C&RA Administrative Assistand, and Reed Stoops, Dept. of C&RA and ascertained the following information.

Section 1:

This section deals with day care licensing by HESS. Currently, the law says that children who receive day care assistance from the state have to be placed in a licensed center. The first section of this bill is a housekeeping measure to clean up current language in the law. As the section delineates, municipalities can oversee their own day care centers as long as they adopt an ordinance providing for day care licensing. Apparently, this provision is particularly useful in bush areas where the standards imposed by the state are too stringent and the state allows them to modify or waive the standards so they can provide day care.

Sections 2, 3 and 4 deal with Day Care Assistance which is administered by the Department of C&RA.

Section 2:

What this section is doing is determining what the age limit will be for children of families receiving day care assistance. When HESS was in the aid to day care business, they provided assistance up to the age of 14. CRA in their program only provided funding up until age 7. So what this is is a compromise specifying that a child means anyone below 11 years of age. A more detailed discussion of this bill is provided in Section 3.

Section 3:

Background for this section is as follows: In the past, assistance to families with children in day care centers was furnished by two means: 1) HESS had a program that provided 100% funding to families on welfare; 2) CRA provided assistance to families based on income. CRA's operated on a sliding scale with those earning higher incomes receiving less in state assistance and vice-versa. However, apparently about a year ago, CRA absorbed HESS's assistance program that was offered to parents that were on welfare. When CRA assumed this program they also incurred the additional expenses that had previously been paid out of HESS's expenditure fund.

This created a financial drain on CRA and CRA had to stop providing financial assistance to those on the higher income range of the sliding scale because CRA did not have the funds to assist them. (Because of this drain created by CRA absorbing HESS's program, CRA has put in for a supplemental appropriation to cover the cost.) What this bill wants to do is eliminate those families who are on welfare from receiving 100% funding for day care assistance, and put everbody on the sliding scale system. Of course using this system would not drastically reduce the number of welfare recipients receiving aid because alot of them obviously have very low incomes which would make them eligible for the greater share of the aid.

Section 4

Provides for an effective date of July 1, 1977.

PC/js

No Fiscal Impact

according to CRA

CS HOUSE BILL NO. 193

"An Act relating to child care; and providing for an effective date."

Although this bill amends existing statutes governing the Department of Community and Regional Affairs Day Care Assistance Program, two of its provisions would impact this Department's Aid to Families with Dependent Children (AFDC) cash assistance program:

1. Sec. 2 of CHSB No. 193 would reduce the maximum age of AFDC eligible children covered by the Day Care program from age 14 to age 11. The AFDC parents of children in this deleted age group would therefore be required to pay their own full day care costs. Community and Regional Affairs notes that 6 AFDC children would become ineligible for day care subsidy if this measure were to be enacted, and that current costs of day care for these 6 children averages $2600 per year per child.

   Federal Regulations governing the AFDC program mandate that all reasonable costs of earning income, including client-paid day care costs, be deducted from gross monthly income in determining AFDC eligibility and payment amounts (45 CFR 232.20). Under this provision, client-paid day care expenses would qualify as a budgeting deduction, decreasing AFDC adjusted gross income and thus increasing the amount of the monthly AFDC grant on a dollar-for-dollar basis.

   Thus the parents of each of these 6 affected AFDC children would be required to pay an average of $2600 per year per child to their day care contractor, but each client would receive an exactly compensatory increase in AFDC monthly payments. The effect of this change would be to increase expenditures within the AFDC program component of the Assistance Payments BRU by $15,600 in FY 78 (6 children times $2600 per child per year = $15,600). Since AFDC funding is 50% federal, 50% State General Fund matching, and the Day Care program is 100% General Funds, the impact of passage of Sec. 2 upon the General Fund expenditures would be a net reduction of $7,800 for FY 78.

2. Sec. 3 of CSHB No. 193 would remove all AFDC eligible children from 100% subsidization of Day Care costs and place such children upon varying percentage subsidies appropriate to family income levels. Currently C & RA serves 235 AFDC children who would be affected by enactment of this measure; they estimate that placement on existing subsidy/income schedules would require parents of these children to pay an average of $499.57 per year per child for day care.

As noted above, the AFDC grants to each of the families affected would have to be increased to allow a dollar-for-dollar compensation for the actual client-paid day care expenses. Thus the effect of enactment of Sec. 3 upon the FY 78 Assistance Payments BRU would be to increase AFDC program expenditures by $117,400 (235 children times $499.75 per child per year = $117,400; $58,700 Federal Funds, $58,700 in State General Funds). The net effect of passage of Sec. 3 upon total General Fund expenditures would be a net reduction of $58,700 for FY 78.

The Department supports the concept of removing the preferential treatment for working AFDC recipients which might tend to emphasize their welfare-related status and to reinforce dependency patterns. The Department further supports the concept of expanding the availability of the Day Care Assistance Program without increasing total State expenditures.

However, if CSHB No. 193 were to be enacted, an increased appropriation of 133.0 for FY 78 for the Assistance Payments BRU would be required. Such increase would result in a net savings of 66.5 SG^F.

JUNEAU, ALASKA

Memorandum

TO: Representative Hugh Malone
Speaker of the House

DATE: March 8, 1978

RE: CSHB 190

FROM: Joe Orsini JO

Regarding your inquiry of March 7 on CSHB 190, committee letters were sent out February 24 to the Commissioner of Environmental Conservation and to the Kenai Peninsula Borough, the Municipality of Anchorage, the Matanuska-Susitna Borough and the Fairbanks North Star Borough for their assessment of the revision of CSHB 190 proposed by Mr. John Davis of the Cook Inlet Air Resource Management District. Since no comments have yet been received, no date has been scheduled for a committee hearing at this time.

Similarly, for HB 214 (SB 179), municipal officers from Fairbanks and Anchorage have commented verbally on the proposed legislation and have indicated that they would provide statements in writing. We have not yet received their statements, or statements from any other municipality on the issue.

I would appreciate, however, any background material you could supply me from your own files regarding HB 214 which could be used for the Committee's information.

Joe
The data on HB 214 has been transmitted. I appreciate your scheduling the bill at your earliest convenience. Thanks
Hugh

Dear Rep. Malone:

The following list of payments by political subdivisions represents the amounts that the State would pay out if it decided to refund all judicial services payments subsequent to July 1, 1975:

Cordova	$ 200
Homer	240
Palmer	678
Kodiak	8,368
Seldovia	600
Seward	6,580
Soldotna	1,259
Ft. Yukon	400
Nenana	45
Haines	680
Juneau	41,684
Petersburg	500
Wrangell	500
Nome	1,000
Kotzebue	600
Delta Junction	240
Sitka	10,135
Anchorage	126,500
Valdez	7,556
Skagway	782
	$208,547

Please let me know if you need other information on these payments.

Sincerely,

Richard Barrier

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MEETING

May 18, 1978

Present: Senators Orsini, Hackney and Willis; Don M. Berry, Municipality of Anchorage; Floyd Johnson, Division of Emergency Services, Dept. of Military Affairs; Peter Froehlich, Attorney General's Yvonne M. Alford, Municipality of Anchorage; Mitchell Gravo, Municipality of Anchorage; Jim Rolle, Municipal League; Lisa Rudd, Representative.

Absent: Senators Ferguson and Sumner

The meeting was called to order at 3:07 p.m. House Bill 214 and CSHB 941 were the bills before the Committee.

HOUSE BILL 214

Mitchell Gravo, Municipality of Anchorage, explained that the effect of the legislation passed in 1976 was to relieve municipalities for judicial services rendered by the state. Prior to that time municipalities had to pay the state for judicial services such as magistrates and court judges. He further explained that when this legislation was passed it said nothing about amounts owed prior to 1976. HB 214 would relieve the politicial subdivisions from paying for judicial services rendered prior to 1976.

Senator Hackney moved that the Committee passed out HB 214 with a "DO PASS" recommendation. There was no objection.

CS FOR HOUSE BILL 941

Mitchell Gravo, explained that the bill concerns a 1974 lease agreement between the State of Alaska and, at that time, the City of Anchorage on 3rd and Post. He stated that the lease called for rent of $100,000 a year plus $10,000 for the option to purchase the facilities after 10 years. The property was appraised in 1974 at $1 million. In 1976 after the lease had been functioning for 2 years the State wanted to rescind the lease and filed suit against the City. Mr. Gravo stated that it would probably take 1 1/2 to 2 years before the question can be legally resolved. He stated that the State alleged that the lease was illegal on three grounds: 1) the Commissioner of Highways lacked authority to enter into the lease-purchase agreement because the Director of the Division of Lands was the only official who could execute such an agreement, 2) appropriate public notice was lacking, 3) the property was appraised six rather than three months prior to the lease-purchase agreement.

He stated that this bill would ratify the lease purchase agreement between the State and the city of Anchorage and would direct the Director of the Division of Lands and the Commissioner of Highways to recognize the lease-purchase agreement.

He stated that the State is relying on loopholes and technicalities to rescind the lease-purchase agreement while claiming that the State is in need of the property. Mr. Gravo further stated that the People

Mover bus system is located at this facility and that it would be nearly impossible to find facilities elsewhere in the downtown area, which was especially suited for dispatching purposes.

Pete Froehlich, Attorney General's Office, was called in the absence of Richard Bernham who is handling the law suit against the City of Anchorage. Mr. Froehlich stated that he would testify from a letter written to Senator Croft at the request of Representative Rudd.

Senator Hackney questioned the letter's assertion that the State was in need of the land at the time the lease-purchase agreement was made.

Mr. Froehlich stated that if this bill was to pass assuming it is not vetoed, in his judgement the issue of the authority of any other Department, other than the Director of the Division of Lands, to dispose of land would be unresolved.

Mr. Froehlich unlike Mr. Gravo, believed that a Superior Court decision would be made by mid-summer.

Chairman Orsini asked Mr. Froehlich to report back to the Committee with the following information by next week: a legal opinion of the effect of this bill if it were passed, assuming it was not vetoed; if the bill passed the Legislature would the Administration recognize the lease as valid; other agencies that have demonstrated a particular need for this piece of property.

Floyd Johnson, Department of Military Affairs, Division of Emergency Services, stated that they occupy one of the three buildings in the complex. He stated that his office was notified by the AG's office through the Department of Administration not to sign a lease agreement with the city and not to make monthly payments. He stated that his office has four years of monthly bills and would be willing to pay their debt to the Municipality as soon as the court decision comes down. He stated that in FY 75 and FY 76 the rent money lapsed into the general fund yet FY 77 is committed and possibly also FY 78 funds. He stated that the total owed as of the end of the fiscal year would be $93,430.

Chairman Orsini asked that the Deputy Commissioner send a memo to the Committee giving his opinion of, if the lease goes on as originally signed, if Emergency Services has a legal right to stay there through the state's actual ownership, since they had signed a lease with the Dept. of Highways in 1972.

Representative Lisa Rudd, stated that she asked to have the bill introduced. She stated that an agreement that had been entered into in good faith by both parties, which were also public bodies, was not one which should be subject to litigation two years after the fact. She stated that there was a definite legal question as to whether or not the Commissioner of Highways had the authority to enter into the agreement and there is also a question on the appraisal. She stated that she had talked with people that are very familiar with state leases and

if the lease is overturned by the court on either of those basis there are probably a number of other state leases of land which would also become void for the same reasons. She stated that the Municipality has been on the location for 4 years and was in need of the land as much, or more, than the State.

Don Berry, Municipality of Anchorage, stated that they were in strong support of HB 941. He stated that the lease was signed in good faith and that there had been a verbal agreement between Governor Egan and Mayor Sullivan to use this land for mass transit.

Chairman Orsini stated that the Committee needs more information on the bill before making a final decision and asked that the information requested be available to the Committee early the following week.

The meeting was adjourned at 4:00.

Re: House Bill 214

Dear Senator Orsini:

House Bill No. 214 relative to judicial services is before your committee. The bill provides for forgiveness of certain indebtedness to the State for judicial services.

We have an outstanding liability of some $25,000 that is being deferred pending resolution of this bill. All of the cities affected need to know as soon as possible whether this bill will pass or fail. We, like the State, are in the process of preparing budgets for the upcoming fiscal year and we cannot do so properly without knowing the fate of this bill. It needs to be passed but, even more important, we need to know its fate.

Sincerely,

Vincent O'Reilly
Mayor

JEW/VOR/eh

F: HB 214

HB 214: AN ACT FORGIVING AMOUNTS OWED BY POLITICAL SUBDIVISIONS FOR JUDICIAL SERVICES; AND PROVIDING FOR AN EFFECTIVE DATE.

HB 214 would forgive amounts owed by political subdivisions to the State for judicial services provided by the State to those political subdivisions prior to 1976. The Municipality of Anchorage supports this bill.

Prior to 1976, AS 22.15.270 required municipalities to pay to the State "such sums as will pay for the judicial services rendered to the political subdivision by the district judge or magistrate rendering the services". Chapter 219 SLA 1976 deleted the above quoted language.

However, Chapter 219 SLA 1976 did not expressly deal with amounts owed to the State by municipalities for pre-1976 judicial services. Since 1976, the State has indicated that it will file suit to recover outstanding amounts for judicial services incurred prior to 1976 unless the Legislature clarifies the situation by excusing municipalities from such debts. HB 214 would benefit a number of municipalities, and it would benefit Anchorage in the amount of $250,000 because we now owe that amount to the State for pre-1976 judicial services.

The State is actively encouraging the provision of local law enforcement and other criminal justice services by programs such as revenue sharing. Thus, the State is acting inconsistently in seeking to make municipalities pay costs for judicial services incurred as an essential part of the criminal justice process. For example, this year, Anchorage will receive approximately $1,470,280 in revenue sharing for police services under AS 43.18.010(a)(1). However, under the 1978 Anchorage Municipal budget for police and prosecution functions, Anchorage taxpayers will contribute approximately $10,325,300 for these services.

Furthermore, in 1976, the Assembly adopted a comprehensive penal code and the Municipality began an intensive effort to control, at the local level, criminal activity such as prostitution and drunk driving. Many of the criminal activities controlled through local police and local prosecutors were formerly the responsibility of the State Troopers and District Attorney. Thus, by mounting an intensive local effort against crime, Anchorage taxpayers are contributing their part to providing an adequate criminal justice system for over half the people of Alaska, thereby saving the state considerable costs that it would otherwise incur.

The foregoing facts indicate that it is not inequitable or unreasonable for municipalities such as Anchorage to be excused from outstanding debts for judicial services. Finally, HB 214 is consistent with Ch. 219, SLA 1976 wherein the Legislature indicated that the costs for judicial services are properly the responsibility of the State.

Municipality of Anc.

GEORGE M. SULLIVAN,
MAYOR

OFFICE OF THE MAYOR

March 21, 1978

Senator Joseph L. Orsini, Chairman
Community & Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Senator ~~Orsini~~ Jor:

Your committee is presently considering HB 214 entitled "An Act forgiving amounts owed by political subdivisions for judicial services; and providing for an effective date". The Municipality of Anchorage strongly supports this legislation and urges its adoption by the Senate at the earliest possible time.

Prior to 1976, AS 22.15.270 required municipalities to pay to the state "such sums as will pay for the judicial services rendered to the political subdivision by the district judge or magistrate rendering the services." Chapter 219 SLA 1976 deleted the above quoted language but, unfortunately, did not expressly deal with amounts owed to the state by municipalities for pre-1976 judicial services. Since 1976, the state has indicated that it will file suit to recover outstanding amounts incurred prior to 1976 unless the Legislature acts to clarify the situation and excuse municipalities from such debts. I understand that a number of municipalities would benefit from the proposed bill. Anchorage has approximately $250,000 in outstanding debt that would be forgiven if HB 214 becomes law.

Since the State of Alaska is actively encouraging the provision of local law enforcement and other criminal justice services by programs such as revenue sharing, it seems odd that the State should seek to make municipalites pay costs for judicial services incurred as an essential part of the criminal justice process. For example, this year, Anchorage will receive approximately $1,470,280 in revenue sharing for police services under AS 43.18.010(a)(1). However, under the 1978 budget for police and prosecution functions, Anchorage taxpayers will contribute approximately $10,325,300 for those services. Anchorage taxpayers are therefore doing at least their fair share to provide an adequate criminal justice system for over half the people of Alaska.

In addition, the Assembly in 1976, adopted a comprehensive penal code and began an intensive effort to control criminal activity such as prostitution and drunk driving (OMVI) at the local level. Many of the criminal activities controlled through local police and local prosecutors were formerly the responsibility of the State Troopers and District Attorney. Thus, by mounting an intensive local effort against crime, Anchorage is, in essence, saving the state considerable costs that it would otherwise incur.

Based on these facts, I do not feel that it is inequitable or unreasonable for municipalities such as Anchorage to be excused from outstanding debts for judicial services. This is particularly true in light of the fact that, by enacting Ch. 219, SLA 1976, the Legislature has indicated that such costs are properly the responsibility of the state.

If you have any additional questions concerning this legislation, please contact Mr. Ted Berns, Municipal Attorney at 264-4237. Thank you for your attention to this bill and for an opportunity to comment.

Sincerely,

MUNICIPALITY OF ANCHORAGE

George M. Sullivan
Mayor

GMS:TDB:gml

CSHB 193 am, HB 424, HB 273 am

SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

May 12, 1977

Present: Chairman Orsini, Senators Hackney and Willis; Reed Stoops, Community & Rural Affairs Department; Margo Dick, Day Care Assistance; Palmer McCarter, Dept. C&RA.

Absent: Senators Ferguson and Sumner

The hearing began with CSHB 193 am concerning day care assistance. Reed Stoops, Community and Rural Development, testified in favor of the bill and explained that the proposed changes in the bill would (1) reverse the licensing requirements of day care facilities; (2) redefine definitions of "child"; (3) eliminate the current system of providing assistance to AFDC families and; (4) provide for an effective date.

Mr. Stoops informed the committee that those AFDC families who were receiving 100% funding for day care assistance would henceforth be subjected to eligibility standards determined on a sliding scale income basis coinciding with the formula used to determine how much non-AFDC families will receive in assistance. Stoops stated that enactment of this bill would provide a savings of $132,000 to the state.

He also stated that changing the required age limit from seven years of age to 11 years of age for non-AFDC recipients, and AFDC recipients from age 14 to 11 years would be an equitable compromise so that more children could benefit from day care assistance without incurring any additional .se. He stated that they estimate 8% more children would be elegible.

Margo Dick, from the Day Care Assistance in Juneau supported Mr. Stoops comments.

Senator Hackney moved that the committee pass the bill out with individual recommendation, and Senator Willis voted "do pass", and Senators Orsini and Hackney voted "no rec".

Chairman Orsini asked Palmer McCarter to testify on HB 424, and he explained that this bill provides reimbursement to municipalities for payments made after July 1, 1975 for judicial services. Senator Hackney moved for a "do pass" vote from the Committee, and the bill was unanimously passed out.

Palmer McCarter offered testimony regarding CSHB 273 am, and stated they the Dept. is against the concept of this bill. He explained that 3rd class boroughs were created as an addition to the existing borough form of government. The 3rd class borough's powers consist of providing education and taxation for the purpose of providing that service.

He also pointed out the the Federal Government might be upset if some areas in the state have Coastal Zone Management without a municipality or borough to carry out planning, platting and zoning.

Senator Willis moved that the bill go out of the Committee with individual recommendation, and he voted "no rec", Senator Orsini voted "do not pass" and Senator Hackney voted "do pass".

May 9, 1977

The Honorable Joseph Orsini
State Capitol
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

There is a Bill being considered in the State House of Representatives which I feel deserves consideration by every Alaskan and especially those in a position to influence legislation. The Bill is HB 364 sponsored by the House Rules Committee, which will allow State employees to vote on whether or not to opt out of the Social Security system.

The main argument put forth is that these funds could be used more advantageously if placed with the Public Employee's Retirement System. I doubt that any knowledgeable individual would disagree with this claim, however, anyone taking the same amount of money and placing it in a minimal return investment would probably do better than the Social Security Fund.

Allowing another group to opt out of the system only spreads the responsibility of providing for our aged over a smaller number of taxpayers. According to published reports, our Social Security Fund keeps shrinking as our taxes continue to increase. This year the maximum tax on a self-employed individual is $1,304 compared with $1,209 in 1976. The maximum for employees is $965 in 1977 compared with $895 in 1976 with like amounts paid by the employer. I understand President Carter is proposing legislation to allocate other tax monies to Social Security.

At the present time Federal employees and teachers are exempt and probably others of whom I am unaware. There are many inequities in our tax system as I am sure you are aware. It seems to me that an effort should be made to eliminate the inequities rather than allow more. Every employee should be allowed to contribute, or not, at the employee's option.

It has been my feeling for some time that every individual should have the opportunity to opt out of the Social Security system, but once this election is made it should be binding and irrevocable. Accumulated contributions would be forfeited upon the election. Before one is allowed to opt out of the system, however, proof of a retirement plan should be required. Needless to say, assuring that an adequate retirement plan is begun and maintained would be next to impossible. I suspect that had something to do with inception of the system initially.

The problem with allowing individuals to opt out of the system is the system itself. Many people retire from public service at a reasonably young age. These people have acquired skills that enable them to obtain employment in jobs covered by Social Security at high salaries. They work at salaries in excess of the Social Security base for enough quarters to qualify for near maximum benefits and receive nearly the same monthly allowance as someone who has paid into the system his entire working life. In fact, they could receive more than some of the low income people who have contributed for their entire life.

I hope that you will seriously consider the consequences of this Bill on every Alaskan, and not just State employees, before allowing it to pass. By copy of this letter to the Alaska Society of Certified Public Accountants, I am asking the members to support my opposition to this Bill.

Very truly yours,

LeRoy T. Funk

3. Are there any classes of municipalities which favor or not favor the bill. Such as large versus small municipalities?

5-19-78

NOTE FOR CSHB 558 FILE

Jim Rolle called yesterday to say that further study of 558 indicated that the municipal league did not have any problems with the bill, since it appeared that any municipal involvement in the legislation would be at the option of the municipality.

Earlier Rolle believed that 39.30.100(1)(A)(iii) would create a situation where municipalities would feel impelled to participate in the program and for that reason said that the municipal league had problems with the bill. Yesterday, he said that this was based on an aparent misreading.

(On Wednesday, Marilyn Miller said that she had studied the bill extensively and said that she found no m unicipal impact that was not voluntary.)

Mike Miller said on Wednesday that as many as 8,000 state employees would be affected by the bill and for that reason he and the APEA were concerned about its passage and committee waiver.

Cherie Shelley, APEA, has said that the APEA is primarily concerned with Sec. 4 of the bill and is willing to see everything else drop. She said that Senator Tillion is holding all the APEA bills in Senate Finance until they are all in place before he will consider moving out any one of them.

IN THE HOUSE BY THE STATE AFFAIRS COMMITTEE

CS FOR HOUSE BILL NO. 558

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LECISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act extending leaves of absence to and amending the group insurance benefits of certain employees of the state, and certain of its political subdivisions; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 39.20.310(7) is amended to read:

(7) temporary employees hired for periods of less than 30 consecutive days [12 CONSECUTIVE MONTHS];

* Sec. 2. AS 39.30.100(1)(A) is repealed and re-enacted to read:

(A) an employee, except an emergency employee, who has served with the same governmental unit as

(i) a permanent full-time employee for 30 days or more;

(ii) a permanent part-time employee for 30 days or more; or

(iii) a temporary employee for 60 days or more; however, temporary employees employed by a municipality participating in the provisions of sec. 90 of this chapter need not be provided coverage.

* Sec. 3. AS 39.30.100(2) is amended to read:

(2) "governmental unit" means the state [, A BOROUGH, MUNICIPAL CORPORATION,] or any [OTHER] political subdivision of the state, and the North Pacific Fishery Management Council;

* Sec. 4. AS 39.30.090(14) is amended to read:

during the next succeeding calendar year, 90 per cent of the examination cost; and

(D) for a physical examination of an employee given during the next and each succeeding calendar year, the entire cost of the examination.

* Sec. 7. Sections 2 - 4 of this Act take effect July 1, 1978.

Section
130. Special hazard insurance

HB
621

HB 621

"An Act relating to unemployment insurance coverage for employees of the state and its political subdivisions; and providing for an effective date."

In 1977, Federal Public Law 94-566 determined that states and their political subdivisions must provide unemployment insurance coverage for their employees. If the state did not provide coverage, certain Federal funds would be withheld.

State of Alaska then passed Ch. 122 SLA 1977 (HCS for SB 116), enacting coverage for the state and its political subdivisions' employees. Ch. 122, Sec. 34 provides that if Congress repeals or the courts find PL 94-566 unconstitutional, ~~Ch. 122~~ Sec 33 will ~~not~~ go into effect:

Sec. 32 - provides for suspension while in the courts

Sec. 33 - reverts to law the way it was before

HB 621 repeals Sections 32 -34; and the Senate State Affairs Ammendment provides for municipalities to remain exempt from this - i.e. they still will come under Sec. 32 - 34:

Sec. 32 - repealed and reenacted to exclude municipalities

Sec. 33 - repealed and reenacted to exclude municipalities

NOTE FOR HB 621 FILE

Cherie Shelley, APEA, stopped by the office last week to ask if S C/RA would waive referral on the bill if State Affairs eliminated the coverage of municipal employees under the bill.

She said that it was never APEA's original intention to cover municipal employees...that its chief goal was for state coverage. As a result, the addition of municipal employees was essentially inadvertent, and could be dropped without problem.

Joe--

You will recall that you've been hesitant to bring up House Bill 657--relating to tidelands near Skagway--because of adverse ruling from the Attorney General. I've taken the liberty of having the bill redrafted as a suggested committee substitute. The Attorney General himself assures me that the redrafted legislation no longer has Constitutional problems. Your consideration of this legislation would be greatly appreciated.

Joe--

By a unanimous vote the House passed H.B. 657 which, though written in general terms, applies only to a small bit of tidelands at Skagway. The Division of Lands, although not wild about the bill told House Community and Regional Affairs they had no real objection to it. I'd appreciate if you would bring it up for a hearing in your committee.

May 15, 1978

The Honorable Joe Orsini
Chairman, Senate Community
and Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

I am writing in reply to your letter of May 8, 1978, concerning SB 374.

Generally, I believe it sufficient that the State convey tidelands by long term lease rather than fee title. However, if there are specific circumstances which require fee conveyance, I believe the revised work draft (SCSHB 657) is satisfactorily limited to prevent a wholesale run by municipalities on State owned tidelands.

Sincerely,

Robert E. LeResche
Commissioner

SENATE CS FOR CS FOR HOUSE BILL NO. 766

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act authorizing home rule and general law municipalities to exempt contractors from certain bond requirements in the construction or repair of public works projects."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 36.25 is amended by adding a new section to read:

Sec. 36.25.025. OPTIONAL MUNICIPAL EXEMPTION. A municipality, by ordinance adopted by its governing body, may exempt individual contractors from compliance with the provisions of sec. 10(a) of this chapter if the estimated cost of the project does not exceed $400,000, and

(1) the contractor is, and for two years immediately preceding the award of the contract has been, a licensed contractor having his or its principal office in the state;

(2) the contractor certifies that he has not defaulted on a contract awarded to him during the period of three years preceding the award of a contract for which a bid is submitted;

(3) the contractor submits a financial statement, prepared within a period of nine months preceding the submission of a bid for the contract and certified by a public accountant or a certified public accountant licensed under AS 08.04, demonstrating that the contractor has a net worth of not less than 20 per cent of the amount of the contract for which a bid is submitted; and

(4) the total amount of all contracts which the contractor anticipates performing during the term of performance of the contract

HB 827

General Industry stds - sec. by R. Block (Dir of Insur)

for which a bid is submitted does not exceed the net worth of the contractor reported in the certified financial statement prepared and submitted under (3) of this subsection by more than seven times.

* Sec. 2. AS 29.13.100 is amended by adding a new paragraph to read:

(38) AS 29.48.130(a)(12) (municipal exemption on contractor bond requirements)

* Sec. 3. AS 29.48.130(a) is amended by adding a new paragraph to read:

(12) exempt contractors from compliance with general requirements relating to payment and performance bonds in the construction or repair of municipal public works projects within the limitations set out in AS 36.25.025.

TO: All Senators
Alaska State Legislature

FROM: Representative Dick Eliason

DATE: May 30, 1978

SUBJECT: House Bill 766

The intent of House Bill 766 is to permit municipalities to exempt contractors from existing bonding requirements for local public works projects. This would have to be done by ordinance of the local government.

The effect would be to enable small, local contractors, who do not have the financial capability to meet current bonding requirements, to secure public works contracts. At present, many small contracts on local projects go to larger firms outside the local area, often from outside the state. The result of such exemptions being available would be to provide additional work for local firms and for local labor. In addition, it would often bring in lower contract prices, simply because of a contractor having equipment and people in the area.

Contracts could be let, and exemptions granted at the discretion of local officials, who usually are acquainted with local contractors and know of their reputations, integrity and capabilities. The contractors in question live and work in the local communities, but have increasing difficulty getting work because of financial and bonding requirements.

There is protection built into the contracting situation with the retained percentage system, under which the municipality pays for a contract incrementally as work is satisfactorily completed. Additionally, municipalities have the option of granting front money for local contractors by way of paying for or underwriting costs of shipping materials and equipment when necessary.

There is no significant opposition to the measure. The law would help to restore a measure of local autonomy to the municipalities.

A Senate amendment to the bill would provide for an upper limit of $400,000 on such contracts, probably a more realistic level than the originally-proposed ceiling of $250,000.

NB 827

5-22

~~766~~ conditions

provided that:

1) the contractor is, and for two years immediately preceeding the award of the contract has been, a licensed contractor having its principal offices in the state.

2) the contractor submits a financial statement as of no earlier than nine ~~months~~ months prior to submitting the bid for contract, certified by ~~a certified public~~ an accountant licensed by the state showing:

(a) a net worth of no less than 20% of the face amount of the contract;
(b) the contractor has not defaulted on any contract awarded in him the last three years;

3) the total amount of all contracts being performed by the contractor during the term of the subject contract being awarded under this statute, does not exceed seven times the net worth of the contractor.

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MEETING

May 23, 1978

Present: Senators Orsini, Hackney, Willis and Ferguson; Tom Singer, House Permanent Fund; Pat Conheady, DNR; Annette Smith, House C&RA; Jack Chenoweth, Legislative Affairs Agency, Royce Weller, Hugh Malone's Staff; Representative Dick Eliason, Richard Engen, Division of State Libraries and Museums.

Absent: Senator Sumner

The bills before the Committee were CSHB 133, HB 766 and SB 580. The meeting was called to order at 3:08.

SENATE BILL 580

Richard Engen, Division of State Libraries and Museums, stated that this bill would increase the present grant and aid program for assistance to the Public Libraries Association throughout the state from $250 a year on a reimbursable basis to a $500 grant for purchase of library materials.

He stated that it eliminates much of the paper work now required by statute. He explained that his office has to submit invoices on a reimbursable basis and this would be eliminated through the grant provision of the bill. He also stated that the bill removes the restriction from purchasing religious materials which is in the original statutes.

Senator Hackney moved to increase the $500 grant amount to $1,000. There were no objections. Senator Hackney then moved to pass the bill out with a "DO PASS" recommendation.

HOUSE BILL 766

Chairman Orsini went through the proposed recommendations for the bill. He stated that there was a CS for increasing the $250,000 to $400,000 and adding certain conditions to the increase.

Representative Eliason stated that the bill was introduced at the request of the borough Administrator of Sitka. He stated that small contractors in rural areas and smaller communities of the state who have ample equipment and the experience to handle a number of municipal jobs are falling short of other contractors from out of the community and even out of te state because of the difficulty in establishing a bond.

Senator Ferguson moved that the Committee adopt a CS for HB 766 including the recommendations by Chairman Orsini and pass it out with "INDIVIDUAL RECOMMENDATIONS".

CS FOR HOUSE BILL 133

Jack Chenoweth, Legislative Affairs Agency, went over the proposed committee substitute for CSHB 133 and explained section by section

changes in the bill and new language that had been put into t. As a result of committee discussion, a revised work draft of the proposed committee substitute was requested.

Chairman Orsini stated that CSHB 133 would be scheduled for Committee action Thursday.

The meeting was adjourned at 4:00.

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: " An Act relating to the bonding requirements for public works contracts".

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*Section 1. AS 36.25.010 is amended by adding the following subsections:

(d) Notwithstanding any other provisions of this section, the state or a political subdivision of the state other than municipalities shall waive the bond requirement for contracts of up to $500,000, provided all of the following conditions are met:

(1) The contractor has been unable to secure a bid, performance, or payment bond, and provides the names of the sureties who have denied him bonding, and documentation of the reasons for that denial

(2) the contractor is, and for ~~three~~ two years immediately preceeding the award of contract has been, a licensed contractor having its principal offices in the state;

(3) the contractor provides the following information:

(a) the class of construction in which he specializes,

(b) the size of jobs he feels best qualified to handle,

(c) the work he completed in each of the past three years,

(d) the largest work load carried at any one time, and

(e) a list of the largest jobs he has completed, including

(1) amount of contract

(2) types and location of work

(3) owner's name and address

(4) year completed

the contract is for similar work to that usually performed by the contractor

(4) the contract is for construction, alteration, repair, or maintenance of buildings or improvements and requires the performance of substantially all work by the contractor utilizing his own tools, equipment, and employees, and requires the contractor to use no subcontractors;

(5) the contractor submits a financial statement as of no earlier than nine months prior to submitting the bid for the contract, certified by a certified public accountant showing:

(a) a net worth of no less than 20% of the face amount of the contract;

(b) a profit from contracting operations for at least the year preceding the award of the contract, and for two of the last three years preceding the award of the contract;

(6) the contractor has not defaulted on any contract awarded him in the last three years:

(7) the total amount of all contracts being performed by the contractor during the term of the subject contract, including the contract being awarded under this statute, does not exceed seven times the net worth of the contractor:

(7) the state, or political subdivision of the state, establishes a disbursement procedure wherein:

(a) funds are disbursed in periodic progress payments relating to the amount of work performed to date of disbursement;

(b) no less than ten percent of each disbursement is withheld

to the end of the contract to assure completion of the contract; and

(c) the state or political subdivision of the state performs such audits and requires such lien releases as is appropriate to assure payment of all employers of and suppliers to the contractor.

(e) A municipality, by ordinance adopted by its governing body, may exempt contractors from compliance with the provisions of (a) of this section. The contractor shall be subject to the provisions of (d) of this section.

* Section 2. AS.37.05.220(8) is amended as follows:

(8) prescribe standard forms for bids and contracts for construction, purchase of supplies, and other purposes, which bids and contracts may contain provisions which the department considers necessary; but all contracts for construction shall require the filing of an acceptable performance bond and a penalty provision for failure to perform the contract according to its terms, except as provided in AS.36.25.010(d) and (e).

*Section 3. AS 29.13.100 is amended by adding a new paragraph to read:

(38) AS 29.48.130(a)(12) (municipal exemption on contractor bond requirements).

*Section 4. AS29.48.130(a) is amended by adding a new paragraph to read:

(12) exempt contractors from compliance with general requirements relating to payment and performance bonds in the construction or repair of municipal public works prijects in the manner authorized by AS36.25.010(e).

IN THE HOUSE BY THE COMMERCE COMMITTEE

CS FOR HOUSE BILL 827

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: " An Act relating to the bonding requirements for public works contracts".

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*Section 1. AS 36.25.010 is amended by adding the following subsections:

(d) Notwithstanding any other provisions of this section, the state or a political subdivision of the state other than municipalities shall waive the bond requirement for contracts of up to $500,000, provided all of the following conditions are met:

(1) The contractor has been unable to secure a bid, performance, or payment bond, and provides the names of the sureties who have denied him bonding, and documentation of the reasons for that denial

(2) the contractor is, and for three years immediately preceeding the award of contract has been, a licensed contractor having its principal offices in the state;

(3) the contractor provides the following information:

(a) the class of construction in which he specializes,

(b) the size of jobs he feels best qualified to handle,

(c) the work he completed in each of the past three years,

(d) the largest work load carried at any one time, and

(e) a list of the largest jobs he has completed, including

(1) amount of contract

(2) types and location of work

(3) owner's name and address

(4) year completed

the contract is of similar work to that usually performed by the contractor

(4) the contract is for construction, alteration, repair, or maintenance of buildings or improvements and requires the performance of substantially all work by the contractor utilizing his own tools, equipment, and employees, and requires the contractor to use no subcontractors;

(5) the contractor submits a financial statement as of no earlier than nine months prior to submitting the bid for the contract, certified by a certified public accountant showing:

(a) a net worth of no less than 20% of the face amount of the contract;

(b) a profit from contracting operations for at least the year preceding the award of the contract, and for two of the last three years preceding the award of the contract;

(c) the contractor has not defaulted on any contract awarded him in the last three years:

(6) the total amount of all contracts being performed by the contractor during the term of the subject contract, including the contract being awarded under this statute, does not exceed seven times the net worth of the contractor:

(7) the state, or political subdivision of the state, establishes a disbursement procedure wherein:

(a) funds are disbursed in periodic progress payments relating to the amount of work performed to date of disbursement;

(b) no less than ten percent of each disbursement is withheld

to the end of the contract to assure completion of the contract; and

(c) the state or political subdivision of the state performs such audits and requires such lien releases as is appropriate to assure payment of all employers of and suppliers to the contractor.

(e) A municipality, by ordinance adopted by its governing body, may exempt contractors from compliance with the provisions of (a) of this section. The contractor shall be subject to the provisions of (d) of this section.

* Section 2. AS.37.05.220(8) is amended as follows:

(8) prescribe standard forms for bids and contracts for construction, purchase of supplies, and other purposes, which bids and contracts may contain provisions which the department considers necessary; but all contracts for construction shall require the filing of an acceptable performance bond and a penalty provision for failure to perform the contract according to its terms, except as provided in AS.36.25.010(d) and (e).

*Section 3. AS 29.13.100 is amended by adding a new paragraph to read:

(38) AS 29.48.130(a)(12) (municipal exemption on contractor bond requirements).

*Section 4. AS29.48.130(a) is amended by adding a new paragraph to read:

(12) exempt contractors from compliance with general requirements relating to payment and performance bonds in the construction or repair of municipal public works prijects in the manner authorized by AS36.25.010(e).

SEE CSHB 827 F: 766 HB RICHARD K 2515 BACK

The State, or a political subdivision of the State, may award a contract of up to $200,000 without the requirement of bond, provided all of the following conditions are met:

(1) The contractor is, ~~and for five years immediately preceding the award of contract has been~~ 2 years, a licensed contractor having its principal offices in the state;

(2) The contract is for alteration, repair or maintenance of existing buildings or improvements and requires the performance of substantially all work by the contractor utilizing his own tools, equipment and employees, and requires the contractor to use no subcontractors.

(3) The contractor has a financial statement as of no earlier than nine months prior to submitting the bid for the contract, certified by a certified public accountant showing:

(a) a net worth of no less than 20% of the face amount of the contract;

(b) A profit from contracting operations for at least both of the last two fiscal years preceding the award of the contract, and for at least three of the last five years preceding the award of the contract;

(c) The contractor has not defaulted on any contract awarded him in the last three years.

(4) The contractor provides evidence that he has fully performed contracts of similar work in the state in both of the last two years preceding the award of the contract.

(5) The total amount of all contracts being performed by the contractor during the term of the subject contract, including the contract being awarded under this statute, does not exceed seven times the net worth of the contractor.

(6) The State, or political subdivision, awarding the contract has received bids from at least three other contractors, whose bids are accompanied by a bid bond or who meet the qualifications of this subsection, and the successful contractor's bid is not less than 10% lower than the average of all bids on the same job

(7) The State, or political subdivision, establishes a disbursement procedure wherein:

(a) funds are disbursed in periodic progress payments relating to the amount of work performed to date of disbursement;

(b) No less than 10% of each disbursement is withheld to the end of the contract to assure completion fo the contract;

(c) the State or political subdivision performs such audits and requires such lien releases as is appropriate to assure payment of all employers of and suppliers to the contractor.

766 conditions

provided that:

1) the contractor is, and for two years immediately preceeding the award of the contract has been, a licensed contractor having its principal offices in the state.

2) the contract submits a financial statement as of no earlier than nine months prior to submitting the bid for contract, certified by a certified public accountant showing:

(a) a net worth of no less than 20% of the face amount of the contract;
(b) the contractor has not defaulted on any contract awarded to him the last three years;

3) the total amount of all contracts being performed by the contractor during the term of the subject contract being awarded under this statute, does not exceed seven times the net worth of the contractor.

NOTE FOR HB 766 FILE

Would provide for bonding exemption for smaller construction companies in small communities where these companies cannot afford paperwork involved in qualifying for such bonding.

Sponsor Eliason.

(CSHB 827, Gruening, however, might provide better safeguards for small communities since it would exempt small contractors for up to $500,000 if those contractors could meet certain conditions-- such as not having defaulted over the past three years.)

The Southeastern Conference has recommended that another approach could also deal with the problem. That would be through "personal assurity" which is comparable to co-signing a morgage note.

Richard Block, state insurance, provided much input to HB 766 and to CSHB 827 which he said has received a more careful going over.

Other possible contacts: George Easley and Mike Miller of Dawson insurance.

The bonding requirements dealt with by the bill concern performance bonds.

bfh

5-10-78

NOTE FOR HB 766 FILE

Rep. Eliason said that the bill was requested by the Sitka City Manager and supported by the AML.

He said there was the possibility of AFL-CIO opposition because of labor belief that local companies are greater hirers of non-union labor.

He does not believe this to be the case and is ready to indicate evidence for this in committee hearings.

Eliason believes also that the $250,000 ceiling on the bonding exemption would mean that only small companies in rural areas would be affected. He thinks that Anchorage, Fairbanks, Juneau, and Ketchikan would not have projects falling within that monetary range.

He was not supportive of the concepts in HB 827 which would list a number of conditions which a small contractor would first have to meet to qualify for the bonding exemption. He said that these conditions amount to three pages of requirements and would be onerous.

SENATE COMMUNITY AND REGIONAL
AFFAIRS COMMITTEE MINUTES

April 4, 1978

Present: Senators Orsini, Hackney, Sumner and Willis; Janet McCabe, Federal-State Land Use Planning Commission; Rynnieva Wescott, Fairbanks Town & Village Assoc.; Pat Conheady, Department of Natural Resources; Walt Parker, Federal-State Land Use Planning Commission; John Katz, Federal-State Land Use Planning Commission.

Absent: Senator Ferguson

Senate Bill 562 and House Bill 795 were the bills before the committee.

Chairman Orsini called the meeting to order at 3:02.

HOUSE BILL 795

Rynnieva Wescott, Fairbanks Town and Village Association for Development, Inc. stated that there were four basic goals of the program: 1) To develop a comprehensive program for public works projects in their region 2) to establish a closer multi-agency communications and coordination within communities 3) to create provisions for reduction in construction leave time and cost of public facilities and 4) to insure the capital improvements budgeting reflects the economic development goals of local decision makers and residents. She also stated that the Rural Capital Improvements Program was involved in long range economic development planning in an area consisting of 240,000 square miles with 45 small communities in the area. There are 32 organized municipalities and the rest are run by traditional village councils. She stated that the Rural Capital Improvements Program was basically funded by state money though it has a planning grant from EDA that includes the entire district. It also receives planning money from the borough for planning within the borough.

Chairman Orsini asked whether state money was being used to plan development of private enterprises. Ms. Wescott replied that Town and Village Assoc. works with village corporations to assist in planning and helps in finding funding for the corporations' projects.

Chairman Orsini stated that this bill would come before the committee again for furtner discussion.

SENATE BILL 562

Janet McCabe, Federal-State Land Use Planning Commission, stated that the Commission had assisted the Senate Resources Committee and the Administration in preparing this bill for the disposal of approximately 50,000 acres of state lands annually into private ownership. She stated that the Commission supports SB 562. She

gave a background of state land use up until the present. She also went over the three main sections of the bill and outlined the intent of each section. The Committee members, Ms. McCabe, Mr. Walt Parker, Commission Co-Chairman and Mr. John Katz, Commission Attorney discussed the municipal land selections, wilderness permits and the means by which Stated trust lands could be used for income producing purposes.

Chairman Orsini stated that this bill would also be held in committee for further discussion. The meeting was adjourned at 4:10 p.m.

SENATE COMMUNITY & REGIONAL AFFAIRS
COMMITTEE MEETING

April 18, 1978

Present: Senators Orsini, Willis, Hackney and Sumner; Cherie Shelly, APEA; Jon Scribner, Department of Environmental Conservation; Lowell Swartz, Department of Health, Education and Social Services; Richard Peter; Robert L. Cole, Department of HESS; Robert L. Stewart; Greg Mackyowsky, Code Revision Commission; Bob Van Houte, NEA-Alaska; Richard Holden, Department of Transportation and Public Facilities; Janice Gates, Department of HESS.

Absent: Senator Ferguson

Senate Bill 373, relating to public information regarding collective bargaining by public employees; Senate Bill 533, relating to planning of public facilities for municipalities; Senate Bill 183, relating to alcoholic beverages and House Bill 795, appropriations for Fairbanks Town and Village Assoc., for Development, Inc., were the bills before the Committee.

SENATE BILL 373

Chairman Orsini stated that there was a committee substitute for this bill which covered most of the testimony that was heard on the bill. Senator Hackney moved that the Committee pass out SB 373 with individual recommendations.

HOUSE BILL 795

Senator Hackney moved that the Committee pass out HB 795 with individual recommendations.

SENATE BILL 533

Jack Chenoweth, Legislative Affairs Agency, explained the committee substitute draft to the Committee members. Section 1 is from the original bill. Section 2 derived from draft provided by Richard Holden, DOT, requiring that there be a state-wide comprehensive facility procurement plan done by the Commissioner. He also explained that he had defined "public facility", which was of some concern to the Committee last meeting. Section 3 expands upon the public responsibility of the Department of Community and Regional Affairs in this process.

Chairman Orsini stated that he would like to pin down the concepts and make the initial changes in the bill Thursday.

Janice Gates, Department of HESS, called attention to the Committee that on Page 2, Sec. (d) dealing with health care facilities that "in communities without such facilities", was confusing and unnecessary. The Committee discussed the rest of the items on that page and it was brought out that there was other language that was not particularly necessary. The language would be revised for Committee consideration on Thursday.

Richard Holden, DOT, stated that a repealer, which states that highways and ferries are not a "public facility" was left out of the work draft.

Senator Sumner expressed concern regarding the health care and social services facilities in private finance facilities. He stated that there were serious questions regarding the "certificate of need" and whether that is not some sort of self-regulating opportunity. He also stated that he wanted to make sure that if "certificate of need" and planning were not tied together in this bill that they are not tied together in practice as well.

Jon Scribner, Department of Environmental Conservation, with regard to the water and sewer system section of the bill, stated that DEC has a program in which it works with local communities and the communities themselves set the priorities on their water and sewer systems. In that regard, he stated, the Department was unsure of how this kind of program fits in with this particular bill. He went on to explain that the Department has an Advisory Committee, which the Legislature set up last year that sets money priorities for villages in this program. Mr. Holden stated that there was a solution to this problem, because most of the agencies have some sort of peculiarity with e.g. source of federal funds. He stated that in one of the earlier committee meetings Senator Sumner suggested that a clause go in the bill that Administrative regulation draft to implement this legislation be developed by each program agency for that particular programing and approved by them before promulgating it.

Chairman Orsini stated that he would like to have a new draft drawn up incorporating some of the concerns expressed and again stated that the final adjustments would be made Thursday.

SENATE BILL 183

The Committee had a draft committee substitute drawn up and Jack Chenoweth, Legislative Affairs Agency, pointed out some of the differences in the proposed draft and the original bill. He stated that he generally went throughout the bill and cleaned up where the references were. He explained that he added language, at the Committee's request, giving municipalities greater authority with respect to the renewal or new applications for a liquor license. Chairman Orsini suggested that there should be some requirement to prevent the ABC Board from taking action on applications in that 30-day period. Mr. Chenoweth stated that the only way a municipality can disapprove an application would be with a local ordinance. He stressed the validity of that ordinance as it could be subject to a law suit.

Mr. Chenoweth stated that he tried to shorten and simplify the language of the referendum ballot language that is actually put before the public to determine liquor sales within a community or municipality.

He explained section 04.15.438 which would give a municipality the option of staying wet but with the sale of non-distilled alcoholic beverages only, such as beer and wine.

In reference to penalties, Mr. Chenoweth stated that on Page 16, line 2 "may" was changed to "shall". This was done so that on a third violation there would be no question, the license would be revoked and the operation would be closed. Mr. Robert Cole, Department of HESS, pointed out that in changing "may" to "shall" that it should also be done on Page 15, line 28 referring that the board, council or assembly "shall" revoke a license upon the direction of the majority of its members upon the first and second violations.

Senator Hackney added that "consective" terms for violations should be put into the language.

The Committee also instructed Mr. Chenoweth to prepare a separate bill, to be introduced by the Committee, containing Section 9 and the Section on Limitation of Sales from the CS of SB 183. The resulting new legislation would deal only with municipal authority, in the CSSB 183.

The Honorable Lisa Rudd
Chairman
House Community & Regional
Affairs Committee
Alaska House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Chairman Rudd:

Thank you for the opportunity to testify this morning on HB 795. I appreciated the breadth and depth of knowledge and understanding demonstrated by the members of the committee and I hope my answers were satisfactory.

Before continuing, I'd like to express my personal appreciation to Representative Brown of Fairbanks and his staff for assisting me in the preparation of these materials.

With respect to those questions the committee asked me to address in this letter, I have prepared the following statements for the committee's information:

1. With respect to our current cash balances in the RCIP Budget, the Association's bookkeeper has provided me with a cash flow statement through February 29. This is attached as ATTACHMENT #1.

2. Rynneiva Wescott, Project Coordinator for the Association, has advised me that remaining funds in the following budget line items will have been fully expended by March 30, 1978 for purposes stated on ATTACHMENT #2.

3. Budget items not so obligated, or expended by that date, are being held for purposes stated on ATTACHMENT #3.

4. The Rural Capital Improvements Program was originally contemplated as a two year program and I apologize to you for failing to mention that to you in our discussions prior to the hearing.

If we had the $75,000.00 originally appropriated by the Legislature, we would have been able to prepare a final report by late April. The final report would have included:

a. An updated list of community facilities in each community in Interior Alaska. This list has evolved and has been refined during the past three years. It provides the basic data for our regional development efforts in those areas outside the Fairbanks North Star Borough.

b. A summary and preliminary analysis of questionnaires received from each community. (Copies of this questionnaire are available in the interim report.)

c. A preliminary statement on the condition of existing facilities in each community with notes, where appropriate, on glaring deficiencies which need immediate attention by reason of their hazard to life and or property.

d. A current list, as of the publication date, of capital improvements which are scheduled for construction in each community by public and quasi-public agencies of government during the subsequent three years. Including an opportunities list for combining projects for the purposes of reducing construction and operation costs.

e. A status report on each community's discussion of economic development issues and questions affecting their community.

f. A statement of preliminary conclusions and recommendations concerning the first year's work, and a detailed work program for the second year.

5. Obviously the interim report falls far short of what we contemplated for the first year's final report. The $37,500.00 we are now requesting will enable the Association to complete our first year's work.

6. Finally, Madame Chairman, though we know what the subject of the final report will be, the second year's work is still tentative in terms of how we plan to do the work. To a large extent we do not want to detail our work in the second year until we have completed the final report on the first year's work, and have a better understanding, therefore, of how to best organize our available resources.

We do have a budget prepared for next year's work and a copy is enclosed for the committee's information as ATTACHMENT #4. We have advised Representative Cowper and Senator Sackett--both of whom represent areas served by FTVAD--of our request and are awaiting their advice on how we should proceed to properly bring it before the Legislature.

7. With respect to the "subject" of the final report. The Fairbanks Town & Village Association for Development, Inc. is involved primarily with long term regional economic development; professional planning and project development assistance to Fairbanks and the 45 smaller communities within the Interior; and, finally, development of public works financing.

The RCIP is aimed at the last item. The second year report will list a project, or projects, in each community which is needed by the community, desired by them, which is financable in terms of both construction and operation, will not disrupt desirable life styles and will contribute to the community's own efforts toward community development.

Since this program, though administered by DCRA, has to do with public facilities, a question may arise concerning our relationship with the State's Department of Transportation and Public Facilities. Over the years the Association has worked very closely with the officers and staff of both the former Departments of Public Works and Highways and the current Department of Transportation and Public Facilities, both in planning and in project development and financing.

We intend to continue this important relationship throughout the duration of the Rural Capital Improvements Program, and beyond.

I hope these statements have fully answered the committee's questions. I may remain in Juneau until the committee reconvenes on Wednesday morning and, if so, I'll be able to answer further questions.

Otherwise I'll be at my office in Fairbanks at 452-4761.

Thank you again for your consideration.

Sincerely,

Jerry Smetzer
Executive Director

I. INTRODUCTION

A. Purpose

The Rural Capital Improvements Program (RCIP) was initiated in November, 1978 through a legislative appropriation to the Fairbanks Town and Village Association for Development (FTVAD). The program was established to meet three primary needs.

Item One: To identify and prioritize needed capital improvement projects in forty-six rural communities as assessed by residents in each community.

Item Two: To encourage and assist the forty-six villages in the study region to begin community growth and economic development planning.

Item Three: To identify the existing infrastructure of the villages, to enable state and federal planners to make informed decisions on the scheduling of construction programs in each community.

B. History

The concept of the RCIP was developed as an out-growth of the Rural Impact Information Program (RIIP), which was initially set up to monitor the effect of the Trans-Alaska Pipeline Project on rural Alaska.

The results of that project, summarized in The Impact of the Trans-Alaska Oil Pipeline on Rural Communities in Alaska's Interior, dated June, 1977, illustrated the need for a major investigation into the development needs of rural Alaska.

Initial funding for the RCIP came as a legislative appropriation to the Department of Community and Regional Affairs, in the amount of $37,500. The original request amount was for $75,000, but was reduced during the final budget process.

A full-time project supervisor was hired under contract to FTVAD in November, 1977, to establish a workable format for data collection; hire and supervise sub-regional consultants; and establish primary communications with the communities in the study region.

In late November and early December, consultants were hired to work in the United Crow Band, Ingalik, Kutchin and Tena sub-regions of the Tanana Chiefs Conference. A series of workshops were held in December in McGrath and Fairbanks to familiarize village council, city council and local government specialists with the working format and objectives of the RCIP.

Following the training workshops, the RCIP questionnaire was sent to each of the communities within the FTVAD/TCC region, with instructions and advisory notes on the method of completion.

Sub-regional consultants were instructed to follow-up with contacts to each village to assure completion of the survey forms, and to update information contained in the RIIP Community Facilities Summary (CFS), issued in June, 1977.

C. Methodology

Techniques used in the information collection process of the RCIP were based on the use of an "open end" questionnaire and direct contact to significant community leaders, to obtain first hand observations of rural needs.

The initial questionnaire (Appendix A) was drawn from other survey forms used by the University of Alaska Institute of Social and Economic Research (ISER), various state agencies, and various consulting firms which develop comprehensive community plans. In addition to standard economic and planning questions, the form included broad category

questions on the Alaska gas line, subsistence, and community economic development planning.

These questions were phrased in such a manner as to encourage public discussion on the potential effect of development in these general categories.

In subsequent discussions with the State Department of Community and Regional Affairs, Commerce and Economic Development, Department of Environmental Conservation, and Transportation and Public Facilities, it was decided that additional and expanded questions on these and additional subjects be included for a second phase look at each community.

Subject to full response by each community, the data contained in the survey form will be incorporated into the CFS, and a draft Overall Economic Development Program prepared for village review and comment.

II. SCOPE OF SURVEY/OBSERVATIONS

A. FTVAD/TCC/Doyon Region

The Rural Capital Improvements Program survey program is directed at forty-six villages contained within the Tanana Chiefs Conference/Doyon Limited boundaries. This area is further sub-divided into four Athabascan regional administrative units.

These regions are: Crow Band Region, with an administrative center at Tok; Kutchin Region, with Ft. Yukon as the historical center; Tena Region, with the Tanana-Galena axis as the historical center; and the Ingalik Region, with McGrath as the administrative center.

Of the communities included in the study, twenty-three are incorporated second-class cities; three are first-class cities; and the remainder are governed by traditional native councils. Specific communities are listed in Appendix B.

B. Sub-Regional Responses:

Because of limited responses to the questionnaires, to date, it is difficult to present a clear picture of community needs and perspectives on economic growth and planning. The obvious limitations on communications and transportation, plus the different levels of village awareness to growth problems makes evaluation of responses a largely subjective effort. No valid statistical interpretations can be made, until a significantly larger sampling is obtained.

However, based on existing responses, it is possible to generalize some few observations:

1. Communities that have had some measure of continuing communication and transportation access to urban centers view economic expansion as desirable and positive for their interests.

2. Communities historically remote from urban centers see economic expansion as threatening and eventually destructive of cultural and community integrity. Most of these communities give high priority to preserving their subsistence lifestyle.

3. There is a uniform distrust of larger governmental structures, despite a contradictory dependence on these same agencies for provision of what are viewed as "essential" programs.

4. There is an increasing need for rural communities to be trained and informed as to roles and functions of all aspects of government.

5. All communities see a degree of need for community planning. However, much of this "planning" is viewed as an outside attempt to influence economic expansion, often at the expense of local desires.

6. Capital construction in the study communities has a tendency to be based on needs which may not be internally generated. This, in turn, gives rise to a "shopping list" approach to projects, without an understanding of the long term effect of said project on the community's structure.

C. Findings by Sub-Region

1. Crow Band: 11 villages

This area will be significantly affected by construction of the Alaskan Gas Pipeline, and the attendant population influx. Some degree of community and native corporation planning is being generated, but lack of firm data on project start-up dates and supporting programs has made the effort, to date, largely speculative.

Questionnaire responses indicate an awareness of greater job and investment opportunity, with an improved potential for early conveyance of native lands. The negative effects of pipeline construction center on changes in community structure and lifestyle, an overburdening of existing

service agencies, and a major shift in population. Further, one remote village (Healy Lake) questions such problems as trespass, damage to native lands, and a direct impact on subsistence activities.

The community of Eagle also feels that the construction effort may have an adverse effect on the tourist industry, and may result in forced improvements beyond that desired by the individual communities.

A separate question was asked concerning the effect of economic development on subsistence activities. Generally, the answers were vague, and did not specifically address the effect of growth on the subsistence way of life.

Where a community saw reason to favor economic development as a means of improving an individual's status, they did not connect those changes with long term impact on hunting, fishing or trapping as an alternative economic concept. The failure to make this connection may be a reflection of lesser dependency on subsistence activity than in other regions, but insufficient data exists to substantiate this point.

A general listing of needed capital projects was solicited, with results varying according to the relative awareness of the respondent. Some answers included programs and proposals beyond the scope of capital projects, and ranged to social service programs, and private sector development.

No attempt is made, in this report, to tabulate community needs for general projects. Such data will be included, by village, in the final project summary.

An attempt to assess local ability to fund for projects was sought, but the responses indicated a uniform dependence on external funding sources (grants and direct subsidy).

2. Kutchin Region 10 villages

To date, two responses have been obtained from the communities in this region.

Although some of the lands within this region will be used for the gas pipline, village perceptions of its effects and benefits remain minimal. It is reported that several of the village corporations in the region are investigating joint venture opportunities, and there is some discussion of the creation of a third-class borough to encompass the villages in the region.

At present, no effect, beyond residential employment is seen as a derivative of the pipeline construction effort. The primary negative effect of the construction effort is the loss of skilled workers by each village.

Economic development in the region is viewed as a positive influence, in the creation of more jobs, and a general upgrading of individual standards of living. No perceived effect on subsistence styles is noted, with the exception of potential depletion of existing physical resources.

Capital projects listed by the two communities responding include electrical power generation, medical facilities and new or improved community offices and public use facilities. No local financing alternatives were reflected, indicating a continuing dependence on external public funding.

3. Tena Region 12 villages

Questionnaire responses from this region are limited to individual statements completed during village training sessions in early December. Because these responses were for exemplary purposes, to enable the local governments to more effectively consider the question of economic development and planning, the generalizations should not be viewed as indicative of any official position.

Subsequent to the sub-regional training session, the Galena City Council approved the responses submitted by the City Manager, at that time. While the data presented is a fair reflection of needs, it must be judged on the limitations placed during training.

As in the other regions, needed projects covered the range of power generation, health and community recreational facilities to road and sewer and water improvements.

Overall perspectives towards growth and development were marked by a conservative attitude of local determination, with severe restrictions on outside participation.

Where there is an apparent need to develop certain industrial bases, a uniformly negative response to expansion of the tourist and recreational potential was observed.

Local industrial and/or economic growth is desired in the agricultural, fur, timber and fisheries areas, with expansion of energy programs viewed as significant to all areas.

All communities responding showed a continuing dependence on external funding sources for start-up and maintenance of projects, with limited awareness of local taxation options.

Many of the attitudes reflected in the survey responses hinge on the continuance of a subsistence lifestyle, despite a contradictory desire for programs and facilities which may generate pressures to move the villages into a cash economy, and away from the other closed lifestyle.

4. Ingalik Region 9 villages

One response has been garnered from the communities on the Kuskokwim and Lower Yukon Rivers. Other responses were, as previously noted, provided during the December training sessions, and continue to reflect attitudes prevalent in the Tena region.

Little direct benefit is seen from development of the Northwest gas pipeline, aside from individuals gaining employment. Incidental negative impact is seen in delays in shipment of goods and provision of services to areas outside of the primary construction effort.

No clear perception of the effects of economic development are apparent. It should be noted that the phrase "economic development" if left undefined is generally viewed as externally influenced growth, generated by non-residents seeking definite financial gain.

A clear divergence of opinion exists as to the desireability of such "economic development", which clouds the perception of community goals and planning.

In large measure, these communities perceive a need for fundamental education in the basics of local government, community administration, and in development of a more effective planning process.

Generally there is a stated need for development of some industrial activity on the local level, but with safeguards to community and culturally derived standards. This area echoes most of the communities in the Tena region in their opposition to recreational and tourist related

growth.

Area willingness to defray costs of capital construction is virtually non-existent, because of the absence of a revenue base. Projects contemplated must be funded by grant or direct subsidy.

III. Summary of Activity

To date, the RCIP has dealt with the study communities through individual (telephone and letter) contacts, and the monthly publication of a newsletter. The bulk of the contact has been in response to inquiries about specific problems or programs. For example: The village of Allakaket sought the assistance of the RCIP in resolving a fuel shortage problem that occurred during the week of February 13.

Although this office was unable to do more than advise parties concerned of actions pending, the apparent communications function did facilitate an earlier resolution of the problem than would have resulted had no contact been made.

Further, this office has been active on a continuing basis in working with the Tok area in scheduling and planning for an Alaska Humanities Forum program on Gas Pipeline Impact on April 8 and 9. While much of the planning does not specifically address capital improvements, the obvious connection is in the areas of overall economic development and growth planning.

This office has assisted the villages of Nikolai and Healy Lake in their attempts to gain funding for completion of village electrification programs and is exploring means of obtaining funding for a community recreational program in Beaver.

It should be noted that during the life of the Rural Capital Improvements Program, many issues have been raised which do not appear to be directly related to village capital construction programs. Because of the apparent need, however, by rural residents, to have direct contact with responsible agencies, the RCIP has assumed some of these advocacy roles.

IV. CONCLUSIONS AND RECOMMENDATIONS

The effective performance of the Rural Capital Improvements Program hinges on the confidence that village residents are capable of placing on it. To this end, it is imperative that all survey and attitudinal data be collected by on-site contact.

A recurring comment by workshop and training participants, as well as the sub-regional consultants, is that they do not feel "comfortable" rendering decisions away from the concensus bodies of their home villages, and that they will not see the final utilization of whatever data is produced.

Since the RCIP is constituted to address community planning, as well as the immediate capital construction needs, a minimum of one day spent in each of the forty-six villages for "hands on" experience is necessary.

Further, to avoid the appearance of organizational indifference, sufficient weight must be given to each village's perception of needed programs, thereby underwriting community involvement in the planning process.

Appendix A contains representative responses from communities in each region.

Fairbanks, Alaska 99707
Phone (907) 452-4761 Ext. 278

MEMORANDUM

TO: Board of Directors, FTVAD

FROM: Jerry E. Smetzer, Executive Director JES

SUBJECT: Fairbanks Town and Village Association for Development, Inc. - Accomplishments

DATE: March 16, 1978

As you know, questions often arise concerning the effectiveness of the work of the FTVAD staff and whether or not the investment in the program is being repaid directly or indirectly to Fairbanks and the surrounding rural communities.

As we go into budget negotiations during the next couple of months, the names of people contained in this memo should help you provide answers to those questions. We are constantly involved in project development efforts which are not known to the public generally and perhaps are not even known to most Board members. However, the projects listed in the Overall Economic Development Program for Fairbanks and the Interior of Alaska (OEDP) are approved by the Board and generally describe what those projects are all about.

If you want a current status report on any project listed in the OEDP, please contact the responsible officer listed for that project at the FTVAD offices, 452-4761.

Because we work with so many people and institutions in order to accomplish our goals and objectives it is probably impossible to determine the degree to which our efforts contributed to the success or failure of a particular project.

What I feel we can do, however, is to list some projects generally known to the public which we have been actively involved in, and give you the names of some people who we have worked closely with on those projects.

FTVAD staff has been involved in many projects throughout the Interior, but for the purposes of this memo, I am listing projects inside and outside the Fairbanks North Star Borough, which I am personally familiar with. Ms. Wescott can also advise you of her work. Though she is no longer employed by FTVAD, I am sure Ms. Janice Farrell would also be happy to discuss her work with you.

The projects are listed by project title and page number as they appear in the OEDP.

Category 1. TRANSPORT DEVELOPMENT

INSIDE FAIRBANKS NORTH STAR BOROUGH

We have not included the Joint Use Air Cargo Facility which we are generally associated with inasmuch as a great deal of development work still reamins to be done before the project will become a reality.

1. Terminal Sewer Line - Page 61

   The project was designed to establish sewer and water utilities at the Fairbanks International Airport. College Utilities plans to construct these lines this summer. Estimated Construction Costs: $4,000,000.

   Contacts:

   Bob Bettisworth
   George Gordon
   Don Harris
   Chuck Meggitt
   Dick Greuel

2. Jet Fuel Supply and Servicing - Page 63

   This project is a key project in the development of the Fairbanks International Airport and has to do, primarily, with the installation of a hydrant fueling system in order to establish jet fuel prices at FAI which are competitive with Anchorage.

   On March 1st, Commissioner Harris stated at a meeting in Fairbanks that if sufficient fuel purchases by air carriers can be demonstrated that the State of Alaska DOTPF would pay for the installation of a hydrant fueling system.

   The following people are familiar with our role in this: Don Harris, Dr. Wood, Terry Palczer, Richard Wien, John Carlson, Fred Pratt.

   Estimated Construction Cost: $1,500,000.

Within this category, one airport project we became involved with does not appear in the OEDP. That project involves the construction of an 80,000 sq. ft. fast mail facility adjacent to the site of the proposed joint use air cargo facility.

That project has been financed and is now being designed and will be constructed as soon as possible.

Our primary contact on the project was Wayne Schley, Staff Assistant to the Post Office Committee, U. S. Senate in Senator Stevens' office. Additional contacts include Galen Gransbury and Otis Dean of the Post Office, Bill Biden, Wien Air Alaska, and Bruce Kennedy, Alaska Airlines and Chuck Meggitt, former Airport Manager. Estimated Construction Cost: $10,000,000.

OUTSIDE FAIRBANKS NORTH STAR BOROUGH

1. Local Service Roads and Trails Program - Page 64

   This program provided supplemental federal financing for ISR&T road projects in about 15 rural communities. Our primary contact on this project is Bob Thomas and Mike Tinker, DOTPF, Fairbanks; John Widdis, DOTPF, Nome; John Sackett, Galena; Rudy, Adolf and Hamilton Hamilton of Shageluk. Completed Construction Cost: ~~$600,000~~ 500,000

Category 2. COMMUNITY FACILITIES

INSIDE FAIRBANKS NORTH STAR BOROUGH

1. Airframe and Power plant Addition to Hutchison Career Development Center - Page 110

   The man most knowledgeable on our role on this project is Don Berry who administers the A & P instructional program and, of course, Clyde Courtnage, EDA Representative of Anchorage, who developed EDA funds for the project. Completed Construction Cost: $1,250,000.

2. South Side Water - Page 71

   The purpose of this project was to seek federal funds for the purpose of supplying South Fairbanks residential and industrial areas with city water.

   The project was recently approved by the City of Fairbanks with funds from the federal Economic Development Administration.

   FTVAD staff worked closely with Bob Burg, Dick Greuel, Wally Droz, Candace Magnuson, and Bob Wolting on this project. Estimated Construction Cost: $2,300,000.

OUTSIDE FAIRBANKS NORTH STAR BOROUGH

1. Tok Multi-purpose Building - Page 112

   Charlie Biederman, Executive Director of the Upper Tanana Regional Council on Alcoholism is most knowledgeable on this issue. Estimated Construction Cost: $2,300,000. $240,000

2. Also, some projects in this category do not appear in the OEDP which FTVAD became involved with and assisted in securing funds. Those include:

Shageluk - Construction of a 120' span bridge, 2.5 miles of roadway to the airfield and construction of village streets. Tundra Construction of Fairbanks was awarded the contract. Jonathan Widdis of the DOTPF Nome office, Senator John Sackett and Mike Harper and Ron Lind of the Governor's Office are familiar with our role in this project. Estimated Construction Cost $600,000.

Galena - Construction of a municipal garage. People to contact for information include Roger Huntington and Henry Mitchell of Galena and Clyde Courtnage, EDR, Anchorage. Completed Construction Cost: $237,530.

Nulato - Construction of a health clinic. Project will go to bid this month. Information sources include Andrew Demoski of Nulato, Duane Anderson of R & M Consultants in Anchorage, Henry Mitchell of Alaska Legal Services in Galena and Clyde Courtnage. Completed Construction Cost: $238,000.

Tanana - Construction of a fire station. Project to go to bid this month. People knowledgeable of our assistance include Mike Andon and Ava Walsh of Tanana, Henry Mitchell, Duane Anderson, Jim Movius, and Clyde Courtnage. Completed Construction Cost: $254,000.

Ft. Yukon - Remodeling and refurbishing the Ft. Yukon Community Center. Gustafson General Contractors of Fairbanks were awarded this contract. Contact persons for this project include Steve Ginnis and Jonathan Solomon of Ft. Yukon, Bob Hesseltine of CH2M/Hill in Anchorage, Henry Mitchell and Clyde Courtnage. Completed Construction Cost: $387,210.

Category 3. ENERGY CONSERVATION

1. Winterization Program - Page 81

The initial purpose of this program was to apply state and federal assistance funds to poorly insulated homes occupied by elderly, handicapped and low-income people within the city and borough.

This very successful program will be expanded this summer to include rehabilitation of low-income homes which are seriously sub-standard within the City of Fairbanks.

We work closely with Bob Wolting, Candace Magnuson, of the City, and we have the full support of the individual members of the City Council, particularly Wally Droz and Joe Marshall who have strongly defended the program in public meetings.

Members of the advisory committee include Walt Schlotfeldt, John Munson, Bea Coleman, Edith Tegoseak and Mabel Hopson. Estimated Project Disbursement to July 1, 1978: $212,000.

Category 4. PETROLEUM RESOURCE POLICY

1. University of Alaska Museum, Fairbanks - Page 87

The purpose of this project was to assist in developing $8,000,000 to finance construction of the U of A Museum.

As you know, the museum will be under construction this summer though with a reduced appropriation.

We worked with many, many people on this project but the people with the most understanding of the problems involved and our role in it included Howard Cutler, Larry Carpenter, Steve Cowper, Mike Dalton, Lou Rowinski, Dave Norton, Paul Metz, Fred Pratt, Rosamond Weller, etc. Estimated Construction Cost: $6,400,000.

2. Pipeline Impact - Page 87

The primary purpose is to develop greater public understanding of impact problems and opportunities and to develop assistance programs within the state and federal governments for local communities which must deal with these probelms.

Originally we were involved with the conduct of two public forums in Fairbanks and the creation of the borough's impact information center and a related program outside Fairbanks called the Rural Impact Information Center. The people who best understand our role in the formation of the IIC include Gene Straatmeyer, Frank Mueller, Don Hart, Joe LaRocca, and Mim Dixon.

Of course, we have gone far beyond the scope of the original IIC into the develoment of major federal impact assistance programs. Most of the people familiar with our role in this aspect of impact are in Washington, D. C. I will be happy to give you their names if you wish. No Dollar Value.

3. Supply, Service, and Support Development for Off-Shore Continental Shelf Petroleum Development in the Beaufort and Chukchi Seas - Page 88

This project is designed to capture major support facilites for Arctic petroleum related development in Fairbanks.

It is within this project that we are assisting others in Fairbanks in capturing gas pipeline related state, federal and Northwest energy offices in Fairbanks.

It is also within this project that we and others have been attempting to secure the joint state federal oil and gas lease sale for the Beaufort Sea in Fairbanks. As you know, Governor Hammond, yesterday, March 16, announced that the sale would be held here.

Dave Norton, Fred Pratt, and Bill Gordon are knowledgeable about our role in this. Several state and federal officials are also knowledgeable. No Dollar Value Has Been Projected.

Finally, I think it is worth mentioning that Chuck Rees gives the Association a great deal of credit for the North Star Terminal Facilities. He has made these statements publicly on many occasions.

Larry Carpenter can also give Alyeska's perspective on our role with respect to North Star Terminals. Estimated Construction Cost: $14,000,000.

If you need more information on our role with respect to these programs, we will try to supply it.

JES:rlf

Ft. Yukon dock facility

This project will include on site study of erosion problems and construction of dock ramp and a 1-acre storage pad. Estimated cost $100.000.

North Pole Industrial Park

The project is to iniate Phase I construction of a sewer, water, power, telephone, road and railroad serviced light-industrial park on a 140-acre site. Also in phase I is construction of a building to facilitate a meat packing plant. When 40-acre park is developed & utilize to full capacity it will create 600 to 800 permanent jobs. Estimated construction cost $800,000.

INTRODUCTION

The Fairbanks Town and Village Association for Development, Incorporated began full time operations in the fall of 1972 with an annual budget slightly in excess of $75,000.00. Funds were provided by the Fairbanks North Star Borough and the federal Economic Development Administration. According to the audit report for the fiscal year ending June 30, 1976, the association spent $144,101.00 for its operations and programs.

However, this audited annual expenditures jumped to $250,000.00 in the period ending September 30, 1977, and it is anticipated that by the end of FY '78 the association will have spent in excess of 1/2 million dollars. Sources of contracted revenues include the borough, the city, three agencies of the State of Alaska, and four agencies of the federal government.

We expect this explosive rate of growth to continue through 1979.

Obviously managing a $75,000.00 budget involving four permanent employees is less complicated than managing our present program, let alone the anticipated growth in that program next year. Accordingly we have developed the attached budget format which anticipates a total budget in excess of a million dollars during FY '79.

Two parameters guide us in developing this budget format: 1) all revenues and all costs of operating the program are shared among "operations," "program categories," and "major projects." There are no hidden assets or undefined overhead costs; 2) the three professional officers - the Executive Director, the Deputy Director and the Project Coordinator - are fully responsible for their respective areas of management and are, by this budget, assigned a fixed share of the support costs in the operating budget for that purpose.

The interested layman, we hope, should have little difficulty tracing the cost of exercising the duties of each of the professional officers in their work on general management, operating responsibilities and program development and management.

Finally, as the budget makes clear there is a minimum amount of money necessary for the existence of the Fairbanks Town and Village Association. Without this money - budgeted in the column marked "overhead" - it would be impossible to manage the several programs of the association.

As such it represents, approximately, the so called "bottom line" below which the Board of Directors must decide whether or not to radically restructure the association, and to decide, more specifically, whether to begin terminating successful programs.

For those who provide funds to the association, contributions to FTVAD overhead should be recognized for what they are: an affirmation of confidence in our work, our ability to competently deliver needed services to the general public and our value to the people and communities of Interior Alaska.

BUDGET DEVELOPMENT

The budget is developed on the basis of operating costs, program management, and individual project budgets. The program categories have been approved by the Board of Directors and are described in the Development section of our current OEDP titled "Overall Economic Development Program for Fairbanks and the Interior of Alaska."

The function of the operating budget has been generally described in the introduction. The budgets for the program categories reflect the full cost of our work in those programs. Each line item reflects the sum of the FTVAD overhead contribution, the sum of all contracted project revenues from local governments in the Interior, all state agencies, all federal agencies, and all non-gove tal sources.

Individu ject contracts, though not directly reflected in this budget, are or ll be in the project files in the association's offices.

Overhead costs are determined on the basis of the equivalent staff time allocations described in the technical notes on page __.

Since this is a planning budget we have made several assumptions concerning sources of operation progam and project revenues. We fully expect that at the beginning of the new fiscal year on October 1, 1978, we will have a revised planning budget which will reflect actual contracted revenues and negotiated budgets as of that date. The format, however, will remain the same.

Monthly cash flow reports will generally follow the same budget format in terms of operations and program categories. However, within those categories month to date, year to date and % encumbered will be shown by contract source, title, and number.

CATEGORY 1: TRANSPORT DEVELOPMENT

Fairbanks has always considered itself the supply and service center for Interior and Northern Alaska. The development of improved transportation systems in these areas will always be a priority activity with the Directors of the Fairbanks Town and Village Association.

Interior and Northern Alaska rely almost entirely on aircraft for year round transport of goods, services and people. Air is supplemented by river and sea going barge operations during the few summer months. Within this category of activity therefore, our goal is to improve these two dominant modes.

Summary of Project Titles

CATEGORY 2: COMMUNITY FACILITIES DEVELOPMENT

Implementing a successful capital improvements program that will facilitate infrastructural needs of a community in a timely and cost efficient manner requires an analysis of local economic problems, a development scenario, a facilities inventory, community involvement and a closer multi-agency communication.

These factors constituted action by the FTVAD Board in March, 1977 to coordinate the Capital Improvements Program listed in our work program under Alphameric Code 2.Pr.A. and includes the composition of a community profile for each population center in the FTVAD district. Community profiles for thirty-two of the forty-five communities in our region are complete.

Capital improvement projects included in this category are infrastructural requirements as determined by the municipality involved with concurrence of the FTVAD Board of Directors.

CATEGORY 3: ENERGY CONSERVATION AND HOUSING REHABILITATION

Because of the temperature extremes in Interior Alaska and the high cost of fuels, the Fairbanks area seems a natural target for energy conservation programs.

In the summer of 1976, the Rural Community Action Program staff requested assistance from the Town and Village Association in providing home weatherization to low income families within the Fairbanks North Star Borough. The borough administration also asked the association to provide this program to borough residents.

The project was approved by the association's regional Board at its December, 1976 meeting.

Another facet of the Energy Conservation Program is waste heat (excess energy) utilization. The two feasibility studies approved by the association Board can supply data to cap this energy now being discharged in the atmosphere and water bodies from pipeline pump stations, power plants, refineries and other future manufacturing plants to be used as energy to operate fish hatcheries, commercial greenhouses, forage dryers, pulp mills, vegetable dehydration plants, tanneries, etc.

Summary of Project Titles

1. Energy Conservation
2. Winterization Program
3. Waste Heat Utilization
4. Pump 9 Waste Heat
5. Pump 6 Waste Heat

CATEGORY 4: PETROLEUM RESOURCE POLICY

Because of the massive impact of rapid petroleum resource development on the short and long term stability of the community, the question of the appropriate response by the general public and by government has occupied much of the time and attention of the association since its formation in 1972.

The primary vehicles developed to deal with this question involved continuous information processing oriented toward the information demands of business, government and individuals throughout the Interior.

The information base thus developed will be enormously valuable in anticipating the short term problems and opportunities which will accompany the construction of a natural gas pipeline.

However, a great deal of work remains to be done in this area if Interior Alaskans are to gain more than transitory benefits from future petroleum development in Alaska.

Summary of Project Titles

CATEGORY 5: WORK FORCE DEVELOPMENT

In the spring of 1975, the Fairbanks Town and Village Association was asked to help plan, seek funding for, and coordinate the Community Forum on Growth. Two additional staff members were hired under a grant from the Alaska Humanities Forum and the well-attended forum was held in May. The final analysis showed that Interior residents wanted more information about what effect the "pipeline boom" was having on the community. They wanted to be able to take advantage of opportunities and to minimize the adverse effects of this largest-ever construction project. They asked that more attention be given to the human element when development was being planned. The Work Force Development category was incorporated into the work program and was adopted by the Board at its March, 1977 meeting.

Such projects as the Fairbanks Rehabilitation Center and the Senior Citizen Center have since been adopted under this category.

CATEGORY 6: RENEWABLE RESOURCE DEVELOPMENT

Each year as the world population increases and as the export of food becomes a major bargaining force in foreign policy and balancing the national economy, more agricultural land is required to meet the demands.

Alaska is virtually the only state of the union that has idle agricultural land for production. There are approximately 15 million acres of arable land suitable for agricultural production in Interior Alaska.

Agriculture can supply the economic base needed in most bush villages while it simultaneously supplies the village residents with a stable diet. Many village corporations such as Minto and Manley Hot Springs selected lands under ANCSA entitlements specifically for their suitability to agricultural production.

The initial OEDP published in the spring of 1974 addressed agriculture as an important aspect of economic development but little has been done to set strategies for development until the December, 1976 FTVAD annual Board meeting and the March, 1977 semi-annual Board meeting.

Recent emphasis on natural resources in Alaska has been addressed to petroleum, a non-renewable resource.

The Natural Resource Development program initiated in the original OEDP has been divided into two programs to develop a timely and productive strategy for agriculture, forestry, aquaculture and the fur industry.

1. Petroleum Resource Policy will focus on the development of non-renewable natural resources.

2. Renewable Resource Development will include strategy programs, capital improvements projects and technical studies critical to the development of renewable natural resources.

INDIRECT COSTS ASSIGNMENTS

Most agencies of government and many non-profit corporations who receive contracts to perform services from local, state and federal governments usually charge a fixed "overhead" or "indirect cost" fee on all contracts. This overhead represents the cost of maintaining the experienced staff, space, equipment, and associated resources which are necessary in order to be able to provide these services.

Government agencies which are created by law and supported by annual financial appropriations have much less of a problem with overhead than does a non-profit corporation such as the Fairbanks Town and Village Association which was created by private citizens and must rely on contracted revenues and public financial support to overhead costs whether or not they are performing contracted services against which "overhead" or "indirect costs" fees can be assigned.

Because of the multiple contracted revenues to the Association which are currently in force, and because of the complexity of managing the contracts, we have begun, with this planning and management budget, to devise a method of assigning a variable indirect cost to our contracted revenues.

We believe this approach is preferable to the "fixed overhead" fee which has too often been abused because of the ease with which such overhead can be shifted into other administrative areas which have nothing to do with the contract against which it was assigned.

Furthermore, there is, among federal and state grant-in-aid programs, little consistency in the proportion of such grants that can be assigned toward the cost of administering the programs. Highly desirable programs may be impossible to administer within allowable administrative cost restrictions. When this kind of situation occurs there should be, we feel, some method of calculating the total overhead costs inovlved in administering a desirable program.

Only in this way can we realistically balance the benefits to the general public of a particular program against the limited available administrative resources which will be consumed in the management of it.

COMPUTING EQUIVALENT STAFF TIME COSTS

Equivalent staff time costs are based on a derivation of total annual operating costs using certain percentages related to professional time costs, and clerical, administrative and operating costs. Determining equivalent staff time costs helps in understanding the full costs of staff work, and in allocating administrative resources to projects and to the legal requirements and general obligation of the Fairbanks Town and Village Association.

It should be noted that the "Annual Operating Costs" from which these computations are derived does not reflect the total annual revenue and expenditures of the association. The annual operating costs are the costs of maintaining a permanent staff, offices and operations. Additional revenues are generated each year from project related grants which are usually limited in scope and duration and not necessarily renewed each year.

Project related grants which have been received or are firmly committed as of the publication date are listed as "Supplemental Financing" in the individual project descriptions.

A. The derivation of "Equivalent Staff Time Costs" for FY '79 is as follows:

a.	Total Operating Budget	$302,100.00
b.	Monthly Operating Budget	23,175.00
c.	Weekly Operating Budget	6,042.00

B. The annual operating costs are divided into two categories:

1. Professional Time Costs:

   These are evaluated based on the total costs of salaries and benefits for the association's three professional staff officers as a percentage of the total operating budget.

   For FY '79 professional time costs are projected at roughly 35% of total operating costs and are broken down as follows:

a.	Annually	$105,735.00
b.	Monthly	8,811.00
c.	Weekly	2,115.00

2. Support Costs:

   After deducting the costs of professional staff salaries and benefits from the operating budget, the amounts remaining are called the "Support Costs."

   For FY '79 support costs are projected at roughtly 65% of total operating costs and are broken down as follows:

a.	Annually	$196,365.00
b.	Monthly	16,364.00
c.	Weekly	3,927.00

C. The final element in deriving equivalent staff time costs is the allocation of a percentage of the total available support costs to each professional officer based on their share of professional time costs.

   For FY '79 these percentages are projected as follows:

Executive Director	Deputy Director	Project Coordinator
36%	34%	29%

D. The following table, therefore, yields projected equivalent staff time costs for FY '79:

	Executive Director	Deputy Director	Project Coordinator
Professional Time Costs	$38,500.00	$36,300.00	$30,800.00
Support Costs	70,691.00	66,764.00	56,946.00
a. Annually	$109,191.00	$97,564.00	$93,246.00
bc. 4 man/weeks	8,736.00	7,804.00	7,460.00
c. 3 man/weeks	6,552.00	5,853.00	5,595.00
d. 2 man/weeks	4,368.00	3,902.00	3,730.00
e. 1 man/week	2,184.00	1,952.00	1,865.00
f. 1 man/day	437.00	390.00	373.00

When accompanied by the staff time allocations assigned following our annual OEDP approval by the Board of Directors, the equivalent staff time costs are the tools used by the staff to determine the full costs of allocating the two primary resources of the association, professional skills and administrative support, to our planning and development work in the Interior of Alaska.

STAFF TIME ALLOCATIONS

Staff time allocations are professional judgements by the association's three professional staff officers on how they each expect to spend their time during the coming fiscal year. Staff time allocations are determined following approval by the Board of Directors of the coming year's Overall Economic Development Program and the projects, program, and management responsibilities which constitute the work program.

Once assigned at the beginning of the fiscal year the staff time allocations and the equivalent staff time cost factors provide the staff, the Board, and the general public with a constant cost/benefit and progress analysis for each of the association's activities.

This analysis is reported by means of progress status reports which are prepared by each of the professional staff officers once every six months.

Since it would be premature to develop staff time allocations this far in advance of the beginning of FY '79, we have, for the purposes of this planning budget, confined ourselves only to the annual allocations and the program category allocations.

Those are as follows:

Annual Time Allocations	Annual Average	40 hrs/week	50 weeks/yr
Executive Director			
Staff supervision	10%	4	5
Operational requirements	20%	8	10
Community interaction and conferences	10%	4	5

NOTE FOR HB 855 am FILE

Per Annette Smith, H C/RA, HB 855 am was made retroactive to July 6, 1976 for the following reason:

The original language of the statutes was passed at that time, but it was tacked on to a Senate bill. The attorney general ruled, after the legislature passed the bill, that the legislation violated the two subject proviso. Therefore this legislation has been under a legal cloud.

HB 855 am was first included in HB 483, municipal code revision, but Lisa Rudd felt the subject was important enough to be addressed separately.

The retroactivity, then, was provided to insure that any action taken after 1976 would not be legally jeopardized.

Jack Chenoweth prepared the draft and researched the subject.

LEGISLATIVE AFFAIRS AGENCY

MEMORANDUM

March 17, 1978

SUBJECT: HB 855: relating to public corporations and other instrumentalities of municipal government. (Work Order No. 5187)

TO: Representative Lisa Rudd, Chairperson
House Community and Regional Affairs Committee

FROM: John B. Chenoweth
Legislative Counsel

You have posed four questions with reference to HB 855 which bear upon the use by local governments of public agencies as a means by which to issue obligations on a tax-exempt basis. HB 855 would re-enact provisions of AS 29.59, specifically authorizing public corporations or like instrumentalities established by municipal governments to issue obligations in order to fund the costs of construction of public facilities. The reasons favoring re-enactment of AS 29.59 are alluded to in my memorandum to Representative Nels Anderson of February 16, attached to this memorandum.

The statutory provision which eventually was enacted into law as AS 29.59 was first drafted during the 1976 session in response to proposed additions to and amendments of regulations by the US Treasury. The changes proposed, incorporated into regulations relating to definition and administration of the Internal Revenue Code, would have defined limits which public agencies established by local governments would have been required to satisfy in order to gain or retain the benefit of tax-exempt interest on the agent's obligations to the extent enjoyed by the obligations of the municipality which were directly issued. The purpose of the proposed rule change was, at least in the view of the Treasury, that public agencies which were issuing the obligations be in actual fact substantially controlled and directed by the local government unit or units in whose behalf they were issuing obligations. In the language of the Treasury-prepared synopsis of the regulations

> In general, the proposed amendments [to IRS regulations] provide that only a constituted authority of a state or local government unit may issue obligations on behalf of the unit. The authority must be specifically authorized pursuant to state law to issue obligations on behalf of the unit to accomplish a public purpose of the unit. The authorization must specify the public purpose of the governmental unit on behalf of which the authority is authorized to issue obligations and also must create the authority or provide that the governmental unit may create the authority. The authority must be created and operated solely to accomplish a public purpose of the governmental unit.
>
> The proposed amendment requires a closer connection between the authority and the governmental unit including control of the authority's board and organizational or supervisory control over the authority of the governmental unit.

AS 29.59 was drafted to respond to the threshhold requirements of the then-proposed federal regulation changes, namely, the requirement that the public agencies be specifically authorized in applicable state law, that they be authorized to undertake or fulfill a public purpose, that the public purpose for which authorized be specified, and that the grant of authority represent a grant for only the accomplishment of that public purpose.

The stringent requirements of the regulations proposed by the Treasury were not adopted. Rather, former provisions of the Code of Federal Regulations relating to tax-exempt interest paying obligations were substantially continued.

The current law on the subject appears to be this --

The applicable statute is 26 USC 103(a):

> (a) GENERAL RULE. Gross income does not include interest on --
>
> (1) the obligations of a State, a Territory, or a possession of the United States, or any political subdivision of any of the foregoing, or of the District of Columbia;. . .

The statutory exemption embraces debt obligations of local governments, whether issued "directly" or "indirectly," that is, through the use of a public corporation as agent:

> Obligations issued by or on behalf of any State or local governmental unit by constituted authorities empowered to issue such obligations are the obligations of such a unit. . . .

and

> The term "political subdivision", for purposes of this section [26 CFR §1.103-1], denotes any division of any State or local governmental unit which is a municipal corporation or which has been delegated the right to exercise part of the sovereign power of the unit. . . .

26 CFR §1.103-1(b).

I

Your first question -- whether the same concerns which prompted introduction and enactment of the legislation in 1976 are still of concern -- is probably better answered in the negative. The stringent requirements which the Treasury was suggesting in the amendments and changes mentioned earlier in this monograph have not been adopted and are not now under active consideration. Assuming that the principal factor motivating HB 674's introduction in the 1976 session was to obviate anticipated challenges to the authority of agencies or corporations established by local governments in Alaska to issue tax-exempt obligations for the benefit of the local government -- and I think it is a fairly good assumption -- the apparent urgency of the situation then does not control or affect events now.

II

The answer to the first part of your second question, insofar as it applies to tax-exempt obligations in general (exclusive of the problems of the use of industrial development bonds), is likewise "no." The Treasury, in 1976, did not adopt the regulations as contemplated at that time; the existing body of regulation -- including, of course, revenue rulings and the body of case law -- has been continued forward with few substantive changes.

III

Your third question departs from further examination of applicable regulations of the IRS. It presents the question of whether there is a state constitutional "check" on the establishment of public corporations or agencies by Alaska municipalities to undertake public purposes. Your question cites the general statement of policy contained in Article X, sec. 1 of the state constitution, which recounts the philosphy underlying the existing local government article:

> The purpose of this article is to provide for maximum local self-government with a minimum of local government units, and to prevent duplication of tax-levying jurisdictions. A liberal construction shall be given to the powers of local government units.

The reference to "units" in this section is unusual -- the term appears nowhere else in the article. The next following section, section 2, describes the requirement that "all local government powers . . . be vested in boroughs and cities," to the exclusion of any other kind or species of local authority having the very important power of taxation. By virtue of the interposition of the phrase "powers of local government units" in section 1 and the requirement imposed by section 2 that full local government powers devolve only upon boroughs and cities, and based upon the transcript and record of proceedings of the constitutional convention, I conclude that the use of the word "units" in the first section was intended to embrace only the two general types of local government authorized. It was not thought that the limitation would apply to the establishment of mechanisms by the local government units themselves after they were incorporated. Quite the contrary: the powers of local government units were intended to be liberally construed (Art. X, sec. 1), and the authority of a political subdivision to establish a public enterprise or public corporation in furtherance of legitimate public purposes is at least alluded to in Article IX, sec. 11, and appears there and in commentary in the record of the constitutional convention without restriction as to number or kind of agency. In short, I believe that the state constitutional provision enunciating a policy of a "minimum of local government units" may not be understood to be a limitation on the use of public enterprises or corporations -- public agencies, generally -- to supplement direct provision of public services by local governments. Other circumstances or conditions may compel that conclusion: the constitutional provision cited, in my opinion, does not.

IV

Your concluding query requires examination of tax-levying authority under AS 29.59 and existing limitations on the authority of local governments to levy property taxes. The tax limitations of AS 29.53.050 appear to be inapplicable to taxes of a public corporation or similar public agency established by a municipality under authority granted by AS 29.59. There is no direct relationship between the two statutory provisions mentioned such that the limitations section of AS 29.53.050 need be extended and made applicable to public agencies. The grant of authority set out in AS 29.59 does not extend to the public corporation or similar instrumentality the right to levy taxes. That right is limited, by the state constitution, to the levy and collection by cities and boroughs only. Thus, the right of the public corporation to issue obligations on behalf of the municipality for public purposes, if understood as having the effect of using the public corporation as a "front" for the municipality, cannot circumvent the limitation on delegation of taxing authority only to cities and boroughs, requiring the municipality to raise necessary revenues to pay off obligations of the corporation within the general limitation of AS 29.53. Similarly, if the right granted be seen as one by which a public corporation is authorized to issue its obligations for public purposes in furtherance of the responsibilities of municipalities, the grant of authority does not carry with it the right to levy and collect taxes for the purpose, and concern about conflict with AS 29.53 is unfounded. (The latter is analogous, at the local level, to the relationship between the State and ASHA, a public corporation: ASHA bonds are strictly revenue bonds; ASHA is not authorized to offer obligations on the strength of the full faith and credit of the people of Alaska, nor is the State legally obliged to bail ASHA out of any financial embarrassments.) In summary, in no instance can I conceive of a public corporation established under AS 29.59 having a valid argument on which to enforce a levy in excess of that provided for generally in statute.

V

I do not want to leave points 1 and 2 of this paper without mentioning two other matters:

While it is true, of course, that the failure of the IRS to adopt the regulations proposed in early 1976 constitutes a change of circumstance over the intervening two-year period,

it is equally true that, apart from AS 29.59, there is no generally applicable provision by which a city or borough is granted authority to establish a corporation or instrumentality to use as an agent in the issuance of debt obligations on its behalf. I am not aware that any Alaska municipality has placed reliance on the provision in the two years it has appeared in the statutes. Repeal of the provision, or even non-alteration, probably poses no problem. However, though AS 29.59 was drafted and enacted under circumstances quite different than those presently known, to the extent that a clear statement of authority for the establishment of a corporation for the purposes indicated is desirable, the provision does serve that purpose. The committee will, of course, enunciate the policy: I did not want to leave the impression that, because circumstances have changed, the statute no longer serves a useful role.

Secondly, I want to caution that this memo is not intended to address or suggest disposition of the issues which surround the very complicated subject of tax treatment of the interest earned on industrial development bonds. (In requesting your questions in writing, I wanted to try to assure that the questions could be answered in a manner which did not require extended treatment of the handling of industrial development bonds, a relatively more common means of involving public purpose financing through the intermediary of a public corporation, but one which is, in terms of tax-exempt eligibility, far more complicated.) The tax-exempt status of industrial development bonds -- defined, generally, as bonds whose proceeds are used in an activity engaged in for profit by other than a governmental unit or other than an organization exempt from tax (i.e. corporations with nonprofit status under §501(c)(3)) and on which either the payment of the principal and interest is secured in whole or in part by property to the payments received from the property are pledged for the payment of principal and interest -- is subject to far more extended and extensive limitations that those of bonds which would be issued by public corporations or instrumentalities whose existence is authorized under AS 29.59.

I trust that this fully responds to your questions.

February 16, 1978

SUBJECT: Brief history of AS 29.59

TO: Representative Nels A. Anderson, Jr.

FRO: John B. Chenoweth
Legislative Counsel

My recollection of the circumstances relating to the adoption and taking effect of the bill embodying this provision is this:

In mid-session of 1976, Bob Dupere called to the attention of the Senate Community and Regional Affairs Committee the proposal by the IRS to tighten regulations defining the tax-exempt status of public corporations. Dupere has, of course, a working knowledge of municipal finance with respect to Alaska's local governments, and appreciated the potential problems that would have been presented under the particular changes then under consideration by the IRS. His suggestion to meet the problems was to make clear that municipalities had the authority to establish public corporations for carrying out specific municipal purposes, to protect the tax-exempt status (insofar as that was possible) of these creatures in the event local governments determined to make use of public corporations to meet public purposes or needs. At the time, as I recall, the possibility of establishment of a public corporation for hospital care was under active consideration, as, I think, was the proposal to use municipal authority to provide public services to major industrial users.

At any rate, the bill was drafted and presented. Committee members endorsed the attachment of the provision to a bill offered by the governor making technical amendments to the existing authority of the Alaska Municipal Bond Bank Authority. I do not recall whether the provision was added on to the governor's bill in anticipation of possible veto of the same provision standing alone, or whether it was added because, on that day, the governor's bill happened to present itself as a handy vehicle. That is where it was put -- but in redrafting the bill to carry the amendment, the draftsman neglected to conform the title.

The governor signed the bill into law. However, in a most unusual move, his transmittal letter to the Legislature pointed out the problem posed by the failure to limit the bill to one subject and to conform the title to the substantive provisions of the amended bill:

> "I have signed the following bill and am transmitting the enrolled and engrossed copies to the Lieutenant Governor's Office for permanent filing:
>
> SENATE COMMITTEE SUBSTITUTE FOR
> COMMITTEE SUBSTITUTE FOR
> HOUSE BILL NO. 674
> amended Senate (Chapter 56, SLA 1976)
>
> Even though I have signed this bill into law, I have been advised by the Attorney General that the inclusion of Sec. 4 in the bill violates Article II, Section 13 of the Alaska Constitution. This provision requires that bills are to be confined to one subject and that the subject be expressed in the title. Accordingly, the Attorney General has advised that Sec. 4 of the bill is void and of no effect.
>
> I am bringing this matter of the Attorney General's advise (sic) to your attention so that those legislators who were relying on Sec. 4 to accomplish some objective may be notified as to its probable effect. Those legislators may then want to take appropriate action such as introducing new legislation to cover the subject set forth in Sec. 4 of the bill."

1976 House Journal, at p. 1280.

I have to question why the Attorney General determined that only section 4 of the legislation, that section adding what is now AS 29.59, was "void and of no effect" -- why, in fact, the entire bill was not tainted with the same objection -- and whether, for that reason, the opinion rendered to the governor is correct. Nevertheless, it is the closing paragraph of the governor's transmittal letter which the provision designated "*Sec. 13" in the original version of HB 483 is intended to address.

Assuming that the governor's statement, based on the attorney general's advice, is correct, then it seems that you have two courses open: Repeal AS 29.59 or re-enact it, with or without substantive amendment. At least as to any municipality which may have acted in reliance on the section, or which may in the future, I think it desirable, in response to the governor's invitation, that the legislature act, for inaction only maintains the "cloud" on AS 29.59 first pointed out in the above-cited transmittal letter.

NOTE FOR HB 873 FILE

This bill was introduced at the original request of Fairbanks North Star Borough Mayor John Carlson through the Alaska Municipal League.

Carlson's specific problem is that his Attorney and Staff Director both earn more money than he does.

As far as assemblymen are concerned, there is the problem that no assemblyman can receive a raise that he voted for during his term of office. Therefore there is the anomaly of half of an assembly receiving a lower salary than their recently elected peers.

RE: CS For House Bill No. 873

Dear Senator Orsini:

I would appreciate your review of CS For House Bill No. 873 "An Act relating to the salaries of elected municipal officials." This piece of legislation allows for compensation of mayors of municipalities and members of the assembly or council to have their compensation fixed annually by ordinance. Under the present legislation, the compensation of these individuals "may not be changed during a term in office." This causes a problem in that a mayor elected for a three-year term cannot receive a cost-of-living adjustment during his tenure in office. Also an assembly or city council member cannot have their compensation changed during their tenure in office. During budget time, there is a feeling to adjust compensation for assembly or council members but this is not done as it would affect only the newly elected officials at the next election. What would happen if a salary change were adopted is a large percentage of the assembly/council would be compensated less than the newly elected officials. The amendments, as proposed in CS HB No. 873, would allow the compensation to be changed making it uniform throughout the entire council or assembly.

Sincerely,

JOHN A. CARLSON
Borough Mayor

F. HB 873.

March 27, 1978

Re: HB 873

The Honorable Lisa Rudd
Chairman
House Community & Regional
Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Chairman Rudd:

In our borough, a second-class borough, there are twelve (12) elected officials; mayor, elected-at-large; four (4) assemblymen, elected-at-large from the area outside the City of Ketchikan; a seven (7) assemblymen appointed from the City Council. As a second-class borough the provisions of AS 29.23.530 apply. All our twelve (12) elected officials have 3-year staggered terms. Under the existing provisions of AS 29.23.530 in order to effect an entire salary change for all elected official positions, three elections must take place before all members are receiving the same salary.

A Ketchikan Gateway Borough Assembly salary change (from $100 to $150) commenced with the October, 1975 election and will be completed when those elected in October, 1978 take office at which time all eleven will again be receiving the same compensation.

Having observed this transition from $100 to 150 per month, it is apparent that among the elected officials, the procedure involved is a point of irritation as all have the same responsibilities.

I believe there are sufficient checks in our local government structures to preclude the actions of elected officials from becoming actions directed toward overt personal

gain at the expense of the local taxpayers. Those local governments to which the existing requirements apply are those smaller municipalities where actions of the elected officials are constantly subject to very close public scrutiny. Elected officials salaries must be set by ordinance on which public hearings are held, these salaries are included in the annual budget on which public hearings are held, and the appropriations needed to pay these salaries are made by ordinance on which public hearing are held.

Therefore, I am of the opinion that the present provisions of AS 29.23.530 are unduly restrictive and I support HB 873 as proposed.

Sincerely,

Judith A. Slajer
Borough Manager

RE: HB 873 "An act relating to the salaries of elected municipal officials"

Dear Ms. Rudd:

I wish to present testimony in favor of passage of HB 873.

Having had the privilege of being elected a full time Borough Chairman in October of 1968, when the budget was set in June of 1968 for a part time Borough Chairman, I found that compensation could not be increased because of the wording in the statute. I am very happy to see HB 873 introduced as this would amend this restriction.

I concur that wages should not be decreased, as a person running for that office naturally would expect to receive the compensation shown in the budget, but should, on the other hand, not be restricted from receiving just compensation for his efforts.

Very truly yours,

JOHN A. CARLSON
Borough Mayor

ALASKA MUNICIPAL LEAGUE

204 N. Franklin St. Juneau, Alaska 99801 (907) 586-1325

April 10, 1978

Representative Lisa Rudd, Chair
Community and Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Representative Rudd:

We are writing with regard to HB 873. Although this currently effects only two of our members, Fairbanks North Star Borough and Kenai Peninsula Borough, as more municipalities grow, we may have more.

I think that some of the concerns of the committee are real, and I would therefore suggest an amendment.

On line 73, strike the period after office, and continue the sentence by saying "unless by ordinance generally applicable to all personnel employed by a municipality".

The result would be that salaries may not be reduced during a term of office unless by ordinance generally applicable to all personnel employed by a municipality.

It would appear to us that this is fair as it provides:

1) The official could receive a raise as the Assembly saw fit.

2) It provides for a reduction as it would apply to all municipal employees.

3) It still provides that the salary may be adjusted up or down before the next term begins.

4) It also provides that there will not be any discrimination in establishing salaries for the official.

We appreciate your time and consideration.

Sincerely,

Jim Rolle
Executive Director

JAY S. HAMMOND, GOVERNOR

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

OFFICE OF THE COMMISSIONER POUCH B – JUNEAU 99811

June 1, 1978

The Honorable Joseph L. Orsini
Chairman, Senate Community and
Regional Affairs
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

It is the Department's opinion that HB 913 will accomplish two things:

1. HB 913 will make the promulgation of regulations for the Day Care Assistance Program mandatory rather than permissive.

The Department has no objection to this change since regulations have already been drafted and should be set in place by this summer. Public input concerning changes will be open through July 31. However, we feel this change is purely academic as regulations are already being written.

2. HB 913 will severely impair the Department's ability to ensure competent administration by a subcontractor on the local level.

The Department is opposed to this change. While the Statutes (AS 44.47.250-310) require the Department to administer the Day Care Assistance Program, HB 913 would severely impair our ability to do so. To administer the program adequately, we feel the Department must have the authority to ensure that the Day Care Assistance Program Administrator, whether subcontracted or not, has the ability to serve the clientele effectively. In addition, certain minimum performance standards, as set forth in our proposed Day Care Assistance Program regulations, are necessary to best serve families in need of assistance, such as the accessibility of the administrator to the public. (If the committee feels that the $100,000 minimum grant clause for authority to subcontract is inappropriate, the Department will delete this from the proposed regulations in line with your recommendations).

Since the Day Care Assistance Program benefits low-income parents, we are very concerned that poor administration of the Day Care Assistance Program would affect the parents receiving this assistance.

We have found this to be the case in the past when subcontractors have not administered the program in an acceptable manner. We have also found that contractors rely heavily on the Department to train the subcontractor and monitor the program, and the contractor does very little, if anything, of this nature.

Due to the above stated reasons, the Department opposes this bill.

Sincerely,

Lee

Lee McAnerney
Commissioner

6-1-78

Re CS for HB 913

Jim Rolla said that the AK Municipal League supports the CS + the legislature since it would get DCRS out of the business of over-seeing municipal contracting for day care services. Therefore the League did support the bill and the concept behind it.

However Rolla was concerned that the language in the bill could prevent the State from directly administering day care programs in cases where a small municipality, which did not wish to undertake the administration of day care contracts, opted out. Rolla would like language, presumably in Sec (6) that would instruct the State to undertake direct day care programs where a municipality was not involved — either in a outside of an organized borough.

Bill.

CS FOR HOUSE BILL NO. 913

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to day care programs."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 44.47.250 is repealed and re-enacted to read:

Sec. 44.47.250. POWERS AND DUTIES. The department shall

(1) implement and administer a program to assist in providing day care for the children of low-income families according to the requirements of secs. 250 - 310 of this chapter;

(2) establish standards of eligibility for day care benefits;

(3) contract for the care of children of eligible families;

(4) establish procedures to periodically review the needs of families receiving day care benefits;

(5) contract with consenting municipalities to perform its duties under secs. 250 - 310 of this chapter within those municipalities; a municipality may subcontract with another organization in the community to perform administrative duties; [w/ approval of department]

(6) contract with day care facilities outside of municipalities; to provide more effective administration of programs in the unorganized borough, the department may contract with another organization in the community or with an organization serving the region in which the community is located to perform administrative duties;

(7) adopt regulations necessary for the performance of its duties under secs. 250 - 310 of this chapter.

* Sec. 2. AS 44.47.260 is amended to read:

Sec. 44.47.260. LOCAL PARTICIPATION. When a contract is made

under sec. 250(5) [SEC. 250(b)(2)] of this chapter between the department and a muncipality, the municipality shall pay the costs of administering the contractual duties within its jurisdiction.

STATE of ALASKA

MEMORANDUM

DEPARTMENT OF COMMUNITY AND REGIONAL AFFAIRS

TO: Eric Lee, Director of Community and Rural Development

DATE: January 23, 1978

FILE NO:

TELEPHONE NO:

FROM: F. Harvey Pitts
Child Care Programs Coordinator

SUBJECT: Recommendations by the Ombudsman in his Octobet 20, 1977 letter to you concerning Dr. Gold's complaint

Herein are my comments regarding the several recommendations for improving the DCAP which were set forth by the Ombudsman:

1. To straighten out any confusion that might have been evidenced in this Fairbanks day care administration, we would suggest you begin the tedious but needed process of promulgating regulations, at least in the following areas:

   A. What is the State's intent and interpretation of "permission to subcontract?" With that permission, is it then the responsibility of the Borough to determine the exact subcontractor?...
   B. ...the procedure of how one should obtain permission for subcontracting is not clear. For example, it calls for "Written permission from the Department" for a municipality to be able to subcontract. Yet, when should the permission, if so desired, be obtained?...
   C. ...Should a municipal government have to substantiate why it prefers to operate the program through sub-contracts as you once intended?...
   D. What does the Department infer by the local administering agency's responsibility to serve eligibles in the designated grant area?...should be clarified. It might make more overall management and planning sense to prioritize eligibles from the start of the fiscal year and apportion monthly subsidies to a determined ceiling..."
   E. ...exact breakdown of State, contractor (or local government) and subcontractor (or local administering agency) responsibility. Appropriate termination procedures for recipients...; methods of accurately informing recipients in a properly designated time frame...; guidelines important for subcontractor's proposals statewide, as well as advertising for new proposals; a spelled-out monitoring effort....

2. ..., we would recommend a clarifying letter be sent to Fairbanks North Star Borough Mayor John Carlson and Fairbanks Borough Assembly Chairman Phil Younkers.

3. We suggest a letter to Dr. Gold...and, by means of this complaint resolution, perhaps a future meeting between you, Pitts, Dr. Gold, the Commissioner and appropriate Borough contacts could take place to iron out personality conflicts that might remain."

As far as I can determine, the above are recaps of the Ombudsman's suggestions with extraneous remarks omitted. The following are my suggestions:

1. First, I am opposed to regulations-any regulations. They are cumbersome, not suited to community variations, and would serve to eliminate the flexibility we have to allow different communities, with unique cultural, traditional and economic needs, to serve their residents the way the local government feels they should be served. Because they have the effect of specific law they predestine a "big brother" approach similar to the federal government's FIDCR which is the prime reason the DCAP program was designed as it is by the legislature. The intent was for a great degree of flexibility. I believe that is why the legislature in its wisdom made promulgating regulations permissive rather than manditory. Indicated by the fact that no funds were appropriated for the promulgation process. That the Department is not required to promulgate regulations, contrary to what Mr. Flavin stated, has been verified by 3 Assistant Attorney Generals. This was the opinion of Dick Bradley (now with Legislative Affairs) when he was with the Department of Law , it is the opinion of Rodger Pegues in the Juneau office of the Department of Law, and is also the opinion of Ivan Lawner, general civil section, of the Anchorage office of the Department of Law. In fact, Mr. Lawner said that courts have held that written guidelines and contracts, such as we have, have been enforced by courts in the same manner as regulations. According to Mr. Lawner, Mr. Flavin is a strong proponent of regulations, but Mr. Lawner too, could not see the need for regulations as recommended by Mr. Flavin. In summary, it my opinion that there is no need for regulations, that they would prove detrimental to the flexability intended for the DCAP by both the legislature and the administration and that we should defer in their promulgation. Perhaps at some later point in time regulations might prove helpful. However, that time would come when history stabilizes the DCAP and not while it is under metamorphosis, certainly not in the near future, if ever. Assimilation of changes into our Day Care Assistance Program Application Manual, and thereby into our contracts, would serve the same purpose as regulations, and would be much more amenable to change with the program.

In paragraph A Flavin recommends that we clarify the Department's intent and interpretation of "permission to subcontract." This recommendation has merit and I suggest we do this in the manual by rewording the 3rd paragraph in Section III on page 2 to read as follows:

> A participating government may choose to administer the program directly, and is urged to do so. However, the Department realizes that extinuating circumstances might exist in smaller or rural communities which would make it necessary for the community to subcontract for another appropriate local agency or group to perform local administrative functions. These functions include: outreach, screening of applicants, eligibility determination, authorization, payment to providers, and monthly reporting. If a community opts to subcontract for administration, it must request from and obtain the written approval of the Department to subcontract prior to execution of the subcontract. In no case will the Department allow a community to opt to subcontract or change the sub-contractor whom the Department has previously approved after a grant is made. Violation of this provision will result in immediate termination of the contract and grant.

I believe this would suffice to clarify our intentions regarding both subcontracting and the need to satisfy the Department of the qualifications of the subcontractor to adequately administer the program.

In paragraph 13 it is suggested that we clarify when permission to subcontract should be obtained. My above suggested change will also satisfy this recommendation, which too has merit.

In Paragraph C the suggestion is that we clarify whether a local government should have to substantiate why it prefers to operate the program through subcontracts. I think this suggestion has merit and I think the answer is yes they should. However, because of community variations I don't believe we will be able to spell objective criteria for acceptable needs for subcontracting that could satisfactorily encompass the entire State. Those guidelines inserted because of the above recommendation should suffice here.

Paragraph D suggests we clarify the intent of the LAA's responsibility to serve eligibles in the designated grant area. This can be done most succintly in Appendix A of the Contracts for Service by deleting the words "to serve all" and replacing them with the words "not to deny assistance to" and adding the words "regardless of the location of the family's residence" to the end of the paragraph so that it reads:

> The Contractor agrees not to deny assistance to families with reasonable access to licensed day care facilities within the Fairbanks North Star Borough regardless of the location of the family's residence.

In this same paragraph the Ombudsman also alludes to prioritizing eligibles and restricting monthly expenditures from the start of the fiscal year. It is my feeling that eligibles are prioritized in

the statute (preference shall be shown to low income and single parent families). Furthermore, establishing monthly maximums would be detrimental to the various communities wherein employment fluxuates by season such as in Petersburg and Kodiak or communities undergoing rapid development and construction. I therefore recommend retaining the stutus quo on priorities and monthly expenditures.

Paragraph E contains a mutiplicity of suggestions:

1. We should spell out the exact breakdown of State, Contractor, and Subcontrqctor responsibility. This is done in the latter half of our manual which is made a part of every contract. Any addition would be redundant, and therefore I recommend no action on this.
2. We should extablish appropriate termination procedures for recipients. At first glance this seems like an excellent suggestion. However, as I thought about ways this could be implemented, several things occurred to me... There are many reasons why clientele terminate from the program. They might marry another person whose combined income exceeds the maximum allowable. Termination in this case is simple - when the client marries, their assistance abruptly terminates. Another client might get a better paying job or might quit working. Again, termination in these cases is simple and abrupt. Perhaps a recipient family is eligible because a non working parent is suddenly incapable of caring for the child(ren) while the parent works either through accidental injury or onset of illness. Eligibility in this case, ceases when the attending physician certifies the incapacipated parent is able to resume caring for the child(ren). Although abrupt, cessation of eligibility in these instances are foreseeable in advance based on information submitted by the client's physician. Therefore, no detailed plan is necessary beyond informing the client termination is a forced cutback as a result of poor planning and administration by the LAA. With our improved monitoring of monthly expenditures this should never happen. But if it does, it obviously will be the result of poor administration of the LAA. Since it is our philosophy to allow as much local control as possible, I believe we should leave this final decision with the LAA. However, since you feel an advance notice of at least 2 weeks should be given prior to termination of assistance, this can be accomplished by adding the following sentence to item #9 in Section V, C of the Program Manual:

   "A minimum of 2 weeks notice must be given to any recipient prior to termination of day care assistance when the recipient continues to meet eligibility criteria."

3. Setting forth guidelines important for subcontractors as well as requirements for advertising for subcontractors are also recommended in this paragraph. Setting forth guidelines for acceptable subcontractors indeed merits implementation and I propose to do this by inserting the following paragraph between the existing paragraphs 3 and 4 on page 2 of the manual:

> The following criteria are established as minimum for approving subcontractors:
>
> A. REQUIREMENTS
>
> 1. Formal training or experience totalling at least four years in one of the helping professions.
> 2. Demonstrated capability to interpret and apply written instructions.
> 3. Demonstrated administrative ability to compute gross income and adjusted net income.
> 4. Administrative experience in program operation.
> 5. Experience or training in office organization or management.
> 6. Experience in administering a Social Service Program.
> 7. Must devote a minimum of 75% of administrator's worktime to the Day Care Assistance Program.
> 8. Administrative duties may not be delegated, person who meets above criteria must perform all administrative duties related to this program.
> 9. Must maintain regular office hours in a facility conducive to serving low income and single parents accompanied by children.

Insofar as advertising requirements are concerned, each municipality's ordinance or"regulation" is quite likely to be individual and distinct. I really believe that we would be infringing on local porrogative if we were to attempt to manipulate their buidding and advertising procedures. And yet, I really agree that the more notice and publicity that the municipality gives in seeking subcontractor proposals, the better the program administration will be. Rather than discount this suggestion, I would like to think about this a bit more.

4. A "spelled-out monitoring effort" is also suggested. I feel this suggestion is redundant since this is covered in each contract, whereinthe Department reserves the right to examine documents related to the program in the body of the Contract as well as in Section V, D, paragraphs 4 and 5 on page 19 of the program manual.

The suggestion is made that "You expand your direct involvement with the public at large " including:

1. selective recipient interviews during field trips
2. public hearings or some public response mechanism from State residents

The suggestion has a great deal of merit, however, staffing and time constraints perclude its implementation. To implement this suggestion would require an additional full time Field Training Officer. However since public input is always a valuable consideration, beginning immediately we will select names on a random basis from recipient files during field trips for monitoring and will telephone a sample of recipients from each community. This will provide a forum for input by those directly affected by the DCAP. In these telephone calls we will stress confidentiality and that the calls are for obtaining public opinion only.

1. It is suggested that you send a clarifying letter to Borough officials in Faibanks regarding Dr. Gold. This you have done.

2. It is suggested that you write Dr. Gold, and that a meeting be arranged between the Director, myself, the Commissioner and appropriate Borough officials to iron out personality conflicts. I have no comment regarding the letter but agree that a meeting with Dr. Gold might prove beneficial if he were to continue to be involved. However, I see no reason to include the Commissioner since I'm sure she has no personality conflict with Dr. Gold. However, I'd like to point out that I don't consider differences of opinion , Dr. Golds defensive tirade in his letter wherein he demanded I apologize to him, a personality conflict. And even if a personality conflict did exist between Gold and myself, I feel I am actualized above petty resentment.

1) Day Care Assistance Program - Frank Flavin, Ombudsman, Eric Lee, Harvey Pitts

Mayor Carlson gave history of day care assistance program thus far and the problems with the subcontracting of it. Mr. Lee gave some in depth background on the program from the state's standpoint. Federal guidelines were not applicable to Alaska, so state set up its own program. Program is geared for the parent, not the child, so parent can go to work or attend school which will leak to gainfull employment. The state agencies should not directly administer the program through social services and has established the grant program with the local government paying the administration costs. The program is not forced on municipalities, but is available if wanted. It was originally designed to be administered in-house. The borough could appro riate the funds for the administration and have the program administered within the borough. They can give the responsibility to the state for the selection of the subcontractor. Mr. Lee felt the borough should operate the program in-house and all the bigger municipalities do. Smaller ones have contracted out to other social service agencies. Brennen asked if the borough was to separate itself from this service, would it still be available. Lee answered there would be no program in the borough, but the city could take over the program. It would be up to the city whether it would be limited to people within the city or not. Brennen asked why the selection of the subcontractor was not totally left to the borough and Lee answer the borough was merely responsible for the cost of it, the state has the final say and sets the guidelines. Lee stated criteria were laid out at the Aug. meeting with the mayor. Criteria are being drafted, will go to public hearing throughout the state and will become part of the Alaska Administrative Code. This is being pushed, but may take time. It will probably not be done in time for the upcoming year and bids. The current manual is the starting point and public hearings will be based on that. The state has to assumethat the proper administrator will be provided for the program. When it is in-house, the qualifications, etc., of the administrator has to be approved by the state. The parents attending question why the assembly did not want the program in-house as they felt it was far better administered. They were told the assembly felt they were overstepping the powers of the borough and it has been proven the voters do not want the assembly to have additional powers.

The parents pointed out this was a job development program, not a social service. The borough will or will not accept the program depending on the conditions and those conditions should be laid out. It should also be decided who the negotiators are to be, the assembly or the administration. The consensus was to set up agreed specifications with the state prior to putting out bid. Providers and recipients will be included in negotiations.

2) Utilization of clerk's office and borough letterhead

Ms. Parr stated clerk's office and equipment was not to be used by assemblymen. A typewriter is available to move into assembly offices. Policy was set for using letterhead only for borough business and assemblymen should have their own stationery for personal use.

3) Code of Ethics

Younker suggested Nordale review ordinance with amendments. Karella felt the enforcement of this could only be done in court. The ordinance states borough employees and elected officials have to check with borough attorney on future job positions if there might be a conflict. Parr suggested an alternative to putting this on the attorney would be to form an ad hoc committee of the attorny and 2 or 3 others. This would not be a standing committee, but formed for each case. Consensus was to form committee to do in depth study of ordinance. Committee to be: Karella, Parr and Brennen - also notify Marshall & Younker.

4) Budget and Community Services Requests

Mayor Carlson stated they are looking at about 8.4 mill rate as the budget presently stands. The assembly needs a definition of TVA's goals. Stringer said TVA will be moving from the borough offices and a meeting of TVA board and the assembly would be useful. One portion of a work session will be set aside for TVA.

Shouldn't some of the sommunity service requests be under P&R budget? Brennen suggested a non-revenue fund for community services. If the fund became large enough, the grants could be funded from the interest. Deisher would like to see a percentage of P&R's budget go toward the preforming arts. Younker believes the P&R commission should be directing how the budget is spent. Stein said symphony and theater are not government function and should not be funded.

Terese Kaptur, Fairbanks Symphony, stated all orchestras are supported in part by some of tax support dollars. They are asking for educational and promotional grant. Mailing list is 150 very small fraction of population. All money would be spent in the borough for the borough. This would not be a continuing request. This is their first request because they have found ticket sales do not cover costs. Average attendance is 600 with tickets at $4.00 general and $1.00 students.

Phil Gilbert, Hospitality House, stated they would continue mental health program as is now and add about 9 needed services. They need 25% match funding and endorsement with state matching fund with 75%.

Brennen stated endorsement can be given to all applicants for grant and state will pick best bidder. They have most of their 25% money and are only asking for endorsement as suitable group for grant. Consensus was that assembly is not qualified to consider this and cannot endorse one group without listening to all.

Linda Hulbert, Adult Learning Center, stated this is non-profit, private organization. The borough does not offer basic adult education program. Provide no charge service and serve Fairbanks and all interior villages. Rural funding comes from native corporations. They are asking for funding for teachers for special classes, i.e., English as second language, GED. State provided $124,000 last year and native corp. $50,000. Younker felt this should be under the school board budget. School board will not get into operating adult education.

5) Chena Wayside

Consensus was not to take it from the state unless it is completed or they will add administrative costs to the offered $269,000.

FRANK J. GOLD, ED. D.
Registered Psychologist
3098 Airport Way
FAIRBANKS, ALASKA 99701
(907) 456-4409

May 19, 1978

Eric Lee, Director
Division of Community & Rural Development
619 Warehouse Avenue, Suite #230
Anchorage, Alaska 99501

Dear Mr. Lee,

This is being written in response to the PROPOSED REGULATIONS for the administration of the Day Care Assistance Program.

The Department of Community & Regional Affairs, Division of Community & Rural Development, is charged with contracting with local communities for the administration of the Day Care Assistance Program; the Department has consistently voiced support for local versus state control of the Program; the Department has held the local community financially responsible for unallowable expenses (as defined by the Division) incurred in the administration of the Program.

Thus, one section in particular is of import and concern in the PROPOSED REGULATIONS: ACC .20(b). In that section, the Department proposes to eliminate the option of subcontracting for communities whose grant is in excess of $100,000. This I find inconsistent and incomprehensible--in fact, discriminatory!

The Fairbanks North Star Borough Assembly has consistently gone on record as being opposed to administering the Day Care Assistance Program "in house". The Assembly has publically stated, on numerous occasions, that it is their wish to subcontract the Program administration. During the current fiscal year, on just as many occasions, the Division has thwarted that publically-elected body's desire.

Four communities are presently receiving funds in excess of $100,000: Anchorage, Fairbanks, Juneau, and Kodiak. Two of these communities are consolidated municipalities with departments designed to handle a variety of health/social services; the third is a second class borough presently subcontracting the Program administration successfully. In spite of findings issued by the Office of the Ombudsman, and in spite of the expressed will of elected officials, the fourth community--Fairbanks--does not fall in either category. Because of the obstinance and arrogance found within the Department, the Fairbanks community has been forced to choose between eliminating the Program and operating it "in house".

Neither the Department nor the Division should allow itself to be placed in the position of opposing the public will; neither the Department nor the Division should allow itself to be accused of dictating unnecessary administrative procedures to a local community; neither the Department nor the Division should allow itself to be charged with authoritarian discrimination.

I request that the Department of Community & Regional Affairs and the Division of Community & Rural Development eliminate ACC .20(b) and allow every local community the option of subcontracting the administration of the Day Care Assistance Program.

Sincerely yours,

Frank J. Gold, EdD

January 25, 1978

Eric Lee, Director
Community and Rural Development

Implementation of
Recommendations of
the Ombudsman

All directives in this memorandum are in reference to your January 23, 1978 memorandum on the subject of recommendations of the Ombudsman in his October 20, 1977 letter to you, concerning Dr. Gold's complaint. You are hereby directed to implement as soon as is possible and practical, within staff time restraints, the following:

1) Insert a clarifying paragraph dealing with permission to subcontract, per your memorandum.

2) Execute an appendix to all Contracts, redefining the term "to serve" as per your memorandum.

3) Add the Program Manual section V C relating to Notice of Termination, as per your memorandum.

4) Subcontractor criteria - Implement the changes that you recommend, with the exception of number 7, under the Requirements, requiring seventy-five percent of the Administrator's work time to the program. This needs to be reworded to allow for flexibility, dependent upon the size and nature of the community involved. Seventy-five percent is certainly reasonable for Fairbanks, however, an area such as Nome, or Kotzebue, etc. it might not be appropriate.

5) Contract advertising - I would recommend that we insert language into our guidelines that require broad public advertising of all subcontracts, and that the Contractor provide us with their advertising plan, with their permission to subcontract.

6) Direct public involvement - Implement your recommendation.

Please advise me when these directives have been carried out.

EL/dt

October 27, 1977

Mr. Frank Flavin
Ombudsman
360 "K" Street
Anchorage, Alaska 99501

Dear Mr. Flavin:

Re: Ombudsman Complaint 77-1421 (findings)

We have reviewed your findings in the above referenced complaint and offer the following responses to specific items mentioned in those findings. Items not specifically referred to, we agree with or do not view as significant enough for comment. All notations are in reference to your Letter of Findings of October 20, 1977.

To set the record straight, page 2 paragraph 3 of your letter states that "he (Pitts) would extend the FY 1977 Contract to the end of September, 1976." This is incorrect. It was the FY 1976 Contract which was extended.

A major point around which you have based your findings and which we have expressed concern in the program administration by Dr. Gold is the question of who may, should, or must be served (page 3).

We would agree that, to an uninformed party, there could appear to be a conflict between the language of Appendix A to the Contract and the Day Care Assistance Manual. The phrase, in Appendix A, "The Contractor agrees to serve all families with reasonable access to licensed day care facilities within the Fairbanks North Star Borough", was included in all the Day Care Contracts after a problem arose in Petersburg with City of Petersburg, as the Contractor, wanting to refuse "service" to persons living in the adjacent community of Kupreanof. "Service", by our definition, means "accepting applications from" or otherwise not discriminating solely on the basis of the geographic location of the individual clients residence.

The phrase referred to in the Day Care Assistance Manual, which is part of the Contract, is absolutely clear that the program is underfunded and that it is not the intention to "subsidize" (as opposed to "serve") all eligible families. We are certain that all contractors and administrators were aware of this fact.

The fact that I specifically reinforced this in person with Dr. Gold is documented in my Trip Report of February 9, 1977 and referred to, by you, on page 6.

You indicate (page 15) that Dr. Gold admits a conflict in philosophy between himself and the Department. As subcontractor his duties were to perform the administrative functions necessary to deliver the required service not to establish policy. If, in fact, his philosophy of the program differed dramatically from that of the State, and his actions did lead to an imposition of his philosophy, there is a serious question of a conflict-of-interest in accepting the subcontract. Dr. Gold's direct and overt actions in the political arena (legislature) were only made possible as a result of information he had access to as a result of his contractual relationship.

As the agent for the Borough and the State, Dr. Gold was acting in a manner contrary to the policies of the agency with whom he was obligated to represent.

In this same regard, we would like to point out that contrary to your statement on page 8, paragraph 5; "During the same time Dr. Gold was testifying against Community and Regional Affairs day care proposals in front of legislative committees", the Department had no day care proposals before the Legislature. Dr. Gold on his own volition was attempting to have a supplemental appropriation introduced.

Much is made of local flexibility, by you, by Dr. Gold and certain by Community and Regional Affairs. On page 4, paragraph 2 you indicate the law "...actually encouraged where applicable.. the local governments to subcontract to a local administering agency." The law is permissive, and permits subcontracting only with the approval of the Department. We can no where find where the law "encourages" subcontracting. You state (page 2) and we agree, that the subcontracting portion of the Statute was designed for rural areas. Fairbanks does not fall in that category.

We disagree with your chronology as portrayed on page 5, paragraph 4. Dr. Gold was instructed verbally (he never requested clarification in writing so it was never given) on more than one occasion that it was not mandatory that he cut off clients already on the program to "make room" for newer applicants with lower incomes. If this were true every program, every day, would need to realign their eligibles with each new applicant. The only requirement was that new AFDC or WIN recipients must be subsidized and an appropriate reserve of funds made available to this group only.

In paragraph 5 of page 5, we feel that Dr. Gold was fully aware that he was not obligated to subsidize all eligible families in the area. His own actions and records will indicate he did not attempt to subsidize all eligibles.

His explanation of short notice to applicants, as stated in your letter, (page 5) was that certain Legislators were working for a speedy supplemental appropriation. It would be considered poor management (and probably illegal) if we were to over expend our funds on the supposition that the Legislature might appropriate additional funds to us in the future. It was no less poor management on the part of Dr. Gold. You indicate that in fact the money was appropriated. We would point out, however, that it was not "speedy" as Dr. Gold anticipated. It in fact was not appropriated until it was too late to be utilized to any extent. Fairbanks utilized only 15 percent of the supplemental.

Your letter reports on page 7 paragraph 3 that:

> "Of the $3,068 in auditable exceptions which Brewer reported on return from her April visit, $822 were cancelled by the Department when adequate back-up paperwork was provided."

We would make note that actually $943.96 was cancelled not $822, as you report. The point is that, much of the paperwork referred to should have been done properly by Dr. Gold in the first place or in the 3-month reviews of applicant files. The matter as to who reimbursed the State is not of concern to us and is a matter between Gold and the Borough.

Page 7, paragraph 4, cites the Department for Mr. Pitts not notifying Dr. Gold of the severity of the actions in regard to denying access to the files Dr. Gold did receive a copy of the letter to Blevins from Pitts and the attached monitoring report by Ms. Brewer which clearly outlines the severity of the problem.

We would agree with the finding that the Department technically erred in that the Director did not directly communicate in writing the problem of noncompliance with Dr. Gold. The procedure will be strictly adhered to on future actions. We submit however, that Dr. Gold was fully aware of the seriousness of the problem. The mere fact that he sent the "rather inflammatory" letter to Commissioner McAnerney is an indication that he felt threatened and was concerned.

The situation as it relates to Barbara Morse was unfortunate. She was the only professional Divisional employee in Fairbanks. She also happened to be eligible for the DCAP. We would agree that this clouds her involvement. It, however, would have required undue expense to the State to have dispatched another employee to Fairbanks to undertake routine actions related to the program. For example, I specifically requested that she obtain from the Borough the information on the bidding procedures. Her activities on behalf of the Department were limited and had negligible influence on the actions taken.

You indicate that despite specific problems outlined in Brewer's April report she indicates an improvement in the administration. Improvement is only relative to the previous level and does not in any way indicate the acceptability of the "improved" level.

Findings:

A. Action found to be arbitrary

Concur in the technical sense that the procedure was not adequately followed. We do not agree that, as a result, Dr. Gold was not made aware of the seriousness of the problems.

B. Actions found to be based upon improper grounds

Item #2 and item #4

Dr. Gold had been told that there may be additional funds available later. It was indicated these would be in smaller amounts if at all.

In page 13 paragraph 1 you state "The Contract does not state, as you say, that not every eligible person in the Fairbanks area must or should be served". We still maintain that it does, in fact, state this. Article XIV Procedures and Guidelines to the Contract states:

> The Contractor shall perform all services in compliance with the procedures and guidelines as outlined in the Department of Community and Regional Affairs Day Care Assistance Program Manual (revised June 7, 1976), attached hereto and made a part hereof (emphasis added), and Alaska Statute 44.47.250-310.

The Manual (which is part of the Contract) states on page 2 paragraph 1

> It is not the purpose of this program to provide free day care to all qualifying for assistance. Current funding does not permit the State to subsidize all eligible families;...

We have previously explained the phrase "to serve" as used in Appendix A.

We would agree with you in the statement that the choice to apportion the total funding on a month-by-month average or not, is one of local flexibility, provided:

1. The interests of the State are protected;
2. The interests of the clientele are protected;
3. The local administrator has justifiable grounds to show the advantages of expending the allocated funds in a manner other than on a monthly programmed annual basis;
4. The administrator accepts the responsibility for his management decisions;
5. That the local management decisions are in keeping with the philosophy and intent of the program.

We are of the opinion that Gold applied his own philosophy to the administration of the program; that he mislead recipients, delegated program authority to inappropriate and unqualified members of his staff and did not maintain necessary supervisory controls; exercised poor judgement in expecting to receive all the necessary funding through political activity and operating the program accordingly; improperly used his position as program administrator in attempts to implement his personal policies and thus, exceeded the bounds of his contractual relationship.

Item #5

Your report consistantly refers to Dr. Gold cutting higher income clients to make room for lower clients as he felt he was obligated to do. Dr. Gold filed Monthly Statistically Reports with our office. We have indicated, and you have acknowledged, they were often late. In addition, they are of poor quality and provide conflicting information. One portion of these forms asks for the number of new families placed on the program during the month by income groups. Dr. Gold's reports indicate that he did add 9 new families in November;

not all in the lowest group, but in groups I,II and III. The reports for December, January, and February indicate that no new families were added in any group. He does not begin adding again until he feels the Legislature might act in March. His explanation and interpretation of Appendix A, that he had to cut recipients in the higher group to make funding available for new applicants in the lower group, does not correspond with what Dr. Gold was actually doing by his own reports.

You also state "Exactly how the reports should be filed, and what route each report should take through what local, Borough and State offices is unclear, ..." The Department Forms Preparation Manual for the program specifically states on page 3: "This Manual outlines the purpose of each of the above forms as well as the steps for their completion and submission to the correct governmental unit or agency." The Manual then continues to do just that for each form. Dr. Gold received this Manual and was trained in its use.

C. Action Found Unfair

It is our position that the Borough acted prematurely in informing Dr. Gold he would receive the Contract, especially, in light of my meeting with Helen Blevins in May. Our relationship with Dr. Gold was completed upon expiration of the Contract with the Borough on June 30, 1977. We felt no obligation to deal directly with him after that date. You indicate that Dr. Gold was surprised that we would not accept him as a subcontractor. His surprise must have been that a State agency asserted its authority, not that his program administration was considered unsatisfactory.

Agency Action Justified

A. Statewide perspective needed and obtained through Community and Regional Affairs monitoring.

Concur

B. Program problems properly outlined by the agency.

Concur. In addition, this experience indicates fault on our part for attempting to work out the problem areas with Dr. Gold and the Borough on an informal basis. Our obvious intent was to maintain a cordial working relationship with both. However, as you have indicated (page 16, paragraph 3), "This same patience also lent to the lack of due process..." We have already revised our procedures and taken corrective actions in this regard.

C. Suggestions for future program advertising and proposal guidelines proper and helpful.

Concur

D. However, heavy-handed the Community and Regional Affairs action to discredit, the Borough chose not to challenge the State's authority and chose to accept its critical comments as basis for not renewing the Day Care Contract with Dr. Gold.

We concur with your conclusion that it was rightfully the Borough's decision. However, we would disagree that we were "heavy-handed". You refer to Dr. Gold's emotionally charged and slanderous remarks before the Assembly as advocacy talents and conclude that "he was not precluded by the State from giving his side of the story." We expressed our position in a straight forward manner, as we feel we have the authority and responsibility to do so.

E. RECOMMENDATIONS

We are, and will continue, to consider the recommendations presented. We offer comments on some of these at this time. Others will necessitate a more thorough review to determine their impact and appropriateness. A lack of comment on these here does not indicate a lack of action. We refer to your recommendations by their reference in your letter.

1. Regulations

We have expressed to your staff our position regarding regulations. It is our experience that regulations tend to restrict program flexibility and create bureaucratic barricades. In review of the first two-years operation of the Day Care Assistance program, we agree that some regulations may be appropriate and have began an examination of the same.

The drafting and implementation of Statewide regulations cost approximately $10,000. We will discuss submission of this in our Budget to the Legislature, where they can indicate their desire for regulations or not.

2. Letter to the Borough

Concur

3. Letter to Dr. Gold.

No comment.

SPECIAL FINDINGS

Since you chose to comment on the appropriateness of the A-95 Grant Review and approval system, we would also comment:

This Division (not related to the Day Care program) has for many months been promoting a more efficient, extensive and comprehensive review process.

We would disagree that comments by agencies should only relate to that agency's experience with the Contractor. If this held true, a new applicant would receive no comments, either positive or negati

This agency reviews several grant applications each month on a wide spectrum of subjects. They are reviewed for clarity, objectivity, budget soundness, contractor history, need for project, inter-relationship of the project to others, relationship to stated admini stration policies and philosophy. This is totally appropriate and in fact, absolutely necessary to objectively evaluate the merits of each proposal.

In summary, we feel the investigation of the complaint was conducted in a manner satisfactory to us. Your assistant, Kathy Allen, was very courteous and cooperative in her dealings with this office. Although, as we have indicated, we do not totally agree with your interpretations on some matters, we do completely agree with your final conclusion as stated in your October 21, 1977 letter to Dr. Frank Gold:

> Please understand that we (Ombudsman) are not in a position to determine whether or not you should have, or should now receive the subcontract for the Fairbanks North Star Borough's administration of the Day Care Assistance program this next year. We believe that position is not one that our office can should, or would want to take in light of our own statutory jurisdiction and responsibilities.

Sincerely,

Eric Lee

Re: Ombudsman Complaint 77-1421
(Findings)

Dear Mr. Lee:

Please be advised that the above-noted complaint has been investigated and has been found to be a partially-justified complaint. However, based on conversations with my assistant, I believe we can come to a mutual agreement regarding future action in this case.

The complaint, filed by Dr. Frank Gold of Fairbanks, alleged that your office improperly and unfairly prevented him from obtaining a contract to administer the Day Care Assistance Program within the area of the Fairbanks North Star Borough. Letters from your office to the Borough Assembly and the Borough Mayor became the basis upon which that governmental body determined not to award a second year's day care contract to Dr. Gold.

Dr. Gold has charged that action, based on erroneous grounds outlined in the letters, was an abusive overextension of the State's authority in administering monies for the program.

We have reviewed the files, both in Anchorage and Fairbanks, interviewed several administrators of the day care program, Community and Regional Affairs personnel, Fairbanks officials, day care assistance recipients, and of course, Dr. Gold.

As the entire complaint and resulting situation is to be considered by the Borough assembly again soon, we find it appropriate, and hopefully helpful to all parties, to detail the history of this day care assistance administration in Fairbanks; our findings regarding the Division of Community and Rural Development; and our recommendations, based on those findings. Our intent, by means of the recommendations, is

to afford an impartial look at the record, set that past record straight, and hopefully, to suggest improvements for this needed program.

SUMMARY OF BACKGROUND RECORD

After the Fairbanks Borough determined there was need for day care assistance, as provided for in AS 44.47.250, the Borough began implementing its own program through funds provided by the Department of Community and Regional Affairs.

The program was administered directly by the Borough through the end of 1976. Due to a transfer of the Central Child Care Coordinator's office from Juneau to Anchorage in the summer of 1976, a timely approval of the FY 1977 Day Care Assistance grant to the Fairbanks North Star Borough was not possible until September, 1976. In a letter dated August 26, 1976, F. Harvey Pitts, the Child Care Coordinator, stated he had received the application for the next year's program funds. At that time, he said the proposal "appears in order and has my approval", but said until the final authorization came through, he would extend the FY 1977 contract to the end of September, 1976. It is important to note here that a copy of that letter was sent to Dr. Frank Gold, who had previously signed a contract with the Borough to begin administering the Day Care Assistance Program on July 1, 1976. Although the FY 1977 contract from the Department to the Borough was not finally approved until September 24, 1976, it was backdated to become effective July 1, 1976.

The Borough, State and Dr. Gold's files all are in agreement that Dr. Gold began administering the Day Care Assistance program in July of 1976. He had not solicited the contract, but rather, he had been approached and asked by borough officials if he would be interested in a contract. He was interested and soon took over full administration of the program.

Regarding legislative intent concerning the statute requiring the Department's permission prior to subcontracting, the record and your recollection of this provision indicate the inclusion was aimed at rural areas. Fairbanks is not a rural area, but the law does not distinguish a difference, between urban and rural areas, thus letting the Fairbanks Borough Assembly opt for subcontracting.

In FY 1977, (contract signed in September, 1976) there was no discussion of the merits of in-house versus subcontracting the program, nor was there any request or demand for permission to subcontract. The reading of the law at the time and the

interpretation up until this past May was that "permission to subcontract" meant the State could allow a municipal government to move the Day Care Assistance Program administration out of its own offices and subcontract. The involvement the State had in the actual subcontractor choice was negligible, at least according to the Borough's interpretation and the 1976 experience.

After a month and a half of program administration, Dr. Gold found he had more applicants than he had anticipated money for the rest of his contract term. Part of this reason was the expressed desire of the State that the program be advertised widely in the North Star Borough area. And, examination of the contract, the regulation manual and the statute are in conflict regarding what the responsibility of the administrator actually is in meeting the demands of all those applicants that qualify for the assistance.

The statutes potentially (from AS 44.47.250 through AS 44.47.3.0) allow for the Department to establish guidelines for parent eligibility, provides for subcontracting the assistance program administration, and sets out the parent responsibility in finding a licensed day care facility for his or her child. It does not directly address how eligible families are to be cut from the program.

The Day Care Assistance Manual (page 2) states: "It is not the purpose of this program to provide free day care to all qualifying for assistance. Current funding does not permit the State to subsidize all eligible families; therefore, lower income families will be given priority."

The contract between the State and the North Star Borough as well as the subcontract between the North Star Borough and Dr. Gold, however, both contain the following section (5) as part of Appendix A, which is to be considered a part of both contractual agreements:

"(5) The contractor agrees to serve all families with reasonable access to licensed day care facilities within the Fairbanks North Star Borough."

Observing that he had reserve money to fund AFDC and WIN recipients, and in light of the aforementioned conflict in interpretation limiting subsidies amongst eligibles, Dr. Gold chose to exercise the flexibility called for in the Day Care Assistance Manual's stated purposes and goals of the program. These purposes, directly quoted, are:

"The act gave responsibility for administration of the program to the Department of Community and Regional Affairs in the hope of encouraging local government participation in the delivery of day care services.* The Department will contract with local communities for direct program administration in order to allow as much local responsibility as possible while assuring the requirements of the law are met."

Where the law gave the department responsibility for allocating its appropriated funds, it also allowed -- and actually encouraged where applicable -- the local governments to subcontract to a local administering agency. The law (AS 44.47.250 (b) (2)) requires C&RA's permission to subcontract; the manual and subsequent contracts call for that permision to be in writing.

Less than one month after the State and Borough had firmed up their mutual contract for FY 1977 funds (on September 24, 1976), Dr. Gold determined that the contractual amount would be far short of the Fairbanks North Star Borough's demand. On October 18, 1976, he wrote to Pitts requesting an additional $70,000 to $100,000 to meet the needs projected for the entire fiscal year. Pitts responded in an October 20, 1976 letter that an additional $22,125 was allocated to the Fairbanks program. He stated, "The problem is, of course, insufficient funding to accommodate all persons eligible for Day Care Assistance." He further suggested that a maximum monthly mean subsidy be established as a monthly ceiling. This would allow for continued funding of AFDC families for the entire year. Pitts stated that after the additional October allocation, there would be "no more additional funds which can be made available" to the Borough during fiscal '77. He suggested that to stay within the monthly ceiling allocations, Dr. Gold curtail assistance beginning with those recipients in the higher income groups.

On October 26, 1976 (or two days after receiving Pitts' letter), Dr. Gold computed a monthly average and sent out a letter to some of the recipients that their assistance would be dropped November 1, 1976. Copies of this letter were sent to both Pitts and Helen Blevens, the Borough's Treasurer.

---

* This is consistent with the statutory powers and duties of C&RA "to advise and assist local governments" (AS 44.47.050 (1); and to supervise, monitor, and otherwise help make local governments eligible for State, federal and other grants.

That letter, which became the form for future notification of other applicants who would have to be dropped to allow Dr. Gold to stay within his monthly mean averages, included the following paragraph:

"Due to the inadequate amount of funds provided to the Fairbanks North Star Borough Day Care Assistance Program, it is impossible to continue funding all day care payments for the entire year."

Pitts' Anchorage file shows this copy with no corresponding letter even mentioning--much less criticizing--the explanation Dr. Gold was using.

More low income applicants continued to apply for new Day Care Assistance, thus mandating Dr. Gold to rework his allowable "eligibles" list to stay within his monthly mean. In order to continue giving priority to applicnats with lower incomes, even if they were newer applicants than some other higher income eligibles still getting subsidies, Dr. Gold had to revert to cutting off new groups of eligibles within the higher income brackets. This is his understandable explanation of the necessity of staggered elimination of higher income group recipients as the fiscal year progressed.

Admittedly, the above was not his only reason for delaying notification of those who eventually were cut from the program with only a few days' notice. Dr. Gold operated under apparently acceptable interpretations of the contractual terms of serving all eligible families in the Fairbanks Borough area and under the expressed C&RA desire for local flexibility. Dr. Gold considered this short notice (which caused some admitted hardships) as serving the client community until he was forced to cut them from the program. His explanation is that at least four Fairbanks legislators were openly working to expedite a speedy supplemental allocation to the Statewide program, with special attention to the Fairbanks plight.

More money from within C&RA was forthcoming on February 10, 1977, when Pitts and Dr. Gold discussed the new availability of $18,054 which came from unspent day care assistance money not used by another community. With the initial $106,495 contract monies, the October $22,125 monies and this new February allocation of $18,054, the Fairbanks North Star Borough allocation was a total of $146,674. This figure was still some $55,000 short of Dr. Gold's first forecast of the Fairbanks day care needs of $200,000 in early fall--and about half his January, 1977 forecast to legislators based on increased demands for the assistance from Fairbanksans.

The administration of the program by Dr. Gold was of no serious concern to the Department's Chief Day Care Coordinator, as is evident in the letter Pitts sent Gold confirming the above additional allocation. Pitts, in a letter dated February 18, 1977, stated, "As in the past, Frank, keep up the good work. I still plan to stop by and visit with you as soon as I can find the time to get out of the office."

File records show that Dr. Gold had incurred no major criticism by the Department, at least through Pitts' previcusly mentioned letter. The first signs of unrest due to Dr. Gold's management can be evidenced in your trip report dated February 9, 1977 (which was prior to Pitts' above comments of good work.) In that report where you detail discussions with Dr. Gold, you stated, "It is difficult to get the idea across that this is not a "welfare" type program where everyone who meets the guidelines is entitled to service . . . We must address this as a political issue. I would strongly recommend against any supplemental appropriations to Fairbanks or other communities. In my opinion, a supplemental would be rewarding poor planning and mismanagement and penalizing those communities who have conducted a responsible program. They wanted flexibility and authority but are quick to shirk responsibility for problems created . . . We need to work more closely with the grantee communities in preparation of the FY '78 program to avoid a repeat of this years problems."

Ironically, it is about this time when Dr. Gold and other day care administrators Statewide began to address this funding supply as a political issue also. They began intense lobbying with their respective legislators for more funds to last the FY '77 year. And since Pitts' letter followed your report to Commissioner McAnerney (with no subsequent comment to Dr. Gold), we cannot assume he was placed on any notice for rectifying any major or minor concerns you expressed.

Shortly after this public testimony before the legislature, apparent conflicts arose between the day care administrator (Dr. Gold) and the Department. After one visit by the Department's field officer (Jan Brewer) on March 30th, several errors (according to Brewer's March 31st field report) were noted in the administrator's operations. Since Dr. Gold had just hired a new program administrator, Brewer recommended that a subsequent visit to the Fairbanks office take place within a month to better review all the files

after the new program person was more familiar with the job and files.

Brewer returned to the Fairbanks office on April 11, 12 and 13, at which time relations between the local administrator and the agency deterioriated significantly. Dr. Gold, who admits he was made aware of the impending visit by Brewer, was reluctant to allow her access to any files, except the terminated ones, until his program assistant returned to work. He had said his assistant was out sick and Brewer reviewed only the closed files. The next day, (April 12) the assistant was still out sick and Brewer was denied access to the files. She had reminded Dr. Gold of Article VII in his contract with the Borough that mandated the files be open to the Department during regular business hours. Whether Dr. Gold opened his files to her or the following day (April 13) due to the fact his assistant had returned to work or because Borough Treasurer Helen Blevins had called him (at Brewer's request) to mandate Dr. Gold open the files (or a combination of both) is a matter of interpretation. In any event, the files revealed some audit exceptions.

Of the $3,068 in auditable exceptions which Brewer reported on return from her April visit, $822 were cancelled by the Department when adequate back-up paperwork was provided. Of the remaining exceptions, it is unclear where the responsibility falls in regards to the errors as the Borough paid at least portions of those exceptions. According to Borough Administrator Ron Garzini and Dr. Gold, several of the exceptions were based on miscalculations made while the Borough still administered the program in-house. Dr. Gold has stated he has not paid any of those audit exceptions in question.

Shortly after the April staff visit, Dr. Gold received a copy of a letter written by Pitts to Blevins in which he outlined the disallowed audit exceptions and detailed the problem regarding access to the files. The letter did not outline actions which Pitts thought were mandatory to insure continuation of the program with Dr. Gold nor did Pitts notify Dr. Gold of the severity of the actions in regard to denying access to the files. We refer here to the Department's Day Care Assistance Application Manual; Page 19, Article 5 of the Department's responsibilities in this program:

"5. When the Director finds that the local agency is not in compliance with the work program and contract, he shall notify the agency of the problem and the requirement for compliance. If after a reasonable period satisfactory

adjustments are not made, he shall notify the agency that further payments will be withheld until the deficiencies are corrected."

Pitts' April 19 letter to Blevins, however, prompted Dr. Gold to fire off a rather inflammatory letter to Commissioner McAnerny asking that Pitts apologize for the letter, and for Pitts' failure to talk with Dr. Gold before concluding Dr. Gold was in the wrong. Dr. Gold recalls hand-delivering the letter to the Commissioner on April 26.

Dr. Gold received no response from the Commissioner, nor did he receive any letter from Pitts. However, the Anchorage file shows an interesting (however irrelevant) memo from Pitts which carries a date of April 27. It concerns a proposal by Dr. Gold for a drug abuse grant he applied for in another department--the Drug Abuse Office. The memo was initially written by Pitts on non-ordinary stationery and the copy in the Anchorage file we copied, shows a stamp as having been received by the Drug Abuse Office on May 16, 1977. The memo was written to McAnerney, but the only paragraph to mention Pitts' involvement with Dr. Gold in the day care contract experience vaguely questions Dr. Gold's management of the day care program and Dr. Gold's refusal to allow Brewer access to the files. The last paragraph recommends the following:

"I recommend that the A-95 Grant Request referenced above be denied and that a search be undertaken for a more suitable Drug Abuse Program Administrator."

During the same time Dr. Gold was testifying against C&RA day care proposals in front of legislative committees, the Department began collecting a variety of paperwork regarding Dr. Gold's other involvements.

For example, in the Anchorage day care assistance file on the Fairbanks program, there are some 61 different documents (at least as recorded in September by my assistant, Cathy Allen). Of those 61, 31 documents deal with subjects other than the day care program. A large portion detail problems and criticisms other people had with Dr. Gold's proposed mental health clinic. Eight other pieces of paper dealt with Borough zoning problems--some dating back two years.

Barbara Morse, a Departmental employee directly under your supervision, was also receiving day care assistance through Dr. Gold's administration. She had recorded problems with Dr. Gold's administration of the program as he had required more back-up paperwork in order to adjust the level

of her income to what she thought was appropriate. The problems with her individual subsidies were not major ones, but it does cloud any involvement she might have had in discrediting Dr. Gold's administration of the program. Borough officials have reported she inquired about several different problem areas, including whether or not proper advertisement had preceded the request for new bidders. In the meantime, John Swan had also been interested as a potential administrator and Morse had been working to interest Swan in the day care program administration. He had been running a day care facility where Morse had taken her child. When you traveled to Fairbanks for your May 19 meeting with Blevins, Morse was in attendance.

That same trip report includes the following statement: "it was the borough's responsibility to monitor the activities of their subcontractor." You also stated, "that we would be very reluctant to approve a subcontract with Dr. Gold for next year, and recommended that they heartily consider operating the program in-house next year."

Regarding Brewer's field report from the next departmental trip on May 31, she reflected a much brighter picture of Dr. Gold's operation of the program. Although she details one case where a family had to have its payments terminated and the notice was somewhat short and indirect (the day care center was informed), the incident prompted her recommendation that a form and standard termination notice be worked out.

This Brewer report appears to contain other unfavorable impressions concerning Dr. Gold, but no examples were provided; they were requested for the future. Brewer's report states of Dr. Gold's administration of the program that applications were now complete; the back-up data was in place and no other close monitoring would be required before the "contracts are ready for renewal."

In the "Effectiveness of Program In Meeting Goals," Brewer wrote, "The program's effectiveness apparently has improved since the last visit. Applicants are now more carefully screened and clients are not being assisted at correct percentages for their income group."

To maintain a proper perspective, we should point out that the April field trip report with the same evaluation forms, detailed several problem areas: audit exceptions, refusal to allow access to all the files, files were incomplete, etc. To adequately insure we don't overlook that report, we have also included a copy of it as an attachment. The point is that

with the prior report or without it, Dr. Gold's administration of the program as is reflected by Brewer, certainly improved.

There are two final letters (one June 24 and a second dated July 25) which culminated in the Borough's action of not awarding a contract renewal to Dr. Gold.

On June 24, you responded to a June 22 letter from Fairbanks Mayor John Carlson which indicated the Borough's intent to apply for day care funds for fiscal 1978. This letter includes the following paragraph:

"Alaska State Law (AS 44.47.250) allows the borough to subcontract its obligations only with the consent of the Department of Community and Regional Affairs. The Department in examining and evaluating the appropriateness of the grant application, must weigh the commitment, the plan and capabilities of the Borough in administering the program."

It also states:

"Unless the borough can present evidence to indicate and guarantee a significant change in the program management by Dr. Gold that will assure a proper level of performance, the Department will not grant approval to the Borough to subcontract.

Prior to this letter's arrival on Mayor Carlson's desk, the borough had informed Dr. Gold that he was the only agency that responded to the Borough's request for bidders. He was told that he would receive the contract though no official paperwork had been signed. The mayor then informed Dr. Gold of the Department's letter.

Dr. Gold took great exception to your letter in public testimony. The Borough opted to operate the program in-house until it could gather more information about the entire matter and seek proposals from others who might also wish to administer the program. Garzini, in public testimony said had there been no letter from C&RA threatening a discontinuation of the day care assistance funding with Dr. Gold, he would have had little objection to the Borough's renewal of the contract with Dr. Gold.

In a July 25 letter from your office, you further outline other problems with Dr. Gold's past administration of the program and offer the following:

"Subsequent to our initial rejection, the Department has become aware of many other circumstances related to Dr. Gold and his other business activities, contracts and zoning

problems which would preclude Dr. Gold from being acceptable as the administrator of this program under any conditions."

Since that second letter, the borough has requested and accepted applications from six sources. These applicants all presented proposals for the day care program's administration based on new proposal guidelines that we feel your agency properly assisted in developing. Certainly, with this relatively new program, guidelines for those who might administer the program would be hard to develop based on no prior experience. Also, since your office has noted problem areas--not only in Fairbanks but Statewide--it is appropriate you should assist the local governments in proposal guidelines.

Dr. Gold has since charged the nature of these guidelines was such that it sought to exclude him. Since some valid concerns with his administration of the program prompted such proposal guidelines, we do not find your involvement here to be faulty.

Presently, the Borough is operating the day care assistance program in-house, awaiting the settlement of this Ombudsman complaint, as well as other factors (such as the local election) before opting to award a contract to any of the six proposal applicants (which includes Dr. Gold).

According to Phil Younker, the Borough will take action--one way or another--on this matter in the near future.

FINDINGS:

Pursuant to AS 24.55.150, we have found Departmental actions: 1) to be arbitrary regarding the enforcement of rules set out in the Day Care Assistance Manual; 2) to be based, in part, on improper grounds; 3) to be unfair, procedurally; and 4) unreasonable in the scope of information and materials collected in regard to Dr. Gold.

A. Actions Found to be Arbitrary

In many areas, you have held Dr. Gold accountable for following rules and procedures outlined in the Day Care Assistance Applications' Manual (which was made part of the contract to the Borough and also the subcontract to Dr. Gold). His refusal to allow Brewer access to files; exact compliance with the subsidy scale; required back up information for each applicant; his determination of who should continue to receive subsidies and who should be cut off; and the Borough's failure

to secure written permission from your division are all covered in the contract and/or manual.

Yet, page 19, article 5 of the manual calls for the Director (identified as you by manual definitions), to notify the agency (identified as Dr. Gold by means of the same manual definitions) of those problems inconsistent with either the work program or contract. If "after a reasonable period satisfactory adjustments are not made" the Director is then to notify the agency that payments will be withheld until the deficiencies are corrected."

Notification of the audit problems went to the Borough Treasurer almost immediately upon Brewer's filing of her trip report. The money was to be immediately withheld and Blevins was warned of the seriousness of Dr. Gold's refusal to allow the C&RA field worker access to all the files. No notice for compliance was given Dr. Gold.

B. Actions Found to be Based Upon Improper Grounds

The July 25 letter to Assembly Chairman Dave Brennan specifically outlined six major criticisms you defined as problems with the day care program administration by Dr. Gold. We find fault with four of those items discussed.

Item #2 and Item #4

We would like to couple Item #2 and Item #4 together as they are similar in our comparison of the facts regarding both. These criticisms deal with the original grant ceiling for the program being $106,495; that Dr. Gold should have apportioned an equal amount each month for the program's subsidies so that the money would last the year; that there was no mandate to serve all "eligibles" (as you allege is clearly stated in the contract); and that his expressed shortcomings due to improper training is invalid due to four trips made by your staff for auditing and training purposes.

First, we find that although the original grant amount was $106,495, Dr. Gold had been told from the start of his administering the program that there would be more money available. Pitts had told him that pending reports from other communities regarding whether these other areas would be able to use their allocated day care funds, more money would become available. Extra money was already accumulated from communities which could not get a program established for fiscal 1977 by the time Dr. Gold took charge of the Fairbanks program.

Dr. Gold chose not to apportion money on a month-to-month average, which was reasonably his prerogative based on the manual, law and contract (plus subcontract). The contract does not state, as you say, "that not every eligible person in the Fairbanks area must or should be served". The contract (in Appendix A) states that the contractor "agrees to serve" all families with reasonable access to licensed day care facilities in the Fairbanks area. The contract states just the opposite, according to our reading, of what you list as its clear statement regarding who should be served.

Whether or not Dr. Gold chose to apportion his total amount on a month-by-month average seems to fall in the category of local flexibility. How else would you interpret Pitts' suggestion that a monthly average be determined and adhered to as was stated in his October 22 letter to Dr. Gold? As long as Dr. Gold held enough money aside for the total subsidizing of WIN and AFDC recipients, then he was not in violation of the contract, according to our review. And, as new applicants qualified as eligibles and had lower incomes than those still receiving subsidies, we believe Dr. Gold was following the priority expressed by the law, guideline manual, contract and subcontract to favor lower income eligibles.

Finally, the lack of training or auditing Dr. Gold alludes to as reason for his shortcomings in administration of the day care program is difficult to determine as valid or invalid. You indicate that he cannot blame base line data projections as his basis for not terminating higher income eligibles. From the first moment he realized he would run short on funding for the year at the maximum subsidizing of all those eligibles, you indicate he should have averaged out his funds based on a month-to-month average. Since the funds did increase (and he had confidence there would be more coming) and there were more new applicants with lower incomes applying for subsidies, we believe Dr. Gold showed a management plan that was not prohibited by his contract--nor even criticised by your agency until after he had terminated many of those on the program under his plan of serving as many as he could as long as he could. Regarding training and auditing help, the field trip report for October only states that Dr. Gold wasn't able to make a meeting. Your February report does not mention any training or auditing other than your attempt to bring home the point the program was not "a free lunch". (And, Dr. Gold's records show the meeting as more of a strategy one for the legislative effort for supplemental

and fiscal 1978 funding of the program). Brewer's March report allows that new staff were on baord and that she would await that staff's familiarization with the back files before auditing. The April field report was covered above and the May report also indicates the Department's action in training Dr. Gold's staff and auditing the Fairbanks files. Proper training and auditing prior to the acknowledged problems in April are hard to detail in light of the field reports on file.

Item #5

The letter to Brennan questions Dr. Gold's method of cutting eligibles from the program; the short time frame in notifying eligibles that they are being cut; the explanation used in the form letter; and the lack of proper monitoring and analysis. The latter, you theorized, might have resulted in fewer cutbacks sooner and addition of new eligibles with lower incomes through natural attrition. Dr. Gold, however, cut eligibles, upon your October suggestion of terminating those from Group V, the Group IV, the Group III, etc. The time frame was short as he expected more funding and exercised his local management flexibility to keep eligibles in the program until the last moment. Regarding the misleading explanation you fault, Dr. Gold had sent the same letter terminating eligibles three different times (with copies to Pitts each time) using the same standard form letter he initiated in October for the first cut-off. No criticism was voiced until your July letter. Had Pitts voiced his concern over the explanation Dr. Gold used, it is likely (according to Dr. Gold) that the form letter would have been changed. Additionally, in the October 20, 1976 letter from Pitts which preceded Dr. Gold's first form letter, Pitts declared the problem "is, of course, insufficient funding to accommodate all persons eligible for Day Care Assistance." Dr. Gold's terminology to recipients of day care subsidies was, "Due to the inadequate amount of funds provided to the Fairbanks North Star Borough Day Care Assistance Program, it is impossible to continue funding all day care payments for the entire year." We don't find the two explanations significantly different.

Since it was (by contract and manual guidelines) the responsibility of both the Borough and the State to "monitor" the local program, we find it inconsistent to solely fault Dr. Gold with failure to properly monitor the program with regard to analyzing the list of eligibles in time to cut higher income eligibles to accommodate new applicants with lower incomes. In fact, the Borough received notice of its

monitoring problems, but the actual local administering agency (Dr. Gold) received none. Also, Dr. Gold's records show no natural attrition where he could have added those new eligibles in question with lower incomes.

Item #6

Here, you report that there were several audit exceptions "for which the borough is financially responsible." You further stated these exceptions "were due primarily to inadequate and inaccurate applicant screening on the part of Dr. Gold's staff". This is not true, according to your files and those of Dr. Gold, as well as information from Garzini. Your contract with the Borough and the subsequent subcontract with Dr. Gold holds the administrator responsible for problems in subsidy eligibility. The Borough paid all the audit exceptions that weren't adjusted after back-up information was obtained from the eligible applicants. Although Garzini states that Dr. Gold paid "a negligible amount" of the exceptions, his files show he paid none. Garzini clarified that most of the exceptions could be traced back to screening work done by the Borough when it first began the program--before Dr. Gold was contracted for the program's administration.

Information regarding the timely filing of monthly reports is difficult to detail except that the departmental files show the reports were late. Exactly how the reports should be filed, and what route each report should take through what local, Borough and State offices is unclear, but it is our finding that these reports were received in your offices late in at least three cases.

C. Action Found Unfair

Even if all the above criticisms and problems with Dr. Gold's administration of the Fairbanks program were accurate, we find it unfair to notify Dr. Gold (and at that, notify him indirectly through a letter to Mayor Carlson) of his total unacceptability for a contract renewal after the Borough has asked him to submit a letter requesting a contract renewal.

We have considered your argument that it was easier not to inform Dr. Gold of each problem as it arose in the hopes he would become a more conscientious administrator as time went by, but it, nevertheless, came as a su prise to him that you would not accept him as a subcontractor. Dr. Gold, and several other agency and local officials, certainly admit there were conflicts of philosophy between him and the Division. All admit there were deep personality conflicts (evident in Dr. Gold's letter to the Commissioner of April 26 and

Pitts' letter to the Commissioner of April 27). The Borough obviously did not think the problems so severe that they would not have rejected the contract renewal with Dr. Gold. Dr. Gold, after Brewer's May 31 trip, did not think his administration so faulty that a contract renewal would be jeopardized or, he felt, he would have received some feedback, as the Department certainly had been vocal about the program in the past few months.

In addition, Brewer's last field report shows Dr. Gold as improving, though each piece of correspondence from the State to the Borough gets progressively worse in its assessment of Dr. Gold's operation of the day care program in Fairbanks.

In the interest of making the Fairbanks program viable, it is understandable your field worker would attempt (and is evident by her continued patience) to try and correct problem areas as opposed to confronting Dr. Gold and his assistants with each error or criticism. But this same patience also lent to the lack of due process we feel Dr. Gold should have been afforded according to the manual procedures which call for the Director's calling attention to contract and work program problems.

Brewer's last comments in the May field report that additional monitoring in person was not necessary until the "contracts are ready for renewal", raises an inference that the subcontract to Dr. Gols would be acceptable.

The paragraph precluding Dr. Gold from "being acceptable as the administrator of this program under any conditions" based on "other circumstances related to Dr. Gold and his other business activities, contracts and zoning problems," is an unreasonable statement concerning Dr. Gold. The paperwork in his Anchorage file regarding establishment of a new mental health association for possible State grant funding does not show any positive letters about the fledgling group (which is now in the final stages of being approved for funding). The Borough zoning problems you allude to are being pursued through the court system. The "other business activities" reflected in paperwork in the file could include the proposal by Dr. Gold for continued grant allocations for drug treatment programs. Although Pitts' letter pointed out problems with his proposal, Dr. Gold received another year's funding approval just recently. And last, references made by Pitts to my assistant about other "alcoholism" grants awarded Dr. Gold that might interfere with day care recipients using Dr. Gold's same premises,

simply do not exist. He does not now have (nor has he had recently) any alcoholism programs which he is running or administering.

It is in addition to the voluminous paperwork in our files that are not direcly germane to the day care program's administration; the somewhat unprecedented letter by Pitts regarding Dr. Gold's drug abuse proposal; the harshness about Dr. Gold's running the program, as is reflected in your letters at the same time his field report evaluations by Brewer were showing improvement the questionable involvement of staff in Fairbanks; and the cloud of doubt by the non-specific paragraph cited above that prompt us to find your agency's actions unreasonable. These unreasonable statements figured heavily in Dr. Gold's not being awarded a second year's subcontract for the Fairbanks North Star Borough Day Care Assistance Program.

AGENCY ACTION JUSTIFIED

A. Statewide perspective needed and obtained through C&RA monitoring

Since the entire amount of day care assistance monies comes from the State with no federal matching monies, the State is in the best position to judge Statewide need and it can best ascertain how the money should best be allocated to the different programs. Through surveillance and monitoring, it is in a better position to determine how any one program measures up to another. In this regard, it was indeed proper that C&RA did outline all problem areas; we only would ask that more time be afforded in reviewing the cited grounds presented to the Borough Assembly as background for the action against Dr. Gold. Careful review of the Department's file would have cleared up the most serious and certainly the majority of problem areas cited.

B. Program problems properly outlined by the agency

The untimely filing of monthly reports, the refusal to allow field workers to review day care assistance recipient files at any time during the work day, as well as smaller, case-by-case details that required clarification or more attention are best brought out by the State agency. In some cases, the local government might not watch nor wish to closely monitor a program. The State, which has the background and knowledge of program administration throughout the State, is in a better position to pick up administrative

details that could tighten any single rural or urban program's administration. It would appear that at least some minor paperwork sloppiness as well as the lack of file access were proper criticisms for whatever reasons.

C. Suggestions for future program proposal advertising and proposal guidelines proper and helpful.

The mere questioning of how the contract was advertised in May was appropriate and suggestions for future advertisement were proper. It is possible that the Borough did not think any other local agency would be interested in the day care program's administration as the local government had initially approached Dr. Gold and asked him to administer the program in July of 1976. If the State were made aware of other potential candidates for the administration, it is their duty to inform the local government of such concern. Also, the guidelines for future subcontractors as recommended and mutually-worked out by the Borough and the agency were appropriate. The role of the State in carrying out its statutory authority in this program is primarily to assist the local governments--which it did in both questioning the form and extent of the advertising and working with the Borough on guidelines for future subcontractors.

D. However heavy-handed the C&RA action to discredit, the Borough chose not to challenge the State's authority and chose to accept its critical comments as basis for not renewing the day care contract with Dr. Gold.

If no fair comment had been afforded the subcontractor, we might have pointed out how unfair it was for a State agency--with all its implied power as a government authority--to barrel over a subcontractor. Obviously, given the advocacy talents of our complainant and the time he has been afforded before the Assembly to counter the C&RA comments, he was not precluded by the State from giving his side of the story.

The Borough may have based its action to nullify plans for renewing Dr. Gold's 1977 contract on the State's expressed authority mandating written approval of the exact subcontract. Or, the Borough may have based its action to readvertise the contract based on new guidelines worked out with the agency staff. Most likely, the Borough chose to accept the total accumulation of critical data from your agency along with your assertion that a subcontract with Dr. Gold would not be approved by them. The July 25 letter with the critical comments about advertising and the offer to work out better guideline proposals for subcontractors became the basis for

Dr. Gold's not getting a second year contract based on the old subcontract provisions.

In the same light, we feel it was the Borough's determination not to renew the contract, but that action was heavily based on your letter. Whether the Borough chooses to accept your authority is a matter of Borough or court jurisdiction. Whether the Assembly chooses to accept our analysis of the entire situation as a basis for reexamining their past action or future action is up to them. It is because we do not want to become overly involved in a related matter of municipal and State concern that we have offered these comments regarding action we think the State took that was justified and appropriate.

D. RECOMMENDATIONS

We hope that the review, as we have painstakenly presented it, will provide you with a careful enough review of the facts surrounding this complaint to weigh the following recommendations. It is my understanding that each recommendation has already been broached with you by my assistant. We hope these suggestions will provide you with meaningful alternatives that will tighten up the program's Statewide administration.

1. To straighten any confusion that might have been evidenced in this Fairbanks day care assistance program administration, we would suggest you begin the tedious but needed process of promulgating regulations, at least in the following areas:

A. What is the State's intent and interpretation of "permission to subcontract"? With that permission, is it then the responsibility of the Borough to determine the exact subcontractor? Other State agency examples provide for mixed interpretations as do court rulings on the authority of the State in subcontracting matters. Some rulings and agency examples reflect the contract law's strict interpretation of a due process of authority from the State to the contractor and the subsequent authority from the contractor to the subcontractor, with only minor connections from the State to the subcontractor.

B. In the application manual, it outlines how a day care assistance grant is made to a local government. However, the procedure of how one should obtain permission for subcontracting is not clear. For example, it calls for "written permission from the Department" for a

municipality to be able to subcontract. Yet, when should the permission, if so desired, be obtained? The application manual does not say, but alludes to subcontractor Articles of Incorporation as being necessary for the local government's complete grant application and possible approval. The manual also calls for subcontractor forms to be filled out after the grant is approved. Yet, with this complaint, the Borough was chastised for not seeking and/or obtaining prior written approval before it sent in the grant application for this upcoming year. One way or another, the procedure should be clarified.

C. Since the initial intent of the subcontractor option was to assist the particularly small communities, what kind of consideration should in-house vs. outside municipal subcomtract administration be given? Should a municipal government have to substantiate why it prefers to operate the program through subcontracts as you once intended? This clarification might be opportune now with other clarifications sought and, perhaps with the promulgation of regulations.

D. What does the Department infer by the local administering agency's responsibility to serve eligibles in the designated grant area? The confusion that exists through not addressing this point in the statute but addressing it rather contradictorily in the manual and the contract appendix should be clarified. It might make more overall management and planning sense to prioritize eligibles from the start of the fiscal year and apportion monthly subsidies to a determined ceiling, as now appears to be left up to the local government's or local agency's mandate to determine. If you believe the program better run (Statewide) by stricter management guidelines, then those should be clarified and made part of regulations.

E. Other specific areas brought to light by this inquiry stemming from the 1977 Fairbanks program experience should also be clarified in this review process. These areas include exact breakdown of State, contractor (or local government) and subcontractor (or local administering agency) responsibility. Appropriate termination procedures for recipients whose money begins to dwindle faster than anticipated; methods of accurately informing recipients in a properly-designated time frame to insure adequate time for easier adjustment; guidelines important for subcontractors' proposals Statewide, as well as advertising for new proposals; and a spelled-out monitoring effort regarding how problem areas are to be discussed, corrected, challenged and made a basis for disciplinary action should be readied.

Under litigation and court rulings regarding the applicability of the Administrative Procedures Act to agencies which have the permission to promulgate regulations (which you have in C&RA Day Care Assistance Program statutory authority--AS 44.47.250(b)(1), the courts have held that when you may promulgate regulations, you must.

Regulations for this program have already been discussed. Where we recognize a responsibility of your agency to establish some regulations to clarify the above-cited confusions, we would only suggest you begin work on these matters. However, if the line of agencies now awaiting regulations is too long to accommodate clarifications this year, we would suggest that the applications' manual include the needed clarifications. These additions and changes, as well as specific delineation of responsibilities might also--or might instead--be made a part of the applicable contracts and subcontracts. We are striving for equal enforcement of rules and regulations--no matter what form they should take.

An argument you have presented for not including all those points and matters within the policy manual as perspective regulations is the entire program's "armslength" attitude in its dealing with the general public. (Actually, we would like to see all manual procedures covered by regulation as the actual subsidy scale provides for the real flexibility you seem to desire in the program's administration.) Since a recipient's appeal is to Pitts' office, and since there have been recipients who have been penalized because the subsidy scale was not mandatorily followed by the administrator locally, we believe you have more of a direct link with the general public than your initial establishment of the program first indicated.

We would suggest, if you are considering these recommendations to tighten up on the mutual accountability of all agencies involved, that you expand your direct involvement with the public at large. More carefully outlining procedures and manual interpretations brings you into closer scrutiny by the public. We would suggest you further this involvement (not necessarily dramatically) and include selective recipient interviews in the field trips by your staffers. It is in this monitoring effort that you will get a more direct evaluation of a contractor or subcontractor's work effort.

As another step to involve the public, we would suggest public hearings or some public response mechanism where you might get the general response from State residents on the

matters outlined above. The public may have its own ideas about local versus State control and the guidelines for a contractor's involvement.

2. To clarify the record, which we hope we have detailed adequately to show problems with the grounds you cited for not wanting Dr. Gold involved in a subcontract for the day care program, we would recommend a clarifying letter be sent to Fairbanks Borough Mayor John Carlson and Fairbanks Borough Assembly Chairman Phil Younkers. We would hope the letter might explain the improper grounds we believe might have unfairly weighted Borough opinion against Dr. Gold. The same letter, we would suggest, also include a clarification of your apprehension of Dr. Gold as a future administrator. In talks with my assistant, you have indicated you would not protest Dr. Gold's acquiring of the contract (through criticisms or assertion of C&RA authority) if he were to abide by the guidelines worked out by you and the Borough staff. This explanation would be helpful in the recommended letter to the Borough Assembly and Mayor. Where we would appreciate a clarification of what we think are improper grounds, we would also offer that other proper grounds about Dr. Gold's administration of the program would appropriately be forwarded in this same letter. Assistance in the form of comments about other proposed administratiors would also be pertinent and proper here, we feel. Suggested monitoring efforts that might correct future problems while still insuring the Borough and local administering agency the right to due process could be included in this same proposed letter.

3. We would suggest a letter to Dr. Gold, although a copy of the above letter to the Fairbanks Borough would be appreciated as an alternative. Acceptable guidelines that would allow him to obtain the contract without any State controversy should the Borough opt to contract with him again, should be specified in this second letter. A forward, clear assessment of his past performance as an administrator; day care program spokesman before the legislature; and outspoken public critic of the Department would appropriately be outlined in this letter. And, by means of this complaint resolution, perhaps a future meeting between you, Pitts, Dr. Gold, the Commissioner and appropriate Borough contracts could take place to iron out personality conflicts that might remain.

SPECIAL FINDINGS

In the perusal of the file, we took special note of the letter Pitts forwarded to Commissioner McAnerny regarding Dr. Gold's early spring proposal for drug abuse funding. Through the A-95 grant approval process (those being specific funds administered through the State), grant proposals are routinely circulated throughout sister agencies in the hopes that others having dealt with proposed contractors will comment about the contractor in question. The process, although still somewhat rudimentary and selective in the circulation of proposals, is a good one.

The State should have a central information system which would allow cross-referencing and more complete examination of contractors. In this case, comments forwarded by Pitts, however, lead us to examine this process more closely. We find no problem with the concept of cross review of contractors' past performances within the evaluating agency. But, Pitts' assessment of Dr. Gold's proposal is inappropriate. The two-page evaluation (for reasons we have not been able to justify) recommends that another contractor/administrator be found for the Fairbanks drug treatment program. In the six lengthy paragraphs critical of Dr. Gold's drug program proposal, only one paragraph deals with Pitts' direct dealing with Dr. Gold through the day care program he actually oversees. The memo to C&RA Commissioner McAnerny was written on April 27 by Pitts--a day after the Commissioner was hand-delivered an inflammatory letter by Dr. Gold about Pitts' actions in regard to Brewer's controversial field trip to Fairbanks in April.

As there are no regulations, laws, procedures, or even standard practices exercised in the review of A-95 grant application proposals, we cannot find direct fault in Pitts' action except to say it was inappropriate.

Since the comments apparently did not get to the Drug Abuse Review Board in time for their full consideration and since they chose to award the contract to Dr. Gold for this upcoming year, we suggest no future action in this matter. We do feel that the process of cross referencing evaluations be reviewed toward insuring objectively, accountability and due process so that a valuable tool does not become a "blacklist".

We would recommend that future evaluation by C&RA staff of A-95 proposals be restricted to specific past

involvement with the contractor and that it be as precise as possible. Hopefully, through central agency, the Division of Policy Development and Planning personnel, there will be adequate response mechanisms afforded the contractor in question so that a fair evaluation is afforded by the State.

In summary, we hope this exhaustive look at the record has been helpful in your own review of the inquiry to our office by Dr. Gold. We have given much thought to the recommendations and options presented for your consideration in the hopes of bettering the program while setting the past record straight. In constantly weighing the findings and recommendations, we have attempted to set reasonable goals, which we believe are not arbitrary, given your initial discussions with our office last month. Please let us know if you have any questions or comments. We would like some response, even if it is an oral response within a week.

We are forwarding the exact copy of these findings, except for the section which details the staff situation and the details of any specific day care recipients as those names are confidential, to Dr. Gold, the complainant.

As everything but the names and files of day care assistance subsidy recipients are already part of the public record, in light of our prior consultation with you in regard to this matter, and the Borough's involvement as the prime contractor, we will make this report available to the Borough pursuant to their request as is outlined in the letter attached from Mayor Carlson. We will do this unless you have a reasonable objection to this procedure. If so, please give me a call this weekend (October 22 or 23; we plan to be in the office for a good part of the weekend) or call us on Monday or Tuesday, October 24 or 25.

We appreciate your cooperativeness in this matter and thank you for your consideration.

Sincerely,

Frank Flavin

Senator Joe Orsini
Chairman
Community & Regional Affairs
Alaska State Senate
Juneau, Alaska 99811

Dear Senator Orsini,

I have been told that CS HB 913 (an act relating to day care programs) is now in your committee.

Being aware that the session must be drawing to a close, but also being aware that at least in Fairbanks and Kodiak the contracting municipality's hands are about to be tied by the proposed regulations offered by the Department, I am requesting that your committee act on this legislation if at all possible.

The Department would like to refuse to allow these two communities future sub-contracting privileges. This is most distressing here in Fairbanks since the Fairbanks North Star Borough has continually gone on record as wanting to sub-contract the administration of the Day Care Assistance Program. My contact with Kodiak indicated that they too would like to continue sub-contracting.

This may not be the most important item to come before your committee, but it would be appreciated if you and your associates would find the time to put a minor stop in the irresponsible and dictatorial Department bureaucracy.

Thank you for your time.

Sincerely,

Frank J. Gold

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to sick leave and certificated employees of school districts; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.14.107 is repealed and re-enacted to read:

Sec. 14.14.107. SICK LEAVE AND SICK LEAVE TRANSFER. (a) Every school district shall allow its certificated employees * ^ one and one-third days of sick leave a month with unlimited accumulation of sick leave days.

* DELETE "AT LEAST"

(b) A certificated school district employee who changes employment from one school district to another district, or from a school district to the Department of Education, or from the department to a school district, may transfer all of the cumulative sick leave to the new employer. It is the responsibility of the employee to notify the new employer, within 90 days of commencing work, of the number of days to be transferred.

(c) The department may implement this section by regulation.

* Sec. 2. This Act takes effect immediately in accordance with AS 01.10.-070(c).

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MEETING

May 25, 1978

Present: Senators Orsini, Willis, Hackney and Sumner; Roger Allington, City and Borough of Juneau; Stuart H. Bowdoin, Bristol Bay Borough; Phil R. Holdsworth, S.E. Conference; Richard M. Burnham, Attorney, General's Office; Floyd Johnson, Division of Emergency Services, Jim Rolle, AML; Pat Conheady, Department of Natural Resources; Jack Chenoweth, LAA; Don Berry, Municipality of Anchorage; Annette Smith, H/C&RA; Royce Weller, Hugh Malone's Staff

Absent: Senator Ferguson

The meeting was called to order at 3:04. The bills before the Committee were HB 941 and CSHB 133.

HOUSE BILL 941

Richard Burnham, Assistant Attorney General representing the State in the litigation over the Highway complex in Anchorage, stated that that agreement may not have been entered into in good faith. He moved that there was an affidavit form filed in the AG's office giving the Municipality of Anchorage notice that it was doubtful that the Commissioner of the Department of Highways had the authority to dispose of the land on which the complex is located. He also stated that the Department of Administration appraised the land in 1973 at 3 1/2 million dollars. The next spring an appraiser, presumably hired by the Municipality and approved by the Commissioner, appraised the property at 1 million dollars. It was on the second appraisal that the lease purchase agreement was made. He stated that he did not feel that this was in the best interest of the state to lose 2 1/2 million dollars between two appraisals. Senator Orsini pointed out that he was assuming the first appraisal was correct and the second appraisal incorrect.

Floyd Johnson, Division of Emergency Services, Department of Military Affairs, stated that the division would need a supplemental appropriation for rent due to the Municipality of Anchorage if this bill were to pass. He stated that the supplemental would require $92,467 and asked that the bill be amended to require the Municipality and his agency to sit down in good faith and negotiate a new 3 year rental sublease agreement. He told the Committee that his agency can get 50/50 matching monies from the federal government for construction of emergency operation center, that it would take about 2 to 3 years to get this money committed, and any relocation of his office would be complicated by the need to move the division's complex communication system. He stated that it would take around $100,000 to make a move to another location, preferably to another downtown location, even if one were available.

Don Berry, Municipality of Anchorage, supplied the Committee with a letter from the Assistant Municipal Attorney.

Senator Willis moved to pass out HB 941 with "INDIVIDUAL RECOMMENDATIONS".

CS FOR HOUSE BILL 133

Roger Allington, City and Borough of Juneau, asked the Committee to take a second look at the 13,600 acreage allotment for Juneau and restore at least the amount of 19,584 acres which came out of the Senate Resources version. He stated that the city was in need of the land specifically in Juneau because of the need to relocate persons now living in hazardous downtown slide areas. Mr. Allington noted that an allotment of 24,000 acres for Juneau would be more appropriate for the Muricipality's needs.

Stuart Bowdoin, Bristol Bay Borough, stated that his borough was in support of the bill. He stated that the Borough was in dire need of the land and would take about anything that becomes available.

Phil Holdsworth, Southeastern Conference, stressed the need for Southeastern communities such as Petersburg, Wrangell and Skagway to have access to trust lands which now hem them in and restrict any future growth.

Jim Rolle, Alaska Municipal League, stated that the League does not feel that access to trust lands should be based on population and urged that cities, as well as boroughs, also be eligible for trsut lands and deficiency payments.

Pat Conheady, Department of Natural Resources, opposed the increase of the Anchorage allotment to 44,893 and referred to a letter of May 19 from the Director of the Division of Lands, Mike Smith. According to Mr. Conheady, a correct allotment figure for Anchorage would be 37,655 acres. He discussed the section of payment for land deficiency and supported the need for cities to have access to trust lands, particularly in Southeastern.

Mr. Conheady expressed concern regarding the January 1, 1980 deadline for determining land deficiency payments, the State was not sure when the 6A selections would be made and available for municipal selection.

Senator Sumner moved that the amendments be passed and pass out SCS for CSHB 133 with "INDIVIDUAL RECOMMENDATIONS".

The meeting was adjourned at 4:10 p.m.

THE FOLLOWING DOCUMENT(S) MAY NOT FILM LEGIBLY BECAUSE OF POOR QUALITY OF THE ORIGINAL.

of ALASKA

TO: H. B. Wellman, Director
Division of General Services/Supply
Department of Administration

DATE: September 27, 1973

FROM: Tom E. Nain, Area Supervisor
Division of General Services/Supply
Department of Administration

SUBJECT: Acquisition of Department of Highways Buildings

Please refer to Mr. Don Lowell's August 29 memo, subject as above. You asked for my recommendation concerning the Alaska Disaster Offices' request to obtain the maintenance facility at 1305 East 4th Avenue, Anchorage.

The facility is approximately 20.0 acres in size, of which approximately 16.0 acres is within a 6' chain-link fence. It is ungrade with 4th Avenue and a small portion of the north boundary is ungrade with 3rd Avenue. The east and south boundaries abut embankments that make access impractical from these sides. The enfenced area serves as a vehicle parking lot.

The fenced area has the following buildings:

a. Office building: Three stories of reinforced concrete having approximately 9330 gross square feet and approximately 7870 net square feet. This building houses the administrative offices of the Alaska Disaster Office which leases the space from the Department of Highway.

b. Maintenance building: Three stories of structural steel and metal siding. This building is approximately 66' x 150'.

A 60' x 66' section has three stories, each with 8' ceilings, served by a freight elevator. The first two floors are primarily shop and storage areas. The third floor is partitioned into offices.

The remaining 66' x 90' section has a shop with a 16' ceiling above which is another storage area.

c. Gas station: A wood frame building approximately 60' x 66' with 4 service bays. The station itself is approximately 20' x 60' and has offices on the second floor.

d. Paint storage area: Comprised of one wood frame building approximately 20' x 40' and 2 quonsets approximately 16' x 36' each.

e. Storage area: Comprised of 5 quonsets approximately 16' wide and from 36' to 54' long with a wooden loading dock.

f. Soils laboratory: (Leased to City of Anchorage.) A building approximately 50' x 150' consisting of a concrete structure and wood frame structure. The City uses this as their sign shop.

g. Open storage: Approximately 10.0 acres.

The Department of Highways reports their expenses to operate the maintenance building during FY 73 as follows:

Gas	$ 6866.65
Electricity	5178.51
Water	2907.14
Garbage	567.24
Other	3289.16
Personnel Services	568.62
Commodities	380.17
Overhead	3275.39
TOTAL	$23433.28

Based on 23,750 gross square feet, this building costs 6.8¢ per square foot per month. Used as storage, the buildings costs should be less. This is cheap storage on an actual cost basis. However, on a rate of return based on an appraisal of the value of the facility, the real cost to the State is much greater. If the land is worth $4.00 a square foot, the total value—exclusive of buildings—is $3,400,200 for which a minimal 6% return is $209,283 annually.

It has been suggested that this facility could be used to store USDA commodities and to be used for state surplus property sales. The available storage space is not ideally suited to food storage because of the 8' ceiling which restricts the use of equipment. Only 2500 square feet would be available for this use. The area could be used for state sales; however, the major attraction to buyers seems to be vehicles and construction equipment which are generated by the Department of Highways at 5700 Tudor Road. It appears more feasible to move the other miscellaneous sale items to that location.

There is always a need for miscellaneous storage by field offices in Anchorage. The quonsets and the maintenance building would be suitable for this purpose; however, control of access would be difficult and vacant storage areas have a way of becoming junk piles.

The Alaska Disaster Office does have storage problems and a facility adjacent to their present office seems to be practical; therefore, as the only outright expense for ADO to use this is the cost of transferring the property, I recommend that they be permitted to use the facility until permanent plans are made for either ADO or the facility.

cc: Alaska Disaster Office

TO: [illegible] Joseph H. Ehrl
Department of Administration

DATE: August 20, 1973

FROM: Donald Lovell, Director
Alaska Disaster Office
Department of Military Affairs

SUBJ: Acquisition of Department of Highways Buildings

The Department of Highways will be moving their equipment maintenance personnel from the old Department of Highways yard to their new facilities somewhere around November, 1973. The facilities they vacate will be empty, with the exception of a one-story building leased to the City of Anchorage for their sign shop and the building the Alaska Disaster Office occupies.

I request that the old Highway maintenance building (a three-story building) and five Quonset huts be assigned to the Alaska Disaster Office for storage of emergency supplies when Highways moves out. This is urgent, since equipment and supplies we now have are scattered around in several buildings, bonans, and Quonsets, creating a waste in manpower and time in receiving and distributing these items.

We have storage in a warehouse in Seward, eight bonans in Girdwood, a Quonset on Kingsport, a basement of a fire station, etc.

We would, upon acquisition of the building and Quonsets, move in our emergency hospitals, emergency medical, sanitation, and water supplies, tents, cots, blankets, and other equipment as it is acquired through Excess and Surplus Property for distribution to the several communities we serve. Additionally, the building would house our emergency vehicles and our mobile communications center.

Also, there should be adequate room in the building to store surplus commodity foods for your Department.

We have been desperately short of adequate, secure storage ever since my predecessor relinquished an 80'x120' warehouse to the Department of Highways.

Your early approval of this request would be appreciated.

IN THE HOUSE

BY THE COMMITTEE FOR COMMUNITY AND REGIONAL AFFAIRS

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act ratifying the lease-purchase agreement between the State and Municipality of Anchorage, concerning the former State Highway Complex at 4th and Post Roads in Anchorage."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

Section 1. PURPOSE.

(1) Whereas, the State of Alaska, acting through the Commissioner of Highways, entered into a lease-purchase agreement with the City of Anchorage on November 14, 1974 concerning the former State Highway Complex at 3rd and Post Roads in Anchorage, Alaska, described more particularly as:

> Blocks 28-C, 28D, 29-A, 29-B, 29-C, 29-D, 30-A, and Lot 2, Block 30-B, all in the East Addition to the Anchorage Townsite, Anchorage, Alaska, with all fixtures and improvements except for the Northwesterly 90 feet of Block 28-C, East Addition, containing 32,930 square feet more or less; and the North 90 feet of Blocks 29-A, 29-B, and 30-A, East Addition, together containing 72,707 square feet, more or less.

Such agreement being recorded on November 20, 1974, in Book 232 at Page 317, Anchorage Recording District, Third Judicial District, State of Alaska; and

(2) Whereas, pursuant to the lease-purchase agreement the Municipality pays the State $100,000 a year in rent plus $10,000 a year in consideration for its option to purchase the property, such funds being applied to the purchase price of $1,000,000 if the Municipality chooses to exercise the option; and

(3) Whereas, the complex has been used by the Municipality as a maintenance and vehicular storage yard for the People Mover Mass Transit System; the Municipality intends to use the Complex as ~~the~~ a future operations center of the People Mover mass transit system; and

(4) Whereas, it is in the public interest to encourage development of such mass transit system; and

(5) Whereas, the lease-purchase agreement was entered into by both the State and City in good faith; and

(6) Whereas, for many years the City and Municipality of Anchorage have provided the street lighting systems on the State Highway System within the City and Municipality at no cost to the State; and,

(7) Whereas, the City of Anchorage has leased 8.7 acres of valuable land at Lake Spenard to the State as a site for the National Guard at a lease rate of $1 a year for 102 years, and in addition, the City has leased the State Division of Aviation 21 acres of valuable land adjacent to the shoreline of Lake Spenard at a nominal rate of $1,800 a year; and

(8) Whereas, question has arisen concerning whether execution of the conveyance by the Commissioner of Highways on behalf of the State created a valid instrument; and

(9) Whereas, enactment of a general law would be inappropriate to correct the statutory confusion from which such dispute arises since the Department of Highways no longer exists as a separate entity, having been merged into the Department of Transportation and Public Facilities pursuant to Executive Order No. 39(1977); and

(10) Whereas, the Legislature finds it in the best interest to both the State and Municipality of Anchorage to declare the lease-purchase agreement to be a valid document binding on both parties;

Section 2. IT IS HEREBY ENACTED THAT:

(1) The action of the former Commissioner of Highways in enacting the lease-purchase agreement between the State and City of Anchorage which was recorded on November 20, 1974 in Book 232, Page 317, Anchorage Recording District, Third Judicial District, State of Alaska, is hereby ratified.

(2) The Commissioner of Natural Resources and Director of the Division of Lands are empowered and directed to approve the lease-purchase agreement, as written, pursuant to the authority vested in them by AS 38.05.315(A).

Section 3. This Act takes effect immediately in accordance with AS 01.10.070(C).

LEASE-PURCHASE AGREEMENT

THIS AGREEMENT is entered into this 13 day of November 1974, by and between the STATE OF ALASKA, DEPARTMENT OF HIGHWAYS, hereinafter referred to as the "STATE," and the CITY OF ANCHORAGE, a municipal corporation organized and existing under its charter and the laws of the State of Alaska, hereinafter referred to as the "CITY."

WHEREAS, the STATE is the owner of the following described real property:

Blocks 28-C, 28D, 29-A, 29-B, 29-C,
29-D, 30-A, and Lot 2, Block 30-B,
all in the East Addition to the
Anchorage Townsite, Anchorage, Alaska,

which has improvements and fixtures located upon it, such real property, improvements and fixtures being hereinafter referred to as the "Premises"; and

WHEREAS, the CITY desires to lease the premises, excluding the excepted parcels described below, and desires to have the option to purchase the Premises and a contingent option to purchase the excepted parcels described below.

NOW, THEREFORE, in consideration of the mutual covenants described below, the STATE and the CITY hereby agree as follows:

1. Subject Property.

The STATE leases to the CITY, and the CITY leases from the STATE, all of the Premises, with the exception of the following four parcels, which are hereinafter referred to as the "Excepted Parcels": the Northwesterly 90 feet of Block 28-C, East Addition, containing 32,930 square feet more or less; and the North 90 feet of Blocks 29-A, 29-B, and 30-A, East Addition, together containing 72,707 square feet, more or less.

2. Rent and Terms of Lease.

The lease will be for a period of ten (10) years, commencing on August 14, 1974. The rent shall be One Hundred

RECORDED Nov 20 1974 BOOK 332 PAGE 347

cc: Treasury
Controller (Cloy Rodgers) 12/4/74
Purchasing (for conveyance purposes)

Thousand Dollars ($100,000) per year. The first year's rent shall be payable on Dec. 1, 1974. Each year's rent thereafter shall be payable, in advance, on August 14 of that year.

3. Option to Purchase Premises, Excluding Excepted Parcels.

A. Option, Price and Terms. At any time after one year of this lease has expired, the CITY shall have the right, at the CITY's option, to purchase the premises, excluding the Excepted Parcels, for the sum of One Million One Hundred Twenty-Six Thousand Dollars ($1,126,000). No interest shall be paid on this purchase price. The purchase price shall be paid in cash on the closing date. The price to be paid by the CITY for this option shall be Ten Thousand Dollars ($10,000) per year, commencing with the second year of this agreement, until the option is exercised or abandoned. This annual option price will be paid in advance on the same date on which the annual rent is to be paid (excluding the first rental payment date). If the CITY exercises this option, then the lease shall terminate and all of the payments of rent made by the CITY pursuant to paragraph 2, above, and all of the $10,000 per year payments made by the CITY for this option, will be credited to the above $1,126,000 purchase price.

B. Exercise of Option. The exercise of this option shall be accomplished by the CITY giving notice to the Commissioner of Highways, in writing, of the CITY's desire to exercise the option,

C. Closing Date. The sale transaction shall be closed within sixty (60) days of the exercise of this option.

D. Warranty Deed. Upon closing, the STATE will deliver to the CITY an executed warranty deed for the premises, excluding the Excepted Parcels, in favor of the CITY, subject only to encumbrances and restrictions of record as of August 14, 1974.

4. Contingent Option to Purchase Excepted Parcels.

A. Option, Price and Terms.

The Excepted Parcels, which have been described above, are being withheld from the present lease of the premises, and from the option described in paragraph 3, above, for possible use by the STATE for street or highway right-of-way expansion purposes. If the STATE decides that it does not need all or a portion of the Excepted Parcels for the above-described purpose, or upon the expiration of fifteen (15) years from the date of execution of this agreement without use for the above-described purpose being accomplished by the STATE, whichever is earlier, then the STATE will immediately offer the Excepted Parcels, or the portions of the Excepted Parcels not used for the above-described purpose, for sale to the CITY. The CITY shall have until August 14, 1984, or one year from the date of the above-described offer by the STATE, whichever is later, to decide whether to accept such offer. The purchase price of the Excepted Parcels, or portion thereof, shall be $2.00 per square foot, and shall be paid in cash on the closing date. No interest shall be paid on this purchase price.

B. Exercise of Option. The exercise of this option shall be accomplished by the CITY giving notice to the Commissioner of Highways, in writing, of the CITY's desire to exercise the option.

C. Closing Date. The sale transaction shall be closed within sixty (60) days of the exercise of this option.

D. Warranty Deed. Upon closing, the STATE will deliver to the CITY an executed warranty deed for the Excepted Parcels, or portion thereof, in favor of the CITY, subject only to encumbrances and restrictions of record as of August 14, 1974.

E. If the CITY has exercised the option described in paragraph 3, above, then the STATE will give the CITY one year's

notice of any right-of-way expansion upon any portions of the Excepted Parcels which have structures located upon them, so that such structures may be salvaged if the CITY so desires.

5. Possession.

The CITY has the right to possession of the Premises, excluding the Excepted Parcels, as of August 14, 1974. Commencing on August 14, 1974, the CITY will be responsible for all maintenance and utility costs.

6. Replat.

The CITY will prepare and submit a replat of the Premises to the appropriate platting authority. The replat will separate the Excepted Parcels from the remainder of the Premises.

7. Clean-up of Premises.

The STATE will clean up the Premises by November 1, 1974. Such clean-up will include the removal of all items which the CITY designates for removal. Such items will include, but will not be limited to, designated equipment, lumber, metal objects, barrels, drums, damaged pipe and culvert. Further, such clean-up will include the removal of all rubbish and refuse from the premises, and the removal of all spilled creosote, tar, and other chemical compounds. This clean-up will meet the standards of the City Department of Public Works, the Greater Anchorage Area Borough Department of Environmental Quality, and the State Department of Environmental Conservation. If the above-described clean-up is not completed by the date specified above, the CITY may perform such clean-up and deduct the costs of the clean-up from the next rental payment.

8. Termination.

The City may terminate this Lease-Purchase Agreement at any time by giving sixty (60) days notice. Rent and option payments shall be pro-rated to the date of termination.

9. Sub-Leases to Greater Anchorage Area Borough and Alaska Disaster Office.

The CITY will execute the sub-leases, which have been attached to this agreement and have been designated Exhibits A and B, to the above entities, for the portions of the Premises described in the sub-leases, pursuant to the terms and conditions contained in those sub-leases.

In the event of termination of this Lease-Purchase Agreement prior to the expiration of the terms of the sub-leases, such sub-leases shall be binding on the STATE for the remainder of the terms.

IN WITNESS WHEREOF, the parties have executed this agreement on the date first written above.

Defendant.	)

No. 76-7012 E. Civ.

AFFIDAVT OF DALE P. TUBBS

STATE OF ALASKA)
) ss.
THIRD JUDICIAL DISTRICT)

I, Dale P. Tubbs, being first duly sworn, deposes and says:

1. I have been retained by the Municipality of Anchorage to research and obtain past practice evidence of land disposal procedures used by the Alaska Division of Lands and other Alaska state agencies, particularly the former Department of Highways and the Department of Public Works, Division of Aviation.

2. My knowledge and experience with state agency land disposal practices is predicated on 14 years and 4 months employment with the Alaska Division of Lands in the following capacities:

January, 1962 - February, 1963: District Forestor - Duties included state timber sales.

February, 1963 - March, 1967: Area Forester - Duties included state timber sales and planning report preparation for state land management.

March, 1967 - January, 1969: Realty Officer II - Duties included coordination of state land disposal program for Southcentral Alaska, prepare right-of-way permits, lease agreements, and material sale contracts.

January, 1969 - December, 1973: Southcentral District Land Manager - Duties included supervision of the district land management planning, and disposal through sale, lease, and grants of state land.

MUNICIPALITY OF ANCHORAGE
OFFICE OF THE MUNICIPAL ATTORNEY
POUCH 6-650
630 WEST FIFTH AVENUE
ANCHORAGE, ALASKA
274-2525

December, 1973 - November, 1974: Acting Chief of Land Section - Duties included supervision of state land appraisal activities and the land disposal section for the division. This included the signing of state leases, permits, and sale contracts.

November, 1974 - April, 1976: Deputy Director of the Division of Lands - Duties included land disposal policy making and signing of state land permits in the absence of the director.

May, 1976 - Present: Land Management Consultant employed by Moening-Grey & Associates, Inc.

3. The information shown in Attachment I and II is derived through my research of the State Division of Lands records and case files. The material is a matter of public record.

Attachment I summarizes the type of land and resource disposal activity, approximate minimum number of transactions involved, the past practice treatment in regard to providing an appraisal as required by AS 38.05.310, and the past practice treatment of giving public notice as prescribed in AS 38.05.345. The treatment of disposals by public auction follow the prescribed appraisal and notice. Negotiated transactions did not include an appraisal when the legislation prescribed a land grant, such as borough selections, and in all instances except for some coal, oil, gas, and shore fishery offerings no public notice was given. This policy was derived from the belief of the Division of Lands that statutory authorized negotiated transactions did not require public notice.

Pages 5 and 6 of Attachment I summarizes the types of cases by recipient categories that have received land without public notice and in instances of AS 38.05.315(a) without appraisal.

Attachment II is a sampling of case files showing actual recipients of leases, sales, or grants of state land found within the Division of Lands case files. This table depicts the type of recipients involving negotiated transactions without public notice. Land appraisals were made for these parcels when trust lands were involved or the statute

MUNICIPALITY OF ANCHORAGE
OFFICE OF THE MUNICIPAL ATTORNEY
POUCH 6-650
[illegible] WEST FIFTH AVENUE
ANCHORAGE, ALASKA
274-2525

authorizing the conveyance required a fair market value return.

4. Contact was made with the land leasing and right-of-way sections within the Alaska Department of Transportation to reconfirm known past practices used by them. Ted Richards, an employee for the highways right-of-way section, confirmed that excess state lands, from highway projects, are commonly conveyed to abutting owners with a commissioners deed. No public notice is given for these transactions when the land was originally purchased with state money. Most of these transactions involve remnant land parcels.

Mr. Steve Parish, chief of airport leasing, confirmed the former division of aviation conducted all of its leasing activities without public notice. This policy was changed in November of 1976 when a directive was received to subject the leases being offered to public notice. The directive exempts the public notice requirement when a lease is being offered to another state agency.

5. A decision to void the negotiated lease transaction between the State and Anchorage for the former highway maintenance site on East Third Avenue because of the lack of public notice would put a cloud on the validity of all the existing negotiated lease, sale, and grant transactions entered into by the various state agencies conveying land or interest in land. These agencies include: Alaska Division of Lands, former Department of Highways, Alaska State Housing Authority, Division of Waters and Harbors, Division of Buildings (school sites), and the Division of Aviation.

Specific sites or types of facilities particularly impacted by such a decision would include:

a. Borough and municipal land selections - 350,000 acres.

b. Five schools in the Anchorage Municipality.

ATTACHMENT I

Division of Lands Land Disposal Practices Prior to 1976

Land disposal actions by the Alaska Division of Lands fall within definite patterns with little variation. These procedures remained essentially unchanged until about February-March, 1976. By that time disposal activity decreased to almost zero and new procedures were being implemented. Reasons for the procedural change include:

1. The court case involving the sale of state land on the Aleutian Islands and Alaska Peninsula - Aleut Corp vs State, Superior Court, 3rd Jud Dist GA 72-2893(1973).

2. Questions raised in the sale of oil and gas leases in Kachemack Bay.

3. Procedures used for lease and sale of lands to Alyeska Pipeline Service Company as provided in AS 38.35.

At the time of my resignation from the Division of Lands, I was working on a check sheet to outline which procedures must be followed to consumate a disposal. New legislation has since cleared up questionable areas as to review and public notice. The remaining decisions are administrative.

Prior to the 1976 legislation and the almost halting of disposals, the past practices of the Division of Lands can be documented as follows:

		Past Practice	
		AS 38.05.310 Appraisal within 90 Days	AS 38.05.345 Public Notice
Advertised Disposals - Public Auction	(Number of Cases)		
Land Sales (AS 38.05.045)	(3500+)	Yes	Yes

Past Practice

	(Number of Cases)	AS 38.05.310 Appraisal within 90 Days	AS 38.05.345 Public Notice
Land leases (AS 38.05.070)	(4000+)	Yes	Yes
Material Sales (AS 38.05.110) Upland & tide	(50+)	Informal	Yes
Timber Sales (AS 38.05.110)	(100)	Yes	Yes
Grazing leases (AS 38.05.070)	(50+)	-	Yes
Oil and Gas (AS 38.05.180)	(1600+)	-	Yes
Tid[illegible] leases (AS 38.05.070)	(25+)	Yes	Yes
Negotiated Disposals or Grants			
Transfer of State Land to Cities (AS 38.05.347)	(?)	No	No
1. Agricultural Preference (AS 38.05.069)	(30)	Yes	No
2. Forest Service Preference (AS 38.05.068)	(200+)	Yes	No
3. Preference Grazing leases (AS 38.05.075)	(20)	No	No
4. Upland Shore Fishery Sites Sale (AS 38.05.66)	(45)	Yes	No
5. Open to Entry (AS 38.05.077)	(4200)	Yes	No
6. State, Federal and Political Subdivisions (AS 38.05.315(a))	(hundreds)	Grantland No	No
		Trustland Yes	No

Past Practice

	(Number of Cases)	AS 38.05.310 Appraisal within 90 Days	AS 38.05.345 Public Notice
7. Non profit Organizations (AS 38.05.315(b-d))	(42)	Yes	No
8. Earthquake Grants (Chapter 116 SLA 1964)	(200+)	Statute Limit No	No
9. Material Sales (Tideland & Upland) (AS 38.05.110)	150	Informal	No
10. Timber Sales (AS 38.05.110)	(400+)	Informal	No
11. Preference right lease or sale (AS 38.05.035(b)(2))	(10)	Depends on Circumstance	No
12. Preference right sale (AS 38.05.035(b)(3)	(20)	Back dated Yes	No
13. Preference right sale (Nigh bill) (AS 38.05.035(b)(5)	(50)	Back dated Yes	No
14. Shore Fishery Lease (AS 38.05.082)	(275)	Administrative minimum	Yes
15. Negotiated lease (AS 38.05.070(b))	(100-200)	Minimum with clause for adjust. or appraisal	No
16. Off Shore Prospecting Permits	(Several thousand)	No	No
17. Tideland leases (AS 38.05.070(b)	(225)	Yes	No

Past Practice

		AS 38.05.310 Appraisal within 90 Days	AS 38.05.345 Public Notice
	(Number of Cases)		
18. Coal Prospecting Permits	(760)	No	Yes
19. Land exchanges (except Cook Inlet)	(20)	Yes	No
20. Occupied tidelands and Submerged lands (AS 38.05.320)	(382)	Grant	No
21. Oil and Gas leases - Noncompetitive	(2000+)	No	Yes
22. Right-of-way Permits	(1000+)	No	No
23. Inter-Agency Land Management transfers			
Tidelands	(200+)	No	No
Uplands	(hundreds	No	No
Municipal Selections AS 29		No	No

The above mentioned information can be summarized into several catagories. Disposals that were offered at public auction were appraised within 90 days of the auction date and public notice was published 3 times and or posted.

Negotiated transactions, except for shore fishery leases and openings of mineral lands were not given public notice. The statutes were interpreted to mean that if the transaction was within negotiable limits or as directed by statute, public notice was not necessary. Appraisals for the disposals was dependant on the type of action. Disposals to governmental agencies are for $1.00 if they involved general grant land. When trust lands were involved - (after about 1970) the market value was charged.

Cases of particular interest that have special color are:

1. Earthquake grants - (Chapter 116 SLA 1964) Allowed for granting land to those that lost land in the earthquake. Only administrative cost were to be charged.

2. Preference sales - AS 38.05.035(b). This section provides for negotiating a sale to a party that lost his land through administrative error. Appraisal is back dated to the claimants entry on the land.

3. Shore Fishery Sites - (AS 38.05.66). This section provided for a negotiated sale to certain persons that had a BLM special use permit. Appraisal was current market value but no public notice was made.

4. U.S. Forest Service Preference rights. (AS38.05.068). Provides for negotiated sale to valid U.S.F.S. permit holders. Appraisal is at current market value but no public notice is given.

5. Disposals to Governmental entities (AS 38.05.315(a)). Lands are conveyed by sale or lease for $1.00 if the lands are used for public purposes. Market value for trust land, no public notice was given. Particular disposals of interest.

   a. Lease to City of Anchorage for $1.00/yr. at Pt. Woronzof.
   b. Reconveyance of State land back to the BLM:
      (1) 2 townships - 46,000 acres - Tangle Lakes.
      (2) Campground with improvements at Lake Louise.
      (3) 10 acre site at Delta for BLM adm. site.
   c. OCD's to BIA for school facilities.
   d. Leases to the Military - such as Nike site at Goose Bay.
   e. OCD's or leases to cities.
      (1) Homer
      (2) Anchorage
      (3) Ketchikan
      (4) Kenai
      (5) Juneau
      (6) Hydaburg
      (7) Hoonah
      (8) Haines
      (9) Girdwood
      (10) Fairbanks
      (11) Delta Junction
      (12) Craig
      (13) Cordovia
      (14) Bethel

(15) Fort Yukon
(16) Soldotna
(17) Kodiak

6. Transfer of State land to cities. AS 38.05.347. Surplus state lands made available to cities for the asking. This is a land grant so no appraisal was made and no notice was given. Kenai and Anchorage were recipients of this grant.

7. Assoc. for Retarded Children - - Chapt 167 SLA 1960 Provided for a 75 year lease at $1.00 per year. No reappraisal. No public notice.

8. None of the $1.00 leases to governmental entities are reappraised at 5 year intervals as provided in AS 38.05.105.

9. No transactions transferring state public domain lands from ADL to another state agency was addressed in this report.

10. The Commissioner of Hwys. (Walt Parker) gave away the down stream side of the Yukon Bridge to Alyeska Pipeline Service Co. See agreement in court case file. State of Alaska vs Alyeska -- Civil.

CHAPTER 142

AN ACT

Relating to the Ferries, Roads and Highways Construction Fund; appropriating $1,000,000 therefrom for highway construction; and providing for an effective date.

(C.S.S.B. 175)

Be it enacted by the Legislature of the State of Alaska:

Section 1. There is hereby appropriated from the Ferries, Roads and Highways Construction Fund to the Department of Public Works the sum of $1,000,000 contingent on the availability of federal aid highway matching funds for new road construction. Emphasis is to be placed on connecting centers of population to the state highway system that are not connected to the system by ferry or road.

Sec. 2. This Act takes effect on the day after its passage and approval or on the day it becomes law without such approval.

Approved April 25, 1961

CHAPTER 143

AN ACT

Relating to pre-session meetings of the finance committees; amending Sec. 20, Ch. 157, SLA 1959.

(H.B. 279)

Be it enacted by the Legislature of the State of Alaska:

Section 1. Sec. 20, Ch. 157, SLA 1959, is amended to read:

Sec. 20. Committees. a. Each house shall have standing committees to facilitate the transaction of business in accordance with the provisions of the rules of the legislature. Provisions may also be made in the rules for the appointment of special committees, as needed, by the presiding officer of each house. The legislature shall provide for the utilization of joint committees to facilitate and expedite business.

b. The finance committees of the house and senate shall convene at the capital for a joint meeting during the ten-day period preceding the convening of the second regular session of the legislature. The pre-session meeting shall be devoted to consultation with the executive budget committee, review of revenue and expenditures, and such other business which the finance committees determine will expedite their work and that of the legislature in the ensuing session.

Approved April 26, 1961

CHAPTER 144

AN ACT

Empowering and directing the director of the division of lands of the Department of Natural Resources to lease certain real property to Alyeska Ski Corporation, an Alaska corporation, for a limited use; and providing for an effective date.

(S.B. 141)

Be it enacted by the Legislature of the State of Alaska:

Section 1. The director of the division of lands of the Department of Natural Resources is empowered and directed to offer, by noncompetitive lease, to Alyeska Ski Corporation, an Alaska corporation, the following described real property lying in

the vicinity of Girdwood, in the Anchorage Recording District:

Beginning at a point being the southwest corner, Cor. #4, of U. S. Survey 3569, thence West 20 chs., North 60 chs., East 65½ chs. m/1 to the Chugach National Forest boundary line, thence South 60 chs. along the Chugach National Forest boundary line, thence West 5½ chs. m/1, to the southeast corner, Cor. #3, of U. S. Survey 3569, thence North 40 chs. along the east boundary of U. S. Survey 3569 to the northeast corner of the survey, Cor. #2, thence West 40 chs. along northern boundary of U. S. Survey 3569 to the northwest corner of the survey, Cor. #1, thence South 40 chs. along western border of U. S. Survey 3569 to point of beginning, containing approximately 233 acres.

Sec. 2. The lease shall be for a term of 55 years, conditioned upon the use of the land for the development and maintenance of a year-around resort area, such use including, but not being limited to, skiing, eating, airplane landing and other associated recreational facilities, and lodgings for the public and for employees of the lessee. Rent based on fair market value of the land shall be paid by the lessee and shall be subject to adjustment at five year intervals in accordance with Ch. 169, SLA 1959, as amended, and regulations pursuant thereto. The director, with the consent of the commissioner of the Department of Natural Resources, may impose such additional conditions or limitations in the lease as he determines will best serve the interests of Alaska. The director will make such limited conveyance within a reasonable time after said land has been conveyed to the State of Alaska by the United States of America.

Sec. 3. This Act takes effect on the day after its passage and approval or on the day it becomes law without such approval.

Became law without signature April 27, 1961

CHAPTER 145

AN ACT

Relating to penalties under the provisions of the Uniform Narcotic Drug Act; amending Sec. 40-3-20, ACLA 1949 as amended by Ch. 26, SLA 1951 and Ch. 106, SLA 1953; and providing for an effective date.

(S.B. 99)

Be it enacted by the Legislature of the State of Alaska:

Section 1. Sec. 40-3-20, ACLA 1949 as amended by Ch. 26, SLA 1951 and Ch. 106, SLA 1953 is amended to read:

Sec. 40-3-20. Penalties. Whoever violates any provision of this Act except that relating to the keeping of records by persons authorized to administer or professionally use narcotic drugs shall upon conviction be fined not more than $5,000.00 and be imprisoned not less than two nor more than 10 years. For a second offense, or if, in case of a first conviction of violation of any provision of this Act, the offender shall previously have been convicted of any violation of the laws of the United States or of any other state, territory or district relating to narcotic drugs, the offender shall be fined not more than $7,500.00 and be imprisoned not less than 10 nor more than 20 years. For a third or subsequent offense, or if the offender shall previously have been convicted two or more times in the aggregate of any violation of the laws of the United States or of any other state, territory or district relating to narcotic drugs, the offender shall be fined not more than $10,000.00 and be imprisoned not less than 20 nor more than 40 years.

Whoever violates any provision of this Act relating to the keeping of records by persons authorized to administer or professionally use narcotic drugs shall, upon conviction, be punished by a fine of not less than $500.00 nor more than $5,000.00 or by imprisonment for not more than five years, or both.

Whoever is convicted of illegally selling, giving or supplying narcotic drugs to a person under the age of twenty-one years shall be punished as follows:

the City of Seward for expenses incurred by the state through the Department of Public Safety for prisoner care during the fiscal year ending June 30, 1961.

Sec. 8. The sum of $475.00 is appropriated from the general fund to reimburse the Frontier Flying Service for expenses incurred by the state through the Department of Public Safety for transportation of personnel during the fiscal year ending June 30, 1960.

Sec. 9. The sum of $250.00 is appropriated from the general fund to reimburse the Wien Alaska Airlines for expenses incurred by the state through the Department of Public Safety for search and rescue during the fiscal year ending June 30, 1961.

Sec. 10. The sum of $116.67 is appropriated from the general fund to reimburse the Del-Air Flying Service for expenses incurred by the state through the Department of Public Safety for search and rescue during the fiscal year ending June 30, 1961.

Sec. 11. The sum of $823.38 is appropriated from the general fund to the Ellis Air Lines for expenses incurred by the state through the Department of Public Works, Division of Aviation, for repair of the Craig float during the fiscal year ending June 30, 1961.

Sec. 12. The sum of $300.00 is appropriated from the general fund to the Trading Union, Inc. for expenses incurred by the state through the Magistrate Courts for office rental during the fiscal year ending June 30, 1960.

Sec. 13. The sum of $2,052.65 is appropriated from the general fund to the General Services Administration for expenses incurred by the state through the Magistrate Courts for remodeling of rooms during the fiscal year ending June 30, 1960.

Sec. 14. The sum of $857.01 is appropriated from the general fund to the Alaska Airlines, Inc. for expenses incurred by the state through the Department of Law for transportation of witnesses during the fiscal year ending June 30, 1960.

Sec. 15. The sum of $34.00 is appropriated from the general fund to Ellis Airlines for expenses incurred by the state through the Department of Commerce for the transportation of a member of the Public Service Commission during the fiscal year ending June 30, 1961.

Sec. 16. The sum of $255.00 is appropriated from the general fund to Walter Muller, Kodiak Mortuary, for expenses incurred by the state through the Department of Health and Welfare for burial costs during the fiscal year ending June 30, 1961.

Sec. 17. The sum of $60.23 is appropriated from the general fund to reimburse the Pacific Northern Airlines for expenses incurred by the state through the Department of Public Works for transportation furnished during the fiscal year ending June 30, 1961.

Sec. 18. This Act takes effect on the day after its passage and approval or on the day it becomes law without such approval.

Approved March 2, 1962

CHAPTER 20

AN ACT

Empowering and directing the director of the division of lands of the Department of Natural Resources to issue a patent to Lot 3, Section 36, Township 20 North, Range 5 East, Seward Meridian, Alaska.

(H.B. 96)

Be it enacted by the Legislature of the State of Alaska:

Section 1. The director of the division of lands of the Department of Natural Resources is hereby empowered and directed to convey fee title to the following described state lands to John J. Corey:

Lot 3, Section 36, Township 20 North, Range 5 East, Seward Meridian, Alaska.

Sec. 2. Said conveyance shall only be

made on condition that the land be classified as "Residential" under the division of lands classification system and that John J. Corey reimburse the state for all costs in connection with the transfer but not to exceed $10 per acre.

Became law without signature March 8, 1962

CHAPTER 21

AN ACT

Transferring between appropriations made to the Department of Public Works for the fiscal year ending June 30, 1962; and providing for an effective date.

(S.B. 236)

Be it enacted by the Legislature of the State of Alaska:

Section 1. The sum of $1,000 is transferred from the line item appropriation for Commodities, Construction and Engineering Branch, Division of Aviation, Department of Public Works for the fiscal year ending June 30, 1962, to the line item for Contractual Services, Construction and Engineering Branch, Division of Aviation, Department of Public Works, for the fiscal year ending June 30, 1962.

Sec. 2. The sum of $1,000 is transferred from the line item appropriation for Travel, Construction and Engineering Branch, Division of Aviation, Department of Public Works, for the fiscal year ending June 30, 1962, to the line item for Contractual Services, Construction and Engineering Branch, Division of Aviation, Department of Public Works, for the fiscal year ending June 30, 1962.

Sec. 3. This Act takes effect on the day after its passage and approval or on the day it becomes law without such approval.

Approved March 12, 1962

CHAPTER 22

AN ACT

Providing for the designation of another officer to perform the authenticating functions of the secretary of state in his absence; and providing for an effective date.

(H.B. 358)

Be it enacted by the Legislature of the State of Alaska:

Section 1. The secretary of state may designate a head of a principal executive department, or more than one such officer in the alternative, who shall temporarily be custodian of the state seal and perform the authenticating functions of the secretary of state during such time as the secretary of state shall succeed to the office of governor, act as governor, be absent from the state, or otherwise not be available at the state capital to perform the above authenticating functions. The designation shall be in writing, signed by the secretary of state, and filed in the office of the secretary of state. The designation shall be effective until revoked by a later designation executed and filed in the same manner.

Sec. 2. This Act takes effect on the day after its passage and approval or on the day it becomes law without such approval.

Approved March 13, 1962

CHAPTER 23

AN ACT

Relating to the penalty for putting or throwing rubbish, garbage, or material on Alaska

merce; provided however, notwithstanding any other provisions of this Act, any domestic bank holding company, as defined by Subsec. b, organized pursuant to Ch. 126, SLA 1957, which shall maintain its principal office and place of business in this state and conduct its principal operations in this state may acquire and own all or any portion of the voting shares or other capital stock of, or all or substantially all of the assets of, any corporation which is subject to the regulations of the Commissioner of Commerce under the provisions of this Act; provided further, any such holding company may be required to post a bond in an amount equal to the par value of the stock held by it with the Commissioner of Commerce under such conditions as may be prescribed by him to assure full protection to the public; provided, any such holding company shall be subject to an examination by the Commissioner of Commerce or a competent person designated by him whenever he deems it necessary, but not less than once each year, and that the actual cost of each examination shall be paid to the Commissioner by every holding company so examined, and the Commissioner may maintain an action for the recovery of such costs in any court of competent jurisdiction.

b. "Domestic bank holding company" means any domestic corporation, business trust, association, or other similar organization which on the effective date of this Act or hereafter is designated a holding company affiliate by the Board of Governors of the Federal Reserve System rather than a bank holding company per se because such company is an owner or holder of shares of stock in a single banking corporation rather than of two or more banking corporations.

c. The Commissioner of Commerce is empowered to promulgate rules and regulations regulating domestic bank holding companies to insure financially sound banking organization and practice.

d. Any person or persons, company, or corporation, or any of the officers, servants, agents, or employees of any such person, company, or corporation who shall violate any of the rules and regulations promulgated pursuant to Subsec. c. shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished by a fine of not more than $5,000, or by imprisonment for a period of not more than one year, or by both; and in the case of a corporation, by a fine of not more than $5,000.

Sec. 2. This Act takes effect on the day after its passage and approval or on the day it becomes law without such approval.

Approved April 4, 1962

CHAPTER 54

AN ACT

Empowering and directing the director of the division of lands of the Department of Natural Resources to issue a patent to a portion of Lot 20, Section 1, Township 7 South, Range 13 West, Seward Meridian, Alaska; and providing for an effective date.

(C.S.S.B. 284)

Be it enacted by the Legislature of the State of Alaska:

Section 1. The director of the division of lands of the Department of Natural Resources is empowered and directed to convey fee title to certain state land described as a portion of Lot 20, Section 1, Township 7 South, Range 13 West, Seward Meridian, Alaska, to Charles B. Abbott, according to the following legal description:

Commencing at a G.L.O. Brass monument, which is the Southwest corner of Lot 14, said section, township, and range; thence due East 1560.00 feet to a point; thence South 0 degrees 01 minutes East 60.00 feet to a point; thence due East 90 feet to point of intersection to West line of said Lot 20; thence South 0 degrees 01 minutes East 79.00 feet on the West line of Lot 20 to a point designated as Corner Number 1 and POINT OF BEGINNING; thence South 54 degrees 05 minutes East 220.00 feet to a point

designated as Corner Number 2; thence North 35 degrees 55 minutes East 162 feet, more or less, to point of intersection with G.L.O. meander line of Kachemak Bay, which point is Corner Number 3; thence along the meander line in a northwest direction 220 feet, more or less, to a point from which the Point of Beginning bears South 35 degrees 55 minutes West, said point designated as Corner Number 4; thence South 35 degrees 55 minutes West 146 feet, more or less, to Corner Number 1 and POINT OF BEGINNING. The land thus described aggregates 0.79 acres, more or less.

Sec. 2. The conveyance provided for in this Act is in consideration of the voluntary relinquishment by Charles B. Abbott of a claim to this and several other contiguous lots in order to permit state selection and prompt development thereof. The conveyance is made at no cost to the patentee.

Sec. 3. This Act takes effect on the day after its passage and approval or on the day it becomes law without such approval.

Approved April 4, 1962

CHAPTER 55

AN ACT

Relating to land preference rights; amending Subsec. (16), Sec. 5, Art. II, Ch. 169, SLA 1959, as amended by Sec. 4, Ch. 61, SLA 1960; and providing for an effective date.

(H.B. 440)

Be it enacted by the Legislature of the State of Alaska:

Section 1. Subsec. (16), Sec. 5, Art. II, Ch. 169, SLA 1959, as amended by Sec. 4, Ch. 61, SLA 1960, is amended to read:

(16) The Director may grant preference rights for the lease or purchase of Alaska lands in order to correct the past or future errors or omissions of any state or federal administrative agency where inequitable detriment would otherwise result to a diligent claimant or applicant due to situations over which the claimant or applicant had no control. The exercise of this discretionary power shall operate only to divest Alaska of its title to or interests in lands, and shall be exercised only with the express approval of the Commissioner. Any claimant who shows bona fide improvement of Alaska lands made prior to March 31, 1960, and who has in good faith sought to obtain title to such lands, but who through error or omission of others has been denied title thereto may, on a showing satisfactory to the Commissioner, be accorded a preference right to lease or purchase same at an appraised price determined by the Division. Error or omission of a predecessor in interest or an agent, administrator, or executor which has clearly prejudiced the claimant may be the basis for granting a preference right.

Sec. 2. This Act takes effect on the day after its passage and approval or on the day it becomes law without such approval.

Approved April 4, 1962

CHAPTER 56

AN ACT

Relating to the fish and game resources of Alaska; amending Sec. 8, Art. II, Ch. 94, SLA 1959, as amended by Sec. 17, Ch. 131, SLA 1960; and providing for an effective date.

(H.C.S.C.S.S.B. 21)

Be it enacted by the Legislature of the State of Alaska:

Section 1. Sec. 8, Art. II, Ch. 94, SLA 1959, as amended by Sec. 17, Ch. 131, SLA 1960, is amended to read as follows:

CHAPTER 91

AN ACT

Relating to the licensing of chiropractors; and providing for an effective date.

(H.B. 230)

Be It Enacted by the Legislature of the State of Alaska:

Section 1. AS 08.20.120 is amended to read:

Sec. 08.20.120. **Qualifications for License.** An applicant shall be issued a license to practice chiropractic if he

(1) is at least 21 years of age;

(2) has had a high school education or its equivalent;

(3) has successfully completed at least two academic years of study in a college of liberal arts or sciences;

(4) is a graduate of a legally chartered accredited school or college of chiropractic, approved by the board, which requires for graduation a residence course of instruction of not less than four years of nine months each;

(5) passes an examination given by the board;

(6) has a certificate of registration in the basic sciences as provided by AS 08.16.200.

Sec. 2. AS 08.20.130(c) is amended to read:

(c) A general average rating of 75 per cent is a passing grade on the examination.

Sec. 3. AS 08.20 is amended by adding a new section to read:

Sec. 08.20.135. **Associate.** A person who complies with sec. 120(1), (2), (4), (5), and (6) of this chapter shall, pending compliance with sec. 120(3) of this chapter, be licensed to serve as an associate in an existing chiropractic clinic or office under the direct supervision of a licensed chiropractor for a period not to exceed three years.

Sec. 4. This Act takes effect on the day after its passage and approval or on the day it becomes law without such approval.

Approved April 22, 1965

CHAPTER 92

AN ACT

Empowering and directing the director of the division of lands, Department of Natural Resources, to lease certain real property to Pioneer Memorial Park, Inc., an Alaska nonprofit corporation, for a limited use; and providing for an effective date.

(C.S.H.B. 238)

Be It Enacted by the Legislature of the State of Alaska:

Section 1. The Legislature finds that it is in the best interests of the state to convey certain lands in the Fairbanks Recording District to Pioneer Memorial Park, Inc., under certain unique conditions.

Sec. 2. The Legislature further finds that a conveyance which would be satisfactory in this situation could not be made under the existing general sale or leasing laws, and that any reasonable general sale and leasing laws which the Legislature might enact, and which would be acceptable in the vast majority of sale or leasing situations, would necessarily be, like the existing general laws, too restrictive or inapplicable in this situation, and would not provide for the multiple and special uses which are present in this situation.

Sec. 3. The Legislature further finds that the instant situation is of a rare and unique nature, and that the necessary and desirable conveyance can be accomplished only by a special act of the Legislature.

Sec. 4. The director of the division of lands of the Department of Natural Resources shall offer, by noncompetitive lease, to Pioneer Memorial Park, Inc., an Alaska nonprofit corporation, the following scribed real property in the Fairbanks cording District:

A parcel of land located within section 9, T. 1 S., R. 1. W., Fairbanks Meridian, consisting of: all and the whole of section Lot 12, of said section 9, and that portion of the SW ¼ SW ¼ of said section 9 which lies north of the north right-of-way line of Airport Road, said right-of-way being 50 feet on either side of said road center line, all of the above said land containing 44.85 acres, more or less.

Sec. 5. The lease shall be for a term of 55 years and for a nominal rental, conditioned upon the use of the land as a site of a pioneer park which is to include a facility for the preservation and display of historical items for the benefit of all Alaskans, students and tourists. The director may impose limitations in the lease which will ensure that the use of the land will be consistent with this basic purpose and in the best interest of the state. The lease may provide for a limited number of profit-making concessions, which will not detract from the primary use of the land as a pioneer park, and for subleases.

Sec. 6. The lease shall be granted only on the condition that Pioneer Memorial Park, Inc., immediately sublease the property to 67 North, a nonprofit Alaska corporation, or its successor, for use as a site for the 1967 centennial exposition and celebration. The term of the sublease shall be for as long as is necessary to accomplish this purpose, but not to exceed five years. The sublease may provide for a rental not to exceed one per cent annually of the fair market value of the property, excluding improvements, as determined by the director, and shall provide for construction, at no expense to Pioneer Memorial Park, Inc., of at least one structure suitable for use as a permanent exhibit hall for the pioneer park. The sublease shall provide that the property be returned to Pioneer Memorial Park, Inc., in a condition suitable for its use as a pioneer park. The sublease shall be subject to approval by the director, who may require other provisions which are in the best interest of the state.

Sec. 7. (a) Nothing in this Act shall prevent the director from including any provision in the lease or requiring any provision in a sublease which he considers to be in the best interest of the state.

(b) The director may agree with the Board of Regents of the University of Alaska that the Board of Regents may exercise any or all of the powers vested in the director by the lease.

Sec. 8. All transfers and management agreements concerning the property described in sec. 4 of this Act, made by or between state agencies, including the University of Alaska, are revoked and terminated.

Sec. 9. The director shall offer the lease within a reasonable time after this Act takes effect.

Sec. 10. This Act takes effect on the day after its passage and approval or on the day it becomes law without such approval.

Approved April 22, 1965

CHAPTER 93

AN ACT

Permitting treatment of residents in isolated areas by Public Health Service dentists and physicians.

(H.B. 244)

Be It Enacted by the Legislature of the State of Alaska:

Section 1. AS 08.36 is amended by adding a new section to read:

Sec. 08.36.271. Permits for Isolated Areas. (a) The Departme. of Health and Welfare shall designate as isolated areas those specific places and regions remote from major population centers which are not served by dentists licensed under this chapter and which have a

ATTENTION FRANK BAXTER, DEPUTY DIRECTOR, ADMISTRATION

THIS IS TO CONFIRM THE CONTINUANCE OF THE DEPARTMENT OF HIGHWAYS, DEPARTMENT OF MILITARY AFFAIRS AGREEMENT EFFECTIVE APRIL 17, 1972, THROUGH JUNE 30, 1973, FOR THE ALASKA DISASTER OFFICE HEADQUARTER SPACE IN THE OLD ANCHORAGE HIGHWAY COMPLEX. IN ANY SALE AGREEMENT WITH THE CITY OF ANCHORAGE, PLEASE PROVIDE CONTINUED HEATED GARAGE SPACE FOR OUR EMERGENCY COMMUNICATIONS VAN VALUED AT $150,000. ALSO, IF POSSIBLE, ALLOW CONTINUED USE OF THE QUONSET HUTS UNTIL OTHER WAREHOUSING CAN BE PROVIDED.

DONALD LOWELL/DIRECTOR/ALASKA DISASTER OFFICE.

AGREEMENT

Between: DEPARTMENT OF HIGHWAYS and DEPARTMENT OF MILITARY AFFAIRS

The Alaska Disaster Office, Department of Military Affairs, is located in Department of Highways Building #400-140-701 (T-07559) at 1306 East 4th Avenue, Anchorage, Alaska.

The space assigned to the Alaska Disaster Office consists of a total of 9,632 square feet.

The Department of Military Affairs will be charged 20 cents a square foot, or $1,926.40 a month, $23,116.80 a year for office and shop area space.

This charge will be the proportionate share of expenses for heat and utilities for the building. Maintenance and janitorial services for space assigned to the Alaska Disaster Office will be the responsibility of the Department of Military Affairs. All costs incurred in performing same will be paid by them.

It is understood and accepted that the duration of this space rental agreement may be terminated upon a sixty (60) day notice whenever disposal of land and buildings at 1306 East 4th Avenue becomes required. Otherwise, the duration of this lease will be from April 17, 1972, through June 30, 1973.

MEMORANDUM

TO: Donald Lowell, Director
Alaska Disaster Office
Department of Military Affairs

DATE: April 4, 1975

FROM: Andrew S. Nerwick
Commissioner
Department of Administration

SUBJECT: Old Anchorage Highway Complex

Thank you for your letter regarding the requested sublease for the subject.

I have forwarded copies of the Lease Purchase and proposed Sublease for the complex to the Attorney General and requested that he make a determination of the legality of the Lease Purchase Agreement. Prior to further action on the proposed Sublease, we must have the Attorney General's decision on the Lease Purchase Agreement.

Your previous correspondence concerning this complex indicates that you are somewhat familiar with the circumstances of the Lease Purchase, therefore, I will not explain further. However, I must request your patience until we can obtain further word from the Attorney General.

By copy of this memorandum, Mr. Avrum Gross is requested to provide a decision relative to the above at the earliest convenience.

Thank you, and we will advise you of the outcome.

DEPARTMENT OF LAW

OFFICE OF THE ATTORNEY GENERAL

POUCH K – STATE CAPITOL
JUNEAU 99811

May 15, 1978

Honorable Chancy Croft
Alaska State Senate
Pouch V, State Capitol
Juneau, AK 99811

Re: CS HB 941

Dear Senator Croft:

I am writing this letter to you at the request of Representative Rudd. It is my understanding from her that the free conference committee wishes to know the State's side of the case involving what is commonly referred to as the "Old Anchorage Highway complex" located at Third and Post Road in Anchorage. You should be aware that this letter expresses no view on the question of the legality of CS HB 941. Frankly, I have serious doubts that the legislature can "ratify" an illegal transaction.

The litigation involving the Old Anchorage Highway complex began in the summer of 1976 with the filing of a complaint by the State. In July of 1977, the State moved for summary judgment and oral argument on the State's motion was held on September 26, 1977. Additional oral argument was held in the fall of 1977 and final oral argument was heard on April 25, 1978. We are now awaiting the court's decision.

I. Facts of the Case

The land referred to as the Old Anchorage Highway complex came to the State pursuant to the Alaska Omnibus Act of June 25, 1959 and was accepted by the Governor on behalf of the State on July 2, 1959. From that date until late 1973, the property and buildings located thereon were utilized by the Department of Highways as a maintenance yard and office compound.

The Department of Highways discontinued use of the property in 1973 and the property remained virtually unused until late 1974. During this period of inactivity, discussions ensued among various State departments concerning the best use to be made of the property. It was definitely conceded by all that the State did have a need for the property.

On October 21, 1974, during the course of the discussions concerning use of the property, it came to the attention of the Department of Law that the Commissioner of the Department of Highways was engaged in negotiations with the Municipality of Anchorage for the property's lease and possible sale. The Department of Law examined the issue and wrote a memo concluding that the Commissioner of the Department of Highways did not have the authority to enter into a lease-purchase agreement concerning the subject property.

Prior to writing that memorandum, David Shaftel, an attorney representing the Municipality in the negotiations, contacted Richard Bradley of the Department of Law. He advised Mr. Bradley that he was reviewing the purchase of the property by the Municipality and had certain misgivings about the legal aspects of the purchase. Mr. Bradley and Mr. Shaftel discussed the legality of the lease-purchase and Mr. Bradley informed Mr. Shaftel at the time that his conclusion was that the Commissioner of the Department of Highways did not have the authority and he specified which statutes he based his decision on.

Despite having knowledge that the Department of Law believed the Commissioner of the Department of Highways did not have the authority to enter into the lease-purchase agreement, the Municipality entered into the agreement on November 13, 1974. The agreement provides that the Municipality of Anchorage will pay $100,000 a year rent for ten years and $10,000 per year, starting the second year for ten years, for an option to purchase. The purchase price is set in the agreement at $1,126,000. The agreement does not provide for the payment of any interest whatsoever. In other words, at the end of ten years, the Municipality will have paid $1,000,000 in rent and $90,000 for the option to purchase, making a total of $1,090,000. By paying $36,000 at the end of ten years, the Municipality would be the owner of the property under the agreement. What the agreement really amounts to is nothing more than a ten-year interest-free loan in the amount of $1,126,000. The end result would be that despite tremendous inflation having occurred during the life of the agreement, and despite the continuously rising property costs in the Anchorage area, the Municipality will be in a position to purchase the property in 1984 at its 1974 value. The difference between the two amounts in this particular case could be as much as $3-4,000,000.

II. Legal Issues

Three major legal issues are involved in the litigation:

A. Which State agency first obtained jurisdiction over the subject property?

Under AS 38.05.030(b), all lands assigned by the Division of Lands to the Department of Highways are required to be returned to the Division of Lands when no longer needed by the Department of Highways. It is therefore important to determine whether the subject property constitutes property assigned by the Division of Lands to the Department of Highways. It is the State's position in the lawsuit that the subject property first came within the jurisdiction of the Division of Lands for the reason that AS 37.20.030(b) provides all Omnibus lands received from the federal government fall within the jurisdiction of the Department of Natural Resources.

The Municipality has taken the position that the property first came within the jurisdiction of the predecessor of the Department of Highways under AS 37.20.030(c), which provides that all public buildings accepted from the federal government under the Omnibus Act are subject to the jurisdiction of the Department of Public Works. Given the fact that the 1974 appraisal of the subject property found the buildings to be of no value while the land was valued in excess of $1,000,000, we believe the Municipality's assertion that public buildings, and not land, are at issue has no basis in fact.

B. Whether the Commissioner of the Department of Highways possessed the authority to sell State property of the type at issue?

The State has taken the position that even if the subject property is found to have first come within the jurisdiction of the predecessor of the Department of Highways, the Commissioner of the Department of Highways had no authority to sell the property, based upon AS 38.05.030(d) which specifically mandates that the Department of Highways turn over to the Division of Lands jurisdiction over all property it no longer needs except for property acquired by eminent domain or purchase. The subject land not having been acquired by eminent domain or purchase, the Commissioner of the Department of Highways had no choice but to turn the land over to the Division of Lands when it was no longer needed by his Department.

The Municipality has argued that under AS 19.05.070, the Commissioner of the Department of Highways had the authority to dispose of the property for it constituted property "no longer necessary for highway purposes." Again, in the State's view the Municipality's argument is without merit. What AS 19.05.070 was intended to do was to authorize the Commissioner of the Department of Highways to dispose of essentially remnant pieces of property. For example, if the Department of Highways had condemned a portion of property only to find after construction of the highway that a small piece of the property was unnecessarily condemned, the Department under AS 19.05.070 could return the land to its prior owner or an adjacent landowner or sell the land outright. This interpretation is borne out by the committee report on Ch. 35 SLA 1971 which appears at 1971 House Journal, page 776.

If the court were to side with the Municipality, the result would be an ad hoc land acquisition and land disposal system for the State with various departments acting as entirely independent entities in purchasing and disposing of property. What the State has sought from the court is a determination that there exists but one department responsible for disposing of all State property and that department is the Department of Natural Resources. We believe this is what the Legislature intended when it enacted AS 38.05 et seq., the Alaska Land Act, which states at AS 38.05.035(a)(7) that the Director of the Division of Lands is to have jurisdiction over all State lands.

C. Whether there was adequate public notice prior to entrance into the lease-purchase agreement?

Article VIII, Section 10, of Alaska's Constitution provides:

> No disposals or leases of State lands, or interests therein, shall be made without prior public notice and other safeguards of the public interest as may be prescribed by law.

The only notice given prior to the signing of the lease-purchase agreement was the listing of the lease-purchase agreement as one of at least nineteen agenda items to be considered at an Anchorage City Assembly meeting. It is

the State's view that the constitutionally required public notice means more than the mention of the transaction on a City Assembly agenda. It is just not reasonable to expect citizens to look to the agenda of an Anchorage City Assembly meeting to determine what is happening with the public's property.

The above is a succinct summary of the case and only briefly addresses the major legal issues. The facts of the case make it apparent that the Municipality of Anchorage saw a good deal and took it. And they did so with full knowledge that the Attorney General's office considered the transaction to be illegal. The arguments presented to the court by the Municipality are nothing more than attempts to justify ex post facto the Municipality's prior misconduct. Any ratification of the lease-purchase agreement would allow the Municipality to retain its outrageous bargain at the expense of the State and the public. It would also mean that two years of effort by the Department of Law have been wasted.

Sincerely,

AVRUM M. GROSS
ATTORNEY GENERAL

GEORGE M. SULLIVAN,
MAYOR

OFFICE OF THE MUNICIPAL ATTORNEY

April 5, 1978

Senator Joseph Orsini
Pouch V
Juneau, Alaska 99811

Dear Senator:

On November 14, 1974, the City of Anchorage and the State of Alaska entered into a Lease Purchase Agreement whereby the City leased from the State the industrial complex situated at the intersection of Third Avenue and Post Road in Anchorage. During territorial days, the complex was utilized as a maintenance and operations center for equipment for the Federal Bureau of Public Roads in Southeast Alaska. It was conveyed to the State of Alaska under the Omnibus Act of 1959 and was utilized as the Southcentral office and maintenance center of the Department of Highways and its predecessors until the Department moved to the new complex on Tudor Road in 1974. The Lease Purchase Agreement, which was negotiated at arm's length between the City and Commissioner Campbell between 1971 and 1974, provided that the City would pay the State rent of $100,000.00 per year plus $10,000.00 per year for the option to purchase. The term of the lease was to run for 10 years from August 14, 1974, and the purchase price, if the City chose to exercise the option, was to be $1,000,000. Prior rent and option payments were to be credited to the purchase price. Since August, 1974, the former highway complex has been used by the City and, for a time after the unification in 1975, by the Municipality of Anchorage, as a central maintenance center for city vehicles and, more importantly, as the maintenance center for the People Mover--a mass transit system which serves the needs of half the population of Alaska. If disputes surrounding this property can be resolved, the Municipality intends to utilize the former highway complex as a satellite operations center for the People Mover.

Shortly after the present administration took office, the State announced its intention to repudiate the Lease Purchase Agreement. It has subsequently filed a lawsuit to have the Agreement declared null and void and to have the Municipality ejected from the premises. The suit alleges that the Commissioner of Highways lacked authority to enter into the Lease Purchase Agreement, that the Director of the Division of Lands was the only official who could execute such an agreement, that appropriate public notice was lacking, and that the

property was appraised six, rather than three months prior to the effective date of the Agreement. The matter is still pending before the courts.

During the course of negotiations the Commissioner of Highways repeatedly assured City officials that he had full authority to execute the Agreement. The property was appraised by the State in February, 1974, six months prior to initiation of the Lease in August, 1974. The appraised value was a little over $1,000,000.00, approximately the purchase price set forth in the Agreement. Yearly rent paid to the State by the City is approximately 10% of the appraised value.

If the state succeeds in its efforts to have the Lease invalidated, the Municipality will need to seek new quarters for the pr[illegible] maintenance and operations center for the People Mover. [illegible]e property values in downtown Anchorage have been escalat[illegible] at approximately 2% per month since 1974 when the Agreement was executed, the cost of such relocation would be extremely oppressive to the taxpayers and highly disruptive to the financial structure of the mass transit system. The spectacle of the State seeking to interfere with the future growth of the Municipality's mass transit system through invalidation of the Lease becomes even more ridiculous when one considers that the State pays the Municipality $857,710 a year in state revenue sharing to promote mass transit.

The State's suit is even more ridiculous when one considers the past history of cooperation between local government in Anchorage and the State concerning matters affecting the public interest. For many years, the City of Anchorage provided the street light systems for the portion of the State Highway system within the City at no cost to the State. The Municipality has continued to do so. The City of Anchorage has leased 8.7 acres of valuable land at Lake Spenard to the State as a site for the National Guard at a lease rate of $1 a year for 102 years. In addition, the City leased the State Division of Aviation 21 acres of valuable land adjacent to the shore line of Lake Spenard at the nominal rate of $1,800 a year.

Basis of the State's Challenge to the Lease Purchase Agreement

The State contends that the Lease Purchase Agreement should be invalidated because the Commissioner of Highways lacked authority to execute it, that adequate public notice was not given, and that the property was appraised six months, rather than three months, prior to the effective date of the Agreement. The critical question is whether the Commissioner had such authority; unfortunately, that answer is masked in a bewildering tangle of statutes.

AS 38.05 (The Alaska Land Act) requires that most conveyances of state land be made by the Director of the Division of Lands, pursuant to the provisions of the Land Act. However, AS 38.05.030(B) of the

Alaska Land Act exempts certain conveyances by the Department of Highways from the procedural requirements of the Land Act. It provides:

> (B) The provisions of this chapter do not apply to any power, duty or authority now or in the future granted to the Department of Public Works and the Department of Highways in the name of the state, to acquire, use, lease, dispose of, or exchange real property, or any interest in real property. Lands assigned by the Division of Lands to the Department of Public Works and the Department of Highways shall be returned to the management of the Division of Lands when they are no longer needed for the purposes assigned.

AS 38.05.030(d) provides:

> (d) Real property acquired by, and under the management of, the agencies referred to in (a) and (b) of this section, which is no longer needed for its intended use, shall be returned to the jurisdiction of the Division of Lands, except that the Department of Highways may dispose of real property acquired by it under AS 19.05.040(2) and AS 19.05.080-19.05.120.

AS 19.05.070 gave the Commissioner of Highways the following powers to dispose of land:

> 19.05.070. Vacating and disposing of land and rights in land.
>
> (a) The department may vacate land, or part of it, or rights in land acquired for highway purposes, by executing and filing a deed in the appropriate recording district. Upon filing, title to the vacated land or interest in land inures to the owners of the adjacent real property in the manner and proportion considered equitable by the commissioner and set out by him in the deed.
>
> (b) If the department determines that land or rights in land acquired by the department are no longer necessary for highway purposes the department may:
>
> (1) transfer the land or rights in land to the Department of Natural Resources for disposal, or
>
> (2) sell, contract to sell, lease, or exchange land or rights in land according to terms, standards and conditions established by the commissioner.
>
> (c) Proceeds received from disposal of land or rights in land as authorized by this section shall be credited to the

> funds from which the purchase of the land was made originally. (§ 4 art IV title IV ch 152 SLA 1957; am § 4 ch 35 SLA 1971).

The key question is whether the highway complex was ever assigned to the Department of Highways by the Division of Lands. If there was an assignment, the property should be returned to the Division of Lands for conveyance. If not, the Commissioner of Highways had the authority to execute the Lease Purchase Agreement. The State concedes there was no express assignment by the Division of Lands; however, it argues that there was a constructive assignment by operation of law. Historically, the situation is very confused.

In 1959, the State received the highway complex from the United States under the Omnibus Act. Chapter 176 SLA 1959 provided that public lands were to fall into the jurisdiction of the Division of Lands or its successor and all public buildings were to be placed under the jurisdiction of the Alaska Highway and Public Works Department or its successor. In 1974 the Department of Highways was a direct successor in interest to the Alaska Highway and Public Works Department, being created from the Public Works Department by Executive Order No. 23 in 1962. The latter vested the Department of Highways with all highway powers and responsibilities formerly exercised by the previous department. The highway complex was used as the Anchorage headquarters for the Department until 1973. These factors indicate that the Commissioner of Highways had authority to execute the Lease Purchase Agreement, but it will probably take a Supreme Court ruling a year or two hence to decide the matter finally.

Public notice of the transaction was given in the Anchorage Daily Times concerning Anchorage City Council consideration of the Lease Purchase Agreement although it was not formally given by the State. If the transaction is not covered by the Alaska Land Act, as discussed above, Alaska Statutes did not require public notice.

The property was appraised by the State by Paul M. Dirksen in February, 1974, some six months prior to August 14, 1974, the date of the Agreement. The State alleges that the transaction is invalid because the appraisal was made six, rather than three months, prior to the effective date.

If the Agreement is invalidated as a consequence of lack of notice and deficiences in appraisal, title to hundreds, if not thousands, of other land conveyances by the State could be affected. I have enclosed a copy of an Affidavit of Dale Tubbs, formerly of the Division of Lands, which indicates the effect that invalidation of this conveyance for want of notice and appraisal would have upon other conveyances if the same standards were applied.

Appropriate Remedy

The Municipality believes the Commissioner of Highways had authority to execute the Lease Purchase Agreement and that it was an entirely proper conveyance. However, because of the State's challenge, the issue will probably not be resolved for at least another year or two because of litigation. In the meantime, the future of the State's largest mass transit system is cast into doubt because of the hopeless ambiguity of statutes concerning the authority of the Commissioner of Highways to make the conveyance. The Municipality has put many thousands of dollars into improving the property to keep the building habitable and in conformity with OSHA standards. The Municipality believes that because of the confused statutory situation and because of the State's commitment to improving mass transit in urban Alaska, that the Legislature should resolve this impasse by enacting a bill doing two things:

1. Ratifying the actions of the Commissioner of Highways in executing the Lease Purchase Agreement;

2. Directing the Commissioner of Natural Resources and the Director of the Division of Lands to approve the Lease Purchase Agreement as a conveyance to another government entity pursuant to AS 38.05.315(A). The following provision allows the Director of the Division of Lands to convey or lease to another government body for less than fair market value and without auction.

Such legislative action has been used frequently in the past. Examples are Chapter 144 SLA 1961; Chapter 20 SLA 1962; Chapter 54, SLA 1962; and Chapter 92, SLA 1965, copies of which are enclosed.

I have enclosed a copy of the draft bill which probably accomplishes these things. There is no pride in authorship, so please feel free to rework the draft as you see fit.

Thank you for considering this matter. Speedy resolution of the dispute could end an unseemly battle between government entities at the taxpayers' expense and remove a cloud from the future of mass transit in Anchorage.

Sincerely yours,

Theodore D. Berns
Municipal Attorney

Alaska State Legislature

Senate

Committee on

Community & Regional Affairs

Pouch V
State Capitol
Juneau, Alaska 99811

June 9, 1978

LETTER OF INTENT

Information received by the Senate Community and Regional Affairs Committee has identified six sections of the coastal zone regulations submitted by the Alaska Coastal Policy Council which, in the opinion of the Committee, warrants change. These appear in the standards for timber harvest (6AAC 80.100). Three of these sections, namely 6AAC 80.100 (a),(b)(3), and (d) were deleted entirely by the House of Representatives. We concur in this result.

There are three other sections which are also of concern. Section (b)(2) of the regulations, as submitted by the Policy Council, requires that timber harvest activities in the coastal area be conducted so as to "assure unrestricted fish movement in coastal waters". The word "unrestricted" as appears in this section is absolute in its requirement, therefore placing an unreasonable burden upon the timber industry. On the other hand, the Committee does desire that fish movement in coastal waters be assured. Since we cannot amend this section and therefore have a choice only between adopting it entirely or deleting it entirely, we wish to pass the section without change. However, we strongly urge the Alaska Coastal Policy Council to delete the word "unrestricted" as it appears in this section for the reason given.

For the same reason we also urge the Alaska Coastal Policy Council to delete the word "unrestricted" as it appears in Section (c)(4). Again, we will pass this section as written, but believe that the word "unrestricted" places an unreasonable burden upon the timber industry.

Finally, we urge the Alaska Coastal Policy Council to delete the words "potential for" in Section (b)(1) as submitted by the Council. As presently written, that section requires that timber harvest activities in coastal areas be conducted so that "the location of facilities and the layout of logging systems shall be managed so as to minimize potential for adverse environmental impacts". Industry should minimize adverse environmental impacts. However, the words "potential for" add an open-ended burden, the meaning of which we are uncertain; we therefore strongly urge that these words be deleted by the Alaska Coastal Policy Council.

It is the intent of the Committee with respect to the timber harvesting process section under review that, for the reasons stated above, the Alaska Coastal Policy Council review the sections discussed above and resubmit them with the recommended changes.

JOE ORSINI, Chairman

SENATE COMMUNITY & REGIONAL AFFAIRS
COMMITTEE MEETING

June 9, 1978

Present: Senators Orsini, Ferguson, Sumner and Willis

Absent: Senator Hackney

The Senate Community and Regional Affairs Committee met directly after session this day and passed out CSHB 134 with "INDIVIDUAL RECOMMENDATIONS" and CSHCR 125 am (C&RA) with a 'Letter of Intent' that passed out with "INDIVIDUAL RECOMMENDATIONS".

ALASKA HOUSE OF REPRESENTATIVES

Community and Regional Affairs Committee

LISA RUDD, Chair

Pouch V, State Capitol
Juneau, Alaska 99811
(907) 465-3870

LETTER OF INTENT -- CSHCR 125

By the Community and Regional Affairs Committee

Testimony received by the Community and Regional Affairs Committee identified two provisions of regulations submitted by the Alaska Coastal Policy Council for which change is suggested. Both bear upon the desire of members of the committee to maintain the broadest possible opportunity for public participation in the understanding of the process of developing district and state coastal management programs. Specifically,

(1) in 6 AAC 85.120(b), it is the intent of the committee that, in addition to giving of notice of public hearing by newspaper advertisement, where no newspaper of general circulation exists within a community or region, general notice should be given by radio;

(2) in 6 AAC 85.140, it is the intent of the committee that broad public circulation through general notice or radio broadcast be given to recommendations of the Coastal Policy Council in its review of district programs, that the public at-large (rather than only those persons specifically served a written copy of the Council's recommendation) have opportunity to respond with written comments, and that the public at-large enjoy the opportunity to attend all subsequent sessions, including mediation sessions.

Language adopted by the Coastal Policy Council in each of the sections cited complies with the letter of each underlying statute; the committee recommends reconsideration and change to more nearly accord with the spirit of public participation and understanding which is the basis of the coastal management program.

NOTES ON TELCON WITH ALLAN LINN RE SB 14 - 2-23-78

Linn confirmed that neither he nor the Division of Agriculture was involved in drawing up the criteria for the formula which the Division of Lands devised for the classification of agricultural lands under the bill. Nor was he actively involved in the classification process itself for the lands.

He pointed out that the Division of Lands has the responsibility for land classification and that the Division of Agriculture does not have the funding to carry out such a classification process. Linn said that he had no problems with the agricultural criteria set up by the division of lands, but noted that his expertise and involvement lay in the direct agricultural assessment, not in determining the applicability of access, other potential land uses, transportation facilities, state policies on d-2, etc.

Ben Harding

LINN COMMENTS RE CSSB 14 am IMPLEMENTATION

Linn said that the classification of state agricultural land had not been carried out by his office (the Division of Agriculture) but by the Division of Land.

He said he was not specifically aware of how much of the 650,000 acres called for in CSSB 14 had been classified, but he recalled the following general figures:

first year - 85,000 acres - scattered in the Susitna valley, Nenana, the Chena river valley, and possibly Kenai.

2nd year -125,000 acres - primarily in the Delta area for the barley project.

He was not directly aware that any "formula" had been used to classify agricultural land under CSSB 14. He did say, however, that the Division of Land had developed a process in which a number of factors were quantified and weighed to evaluate whether lands should tentatively be classified as agricultural or not. He said he could not rule out the possibility that Division of Land people might have used this weighing process to select land under CSSB 14, although he said he was aware it was being used for the state's agricultural selections under d-2. He also mentioned that "access to transportation" was one of the factors that was used in the process.

He assumed, however, that the classification of agricultural land has been completed for CSSB 14.

The state is using data compiled by the USDA Soil Conservation Service to estimate its total potential agricultural land. The SCS figure is 17.5 million acres, which Linn said has been revised upwards, since the SCS estimates are deliberately low. Linn said that the SCS is the only agency which has been involved in field work to select agricultural land. The state has not been, and Linn asked for $200,000 in his budget to be used as a contribution to the SCS work. That amount, he said, was deleted in the administration's budget.

DNR COMMENTS REGARDING THE IMPLEMENTATION OF CSSB 14 am

Summary

At this time, 165,144 acres have been classified for agricultural use under the bill, according to Gary Johnson, Planning and Research Section, DNR. Another 479,185 acres have been identified, but not classified, for agricultural potential. "Things look tight" for the classification of 650,000 acres by the end of the three year deadline in CSSB 14. Additional funds and manpower could ensure that the minimum acreage figure could be classified. Although some land between Circle and Fort Yukon has been tentatively applied for by the State from the BLM, the decision was apparently made by the State not to request agricultural land in the heart of the Yukon Flats, even though this is the best contiguous farming land in Alaska, because of the d-2 situation.

Location and Amount of Land Classified

Johnson gave the following breakdown of the 165,144 acres so far classified:

Jan. 1977	Kenai area	6,798	acres
" "	Mat-Su area	33,638	"
" "	Fairbanks	4,393	"
" "	Nenana/Tolchaket	42,119	"
Nov. "	Delta (barley project)	78,205	" (est.)

An additional 479,185 acres have been identified as potentially classifiable into an agricultural use category.

Johnson also believes that further agricultural acreage could be found in the following areas:

Delta	50,000	acres
Nenana/Tolchaket	25/30,000	"
Nenana (elsewhere)	120,000	"

He said that there is significant agricultural potential for land in the Susitna valley, but that insufficient funds and land data have so far prevented its identification and classification.

Johnson said that "things look tight" for meeting the 650,000 acreage figure set by CSSB 14 am within the three year time frame. He said, however, that he could not say that it was impossible but indicated that with increased funding and manpower it was more likely that sufficient land can be found and surveyed for agricultural use. At this time, the State has no capability to perform soil surveys in the field. The USDA Soils Conservation Service is the only agency doing such work and the State is using this data. Johnson thought that $50,000 had originally been considered for a matching grant to the SCS to carry out additional soil survey work but he did not know whether the money was still in the administration's budget.

Agricultural Potential of the Yukon Flats and D-2

According to Johnson, the Yukon Flats and the Delta area contain the greatest amount of contiguous, good quality agricultural land in Alaska. Of the two areas, the Yukon Flats is the best. The State has tentatively applied for land with the BLM between Circle and Fort Yukon, but Johnson said that the decision was apparently made for the State not to apply for land "in the heart" of the Yukon Flats because of d-2 considerations. He estimated that of the approximately 18 million acres of potential agricultural land in Alaska about 40% would be

withdrawn under HR 39. Of that, he estimated as much as 7 million acres in the Yukon Flat of potential farm land would be withdrawn under the d-2 proposals.

Elsewhere in the state, Johnson said that there is no doubt that enough agricultural use land exists to meet the 650,000 acre figure; it's only a matter locating it through soil surveys or through more general reconnaissance.

Formula for Determining Agricultural Classification

Johnson said that a formula was devised with the Division of Agriculture for classifying state land for agriculture. He described the formula as one of locating "core areas" of a minimum of 90 acres (he noted that much farm land in the state was scattered in small patches among muskeg bogs). Then minimum 10 acre adjacent areas were located, along with minimum 40 acre areas lying within 10 chains of the core area. Johnson explained that the formula was essentially "to identify land in blocks large enough to have agricultural usefulness" for farmers in the future. Another criterion was for the land to contain 50 percent or more Class II or III soils.

Initially Johnson said that such factors as transportation facilities, access to the land, or nearness to population centers were "not really considered" in the formula. Later on he indicated that, to some extent, these factors were taken into consideration

He also noted that before the land was classified for agricultural use, it underwent an "interagency review" which consisted of the Department of Fish and Game, the Department of Community and Regional Affairs, and the eight divisions within the Department of Natural Resources. This review had resulted in the deletion of three areas initially included in the agricultural classification: the area adjoining the capital site in Willow, a very important moose habitat, and an area near Fairbanks that had been used for recreational purposes

Knowledgeable persons in the USDA SCS, Johnson said, were Wayne Long, Ted Freeman, or Bill Fibbish (sp?), all of whom could be reached at 276-4246. The author of an upcoming SCS soils survey is Sam Reiger in Palmer.

IN RESPONSE TO YOUR INQUIRY REGARDING USE OF LANDSAT IMAGERY TO MAP LANDS FOR AGRICULTURAL CLASSIFICATION, I HAVE THE FOLLOWING OBSERVATIONS:

THE SOIL CONSERVATION SERVICE HAS MAPPED MUCH OF THE STATE IN TERMS OF SOILS AT VARIOUS LEVELS OF SPATIAL RESOLUTION AND SOIL CLASSIFICATION DETAIL. THESE MAPS ARE, OF COURSE, THE PRIMARY DATA SOURCE FOR ANY PROCEDURE FOR CLASSIFYING LANDS FOR AGRICULTURAL PURPOSES.

WE HAVE WORKED WITH THE SOIL CONSERVATION SERVICE ON A NUMBER OF PROJECTS AND ALONG WITH THEM COME TO THE TENTATIVE CONCLUSION THAT BROAD CATEGORIES OF SOILS CAN BE INFERRED FROM LANDSAT IMAGERY. THE BEST EXAMPLE OF THIS IS A RANGE AND SOIL SURVEY PERFORMED JOINTLY IN THE SEWARD PENINSULA. THIS WORK WAS DONE TO IDENTIFY AND MAP REINDEER RANGE FOR THE NANA CORPORATION. THESE RESULTS APPEAR TO BE QUITE SATISFACTORY.

THE SATELLITE DATA IS BASED ON LIGHT REFLECTED FROM THE SURFACE COVER OF THE EARTH. GENERALLY, THEN, ATTRIBUTES ARE IDENTIFIED THROUGH SPATIAL RELATIONSHIPS AND IDENTIFICATION OF SURFACE MATERIALS. IN ALASKA THE SURFACE MATERIALS ARE USUALLY VEGETATION. HENCE, SOILS MAPPING WOULD DEPEND LARGELY ON RECOGNITION OF PATTERNS (MORAINES, ABANDONED STREAM CHANNELS, DUNES, ETC.) AND VEGETATION TYPES AND THE ASSOCIATION BY INFERENCE OF THESE ATTRIBUTES WITH THE UNDERLYING SOILS.

WE HAVE NOT YET PERFORMED A FEASIBILITY ANALYSIS TO DETERMINE WHETHER THE KIND OF RESULTS FOUND ON THE SEWARD PENINSULA CAN BE OBTAINED IN THE REGIONS OF ALASKA WHERE AGRICULTURAL SOILS ARE FOUND. HOWEVER, WE AND MEMBERS OF THE SOIL CONSERVATION SERVICE HAVE SUSPECTED THAT BROAD ASSOCIATIONS CAN BE MADE.

THE AGRICULTURAL CLASSIFICATIONS TO DATE HAVE PROBABLY BEEN MADE ON THE BASIS OF "DETAILED" SOILS MAPS. I BELIEVE SCS HAS MAPPED A MUCH LARGER AREA OF THE STATE ON A "RECONNAISSANCE" LEVEL. PERHAPS THESE "RECONNAISSANCE" LEVEL MAPS COULD BE USED WITH LANDSAT IMAGERY AND TOPOGRAPHIC MAPS TO CLASSIFY OTHER AREAS. THE ACCURACY AND DETAIL OF PREVIOUS CLASSIFICATIONS COULD NOT BE MATCHED. THE SMALLEST MAP UNIT WOULD PROBABLY BE ON THE ORDER OF 360 ACRES.

I WOULD ENVISION SUCH AN ANALYSIS TAKING PLACE ALONG THE FOLLOWING LINES:

THE "RECONNAISSANCE" MAP WOULD IDENTIFY THE GENERAL AREA WITH THE DESIRED SOILS. TOPOGRAPHIC MAPS WOULD BE USED TO ELIMINATE STEEP SLOPES AND OTHER AREAS OBVIOUSLY NOT SUITED TO AGRICULTURE. FINALLY THE LANDSAT IMAGERY WOULD BE USED TO ELIMINATE POORLY-DRAINED AREAS, AND LANDFORMS GENERALLY NOT SUITABLE FOR AGRICULTURAL USE. THIS WOULD BE FOLLOWED BY A SHORT AERIAL (WINDOW) SURVEY TO MAKE SURE GLARING ERRORS HAD NOT BEEN MADE.

THESE ARE MY THOUGHTS. CERTAINLY THE SOIL CONSERVATION SERVICE SHOULD BE QUESTIONED ON THIS. THEY ARE THE EXPERTS. SHOULD THEY BE INTERESTED IN PURSUING THE MATTER WE WOULD BE HAPPY TO WORK WITH THEM. OVER THE NEXT FEW DAYS WE WILL LOOK A LITTLE DEEPER INTO THIS MATTER AND SEND YOU FURTHER INFORMATION.

THE FOLLOWING IS MY OPINION ONLY AND IS BASED ON ASSUMPTION OF OUR INVOLVEMENT. IT WOULD TAKE A MAXIMUM OF TWO MONTHS AFTER FUNDING TO COLLECT THE NECESSARY MATERIALS AND DO THE PRELIMINARY GROUND WORK. FOLLOWING THA THE AREAS WITH A POTENTIAL FARMING CLIMATE COULD BE ANALYZED AT 1:250,000 SCALE WITHIN FOUR MONTHS TO ESTABLISH GENERAL FARMING POTENTIAL AREAS. RESULTS WOULD BE IN TERMS OF TWO TO FOUR SQUARE MILE SECTORS. FOLLOWING THIS SELECTED AREAS COULD BE ANALYZED AT 1:63,360 SCALE (INCH TO MILE) WITH RESULTS IN TERMS OF 1/2 SQUARE MILE SECTORS. THIS SECOND PHASE WOULD TAKE ANOTHER FOUR MONTHS THIS INCLUDES BASIC AERIAL RECONNAISSANCE.

TOTAL TIME FROM INITIATION: 10 MONTHS. ASSUMING SCS AND DIV. OF LANDS COOPERATION, OUR TOTAL COST WOULD BE $50,000 FOR PHASE 1 (1:250,000 SCALE) AND $35,000 FOR PHASE II (1:63,360 SCALE). A FINAL FIELD CHECKING PHASE MIGHT BE ADVISABLE PERFORMED BY SCS WITH OUR PARTICIPATION. ESTIMATED COST FOR OUR PART: $15,000.

Business Property Tax

V.I.J.C.
2 F: BUSINESS
PROPERTY TAX

FURTHER COMMENTS BY ORRIN POMEROY (STATE ASSESSOR'S OFFICE)

RE YOUR BILL ON BUSINESS PROPERTY TAX IN UNORGANIZED BOROUGH

Pomeroy had the following concerns regarding the draft bill:

1) By restricting the tax to business property, would in fact the measure cost more to administer than it would raise in revenue?

2) Why should property tax exemptions be granted for communities with exisiting sales taxes? He believed that the two were different in nature and affected different segments of the local population. For the sake of equity, he agreed that exemptions should be stipulated for communities already having some form of property tax.

He noted that from his preceding remarks it was clear that he still favored the approach of SB 35 which taxed all real property in the unorganized borough. He remains concerned that absentee, "foreign" i.e. non-local, land owners possess considerable unimproved property in the unorganized borough which they are allowing to appreciate free from taxation.

He also remains concerned about what defines the concept of business property. He suggested that you might want to include language in your bill stipulating that records such as business licences should be made available to the Assessor's Office, but acknowledged that the legality of this would have to be determined first.

Pomeroy has not yet drawn up a fiscal note although he says his original rough estimate ($200-300,000 and 3/4 additional positions) is still a good ball park figure. If you would like him to start on the fiscal note, he said he would be ready to begin.

STATE OF ALASKA

JAY S. HAMMOND, Gover

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

DIVISION OF LOCAL GOVERNMENT ASSISTANCE / *POUCH B - JUNEAU 99811*

May 25, 1978

The Honorable Joseph Orsini
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

Your have requested comments from this Department concerning CS for House Bill 483am relating to "clean-up" of the Municipal Code (Title 29).

Although the bill, in its current form, received some minor amendments from the House, we very strongly support the bill. Our only concern is that Section 16, which repeals a section of Title 14 perhaps should not be in a "clean-up" bill to amend Title 29, but I presume your legal advisors can more adequately respond to this concern.

Basically, the bill originated with this Department. A group of municipal attorneys who participated in the original drafting of the 1972 version of Title 29 were invited to a special work session to offer suggested amendments to Title 29. Once drafted, the bill was widely circulated among municipalities for comment. Among others, the Association of Municipal Clerks offered additional amendments, some of which are incorporated in this bill.

Billy Berrier, now Director of the Legal Services Division for the Legislative Affairs Agency (and one of the participants in the original drafting of this bill) will hopefully be available to your committee when this bill is calendared, since he, perhaps better than anyone, can explain the reasoning for many of the proposed, technical amendments offered by HB 483.

Although this bill, if enacted by the Legislature, won't "clean-up" all of the problems of Title 29, we feel that passage of HB 483 will markedly improve the language of the Municipal Code and eliminate some of the more obvious problems which we, in this Department, and municipalities have had to live with during the past few years.

If we can provide additional comments, please advise.

Sincerely,

LEE McANERNEY
COMMISSIONER

STATE OF ALASKA

AUDIT DIVISION
POUCH W—ALASKA OFFICE BUILDING

FINANCE DIVISION
POUCH WF—STATE CAPITOL

THE LEGISLATURE

BUDGET AND AUDIT COMMITTEE JUNEAU 99801

March 3, 1978

SUMMARY OF: A Review of the Department of Community and Regional Affairs

PURPOSE OF THE REVIEW

In accordance with the provisions of Title 24 of the Alaska Statutes, a review of the Department of Community and Regional Affairs was conducted to determine if the financial statements appearing in the State's Annual Financial Report for fiscal year 1976-1977 are fairly presented.

FINANCIAL STATEMENTS

Because of scope limitations, we do not express an opinion on the Statement of Revenues-Estimated and Actual. Because the unencumbered balances for continuing programs were overstated $7,392,880, the Statement of Expenditures and Encumbrances Compared with Appropriations and its related schedules are not presented fairly. The Statement of General Fixed Assets is presented fairly.

NOTE TO FINANCIAL STATEMENTS

Audits of grants under the Comprehensive Employment and Training Act (CETA), for which the Division of Manpower is the prime sponsor, have disclosed questioned costs of $868,561.

FINDINGS AND CONCLUSIONS

1. The Division of Budget and Management, Office of the Governor, should obtain Legislative Budget and Audit Committee approval on all transfers between budget request units and new positions.

During the fiscal years 1977 and 1978 positions were created and funds transferred between appropriations without Budget and Audit Committee approval.

2. The Department should review year-end contract encumbrances and reduce or close out unrealistically high encumbrance balances.

Year-end encumbrances for the Child Assistance program were overstated by $183,497.98, 11% of program expenditures and encumbrances. Community Services was overstated by $78,950.27, 7% of program expenditures and encumbrances.

3. The Department should be more timely in submitting billings for reimbursement on Federal grants.

Revised final billings on a Federal grant were not submitted until a year after grant closing.

4. The Division of Finance, Department of Administration, should report all General Fund revenues in the financial statements and should enforce administrative regulations regarding receivables. The Department of Community and Regional Affairs should follow those regulations.

Errors by the departments in recording receivables and prior year revenues, and the method used by Finance to calculate adjustments to revenues are among the reasons why some revenues are never reported as revenues in the financial statements.

5. The Department should take a complete inventory to update the property list.

The use of the property list as a management tool is reduced because divisions swap equipment and never record the exchange.

Ombudsman's report Anchorage Daily News, March 23, 1978

State 'glacially slow'

By ROSEMARY SHINOHARA
Daily News Staff Writer

It's nasty in a couple of spots, funny in others, and if there were a best seller's list for annual reports, it would definitely be a candidate.

The third annual report of the Ombudsman for the State of Alaska is most remarkable for its brevity. The gist of the story can be absorbed in 10 or 15 minutes.

IT'S SMALLER than a comic book, larger than a paperback, a total of 65 loosely-filled pages.

The brevity is explained in the introduction:

"In light of the legislative desire to minimize pomp and paperwork, we have reduced the size of last year's report and have attempted to present the relevant facts and statistics in as clear and concise a manner as possible."

THE NASTINESS starts on page 15, prefaced by a comment that "most" state agencies are very cooperative in resolving complaints which poured into the office at the rate of 7.31 for every day of the year in 1977.

So, acknowledging that most people are nice, let's look at the facts: for the best agencies, cases closed equal more than 80 percent of the new cases opened in complaints about dealings with the agency.

"The major exceptions are Community and Regional Affairs, in which closures equalled only ten percent of openings; Environmental Conservation, where closures equalled 56 percent of openings; and Natural Resources where closures equalled 50 percent of openings."

THE REPORT, signed by chief ombudsman Frank Flavin, says the Natural Resources Department is "glacially slow" at making decisions, but when they're made, they're generally well-researched and documented.

And Environmental Conservation is excused because of the "complexity of the complaint load."

But, says the report, "Community and Regional Affairs complaints are open 'forever,' due to an agency tendency to 'dig in and lower the flak shields' at the least hint of criticism — no matter how constructive."

NO SPECIFIC mention is made in the report of the biggest complaint to surface involving the Community and Regional Affairs Department — a complaint against the hiring practices of a division

(Continued on Page 2)

• Ombudsman's report

(Continued from Page 1)

director that led to his indictment by a state grand jury. Charges were eventually dismissed.

The department takes exception to the comments in the annual report. Carl M. Gonder, deputy commissioner, said there's a "very strong inference" on page 15 that the department was uncooperative. "We felt that anytime they had a request for information or an investigation they were conducting we were cooperative."

People in the department who dealt with the Juneau representative of the ombudsman felt they had good relations, Gondor said.

"I THINK the crux of the thing in our view is that the ombudsman, when he makes an investigation, draws his own conclusions. If somebody disagrees with his conclusions, then he's unwilling to admit he might be wrong himself."

The ombudsman's report also passed out praise to individuals, and gave a "most improved" accolade to the people in state government who handle the longevity bonus system.

Occupational Licensing, Revenue, Audit, Student Financial Aid and Workmens Compensation agencies were also cited for being easy to deal with.

ON THE WHOLE, the report concludes Alaskans are complaining at a higher rate than elsewhere, and they're doing it more every year.

The 1977 complaints, totalling 2,569, were up 31 percent over 1976 complaints. And the number of Alaska complaints exceeds those in Hawaii by 46 percent, in Iowa by 51 percent, and in Nebraska by 2-7 percent.

Bureaucratic 'Shuffle' Spurs Lawmakers

By The Associated Press

In voting overwhelmingly last week to override Gov. Jay Hammond's veto of a bill to give a legislative committee authority to suspend administrative regulations between sessions, lawmakers were expressing a rising frustration with the state's growing bureaucracy.

Just about every member of the House and Senate has a favorite story about alleged bureaucratic blundering in the implementation of regulations which often have more impact on people that the acts of the Legislature itself.

One classic example of what lawmakers call the "bureaucratic shuffle" surfaced Tuesday in a letter from Rep. Bill Miles to Rep. Bob Bradley, chairman of the House State Affairs Committee, over the status of regulations necessary to fully implement a $7.5 million bond issue for elderly housing approved by voters in the 1976 general election.

The two Anchorage Democrats want the current Legislature to begin appropriating money from the bond issue for projects around the state, but found they couldn't proceed without the regulations.

So, Miles took on the job of trying to find out what was going on. The following is a summary of his account to Bradley about the effort.

Last Wednesday, Kevin Waring of the Department of Community and Regional Affairs told Miles that the regulations were completed and were in the lieutenant governor's office awaiting the expiration of a statutory 30-day grace period before they could be implemented.

Miles sent his administrative assistant to the lieutenant governor's office to obtain a copy of the regulations, but was told they had not arrived yet.

On Friday, Miles received a letter from Community and Regional Affairs Commissioner Lee McAnerney, containing a copy of what was listed as the final regulations approved by the attorney general's office for filing with the lieutenant governor.

Miles then contacted Waring again and was told that, yes, it was true that the attorney general's office had completed its review and, yes, the regulations were on file in the lieutenant governor's office.

Once again, Miles sent his assistant up to the lieutenant governor's office and once again she came down with the message that the regulations weren't there.

Miles then asked the attorney general's office in Juneau if it knew anything about the regulations and was informed that they were being worked on in the Anchorage office, and had not yet been approved.

A short time later, however, the attorney geneal's office called Miles back to report that the regulations were not in Anchorage after all but were being reviewed in the Juneau office.

"If a legislator has this hard of a time getting information on regulations from the bureaucracy, imagine what a citizen has to go through," said Miles, chairman of the House Democratic caucus.

Miles said he concluded that "either the department does not know where the regulations are located or misinformation is being deliberately spread."

In his letter to Bradley, Miles said he was particularly upset because the Department of Community and Regional Affairs had been promising him all year that the regulations soon would be ready.

"Regardless, housing for Alaska's elderly is most important," Miles said. "We cannot allow continued delay and risk missing another construction season."

Bradley responded to Miles' letter with a resolution wh asks the governor to dir McAnerney to adopt the re lations within 90 days.

McAnerney could not reached for comment.

Bradley said he didn't think resolution was unreasonable light of Miles' experience and fact that the department was a to adopt emergency regulatio within less than two month passage of the bond issue spend $2 million to compl elderly housing projects Ketchikan and Juneau.

Résumé

Sigvald John Strandberg, 7235 Blackberry Street, Anchorage, Alaska 99502

Personal Data

Birth Date: January 29, 1943 Birth Place: Anchorage, Alaska

Height: 5 ft. 10 in. Weight: 165 lbs. Hair Color: Dark Blonde
Eyes: Brown

Married: Wife, Arlene, sons, Sigvald, Jr. (6/8/68) and Neil (1/18/70)

Health: Excellent

Education

Primary & Secondary:

Entered first grade 1948 @ Chugach School, attending through first half of sophomore year @ Anchorage High School; thence to Fairbanks (family move) in January 1957, enrolling in Fairbanks Lathrop High School through May, 1959 when family returned to Anchorage. Graduated from Anchorage High School in 1961. Member, National Honor Society.

Post Second: Attended Willamette University, Salem, Oregon, 1961/62. General studies preparatory to law school. Transferred to Alaska Methodist University in 1962 and graduated therefrom in 1965 with B. A. degree (major concentration in math, chemistry and physics). Attended fall semester 1965 at Long Beach State College, Long Beach, California, taking supplemental courses in chemistry prior to entrance into graduate school. Attended night school at AMU fall semester 1966.

Military

Contracted recruitment in the Alaska Army National Guard in spring 1966. Served in Kenai, Anchorage and Juneau units. Honorably discharged 1972 after completing 6 years enlistment. Rank Spec. 5. Scored highest in State in 1971 and 1970 M.O.S. (occupational speciality) exams.

Personal History

Lifelong Alaskan resident, member of Pioneer gold (placer) mining family. Grandfather, David Strandberg, participated in Fairbanks gold rush in early 1900, and walked, snowshoed and dogsledded much of Alaska's Interior (walked from tidewater at Seward through Anchorage prior to its establishment and across the Alaska Range). Father, E. Odin Strandberg, born in Flat, Alaska in 1915 and family established permanent winter residency in Anchorage in 1923, the year after President Harding drove the golden spike in the Alaska Railroad at Nenana. Mother, Marie Strandberg. Three brothers.

Wife a 30 year Alaskan resident raised in Southeastern Alaska. Her late father a career Coast Guardsman, having extensive world travel and sea duty throughout Alaskan waters including Bering Sea ice patrols.

Interests

Having had the opportunity to serve in policy-making capacity in State Government, I am interested in continuing participation in community and state affairs. (See elaboration of state government duties in Work History section.)

Am very much personally committed to continuing my public service contribution to help ensure that Alaska State and local government continues to operate under policies which respect orderly growth and responsibly control resource and community development.

Served as chairman of the State Local Boundary Commission by appointment of Governor Jay S. Hammond from December 1974 through February 1, 1978. Extensive travel throughout Alaska and acquainted with community leadership and diverse economy of State and in its various regions. As chairman conducted hearings throughout Alaska from small villages such as Selawik, Kasaan and Angoon to cities such as Kodiak on matters relating to municipal services and jurisdiction.

Presently Vice President of Sand Lake Community Council, and past President and currently serving on the Alaska Methodist University Alumni Association board of directors. Past director of the Anchorage Board of REALTORS and the Alaska Association of REALTORS.

Republican candidate from District 12 in the August 1976 Alaska House Primary.

Work History

1974 - present	Private businessman involved in real estate sales. Spring 1977 along with several partners, formed First Equity, Inc. REALTORS, and First Equity, Inc. (an Alaskan corporation) with principal offices in Anchorage. Real estate broker, March 1977 till present, associate broker 1976 until 1977. Also have an Alaskan business license to perform appraisal work and other real estate services; counselor, property development consultant.
1973 - 1974	Independent contractor in municipal consulting.
July, 1972 to August, 1973	Director, Division of Local Government Assistance, Department of Community and Regional Affairs.
January 5, 1971 to July 23, 1972	Senior Local Government Specialist on Local Affairs Agency, Office of the Governor, staff.
March 23, 1972	Honorably discharged from the Alaska Army National Guard, 910th Engineers Company, after completing 6 years enlistment.

RESUME
Sigvald John Strandberg
Page 2

Work History
continued

December, 1969 to January 4, 1971

Appointed by Governor Keith H. Miller to direct the functions of the Local Affairs Agency. Supervised five professional level staff members (four local government specialists and the State Assessor) and four clerical personnel. Functions of the agency involved extensive contacts and coordination with other Departments and programs in the Executive Branch. Appeared frequently before legislative local government and other committees to offer testimony on bills impacting municipal governments. Supervised development and implementation of agency advisory city manager program, serving selected cities throughout the State with comprehensive interim professional municipal managerial assistance. Keyed to development of council-manager form of local government, assistance was directed to cities of Haines, Dillingham, Unalaska, among others. Supervised preparation and publication of the agency's Alaska Municipal Bond Report to the Governor and Legislature. Other publications included the agency's Fiscal Manual and Chart of Accounts for Small and Medium Sized Cities, and the agency Residential Cost Appraisal Manual for Alaskan Assessors and Appraisers. Coordinated Local Boundary Commission public hearings and meetings involving boundary changes proposed by the cities of Anchorage, Fairbanks, Valdez, Cordova and Haines, among others. Supervised the development and implementation of Federal Title IX (Demonstration Cities and Metropolitan Development Act of 1966), Title VIII (Housing Act of 1964) Community development training services, and 701 (Housing Act of 1954) Community Development Advisory Services programs. Other functions included representation of the Governor's Office on the Rural Alaska Community Action Program Board of Directors and Executive Committee, and Chairman of the State Geographic Board.

February 19, 1968 to December 1969

Transferred from Department of Labor to Office of the Governor, Local Affairs Agency as Local Government Specialist. Working under the supervision of the Agency Director, provided technical assistance to municipalities including development of ordinances, budgeting and accounting advice, and interpretation of Alaska municipal law. Duties also involved specific research in municipal service allocation schemes and analysis of the structure and function of the Alaskan borough and city system of local government. Served in staff capacity to the State Local Boundary Commission, an independent agency attached to the State Executive Branch for administrative services. Arranged for and attended public hearings and meetings of the Commission. Participated in the drafting and review of proposed standards and procedures for municipal boundary changes. Assisted in the formulation of administrative procedures governing State Aid to Local Government Program (Revenue Sharing).

Work History
continued

September 27, 1967 to February, 1968	Returned to former position as employment interviewer at Alaska State Employment Service, Juneau Local Office.
May 15, 1967 to September 11, 1967	Active Duty training, Alaska Army National Guard 6 month obligation (24 March 1966 date of enlistment ANG). Duty completed at Fort Bragg, North Carolina and Fort Belvoir, Virginia. Seven week poverman course in U.S. Army Engineer School at Ft. Belvoir; graduated number 1 in class of 62.
March to May 1967	Employed by Department of Labor, Employment Security Division, Alaska State Employment Service, Juneau Local Office: employment interviewer. Interview unemployed individuals, determine suitable occupation from analysis of previous work background, educational level, skills, knowledge, abilities and personal preference. Refer applicants to existing job openings. Arrange interviews with employment counselor for those people who are not job-ready. Recruit and screen for various Federally sponsored programs such as MDTA and Job Corps. Administer proficiency tests to clerical applicants. Make employer visits to determine manpower needs. Coordinate with various State and Federal agencies such as Vocational Rehabilitation, State Division of Welfare, Bureau of Indian Affairs, Neighborhood Youth Corps and Youth Opportunity Campaign. Assist Unemployment Insurance personnel in claims filing.
November through January 1966	Employed by Department of Army, Petroleum Distribution Office, Anchorage Terminal: petroleum pumping equipment operator. Defueled ocean-going tankers at Port of Anchorage, unloaded railroad tank cars into storage facilities at depot. Issued diesel oil and automotive gasoline to military base stations. Issued jet fuel and aviation gasoline to hydrants under aprons at Elmendorf Air Force Base.
October to November 1966	Employed by Department of Army. Drove 45 passenger school bus transporting military dependent children to and from schools on Ft. Richardson.
February through September 1966	Installation, operation and maintenance of diesel, dual fuel, and spark fired natural gas engines driving AC generators, supplying power to City of Kenai and Wildwood Air Force Station. Supervised up to four other operators and mechanics.

Work History
continued

1964 through 1965	During college terms, employed by Alaska Methodist University doing miscellaneous work, including messenger services, custodial work.
1961 through 1965	Summers employed at Consolidated Utilities, Ltd., Kenai, Alaska. Job duties same as noted above.
1960 through 1961	Part-time winters, part-time June through August employed by E. Odin Strandberg & Associates, Anchorage, Alaska. Chainman and rodman, general land, tideland and commercial surveys.
1957 to 1960	Summers (June through September) employed at Strandberg Mines, Inc., Folger, Alaska. Operating engineer and general mine operations: stripping, clean-ups, maintenance of camp landing field and facilities, mine survey work.

Personal Interests

Since 1961 I have been interested in aviation. This has enabled me to see a large portion of Alaska on business and pleasure flights. Private Pilot License (airplane single-engine land) obtained in 1963; 250 hours logged to date.

Family interests include sport fishing and cross-country skiing.

Dear Mr. Strandberg Sig

Further to your telephone conversation this morning with my Administrative Assistant, I would like to invite you and any other members of the Local Boundary Commission to attend the hearings which the Senate Community and Regional Affairs Committee will be holding in regard to your recommendations on the proposed annexations by the Cities of Skagway and Petersburg and the Haines Borough.

The committee meeting is scheduled for 3:00 P.M. in Room 100 of the Assembly Building Tuesday, February 7, 1978.

I look forward to seeing you and any other Commission members who wish to attend at that time.

Sincerely,

Joe Orsini

Gentlemen:

As I understand it, the Boundary Commission is holding a hearing in Kodiak to consider three items. The first is to make a decision on the Mill Bay Road annexation. This was heard by the Boundary Commission on December 12, 1977. The second item is to discuss two 1963 annexations: one involving the City's airport property and the other is the Frontier Southern Baptist Church property. The third item is to discuss the boundary question in the total urban area of Kodiak.

The City of Kodiak has supplied the Boundary Commission with a great deal of information regarding the Mill Bay annexation. The Borough has gone ahead with their plans to create a service area in the Kodiak urban area adjacent to the city limits. The City of Kodiak has decided to stop this service area creation through the court system. If it turns out that the courts will not allow the service area to be created, the responsibility will be placed on the City of Kodiak to provide services to the projected service area.

There is another area that I would like to bring to your attention as well. This involves the Coast Guard Base adjacent to the City of Kodiak. At the present time, the State of Alaska leases part of the Coast Guard Base for the State airport and is currently considering expansion of that facility. The Coast Guard Base, including the airport, is not within the boundaries of the Kodiak Island Borough, therefore, we have a difficult situation.

The City of Kodiak Police Department is the security agency involved at the airport. Our police officers provide the necessary anti-hijacking protection for the State. There are areas at the airport that are leased to individuals and the property is not taxed in any way. As the airport grows and develops, increased commercial activity will be present at that facility. It is obvious that the Kodiak Island Borough

Fr Local Boundary Commission

is missing out on a great deal of personal property tax at the airport. I am not certain about the real property taxes since it is Federal property.

Another issue is the fact that Koniag Native Corporation is receiving excess property from the Coast Guard. There are plans to develop this property, of course. As long as the property remains outside of the jurisdiction of the Planning and Zoning function, the area could be developed without adequate controls. I feel it is important that the Boundary Commission take a look at this situation as well.

The immediate concern is to annex the State airport. I believe that part of the Coast Guard Base could be annexed without any residents taken in. I realize this is another whole dimension to the boundary situation in the Kodiak urban area; however, I think that if you are going to be looking at the total urban area around the City of Kodiak, the Coast Guard facility and State airport should be taken into consideration.

I have done some research regarding the formation of boroughs and utilization of service areas in the context of what is happening currently in the Kodiak urban area. I must apologize that the amount of research done and the limits of my resources does not make this study a complete one; however, the basic issues as I see them are presented below.

The most adequate source of information is a publication called "The State and Local Government System" by Thomas A. Morehouse and Victor Fisher. I was only able to find the SFG interim report #23, March, 1970.

I would like to take the liberty of quoting the specific paragraphs and furnishing you with Xerox copies of specific pages of the report. By utilizing this method I will not take things out of context and give you incomplete information. This, of course, will make this communication to you a rather lengthy one; however, I think the end result will be much more convincing.

Since the subject report was published in March of 1970, I am certain the research was done in 1969 and before. That means that at least for the last nine years the State of Alaska has been aware of the problems existing between cities and boroughs. There are references to other publications in this study that show that the State of Alaska has been aware of the problem prior to 1969. Due to lack of resources and adequate time, I will not go into a long dissertation regarding the Constitutional Convention, creation of boroughs and other instrumentalities of local government. However, I do plan to dwell on the issues that were brought out by Mr. Morehouse and Mr. Fisher that relate to the specific problem that the Boundary Commission is concerned with in the Kodiak urban area.

On Page I-18, the situation that we now have here is presented. At the top of the page, it mentions the Boundary Commission's responsibilities and ability to affectuate the necessary controls. The next paragraph talks about the borough form of government and I quote: "In its current stage of evolution, then, the borough possesses the form but not the substance of authoritative area-wide government. It is 'general government' within which a powerful special government--the school district--has maintained and even increased its autonomy. It has 'exclusive authority' for area-wide functions, but in practice, its functions are divided and shared with independent city and school administrations. It is a 'regional government' but it competes with city government for both territory and function. It speaks of promoting 'area-wide' policy and programs but it is so structured as to facilitate the expression of local selfinterest and localized service area needs"

The next paragraph on Page I-18 and I-19 further develop this idea: "The basic problem is that in most areas two forms of local government--the city and the borough--are attempting to occupy political and physical 'space' where there is room only for one. This is so particularly where a borough centers on a single urban core served by a well established city (Anchorage, Fairbanks, Sitka, Ketchikan). The case for a single urban area-wide governmental unit for these places would seem clear. Much less clear, however, is the rational used for superimposing the borough as a second unit for local general government on the existing municipal base in these more developed regions of the State. On the other hand, where the borough, as a regional government, might serve smaller areas of settlement and rural areas, as well as region-wide needs, more room could be considered available for both borough and city governments (e.g. Kenai, Kodiak, Matanuska-Susitna)."

The fact that growth in the last nine years has placed the City of Kodiak in the same situation as Anchorage, Fairbanks, Sitka and Ketchikan is pointed out by your addressing the same issues as discussed in the report.

On Page I-21, at the top of the page, there is a discussion regarding cities. "City boundaries should be so located as to encompass an entire 'natural' socio-economic and political community. Since most of Alaska's urban settlements are small and relatively compact, there is no technical reason why this criterion cannot easily be met. This would minimize the need for service areas in organized boroughs to perform urban services that can be performed by a city."

On the same page there is a discussion regarding service areas. This goes on to the next page as well and is certainly germain to the discussion at hand. "While it is generally desirable that matters of government organization and functions

be determined locally, past experience of borough-city conflict over annexation and the creation and operation of service areas indicate that the State probably through the Boundary Commission should review local action and play a mediating role. The purpose would be to insure that appropriate incorporation and annexation standards are met, that a new service area is actually warranted and, if so, that it is properly constituted. Any area bordering on a city should be subject to annexation rather than permitting its establishment as a borough service area or its incorporation as a separate city. If annexation or incorporation is not feasible or desirable, expansion of an existing service area would be considered providing that a determination is made that the existing service area should not itself be annexed or incorporated. Only after each of these options is considered in order should it be permissible to establish a new service area and then only with a clear understanding that it is subject to future adjustment within the broader system of organized local government."

Further on in the study, on Page IV-37, the same kind of information is presented. "The State was to assume a continuing responsibility for the overall design and performance of the local governmental system. Specifically for this purpose two new State agencies were mandated by the Constitution: a Local Boundary Commission and a 'local government agency'. The Boundary Commission would assure that borough and city boundaries were properly aligned in the first instance and subsequently were responsive to changing needs and conditions. The Commission was thus authorized by the Constitution to 'consider any proposed local government boundary changes' and subject to legislative veto it could implement such changes."

On Pages VI-16 and VI-17 there is a discussion of city versus borough. "It was apparent from the start that a potential stalemate between cities and boroughs was built into the new local governmental system set forth in the Constitution. Boroughs and the cities within them were very likely to compete with each other for territorial jurisdiction over urbanizing areas outside city limits. To service these places the borough would need to acquire additional powers or create special service areas. If additional area-wide powers were sought these would be at the direct expense of city authority since area-wide powers assumed by the borough are denied to the cities. If nonarea-wide (outside city) powers were sought or if service areas were created, these could constitute blocks to city expansion."

On Page VI-18, there is a discussion of annexation versus service areas. "As viewed by the Public Administration Service (PAS) in its report to the Statehood Committee in 1950, there were two contrasting approaches to local government reorganization in the more urbanized areas of the state. On the one hand, the borough could be established with a view toward eventual absorption of the city within it. On the other, the jurisdiction of the city could be expanded through annexation of the urbanizing areas around it. In most of urban Alaska, there appeared to be no need for more than one unit of local government to provide urban services.

Population and economic bases were small and duplication of governmental machinery would be wasteful. 'By all odds' reported PAS, 'the most direct and least complicated line of evolution for many communities would be expansion of the central city with all of its existing plant, political structure, credit and fiscal base and political know-how'. But, 'if this line of reasoning is valid what foreseeable use is there for organized boroughs . . .'"

> PAS concluded: "It may be that the best solution for the problems of urban government in most areas will be to concentrate the full responsibility in a single level, the city, or the completely consolidated city-borough. On the other hand, it may be that the borough will provide a very useful agency in rural Alaska for the exercise of local responsibility for administration and at least partial financing of education and a growing list of local or regional services such as local roads, fire protection, utilities (water, sewer and others), health, recreation, etc., some of which would be provided on a borough-wide basis and some in special service areas organized and governed under the authority of the borough."

"Ignoring these considerations, the State layered borough government over the cities of urban Alaska and established no borough units in rural Alaska."

On Page VI-20, this thought continues. "At the same time, the borough service area has been available as a vehicle for meeting service needs for developed enclaves outside the city. This tends to neutralize whatever attraction city annexation may have for those seeking more and higher quality urban services. With the borough service area, residents outside the city may select the particular mix of services they wish and be assured of paying, through differential mill rates, only for those additional services directly received in their immediate area of residence. For this reason, however, service areas also fragment the borough. The separate suburban enclaves develop, a built-in resistance to unified or consolidated area tax and service structures, and service area status insulates their residents from the cost of city facilities and services that they share or benefit from, perhaps most obviously as owners of property whose value is enhanced simply because the city is accessible."

I find that the above paragraph gets to the heart of the problem and I think that to go further would just elaborate this very same thinking and belabor the point.

One of the outgrowths of the current Kodiak Borough-City conflict has been the idea of unifying the governments in the Kodiak Island Borough. Resolutions have been passed by both the City of Kodiak and the Kodiak Island Borough regarding unification. At the Borough Assembly meeting on April 7, the Borough Assembly

did adopt a Resolution to put the question on the ballot next October. Hopefully, the Boundary Commission will look at the problem in the immediate context of what is going on now rather than what might happen in the future. I am certain that you are aware of the unification procedures and the fact that the Kodiak Island Borough is fragmented with a home rule city, five second class cities and the Borough. In addition, there are many residents outside of the cities that compound the complexity of unification. While I personally see unification as the only answer and ultimately it is bound to occur, the process will probably take two to three years before unification becomes a reality.

The Boundary Commission is the only body that has the power, authority and responsibility to mediate the conflicts described above. I feel that the State of Alaska is certainly at fault by allowing the borough-city annexation-service area conflicts to exist in the first place. In the last nine or ten years the situation has gotten worse and it has even reached Kodiak Island which in itself is isolated from the rest of Alaska. This is certainly not the time nor the place to lay blame but to look at answers within the context of legalized solutions.

The obvious is clear. The Boundary Commission should consider steps to annex the total urban area into the City of Kodiak by using the stipulation for differential taxation as described in 19AAC 05.020 (3) and (4). Without the total picture being reviewed and the Boundary Commission taking appropriate action, I see this situation continuing for a number of years. Since the Boundary Commission decided not to act on the Mill Bay Road annexation when you were here in December because of a decision to look at the entire urban area, I think it is encumbent that the Boundary Commission act positively to stop the squabbling and hassles that have resulted because of the City-Borough conflicts.

If Kodiak were an isolated case and our problems were unique to Alaska, I would be the first one to bring that to your attention; however, it is clear that since the creation of the Kodiak Island Borough and the fact that City Council-members do not sit on the Borough Assembly and removal of the weighted voting provision, many conflicts were bound to result. Only through the good offices of the Boundary Commission will the Kodiak Island taxpayers and residents see a resolution to their problem.

Hopefully, unification is the final solution to the problems, perhaps, that is what this is all about. The Constitutional Convention was aware that unification was probably the only answer; however, they did not deem it practical to mandate that from the beginning. It seems as though the only answer is unification, however, in the meantime we must look to the political realities of that process. As mentioned above, the City is taking legal action against the Borough to stop the formation of the service district immediately outside of the city limits. The Borough plans on utilizing City water and sewer to serve the residents of these service areas. As long as the Boundary Commission refuses to take positive annexation action,

the taxpayers will be the losers. In addition, the residents of Kodiak will divide up into groups and destroy the harmonious relationships that have developed over many years. The Boundary Commission has the responsibility and authority to resolve this problem before it gets carried to extremes. Your assistance will be greatly appreciated. Hopefully, the Boundary Commission will remedy the situation by annexing all the urban area of Kodiak to the City of Kodiak.

Thank you for your time and attention.

Very truly yours,

CITY OF KODIAK

Ivan L. Widom

4. The state was to control local government boundary changes that could be made objectively in response to changes in urban population and economic growth patterns. Just as the Boundary Commission was unable to substitute its authority for local determinations in the initial setting of borough boundaries, so it has since played a minor role in controlling subsequent alterations of borough and city boundaries. As in pre-statehood days, most significant boundary changes are subject to several procedural checks and to elections in the areas immediately affected. The commission has not been in a position to counter or withstand the political pressures brought to bear, particularly when proposed boundary changes are perceived as affecting values associated with local autonomy, suburban separatism, or tax and service independence.

In its current stage of evolution, then, the borough possesses the form but not the substance of authoritative areawide government. It is a "general government" within which a powerful special government -- the school district -- has maintained and even increased its autonomy. It has "exclusive authority" for areawide functions, but in practice these functions are divided and shared with independent city and school administrations. It is a "regional government," but it competes with city governments for both territory and functions. It speaks of promoting "areawide" policies and programs, but it is so structured as to facilitate the expression of local self-interest and localized service area needs.

The basic problem is that in most areas two forms of local government -- the city and the borough -- are attempting to occupy political and physical

"space" where there is room only for one. This is so particularly where a borough centers on a single urban core served by a well established city (Anchorage, Fairbanks, Sitka, Ketchikan). The case for a single, urban areawide governmental unit for these places would seem clear. Much less clear, however, is the rationale used for superimposing the borough, as a second unit of local general government, on the existing municipal base in these more developed regions of the state. On the other hand, where the borough, as a regional government, might serve smaller areas of settlement and rural areas, as well as region-wide needs, more room could be considered available for both borough and city governments (e.g., Kenai, Kodiak, Matanuska-Susitna).

Borough government does not exist at all in most of Alaska, for the "unorganized borough" does not function. Current developments in unorganized Alaska suggest, however, that the social and political conditions for increased local self-government are now emergent. Therefore, in considering the governmental needs for unorganized Alaska, it will be necessary to avoid outmoded notions of the "readiness" of its residents for self-government. In the absence of formal governmental institutions, Native leaders are building their own regional organizations and promoting local participation in a number of federally funded social and economic development programs. Unless these realities are taken fully into account, local government policies developed at the state level will meet with no more success in rural Alaska during the 1970's than did state policies concerning the organized borough in urban Alaska during the 1960's.

The momentum of the statehood movement has been spent, making it all the more difficult to effect basic alterations in the existing scheme.

3. Cities. Cities are viewed as the basic units of local government, located both within and outside of organized boroughs. City boundaries should be so located as to encompass an entire "natural" socio-economic and political community. Since most of Alaska's urban settlements are small and relatively compact, there is no technical reason why this criterion cannot easily be met. This would minimize the need for service areas and organized boroughs to perform urban services that can be performed by a city.

The city classification scheme should parallel the borough's. That is, there should be but two classes of municipal corporation -- home rule and general law. As in the case of organized boroughs, general law cities should have the option of assuming home rule status and privileges.

4. Service Areas. Service areas in organized and unorganized boroughs would be vehicles primarily for meeting special service needs and applying differential tax rates, as at present. In unorganized borough areas, they would be directly under the jurisdiction of the state and the advisory councils. The service area should not be used as a substitute for organized borough or city status. The determination of the need to establish a service area should be based upon consideration of settlement patterns within the borough, proximity to a city or existing service area, the desire for special types and levels of service on the part of the area's residents, and their capacity to provide the additional revenues necessary to support the desired types and levels of services.

While it is generally desirable that matters of government organization and functions be determined locally, past experience of borough-city conflict over annexation and the creation and operation of service areas

indicate that the state, probably through the Boundary Commission, should review local action and play a mediating role. The purpose would be to ensure that appropriate incorporation and annexation standards are met, that a new service area is actually warranted and, if so, that it is properly constituted. Any area bordering on a city should be subject to annexation rather than permitting its establishment as a borough service area, or its incorporation as a separate city. If annexation or incorporation is not feasible or desirable, expansion of an existing service area would be considered, providing that a determination is made that the existing service area should not itself be annexed or incorporated. Only after each of these options is considered in order, should it be permissible to establish a new service area, and then only with clear understanding that it is subject to future adjustment within the broader system of organized local government.

Functions and Finances

Issues of governmental structure, functions, and finances are closely interrelated; one cannot properly be considered in isolation from the others. State policies such as the following would help create and reinforce the local government structure outlined above.

1. Financial incentives. State financial aid policies should be designed to (a) eliminate current disincentives to local incorporation or annexation, and (b) provide positive incentives for performance of urban area functions by cities and regional functions (including special service areas) by boroughs. The state should re-examine all provisions of law and fiscal relations (e.g., tax and revenue sharing) that tend

to the long term goal of a unified local governmental system, and provisions were included in the constitution for the purpose of encouraging close cooperation between boroughs and cities within them.

Cities, then, would continue to exist within the new boroughs and, between them, they would eventually exercise all local government powers in the state. Special districts, including school districts and public utility districts, would be absorbed into these two constitutional forms of local government. While elective school boards could remain in existence, they would be under the general budgetary control of the borough assemblies.

The state was to assume a continuing responsibility for the overall design and performance of the local governmental system. Specifically for this purpose, two new state agencies were mandated by the constitution: a local boundary commission and a "local government agency." The boundary commission would assure that borough and city boundaries were properly aligned in the first instance, and subsequently were responsive to changing needs and conditions. The commission was thus authorized by the constitution to "consider any proposed local government boundary change" and, subject to legislative veto, it could implement such changes. The local government agency, on the other hand, would broadly "advise and assist local governments . . . review their activities," and perform other functions assigned by law.

Within this very open and apparently simple constitutional framework, the state legislature was to specify and elaborate essential features of local government and state-local relations. The ultimate goal, however, was not state control, but maximum local control of the internal

serve the city and is obligated to work with the borough planning staff. In the hopeful words of the state's Attorney General, "the system is a carefully balanced one which demands a great deal of cooperation between city and borough."[17]

Thus, although the borough presumably has "exclusive" planning and zoning authority, effective arrangements are anything but clear-cut. They are, in part, the outcome of practical, and often unstable, compromises in the writing and interpretation of statuatory provisions. Complicating the issue in this case is a concept of planning that does not account for differences in scale or level. Consequently, political and administrative accommodations must be reached at the local level in order that even routine planning tasks -- at project, neighborhood, city, and areawide levels -- can be accomplished. By denying planning authority to the city, the borough act tended to complicate rather than clarify borough-city administrative relationships -- it helped create a structure within which conflict was bound to occur, and one that has in some cases operated to eliminate city planning functions altogether. But the planning conflict only reflects larger differences between the city and borough.

City Vs. Borough

It was apparent from the start that a potential stalemate between cities and boroughs was built into the new local governmental system set forth in the constitution. Boroughs and the cities within them were very likely to compete with each other for territorial jurisdiction over urbanizing areas outside city limits.[18] To service these places, the borough

[17] Quoted in Alaska, Local Affa'rs Agency, Alaska Local Goverament, Vol. VII, No. 7, October 1964, p. 4.

[18] See PAS, op. cit., pp. 63-73.

would need to acquire additional powers or create special service areas. If additional areawide powers were sought, these would be at the direct expense of city authority, since areawide powers assumed by the borough are denied to the cities. If non-areawide (outside city) powers were sought, or if service areas were created, these could constitute blocks to city expansion. Moreover, borough assemblymen from outside the city could be expected to resist city annexation cutting into their constituency. And if, at the same time, this meant that assemblymen from the city would acquire the weighted vote advantage because of an increase of the city population (to a majority of the borough population), the resistance would be all the more intense.

Assembly Structure

Since the city is represented on the assembly by city council members, the ground is already prepared for city-suburban splits and polarization because of the assembly's own internal structure. This can directly channel and reinforce the internal divisions that would in any case exist because of the normal political reality of competition and conflict among the different interests that assemblymen are elected to represent.[19] Direct city representation, as required by the constitution,[20] enhances certain naturally unstable aspects of the political process that have already been

[19] Cf. Paul Ylvisaker, "Some Criteria for a 'Proper' Areal Division of Governmental Powers," Area and Power, Arthur Maass, ed. (Glencoe, Ill.: The Free Press, 1959), p. 33.

[20] Alaska, Constitution, Article X, Section 4. This, it should be noted, is the only instance in which the article prescribes a specific feature of internal organization, a practice otherwise avoided, and deliberately so, by the article's framers.

built into the borough structure. Another method of city representation (e.g., borough sections, at-large, or some combination of both) would not mean the elimination of conflict. Indeed, it is possible that confrontations between completely separate city and borough governments might even be more intense in the absence of assembly "screening" and internal stalemating. However, these confrontations would more likely occur in political arenas larger than the assembly structure, often forcefully presenting themselves for more definitive resolution at the state level.

Annexation Vs. Service Areas

As viewed by the Public Administration Service (PAS) in its report to the Statehood Committee in 1959, there were two contrasting approaches to local government reorganization in the more urbanized areas of the state. On the one hand, the borough could be established with a view toward eventual absorption of the city within it. On the other, the jurisdiction of the city could be expanded through annexation of the urbanizing areas around it. In most of urban Alaska, there appeared to be no need for more than one unit of local government to provide urban services. Population and economic bases were small, and duplication of governmental machinery would be wasteful. "By all odds," reported PAS, "the most direct and least complicated line of evolution for many communities would be expansion of the central city with all of its existing plant, political structure, credit and fiscal base, and political know-how." But, "if this line of reasoning is valid, what foreseeable use is there for organized boroughs . . .[?]"[21] PAS concluded:

[21] PAS, op. cit., p. 71.

> It may be that the best solution for the problems of urban government in most areas will be to concentrate the full responsibility in a single level, the city, or the completely consolidated city-borough. On the other hand, it may be that the borough will provide a very useful agency in rural areas for the exercise of local responsibility for administration and at least partial financing of education and a growing list of local or regional services such as local roads, fire protection, utilities (water, sewer, and others), health, recreation, etc., some of which would be provided on a borough-wide basis and some in special service areas organized and governed under the authority of the borough.[22]

Ignoring these considerations, the state layered borough governments over the cities of urban Alaska and established no borough units in rural Alaska.

As described above, the state was confronted with the problem of "integrating" all areas served by special districts. City annexation of all, or even a larger part, of these surrounding areas appeared to be politically out of the question. Even in the case of a small public utility district completely encompassed by the city of Anchorage, opposition to city annexation was intense, although the annexation was finally accomplished. In this case, the Boundary Commission exercised its constitutional prerogative of ordering the annexation, subject to legislative veto, without a vote of the residents of the district. Its action was upheld by the state Supreme Court.[23] This was a relatively simple case of a special district that was required under the constitution to be integrated into a city or borough. Completely surrounded by Anchorage, it was an obviously practicable and logical move for the city to annex it. On the other hand, the Boundary Commission had been most respectful of political realities in cases where suburban residents, often fearing that the cost in new taxes will outweigh the benefits of additional services received, object

[22] Ibid.

[23] City of Anchorage vs. Fairview Public Utility District No. 1, Alaska Supreme Court (1962).

to city annexation. Certain groups of outside-city residents have also been extremely possessive of their identity and autonomy, much in the tradition of suburban and rural separatism, with central cities often cast in somewhat morally suspect roles.[24]

At the same time, the borough service area has been available as a vehicle for meeting service needs of developed enclaves outside the city. This tends to neutralize whatever attraction city annexation may have for those seeking more and higher quality urban services. With the borough service area, residents outside the city may select the particular mix of services they wish and be assured of paying, through differential mill rates, only for those additional services directly received in their immediate area of residence. For this reason, however, service areas also fragment the borough. The separate suburban enclaves develop a built-in resistance to unified or consolidated area tax and service structures, and service area status insulates their residents from the cost of city facilities and services that they share or benefit from, perhaps most obviously as owners of property whose value is enhanced simply because the city is accessible.

So, following the line of least relative resistance, boroughs were established in large part to solve the special district problem. Critical by-products of this action were the blocking of significant annexation activity by the cities within them and, in several cases, the fragmenting of the urban area. This outcome was foreseen by PAS in its 1959 report: "The conclusion is inescapable that it would often be more difficult to

[24] Although Alaska's "central cities" are really small and medium-sized towns by U.S. standards, such anti-city sentiments often seem to be magnified here. This is, in part, the result of Alaska's peculiar socio-economic characteristics and political "culture" as described in Chapter III above, as well as traditional American attitudes toward the "city."

Dear Mr. Strandberg:

The Senate Community and Regional Affairs Committee would like to express its support for your reappointment by Governor Jay Hammond to serve an additional term of office on the Local Boundary Commission.

The Committee deeply appreciates your years of public service on the Commission and looks forward to the continuation of your work.

Sincerely,

Joe

Dear Mr. Strandberg Sig

Further to your telephone conversation this morning with my Administrative Assistant, I would like to invite you and any other members of the Local Boundary Commission to attend the hearings which the Senate Community and Regional Affairs Committee will be holding in regard to your recommendations on the proposed annexations by the Cities of Skagway and Petersburg and the Haines Borough.

The committee meeting is scheduled for 3:00 P.M. in Room 100 of the Assembly Building Tuesday, February 7, 1978.

I look forward to seeing you and any other Commission members who wish to attend at that time.

Sincerely,

Joe Orsini

Honorable Lisa Rudd, Chair
Alaska House of Representatives
Community & Regional Affairs Committee
Pouch V
Juneau, AK 99811

Dear Lisa:

Have discussed your scheduled hearings (February 6 & 8 @ 9:00 a.m. & February 7 @ 3:00 p.m.) with my fellow commissioners and they request that I represent the Commission on the matters submitted for legislative review.

I'm looking forward to appearing before your committee and, on behalf of the commission, wish to thank you for your courteous invitation.

Sincerely yours,

Sigvald J. Strandberg
Chairman

1. STATE REVENUE SHARING

Undoubtedly you have read or heard the Governor's proposed revision of revenue sharing; that of basing the amount a municipality would receive on its relative tax base per capita. While the goal may be equity, tax base per capita is only one factor in looking at such programs. There is no simple correlation between tax base and what state revenue sharing should be.

To begin, tax base is only indicative of the size of the physical plant(buildings, dwellings, etc.) within a given community. The Governor's unstated hypothesis is: the greater the tax base per capita, the greater the capacity to fulfill local service needs by local funds. This is an oversimplification of a longstanding urban problem which has two dimension : the need for service and complexity of that service delivery. Tax base does not necessarily relate to service needs or demands. Urban densities, congested traffic, large numbers of unemployed and the crime rate are more closely connected to the need for service. Service demands (needs) criteria are the factors to consider before making any judgments on tax base and its relationship to state revenue sharing.

Service demands or need criteria must be evaluated very carefully in order to avoid falling into the argument that not having the funds is tantamount to having a service need. While this may sound ludicrous, the argument is used with surprising frequency. Conversely, the argument that because a community has a high tax base per capita it should receive lesser revenue sharing funds misses the point of service need to capacity to fulfill those needs.

Returning to the need criteria and the faulty argument mentioned above, the State Administration may be unintentionally "helpful" in this establishment of need through the efforts of the Department of Community and Regional Affairs when it fosters municipal incorporation of very small villages. Additionally, new services are encouraged as early after incorporation as possible. This process, while a valid concern of the state's, may simply outstrip the local government's capacity to generate revenue to pay for the "new services". The point here is not that the state shouldn't be assisting in the creation and development of local governments, but that the state can press for too fast a development and thereby create false service demands. Until the "real" service needs and the revenue needed to provide them is established through objective research, the current method of revenue sharing should not be changed.

House Bill 70 does not substantially change the current approach to state revenue sharing. It adds a few categories as separate item. Specifically, HB 70 would separate water and air pollution, make small boat harbors or ports, mass transit and airports separate categories, and add as new categories solid waste disposal and ambulance. The formula used is B X P = Amount. B is the base revenue sharing amount of $1 times the units for each service category and P is the population of the community. Thus, for example, if Anchorage's population is 200,000, its share for police protection would be $12 times 200,000 or $2,400,000. However, the recent expansion to Muldoon, Sand Lake, and Eagle River of police services will increase greatly the need for a greater amount for the police category. Another way of looking at an increase in the police service category is to remember that the state's responsibility for policing in those areas will no longer be needed. Hence, a larger share of state funds could be made available to the police protection category.

Anchorage Municipality strongly supports passage of HB 70 and endorses an amendment that would increase the police units to twenty dollars per capita. The cost for police services in Anchorage is currently over $120 per capita. Any relief in this category would be most welcome.

In addition to the above support for the HB 70 revenu sharing bill and possible amendment in police services funding, the Municipality requests consideration be given to building into the annual revenue sharing formula a cost of living(inflation) increase. Such a cost of living index could be based upon the Consumer Price Index (CPI) published by the U.S. Department of Commerce. An example of how this might work is illustrated below.

The base year for the CPI is 1967; therefore 1967 equals 100 points (keep in mind these are not percentage points but can easily be converted to percentage points)

Year	Anchorage CPI	Example Service
1967	100.0	$8.28
1973	120.8	10.00
1974	133.8	11.08
1975	151.0	12.50
1976	163.3	13.52
1977	177.4	14.69
*1978	191.6	15.86

* The 1978 figure is estimated based on 1973-77 average annual increases.

AS you can see the impact of using the CPI would be to increase annually the revenue sharing in an equal amount as the cost of living has increased (inflationary increase). In accordance with the format of HB 70 it would be better to amend the formula wording of AS 43. 17.030 to the following:

Sec. 43.17.030. BASIC GRANTS TO MUNICIPALITIES. (a) If a municipality elects not to receive the grant provided for under sec. 20 of this chapter, the amount of revenue sharing for which it is eligible shall be B X P where

(1) "B" is the base revenue sharing amount of $1.00 times the Consumer Price Index issued by the U.S. Department of Commerce for that year times the service units for each service performed by the municipality established as follows:

(A) police protection	20 units
(B) fire protection	7.5 units
(C) water pollution control	2 units
(D) land use planning	2 units
(E) parks and recreation	5 units
(F) small boat harbor or port	5 units
(G) mass transit	5 units
(H) airport	5 units
(I) solid waste disposal	2 units
(J) ambulance	2 units
(K) air pollution	2 units

(2) "P" is the population of the municipality rounded up to the nearest 100.

The purpose for this request is to enable local governments to maintain a status quo in the services they are able to render through state revenue sharing than lose ground to inflation. A look at what inflation has done to recent revenue sharing in one category will be illustrative.

In 1973 five dollars per capita was given to municipalities. That figure has not been changed since. The impact of inflation is as follows:

Year	CPI	Parks and Recreation
1973	120.8	$5.00
1974	133.9	$5.42
1975	151.0	$6.92
1976	163.3	$7.48
1977	177.4	$8.13

What this says is that it takes $8.13 to buy in 1977 what it took $5.00 in 1973. Another comparison that can be made is what the 1977 actual revenue sharing was for Anchorage and what it would be under the CPI method. The comparison is shown in Appendix "A". The CPI is applied to road maintenance and health facilities dollars that are not direct pass through funds.

IN THE HOUSE

BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

CS FOR HOUSE BILL NO. 70

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to municipal revenue sharing, and the Alaska Business License Act; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 43 is amended by adding a new chapter to read:

CHAPTER 17. MUNICIPAL REVENUE SHARING.

Sec. 43.17.010. CONSTRUCTION AND IMPLEMENTATION OF CHAPTER. (a) This chapter may not be construed so as to create a debt of the state.

(b) The special municipal services account is established. The legislature may annually appropriate funds to the account to carry out the provisions of this chapter. If there are not enough funds in the account to provide for each local government's or other recipient's share authorized under this chapter, the funds which are available shall be distributed in proportion among eligible local governments and other recipients.

(c) If any money remains in the special municipal services account at the end of the fiscal year for which the money is appropriated and this remaining money is more than the amount required for the allocations authorized in this chapter, this money reverts to the general fund.

Sec. 43.17.020. MINIMUM GRANTS TO MUNICIPALITIES. (a) A municipality proposing to provide administrative services or a service provided for in sec. 30(a)(1) of this chapter may, in lieu of obtaining revenue sharing money as provided in this chapter, obtain instead a

APPENDIX A

	RATE	POPULATION	1977 CPI	1977 W/CPI AMOUNT	1977 ACTUAL AMOUNT
POLICE PROTECTION	12	106,690	1.08	1,382,702	1,280,280
MILITARY	6	18,897	1.08	122,452	113,382
FIRE PROTECTION	7.50	175,189	1.08	1,419,031	1,313,918
AIR/WATER	2	175,603	1.08	379,302	351,206
LAND USE PLANNING	2	175,603	1.08	379,302	351,206
PARKS AND RECREATION	5	164,400	1.08	887,868	822,100

	1000/bd	235	1.08	253,800	235,000
				7,239,124	6,702,894

minimum grant of $25,000.

(b) The department shall issue regulations regarding procedures and time limits for making an election under this section.

Sec. 43.17.030. BASIC GRANTS TO MUNICIPALITIES. (a) If a municipality elects not to receive the grant provided for under sec. 20 of this chapter, the amount of revenue sharing for which it is eligible shall be B x P where

(1) "B" is the base revenue sharing amount of $1 times the service units for each service performed by the municipality established as follows:

(A)	police protection	12 units
(B)	fire protection	7.5 units
(C)	water pollution control	2 units
(D)	land use planning	2 units
(E)	parks and recreation	5 units
(F)	small boat harbor or port	5 units
(G)	mass transit	5 units
(H)	airport	5 units
(I)	solid waste disposal	2 units
(J)	ambulance	2 units
(K)	air pollution	2 units

(2) "P" is the population of the municipality rounded up to the nearest 100.

(b) If a municipality provides one or more of the services in (a)(1) of this section under contract to a defined area outside the boundaries of the municipality, the revenue sharing amount for those services shall be increased by the service units for each service times the population of the area served rounded up to the nearest 100.

(c) If a municipality contains areas having differential rates of

RECEIVED
FEB 22 1971
MUNICIPAL MANAGER'S
OFFICE

taxation, the entitlement shall be calculated for areawide services and for each area separately and totaled to reach the entitlement of the municipality. Revenue sharing money for which the entitlement is based upon areawide services may be used for areawide purposes only. Revenue sharing money for which the entitlement is based upon service area services may be used for that service area only.

Sec. 43.17.040. HEALTH FACILITIES AND HOSPITALS. (a) During each fiscal year the state shall make payments as follows:

(1) $2 per capita to a municipality which has the power to provide health facilities and services and in which a hospital is located;

(2) in addition to the payment made under (1) of this subsection

(A) the state shall make payments to a municipality which has the power to provide hospital facilities and services and which exercises the power on the basis of $1,000 per bed for each bed actually used for patient care limited to the number of beds provided for in the construction design of the hospital, or $75,000 a hospital for those hospitals with 10 or more beds, or $25,000 a hospital for those hospitals with less than 10 beds, as the municipality may elect; funds received under this subparagraph may be used only for hospitals and shall be apportioned among qualifying hospitals as the municipality determines;

(B) the state shall make payments on the basis set out in (A) of this paragraph to a municipality for nonprofit hospitals not operated by a municipality if the municipality first certifies to the department that the hospital is in compliance with all standards for hospitals which have been adopted by the municipality; in the absence of this certification the funds which would

have gone to the hospital lapse into the state general fund; payments to the municipality shall be transferred to the hospital in accord with the basis by which the entitlement was generated by the hospital and shall be applied to the annual cost of operation and maintenance of the hospital or for the provision of health care service at the hospital as the directors of the hospital determine;

(C) a hospital may not receive payment under both (A) and (B) of this paragraph;

(3) $1,000 per bed to an organized borough or city outside an organized borough in which a health facility is operated for each bed actually used for patient care, limited to the number of beds provided for in the construction design of the health facility, or $4,000 for each health facility as the local government may determine;

(4) funds received by a municipality under (1) or (3) of this subsection shall be used for expenses of health services or operation and maintenance of facilities as the municipality determines.

(b) If construction of a hospital or health facility began before January 1, 1976, and state matching aid for construction approved under AS 18 for payment to a municipality or other facility sponsor constitutes less than 25 per cent of the total project cost, the state shall pay to the municipality or other facility sponsor each fiscal year a sum equal to $2,500 a bed for the maximum number of beds provided for in the construction design of the facility. State aid provided for in this subsection shall continue until the municipality or other facility sponsor has received an amount which, combined with state matching money for construction of the facility approved under AS 18, equals 25 per cent of the total project cost. No funds received for construction shall be used for any other purpose.

(c) In this section

(1) "hospital" means a licensed hospital determined by the Department of Health and Social Services to be a general hospital; the term excludes facilities operated or wholly supported by the state or the federal government;

(2) "health facility" means public health centers, maternity homes and community mental health centers, facilities for the mentally or physically handicapped, nursing homes and convalescent centers which are licensed, when required, by the state under AS 18.20.010 - 18.20.130 and are owned or operated or both by a local government or by a nonprofit corporation or other nonprofit sponsor; the term excludes facilities operated or wholly supported by the state or the federal government.

Sec. 43.17.050. VOLUNTEER FIRE DEPARTMENTS OUTSIDE MUNICIPALITIES. The state shall pay to a volunteer fire department registered with the state fire marshal and serving an area not in an organized borough or a city a sum for protection purposes equal to $7.50 per capita for the population served by the department, as determined by the state fire marshal using the latest figures of the United States Bureau of the Census or other reliable data. Grants shall be made on the same basis to facilitate the organization of volunteer fire departments in an area not in an organized borough or a city. Payment shall be made upon application by the proposed fire protection group to the department and approval of the application according to standards of organization and service prescribed by regulations promulgated by the department.

Sec. 43.17.060. AREA COST-OF-LIVING DIFFERENTIAL. (a) State payments under this chapter shall reflect area cost-of-living differential. Amounts distributed shall be based upon the sum of the grants due multiplied by the appropriate area cost-of-living differential. The area cost-of-living differential shall be determined annually by election district under the provisions of AS 39.27.030; however, the area

cost-of-living differential to be applied shall not result in an amount to be distributed less than the base allocation.

(b) The election districts used in (a) of this section are those designated by the proclamation of reapportionment and redistricting of December 7, 1961, and retained for the house of representatives by proclamation of the governor September 3, 1965.

Sec. 43.17.070. FINANCIAL REPORTS. No final payment may be distributed to a municipality under this chapter unless that municipality first submits to the department (1) a financial report for each of the two fiscal years immediately preceding the fiscal year in which funds are to be distributed; and (2) a budget for the municipality's fiscal year in which funds are to be distributed. The department may, by regulation, prescribe procedures and filing dates for submitting financial reports and for obtaining all information required to determine the municipality's tax effort.

Sec. 43.17.080. POPULATION DETERMINATION. For purposes of this chapter, population shall be determined by the latest figures of the United States Bureau of the Census, Department of Labor estimates or other population data which, in the judgment of the department, is reliable. However, a municipality may not receive state shared revenue based on the population residing on that portion of a military reservation annexed to a city or borough after January 1, 1973, except as provided in this section. If a military reservation is located within a city or borough, the city or borough is limited in its entitlement to state shared revenue under this chapter, based on the population residing on the reservation, as follows: 50 per cent of the amount paid per capita for police protection; 25 per cent of the amount paid per capita for parks and recreation; 50 per cent of the amount paid per capita for mass transit; 50 per cent of the amount paid per capita for

water pollution; and 50 per cent of the amount paid per capita for air pollution.

Sec. 43.17.090. ADDITIONAL LIMIT. In addition to the limitations on expenditure of funds contained in sec. 40 of this chapter:

(1) if a borough exercises the powers in sec. 30(a)(1) of this chapter in the borough area outside cities only, or in a service area only, the grants authorized under this section shall be based on the population of the borough area outside cities or the service area respectively;

(2) if a city within an organized borough provides police protection services, the borough may not qualify for aid under sec. 30(a)(1)(A) of this chapter unless

(A) police protection services are provided in the borough area outside cities, or if limited to a service area, in the service area, through borough contract with a city or with the state or

(B) the borough assumes and exercises power to provide police protection services on an areawide basis in the manner provided by law.

Sec. 43.17.100. ROAD MAINTENANCE. (a) During each fiscal year the state shall pay to a city or organized borough which has and exercises power to provide road maintenance $1500 a mile for each mile of road, street, or highway maintained by that local government. No payment may be made for

(1) the official state highway system;

(2) roads, streets, or highways not dedicated to a public use;

(3) roads, streets or highways maintained under the local services road program;

(4) alleyways; or

(5) maintenance of roads not used by automotive equipment.

(b) Frozen waterways and connections from inhabited areas to the waterways which may be safely used for public transportation by automotive equipment and are so used during a portion of a year are eligible for payments of $900 per mile if the waterways and connections are maintained during the period of use by a municipality or combination of municipalities. The Department of Community and Regional Affairs, after consultation with the Department of Highways, shall determine which waterways and connections qualify and, where the waterways or connections lie outside the corporate limits of a municipality, which municipality is eligible for the shared revenue unless the municipalities involved have agreed in writing to a particular distribution.

Sec. 43.17.110. REGULATIONS. The department shall adopt regulations necessary to carry out the purposes of this chapter. The regulations shall include

(1) minimum standards of service required to qualify a municipality for service unit credit for each service; and

(2) provisions for a performance report adequate to demonstrate to the department that each service for which credit was allowed was actually performed by the municipality at least at the prescribed minimum level.

Sec. 43.17.120. EXPENDITURE OF FUNDS. Funds received by a municipality under this chapter may be expended for any public purpose for which the municipality has power to expend funds except as provided in sec. 40 of this chapter.

Sec. 43.17.130. UNIFICATION, MERGER OR CONSOLIDATION OF MUNICIPALITIES. If a borough and the cities within the borough merge, consolidate or unify in accordance with AS 29.68, the amount of revenue

sharing to which the successor municipality is entitled shall be computed for the first year and each year thereafter as if the merger, consolidation or unification had not occurred, and the successor municipality shall receive not less than the amount so computed.

Sec. 43.17.160. DEFINITIONS. In this chapter

(1) "department" means the Department of Community and Regional Affairs;

(2) "municipality" for revenue sharing purposes means a city, borough or unified municipality incorporated under the laws of the State of Alaska except a second class city incorporated after the effective date of this Act and lying within an organized borough.

* Sec. 2. AS 43.18.010 - 43.18.045 are repealed.

* Sec. 3. Other provisions of this Act notwithstanding, a municipality which would receive less money under the provisions of this Act than it was entitled to receive in fiscal year 1977 under the provisions of AS 43.18 repealed by this Act shall continue to receive an amount equal to that authorized for fiscal year 1977 under the former provisions of AS 43.18, in accordance with those provisions.

* Sec. 4. AS 43.70.010 is repealed.

* Sec. 5. AS 43.70.030(a) is amended to read:

(a) The license fee for each business is $25 [PLUS A SUM EQUAL TO ONE-HALF OF ONE PER CENT OF THE GROSS RECEIPTS IN EXCESS OF $20,000 FROM THE BUSINESS DURING THE YEAR FOR WHICH THE LICENSE IS ISSUED, EXCEPT THAT ALL GROSS VOLUME IN EXCESS OF $100,000 A YEAR IS TAXED AT THE RATE OF ONE-QUARTER OF ONE PER CENT. THE ANNUAL LICENSE FEE PAID BY A PROFESSIONAL PERSON TO HIS PROFESSIONAL BOARD SHALL BE CREDITED AGAINST THE INITIAL FEE REQUIRED UNDER THIS CHAPTER].

* Sec. 6. AS 43.70.030(c) is amended to read:

(c) The licens for the privilege of taking orders through use of

catalogs and by mail order offices in the state is the same as set out in this chapter for business generally [AND GROSS VOLUME OF BUSINESS OF THOSE OFFICES INCLUDES ALL ORDERS TAKEN AT THEM WHETHER DELIVERY OF THE MERCHANDISE IS MADE THROUGH THE OFFICES OR NOT].

* Sec. 7. AS 43.70.030(d) is amended to read:

(d) The initial fee of $25 applies to all of the provisions of this section, and shall accompany the application. The balance under sec. 30(b) of this chapter is due and payable on December 31st of each year and shall be paid before the first day of March following, except that the department may extend the time until the 30th of the following April upon application showing that the extension is necessary to enable the applicant to ascertain the amount of license money due. To enable accurate determination of the balance of the tax due at the end of each year, each person to whom this chapter applies shall keep records, give statements under oath, and make returns which the department requires. Returns are made under penalty of perjury.

* Sec. 8. AS 43.70.040 is amended to read:

Sec. 43.70.040. REVIEW AND DETERMINATION OF LICENSE TAX. As soon as practicable after the final payment of the tax under sec. 30(b) of this chapter, the department shall examine the return and determine the correct amount of the tax and, if an error is found, shall notify the taxpayer of the error and examine the taxpayer's records as authorized in AS 43.05.040, and take other proper steps to determine the amount due.

* Sec. 9. AS 43.70.110(2) is repealed.

* Sec. 10. AS 43 is amended by adding a new section to read:

CHAPTER 17. MUNICIPAL REVENUE SHARING.

Sec. 43.17.150. ADDITIONAL GRANTS TO REPLACE LOST REVENUE. In addition to all other revenue sharing with municipalities, a munici-

pality is entitled to and shall receive each year an amount equal to the amount of money it was entitled to receive under AS 43.70.080 for the year 1978.

* Sec. 11. Sections 1, 2 and 3 of this Act take effect July 1, 1977. Sections 4, 5, 6, 7, 8, 9, and 10 of this Act take effect January 1, 1980.

2. Supplemental Appropriation for Police Protection

Police service expansion costs have been a major aspect in Anchorage local elections with Muldoon, Sand Lake and Eagle River voting to assume local police services. Sand Lake and Muldoon will begin to incur costs January 1, 1978. Eagle River will begin January 1, 1979. However, the Sand Lake and Muldoon new service will not have been included as a part of the State's 1977 (1977-78) budget for state revenue sharing. Anchorage Municipality therefore requests consideration for a supplemental appropriation to cover state revenue sharing from January 1, 1978, through June 30, 1978, for the Sand Lake and Muldoon areas. The revenue sharing calculation is as follows:

Area	Population	1/2 Year	Rate	Amount
Muldoon	23,349	.5	12	$140,094
Sand Lake	18,914	.5	12	113,484
	Total Supplemental			$253,578

The above figure is arrived at by using the revenue sharing calculation. However, it would be illustrative to demonstrate the full costs to the Municipality for that time frame. These costs are for one-half year with the expectation that the State's 1978 budget would pick up the remainder of the year as a matter of regular procedure.

MULDOON/SAND LAKE POLICE SERVICE EXPANSION COSTS FOR JANUARY 1, 1978 THROUGH JUNE 30, 1978

Personnel Services		$696,490
46 sworn officers		
6 communications clerks		
Supplies		68,140
Uniforms and various personal equipment supplied		
Other Services and Charges		225,920
Vehicles	$190,000	
Misc.	35,920	

Machinery and Equipment	89,970
Total Direct Costs	$1,080,520
Intergovernmental Charges	65,790
Total Costs	$1,146,310

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act Entitled: "An Act Making a Supplemental Appropriation to the Municipality of Anchorage for Police Protection and Providing for an Effective Date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA

Section 1. The sum of $253,578 is appropriated from the General Fund to the Municipality of Anchorage for the purpose of increased police protection.

Section 2. This Act takes effect immediately in accordance with AS 01.10.070(c).

3. ınicipal Land Selection

Senate Bill 241 and Committe Substitute for HB 133 both present an opportunity for the State to "clear up accounts" in municipal land selection while at the same time regain the land management control it claims it needs desperately. Since these bills have already been introduced, it is necessary to provide some history behind their evolution, support and progress.

While Senate Bill 241 was introduced by request of the Governor, HB 133 was concurrently introduced by Representatives Parr, Cowper and Brown. Both bills started out as identical bills and are still substantially the same although the House version has undergone a few minor changes. What does not show in the bill is the extensive effort by most of the boroughs to compromise individual desires in order to arrive at a consensus in support of the bill. With this basic broad support the bill passed the House Community and Regional Affairs Committee with only a few changes. The Senate version still resides in the Senate Community and Regional Affairs Committee.

It was not until the bill reached the House Finance Committee near the end of the session, that the North Slope Borough expressed a desire to alter the bill giving the Borough 200,000 acres instead of the 695 acres listed in the bill. Since the bill has an in lieu payment feature the changed position of North Slope Borough also could have drastically changed the fiscal note of the bill. This situation caused aprehension among the Finance Committee members and since the end of the session was so near, the Finance Committee elected to postpone action in the bill.

The Committee's Chairman, Steve Cowper, appointed an interim committee to review the bill's provisions and submit an alternate proposal.

The current bills major provisions are: that cities and boroughs with selectable land (state land that is vacant, unrestricted and unreserved) would get their ten percent, or whatever figure of acres spelled out in the bill. (This feature is included to remove difficulty in land selection where there are large tracts of federal and state reserved lands, thereby reducing the percent selectable if ten percent of state selectable lands is used as the base); that cities or boroughs which find it impossible to select their ten percent of state land be entitled to a dollar in-lieu payment (Anchorage and to a lesser extent Kodiak); and finally, that selection of land, if available, automatically excluded that party from the in-lieu payment option. It is anticipated that the House Finance Committee will come up with a proposed change in acreage and possibly a new schedule of in-lieu payments. Since Anchorage is one of those local governments which can not select more land, the crucial concern the Municipality has will be for the specific dollar payment in-lieu of selectable land. Another point to remember is that early passage of the land selection bill is essential since this is a second session as well as election year. Therefore Anchorage supports early passage of CSHB 133.

IN THE HOUSE

BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

CS FOR HOUSE BILL NO. 133

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to selection and transfer of state land to municipalities; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. STATEMENT OF PURPOSE. The purposes of this Act are to remove uncertainties in the existing municipal land selection law of the state; to provide for an immediate, final determination and settlement of municipal land entitlement; to provide for the completion of rational ownership patterns for sound land management; and to provide for timely patent of land to municipalities to fulfill their respective entitlements.

* Sec. 2. AS 29.18 is amended by adding new sections to read:

ARTICLE 3A. GENERAL GRANT LAND.

Sec. 29.18.202. DETERMINATION OF ENTITLEMENT. (a) The general grant land entitlement of each of the municipalities in this subsection is the amount set out opposite each:

(1) Municipality of Anchorage -- 20,865 acres;

(2) City and Borough of Juneau -- 13,600 acres;

(3) City and Borough of Sitka -- 9,200 acres;

(4) Bristol Bay Borough -- 1,940 acres;

(5) Fairbanks-North Star Borough -- 112,000 acres;

(6) Haines Borough -- 1,080 acres;

(7) Kenai Peninsula Borough -- 155,780 acres;

(8) Ketchikan Gateway Borough -- 9,200 acres;

(9) Kodiak Island Borough -- 45,200 acres;

(10) Matanuska-Susitna Borough -- 355,210 acres;

(11) North Slope Borough -- 645 acres.

(b) The general grant land entitlement of a city eligible to receive general grant land under the former provisions of secs. 190 - 200 of this chapter repealed by this Act is 10 per cent of the maximum total acreage of vacant, unappropriated, unreserved land within the boundaries of each city at any time between the initial date of eligibility under former secs. 190 - 200 of this chapter and the effective date of this Act.

(c) Within six months of the effective date of this Act, the director shall determine the entitlement for each city eligible to receive general grant land under (b) of this section and certify that entitlement to the city.

(d) General grant land entitlements provided in this section constitute vested property rights which shall be fulfilled as provided in sec. 204 or sec. 208 of this chapter, but no municipal selection vests any interest in or right to receive a particular tract of land except as provided by sec. 204 of this chapter.

(e) General grant land entitlements vested under this section may be exercised at any time before the date which is two years after the expiration of the state's right to make selections under secs. 6(a) or (b) of the Alaska Statehood Act (P.L. 85-508); however, the time limitation imposed by this subsection does not apply to payments in lieu of land under sec. 208 of this chapter.

Sec. 29.18.204. FULFILLMENT OF LAND ENTITLEMENTS. (a) The acreage of each municipality's land selections under former secs. 190 - 200 of this chapter for which patent has been issued before the effective date of this Act shall be credited toward fulfillment of the entitlement of that municipality.

(b) All approved selections under former secs. 190 - 200 of this chapter for which patent has not been issued to a municipality on the effective date of this Act shall be reviewed by the director within nine months of the effective date of this Act. Any approved selection of land which was vacant, unappropriated or unreserved on the date of selection is valid as of the date of the approval under the former secs. 190 - 200 of this chapter, and a patent shall be issued to the municipality within three months after approval by the director of a plat of survey. The acreage shall be credited toward fulfillment of the municpality's entitlement. No municipality is entitled to receive patent under this chapter to more than its entitlement determined under sec. 202 of this chapter. Any prior approval by the director of municipal selections for land which was not vacant, unappropriated or unreserved on the date of selection shall be rescinded, and patent may not be issued except when disposal to a third party by sale or lease has occurred. Transfers of general grant land to municipalities under this chapter are subject to AS 38.05.321. Classification actions as reflected upon the land status records of the Department of Natural Resources are determinative of land classification status for purposes of this chapter.

(c) All municipal land selections under former secs. 190 - 200 of this chapter not approved as of the effective date of this Act shall be recognized by the director as representing the priority interests of the municipalities, and the selections shall be given first consideration under (e) of this section unless the municipality indicates different priorities.

(d) On the effective date of this Act and for five years thereafter no classification of a parcel of general grant land in excess of 3,200 acres under AS 38.05.300 shall be effective, unless otherwise required by law, if the municipality in which the parcel is located, within 30

days after receipt of notice of the proposed classification, advises the director in writing that it does not consent to the classification and indicates the reasons for its nonconsent.

(e) Each eligible municipality and the director shall jointly consider which vacant, unappropriated, unreserved land, including federal land of interest to a municipality which may be selected by the state as general grant land, located within the boundaries of the municipality is appropriate for municipal selection and approval by the director to fulfill any remaining municipal general grant land entitlement. The joint consideration made by the parties shall include a cooperative land planning process which will, in addition to the normal objectives of such a process, seek to identify both local and state interests in tracts of vacant, unappropriated and unreserved land remaining within the municipality. Adjacent tracts shall be considered simultaneously except when such simultaneous consideration would cause significant delay or expense. Once a tract has been jointly considered, it may be selected by a municipality. Each selection must be approved or disapproved for patent by the director under (f) of this section within nine months of its selection by a municipality, and a patent shall be issued to the municipality within three months after approval by the director of a plat of survey.

(f) In reviewing a municipal selection, the director shall consider the state's responsibilities for developing and protecting values which are of greater than local concern, including development which will have statewide impact, and critical environmental concerns. Specific state responsibilities to be considered, if such responsibilities have not been authorized or delegated by the state to a municipality, include air quality; water; minerals and energy; timber; agriculture; grazing; fish and wildlife and their habitat; public recreation, natural, historical,

and archaeological areas of greater than local concern; access to public land and water; transportation; communications; and public safety. Specific municipal responsibilities to be considered include residential, commercial and industrial needs; support of municipal services; education; local transportation; private recreation; public recreation, natural, historical and archaeological areas of local concern; and other responsibilities authorized or delegated by the state to a municipality. A selection by a municipality of land which is primarily of local concern shall be approved. When the interests of the state may be protected through the conveyance of title that is less than a fee title, the municipality, at its option, may accept the title in acre-for-acre fulfillment of its entitlement.

(g) Every decision of approval or disapproval of a municipal selection by the director under (f) of this section shall include a written explanation of the decision based upon the criteria of that subsection. Before issuing any decision to disapprove a selection, the director shall notify the affected municipality in writing, by certified mail, of his reasons for the proposed decision. The municipality shall have 30 days from receipt of the proposed decision to respond to the director in writing enumerating the reasons for which the municipality believes the proposed decision to be in error. After receipt of the municipality's statement of reasons, or after expiration of the period in which the municipality may respond to the proposed decision, the director shall, within 30 days, affirm, modify or reverse his proposed decision in writing and give written notice of his decision to the municipality. The decision of the director constitutes final administrative action in the matter. A municipality may appeal an adverse decision by the director to the superior court under AS 44.62.560 - 44.62.570.

(h) Within 30 days after convening of the first regular session of the Eleventh Alaska Legislature and the first and second regular sessions of the Twelfth Alaska Legislature, the director shall report to the legislature on the implementation of secs. 202 - 218 of this chapter.

Sec. 29.18.206. SELECTION AND CONVEYANCE PROCEDURE. (a) All municipal selections shall be made in reasonably compact tracts, taking into account the use capabilities of a tract and its relationship to surrounding land uses. A selection filed by a municipality which has not been approved by the director may be relinquished at any time. An approved selection may be relinquished by a municipality if the relinquishment is approved by the director. An approved selection relinquished by a municipality increases the remaining entitlement of the municipality on an acre-for-acre basis.

(b) A municipality may maintain selections for not more than 110 per cent of its remaining entitlement. Municipal selections for general grant land which is withdrawn under sec. 11(a)(2) of the Alaska Native Claims Settlement Act (43 U.S.C. 1601 et seq., P.L. 92-203) is not included in the limitation of this subsection.

(c) If land selected by a municipality is unsurveyed at the time of approval, the director shall survey, or may approve the municipality's survey of, the exterior boundaries of an approved selection without interior subdivision, and shall issue patent in terms of the exterior boundary survey. The cost of the survey shall be borne by the municipality. If land selected by a municipality has been surveyed at the time of its selection, the boundaries shall conform to the public land subdivisions established by the approved survey.

(d) The director may approve municipal selections of land which has been tentatively approved or patented to the state by the federal government, but he may not issue patent to a municipality until the land

has first been patented to the state. After approval of a selection by the director, but before patent to a municipality, the municipality may execute conditional leases and make conditional sales only with the consent of the director. Conditional sales and conditional leases made before the effective date of the Act do not require the consent of the director.

(e) Nothing in this chapter affects a valid existing claim, location or entry under the laws of the state or the United States whether for homestead, mineral, right-of-way or other purposes. Nothing in this chapter affects the rights of an owner, claimant, locater or entryman to the full use and enjoyment of the land so occupied.

Sec. 29.18.208. PAYMENT IN LIEU OF LAND. (a) There is established within the general fund the Alaska municipal land account for the purpose of allowing eligible municipalities to receive payment in lieu of land entitlements provided in sec. 202 of this chapter.

(b) By August 1 of each year the director shall certify to each municipality having an entitlement under sec. 202 of this chapter the acreage of patented selections, approved selections not yet patented, pending municipal land selections neither approved nor disapproved by the director, and the remaining entitlement of the municipality. If at the time of certification the ratio of the remaining entitlement of the municipality to the vacant, unappropriated, unreserved land within the municipality is greater than two to one, or if there are less then 1,000 acres of vacant, unappropriated, unreserved land within the municipality, the municipality may, at its option, request payment in lieu of land from the account established in (a) of this section; however, no payment may be made to the City and Borough of Juneau, the City and Borough of Sitka or the Ketchikan Gateway Borough under this subsection until the fiscal year after cumulative appropriations to the account exceed $12,000,000

or until the fiscal year beginning July 1, 1984, whichever occurs first.

(c) A municipality eligible for payment under this section may, by October 1 of each fiscal year of eligibility, notify the director of its election to accept payment in lieu of land from the account. A municipality may accept payment for not more than 15 per cent of its entitlement under sec. 202 of this chapter, to a maximum of 10,000 acres, in each fiscal year. A municipality which chooses to accept payment in lieu of land shall be entitled to an amount based on the cumulative total number of acres of remaining entitlement which it relinquishes according to the following schedule:

(1) 10,000 acres or less -- $1,500 per acre;

(2) 10,001 to 20,000 acres -- $750 per acre; and

(3) more than 20,000 acres -- $350 per acre.

(d) The governor shall annually submit to the legislature a request for an appropriation to the account for the municipalities which have elected to receive payment in lieu of land under this section.

(e) If the total appropriation is not sufficient to meet the amount due to all municipalities which have elected to accept payment in lieu of land under (c) of this section, the governor shall apportion the appropriation among the municipalities in proportion to the payment calculated for each municipality for that year. When a distribution of payments is made under this subsection, the remaining entitlement of a municipality to which payment is made shall be reduced in an amount equal to the number of acres for which payment was received. An apportionment may increase the acreage for which a municipality may request payment in a succeeding year, but this increase in acreage does not authorize a municipality to request payment in lieu of land of more than 10,000 acres in any one year.

Sec. 29.18.210. AUTHORIZATION FOR LAND EXCHANGES. The director,

with the concurrence of the commissioner, and any municipality are authorized to exchange land or interests in land when it is in the public interest. Land or interests in land exchanged under this section must be of approximately equal value, including the non-monetary value of public benefits. Exchange procedures shall comply with applicable law and municipal ordinances. The notice and review provisions of AS 38.05.305 and 38.05.345 are applicable to exchanges of land under this section. The provisions of AS 38.50 do not apply to exchanges of land under this section.

Sec. 29.18.212. PUBLIC PURPOSE AND EXPANSION NEEDS. (a) Consistent with the best interests of the state, if a municipality does not contain and cannot reasonably acquire sufficient nonfederal land within its boundaries to meet its legitimate needs for public or private settlement or development, it shall be the policy of the state to select federal land reasonably necessary to meet the needs of the municipality and to make the land selected available to the municipality under AS 38.05.315 or (b) of this section.

(b) Where state land is the most logical location for demonstrated municipal expansion for nonpublic settlement and development purposes, and when an exchange of land under sec. 210 of this chapter is not possible or is not in the public interest, it is the policy of the state to sell or lease the land at public auction. The state may contract with a municipality to act as its agent in an auction of state land under applicable statutes. When a municipality acts as the agent of the state in an auction, the municipality may retain from the proceeds of the auction the expenses which the director determines to be necessary and reasonable.

(c) Nothing in this chapter limits or impairs the authority of the director to transfer land to municipalities, without limit or considera-

tion, for public purposes in accordance with AS 38.05.315. If there is a remaining entitlement of the municipality, land transferred under AS 38.05.315 shall be credited toward fulfillment of the entitlement; however, land conveyed to the state under sec. 12(d)(2) of Public Law 94-204 and subsequently conveyed by the state to a municipality under secs. 202 - 218 of this chapter or AS 38.05.315 may not be credited against the municipality's remaining entitlement.

Sec. 29.18.214. ELECTION OF BENEFITS. (a) A municipality which on the effective date of this Act is engaged in litigation, or which becomes engaged in litigation, regarding a claim to state land under former secs. 190 - 200 of this chapter shall elect either to obtain the benefits provided in secs. 202 - 218 of this chapter or to pursue the litigation and thereby waive any claim to entitlement under secs. 202 - 218 of this chapter. An election shall be made by filing a motion for dismissal with prejudice in the court in which the litigation is pending. If the claim involves a municipality identified in sec. 202(a) of this chapter, the municipality shall file its motion for dismissal within 60 days of the effective date of this Act. If the claim involves a municipality not listed in sec. 202(a) of this chapter, the municipality shall file its motion for dismissal within 60 days after receiving the certificate of entitlement provided by the director under sec. 202(c) of this chapter. Failure of the municipality to file a motion for dismissal during the time period provided in this subsection shall be considered a waiver of entitlement under secs. 202 - 218 of this chapter.

(b) A municipality which was eligible to file land selections under the former secs. 190 - 200 of this chapter and which does not enter into litigation over a claim to rights under those sections before the expiration of the time period within which it could make an election under (a) of this section shall be considered to have elected to receive benefits

under secs. 202 - 218 of this chapter and to have waived any claim which might have been raised under former secs. 190 - 200 of this chapter.

Sec. 29.18.216. ADMINISTRATION. The commissioner may adopt regulations in accordance with the Administrative Procedure Act (AS 44.62) necessary to carry out the purposes of secs. 202 - 218 of this chapter.

Sec. 29.18.218. DEFINITIONS. In secs. 202 - 218 of this chapter, unless the context otherwise requires,

(1) "approved selection" means a municipal land selection which has been approved in writing by the director for transfer by patent to a municipality;

(2) "director" means the director of the division of lands, Department of Natural Resources, or his designee;

(3) "general grant land" means land patented or tentatively approved to the state from the United States under secs. 6(a) or (b) of the Alaska Statehood Act;

(4) "municipal land selection" means a request by a municipality, filed in writing with the director under authority of secs. 190 - 200 of this chapter repealed by this Act or under secs. 202 - 218 of this chapter for vacant, unappropriated, unreserved general grant land within its municipal boundaries in partial fulfillment of its municipal entitlement;

(5) "municipality" means a home rule or general law city or organized borough of any class, and includes third class boroughs and unified municipalities established under AS 29.68.240 - 29.68.440;

(6) "patent" means a document, issued by the director to a municipality for a previously approved selection, which conveys and quitclaims all the right, title and interest of the state without reservation or condition except as may be required by law;

(7) "remaining entitlement" means the general grant land

entitlement determined in accordance with sec. 202 of this chapter, reduced by the total acreage of approved selections, including both patented and unpatented parcels;

(8) "vacant, unappropriated, unreserved land" means general grant land as defined in (3) of this section, excluding minerals as required by sec. 6(i) of the Alaska Statehood Act, which

(A) has not been set aside by statute for one or more particular uses or purposes;

(B) has not been approved for patent to a municipality under secs. 202 - 218 of this chapter or former secs. 190 - 200 of this chapter repealed by this Act; or

(C) is unclassified or, if classified under AS 38.05.300, is classified for agricultural, grazing, commercial, industrial, private recreational, residential, utility or open-to-entry purposes.

* Sec. 3. AS 38.05.321 is repealed and re-enacted to read:

Sec. 38.05.321. RESTRICTION ON SALE, LEASE OR OTHER DISPOSAL OF AGRICULTURAL AND GRAZING LAND. (a) The sale, lease or other disposal of state land classified as agricultural or grazing land transfers only rights for agricultural and grazing purposes, and all other interests in the land remain with the state unless otherwise required by law.

(b) State land classified as agricultural or grazing land which has been selected by a municipality under AS 29.18.190 - 29.18.200 or 29.18.204(e) may be approved by the director for patent under AS 29.18.204(f); however, only rights in the land for agricultural or grazing purposes may be transferred and all other interests in the land will remain with the state. Agricultural or grazing land approved for patent to a municipality under AS 29.18.204(f) shall be credited, acre for acre, toward fulfillment of that municipality's entitlement under AS 29.18.202.

If the director later determines it to be in the best interests of the state to transfer some or all of the additional rights in that approved or patented agricultural or grazing land, those rig' ts shall pass without consideration to the municipality in which the land is located.

(c) The provisions of this sectic n do not apply to state land classified as agricultural or grazing land which has been selected by a municipality under the provisions of AS 29.18.190 - 29.18.200 if the selection is an approved selection valid under AS 29.18.204(b).

* Sec. 4. AS 38.05.290 is amended by adding a new subsection to read:

(b) Consistent with the best interests of the state, in the selection of general grant land it is the policy of the state to make available the maximum land area from which municipalities may fulfill land entitlements under AS 29.18.202 - 29.18.218.

* Sec. 5. AS 29.18.190, 29.18.200, and 29.18.420 are repealed.

* Sec. 6. This Act takes effect immediately in accordance with AS 01.10.-070(c).

IN THE SENATE

BY THE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

SENATE BILL NO. 241

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to selection and transfer of state land to municipalities; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. STATEMENT OF PURPOSE. The purposes of this Act are: to remove existing inequities and uncertainties in the existing municipal land selection law of the state; to provide for an immediate, final determination of municipal land entitlement; to provide for the completion of rational ownership patterns for sound land management within five years; and to provide for timely patent of lands to municipalities to fulfill their respective entitlements.

* Sec. 2. AS 29.18 is amended by adding new sections to read:

ARTICLE 3A. STATE LAND.

Sec. 29.18.202. DETERMINATION OF ENTITLEMENT. The total state land entitlement of each municipality eligible to receive state land, under the former secs. 190 - 200 of this chapter, is 10 per cent of the maximum total acreage of vacant, unappropriated, unreserved general grant land within the boundaries of each municipality at any time since the initial date of eligibility under the former secs. 190 - 200, but in no event later than December 31, 1976. For purposes of determination of entitlement, the boundaries of each municipality are those which existed on the initial date of eligibility under the former secs. 190 - 200.

Sec. 29.18.204. FULFILLMENT OF LAND ENTITLEMENTS. State land

entitlements of eligible municipalities shall be fulfilled in the following manner:

(1) Within six months of the effective date of this Act, the director shall determine each municipality's entitlement as defined in sec. 202 of this chapter and shall certify that entitlement to each municipality.

(2) The acreage of each municipality's land selections under the former secs. 190 - 200 of this chapter, for which patent has been issued before the effective date of this Act, shall be credited toward fulfillment of that municipality's entitlement.

(3) All approved selections under the former secs. 190 - 200 of this chapter, for which patent has not yet issued to a municipality as of the effective date of this Act, shall be reviewed by the director within six months after the effective date of this Act. Any approved selection for land which was vacant, unappropriated, or unreserved on the date of approval is considered valid, and a patent shall be issued to the municipality within six months after approval by the director of a plat of survey for the approved selection. This acreage shall be credited toward fulfillment of that municipality's entitlement. No municipality is entitled to receive patent under this chapter to more than its entitlement under sec. 202 of this chapter. Any prior approval by the director of municipal selections for land which was not vacant, unappropriated, or unreserved on the date of approval shall be rescinded, and patent may not be issued except where disposal to a third party by sale or lease has occurred. Patent for approved municipal selections of land under agricultural or grazing lease as of the effective date of this Act is subject to AS 38.05.321. Classification actions as reflected upon the land status records of the Department of Natural Resources are determinative of land classifi-

cation status for the purposes of this chapter.

(4) All municipal land selections under the former secs. 190 - 200 of this chapter not yet approved as of the effective date of this Act shall be recognized by the director as representing the priority interests of the municipalities under this Act and those selections shall be given first consideration under (6) of this section unless a municipality indicates different priorities.

(5) No filing of a municipal land selection vests any rights to the land selected unless approved by the director as being in the best interests of the state. As of the effective date of this Act, and for a period of five years after that date, no classification under AS 38.05.300 of a parcel of state land in excess of 5,760 acres is effective, unless otherwise required by law, if the municipality in which the land lies, notifies the director in writing of the reasons for any objections to the classification within 30 days after receipt of notice of the proposed classification.

(6) Commencing on the effective date of this Act, and within five years after that date, each eligible municipality and the director shall jointly determine which vacant, unappropriated, unreserved land, including federal land of interest to a municipality which is selectable by the state as general grant land, within the boundaries of the municipality is appropriate for selection and approval to fulfill any remaining municipal land entitlement. This joint determination must include a cooperative land management and planning process which will, in addition to the normal objectives of such processes, identify both local and state interests in the remaining vacant, unappropriated, unreserved land within each municipality. The director shall expeditiously review municipal selections for that land jointly identified as being of predominantly local interest. Following

approval of a municipal selection, a patent shall be issued to the municipality within six months after approval by the director of a plat of survey for the approved selection.

(7) In determining whether a municipal selection of vacant, unappropriated, unreserved land is in the best interests of the state, the director shall consider the state's responsibilities for developing and protecting those land values which are of statewide concern. Responsibilities which are of general statewide concern include: large scale development, development of regional impact, and critical environmental concerns. Specific land values to be considered include: air quality; water; minerals and energy; timber; agricultural; grazing; fish, wildlife, and their habitat; public recreation, natural historical, and archaeological areas of greater than local significance; public access to public land and water; transportation; communications; public safety; and other values of greater than local significance.

(8) Every action of approval or disapproval of a municipal selection by the director must include a written explanation of that decision based upon the values enumerated in (7) of this section. If the interests of the state may be protected through conveyance of less than fee title, the director may only convey title less than fee title in acre-for-acre fulfillment of the municipality's entitlement.

(9) Within 30 days after the convening of the first regular session of the Eleventh Alaska Legislature, and the first and second regular sessions of the Twelfth Alaska Legislature, the director shall report to the legislature on the implementation of secs. 202-216 of this chapter.

Sec. 29.18.206. SELECTION AND CONVEYANCE PROCEDURE. (a) All selections must be made in reasonably compact tracts, taking into account the use capabilities of a tract as well as its relationship to

surrounding land uses. Selections filed by a municipality, but not yet approved by the director, may be relinquished at any time. Approved selections may be relinquished by a municipality if agreed to by the director. Selections or approved selections relinquished by a municipality increase its remaining entitlement on an acre-for-acre basis.

(b) If land selected by a municipality is unsurveyed at the time of approval, the director shall survey, or may approve the municipality's survey of, the exterior boundaries of such an approved selection without interior subdivision, and he shall issue patent in terms of the exterior boundary survey. The cost of the survey shall be borne by the municipality. If land selected by a municipality has been surveyed at the time of its selection, the boundaries must conform to the public land subdivisions established by the approved survey.

(c) The director may approve municipal selections for land tentatively approved or patented to the state by the federal government, but he may not issue patent to a municipality until that land has been first patented to the state. After approval of a selection by the director, but before patent to a municipality, the municipality may execute conditional leases and make conditional sales only after approval by the director of a plat of survey of the area to be leased or sold.

(d) Nothing in this chapter affects a valid existing claim, location, or entry under the laws of the state or the United States whether for homestead, mineral, right-of-way or other purpose, nor affects the rights of an owner, claimant, locater, or entryman to the full use and enjoyment of the land so occupied.

Sec. 29.18.208. AUTHORIZATION FOR LAND EXCHANGES. The director, with the concurrence of the commissioner, and the municipalities are

authorized and encouraged to exchange land or interests in land among themselves where it is in the best public interest. Land or interests in land exchanged under this section must be of approximately equal value, including values of public benefits. Exchanges under this chapter are not subject to the provisions of AS 38.50, but are subject to the notice and review provisions of AS 38.05.305 and AS 38.05.345.

Sec. 29.18.210. DIRECTOR'S AUTHORITY. Nothing in this chapter limits or impairs the director's authority to transfer land to municipalities for public purposes under AS 38.05.315, except that the acreage of such transfers must be credited toward fulfillment of a municipality's land entitlement so long as any unfulfilled entitlement remains.

Sec. 29.18.212. ELECTION OF BENEFITS. (a) A municipality which is or becomes engaged in litigation against the state regarding a claim to state lands under the former secs. 190 - 200 of this chapter shall elect either to obtain the benefits afforded by secs. 202 - 216 of this chapter, or to pursue that litigation and thereby waive any claim to entitlement under secs. 202 - 216. That election must be made by filing a motion for dismissal with prejudice in the court in which the litigation is pending within 60 days after the effective date of this Act. Failure to file such a motion within the time period allowed is considered a waiver of entitlement under secs. 202 - 216.

(b) A municipality which has filed land selections under the former secs. 190 - 200 of this chapter and which is not in litigation with the state regarding a claim to rights under those statutes may, within 60 days after the effective date of this Act, elect to pursue its claim under the former secs. 190 - 200 by filing a legal action in the superior court to perfect the claim. A municipality not so

filing within the time period specified is considered to have elected to receive benefits under secs. 202 - 216 of this chapter, and to have waived any claims which might have been raised under the former secs. 190 - 200.

Sec. 29.18.214. REGULATIONS. The commissioner may adopt regulations under the Administrative Procedure Act (AS 44.62) necessary to carry out the purposes of secs. 202 - 216 of this chapter.

Sec. 29.18.216. DEFINITIONS. In secs. 202 - 216 of this chapter, unless the context requires otherwise

(1) "approved selection" means a municipal land selection which has been approved in writing by the director as being in the best interests of the state for transfer by patent to a municipality;

(2) "director" means the director of the division of lands, Department of Natural Resources, or his designee;

(3) "general grant land" means land patented or tentatively approved to the state from the United States under Section 6(a) or (b) of the Alaska Statehood Act (72 Stat. 339, et. seq.);

(4) "municipal land selection" means a request by a municipality, filed in writing with the director under authority of the former secs. 190 - 200 of this chapter or under secs. 202 - 216 of this chapter, for vacant, unappropriated, unreserved land within its municipal boundaries in partial fulfillment of its municipal entitlement;

(5) "municipality" means an incorporated city or organized borough of any class, whether home rule or otherwise, and includes a municipality unified under AS 29.68.240 - 29.68.440;

(6) "patent" means a document, issued by the director to a municipality for a previously approved selection, which conveys and quitclaims all the state's right, title, and interest, without reserva-

tion or condition except as may be permitted by law;

(7) "vacant, unappropriated, unreserved land" means the surface estate of general grant land as defined in (3) of this section, exclusive of shoreland, which

(A) has not been set aside by statute for one or more particular uses or purposes; or

(B) is unclassified or, if classified under AS 38.05.-300, is classified for agricultural, grazing, commercial, industrial, private recreation, residential, utility, or open-to-entry purposes.

* Sec. 3. AS 38.05.321 is repealed and re-enacted to read:

Sec. 38.05.321. RESTRICTION ON SALE, LEASE OR OTHER DISPOSAL OF AGRICULTURAL AND GRAZING LAND. (a) The sale, lease or other disposal of state land classified as agricultural or grazing land transfers only rights for agricultural and grazing purposes, and all other interests in the land remain with the state unless otherwise required by law.

(b) State land classified as agricultural or grazing land and selected by a municipality under the former AS 29.18.190 - 29.18.200 or under AS 29.18.202 - 29.18.216 may be approved and patented to that municipality; however, only rights in the land for agricultural and grazing purposes may be transferred and all other interests in the land will remain with the state. Agricultural or grazing land patented to a municipality shall be credited, acre for acre, toward fulfillment of that municipality's entitlement under AS 29.18.202. If the director later determines it to be in the best interests of the state to transfer some or all of the additional rights in that approved or patented agricultural or grazing land, those rights shall pass without consideration to the municipality in which the land is located.

* Sec. 4. AS 29.18.190, 29.18.200, and 29.18.420 are repealed.

* Sec. 5. This Act takes effect immediately in accordance with AS 01.-10.070(c).

4. Municipal Court Costs

House Bill 214 sponsored by Malone and Senate Bill 179 sponsored by Huber, Willis, Bradley, and Rodey are identicle bills. These bills would forgive all debts incurred and outstanding against political subdivisions for payment to the state for judicial services rendered under AS 22.15.270 (as it read prior to 1976). The Municipality has approximately $250,000 in outstanding debt which would be forgiven if this legislation were to pass. Hence, Municipal Assembly and Administration strongly support passage of these legislative proposals.

5. Mandatory Minimum Sentencing

(Drun' Driving)

Alcohol abuse is well recognized as a major contributing factor to traffic accidents and fatalities in Alaska. Nonetheless under present law, a person arrested for the first time for driving while intoxicated is not required to serve time in jail but may escape with merely a fine and suspended sentence. He or she may therefore take lightly the seriousness of the offense and the tragedy which may result from driving while intoxicated.

House Bill 127 amends AS 28.35.939 to provide that first time offenders be required to serve a minimum of three consecutive days in jail. No portion of that sentence may be suspended. Additionally, sentences imposed for subsequent offenses must be served consecutively.

The imposition of a mandatory minimum sentence and a requirement that the jail sentence be served consecutively will have a substantial economic impact on the violator. This is a strategic part of the legislation which combines legal and economic sanctions as a deterrant to alcohol abuse.

CS FOR HOUSE BILL NO. 127

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to penalties for driving while intoxicated."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 28.35.030 is amended to read:

Sec. 28.35.030. DRIVING WHILE UNDER THE INFLUENCE OF INTOXICATING LIQUOR OR DRUGS. A person who, while under the influence of intoxicating liquor, depressant, hallucinogenic or stimulant drugs or narcotic drugs as defined in AS 17.10.230(13) and AS 17.12.150(3) operates or drives an automobile, motorcycle or other motor vehicle in the state, upon conviction, is punishable by a fine of not more than $1,000, or by imprisonment for not more than one year, or by both and [. UPON A SECOND CONVICTION WITHIN FIVE YEARS AFTER A FIRST CONVICTION UNDER THIS SECTION,] the court shall impose a minimum sentence of imprisonment of not less than three consecutive days. Upon a subsequent conviction within five years after a [SECOND] conviction under this section, the court shall impose a minimum sentence of imprisonment of not less than 10 consecutive days. The execution of sentence may not be suspended nor may probation or parole be granted until the minimum imprisonment provided in this section has been served, nor may imposition of sentence be suspended, except upon the condition that the defendant be imprisoned for no less than the minimum period provided in this section, nor may the punishment provided for in this section be reduced under AS 11.05.-150. In addition, his operator's license shall be revoked in accordance with AS 28.15.210(c).

6. Public Utility Rate Making

INCLUSION OF CONSTRUCTION WORK IN PROGRESS (CWIP) IN RATE BASE

Plant construction has always been a vital part of utility planning and operations and is a function which is necessary to provide the plant required for adequate utility service. The practice of excluding CWIP from rate base and deferring recovery of such capital costs has been common for many years. While the theory of cost deferral is sound, and for many years there was very little challenge as to these deferrals, conditions have changed dramatically in the past few years and the combined impetus of substantial construction additions, prolonged construction periods, and the high costs of capital, with depressed earnings from operations, now cause very severe financial results.

It is now appropriate to include CWIP in the rate base so as to recover, on a current basis, the capital costs associated therewith, rather than deferring such costs for future recovery. There are a number of benefits to such an approach, with no concurrent disadvantage to the consumer or to the utility. The benefits which will flow from including CWIP in rate base, which inure to both the utility and to the consumer, include the following:

(1) offset to attrition
(2) improved cash flow
(3) improved debt coverages
(4) reduced business risks

Nor does the customer appear to be put to a disadvantage by including CWIP in rate base. True, the customer will pay for the cost of service at an earlier date and, therefore, the rates initially will be higher to that extent; but on a time value of money, the cost is exactly the same to the customer and it is a question of <u>when</u> the costs are recovered, rather than <u>whether</u> such costs are recovered. In addition, on an absolute dollar cost basis, the cutomer will actually pay less in total dollars.

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act Entitled: "An Act Relating to Rate Making for Public Utilities"

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA

Section 1. AS 42.05.441(b) is repealed and reenacted to read:

Section 42.05.441(b). Valuation of Property of a Public Utility.

(b) For rate making purposes the Commission shall determine the rate base of a public utility by calculating the acquisition of cost [OR, IF LOWER, THE ORIGINAL COST] of utility property used and useful in rendering service to the public [TO THE PERSON FIRST DEVOTING IT TO PUBLIC SERVICE] less accrued depreciation, plus construction work in progress, plus materials and supplies and a reasonable allowance for cash working capital when required.

7. Small Basiness Guaranty Corporation

Small Business Surety Guaranty Corporation of Alaska

Legislation is being drafted to assist small Alaskan businesses which are currently unable to participate in Municipal and state contract bidding because they are unable to obtain the requisite bid, construction or performance bonds. The proposed legislation would set up a state agency which would be guarantor of surety bonds (up to 90%) which the Small Business Administration has declined to guaranty, and would also be authorized to provide surety bonds in instances where private financial institutions have refused to give bond. The result will be a responsible agency which assists these small businesses in obtaining bonds when all other bonding sources have failed.

8. HEALTH AND SOCIAL SERVICE

PROGRAM COSTS

The attached position paper was presented to the House HESS committee last year in regards to House Bills 206 and 207.

The legislature increased the line item contract amount to the Municipality from $500,000.00 to $700,000.00. The Governor, however, line item vetoed $100,000.00 of that amount.

We obviously need to have the 1978/79 budget amount increased again especially if it is to be a floor as spoken to in the legislation.

DEPARTMENT OF HEALTH AND ENVIRONMENTAL PROTECTION
MUNICIPALITY OF ANCHORAGE

March 9, 1977

TESTIMONY PRESENTED BY ROBERT A. "BERT" HALL BEFORE THE HESS COMMITTEE OF THE HOUSE OF REPRESENTATIVES.

Mr. Chairman, members of the House HESS Committee, my name is Bert Hall; I am the Director of the Department of Health and Environmental Protection for the Municipality of Anchorage.

We have been studying very carefully House Bills 206 and 207 and have accomplished some analysis of the potential impacts, both positive and negative, of that legislation upon the Municipality. Our prime concern is obviously with H.B. 206 since, by definition, we would be excluded from consideration under H.B. 207.

The testimony we offer today, especially any statistics, are intended to be preliminary in nature with dollar figures used only for illustrative purposes. We are attempting to document some accurate reflection of the history of our past experiences in joint funding public health services in the Anchorage area.

Let me begin by stating that we believe that there needs to be established a formal and equitable system for the orderly delegation of state authority to municipalities and for the authorization of grants to local governments to assist in providing public health services. We agree with the stated purpose - to provide and safeguard the health of the general public. However, if our understanding of the system suggested in H.B. 206 as it would apply to the Municipality of Anchorage is accurate, then we have some real problems endorsing the legislation without amendment.

Since the Municipality of Anchorage has the only history of joint governmental funding of public health services in Alaska, perhaps it would be helpful to review briefly our past experiences.

As early as 1926 the City of Anchorage employed a sanitarian and a nurse to look after some of the health and sanitation problems for the community. Over the years various combinations of efforts by the city and adjacent utility districts with assistance from the Territory and the State have maintained an agency to provide public health services.

Full St. G Grant $800,000

For about ten years the Greater Anchorage Area Borough Health Department operated as a district agency serving Anchorage and the metropolitan area technically under State authority, and financed by a combination of local, State and Federal funds. A succession of health officers brought variations in emphasis, but for the most part the services included general sanitation and public health nursing.

The assumption of health powers by the Borough in 1964 brought no significant changes in services for several years, though steadily the local agency grew in experience and assumed many responsibilities once carried almost wholly by the State. Even yet the Department lacks some of the most important services such as: Laboratory, Child Guidance, Nutrition and Health Education. Of these only laboratory services are available through the Southcentral Regional Laboratory operated by the State Department of Health and Social Services.

The Department of Health and Environmental Protection's responsibilities include the full scope of health powers, including environmental, since no other official agency of local government has such powers assigned.

"The scope of health is considered to be a state of complete physical, mental and social well being, and not merely the absence of disease or infirmity". This definition has been adopted by the World Health Organization, the American Public Health Association, The Alaska Public Health Association, and by most official health agencies throughout the Country. The practical boundaries of health functions assumed by Federal, State and local official and voluntary agencies are more often defined by limits of resources and recognized needs than by definition of public health which states that "public health includes those services and functions which the people can better provide for themselves collectively rather than as individuals". This definition also implies that as needs change services change to meet them.

As noted above the Department of Health Environmental Protection has grown and has assumed many of the State's public health responsibilities. In recognition of the assumption of these State responsibilities the State gave the Department in fiscal year 1970-71 the amount of $265,000. Included in this amount was $125,000 for Alaska Crippled Children's Association and Alaska Retarded Citizen's Association thus leaving $140,000 for public health services. The $125,000 for ACCA and ARCA was for the provision of

exceptional children's programs. The $140,000 was for the provision of communicable disease control, vital statistics collection, environmental sanitation, health education, promotion of individual health and collection and preparation of laboratory samples.

We, the local health authority were expected to accomplish many specific tasks, including the following:

We would provide immunications for all citizens without charge,
We would perform chest x-rays,
We would provide diagnostic consultation for TB and for venereal diseases,
We would accomplish epidemiological investigations where appropriate.

In the environmental health area;

We would inspect public facilities: eating and drinking establishments, grocery stores, bakeries, etc.; housing and mobile home communities, schools, hospitals, nursing homes, swimming pools, etc.
We would respond to complaints and public nuisances,
We would deal with most matters of pollution, especially water and sewer.

To promote individual health;

We would provide for visits of the Public Health Nurse in the home,
We would conduct family planning clinics,
We would conduct classes for expectant parents and run well child clinics,
We would provide consultation to child care centers.

Additionally, we would provide certain limited laboratory services, and the services of the physician.

All of these and many more would be provided in the basis of total health needs.

When the first contract was signed in 1970, it was agreed that the State support would allow for the provision by the Municipality of a proportionally greater amount of services than would have been provided if no contract or grant existed.

It should be pointed out that there was little rhyme nor reason regarding the dollar amount included. The contract instead was a document intended to legally transfer the line item budget amount.

For the next fiscal year, 1971-72, the contract was renegotiated to a total amount of $500,000, $140,000 was earmarked for ACCA and ARCA, the exceptional children's programs... $100,000 was dedicated to environmental health and $260,000 to public health. The total amount budgeted for these services by the Municipality for that period was $1,391,000. The State's share of that budget was therefore, 25.9%. It is my belief that that contract was the first sincere attempt to share reasonable costs.

I have studied all of the contracts since 1971. All are basically the same; all use the same words, all have the same conditions, all have the same scope - and unfortunately all have the same dollar amount.

Meanwhile, the population of Anchorage has grown about 50%, services have been expanded to meet the recognized needs; inflation has eaten away at the purchasing power or service delivery capability of the $360,000 we received from the State for the provision of the public health services described above.

Attached is a graph which illustrates the growth of the true costs and shows also the level of State support.

The true cost of delivering public health services in Anchorage for the present year is $2,930.170. The Municipality is receiving $335,430 in other revenue. The State is still contributing $360,000 which means that its share is now only 13.9%. If the 1971-72 proportion of State investment was interpolated to today's budget then the State would be paying $754,000 for its share of public health services and a total of $894,000, recognizing that the $140,000 was legislatively intended for passthrough projects.

House Bill 206 provides under Section 18.10.031(1) for a grant to a Municipality in an amount equal to 90% of the State budget for public health services funished by a municipality in that fiscal year; the same level of basic grant support shall be provided in subsequent fiscal years. In order to get this grant the Municipality must only agree to maintain the same level of public health services as furnished by the Department in the fiscal year preceding application for the grant. There is also a hold harmless clause which we cannot interpret.

Under House Bill 206, will the State be willing to go 90% of the true cost of delivering public health services in Anchorage or is it the intent of the State to continue paying the Municipality $360,000 as provided under Section 18.10.031(d)? Herein lies our major problem with the legislation.

Up until this time the Municipality of Anchorage has provided the public health services in the Anchorage area which are the historic delegated responsibility of the State. The State, through House Bill 206 would contract with local governments and under H.B. 207 create health entities to contract with where no local government exists for the delivery of public health services. In other areas of the State the local residents will only have to pay 10% of the true cost of the delivery of public health services; H.B. 207 provides that where local governments do not exist federal monies can be used to match the State contribution.

Today in Anchorage, the local taxpayers directly pay for 86.1% of the cost of providing public health services as well as their share of State taxes. The people in other communities are not directly paying for any public health services.

In essence, we are questioning whether or not the base figure which would be used to calculate a 90% support for 1980, and would be reflected in all future years, bears any relationship to the true costs as would be the case elsewhere in the State.

Another major concern is the potential disincentive that may be built into the Bill. If a local government knew that it would get 50% support for a new program a few years down the road, why expand services for less support? Someone might even conclude that local autonomy might not be worth spending 85%-90% of the costs with local funds when the basic services could be provided by the State at 100% support if no agreement existed.

A final concern relates to the lack of a clear mechanism for providing for State support of any dramatic increase in needs which comes into being with little warning. In a similar vein, there appears to be no opportunity for passing along any major availability of new health dollars that may come to the State from one source or another.

Thank you.

9. PUBLIC EMPLOYEES RETIREMENT SYSTEM

SICK LEAVE AND SERVICE CREDITS

HB 25 causes some problems for local governments who participate in the State's Public Employee Retirement System, yet have different sick leave or service credit practices than the state.

For example, Under the proposed HB 25

Sec. 1 - The municipality would incur additional financial liability because this section would require the employer to reinstate in full the sick leave accumulated at time of termination if he is reemployed within three years by any participating employer. Thus, if a municipal employee were to terminate today and cash in his sick leave then be rehired by the municipality or state, or any other municipal participant in PERS, his sick leave accrued at time of termination would have to be reinstated. The bill does not address whether, if cashed out for sick leave, the rehired employee would have to repay the money paid him for sick leave upon termination. In this sense, HB 25 needlessly complicates the orderly administration of local government participants in PERS if their personnel practices differ from that of the states. By changing the reference section to AS 39.20 rather than AS 39.35 the problem of adversely affecting participant municipalities would be removed. Anchorage Municipality, as one of those participant communities, opposes the passage of HB 25 without changing the sectional reference from AS 39.35 to AS 39.20.

IN THE HOUSE BY MILLER AND DUNCAN

HOUSE BILL NO. 25

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to sick leave credited as service credit in the Public Employee's Retirement System of Alaska."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 39.35 is amended by adding new sections to read:

Sec. 39.35.355. REINSTATED SICK LEAVE. If an employee's employment is terminated for any reason before he becomes eligible for a retirement benefit and the employee is subsequently reemployed within three years by the same participating employer, the employee is entitled to have reinstated in full the sick leave he had accumulated at the time of his last termination

Sec. 39.35.365. SICK LEAVE COMPUTED AS SERVICE CREDIT. Upon retirement, a participating employee is entitled to receive service credit for his accumulated sick leave. For purposes of determining his service credit for the entire period of employment, the employee's sick leave shall be computed as service credit at the same rate of pay as his salary on retirement.

Sec. 39.35.370. OPTION FOR ANNUAL LEAVE COMPUTED AS SERVICE CREDIT Upon retirement a participating employee shall have the option to receive service credit for his accumulated annual or personal leave or receive cash payment for his accumulated annual or personal leave. For purposes of determining his service credit for the entire period of employment, the employee's annual or personal leave shall be computed as service credit at the same rate of pay as his salary on retirement.

Sec. 39.35.375. SERVICE CREDIT FOR SICK LEAVE. An employee who completes five years of service and whose employment is terminated for any reason except retirement is entitled to receive service credit for his accumulated sick leave.

10. REPEAL OF BUSINESS LICENSE TAX

SB 41, SB 7 and HB 106 all propose to eliminate the Alaska Business License Tax. This tax provides substantial income to many communities. It contributes approximately $3,000,000 in revenue to the Municipality of Anchorage. Yet the Municipality is not unsympathetic to the goals of the proposed legislation. However, some source of funding is necessary to replace this important resource to local governments. It is essential that these proposed bills identify an alternate source of funding.

SENATE BILL NO. 41

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the Alaska business license tax; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 43.70.030(a) is amended to read:

(a) The license fee for each business is $25 [PLUS A SUM EQUAL TO ONE-HALF OF ONE PER CENT OF THE GROSS RECEIPTS IN EXCESS OF $20,000 FROM THE BUSINESS DURING THE YEAR FOR WHICH THE LICENSE IS ISSUED, EXCEPT THAT ALL GROSS VOLUME IN EXCESS OF $100,000 A YEAR IS TAXED AT THE RATE OF ONE-QUARTER OF ONE PER CENT. THE ANNUAL LICENSE FEE PAID BY A PROFESSIONAL PERSON TO HIS PROFESSIONAL BOARD SHALL BE CREDITED AGAINST THE INITIAL FEE REQUIRED UNDER THIS CHAPTER].

* Sec. 2. AS 43.70.030(c) is amended to read:

(c) The license for the privilege of taking orders through use of catalogs and by mail order offices in the state is the same as set out in this chapter for business generally [AND GROSS VOLUME OF BUSINESS OF THOSE OFFICES INCLUDES ALL ORDERS TAKEN AT THEM WHETHER DELIVERY OF THE MERCHANDISE IS MADE THROUGH THE OFFICES OR NOT].

* Sec. 3. AS 43.70.030(d) is amended to read:

(d) The initial fee of $25 applies to all of the provisions of this section, and shall accompany the application. The balance under sec. 30(b) of this chapter is due and payable on December 31st of each year and shall be paid before the first day of March following, except that the department may extend the time until the 30th of the following April upon application showing that the extension is necessary to enable

7!

the applicant to ascertain the amount of license money due. To enable accurate determination of the balance of the tax due at the end of each year, each person to whom this chapter applies shall keep records, give statements under oath, and make returns which the department requires. Returns are made under penalty of perjury.

* Sec. 4. AS 43.70.040 is amended to read:

Sec. 43.70.040. REVIEW AND DETERMINATION OF LICENSE TAX. As soon as practicable after the final payment of the tax under sec. 30(b) of this chapter, the department shall examine the return and determine the correct amount of the tax and, if an error is found, shall notify the taxpayer of the error and examine the taxpayer's records as authorized in AS 43.05.040, and take other proper steps to determine the amount due.

* Sec. 5. AS 43.70.080 is amended to read:

Sec. 43.70.080. DISPOSAL OF MONEY. All money collected by the department under this chapter shall be deposited in the general fund. Each fiscal year, the [THE] Department of Revenue shall refund to each organized borough and each city of any class 60 per cent of the money collected in the local government or an amount equal to the amount of shared business license tax receipts which the borough or city was entitled to receive under this section for the state fiscal year ending June 30, 1976, whichever is greater.

* Sec. 6. AS 43.70.010 and AS 43.70.110(2) are repealed.

* Sec. 7. This Act takes effect January 1, 1978.

Sec. 43.18.090. ADDITIONAL GRANTS TO REPLACE LOST REVENUES. In addition to revenue sharing payable to municipalities under secs. 10 - 45 of this chapter, the state shall pay to a municipality each fiscal year a percentage of the amount of business license tax receipts which the municipality was entitled to receive under AS 43.70.080 for the state fiscal year ending June 30, 1977. The applicable percentage payable under this section is

(1) 100 per cent for the fiscal years ending June 30, 1978 and June 30, 1979;

(2) 80 per cent for the fiscal years ending June 30, 1980 and June 30, 1981;

(3) 60 per cent for the fiscal years ending June 30, 1982 and June 30, 1983;

(4) 40 per cent for the fiscal years ending June 30, 1984 and June 30, 1985; and

(5) 20 per cent for the fiscal years ending June 30, 1986 and June 30, 1987.

* Sec. 7. This Act takes effect January 1, 1978.

11. CLASSIFICATION OF STATE LAND-RECREATIONAL TRAILS

HOUSE BILL NO. 116 am

HB 116 am attempts to complement the recreational trails planning and comprehensive planning within municipalities by making state land, within that municipality, appropriate for recreational purposes available for use by a municipality. The bill provides that in making the state land appropriate for recreational purpose available to municipalities, the state will consult with local elected bodies and comply with local comprehensive planning. Anchorage Municipality views this as a most welcome practice and supports wholeheartedly the passage of HB 116.

HOUSE BILL NO. 116 am

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the classification of state land; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 41.20 is amended by adding a new section to read:

Sec. 41.20.065. RECREATIONAL TRAILS LAND. (a) The commissioner of natural resources, or his designee, is authorized to classify state land appropriate for recreational purposes within a municipality as recreational trails land. Before classification of state land within a municipality as recreational trails land under this section, the commissioner shall consult with the appropriate municipal authority so that, to the maximum extent possible, his classification conforms to and enhances existing municipal trail classifications.

(b) With respect to land located within a municipality, classifications under this section shall conform to the overall comprehensive plan adopted for the municipality and all regulations and restrictions on the use of land adopted under the comprehensive plan; however, no municipal regulation may bar public access to the state land.

* Sec. 2. This Act takes effect immediately in accordance with AS 01.-10.070(c).

12. SHORTFALL-SENIOR CITIZEN PROPERTY TAX EXEMPTION

Municipality of Anchorage

MEMORANDUM

DATE: November 22, 1977

TO: Mayor

FROM: Chief Fiscal Officer

SUBJECT: Senior Citizen Property Tax Exemption

I am attaching copies of letters from Pat McKee and an official of the State Community & Regional Affairs Department relating to the shortfall in State revenue available to local governments for the senior citizens property tax exemption. Because of this shortfall, the State intends to reimburse only 90% of the amount due the Municipality of Anchorage. The remaining 10%, or $75,369.00, will be requested as a supplemental appropriation when the State Legislature convenes.

It would be to our advantage to impress upon the Anchorage delegation the urgency of passing the supplemental appropriation as early in the session as possible. Hopefully, the necessity of billing each individual for the remaining 10% can be averted.

Robert M. Nelson

Robert M. Nelson
Chief Fiscal Officer

RMN:ps

Attachment

91-010 (4/76)

Municipality of Anchorage

MEMORANDUM

DATE: Nov. 8, 1977

TO: Chief Fiscal Officer

FROM: Director, Property Appraisal

SUBJECT: 90% PAYMENT FROM THE STATE SENIOR CITIZEN'S EXEMPTION

Attached is a letter from LaDonna Brown with the Division of Local Government Assistance indicating that the Municipality of Anchorage will receive only 90% of the full entitlement of the Senior Citizen's property tax payments from the State of Alaska.

Our full entitlement from the state should have been $753,691.18; we will only be receiving 678,322.06, a difference of $75,369.11.

Under Alaska Law, Section 29.53.020 Sub-section (g) the State is obligated to reimburse the Borough or City as appropriate for the real property tax revenues lost to it by the operation of the Senior Citizen's property tax exemption.

I believe it would be beneficial if the Administration was to make this fact known to our legislators so that they might be prompted to appropriate the required funding in the early days of the next session of the legislature.

STATE OF ALASKA
JAY S. HAMMOND, GOVERNOR
DEPT. OF COMMUNITY & REGIONAL AFFAIRS
DIVISION OF LOCAL GOVERNMENT ASSISTANCE / POUCH B – JUNEAU 99811

November 2, 1977

RECEIVED
NOV 8 1977
ASSESSOR

Mr. Glenn McKee, Director
Property Appraisal Division
Municipality of Anchorage
Pouch 6-650
Anchorage, Alaska 99502

Dear Mr. McKee:

Re: 1977 Senior Citizen Property Tax Exemption

The audits have revealed a funding shortfall which requires proration of municipal reimbursements.

A supplemental grant has been requested and it may take several months to obtain final legislative action after the session convens. Audited accounts completed by our office after September 30, will be paid at 90% of full entitlement.

Should the supplemental grants not receive approval by the legislature, the six municipalities that have been paid in full will be requested to refund the difference between full entitlement and final prorated amount but not more than 10% of the amount received.

The Department will follow and support the supplemental grants request and will make full use of any input you can submit to influence the legislature in assigning a high priority to resolving this problem.

There is no reason to believe that legislative intent was to fund the program at less than 100% and we deeply regret the inconvenience created by this inadvertent shortfall.

Sincerely,

LaDonna Brown

13. MUNICIPAL TAXATION

Municipality of Anchorage

MEMORANDUM

DATE: Dec. 9, 1977

TO: Chief Fiscal Officer

FROM: Director, Property Appraisal

SUBJECT: SENATE BILL 112

The general features of the senate bill are:

1. There will be a base year. The base year is defined as the last time any property was revalued for assessment purposes.

   PROBLEM: Since we have been on a three-year appraisal cycle and have not yet evolved into an annual cycle, each third of the Municipality would have a different base year.

2. There is a limitation of a 5% annual change in value from the base year.

   PROBLEM: I am assuming they are referring to no more than a 5% increase in value, which obviously would not approach anything close to market value increases. How about if a property, for some reason, decreased in value over and above the 5% limitation; this does happen because of economic situations outside of the boundaries of the property.

3. They indicate that if improvements are made to a property subject to the provisions of the section, that the full and true value of the improvements shall be included in the determination of the limited assessed value in the year in which the improvement is first included on the Municipality's tax roll.

   PROBLEM: Assume a two-bedroom home with a base year of 1975, also assume that two more bedrooms were added in 1978; it would be virtually impossible to determine the increase in value attributed to the total improvement by the addition of two bedrooms several years later without being able to change the base year of total improvement or simply stated having a weighted average base year value.

   This section of the subject bill obviously assumes that all values are based on the cost approach to value and not the market approach to value. In this Municipality we use the market approach to value, which may or may not be equal to the cost approach to value.

4. The bill provides that the Assessor will keep full and true market value figures and limited valuation figures. This would, in essence, double the work load for the first few years and would create problems each time an addition or deletion was made to any structure.

5. Assume a parcel of real estate, land only, with a value of $10,000 without sewer, water or any other utility. Assume that the sewer and water were added or made available to the property and that normally this increase would raise the property value to $17,000. Do we start off with a new base year at $17,000 or do we add 5% to the $10,000 figure? Let us also assume that a property that used to be zoned B-3 was rezoned R-1. We now have a property that is far less valuable than it used to be. Are we to reduce the value by 5% per year and hopefully someday reach the value of the R-1 property?

6. The Municipality would be allowed a 10 mill limit on the limited valuation plus an equivalent of 10 mills from the State based on the full and true value of the property.

   PROBLEM: At the present time Municipalities are allowed a maximum of 30 mills. As proposed, this limitation would be sharply reduced, to what degree, no one would be able to tell from year to year.

7. And I would like to repeat again, the bill would create inequities among taxpayers beyond belief.

   If it is State aid we are looking for in this bill, there has got to be a far less complicated way of receiving it without totally destroying the 'You get what you pay for' theme.

Glenn M. McKee
Director

GMM:eea

14. REPEAL OF MUNICIPAL PROPERTY TAX

Municipality of Anchorage

MEMORANDUM

DATE: Dec. 9, 1977

TO: Chief Fiscal Officer

FROM: Director, Property Appraisal

SUBJECT: SENATE BILL 210

In section 29.33.030, this bill provides that boroughs shall assess property and collect sales and use taxes levied within their boundaries subject to chapter 53 of this title. What this says in essence is that we may only assess property taxes. We may, however, collect on sales taxes, use taxes and special assessments.

In section 43.18.030, it states that the intent of this chapter in authorizing state aid for Municipal purposes, is that local governments which levy, then they excluded the word property, taxes, reduce those levies in reasonable proportion to the amount of state aid received by a local government for a given fiscal year. They also require us to furnish a notice to the taxpayers saying how well the state is treating them from the state level.

They go on to say that the State shall reimburse a Municipality for the property tax revenues lost to it by the operation of this bill. Reimbursement will be made annually in an amount equal to the total of the real and personal property taxes due and payable to the Municipality for the last complete fiscal year of the Municipality ending on or before Dec. 31, 1978. This is confusing to me in that the payment is paid in an amount equal to the total of the real and personal property taxes due and payable in our last complete fiscal year. It does not provide that there shall be an increase in taxes after that year. If we can't tax real and personal property as of Jan. 1, 1979, who is going to make up the difference and how? It would seem that it could be made up only by sales taxes, use taxes or special assessments. I also wonder what this would do to our bonding powers since we don't have the power to levy a tax as such.

In my opinion, it is another one of those bills to spend all of the oil money we don't have; shades of the $900,000,000 that we receive for our leases.

Officials Plan Juneau Trip

Anch Times 5/5/78

A score of Anchorage officials will fly to Juneau Sunday for a work session with legislators on pending legislation of local interest.

Those making the trip will include some municipal department heads, assemblymen, school board members and school district officials. The group will essentially lobby for bills of concern to Anchorage.

Among the issues set for discussion at the 3 p.m. meeting:

— The selection and transfer of state land to municipalities.

— Ratification of a lease purchase agreement between the state and the municipality for the former state highway complex at Third Avenue and Post Road here.

— State aid for extending municipal police protection services.

— A special appropriation for Anchorage police services for the Muldoon-Spenard police expansion project due to get underway this fall.

— A bill to authorize state support for construction and development of cultural facilities in municipalities and an accompanying funding measure.

— A bill to provide 50 percent state funding for local capital improvements projects in municipalities. This bill was introduced in the Legislature at the request of Breakthrough, an Anchorage citizens' group boosting local improvements.

— A bill amending the state's procedure of collecting local vehicle tax for municipalities.

Also set for discussion are utilities and health proposals and school district issues.

Anchorage Times May 9, 1978, Tues

Municipal Officials Here To Begin Regular Sessions With Legislators

Municipal officials will meet with the Anchorage legislative delegation weekly from now until the end of the session to confer on bills considered priorities by the municipality.

Some of those meetings — set for Wednesdays — will be by teleconference between the two cities. For others, municipal officials will fly to Southeast.

The meeting schedule was established Sunday in Juneau during a lobbying trip by Anchorage officials to the capital city.

Anchorage assemblymen and administration officials individually have made several trips to Juneau to discuss pending legislation, but not as part of a regular meeting schedule. Such a schedule was advocated by an assembly resolution approved recently and strongly backed by Mayor George Sullivan.

Those who layed over in Juneau Monday got to see approved in the House one of their priority bills — a measure ratifying a lease-purchase agreement between the state and municipality for a former state highway facility at Third Avenue and Post Road. The vote was 33-1.

Fairbanks Rep. Fred Brown cast the only vote against the agreement.

The agreement was negotiated in November 1974 but the state administration has since tried to have it thrown out by the courts. The administration contends the former commissioner of highways who entered into the agreement did not have authority to do so, that public notice of the transaction was inadequate, and that the property was not appraised within the requisite three months before the effective date of the agreement.

Under the agreement the municipality agreed to pay rent of $100,000 a year plus $10,000 annually for the purchase option. Total purchase price of the facility was set at $1 million. The municipality has been making the annual rental and option payments, and plans to use the facility as an operations-maintenance base for the People Mover transit system.

Other measures discussed at the Sunday session:

— A bill that would revise the standards for allocating state revenue sharing funds to local governments in a manner designed to favor economically disadvantaged communities.

The municipal administration, which says Anchorage would be adversely affected by the measure, have opposed it. The measure, now in the House community and regional affairs committee, is supported by most other municipalities and boroughs.

— Several measures concerning alcoholism treatment and funding.

— A bill to provide state aid for extension of municipal police services, and a measure providing for a supplemental appropriation to Anchorage for extension of police services to the Sand Lake and Muldoon areas.

ANCHORAGE ASSEMBLY

MEMORANDUM TO ALL ANCHORAGE LEGISLATORS

SUBJECT: MONIES APPROPRIATED FOR FUNDING OF SCHOOL DEBT SERVICE

Last session the Legislature passed into law a Bill which provided that past school construction costs would be reimbursed by the State at the 100 percent level.

In this year's budget, the Governor recommended that, despite the law, school construction cost reimbursement be provided at the 80 percent level.

We had planned on 100 percent and had expected that the Governor would have recommended funding at that level.

At a joint meeting of the Anchorage School Board and the Municipal Assembly...convened to discuss this year's school budget and its impact on local taxation...the combined body passed the following Resolution:

> "We jointly resolve that the Legislature be requested to appropriate school construction debt service reimbursement funds at the 100 percent level as intended by State Law."

This appropriation (increase from 80 to 100 percent) represents about 2.4 million dollars which can be built into this year's school budget in direct tax relief areawide throughout the Municipality.

I hope you can support this increase in funding and support the execution as well as the spirit of the law enacted last year.

Sincerely,

Dave

Dave Rose

ANCHORAGE
SCHOOL DISTRICT
4600 DeBarr Road - Anchorage, Alaska
99504
AREA CODE 907-333-9561

March 21, 1978

The Honorable Joe Orsini
Alaska State Senate
Pouch V
Juneau, AK 99811

Dear Senator Orsini:

Pending Municipal Assembly action, Anchorage voters will be asked this fall to approve a bond package proposed by our School Board in the amount of $23,000,000. The sale of these bonds will provide our school system with the ability to build needed schools, improvements, and to acquire building sites for future expansion. At this time, you have a number of proposals to provide state support for the retirement of these bonds. Each of them has merit.

The Anchorage School Board strongly supports the proposal for bond reimbursement advanced by HB 681. This bill provides the simplest formula allocation of state funds for the purpose of bond retirement. It calls for reimbursement, on a delayed basis, of 80% of future local bond expenditures and 100% of bond commitments made prior to 1977.

This measure would give Alaska's citizens and students a direct share in the wealth of our non-renewable natural resources. It would also, by its very simplicity, provide for studied local planning and decisions as to the types of facilities built with bond funds. It would avoid a potentially negative effect generated by rigid state control of what has traditionally been a local decision-making process. We feel that the people of our state know best what their needs are on a community by community basis and we feel that this decision-making activity should be kept at that level within broad general guidelines which should be developed and implemented by the State Board of Education.

The other bond funding bills contain specific proposals and possible oversights which should merit your further attention.

None of the proposals allow for "front-end money" which would be of immense benefit to rural areas. Some of these districts are caught in a "Catch 22" dilemma of having a tremendous need for new and larger facilities while not having the tax base to provide for note retirement immediately following the sale of the bonds.

The State Superintendents' Association has suggested your consideration of a proposal to provide between 80% and 100% of local bond payments on an ability to pay basis for less-able districts.

We would also point out some areas of disagreement which exist in Governor Hammond's bond bill, HB 853.

The Governor's bill sets a state support floor of 50% of local bond payments. This floor should be increased to 80%. It also gives the Commissioner of Education a veto power over future school planning and construction throughout the state. Specifically, we refer to page 4, section "C" of HB 853, lines 3 and 4. This section would be greatly improved by the deletion of the words, "and priority" in line 3 and "and necessary" in line 4.

In the area of labor relations, we would reiterate our stated opposition to proposals such as HB 489 which calls for group representation of REAA's and employee organizations in collective bargaining. This would seriously undermine the principle of local control of education and would saddle the state with labor relation climate similar to that under the state operated school system (SOS). We are opposed to any efforts to broaden the scope of negotiations with employee units, particularly teachers and any broadening of the binding arbitration requirements which now exist.

One of the very important areas under consideration this year lies in the state's commitment to children with special needs. Our handicapped and gifted students require a great deal of staff and financial support from the state and the community. Under the provisions of state and federal law, school districts must provide extensive, ongoing diagnostic services to these students outside of the regular classroom services. It is in this area that we and other school districts are feeling a financial burden.

To alleviate this situation, we would propose a change to our special education funding formula to provide additional foundation support units for the specific purposes of student assessment and diagnosis. The proposed change attached to this letter would provide 30 additional units of support for

RELEASE COPY

Anchorage's handicapped and gifted students and would allow us to provide additional services in the special education classrooms where they are so vitally needed.

We must also ask your support in enforcing a moratorium on any other special education proposals which come to the floor during this session.

Complex federal laws, regulations, and definitions, coupled with enforcement of existing state laws and regulations, have put our special education systems into a state of flux. Frankly, we need some time to catch our breath and put our house in order.

It is our intent to exercise a leadership role in the revision of existing special education legislation prior to the beginning of the next legislature and to present our recommendations to you in the form of a complete package of coordinated and viable bills at that time. It would be our intent to simplify rather than complicate this important body of law and regulation so that we can provide these services with a minimum of delay and overhead, but we need time and a respite from more changes.

Sincerely,

John B. Peper

The Honorable Joseph L. Orsini
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Mr. Orsini:

During the current legislative session, your committee will be dealing with a number of bills affecting public education.

Since the Anchorage School District enrolls one half of Alaska's public school students, we feel that many of these proposals are of vital importance to us.

Would it be possible for your staff to alert us to committee hearings on bills dealing with these matters? We are most interested in proposals on public employment practices affecting teachers and school employees, educational programs and school finance.

Your assistance in this matter would be appreciated.

For your information, we are enclosing copies of the Anchorage School District's Facts and Figures Digest. This booklet contains a summary of the District's financial activities and student enrollment patterns and may help you place some perspective on the size of our system.

Thank you in advance for your time and cooperation.

Sincerely,

John B. Peper

Dear Senator Orsini:

The enclosed is a statement of legislative priorities of the Anchorage School Board as presented at the Chamber of Commerce Legislative Forum.

We apologize for not having a written statement at that time.

Please feel free to call upon Dr. Peper, the Superintendent of the Anchorage School District, or any member of the Board if you have any questions or need further clarification on any of the issues.

Thank you for your time and attention.

Sincerely,

Heather Flynn

December 17, 1977

TO: Anchorage Chamber of Commerce Legislative Forum

FROM: Anchorage School Board

SUBJECT: Legislation

The Anchorage School Board has a limited number of priorities. Our primary goal is to prevent an erosion of the constitutional and statutory authority and responsibility vested in the School Board.

To that end the Anchorage School Board and the entire Alaska Association of School Boards is firmly opposed to any form of binding arbitration including last best offer arbitration, or binding arbitration which includes a local referendum on the results. The financial impact on school districts could be disastrous.

Perhaps more important than the financial aspects are the issues of management rights and local control. The legislature, through Title 1 and 29, has wisely determined that the local school board is an autonomous organization, locally elected, and self-determining, subject to federal and state statutes and regulations. The legislature reaffirmed this autonomy with the creation of the regional attendance areas and locally elected regional school boards. Imposing further restrictions upon how locally elected bodies must bargain with unions which enjoy a statewide power base would do violence to the local control the legislature attempted to create in the REAA's.

A local referendum on the results of binding arbitration is the ultimate in buck-passing. It offers insulation of the legislator who finds it a comfortable compromise. And it removes from the local board the accountability to which they should be held.

Management rights, especially in the public sector, is a developing and complex area. We wish to note the recent decision of the Alaska Supreme Court affirming the position of the Anchorage School Board that by allowing some items to be negotiable, we are abrogating our constitutional responsibility of policy making. Quoting from the opinion, "If teachers' unions are permitted to bargain on matters of education policy, . . . the autonomy of the School Boards could be severely eroded, and the effective control of educational policy shifted from the school boards to the teachers' unions".

The line between educational policy and financial control is merely semantic. If we allow educational policy to be bargained, we allow control of our budget to a union which is not accountable to the taxpaying public. We implore the legislature to respect the direct accountability of the School Board to the public.

Both state and federal statutes require that the ASD provide a full range of services to the physically and mentally handicapped, as well as assistance in becoming English language proficient to children who are non-English speaking or bilingual. But while these services are mandated, little or no financial assistance has been provided to support their implementations.

The new PL 94-142 mandates more services to the handicapped than ever before. The current foundation funding ratio of 1.5% is proving inadequate in two ways. It takes more than 1 1/2 times the amount of money to serve handicapped children, ages 3 - 20, as it does normal children, and while Anchorage has 43% of the student population in the state, it has a far greater percentage of special education children largely because of the physical and psychological facilities. State tuition charges do not cover the costs. Our projected increase in costs is between $900,000 and $1.7 million. Currently, the deficit is being borne by the local tax dollar. We suggest an increase in the ratio of funding to 1.75% or 2.0%.

In addition to federal mandates, A.S. 14.30.410 dictates a State program of bilingual education. The program is a necessary one in order to meet the needs of our diversified and cosmopolitan population in Anchorage. We are currently funding the bilingual program with $340,000 in local funds. We request that the State fund at least part of this expense under the foundation formula.

While Anchorage has made some financial headway, we are still penalized for the size of our district by the way in which average daily membership (ADM) is computed to create a foundation unit. We recommend a consistent formula applied more fairly throughout the state.

Parenthetically, we continue to urge the legislature to provide planning time and a phase-in period for any changes in Teachers Retirement System, Public Employees Retirement System or Workmen's Compensation which would impact our budget. Our budget is formalized and sent to the Assembly by April 1. Any legislative changes in the aforementioned programs, without lead time, must be borne by local tax revenues.

Anchorage is looking forward to a unique year of local property tax relief. Thanks to 100% funding of a bond indebtedness for past construction, we will realize approximately a $6 million increase in State funding. This, of course, is predicated upon full appropriation of the amount, which has not always been the case in the past.

This increase could translate into as much as 1.5 mill reduction to local property taxpayers except that we are obligated to fund both special education for the handicapped and bilingual from these same monies. Nevertheless we anticipate a reduction of approximately one mill.

The problem arises in Sec. 43.18.100(c) which clearly says the State may appropriate funds annually. Last year we were shorted over $450,000. Because our budget is finalized prior to the close of the legislature, any funding shortfall must be taken from our program budget.

Anchorage needs a commitment not only to the continuance of 100% bond retirement for school construction debt, but a commitment to full funding for that debt.

The Anchorage School District supports legislation which would deed state lands currently used for educational purposes to the Municipality. Public use may be insured by an automatic reversion clause should the Municipality no longer use the property for educational purposes. The legislation would eliminate costly yearly paperwork and rents.

Finally the Anchorage School Board continues to support the concept embodied in CSSB 30, currently in Senate Rules, which would increase parents' liability to $5,000 for vandalism done by their minor child.

ANCHORAGE ASSEMBLY

MEMORANDUM FOR: All Anchorage Legislators

FROM: Dave Rose

DATE: January 27, 1978

During the 1976 legislative session, Chapter 256 "An Act Relating to Motor Vehicles; and providing for an effective date" was enacted into law. This act amended AS 28.10 by adding a new section providing for an Annual Motor Vehicle Registration Tax.

The Municipality exercised its local option and substituted this tax in lieu of personal property taxes on automobiles and trailers.

It was believed that more tax revenue would accrue to the municipality's benefit because all owners would be paying the tax rather than a lesser number (many did not file tax forms and were not discovered). At the same time it was believed that the tax imposed would be less, on an individual basis, than the personal property tax because the sliding scale provided in AS 28.10.255 would seem to generate a lower amount due. Additionally, it was assumed that the auto registration tax would be an allowable deduction for Federal and State income tax purposes in the same manner as the personal property tax which it was being substituted for.

Problems have developed. My telephone has started to ring and I suspect that yours will also. The problem is twofold:

1. Some people pay more under this scheme than they did under the personal property tax option. This happens because older vehicles (5th year and over on the chart) pay a constant rate. Thus, an old clunker worth virtually nothing pays the new tax at $20.00 while it would have paid far less under the old tax. To make things worse, the new law violates the 30 mill rule which adequately applied under personal property tax. Eg: any vehicle worth less than $666.67 which is taxed the minimum $ 20.00 converts to a millage in excess of 30.

2. The personal property levy was income tax deductable whereas the new tax may not be deductable. I have seen an opinion from Anchorage IRS which indicates that that office is of the opinion that the tax may not be deducted. I hope legislative files can produce a contra opinion.

Allow me to recommend the following actions. Research the original proposed bill. I believe that it had a sliding scale beyond the five year point. Lower taxation in the $15-$10-$5 range might prevent future inequity. You might wish to investigate the approach that cuts the chart off at the five year point thus making the assumption that all vehicles older than five years have little value for taxation purposes. In any event, you may wish to consult with the municipality assessing department for comment and input. By copy of this letter I am advising the Assessor that you might contact him.

Secondly, seek resolution at the State level of the tax deduction question. Research the record to see what representations were made at the time the bill was introduced, heard in committee, amended, and passed. Perhaps the State could be an advocate for us with the IRS.

Sorry to be the bearer of bad news but thought you might wart to be kept abreast of the situation.

Sincerely,

Dave Rose

Amended: 1/12/78
Adopted: 1/12/78

RESOLUTION NO. 78-2

A RESOLUTION OF THE FAIRBANKS NORTH STAR BOROUGH REQUESTING LEGISLATIVE SUPPORT FOR INDICATED ISSUES OF PARTICULAR INTEREST TO THE BOROUGH

WHEREAS, the Fairbanks North Star Borough Assembly requests that the members of the 1978 Congressional Delegation of the State of Alaska support items of particular interest to the Borough, and

WHEREAS, some of these items relate to pending legislation in the House of Representatives and in the Senate, and

WHEREAS, other topics will require the introduction of legislation to accomplish our purpose;

NOW THEREFORE, BE IT RESOLVED by the Assembly of the Fairbanks North Star Borough that the following be considered as a list of issues of interest to the Fairbanks North Star Borough during the 1978 Legislative Session:

Flood Control - we request funding in the amount of $4,500,000 per AS 35.07.010 to fund the remaining State share to complete the Chena River Lakes Project.

Chena Wayside - we support conveyance of Chena Wayside Park facility to Borough provided necessary safety and health upgrading is done by the State.

Borough Land Selection - we support the concept of fixed acreage allocations to Borough similar to that contained in CSHB 133, we also strongly favor the cooperative selection provisions.

Alaska Railroad Connection to Midwest - we support the study of accelerated development of a rail connection to the midwest which will benefit consumers and business by opening new markets for both purchase and sale.

School Facility Maintenance - we support the concept that the responsibility for school facility maintenance, with the exception of that which can be performed by custodians, should rest with Borough General Government, who in turn may delegate this responsibility if it chooses to do so.

PASSED AND APPROVED this 12th day of JANUARY 1978.

NOTE ON HAINES BOROUGH SUPPORT FOR BOUNDARY COMMISSION RECOMMENDATION

This afternoon I spoke to Ray Menaker, Haines Borough Mayor, regarding the Local Boundary Commission recommendation in Senate Joint Resolution number 39.

Menaker said that the Haines Borough "very much" supported the recommendation.

According to Menaker, the area proposed for annexation is approximately 80 acres in size and contains a military tank farm. If this land were annexed, it would not affect the status of the tank farm.

Menaker said that the tank farm area is now an island completely surrounded on all sides by the Haines Borough.

The Haines Borough believes that the proposed annexation recommendation is not opposed by any Haines residents nor by the military. It does not plan to send a representative to the legislative hearings.

Ben Harding
2-6-78

STATE OF ALASKA

LOCAL BOUNDARY COMMISSION

Haines Borough Petition for
Annexation of Petroleum
Distribution Office Haines Depot

Statement of Decision

Whereas, on June 3, 1976, the Haines Borough submitted a petition to the Local Boundary Commission through the Department of Community & Regional Affairs in accordance with Title 29 of the Alaska Statutes requesting annexation of the area commonly known as the Department of Army Petroleum Distribution Office, Haines Terminal & Pumping Station; and

Whereas, the Haines Terminal & Pumping Station, identified as a U.S. Military Reservation, had been excluded from the boundaries of the Haines Borough at the time of the borough's incorporation in 1968, to remain as an exclusion until such time as the area was no longer subject to military reservation status; and

Whereas, the Department of the Army has decommissioned the Haines Petroleum Distribution Office facility and governmental control of the area has now been turned over to the General Services Administration; and

Whereas, the General Services Administration has indicated no objection to the inclusion of the area within the Haines Borough;

NOW THEREFORE, the Local Boundary Commission makes the following findings and enters its decision thereto:

The petition territory meets the regulatory standards for annexsation as follows:

19 Alaska Administrative Code 05.110(a)(1): The territory is entirely surrounded by the Haines Borough.

19 AAC 05.110(a)(4): The location and configuration of the territory, together with the improvements thereon, make the Haines Terminal & Pumping Station a likely location for future development should Haines be somehow tapped as a terminus for a gas line carrying Arctic gas.

19 AAC 05.110(a)(8): The Local Boundary Commission's action in this case formalizes an action called for in the Haines Borough incorporation document; namely, the inclusion within the Borough of the Haines facility once it was no longer subject to military reservation status.

19 AAC 05.120(1): The Local Boundary Commission finds that the Haines Borough has demonstrated that it is capable of and willing to extend its services and jurisdiction into the area.

On the basis of the foregoing, the Local Boundary Commission affirms its decision to include the Haines Depot territory within the Haines Borough with the resultant new boundary description eliminating the present military reservation exclusion.

STATE OF ALASKA

LOCAL BOUNDARY COMMISSION

JUNEAU, ALASKA

RECOMMENDATION FOR ANNEXATION OF TERRITORY TO THE BOROUGH OF HAINES, ALASKA

SUBMITTED JANAURY 18, 1978

RECOMMENDATION FOR ANNEXATION OF TERRITORY

TO THE

HAINES BOROUGH

WHEREAS, petitioner, the Haines Borough has requested that certain territory be annexed to the Haines Borough, to wit; the base proper of the Petroleum Distribution office, Haines Terminal and Pumping Station, an area within the Haines Borough presently excluded because of its former military reservation status; and

WHEREAS, subsequent to giving proper notice, the Local Boundary Commission conducted a public hearing in Haines on Thursday, June 23, 1977, to hear testimony of the public concerning the proposed annexation; and

WHEREAS, upon conclusion of the public hearing the Local Boundary Commission convened a public decisional meeting at which it reviewed the Haines Borough's petition, supporting brief and all testimony received prior to and during the June 23, 1977 public hearing; and

WHEREAS, the Local Boundary Commission has determined that the territory sought to be annexed meets the standards for annexation in that the subject territory is no longer a military reservation; and

WHEREAS, the exclusion of the subject territory serves no useful or rational purpose;

NOW THEREFORE, the Local Boundary Commission recommeds that pursuant to Article X, Section 12 of the Alaska Constitution and Alaska Statute 29.68.020, that the petition to annex territory to the Haines

Borough be approved and that the following be the official description of the boundaries of the Haines Borough:

IN accordance with Article X, Section 12 of the Alaska Constitution, this recommendation shall become effective forty-five days after presentation to the Legislature or at the end of the Session, whichever is earlier, unless disapproved by a resolution concurred in by a majority of the numbers of each House.

Beginning at Eldred Rock Light at Latitude 58°58.3'N and Longitude 135°13.2'W; thence in a straight line east to Mt. Nesselrode, Boundary Peak No. 98 at Latitude 58°57'44.96"W and Longitude 134°18'42.03"W; thence northerly at the Alaska-Canada Boundary line on a meander line to Mt. Bagit at Latitude 59°21'N and Longitude 135°02'W; thence due west on a straight line to a point in the center of Lynn Canal on Taiya Inlet at approximately Latitude 59°21'N and Longitude 135°22.5'W; thence northwesterly to Monument No. 124 on the Alaska-Canada Boundary at Latitude 59°44'N and Longitude 135°43'W; thence in a meandering westerly line following the Alaska-Canada Boundary to Mt. Harris; thence in a southeasterly and southerly manner along the Glacier Bay National Monument Boundary to a point due north of Porpoise Island Light at Latitude 58°22.1'N and Longitude 135°27.2'W; thence south to Porpoise Island at Latitude 58°19.1'N and Longitude 135°27.2'W; thence southeasterly to the southern tip of the Sisters Islands at Latitude 58°10'N and Longitude 135°15'W; thence southeasterly to Hanus Reef at Latitude 58°07.9'N and Longitude 134°59.8'W; thence north to a point midway between Lincoln Island on the east and the mainland on the west, at Latitude 58°30'N and Longitude 135°04.15'W; thence north paralleling the boundary of the City and Borough of Juneau to Eldred Rock Light the point of beginning, containing 2,620 square miles more or less.

Save and excepting therefrom: (1) the lands comprising Klukwan Indian Reservation established by Executive Order numbered 1764 dated April 21, 1913 and amended as to the boundaries thereof by Executive Order numbered 3673 dated May 15, 1922 and further amended by the Act of September 2, 1957, Public Law 85-271, 71 Stat. 596,

particularly described as follows: Lots 1, 2 and 3 of Section 32; all of the north one-half of Section 33, Lots 1, 2, 3 and 4 of the south one-half of Section 33; Lots 1 and 2 and the northeast one-quarter of the southwest one-quarter of Section 34, Township 28 South, Range 56 East, CRM Alaska (and Lots 2, 3 and 4 of Section 5, and Lots 1 and 9 of Section 6, Township 29 South, Range 57 East, Copper River Meridian).

STATE OF ALASKA

LOCAL BOUNDARY COMMISSION

In the Matter of the Petition for Annexation of Territory to the Haines Borough.	)	Docket No. 76-

PETITIONER'S BRIEF

COMES NOW Petitioner, HAINES BOROUGH, through the Borough attorney, and submits the following brief in support of the local government boundary addition to the Borough.

I

GEOGRAPHICAL REASONS

The area proposed by Petitioner for annexation is within the Haines Borough boundaries in Lutak Inlet, about four miles northerly of the City of Haines, and is a logical addition, now that Alaska law permits annexation of military reservations, pursuant to AS. 29.68.020.

II

ECONOMIC REASONS

The fuel storage and distribution system and the personnel employed therein are an integral part of the Haines' economy and have been for many years, since it was constructed in or about 1953 for supplying Eielson Air Force Base near Fairbanks with fuel. Now that the General Services Administration is trying to dispose of the facility it is all the more compelling to include it within the mainstream of Borough influence.

III

TRANSPORTATION REASONS

The area is four miles from Haines on the paved Lutak

Highway and is within one mile of the Haines Ferry Terminal.

It is respectfully requested that the Haines Borough Petition be granted.

DATED: May June 3 1976 in Haines, Alaska.

Re: Petersburg Annexation Proposal
L.B.C. Supplemental Information

Dear Mr. Simpson:

This office as legal counsel for the City of Petersburg has been requested by members of the Local Boundary Commission to furnish additional data to supplement the hearing record. This letter constitutes a best-efforts basis to furnish that information and it should be mentioned that since a quorum of members were physically present for the hearing, the City of Petersburg waives any objection to the participation in the deliberations by absent member Sheila Gallagher conditioned on her reading of the documentation and listening to the tapes of proceedings at the hearing.

1. Lost School Revenue. The $47,000 figure submitted by the City of Petersburg as revenue lost from the State for payment of non-resident student tuition is accurate. The figure of $53,000 mentioned by the protestants at the hearing is based on the last school year (when enrollment was slightly up), coupled with failure to consider that five of the non-resident students are from Kupreanof in which case the non-resident payment from the State would continue in any event.

2. Sales Tax Revenues. The afternoon of January 10, I resolved to follow through the best I could on the request for additional sales tax data. Unfortunately, I report that my worst suspicions about obtaining hard information were confirmed. I instructed Patty Curtiss, secretary to

the City Manager, to call out to all of the businesses and ascertain an estimate of gross sales tax revenues from each of them assuming that they were subject to the City's jurisdiction and imposing a 5% sales tax with a $1,000 transactional ceiling. She reported back to me mid-morning of January 11, 1978 and advised that her responses fell into three categories. The first category was the "no contacts" where she was unable to contact the proprietor. The second and largest category was composed of those businesses who said they would call back later and one who requested that Patty call them back later. The third category, including the liquor store, flatly refused to divulge any information. The City of Petersburg is not in a position to obtain from the Alaska Department of Revenue the gross revenue figures reported by the various enterprises since that is privileged information. I am not sure that that would do too much good anyway, because I doubt if all of them file business license returns. For example, and the only enterprise on which I can furnish concrete data, specifically the Petersburg Consumer's Co-op, does not file a business license return notwithstanding that our litigation with them over the sales tax revealed that they order four or five shipments per year varying in range from $14,000 to $24,000 each. The lumber mill reported that it had no retail sales. The proprietors of the building stores were in the "call-back" category, and Sonny Hicks the owner of the Beachcomber could not be located by Patty. We are unable to furnish any meaningful data on the volume of business in the territory outside of the City to justify either an upward or downward adjustment in the original sales tax revenue estimate of $149,000.

3. Property Valuation. Taxes on the total real property were calculated at a 7 mill levy against $6,790,000 on real property and $250,000 on personal property. As indicated in the earlier submitted "Affidavit re Information Sources", the real property was estimated by the City Clerk's taking and updating an appraisal submitted by Mr. Erroll Simmons in 1975. She used an inflation factor of 5% per year. The personal property valuation was predicated on an estimate of equipment owned by the two major logging companies, Reed Brothers and Olsen & Sons, Ltd. The personal property valuation is conservative. No attempt was made to adjust the real property valuation for senior citizen exemptions and leases of government property which would now be subject to tax.

4. Bonded Indebtedness. The City of Petersburg's figures submitted on a separate sheet reciting the general obligation and revenue bond indebtedness are accurate. There have been no bond issues of either kind since June, 1977.

5. Financial Data Generally. To the extent that the City of Petersburg is remiss in submitting financial data to the Commission respecting the fiscal repercussions of the proposed annexation, the broad brush can be attributed to the fact that the City of Petersburg does not have a finance director, and secondly and more importantly, to me as the City's attorney who did not instruct the City Administration to be prepared on that issue any further than the documentation submitted. The reasoning for that was in the three annexation matters which I have previously participated or followed, such data was not requested, nor was I of the opinion that the financial viability of an annexation proposal was one of the standards promulgated in 19 AAC 05.010 or the Alaska Constitution. Inasmuch, however, as an annexation proceeding is a quasi-legislative or political act in contrast to a judicial proceeding, the Commission's concern on that issue is at least understandable.

6. Start-up Costs. The Commission is apparently concerned about the possibility that cost of extending general services circa March 1978 when the Alaska Legislature would approve any proposal would create a financial drain on the City of Petersburg's general fund which was unforeseen, unbudgeted, and could not be made up until the 1979 tax levy. I am strongly inclined to agree with that assessment about a short-term negative cash flow but similarly inclined to discount its magnitude predicated on the knowledge that many of the general services, including extra-territorial fire, police protection and ambulance service have been provided heretofore. In the event of annexation approval and the incurrence of a deficit later in calendar year 1978 and the first part of 1979, the City may issue bond anticipation notes at the time of incurring the deficit according to AS 29.58.070. Alternatively, the City of Petersburg, being a home-rule municipality is not limited to the conventional financing procedures enumerated in the statutes and Sec. 14.1(a)(3) of the City Charter expressly authorizes the issuance of revenue or tax anticipation notes. Moreover, that might not even be necessary since the Legislature's prospective approval of the annexation would be known by the end of February 1978, there is ample time for the City to accomodate any additional expenses foreseen as stemming from the additional services in the annexed area prior to formulation of its budget and adoption of such budget by the June 15 date mandated by Statute.
